BIOL 390 Undergraduate Internship Seminar (1) NW Crowe Weekly workshop to prepare students for off-campus research internships. Required for students planning to take BIOL 399. Prerequisite: BIOL 220. Offered: AWSpS.

BIOL 397 Preparing Avian Research Specimens (5) NW Preservation of avian study skins, skeletal specimens, extended wings, and tissues for genetic analyses. Standards required for deposit of specimens in research collections. Examines needs for continued collecting, uses of specimens in discovering new knowledge, and impacts of collecting on wild populations. Prepares students for participation in expeditions. Offered: A.

BIOL 399 Biology Internship Program (3-5, max. 15) NW Crowe Coordinated internship in a biology-related field. Registration restricted to students already matched with an internship opportunity in BIOL 390 or by instructor approval. Students must complete at least a combined 10 credits in BIOL 391-399 over consecutive quarters. Credit/no credit only. Prerequisite: BIOL 390. Offered: AWSpS.

BIOL 401 Advanced Cell Biology (3) NW Bakker, Crowe, Hille, Wakimoto Selected topics in molecular cell biology. Strong emphasis on reading and interpreting primary research literature. Writing intensive course. Prerequisite: BIOL 355.

BIOL 402 Cell Biology Laboratory (3) NW Investigative projects using modern molecular methods (restriction enzyme digestion, blotting, hybridization, immunocytochemistry, density gradient centrifugation, electrophoresis) and other methods currently used to study plant and animal cells, nucleic acids, and proteins. Includes practice in scientific style writing. Prerequisite: BIOL 401, which may be taken concurrently. Offered: ASp.

BIOL 403 Comparative Vertebrate Histology (5) NW Micropreparative anatomy of vertebrates. Emphasis on mammals. Light microscopy and interpretation of ultrastructure. Functions of basic tissue types and organs as related to structure. Prerequisite: BIOL 220. Offered: irregularly.

BIOL 404 Cellular and Molecular Biology of Human Disease (3) NW Concepts of cellular and molecular biology as applied to human disease. Emphasis on current experimental approaches to investigate disease mechanisms and the contributions of model systems. Topics selected in cancer biology, viral induced disease, gene therapy. Prerequisite: either BIOL 202 or BIOL 220; either BIOL 405, BIOL 440, BIOL 355, BIOL 401, GENET 371, or GENET 372. Offered: A.

BIOL 406 Insect Behavior (4) NW O'Donnell Explores complex and diverse behaviors in insects and related invertebrate animals. Overview of important lineages of insects and major behavioral traits. Examines how insect behavior both constrains behavior and provides evolutionary opportunities. Prerequisite: either 2.0 in BIOL 180, 3.5 in PSYCH 200, or 2.0 in PSYCH 300. Offered: jointly with PSYCH 406.

BIOL 407 Plant Nuclear and Cytoplasmic Genetics (3) NW Bendich, Corral Covers genetic aspects specific to plants and algae, including chromosome structure, genome mapping, transposon biology, genes for floral and vegetative development, flowering, ploidy levels, and cytoplasmic genetics. Prerequisite: either BIOL 101, BIOL 200, or BIOL 203; either GENET 371, GENOME 371, GENET 372, or GENOME 372.

BIOL 408 Mechanisms of Animal Behavior (4) NW Beecher, Brenowitz Comparative exploration of physiological and perceptual mechanisms that control behaviors necessary for survival and reproduction in animals. Model systems discussed include animal communication, mate choice, escape behavior, learning and memory, orientation, biological rhythms, foraging behavior. Prerequisite: either 2.0 in BIOL 180, or 3.5 in PSYCH 200, or 2.0 in PSYCH 300. Offered: jointly with PSYCH 408.

BIOL 409 Geobiology (5) NW Biological bases of social behavior, emphasizing evolution as a paradigm. Emphasizes how to think like an evolutionary biologist, especially with regard to interest conflict. Topics are individual versus group selection, kin selection, altruism, mating systems, sexual conflict, alternate reproductive strategies, and parent/offspring conflict. Prerequisite: either 2.0 in BIOL 180, or 3.5 in PSYCH 200, or 2.0 in PSYCH 300. Offered: jointly with PSYCH 409.

BIOL 410 Circadian Rhythms and Clocks (5) NW A laboratory-based course where students choose one organism (rodent, Drosophila or plants) on which they carry out a research project throughout the quarter. Lectures cover the basic theoretical background and discussion seminars are based on journal articles directly related to the students' research projects. Prerequisite: BIOL 350 or BIOL 355. Offered: A.

BIOL 411 Developmental Biology (4) NW Schubiger, Swalla Embryology and subsequent development of vertebrate and invertebrate animals, including Xenopus, mammals, chicks, Drosophila, echinoderms. Morphological changes in developing animals; experimental analysis of developing systems; underlying genetic and biochemical regulation of development. Prerequisite: either BIOL 355 or BIOL 401. Offered: AW.

BIOL 412 Developmental Biology Laboratory (3) NW Normal development of living embryos (frog, chick, insect, echinoderm). Internal anatomy of embryos on prepared slides. Comparisons between vertebrate and invertebrate animals. Scientific style reports on experiments. Prerequisite: BIOL 411, which may be taken concurrently. Offered: irregularly.

BIOL 413 Methods and Problems in Development (3) NW Schubiger Special topics in development. Integrating classical and current approaches. Developmental genetics, experimental embryology, molecular mechanisms of developmental regulation, and gene function in cell determination and cell differentiation in animal systems. Prerequisite: BIOL 411. Offered: irregularly.

BIOL 414 Molecular Evolution (5) NW S. Edwards Survey of empirical approaches to the study of molecular evolution and ecology, drawing on examples from a variety of taxa and the recent literature. Topics include DNA sequencing and systematics, fingerprinting approaches in behavioral ecology, and adaptive evolution at the molecular level. Prerequisite: BIOL 354 or BIOL 355. Offered: jointly with GENOME 414.

BIOL 415 Evolution and Development (3) NW Swalla Analysis of intertwined developmental and evolutionary processes studied through evolution of developmental genes, proteins, and expression patterns in different organisms. Includes reading and analyzing implications for ecology evolution, and human disease. Prerequisite: either BIOL 354 or BIOL 355. Offered: irregularly.

BIOL 416 Molecular Genetics of Plant Development (3) NW Comai, Tori Plant growth and development examined in molecular-genetic terms. Covers mutation, dominance, redundancy, epistasis, and key technologies for discovery of gene function as well as embryogenesis, meristem formation, flower development, and other problems in plant development. Prerequisite: BIOL 220, GENOME 371.

BIOL 425 Advanced Plant Physiology and Development (3) NW Expanded coverage of plant growth, nutrition, metabolism, and development. Cannot be taken for credit if BIOL 325 already taken. Prerequisite: either BIOL 102, BIOL 162, BIOL 203, or BIOL 220. Offered: concurrent with BIOL 325; W.

BIOL 426 Advanced Plant Physiology Laboratory (3) NW Expands laboratory experiments on the growth, nutrition, metabolism, and development of plants. Cannot be taken for credit if BIOL 326 already taken. Prerequisite: BIOL 325 or BIOL 425, which may be taken concurrently. Offered: concurrent with BIOL 326.; Sp.

BIOL 427 Biomechanics (4) NW Daniel Physical biology emphasizing a mechanical approach to ecological, evolutionary, and physiological questions. Basic principles underlying fluid and solid mechanics to explore responses of animals to flows, loads, and motions. Recommended: either BIOL 102, BIOL 162, BIOL 203, or BIOL 220. Offered: W, even years.

BIOL 428 Techniques for Mathematical Biology (3) NW Equips students to use, rather than prove, many applied mathematics techniques essential in mathematical biology. Includes instruction to use symbolic computation software (Mathematica, Macsyma) to do by computer the kind of mathematical formula manipulation that mathematicians formerly performed by hand. Recommended: calculus, linear algebra. Offered: irregularly.
BIOL 430 Marine Zoology (5) NW Strathmann
Survey of groups of invertebrate animals present in the San Juan Archipelago; natural history, functional morphology, ecology, distribution, habitat, adaptation, trophic interrelationships, and evolution. Permission of Director; Friday Harbor Laboratories required for research abroad. Recommended: 20 credits in biological sciences; corequisite: BIOL 445. Offered: at Friday Harbor Laboratories; Sp.

BIOL 432 Marine Invertebrate Zoology (9) NW Comparative morphology and biology of marine invertebrates with emphasis on field and laboratory studies. Representatives of all major and most minor phyla are collected, observed alive, and studied in detail. Not open for credit to students who have taken 433 or 434. Recommended: 20 credits in biological sciences. Offered: at Friday Harbor Laboratories; S.

BIOL 433 Marine Ecology (5) NW Ruesink
Study of marine ecological processes such as recruitment, disturbance, competition, and predation, and their effects on the structure and diversity of marine communities. Weekend field trips to local intertidal habitats required. Prerequisite: either BIOL 356, BIOL 472, or a minimum grade of 3.4 in BIOL 180. Offered: Sp, odd years.

BIOL 434 Invertebrate Zoology (5) NW Comparative biology and morphology of invertebrates. Laboratory work emphasizes structures and functions. Emphasizes annelid and related worms, mollusks, and arthropods. Not open to students who have taken 430 or 432. Prerequisite: either BIOL 102, BIOL 202, or BIOL 220. Offered: Irregularly.

BIOL 435 Biology of Eukaryotic Microbes (5) NW Introduction to comparative biology of eukaryotic microbes known as protists (algae, certain fungi, and protozoa). Emphasis on the structure, reproductive characteristics, classification, phylogeny, physiology, development, biodiversity, and ecological roles of these microbes. Emphasis on examples most commonly used in contemporary biological research. Prerequisite: either BIOL 102, BIOL 162, BIOL 180, or BIOL 203. Offered: Irregularly.

BIOL 436 Advanced Systematics (5) NW Analysis of characters and examination of evolutionary principles as they relate to systematic studies in vascular plants. Offered: Irregularly. Prerequisite: BIOL 354.

BIOL 437 Origins of Our Modern Floras (5) NW Evolution and biogeographic development of modern forest taxa and associations. Late Cenozoic forests (last 60 million years) of western North American environments, emphasizing geologic and climatic shifts that have shaped temperate and tropical vegetation. Three required weekend field trips. Prerequisite: either BIOL 117, BIOL 317, or BOTANY 113 and either BIOL 102, BIOL 162, BIOL 180, or BIOL 203. Offered: Irregularly.

BIOL 438 Biological Monitoring and Assessment (5) NW Karr Explores the technical questions (recommended: 20 credits in biological sciences and logical reasoning, pain relevance, and legal basis for tools — existing and needed — to assess ecological health. Prepares students to see the biological components of ecological systems in diverse ways. Offered: jointly with FISH 438.

BIOL 440 General Mycology (5) NW Ammirati
General survey of the fungi with emphasis on life cycles, structure, physiology, economic importance. Prerequisite: either BIOL 102, BIOL 182, BIOL 190, or BIOL 203. Offered: W.

BIOL 441 Morphology and Anatomy of Land Plants (5) NW Comparative morphology and anatomy of land plants. Derivation of morphological structures and basis for current classification schemes examined using living and fossil organisms. Laboratories emphasize live plants native to the Pacific Northwest. Prerequisite: either BIOL 102, BIOL 162, BIOL 203, or BIOL 220; recommended BIOL 317. Offered: A.

BIOL 442 Mushrooms and Related Fungi (5) NW Ammirati General biology, ecology, and classification of mushrooms, poly sacs, puffballs, and other related basidiomycetes. Emphasis on Pacific Northwest species. Prerequisite: either BIOL 102, BIOL 162, BIOL 203, or BIOL 220; recommended BIOL 440. Offered: S.

BIOL 443 Natural History of Mammals (5) NW Kenagy Field, lecture, and laboratory course introducing mammals in a general biological context, emphasizing habits, evolution, behavior, morphology, and adaptation to the environment. Includes required weekend field trips, for which students may be required to share a portion of transportation costs. Prerequisite: either BIOL 354 or BIOL 356. Offered: A.

BIOL 444 Natural History of Birds (5) NW Wingfield Field, lecture, and laboratory study of birds framed in biological theory rather than taxonomy. Breeding systems, brood parasitism, appearance, molt, migration, orientation, social behavior, song, and flight are emphasized. Includes Saturday and weekend field trips for which students are required to share a portion of transportation costs. Prerequisite: BIOL 220; recommend BIOL 350 or BIOL 356. Offered: Irregularly.

BIOL 445 Marine Botany (8) NW Survey of plants represented in marine environments; natural history; ecology, distribution, habit, adaptation, and trophic interrelationships. Prerequisite: either BIOL 102, BIOL 162, BIOL 203, or BIOL 430/zooll 430, which may be taken concurrently. Offered: at Friday Harbor Laboratories; Sp.

BIOL 446 Biology of Algae (5) NW Cattolico, Waaland Study of major algal groups emphasizing form, function, reproduction, distribution, biodiversity, and ecological roles in coastal, oceanic, and global ecosystems. Topics include classification, cellular and organismal features, phylogeny, and evolution of major algal groups. Emphasizes economically useful and ecologically important alga. Prerequisite: either BIOL 102, BIOL 162, or BIOL 203. Offered: Sp.

BIOL 451 Invertebrate Paleontology (5) NW Ward Important larger invertebrate groups; morphology, classification, stratigraphic distribution, evolution, paleoecology. Offered: jointly with ESS 451; W.

BIOL 452 Vertebrate Biology (5) NW The biology of vertebrate animals, emphasizing their diversity, adaptations, and evolutionary history. Introduces aspects of behavior, physiology, morphology, and ecology that emerge from the comparative study of vertebrates. Laboratory includes local field trips, films, and introduction to regional vertebrate fauna. Prerequisite: either BIOL 102, BIOL 162, BIOL 180, or both BIOL 202 and BIOL 203. Offered: S.

BIOL 453 Comparative Anatomy of Vertebrates (5) NW Comparison of the structure of vertebrate organ systems: integument, skeletal, muscle, digestive, respiratory, cardiovascular, urinary, and reproductive, with an emphasis on evolutionary trends. Prerequisite: BIOL 350. Offered: W.

BIOL 454 Entomology (3) NW Biology of terrestrial arthropods, with emphasis on insects. Structure, classification, physiology, and ecology of insects. Interrelationships of insects and man. Prerequisite: either BIOL 102, BIOL 162, BIOL 180, or both BIOL 202 and BIOL 203. Offered: W.

BIOL 455 Entomology Laboratory (2) NW Structure and function of arthropods, with emphasis on insects. Field studies and taxonomy of important insect groups. Students may be required to share a portion of the transportation costs of field trips. Prerequisite: BIOL 454 which may be taken concurrently. Offered: Sp.

BIOL 456 Vegetation of Western Washington (5) NW del Moral Vegetation of western Washington, including mature, seral, and weedy vegetation. Recognition of landscape patterns, sight identification of common indicator species, classification of major community types, and uses of native species in landscape design. Four weekend field trips required. Prerequisite: either BIOL 117 or BIOL 317. Offered: even years; Sp.

BIOL 459 Developmental Neurobiology (3) NW Bosma Invertebrate and vertebrate examples illustrate the mechanisms used in constructing nervous systems. Focus on the cellular and molecular mechanisms that underlie questions about the basis of neuronal diversity, axonal pathfinding and target recognition, synaptogenesis, and activity-dependent plasticity. Prerequisite: either BIOL 350 or BIOL 355. Offered: W, even years.

BIOL 460 Mammalian Physiology (3) NW Principles of mammalian physiology with special emphasis on the cardiac, respiratory, renal, and gastrointestinal systems taught at the organ and organ systems level. Prerequisite: BIOL 350. Offered: Sp.

BIOL 461 Neurobiology (3) NW Bosma, Perkel Broad examination of integrative mechanisms in the central nervous system function, with emphasis on sensory processing, plasticity, and control of behavior. Examples are taken from a variety of animal groups. Prerequisite: BIOL 350; either PHY 115 or PHY 122. Offered: W, even years.

BIOL 462 Advanced Animal Physiology (3) NW Huey, Wenderoth Physiology at levels of organisms and behavior, organ systems, and cells — an evolutionary and integrative perspective. Organismal physiology: metabolism, temperature, locomotion, osmoregulation, respiration, circulation, digestion. Prerequisite: either BIOL 202 or BIOL 220; either BIOL 350 or BIOL 460; either CHEM 152, CHEM 155, CHEM 160, CHEM 162, CHEM 164, CHEM 165, or CHEM 220; either PHY 114 or PHYS 121. Offered: A.
BIOL 463 Advanced Animal Physiology Lab (3) NW Huey, Wendtson Experimental design and techniques, data analysis, written reports. Original project labs and experiments in physiology. Prerequisite: BIOL 462, which may be taken concurrently. Offered: A.

BIOL 464 Invertebrate Endocrinology (3) NW Survey of endocrine mechanisms used by invertebrate groups to regulate homeostasis, growth, reproduction, and behavior. Special emphasis given to invertebrate model systems that provide unique insights into basic biological processes. Prerequisite: either BIOL 350 or BIOL 355; recommended BIOL 405 or BIOL 411. Offered: Sp, even years.

BIOL 465 Comparative Endocrinology (3) NW Wingfield Hormonal integration of living processes at all levels in animals: molecules, cells, organs, organisms, populations. Prerequisite: BIOL 350. Offered: A.

BIOL 466 Comparative Endocrinology Laboratory (2) NW Wingfield A broad introduction to endocrine techniques with appropriate experiments to accompany and enlarge on material presented in BIOL 465. Prerequisite: BIOL 465, which may be taken concurrently. Offered: A.

BIOL 467 Comparative Animal Reproduction (3) NW Ramenofsky, Wingfield Reproductive mechanisms, environmental influences on reproductive endocrinology, physiology, behavior, ecology of vertebrates. Discussions extend from organismal to cellular level, and focus on diversity of reproductive patterns among vertebrates. Prerequisite: BIOL 350; recommended: BIOL 465. Offered: Sp.

BIOL 468 Comparative Animal Reproduction Laboratory (3) NW Ramenofsky, Wingfield Laboratory and field studies on animal reproduction involving endocrinology, anatomy, behavior, and ecology. Accompanies, supple- ments, and extends material presented in 467. Prerequisite: BIOL 467, which may be taken concurrently. Offered: Sp.

BIOL 469 Experiments in Animal Physiology (2) NW Riddiford, Truman Experimental design and techniques, data analysis, written reports. Experiments in integrative physiology. Prerequisite: BIOL 350; either PHYS 115 or PHYS 122. Offered: irregularly.

BIOL 470 Biogeography (4) NW Analysis of historical and ecological determinants of current and past distributions of organisms. Integrates techniques developed by taxonomists, paleontologists, geologists, evolutionists, ecologists, and biogeographers to elucidate relationships between geographical distributions and continental drift, ecological interactions, climate, and dispersal abilities of organisms. Not available for credit if credit has previously been given for ZOOL 475. Recommended: one year college biology; background in ecology and evolution. Offered: irregularly.

BIOL 471 Plant Ecology (5) NW Basic concepts of plant ecology, including studies of the environment, plant-environment interactions, populations, communities, and ecosystems. Laboratory includes one weekend field trip, laboratory and greenhouse experiments, and an introduction to ecological problem solving. Prerequisite: either BIOL 102, BIOL 162, BIOL 180, or BIOL 203. Offered: irregularly.

BIOL 472 Community Ecology (4) NW Explores the complexity of biological communities and interactions of plant, animal, and microbes in marine, freshwater, and terrestrial ecosystems. Promotes synthetic and integrative thinking in the environmental sciences through the study of theoretical and empirical issues and original research data. Prerequisite: BIOL 356; recommended: solid foundation in math and physics. Offered: irregularly.

BIOL 473 Limnology (3) NW Schindler Ecology, conservation and management of inland aquatic ecosystems. Explores interactions among biological, chemical and physical features of lakes and other aquatic habitats. Prerequisite: either BIOL 102, BIOL 162, BIOL 180, or BIOL 203. Offered: jointly with FISH 473; A.

BIOL 474 Limnology Laboratory (2) NW Schindler Examination of biota of fresh waters, survey of limnological methods, analysis of data, and writing of scientific papers. Prerequisite: BIOL 473, which may be taken concurrently. Offered: jointly with FISH 474; A.

BIOL 475 Animal Migration (3) NW Under- graduate seminar on evolution, ecology, behavior, and physiology of migration. Student presents a seminar and leads class discussion on a selected topic. Prerequisite: either BIOL 102, BIOL 162, BIOL 203, or BIOL 220; recommended: course in physiology, ecology, or animal behavior.

BIOL 476 Conservation Biology (5) NW Boersma Explores ecological, managerial, economic, and ethical concepts affecting survival of species. Applications of ecology, biogeo- graphy, population genetics, and social sciences for the preservation of species in the face of widespread global habitat modification, destruction, and other human activities. Prerequisite: either BIOL 102, BIOL 162, BIOL 180, or BIOL 203. Offered: AS.

BIOL 477 Marine Conservation (3) NW Terrestrially based concepts of conservation biology applied to marine systems. Human activities affecting marine environment including fishing and pollution; influence of legal and cultural frameworks; and ecosystem management. Prerequisite: either BIOL 102, BIOL 162, BIOL 180, or BIOL 203. Offered: irregularly.

BIOL 478 Topics in Sustainable Fisheries (3, max. 9) I&S/NW Parrish Seminar series featuring local, national and internationally known speakers in fisheries management and conservation. Case studies. Conservation/ restoration in practice. Pre-seminar discussion section focusing on select readings. Final paper. Topics may include harvest management, whaling, by-catch, salmon, marine protected areas, introduced species, citizen action, co- management, and marine ethics. Offered: jointly with ENVIR/FISH 478; odd years; W.

BIOL 479 Alpine Plant Ecology (5) NW Structure of plant communities in alpine regions of the Pacific Northwest. Characteristics of physical environment which influence species adaptation and distribution. Influence, impact of humans and criteria for preservation and/or management of alpine areas. Three weekend field trips required. Prerequisite: either BIOL 102, BIOL 162, BIOL 180, or BIOL 203. Offered: irregularly.

BIOL 480 Field Ecology (4) NW Boersma Field projects examining ecological and behavioral topics such as foraging and social behavior, species interactions, and structure of terrestrial and aquatic communities. Two weekend fieldtrips required. Prerequisite: either BIOL 356 or BIOL 472. Offered: Sp.

BIOL 482 Microscopy and Photography for Biologists (3) NW Waaland Principles and practice of light microscopy, photomicrography, and scientific photography. Illumination systems, bright field, phase-contrast, dark field, fluorescence and other microscopical techniques. Photographic and video image recording of microscopic and macroscopic scientific specimens. Offered: irregularly.

BIOL 484 Senior Seminar in Evolution and Systematics (1-3, max. 9) NW Supervised readings and group discussion. Prerequisite: BIOL 354.

BIOL 485 Senior Seminar in Cellular, Molecular and Developmental Biology (1-3, max. 9) NW Supervised readings and group discussion. Prerequisite: BIOL 355.

BIOL 486 Senior Seminar in Ecology (1-3, max. 9) NW Supervised readings and group discussion. Prerequisite: BIOL 356.

BIOL 487 Senior Seminar in Conservation Biology (1-3, max. 9) NW Supervised readings and group discussion. Recommended: one upper division course in ecology or conservation biology.

BIOL 488 Senior Seminar in Physiology (1-3, max. 9) NW Supervised readings and group discussion. Prerequisite: BIOL 356.

BIOL 489 Senior Seminar in Plant Biology (1-3, max. 9) NW Supervised readings and group discussion. Offered: seminar emphasizing plant biology.

BIOL 490 Undergraduate Seminar (1-3, max. 6) NW Supervised readings and group discussion of selected topics of broad biological significance. Prerequisite: BIOL 102, BIOL 162, BIOL 203, or BIOL 220.

BIOL 491 Special Topics in Biological Science for Teachers (1-9, max. 9) NW Study of selected areas of biology. Designed to enhance the skills and background of K-12 teachers. Credit/no credit only. Recommended: teaching experience.

BIOL 492 The Teaching of Biology (2) Basic course in the teaching of biology in the secondary school. Designed to help preservice teachers identify useful laboratory techniques, materials, and content for the teaching of pre-college biology. Special attention to current issues in biology education. Required for biology students in Teacher Certification Program.

BIOL 493 Study Abroad — Advanced Biology (1-15, max. 15) NW For participants in UW study abroad program. Specific content varies and must be individually evaluated. Credit does not apply to major requirements without approval.

BIOL 496 Peer Teaching Assistants in Biology (1-5, max. 10) Direct experience in the classroom, typically teaching a lab section of BIOL 100. Peer Teaching Assistants attend lectures and weekly preparation meetings and gain in-depth background on the subject material as well as training in teaching techniques and
BIOL 497 Special Topics in Biology (1-5, max. 10) NW.
BIOL 498 Library Research (1-5, max. 10).
BIOL 499 Undergraduate Research (1-20, max. 20).
BIOL 500 Topics in Biology (1-3, max. 16). Offered: Sp.
BIOL 505 Problems in Biological Instruction (1-3, max. 3).
BIOL 510 Seminar in Mathematical Biology (1-3, max. 15) Bergstrom, Daniel, Grunbaum, Kot, Odell, Thompson Seminar on a topic of current interest in mathematical biology. Graduate status required, or permission of instructor for undergraduates.
BIOL 511 Topics in Mathematical Biology (1-3, max. 15) Discussion of current topics in mathematical biology. Graduate status required, or permission of instructor for undergraduates.
BIOL 520 Departmental Seminar (1, max. 18) Credit/no credit only. Offered: AWSp.
BIOL 533 Advanced Invertebrate Zoology (9) Invertebrate fauna of the San Juan Archipelago. Topic changes from year to year. Individual research projects are emphasized. Prerequisite: course in invertebrate zoology and permission of Director of Friday Harbor Laboratories. Offered: at Friday Harbor Laboratories; SpS.
BIOL 536 Comparative Invertebrate Embryology (9) Diversity in developmental patterns in major marine taxa. Analysis of evolutionary changes in development. Emphasis on observation of live embryos and larvae. Prerequisite: permission of Director of Friday Harbor Laboratories; recommended: courses in invertebrate zoology and developmental biology. Offered: at Friday Harbor Laboratories; Sp.
BIOL 538 Advanced Invertebrate Physiology (9) General and comparative aspects of nerve and muscle physiology with particular emphasis upon neuronal control of behavior, neuronal interactions, and other advanced topics determined by visiting faculty. Extensive laboratory experience, including intracellular and extracellular stimulating and recording techniques. Offered: at Friday Harbor Laboratories; Sp.
BIOL 539 Marine Phycology (9).
BIOL 540 Seminar in Molecular, Cellular, and Developmental Biology (1-3, max. 15) Weekly discussions of past and current scientific literature in cell, molecular, and/or developmental biology, review of the state of the field, and presentation of research results. Discussions may cover the full breadth of the discipline or focus on selected topics. Graduate status required, or permission of instructor for undergraduates.
BIOL 541 Topics in Molecular, Cellular, and Developmental Biology (1-3, max. 15) Focused discussion of on-going cell, molecular, or developmental biology research occurring in the instructor’s laboratory. Graduate status required, or permission of instructor for undergraduates.
BIOL 542 Analysis of Development (1-3, max. 15) Analysis of structural, physiological, and molecular levels of developmental processes, including gametogenesis, fertilization, cell and tissue movements, induction, and cytodifferentiation. Graduate standing or permission of instructor.
BIOL 546 Experimental Design in Cell Biology (1.5) Wakimoto, Wright, Hille, Cooper Focuses on experimental design in cell biology. A topic of current research interest is covered in depth in order to follow a line of investigation and critically evaluate the strengths and limitations of various experimental strategies. Offered: jointly with CONJ 536; W.
BIOL 550 Seminar in Evolution and Systematics (1-3, max. 15) Weekly discussions of past and current scientific literature in evolution and/or systematics, reviews of the state of the field, and presentation of research results. Discussions may cover the full breadth of the discipline or focus on selected topics. Graduate status required, or permission of instructor for undergraduates.
BIOL 551 Topics in Evolution and Systematics (1-3, max. 15) Focused discussion of on-going research in evolution and/or systematics occurring in the instructor’s laboratory. Graduate status required, or permission of instructor for undergraduates.
BIOL 552 Advanced Evolution (3) Successful analytical approaches to understanding evolutionary patterns and the processes that generate them, examined by using a wide array of empirical and theoretical tools. Survey of how theory, modeling, and statistics can be applied to observations and experiments in evolutionary biology. Graduate standing required.
BIOL 555 Seminar in Physiology (1-3, max. 15) Graduate standing required, or permission of instructor for undergraduates.
BIOL 560 Seminar in Ecology (1-3, max. 15) Weekly discussions of past and current scientific literature in ecology, reviews of the state of the field, and presentation of research results. Discussions may cover the full breadth of the discipline or focus on selected topics. Graduate status required, or permission of instructor for undergraduates.
BIOL 561 Topics in Ecology (1-3, max. 15) Focused discussion of on-going research in ecology occurring in the instructor’s laboratory. Graduate status required, or permission of instructor for undergraduates.
BIOL 562 Advanced Ecology (3) Successful analytical approaches to understanding ecological patterns and the mechanisms that generate them, examined by using a wide array of empirical and theoretical tools. Applying theory, modeling, and statistics to empirically derived data to providing insight and solutions to key environmental problems. Graduate standing required.
BIOL 570 Seminar in Conservation Biology (1-3, max. 15) Weekly discussions of past and current scientific literature in conservation biology, reviews of the state of the field, and presentation of research results. Discussions may cover the full breadth of the discipline or focus on selected topics. Graduate status required, or permission of instructor for undergraduates.
BIOL 571 Topics in Conservation Biology (1-3, max. 15) Focused discussion of on-going research in conservation biology occurring in the instructor’s laboratory. Graduate status required, or permission on the instructor for undergraduates.
BIOL 572 Science and Environmental Policy (3-5, max. 5).
BIOL 580 Seminar in Physiology (1-3, max. 15) Weekly discussions of past and current scientific literature in physiology, reviews of the state of the field, and presentation of research results. Discussions may cover the full breadth of the discipline or focus on selected topics. Graduate status required, or permission of instructor for undergraduates.
BIOL 581 Topics in Physiology (1-3, max. 15) Focused discussion of on-going research in physiology occurring in the instructor’s laboratory. Graduate status required, or permission of instructor for undergraduates.
BIOL 590 Seminar in Organismal Biology (1-3, max. 15) Weekly discussions of past and current scientific literature in organismal biology, reviews of the state of the field, and presentation of research results. Discussions may cover the full breadth of the discipline or focus on selected topics. Graduate status required, or permission of instructor for undergraduates.
BIOL 591 Topics in Organismal Biology (1-3, max. 15) Focused discussion of on-going research in organismal biology occurring the the instructor’s laboratory. Prerequisite: graduate standing, or permission of instructor for undergraduates.
BIOL 600 Independent Study or Research (1-9, max. 9) Credit/no credit only.
BIOL 700 Master's Thesis (*) Credit/no credit only. Offered: AWSp.
BIOL 800 Doctoral Dissertation (*) Credit/no credit only. Offered: AWSp.

Center for Statistics and Social Sciences

CS&S 320 Evaluating Social Science Evidence (5) I&S, QSR A critical introduction to the methods used to collect data in social science: surveys, archival research, experiments, and participant observation. Evaluates "facts and findings" by understanding the strengths and weaknesses of the methods that produce them. Case based. Offered: jointly with SOC 320/STAT 320; A.

CS&SS 481 Introduction to Mathematical Statistics (5) NW Probability, generating functions; the chi-square method, Jacobian, Bayes theorem; maximum likelihoods, Neyman-Pearson, efficiency, decision theory, regression, correlation, bivariate normal. (Credit allowed for only one of 390, 481, and ECON 590.) Prerequisite: STAT/MATH 126 or MATH 126 with either MATH 308 or MATH 309. Recommended: MATH 324. Offered: jointly with ECON/STAT 481; A.

CS&SS 501 Advanced Political Research Design and Analysis (5) I&S Third methods course in political research. Testing theories with empirical evidence. Examines current topics in research methods and statistical analysis in political science. Content varies according to recent developments in the field and with interests of instructor. Offered: jointly with POL S 501.

CS&SS 505 Review of Mathematics for Social Scientists (1) Reviews basic mathematical skills needed for a meaningful understanding of elementary statistics, data analysis, and social science methodology. Overview of core knowledge required for graduate courses in quantitative methods in social sciences. Topics include discrete mathematics, differential and integral calculus, review of matrix algebra, and basic probabilistic and statistical concepts. Offered: Sp.

CS&SS 506 Computer Environments for the Social Sciences (1) Familiarizes graduate students in the social sciences with modern environments for statistical computing. Provides an overview of available resources and a description of fundamental tools used in quantitative courses and doctoral research. Topics include interfaces to Web-based resources, UNIX-based computing, and major statistical packages (R, SPLUS, SAS, and SPLPLUS). Offered: W.

CS&SS 507 Methodology: Quantitative Techniques in Sociology (3) I&S Applied regression analysis with emphasis on interactive computer graphics techniques and interpretation. Application to typical sociological problems. Offered: jointly with SOC 506; A.

CS&SS 508 Introduction to R for Social Scientists (1) Handcock Familiarizes students with the R environment for statistical computing (http://www.r-project.org). R is a freely available, multi-platform, and powerful program for analysis and graphics similar to S-PLUS. Covers the basics of organizing, managing, and manipulating social science data; basic applications; introduction to programming; links to other major statistical packages. Offered: A.

CS&SS 526 Structural Equation Models for the Social Sciences (3) Structural equation models for the social sciences, including specification, estimation, and testing. Topics include path analysis, confirmatory factor analysis, linear models with latent variables, MIMIC models, non-recursive models, models for nested data. Examines applications to substantive problems in the social sciences. Prerequisite: SOC 424, SOC 425, SOC 426 or equivalent; recommended: CS&SS 505 and CS&SS 506, or equivalent. Offered: jointly with SOC 529.

CS&SS 527 Survey Research Methods (4) Provides students with skills in questionnaire development and survey methods. Develops a questionnaire and design a survey research proposal on a health-related or social topic. Prerequisite: either HSERV 511-513, BIOSTAT 517-518, EPI 512-513, which may be taken concurrently or permission of the instructor is required, and students should have a survey project in mind. Offered: jointly with HSERV 527.

CS&SS 529 Sample Survey Techniques (3) Design and implementation of selection and estimation procedures. Emphasis on human populations. Simple, stratified, and cluster sampling; multistage and two-phase procedures; optimal allocation of resources; estimation theory; replicated designs; variance estimation; national samples and census materials. Prerequisite: either STAT 421, STAT 423, STAT 504, QMETH 500, BI0ST 511, or BIOST 517, or equivalent; or permission of the instructor. Offered: jointly with BI0ST 529/STAT 529.

CS&SS 530 Multivariate Data Analysis for the Social Sciences (3) Multivariate analysis techniques and the presentation of ongoing social research involving cutting edge statistical methods. Credit/no credit only. Offered: AWSp.

CS&SS 594 Special Topics in Social Science and Statistics (1-5, max. 30) Topics vary. Prerequisite: permission of instructor. Offered: AWSp.

Center for Studies in Demography and Ecology

CSDE 501 Population Studies Seminar Series (1) CSDE affiliates and visitors present current research projects. Credit/no credit only. Offered: AWSp.

CSDE 502 Population Studies Proseminar (1) Professional training in demography and populations studies. Includes ethics in population research, human subject review, proposal application and writing. DSDE faculty research specialization, and research preparation and presentation. Credit/no credit only. Offered: A&Sp.

CSDE 590 CSSS Seminar (1, max. 20) Presentations of ongoing social science research involving cutting edge statistical methods. Credit/no credit only. Offered: AWSp.

Center for the Humanities

HUM 200 Issues in the Humanities (1-5, max. 15) I&S/VLPA Topics and issues of current interest in the humanities and the study of the arts. Features numerous guest lecturers from the U.W. faculty together with distinguished visiting teachers, scholars, and artists.

HUM 201 Introduction to Studies in the Humanities (5) VLPA Focuses on the interdisciplinary nature of the humanities with an emphasis on writing. Team-taught lectures and discussion sections for freshmen. Offered: A.

HUM 202 Introduction to Themes in the Humanities (5) VLPA/I&S Focuses on the interdisciplinary nature of the humanities with an emphasis on writing. Investigation of forms and methods the humanities employ to explore life's biggest questions. Team-taught lectures and discussion sections for freshmen. Offered: W.

HUM 203 Introduction to Historical and Cultural Contexts in the Humanities (5) VLPA/I&S Focuses on the interdisciplinary nature of the humanities with an emphasis on writing. Historical and cultural contexts of the humanities and emergence of humanistic themes in particular geographies or among specific cultures or groups. Team-taught lectures and discussion sections for freshmen. Offered: Sp.

HUM 205 Religion, Violence, and Peace: Patterns Across Time and Tradition (5) I&S Noegel, Wellman Investigates the complex relationship between violence and peace in a variety of religious traditions. Examines case studies from the ancient Near East, medieval East Asia, and the contemporary West from the standpoint of lived experiences and contemporary theories derived from several academic...
Chemistry

No more than the number of credits indicated can be counted toward graduation from the following course groups: 120, 142, 145 (5 credits); 145, 155, 160, 162 (11 credits); 162, 165 (6 credits); 165, 312 (5 credits); 220, 223, 237, 335 (5 credits); 238, 336 (4 credits); 221, 224, 239, 337 (5 credits); 241, 346 (3 credits); 242, 347 (3 credits); 355, 452 (3 credits); 452, 456 (3 credits). If a course is completed before a prerequisite is taken, credit will not later be allowed for the prerequisite course.

CHEM 110 Introduction to General Chemistry (3) NW Introduction to general chemistry with an emphasis on developing problem solving skills. Covers basic concepts of chemistry along with the mathematics required for quantitative problem solving. For students without high school chemistry or with limited mathematics background. Successful completion of CHEM 10 prepares students to enroll in CHEM 142. Credit/no credit only.

CHEM 115 Chemistry for Life (5) NW Introduction to chemistry covering selected principles and their effect on ourselves and our environment. Includes scientific investigations conducted outside the laboratory with full class participation. Intended for non-science majors wishing to improve their science literacy and develop a long-term interest in science.

CHEM 120 Principles of Chemistry I (5) NW, QSR First course in a three-quarter overview of chemistry. Not for students majoring in biochemistry, chemistry, or engineering. Includes matter and energy, chemical nomenclature, chemical reactions, stoichiometry, modern atomic theory, chemical bonding. Laboratory. Only 3 credits can be counted toward graduation from the following: CHEM 120, 142, 145. Offered: AS.

CHEM 142 General Chemistry (5) NW, QSR For science and engineering majors. Atomic nature of matter, stoichiometry, periodic table, quantum concepts, and gas laws. Includes laboratory. Recommended: high school chemistry and placement in MATH 120 or higher. No more than the number of credits indicated can be counted toward graduation from the following course groups: 142, 145 (5 credits). Cannot be taken for credit if CHEM 120 already taken. Offered: AWSpS.

CHEM 145 Honors General Chemistry (5) NW, QSR 145 and 155 cover material in 142, 152, and 162. Integrated computer and chemistry laboratory experiments. Prerequisite: either MATH 124, MATH 127, or MATH 134, any of which may be taken concurrently; score of 43% on CHEMGN placement test. No more than the number of credits indicated can be counted toward graduation from the following course groups: 142, 145 (5 credits); 145, 155, 162 (10 credits). Offered: A.

CHEM 152 General Chemistry (5) NW Energy, enthalpy and thermochemistry, spontaneity, entropy and free energy, electrochemistry, quantum mechanics and atomic theory, general concepts of bonding. Includes laboratory. Prerequisite: either 1.7 in CHEM 142 or 1.7 in CHEM 145. No more than the number of credits indicated can be counted toward graduation from the following course groups: 152, 155 (5 credits). Offered: AWSpS.

CHEM 155 Honors General Chemistry (5) NW Continuation of 145. Includes integrated computer and chemistry laboratory experience. Together 145 and 155 cover material in 142, 152, and 162. No more than the number of credits indicated can be counted toward graduation from the following course groups: 152, 155 (5 credits); 145, 155, 162 (10 credits). Prerequisite: 2.2 in CHEM 145. Offered: W.

CHEM 162 General Chemistry (5) NW Covalent bonding, chemical kinetics, liquids and solids, properties of solutions, the elements in groups 1A-4A, the elements in groups 5A-6A, transition metals and coordination chemistry, and organic chemistry. Includes laboratory. Prerequisite: 1.7 in CHEM 152. Offered: AWSpS.

CHEM 165 Honors General Chemistry (5) NW Introduction to systematic inorganic chemistry, representative elements, metals, and nonmetals. Includes coordination complexes, geochemistry, and metallurgy. Additional material on environmental applications of basic chemistry presented. Laboratory included. No more than the number of credits indicated can be counted toward graduation from the following course groups: 162, 165 (5 credits); 165, 312 (5 credits). Prerequisite: 2.2 in CHEM 155. Offered: Sp.

CHEM 197 Science Outreach Training (1-2, max. 2) Training for participation in science-related outreach activities to the community. Emphasis on support for K-12 education and environmental community efforts. Not applicable toward chemistry degree requirements. Credit/no credit only. Offered: AWSpS.

CHEM 198 Tutorial Study (2, max. 6) NW Credit/no credit only. Offered: AWSpS.

CHEM 199 Special Problems (1-6, max. 6) Research in chemistry. Credit/no credit only. Offered: AWSpS.

CHEM 220 Principles of Chemistry II (5) NW, QSR Second course in a three-quarter overview of chemistry. Not for students majoring in biochemistry, chemistry, or engineering. Includes gases/liquids/solids, solutions, acids and bases, equilibrium, oxidation-reduction, electrochemistry, organic compounds, hydrogen bonds, aromatics, stereochemistry. Prerequisite: either 1.7 in CHEM 120 or 1.7 in CHEM 142. Offered: W.

CHEM 224 Organic Chemistry — Short Program (4) NW Continuation of CHEM 223. Structure, nomenclature, properties, and reactions of aldehydes, ketones, carboxylic acid derivatives, amines, carbohydrates, lipids, amino acids, peptides, proteins, and nucleic acids. No laboratory accompanies this course, but CHEM 241 laboratory may be taken concurrently. No more than 4 credits can be counted toward graduation from the following course group: CHEM 224, CHEM 239, CHEM 337. Prerequisite: 1.7 in CHEM 223. Offered: WS.

CHEM 238 Organic Chemistry (4) NW Second course for students planning to take three quarters of organic chemistry. Further discussion of physical properties and transformations of organic molecules, especially aromatic and carbonyl compounds. No more than the number of credits indicated can be counted toward graduation from the following course groups: 238, 336 (4 credits). Prerequisite: either 1.7 in CHEM 237 or 1.7 in CHEM 335. Offered: WsSpS.

CHEM 239 Organic Chemistry (3) NW Third course for students planning to take three quarters of organic chemistry. Polynuclear compounds and natural products, lipids, carbohydrates, amino acids, proteins, and nucleic acids. Includes introduction to membranes, enzyme mechanisms, prosthetic groups, macromolecular conformations and supramolecular architectures. No more than 4 credits can be counted toward graduation from the following course groups: CHEM 224, CHEM 239, CHEM 337. Prerequisite: either 1.7 in CHEM 238 or 1.7 in CHEM 336. Offered: ASpS.
CHEM 241 Organic Chemistry Laboratory (3) NW Introduction to organic laboratory techniques. Preparation of representative compounds. Designed to be taken with 224 or 238. No more than the number of credits indicated can be counted toward graduation from the following course groups: 241, 346 (3 credits). Prerequisite: either 1.7 in CHEM 233 or 1.7 in CHEM 237; either CHEM 335, either CHEM 224, CHEM 223 or CHEM 336, any of which may be taken concurrently. Offered: WSpS.

CHEM 242 Organic Chemistry Laboratory (3) NW Preparations and qualitative organic analysis. Designed to be taken with 239. No more than the number of credits indicated can be counted toward graduation from the following course groups: 242, 347 (3 credits). Prerequisite: either 1.7 in CHEM 224 or CHEM 239 which may be taken concurrently; either 1.7 in CHEM 241 or 1.7 in CHEM 346. Offered: ASpS.

CHEM 296 Research in Chemistry: An Introduction (1) Ten presentations describing programs of researchers in the chemical sciences. Does not count toward any chemistry major requirement. Credit/no credit only. Offered: W.

CHEM 297 Science Outreach Participation (1-2, max. 6) Continuation of 197. Work with K-12 schools or community organizations. May include scientific presentations, K-12 curriculum support, or involvement in a community project. Not applicable toward chemistry degree requirements. Credit/no credit only. Prerequisite: CHEM 296. Offered: jointly with BIO 396; A.

CHEM 299 Special Problems and Report Writing (1-6, max. 6) Research in chemistry and/or study in the chemical literature. Requires writing a scientific report. Credit/no credit only. Offered: AWSpS.

CHEM 312 Inorganic Chemistry (3) NW The periodic table: chemistry of representative and transition elements. Aqueous chemistry, solid state chemistry, and everyday aspects of inorganic chemistry emphasized. Not intended for students who have completed 165. No more than the number of credits indicated can be counted toward graduation from the following course groups: 165, 312 (5 credits). Prerequisite: either CHEM 155 or CHEM 162; either CHEM 224, CHEM 238, or CHEM 336. Offered: AW.

CHEM 317 Inorganic Chemistry Laboratory (4) NW Experimental exploration of the periodic table. Techniques of preparation and characterization of inorganic compounds. Handling of air-sensitive materials and gases. Prerequisite: either CHEM 165 or CHEM 312; either CHEM 224 or CHEM 347. Offered: WSp.

CHEM 321 Quantitative Analysis (5) NW Introduction to chemical analysis, including gravimetric, volumetric, spectrophotometric, and potentiometric analyses. Laboratory computer use included. Prerequisite: either CHEM 155 or CHEM 162. Offered: AWS.

CHEM 346 Organic Chemistry Honors Laboratory (3) NW To accompany 336. No more than the number of credits indicated can be counted toward graduation from the following course groups: 241, 346 (3 credits). Prerequisite: 1.7 in CHEM 335; CHEM 336 which may be taken concurrently. Offered: W.

CHEM 347 Organic and Qualitative Organic Honors Laboratory (3) NW Continuation of 346. To accompany 337. No more than the number of credits indicated can be counted toward graduation from the following course groups: 242, 347 (3 credits). Prerequisite: CHEM 337 which may be taken concurrently; 2.2 in CHEM 346. Offered: Sp.

CHEM 355 Introductory Physical Chemistry for Biologists (4) NW The following topics are discussed from a physical chemical point of view: structural study of biopolymers, enzyme kinetics, bioenergetics, and denaturation. No more than the number of credits indicated can be counted toward graduation from the following course groups: 355, 452 (3 credits). Prerequisite: either CHEM 224, CHEM 239, or CHEM 337; either MATH 124, MATH 134, MATH 145, or Q SCI 291; either PHYS 114 or PHYS 121.

CHEM 396 Research in Chemistry and the Chemical Sciences (1) NW Presentations by researchers in academia and industry describing the opportunities for research chemistry and biochemistry. Credit does not count toward chemistry major requirements. Credit/no credit only. Offered: AWSp.

CHEM 397 Science Outreach Mentors (1-2, max. 6) Mentoring of beginning outreach participants. Introduces students to training of outreach students, and evaluation of outreach activities. Not applicable toward chemistry degree requirements. Credit/no credit only. Prerequisite: CHEM 197. Offered: A.

CHEM 399 Undergraduate Research (*, max. 12) Research in chemistry. Credit/no credit only. Offered: AWSpS.

CHEM 410 Radiochemistry Laboratory (2) NW Introductory general service course for students planning further work in nuclear or tracer applications. Safety procedures, detection and measurement of nuclear radiation, radiochemical and tracer techniques. Prerequisite: either 1.7 in CHEM 155 or 1.7 in CHEM 162; recommended: CHEM 418. Offered: alternate years.

CHEM 414 Chemistry of the Main Group Elements (3) NW The elements and their compounds in relation to the periodic system. Prerequisite: either CHEM 165 or CHEM 312; either CHEM 347 or CHEM 458, either CHEM 453, CHEM 455, or CHEM 475. Offered: alternate years.

CHEM 415 The Chemical Bond (3) NW Nature of the chemical bond. Simple bonding theories, molecular orbital methods, symmetry, and group theory. Includes weekly computer exercises in which students perform ab initio calculations. Prerequisite: either CHEM 453, CHEM 455, or CHEM 475. Offered: alternate years.

CHEM 416 Transition Metals (3) NW Survey of selected key topics in the chemistry of the transition metals, including emphasis on the structure, bonding, and reactivity of major classes of compounds. Prerequisite: either CHEM 165 or CHEM 312; either CHEM 453, CHEM 455, or CHEM 475, which may be taken concurrently. Offered: A.

CHEM 417 Organoenic Chemistry (3) NW Chemistry of the metal-carbon bond for both main group and transition metals. Structure and reactivity with applications to organic synthesis and catalysis. Prerequisite: either CHEM 224, CHEM 239, or CHEM 337; CHEM 416. Offered: W.

CHEM 418 Nuclear Chemistry (3) NW Natural radioactivity, nuclear systematics and reactions, radioactive decay processes, stellar nucleosynthesis, applications of radioactivity. Prerequisite: either CHEM 453, CHEM 455, or CHEM 475. Offered: alternate years.

CHEM 419 Bioorganic Chemistry (3) NW Description of transition metal-containing systems found in biology. Structural and electronic properties and reactivity of metalloproteins, metalloenzymes, and metallocofactors. Methods used to probe and model metal sites by spectroscopic and synthetic techniques. Prerequisite: either CHEM 224, CHEM 239, or CHEM 337; CHEM 416. Offered: Sp, even years.

CHEM 426 Instrumental Analysis (3) NW Introduction to modern instrumental methods of chemical analysis, including chromatography, optical and mass spectroscopy, electrochemistry and flow injection analysis. Basic concepts of transducers, spectrometers, mass analysis, separation sciences, and computerized data acquisition and reduction. Includes laboratory. Prerequisite: CHEM 321. Offered: W.

CHEM 427 Principles of Modern Wet Analysis (3) NW Sampling and sample dissolution, multiple chemical equilibria, pH and relevant chemical measurement, reagent-based kinetic enzyme assays and immunoassays. Principles of process, environmental, clinical, and biotechnological assays. Separations and flow injection. Prerequisite: either CHEM 223, CHEM 237, or CHEM 335; CHEM 321.

CHEM 428 Bioinstrumental Analysis (3) NW Modern instrumental methods of bioanalysis of DNA and proteins, including agarose gel electrophoresis, PCR, Sanger sequencing for nucleic acid analysis and ELISA, SDS-PAGE, and LC/MS-MS analysis of proteins. Mass analysis, separation sciences, and bioinformatics tools. Includes laboratory. No credit allowed if BIO 426 taken. Prerequisite: CHEM 239; either CHEM 317, CHEM 321, CHEM 461 or BIO 440. Offered: Sp.

CHEM 429 Chemical Separation Techniques (3) NW Introduction to modern separation techniques such as gas chromatography, high-performance liquid chromatography, electrophoresis, and field flow fractionation. Prerequisite: either CHEM 224, CHEM 239, or CHEM 337; either CHEM 241, CHEM 321, or CHEM 346. Offered: W.

CHEM 433 Theoretical Organic Chemistry — Predictions and Experimental Tests (3) NW Molecular orbital theory in organic chemistry. Woodward-Hoffmann rules, aromaticity, concerted reactions, photophysical transformations, and reactions of electron-deficient species. Prerequisite: either CHEM 239 or CHEM 337. Offered: alternate years.

CHEM 435 Introductory Biophysical Chemistry (3) NW Survey of the statics and dynamics of biophysical and biochemical processes. Prerequisite: either CHEM 224, CHEM 239, or CHEM 337, either CHEM 453, CHEM 455, or CHEM 475, any of which may be taken concurrently; recommended: either BIO 405 or BIO 440. Offered: alternate years; W.

CHEM 436 Molecular Enzymology (3) NW Enzyme structure, function, chemistry and inhibition, including modes of biological catalysis, stereochemistry, enzyme characterization and

CHEM 452 Physical Chemistry for Biochemists I (3) NW General equilibrium thermodynamics emphasizing biochemical applications: ligand binding, biological oxidation-reduction reactions, membranes, active transport, colligative properties, and surface tension. No more than the number of credits indicated can be counted toward graduation from the following course groups: 355, 452 (4 credits); 452, 456 (3 credits). Prerequisite: either CHEM 155 or CHEM 162; either MATH 125 or MATH 134; either PHYS 115 or PHYS 122. Offered: AW.

CHEM 453 Physical Chemistry for Biochemists II (3) NW Continuation of 452. Includes transport properties, enzyme kinetics, introduction to quantum mechanics, spectroscopy, and classical statistical mechanics. Prerequisite: either CHEM 452 or CHEM 456; either MATH 126 or MATH 136; either PHYS 116 or PHYS 123. Recommended: MATH 307; MATH 308. Offered: WS.

CHEM 455 Physical Chemistry (3) NW Introduction to quantum chemistry and spectroscopy. Theory of quantum mechanics presented at an elementary level and applied to the electronic structure of atoms and molecules and to molecular spectra. Prerequisite: either CHEM 155 or CHEM 162; either MATH 126 or MATH 136; either PHYS 116 or PHYS 123; recommended: MATH 307; MATH 308. Offered: AsP.

CHEM 456 Physical Chemistry (3) NW Chemical thermodynamics. Laws of thermodynamics presented with applications to phase equilibria, chemical equilibria, and solutions. No more than the number of credits indicated can be counted toward graduation from the following course groups: 452, 456 (3 credits). Prerequisite: either CHEM 155 or CHEM 162; either MATH 126 or MATH 136; either PHYS 116 or PHYS 123; recommended: MATH 307. Offered: WS.

CHEM 457 Physical Chemistry (3) NW Introduction to statistical mechanics, kinetic theory, and chemical kinetics. Prerequisite: either CHEM 455 or CHEM 475; either CHEM E 326 which may be taken concurrently. CHEM 456 and CHEM 476. Offered: W.

CHEM 458 Global Atmospheric Chemistry (4) NW Global atmosphere as chemical system. Physical factors and chemical processes. Natural variabilities and anthropogenic change. Cycling of trace substances. Global issues such as climate change, acidic deposition, influences on biosphere. Prerequisite: either ATM S 358 or CHEM 458. Offered: jointly with ATM S 458.

CHEM 460 Spectroscopic Molecular Identification (3) NW Basic theory of spectral techniques-infrared and ultraviolet/visible spectroscopy, NMR, and mass spectrometry-with emphasis on spectral interpretation skills needed for the elucidation of structure, conformation, and dynamics in organic and biological chemistry. Prerequisite: either CHEM 224, CHEM 239, or CHEM 337; recommended: either BIOC 405 or BIOC 440. Offered: alternate years; Sp.

CHEM 461 Physical Chemistry Laboratory (3-4) NW Physical measurements in chemistry. Vacuum distillation, spectroscopic methods, electrical measurements. Prerequisite: either CHEM 453, or both CHEM 455 and CHEM 456, or both CHEM 456 and CHEM 475; recommended CHEM 457. Offered: AsP.

CHEM 462 Techniques of Synthetic Organic Chemistry (2-3) NW Laboratory techniques of synthetic organic chemistry. Vacuum distillation, multiphase synthesis, air sensitive reagents, photochemistry, chromatography, and separation techniques. Prerequisite: either CHEM 242 or CHEM 347; CHEM 460 which may be taken concurrently. Offered: A.

CHEM 463 Spectroscopic Techniques for Structural Identification (2) NW Laboratory techniques of spectroscopic analysis for structural determination using UV, IR, NMR, mass spectrometry. Prerequisite: CHEM 460. Offered: W.

CHEM 464 Computers in Data Acquisition and Analysis (3) NW Introduction to use of the computer in the chemistry laboratory. Principles of microcomputers and their use for such problems as data acquisition, noise reduction, and instrument control. Prerequisite: either CHEM 453, CHEM 455, or CHEM 475; MATH 136, or both MATH 307 and MATH 308. Offered: Sp.

CHEM 465 Computations in Chemistry (3) NW Computer calculations on color graphics workstations applied to problems in chemistry. Numerical methods and algorithms for calculating classical dynamics, quantum wavefunctions, wavepacket propagation, and chemical kinetics. Use of computer programs for calculating electronic wavefunctions, molecular conformations, simulations of liquids and solids. Prerequisite: either CHEM 455 or CHEM 475, either of which may be taken concurrently. Offered: W.

CHEM 471 Physical Chemistry of Macromolecules (3) NW Classical hydrodynamic methods, and modern optical correlation and pulse techniques for studying dynamical motions and conformations of macromolecules, especially biopolymers, in solution. Cooperative thermal transitions, optical properties, and polyelectrolyte effects. Prerequisite: either CHEM 452, CHEM 456, or CHEM 476; either CHEM 453, CHEM 455, or CHEM 475; CHEM 476. Offered: alternate years; W.

CHEM 475 Honors Physical Chemistry (3) NW Introduction to quantum chemistry, spectroscopy. Theory of quantum mechanics applied more rigorously than in CHEM 455. Application of quantum mechanics to electronic structure of atoms and molecules. Computer software used to solve problems. Prerequisite: either CHEM 155 or CHEM 162; either MATH 126 or MATH 136; either PHYS 116 or PHYS 123; recommended: MATH 307; MATH 308. Offered: A.

CHEM 476 Honors Physical Chemistry (3) NW For chemistry and biochemistry majors and otherwise qualified students. Chemical Thermodynamics. Similar in scope to CHEM 456 with the study of more complicated systems. Emphasis on using computer software to solve problems. Prerequisite: CHEM 475. Offered: W.

CHEM 477 Honors Physical Chemistry (3) NW For chemistry and biochemistry majors or otherwise qualified students. Statistical mechanics, kinetic theory, and chemical kinetics including statistical interpretations of kinetics and transport phenomena. Prerequisite: CHEM 475; either CHEM E 326, which may be taken concurrently, or CHEM 476. Offered: Sp.

CHEM 484 Materials Chemistry (3) NW Overview of basic principles, techniques, and applications associated with solid materials. Topics include description of crystals, examples of crystal structures, structural analysis, band structures of solid materials, preparation of materials, materials for microelectronics, and materials for information technology. Prerequisite: CHEM 453 or CHEM 455. Offered: jointly with MSE 484; Sp.

CHEM 496 Research Seminar for Undergraduates (1, max. 2) NW Formal presentations of student research. One credit applies to research component of a relevant major. Credit/no credit only. Offered: jointly with BIOC 496; Sp.

CHEM 498 Teaching Chemistry (3) NW Training in teaching chemistry laboratory and quiz sections. For chemistry and biochemistry majors, especially those planning graduate work or secondary education. Covers teaching strategies, student diversity, learning styles, grading, and interaction with students and faculty. Credit/no credit only. Offered: A.

CHEM 499 Undergraduate Research and Report Writing (*, max. 12) Research in chemistry and/or study in the chemical literature. Credit/no credit only. Offered: AWSpS.

CHEM 501 Readings in Chemistry (1, max. 9) Individual meetings with faculty to discuss readings (journal articles, book chapters, proceedings) in the chemical sciences. Credit/no credit only. Offered: AWSpS.

CHEM 502 Practical NMR Methods for Biological and Organic Structure Elucidation (4) Theory of NMR (rotating frame, multi-pulse experiments, relaxation phenomena, 2D experiments) as applied to structural and dynamic problems in organic and biomedical chemistry. Provides basis for experiment selection and spectrum interpretation. A more advanced treatment of NMR than 460. Prerequisite: CHEM 224, CHEM 239, or CHEM 337; recommended: CHEM 460 or equivalent, CHEM 435 or CHEM 455. Offered: W.

CHEM 508 Advanced Inorganic Chemistry (3, max. 9) Discussion of selected applications of physical techniques to the study of inorganic molecules. Topics include group theory, magnetic resonance spectroscopy (NMR and ESR), vibrational spectroscopy (IR and Raman), electronic spectroscopy, magnetism, and electrochemistry. Offered: A.

CHEM 510 Current Problems in Inorganic Chemistry (3, max. 9) Primarily for doctoral candidates in inorganic chemistry. Current topics (e.g., bioinorganic, advanced organometallic, materials and solid state, advanced organic spectroscopy). See department for instructor and topics during any particular quarter. Offered: Sp.
CHEM 520 Current Problems in Analytical Chemistry (3, max. 9) Primarily for doctoral candidates in analytical chemistry. Current topics (e.g., flow injection analysis, mass spectrometry, and advanced radiochemistry). See department for instructor and topics during any particular quarter. Offered: AW.

CHEM 521 Analytical Electrochemistry (3) Theory and practice of modern electrochemistry with emphasis on instrumentation and applications in chemical analysis. Offered: alternate years.

CHEM 522 Atomic and Molecular Analytical Spectroscopy (3) Quantitative analysis of atomic and molecular species, using all forms of electromagnetic radiation, electrons, and gaseous ions. Offered: alternate years.

CHEM 523 Geochemical Cycles (4) Descriptive, quantitative aspects of earth as a biogeochemical system. Study of equilibria, transport processes, chemical kinetics, biological processes; their application to carbon, sulfur, nitrogen, phosphorus, other essential elements. Stability of biogeochemical systems; nature of human perturbations of their dynamics. Prerequisite: permission of instructor. Offered: jointly with OCEAN 523/ATM S 508.

CHEM 525 Process Analytical Chemistry (3) Chemical sensors and systems approach to chemical analysis as an integral part of monitoring and controlling chemical, biological, and medical processes. Offered: alternate years.

CHEM 526 Chemometrics (3, max. 9) Mathematical and statistical methods for experimental design, calibration, signal resolution, and instrument control and optimization. Offered: alternate years.

CHEM 530 Advanced Organic Chemistry (3) Fundamental aspects of organic structures and transformations. Structure and basicity of carbonium, substitution reactions, elimination reactions, nucleophile addition and addition/elimination reactions, condensation reactions, structural rearrangements of carbocations, electrophilic addition, electrophilic substitutions, neighboring group effects. Prerequisite: CHEM 337. Offered: A.

CHEM 531 Advanced Organic Chemistry (3) Synthetic organic chemistry. Discussion of practical methods for the synthesis of complex organic molecules with an emphasis on strategy and the control of stereochemistry. Prerequisite: CHEM 530. Offered: W.

CHEM 532 Advanced Organic Chemistry (3) Chemical Biology. Application of chemical methods to the study of biological processes that occur in cells. Prerequisite: CHEM 530 and CHEM 531. Offered: Sp.

CHEM 540 Current Problems in Organic Chemistry (1-3, max. 12) Primarily for doctoral candidates in organic chemistry. Discussions of topics of current interest and importance. See department for instructor and topic during any particular quarter.

CHEM 550 Introduction to Quantum Chemistry (3) Origins and basic postulates of quantum mechanics, solutions to single-particle problems, angular momentum and hydrogenic wave functions, matrix methods, perturbation theory, variational methods. Prerequisite: CHEM 455. Offered: A.

CHEM 551 Introduction to Quantum Chemistry (3) Electronic structure of many-electron atoms and molecules, vibration and rotation levels of molecules, effects of particle exchange, angular momentum and group theory, spectroscopic selection rules. Prerequisite: CHEM 550. Offered: W.

CHEM 552 Statistical Mechanics (3) General theorems of statistical mechanics, relation of the equilibrium theory to classical thermodynamics, quantum statistics, theory of imperfect gases, lattice statistics and simple cooperative phenomena, lattice dynamics and theory of solids, liquids, solutions, and polymers, time-dependent phenomena and mechanisms of interaction. Prerequisite: CHEM 455 and CHEM 456 (concurrent registration permitted) or equivalent. Offered: Sp.

CHEM 553 Statistical Mechanics (3) General theorems of statistical mechanics, relation of the equilibrium theory to classical thermodynamics, quantum statistics, theory of imperfect gases, lattice statistics and simple cooperative phenomena, lattice dynamics and theory of solids, liquids, solutions, and polymers, time-dependent phenomena and mechanisms of interaction. Prerequisite: CHEM 552. Offered: A.

CHEM 560 Current Problems in Physical Chemistry (1-3, max. 12) Primarily for doctoral candidates in physical chemistry. A discussion of topics selected from active research fields. See department for instructor and the topic during any particular quarter.

CHEM 561 Macromolecules (3, max. 9) Physical chemistry of macromolecules and biopolymers. Topics include solution thermodynamics, hydrodynamic properties, molecular weight distributions, optical and electro-optic techniques, chain configuration statistics, cooperative phenomena, theory of rubber elasticity, and polyelectrolytes. Offered: alternate years.

CHEM 575 Molecular Modeling Methods (4) Introduction to theory and practice of computer simulation studies of molecules with emphasis on applications to biological molecules and complexes. Discussion of background theory, implementation details, capabilities and practical limitations of these methods. Prerequisite: previous coursework in biochemistry and physical chemistry and/or permission of instructor. Offered: jointly with BIOEN 575; A.

CHEM 590 Seminar in General Chemistry (1, max. 18) For chemistry graduate students only. Credit/no credit only. Offered: A/W.

CHEM 591 Seminar in Inorganic Chemistry (1, max. 18) For chemistry graduate students only. Credit/no credit only. Offered: A/W.

CHEM 592 Seminar in Analytical Chemistry (1, max. 18) For chemistry graduate students only. Credit/no credit only. Offered: A/W.

CHEM 593 Seminar in Organic Chemistry (1, max. 18) For chemistry graduate students only. Credit/no credit only. Offered: A/W.

CHEM 595 Seminar in Physical Chemistry (1, max. 18) For chemistry graduate students only. Credit/no credit only. Offered: A/W.

CHEM 600 Independent Study or Research (*) Prerequisite: permission of coordinator. Offered: A/W.

CHEM 700 Master’s Thesis (*) Prerequisite: permission of coordinator. Offered: A/W.

CHEM 800 Doctoral Dissertation (*) Prerequisite: permission of coordinator. Offered: A/W.

Classics

Classical Archaeology

CL AR 340 Pre-Classical Art and Archaeology (3) VLPA Survey of the art and the other material remains of the civilizations in the Aegean from the Neolithic Age to the end of the Bronze Age, with special emphasis on Minoan Crete and the Mycenaean kingdoms of mainland Greece, illustrated by slides. The history, techniques, and results of significant excavations are examined. Offered: jointly with ART H 340.

CL AR 341 Greek Art and Archaeology (3) VLPA Bliquez Survey of the material remains and the developing styles in sculpture, vase painting, architecture, and the minor arts from the geometric to the Hellenistic periods, illustrated by slides. Principal sites and monuments, as well as techniques and methods of excavation, are examined in an attempt to reconstruct the material culture of antiquity. Offered: jointly with ART H 341.

CL AR 342 Roman Art and Archaeology (3) VLPA Harmon Roman architecture and art, with emphasis on the innovations of the Romans; illustrated by slides. Offered: jointly with ART H 342.

CL AR 343 Hellenistic Art and Archaeology (3) VLPA Survey of the art of Greece and the eastern Mediterranean from the time of Alexander the Great to the Roman conquest. Principal sites with their sculpture, painting, mosaics, and minor arts examined in lectures illustrated with slides. Offered: jointly with ART H 343.

CL AR 442 Greek Painting (3) VLPA Study of painted decoration on Greek vases, with emphasis on stylistic developments and cultural and historical influences. Painting on other media also examined as evidence allows. Offered: jointly with ART H 442.

CL AR 443 Roman Painting (3) VLPA Study of surviving painting from the Roman World, with emphasis on wall paintings of Pompeii and Herculaneum. Principal topics for discussion: the four styles of Pompeian painting the dependence of Roman painters on Greek prototypes, and the significance of various kinds of painting as domestic decoration. Offered: jointly with ART H 443.
sculpture and sculptors, their Roman copyists, and Roman portraits and sarcophagi. Emphasis on Greek sculpture of the fifth century BC. Offered: jointly with ART H 444.

CL AR 446 Greek Architecture (3) VLPA
Detailed study of Greek architecture from its beginnings, with special emphasis on the Periclean building program in fifth-century Athens. Offered: jointly with ARCH 454/ART H 446.

CL AR 447 The Archaeology of Early Italy (3) VLPA
Harmon Study of the principal archaeological sites of early Italy, including Etruria, Sicily, southern Italy, and archaic Rome up to the Republican period. Attention given to the material remains and their relationship to the Etruscan, ancient Sicilian, and early Roman civilizations. Offered: jointly with ART H 447.

CL AR 448 The Archaeology of Italy (3) VLPA
Harmon Study of the principal archaeological sites in Italy with special emphasis on ancient Rome. Sites include the Alban hills, Ostia, Pompeii, Herculanenum, Tarquinia, Paestum, Tivoli, and Praeneste. Attention given to the relationship between material remains and their purpose in ancient life. Illustrated by slides. Offered: jointly with ART H 448.

CL AR 513 Athenian Topography (5) Detailed consideration of the topography and monuments of ancient Athens from the beginning through the Roman period.

CL AR 541 Seminar in Greek and Roman Art (3) In-depth study of selected topics and problems of the art of ancient Greece and Rome. Offered: jointly with ART H 541.

Classical Linguistics

CL LI 501 Comparative Phonology of Greek and Latin (5) Harmon Phonological developments of Greek and Latin from Indo-European to the classical periods of both languages.

CL LI 503 History of the Greek Language (5) Morphological and syntactical development of the Greek language from Homer through the New Testament; the development of prose and poetic style.

CL LI 505 History of the Latin Language (5) Harmon Morphological and syntactical development of the Latin language; the development of Latin as a literary language.

CL LI 506 Italic Dialects (5) Harmon Principal remains of the non-Latin languages and dialects of ancient Italy.

CL LI 508 Greek Dialects (5) The non-Attic dialects of ancient Greek, based on a study of inscriptions and the literary remains.

Classics

Upper-division classics courses in English (300 and 400 level) in the Department of Classics do not generally have prerequisites. Most 400-level courses deal with a single genre of literature or with a limited area of classical studies. The 300-level courses deal with broader subjects at a relatively advanced level. Both are primarily for juniors and seniors, but they are open to freshmen and sophomores with an interest or background in the subject of the course.

CLAS 101 Latin and Greek in Current Use (2)
VLPA Designed to improve and increase English vocabulary given the historical development of both Latin and Greek elements in English, with emphasis on words in current literary and scientific use. No auditors. Knowledge of Latin or Greek is not required. Offered: AWSpS.

CLAS 102 Grammar and Syntax through Latin (3) VLPA Improve familiarity with basic grammar, syntax, logic through study of mechanics of the Latin language. For Educational Opportunity Program students only. No auditors. Knowledge of Latin or Greek not required.

CLAS 122 Gateway to the Ancient Greek-Roman World (5) VLPAP Introduces students to aspects of Ancient Greece and/or Roman literature and culture. Develop understanding of the nature and process of critical thinking and basic research techniques.

CLAS 205 Bioscientific Vocabulary Building From Latin and Greek (3) VLPA Designed to help the student master the scientific vocabulary of his or her major field by a study of the Latin and Greek roots that are used to create the majority of scientific terms. No auditors. Knowledge of Latin or Greek is not required. Offered: AWSpS.

CLAS 210 Greek and Roman Classics in English (5) VLPA Bliquez, Blondell, Clauss, Connors, Gowing, Harmon, Hinds, Levaniouk, Power, Group Introduction to classical literature through a study of the major Greek and Latin authors in modern translation. Offered: AWSpS.

CLAS 230 Greek and Roman Private and Public Life (5) VLPA Bliquez Study of the civic and social practices and institutions of everyday Greek and Roman private and public life, including the family, social classes, the courts and legal systems, military service and war, technology and the trades, money and banking, agriculture and rural life. Many lectures illustrated by slides. Offered: A.

CLAS 320 Greek and Roman Private and Public Life (5) VLPA Bliquez Study of the civic and social practices and institutions of everyday Greek and Roman private and public life, including the family, social classes, the courts and legal systems, military service and war, technology and the trades, money and banking, agriculture and rural life. Many lectures illustrated by slides. Offered: A.

CLAS 324 Greek and Roman Athletics (3) I&S/Greek and Roman athletic festivals and events, and the place of athletics and sport in ancient society.

CLAS 326 Women in Antiquity (3) I&S/VLPA Connors, Levaniouk A broad survey of primary sources in medicine, law, philosophy, religious ritual, myth, history, and ethnography, informed by perspectives from literature, art, and archaeology. Provides students the tools to analyze the social roles of women in ancient Greece and Rome.

CLAS 328 Sex, Gender, and Representation in Greek and Roman Literature (3) I&S/VLPA Hinds, Stroup Affirmation and inversion of gender roles in Greek and Roman literature, myths of male and female heroism; marginalization of female consciousness; interaction of gender status, and sexual preference in love poetry. Readings from epic, drama, historiography, romance, and lyric.

CLAS 330 The Age of Augustus (5) I&S/VLPA Gowing Detailed study of the history and culture of the reign of Augustus, the first Roman emperor (31 BC–AD 14). Includes readings in Augustan authors such as Vergil, Ovid, and Horace as well as the study of Augustan art and architecture. Offered: jointly with HSTAM 330.

CLAS 399 Study Abroad: Classics (3-15, max. 20) VLPA For participants in Classics overseas study programs. Specific course content determined by assigned faculty member. Credit not applicable to majors in the Classics Department without approval.

CLAS 401 Undergraduate Seminar in Classics (3-5) VLPA Seminar on a broadly defined topic in classics. Includes reading in Latin or Greek as appropriate for individual students. Additional readings in works in English translation and works of scholarship chosen to give undergraduates majors familiarity with research methods and perspective on the discipline.

CLAS 424 The Epic Tradition (5) VLPA Clauss, Levaniouk Ancient and medieval epic and heroic poetry of Europe in English: the Iliad, Odyssey, and Aeneid; the Roland or a comparable work from the medieval oral tradition; pre-Greek forerunners, other Greek–Roman literary epics, and later medieval and Renaissance developments and adaptations of the genre. Choice of reading material varies according to instructor's preference. Offered: jointly with C LIT 424.

CLAS 427 Greek and Roman Tragedy (5) VLPA Power, Group Reading of the tragedies of Aeschylus, Sophocles, Euripides, and Seneca.

CLAS 428 Greek and Roman Comedy (5) VLPA Power, Group Readings from the comedies of Aristophanes, Plautus, and Terence.

CLAS 430 Greek and Roman Mythology (3/5) VLPA Principal myths found in classical and later literature. Offered: AWSpS.

CLAS 432 Classical Mythology in Film (3/5) VLPA Clauss Comparison and discussion of classical myths and modern films inspired by them. Promotes access to the reading of classical mythology. Analyzes significant differences between ancient literary and modern cinematic representations of the myth.

CLAS 435 The Ancient Novel (3) VLPA Connors, Power Reading and discussion of the principal Greek and Roman novels, the earliest European prose fiction, with attention to earlier literature and to imperial culture.

CLAS 445 Greek and Roman Religion (3) I&S/VLPA Harmon, Levaniouk Religion in the social life of the Greeks and Romans, with emphasis placed on their public rituals and festivals. Attention is given to the priesthoods, personal piety, rituals of purification and healing, and the conflict of religions in the early Roman Empire. Many lectures illustrated by slides. Recommended: RELIG 201. Offered: jointly with RELIG 445.

CLAS 495 Senior Essay (1-3, max. 4) VLPA Usually written in conjunction with another course in the final year of study in the major.

CLAS 496 Special Topics (2-5, max. 15) VLPA Offered occasionally by visitors or resident
GREEK 600 Independent Study or Research (*).

GREEK 590 Supervised Study (*, max. 18) Prerequisite: permission of graduate program coordinator.

GREEK 422 Herodotus and the Persian Wars (3) VLPA Bliquez, Levaniouk, Power Recommended: minimum of two years of ancient Greek language study at college level (or equivalent).

GREEK 242 Thucydides and the Peloponnesian War (3) VLPA Bliquez Recommended: minimum of two years of ancient Greek language study at college level (or equivalent).

GREEK 426 Attic Orators (3) VLPA Bliquez, Power Recommended: minimum of two years of ancient Greek language study at college level (or equivalent).

GREEK 428 Imperial Greek Literature (3-5, max. 15) VLPA Clause, Gowing Readings in imperial Greek prose and poetry from the first century CE onward, including Dio Chrysostom, Apian, Plutarch, Aelius Aristides, Lucian, Athenaeus, and New Testament Koine. Recommended: minimum of two years of ancient Greek language study at college level (or equivalent).

GREEK 442 Greek Drama (3) VLPA Blondell, Levaniouk, Power Recommended: minimum of two years of ancient Greek language study at college level (or equivalent).

GREEK 443 Greek Drama (3) VLPA Blondell, Levaniouk, Power Recommended: minimum of two years of ancient Greek language study at college level (or equivalent).

GREEK 444 Greek Drama (3) VLPA Blondell, Levaniouk, Power Recommended: minimum of two years of ancient Greek language study at college level (or equivalent).

GREEK 449 Greek Epic (3) VLPA Levaniouk Recommended: minimum of two years of ancient Greek language study at college level (or equivalent).

GREEK 450 Lyric Poetry (3) VLPA Blondell, Levaniouk, Power Recommended: minimum of two years of ancient Greek language study at college level (or equivalent).

GREEK 451 Lyric Poetry (3) VLPA Blondell, Levaniouk, Power Recommended: minimum of two years of ancient Greek language study at college level (or equivalent).

GREEK 462 Literature of Classical Athens (3-5, max. 15) VLPA Readings and discussion of selected authors of the early Greek period. Recommended: minimum of two years of ancient Greek language study at college level (or equivalent).

GREEK 463 Hellenistic Greek Literature (3-5, max. 15) VLPA Clausse Readings and discussion of selected authors of the Hellenistic Age. Recommended: minimum of two years of ancient Greek language study at college level (or equivalent).

GREEK 465 Early Greek Literature (3-5, max. 15) VLPA Readings and discussion of selected authors of classical Athens. Recommended: minimum of two years of ancient Greek language study at college level (or equivalent).

GREEK 466 Literature of Classical Athens (3-5, max. 15) VLPA Readings and discussion of selected authors of classical Athens. Recommended: minimum of two years of ancient Greek language study at college level (or equivalent).

GREEK 482 Imperial Greek Literature (3-5, max. 15) VLPA Readings and discussion of selected authors of the first century CE onward, including Dio Chrysostom, Apian, Plutarch, Aelius Aristides, Lucian, Athenaeus, and New Testament Koine. Recommended: minimum of two years of ancient Greek language study at college level (or equivalent).

GREEK 490 Supervised Study (*, max. 18) Special work in literary and philosophical texts for graduates and undergraduates. Recommended: minimum of two years of ancient Greek language study at college level (or equivalent).

GREEK 500 Grammar and Composition (5) Bliquez, Blondell Translation of passages from English to Greek for the purpose of acquiring advanced knowledge of the grammar and the style of the classical tongue.

GREEK 501 Homer (5) Levaniouk Readings from the Iliad or the Odyssey.

GREEK 503 Aristophanes (5) Bliquez Select comedies.

GREEK 504 Plato (5) Blondell The Republic or other dialogues.

GREEK 506 Aristotle (5) Blondell.

GREEK 508 Lysias and Demosthenes (5) Bliquez Select speeches, oratorical theory, historical questions.

GREEK 510 Greek Historians (5, max. 10) Bliquez.

GREEK 512 Greek Tragedy (5, max. 10) Aeschylus, Sophocles, and/or Euripides.

GREEK 515 Greek Epigraphy (5) Selected inscriptions from various Greek states and sanctuaries and evidence they provide for religious and social practices, literature, and political history. Classification and editing of inscriptions, and epigraphical techniques.

GREEK 520 Seminar (5, max. 45).

GREEK 524 Greek Prose (5) LBPL Translation of selections from classical Greek literature. Prerequisite: LBPL 101. Offered: W.

GREEK 301 Greek Language, Accelerated (5) Intensive introduction to Attic Greek. Not accepted as upper-division credit toward a major in Greek or classics. Does not satisfy foreign language proficiency requirement. Cannot be taken for credit if GREEK 101 already taken. Offered: W.

GREEK 305 Attic Prose (5) VLPA Translation of selections from Attic prose; elementary exercises in Attic prose composition. Recommended: GREEK 103, GREEK 301, or equivalent.

GREEK 306 Attic Prose (5) VLPA Translation of selections from Attic prose; elementary exercises in Attic prose composition. Prerequisite: GREEK 305.

GREEK 307 Homer (5) VLPA Translation of selections from the Iliad or the Odyssey; Attic prose composition, metrics. Prerequisite: GREEK 306. Offered: Sp.

GREEK 308 Introduction to Koine Greek Texts (3) VLPA Williams Reading and discussion of selected religious and philosophical texts from Koine Greek.

GREEK 413 The Pre-Socratic Philosophers (3) VLPA Blondell Recommended: minimum of two years of ancient Greek language study at college level (or equivalent).

GREEK 414 Plato (3) VLPA Blondell Recommended: minimum of two years of ancient Greek language study at college level (or equivalent).

GREEK 415 Aristotle (3) VLPA Blondell Recommended: minimum of two years of ancient Greek language study at college level (or equivalent).

GREEK 504 Plato (5) Blondell The Republic or other dialogues.

GREEK 506 Aristotle (5) Blondell.

GREEK 508 Lysias and Demosthenes (5) Bliquez Select speeches, oratorical theory, historical questions.

GREEK 510 Greek Historians (5, max. 10) Bliquez.

GREEK 512 Greek Tragedy (5, max. 10) Aeschylus, Sophocles, and/or Euripides.

GREEK 515 Greek Epigraphy (5) Selected inscriptions from various Greek states and sanctuaries and evidence they provide for religious and social practices, literature, and political history. Classification and editing of inscriptions, and epigraphical techniques.

GREEK 520 Seminar (5, max. 45).

GREEK 590 Supervised Study (*, max. 18) Prerequisite: permission of graduate program coordinator.

GREEK 600 Independent Study or Research (*).

Latin

LATIN 101 Elementary Latin (5) An intensive study of grammar, with reading and writing of simple Latin prose. Offered: A.

LATIN 102 Elementary Latin (5) An intensive study of grammar, with reading and writing of simple Latin prose. Prerequisite: LATIN 101. Offered: W.

LATIN 103 Elementary Latin (5) Reading of selections from classical Latin literature. Prerequisite: LATIN 102. Offered: Sp.

LATIN 300 Latin Language, Accelerated (5) Intensive introduction to classical Latin. Not accepted as upper-division credit toward a major in Latin or classics. Does not satisfy foreign language proficiency requirement. Cannot be taken for credit if LATIN 101 already taken. Offered: W.

LATIN 305 Introduction to Latin Literature (5) VLPA Readings in prose and poetry from various Latin authors; elementary exercises in Latin prose composition. Recommended: LATIN 103, LATIN 301, or equivalent. Offered: A.
LATIN 306 Cicero and Ovid (5) VLPA Readings from the orations of Cicero and the poetry of Ovid; elementary exercises in Latin prose composition. Prerequisite: LATIN 305. Offered: W.

LATIN 307 Vergil (5) VLPA Selections from the first six books of the Aeneid; elementary exercises in Latin prose composition or metrics. Prerequisite: LATIN 306. Offered: Sp.

LATIN 401 Medieval Latin Literature to 1200 (3) VLPA Hindi Reads text in Latin; cultural and historical contexts discussed. Presupposes year and a half or Latin or equivalent. Informal individual guidance available to members of class handling medieval or Renaissance Latin texts in their research. Recommended: LATIN 306.

LATIN 402 Later Medieval and Renaissance Latin Literature (3) VLPA Hindi Texts read in Latin; cultural and historical contexts discussed. Presupposes year and a half of Latin or equivalent. Informal individual guidance available to members of class handling medieval or Renaissance Latin texts in their research. Recommended: LATIN 306.

LATIN 414 Seneca (3) VLPA Blondell, Clauss Recommended: minimum of two years of Latin language study at college level (or equivalent).

LATIN 412 Lucretius (3) VLPA Blondell, Clauss Recommended: minimum of two years of Latin language study at college level (or equivalent).

LATIN 414塞内卡 (3) VLPA Blondell, Stroup Recommended: minimum of two years of Latin language study at college level (or equivalent).

LATIN 422 Livy (3) VLPA Clauss, Gowing Recommended: minimum of two years of Latin language study at college level (or equivalent).

LATIN 423 Cicero and Sallust (3) VLPA Clauss, Gowing, Stroup Recommended: minimum of two years of Latin language study at college level (or equivalent).

LATIN 424 Tacitus (3) VLPA Clauss, Gowing Recommended: minimum of two years of Latin language study at college level (or equivalent).

LATIN 447 Roman Lyric (3) VLPA Clauss, Harmon Recommended: minimum of two years of Latin language study at college level (or equivalent).

LATIN 449 Roman Elegy (3) VLPA Harmon, Hinds Recommended: minimum of two years of Latin language study at college level (or equivalent).

LATIN 451 Roman Satire (3) VLPA Connors, Stroup Recommended: minimum of two years of Latin language study at college level (or equivalent).

LATIN 457 Roman Drama (3) VLPA Connors Recommended: minimum of two years of Latin language study at college level (or equivalent).

LATIN 458 Roman Epic (3) VLPA Clauss, Connors, Harmon, Hinds Recommended: minimum of two years of Latin language study at college level (or equivalent).

LATIN 461 Latin Literature of the Republic (3-5, max. 15) VLPA Readings and discussion of selected authors from the era of the Roman Republic. Recommended: minimum of two years of Latin language study at college level (or equivalent).

LATIN 462 Latin Literature of the Augustan Age (3-5, max. 15) VLPA Readings and discussion of selected authors from the Augustan era. Recommended: minimum of two years of Latin language study at college level (or equivalent).

LATIN 463 Latin Literature of the Empire (3-5, max. 15) VLPA Readings and discussion of selected authors from the Roman Empire. Recommended: minimum of two years of Latin language study at college level (or equivalent).

LATIN 465 Roman Topography and Monuments (5, max. 10) VLPA Clauss, Gowing, Harmon, Stroup Study of the material remains of ancient Rome from the archaic period through the imperial age. Reading of source materials and inscriptions in Latin. Conducted in Rome. Recommended: minimum of two years of Latin language study at college level (or equivalent). Offered: Sp.

LATIN 490 Supervised Study (*, max. 18) Special work in literary and philosophical texts for graduates and undergraduates. Recommended: minimum of two years of Latin language study at college level (or equivalent).

LATIN 500 Grammar and Composition (5) Clauss, Gowing, Hinds, Stroup Translation of passages from English to Latin for the purpose of acquiring advanced knowledge of the grammar and style of the classical tongue.

LATIN 501 Vergil (5) Clauss, Harmon, Hinds .

LATIN 502 Horace (5) Clauss, Harmon .

LATIN 503 Plautus and Terence: Early Roman Literature (5) Blondell, Connors, Stroup .

LATIN 504 Philosophy at Rome (5) Blondell, Stroup Selected philosophical works of Cicero and other sources for Hellenistic and Roman philosophy.

LATIN 506 Cicero (5) Gowing, Stroup Select speeches, with attention to rhetorical theory and/or letters.

LATIN 508 Silver Latin Literature (5) Connors, Hinds .

LATIN 510 Roman Historians (5, max. 10) Clauss, Gowing .

LATIN 512 Augustan Poetry (5, max. 15).

LATIN 520 Seminar (5, max. 45).

LATIN 590 Supervised Study (*, max. 18) Prerequisite: permission of graduate program coordinator.

LATIN 600 Independent Study or Research (*) .

Communication

COM 201 Introduction to Communication I (5) I&S Introduces students to four core principles that undergird the study and practice of communication — communication literacy, research inquiry, theories and concepts, and community engagement. Principles discussed and developed in the context of international communication, political communication, and communication technology and society.

COM 202 Introduction to Communication II (5) I&S/VLPA Introduces students to four core principles that undergird the study and practice of communication — communication literacy, research inquiry, theories and concepts, and community engagement. Principles discussed and developed in the context of social interaction, rhetoric and critical studies, and communication and culture.

COM 220 Introduction to Public Speaking (5) I&S/VLPA Designed to increase competence in public speaking and the critique of public speaking. Emphasizes choice and organization of material, sound reasoning, audience analysis, and delivery.

COM 222 Speech Communication in a Free Society (3) I&S/VLPA Problems and arguments related to freedom of speech; early English writers on freedom of expression; background of freedom of speech in the United States; contemporary freedom of speech issues.

COM 234 Public Debate (5) I&S/VLPA Examines public debate in a democracy by developing a rhetorical perspective of public argument and skills to evaluate debates critically. Develops an understanding of rhetoric, values, audiences, tests of reasoning, and sources of information. Sharpens critical skills and applies them to contemporary controversies in the public sphere.

COM 251 Interviewing (5) I&S/VLPA Interviewing principles and practices, with emphasis on information gathering, selection, and persuasive interviews. Purposes and types of interviews, structure of interviews, and influence of communication patterns on interview outcomes.

COM 270 Interpersonal Communication (5) I&S/VLPA Emphasizes analyzing and understanding communication variables affecting human relationships, such as person perception, feedback, idea development, nonverbal cues. Focus on informal communication settings.

COM 273 Parliamentary Procedure (3) I&S/ VLPA Principles and practice: a study of the historical bases and contemporary uses of parliamentary procedure; methods and practice in organizing and conducting public meetings.

COM 300 Basic Concepts of New Media (5) I&S/VLPA Provides a comprehensive examination of the effects of new, digital media on interpersonal communication, media industries, and media culture. Emphasis on economic, social, political, and aesthetic implications. Provides limited experience with computer-based media. No prior technical computer experience assumed.

COM 301 Navigating Information Networks for Mass Media (5) I&S Builds familiarity with computer-mediated information networks. Introduces and compares network search engines, agents, browsing/viewing tools and
COM 302 The Cultural Impact of Information Technology (5) I&S/VLPA Utilizing approaches from the history of technology, cultural studies, and literary theory, seeks to analyze the cultural and social impact of information technology. Considers how information technologies impact our relationships with others, our concept(s) of self, and the structure of the communities to which we belong. Offered: jointly with CHID 370.

COM 304 The Press and Politics in the United States (5) I&S Journalist’s role in elections and public policy. Relationship between news coverage and political campaigns. Study and analysis of local political newswriting, reporting, and response by local and state political figures. Offered: jointly with POL S 304.

COM 305 The Politics of Mass Communication in America (5) I&S Role of mass audiences in politics from the standpoint of the communication strategies used to shape their political involvement. Topics include: social structure and political participation, political propaganda and persuasion, the political uses of public opinion, and the mass media and politics. Offered: jointly with POL S 305.

COM 306 Media, Society and Political Identity (5) I&S Explores how society and culture are both represented in and shaped by communication technologies and media content. Media include film, advertising, news, entertainment television, talk shows, and the Internet. Explores how media represent and affect individual identity, values, and political engagement. Offered: jointly with POL S 306.

COM 320 Public Speaking (5) I&S/VLPA Practice in preparation and presentation of a variety of types of public speeches based on study of their structure and form; emphasis on organization and delivery. Prerequisite: COM 220.

COM 321 Communications in International Relations (5) I&S Looks at communications in relations between international groups and states. Examines the range of functions and roles communication media play in international affairs, global issues, and intergroup relations. Also examines the strategic use of communications by various groups. Offered: jointly with POL S 330.

COM 322 Global Communication (5) I&S Introduction to the history, purpose, channels, content, technologies, policy, and regulation of international communications systems. Issues covered include disparities in media development between post-industrial and developing nations, imbalances in international news and information flow, and the emergence of global communications. Offered: jointly with POL S 329.

COM 329 Rhetoric of Social and Political Movements (5) I&S/VLPA inquiry into the rhetoric of social and political movements; emphasis on investigation of persuasive discourse; examination of the nonverbal symbols of persuasion.

COM 331 The Rhetorical Tradition in Western Thought (5) I&S/VLPA Analysis of the major theories that prescribe and describe the use of symbols to change attitudes and behavior. Principal emphasis is placed upon defining the nature and scope of rhetoric and upon analyzing the art’s underlying assumptions about human beings as symbol users. Some background in history, philosophy, and literature is desirable.

COM 333 Essentials of Argument (5) I&S/ VLPA Argument as a technique in the investigation of social problems; evidence, proof, refutation, persuasion; training in argumentative speaking.

COM 340 History of Mass Communication (5) I&S History and development of communication from prehistoric times; rise of mass media; political and economic context of newspapers, radio, film, and television.

COM 342 Media Structure (5) I&S Industrial organization and culture; consumer and producer decisions; public policy toward media; workforce and unions. Media role in culture and political economy.

COM 343 Effects of Mass Communication (5) I&S Effects of mass communication on individuals and society. Relevant theories applied to research evidence, addressing such topics as effects of stereotyping, violent and sexual imagery, and persuasive messages on our knowledge, attitudes, and behaviors.

COM 359 Writing for Mass Media (5) I&S Training in gathering information through interviews and observation and from written record and other public sources. Practice in organizing and writing this information for presentation in a mass medium such as a newspaper, newsletter, or magazine. Offered: AWSPs.

COM 360 Beginning Newswriting and Reporting (4) I&S Introduction to newswriting and reporting for print media. Focus on defining news, general writing skills, constructing leads, preparing a variety of basic journalism news stories, interviewing techniques, covering beats, and journalistic style.

COM 361 Advanced Reporting and Newswriting (4) I&S In-depth training in the development of advanced-level reporting and newswriting skills. Practice in information gathering, interviewing, use of sources, database analysis, and investigative reporting techniques. Recommended: COM 360.

COM 362 Community Journalism: News Lab (5) I&S Newswriting-skills course. Students gain real-world experience by producing news and feature stories for client papers in the Puget Sound Region. Involves considerable one-on-one work with the lecturer/editor. Requires writing and reporting skills. Recommended: COM 361.

COM 373 Communication in Small Groups (5) I&S/ VLPA Discussion as an everyday community activity, with emphasis on the informal cooperative decision-making methods of committee, conference, and roundtable groups.

COM 374 Perspectives on Language (5) I&S/ VLPA Study of language and meaning, and survey of several influential modern approaches, including the semantic, generative, behavioristic, and analytic philosophies. Relates theories of language and meaning to the study of speech communication.

COM 375 Communication Ethics (5) I&S/ VLPA Ethical problems in interpersonal and public speech communication. Alternative ways of evaluating and responding to moral problems in a variety of communication situations.

COM 376 Nonverbal Communication (5) I&S/ VLPA Reviews the nature of nonverbal communication as part of the human message system. Discusses research on the types of cues that are part of the nonverbal system, reviews some communicative functions allowed by nonverbal cues (e.g., emotional expressions, relational messages, deception, coordination, or interaction), and ties nonverbal communication to language.

COM 378 Social Approaches to Interpersonal Communication (5) I&S/ VLPA Exploration of several social approaches to interpersonal communication, emphasizing the theorists' philosophical orientations and practical applications.

COM 382 Social Scientific Approaches to Communication Research (5) I&S Comprehensive introduction to research methods employed in basic and applied communication research, including sample surveys, content analysis, experimentation, and elementary statistics.

COM 395 Communication Internship (2-5, max. 5) Faculty-supervised study of communication principles in internship contexts. Readings to aid students in observations of communication concepts combined with individualized reading structured around topics of interest for each student.

COM 402 New Media as Virtual Communities (5) I&S Technologically-mediated virtual communities considered through analysis of historical precedents and influences and through an exploration of the concept of community. Issues include a focus on social interactions; the social, political, economic, and technological contexts of virtual communities and the limits for their sustenance.

COM 405 New Media Criticalism (5) I&S/ VLPA Examines critically the content of new media forms, contrasting them with traditional media. Stresses influences of social, economic, political, and technological forces on content and developing strategies for critical analysis.

COM 407 Communication Technology and Politics (5) I&S Employs some core concepts of political communication and theories of democracy to examine the emerging role of information and communication technologies in...
candidate and issue campaigning; online voting; protest and advocacy movements; law-making and electronic governance in the United States and internationally. Offered: jointly with POL S 451.

COM 414 Mass Media and Public Opinion (5) I&S Examines the foundations of the idea of public opinion in a democratic environment and the role of mass communication in the organization, implementation, and control of that opinion. Considers these relationships from the perspectives of societal elites, media, and citizens. Offered: jointly with POL S 452.

COM 417 Political Deliberation (5) I&S Exploration of philosophical and empirical writings on political deliberation in small groups, campaigns, and other public settings. Contempor- ary deliberative theory. Participation in face-to- face discussions on current issues. Recommended: either COM 273 or COM 373. Offered jointly with POL S 455.

COM 418 Communications and the Environment (5) I&S Examines the role of mass media in the resolution of environmental problems. Topics include strengths and weaknesses of media coverage, use of media by environmental groups and government agencies, media effects on public opinion, and mass communication and social movements. Offered: jointly with ENVIR 418.

COM 420 Comparative Media Systems (5) I&S Provides students an understanding of policies that shape national communication processes and systems. Uses comparative analysis to identify both similarities and differences among media structures of nations at different levels of development. Primary emphasis on broadcast media. Offered: jointly with SIS 419/POL S 468.

COM 423 Communication and Social Change (5) I&S Examines both theory and application involved in using communications media as a tool for addressing political, social, and economic development issues. Utilizes a case study approach to look at localized applications of traditional and new communications tools in the pursuit of sustainable development.

COM 425 European Media Systems (5) I&S Examines media systems in selected countries in Europe and policy issues that link (or divide) members of the European Union and other major media producers. Media studied in context of the contemporary economic, social, political, and cultural milieu in which they operate. Offered: jointly with EURO 425.

COM 426 International Media Images (5) I&S Ways in which media construct images of international peoples and events. Develops a set of critical tools for assessing media portrayals of international affairs and cultures.

COM 427 International Communications Law and Policy (5) I&S Examines the international and comparative aspects of traditional press law, broadcast regulation, and telecommunications policy. Also examines freedom of the press in international reporting and the efforts of countries to limit foreign media influences within their borders.

COM 428 Asian Media Systems (5) I&S Examines the media systems and communication policies in selected Asian countries. Identifies and analyzes the cultural, economic, historical, and political parameters that influence these media.

COM 429 Chinese Communications Systems (5) I&S Examines the economic, historical, intellectual, social, and political foundations of communications systems in the region of China as far west as Hong Kong, Singapore, and Taiwan. Focus primarily on print and broadcast journalism.

COM 430 Canadian Documentary Film Traditions (5) I&S History and development of non-fiction film documentary traditions, especially in Canada, the first institutionally defined area in which documentarians became prominent through the National Film Board and the Canadian Broadcasting Corporation. Discussion of Flaherty, Greiser, and independ- ent network producers who developed present-day style of documentaries. Offered: jointly with SISCA 430.

COM 431 Rhetorical Criticism (5) I&S/VLPA Study of approaches to rhetorical inquiry that aid in the description, analysis, interpretation, and evaluation of discourse. Applies various critical models to a chosen artifact.

COM 434 Argumentation Theory (5) I&S/VLPA Theory and research on the structure and properties of argument, argument fields, argument modeling, the influence of audience, argument criticism, and related topics. Prerequisite: either COM 220 or COM 334.

COM 435 Historic American Public Discourse (5) I&S/VLPA Rhetorical criticism of historical public speeches, essays, and declarations. Includes readings of public texts in their historical and political context to increase understanding of those texts, their rhetorical construction, and the culture from which they arose. Covers the beginnings of the nation to the middle of the 20th century.

COM 436 Contemporary American Public Discourse (5) I&S/VLPA Rhetorical criticism of contemporary public messages. Includes reading of public texts in their context to increase understanding of those texts, their rhetorical construction, and the culture from which they arose. Covers mid-20th century to the present.

COM 437 Rhetorical Perspectives in Intellectual Revolutions (5) I&S/VLPA Rhetorical investigation of selected major writings. Examines the rhetorical dimension in the progress of ideas through analysis of documents of major intellectual revolutions as persuasive works. Relates principal revolutions in Western thought to contemporary controversy. Examines Rights of Man, Communist Manifesto, The Origin of Species.

COM 440 Mass Media Law (5) I&S Survey of laws and regulations that affect the print and broadcast media. Includes material on First Amendment, libel, invasion of privacy, freedom of information, copyright, obscenity, advertising and broadcast regulation, and matters relating to press coverage of the judicial system. Offered: jointly with POL S 461.

COM 441 United States Media History (5) I&S Development of mass communication in the United States with emphasis on role of mass media in politics, economics, gender, and race.

COM 442 History of Media Technology and Regulation (5) I&S Impact of pre-1980s media technologies — printing, telecommunications, broadcasting, photography, and more — on individuals and institutions, especially government, business, and the mass media. How laws and policies have changed to govern new media forms.

COM 443 Indigenous Film, Sovereign Visions (5) VLPA/I&S Cote', Hart, Ross Explores fiction, documentary, experimental film, and digital media from indigenous artists from around the world. Focuses on personal, political, and cultural expression. Issues include media and sober- eignty movements, political economy, language revitalization, the politics of decolonization, and indigenous aesthetics. Offered jointly with AIS 443.

COM 444 Public Relations and Society (5) I&S Overview of issues, strategies, and role of public relations professionals in various areas of American society, including media relations, government relations, community affairs, and consumer relations.

COM 451 Mass Media and Culture (5) I&S/ VLPA Empirical and theoretical framework for analyzing role of mass media in cultural change. Historical and contemporary cases consider ethnic, gender, class, and urban-rural conflicts and cultural roles of sports, elections, and national rituals. Focus on visual electronic media.

COM 452 Crisis Communications (5) I&S Study of the functions of communications professionals during crises, public relations professionals as advocates for organizations and companies in crisis and the news media as advocates of the mass public. Discussion of cases.

COM 460 Special Reporting Topics (4, max. 8) I&S Topics vary. x.

COM 461 Computer-Assisted Journalism (5) I&S Introduction to computer-assisted journalism and other advanced reporting techniques. Includes hands-on electronic data analysis, exploration of on-line investigative tools, and the fashioning of electronically-retrieved information into news stories. Students examine ethical and technical challenges these tools present to media and society.

COM 463 Copy Editing and Design (5) I&S Focus on editing copy for publications, covering grammar and style, production methods, news criteria, use of wire services, headlines, make-up and design, pagination, and online publication.

COM 464 Opinion Writing (5) VLPA Combines the teaching expertise of a Department of Communication faculty member with the
professional expertise of an opinion-writing journalist. Students learn about and practice writing newspaper editorials, columns, and various forms of criticism in order to gain an understanding of the differences between news and opinion content in print journalism. Prerequisite: COM 361.

COM 465 Legislative Reporting (12) I&S Coverage of Washington legislature for a daily newspaper. Selected students live in Olympia, interview legislative delegations, report on committee and floor sessions, and attend and report on gubernatorial and other press conferences.

COM 466 Digital Journalism (5) I&S A. Chan Introduction to digital journalism. Integrates Web design, video, still, and sound to develop an Internet Webcast called DIA (Digital Interactive) News. Students serve as sole initiators of DIA news, utilizing journalistic standard of storytelling, video production, and editing and design. Prerequisite: COM 300.

COM 467 Feature Writing (5) VLPA Focuses on the many types of newspaper and magazine articles that do not fall into the category of hard news, including histories and backgrounders, how-to and explanatory, consumer information, statistical pieces, first-person, and participatory. Includes practice in writing these forms. How to market freelance manuscripts.

COM 468 Journalism Ethics (5) I&S A. Simpson Provides a method and substantive context based on ethical theory, media history, and value systems analysis for analyzing and resolving dilemmas raised by journalistic practices.

COM 469 Intellectual Foundations of American Journalism (5) I&S Examines the thinkers and philosophers who have influenced modern journalism. Studies the main ideas in the development of world thought and their impact on today's journalists. Explores the role communications systems have played in the creation of the world's cultures.

COM 470 Discourse: Analyzing Talk and Texts (5) I&S/VLPA From gossip to globalization, a critical and practical introduction to contemporary theories/methods in the study of discourse: how verbal communication is used in conversational talk and mediated texts to construct identities and relationships; and how power, control, and ideology are reproduced through language used in everyday social interactions.

COM 471 Persuasion (5) I&S/VLPA Analysis of the ways in which beliefs, values, attitudes, and behavior are deliberately influenced through communication.

COM 472 Empirical Approaches to Interpersonal Communication (5) I&S Examination of theories and research on the development and deterioration of interpersonal relationships. Emphasis on the nature of interpersonal interaction, the role of language and nonverbal communication in relationships, functional and dysfunctional interaction patterns, and the dynamics of interpersonal networks.

COM 473 Problems of Discussion Leadership (3) I&S/VLPA Critical analysis of leadership in committee and conference, with emphasis on the development of speech effectiveness in the cooperative achievement of goals. Prerequisite: COM 373.

COM 474 Communication, Conflict, and Cooperation (5) I&S/VLPA Role of communication in resolving informal conflicts and in facilitating interpersonal and intergroup cooperation. Review of empirical literature. In-class simulations and exercises.

COM 475 Organizational Communication (5) I&S/VLPA Role of communication in organizations, the types of problems arising, and approaches to their resolution. Communication in the human relations productivity of organizations. Applying communication skills in various organizational roles.

COM 476 Models and Theories in Communication (5) I&S Examination of selected theories and models of speech communication as well as of criteria applicable to them. Emphasis on the nature and function of theories and models, especially as these relate to basic principles underlying the scientific, interpretive, and critical study of speech communication phenomena.

COM 478 Intercultural Communication (5) I&S Examines intercultural communication theory and its application for varying levels of human interaction: interpersonal, intergroup, and international.

COM 479 Communication in Children's Environments (5) I&S/VLPA Study of the communication capacity of children with emphasis on the analysis of the communication process in formal and informal learning environments. Includes examination of communication-based educational approaches and instructional strategies.

COM 480 Communication in Adolescent Environments (5) I&S/VLPA Study of the communication process in youth environments with a primary focus on formal and informal learning. Includes critical analysis of communication in contemporary instructional settings and the development of communication strategies for teaching and learning.

COM 482 Computer-Mediated Interpersonal Communication (5) I&S Examination of relationships and groups formed through computer-mediated interpersonal communication. Focus on how people manage interactions and identities, develop interpersonal relationships, engage in collaboration and conflict, and develop communities in virtual environments. Involves both the study and use of network-based computer-mediated systems.

COM 484 Cultural Codes in Communication (5) I&S/VLPA Social and cultural codes in interpersonal communication, with special reference to contemporary American subcultural groups and their communication patterns.

COM 488 Race, Gender, and Power in Asian American Media (5) I&S Examines the cultural, political, and social facets of Asian American media since 1915 within such key issues as racial and sexist stereotypes, white privilege and hegemony, identity, and agency and empowerment. Informed by critical theories of race and ethnicity.

COM 489 Ethnicity, Gender, and Media (5) I&S Media portrayal of women and people of color; creation of alternative media systems by women and people of color in the United States. Offered: jointly with AES 489/WOMEN 489.

COM 495 Special Topics in Communication (2-5, max. 15) Lecture, seminar, and/or team study. Topics vary.

COM 496 Honors Seminar (5) I&S/VLPA Preparation for researching and writing senior honors thesis.

COM 498 Independent Research (1-5, max. 10) Work on research projects designed and conducted by undergraduate students.

COM 499 Directed Research (1-5, max. 10) Work on research projects designed by faculty members.

COM 500 Communication Theory Development (5) Covers the philosophy behind theory development, discusses the basic components of theories, and reviews significant theoretical contributions in communication from social scientific and humanistic traditions. Introduces students to the process of conceptualization and theory design through reading and discussion of relevant bodies of communication scholarship.

COM 501 Methods of Inquiry (5) Overviews some of the most important methods of inquiry used to investigate communication phenomena. Includes textual criticism, content analysis, ethnography, experimentation, survey research, and historical approaches. Explores the utility of different methods for investigating research topics, defining and measuring concepts, reading texts, and investigating theories.

COM 502 Communication Scholarship and Public Life (5) Examines potential connections between communication scholarship and government, markets, civil society, and the general public.

COM 507 Interdisciplinary Communication Theory (5) Introduces students to challenges, benefits, and processes of interdisciplinary research. Explores formation of disciplinary boundaries. Considers significant theories that have influenced communication research. Considers how synthetic theoretical arguments are made and how to integrate work from fields with different epistemologies.

COM 509 Collaboration and Scholarship (5) Examines the collaborative research process. Students identify and conceptualize a group project, carry it out, and present findings. Topic varies. Prerequisite: COM 501 or equivalent.

COM 511 Content Analysis (5) Content analysis as a technique for making inferences from texts. Includes quantitative, qualitative, and computer-assisted approaches to analysis.

COM 512 Critical, Social, and Practice-Based Approaches (5) Explores approaches to communication research developed from understandings of human communication as inherently social, grounded in tool-mediated action, and intertwined with power relations. Covers a range of theories that are associated with these approaches, and the implications of these theories for methods of data collection and analysis.
COM 513 Fieldwork Research Methods (5-, max. 10) Methods of fieldwork research in communication studies, with emphasis on participant observation, ethnography, and discourse analysis.

COM 515 Rhetorical Criticism (5) History and method of rhetorical criticism. Application of critical standards to various rhetorical artifacts.

COM 516 Descriptive and Analytic Communication Research Methods (5) Development of the historical approach to communications research. Study of historical methods, bibliography, and criticism.

COM 517 Survey Research (5) Faculty-directed project in survey research in which basic principles of survey design, including sampling, observation, measurement, data analysis, and data interpretation, are all applied. Prerequisite: elementary statistics or permission of instructor.

COM 520 Statistical Methods in Communication (5) Reviews the steps taken in social scientific research on communication, with emphasis on the conceptualization, operationalization, and analysis of quantifiable variables. Highlights understanding of computer application of univariate and bivariate statistics, focusing on both parametric and nonparametric tests.

COM 521 Advanced Statistical Methods in Communication (4) Discusses complexities in quantitative research on communication. Focus on multivariate data design and analysis, including multiple and logistic regression, ANOVA and MANOVA, and factor analysis. Prerequisite: COM 520.

COM 527 International Communication Research Methods (5) Methodological issues particular to the design or analysis of research that deals with data from different countries, cultures, or sub-cultures. Prerequisite: COM 501 or equivalent.

COM 528 Designing Internet Research (5) Focuses on designing Internet research, assessing the adaptation of proven methods to Internet tools and environments, and developing new methods in view of particular capacities and characteristics of Internet applications. Legal and ethical aspects of Internet research receive ongoing consideration.

COM 529 Research Strategies and Methodologies in Digital Media (5) Introduces and compares methods of inquiry into digital media industries, practitioners, and consumers. Develops theories and skills applicable in business decision-making processes, as well as in scholarly research.

COM 530 Philosophical Issues in Rhetorical and Communication Theory (5) Survey of selected philosophical controversies among speech communication theorists, and analysis of one philosopher's approach to communication. Topics include paradigm descriptions of communication, rhetoric and knowledge, linguistic analysis and communication, hermeneutics and dialogue.

COM 531 Rhetoric in Society (5) Selected works of major rhetorical theorists such as Aristotle, Cicero, Augustine, Campbell, Whately, Perelman, and Burke. Examines how rhetorical themes are responsive to and symptomatic of societal conditions and values.

COM 532 Classical Rhetoric (5) Development of the classical tradition in rhetorical theory, criticism, and pedagogy from the sophists to Augustine; analysis of the contributions of major figures and works to that tradition.

COM 535 Critical Theory Applications in Communication (5) Major approaches in critical theory: Marxism, psychoanalysis, structuralism, and semiology. Synthesizes these approaches by viewing the "cultural studies" tradition. Assesses critical theory through empirical study of network television in the United States and the United Kingdom.

COM 538 Theories and Criticism of Communication Technologies (5) Potential of the computer for use in behavioral science. Prerequisite: elementary programming, elementary statistics.

COM 540 The Rhetoric of Science (5) Examines selected topics in the rhetoric of science, underscoring the interplay of language, situation, culture, and prior tradition in the quest for exact knowledge of the natural world. Scrutinizes scientific communication in intradisciplinary, interdisciplinary, and extradisciplinary contexts.

COM 542 Readings in Communication History (5) Selected readings on the history of communication.

COM 543 Research Seminar in Historic and Contemporary Communication (5) Topical research seminar in historic and contemporary communication.

COM 545 Development of Mass Communication (5) Institutions of mass communication. Political and social roles.

COM 546 Evolution and Trends in Digital Media (5) Examines the past, present, and future of digital communication from diverse disciplinary and theoretical perspectives. Offered: A.

COM 547 Telecommunications Policy and Convergent Media (5) Structures and policies governing the functioning of communication technologies and data flow: United States and international perspectives. Interdisciplinary approach.

COM 549 Mass Communication Process and Effects (5) Analytic approach to conceptualization and research in the field since 1900.

COM 550 European Union Information Society Policy (5) Gifford Analysis of European Union policy and regulatory documents relating to cultural, economic, political, social, and technological aspect of the new information society, including efforts to promote transborder flows of television programs in Europe.

COM 551 Political Communication (5) Surveys classic works and new directions in political communication, including functionalist, structuralist, constructivist, network, and comparative approaches, reflecting a range of methods. Examines political organizing, electoral and legislative processes, civic (dis)engagement, media and politics, public deliberation and opinion formation, political identity and discourse. Offered: jointly with POL S 551.

COM 553 Public Opinion and Communication (5) Conceptual and methodological approaches to public opinion and communication as historical and behavioral phenomena. United States and international perspectives.

COM 554 Discourse and the Politics of Resistance (5) Examines how disciplines theorize and empirically study discourse in the politics of resistance. Examines the discursive turn in U.S. and European "new" social movement theory.Ranges across disciplines, such as political sociology, cultural anthropology and human geography, to discover ways in which discourse is conceptualized and studied for its role in seeding social change. Offered: jointly with POL S 567.

COM 555 Political Deliberation (5) VLPA I&S Gastil Exploration of deliberative theories of democracy and research on political discussion in campaigns, face-to-face meetings, on-line forums, and informal conversations. Presents different uses and understandings of deliberation and its role in democratic governance. Recommended: COM 577, POL S 551/COM 551. Offered jointly with POL S 558.

COM 556 Political Communication Research Practicum: Community, Communication, and Civic Engagement (5) Overview of the research process, including literature review, hypothesis generation, data gathering, empirical analysis, and writing for publication Topics vary with instructor, but generally address questions of how communication affects democracy and citizen engagement in national or international contexts. Offered: jointly with POL S 594.

COM 557 Government and Mass Communication (5) Legal problems of mass communication, institutions, and media operations.

COM 558 U. S. Digital Media Law and Policy (5) Examines the conceptual framework and social application of existing regulations and policies on digital media, with the aim of helping professionals address the changing legal and policy environments.

COM 559 Media and Foreign Policy (5) The role of communications media in how nations interact. The media as source, actor, and catalyst in international affairs. Interdisciplinary focus.

COM 561 Regional Communication Systems (5) Communication as a factor in economic, sociocultural, and political relations among nations of a region. Focus varies with specialization of instructor. Consult graduate secretary for details. Interdisciplinary focus.

COM 562 International Communication Systems (5) International communications and contemporary issues that affect the functioning of global communication systems. Interdisciplinary focus.

COM 564 Media, Myth, and Ritual (5) Douglas Examines the way media operate in a secular society with many of the characteristics that traditionally have been imputed to spirituality and religion. Analyzes media's mythological and ritualistic function in society by taking an interdisciplinary approach informed by religious studies, cultural studies, journalism, and communication theory.
COM 556 Mass Media Structure (5) Research on the structural aspects of mass communication.

COM 566 Discourse and Sexuality (5) Seminar-based analysis of discourse and social construction of erotics/desire in face-to-face/ mediated paradigms for instructional communication. Examination of the reproduction of power, control and ideology through the linguistic and semiotic realization of sexuality. Offered: jointly with WOMEN 556.

COM 567 Gender, Race, and Communication (5) Analysis of the role of media in the construction of reality, production processes, and their influence on media representation of women and people of color. Offered: jointly with WOMEN 589.

COM 570 Organizational Communication (5) Examination of social scientific theory and research on communication in organizations. Topics include quantitative and qualitative approaches to process of organizational communication, function and structure of macro networks, superior-subordinate relationships, and the role of communication in organizational change, development, and effectiveness.

COM 576 Interpersonal Communication (5) Social scientific research and theory on the role of communication in developing and maintaining interpersonal relationships. Nature of interpersonal communication, relationship change processes, interpersonal control through communication, and personal communication networks.

COM 577 Communication in Small Groups (5) Reviews research and theory on the group communication theories and the history of research on small groups. Topics include structuration, democratic decision making, symbolic convergence, and the influence of personality, gender, and ethnicity on group communication. Includes students in original research projects on communication in small group settings.

COM 578 Intercultural Communications (5) Manusov, Rivenburgh Focuses on the nature of communication between different cultures, including the processes as they occur on sojourns, immigration, negotiations, and conversations across national boundaries. Specific topics include identity formation and expression, intercultural relationships, stereotyping, prejudice, and group affiliation.

COM 580 Nonverbal Communication (5) Reviews primary theories and research on nonverbal communication. Focus on development and social aspects of nonverbal cues, including review of communicative functions served by nonverbal channels. Topics include paralinguistic systems, relational messages, deception, acquisition of cue use, and emotional expression. Emphasizes research methods and influences of culture and context.

COM 582 Communication Education Research (5) Communication in instructional environments. Nature of instructional communication, paradigms for instructional communication research, quantitative and qualitative approaches to instructional communication, verbal and nonverbal classroom interaction.

COM 584 Ways of Speaking (5) Theory and literature of the ethnography of communication, with special emphasis on the descriptive-comparative approach to culturally patterned styles of communicative conduct. Offered: jointly with ANTH 584.

COM 585 Digital Media Message Design and Content Creation (5) Applies communication theory to the identification, creation, and evaluation of digital media message design to meet needs of the target audience. Introduces the theory and practice of hypertext and project management techniques needed to organize digital assets, allocate resources, and meet deadlines.

COM 586 Writing and Presentation for Digital Media (5) Applies communication theory and research tools to rhetorical and design choices in web page creation. Examines the emergence of digital media story-telling techniques, as well as ethical and technical challenges these tools present to media and society.

COM 587 Digital Media Economics and Management (5) Emphasizes communication theory to analyze effective management of digital media enterprises, with practical application of economic theory to entrepreneurial strategies. Topics include analysis of the total business process, patterns of ownership, merger and acquisitions, finance and accounting, human resources development, sales and marketing, and ethics.

COM 588 Digital Media Branding and Marketing (5) Critically examines the role of advertising, marketing, and other promotional efforts in establishing the branding of digital media companies. By using communication theory to analyze successful cases of established and start-up digital media companies, participants identify practicable and effective strategies for brand building and enhancement.

COM 589 Global Digital Media Law, Policy, and Ethics (5) Examines the legal, social, political, and policy environments of digital media laws, policies and ethics around the world. Offers a comparative perspective, which prepares digital media managers to expand into other markets outside their home bases.

COM 590 Selected Readings (1-5, max. 10) Selected readings assigned by faculty.

COM 591 Independent Research (1-5, max. 10) Research projects designed and led by students with faculty supervision.

COM 592 Directed Research (1-5, max. 10) Student participation in faculty-directed research projects.

COM 593 Communication Internship (1-5, max. 15) Provides students an opportunity to connect their scholarship with communities outside academia by engaging in a project that uses communication theory to inform practical work.

COM 594 Professional Proseminar (1, max. 6) Helps students develop a range of professional competencies. Focuses on a particular topic such as computer-assisted research, technology in the classroom, obtaining funding for research, writing for academic publication, career choices after graduate school, and ethics in research and teaching.

COM 595 Public Speaking Pedagogy (1, max. 5) Content and effective teaching skills for public speaking course. Emphasizes the rhetorical tradition, grading speeches, and facilitating oral critiques. Required for all COM 220 TAs; recommended for those who want to teach COM 220. Only 3 credits count toward degree. Credit/no credit only.

COM 596 Communication Pedagogy (1, max. 3) Development of effective teaching and professional skills. Emphasizes interactive teaching, leading discussions, lecturing, planning courses, evaluating resource materials, grading and evaluation, teaching philosophies, and effective classroom management and communication. Required of all graduate students who accept teaching assistantships. Credit/no credit only.

COM 597 Special Topics in Communication (5, max. 10) Examination of current topics in the theory and practice of political communication. Offered: jointly with POL S 552.

COM 600 Independent Study or Research Project (*) Prerequisite: permission of supervisory committee chairperson. Credit/no credit only.

COM 700 Master's Thesis (*) .

COM 800 Doctoral Dissertation (*) .

Comparative History of Ideas

CHID 110 The Question of Human Nature (5) I&S/VLPA Clowes, Merrill Considers the relationship between the individual and his/her culture. Traces the evolution of the notion of human nature in Europe and the United States and compares this tradition with representations of the human being from other cultural traditions.

CHID 205 Method, Imagination, and Inquiry (5) VLPA Searle Examines ideas of method and imagination in a variety of texts, in literature, philosophy, and science. Particularly concerned with intellectual backgrounds and methods of inquiry that have shaped modern Western literature. Offered: jointly with ENGL 205.

CHID 207 Introduction to Intellectual History (5) I&S Clowes, Towsis Ideas in historical context. Comparative and developmental analysis of Western conceptions of “community,” from Plato to Freud. Offered: jointly with HIST 207.

CHID 210 The Idea of the University: Ways of Learning, Exploring, and Knowing (5) I&S Considers different ways of learning, exploring, and knowing in the context of the historical development, social context, and impact of universities in general and of the University of Washington in particular. Includes reflective workshops on choosing areas of study (majors) in collaboration with Undergraduate Advising.

CHID 270 Special Topics (5, max. 15) I&S Each special topics course examines a different subject or problem from a comparative framework.

CHID 298 Pre-Departure Seminars (2) I&S Barrett, Barrett, Warren Prepares students to participate in CHID International Programs. Prerequisite: students must be accepted to an International Program prior to registration. Offered: A/W/S/P.

CHID 300 Ideas in Art (5) VLPA Opperman Selected monuments of art and architecture in the Western tradition, from the Greeks to the

CHID 332 Disability and Society: Introduction to Disability Studies (5) I&S Introduction to the field of disability studies. Focuses on theoretical questions of how society predominantly understands disability and the social justice consequences. Examines biological, social, cultural, political, and economic determinants in social creation/construction (framing) of disability and effects on those claiming and/or labeled as disabled. Offered: jointly with LSJ 332.

CHID 350 Women in Law and Literature (5) I&S/VLPA Tupper Representations of women in American law and literature. Considers how women's political status and social roles have influenced legal and literary accounts of their behavior. Examines how legal cases and issues involving women are represented in literary texts and also how law can influence literary expression. Offered: jointly with WOMEN 350.

CHID 370 The Cultural Impact of Information Technology (5) I&S/VLPA Utilizing approaches from the history of technology, cultural studies, and literary theory, seeks to analyze the cultural and social impact of information technology. Considers how information technologies impact our relationships with others, our concept(s) of self, and the structure of the communities to which we belong. Offered: jointly with COM 302.

CHID 390 Colloquium in the History of Ideas (5) I&S Clowes, Toews, Tupper Basic theoretical issues in the comparative history of ideas as a disciplined mode of inquiry; examination of representative historical figures and problems. Primarily for majors.

CHID 433 Disability Law, Policy, and the Community (5) Seminar addressing legal rights of disabled people, history of disability policy in the United States, and the role of community activism and other forces in policy development and systems change. Introduction to the existing social service systems that affect disabled people. Recommended: LSJ 332. Offered: jointly with LSJ 433.

CHID 434 Civil and Human Rights Law for Disabled People (5) I&S Designed for students interested in expanding their knowledge of civil and human rights for disabled people. Examines the American perspective (ADA) as well as various international models including the United Nations' International Human Rights treaties as they relate to disabled people. Recommended: LSJ 332. Offered: jointly with LSJ 434; A.

CHID 470 CHID Study Abroad (5, max. 15) I&S For participants in study-abroad program. Specific course content varies.

CHID 471 Europe Study Abroad (5, max. 15) I&S For participants in study-abroad program. Specific course content varies.

CHID 472 Latin America Study Abroad (5, max. 15) I&S For participants in study-abroad program. Specific course content varies.

CHID 473 Africa Study Abroad (5, max. 15) I&S For participants in study-abroad program. Specific course content varies.

CHID 474 Asia Study Abroad (5, max. 15) I&S For participants in study-abroad program. Specific course content varies.

CHID 475 East Asia Study Abroad (5, max. 15) I&S For participants in study-abroad program. Specific course content varies.

CHID 476 South Pacific Study Abroad (5, max. 15) I&S For participants in study-abroad program. Specific course content varies.

CHID 477 Middle East Study Abroad (5, max. 15) I&S For participants in study-abroad program. Specific course content varies.

CHID 484 Colonial Encounters (5) I&S History of European colonialism, focusing on British, French, and Dutch colonial encounters from 1750s to 1950s. Units on colonial law, medicine, religion, sexuality, and commodity culture. Offered: jointly with HSTEU 484.

CHID 490 Research Seminar (5) VLPA/I&S Thurtle, Toews Intensive readings in specific topic. Students complete individual research projects. Satisfies the senior thesis requirement. Prerequisite: CHID 390.

CHID 491 Senior Thesis (5-) I&S Critical and methodological issues. Required of candidates for an honors degree.

CHID 492 Senior Thesis (-5) I&S Critical and methodological issues. Required of candidates for an honors degree.

CHID 493 Senior Thesis (-5) I&S Research and writing of thesis under supervision of a faculty member. Required of candidates for an honors degree.

CHID 496 Focus Groups (1-2, max. 4) Credit/no credit only.

CHID 497 Peer Facilitators (5).

CHID 498 Special Colloquia (1-5, max. 20) I&S Each colloquium examines a different subject or problem from a comparative framework. A list of topics is available from the CHID office.

CHID 499 Undergraduate Independent Study or Research (1-5, max. 10) Supervised independent study for students who wish to pursue topics not available in regular course offerings.

Comparative Literature

C LIT 200 Introduction to Literature (3/5) VLPA Reading, understanding, and enjoying literature from various countries, in different forms of expression (e.g., dramatic, lyric, narrative, rhetorical) and of representative periods. Emphasis on the comparative study of themes and motifs common to many literatures of the world.

C LIT 210 Literature and Science (5, max. 15) VLPA Introduces the rich and complex relationship between science and literature from the eighteenth century to the present day. Students examine selected literary, scientific, and philosophical texts, considering ways in which literature and science can be viewed as forms of imaginative activity.

C LIT 211 Literature and Culture (5, max. 15) I&S/VLPA Study of literature in its relation to culture. Focuses on literature as a cultural institution, directly related to the construction of individual identity and the dissemination and critique of values.

C LIT 230 Introduction to Folklore Studies (5) I&S/VLPA Comprehensive overview of the field of folkloristics, focusing on verbal genres, customs, belief, and material culture. Particular attention to the issues of community, identity, and ethnicity. Offered: jointly with SCAND 230.

C LIT 240 Writing in Comparative Literature (5, max. 15) Comparative approach to literature and a workshop in writing comparative papers in English. Emphasis on cross-cultural comparison of literary works. Readings in English with an option to read selected texts in the original languages. Offered: AWSp.

C LIT 270 Perspectives on Film: Introduction (5) VLPA Introduction to film form, style, and techniques. Examples from silent film and from contemporary film. 270, 271, 272 are designed to be taken as a sequence, but may be taken individually.

C LIT 271 Perspectives on Film: Great Directors (5) VLPA Introduction to authorship in the cinema. The work of a major director or directors. 270, 271, 272 are designed to be taken as a sequence, but may be taken individually.

C LIT 272 Perspectives on Film: Genre (5) VLPA Introduction to study of film genre. Literary, mythic, and historic aspects of film genre. 270, 271, 272 are designed to be taken as a sequence, but may be taken individually.

C LIT 300 Introduction to Comparative Literature: Forms, Genres, History (5) VLPA An introduction to comparative literary study designed for departmental majors. Examines how literary forms and genres shape our reading of texts; how these forms and genres change over time; and how literary forms and genres manifest themselves in different cultural traditions. Includes theoretical readings and substantial writing.
C LIT 301 Theory of Film: Analysis (5) VLPA Introduction to the analysis of film. Covers major aspects of cinematic form: mise en scene, framing and camera movement, editing, and sound and color. Considers how these elements are organized in traditional cinematic narrative and in alternative approaches.

C LIT 302 Theory of Film: Critical Concepts (5) VLPA Overview of the main conceptual problems in film criticism such as: "what is a film?", "what is the relationship between film and reality?", "does a film have a language?", "what is the connection between image and sound?" Follows a historical timeline within five individual sections.

C LIT 303 Theory of Film: Genre (5) VLPA Introduction to the history and significance of film genres from the early days of film to the present. Examines a selection of several genres, drawn from a list including western, melodrama, musical, thriller, road odyssey, film noir, and documentary. Topics include form, ideology, authority, history, innovation, and parody.

C LIT 310 History of Film: 1895-1929 (5) VLPA Film history from its beginnings in the 1890s through the golden era of silent film in the 1920s. Topics include the invention of major film techniques, the creation of Hollywood and the studios, and movements such as expressionism, constructivism, and surrealism.

C LIT 311 History of Film: 1930-1959 (5) VLPA Film history from the introduction of sound through the late 1950s. Focuses mostly on the golden age of the Hollywood studios and on alternative developments after World War II in Italy (Neo-Realism), France (the New Wave), and Japan.

C LIT 312 History of Film: 1960 - 1988 (5) VLPA Covers the vast changes in filmmaking since 1960. Topics include the continuing influence of the French New Wave, the New German Cinema of the '70s and the "New Hollywood" of the '70s, American independent film of the '80s, and the resurgence of Chinese filmmaking since 1980.

C LIT 313 History of Film: 1989-Present (5) VLPA Addresses the latest trends in international filmmaking typically with an emphasis on world cinema and issues of globalization and diaspora. Sometimes taught in conjunction with the Seattle International Film Festival.

C LIT 315 National Cinemas (3-5, max. 15) VLPA Examines the cinema of a particular national, ethnic or cultural group, with films typically shown in the original language with subtitles. Topics reflect themes and trends in the national cinema being studied.

C LIT 320 Studies in European Literature (5, max. 15) VLPA Examination of the development of European literature in a variety of genres and periods. Possible areas of study include literature from romantic fiction of early nineteenth century through great realist classics of second half of the century or from symbolism to expressionism and existentialism.

C LIT 321 Studies in Literature of the Americas (5, max. 15) VLPA Emphasizes connections between twentieth century literature of the United States and Canada and current literature of Latin America. Emphasizes that, despite obvious differences, much is shared in terms of culture and national sensibility across the two continents.

C LIT 322 Studies in Asian and Western Literatures (5, max. 15) VLPA Topics designated by individual instructors.

C LIT 323 Studies in the Literature of Emerging Nations (5, max. 15) VLPA Novels and short stories, from Africa, the Middle East, and South Asia. Discusses relationship of Western literary genres to an oral literary tradition, as well as issues like colonialism, gender relations, narrative technique, native and non-native languages.

C LIT 330 The European Fairy Tale (5) VLPA An introduction to folktales and literary tales from various traditions and periods. A discussion of their origin, special characteristics, dissemination, and relevance to the contemporary reader.

C LIT 331 Folk Narrative (5) VLPA Survey of various genres of folk narratives studied in performance contexts to reveal their socio-cultural functions in a variety of milieu. Theory and history of folk narrative study, taxonomy, genre classification, and interpretive approaches. Recommended: SCAND 230 or C LIT 230. Offered: jointly with SCAND 331.

C LIT 334 Immigrant and Ethnic Folklore (5) &/VLPA Survey of verbal, customary, and material folklore from the immigrant and ethnic context. Theories of ethnic folklore research applied to the communities of Scandinavians, Baltics, or other European ancestry. Recommended: SCAND 230 or C LIT 230. Offered: jointly with SCAND 334.

C LIT 350 Themes in World Literature: Parents and Children (5) VLPA World literature, from the Renaissance to modern times, based upon the theme of "parents and children." Selections drawn from European, English, and American literature, not limited to period and genre. Focus upon the motive of generational conflict.

C LIT 351 Themes in World Literature: Love, Sex, and Murder (5) VLPA World literature, from the Renaissance to modern times, based upon the theme of "love, sex, and murder." Selections drawn from European, English, and American literature, not limited to period and genre. Focus upon the human potential for both great violence and extraordinary compassion.

C LIT 352 Themes in World Literature: Death and Transfiguration (5) VLPA Theme of death, transfiguration, and new life in world literature. Selections from Tolstoy, D. H. Lawrence, Celine, E. M. Forster, and other major writers.

C LIT 357 Literature and Film (3-5, max. 10) VLPA The film as an art form, with particular reference to the literary dimension of film and to the interaction of literature with the other artistic media employed in the form. Films are shown as an integral part of the course. Content varies.

C LIT 371 Literature and the Visual Arts (5) VLPA Focuses on specific theoretical problems. Examines the relationship between text and image in a variety of art forms including poetry, novels, paintings, photography, essays, comic strips, film, and advertisements. Readings, in English, from a wide variety of national literatures.

C LIT 375 Images of Women in Literature (5, max. 15) VLPA Comparative study of the ways women's image, social role, and psychology have been portrayed by writers of various nationalities and literary periods. Selection of theme varies from quarter to quarter. Works are read in English translation.

C LIT 396 Special Studies in Comparative Literature (3-5, max. 10) VLPA Offered by visitors or resident faculty. Content varies.

C LIT 397 Special Topics in Cinema Studies (3-5, max. 10) I&S/VLPA Varying topics relating to film in social contexts. Offered by resident or visiting faculty.

C LIT 400 Introduction to Theory and Criticism (5) VLPA A selection of major theoretical statements in the history of literary theory and criticism, with texts drawn from such fields as literary studies, aesthetic theory, film studies, philosophy, and cultural studies.

C LIT 410 Studies in Literary History (5, max. 15) VLPA Introduction to a major figure or movement associated with the development of literary history. Through the study of one aspect of literary history students gain a thorough understanding of a particular point of view, while exploring the breadth of contemporary approaches to literature.

C LIT 421 Studies in Connections: Literature and Other Disciplines (5, max. 15) VLPA Examines the links between literature and other disciplines or art forms. Literature and history, literature and philosophy, literature and music, literature and the visual arts are all appropriate topics. Selection of focus depends on instructor.

C LIT 422 Studies in Genre (5, max. 15) VLPA Major genres of world literature: poetry, fiction, drama. Readings, in English from a wide selection of national literatures.

C LIT 424 The Epic Tradition (5) VLPA Ancient and medieval epic and heroic poetry of Europe in English: the Iliad, Odyssey, and Aeneid; the Roland or a comparable work from the medieval oral tradition; pre-Greek forerunners, other Greco-Roman literary epics, and later medieval and Renaissance developments and adaptations of the genre. Choice of reading material varies. Literary background recommended. Offered: jointly with CLAS 424.

C LIT 430 Readings in Folklore (5) VLPA Exploration of theoretical and methodological issues in folklore studies through independent reading of journal articles published during the last five years. Recommended: SCAND 230 or C LIT 230. Offered: jointly with SCAND 430.

C LIT 431 The Northern European Ballad (5) VLPA Integrative study of the Northern European Ballad, with an emphasis on texts, performance, context, history, genre classification, and interpretive approaches. Offered: jointly with SCAND 431.

C LIT 490 Directed Study or Research (1-5, max. 10) Individual study of topics in comparative literature by arrangement with the instructor and the Comparative Literature office.

C LIT 491 Internship (1-5, max. 5) Supervised experience in local businesses and other agencies. Open to upper-division Comparative Literature and Cinema Studies majors. Recommended: 25 credits of C LIT courses.

C LIT 493 Comparative Literature Honors Seminar (5, max. 15) VLPA Special topics in comparative literature. Required of honors students in comparative literature.
Ages, taught by representatives from various disciplines in the social sciences.

C LIT 517 Colloquium in Folklore (5)
- Critical trends in folklore studies, taught by representatives from various literature departments as well as from related disciplines, such as philosophy, art history, history, and comparative religion.

C LIT 530 Cultural Criticism and Ideology
- Critique I (5, max. 15) A study of the main attempts to come to an understanding of the humanities and the nature of historical interpretation in a cultural context.

C LIT 535 Cultural Criticism and Ideology
- Critique II (5, max. 15) Offerings vary to cover individual theorists and particular manifestations of cultural criticism and ideology critique.

C LIT 545 Medieval Studies (3/5, max. 15)
- Literature, intellectual history, and sociology of the Middle Ages, 500-1200. Topics may include "renaissance" of the twelfth century; the educational ideal; rise of universities; philosophical concepts.

C LIT 546 Studies in Renaissance and Baroque
- (3-5, max. 10) Aspects of Western European literature during the Renaissance and Baroque period. Course content varies.

C LIT 547 Studies in Eighteenth-Century Literature
- (3-5, max. 10) Examination of various trends in eighteenth-century literature including the Enlightenment, Rationalism, Pre-Romanticism, and Neo-Classicism. Course content varies with instructor.

C LIT 548 Studies in Nineteenth-Century Literature
- (3-5, max. 10) Examination of various trends in nineteenth-century literature including Romanticism, Realism, Naturalism, and Symbolism.

C LIT 549 Twentieth-Century Literature (3-5, max. 10)
- Selected movements, schools, and trends of significance in twentieth-century literature of Europe and Americas. Symbolism, surrealism, dada, expressionism, neorealism, existentialism, nouveau roman, and absurd may be considered. Texts in English, French, and German figure most prominently, but Spanish, Italian, Russian, and other materials may be examined. Content and emphasis vary.

C LIT 570 The Novel: Theory and Practice (3-5, max. 15)
- Study of the novel as a genre, examining two or more novels of varying national literatures. Course content varies.

C LIT 571 The Lyric: Theory and Practice (3-5, max. 15)
- Examination of central questions in the study of the lyric genre as approached from an international point of view. Course content varies.

C LIT 572 The Epic: Theory and Practice (3-5, max. 15)
- Examination of epic literature as exemplified by selected works chosen from various cultures and periods (e.g., French and German medieval courtly epic, the epic in Renaissance and baroque Europe, traditions of the mock epic). Course content varies.

C LIT 573 The Drama: Theory and Practice (3-5, max. 15)
- Examination of various aspects of the drama as a major literary genre, as approached from international and multilingual points of view. Course content varies.

C LIT 576 Seminar in East-West Literary Relations (3-5, max. 15)
- Comparative investigation of literary topics requiring the study of both Eastern and Western documents. Explores parallels and contradictions between the two, in concepts, ideas, and specific topics. A comparative paper on a chosen topic with qualified conclusions is required. Emphasis varies. Prerequisite: at least one East Asian language.

C LIT 590 Master of Arts Essay (5/10, max. 10)
- Research and writing project under the supervision of a faculty member.

C LIT 596 Special Studies in Comparative Literature (3-5, max. 15)
- Offered occasionally by visiting or resident faculty. Course content varies.

C LIT 599 Special Seminar or Conference (1-9, max. 30)
- Group seminars or individual conferences scheduled to meet special needs. Prerequisite: permission of graduate program adviser.

C LIT 600 Independent Study or Research (*)

C LIT 800 Doctoral Dissertation (*)

Dance

DANCE 101 Introduction to Dance (5)
- VLPA Introduction to dance as an art form. Lectures in dance appreciation. Studio experience in ballet and modern dance techniques. Attendance required at outside events.

DANCE 102 Introduction to Dance (5, max. 10)
- VLPA Introduction to dance as an art form. Lectures in dance appreciation. Studio experience in ballet and modern dance techniques. Attendance required at outside events. Prerequisite: DANCE 101.

DANCE 103 Introduction to Dance (5, max. 10)
- VLPA Introduction to dance as an art form. Lectures in dance appreciation. Studio experience in ballet and modern dance techniques. Attendance required at outside events. Prerequisite: DANCE 102.

DANCE 104 Modern Technique (1-8, max. 8)
- VLPA Advanced beginning. Continued development of all beginning areas and expansion of movement vocabulary.

DANCE 105 Modern Technique (1-8, max. 8)
- VLPA Advanced beginning. Continued development of all beginning areas and expansion of movement vocabulary.

DANCE 106 Modern Technique (1-8, max. 8)
- VLPA Advanced beginning. Continued development of all beginning areas and expansion of movement vocabulary.

DANCE 107 Ballet Technique I (1-8, max. 8)
- VLPA Advanced beginning. Continued development of all beginning areas. Expansion of ballet vocabulary.

DANCE 108 Ballet Technique I (1-8, max. 8)
- VLPA Advanced beginning. Continued development of all beginning areas. Expansion of ballet vocabulary.

DANCE 109 Ballet Technique I (1-8, max. 8)
- VLPA Advanced beginning. Continued development of all beginning areas. Expansion of ballet vocabulary.

DANCE 110 Jazz Technique I (1-4, max. 4)
- VLPA Introduction to jazz technique. Dance performance attendance required.
DANCE 111 Jazz Technique I (1-4, max. 4) VLPA Introduction to jazz technique. Dance performance attendance required.

DANCE 112 Jazz Technique I (1-4, max. 4) VLPA Introduction to jazz technique. Dance performance attendance required.

DANCE 166 Dance Composition I (5) VLPA Introduction to the principles of dance composition through improvisation.

DANCE 201 Ballet Technique II (1-8, max. 8) VLPA Intermediate. Expansion of ballet vocabulary.

DANCE 202 Ballet Technique II (1-8, max. 8) VLPA Intermediate. Expansion of ballet vocabulary.

DANCE 203 Ballet Technique II (1-8, max. 8) VLPA Intermediate. Expansion of ballet vocabulary.

DANCE 204 Modern Dance Technique II (1-8, max. 8) VLPA Intermediate. Expansion of movement vocabulary.

DANCE 205 Modern Dance Technique II (1-8, max. 8) VLPA Intermediate. Expansion of movement vocabulary.

DANCE 206 Modern Dance Technique II (1-8, max. 8) VLPA Intermediate. Expansion of movement vocabulary.

DANCE 210 Jazz Technique II (1-4, max. 4) VLPA Intermediate-level jazz technique. Continued development of beginning areas. Expansion of movement vocabulary. Dance performance attendance required.

DANCE 211 Jazz Technique II (1-4, max. 4) VLPA Intermediate-level jazz technique. Continued development of beginning areas. Expansion of movement vocabulary. Dance performance attendance required.

DANCE 212 Jazz Technique II (1-4, max. 4) VLPA Intermediate-level jazz technique. Continued development of beginning areas. Expansion of movement vocabulary. Dance performance attendance required.

DANCE 230 Alternative Movement Studies (3, max. 9) VLPA Introduction to an alternative approach to movement study. Topics vary.

DANCE 232 Intermediate Alternative Movement Studies (3) VLPA Study of an alternative approach to movement at the intermediate level. Topics vary.

DANCE 233 Advanced Alternative Movement Studies (3) VLPA Study of an alternative approach to movement at the intermediate level. Topics vary.

DANCE 234 World Dance and Culture (3, max. 9) I&S/ VLPA Survey course presenting selected dance idioms as they relate to ethnicity in their performance, aesthetics, and history. May have studio component.

DANCE 242 Music in Relation to Dance (3) VLPA Moore Provides students with music skills necessary to the areas of dance pedagogy, performance, choreography, dance analysis/criticism, and production. Includes an introduction to music theory, compositional and rhythmic analysis, music for dance class, and training on music/sound editing equipment.

DANCE 250 The Creative Context (1-5, max. 8) I&S/VLPA Cooper Gateway course for dance major. Examines dance as a universal activity and expression of cultural identity. Offers a cross-cultural and historical view of a variety of theatrical, vernacular, and sacred dance forms, and investigates the myriad ways that dance functions across societies. Offered: A.

DANCE 266 Dance Composition II (3-5, max. 10) VLPA Dance composition in relation to music. Emphasis on solos and small groups. Prerequisite: DANCE 166. Offered: alternate years.

DANCE 270 Dance Performance Activities (1-3, max. 9) VLPA Performance in a dance or work on a crew for a dance production, either a studio showing or public performance, conducted under faculty supervision. Credit/no credit only.

DANCE 301 Ballet Technique III (1-8, max. 8) VLPA Advanced-intermediate level: continued development and expansion in all areas of technique.

DANCE 302 Ballet Technique III (1-8, max. 8) VLPA Advanced-intermediate level: continued development and expansion in all areas of technique.

DANCE 303 Ballet Technique III (1-8, max. 8) VLPA Advanced-intermediate level: continued development and expansion in all areas of technique.

DANCE 304 Modern Dance Technique III (1-8, max. 8) VLPA Intermediate-advanced. Dance sequences of greater complexity.

DANCE 305 Modern Dance Technique III (1-8, max. 8) VLPA Intermediate-advanced. Dance sequences of greater complexity.

DANCE 306 Modern Dance Technique III (1-8, max. 8) VLPA Intermediate-advanced. Dance sequences of greater complexity.

DANCE 344 Early Dance History (3-5, max. 5) I&S/VLPA Cooper Survey of ballet history. Offered: A.

DANCE 345 Late Dance History (3-5, max. 5) I&S/ VLPA Survey of modern dance history.

DANCE 366 Dance Composition III (3-5, max. 10) VLPA Dance composition in relation to production. Emphasis on larger group works. Prerequisite: DANCE 166.

DANCE 371 Choreographic Workshop (2-5, max. 5) VLPA Performing experience for students in pieces choreographed by faculty members and guest choreographers.

DANCE 390 Dance Teaching Methodologies (3-5) VLPA Introduction to dance pedagogy, including educational theory, motor learning, and biomechanical principles and music as it relates to the teaching of dance.

DANCE 420 Dance Aesthetics (3) I&S/VLPA Philosophical investigation of the expressive elements of dance. Reading and discussion of the concepts of beauty, style, and aesthetic theory.

DANCE 480 Senior Seminar (3) VLPA Culminating project emphasizing a synthesis of experiences in the Dance Program with a focus on individual interests.

DANCE 490 Special Studies in Dance (1-3, max. 10) VLPA Special studies designed to address contemporary and historical concerns in the field of dance.

DANCE 493 Anatomy for Dance (3-5) NW VLPA Simpson Anatomy of the musculoskeletal system and its applications in dance movement.

DANCE 499 Undergraduate Independent Study (*, max. 6).

DANCE 510 Chamber Dance Production (3, max. 9) Dance production in the university environment. Publicity, programming, budgeting, rehearsal, rehearsal direction, and performance of Chamber Dance Company repertoire. Credit/no credit only.

DANCE 515 Dance Research Methods (3) Seminar in problem identification and definition, theory development, research design, data analysis, and interpretation. Examples of various types of dance research.

DANCE 520 Dance in Higher Education (3) Readings, discussion, and observation of teaching methods. Students assist faculty in the instruction of lower-level classes. Selected anatomical, historical, and aesthetic concepts as they relate to dance pedagogy. Development of a personal teaching style appropriate for university-level dance courses.

DANCE 521 Dance Administration (3) Readings and discussion relating to dance administration in college and professional settings. Topics include: curricular development, academic advising, budgetary procedures, personnel issues, and problems related to dance as a performing art within the university structure.

DANCE 530 Choreographer/Composer Collaboration (2, max. 6) Collaboration between choreographers and composers: models and creative workshop projects, preparation for a concert of collaborative work in DANCE 531. Offered: Sp.

DANCE 544 Early Dance History (3-5) Study of the evolution of dance from ritual to a theatre art form.

DANCE 545 Late Dance History (3-5) Roots of contemporary dance as an art form and its relationship to developments in ballet since the turn of the century.

DANCE 590 Dance Teaching Methodologies (3-5) Wiley Introduction to dance pedagogy with an emphasis on motor learning skills and biomechanics. Practical teaching experience.

DANCE 595 Master's Project (3) Project in area of interest developed in consultation with faculty advisor and supported by elective courses. Full faculty approval of proposed project by end of first year. Formal presentation, appropriate to project's content, presented to full faculty during second year. Project culminates in the teaching of an undergraduate dance course.

DANCE 600 Independent Study or Research (*, max. 10).
Digital Arts and Experimental Media

DXARTS 198 Digital Arts Seminar (5, max. 10) VLPA Topics are announced during the preceding quarter. Taught by UW faculty and visiting artists, engineers, scientists, and humanities scholars.

DXARTS 200 Digital Art and New Media: History, Theory, and Practice (3) VLPA Provides a historical and critical overview of artists and scientists pioneering the digital arts. Discusses important digital media issues from aesthetics, creative strategies, emerging trends, and socio-cultural aspirations.

DXARTS 201 Fundamentals of Digital and Experimental Art I (5) VLPA Principles of digital media creation through a combination of lectures, practical assignments, and studio seminars. All resources, assignments, and reviews are web-based. Requires access to a fast, networked computer outside of class. Prerequisite: DXARTS 200.

DXARTS 202 Fundamentals of Digital and Experimental Art II (5) VLPA Server-based art creation. Introduces principles of digital media creation. All resources, assignments, and reviews are web-based. Requires access to a fast, networked computer outside of class. Prerequisite: DXARTS 201.

DXARTS 400 Undergraduate Research Studio (2, max. 6) VLPA Covers recent advances and current trends in digital arts and experimental media research. Topics may include in-depth examination of new artwork and research by pioneering figures in the field.

DXARTS 411 Applications of Digital Technologies to Humanities Research (5) VLPA Hands-on project-based approach to imaging, new media, text, databases, metadata and accessibility, rights management, and other issues central to contemporary humanities research. Offered: jointly with HUM 411.

DXARTS 430 Algorithmic Processes in the Arts (5) VLPA Basics of computer programming and algorithmic thinking in digital arts. Emphasis on experimental art forms where building of custom software is integral to realizing an artistic vision.

DXARTS 440 Fundamentals of Interactive 3D Art (5) VLPA Andrews Introduction to fundamental techniques for the creation of interactive graphics-based three-dimensional digital art. Concepts and techniques include the use of scripting and modeling as methods for designing spaces. Strong emphasis on interactivity, aesthetics, and the exploration of time-based art. Contextualizes navigable digital environments within the history of the visual arts.

DXARTS 441 3D Space I: Computer Modeling and Environments (5) VLPA Andrews Introduction to 3D graphics for experimental artists. Utilizes sophisticated software tools to explore object modeling, environment construction, surface texturing, and image rendering. Through lectures, viewings, tutorials, and projects, students develop a multi-purpose skill set that can be used for innovative content creation, visualization, project planning, documentation, and cross-media integration. Offered: A.

DXARTS 442 3D Space II: Computer Motion and Advanced Techniques (5) VLPA Andrews Further investigation into 3D visualization for experimental artists. Building on foundations established DXARTS 441, introduces methods for orchestrating movement, including deformation, dynamics, and rigging. Also covers techniques such as particle systems, simulation, and scripting, giving students experience using advanced tools for envisioning and creating original artwork. Prerequisite: DXARTS 441. Offered: W.

DXARTS 443 3D Space III: Special Topics in 3D Computer Arts (5) VLPA Andrews In-depth exploration of topics in advanced 3D arts research, specific subjects vary. Students integrate skill developed in DXARTS 441 and DXARTS 442 to realize ambitious art projects related to particular class focus. Sample topics include virtual reality, interactive 3D, networked environments, and rapid prototyping. Prerequisite: DXARTS 442. Offered: Sp.

DXARTS 450 Digital Video Foundations (5) VLPA Brixie A video studio designed towards the individual creation of experimental short films and video art. Emphasis on art-making, conceptual thinking, and experimentation. Focuses on core generative processes of digital film, including: production, editing, and presentation. Students work individually and in small teams.

DXARTS 451 Introduction to Experiments in Digital Video: The Architecture of Time I (5) VLPA Introduction to the skills and concepts used in digital video production. Includes exposure to industry standard equipment, terminology, and digital video production skills in experimental arts context. Basic research areas include field production and electronic image gathering, field and studio lighting, basic nonlinear editing.

DXARTS 452 Experiments in Digital Video: The Architecture of Time II (5) VLPA Nonlinear and nondestructive editing methods used in digital video are defining new architectures of time for cinematic creation. Continues previous digital video research with intermediate nonlinear editing, digital audio, compositing, and digital effects. Focuses specifically on student research with attention to cinematic strategies in an experimental arts context. Prerequisite: DXARTS 451.

DXARTS 453 Experiments in Digital Video: The Architecture of Time III (5) VLPA Further skills and concepts taught in DXARTS 450 and 451. Emphasizes development of advanced research interests. Research topics include interactive video installation, web-based e-cinema projects, anamorphic image research, video and electronics as support systems for installation, CCTV research, basic D D authoring, and live keying techniques. Prerequisite: DXARTS 452.

DXARTS 460 Digital Sound (5) VLPA Foundations of digital sound for digital arts applications. Digital sound theory; transducers; audio signals; mixer architectures; field recording strategies. Multi-track editing for recording, analysis, editing, montage, mixing, synchronization, and mastering. Problem-solving for innovative applications in video, multi-media, and installation art.

DXARTS 462 Digital Sound Processing (5) VLPA Introduction to digital sound processing techniques. Includes sampling techniques and time-domain transformation of samples sound; sample-rate conversion; sound granulation and time stretching; delay lines; introduction to digital filtering; FIR and IIR filters; digital effects; reverberation; virtual-room acoustics and dynamic sound location. Prerequisite: DXARTS 461/MUSIC 401. Offered: jointly with MUSIC 402, W.

DXARTS 463 Advanced Digital Sound Synthesis and Processing (5) VLPA Advanced sound processing and synthesis techniques. Includes sound time warping; analysis-synthesis techniques; linear predictive coding; the phase vocoder; frequency-domain sound transformations; introduction to physical modeling. Prerequisite: DXARTS 462/MUSIC 402. Offered: jointly with MUSIC 403; S.

DXARTS 470 Sensing and Control Systems for Digital Arts (5) Software- and hardware-based tools and approaches to real-time I/O and electromechanical control in performance, art installations, and other digital arts applications. Focus on prepackaged but flexible tools. Real-time systems programming and design.

DXARTS 472 Mechatronic Art, Design, and Fabrication II (5) Continues the systems based approach to design and fabrication of functional experimental art devices. Combines principles of mechanical, electronic and electrical engineering, software engineering, robotics and motion control, application of sensors, actuators, and other control devices. Prerequisite: DXARTS 471.

DXARTS 473 Mechatronic Art, Design, and Fabrication III (5) Continues systems based approach to the design and fabrication of functional experimental art devices. Combines principles of mechanical, electronic and electrical engineering, software engineering, robotics and motion control, application of sensors, actuators, and other control devices. Prerequisite: DXARTS 472.

DXARTS 480 Special Topics in Digital Arts and Experimental Media (3-5, max. 15) Taught by UW faculty and visiting artists, engineers, scientists, and humanities scholars.

DXARTS 491 Senior Thesis I (5) VLPA Introductory course of the senior thesis sequence. Includes weekly seminars, selection of a thesis topic, and contract with an appropriate faculty advisor. Majors and senior standing only. Offered: A.

DXARTS 492 Senior Thesis II (5) VLPA Second course of the senior thesis sequence. Majors and senior standing only Prerequisite: DXARTS 491. Offered: W.

DXARTS 493 Senior Thesis III (5) VLPA Third course of the senior thesis sequence. Compilation and presentation of final project. Majors and senior standing only Prerequisite: DXARTS 492. Offered: Sp.

DXARTS 495 DXARTS Production Studio (3-15, max 30) VLPA Intensive, large-scale,
collaborative, experimental media-based art projects. Examples include major interactive art installations, cinematic works, live computer music performances, and mechatronic or telematic collaborations. Topic vary. Offered: A.

**DXARTS 499 Undergraduate Research (1-5, max. 12)**

**DXARTS 500 Research Studio (3, max. 30)** Covers recent advances and current trends in digital arts and experimental media research. Students discuss and demonstrate their own ongoing research and creative projects. In-depth examination of new artwork and research by pioneering figures in the field. Prerequisite: DXARTS graduate student.

**DXARTS 505 Research Techniques in Digital Arts (3)** Digital arts research resources; structuring and strategizing research as part of artistic development; standards for writing and publishing; ethics and approach to technology transfer, and issues such as patenting. Prerequisite: DXARTS doctoral student.

**DXARTS 517 Psychology of Audio and Visual Perception in the Arts (5)** Processes behind sound and image perception, with emphasis on cognition and practical applications for artists. Includes cross-modal theory and synaesthesia. Prerequisite: DXARTS graduate student.

**DXARTS 528 Real-Time Digital Image Processing (5)** Theory, aesthetics, and practice of real-time video manipulation/performace systems. Theory and high-level programming of image synthesis and processing. Prerequisite: DXARTS 450; DXARTS 531.

**DXARTS 552 Advanced Topics in Digital Video (5)** Covers recent advances and current trends in digital video research. May include in-depth examination of new artwork and research by faculty, students, and visiting professionals. Prerequisite: DXARTS 450; and either DXARTS 451 or 452.

**DXARTS 565 Spectral Modeling of Sound (5)** Theory and practice of sound modeling in the spectral domain. Custom-designed software for spectral modeling and re-synthesis. Implementation of software tools for spectral analysis, transformation, and synthesis. Prerequisite: DXARTS 463.

**DXARTS 567 Sound in Space (5)** Theory and practice of spatial sound. Custom-designed software for spatial location of sound. Soundfield microphones used for team-based location recording sessions. Prerequisite: DXARTS 463.

**DXARTS 569 Real-time Digital Sound Processing (5)** Introduction to real-time digital sound processing techniques. Includes: foundation of real-time systems; integration; reactive environments in performance and installation work; interfaces; communication protocols (MIDI, TCP); feature detection; pitch tracking; transient detection; time-domain processing techniques; frequency-domain processing techniques; algorithmic processes. Prerequisite: DXARTS 463.

**DXARTS 589 Advanced Topics in Digital Arts and Experimental Media (3-5, max 21)** Covers recent advances and current trends in digital arts and experimental media research. Various topics may include in-depth examination of new art work and research by faculty, students, and visiting professors.

**DXARTS 600 Independent Study or Research (1-9, max. 27)**

**DXARTS 800 Doctoral Dissertation (*) At least 27 hours of dissertation credit is required for the award of a Ph.D. in Digital Arts and Experimental Media. No more than 10 credits may be taken in any quarter, except summer. Credit/no credit only.**

---

**Drama**

**DRAMA 101 Introduction to the Theatre (5)** **VLPA** The theatre as an art form with emphasis on the play in production. The role of the various theatre artists: actors, directors, designers, and playwrights. Required attendance at one or more performances. Lecture and discussion groups. For nonmajors. Offered: AWSp.

**DRAMA 201 Play Analysis (5) **VLPA Play structure through analysis of one-act plays in all genres, with special attention to plotting and the various means used to achieve a unity of action as the basis of all drama.

**DRAMA 210 Theatre Technical Practice (4) **VLPA Intensive lecture-laboratory in basic theories, techniques, and equipment of the stage. Technical procedures.

**DRAMA 211 Theatre Technical Practice (4)** **VLPA** Trout Intensive lecture-laboratory in basic theories, techniques, and equipment of the stage. Stage costumes.

**DRAMA 212 Theatre Technical Practice (4) **VLPA Intensive lecture-laboratory in basic theories, techniques, and equipment of the stage. Stage lighting.

**DRAMA 214 Design for Performance (5, max. 10) **VLPA Introduction to basic concepts of designing for the performing arts. Emphasis on text analysis, collaboration, and on how the visual and aural development of character and environment relate to a written or musical source. Requires tools and materials used in the creation of collages, models, and mini-performances.

**DRAMA 251 Acting (4) **VLPA Theory and practice of fundamentals of American "method," based on principles of Stanislavsky and their American evolution. Development of basic acting skills through monologue work. Offered: A.

**DRAMA 259 Performance Practicum (2-6, max. 12) **VLPA Special work in various aspects of performance technique.

**DRAMA 290 Theatre Technical Practices Laboratory (1-3, max. 3) **VLPA Laboratory course involving specific production assignment, either in-shop or in-theatre or both. Offered: AWSp.

**DRAMA 291 Theatre Technical Practices Laboratory (1-3, max. 3) **VLPA Laboratory course involving specific production assignment, either in-shop or in-theatre or both. Offered: AWSp.

**DRAMA 292 Theatre Technical Practices Laboratory (1-3, max. 3) **VLPA Laboratory course involving specific production assignment, either in-shop or in-theatre or both. Offered: AWSp.

**DRAMA 298 Theatre Production (1-2, max. 9) **VLPA Laboratory course for students participating in School of Drama minor productions and projects. Credit/no credit only. Offered: AWSp.

**DRAMA 302 Critical Analysis of Theatre (5) **VLPA Bryant-Bertall. Analyses of plays, based on leading critical traditions. Illustrates variety of approaches to a play, criteria for choosing best approach for a given play, and ways in which criticism aids in understanding dramatic effect, for both reader and practitioner. Offered: AWSp.

**DRAMA 305 Computers in the Theatre (5) **VLPA Computing and information systems as problem solving tools for the theatre. Analysis of problems in theatre production and scholarship, with approaches to solutions through computing. Database, spreadsheet, and CAD system applications in the practice and study of lighting and scenic design, theatre management, and research in theatre history and criticism.

**DRAMA 313 Scenery Construction (3) **VLPA Survey of materials, processes, and equipment in the fabrication, assembly, painting, rigging, and installation of stage scenery and properties. Recommended: DRAMA 210.

**DRAMA 314 Introduction to Design for the Performing Arts (3) **VLPA Forrester Survey of the role of design (scenery, costume, lighting, and sound) in the contemporary performing arts. Consideration of communicative mission and limitations of each of the design areas. Recommended: DRAMA 210; DRAMA 211; DRAMA 212.

**DRAMA 316 Theatrical Makeup (2) **VLPA Basic principles, with intensive practice in application of makeup for use on prosenium and arena stages. Open to nonmajors.

**DRAMA 350 Introduction to Acting Methods (4) **VLPA Advanced scene study from three actor-training viewpoints. Approach based in the American "method" through such proponents as Adler, Strasberg, Hagen, Meisner. Exposure to more physically-based systems such as Alexander and Suzuki included. Recommended: DRAMA 252 or equivalent.

**DRAMA 351 Intermediate Acting-Scene Study (4) **VLPA Actor-training methodologies of Stanislavsky, Meyerhold, Michael Chekov, and other physically-based approaches. Increase understanding of psychological motivation, concentration, focus of attention, clarity of physical expressiveness. Perform three scenes.
DRAMA 302. Bloodsports of the Roman arenas. Prerequisite: and Hellenistic Greek and Roman theatre
Introduction to the history of theatre from the early liturgical practice. Includes draft and draping, and application of contemporary scene construction and stagecraft. Prerequisite: DRAMA 211; DRAMA 212; two of DRAMA 290, DRAMA 291, DRAMA 292; DRAMA 253; audition; and 2 credits of CRIM 466 within two quarters. Offered: A.

DRAMA 353 Intermediate Acting — Production (4) VLPA Explores the ten-minute play. Focus shifts to full-length play script, developing ensemble playing, sustained concentration, focus of attention, character motivation, and extended through-line. Culminates in public performance. Recommended: one of DRAMA 210, DRAMA 211, DRAMA 212; two of DRAMA 290, DRAMA 291, DRAMA 292; audition; and 2 credits of 466 within two quarters. Offered: Sp.

DRAMA 365 Ethnic Studies in Drama (3, max. 15) VLPA Currie-Norton Theatre and plays, post-World War II to the present. Style, content, and context explored. Emphasis on social, political, and economic milieu from which theatre arose. Playwrights studied may include Alice Childress, August Wilson, Lynn Nottage, Percy Mtwa, Luiz Valdez, and Maria Fornes. Offered: F.

DRAMA 371 Theatre and Society (5) VLPA Introduction to the history of the theatre from the Greeks to the present day. Development of the theatre as a social institution. Reading of major texts from each period. DRAMA 373 Women in Theatre (5) VLPA Examines both the inclusion and exclusion of women by the cultural practice of theatre. Has two primary aims: to provide an historical overview of women in playwriting, acting, directing, and criticism, and to apply contemporary social issues to the practice, texts, and criticism of the stage. Prerequisite: DRAMA 302.

DRAMA 374 History of Greek and Roman Theatre (5) VLPA Johnson Survey of Classical and Hellenistic Greek and Roman theatre culture, including texts, architecture, iconography, scenic practices, and conventions of performance from the festival of Dionysus to the bloodsports of the Roman arenas. Prerequisite: DRAMA 302.

DRAMA 377 History of Medieval and Renaissance Theatre (5) VLPA Johnson Survey of the rise of theatre from the early liturgical drama through the High Middle Ages to the Reformation and the great flowering of secular drama in Elizabethan England and the Golden Age of Spain. Prerequisite: DRAMA 302.

DRAMA 378 History of European Theatre, Renaissance to Revolution (5) VLPA Johnson Survey of the drama, theatre, and theatre culture from the Italian Renaissance through the French Revolution. Examines the rise of court culture, opera, French neo-classicism, as well as the popular commedia dell Arte. Prerequisite: DRAMA 302.

DRAMA 391 Beginning Technical Practices (1-3, max. 9) VLPA Laboratory course involving specific production assignments, either in-shop or in-theatre, or both. Recommended: DRAMA 290; DRAMA 291; DRAMA 292.

DRAMA 401 Senior Seminar (1, max. 2) VLPA Gates A professional seminar featuring guest artists and career development specialists. Credit/no credit only. Offered: A.

DRAMA 405 Computer Graphics Systems (3) VLPA Introduction to CAD applications in theatre design and technology. Focus on learning to use general purpose graphics software for CAD. Discussion of available hardware and software. Recommended: DRAMA 420.

DRAMA 410 Advanced Theatre Technical Practices (2, max. 20) VLPA Production-related apprenticeship, in the areas of scene construction, scene painting, costume, or lighting. Recommended: DRAMA 210; DRAMA 211; DRAMA 212; DRAMA 418. Offered: AWSp.

DRAMA 413 Advanced Scene Construction (3) VLPA Special problems in scene construction materials and rigging. Recommended: DRAMA 210; DRAMA 212; DRAMA 290; DRAMA 292; DRAMA 410; DRAMA 420.

DRAMA 414 Scene Design (3, max. 6) VLPA Dahlstrom, Forester Theory, practice, and rendering of scene designs. Repeat of course involves intermediate designs and models. Recommended: ART H 210; DRAMA 210.

DRAMA 415 Stage Costume Design (3, max. 6) VLPA Trout Theory, practice, and rendering of costume designs for the theatre. Repeat of course involves intermediate designs. Recommended: ART H 210; DRAMA 211; DRAMA 416 if repeating.

DRAMA 416 History of Western Dress (5) VLPA Gates Survey history of Western dress. Emphasis on use of this information by theatrical costume designers. Includes development of costume for drama, ballet, and opera. Prerequisite: DRAMA 302.

DRAMA 417 Stage Costume Patterning and Construction (3, max. 6) VLPA Techniques of costume construction, including studies of fabrics; emphasis on creating patterns by draping. Recommended: DRAMA 211; DRAMA 416.

DRAMA 418 Scene Painting (3, max. 6) VLPA Forrest Lecture-laboratory with focus on techniques and principles of scene painting. Uses of various media and types of equipment as applicable to varied scenic pieces. Recommended: DRAMA 210.

DRAMA 419 Advanced Stage Lighting Design (3, max. 9) VLPA Development of a working process consistent with current professional practice. Includes drafting, worksheets, study of color. Students read plays and develop analytical skills. Recommended: DRAMA 212.

DRAMA 420 Design and Technical Drafting (2, max. 4) VLPA Forrest Laboratory and project critique covering stage design graphics and technical drawing; specifically: designer’s elevations, ground plans, sections, detail drawing, transposition of design drawing information to technical drawings. Recommended: DRAMA 210.

DRAMA 421 Drawing and Rendering Techniques for the Theatre (2, max. 10) VLPA Forrest Weekly figure-drawing laboratories with live model and weekly field trips for laboratories in drawing natural phenomena and architectural detail. Studies in historical detail. Practice in use of several media and techniques of expression. Recommended: DRAMA 210; DRAMA 211.

DRAMA 441 Beginning Playwriting (1-6, max. 12) VLPA Writing exercises and drafts of a one-act play provide first experience in writing for performance. Readings of representative one-act plays introduce genres and writing styles. Recommended: DRAMA 253 or DRAMA 353; DRAMA 210; DRAMA 211; DRAMA 212.

DRAMA 450 Rehearsal Laboratory (2, max. 6) VLPA Acting in projects directed by graduate directing students. Recommended: DRAMA 253.

DRAMA 451 Advanced Acting — Production Workshop (4) VLPA Improvisation skills. Methodology employs development of one-minute solo work, using either original or adaptations of non-dramatic texts. Culminates in public showings of the five-minute one-person works. Offered: A.

DRAMA 452 Advanced Acting — Scene Study (4) VLPA Invites actor to create a role, Script reading for action and consequence. Use and employment of five senses to express character’s life, presenting a coherent and alive person to the stage. Culminates in public performance. Offered: W.

DRAMA 453 Advanced Acting — Physical Training (4) VLPA Introduction to physical training methods of Tadashi Suzuki, Kenji Suzuki, and the relationship of their methodologies to Constantin Stanislavsky. Contemporary monologues analyzed for psychological motivation, while exploring the physical analog of “action” as expressed and accessed by the new physical training. Offered: Sp.

DRAMA 454 Projects in Acting (3, max. 9) VLPA Rehearsal and classroom performance of dramatic literature of various periods and styles. DRAMA 455 Alexander Technique (3) VLPA Madden A practical and theoretical introduction to the Alexander Technique, a psychophysical re-education process developed by F. M. Alexander (1869-1955). Studio application of this work improves physical/vocal coordination, enhances creativity, and clarifies thinking.

DRAMA 460 Introduction to Directing (4) VLPA Curtis-Newton. Student is introduced to the art of the stage director. Recommended: DRAMA 210; DRAMA 211; DRAMA 212; DRAMA 253 or DRAMA 353; DRAMA 302. Offered: A.

DRAMA 461 Elementary Directing (4) VLPA Curtis-Newton Elementary study of the art of the stage director. Recommended: DRAMA 460.

DRAMA 462 Elementary Directing (4) VLPA Elementary study of the art of the stage director. Recommended: DRAMA 461.

DRAMA 466 Stage Management (2-5, max. 15) VLPA Stewart Study and practice of stage management. Recommended: DRAMA 210; DRAMA 211; DRAMA 212; DRAMA 290; DRAMA 291; DRAMA 292.

DRAMA 471 History of the English Restoration and 18th Century Theatre (5) VLPA Johnson Examination of the relationship of the physical theatre and the productions that look
place within that theatre. Particular emphasis on the text, performed, styles of acting, scenic elements, and the critical theories that influenced the theatre of the period. Prerequisite: DRAMA 302.

DRAMA 472 European and American Theatre, Revolution to Modernism (1780-1920) (5) VLPA Johnson Survey of the drama, theatre, and theatre culture from the French Revolution into the beginnings of Modernism; social and political aspects of the theatre, rise of Romanticism, melodrama, and variety entertainment through the 19th century to the artistic revolution that paved the way for modern theatre. Prerequisite: DRAMA 302.

DRAMA 473 Modern European Theatre and Drama (5) VLPA Witham Major movements and figures in contemporary European theatre from French absurdism to the present. Prerequisite: DRAMA 302.

DRAMA 475 Modern English Theatre and Drama (5) VLPA Witham Major trends in contemporary English theatre, post-World War II era. Experiments such as the Federal Theatre Project, Group Theatre, and Living Theatre. Prerequisite: DRAMA 302.

DRAMA 490 Special Studies in Acting-Directing (1-6, max. 12) VLPA.

DRAMA 491 Special Studies in Design-Technical (1-6, max. 6) VLPA.

DRAMA 494 Special Studies in Theatre and Drama (5, max. 20) VLPA Bryant-Bertail, Johnson, Witham Topics in drama, history, and criticism. See Time Schedule for specific topic. Prerequisite: DRAMA 302.

DRAMA 495 Practicum in Design and Technical Theatre (2-6, max. 15) VLPA Emphasis on developing design and technology problem-solving skills through laboratory and project evaluation. Recommended: DRAMA 211, DRAMA 212, DRAMA 313.

DRAMA 496 Stage Costume Problems (2, max. 8) VLPA Specific research problems of stage costume design and execution: accesso-

DRAMA 499 Theatre Production (1-2, max. 9) VLPA Laboratory course for students participating in School of Drama major productions. Credit/no credit only. Offered: AWSp.

DRAMA 499 Undergraduate Research (1-5, max. 15).

DRAMA 502 Director-Director Analysis (4) Dahlstrom Methods of examining plays to make the collaboration of director and designer productive. Attempts to create a structural whole from visual and verbal approaches to analysis. Prerequisite: graduate standing in drama.

DRAMA 510 Design Studio (3, max. 18) Dahlstrom, Forrester, Trout Investigation of space, form, light, texture, and color in total theatre design, stressing mastery of the media, methods of presentation and execution, and intelligent and appropriate visual reaction to a dramatic text. Prerequisite: graduate standing in drama.

DRAMA 512 Lighting Design Seminar (1/4, max. 18) Forum for graduating students to further explore the art of lighting design, Assignments include paper projects, School of Drama production, and field trips to local theatres. Prerequisite: graduate standing.

DRAMA 514 Design and Technical Theatre Colloquium (2, max. 18) Discussion of work in progress or completed in production, centering on the conceptual work of the designer/director on the production and the methods of execution in the shops and on stage. Offered: AWSp.

DRAMA 518 Studies in Historic Design (3) Dahlstrom Investigation of artistic principles and modes that influenced the art, architecture, furniture, and decor of selected historic periods. Prerequisite: DRAMA 518, or permission of instructor.

DRAMA 520 Advanced Theatre Practicum (1-5, max. 15) Professional student internship with professional theatres: scenery, lighting, scene painting, costume, acting, directing, stage management, theatre management. Prerequisite: permission of instructor.

DRAMA 551 Teaching of Acting (1-3, max. 3) Seminar discussion on problems in teaching acting to undergraduate students in 251, 252, and 253. Prerequisite: permission of instructor and being a teaching assistant in acting.

DRAMA 552 Teaching of Acting (1-3, max. 3) Seminar discussion on problems in teaching acting to undergraduate students in 251, 252, and 253. Prerequisite: permission of instructor and being a teaching assistant in acting.

DRAMA 553 Teaching of Acting (1-3, max. 3) Seminar discussion on problems in teaching acting to undergraduate students in 251, 252, and 253. Prerequisite: permission of instructor and being a teaching assistant in acting.

DRAMA 566 Directing for the Camera (3) Jenkins, Jory, Madden, Pearson, Shahn Focus on the art of directing for television and video productions. Prerequisite: permission of instructor and being a teaching assistant in acting.

DRAMA 567 Acting Process (1-3, max. 12) Development of acting skills necessary for the professional director. Emphasis on physical training, playing action, strong internal technique, imagination and clarity of expression.

DRAMA 568 Writing for the Stage (3, max. 6) Focus on adaptation for the stage of non-dramatic sources, such as literature, poetry, history, and contemporary events. Emphasis on structure, dialogue, dramatic action, rhythm, characterization. Writing exercises using ficitive and non-fictive sources, biographical sources, and found objects. For MFA Directing students only.

DRAMA 569 Directing/Teaching Apprenticeship (3) Assisting faculty or professional guest director in production for the entire rehearsal period, or assisting faculty in performance training.
Earth and Space Sciences

ESS 100 Dinosaurs (2) NW Biology, behavior, ecology, evolution, and extinction of dinosaurs, and a history of their exploration. With dinosaurs as focal point, course also introduces the student to how hypotheses in geological and paleobiological science are formulated and tested.

ESS 101 Introduction to Geological Sciences (5) NW Survey of the physical systems that give the earth its form. Emphasizes the dynamic nature of interior and surface processes and their relevance to mankind and stresses the value of rocks and earth forms in the understanding of past events. A course with laboratory for non-science majors. Not open for credit to students who have taken ESS 105, or ESS 210. Field trips. Offered: AWSp.

ESS 102 Space and Space Travel (5) NW Explores powering the sun, making of space weather conditions, observations from space and from Earth, Earth’s space environment, radiation belts and hazards, plasma storms and auroras, electron beams, spacecraft requirements, tooping up for manned exploration. Open to non-science majors.

ESS 103 Minerals and Gems (3) NW Introduction to the nature of minerals: composition, structure, physical properties, and origins, with emphasis on gem minerals. Focuses on topics of particular interest in gemology, such as mechanisms of color, history and lore of gems, and uses of gems. Hands-on laboratories using about one hundred representative gems and minerals.

ESS 104 Prehistoric Life (3) NW Fossils and how they are preserved. What fossils tell us about past life and environments. How the history of life unfolded and what caused the great events in biological evolution. Open to non-science majors, but also lays a foundation for higher-level geobiology courses.

ESS 105 The Earth: Its Processes and Hazards (5) NW Introduction to physical and environmental geology. Focuses on large-scale tectonic forces create Earth’s continents and oceans, and surficial forces that shape Earth’s landscapes. Emphasizes processes that endanger human populations (such as earthquakes, volcanic eruptions, and floods). Not open for credit to students who have taken ESS 101.

ESS 106 Living with Volcanoes (3) I&S/NW Explores volcanoes and volcanic eruptions on Earth and in the solar system. Examines how volcanoes work and how they affect the environment, life, and human societies. Illustrates principles using local examples of recent volcanism and ancient examples of mega-eruptions. Evaluates the possibility of predicting future eruptions.

ESS 107 Environments of Washington Through Geologic Time (5) NW Introduces students to the geologic and paleontologic history of our region. Students collect data from field studies and museum collections of fossils and rock to reconstruct ancient environments, creating paleogeographic and paleoclimatic maps through geologic sequences of time. Includes three, one-day field trips on weekdays.

ESS 201 The Earth System and Climate (5) NW Earth’s dynamic environment, global energy balance, interplay of chemical, physical, and biological processes shaping the Earth’s surface and climate. Emphasis on quantitative methods for measuring, evaluating, and understanding contemporary changes relative to the last several thousand years. Prerequisite: either MATH 124, MATH 144, or Q SCI 291.

ESS 202 Earthquakes (5) NW Earthquakes of the Pacific Northwest and around the world — their cause and relationship to plate tectonics; why, where, and when they occur. How earthquakes affect human life: shaping landscape, hazards. Laboratory explores physical processes associated with earthquakes. One field trip. Open to non-science majors.

ESS 205 Access to Space (5) NW Group development of student experiments to the outer rim of our atmosphere and the beginning of space; investigation of stratosphere, mesosphere, thermosphere, magnetosphere, development of exploration packages; basic electronic fabrication, global positioning, radio tracking, expectations at high altitudes. Open to all disciplines. No previous experience of electronics required.

ESS 209 Interdisciplinary Earth Sciences Field Seminar (3-12, max. 12) NW Miscellaneous field-based and experiential learning activities in Earth and Space Sciences.

ESS 210 Physical Geology (5) NW Introduction to the physical and chemical processes of the earth’s surface and interior. Plate tectonics, earthquakes, volcanism, glaciation. Optional field trips to Cascades and Olympics. Background in geology not required but science background desirable. Not open for credit to students who have taken 101.

ESS 212 Earth Materials and Processes (5) NW Crystallography, crystal chemistry, and characteristics of rock-forming and ore minerals. Description, phase equilibria, origin, and associations of igneous, sedimentary, and metamorphic rocks. Laboratory study of hand specimens. Two one-day field excursions. Prerequisite: CHEM 142. Offered: W.

ESS 213 Evolution of the Earth (5) NW Introduction to paleontology, types of stratigraphy, and radiometric dating. The physical, chemical, biological, and plate tectonic evolution of the earth’s crust, seawater, and atmosphere. Comparison with other planets. Climate changes and man as a geologic agent. Two one-day field excursions. Prerequisite: ESS 211. Offered: Sp.

ESS 230 Rivers and Beaches (3/5) NW Introduction to Earth surface environments, the processes that shape them, how humans affect them and are affected by them. Weekend field
trips examine mountains, rivers, deltas/estuaries, beaches, and environments beyond. Focus on linking environments to illustrate coupling between landscapes and seascapes. Offered: jointly with OCEAN 230.

ESS 301 Geology of the Northwest (5) NW Geologic history of Washington, Oregon, and Idaho. Emphasis on use of geologic principles in interpreting evidence found in landscapes and rocks. Weekend field trips optional. Prerequisite: either ESS 101, ESS 105, ESS 210, ESS 211.

ESS 302 Great Ice Age (5) NW Growth of mile-thick ice sheets, worldwide lowering of sea level, and other geological and paleoclimatological changes that accompany the harsh environments of a global glaciation. Geology of the last three million years, focusing on the causes and effects of global glaciation and future climate change. Prerequisite: either ESS 101, ESS 105, ESS 210, ESS 211.

ESS 303 Geologic Hazards (5) NW Geologic forces dramatically alter the earth’s surface, devastating communities, taking human lives. Uses lectures and field work to examine geologic hazards affecting civilizations around the world. Northwest examples illustrate causes and effects of many catastrophic geological processes, including: earthquakes, volcanoes, floods, glaciers, landslides. Prerequisite: either ESS 101, ESS 105, ESS 210, ESS 211.

ESS 304 Volcanoes and Glaciers of the Pacific Northwest (5) NW Introduction to volcanic and glacial processes, emphasizing examples in the Pacific Northwest. Volcanic products, landforms, hazards, prediction, and history. Relationship to tectonics. Nature and distribution of present and former glaciers in Washington. Two all-day Saturday field trips to Cascade volcanoes required.

ESS 305 Earthscapes (5) NW Introduction to study of landforms and geomorphic processes. Topics include tectonics, volcanoes, weathering, soils, erosion, mass wasting, rivers, glaciers, coastal landscapes, and arid landscapes. Laboratory assignments, with the writing of scientific abstracts, is included. Optional weekend field trips introduce students to geomorphic landscapes found in western Washington. Prerequisite: either ESS 101, ESS 105, ESS 210, ESS 211.

ESS 306 Planetary Geology (5) NW Up-to-date survey of geological features and processes on and within planets and their moons deduced from sampling, remote sensing, spacecraft imagery, and theory. Comparative discussion of volcanism, tectonics, surface processes, and thermal evolution. Examination of moon rocks and meteorites. Prerequisite: either ESS 101, ESS 105 ESS 210, ESS 211.

ESS 311 Geomorphology (5) NW Introduction to continuum mechanics: elasticity, fluid dynamics, diffusion, porous flow, multiphase flow, dimensional analysis, and natural convection. Example applications: earthquakes and rock mechanics, flow of glaciers, slope stability, debris flows, groundwater flow, contaminant transport, flow in rivers and channels, mantle and magma convection. Prerequisite: either MATH 125 or Q SCI 292; either PHYS 114/117 or PHYS 121. Offered: W.

ESS 312 Geochemistry (5) NW Geochemical concepts essential to earth science studies. Crystal chemistry and elemental affinities, thermodynamics of geologic processes, trace element and isotopic fractionation, weathering, cosmochemistry, and exploration of basic global geochemical cycles. Laboratory exercises explore the dynamics of geochemical processes. Prerequisite: either CHEM 142; either MATH 125 or Q SCI 292; ESS 212. Offered: Sp.

ESS 313 Geobiology (5) NW Introduction to the early record of life on earth. Environmental factors leading to life's diversification. The role of life in biomineralization and the biosphere. The role of life in landform and soil formation. Laboratory exercises demonstrate specimens and techniques. Prerequisite: CHEM 142; either PHYS 114/117 or PHYS 121.

ESS 314 Geophysics: Expedition to Planet Earth (5) NW Survey of fundamental geophysics using an investigative approach. Examines how a future expedition of extraterrestrial humanoids could use geophysical data, physical principles, and mathematical techniques to decide whether they should colonize Earth and understand why the indigenous civilization became extinct. Prerequisite: MATH 126; either PHYS 115/118 or PHYS 122.

ESS 315 Environmental Earth Science (5) NW Analysis of geologic constraints upon human activity and the environmental consequences of such activity. Topics include hillslope processes, fluvial and groundwater processes, earthquake and volcanic hazards, and environmental aspects of deforestation and atmospheric pollution. Prerequisite: either ESS 101, ESS 105, ESS 210, ESS 211. Offered: jointly with ENVR 313.

ESS 326 Geomorphology (5) NW Introduction to landscape processes. Nature and distribution of present and former glaciers in Washington. Two all-day Saturday field trips to Cascade volcanoes required.

ESS 345 The Environment of Fuel and Mineral Deposits (3) I&S/NW Fuels and nonmetallic ores as the substrate of industrial civilization. Provides non-majors with sufficient information about these resources to allow for informed decisions of related geological, environmental, and societal issues. Prerequisite: either ESS 101, ESS 105, ESS 210, ESS 211.

ESS 401 Regional Geology of the Pacific Northwest (3) NW Explores the geological diversity of the Pacific Northwest temporally (Archean to Pleistocene), tectonically (craton, terranes, and cover sequences), and lithologically (ophiolites to coal). Three weekend field trips required.

ESS 402 International Field Geology (3-12, max. 12) NW Supervised geological field work in classic, instructive international sites. Venue varies from year to year. Work may include geologic mapping, construction of cross sections, measurement and analysis of stratigraphic sections, field excavation, and supervised individual research projects.

ESS 403 Plate Tectonics (4) NW Introduction to the principles and methods of plate tectonics, including motions on a sphere, polar-wander paths, plate-boundary seismicity, and focal mechanisms. Also includes modern observations and theories of plate deformation and continental dynamics. Prerequisite: PHYS 121.

ESS 406 Earth Sciences for Middle and High School Science Teachers: Solid Earth (3) NW Topics of contemporary interest selected to meet state academic standards. Topics include Pacific Northwest earthquakes and volcanoes, global and regional plate tectonics, history of the Earth, the Earth's interior, planetary geology, and surface processes on the Earth. Does not count toward the ESS degree. Prerequisite: ESS 101.

ESS 410 Marine Geology and Geophysics (4) NW Sedimentological and petrological processes that determine the geologic record. Prerequisite: either ESS 101 or ESS 210. Offered: jointly listed with OCEAN 410.

ESS 411 Geophysical Continuum Mechanics (3) NW Analysis of stress and strain. Measurement and interpretation of strain in geological materials. Elasticity applied to determine stress in the earth's lithosphere. Creep of solids and flow of geological materials. Prerequisite: either MATH 136 or both MATH 307 and MATH 308.

ESS 412 Seismology (3) NW Introduction to theoretical and observational seismology. Elastic plane wave propagation through stratified media. Surface waves, eigenfunctions, ray theory. Structure of the Earth's mantle and core. Seismicity distributions, earthquake focal mechanisms and relationship to tectonics. Prerequisite: either ESS 411; recommended: concurrent registration in ESS 446.

ESS 413 Geophysics: The Earth (3) NW The earth and its interior; gravity, magnetism, heat flow, seismology. Earth's outer structure, studied through the unifying concepts of plate tectonic theory. Quantitative approaches to problems, using techniques of classical physics. Prerequisite: either ESS 412; PHYS 322.

ESS 414 Geophysics: Fluids (3) NW Introduction to geophysical fluid dynamics. An overview of fluids in geophysics with emphasis on the oceans. A nonrigorous development of the equations of motion with examples drawn from oceanography and solid earth geophysics. Prerequisite: either MATH 136 or both MATH 307 and MATH 308; PHYS 322.

ESS 415 Space and Plasmas (3) NW Survey of various phenomena occurring in outer regions of Earth's atmosphere, ionosphere, magnetosphere, and Van Allen radiation belts. Laboratory applications include plasma thrusters and fusion concepts. Concepts include charged particles in magnetic fields, drift motion, plasma, magnetohydrodynamic waves. Prerequisite: PHYS 321.

ESS 416 Geophysics: The Atmosphere (3) NW Phenomena of the lower atmosphere: some simple applications of the principles of classical thermodynamics, fluid dynamics, and radiative transfer to the atmospheric hydrological cycle, global energy balance, and atmospheric dynamics and climate. Prerequisite: ESS 414.

ESS 422 Intermediate Spectral Remote Sensing (4) NW Explores spectral image processing with ENVI software, used in individualized projects involving satellite or aircraft images. Emphasis on integration of remote sensing and field measurement using process models and Geographic Information Systems (GIS). Recommended: introductory
courses in physics, chemistry, calculus, geology, and field geology. Prerequisite: ESS 421.

ESS 424 Water in the Environment (3) NW Discusses the unique physical and chemical properties of the water molecule in relation to the atmospheric greenhouse effect, precipitation formation, ocean circulations, infiltration of water through soils, geysers eruptions, and glacier and sea ice thickness. Prerequisite: either MATH 124, MATH 126, MATH 129, or MATH 136; PHYS 123. Offered: jointly with ATM S 460/PHYS 460.

ESS 426 Fluvial Geomorphology (5) NW Hydraulic and morphological characteristics of streams and valley floors. Landscape evolution by stream erosion and deposition. Field exercises emphasize quantitative analysis of fluvial processes, channel forms, acquisition of various skills, such as mapping, topographic surveying, report writing. Prerequisite: either ESS 311, or ESS 326.

ESS 427 Hillslope Geomorphology (5) NW Theoretical, laboratory, and field study of hillslope evolution by mass wasting and water erosion. Prerequisite: either ESS 311, or ESS 326.

ESS 428 Landscape Evolution (5) NW Advanced examination of landscape evolution. Emphasis on technics and concepts among tectonics, climate, and hillslope, fluvial, and glacial processes. Intended for seniors and graduate students in geomorphology and related disciplines. Prerequisite: either ESS 426, or ESS 427.

ESS 431 Principles of Glaciology (3) NW Snow deposition and metamorphism, avalanches, heat and mass balance at snow and ice surfaces, glacier flow, ice sheets, sea ice, permafrost, methods of paleoclimate reconstruction, Ice Age theories. Prerequisite: PHYS 121; PHYS 122.

ESS 432 Glacial Geology (5) NW Interpretation of glacial environments and history through study of sediments and landforms. The laboratory component is largely field based and visits some spectacular glaciated landscapes. Provides students an experiential learning approach to the field as well as an opportunity to conduct independent research.

ESS 433 Environmental Change in the Glacial Ages (3) NW Physical, biological evidence of climatic change during Quaternary Period; emphasizing stratigraphy, chronology. Impact of alternating glacial/interglacial cycles on earth’s terrestrial, marine environments. Theories on causes of climatic variation. Offered: jointly with QUAT 417.

ESS 439 Petrology of Igneous Rocks (5) NW Systematic study of the major families of volcanic and plutonic igneous rocks with emphasis on tectonic setting, phase relations, geochemistry, and models of their origin and evolution throughout geologic time. Laboratory emphasizes thin-section study of rocks using transmitted and reflected light. Prerequisite: ESS 312.

ESS 440 Petrography and Petrology of Metamorphic Rocks (5) NW Mineralogy, textures, and origins of metamorphic rocks; metamorphic facies and metamorphic phase equilibria; controls of metamorphism. Prerequisite: ESS 312; ESS 438.

ESS 441 Petrology and Petrography of Sedimentary Rocks (5) NW Mineralogy, textures, and origin of sedimentary rocks, using petrographic microscope. Prerequisite: ESS 312.

ESS 445 Geology of Ore Deposits (5) NW The geologic principles, environmental aspects, and exploration strategies of selected types of metallic and nonmetallic ore deposits and coal. Prerequisite: ESS 312.

ESS 450 Paleobiology (3) NW Biological evolution over the past 500 million years, considering how the reciprocal interactions between environment and evolution have influenced the major episodes in life’s history and providing a background for assessing the evolutionary impact of modern environmental change.

ESS 451 Invertebrate Paleontology (5) NW Important larger invertebrate groups; morphology, classification, stratigraphic distribution, evolution, paleoecology. Offered: jointly with BIOL 451.

ESS 452 Fossil Vertebrates (5) NW Highlights in evolutionary history of the fossil vertebrates, from early Paleozoic fish es through late Cenozoic mammals. Morphology, adaptations, relationships of the major groups. Bone structures and systematic relationships. Field trip. Prerequisite: either BIOL 101, or ESS 100.

ESS 453 Fossil Mammals (5) NW Evolutionary relationships of fossil mammals, from mammal-like reptiles of late Paleozoic to diverse Cenozoic groups. Morphology, adaptations, extinctions, evolutionary patterns. Structures and relationships of most major groups. Field trip. Prerequisite: either BIOL 101, or ESS 100, or ESS 452.

ESS 455 Stratigraphy (4) NW Systematic study of stratified rocks and space-time implications. Principles of stratigraphy, including biostratigraphy, magnetostratigraphy, seismic stratigraphy, subsurface mapping. Emphasis on the analysis, evolution of sedimentary basins and continental margins. Prerequisite: ESS 213.

ESS 456 Depositional Environments (4) NW Principles of sedimentary facies analysis, including survey of modern processes that produce sedimentary sequences. Recognition of various depositional environments represented in the geologic record, including terrestrial, marine terrigenous, and carbonate environments. Two field trips required. Prerequisite: ESS 213.

ESS 457 Environmental Geochemistry (4) NW Examines the geochemistry of natural waters, emphasizing applications in geological and soil sciences. Topics include soil/groundwater composition; weathering and the carbon cycle; equilibrium computer modeling; colloids and clay minerals; organic geochemistry of water and soil; and groundwater quality. Experience with geochemical instrumentation. Prerequisite: ESS 312, CHEM 152, or CHEM 155.

ESS 458 Isotope and Trace Element Geology: Lithosphere (3) NW Radiogenic isotopes and trace element as petrogenetic indicators; evolution of earth’s major geochemical reservoirs; application to problems in igneous, metamorphic, sedimentary petrology; stable isotopes, geothermometry; nesosynthesis, origin, and chronology of solar system formation; U-Th disequilibrium series. Prerequisite: either CHEM 150, CHEM 152, or CHEM 155; ESS 312.

ESS 459 Environmental Isotope Geology (3) NW The geochemistry of stable isotopes. Topics include the theory of isotope fractionation, application of isotopes in earth surface processes, climate, and biogeochemical cycles. Includes extensive laboratory experience. Prerequisite: ESS 312.

ESS 460 Cosmogenic Nuclides in Geomorphology (3) NW Use of cosmic-ray-produced nuclides to date rock surfaces and analyze geomorphic processes. Nuclide production by cosmic radiation above and below ground; tracer methods; exposure dating; coupling of cosmogenic nuclide data to geomorphic models. Open to undergraduate students only. Prerequisite: either ESS 312 or ESS 313.

ESS 461 Geological Time (3) NW Principles of radiometric dating. Methods applicable to Earth history from planetary formation to the recent past. Radionuclide dating; geological dating with long-lived isotopes; uranium series, trapped charge and cosmogenic nuclides. Applications in archaeology, climate change, geomorphology, tectonics, and Earth evolution.

ESS 462 Volcanic Processes (4) NW Pre-eruption, eruption, and post-eruption processes. Examines triggers of magma ascent, controls on volatile build-up and loss, magma fragmentation, magma-groundwater interaction, eruption column dynamics, gravity-controlled eruption dynamics, ash-cloud, syn- and post-eruption lahars and other reworking of deposits. Prerequisite: either ESS 311 or ESS 312.

ESS 463 Structure and Tectonics (5) NW Geometry, kinematics, and tectonic setting of major types of structures, including those in contractual fold-and-thrust belts; extended crust; strike-slip-dominated regimes; and shear zones. Laboratory exercises develop basic tools of structural geology. Prerequisite: ESS 213.

ESS 464 Geodynamics (4) NW Principles of continuum mechanics; the application to flow of water, mud, magma; deformation of soil, rock, ice. Emphasis on sound physical understanding of these principles and use of elementary mathematics in their application to earth sciences problems. Prerequisite: ESS 311; either MATH 126, MATH 129, or MATH 136; PHYS 121.

ESS 465 Seismology and Earthquake Engineering (3) NW Overview of earthquake processes and details of the characteristics of destructive ground motion; effects of such motion on engineering structures; current practice in estimating earthquake hazards for important structures such as nuclear power plants. Prerequisite: either MATH 136 or both MATH 307 and MATH 308. Offered: jointly with CEE 431.

ESS 467 Seismic Exploration (5) NW
Introduction to theory and practice of seismic exploration. Application of refraction and reflection techniques to problems in engineering geology and mineral exploration. Constraints in the interpretation of subsurface structure. Prerequisite: ESS 311; either MATH 126, MATH 129, or MATH 136; PHYS 123.

ESS 471 Introduction to Space Physics (3) NW
Introduces several areas of space physics, the physical principles that apply therein, and the methods by which significant observations are made. Covers electromagnetic and plasma processes from the center of the sun to the surface of the earth. Prerequisite: PHY/S 123.

ESS 489 Honors Seminar (3) Bourgeois Covers current scientific topics in Earth and Space Sciences; philosophy and methodology of science strategies for developing research projects; scientific education and career planning. May require colloquium or local conference attendance. Offered: A.

ESS 490 Special Topics (2-10, max. 20) NW

ESS 492 Undergraduate Teaching Experience and Outreach (1-2, max. 2) NW
Designed to help undergraduate majors acquire effective teaching skills at the college and public school level. Teaching experience gained through assisting graduate student teaching assistant or K-12 public school outreach. Involves classroom teaching experience and improving communications and presentation skills.

ESS 495 NASA Science and Engineering Research Seminar (1-4) NW
Review of current space science-related research. Emphasis varies, but topics may include planetary geology, astronomy, global change, aeronaunal engineering, and remote sensing. Credit/no credit only.

ESS 498 Undergraduate Thesis (5) NW
The thesis must be submitted at least one month before graduation.

ESS 499 Undergraduate Research (* max. 15)

ESS 502 The Solid Earth (3) Concepts of internal earth processes: Earth as heat engine and chemical processor, style of mantle convection, origin and evolution of the Earth’s magnetic field, Cascadia subduction and hazards. Introduces seismology, fluid dynamics, heat flow, gravity, and geomagnetism. Focuses on the analysis, critique, and communication of ideas from scientific literature.

ESS 513 Geophysics: The Earth (3) Study of gravity, magnetism, heat flow, seismology. Earth’s outer structure studied through unifying concepts of plate tectonic theory. Quantitative approaches to problems, using techniques of classical physics. Includes advanced, research-oriented problems. Prerequisite: ESS 512; PHYS 322.

ESS 514 Geophysics: Fluids (3) Geophysical fluid dynamics. Fluids in geophysics with emphasis on the oceans. Development of the equations of motion with examples drawn from oceanography and solid earth geophysics. Includes advanced, research-oriented problems. Prerequisite: PHYS 322; MATH 307 and MATH 308 or equivalent.

ESS 516 Geophysics: The Atmosphere (3) Phenomena of the lower atmosphere: some simple applications of the principles of classical thermodynamics, fluid dynamics, and radiative transfer to the atmospheric hydrological cycle, global energy balance, and atmospheric dynamics and climate. Includes advanced, research-oriented problems. Prerequisite: ESS 514.

ESS 517 Early Earth Evolution (3) Geological, biological, and environmental evolution of the Earth over the first 4 billion years of its history, as an analogue for the development of other habitable planets.

ESS 518 Remote Sensing of the Atmosphere and Climate System (3) Satellite systems for sensing the atmosphere and climate system. Recovery of atmospheric and surface information from satellite radiance measurements. Applications for research. Prerequisite: ESS 571; ESS 572. Offered: jointly with ATM S 534.

ESS 520 Geophysical Data Collection and Analysis (3) Theory and practical application of data collection and analysis applied to geophysical problems. Digital processing of signals; filtering and spectral analysis. Laboratory sessions include problem solving on computer-based processing systems.

ESS 523 Geophysical Inverse Theory (3) Introduction to the mathematical techniques for estimating properties of physical systems, such as the earth or atmosphere, from data that is insufficient for a precise specification of the system. Emphasis is on the concept of the resolving power of data sets. The ideas developed are quite general and have a wide range of applicability in the field of data interpretation. Prerequisite: ESS 522, or permission of instructor.

ESS 526 Sediment Dynamics and Boundary-Layer Physics (4) Theoretical descriptions of sediment transport processes constrained by laboratory demonstrations. The physics of boundary layer, initiation of motion, suspended load, bedload, bedforms, and continuing transport (turbidity currents, debris flows, and suspensions) and its application to the geological record. Offered: jointly with OCEAN 542.

ESS 527 Continental-Margin Sedimentation (3) Detailed evaluation of recent studies into processes forming strata on continental margins, including the diverse time scales ranging from sediment transport to sequence stratigraphy. Highlights the linkages with physical oceanographic processes, the fates of geochemical components, and the relationships of the biological communities. Offered: jointly with OCEAN 546.

ESS 528 Interpretation of Sedimentary Structures (2-4, max. 4) Physical and environmental analysis of sedimentary structures, including biogenic sedimentary structures. Clastic sediments and rocks. Field trips required.

ESS 529 Principles of Fluid Dynamics, Heat, and Mass Transfer in Earth Sciences (3)
Introduction to the quantitative treatment of transport phenomena with applications to mantle and magma convection, volcanic eruptions, landslides, porous flow, and reaction. Emphasis on the governing equations of fluid dynamics including porous and multiple flow, chaotic convection, mixing, heat transfer, rheology, analytical, numerical, and scaling solutions.

ESS 531 Physics of Ice (3) Structure of the water molecule. Crystallographic structures of ice. Electrical, optical, thermal, and mechanical properties of ice. Growth of ice from vapor and liquid phases. Prerequisite: permission of instructor. Offered: jointly with ATM S 510.

ESS 533 Dynamics of Snow and Ice Masses (3) Rheology of snow and ice. Sliding and processes at glacier beds. Thermal regime and motion of seasonal snow, glaciers, and ice sheets. Avalanches and glacier surges. Deformation and drift of sea ice. Response of natural ice masses to change in climate. Prerequisite: permission of instructor. Offered: jointly with ATM S 512.

ESS 534 Structural Glaciology (3) Physical and chemical processes in snow, stratigraphy, and metamorphism. Interpretation of ice sheet stratigraphy in terms of paleoenvironment. Dynamic metamorphism of ice from flow. Structures formed at freezing interfaces. Structure of river, lake, and sea ice. Relationship between structures and bulk physical properties. Prerequisite: permission of instructor. Offered: jointly with ATM S 513.

ESS 537 Advanced Mineralogy (3) Crystal symmetry; point groups, space groups. Mathematical description of crystal structures; group theory, irreducible representations; tensor description of physical properties: stress, strain, piezoelectricity, elasticity; structural and magnetic phase transitions, Landau theory, deformation
and creep crystals; elasto-viscous properties of earth’s mantle, crystal chemistry, solid state reactions. Offered: jointly with MSE 518.

ESS 538 Petrogenesis of Igneous Rocks (3) Origin of one or more of the major groups of igneous rocks. Selected petrogenetic problems in light of tectonic setting, petrography, geochemistry, and experimental studies. Prerequisite: ESS 439 or equivalent.

ESS 545 Economic Geology of Sedimentary Rocks (5) Description and origin of metallic and nonmetallic ore deposits indigenous to regoliths, sediments, and sedimentary rocks. Prerequisite: ESS 445, or equivalent or permission of instructor.

ESS 548 Geodynamics (3) Advanced study of various aspects of the dynamics of the solid Earth. Topics may include plate tectonics, mantle convection, rotational dynamics, post-glacial rebound, fault mechanics, and geodetic measurement of crustal deformation.

ESS 549 Geomagnetism (3) Advanced aspects of earth magnetism intended for specialists in this field. Extensive discussion of origin theories and their implications; physical basis and theories of magnetism in rocks; paleomagnetic techniques and results. Prerequisite: permission of instructor.

ESS 550 Electromagnetic and Potential Field Methods (3) Development of equations of electromagnetic fields in conducting media. Solution of forward and inverse problems with natural and controlled sources: magnetotelluric and related methods. Includes the special case of static fields: DC resistivity, gravity, and magnetic interpretation. Prerequisite: either ESS 413, or ESS 513, ESS 522, PHYS 323; or permission of instructor.

ESS 551 Mineral Physics (3) Applications of solid-state physics to various geophysical problems. Topics vary, but usually include the thermal properties of relevant geophysical materials, the equation of state for the earth’s mantle and core, defects in solids and their roles in tectonophysics. Prerequisite: permission of instructor. Offered: alternate years.

ESS 552 Solution Geochemistry (4) Solution chemistry and thermodynamics as applied to solid and liquid silicates and aqueous fluids. Modeling configuration entropies in solids, activity coefficients and complexes in aqueous solution, and modeling chemical mass transfer in geologic systems. Prerequisite: ESS 312, or equivalent.

ESS 553 Electron Beam Microanalysis (4) Materials analysis using electron beams, including electron-target interactions, wave and energy dispersive x-ray analysis, scanning electron microscopy, and applications of these and related techniques to geological problems.

ESS 555 Physics and Chemistry of the Earth’s Interior (3) Emphasizes current issues in global tectonics and mantle dynamics. Examples include global seismic tomography and its bearing on geodynamics, the fate of subducted lithospheres and geochemical constraints on mantle convection. Prerequisite: permission of instructor.

ESS 556 Physical Petrology (3) The quantitative treatment of magmatic processes: thermomechanical state of the lithosphere, solidification, convection, conjugate heat transfer, crystal settling, magma mixing, diapirism and melt extraction, hydrothermal convection. Emphasis on continental lithosphere. Prerequisite: permission of instructor.

ESS 560 Cosmogenic Nuclides in Geomorphology (3) NUW Use of cosmogenic-radiation-produced nuclides to date rock surfaces and analyze geomorphic processes. Nuclide production by cosmic radiation above and below ground; tracer methods; exposure dating; coupling of cosmogenic nuclide data to geomorphic models. Prerequisite: either AMATH 301, AMATH 351, or permission of instructor.

ESS 562 Observational Seismology (1, max 18) Quarterly research topics introduce students to a variety of digital and analog seismograms and techniques for their interpretation. Students present results of short investigations in an informal seminar setting. Credit/no credit only. Prerequisite: either ESS 412, ESS 512, or permission of instructor.

ESS 563 Theoretical Seismology I (3) Advanced theoretical seismology. Attenuation and physical dispersion. Waves in anisotropic media. Moment-tensor source representation. Lamb’s problem in stratified media: propagator methods, asymptotic ray theory, WKBJ seismograms. Inverse methods and analysis of seismological data. Prerequisite: either ESS 412, ESS 512, or permission of instructor.

ESS 565 Low-Frequency Seismology (3) Represent seismic displacement field, including surface and body waves, as superposition of normal modes. Rigorous development of equations of motion, their solution, energy integrals, Rayleigh’s Principle, perturbation theory, attenuation, and excitation formulae. Moment-tensor representation of seismic sources. Prerequisite: either ESS 412, ESS 512, or permission of instructor.

ESS 568 Physics of the Oceanic Lithosphere (3) Basic principles of elasticity, fluid flow, and heat transport with specific applications to the formation and evolution of the oceanic lithosphere. Includes deformation of the earth, flow in porous media, heat transport, and marine seismological and potential field techniques. Prerequisite: OCEAN 540. Offered: jointly with OCEAN 545.

ESS 571 Atmospheric Radiation: Introductory (3) Fundamentals of radiative transfer; absorption and scattering by atmospheric gases; elementary applications to constraints on the thermal structure, photochemistry, and remote sensing. Prerequisite: PHYS 225 or permission of instructor. Offered: jointly with ATM S 532.

ESS 572 Atmospheric Radiation: Advanced (3) Optical properties and particle absorption and scattering; solutions of radiative transfer equation in multiple scattering atmospheres; applications to atmospheric and surface energy balance and remote sensing. Prerequisite: ATM S 532/ESS 571 or permission of instructor. Offered: jointly with ATM S 533.

ESS 573 Cloud Microphysics and Dynamics (3) Basic concepts of cloud microphysics, water continuity in clouds, dynamics, and cloud models. Prerequisite: ATM S 501 or permission of instructor. Offered: jointly with ATM S 535.

ESS 574 Atmospheric Electrical Dynamics (3) Global and local dynamic electric field models, including upper atmospheric and tropospheric sources as modified by propagation delays, orographic features, and transient phenomena. Radiation and plasma waves along with microphysics of corona discharge and charge separation mechanisms. Prerequisite: ESS 415; ESS 416; or permission of instructor.

ESS 576 Space and Laboratory Plasma Physics (3) Discussion of equilibrium and stability, diffusion and resistivity, basic plasma kinetic theory, and wave-particle interactions. Prerequisite: ESS 415, or equivalent or permission of instructor. Offered: jointly with A A 556.

ESS 577 Advanced Space Plasma Physics (3) Formation by the interaction of solar wind with geomagnetic field. Trapped particles. Electromagnetic waves in anisotropic plasma. Dynamic disturbances and plasma instabilities. Prerequisite: ESS 415, or permission of instructor.

ESS 578 Kinetic Theory and Simulation of Space Plasmas (3) Wave-particle interactions in space plasmas. Generation of different wave modes, electrostatic and electromagnetic, Langmuir waves to Alfvén waves. Beam, Weibel, and maser instabilities, heavy ion interactions. Particle simulations, electrostatic and electromagnetic, for non-linear wave evolution and particle heating.

ESS 579 Computational Methods and Modeling in Geophysics I (3) Solution of complex dispersion equations including multiple root finding. Data analysis, fitting, smoothing, fast integration. Ray tracing and particle tracking in 2-D and 3-D. Computer simulation of fluid interactions, unmagnetized and magnetized, compressible and incompressible, and flow around objects.

ESS 581 Planetary Atmospheres (3) Problems of origin, evolution, and structure of planetary atmospheres, emphasizing elements common to all planetary atmospheres, roles of radiation, chemistry, and dynamic processes; new results on the atmospheres of Venus, Mars, Jupiter, and other solar-system objects in the context of comparative planetology. Offered: jointly with ASTR 555/ATM S 555.

ESS 583 Origin of the Solar System (3) Nebular and nonbureal theories of the origin of the solar system, collapse from the interstellar medium, grain growth in the solar nebula, formation of planetesimals and planets, early evolution of the planets and other possible planetary systems; examination of the physical
and chemical evidence upon which the ideas concerning the origin of the solar system are based. Offered: jointly with ASTR 557.

ESS 585 Climate Impacts on the Pacific Northwest (4) Knowledge of past/future patterns of climate to improve Pacific Northwest resource management. Topics include the predictability of natural/human-caused climate changes; past societal reactions to climate impacts on water, fish, forest, and coastal resources; how climate and public policies interact to affect ecosystems and society. Offered: jointly with ATM S/ENVIR/ SMA 585.

ESS 586 Current Research in Climate Change (2, max. 20) Weekly lectures focusing on a particular aspect of climate (topic to change each year) from invited speakers (both UW and outside), plus one or two keynote speakers, followed by class discussion. Offered: jointly with ATM S 586/OCEAN 586.

ESS 587 Climate Dynamics (3) Examines Earth's climate system; distribution of temperature, precipitation, wind, ice, salinity, and ocean currents; fundamental processes determining Earth's climate; energy and constituent transport mechanisms; climate sensitivity; natural climate variability on interannual to decadal time scales; global climate models; predicting future climate. Offered: jointly with ATM S 587/OCEAN 587.

ESS 590 Special Topics (2-10, max. 20) .

ESS 594 Introduction to Earth and Space Sciences Research (1-2, max. 4) Introduces research of faculty and advanced graduate students to first-year graduate students and provides experience for the formulation, oral presentation, and defense of research proposals and results.

ESS 595 Earth and Space Sciences Research Methods (2, max. 12) Current research methodology and results based on recent literature and on faculty and student research. Designed to develop student perspective on observational and theoretical methods and on relation of specific research to broader developments in geophysics and interdisciplinary aspects of geophysics through faculty-guided presentations and discussion by students.

ESS 599 Seminar (1, max. 15) Review of current literature in geophysics and graduate student research with faculty participation. Credit/no credit only.

ESS 600 Independent Study or Research (*) Credit/no credit only.

ESS 700 Master's Thesis (*) .

ESS 800 Doctoral Dissertation (*) .

Economics

ECON 100 Principles of Economics (5) I&S, QSR Fundamental concepts of economic analysis with application to contemporary problems. Cannot be taken for credit if 200 or 201 previously taken.

ECON 150 Quantitative Preparation for Economics and Business (5) NW, QSR Introduces students to the kinds of quantitative analysis used in economics and business courses. Uses practical examples to build skills in graphical analysis, use of algebra, basic probability, introductory computer use, and quantitative reasoning.

ECON 200 Introduction to Microeconomics (5) I&S, QSR Analysis of markets: consumer demand, production, exchange, the price system, resource allocation, government intervention. Recommended: MATH 111. Offered: AWSpS.

ECON 201 Introduction to Macroeconomics (5) I&S, QSR Analysis of the aggregate economy: national income, inflation, business fluctuations, unemployment, monetary system, federal budget, international trade and finance. Prerequisite: ECOn 200; recommended: MATH 111. Offered: AWSpS.

ECON 235 Introduction to Environmental Economics (5) I&S/NW Introduces non-economics majors to environmental and natural resource economics. Discussion of fundamental economic concepts, including markets and private property. Students learn basic tools used in the economic assessment of environmental problems and apply these methods to key environmental issues. Offered: jointly with ENVIR 235.

ECON 299 Study Abroad: Economics (5, max. 10) I&S For participants in the Study Abroad program. Specific course content determined by assigned faculty member and announced in Study Abroad bulletins.

ECON 300 Intermediate Microeconomics (5) I&S Analysis of decisions by individuals and by firms and of outcomes in factor and product markets. Policy issues and applications. Prerequisite: ECOn 200; either MATH 112, MATH 124, MATH 127, MATH 134, or MATH 145. Offered: AWSpS.

ECON 301 Intermediate Macroeconomics (5) I&S Analysis of the determinants of the aggregate level of employment, output, prices, and income of an economy. Policy issues and applications with special reference to current monetary and fiscal policy. Prerequisite: 2.0 in ECOn 201; 2.0 in ECOn 300. Offered: AWSpS.

ECON 306 Topics in Economics (1-5, max. 10) I&S Provides undergraduates the opportunity to apply tools learned in introductory economics courses to topics of interest outside the standard curriculum. Topics vary. Prerequisite: ECOn 201.

ECON 399 Economics Internship (1-5, max. 10) Academic work completed in conjunction with an economics-related internship. Faculty supervision required. Does not apply toward major.

ECON 400 Advanced Topics in Microeconomics (5) NW Application of calculus to microeconomics. Development of comparative statics used in production and consumption theory, including derivation of the Slutsky equation and duality results. Prerequisite: 2.0 in ECOn 300; either MATH 124, MATH 127, MATH 134, or MATH 145; recommended: MATH 126 and 2.5 in ECOn 300.

ECON 401 Advanced Topics in Macroeconomics (5) NW Application of mathematics to macroeconomics. Possible topics include economic dynamics and growth, rational expectations, real business cycle models, and New Keynesian approach. Prerequisite: 2.0 in ECOn 301; either MATH 126, MATH 129, or MATH 136; recommended: 2.5 in ECOn 301.

ECON 402 Microeconomics: Methods and Applications (5) I&S Generalizations and extensions of the course models of competition and monopoly taught in ECOn 300. Topics include factor markets and effects of monopoly power; game theory and oligopoly theory; decision making over time; uncertainty and under asymmetric information; contracts and incentives. Prerequisite: 2.0 in ECOn 300.

ECON 403 The Economics of Property Rights (5) I&S Property rights as an economic concept. Delineation of rights as a subject of optimization. Formation of contracts to maximize the value of personal property. Formation of organizations to induce efficient use of resources and minimize losses to public domain. Prerequisite: 2.0 in ECOn 300; recommended: two 400-level microeconomics classes.

ECON 404 Industrial Organization and Price Analysis (5) I&S Analysis of firm behavior in imperfectly competitive markets. Topics include monopoly, oligopoly, product differentiation, entry deterrence, and the role of asymmetric information. Game theoretic tools and empirical evidence used to analyze topics. Prerequisite: ECOn 300.

ECON 406 Undergraduate Seminar in Economics (5, max. 10) I&S Provides undergraduate student an opportunity to apply the tools of economic analysis in a critical examination of theoretical and empirical work. A list of topics is available in the departmental office. Prerequisite: ECOn 200.

ECON 407 Development of Economic Thought (5) I&S From the early modern period to the present. The main subjects treated are Adam Smith and the classical school, Karl Marx, the neoclassical reformulation and its critics, the impact of J. M. Keynes, and the evolution of economics in the twentieth century. Prerequisite: 2.0 in ECOn 300.

ECON 409 Undergraduate Seminar in Political Economy (5, max. 10) I&S Marxian and public choice approaches to political economy. Explores the questions raised by each approach, the assumption(s) and testability of hypotheses, and applies these approaches to a number of problems in political economy. Recommended: ECOn 300; POL S 270. Offered: jointly with POL S 409.

ECON 421 Money, Credit, and the Economy (5) I&S Role of money and the banking system in the United States economy. Relation of money to...
inflation, interest rates, and business fluctuations. Monetary policy and Federal Reserve System. Prerequisite: 2.0 in ECON 301.

ECON 422 Investment, Capital, and Finance (5) I&S Intertemporal optimization: consumption and portfolio allocation decisions of households, firms, government, and the economy. Examination of the determinants of savings, and capital formation. Investment and savings behavior of households and firms. Prerequisite: 2.0 in ECON 300; either ECON 311, STAT 311, MATH 390, STAT 390, or QMETH 201.

ECON 423 Topics in Financial Economics (5) I&S Topics of current interest such as regulation of securities markets and valuation of stocks. Allows students to apply tools of economics to real world problems in finance. Prerequisite: 2.0 in ECON 301; ACCTG 215. Offered: A/WspS.

ECON 424 Computational Finance and Financial Econometrics (5) NW Covers probability models, data analysis, quantitative, and statistical methods using applications in finance. Prerequisite: 2.0 in ECON 301; either ECON/STAT 311, STAT 341, MATH/STAT 390, or QMETH 300; either MATH 112, MATH 124, MATH 127, MATH 134, or MATH 145. Offered: A/WspS.

ECON 431 Government and Business (5) I&S Economic effects of various governmental regulatory agencies and policies. Antitrust legislation as a means of promoting desired market performance. Observed economic effects of policies intended to regulate business practices, control prices, conserve resources, or promote competition. Prerequisite: 2.0 in ECON 300.

ECON 435 Natural Resource Economics (5) I&S Survey of the economics of renewable and nonrenewable resources including fisheries, forest, minerals, and fuels. Optimal trade-offs between benefits and costs of resource use, including trade-offs between current and future use. Effects of property rights on resource use. Prerequisite: ECON 300.

ECON 436 Economics of the Environment (5) I&S Microeconomic analysis of environmental regulation. The problem of social cost, policy instrument choice, enforcement of regulations, methods for damage assessment, and estimating benefits of environmental improvement. Prerequisite: 2.0 in ECON 300.

ECON 437 Economics of Biological Resources (5) I&S Application of economic concepts to biology and biological concepts to economics. Examination of theory of species maximization, parallels in behavior between humans and other biota, animal choices among alternative food sources, games animals play, evidence of risk aversion in animals. Prerequisite: 2.0 in ECON 300.

ECON 442 Economics of Human Resource Management (5) I&S Analyzes the relationship between personnel practices and organizational performance. Economic analysis of compensation policy emphasized. Topics include hiring and retention strategies; incentive pay; relative performance evaluation; teams; promotions; seniority; and organization design. Examines human capital accumulation and labor legislation. Prerequisite: minimum grade of 2.0 in ECON 300.

ECON 443 Labor Market Analysis (5) I&S Determinants of employment and incomes in the United States: analysis of individual and firm decisions and of equilibrium in the labor market. Topics include decisions to work and retire, education and occupation choices, compensation, discrimination, poverty, unemployment and unions. Examination of policy issues affecting the labor market. Prerequisite: 2.0 in ECON 300.

ECON 444 Topics in Labor Market Analysis (5) I&S In-depth analysis of special topics in the operation of labor markets and public policies affecting incomes and employment. Course content varies by instructor. Prerequisite: 2.0 in ECON 300.

ECON 446 Economics of Education (5) I&S Examines formal education as an investment industry, the economics of human capital investment, and competition among government owned schools and the non-profit sector. Prerequisite: 2.0 in ECON 300. Offered: A/WspS.

ECON 447 Economics of Gender (5) I&S Microeconomic analysis of the sources of gender differences in earnings, labor force participation, occupational choice, education, and consumption. Economic theories of discrimination, human capital, fertility and intrahousehold resource allocation. Economics of the family, differentials in developed and developing countries. Prerequisite: 2.0 in ECON 300. Offered: jointly with WOMEN 447.

ECON 448 Population and Development (5) I&S Survey of topics in population economics, including history of thought, demographic experience of currently developing countries, household production models, fertility demand, quantity-quality models of fertility, mortality, health and nutrition, migration, macroeconomic-demographic linkages. Prerequisite: 2.0 in ECON 300.

ECON 450 Public Finance: Expenditure Policy (5) I&S Application of normative microeconomic theory to analysis of government expenditures. Rationale for government economic activity, collective choice, public goods, and externalities, income redistribution, public sector pricing, and specific expenditure programs. Prerequisite: 2.0 in ECON 300.

ECON 451 Public Finance: Tax Policy (5) I&S Microeconomics of taxation: efficiency, incidence, effect on distribution of income, personal and corporate income taxes, sales and consumption taxes, taxation of property and estates. Prerequisite: 2.0 in ECON 300.

ECON 454 Cost-Benefit Analysis (5) I&S Theory and practice of cost-benefit analysis of public sector projects and policies. Welfare criteria, investment criteria, shadow prices, social discount rate, marginal-willingness-to-pay for non-market goods, social risk, and special topics. Prerequisite: 2.0 in ECON 300.

ECON 455 Microeconomics of Public Policy (5) I&S Topics include general equilibrium analysis of efficiency and equity, income and substitution effects, analysis of alternative welfare programs, intergovernmental grants, price discrimination, price controls, rationing, industry regulation, and public goods. Prerequisite: 2.0 in ECON 300.

ECON 460 Economic History of Europe (5) I&S Origins of the modern European economy; historical analysis of economic change and growth from medieval times that stresses the preconditions and consequences of industrialization. Recommended: ECON 201. Offered: jointly with HIST 451.

ECON 462 Economic History of the United States to the Civil War (5) I&S Systematic study of the changing pre-Civil War economic conditions and the consequences of these changes for the American society. Prerequisite: ECON 201.

ECON 463 Economic History of the United States From the Civil War to the Present (5) I&S Systematic study of the changing economic conditions since the Civil War and the consequences of these changes for the American society. Prerequisite: ECON 201.

ECON 464 Financial Crisis (5) I&S Causes, effects, and cures for financial crisis traced through history from the Tulip Bubble, to the Great Depression, to the East Asian Crisis of 1997, and beyond. Explores the original work of Fisher, Keynes, Friedman, and Krugman, among others. Prerequisite: 2.0 in ECON 301. Offered: A/WspS.

ECON 468 China's Economic Reforms-Integration Into World Economy (5) I&S Systematic survey of China's economic reforms since 1978, including China's increasing integration into the world economy. Prerequisite: ECON 201. Offered: jointly with SISEA 468.

ECON 473 Topics in International Trade (5) I&S Advanced theory of trade and analysis of government trade policies. International trade and factor mobility. Theory of commercial policy. Prerequisite: 2.0 in ECON 301; ECON 471.

ECON 475 Economics of the European Union (5) I&S Analysis of economic issues relating to the European Union. Explores the institutional aspects, the attempt to coordinate social and economic policies-welfare, employment, commercial, fiscal, and monetary-and the economic linkages between the European Union and the rest of the world. Prerequisite: 2.0 in ECON 301.

ECON 481 Introduction to Mathematical Statistics (5) NW Probability, generating functions; the d-method, Jacobians, Bayes theorem; maximum likelihoods, Neyman-Pearson, efficiency, decision theory, regression, correlation, bivariate normal. (Credit allowed for only one of 390, 481, and ECON 580.) Prerequisite: STAT/ECON 311; either MATH 136 or MATH 126 with either MATH 308 or MATH 309. Recommended: MATH 324. Offered: jointly with CS&SS/STAT 481; A.

ECON 482 Econometric Methods (5) NW Application of statistical modeling to empirical
work in economics. A mixture of theory and applied computer work. Primary focus is regression analysis. Prerequisite: 2.0 in ECON 300; either ECON 311/STAT 311 or MATH 390/STAT 390.

ECON 483 Applied Econometric Modeling (5) NW Provides undergraduates the opportunity to learn econometric model building for a particular problem while applying the theory learned in various courses to specific economic cases. Students estimate, test, and forecast economic models. Extensive use of the computer and econometric programs. Prerequisite: 2.0 in ECON 301; either ECON/STAT 311, STAT 341, MATH/STAT 390, or QMETH 300; either MATH 112, MATH 124, MATH 127, MATH 134, or MATH 145.

ECON 485 Game Theory with Applications to Economics (5) NW Introduction to the main concepts of game theory: strategy, solution concepts for games, strategic behavior, commitment, cooperation, and incentives. Application to economics oligopoly theory, bargaining theory, and contract theory. Prerequisite: either MATH 112, MATH 124, MATH 127, MATH 134, or MATH 145; recommended: ECON 300; ECON 404.

ECON 486 Economics of Information (5) I&S, QSR Khalil, Lawarree Basic models of decision making and strategic interaction in the presence of imperfect and incomplete information. Information issues in market exchange and in hierarchical settings. Includes adverse selection, moral hazard, signaling, and screening. Recommended: ECON 404 or ECON 485. Prerequisite: 2.0 in ECON 300.

ECON 490 Comparative Economic Systems (5) I&S Study of resource allocation, growth, and income distribution in capitalist, market socialist, and centrally planned economies. Prerequisite: 2.0 in ECON 301.

ECON 491 Issues in Economic Development (5) I&S Examines factors contributing to the economic problems of developing countries and possible solutions. Theory and applications in economic development and international trade. Prerequisite: 2.0 in ECON 301.

ECON 492 Economic Issues of Contemporary Latin America (5) I&S Covers economic issues of current interest to policymakers in Latin America. Topic areas include trade policy, external capital flows to the region, macroeconomic instability, fiscal and monetary institutions, income inequality, and globalization. Prerequisite: minimum grade of 2.0 in ECON 301.

ECON 494 Economy of Japan (5) I&S & SISEA Analyzing of economic growth of Japan since about 1850 to the present. The reasons for rapid industrialization, various effects of sustained economic growth, and significant contemporary issues are investigated. Prerequisite: ECON 201. Offered: jointly with SISEA 494.

ECON 495 Economic Transformation of Russia and Eastern Europe (5) I&S Analytical survey of the economic institutions and economic structures of the transforming socialist economies. Socialist resource allocation. Market institutions. Structural change and the sequencing of economic reform. Primary focus on Russia and Eastern Europe. Prerequisite: 2.0 in ECON 301.

ECON 496 Honors Seminar (5) I&S Honors and other students in high standing have the opportunity to develop research techniques, to pursue topics in breadth and depth, and to apply tools of economic analysis to selected topics in economic theory and current issues of national and international economic policy. For seniors only.

ECON 497 Honors Directed Study (5) Students write their honors thesis on the topic chosen in the Honors Seminar working under the previously arranged supervision of an economics faculty adviser. Prerequisite: ECON 496.

ECON 498 Senior Seminar (5) I&S Advanced undergraduate research in economics. Students formulate some underlying economic issue, organize its study, gather necessary information, and analyze results. Does not satisfy graduation requirement for the major. Prerequisite: ECON 301; one 400-level ECON course; recommended: two 400-level ECON courses.

ECON 499 Undergraduate Research (1-5, max. 10) May not be applied toward an advanced degree.

ECON 501 Microeconomic Analysis II (4) General equilibrium and welfare economics. Introduction to game theory. Prerequisite: ECON 500.

ECON 502 Macroeconomic Analysis I (4) An introduction to advanced macroeconomics. Theories of income, employment, inflation, and growth. Prerequisite: ECON 300; ECON 301.

ECON 505 Microeconomic Theory: Problems and Applications (3) Seminar for graduate students who have completed the basic core sequence in price theory. Designed to extend the student's analytic and problem-solving abilities by working systematically through a programmed set of readings and problems. The material includes both formal analytical techniques and applications of economic theory. Prerequisite: ECON 501.

ECON 507 History of Economic Thought (3) Classical and neoclassical economic concepts of the nature and significance of economic science.

ECON 508 Microeconomic Analysis III (4) Information economics. Prerequisite: ECON 500; ECON 501.

ECON 509 Macroeconomic Analysis III (4) Modern macroeconomic dynamics, presenting a range of approaches based on intertemporal optimization. Representative agent models with special emphasis on the analysis of government policy. More advanced discussion of economic growth. Prerequisite: ECON 502; ECON 503, or equivalent.

ECON 511 Advanced Microeconomic Theory: Selected Topics (3, max. 12) Seminar in advanced microeconony. Selected topics of special interest and significance. Prerequisite: ECON 500; ECON 501.

ECON 512 Advanced Macroeconomic Theory: Selected Topics (3, max. 12) Seminar in advanced macroeconomy. Selected topics of special interest and significance.

ECON 513 Mathematical Economics: Linear Analysis (3) Theory and application of linear algebra and linear economic models. Prerequisite: ECON 300; MATH 126, or equivalent.

ECON 514 General Equilibrium Analysis (3) Study of the existence, uniqueness, and stability of general equilibrium models under the assumptions of competition. Emphasis is on recent developments in the literature with consideration given to both positive and normative economics.

ECON 515 Special Topics in Mathematical Economics (3, max. 12).

ECON 516 Introduction to Noncooperative Game Theory (3) Study of both pure game theory and its applications to such problems as oligopoly pricing, non-cooperative bargaining, economic growth, and game theory, explores the emergence of the state. Specifies conditions conducive to constitutional rule. Analyzes circumstances amenable to state-promoted exchange as opposed to self-enforced agreements. Prerequisite: ECON 500; ECON 501, or permission of instructor.

ECON 519 Economics of Contracts and Organizations: Empirics (3) Shi Critically reviews empirical literature on contracts and organization. Topics include moral hazard, adverse selection, incentives and risk sharing; relative and subjective performance evaluation; team production; tournament and promotion; efficiency wage; career concern; relational contracts; assess specificity and assess ownership; complexity, uncertainty, asset ownership; adverse selection. Prerequisite: ECON 518; ECON 582.

ECON 520 The Economics of Property Rights (3) Application of standard economic theory to analyze various forms of property rights as constraints of competition; the costs associated with delineation and enforcement of rights; the costs of negotiating and enforcing contracts for right transfers; resource allocation and income distribution implied by different property right and transaction cost constraints. Prerequisite: ECON 500; ECON 501, or permission of instructor.

ECON 523 Emergence of the State (3) Using tools of property rights, industrial organization, and game theory, explores the emergence of the state. Specifies conditions conducive to constitutional rule. Analyzes circumstances amenable to state-promoted exchange as opposed to self-enforced agreements. Prerequisite: ECON 500; ECON 501, or permission of instructor.

ECON 525 Computational Economics (3) Sirakaya Develops a basic understanding of computational techniques used in the economic literature. Demonstrates, with economic examples, when and how these techniques are used and why and how they work. Prerequisite: ECON 580; ECON 581; ECON 582.

ECON 527 Empirics and Theory in Macroeconomics (3) Startz Explores the integration of empirical and theoretical methods central to macroeconomic research. Exposes students to
and empirical analysis of the labor market. The determinants of labor supply and demand, human capital investment, the pattern of compensation, employment contracts and incentives, unemployment and labor market dynamics.

ECON 542 Labor Economics (3) Theoretical and empirical analysis of the labor market. The determinants of labor supply and demand, human capital investment, the pattern of compensation, employment contracts and incentives, unemployment and labor market dynamics.

ECON 543 Population Economics (3) Economic determinants and consequences of population growth; emphasis on formal theoretical models and on empirical analysis. Introduction to: formal demography; welfare economics of population change, including analyses of population effects on consumption, savings, investment, and technical change; and determinants of mortality, fertility, and migration. Prerequisite: ECON 500, ECON 501, or permission of instructor.

ECON 546 Health Economics (3) Theoretical and empirical models of the demand for health and health care; supply of health care from physicians and hospitals; government programs that subsidize health care; cost-benefit analyses of preventive health care and new medical technologies. Prerequisite: graduate-level microeconomics, HSERV 585, or permission of instructor.

ECON 547 Health Policy Economics (3) Selected topics in health economics, including risk and insurance, medical malpractice, the market for physician services, and industry regulation. Prerequisite: a course in intermediate microeconomics or permission of instructor. Offered: jointly with HSERV 587.

ECON 550 Public Finance: Expenditure Policy (3) Theory of public finance with emphasis on public expenditures. Social welfare maximization, public goods and externalities, decreasing cost industries, theory of collective choice, second-best analysis. Prerequisite: ECON 500; ECON 501, or permission of instructor.

ECON 551 Public Finance: Tax Policy (3) Theory of public finance with emphasis on taxation. Second-best analysis, optimal taxation, general equilibrium incidence analysis, issues in personal income taxation and corporate income taxation. Prerequisite: ECON 500; ECON 501, or permission of instructor.

ECON 555 Cost-Benefit Analysis (3) Covers the theoretical foundations of cost-benefit analysis using graduate microeconomics. Stresses both the conceptual and practical problems encountered in the subject. Emphasis on problem solving and term project. Prerequisite: ECON 500; ECON 501.

ECON 571 International Trade Theory (3) Comparative advantage, resource allocation, income distribution, and foreign trade. Different theories of trade, with or without perfect competition and constant returns. International factor mobility. Prerequisite: ECON 500; ECON 501.

ECON 572 International Financial and Monetary Economics (3) Analysis of open economy macro models with emphasis on exchange rates and balance of payments determination. Prerequisite: ECON 502; ECON 503.

ECON 573 International Commercial Policy (3) Analysis of welfare aspects of international trade and factor mobility. Costs and benefits of protection; implications of different government policies. Import competition and response. Prerequisite: ECON 571 or permission of instructor.

ECON 574 International Macroeconomics (3) Surveys recent developments in international macroeconomics, placing particular emphasis on the dynamic aspects. One sector, multisector, and two-country international models discussed. Fiscal issues treated in depth. Stochastic aspects introduced and related to the literature on international real business cycles. Prerequisite: ECON 509 or equivalent.

ECON 580 Econometrics I (4) Methods, tools, and theory of econometrics as the basis for empirical investigation in economics. Specification, testing, and use of econometric models with reference to examples in the literature. Prerequisite: ECON 390 or equivalent.

ECON 581 Econometrics II (4) Methods, tools, and theory of econometrics as the basis for empirical investigation in economics. Specification, testing, and use of econometric models with reference to examples in the literature. Prerequisite: ECON 580.

ECON 582 Econometrics III (4) Methods, tools, and theory of econometrics as the basis for empirical investigation in economics. Specification, testing, and use of econometric models with reference to examples in the literature. Prerequisite: ECON 581.

ECON 583 Econometric Theory I (3) Estimation and testing in linear and nonlinear regression models. Asymptotic theory, bootstrapping. Theoretical developments are reinforced with a variety of empirical examples and applications. Prerequisite: ECON 580, ECON 581, ECON 582 or equivalent.

ECON 584 Econometric Theory II (3) Continuation of 583. Analysis of stationary and nonstationary, univariate, and multivariate time series models. Emphasis on empirical applications. Prerequisite: ECON 583.

ECON 585 Applied Microeconometrics (3) Econometric issues that arise in applied microeconomic research. Topics include the use of panel data and models with limited and qualitative dependent variables. Prerequisite: ECON 582 or equivalent.

ECON 586 Advanced Applied Time Series Analysis (3) Time series and empirical macroeconomics with focus on applications of time series analysis to various topics in macroeconomics and finance. Topics include: state-space models and Kalman filter; Markov-switching models and their extensions; Bayesian Gibbs sampling; randomization; and measurement of volatility.

ECON 590 Theory and Practice of Economic Planning (3) Analysis of incentives for, and methods of, government intervention in socialist and developing countries, with a focus on microeconomic issues.

ECON 591 Theoretical Issues in Economic Development (3) Analysis of issues in economic
ENGL 182 The Research Paper (5) C Includes study of library resources, the analysis of reading materials, and writing preparatory papers as basic to writing a reference or research paper. Open to all undergraduates. Prerequisite: either ENGL 111, ENGL 121, or ENGL 131.

ENGL 197 Interdisciplinary Writing/Humanities (5, max. 15) C Expository writing based on material presented in a specified humanities lecture course. Assignments include drafts of papers to be submitted in the specified course, and other pieces of analytical prose. Concurrent registration in the specified course required.

ENGL 198 Interdisciplinary Writing/Social Science (5, max. 15) C Expository writing based on material presented in a specified social science lecture course. Assignments include drafts of papers to be submitted in the specified course, and other pieces of analytic prose. Concurrent registration in specified course required.

ENGL 200 Reading Literature (5) VLPA Techniques and practice in reading and enjoying literature. Examines some of the best works in English and American literature and considers such features of literary meaning as imagery, characterization, narration, and patterning in sound and sense. Emphasizes literature as a source of pleasure and knowledge about human experience.

ENGL 202 Introduction to the Study of English Language and Literature (5) Gateway course designed for English pre-majors and majors. Introduces critical, historical, and theoretical frameworks important to studying the literature, language, and cultures of English. Concurrent registration with ENGL 197 required. Offered:

ENGL 205 Method, Imagination, and Inquiry (5) VLPA Examines ideas of method and imagination in a variety of texts, in literature, philosophy, and science. Particularly concerned with intellectual backgrounds and methods of inquiry that have shaped modern Western literature. Offered: jointly with CHID 205.

ENGL 207 Introduction to Cultural Studies (5) VLPA Asks three questions: What is Cultural Studies? How does one read from a Cultural Studies perspective? What is the value of reading this way? Provides historical understanding of Cultural Studies, its terms and its specific way of interpreting a variety of texts, i.e., literature, visual images, music, video, and performance.

ENGL 210 Literature and the Ancient World (5) VLPA Introduction to literature from a broadly cultural point of view, focusing on major works that have shaped the development of literary and intellectual traditions to the Middle Ages.

ENGL 211 Medieval and Renaissance Literature (5) VLPA Introduction to literature from a broadly cultural point of view, focusing on major works that have shaped the development of literary and intellectual traditions from the Middle Ages to the eighteenth century.
ENGL 212 Literature of Enlightenment and Revolution (5) VLPA Introduction to eighteenth- and nineteenth-century literature from a broadly cultural point of view, focusing on representative works that illustrate literary and intellectual developments of the period.

ENGL 213 Modern and Postmodern Literature (5) VLPA Introduction to twentieth-century literature from a broadly cultural point of view, focusing on representative works that illustrate literary and intellectual developments since 1900.

ENGL 225 Shakespeare (5) VLPA Survey of Shakespeare's career as dramatist. Study of representative comedies, tragedies, romances, and history plays.

ENGL 228 English Literary Culture: To 1600 (5) VLPA British literature from Middle Ages to end of sixteenth century. Study of literature in its cultural context, with attention to changes in language, form, content, and style.

ENGL 229 English Literary Culture: 1600-1800 (5) VLPA British literature in seventeenth and eighteenth centuries. Study of literature in its cultural context, with attention to changes in form, content, and style.

ENGL 230 English Literary Culture: After 1800 (5) VLPA British literature in the nineteenth and twentieth centuries. Study of literature in its cultural context, with attention to changes in form, content, and style.

ENGL 242 Reading Fiction (5) VLPA Critical interpretation and meaning in fiction. Different examples of fiction representing a variety of types from the medieval to modern periods.

ENGL 243 Reading Poetry (5) VLPA Critical interpretation and meaning in poems. Different examples of poetry representing a variety of types from the medieval to modern periods.

ENGL 244 Reading Drama (5) VLPA Critical interpretation and meaning in plays. Different examples of drama representing a variety of types from the medieval to modern periods.

ENGL 250 Introduction to American Literature (5) VLPA Survey of the major writers, modes, and themes in American literature, from the beginnings to the present. Specific readings vary, but often included are: Taylor, Edwards, Franklin, Poe, Hawthorne, Melville, Emerson, Thoreau, Whitman, Dickinson, Twain, James, Eliot, Stevens, O'Neil, Faulkner, Hemingway, Ellison, and Bellow.

ENGL 251 Introduction to American Political Culture (5) I&S/VLPA Introduction to the methods and theories used in the analysis of American culture. Emphasizes an interdisciplinary approach to American literature, including history, politics, anthropology, and mass media. Offered: jointly with POL S 281.

ENGL 257 Introduction to Asian-American Literature (5) VLPA Introductory survey of Asian-American literature provides introduction to Chinese, Japanese, Filipino, Korean, Hawaiian, South-Asian, and Southeast-Asian American literatures and a comparative study of the basic cultural histories of those Asian-American communities from the 1800s to the present.

ENGL 258 African-American Literature: 1745 to Present (5) VLPA A chronological survey of Afro-American literature in all genres from its beginnings to the present day. Emphasizes Afro-American writing as a literary art, the cultural and historical context of Afro-American literature, and the aesthetic criteria of Afro-American literature. Offered: jointly with AFRAM 214.

ENGL 264 Literature and Science (5) VLPA Explores the relationships between literature and science as ways of comprehending humanity's interaction with the world we inhabit. As a course in criticism, explores how literature and science structure and are structured by social, religious, political, and economic factors in culture.

ENGL 270 Cultural Issues in English (5) VLPA Survey of the assumptions, methodologies, and major issues of English in its cultural settings. Designed to connect English Language study with the study of literature, orality and literacy, education, ethnicity, gender, and public policy.

ENGL 281 Intermediate Expository Writing (5) C Writing papers communicating information and opinion to develop accurate, competent, and effective expression.

ENGL 282 Composing for the Web (5) Introduces the writing of nonfiction narrative and expository pieces for publication on the Web. Analysis and criticism of on-line work.

ENGL 283 Beginning Verse Writing (5) VLPA Intensive study of the ways and means of making a poem.

ENGL 284 Beginning Short Story Writing (5) VLPA Introduction to the theory and practice of writing the short story.

ENGL 300 Reading Major Texts (5) VLPA Intensive examination of one or a few major works of literature. Classroom work to develop skills of careful and critical reading. Book selection varies, but reading consists of major works by important authors and of selected supplementary materials.

ENGL 302 Critical Practice (5) VLPA Intensive study of, and exercise in, applying important or influential interpretive practices for studying language, literature, and culture, along with consideration of their powers/limits. Focuses on developing critical writing abilities. Topics vary and may include critical and interpretive practice from scripture and myth to more contemporary approaches, including newer interdisciplinary practices.

ENGL 303 History of Literary Criticism and Theory I (5) VLPA Literary criticism and theory from its beginnings in Plato through the early twentieth century. Philosophical and theoretical grounds for critical practice put forward by philosophers and critics.

ENGL 304 History of Literary Criticism and Theory II (5) VLPA Contemporary criticism and theory and its background in the New Criticism, structuralism, and phenomenology.

ENGL 305 Theories of Imagination (5) I&S/ VLPA Survey of theories of imagination since the seventeenth century. Focuses on the uses of the concept in literature, criticism, science, and society.

ENGL 307 Cultural Studies: Literature and the Age (5) VLPA Problems of literary periodization. Works by major and minor authors in the context of cultural history; critical and theoretical approaches that have led to the idea of periodization. Emphasis varies. Recommended: one 300-level ENGL course in the literary period being studied.

ENGL 310 The Bible as Literature (5) VLPA Introduction to the development of the religious ideas and institutions of ancient Israel, with selected readings from the Old Testament and New Testament. Emphasis on reading The Bible with literary and historical understanding.

ENGL 311 Modern Jewish Literature in Translation (5) VLPA Survey of Jewish experience and its literary expression since 1880. Includes such Yiddish writers as Sholom Aleichem, Peretz, and I. B. Singer; such Israeli writers as Agnon, Hazaz, and Appelfeld; and such writers in non-Jewish languages as Primo Levi and Kafka.

ENGL 312 Jewish Literature: Biblical to Modern (5) I&S/ VLPA A study of Jewish literature from Biblical narrative and rabbinic commentary to modern prose and poetry with intervening texts primarily organized around major themes: martyrdom and suffering, destruction and exile, messianism, Hasidism and Enlightenment, Yiddishism and Zionism. Various critical approaches; geographic and historic contexts. Offered: jointly with SISJE 312.

ENGL 313 Modern European Literature in Translation (5) VLPA Fiction, poetry, and drama from the development of modernism to the present. Works by such writers as Mann, Proust, Kafka, Gide, Hesse, Rilke, Brecht, Sartre, and Camus.

ENGL 315 Literary Modernism (5) VLPA Various modern authors, from Wordsworth to the present, in relation to such major thinkers as Kant, Hegel, Darwin, Marx, Nietzsche, Bergson, and Wittgenstein, who have helped create the context and the content of modern literature. Recommended: ENGL 230 or one 300-level course in 19th or 20th century literature.

ENGL 316 Postcolonial Literature and Culture (5, max. 10) VLPA Readings of major texts and writers in postcolonial literature and culture. Surveys some of the most important questions and debates in postcolonial literature, including issues of identity, globalization, language, and nationalism. The cultural focus may vary, so students should check with the professor for specific details.

ENGL 317 Literature of the Americas (5) VLPA Examines writings by and about people of the Americas, with a focus on intersections of gender, colonialism, race, sexuality, and ethnicity.

ENGL 320 English Literature: The Middle Ages (5) VLPA Literary culture of Middle Ages in England, as seen in selected works from earlier and later periods, ages of Beowulf and of Geoffrey Chaucer. Read in translation, except for a few later works, which are read in Middle English.

ENGL 321 Chaucer (5) VLPA Chaucer's Canterbury Tales and other poetry, with attention to Chaucer's social, historical, and intellectual milieu.

ENGL 322 English Literature: The Age of Queen Elizabeth (5) VLPA The golden age of English poetry, with poems by Shakespeare, Spenser, Sidney, and others; drama by Marlowe and other early rivals to Shakespeare; prose by
Sir Thomas More and the great Elizabethan translators.

ENGL 323 Shakespeare to 1603 (5) VLPA
Shakespeare’s career as dramatist before 1603 (including Hamlet). Study of history plays, comedies, and tragedies.

ENGL 324 Shakespeare After 1603 (5) VLPA
Shakespeare’s career as dramatist after 1603. Study of comedies, tragedies, and romances.

ENGL 325 English Literature: The Late Renaissance (5) VLPA
A period of skepticism for some, faith for others, but intellectual upheaval generally. Poems by John Donne and the “metaphysical” school; poems and plays by Ben Jonson and other late rivals to Shakespeare; prose by Sir Francis Bacon and other writers.

ENGL 326 Milton (5) VLPA
Milton’s early poems and the prose; Paradise Lost, Paradise Regained, and Samson Agonistes, with attention to the religious, intellectual, and literary contexts.

ENGL 327 English Literature: Restoration and Early Eighteenth Century (5) VLPA
Selections from wits and satirists; poems by John Dryden and Alexander Pope; plays by Dryden, William Congreve, and other wits; the great satires of Jonathan Swift, and the first stinging of the novel.

ENGL 328 English Literature: Later Eighteenth Century (5) VLPA
Classic age of English prose. Essays, biography, and criticism by Samuel Johnson, Oliver Goldsmith, and others; comedies by Goldsmith and Richard Brinsley Sheridan; fiction by Henry Fielding and others; poetry by a variety of writers.

ENGL 329 Rise of the English Novel (5) VLPA
Study of the development of this major and popular modern literary form in the eighteenth century. Readings of the best of the novelists who founded the form, and some minor ones, from Defoe to Fielding, Richardson, and Sterne, early Austen, and the gothic and other writers.

ENGL 330 English Literature: The Romantic Age (5) VLPA
Literary, intellectual, and historical ferment of the period from the French Revolution to the 1830s. Readings from major authors in different literary forms; discussions of critical and philosophical issues in a time of change.

ENGL 331 Romantic Poetry I (5) VLPA
Blake, Wordsworth, Coleridge, and their contemporaries.

ENGL 332 Romantic Poetry II (5) VLPA
Byron, Shelley, Keats, and their contemporaries.

ENGL 333 English Novel: Early and Middle Nineteenth Century (5) VLPA
Studies in the novel in one of its classic phases. Authors include Austen, the Brontes, Dickens, Thackeray.

ENGL 334 English Novel: Later Nineteenth Century (5) VLPA
Studies in the novel as it passes from a classic format to formats more experimental. Authors include George Eliot, Thomas Hardy, Joseph Conrad, and others.

ENGL 335 English Literature: The Age of Victoria (5) VLPA
Literature in an era of revolution that also sought continuity, when culture faced definition as mass culture and found in the process new demands and creative energies, new material and forms, and transformations of old ones. Readings range from works of Tennyson, Browning, Arnold, Shaw, to Dickens, Eliot, Hardy.

ENGL 336 English Literature: The Early Modern Period (5) VLPA
Experiments in fiction and poetry. Novels by Joyce, Woolf, Lawrence, and others; poetry by Eliot and Yeats and others.

ENGL 337 The Modern Novel (5) VLPA
The novel on both sides of the Atlantic in the first half of the twentieth century. Includes such writers as Joyce, Woolf, Lawrence, Stein, Hemingway, Faulkner, and others.

ENGL 338 Modern Poetry (5) VLPA
Poetry in the modernist mode, including such poets as Yeats, Eliot, Pound, Auden, and Moore.

ENGL 340 Modern Anglo-Irish Literature (5) VLPA
Principal writers in English of the modern Irish literary movement — Yeats, Joyce, Synge, Gregory, and O’Casey among them — with attention to traditions of Irish culture and history.

ENGL 342 Contemporary Novel (5) VLPA
Recent efforts to change the shape and direction of the novel by such writers as Murdoch, Barth, Hawkes, Fowles, and Atwood.

ENGL 343 Contemporary Poetry (5) VLPA
Recent developments by such poets as Hughes, Heaney, Rich, Kinnell, and Hugo.

ENGL 344 Twentieth-Century Dramatic Literature (5) VLPA
Modern and contemporary plays by such writers as Shaw, Synge, O’Casey, O’Neill, Yeats, Eliot, Beckett, Pinter, and Albee.

ENGL 345 Studies in Film (5) VLPA
Types, techniques, and issues explored by filmmakers. Emphasis on narrative, image, and point of view.

ENGL 346 Studies in Short Fiction (5) VLPA
The American and English short story, with attention to the influence of writers of other cultures. Aspects of the short story that distinguish it, in style and purpose, from longer fiction.

ENGL 347 The Art of Prose (5) VLPA
Techniques and varieties of prose — autobiogra- phy, biography, personal essay, reflective and meditative writing, social and scientific inquiry, and persuasive writing. Special attention to use of poetic, fictional, and dramatic devices. Recommended: one introductory literature course.

ENGL 348 Studies in Drama (5) VLPA
Investigation of one of the major types of drama: tragedy or comedy; Emphasis on drama prior to the twentieth century.

ENGL 349 Literature and Medicine (5) I&S/Disciplines (5, max. 10) VLPA
Literary responses to the medical revolution. Works by such writers as Poe, Cooper, Irving, Whitman, Dickinson, and Douglass.

ENGL 350 American Literature: The Early Nation (5) VLPA
Conflicting visions of the national destiny and the individual identity in the early years of America’s nationhood. Works by Emerson, Thoreau, Hawthorne, Melville, and such other writers as Poe, Cooper, Irving, Whitman, Dickinson, and Douglass.

ENGL 353 American Literature: The Early Modern Period (5) VLPA
Literary responses to an America propelled forward by accelerating and complex forces. Works by Twain, James, and such other writers as Whitman, Dickinson, Adams, Wharton, Howells, Crane, Dreiser, DuBois, and Chopin.

ENGL 354 American Literature: The Early Modern Period (5) VLPA

ENGL 355 American Literature: Contemporary America (5) VLPA
Works by such writers as Ellison, Williams, O’Connor, Lowell, Barth, Rich, and Hawkes.

ENGL 356 Classic American Poetry (5) VLPA
Poetry by Taylor, Whitman, Dickinson, and such others as Poe, Bradstreet, Crane, Robinson. The lineage and characteristics of lyric and epic in America.

ENGL 358 American Literature: The Emergence of the Novel (5) VLPA

ENGL 359 American Contemporary Indian Literature (5) VLPA
Creative writings — novels, short stories, poems — of contemporary Indian authors; traditions out of which they evolved. Differences between Indian writers and writers of the European-American tradition. Emphasis varies. Offered: jointly with AFRAM 358.

ENGL 360 American Political Culture: To 1865 (5) I&S/VLPA
American literature in its political and cultural context from the Puritan origins to the Civil War. Emphasizes an interdisciplinary approach to American literature, including history, politics, anthropology, and mass media.

ENGL 361 American Political Culture: After 1865 (5) I&S/VLPA
American literature in its political and cultural context from the Civil War to the present. Emphasizes an interdisciplinary approach to American literature, including history, politics, anthropology, and mass media.

ENGL 363 American Literature and the Other Arts and Disciplines (5, max. 10) VLPA
Relationships between literature and other arts, such as painting, photography, architecture, and music, or between literature and other disciplines, such as science. Content varies.

ENGL 364 Literature and Medicine (5) I&S/VLPA
How changing concepts of doctor-patient relationship and of body depicted in literary texts affect decisions throughout the human life cycle.
Medicine and disease as metaphors for personal experience and social analysis.

ENGL 367 Gender Studies in Literature (5, max. 15) VLPA The study of contemporary approaches to analyzing the gender politics of literature and culture. Examines special topics in the history and development of the major theoretical trends, including the relationship of certain theories of gender to relevant works of literature.

ENGL 368 Women Writers (5, max. 15) VLPA Study of the work of women writers in English and American literature.

ENGL 370 English Language Study (5) VLPA Wide-range introduction to the study of written and spoken English. The nature of language; ways of describing language; the use of language study as an approach to English literature and the teaching of English.

ENGL 371 English Syntax (5) VLPA Description of sentence, phrase, and word structures in present-day English. Prerequisite: either ENGL 370 or LING 200.

ENGL 372 Language Variation in Current English (5) VLPA Examination of geographical, social, and occupational varieties of American English. Relationship between societal attitudes and language use.

ENGL 373 History of the English Language (5) VLPA Evolution of English sounds, forms, structures, and word meanings from Anglo-Saxon times to the present. Prerequisite: either ENGL 370 or LING 200.

ENGL 374 The Language of Literature (5) VLPA Roles of explicitly describable language features in the understanding and appreciation of various verbal forms. Emphasis on literature, but attention also may be given to nonliterary prose and oral forms.

ENGL 381 Advanced Expository Writing (5) VLPA Concentration on the development of prose style for experienced writers.

ENGL 382 Writing for the Web (5) C Writing substantial Web essays on topics of current concern. Extensive analysis and criticism of online essays. Prerequisite: ENGL 282.

ENGL 383 The Craft of Verse (5) VLPA Intensive study of various aspects of the craft verse. Readings in contemporary verse and writing using emulation and imitation. Prerequisite: ENGL 283; ENGL 284.

ENGL 384 The Craft of Prose (5) VLPA Intensive study of various aspects of the craft of fiction or creative nonfiction. Readings in contemporary prose and writing using emulation and imitation. Prerequisite: ENGL 283; ENGL 284.

ENGL 407 Special Topics in Cultural Studies (5) VLPA Advanced work in cultural studies.

ENGL 411 Introduction to the Folktales Among Literate Peoples (3) VLPA Techniques of classification, geographic-historical distribution, theories of origin and interpretations, and related areas of investigation of the oral prose folk narrative of literate peoples.

ENGL 422 Arthurian Legends (5) VLPA Medieval romance in its cultural and historical setting, with concentration on the evolution of Arthurian romance.

ENGL 430 British Writers: Studies in Major Authors (5, max. 15) VLPA Concentration on one writer or a special group of British writers. Prerequisite: ENGL 431.

ENGL 431 Topics in British Literature (5, max. 15) VLPA Themes and topics offering special approaches to literature.

ENGL 442 The Novel: Special Studies (5, max. 10) VLPA Readings may be English or American and drawn from different periods, or they may concentrate on different types — gothic, experimental, novel of consciousness, realistic novel. Special attention to the novel as a distinct literary form. Specific topic varies from quarter to quarter.

ENGL 443 Poetry: Special Studies (5, max. 10) VLPA Readings may be English or American and connected by subject matter or poetic technique. Specific topics vary, but might include poetry as a geography of mind, the development of the love lyric, the comic poem.

ENGL 444 Dramatic Literature: Special Studies (5, max. 10) VLPA Study of a particular dramatic tradition (such as expressionism or the absurd theatre) or character (the clown) or technique (play-within-a-play, the neoclassical three unities). Topics vary.

ENGL 451 American Writers: Studies in Major Authors (5, max. 15) VLPA Concentration on one writer or a special group of American writers.

ENGL 452 Topics in American Literature (5, max. 15) VLPA Exploration of a theme or special topic in American literary expression.

ENGL 453 Introduction to American Folklore (5) VLPA Study of different kinds of folklore inherited from America’s past and to be found in America today.

ENGL 466 Gay and Lesbian Studies (5) I&S/ VLPA Examination of ways gays and lesbians are represented in literature, film, performance, and popular culture and how these representations are interpreted in mainstream, gay/lesbian, and academic writing.

ENGL 470 Literature, Literary Study, and Society (5) I&S/ VLPA Relationship of literature to society with particular emphasis on literary education. What social values determine the educational importance of literature, what segments of society are trained to read and write literature, and how literature is institutionalized as part of pedagogical methodology. Emphasis varies.

ENGL 471 The Composition Process (5) VLPA Consideration of psychological and formal elements basic to writing and related forms of nonverbal expression and the critical principles that apply to evaluation.

ENGL 472 Language Learning (5) VLPA Consideration of how an individual achieves psychological and esthetic grasp of reality through language; relates language development to reading skills, literary interpretation, grammar acquisition, oral fluency, discursive and imaginative writing.

ENGL 473 Current Developments in English Studies: Conference (5) VLPA .

ENGL 474 Special Topics in English for Teachers (1-10, max. 10) VLPA .

ENGL 475 Colloquium in English for Teachers (1-5, max. 10) VLPA .

ENGL 476 Puget Sound Writing Program Institute (10) VLPA Focus on the writing process and the teaching of writing accomplished through research, writing, reflection, and demonstration of writing instruction. Affiliated with the National Writing Project.

ENGL 477 Children’s Literature (5) VLPA An examination of books that form a part of the imaginative experience of children, as well as a part of a larger literary heritage, viewed in the light of their social, psychological, political, and moral implications.

ENGL 478 Language and Social Policy (5) I&S/ VLPA Examines the relationship between language policy and social organization; the impact of language policy on immigration, education, and access to resources and political institutions; language policy and revolutionary change; language rights.

ENGL 479 Language Variation and Language Policy in North America (5) I&S/VLPA Surveys basic issues of language variation: phonological, syntactic, semantic, and narrative/discourse differences among speech communities of North American English; examines how language policy can affect access to education, the labor force, and political institutions.

ENGL 481 Special Studies in Expository Writing (5) VLPA Individual projects in various types of nonfictional prose, such as biographical sketches, informational reports, literary reviews, and essays.

ENGL 483 Advanced Verse Workshop (5, max. 15) VLPA Intensive verse workshop. Emphasis on the production and discussion of student poetry. Prerequisite: ENGL 383; ENGL 384.

ENGL 484 Advanced Prose Workshop (5, max. 10) VLPA Intensive prose workshop. Emphasis on the production and discussion of student fiction and/or creative nonfiction. Prerequisite: ENGL 383; ENGL 384.

ENGL 485 Novel Writing (5, max. 15) VLPA Experience in planning, writing, and revising a work of long fiction, whether from the outset, in progress, or in already completed draft. Prerequisite: ENGL 384.

ENGL 486 Playwriting (5, max. 10) VLPA Experience in planning, writing, and revising a play, whether from the outset, in progress, or in already completed draft.

ENGL 487 Screenwriting (5) VLPA Students read screenwriting manuals and screenplays, analyze exemplary films, and write synopses, treatments, and first acts of their own screenplays.

ENGL 490 Study Abroad Program (5, max. 15) VLPA This course, for students in the Study Abroad program, relates major works of literature to the landscape and activities of their settings.

ENGL 491 Internship (1-6, max. 12) Supervised experience in local businesses and other

</table>
ENGL 572 Methods and Materials for Teaching English as a Second Language (5) Prerequisite: LING 445 or permission of instructor.

ENGL 574 Research Methods in Second-Language Acquisition (5) Prerequisite: ENGL 572, LING 449, or permission of instructor.

ENGL 575 Pedagogy and Grammar in Teaching English as a Second Language (5).

ENGL 576 Testing and Evaluation in English as a Second Language (5) Evaluation and testing of English language proficiency, including testing theory, types of tests, and teacher-prepared classroom tests. Prerequisite: ENGL 571 and ENGL 572 or permission of instructor.

ENGL 578 Colloquium in Teaching English to Speakers of Other Languages (5, max. 10) Overview of major issues in second-language acquisition, teaching methodology, and classroom practice with special emphasis on links between theories of language learning and practical aspects of teaching English to speakers of other languages.

ENGL 581 The Creative Writer as Critical Reader (5).

ENGL 586 Graduate Writing Conference (5).

ENGL 587 Topics in the Teaching of Creative Writing (3/3) VLPA The theory and practice of teaching fiction, poetry, and creative nonfiction writing.

ENGL 590 Master of Arts Essay (5/10, max. 10) Research and writing project under the close supervision of a faculty member expert and with the consultation of a second faculty reader. The field of study is chosen by the student. Work is independent and varies. The model is an article in a scholarly journal. Prerequisite: graduate standing in English.

ENGL 591 Master of Arts for Teachers Essay (5) Research and writing project under the close supervision of a faculty member expert in the field of study chosen by the student within the MAT degree orientation toward the teaching of English, and with the consultation of a second faculty reader. The model is an article in a scholarly journal.

ENGL 592 Graduate English Studies (1-5, max. 10).

ENGL 593 Textual Criticism (5) Introduction to paleography, codicology, analytical and descriptive bibliography; examination of the major contributions to textual theory in the nineteenth and twentieth centuries; practice in applying textual theory in editing literary works.

ENGL 595 Topics in Teaching Literature (5, max. 15).

ENGL 597 Directed Readings (*, max. 18) Intensive reading in literature or criticism, directed by members of doctoral supervisory committee. Credit/no credit only.

ENGL 598 Colloquium in English (1-5, max. 10) Lectures and seminars presented by visiting scholars or a range of local scholars relevant to English graduate studies.

ENGL 599 Special Studies in English (5, max. 15).

ENGL 600 Independent Study or Research (*).

ENGL 601 Internship (3-10, max. 10) Credit/no credit only.

ENGL 700 Master’s Thesis (*).

ENGL 800 Doctoral Dissertation (*).

General Studies

GEN ST 101 University Learning Skills (1-3) Introduction to university practice. Practice in skills necessary for academic success, including note-taking, test-taking, writing, active learning, and time and stress management. Academic planning. Introduction to university resources.

GEN ST 105 Introduction to Liberal Studies (1-10, max. 10) Designed to increase the academic proficiencies of new freshmen entering the University. Includes coursework in the liberal arts and sciences and related work in writing, speaking, and mathematics. Introduces students to computing and campus culture. Credit/no credit only.

GEN ST 197 Freshman Seminar (1-3, max. 3) Small-group discussion with faculty representing a wide spectrum of academic disciplines. Topics and approaches vary. Instructor may introduce research techniques or findings, concentrate on readings in his/her area of interest, or illustrate problems and alternatives related to the study of a particular academic discipline. Credit/no credit only. Offered: AWSpS.

GEN ST 199 The University Community (1-2, max. 2) Introduces students to various aspects of the University of Washington community. Includes exploration of university resources and opportunities, and academically related skill development. Credit/no credit only. Offered: A.

GEN ST 350 Independent Fieldwork (1-6, max. 18) Independent fieldwork in community agencies, apprenticeships, internships, as approved for College of Arts and Sciences credit. Faculty sponsor and internship supervisor are required. Credit/no credit only. Offered: AWSpS.

GEN ST 391 Supervised Study in Selected Fields (*, max. 15) Special supervised study in a field represented in the College of Arts and Sciences. Faculty supervisor required. Credit/no credit only. Offered: AWSpS.

GEN ST 470 Undergraduate Peer Instructor Practicum (1-3, max. 12) Provides instruction in group leadership and promotion of values and methods of learning within a university setting. For Peer Instructors in the FIG and TRIG programs. Credit/no credit only. Offered: AWSpS.

GEN ST 480 Senior Seminar: Humanities (5) Seminar examining the relationships and parallels in languages, literature, and culture. Each student required to complete a project or research paper on a topic appropriate to a humanities track.

GEN ST 481 Senior Seminar: Social Sciences (5) Seminar examining the relationships and parallels of fields related to programs considered. Each student required to complete a project or research paper on a topic appropriate to the major track.

GEN ST 493 Senior Study (5) For General Studies majors only. Faculty supervisor required. Offered: AWSpS.

Geography

GEOG 100 Introduction to Geography (5) I&S Introduction to the study of human geography and the major themes of the discipline. Topics include: human-environment interactions, migration and human mobility, patterns of health and nutrition, industrialization and urbanization, and the geography of culture and politics. Offered: AWSpS.

GEOG 102 World Regions (5) I&S Spatial study of world regions, based on historical, cultural, political, economic, and other factors. An attempt to understand the underlying forces that have led to the formation of regions and regional patterns.

GEOG 123 Introduction to Globalization (5) I&S Sparke Provides an introduction to the debates over globalization. Focuses on the growth and intensification of global ties. Addresses the resulting inequalities and tensions, as well as the new opportunities for cultural and political exchange. Topics include the impacts on government, finance, labor, culture, the environment, health, and activism. Offered: jointly with SIS 123.

GEOG 195 Special Topics in Geography (1-5, max. 10) I&S

GEOG 205 Introduction to Physical Sciences and the Environment (5) NW ZumBrunnen Major atmospheric, hydrologic, and geomorphic processes used to interpret the character, distribution, and human significance of different natural and human-altered environments. Includes laboratory exercises for science and non-science majors, geography majors and nonmajors.

GEOG 207 Economic Geography (5) I&S Beyer, Harrington The changing locations and spatial patterns of economic activity, including: production in agriculture, manufacturing, and services; spatial economic principles of trade, transportation, communications, and corporate organization; regional economic development, and the diffusion of technological innovation. Offered: AWS.

GEOG 208 Geography of the World Economy: Regional Fortunes and the Rise of Global Markets (5) I&S Examines the relationship between the globalization of economic activity and regional development. Topics include international trade, colonialism, industrial capitalism, advanced capitalism, and the globalization of labor markets.

GEOG 227 Geographic Perspectives on Minorities in the United States (5) I&S

GEOG 230 Urbanization and Development: Geographies of Global Inequality (5) I&S Lawson Examines global to local interactions of economic, political, and social forces shaping urbanization and development processes across the globe. Provides an introduction to critical development studies, focusing on Latin America, Africa, and Asia. Also examines debates over the causes and geographic patterns of social inequality worldwide.
GEOG 236 Geography of Greater China (5) I&S Chan Studies the geography of development processes, patterns, and problems in “Greater China”: mainland China, Taiwan, and Hong Kong. Covers physical geography, history, and economic and political systems, with major focus on geographical issues in China’s development: agriculture, population, industry and trade, and relations with Hong Kong and Taiwan. Offered: jointly with SISEA 236.

GEOG 245 Geographic perspectives on U.S. Population Diversity (5) I&S Withers Introduction to population geography. Offers a practical understanding of population processes (fertility, mortality, and migration); knowledge of geographic variation in population structures and characteristics; knowledge of data sources for demographic research; experience using formal demographic methods for geographic research; and an appreciation for the demographic underpinnings of contemporary social issues. Offered: W.

GEOG 258 Maps and GIS (5) I&S Explores how people represent the world with maps and geographic information systems (GIS). Trains students in map use for basic navigation, urban management, and environmental analysis. Considers role of spatial databases in commerce, decision-making, and analysis. Helps map readers better determine quality, usefulness, and representation of information. Offered: A.

GEOG 270 Geographies and International Development and Environmental Change (5) I&S Considers the meaning of development and how debates over international development link to environmental concerns. Examines how the globalization of agricultural production and debates over genetically modified food alter ideas about development, nature, and the environment. Addresses fair trade policies and practices and the obligations of multinational corporations. Offered: A.

GEOG 271 Geography of Food and Eating (5) I&S Jarosz Examines food production, distribution, and consumption issues across geographic scales. Focus ranges from the microcosm of the individual body to food and eating at the national and global scales. Explores the political, social, cultural, and economic dimensions of food and eating in particular spaces, places, environments, contexts, and regions. Offered: W.

GEOG 276 Introduction to Political Geography (5) I&S Brown Examines both the geography of politics and the politics of geography at a variety of spatial scales and in different global locations. Typical topics include: geographies of the state and state power; geopolitics and globalization; national and local politics, and other politics of culture, health, nature, and the body. Offered: Sp.

GEOG 277 Geography of Cities (5) I&S England Withers Study of (1) systems of cities—their location, distribution, functions, and competition; and (2) their internal structure—the location of activities within urban areas. Particular emphasis on current urban problems—sprawl, housing, segregation, economic growth, and metropolitan transportation.

GEOG 280 Introduction to the Geography of Health and Health Care (5) I&S Meyer Concepts of health from a geographical viewpoint, including human-environment relations, development, geographical patterns of disease, and health systems in developed and developing countries. Offered: Sp.

GEOG 295 Special Topics in Geography (1-5, max. 10) I&S GEOG 300 Concepts of Regions (5) I&S Historical development and application of the concept of region. Examines systematically how varied societies constitute parts of a total world order.

GEOG 301 Cultural Geography (5) I&S Analysis of the role of culture in the formation of landscape patterns; components of culture that contribute not only to a “sense of place,” but also to the mosaic of settlement patterns and occupancy that can be traced to culture.

GEOG 302 The Pacific Northwest (3) I&S Bayers Settlement pattern in the Pacific Northwest, emphasizing economic and historical factors, including the location of resource-oriented industries, policies regarding the use of public lands, and bases of the development of major urban areas in the region. Offered: W.

GEOG 304 Western Europe (5) I&S Physical and socioeconomic characteristics of western Europe. Contemporary political and economic integration trends in their regional context.

GEOG 308 Canada: A Geographic Interpretation (5) I&S Sparke Examines the overlapping economic, cultural, and political geographies shaping life in contemporary Canada. Topics include: free trade, constitutional crisis, feminism in Canada, aboriginal politics, and border region phenomena. Attention paid to how specific geographic interpretations of Canada by Canadians actually play a part in national life. Offered: jointly with SISCA 308; Sp.

GEOG 310 Immigrant America: Trends and Policies from a Geographic Perspective (5) I&S Ellis Examines U.S. immigration trends and policies from a geographic perspective. Topics include where immigrants come from, where they settle in the United States, immigrant employment enclaves, the effects of U.S. immigration policy on immigrant settlement and employment patterns, illegal immigration, citizenship, and barriers to immigrant success in the United States.

GEOG 313 East Asia (5) I&S Chan Introduction to the contemporary geography of East Asia, including China, Hong Kong, Taiwan, Japan, and Korea. Topics include: physical geography, historical settings, general development patterns, agriculture, population, industry, and trade. Focuses on major geographic issues in development. Case studies from different countries used to illustrate various themes.

GEOG 315 Explanation and Understanding in Geography (5) I&S Brown Covers the beginning steps in the research process. Introduces the discipline of geography, the department, and current faculty through the research aims of explanation and understanding that frame social scientific inquiry. Students develop basic library and writing skills as preparation for future research methods classes and independent research.

GEOG 316 Urban Economics (5) I&S Application of economic analysis to urban trends, problems, and prescriptions, such as changing urban form and function, urban public finance, housing and renewal, poverty and race, transportation, and environmental problems. Prerequisite: ECON 200. Offered: jointly with ECON 316.

GEOG 326 Quantitative Methods in Geography (5) I&S Chan Introduction to quantitative methods in geography, with a primary focus on statistical techniques. Examines the basic concepts, reasoning, and procedures geographers use in developing, analyzing, applying, and presenting quantitative methods. Topics include: generating and describing data; elementary probability, hypothesis testing, comparative tests; finding relationships; and using and misusing statistics. Offered: A.

GEOG 330 Latin America: Landscapes of Change (5) I&S Lawson Examines operation of economic, social, and political processes across countries of Latin America-on international, national, and local scales-to understand common issues facing the region and different impacts in particular countries. Topics include internationalization of Latin American economies; agrarian and urban change; popular movements. Offered: W.

GEOG 333 Russia’s Changing Landscape (5) I&S ZumBrunnen The Russian landscape as it has been affected by Soviet planning, migration and settlement, urbanization, industrialization, the results of collectivization rural agriculture, and the growth of a transport network.

GEOG 335 Geography of the Developing World (5) I&S Characteristics and causes, external and internal, of Third World development and obstacles to that development. Special attention to demographic and agricultural patterns, resource development, industrialization and urbanization, drawing on specific case studies from Asia, Africa, and Latin America. Recommended: GEOG 100 or GEOG 230. Offered: jointly with SIS 335.

GEOG 336 Development and Challenge in China (5) I&S Chan Examines the geography of China’s development since 1949. Introduces China’s physical geography, history, and economic and political system. Emphasizes China’s uneven development in agriculture, population, industry, and trade. Also examines problems China faces in meeting its internal food demand, as well as the external processes of globalization. Offered: W.

GEOG 342 Geography of Inequality (5) I&S England Geographies of social, political, and economic inequality. Focus is usually on North American cities. Examines the theoretical underpinning of inequality. Explores topics such as the spatial distribution of wealth and poverty, the geographies of exclusion, and discrimination in paid employment and housing.

GEOG 343 Comparative Geographies of Youth (5) I&S Jeffrey Examines how three key global processes - rising levels of formal education, changing health regimes, and environmental transformation - are shaping youth in the US and South Asia. Examines ways young people rework broader structures, paying particular attention to their economic livelihoods, cultural practices, and political engagements. Offered: jointly with SIS 343; A.

GEOG 344 Migration in the Global Economy (5) I&S Mitchell Examines the relationships between human mobility in the late 20th century and changes in the global economy. Allows the students to gain familiarity with scholarly research on international migration from a
GEOG 349 Geography of International Trade (5) & S Harrington Introduces the theories and practice of international trade and foreign direct investment. Topics include: trade theory and policy; economic integration; currency markets and foreign exchange; trade operations and logistics; the international regulatory environment; and marketing, location and entry, and finance, accounting, and taxation. Offered: W.

GEOG 366 Introduction to Regional Economic Development (3/5) & S Harrington The process of regional economic development. Theories and conceptualizations of economic growth and structural change, technological change and industrial development, spatial variation in economic activities and government policies. Recommended: GEOG 207; ECON 201.

GEOG 367 Economic Uses of Geographic Information (5) & S Harrington Uses of area data and the geographic information systems (GISs) that handle them in routing, marketing, service-are assessment, and site location. Considers key economic-geography concepts, marketing approaches, questions of data availability and suitability, and GIS. Prerequisite: GEOG 360.

GEOG 370 Problems in Resource Management (5) & S ZumBrunnen Principles and practices of effective conservation and utilization of natural resources. Role of technology in resource use. Physical, political, and economic aspects of resource management for food, population, land, water, air, energy, and timber resources. Recommended: GEOG 100. Offered: Sp.

GEOG 371 World Hunger and Resource Development (5) & S Jarosz Addresses issues of hunger and poverty in their relationship to resource development at the local, national, and global levels. Examines various approaches to the problem of world hunger rooted in critical development studies. Recommended: GEOG 230, GEOG 330, or GEOG 335.

GEOG 372 Asian Sustainable Development (5) & S Examines the contemporary relationship between environmental protection and development paths in Asia. Inquires into the forces driving both environmental change and societal responses (state and local regulations, social movements, etc.) to that change, at many geographical scales. Asian concepts of nature-society relations also explored. Offered: jointly with SISA 372; W.

GEOG 375 Geopolitics (5) & S Sparke An introduction to both political geography and geopolitics, addressing the fundamental links between power and space. Topics covered include: theories of power, space, and modernity; the formation of modern states; international geopolitics in the aftermath of the Cold War; the post-colonial nation-state; and the geopolitics of resistance. Offered: jointly with SIS 375.

GEOG 377 Urban Political Geography (5) & S Morrill Examines how the spatial structure of cities and towns affects and is affected by political processes; considers both traditional and newer forms of politics, as global and local issues. Special attention paid to where politics take place within local contexts across state, civil society, home, and the body. Offered: Sp.

GEOG 378 Policing the City (5) & S Herbert Investigates how and why formal and informal order is established in urban areas, how this order produces advantages and disadvantages, and possibilities of alternative visions of order. Topics include formal means of control (zoning, laws, policing, building codes) and informal means of control (gossip, ostracism, peer pressure, local politics). Offered: jointly with LSJ 378; A.

GEOG 380 Geographical Patterns of Health and Disease (4) & S Mayer Geography of infectious and non-infectious diseases at local, national, and international scales; environmental, cultural, and social explanations of those variations; comparative aspects of health systems. Offered: W.

GEOG 395 Special Topics in Geography (1-5, max. 10) & S.

GEOG 397 Tutorial for Majors (1) Overview of the discipline of geography including faculty research interests, teaching philosophies, and course offerings as well as essential study and research skills and career developments strategies. Students meet concurrently with faculty adviser to identify academic interests and devise plan of studies. Credit/no credit only. Offered: Asp.

GEOG 401 Culture, Capital, and the City (5) & S Examines current themes in social theory as they apply to the urban landscape. Includes the interconnections of cultural and economic processes and the spatial patternings of race, class, and gender in the modern urban context. Offered: A.

GEOG 425 Qualitative Methodology in Geography (5) & S Jarosz Historical and philosophical overview of qualitative methodology in design of geography research strategies. Techniques of interviewing, participant observation, and archival research. Forms of analysis such as textual interpretation, discourse analysis and computer-aided analyses of interview transcriptions and ethnography. Questions of ethics, field notes and write-up. Offered: W.

GEOG 426 Quantitative Methods in Geogra-phy (5) & S, QSR Wilhers Quantitative methods for empirical research in geography. Emphasis on statistical analysis; use of geographic data bases like the United States Census; understanding special issues and problems associated with geographically ordered data; verbal and graphic presentation in a computer environment. Recommended: GEOG 326. Offered: Sp.

GEOG 430 Contemporary Development Issues in Latin America (5) & S Lawson Contemporary development issues in Latin America, seen from a spatial perspective. Concept of development; competing theories as related to various Latin American states. Economic structural transformation, migration, urbanization, regional inequality, and related policies. Offered: A.

GEOG 431 Geography and Gender (5) & S Jarosz Examines theories and case studies across international, national, and regional scales in order to illustrate the social and economic processes upon the construction of gender in particular places. Offered: Sp.

GEOG 433 Resource Use and Management in Russia and the Newly Independent States (5) & S ZumBrunnen Geographic and historical background of the natural resource base of Russia and the Newly Independent States. Geographic and historical perspectives on Soviet natural resource use and management in theory and practice. Implications of the breakup of the USSR for natural resource use and management. Offered: odd years; W.

GEOG 435 Industrialization and Urbanization in China (5) & S Chan Examines the impacts of industrialization strategies adopted by the Peoples Republic of China on urbanization and rural-urban relations. Topics include: economic development strategies, industrial geography, rural industrialization, urban development patterns, migration, and urbanization policies. Recommended: GEOG 336. Offered: Sp.

GEOG 436 Social and Political Geographies of South Asia (5) & S Jeffrey Introduces the social and political geographies of South Asia through reference to agrarian change in India. Outlines key concepts related to the reproduction of inequality in the region, particularly theories of caste, class, gender, and religious communalism, and examines the mechanisms through which these inequalities are reproduced in South Asia. Offered: jointly with SISSA 436, Sp.

GEOG 438 Cities of East Asia: Geography and Development (5) & S Chan Examines urban development in East Asia from a geographic and comparative perspective focusing on issues in development, and the interaction of geography, history, politics, and economics. Major topics include economic development and urbanization; regions and urban systems; migration; urban social and spatial structures; globalization and governance. Offered: Sp.

GEOG 439 Gender, Race, and the Geography of Employment (5) & S Ellis Focuses on the geography of employment for men and women of different racial and ethnic backgrounds in American cities. Presents evidence on labor market inequality for different groups and explanations of these differences. Emphasizes the importance of a spatial perspective in understanding employment outcomes for women and minorities.

GEOG 443 Location and Movement Models (5) I&S. Application of models of optimum location and allocation; assignment, transportation, and spatial equilibrium; spatial interaction; geographic simulation; and spatial diffusion.

GEOG 445 Geography of Housing (5) I&S. White. Focuses on the geography of housing, especially in the United States. Topics include: the American dream of home ownership; housing affordability and differential access to home ownership; homelessness; the history of public housing; hosing demography; residential mobility and neighborhood change, and discrimination in the housing market. Offered: Sp.

GEOG 447 The Geography of Air Transportation (5) I&S. Withers. Focuses on the geography of air transportation, including the spatial interaction emphasizing commodity flow, the nature and distribution of air and water transport, the role of transport in area development.

GEOG 448 Geography of Transportation (5) I&S. Chang. Circulation geography, principles of spatial interaction emphasizing commodity flow, the nature and distribution of rail and water transport, the role of transport in area development.

GEOG 449 Geography of Ocean Transportation (5) I&S. Geographic analysis of ocean trade routes, cargo and passenger flows, and port activities. Evaluation of the role of the transportation carrier in international trade.

GEOG 451 Cultural Geography of Latin America (5) I&S. Interdisciplinary senior seminar examining how physical and social geographies are culturally constructed and interconnected with subjectivities and power in Latin America. Topics include identity formation grounded in particular territories and the social constitution of space via an interplay of material and cultural forces. Offered: jointly with SISLA 451.

GEOG 458 Map Sources and Errors (5) I&S. Analysis and appraisal of source materials for maps, production constraints of mapping agencies, coverage and quality. Focus on errors inherent in maps and geographic information; metadata resources; judgment of fitness for specific applications. Prerequisite: 2.0 in GEOG 360. Offered: odd years; W.

GEOG 460 Geographic Information Systems Analysis (5) I&S. Methods of Analysis provided by geographic information systems (GIS). Operations on map information including map overlay, aggregation/disaggregation, and other spatial and attribute procedures. Exposure to raster and vector software. Review of capabilities of current available GIS software. Prerequisite: 2.0 in GEOG 360. Offered: A.

GEOG 461 Urban Geographic Information Systems (5) I&S. Nyerges. Use of geographic information systems to investigate urban/regional issues; focus on transportation, land-use and environmental issues; all urban change problems considered. GIS data processing strategies. Problem definition for GIS processing. Data collection, geocoding issues. Data structuring strategies. Prerequisite: 2.0 in GEOG 360, recommended: GEOG 277. Offered: W.

GEOG 463 Geographic Information Systems Workshop (5) I&S. Nyerges. Practical experience applying geographic information system (GIS) tools to analyze spatial data. Workshop format requires student-motivated projects; diverse backgrounds encouraged. Prerequisite: either 2.0 in GEOG 460 or 2.0 in GEOG 461. Offered: Sp.

GEOG 465 Analytical Cartography (5) I&S. Algorithms and data structures for selected topics in computer-assisted cartography. Emphasis on point, line, area, and surface data representation, map design, generalization, and data transformations. Prerequisite: either 2.0 in GEOG 460 or 2.0 in GEOG 461. Offered: odd years; W.

GEOG 466 Regional Economic Development (5) I&S. Harrington. Provides a theoretical overview of sub-national, regional economic growth and spatial change, including the roles of interregional interaction and international trade, technological change, social, and legal institutions. Emphasizes inter-regional disparities in the context of relatively wealthy countries. Examines the role of institutions and public decision-making processes of their influence on policy and legal effectiveness of government (and other organizations’) policy. Offered: W.

GEOG 472 Ecoscapes: Nature, Culture, and Place (5) I&S. Relationship between nature, culture, and place as the heart of geographic inquiry. Examines how perceptions of nature are influenced by changing political-economic, cultural, and scientific practices. Uses cultural studies of ecological science as a primary method of analysis. Offered: Sp.

GEOG 474 Geography and the Law (5) I&S. Herbert. Explores the relationship between geography, law, and socio-legal analysis; reviews significant instances where law and geography intersect, such as the regulation of public space, the regulation of borders and mobility, and disputes over property and land use. Offered: jointly with LSJ 474.

GEOG 476 Women and the City (5) I&S. England. Explores the reciprocal relations between gender relations, the layout of cities, and the activities of urban residents. Topics include: feminist theory and geography (women, gender, and the organization of space); women and urban poverty, housing and homelessness; gender roles and labor patterns; geographies of childcare; and women’s work in urban politics. Offered: jointly with WOMEN 476.

GEOG 479 Race, Ethnicity, and the American City (5) I&S. Ellis. Explores America’s cities as sites where ethnic and racial interactions have generated specific patterns of opportunity and disadvantage in housing and labor markets; how ethnic identities and racial formations are changed by living and working in cities, and questions of assimilation, multiculturalism, and America’s ethnically-racial future.

GEOG 486 Environmental Geography, Climate, and Health (5) I&S. National and regional environmental relations are expressed in the context of health and disease. Local and global examples emphasize the ways medical geography is situated at the intersection of the social, physical, and biological sciences. Examines interactions between individual health, public health, social, biological, and physical phenomena. Offered: W.

GEOG 490 Field Research: The Seattle Region (6) I&S. Morrill. Field methods for contemporary urban research. Survey designs used in the analysis of transportation, land use, location of employment, shopping and housing, political fragmentation, and environmental degradation. Field report required, based on field work in the Seattle region.
GEOG 492 Library Research in Geography (3) I&S Introduction to library research methods in geography. Review and assessment of geographical bibliographies and abstract services for monographs, periodicals, gazetteers, dictionaries, encyclopedias, government publications, and statistical sources. Credit/no credit only.

GEOG 493 Assessing Geographic Learning (2) Harrington Enables graduating geography majors to articulate and assess their academic development and professional readiness by examining ways of representing geographic skills and capabilities. Offered: Sp.

GEOG 494 Senior Essay (3) I&S Supervised individual research and writing of major paper during senior year. Offered: AWSp.

GEOG 495 Special Topics (*, max. 15) I&S Topics vary and are announced in the preceding quarter. Offered: AWSpS.

GEOG 496 Internship in Geography (3/5, max. 12) Emphasis on the public or private sector, supervised by a faculty member. Credit/no credit only. Offered: AWSpS.

GEOG 497 Tutorial in Geography (1-5, max. 15) I&S ZumBrunnen Intensive directed study and tutoring. Literature reviews, formulations of project outlines and research designs, orientation in contemporary geographic thought and trends. Directed writing. Required for honors students. Offered: AWSp.

GEOG 498 Undergraduate Seminar in Economic Geography and Regional Science (3) I&S Selected advanced topics and current problems in economic geography. Emphasis on formulating research questions, developing an appropriate research process, selecting methods, searching for resources, writing up and documenting research results, and using the Internet for research purposes. Offered: Sp.

GEOG 499 Special Studies (*, max. 15) Supervised reading programs, undergraduate and graduate library and field research; special projects for undergraduate honors students. Offered: AWSpS.

GEOG 500 Contemporary Geographic Thought (4, max. 8).

GEOG 502 Professional Writing in Geography (*, max. 6).

GEOG 505 Research Seminar: China (5, max. 10) Chan Offered: A.

GEOG 506 Research Seminar: Southeast Asia (5, max. 6).

GEOG 507 Research Seminar: Canadian Problems (5, max. 10) Consideration of the spatial dimensions of Canadian socioeconomic, cultural, and political development, with emphasis on resource potentials and relations with the United States, Japan, and other important trading partners. Prerequisite: GEOG 306 or permission of instructor. Offered: jointly with SISCCA 507.

GEOG 512 History of Geographic Thought (5) Historical development of modern geography. Emphasis on various philosophical and methodological debates in geography and the contexts from which they emerged. Investigates geography’s foundational concepts and institutions; how they have responded to — and influenced — the world around them. Offered: A.

GEOG 513 Research Grant Workshop (5, max. 10) Writing research proposals. Participants learn to identify and approach sponsors; practice the peer-review process; develop a competitive research proposal. Prerequisite: GEOG 512 or GEOG 515 or equivalent; training and experience with quantitative, qualitative, or cartographic analysis; an already-formulated research project.

GEOG 515 Evidence and Explanation in Geography (5) Sparke Introduces the main strands of philosophical debate shaping the discipline of human geography, including description, prediction, explanation, abstraction, structuration, representation, and institutionalization. Focuses on ways “theories” from outside the discipline have shaped the questions and concerns of geographers, and the ways geography reworks such theories. Offered: Sp.

GEOG 520 Research Seminar: Geographic Information Representation (5) Nyerges Current issues in geographic information representation for geographic information systems (GIS). Includes representation for visualization, databases, and analyses. Prerequisite: one course in GIS.

GEOG 526 Advanced Quantitative Methods in Geography (4) Morrill, Withers.

GEOG 531 Latin American Development Seminar (5, max. 10) Lawson Evolution of development theory in Latin America from a spatial perspective. Theories and development issues, using case studies from Latin America. How geographers have conceptualized development problems and solutions. Prerequisite: GEOG 430.

GEOG 532 Rural Development Seminar (5, max. 10) Jareczek Contemporary issues in international development theory related to regional and agrarian change, with emphasis on Africa.

GEOG 533 Research Seminar: Russia and the Newly Independent States (5, max. 10) ZumBrunnen.

GEOG 536 Advanced Research Seminar on South Asian Geographies (5) Jeffrey Examines geographies of social inequality in South Asia through reference to how space, place, and the environment are shaping practices of political struggle in the region. Considers how liberalization, democratization and religious communalization are changing the political geography of South Asia. Offered jointly with SISCCA 536, Sp.

GEOG 538 Research Seminar: Geography of Transportation (3, max. 6) Mayer.

GEOG 540 Research Seminar: Industrial Geography (5, max. 10) Beyers Offered: W.

GEOG 541 Research Seminar: Feminist Geographies (5) England Explores major research themes in feminist geographies. Particular attention to the concept that gendered identities and spaces are discursively (re)produced. Emphasizes recent feminist scholarship that emphasizes difference, as well as the intersections between gender, “race,” ethnicity, sexuality, age, nationality, class, and other social identities and divisions. Offered: jointly with WOMEN 541; W.

GEOG 543 Research Seminar: Immigration, Ethnicity, and Employment (5) Ellis Emphasis on labor market segmentation, theories of discrimination, job/labor queues, networks, ethnic niches and enclaves, skills and spatial mismatches. Specific focus changes annually.

GEOG 550 Research Seminar in Location Theory (3) Offered: AWSpS.

GEOG 553 Advanced Topics in Cultural Geography (5, max. 10) Mitchell Focuses on important contemporary topics in cultural geography. Examines current theoretical debates in anthropology, sociology, geography, feminist criticism, and cultural studies as they relate to the landscape. Include critical questions surrounding issues of representation and ethnicity. Designed to help student prepare for advanced fieldwork. Offered: Sp.

GEOG 560 Research Seminar: GIS Analysis (5, max. 10) Offered: AWSpS.

GEOG 567 Research Seminar: Geography and Economic Development (5, max. 10) Harrington Explores ways in which economic and social changes affect the well-being and development of subnational, regional economies. Exploratory roles of such factors as labor and labor institutions, governments, technical change, corporations, capital markets, information costs, and international trade in the process of global restructuring. Specific focus changes annually.

GEOG 570 Research Seminar: Natural Resources Analysis (3, max. 6) ZumBrunnen.

GEOG 571 Research Seminar: Critical and Normative Ecologies (5) Brown Engages in an interrogation of mainstream managerial environmentalisms by unearthing their ideological bases, and delves into the ethical underpinnings of ecological resistance struggles or green utopias such as ecofundamentalism, deep and social ecology, and environmental justice movements. Offered: A.

GEOG 573 Urban Political Geography: Research Seminar (5) Brown Covers both classic and contemporary theoretical debates and research on the relation between power, place, and the local scale. Considers both
conventional sites (e.g., the local state) as well as new forms and locations of city politics (e.g., sexuality and the body).

GEOG 574 Research Seminar: Geography, Law, and Social Control (5) Herbert Explores relationship between the construction and enforcement of law and the landscape of lived experience; reviews major approaches in socio-legal analysis and seeks to augment these with insights from contemporary human geography research; explores various ways in which geographical variance shapes legal behavior.

GEOG 575 Advanced Political Geography (5) Sparke Provides resources for theorizing how political spatial dynamics are shaped by geographical relationships. Examines how politics are situated in complex material and discursive geographies that are partly reproduced through political negotiations. Examines interrelationships of contemporary capitalism with other complex systems of social and political power relations. Offered: jointly with SIS 575.

GEOG 577 Research Seminar: Internal Spatial Structure of Cities (4, max. 8) Hodge Offered: A.

GEOG 578 Research Seminar: Theorizing the City (5) Ellis Considers classic and contemporary writings in urban theory in the twentieth century, including social ecology (Chicago School), political economy, and contemporary theoretical debates in poststructuralism, deconstructionism, and culture as they relate to cities and space. Offered: W.

GEOG 580 Medical Geography (3) Mayer Geography of disease, consideration in health systems planning. Analysis of distributions, diffusion models, migration studies. Application of distance, optimal location models to health systems planning; emergency medical services; distribution of health professionals; cultural variations in health behavior. Prerequisite: familiarity with social science research; health-related issues. Offered: jointly with HSERV 586; W.

GEOG 581 Seminar in Medical Geography (5, max. 10) Mayer Intensive research seminar dealing with new and promising research themes in medical geography and public health. Offered: jointly with HSERV 585; A.

GEOG 588 Advanced Urban Ecology (5) Alberti, Bradley; Hill, Marzuff, Ryan; ZumBrunnen Discussion of current and important theoretical and empirical papers in urban ecology. Students continue to research interdisciplinary urban ecology projects while developing publishable manuscripts and oral presentations. Offered: jointly with CFR 588; AWSp.

GEOG 597 Tutorial for Graduate Students (2) Introduces beginning geography students to the main research agendas of the faculty; identifies the range of current discourse communities formed by current faculty and graduate students; establishes a process of mentoring and long-term planning for each new graduate student. Credit/no credit only. Offered: A.

GEOG 598 Geography Colloquium (1, max. 3) Participation in, and critique of, student thesis and dissertation research, faculty research, and visitor contributions. Offered: AWSp.

GEOG 599 Effective Teaching of Geography (1) Designed for the ongoing development of effective teaching and professional skills. Topics/activities include micro-teaching, communications and presentation skills; course organization, time management, personal and small group dynamics; design of geography curricula using simulations and computer-assisted instruction in the classroom, and fostering of creative thinking. Credit/no credit only. Offered: A.

GEOG 600 Independent Study or Research (*) Offered: AWSpS.

GEOG 700 Master's Thesis (*) Offered: AWSpS.

GEOG 800 Doctoral Dissertation (*) Offered: AWSpS.

Germanics

Credit Restrictions: Students may receive credit for only one course in each of the following: 101, 111, and the first 5 credits of 104; 102, 111, and the second 5 credits of 104; 103 and the last 5 credits of 104. They may, however, receive credit for courses in different first-year sequences if the courses are taken in progressively more advanced order (e.g., the first 5 credits of 104 followed by 102 and 103). 100 is the equivalent of 101, 102, 103, or 15 credits of 104.

GERMAN 100 Intensive First-Year German (15) Accelerated first-year German. Speaking and listening. Secondary objectives are reading and writing. Offered: S.

GERMAN 101 First-Year German (5) The methods and objectives are primarily communicative, with emphasis on speaking and listening. Secondary objectives are reading and writing. Offered: A.

GERMAN 102 First-Year German (5) The methods and objectives are primarily communicative, with emphasis on speaking and listening. Secondary objectives are reading and writing. Offered: A.

GERMAN 103 First-Year German (5) The methods and objectives are primarily communicative, with emphasis on speaking and listening. Secondary objectives are reading and writing. Offered: A.

GERMAN 104 Individualized First-Year German (1-15, max. 15) Individualized approach to elementary German instruction. Students progress at their own pace. Credits vary. Depending upon amount of material mastered, any number of credits up to 15 may be earned per quarter. Credit/no credit only.

GERMAN 111 Basic German Review (5) Combines in one quarter the contents of 101 and 102. Designed for students with background in German who however feel unprepared to take 102. Highly motivated beginners are also encouraged to take the course. Offered: A.

GERMAN 121 First-Year Reading German (5) Special beginning course devoted exclusively to the reading objective. Offered: AS.
reception in different cultural frameworks, and their influence on fantasy literature from the nineteenth century to the twentieth century, including discussions of their sociological, psychological, and psychoanalytical implications and gender issues. In English.

GERMAN 250 Advanced Conversational German Through Films (2, max. 6) VLPA
Conversational practice in small groups based on films. May be taken concurrently with other Germanics courses. Recommended: GERMAN 103 and GERMAN 150. Offered: WSp.

GERMAN 293 Introduction to Contemporary German Culture (5) I&S/VLPA Introduction to cultures of today's German-speaking world through readings from various media and discussion of diverse manifestations of both high and popular culture, its underlying beliefs and values, and its institutions and historical background. Readings and discussions in English.

GERMAN 295 The Contributions of German Jews to German Culture (5) I&S/VLPA Contribution, assimilation and alienation of German-speaking Jews — such as Karl Marx, Sigmund Freud and Franz Kafka — emphasizing the multi-cultural nature of that which is understood as "German culture."

GERMAN 299 Supervised Study (1-5, max. 10).

GERMAN 300 Studies in Germanics (5, max. 15) VLPA Topics or figures of German literature or language. German texts.

GERMAN 301 Conversation and Writing Skills (3-5) VLPA Language skill development (speaking, writing) using materials selected to broaden understanding of German-speaking countries. Recommended: GERMAN 203. Offered: AW.

GERMAN 302 Conversation and Writing Skills (3-5) VLPA Language skill development (speaking, writing) using materials selected to broaden understanding of German-speaking countries. Recommended: GERMAN 301. Offered: WSp.

GERMAN 303 Conversation and Writing Skills (3-5) VLPA Language skill development (speaking, writing) using materials selected to broaden understanding of German-speaking countries. Recommended: GERMAN 302. Offered: Sp.

GERMAN 304 Contemporary German Play (5, max. 15) VLPA Reading, analysis, and performance of one play by a contemporary German author. Taught in German. Performance scheduled for last week of quarter. Prerequisite: GERMAN 203.

GERMAN 311 Critical Approaches to German Literature (5) VLPA Introduction to literary terminology. Diverse interpretive strategies, ranging from close reading to biographical and sociological approaches. Characteristics of different genres (poetry, prose, drama). Readings from eighteenth- to twentieth-century literature. Recommended: GERMAN 203. Offered: A.

GERMAN 312 Historical Approaches to German Literature (5) VLPA German literature from the Middle Ages to the present: Medieval Courtly period, Baroque, Enlightenment, Sturm und Drang, Classicism, Romanticism, Realism, Neo-romanticism, Expressionism. Recommended: GERMAN 311. Offered: W.

GERMAN 313 Major Figures of German Literature (5) VLPA Focus on major figure such as Goethe, Schiller, Kleist, Fontane, Thomas Mann, Kafka. Emphasis on his/her cultural and sociopolitical contexts, literary and nonliterary texts, including film, art, political, historical, and philosophical texts. Recommended: GERMAN 203; either GERMAN 311 or GERMAN 312. Offered: Sp.

GERMAN 322 Introduction to German Studies (5) VLPA German quest for national identity and the conflict of unity and division. Readings from literature, history, politics, and anthropology. Recommended: GERMAN 203; either GERMAN 311 or GERMAN 312. Offered: W.

GERMAN 323 Institutions and Their Ideas (5) I&S/VLPA Analysis of central institutions of contemporary Germany in their historical development. Recommended: GERMAN 203; either GERMAN 311 or GERMAN 312; GERMAN 322. Offered: Sp.

GERMAN 330 Conversational German (3-5) VLPA For participants in special summer programs only.

GERMAN 333 Business German 1 (5) VLPA Introduction to the language and practices of German business. Recommended: GERMAN 203. Offered: A.

GERMAN 334 Business German 2 (5) VLPA Introduction to the language and practices of German business. Recommended: GERMAN 203. Offered: W.

GERMAN 340 Friedrich Nietzsche in English (5) I&S/VLPA Analysis of Friedrich Nietzsche's chief works and the discussion of his position within modern German literature and thought.

GERMAN 341 Franz Kafka in English (5) VLPA Short stories and novels of Franz Kafka; emphasis on philosophical relevance and esthetic significance.

GERMAN 342 Thomas Mann in English (5) VLPA.

GERMAN 345 Bertolt Brecht in English (5) VLPA Brecht's life and work, particularly his plays and writings on theatre, and some poems and short prose pieces to provide additional perspective on his life and work as a whole. The development of his writing and of his ideas and attitudes.

GERMAN 346 The Contemporary German Novel in English (5) VLPA Major novels of the postwar period (1945 to present), discussed in their historical context.

GERMAN 349 Goethe in English (5) VLPA Selected major works (especially Faust) of Goethe, whose literary, philosophical, and scientific achievements are examined as integral parts of his quest for meaning, wholeness, and universality, and whose impact on Western thinking is traced up to Thomas Mann and C. G. Jung.

GERMAN 350 The German Drama in English (5) VLPA German drama from the eighteenth to the twentieth centuries. German history and culture as reflected in the plays. Discussion of major themes.

GERMAN 351 Vienna 1900 in English (5) I&S/ VLPA Interdisciplinary study of Vienna at the turn of the century. Discussion of literary texts with emphasis on other intellectual and cultural trends of this very rich and complex period.

GERMAN 352 Literature and Society in Weimar and National Socialist Germany in English (5) I&S/ VLPA Literature, theater, and film, with adjunct consideration of art and architecture, in relation to the German social and cultural situation circa 1918 to circa 1947.

GERMAN 353 Postwar Germany (5) I&S/ VLPA Postwar development and present-day character of cultural, social, and political life in Germany. Readings include literary and nonliterary texts devoted to culture and everyday life. In English.

GERMAN 355 German Literature and Film in English (5) VLPA Relationship between literature and film in the German tradition. Content varies; focus may be on a particular time period, director, or theme. Special attention paid to critical and analytical skills required for interpreting the two mediums.

GERMAN 356 Pagan Germany: Myth, Religion, Folklore in English (5) I&S/ VLPA History and culture of the German peoples before and during the conversion to Christianity. Readings include Tacitus's Germania and other historical sources, Beowulf, Nibelungenlied, Grimm's Fairy Tales, and German legends. Treatment of archaeological finds and a variety of materials that bear on religion, prophecy, magic, folk customs, and festivals.

GERMAN 360 Women in German Literature in English (5) I&S/ VLPA Investigates the changing social roles of women in German society on the example of various literary texts from different periods.

GERMAN 370 History of German Cinema (5) I&S/ VLPA History of German cinema, emphasizing the cultural and political context. Works considered include films by Lang, Murnau, Sternberg, Riefenstahl, Fassbinder, Wenders, and Trotta. Readings and discussions in English.

GERMAN 371 Special Topics: German Cinema (5, max. 10) VLPA Covers one or more German film directors, a specific genre, or a chosen theme. Topics vary.

GERMAN 390 Germanic Studies in English (5, max. 15) VLPA Topics or figures of German literature or language.

GERMAN 395 Proctoring of First-Year German Film Course (1-2, max. 6) VLPA Restricted to upper-division students of German who have demonstrated sufficient proficiency in speaking German to lead discussion groups in 150. Leaders may participate one or two hours per week and receive 1 credit for each hour in class with 6 credits allowed in 3 quarters. Credit/no credit only. Recommended: GERMAN 203. Offered: AWSp.

GERMAN 396 Proctoring of Second-Year German Film Course (1-2, max. 6) VLPA Restricted to upper-division students of German who have demonstrated sufficient proficiency in speaking German to lead discussion groups in 250. Leaders may participate one or two hours per week and receive 1 credit for each hour in class with 6 credits allowed in 3 quarters. Credit/no credit only. Recommended: GERMAN 303; either GERMAN 322 or GERMAN 323. Offered: WSp.
GERMAN 397 Foreign Studies in German Literature (1-6, max. 15) VLPA.

GERMAN 398 Foreign Studies in German Language (1-6, max. 15) VLPA.

GERMAN 399 Foreign Studies in German Culture (1-6, max. 15) I&S/VLPA.

GERMAN 401 Advanced Writing and Conversation (3-5) VLPA Texts and exercises, both grammatical and stylistic, to develop vocabulary, stylistic awareness, and the practical application of grammatical rules in written German. Recommended: GERMAN 303. Offered: AWSp.

GERMAN 402 Advanced Writing and Conversation (3-5) VLPA Texts and exercises, both grammatical and stylistic, to develop vocabulary, stylistic awareness, and the practical application of grammatical rules in written German. Recommended: GERMAN 303. Offered: AWSp.

GERMAN 403 Advanced Writing and Conversation (3-5) VLPA Texts and exercises, both grammatical and stylistic, to develop vocabulary, stylistic awareness, and the practical application of grammatical rules in written German. Recommended: GERMAN 303. Offered: AWSp.

GERMAN 406 Intensive Elementary Yiddish (5-15, max. 15) Intensive study of Yiddish grammar, with oral and written drills and reading of selected texts. Offered: S.

GERMAN 411 Studies in Medieval Literature and Culture (5) VLPA Rotating special topics in literature and culture of the Middle Ages, such as particular movements, authors, genres, themes, or problems. Recommended: GERMAN 303; either GERMAN 311, GERMAN 312, GERMAN 322, or GERMAN 323.

GERMAN 412 Studies in Renaissance and Baroque Literature and Culture (5) VLPA Rotating special topics in literature and culture of the Renaissance and Baroque, such as particular movements, authors, genres, themes, or problems. Recommended: GERMAN 303; either GERMAN 311, GERMAN 312, GERMAN 322, or GERMAN 323.

GERMAN 421 Studies in Eighteenth-Century Literature and Culture (5) VLPA Rotating special topics in literature and culture of the eighteenth century, such as particular movements, authors, genres, themes, or problems. Recommended: GERMAN 303; either GERMAN 311, GERMAN 312, GERMAN 322, or GERMAN 323.

GERMAN 422 Studies in Nineteenth-Century Literature and Culture (5) VLPA Rotating special topics in literature and culture of the nineteenth century, such as particular movements, authors, genres, themes, or problems. Recommended: GERMAN 303; either GERMAN 311, GERMAN 312, GERMAN 322, or GERMAN 323.

GERMAN 423 Studies in Twentieth-Century Literature and Culture: (5) VLPA Rotating special topics in literature and culture of the twentieth century, such as particular movements, authors, genres, themes, or problems. Recommended: GERMAN 303; either GERMAN 311, GERMAN 312, GERMAN 322, or GERMAN 323.

GERMAN 444 Undergraduate Thesis in Germanics (5) VLPA Supervised research leading to the writing of a research thesis.

GERMAN 446 Internship in German (2-5, max. 10) Prerequisite: 6 credits of upper-level German language courses. Credit/no credit only.

GERMAN 447 Undergraduate Research (1-5, max. 15) Supervised research with faculty member. Offered: AWSp/S.

GERMAN 451 Linguistic Analysis of German (5) VLPA Recommended: GERMAN 203 Offered: A.

GERMAN 452 History of the German Language (5) VLPA Traces the history of the German language from early Germanic to the present. Recommended: LING 200 and GERMAN 203 Offered: jointly with LING 415.

GERMAN 479 Special Topics in the Teaching of Foreign Languages (3, max. 9) VLPA Intensive workshops for in-service and preservice teachers of all foreign languages on some aspect of foreign-language teaching methodology.

GERMAN 490 Contemporary German Literature (5) VLPA Interpretation of selected works by contemporary German authors. Recommended: GERMAN 303; either GERMAN 311 or GERMAN 312.

GERMAN 493 Special Topics in German Culture (5) I&S/VLPA Recommended: GERMAN 303; either GERMAN 322 or GERMAN 323.

GERMAN 494 Studies in German Poetry (5) VLPA Introduction to various methods of interpretation and to their practical application. Recommended: GERMAN 303; either GERMAN 311 or GERMAN 312.

GERMAN 495 Proseminar in German Literature (5, max. 15) VLPA Special topics, the subject matter and depth of which are not included in other literature courses, arranged through consultation among students and faculty members.

GERMAN 496 History of Germanic Philology (5) VLPA Introduction to the works of outstanding scholars in the field of Germanics.

GERMAN 497 Studies in German Literature (1-6, max. 15).

GERMAN 498 Studies in the German Language (1-6, max. 15).

GERMAN 499 Studies in German Culture (1-6, max. 15).

GERMAN 500 Literary Theory, Methodology, and Bibliography (5) Historical survey and analysis of criticism (Methodengeschichte) and modern trends in contemporary theory. Methods of research and bibliography, as well as theoretical aspects of practical interpretation.

GERMAN 501 Proseminar in Methods and Writing (5) Introduction to research methods, presentation of research, scholarly writing, and general methodological issues. Each year a different special topic is chosen as a focus for students' research in the course.

GERMAN 503 Contemporary German Literature (5, max. 15) Seminar analyzing the esthetic movements and thought of contempo-
sentimentalism, anacreontics, storm and stress, classicism, early romanticism, and works by principal authors such as Gottsched, Bodmer, Gellert, Lessing, Wieland, Klopstock, Herder, Lenz, Goethe, Schiller, Jean Paul.

**GERMAN 534 Storm and Stress (5, max. 15)**
Extensive investigation of poetological and esthetic concepts advanced by initiators and exponents of German storm and stress. Analyses of narrative and dramatic works of storm and stress reveal reflections and implementations of the new theoretical concepts.

**GERMAN 535 Classicism: Goethe, Schiller (5, max. 15)**

**GERMAN 537 Studies in Literature 1770-1830 (5, max. 15)**
Seminars on rotating special topics drawn from the period 1770-1830, such as particular movements, authors, genres, themes, or problems.

**GERMAN 540 Twentieth-Century Poetry (5, max. 15)**
Development of German poetry from Rilke, Hofmannsthal, and George through Trakl, Benn, the Expressionists and the Dadaists, Brecht, and Enzensberger, to such contemporaries as Eich, Heissenbuttel, the concrete poets, Celan, and Bachmann.

**GERMAN 541 Twentieth-Century German Drama (5, max. 15)**
Selection from modern German drama representative of the concern with the human condition, of social criticism, and of experimentation with the new dramatic forms.

**GERMAN 542 Twentieth-Century Prose (5, max. 15)**
Selected modern German novels, short novels, and short stories by representative authors dealing with the social and political problems of Germany as well as with individual problems of existence and identity.

**GERMAN 550 Gothic (5)**

**GERMAN 551 Seminar in Germanic Philology and Linguistics (5, max. 15)**
Topics vary. Prerequisite: basic knowledge of German and at least one elementary linguistics course.

**GERMAN 552 Old High German (5)**

**GERMAN 555 Old Saxon (5)**

**GERMAN 556 Middle High German (5)**

**GERMAN 558 Middle High German Literature (5)**

**GERMAN 560 Modern Dialects (5)**

**GERMAN 565 Seminar in Courtly Epic (5)**
Aspects and methods of literary analysis pertaining to the study of medieval courtly epics.

**GERMAN 566 Late Middle High German Narrative (3)**

**GERMAN 567 Minnesang (3)**
In-depth study of medieval German lyrics in the context of German and European literary and intellectual development. Poems of the period from Kuenenberger through Walther are analyzed with stress on grammatical, formal, stylistic, and ideological interpretation. Prerequisite: adequate knowledge of Middle High German.

**GERMAN 568 Seminar in Heroic Epic (5)**
Literary and historic problems of the German heroic epic, with special emphasis on the Nibelungenlied and the Dietrichsreip.

**GERMAN 575 Teaching of German Literature and Civilization (5)**
Teaching of German language and literature on the advanced level in secondary schools and colleges. Credit/no credit only.

**GERMAN 576 Modern Methods and Materials in Teaching German (3)**
Theory and practice of communicative language teaching; current developments in foreign-language teaching; evaluation of teaching materials. Credit/no credit only.

**GERMAN 577 Principles of Second Language Learning (2)**

**GERMAN 580 Seminar in German Literature (5, max. 15)**
Open topics seminar with varying content.

**GERMAN 581 Seminar in Poetry (5, max. 15)**
Open topics seminar with varying content.

**GERMAN 582 Seminar in Drama (5, max. 15)**
Open topics seminar with varying content.

**GERMAN 583 Seminar in Prose (5, max. 15)**
Open topics seminar with varying content.

**GERMAN 590 Philosophical Issues in German Culture (5, max. 15)**
Seminar on rotating special topics dealing with the impact of particular thinkers, movements, or philosophical problems in German culture.

**GERMAN 591 Studies in German Intellectual History (5, max. 15)**
Seminar on rotating special topics dealing with interactions of history, literature, and culture in the German tradition.

**GERMAN 592 Cultural Studies (5, max. 15)**
Seminar on rotating special topics dealing with periods, themes, or particular problems in German life and culture.

**GERMAN 600 Independent Study or Research (*)**

**GERMAN 700 Master's Thesis (*)**

**History**

**Ancient and Medieval History**

**HSTAM 203 Introduction to the Middle Ages: Medieval People (5) I&S**
Introduction to the Western Middle Ages through a study of social roles and statuses as seen through documents and imaginative literature. The groups studied are rulers, aristocracy, peasants, townspeople, clergy, outcasts, and outsiders.

**HSTAM 205 Military History of the Ancient World (5) I&S**
Military history from prehistoric times to the fall of the Roman Empire, with special emphasis on the Greco-Roman period and the campaigns of Alexander the Great, Hannibal, Scipio Africanus, and Julius Caesar.

**HSTAM 276 Celtic Civilizations of the European Middle Ages (5) I&S**
Introduction to the history and pseudo-history of medieval Ireland, Wales, Scotland, and Gaul. Topics include “Celtic” religion, mythology, social institutions, nationalism, and the relationship between history and myth. Particular attention to how historians “do” history in the absence of straightforward historical sources.

**HSTAM 290 Topics in Ancient/Medieval History (5, max. 10) I&S**
Examines special topics in ancient/medieval history.

**HSTAM 302 Ancient History (5) I&S**
Political, social, economic, and cultural development of Rome from the beginnings in the eighth century BC to the beginning of the Middle Ages.

**HSTAM 312 The Roman Republic (5) I&S**
Political, social, economic, and cultural history, with emphasis on the development of the constitution and territorial expansions.

**HSTAM 313 The Roman Empire (5) I&S**
Political, social, and cultural history, with special emphasis on the period of Cicero and Caesar.

**HSTAM 314 The World of Late Antiquity (5) I&S**
Examines the transformation of the ancient world from the third-century crisis of the Roman Empire to the rise of Islamic civilization. Explores the manifold political, cultural, and social changes that transformed Europe, the Mediterranean, and the Near East between the third and the eighth centuries CE.

**HSTAM 315 The Byzantine Empire (5) I&S**
Political, social, economic, and cultural history of the eastern Roman Empire from the fourth to fifteenth centuries.

**HSTAM 330 The Age of Augustus (5) I&S/VLPA**
Detailed study of the history and culture of the reign of Augustus, the first Roman emperor (31 BC-AD 14). Includes readings in Augustan authors such as Virgil, Ovid, and Horace as well as the study of Augustan art and architecture. Offered: jointly with CLAS 330.

**HSTAM 331 Early Middle Ages (5) I&S**
The Dark Ages, feudalism, emergence of the medieval order of civilization, and the development of Romanesque culture.

**HSTAM 332 Central Middle Ages (5) I&S**
Europe in the central Middle Ages: culture of cathedrals and universities, formation of national states, development of urban society.

**HSTAM 333 Late Middle Ages (5) I&S**
Disintegration of the medieval order under the impact of the national state, the secularization of society, and the decline of the church. Movements of reform and revolution. The culture of late gothic Europe.

**HSTAM 340 Medieval Women (5) I&S**
The experiences of women in medieval society; public and private power, changing concepts of family and the domestic sphere, ideal and reality in courtly love, women in religious life, women in the workplace, the querelle des femmes and the beginnings of “feminist” thought.

**HSTAM 360 Medieval Christianity (5) I&S**
Development of Christianity in the medieval west circa 400 to 1500. Emphasis on the forms of religious life: monasticism, the papaqy, friars, hermits, mystics, and the reformers; and on the emergence of new modes of piety, both lay and clerical.

**HSTAM 365 Medieval England, 1042-1485 (5) I&S**
Upper level survey of English history from the Norman conquest until 1485. Emphasis on political, social, and economic history, with special attention to the peculiarities of English development as these had emerged by 1485.
HSTAM 367 Medieval Jewish History (5) I&S Social and intellectual history of the Jews in western Europe to the fifteenth century. Jews under Islam and Christianity; the church and the Jews; the Crusades and their legacy; intellectual achievements; conflict and cooperation. Offered: jointly with SISJE 467.

HSTAM 370 The Vikings (5) I&S/VLPA The Vikings at home in Scandinavia and abroad, with particular emphasis on their activities as revealed in archaeological finds and in historical and literary sources. Offered: jointly with SCAND 370.

HSTAM 401 Early Greece (5) I&S Bronze and Dark Age Greece: realities of the heroic age of ancient Greece.

HSTAM 402 Classical Greece (5) I&S The classical civilization of ancient Greece, with special emphasis on the legacy of Greece to Western civilization.

HSTAM 403 Alexander the Great and the Hellenistic Age (5) I&S Rise of Macedonia, conquest of Near East by Alexander, and division into lesser kingdoms after Alexander's death. Special emphasis on fusion of cultures and change from city-state to world-state.

HSTAM 443 Kievan and Muscovite Russia: 850-1700 (5) I&S Development of Russia from earliest times to the reign of Peter the Great. Offered: jointly with SISRE 443.

HSTAM 490 Topics in Ancient/Medieval History (5, max. 10) I&S Examines special topics in ancient/medieval history.

HSTAM 501 Greek History Field Course (3-6, max. 6) Examines various topics and themes in Greek history. Content varies.

HSTAM 511 Seminar in Ancient History (3-6, max. 6) Detailed study of special topics in ancient history.

HSTAM 512 Seminar in Ancient History (3-6, max. 6) Detailed study of special topics in ancient history.

HSTAM 518 Topics in Late Antiquity (3-6, max. 18) Examines various topics in the transformation of the ancient world from the third-century crisis of the Roman Empire to the rise of Islamic civilization. Serves as the field course for masters and Ph.D. students.

HSTAM 530 Early Middle Ages (3-6, max. 6) Field course. Survey of early European history through the times of tribal migrations and invasions from Asia. Problems and methods of research.

HSTAM 531 Medieval European History (3-6, max. 6) 

HSTAM 532 Medieval European Seminar (3-6, max. 6) Prerequisite: reading knowledge of Latin.

HSTAM 533 Medieval European Seminar (3-6, max. 6) Prerequisite: reading knowledge of Latin.

HSTAM 534 Medieval European Seminar (3-6, max. 6) Prerequisite: reading knowledge of Latin.

HSTAM 535 Later Medieval Europe (3-6, max. 6) Field course. Surveys European history from ca. 1250 to 1500, with particular attention to historiography.

HSTAM 536 Topics in Early Medieval History (3-6, max. 6) Graduate level study of specific topics in early medieval history. Topics vary from quarter to quarter; for information, please see instructor.

HSTAM 590 Topics in Ancient and Medieval History (5) Seminar on selected topics in ancient and medieval history, with special emphasis on preparation for field examinations. Topics vary according to interests of students and instructor.

HIST 111 The Ancient World (5) I&S Origins of Western civilization to the fall of Rome.

HIST 112 The Medieval World (5) I&S Political, economic, social, and intellectual history of the Middle Ages. Cannot be taken for credit toward a history major if HSTAM 331 or 332 or 333 previously taken.

HIST 113 Europe and the Modern World (5) I&S Political, economic, social, and intellectual history of modern Europe. Cannot be taken for credit toward a history major if HSTEU 302 or 303 previously taken.

HIST 140 Russia from the Tenth Century to the Present (5) I&S Russian political, social, and economic history from the tenth century to the present. Offered: jointly with EURO140.

HIST 151 Introduction to African History. c. 1000-1880 (5) I&S Examines Africa's past from approximately 1000 to 1880. Through the theme of the politics of wealth, explores the history of precolonial states and societies, religious movements that combined local beliefs with Islam and Christianity, the Atlantic and Indian Ocean slave trades, and the origins of American and European colonialism.

HIST 152 Introduction to African History. c. 1880 - Present (5) I&S Examines Africa's pasts from approximately 1880 to the present. Through the theme of the politics of wealth, explores the history of European colonization, African social and cultural life under colonial rule, anti-colonial movements and decolonization, and the changes and challenges of the postcolonial present.

HIST 161 Survey of the Muslim Near East (5) I&S The Middle East (the Arab countries, Israel, Turkey, Iran, and Afghanistan) from the emergence of Islam in AD 622 to the present: culture, economics, politics.

HIST 199 Foreign Study (3-5, max. 10) I&S Lower-division history courses, for which there are no direct University of Washington equivalents, taken through the University of Washington Foreign Study Program.

HIST 200 Ten Events that shook the World (5) I&S Offers introduction to history by examining ten events of great importance for both past and present. The ten events, which vary from quarter to quarter, come from diverse times and places, thereby encouraging a sweeping view of world history. (See department advisor for the current quarterly list of the ten events.)

HIST 204 Europe and America in the Era of the World Wars (5) I&S Declining role of Europe in the world and rise of the United States from 1914 to 1945.

HIST 205 Filipino Histories (5) I&S Explores the histories, cultures, and politics of Filipinos in the Philippines and in the Diaspora, including Filipino Americans. Examines pre-colonial societies, Spanish and American colonial rule, nationalism, decolonization, and post-war political movements. Includes the histories of Filipino peoples in Europe and the United States.

HIST 207 Introduction to Intellectual History (5) I&S Ideas in historical context. Comparative and developmental analysis of Western conceptions of “community,” from Plato to Freud. Offered: jointly with CHID 207.

HIST 209 History of Christianity (5) I&S Twenty centuries of the history, thought, and culture of Christianity.

HIST 211 Introduction to the History of Science (5) I&S Introduction to major themes in the history of science. Investigation of historical and scientific methods through the study of particular historical cases.

HIST 215 The History of the Atomic Bomb (5) I&S History of the atomic bomb from the beginning of nuclear physics to the security hearing of J. Robert Oppenheimer. Includes a study of the scientific achievements that made the bomb possible, the decision to deploy the bomb, the moral misgivings of the scientists involved.

HIST 217 The Space Age (5) I&S Explores the history of ideas, events, and practices associated with the Space Age from the late nineteenth century through the twentieth. Emphasizes intellectual, cultural, and political/military history in the development of rockets and space technology in the United States, Germany, and the Soviet Union.

HIST 219 Science and the Arts in Early Modern Europe (5) I&S Examines the role of artisanal craft practice and knowledge in the Scientific Revolution. Examines the artisanal world and its traditions of craft knowledge and follows the transmission of artisanal practice into the scholarly world of natural philosophy in the seventeenth century. Assesses the consequences for scientists and artisans.

HIST 221 Information Research Strategies in History (3) I&S Information research and problem solving in the context of history. Focuses on identifying information, need, information seeking, evaluation and presentation, and selection of the appropriate sources. Offered: jointly with INFO 221.

HIST 222 Understanding Photographs as Historic Documents (3) I&S/NW Introduction to understanding how to view and interpret information contained in photographs. Examines the photograph as artifact, intent of the photographer, photographic codes and meanings; how such information is used, misused, and manipulated for various purposes and how to navigate archival institutions in search of photographs. Offered: jointly with INFO 222.

HIST 225 The Silk Road (5) I&S Waugh History of cultural and economic exchange across Eurasia from the early Common Era to modern times. Spread of religions such as Islam and Buddhism, overland trade in raw commodities, interaction between nomadic and sedentary cultures, role of empires, culture of daily life, and the arts. Offered: jointly with SIS 225.
HIST 245 Exploration and Empire: Science, Art, and Power, 1300-1800 (5) I&S Explores key moments in the history of exploration and empire, 1300-1800. Taking an interdisciplinary approach, focuses on scientific and artistic aspects of exploration, their implications for imperialism, and legacies in the postcolonial world.

HIST 250 Introduction to Jewish Cultural History (5) I&S Introductory orientation to the settings in which Jews have marked out for themselves distinctive identities as a people, a culture, and as a religious community. Examines Jewish cultural history as a production of Jewish identity that is always produced in conversation with others in the non-Jewish world. Offered: jointly with SISJE 250.

HIST 254 European Colonialism in North Africa, 1830 to the Present (5) I&S Examines European colonialism in North Africa, life under colonial domination, influences of Islam, role of national liberation struggles for independence, and the legacy of this relationship on contemporary conflicts of immigration, religion, and cultural identity. Focuses on Algeria and France, but also considers Britain, Germany, Italy, Libya, Morocco, Spain, and Tunisia.

HIST 260 Slavery in History: A Comparative Study (5) I&S Explores the brutal experiences of African American slavery as a universal historical phenomenon lending itself to a comparative analysis. Explores how the condition of African slavery is defined in terms of its philosophical justifications, economic importance, and local practices. The following historical periods are surveyed: the ancient Near East, Greece, Rome, Islam, Africa, Latin America, and North America.

HIST 269 The Holocaust: History and Memory (5) I&S Explores the Holocaust as a crucial event of the twentieth century. Examines the origins of the Holocaust, perpetrators and victims, and efforts to come to terms with this genocide in Europe, Israel, and the United States. Offered: jointly with SISJE 269.

HIST 283 Introduction to Women's History (5) I&S Includes units on American, European, and Third World women that examine centers of women's activities (convents, women's clubs), women's place in male-dominated spheres (politics), women's impact on culture (health, arts), and the effect of larger changes on women's lives (technology, colonization). Offered: jointly with WOMEN 283.

HIST 290 Topics in History (5, max. 10) I&S Examines special topics in history.

HIST 301 Science and Religion in Historical Perspective (5) I&S Explores the historical relationship between scientific and religious ideas. Focuses on particular episodes of history from ancient to modern times.

HIST 311 Science in Civilization: Antiquity to 1600 (5) I&S From preclassical antiquity to the end of the Middle Ages, stressing the growth of scientific ideas, the cultural context in which they take shape, and their relationship to other movements of thought in the history of civilization.

HIST 312 Science in Civilization: Science in Modern Society (5) I&S Explores the scientific revolution of the seventeenth century, the development of methodology, and the emergence of new fields of interest and new modes of thought.

HIST 313 Science in Civilization: Physics and Astrophysics Since 1850 (5) I&S Explores the scientific revolution of the seventeenth century, the development of methodology, and the emergence of new fields of interest and new modes of thought.

HIST 315 History of Technology to 1940 (5) I&S Explores the social and historical contexts from the medieval foundations of metal working, its social consequences and the establishment of a class of engineers practitioners, to the transformation of American rural life, domestic technology, and industry before World War II.

HIST 345 War and Society (5) I&S Explores the techniques of war from the Renaissance to the present with consideration of the social, political, and economic consequences of war in the Western world.

HIST 346 Images of War in History, Literature, and Media (5) I&S Explores images of war from ancient to modern times. Examines war from the perspectives of war adopted by various observers to see what motivates their representations. Focuses on different periods in which media shape images of war and the effect of this shaping on human consciousness.

HIST 361 Middle Eastern History, 1453-1800 (5) I&S Explores the early modern period in the Middle East, including an exploration of the political, economic, and cultural dominance of the Ottoman Empire and Safavid Iran. Explores the political and social dynamics and economic transformations of the two empires. Offered: A.

HIST 369 The Jewish Twentieth Century in Film (5) I&S Explores twentieth-century Jewish history in its European, American, and Middle Eastern contexts by examining films produced in these settings. Considers central events that shaped modern Jewish culture: the changing geography of Europe and the Middle East, mass migrations, the Holocaust, shifting meanings of race, culture, and religion. Offered: jointly with SISJE 369.

HIST 388 Colloquium: Introduction to History (5, max. 10) I&S Explores the discipline of history for new or prospective majors. Emphasizes the basic skills of reading, analysis, and communication (both verbal and written) that are central to the historian's craft. Each seminar discusses a different subject or problem.

HIST 390 Colloquium in History and Science (5) I&S Explores the history of science to bridge the gap between the natural sciences and the humanities. Students should have a strong background both in history and in a natural science.

HIST 395 Modern Historical Writing, Honors Seminar (5) I&S Explores new types of problems examined by historians and new techniques that have evolved for solution. Brief historiographical introduction, reaching back to the "scientific" historians of the mid-nineteenth century, then continues by examining the impact on historians of new disciplines such as psychology, sociology, and economics, and of new techniques such as statistics and prosopography. Readings are in the theorists and in those who followed their lead. Admission by departmental invitation only.

HIST 399 Advanced Foreign Study (3-5, max. 15) I&S Explores the history of Southern Africa from pre-colonial to the post-colonial present. Focuses on political, economic, and social change and continuity. Emphasis on understanding how various historical actors and historians have interpreted these processes.

HIST 420 The Olympics: The Merging of Old and New in Modern Greece (5) I&S Explores the role of the Olympic games in the history and culture of Greece, from Bronze Age pre-Olympia to the 2004 Athens Games. Topics include mythical and historical origins of the Olympics, moral principles and practices in Greek sports, and modern Olympic games. Offered: jointly with EURO 420.

HIST 449 Issues in Comparative Labor History (5) I&S Explores the role of labor in the modern world. Emphasis on the centrality of workers' struggles in the evolution of national societies on the conceptual, research, and expository strategies of contemporary students of the labor movement and on differences and relationships between labor in developed and underdeveloped countries.

HIST 451 Eastern and Central Africa Since 1500 (5) I&S Explores the history of Eastern and Central Africa from the period prior to the slave trade through European colonization to the post-colonial present. Focuses on political, economic, and social change and continuity. Emphasis on understanding how various historical actors and historians have interpreted these processes.

HIST 452 Southern Africa Since 1500 (5) I&S Explores the history of Southern Africa from pre-colonial social institutions through European
colonialism and industrialization to the post-apartheid present. Focuses on the interplay between race, class, ethnicity, and gender in the structuring of political relations. Emphasizes on understanding how various historical actors and historians have interpreted these processes.

HIST 457 Topics in Labor Research (5, max. 10) I&S Analysis of the post-World War II decline of national labor movements and strategies employed to reverse this trend. Requires a major research project on organizing, bargaining, or another question in labor studies. Prerequisite: either POL S 249, HIST 249, or SOC 266. Offered: jointly with POL S 457.

HIST 461 History of the Middle East: 622-1300 (5) I&S Political and economic analysis of the period circa AD 600, preliminary to rise of Islam, to arrival of the Turks. Muhammad’s teaching and impact; Islamization and Arabization.

HIST 462 History of the Middle East: 1258-1798 (5) I&S Conquests by successors of Genghis Khan; creation in Egypt, Syria, and Iran of cavalry-based states; domination of political, social, and economic history by Ottoman and Safavid empires. The Napoleonic invasion.

HIST 463 History of the Middle East Since 1798 (5) I&S Critical issues and themes in the changing Middle East, including Westernization, growth of nationalism, Arab-Israeli dispute, Iranian revolution, and the role of Islam.

HIST 467 Nations and States in the Modern World (5) I&S Development of national consciousness in the “old nations” of Europe before the French Revolution. Replacement by new nationalism, spreading into East Central Europe, Russia, Ibero-America, Asia, and Africa. Offered: jointly with SIS 467.

HIST 474 Special Topics in History for Teachers (1-10, max. 10) I&S Credit/no credit only.

HIST 481 Economic History of Europe (5) I&S Origins of the modern European economy; historical analysis of economic change and growth from medieval times that stresses the preconditions and consequences of industrialization. Recommended: ECON 201. Offered: jointly with ECON 460.

HIST 485 Comparative Colonialism (5) I&S Rafael Explores the historic roots and practices of colonialism throughout the world, focusing on the roles of nationalism, cosmopolitanism, and imperial domination. Treats colonialism as a world event whose effects continue to be felt and whose power needs to be addressed. Offered: S.

HIST 490 Topics in History (5, max. 10) I&S Examines special topics in history.

HIST 491 Honors Historical Method (5-) I&S The purposes, materials, and techniques of historical scholarship. Theory, practice, and criticism. For honors students.

HIST 492 Honors Historical Method (5-) I&S The purposes, materials, and techniques of historical scholarship. Theory, practice, and criticism. For honors students.

HIST 493 Senior Thesis in the History of Science (5, max. 10) I&S Preparation of the senior thesis for the History and Science emphasis.

HIST 494 Colloquium in Historiography (5, max. 15) I&S Advanced seminar examining central issues in historiography. Emphasizes reading, discussion, and writing.

HIST 495 History Internship (1-5, max. 10) Off-campus independent fieldwork with a community agency in an apprenticeship or internship situation. Work to be jointly supervised by a member of the History Department and an on-site field supervisor.

HIST 498 Colloquium in History (5, max. 15) I&S Each seminar examines a different subject or problem. A quarterly list of the seminars and their instructors is available in the Department of History undergraduate advising office.

HIST 499 Undergraduate Research (1-5, max. 15).

HIST 501 Ancient Greece and Rome: Writings and Interpretations (3-6, max. 6) Study of historians, development of historical study as a distinct pursuit, focus of attention in historical scholarship in the ancient world and comparison with modern interpretation of antiquity.

HIST 502 Medieval Europe: Writings and Interpretations (3-6, max. 6) Study of historians, schools of history, and interpretations of medieval European history.

HIST 503 Modern Europe: Writings and Interpretations (3-6, max. 6) Study of historians, schools of history, and interpretations of modern European history.

HIST 504 Comparative Ethnicity and Nationalism (5) Theoretical approaches to, and historical case studies of, the phenomena of ethnicity, nationalism, and ethnic conflict in the modern world. Emphasis on Europe and Asia.

HIST 511 History of Science (3-6, max. 6).

HIST 512 Seminar in the History of Science (3-6, max. 6).

HIST 513 Seminar in the History of Science (3-6, max. 6).

HIST 514 Seminar in the History of Science (3-6, max. 6).

HIST 515 Field Course in the History of Technology (5) Introduces students to the literature, methodology, and problems of the history of technology, and prepares them for independent study in the field.

HIST 530 Comparative Colonialisms: Methodological and Conceptual Approaches (5) Introduces students to the historiography of modern European/American colonialisms, focusing on Africa, Asia, and/or the Americas. Addresses methodological and conceptual issues by examining relationship between capitalism and colonialism; violence and routinization of colonial power; colonial categories of race, ethnicity, class, and gender; and resistance movements and nationalist politics.

HIST 552 Field Course in African History (5) Methodological and conceptual issues in African historiography; focusing on 1500 to the present. Examines topics including pre-colonial politics and economics, slavery and the slave trades, European conquest and colonization, resistance movements and nationalist politics, and post-colonial debates and dilemmas. Special attention to issues of gender, race, ethnicity, and class.

HIST 561 Islamic History (3-6, max. 6) Field course. Introduction to advanced study in the major periods and problems of Islam. Bibliographical guidance is stressed.

HIST 562 Ottoman History (3-6, max. 6) Field course. Introduction to the major periods and problems of Ottoman history, 1300-1914, by acquainting the student with the major works in at least two languages. An attempt is made to teach some use of Ottoman materials. A minor problem is investigated in detail by every student. Prerequisite: knowledge of at least one major language besides English (French, German, Russian, or other).

HIST 563 Modern Near East (3-6, max. 6) Field course introducing the student to the major periods and problems of Near Eastern history, 1798 to the present.

HIST 570 Topics in Teaching History (3) Topics include active learning, teaching writing, assessment, and course design. Designed for history graduate students working or planning to work as TAs or instructors. Students produce a teaching portfolio and conduct peer observations. Credit/no credit only.

HIST 571 Orientation to an Academic Career in History (3) Course for prospective college and university history instructors, preparing them for the nonacademic aspects of their duties. Prerequisite: Master of Arts degree in history or permission of instructor.

HIST 580 Gender and History (5) Introduction to gender as category of historical analysis, examining the impact of feminist theory within the discipline of history. Course traces historiographical debates in women’s and gender history and explores, through cross-cultural comparisons, how scholars have conceived the relationship between gender and categories such as class, race, ethnicity, and sexuality.

HIST 590 Topics in History (5, max. 15) Seminar on selected topics in general history, with special emphasis on preparation for field examinations. Topics vary according to interests of students and instructor.

HIST 595 Historical Practices (5) Emphasizes the interrelatedness of theoretical issues and historical research. Students read works that encourage the rethinking of sources and their historical meaning and experiment with sources, methods, and questions in a set of practical assignments.

HIST 598 Methods of Historical Research (5) Exploration of new historical and scholarly techniques employed in historical research. Use of social science methodology and literary theory in the evaluation and interpretation of historical sources. Use of feminist theory, deconstruction, critical theory, and orality/literacy studies. Student research paper is based upon a chosen theoretical approach.

HIST 600 Independent Study or Research (*)

HIST 700 Master’s Thesis (*)

HIST 800 Doctoral Dissertation (*)

356
History of Asia

HSTAS 200 South Asian History, Pre-History to the Present (5) I&S Explores history of the modern nations of India, Pakistan, Bangladesh, Sri Lanka, Nepal, Bhutan, Afghanistan, and the Maldives from pre-history to the present. Addresses development of religious systems, arrival of Islam, relations between religious and ethnic communities, and creation of states and empires in South Asia.

HSTAS 201 Ancient Indian Civilization (5) I&S Religions, literature, philosophy, politics, arts, and history of India from earliest times to the Mughal empire.

HSTAS 202 Modern Indian Civilization (5) I&S The Islamic impact, British conquest, and contemporary India. Emphasis on the rise of nationalism, social organization, and contemporary life and history.

HSTAS 211 History of Chinese Civilization (5) I&S Intensive survey of Chinese civilization from earliest times to today. Introduces all students, including East Asian history majors, to the general sweep of Chinese history. Social, cultural, and intellectual developments.

HSTAS 212 History of Korean Civilization (5) I&S From earliest times to the present. Development of Korean society and culture in terms of government organization, social and economic change, literature, and art. Offered: jointly with SISEA 212.

HSTAS 221 History of Southeast Asia (5) I&S Surveys Southeast Asian civilizations at the outset of Western colonial rule; the colonial impact on the traditional societies of Burma, Thailand, Cambodia, Laos, Vietnam, Malaysia, Indonesia, and the Philippines; nineteenth- and twentieth-century nationalist and revolutionary movements; emergence of Southeast Asia as a region in the modern world. Offered: jointly with SISSE 221.

HSTAS 241 Japanese Civilization (5) I&S Japan's civilization, including its origins, government, literature, economic institutions, material culture, social organization, and religions, in relation to the development of Japan as a society and nation. Cannot be taken for credit if SISEA 341 previously taken. Offered: jointly with SISEA 241.

HSTAS 244 Imperialism and Anti-Colonialism in Asia (5) I&S Introduction to Western imperialism expansion, conquest, and colonial rule in Asia; the anti-colonial, nationalist resistances they engendered; and the resultant cultural, political, economic, and intellectual transformations in Asian societies. Covers post-1800 violence, racial hierarchies, human rights abuses, post-colonial memories, persistent strategies of domination, and structural inequities. Offered: jointly with SISA 244.

HSTAS 245 Human Rights in Asia (5) I&S Callahman, Giellel Introduction to recent and ongoing human rights issues in South, Southeast, and East Asia. Focuses on how human rights politics have played out in domestic political arenas. Provides exposure to views/insights into the historical context in which human rights claims, abuses, and debates arise. Offered: jointly with SISA 245.

HSTAS 265 The Viet Nam Wars (5) I&S Giellel Recent Vietnamese history and struggles for independence and national unification vis-a-vis French colonialism, Japanese occupation, American intervention, and internal divisions. Covers historical roots and contemporary contexts of revolution and war, objectives and motivations of participants, and the enormous human costs. Emphasizes socio-cultural changes and wars' legacies. Offered: jointly with SISEA 265.

HSTAS 290 Topics in Asian History (5, max. 10) I&S Examines special topics in Asian history.

HSTAS 340 Alternative Routes to Modernity (5) I&S Routes to modernity followed by non-Western societies between 1800 and 1900. Historical experiences of non-Western societies seen in the contexts of European history and of development theory. Primary sources and techniques for posing theoretical questions of historical data. Offered: jointly with SIS 348.

HSTAS 401 History of Ancient India (5) I&S India in ancient times; emphasis on forms of political organizations and economic life, social organizations, and cultural developments.

HSTAS 402 History of Medieval and Mughal India (5) I&S Medieval India; emphasis on forms of political organizations and economic life, social organizations, and cultural developments.

HSTAS 403 History of Modern India to 1900 (5) I&S Modern India; emphasis on forms of political organizations and economic life, social organizations, and cultural developments.

HSTAS 404 History of Twentieth-Century India (5) I&S Analysis of the problems in the fields of social life, international and domestic politics, education, economics, and other areas that confront India today.

HSTAS 423 History of Modern Japan (5) I&S The making of modern Japan; World War II and surrender; American occupation; postoccupation rebuilding; emergence as an industrial power. Recommended: HSTAS 423 or SISEA 423. Offered: jointly with SISEA 440.

HSTAS 441 Economic and Social History of Japan to 1900 (5) I&S Lecture-seminar on Japanese economic and social history from 700 to 1900. Analyses of the rise and decline of the shoen system, the rise of commerce, social change, changes in the living standard, demographic changes, and the early phases of industrialization. Political and cultural developments as related to economic and social change. Prerequisite: either SISEA 241/HSTAS 241 or SISEA 341/HSTAS 341. Offered: jointly with SISEA 441.

HSTAS 452 Chinese History from Earliest Times to 1276 (5) I&S Traces the development of Chinese civilization from earliest times through the Song dynasty. Examines social, cultural, political, and economic history.

HSTAS 453 Chinese History: AD 906 to 1840 (5) I&S Political, social, economic, and intellectual history form the time of the Mongol conquest of China to the Sino-Japanese war. Focus on the evolution of the late imperial Chinese state and the “early modern” era in China.

HSTAS 454 History of Modern China (5) I&S Social, cultural, political, economic, and intellectual transformations and continuities in China from the end of the imperial period to the present. Offered: jointly with SISEA 454.

HSTAS 457 Women in China to 1800 (5) I&S Gender in Chinese culture, women's situations in the patrilineal family system, and the ways women's situations changed as other dimensions of China's political system, economy, and culture changed from early times through the nineteenth century. Offered: jointly with WOMEN 457.

HSTAS 459 Gender Histories of Modern China, 18th to 20th Centuries (5) I&S Emergence of modernist social, political, intellectual gender formations in social activism, revolutionary writing, scientific ideologies, economic globalization. Focuses gender difference in colonial modernity, revolutionary movement, communism, post-socialist market society. Relates modern Chinese women to global flows, new division of labor, local and regional experience. Offered: jointly with WOMEN 459.

HSTAS 460 Cities in China: Past and Present (5) I&S Economic, political, social, and cultural functions of the city in modern Chinese history. Changes in China's urban system. The city as cultural center and focus of literary and cinematic representation. Attention to architecture, commerce, urbanization, the role of capital cities in the power of the state. Offered: jointly with SISEA 460.

HSTAS 462 Southeast Asian History to 1800 (5) I&S Absorption and modification of cultures (Indian and Chinese), religions (Islam, Buddhism, Catholicism), and peoples (northern European) by island- and mainland-Southeast Asians. Main themes are cultural contact and the growth of states and peoples.

HSTAS 463 Southeast Asian History from 1800 to the Present (5) I&S Post-eighteenth-century history of the present countries of Burma, Thailand, Cambodia, Laos, Vietnam, Malaysia, Singapore, Brunei, Indonesia, and the Philippines. Deals with colonial rule, emerging nationalism, and political independence. Investigates broad themes of social, economic, and cultural history.

HSTAS 466 Islam, Mysticism, Politics and Performance in Indonesian Culture (5) VLPA/ I&S Examines how modern Indonesian music and dance evolved as a result of the colonial conquest and imperial rule of the Dutch East India Company. Focuses on the process of cultural appropriation and the construction of national identity. Offered: jointly with SISEA 446.
HSTAS 481 History of Traditional Korea: Earliest Times to the Nineteenth Century (5) I&S Korean history from earliest times to the modern period.

HSTAS 482 History of Modern Korea: 1860 to the Present (5) I&S Traditional institutions and social thought; Japanese colonial rule; liberation of the Korean War; early Korean communist movement, and North Korea and South Korea since 1945.

HSTAS 490 Topics in Asian History (5, max. 10) I&S

HSTAS 501 Indian History (3-6, max. 6) Prerequisite: permission of instructor.

HSTAS 502 Seminar: History of India (3-6, max. 12) Seminar on selected topics and problems in the history of medieval and modern India. Prerequisite: HSTAS 501 and permission of instructor.

HSTAS 503 Seminar: History of India (3-6, max. 12) Seminar on selected topics and problems in the history of medieval and modern India. Prerequisite: HSTAS 501 and permission of instructor.

HSTAS 520 Premodern Japanese History (5) Field courses in Japanese history prior to 1868. Prerequisite: HSTAS 421 and HSTAS 422, or SISEA 441 and SISEA 541, or permission of instructor.

HSTAS 521 Modern Japanese History (3-6, max. 6) Field course. Prerequisite: HSTAS 422, HSTAS 423, or permission of instructor.

HSTAS 530 Field Course in Southeast Asian History (5) Introduction to major English-language works on Southeast Asian history and to the major historiographical issues of the era.

HSTAS 532 Seminar in Southeast Asian History (5) Selected topics in Southeast Asian history and historiography. Preparation for theses and doctoral dissertations on Southeast Asian history.

HSTAS 541 Economic and Social History of Japan to 1900 (5) Analyses of landholding systems, the rise of commerce, demographic change, early industrialization, and social change. Prerequisite: previous course work in Japanese history or economic history, or permission of instructor. Not open to students who have taken HSTAS 441. Offered: jointly with SISEA 541.

HSTAS 546 Gender and Colonialism in Eastern Asia (5) Economic-political colonialization, post-colonialism, and statism. Gendered citizenship; intra-Asian subimperialism; gendered subjectivities; humanism and the New Woman; modern conflicts over new masculinity and new femininity, and the effect of war, imperialist occupation and colonial modernity on interregional flows of ideas, labor, capital, and jurisprudence. Offered: jointly with WOMEN 546; AWRSpS.

HSTAS 547 Gender and the New International Division of Labor in Asia Pacific (5) Shift of the dynamic relation of gender, state, and citizens from modernization (national development) to globalization (intraregional development) strategies in Pacific Asia, 1945 to present. Consumption, service provision, migratory labor, intra-Asian investment, localization. Offered: jointly with WOMEN 547.

HSTAS 551 Field Course in Chinese History: Pre-Sung Period (3-6, max. 6) Ebrey Introduction to the English-language literature on Chinese history through the Song dynasty. Recommended: HSTAS 452 or equivalent.

HSTAS 552 Seminar in Chinese History: Earliest Times to 1276 ([3-6, max. 12]) Ebrey Methods and materials for research in early imperial Chinese history. Prerequisite: reading knowledge of classical Chinese. Recommended: HSTAS 452, HSTAS 550, or HSTAS 551, or equivalent.

HSTAS 553 Seminar in Chinese History: Earliest Times to 1276 ([3-6, max. 12]) Ebrey Methods and materials for research in early imperial Chinese history. Prerequisite: reading knowledge of classical Chinese. Recommended: HSTAS 452, HSTAS 550, or HSTAS 551, or equivalent.

HSTAS 554 Seminar in Chinese History: Earliest Times to 1276 ([3-6, max. 12]) Ebrey Methods and materials for research in early imperial Chinese history. Prerequisite: reading knowledge of classical Chinese. Recommended: HSTAS 452, HSTAS 550, or HSTAS 551, or equivalent.

HSTAS 555 Field Course in Chinese History: 1276-1895 ([3-6, max. 6]) Guy Introduction to the English-language literature on the Yuan, Ming, and Qing dynasties. Recommended: HSTAS 453 or equivalent.

HSTAS 556 Field Course in Chinese History: 1276-1895 ([3-6, max. 6]) Guy Introduction to the English-language literature on the Yuan, Ming, and Qing dynasties. Recommended: HSTAS 453 or equivalent.

HSTAS 561 Seminar in Chinese History: 1268-1895 ([3-6, max. 6]) Guy Materials and methods for research in imperial Chinese history. Prerequisite: reading knowledge of Chinese. Recommended: HSTAS 453, HSTAS 560, HSTAS 561, or equivalent.

HSTAS 562 Seminar in Chinese History: 1268-1895 ([3-6, max. 6]) Guy Materials and methods for research in imperial Chinese history. Prerequisite: reading knowledge of Chinese. Recommended: HSTAS 453, HSTAS 560, HSTAS 561, or equivalent.

HSTAS 563 Seminar in Chinese History: 1268-1895 ([3-6, max. 6]) Guy Materials and methods for research in imperial Chinese history. Prerequisite: reading knowledge of Chinese. Recommended: HSTAS 453, HSTAS 560, HSTAS 561, or equivalent.

HSTAS 564 Seminar in Chinese History: 1268-1895 ([3-6, max. 6]) Guy Materials and methods for research in imperial Chinese history. Prerequisite: reading knowledge of Chinese. Recommended: HSTAS 453, HSTAS 560, HSTAS 561, or equivalent.

HSTAS 567 Seminar in Twentieth Century Chinese History ([3-6, max. 12]) Dong Materials and methods for research in twentieth-century Chinese history. Prerequisite: knowledge of Chinese and permission of instructor.

HSTAS 572 Seminar in Twentieth Century Chinese History ([3-6, max. 12]) Dong Materials and methods for research in twentieth-century Chinese history. Prerequisite: knowledge of Chinese and permission of instructor.

HSTAS 573 Seminar in Twentieth Century Chinese History ([3-6, max. 12]) Dong Materials and methods for research in twentieth-century Chinese history. Prerequisite: knowledge of Chinese and permission of instructor.

HSTAS 574 Seminar in Twentieth Century Chinese History ([3-6, max. 12]) Dong Materials and methods for research in twentieth-century Chinese history. Prerequisite: knowledge of Chinese and permission of instructor.

HSTAS 575 Field Course in Chinese History: Modern Period ([3-6, max. 12]) Research seminar in modern Chinese history. Training in the materials and methods of research, and preparation of extended research papers. Prerequisite: HSTAS 571-572 or permission of instructor and reading knowledge of Chinese.

HSTAS 581 Modern Korean History (3-6, max. 6) Field course. Prerequisite: permission of instructor.

HSTAS 582 Seminar in Korean History ([3-6, max. 6]) Selected topics in Korean history and historiography.

HSTAS 583 Seminar in Korean History ([3-6, max. 6]) Selected topics in Korean history and historiography.

HSTAS 584 Seminar in Korean History ([3-6, max. 6]) Selected topics in Korean history and historiography.

HSTAS 590 Topics in History (5, max. 15) Seminar on selected topics in general history, with special emphasis on preparation for field examinations. Topics vary according to interests of students and instructor.

History of the Americas

HSTAA 101 Survey of the History of the United States (5) I&S Supplies the knowledge of American history that any intelligent and educated American citizen should have. Objective is to make the student aware of his or her heritage of the past and more intelligently conscious of the present.

HSTAA 105 The Peoples of the United States (5) I&S Surveys American diversity since 1500. Repeopling of America through conquest and immigration by Native Americans, Europeans, Africans, Asians, and Latin Americans. Contributions of various peoples and the conflicts between them, with special attention to changing constructions of race and ethnicity and evolving understandings of what it means to be American.

HSTAA 150 Introduction to African-American History (5) I&S Introductory survey of topics and problems in Afro-American history with some attention to Africa as well as to America. Provides some general knowledge and serves as a basic introductory course for a sequence of lecture courses and seminars in Afro-American history. Offered: jointly with AFRM 150.

HSTAA 185 Introduction to Latin American History: From Columbus to Castro (5) I&S Survey of political, economic, and social history of Latin America from the Iberian conquest to the present. Lectures, discussions, and films focus on developing understanding of Latin America’s current problems through study of their historical roots. Designed for the beginning student and the nonspecialist.

HSTAA 202 Makers of American Foreign Policy, 1776 to the Present (5) I&S Survey of the history of American foreign relations. Focus on the individuals responsible for initiating new foreign policies or for realigning old ones.

HSTAA 205 Asian American History (5) I&S Introductory history of Asian Indians, Chinese, Filipinos, Japanese and Koreans in the United States from the 1840s to the 1960s. Major themes include imperialism, labor migration, racism, community formation, and resistance.
HSTAA 212 The Military History of the United States From Colonial Times to the Present (5) I&S Development of American military policies, organizational patterns, tactics, and weaponry, from beginnings as a seventeenth-century frontier defense force to the global conflicts and military commitments of the twentieth century. Interaction between need for an effective military force and concept of civilian control of that force.

HSTAA 215 American South from the Revolution through the Civil War (5) I&S Kleit Explores the history of the American South from the American Revolution through the Civil War, from a successful revolution to one that met defeat. Attention given to the diversity of people and changes over space and time. Offered: Sp.

HSTAA 221 Environmental History of the U.S. (5) I&S Survey of the relationship between nature and human history, including the impact of the non-human environment on American history and the environmental effects of colonization, urbanization, and consumerism; the cultural construction of nature in different eras and its social implications; the sources and limits of modern environmental politics.

HSTAA 225 American Slavery (5) I&S Explores the making of American slavery from beginnings on the African coast to the plantations of the southern United States. Includes slave life, proslavery thought, slave management, representations of slavery then and now, abolitionism, and debates about slavery.

HSTAA 230 Race and Power in America, 1861-1940 (5) I&S Explores race and the shaping of American society between the Civil War and World War II. Topics include reconstruction, segregation and lynching, immigration and naturalization, imperialism, and movements for social justice.

HSTAA 235 The American People and Their Culture in the Modern Era: A History of the United States Since 1940 (5) I&S Through study of documents, personal testimony, and other sources, materials, through written reports on historical problems, and through discussions, lectures, films, and audiovisual presentations, students are encouraged to examine evidence and to think "historically" about persons, events, and movements within the memory of their own generation and that immediately preceding theirs. Primarily for first-year students.

HSTAA 270 The Jazz Age (5) I&S Interdisciplinary study of period after World War I to Great Crash. Afro-American and Anglo-American currents and impulses that flowed together in the Roaring Twenties. Covers politics of normalcy, economics of margin, literature of twentieth-century disillusionment and confusion, transformation of race relations, and cultural influence of jazz. Offered: jointly with AFRAM 270.

HSTAA 273 Women of the American West (5) I&S Women of the Trans-Mississippi West, from the time of European contact to World War II, studied in all their multifarious roles. Explores ethnicity, class, work, family, suffrage, politics, reform, women's groups, arts and entertainment, religion, civilizing and resistance, and gender ideology.

HSTAA 282 Social History of Mexico (5) I&S Overview of Mexican history from late Aztec times until the twenty-first century. Emphasizes how women, campesinos, indigenous populations, free and enslaved Afro-Mexicans, and the urban poor experienced the past, challenged colonial and post-colonial rule, and shaped modern Mexican society and culture.

HSTAA 283 History of the Chicano People to 1848 (5) I&S Historical survey of the Chicano people from pre-Hispanic times to the war between the United States and Mexico. Offered: jointly with CHSTU 180.

HSTAA 284 History of the Chicano People Since 1848 (5) I&S Historical survey of the Chicano people since the war between the United States and Mexico.

HSTAA 285 Latin American History Through Film (5) I&S/VLPA Critical analysis of Latin American films as historical documents. Subjects include Iberian conquest and colonialism, the struggle for independence in the nineteenth century, social revolutions of the twentieth century, and problems of contemporary development. Readings and lectures place each film in the context of the historiography of the subject matter.

HSTAA 290 Topics in American History (5, max. 10) I&S Examines special topics in American history.

HSTAA 301 Foundations of American Civilization (5) I&S Early America from the sixteenth century to the end of the American Revolution: the founding years, social and religious development, race relations, development of the Atlantic world, origins and legacy of American independence.

HSTAA 302 American Civilization: The First Century of Independence (5) I&S Establishment of the constitutional system; national expansion; intellectual and cultural development; internal conflicts, the Civil War, and Reconstruction.

HSTAA 303 Modern American Civilization From 1877 (5) I&S Emergence of modern America, after the Civil War; interrelationships of economic, social, political, and intellectual developments.

HSTAA 313 African Americans in the American West (5) I&S Explores pre-1848 Spanish-speaking black settlers, slavery, post-civil war migration, buffalo soldiers. 19th and 20th century black urban settlers, World War II migration, the civil rights movement in the West, the interaction of African Americans with other people of color. Particular focus on Seattle and the Pacific Northwest.

HSTAA 316 History of Science in the United States, 1654-1885 (5) I&S History of science in the United States, from the time of European contact to World War II, studied in all their multifarious roles. Explores the history of science in the United States, including migration of European science, development in colonial America, growth of an American scientific community, and expansion of American science in the twentieth century. Issues of scientific attitudes to the natural world, race, ethnicity, and gender are included.

HSTAA 321 Becoming Black Americans (5) I&S History of Africans in America from slave trade through the Civil War, with emphasis on how gender informed African-American experience. Topics include slave trade, middle passage, life in plantation south, culture, family structure and resistance, and the experience of free blacks, North and South.

HSTAA 322 African-American History, 1865 To The Present (5) I&S African-American experience from Reconstruction to the present, emphasizing the variety of African-American political expression. Gender and class differences closely examined, as well as such constructs as “community,” “race,” and “blackness.”

HSTAA 331 African American History I: European Discovery to 1840 (5) I&S Harmon History of Indigenous peoples and their descendants in the area that now constitutes the United States, from the eve of European discovery of the Americas to 1840. Emphasis on relations between Indigenous peoples and immigrants. Offered jointly with AIS 331.

HSTAA 332 African American History II: 1840 to Present (5) I&S Harmon History of African Americans in the United States from 1840 to the present. Emphasis on relations between African-Americans and non-Indians, government policies, and Indian strategies of survival. Offered jointly with AIS 332.

HSTAA 334 The Sixties in America: Conflict, Confrontation, and Concession (5) I&S Politico-cultural movements that collided in the sixties. Includes politics of confrontation and civil disobedience, economics of “guns and butter,” literature of conflict and angst, polarization of arts, transformation of race relations, role of Rock, and influence of domestic politics on foreign relations. Recommended: AFRAM 150; AFRAM 270. Offered: jointly with AFRAM 334.

HSTAA 335 American Jewish Community 1654-1885 (5) I&S.

HSTAA 336 American Jewish History Since 1885 (5) I&S Political, social, economic, religious history of American Jewish community from great eastern European migration to present. Integration of immigrant community into general American community; rise of nationalism; development of American socialism; World War I and II; and reactions of American Jews to these events. Offered: jointly with SIS/JE 336.

HSTAA 338 The United States and Vietnam (5) I&S American involvement in Vietnam, including: the complex of negotiations; strategies and objectives of both sides; military, political, and economic operations of the United States; efforts at pacification; impact of Vietnam on American affairs.

HSTAA 353 Class and Labor in American History (5) I&S The history of workers and class formation form early industrialization to the present. Emphasizes the interaction of class with race, ethnicity, gender, and political culture within the context of American economic development. Explores the role of unions, labor politics, and radical movements.

HSTAA 365 The History of the American Film (5) I&S/VLPA Explores the development of film and American social and cultural history. Considers films as products of specific periods, individual filmmakers, and developments within film industry. Examines representations of political and social issues on the screen, impact of movies on our understanding of the past, and significance of genres and visual styles.
HSTAA 370 Consumer Culture in Twentieth Century America (5) I&S Studies the American attempt in this century to create, sustain, and organize the world’s first consumer-oriented industrial society. Topics to be considered include: the economy of mass consumption, how a culture of consumption was created, and the ideas of social critics who have rejected consumerism.

HSTAA 371 Consumption and Consumerism in the Modern U.S. (5) I&S Nash Surveys the rise of consumer society in the late-nineteenth- and twentieth-century United States including theories of consumption, the experience of consumer culture by different social groups, the role of the state in fostering consumption, the material impacts of consumer society in the U.S. and beyond, and critiques of consumerism. Offered: Sp.

HSTAA 373 Social History of American Women to 1890 (5) I&S Yee A multi-racial, multicultural study of women in the United States from the 17th century to 1890 emphasizing women’s participation in the paid labor force, charitable and reform activities, and 19th century social movements. Uses primary materials such as diaries, letters, speeches, and artifacts. Offered: jointly with WOMEN 383; W.

HSTAA 374 Social History of American Women in the 20th Century (5) I&S Analyzes major themes in the history of women in North America from 1890 through the 1990s. Themes include family and community formation, social activism, education, paid and unpaid labor patterns, war, migration, and changing conceptions of womanhood and femininity in the 20th century. Offered: jointly with WOMEN 384.

HSTAA 377 History of Canada (5) I&S General survey and analysis of political, economic, social, and cultural aspects of Canadian history from the foundation of New France to present; Canadian-American relations, the rise of Quebec nationalism, and the development of the Canadian West. Offered: jointly with SISCA 377.

HSTAA 384 Latin America: Inter-American and Intra-Continental Relations (5) I&S Inter-American relations, focusing on the United States’ diplomatic and military responses to the problems of Latin America since 1776. Intra-Latin American relations and regional organizations (e.g., the Organization of American States).

HSTAA 385 Colonial Society and the Negotiation of Rule in Latin America and the Caribbean (5) I&S Examines the transition to Spanish and Portuguese rule in Latin America and the establishment, and eventual demise, of colonial systems linking Latin America to Europe and Africa. Examines “colonized” groups and their role in the development of colonial political culture.

HSTAA 386 The Challenges of Post-Coloniality in Latin America and the Caribbean (5) I&S Explores the legacies of, and ruptures from, colonialism and the new challenges Latin American and Caribbean peoples faced throughout the years after their struggles for independence from direct European rule. Emphasis on analysis of the negotiations and challenges entailed in the dynamic processes of national state formation in comparative perspective.

HSTAA 401 American Revolution and Confederation (5) I&S Causes of separation of the United States from the British empire; political theory of the Revolution; its military history; diplomacy of the Revolution; the Revolution as a social movement; intellectual aspects; readjustment after independence; the formation of the American union; the Constitution.

HSTAA 404 New England: From the Foundings to the Civil War (5) I&S New England from colonial beginnings to the region’s emergence to national leadership in the mid-nineteenth century. Emphasis on Puritanism, the New England town, adjustment to empire, revolution and constitution making, the growth of party, abolitionism, the flowering of a regional culture, and the personalities who embodied these key themes and periods.

HSTAA 406 Asian American Activism (5) I&S Explores the multiple political traditions forged by Asian Americans, from the earliest challenges to racial laws and unequal wages to the latest debates over affirmative action and racial profiling. Examines Asian American communities organized to oppose and to perpetuate social inequalities. Offered: jointly with AAS 406.

HSTAA 407 Andrew Jackson’s United States (5) I&S In-depth examination of the U.S. from 1820 to 1850, including changes which affected American politics, society, and culture.

HSTAA 409 American Social History: The Early Years (5) I&S Survey of American society and institutions from the colonial era through the Civil War, with special attention to reform, labor, immigration, education, law enforcement and the city.

HSTAA 410 American Social History: The Modern Era (5) I&S Survey of American society and institutions from Reconstruction to the present with special attention to reform, poverty, social mobility, immigrant and ethnic groups, the city and law enforcement.

HSTAA 411 The United States During the Era of Civil War and Reconstruction (5) I&S Conflicting interests, ideologies, and ways of life in the United States from the 1840s to the 1870s.

HSTAA 412 The Westward Movement, 1700-1850 (5) I&S Anglo-American advance into interior of continental United States culminating in occupation of Far West. Rivalry with New France and New Spain in colonial period; role of federal government in westward expansion; land policy and land distribution; migration, settlement, and the pioneering experience; federal Indian policies and implementation; political evolution, urbanization, and economic development of trans-Appalachian West; shaping of national character and institutions.

HSTAA 413 History of the Trans-Mississippi West (5) I&S Anglo-American exploration, conquest, occupation, and exploitation of the trans-Mississippi West, with emphasis on economic development into the twentieth century. Considers wide range of developmental themes (social, political, cultural) in historiography of American West.

HSTAA 414 The Canadian West, 1670-1990 (5) I&S Examines the history of colonization and settlement of Canada’s four westernmost provinces with emphasis on their economic, social, and Native history.

HSTAA 415 History of Indian-White Relations in Anglo-America (5) I&S Explores the wide variety of interactions in North America, ranging from close alliances to outright warfare, between Native Americans and Europeans and their descendants from contact through the removal of most of the remaining eastern Indians to land west of the Mississippi River during the 1830s.

HSTAA 417 Indians in Western Washington History (3) I&S Harmon Relations of Indians and non-Indians in the Puget Sound region, 1790s to the present, with emphasis on evolving ideas about Indian identity. Offered: jointly with AIS 425.

HSTAA 431 American Politics and Society Since 1920 (5) I&S Political, social, economic, and intellectual developments in the United States from 1920 to the present.

HSTAA 432 History of Washington and the Pacific Northwest (5) I&S Exploration and settlement; economic development; growth of government and social institutions; statehood.

HSTAA 446 American Indian Economic History (5) I&S Harmon Survey and analyzes the history of American Indians’ economic challenges and strategies. Topics include the economic cultures of Indigenous North American societies, the impacts of European colonization and U.S. government policies, and tribal strategies aimed at improving Indians’ economic circumstances. Offered: jointly with AIS 446.

HSTAA 454 The Intellectual History of the United States (5) I&S/VLPA Lectures and discussions devoted to the development of the American mind, from historical beginnings to the present.

HSTAA 462 Diplomatic History of the United States, 1901-Present (5) I&S Foreign policy of the United States government since the twentieth century. International wars and the other major episodes in diplomacy are emphasized.

HSTAA 473 Homefront: American Cultures and Society in the 1940s (5) I&S An exploration of the impact of WWII on American culture and social thought. Topics include the effects of war on civil liberties and civil rights, the uses of nationalism, patriotism, and racial ideology, the internment of Japanese-Americans, responses to the Holocaust, and the effects of war on social life.

HSTAA 480 Labor and Popular Movements in Latin America (5) I&S Interdisciplinary approach to origins and trajectory of labor movement from late nineteenth century to present. Emphasis in contemporary period on popular movements, including neighborhood associations, religious base communities, women’s movement, and ethnic mobilization for democratic social and political reform. Recommended: two non-English-language Latin American studies courses.

HSTAA 481 History of Peru and the Andean Region (5) I&S Traces the history of Peru specifically and the Andean highlands generally, from Inca times to the present, examining the shifting relationship between peasants,
indigenous peoples, and the state. Analyzes historically why modern forms of peasant and indigenous political power differ radically between Peru, Bolivia, and Ecuador.

HSTAA 482 The History of Brazil: Colonial Period to the Present (5) I&S Colonial foundations; the first and second empires; the old and new republics; current problems; prospects for the future.

HSTAA 487 History of Mexico: 1822 to the Present (5) I&S Political, social, and economic history of Mexico from its independence from Spain to the present.

HSTAA 488 History of the Caribbean and Central America (5) I&S Political, social, and economic history of principal countries in the Caribbean and Central America from their discovery to the present.

HSTAA 490 Topics in American History (5) I&S Examines special topics in American history.

HSTAA 501 American History: Early (3-6, max. 6).

HSTAA 503 Seminar in American History: Recent Period (3-6, max. 6).

HSTAA 516 Hispanics of the United States (3-6, max. 12).

HSTAA 517 Field Course in American Indian History (5) Field-reading course. Survey of major problems and literature concerning indigenous peoples of North America and their descendents.

HSTAA 518 Field Course in American Social History Before 1860 (3-6, max. 6) Field course. Survey of major problems and literature in American social history before 1860.

HSTAA 519 Asian American History (5) I&S Introduces students to the field of Asian American history, with an emphasis on historiographical shifts and debates. Includes a broad range of topics and methodologies that often cross disciplinary boundaries.

HSTAA 521 American History: Writings and Interpretations, 1770-1870 (4-6).

HSTAA 522 American History: Writings and Interpretations Since 1870 (4-6).

HSTAA 524 American Social History Before 1860 (3-6, max. 6) Field course. Survey of major problems and literature in American social history before 1860.

HSTAA 525 American Social History After 1860 (3-6, max. 6) Field course. Survey of major problems and literature in American social history after 1860.

HSTAA 531 American History: Twentieth Century (3-6, max. 6).

HSTAA 532 Seminar in American History: Recent Period (3-6, max. 12).

HSTAA 533 Seminar in American History: Recent Period (-3-6, max. 12).

HSTAA 540 African American Urban History: 1700-2000 (5) Examines the growth and evolution of African-American urban communities from the colonial era to the present, with particular emphasis on cities of the West.

HSTAA 549 Culture, Politics, and Power in Nineteenth-Century Black America (5) I&S Camp, inquisitorial procedure; the Faust legend; growth theory, methodology, and principal themes in the field. Readings emphasize the environmental history of North America and the United States.

HSTAA 553 Seminar in American History: Recent Period (3-6, max. 6).

HSTAA 554 American History: Intellectual (3-6, max. 5).

HSTAA 557 Field Course in African-American History Since Reconstruction (5) Comprehensive introduction to the major topics and writings in African-American history from the colonial era to 1900, including the inception of slavery, free Blacks, slave revolts, Black abolition, Blacks in the Civil War and Reconstruction, and the Black female role in the struggle for freedom.

HSTAA 561 History of American Foreign Policy (3-6, max. 6).

HSTAA 562 Seminar in American Diplomatic History (3-6, max. 6).

HSTAA 563 Seminar in American Diplomatic History (3-6, max. 6).

HSTAA 569 Culture, Politics, and Power in Nineteenth-Century Black America (5) I&S Slavery; the first and second empires; the old and new republics; current problems; prospects for the future.

HSTAA 570 American Environmental History (5) I&S Readings in environmental history emphasizing theory, methodology, and principal themes in the field. Readings emphasize the environmental history of North America and the United States.

HSTAA 581 Latin American History: Colonial Period (3-6, max. 6).

HSTAA 582 Latin American History: National Period (3-6, max. 6).

HSTAA 583 Seminar in Latin American History (3-6, max. 12) Problems of historical research in the history of Latin America from colonial beginnings to the present.

HSTAA 584 Seminar in Latin American History (3-6, max. 12) Problems of historical research in the history of Latin America from colonial beginnings to the present.

HSTAA 585 Seminar in Latin American History (3-6, max. 12) Problems of historical research in the history of Latin America from colonial beginnings to the present.

HSTAA 590 Topics in American History (5, max. 18) Seminar on selected topics in American history, with special emphasis on preparation for field examinations. Topics vary according to interests of students and instructor.

Modern European History

HSTEU 205 European Witch Trials (5) I&S Witchcraft and magical beliefs in Europe considered as a problem in intellectual, social, and legal history. Medieval background, systematization of witchcraft theory in fifteenth century; comparison of learned and popular beliefs; mechanisms of witch trials and inquisitorial procedure; the Faust legend; growth of skepticism and decline of witchcraft in seventeenth century.

HSTEU 211 France: A Portrait (5) I&S Thematic approach to the history of France. Abandons the conventional chronological format in favor of a constellation of topics and themes — architecture, science, sex, cities, barricades, etc. — that, taken together and in historical perspective, make up a portrait of France.

HSTEU 220 Introduction to East European Studies (5) I&S Introduction to the history of post-1945 Eastern Europe focusing on political, economic, social, cultural, and diplomatic issues. Countries surveyed include Albania, Bulgaria, Czechoslovakia, Hungary, Poland, Romania, and Yugoslavia. Offered: jointly with EURO 220.

HSTEU 250 Rome (5) I&S/VLPA History of Rome as an historical, intellectual, and artistic world center. Literary and historic documents, visual arts, architecture, film, and opera used to explore the changing paradigms of the Eternal City. In English. Offered: jointly with ART H 250/ITAL 250.

HSTEU 273 Women and Gender in Modern Europe (5) I&S Examines European women’s changing social role and competing views of femininity from the Enlightenment to the end of the cold war. Special focus on the relationship of
gender and politics and on the female body in bourgeois society, industrialization, imperialism, the welfare state, fascism, and the cold war.

HSTEU 274 Twentieth Century Europe (5) I&S Introduction to themes in 20th-century European history (1890s-1900s), including the histories of fascism, world war, communism, decolonization, and the fate of Europe under the European Union.

HSTEU 275 Life in England (5) I&S Social history of England from the Norman conquest to the present, seen through letters, autobiographies, novels, and plays of the time. Life of the ordinary inhabitant-in the village and the manor house.

HSTEU 290 Topics in European History (5, max. 10) I&S Examines special topics in European history.

HSTEU 301 Early Modern European History: 1450-1648 (5) I&S Political, social, economic, and cultural history from the late Renaissance to the Peace of Westphalia.

HSTEU 302 Modern European History: 1648-1815 (5) I&S Political, social, economic, and cultural history from the Peace of Westphalia to the fall of Napoleon.

HSTEU 303 Contemporary European History Since 1815 (5) I&S Political, social, economic, and cultural history from the fall of Napoleon to the present.

HSTEU 304 Cultural History of Renaissance Europe (5) I&S/VLP A Examination of Medicean Florence, late-sixteenth-century France, Elizabethan England, and the baroque courts of the early seventeenth century as cultural centers. Includes analysis of paintings such as Botticelli and Rubens; poets such as Ronsard and Donne; philosophers such as Pico and Montaigne; and playwrights such as Marlowe, Shakespeare and Lope de Vega.

HSTEU 323 France Since 1814 (5) I&S Political, economic, and social history of France since the Congress of Vienna. Special emphasis upon the continuity of the revolutionary tradition.

HSTEU 334 Germany 1871-1989 (5) I&S Society and politics from Germany’s first unification to its reunification; domestic and foreign policy; political, economic, social, and cultural developments; high emphasis on German society’s self-perception and on the variety of interpretations of this period's history. Offered: by different “schools” of historians.

HSTEU 361 Spain and Its Golden Age, 1469-1700 (5) I&S History and culture of Spain and its empire from the late Middle Ages through the seventeenth century.

HSTEU 364 Modern Greece: 1821 to the Present (5) I&S Politics and society of Greece from War of Independence to the present. Emergence and development of the Greek state; Greece in the world wars; civil war and post-war politics; military dictatorship; transition to democracy; recent developments. No prior study of Greece assumed. Offered: jointly with EURO 364.

HSTEU 368 Modern European Jewish History (5) I&S Stein Surveys European Jewish history from the Spanish expulsion (1492) to World War I (1914). Considers diversity of European Jewries and the factors that cohered them. Examines how European Jewries ordered their lives, shaped gender and class norms, and interacted with the societies in which they lived. Offered: jointly with SISJE 368.

HSTEU 376 Modern Irish History (5) I&S Political and social history from 1800 to the present; the Irish Question after the Act of Union; development of Irish nationalism in the Home Rule and Sinn Fein periods; the Irish Free State and Northern Ireland since 1921; current problems in Northern Ireland.

HSTEU 378 The Making of Contemporary France (5) I&S Historical origins and subsequent development of nine contemporary problems and characteristics of French government and politics, economy, and society.

HSTEU 380 History of Scandinavia from 1720 (5) I&S Scandinavian history from the Viking Age to 1720, with an emphasis on the political, social, and economic development of Denmark, Norway, Sweden, Finland, and Iceland from the Middle Ages to the Enlightenment. Offered: jointly with SCAND 380.

HSTEU 381 History of Scandinavia Since 1720 (5) I&S Scandinavian history from the Enlightenment to the Welfare State with emphasis on the political, social, and economic development of the modern Scandinavian nations of Denmark, Norway, Sweden, Finland, and Iceland. Offered: jointly with SCAND 381.

HSTEU 401 The Italian Renaissance: (5) I&S Conditions of Renaissance culture: Italian republics and despots, humanism, the classical ideal of the arts, Machiavellian and the foundations of modern political thought; the end of an era.

HSTEU 402 The Reformation (5) I&S Origins of the disunity of Europe in the crisis of the sixteenth century with emphasis on the relations between religion and politics.

HSTEU 405 European Intellectual History: Eighteenth Century (5) I&S/VLP A Development of the social sciences, moral theory, political theory, and religious thought in eighteenth-century Europe. Rationalism, empiricism, utilitarianism, and the sources of idealism.

HSTEU 406 European Intellectual History: Nineteenth Century (5) I&S/VLP A Selected topics in intellectual history up to 1890. The philosophical consequences of the French Revolution, the development of idealism, conservatism, romanticism, and early socialist theory; positivism, the problems of historicism, new forms of Christian apologetics, utilitarianism in decline, liberalism as philosophy, the early Marx.

HSTEU 407 European Intellectual History: Twentieth Century (5) I&S/VLP A Selected topics in the intellectual history of the late nineteenth and early twentieth centuries. The aftermath of Darwinism, the problems of methodology in modern social science, historicism and moral relativism, irrationalism in philosophy and social theory, revisionism in secular and orthodox religions.

HSTEU 411 Europe: 1814-70 (5) I&S Development of Europe during the age of Metternich, the revolutions of 1848, and the emergence of new national states.

HSTEU 412 Europe in the Age of the Masses: 1870-1914 (5) I&S Impact of population increase and technological change on European society; stresses and strains in European life and outlook.

HSTEU 413 Europe: 1914-45 (5) I&S Politics and society of Europe in the age of the concentration camp.

HSTEU 414 Europe Since 1945 (5) I&S Political, economic, and military developments in Europe under the impact of the Cold War.

HSTEU 415 Europe in the Second World War (5) I&S Inquiry to discover what the war of 1939-45 was about and what it did to more than five hundred million Europeans.

HSTEU 422 The French Revolution and Napoleon: 1789-1815 (5) I&S Transformation of France under the Revolution of 1789; the Reign of Terror and Napoleon; the impact of the revolution and Napoleon upon Europe.

HSTEU 432 Germany: 1914-1945 (5) I&S Politics and society from the collapse of the Bismarckian empire to the collapse of Hitler’s empire.

HSTEU 435 World War I (5) I&S European society on the eve of the war. War experience of the Europeans. Long term consequences of the war on European social, political, and economic institutions. Impact of the war on non-European world. The war in European literature.

HSTEU 440 History of Communism (5) I&S Communism from its origins in the Bolshevik faction of Russian social democracy to the present, treating the development of the ideology, the various communist parties, and the communist states. Recommended: two history or politics of Europe courses. Offered: jointly with SIS 440.

HSTEU 444 Imperial Russia: 1700-1900 (5) I&S Development of Russia from Peter the Great to Nicholas II. Offered: jointly with SISRE 444.

HSTEU 445 Twentieth-Century Russia (5) I&S Russia and the USSR from Nicholas II to the present. Offered: jointly with SISRE 448.

HSTEU 451 East-Central Europe Since 1342 (5) I&S Explores the history of the lands and peoples of East Central Europe (Poles, Czechs, Slovaks, and Hungarians).

HSTEU 452 Eastern Europe Since 1918 (5) I&S Poland, Czechoslovakia, Hungary, Romania, Yugoslavia, Bulgaria, and Albania, from the end of World War I to the present.

HSTEU 453 History of the Balkans, 1400 to the Present (5) I&S Centuries of Ottoman rule that produced a new basis for the reemergence of independent states in the nineteenth and twentieth centuries; history of these new states until the present.

HSTEU 454 Baltic History (5) I&S Overview of the history of the area occupied by the Baltic
countries of Latvia, Lithuania, and Estonia. Emphasizes their emergence as modern European nation-states. Era from World War I to present treated in depth, including the historical role and present situation of non-Baltic peoples, particularly Russians. Offered: jointly with SCAND 454.

HSTEU 465 The Jews of Eastern Europe (5) I&S Jewish society in Poland, Russia, the Hapsburg Lands, and Romania from the late Middle Ages to the Holocaust. Offered: jointly with SISJE 465.

HSTEU 466 The Sephardic Diaspora: 1492- Present (5) I&S Stein Examines the history and culture of Sephardic Jewry from the expulsion from the Iberian Peninsula in 1492 to the present. Explores the creation of Sephardic communities in the Dutch and Ottoman Empires, Western Europe, the Americas, and Africa, and the history of the conversos and “hidden Jews.” Offered: jointly with SISJE 466.

HSTEU 470 The Jacobethan Age: England 1580-1630 (5) I&S Emphasis on arts and society instead of the traditional kings, battles, and politics; the way people at all levels of society lived, in towns and in the countryside, within the bounds of the royal court or outside in the political wilderness. Classes on poetry, drama, music, architecture, painting, interior decoration, and some of the minor arts, as well as on demography and some of the traditional historical subjects. Not open for credit to students who have taken 471 or 472.

HSTEU 471 England in the Sixteenth Century (5) I&S Political, administrative, and social history from Henry VII to Elizabeth I, with emphasis on the Reformation and its effects and on conditions of life in Elizabethan England. Not open to students who have taken 470.

HSTEU 472 England in the Seventeenth Century (5) I&S Political, administrative, and social history from the accession of James I to the Glorious Revolution. Not open to students who have taken 470.

HSTEU 474 England in the Nineteenth Century (5) I&S Political, social, and cultural development; the agrarian, industrial, and French revolutions; the rise of parliamentary democracy; the Victorian age; political thought from utilitarianism to Fabianism; Irish home rule.

HSTEU 475 England in the Twentieth Century (5) I&S From the Boer War to the present; conservatism, liberalism, and socialism; England in two world wars; the decline of British imperialism.

HSTEU 482 Fascism in Europe (5) I&S History of the fascist era in modern Europe from 1919 to 1945. A study of the principal examples of national fascism and fascist-like movements coupled with a general theoretical consideration of the phenomenon.

HSTEU 484 Colonial Encounters (5) I&S Balkin History of European colonialism from the 1750s to the present, with an emphasis on British and French colonial encounters. Offered jointly with CHID 484.

HSTEU 490 Topics in European History (5, max. 10) I&S Examines special topics in European history.

HSTEU 501 Renaissance Field Course (3-6, max. 6) Topics in the cultural, political, and social history of the Renaissance era.

HSTEU 502 Reformation Field Course (3-6, max. 6) Topics in the religious, political, and social history of the Reformation era.

HSTEU 505 Early Modern European History (3-6, max. 18) Select topics in early modern European history. Topics vary from quarter to quarter. Prerequisite: permission of instructor.

HSTEU 510 Core Seminar in the History of Modern Europe (5-) An introduction to historiographical classics and exemplary new works in the various fields of modern European history. Members of the seminar choose research topics and present the results of their research to the seminar.

HSTEU 511 Core Seminar in the History of Modern Europe (5-) An introduction to historiographical classics and exemplary new works in the various fields of modern European history. Members of the seminar choose research topics and present the results of their research to the seminar.

HSTEU 512 Core Seminar in the History of Modern Europe (5-) An introduction to historiographical classics and exemplary new works in the various fields of modern European history. Members of the seminar choose research topics and present the results of their research to the seminar.

HSTEU 515 Modern European Intellectual History (3-6, max. 6).

HSTEU 516 Seminar: European Intellectual History (3-6, max. 6)-.

HSTEU 517 Seminar: European Intellectual History (3-6, max. 6).

HSTEU 521 Modern European History: France (3-6, max. 6).

HSTEU 531 Modern European History: Germany (3-6, max. 6).

HSTEU 532 Seminar in Modern European History: Germany (3-6, max. 6)-.

HSTEU 533 Seminar in Modern European History: Germany (3-6, max. 6)-.

HSTEU 534 Seminar in Modern European History: Germany (3-6, max. 6).

HSTEU 544 Modern Russian History (3-6, max. 6).

HSTEU 545 Seminar in Modern Russian History (3-6, max. 6)- Prerequisite: reading knowledge of Russian and either French or German.

HSTEU 546 Seminar in Modern Russian History (3-6, max. 6)- Prerequisite: reading knowledge of Russian and either French or German.

HSTEU 547 Seminar in Modern Russian History (3-6, max. 6) Prerequisite: reading knowledge of Russian and either French or German.

HSTEU 548 Field Course in Soviet History (3-6, max. 6) Specialized course for graduate history students in the scholarly literature of Russian history since 1917. Intended for graduate students preparing for MA or Ph.D. field examination in Russian history of the Soviet period.

HSTEU 551 History of Eastern Europe: 1772-1939 (5) Study of the east-central European region: Poland, Czechoslovakia, Hungary, Romania, and the Balkan countries, from their rebirth to World War II. Prerequisite: reading knowledge of German, French, Russian, or one East European language.

HSTEU 552 History of Eastern Europe: 1939 to the Present (5) Prerequisite: reading knowledge of one major European or one East European language.

HSTEU 553 Seminar in Modern East European History (3-6, max. 6-) Study and research involving special methods dealing with the histories of the East European countries in the modern period.

HSTEU 554 Seminar in Modern East European History (3-6, max. 6-) Study and research involving special methods dealing with the histories of the East European countries in the modern period.

HSTEU 555 Seminar in Modern East European History (3-6, max. 6) Study and research involving special methods dealing with the histories of the East European countries in the modern period.

HSTEU 571 English History: Tudor and Stuart (3-6, max. 6).

HSTEU 572 English History (3-6, max. 6).

HSTEU 573 Seminar in Modern English History (3-6, max. 6-).

HSTEU 574 Seminar in Modern English History (3-6, max. 6).

HSTEU 575 Seminar in Tudor-Stuart History (3-6, max. 6) History of England under the Tudors and the Stuarts. Prerequisite: HSTEU 571 or permission of instructor.

HSTEU 576 Seminar in Tudor-Stuart History (3-6, max. 6) History of England under the Tudors and the Stuarts. Prerequisite: HSTEU 571 or permission of instructor.

HSTEU 590 Topics in History (5, max. 15) Seminar on selected topics in general history, with special emphasis on preparation for field examinations. Topics vary according to interests of students and instructor.

History and Philosophy of Science

HPS 210 Issues in the History and Philosophy of Science (5) I&S Examination of selected topics in the history and philosophy of science at the introductory level. Taught by UW faculty and visiting scholars.

HPS 400 Colloquium in the History and Philosophy of Science (5) I&S/NW Examines
issues from the perspectives of both history and philosophy. Prerequisite: either HIST 311, HIST 312, HIST 313, HIST 314, HIST 315, HIST 317, HIST 318, or HIST 412; either PHIL 350, PHIL 360, PHIL 450, PHIL 460, PHIL 464, PHIL 466, PHIL 473, PHIL 481, PHIL 482, or PHIL 483.

Honors - Arts and Sciences

H A&S 220 Science for Honors Students I (5, max. 10) Evolution of an idea or concept central to the natural sciences. Intended for non-science majors. Content varies from year to year. For university honors students only. Offered: A.

H A&S 221 Science for Honors Students II (5, max. 10) Evolution of an idea or concept central to the natural sciences. Intended for non-science majors. Content varies from year to year. For university honors students only. Offered: W.

H A&S 222 Science for Honors Students III (5, max. 10) Evolution of an idea or concept central to the natural sciences. Intended for non-science majors. Content varies from year to year. For university honors students only. Offered: W.

H A&S 251 Western Civilization I (5, max. 10) I&S/VLPA Introduction to ideas and society in Western Civilization. For university honors students only. Offered: A.

H A&S 252 Western Civilization II (5, max. 10) I&S/VLPA Introduction to ideas and society in Western Civilization. For university honors students only. Offered: W.

H A&S 253 Western Civilization III (5, max. 10) I&S/VLPA Introduction to ideas and society in Western Civilization. For university honors students only. Offered: Sp.

H A&S 261 World Civilization I (5, max. 10) I&S/VLPA Introduction to ideas and society of civilization other than the Western. Specific civilization (Chinese, Japanese, Middle Eastern, South Asian) differs from year to year and section to section. For university honors students only. Offered: A.

H A&S 262 World Civilization II (5, max. 10) I&S/VLPA Introduction to ideas and society of civilization other than the Western. Specific civilization (Chinese, Japanese, Middle Eastern, South Asian) differs from year to year and section to section. For university honors students only. Offered: W.

H A&S 263 World Civilization III (5, max. 10) I&S/VLPA Introduction to ideas and society of civilization other than the Western. Specific civilization (Chinese, Japanese, Middle Eastern, South Asian) differs from year to year and section to section. For university honors students only. Offered: Sp.

H A&S 300 Introduction to the Professions (2-5, max. 15) Studies oriented toward professional work (law, medicine, public affairs). For university honors students only.

H A&S 350 Honors Seminar (2, max. 20) Discussion of selected topics in a variety of subject-matter fields. Topics and reading material vary from year to year. For university honors students only. Credit/no credit only.

H A&S 396 Interdisciplinary Special Topics—Natural Science (1-5, max. 10) NW Special courses drawn from interdisciplinary groups in the natural sciences. Content varies.

H A&S 397 Interdisciplinary Special Topics—Social Science (1-5, max. 10) I&S Special courses drawn from interdisciplinary groups in the social sciences. Content varies.

H A&S 398 Interdisciplinary Special Topics—Humanities (1-5, max. 10) VLPA Special courses drawn from interdisciplinary groups in the humanities. Content varies.

H A&S 499 Honors Independent Study or Research (1-5, max. 10) Faculty supervised Honors independent study or research for students in areas extending beyond their major departments or along lines not otherwise accommodated by existing Honors courses. Honors students only.

International Studies

European Studies

EURO 111 Elementary Modern Greek (5) Fundamentals of oral and written modern Greek. Offered: A.

EURO 112 Elementary Modern Greek (5) Fundamentals of oral and written modern Greek. Recommended: EURO 111 or GREEK 401. Offered: W.

EURO 140 Russia From the Tenth Century to the Present (5) I&S Russian political, social, and economic history from the tenth century to the present. Offered: jointly with HIST 140.

EURO 211 Second-Year Modern Greek (5) VLPA Continuation of EURO 111, 112, 113. Intensive practice in speaking, reading, and writing. Recommended: EURO 113 or GREEK 403. Offered: A.

EURO 212 Second-Year Modern Greek (5) VLPA Continuation of EURO 111, 112, 113. Intensive practice in speaking, reading, and writing. Recommended: EURO 211. Offered: W.

EURO 220 Introduction to East European Studies (5) I&S Felaket Introduction to the history of post-1945 Eastern Europe focusing on political, economic, social, cultural, and diplomatic issues. Countries surveyed include Albania, Bulgaria, Czechoslovakia, Hungary, Poland, Romania, and Yugoslavia. Offered: jointly with HSTEU 220.

EURO 243 Russian Civilization (5) I&S Russia's civilization, including fine arts, literature, religion, and history; political, social, and legal institutions and thought in relation to the general development of Russian society from early times to 1917.

EURO 301 Europe Today (5) I&S Ingebritsen A multi-disciplinary approach to contemporary Europe focusing on social, political, cultural, and economic change, with special reference to developments in the countries of the European Union, Scandinavia, and those in Eastern Europe in the post-Soviet era.

EURO 320 Greek History: 7000 BC to Present (5) I&S Thomas History of Greece from its Neolithic village origins to the present. Examines the different forms of one of the most resilient cultures in the human story. Offered: jointly with HIST 320, A.

EURO 324 Soviet and Post-Soviet Society (5) I&S Social, cultural, political, and economic systems of the major nations which, until 1991, comprised the Soviet Union and are now independent states. Deals with period of full communist power and changes brought about by its demise.

EURO 344 The Baltic States and Scandinavia (6) I&S Survey of the cultures and history of Estonia, Latvia, and Lithuania from the Viking Age to the present, with particular attention to Baltic-Scandinavian contacts. Offered: jointly with SCAND 344.

EURO 360 Contemporary Spain (5) I&S/VLPA Social, political, and cultural developments in Spain since the end of the Franco dictatorship in 1975. Extensive use of Spanish Web sites. Prerequisite: SPAN 302 which may be taken concurrently. Offered: jointly with SPAN 360.

EURO 364 Modern Greece: 1821 to the Present (5) I&S Politics and society of Greece from War of Independence to the present. Emergence and development of the Greek state; Greece in the world wars; civil war and post-war politics; military dictatorship; transition to democracy; recent developments. No prior study of Greece assumed. Offered: jointly with HSTEU 364.

EURO 395 Supervised Internship (1-5, max. 5).

EURO 399 Study Abroad (1-5, max. 15) I&S For participants in Study Abroad program. Specific course content varies. Courses do not automatically apply to major/minor requirements.

EURO 420 The Olympics: The Merging of Old and New in Modern Greece (5) I&S Explores the role of the Olympic games in the history and culture of Greece, from Bronze Age pre-Olympiads to the 2004 Athens Games. Topics include mythical and historical origins of the Olympics, moral principles and practices in Greek sports, and modern Olympics, 1896 to 2004. Offered: jointly with HIST 420.

EURO 425 European Media Systems (5) I&S Examines media systems in selected countries in Europe and policy issues that link (or divide) members of the European Union and other major media producers. Media studied in context of the contemporary economic, social, political, and cultural milieu in which they operate. Offered: jointly with COM 425.

EURO 445 War and Occupation in Northern Europe: History, Fiction, and Memoir (5) The study of literary representations (fiction, memoirs, and personal narratives) dealing with World War
II and the occupation of the Nordic and Baltic countries. Offered: jointly with SCAND 445.

EURO 481 August Strindberg and European Cultural History (5) I&S/VLPA Examines the work of Swedish dramatist, novelist, and painter August Strindberg, in the context of European literary movements and historical ideas from 1880 to 1912, and Strindberg's influence on 20th-century drama and film. Offered: jointly with SCAND 481.

EURO 490 Special Topics (1-5, max. 15) I&S

EURO 499 Senior Seminar I (5) I&S Introduction to research into European topics and to the analysis of problems.

EURO 495 Senior Seminar II (5) I&S Writing and discussion of senior thesis. Prerequisite: EURO 494. Offered: Sp.

EURO 496 Paris: Architecture and Urbanism (3-5, max. 5) I&S/VLPA Spanns the architectural history of Paris, from its Gallic, pre-roman origins in the 2nd century BCE through the work of 21st century architects. Focuses on changing patterns of the physical fabric of the city and its buildings, as seen within the context of the broader political, social, economic, and cultural history. Offered: jointly with ART H 494.

EURO 499 Undergraduate Research (1-5, max. 15).

African Studies

SISAF 399 Study Abroad: African Studies (1-5, max. 15) I&S For participants in study abroad program. Specific content varies. Courses do not automatically apply to major/minor requirements.

SISAF 444 African Studies Seminar (5, max. 15) I&S/Interdisciplinary seminar focusing upon one particular aspect of the African continent. Emphasis may be humanistic, social scientific, or historical. African Studies faculty and visiting scholars lecture on areas of their own expertise.

SISAF 490 Special Topics (1-5, max. 15) I&S

SISAF 499 Undergraduate Research (1-5, max. 15).

Asian Studies

SISA 209 Asian Civilizations: Traditions (5) VLPA Porter Interdisciplinary introduction to the civilizations of Asia, particularly those of India, China, Japan, and Korea. Explores the religion, philosophy, literature, art, and social and political thought of these civilizations from ancient times to the 17th century.

SISA 210 Rise of Asia (5) I&S Anchordoguy, Bachman, Giebel, Sorensen Key themes in the study of Asia, with focus on the present. Topics include: the notion of "Asia," cultural and religious similarities and differences; comparison of colonial experiences under Western and Asian powers; World War II and liberation; postwar patterns of economic and political development; social patterns and issues. Offered: A.

SISA 244 Imperialism and Anti-Colonialism in Asia (5) I&S/Introduction to Western imperialism expansion, conquest, and colonial rule in Asia; the anti-colonial, nationalist resistances they engendered; and the resultant cultural, political, economic, and intellectual transformations in Asian societies. Covers post-1800 violence, racial hierarchies, human rights abuses, post-colonial memories, persistent strategies of domination, and structural inequities. Offered: jointly with HSTAS 244.

SISA 245 Human Rights in Asia (5) I&S Callahan, Giebel Introduction to recent and ongoing human rights issues in South, Southeast, and East Asia. Examines how human rights politics have played out in domestic political arenas. Provides exposure to views/insights into the historical context in which human rights claims, abuses, and debates arise. Offered: jointly with HSTAS 245.

SISA 265 Globalization and the Transformation Economy and Society in Asia (5) I&S Hamilton Examines the rapid and extensive social and economic development throughout Asia since the mid-20th century; the corresponding retail revolution in the American economy; the evolution of characteristic Asian product categories; and the impact of these developments on the social and economic organization of Asian economies. Offered: jointly with SOC 265.

SISA 372 Asian Sustainable Development (5) I&S Jhavani Examines the contemporary relationship between environmental protection and development paths in Asia. Inquires into the forces driving both environmental change and societal responses (state and local regulations, social movements, etc.) to that change, at many geographical scales. Asian concepts of nature-society relations also explored. Offered: jointly with GEOG 372.

SISA 399 Study Abroad: Asian Studies (1-5, max. 15) I&S For participants in study abroad program. Specific course content varies. Courses do not automatically apply to major/minor requirements.

SISA 401 Asia and the World (5) I&S Bachman Overview of major issues and developments in the interactions of Northeast and Southeast Asia and the world. Topics include economic development and integration, sources of instability, and historical patterns of relations. Particular focus on major current issues related to the region. Prerequisite: SIS 201, SIS 210.

SISA 490 Special Topics (1-5, max. 15) I&S Content varies.

SISA 499 Undergraduate Research (1-5, max. 15).

SISA 590 Special Topics (1-5, max. 10) I&S Special topics in Asian Studies. Course content varies by instructor.

Canadian Studies

SISCA 308 Canada: A Geographic Interpretation (5) I&S Jackson Examines the overlapping economic, cultural, and political geographies shaping life in contemporary Canada. Topics include: free trade, constitutional crisis, feminism in Canada, aboriginal politics, and border region phenomena. Attention paid to how specific geographic interpretations of Canada by Canadians actually play a part in national life. Offered: jointly with GEOG 308.

SISCA 356 Canadian Society (5) I&S Origins to the present in its North American setting; political development, cultural evolution, and emergence of multinationalism; economic base; arts and literature; problems of the environment; Canadian foreign relations.

SISCA 377 History of Canada (5) I&S Jackson General survey and analysis of political, economic, social, and cultural aspects of Canadian history from the foundation of New France to present: Canadian-American relations, the rise of Quebec nationalism, and the development of the Canadian West. Offered: jointly with HSTAS 377.

SISCA 399 Study Abroad: Canadian Studies (1-5, max. 15) I&S For participants in study abroad program. Specific course content varies. Courses do not automatically apply to major/minor requirements.

SISCA 400 Canadian Values and Symbols (5) I&S Overview of the ideas, events, and activities which help define Canadians as a people. Examines the "national" expression of these values and symbols, as evidenced in historical experience, a physical environment often harsh and unyielding, a diverse people and cultures, and a pride in achievement that is frequently slow to surface.

SISCA 430 Canadian Documentary Film Traditions (5) I&S/VLPA History and development of non-fiction film documentary traditions, especially in Canada, the first institutionally defined area in which documentaries became prominent through the National Film Board and the Canadian Broadcasting Corporation. Focus on the work of Canadian- and independent network producers who developed present-day style of documentaries. Offered: jointly with COM 430.

SISCA 441 Quebecois Literature (5) VLPA Delcourt Readings of novels, plays, and occasionally, poetry. Special attention paid to how Quebecois authors represent in their works the complex socio-political reality of their culture. Conducted in French. French majors required to read and write in French; all others may read and write in English. Prerequisite: FRENCH 303; FRENCH 306. Offered: jointly with FRENCH 441.

SISCA 450 Comparative Health Care Practices: Canada and the United States (1, max. 3) I&S Provides a platform for critical, analytic thought on health care practices. Topics vary by quarter: politics, ethics, and environmental influences on health care (Autumn); dependent populations, elderly, children, and developmentally delayed (Winter); aboriginal health care, problems and solutions (Spring).

SISCA 490 Special Topics (1-5, max. 15) Content varies.

SISCA 495 Multiculturalism in Canada (5) I&S History of the multi-racial and multi-ethnic character of Canadian society. Impact of federal policy of bilingualism and multiculturalism.
Current issues of language rights, retention of cultural heritage, self-government for aboriginal peoples, and improving race and ethnic relations.

SISCA 498 Seminar: Canadian Problems (5) I&S Major issues pertaining to Canadian society, government, and economic development.

SISCA 499 Undergraduate Research (1-5, max. 15).

SISCA 507 Research Seminar: Canadian Problems (5, max. 10) Consideration of the spatial dimensions of Canadian socioeconomic, cultural, and political development, with emphasis on resource potentials and relations with the Union, Japan, and other important trading partners. Prerequisite: GEOG 308 or permission of instructor. Offered: jointly with GEOG 507.

SISCA 590 Special Topics (2-5, max. 10) Offered occasionally by visitors or resident faculty. Course content varies.

SISCA 600 Independent Study (*).

Comparative Religion

RELIG 201 Introduction to World Religions: Western Traditions (5) I&S History of religions, concentrating on religious traditions that have developed west of the Indus. Primary attention to the Semitic religions (Judaism, Christianity, Islam) and to their ancient world background with emphasis on basic conceptual and symbolic structures.

RELIG 202 Introduction to World Religions: Eastern Traditions (5) I&S History of religions, concentrating on religions that have developed in South Asia and East Asia. Primary attention to Hinduism and Buddhism; other important Asian religions are discussed in relation to them, with emphasis on basic conceptual and symbolic structures.

RELIG 205 Religion, Violence, and Peace: Patterns Across Time and Tradition (5) I&S Noegel, Wellman examines the complex relationship between violence and peace in a variety of religious traditions. Examines case studies from the ancient Near East, medieval East Asia, and the contemporary West from the standpoint of lived experiences and contemporary theories derived from several academic disciplines. Offered: jointly with HUM/NEAR E 205; W.

RELIG 210 Introduction to Judaism (5) I&S Jaffe Basic ideas and motifs of Judaism: God, Covenant, Law, Life Cycle (birth, marriage, family life, sexual laws, role of women, death); Cycle of the Year (Sabbath, holidays, festivals); Holy Land, prayer, Messianism.

RELIG 211 Islam (5) I&S/VLPA Wheeler Introduction to important cultural and historical aspects of Islam, focusing on basic concepts and developments such as prophethood, Quran and Hadith, canon and law, ritual, social theory, Sufism, theology, and sectarianism. Special attention to comparison of varied Muslim practices and beliefs, and their relation to textual and personal authority. Offered: jointly with NEAR E 211.

RELIG 212 Introduction to the Quran (5) I&S/ VLPA Wheeler Emphasis on the historical context of the Quran, the history of the text, its collection, organization, and interpretation. In English. Offered: jointly with NEAR E 212.

RELIG 220 Introduction to the New Testament (5) I&S/VLPA Williams Modern scholarly methods of research and analysis in dealing with New Testament books and their interpretation. Genres of various books (gospel, epistle, sacred history, apocalypse); problems of the relationships among author, material, and intended audience; relationships between theme and image.

RELIG 254 American Religions (5) I&S Wellman Seeks to understand religious diversity in the American context and the varieties of religions in the American historical horizon including religious minorities, American Protestants, public religious expressions, and new American religions.

RELIG 264 Sacred Music in the European Tradition (5) VLPA Surveys European and American sacred music from the 12th to 20th centuries, examining the important role of music in religious worship. Considers the means composers used to make musical works sound the way they do to convey the messages of the texts through music. Offered: jointly with MUSIC 264.

RELIG 301 Religious Thought Since the Middle Ages (5) I&S Development of religious thought in the West from the Middle Ages to the twentieth century. History of focal ideas: God, man, knowledge, and authority during this period and the relation of changes in these ideas to the ways in which basic issues in religious thought have been conceived. Recommended: RELIG 201.

RELIG 320 Comparative Study of Death (5) I&S Death analyzed from a cross-cultural perspective. Topics include funerary practices, concepts of the soul and afterlife, cultural variations in grief, cemeteries as folk art, and medical and ethical issues in comparative context. American death practices compared to those of other cultures. Offered: jointly with ANTH 322.

RELIG 321 Comparative Religion (3) I&S Anthropological approaches to religious experience and belief with emphasis on conceptual issues such as ritual, symbolism, identity, ecstatic experience, and revitalization movements in the context of globalization. Also addresses the diversity of religious expression in American culture and how that compares with other societies. Offered: jointly with ANTH 321.

RELIG 322 The Gospels and Jesus of Nazareth (5) I&S Williams Gospel material from early Christianity, including both canonical and noncanonical gospels. Relation of gospels to analogous literature from the Hellenistic-Roman period. Recommended: ENGL 310 or RELIG 220.

RELIG 324 The Emergence of Christianity (5) I&S Williams Studies stages in the development of Christianity as a new religion, during the first to fifth centuries CE, as the classical forms and institutions of Christian "orthodoxy" gradually achieved definition, and as this emerging Christian tradition became a dominant cultural and socio-political force. Recommended: HIST 307, RELIG 201, or RELIG 220.

RELIG 327 Eastern Christian Traditions (5) I&S Eastern Christian traditions, with principal focus on Eastern Orthodox tradition in Byzantium and Russia from time of the Council of Nicaea to the twentieth century. Considers significant differences between eastern and western Christianity and their doctrinal and cultural origins; explores distinctive features of eastern tradition. Recommended: HIST 307 or RELIG 201.

RELIG 350 Buddhism and Society: The Theravada Buddhist Tradition in South and Southeast Asia (5) I&S Keys Reville Religious tradition of Theravada Buddhism (as practiced in Sri Lanka, Burma, Thailand, Laos, and Cambodia). Variations in ethical orientations developed through Theravada Buddhist ideas. Recommended: RELIG 202 or one eastern religions course. Offered: jointly with ANTH 352.

RELIG 352 Hinduism (5) I&S Pauwels Varieties of Hindu religious practice; the diverse patterns of religious thought and action among contemporary Hindus. Includes ritual behavior, village Hinduism, tantrism, sadhus, yoga, sects, the major gods and their mythologies, religious art, and the adjustments of Hinduism to modernity. Recommended: RELIG 202 or one South Asian culture course.

RELIG 354 Buddhism (5) I&S Cox Buddhism as a religious way and as a way of thinking; the forms of Buddhism known in South Asia (India, Sri Lanka) and those introduced from there to Tibet and other parts of Central Asia. Includes the "Three Jewels" (i.e., the Buddha or Awakened Person, the Teaching [Dharma], and Community [Sangha]) around which Buddhism is traditionally articulated. Recommended: RELIG 202 or one Asian cultures course.

RELIG 380 The Nature of Religion and Its Study (5) I&S Jaffe Study of religion as a general human phenomenon. Manner in which different methods of inquiry (phenomenology, anthropology, sociology, psychology, literary criticism, archaeology, philosophy, theology) illuminate different aspects of religion and help to shape our conceptions of its nature. Recommended: RELIG 201 or RELIG 202. Offered: jointly with CHID 380.

RELIG 399 Study Abroad — Comparative Religion (1-4, max. 15) I&S For participants in study abroad program. Specific course content varies. Courses do not automatically apply to major/minor requirements.

RELIG 400 The Jewish Mystical Tradition (5) I&S Jaffe Jewish esoteric thought from antiquity to early modern times. Emergence of Spanish Kabbalah. The thought of Isaac Luria and its
immense influence in Jewish history through other movements—specifically the mystical messiah, Sabbatian Sevi, and the rise of Hasidism. Recommended: RELIG 201 or RELIG 210.

RELIG 405 Scripture in Judaism (5) I&S /Jaffe
Explores the phenomenon of religious interpretation of sacred books by attending to the destiny of the Bible as read within Judaism. Begins with the canonization of the biblical text itself and continues into the rationalist and mystical interpretive innovations of the Middle Ages. Recommended: HIST/SISJE 250, RELIG 201, or RELIG 210.

RELIG 410 Law in Judaic Experience (5) I&S /Jaffe
Place and function of law in Jewish social and personal experience. Discusses the various ideological justifications of the law in biblical and rabbinic literature, examines representative texts, and explores theological reflection on law by medieval and modern thinkers. Recommended: RELIG 201; RELIG 210; RELIG 400 or RELIG 405.

RELIG 415 Modern Jewish Thought (5) I&S /Jaffe
Major trends in Jewish religious thought since the European Enlightenment, focusing on encounters between Judaism and the modern world. Includes Haskalah; varieties of religious reform and accommodation; Zionism; socialism; the philosophy of Rosenzweig, Buber, and Kaplan; and theological responses to the Holocaust. Recommended: HIST/SISJE 250, HSTEU/SISJE 469, RELIG 201, or RELIG 210.

RELIG 420 The World of the Early Church (5) I&S /Williams Early Christian church within the context of the Greco-Roman sociopolitical, philosophical, and religious environment. Covers the period from about AD 100 to 300. Christian thinkers and documents studied include both the classical “orthodox” and the “heretical.” Recommended: HIST 307, RELIG 220, or RELIG 324.

RELIG 421 The Age of St. Augustine (5) I&S /Christian church in the fourth and fifth centuries as a major institution in the Roman Empire. Great figures of patristic theology, such as Athanasius, Gregory Nazianzus, Gregory of Nyssa, and Augustine. Recommended: HIST 307, RELIG 320, or RELIG 324.

RELIG 426 Gnosticism and Early Christianity (5) I&S /Williams Impact of Gnosticism on the development of Christianity and several other religious groups of that period. Readings dating from the first through the third centuries AD.

RELIG 428 Modern Christian Theology (5) I&S /Modern Protestant and Catholic thought since the nineteenth century: Kierkegaard, Barth, Bultmann, Rahner, Lonergan, and other major figures. Recommended: RELIG 301.

RELIG 433 Life of Prophet Muhammad (5) I&S/VLPWA Wheeler Examines historical and religious traditions associated with the life of the Prophet Muhammad with particular attention to the biography in classical Islam. Focuses on Muhammad as prophet, holy man, law-giver, mystic, and Muslim. Comparison with other religious figures such as Jesus and the Buddha. In English. Offered: jointly with NEAR E 433.

RELIG 443 Art, Religion, and Politics in Byzantium, 700-1453 AD (3) I&S/ VLPA Kartsonis Evolution of the art of Byzantium (700-1453 AD) in the context of contemporary religious, political, and cultural developments. Recommended: some background in Byzantine art or history. Offered: jointly with ART H 453.

RELIG 444 Greek and Roman Religion (3) I&S/ VLPA Harmon Religion in social life of Greeks and Romans; emphasis on their public rituals and festivals. Priesthoods, personal piety, rituals of purification and healing, and the conflict of religions in the early Roman Empire. Recommended: some background in Byzantine art or history. Offered: jointly with ART H 454.

RELIG 445 Topics in the Buddhism of Tibet (3) I&S/ Topics in the development of Buddhism in Tibet. Includes the relationship between reasoning and religious thought; the concept of a person; the formation of the different schools of Tibetan Buddhism; the notion of lineage; the master-disciple relationship in the tantric tradition. Recommended: ANTH 352, RELIG 202, RELIG 350, or RELIG 354.

RELIG 445 Topics in the Buddhism of Tibet (3) I&S/ Topics in the development of Buddhism in Tibet. Includes the relationship between reasoning and religious thought; the concept of a person; the formation of the different schools of Tibetan Buddhism; the notion of lineage; the master-disciple relationship in the tantric tradition. Recommended: ANTH 352, RELIG 202, RELIG 350, or RELIG 354.

RELIG 446 Perceptions of the Feminine Divine in Hinduism (5) I&S/VLPA Pauwels Explores implications of the perception of a feminine divine for gender issues in South Asia. Includes historical overview of goddess worship in South Asia, mythologies, philosophical systems, cults, and rituals associated with the major goddesses, the phenomena of sutee, goddess possession, and women’s goddess rituals at the village level.

RELIG 456 Women in Ancient Judaism (3) I&S/VLPA Noegei Explores those texts in early Jewish literature in which women play prominent roles and those in which women are surprisingly absent. Discusses the literary portrayal of women for what they tell us about the people who wrote the texts. No knowledge of Hebrew is required. Offered: jointly with NEAR E 456.

RELIG 457 The History of Biblical Interpretation (3) I&S/VLPA Morgan Traces biblical interpretation and translation technique from the earliest translations of the Hebrew Bible (Old Testament) to the various historical literary, deconstructionist, and holistic strategies of more recent times. Adopting a “hands-on” approach to the material and explores various hermeneutics by applying them in class. Offered: jointly with NEAR E 457.

RELIG 460 Anti-Semitism As a Cultural System (5) I&S /Jaffe Comparative study of various anti-Semitic cultural systems from ancient to modern times. Topics include how anti-Semitism can be defined as a cultural phenomenon; the conditions that explain the circulation of anti-Semitic traditions in a given society; the conditions under which social conflict with Jews becomes anti-Semitism.

RELIG 490 Special Topics (1-5, max. 15) I&S Topics vary with each offering.

RELIG 491 Seminar: Topics and Issues in Judaism (5) I&S /Jaffe Topics vary. Recommended: RELIG 210; RELIG 400, RELIG 405, or RELIG 410.

RELIG 492 Seminar: Topics in Early Christianity (5) I&S /Williams Topics vary. Recommended: one early Christian history or literature course.

RELIG 497 Field Archaeology (1-10, max. 20) Professionally-guided archaeological fieldwork at a recognized archeological dig in the United States or abroad. Offered: S.

RELIG 498 Honors Thesis (5) I&S Required course for Comparative Religion honors students.

RELIG 499 Graduate Research (1-5, max. 15) Primarily for comparative religion majors and majors in the School of International Studies.

RELIG 501 Approaches to the Study of Religion (5) Major approaches employed by modern scholarship in the study of religion, including historical, phenomenological, anthropological, sociological, and psychological. Prerequisite: admission to the comparative religion MAIS program or permission of instructor.

RELIG 502 Religion in Comparative Perspective (5, max. 15) Analysis of selected theme or symbols in relation to several different religious traditions. Topics vary. Prerequisite: admission to the comparative religion MAIS program or permission of instructor.

RELIG 504 Religion and Culture (5) Study of the relations between religion and culture, with attention to the role of religion in defining conceptions of order and grounding socio-political and artistic traditions.

RELIG 510 Colloquium in Comparative Religion (1, max. 6) Required colloquium for graduate students in comparative religion program. Introduction to faculty research and to major methods and disciplines in the study of religion. Credit/no credit only.

RELIG 520 Seminar On Early Christianity (5) Williams Problems in the history and literature of early Christianity.

RELIG 528 Christian Theology (5) Study of exemplary figures in the history of Christian religious thought. Prerequisite: RELIG 428.

RELIG 570 Religion and Literature (5) The relation of religious thought to the study of imaginative literature. Includes both critical theory and practical criticism of exemplary texts.

SISEA 212 History of Korean Civilization (5) I&S
From earliest times to present. Development of Korean society and culture in terms of government organization, social and economic change, literature. Art. Offered: jointly with HSTAS 212.

SISEA 213 The Korean Peninsula and World Politics (5) I&S
Introduction to Korean politics, economics, society, and international relations since the late nineteenth century. Addresses the evolution of Korea in international society by comparing Korea's experience with that of China and Japan. Offered: jointly with POL S 213.

SISEA 236 Geography of Greater China (5) I&S
Chan Studies the geography of development processes, patterns, and problems in "Greater China": mainland China, Taiwan, and Hong Kong. Covers physical geography, history, and economic and political systems, with major focus on geographical issues in China's development: agriculture, population, industry and trade, and relations with Hong Kong and Taiwan. Offered: jointly with GEOG 236.

SISEA 241 Japanese Civilization (5) I&S
Japan's civilization, including its origins, government, literature, economic institutions, material culture, social organization, and religions, in relation to the development of Japan as a society and nation. Cannot be taken for credit if SISEA 341 previously taken. Offered: jointly with HSTAS 241.

SISEA 242 Japan in the Contemporary World (5) I&S
Interdisciplinary introduction to various aspects of contemporary Japan, such as its politics, economics, and society. Focuses on how Japan has interacted with the global community in the period since World War II.

SISEA 370 Han Chinese Society and Culture (5) I&S
Anagnost, Harrell Themes in the society and culture of the Han Chinese people. Concepts of self, personal interaction; family, gender, and marriage; communities and the state; religion and ritual; class, social categories, and social mobility; culturalism, nationalism, and patriotism. Offered: jointly with ANTH 370.

SISEA 399 Special Topics (2-5, max. 10)
Offered occasionally by visitors or resident faculty. Course content varies.

SISEA 600 Independent Study or Research (*)

East Asian Studies

SISEA 424 Perspectives on East Asia for Teachers (3, max. 6) I&S
Substantive concepts, resources, and materials employed in teaching about East Asia. Requirements may vary in relation to the background of participants.

SISEA 434 Demographic Issues in Asia (3-5) I&S
Hirschman, Lavely Contemporary Asian countries face a number of issues with demographic components, including environmental and resource issues, ethnic rivalries, international migration, and public health. Addresses a set of these issues by focusing on the demography of one or more countries in Asia. Offered: jointly with SOC 434.

SISEA 435 Japanese Government and Politics (5) I&S
Hellmann Government and politics of Japan with emphasis on the period since 1945. Offered: jointly with POL S 435.

SISEA 436 Political Parties in Japan and East Asia (5) I&S
Focus on political parties in Japan. Combines theoretical readings on political parties with intensive study of Japanese political parties. Recommended: either SISEA 242, SISEA 423, SISEA 440, or SISEA 442. Offered: jointly with POL S 429.

SISEA 439 Politics of Divided Korea (5) I&S
Governments, politics, and economy of South and North Korea, the inter-Korea relations, and the two Koreas' relationship with the major powers — especially the United States — with emphasis on the post-cold war period. Offered: jointly with POL S 439.

SISEA 440 The Emergence of Postwar Japan (5) I&S
Pyle The making of modern Japan: World War II and surrender; American occupation; postoccupation rebuilding; emergence as an industrial power. Recommended: HSTAS 423 or SISEA 423. Offered: jointly with HSTAS 424.

SISEA 441 Economic and Social History of Japan to 1900 (5) I&S
Lecture/seminar on Japanese economic and social history from 700 to 1900. Analyses of the rise and decline of the shoen system, the rise of commerce, social change, changes in the living standard, demographic changes, and the early phases of industrialization. Political and cultural developments as related to economic and social change. Prerequisite: either SISEA 241/HSTAS 241 or SISEA 341/HSTAS 341. Offered: jointly with HSTAS 441.

SISEA 442 Political Economy of Postwar Japan (5) I&S

SISEA 443 Class and Culture in East Asia (5) I&S
Examines the nexus between culture and systems of social stratification/class in East Asia, with an emphasis on Taiwan, Korea, Japan, and China. Topics include class formation, mechanisms of social mobility and reproduction, markers of status and hierarchy, resistance, and the formation of class identity. Offered: jointly with ANTH 446.

SISEA 444 Politics of Representation in Modern China (5) I&S
Focuses on issues of representation and power in twentieth century China. Combines substantive information on modern Chinese society and culture with recent debates in social theory and the politics of representation. Major themes include Chinese nationalism, body politics, popular culture, and everyday practice. Offered: jointly with ANTH 444.

SISEA 445 Religion in China (5) I&S
Harrell Religion in Chinese society, doctrines, practices, and social consequences of the eclectic folk religion, the elite Confucian, Taoist, and Buddhist traditions, syncretistic sects, and imported Christianity. Prerequisite: either one 200-level ANTH course, ANTH 370, ANTH 403, LING 203, HSTAS 454, RELIG 202, SISEA 470, or SISEA 443.

SISEA 448 Modern Korean Society (5) I&S
Sorensen Social organization and values of twentieth-century Korea. Changes in family and kinship, gender relations, rural society, urban life, education, and industrial organization since 1900. Differences between North and South Korea since 1945. Recommended: HSTAS/ SISEA 212. Offered: jointly with ANTH 344.

SISEA 449 Government and Politics of China (5) I&S
Whiting Post-1949 government and politics, with emphasis on problems of political change in modern China. Offered: jointly with POL S 442.

SISEA 454 History of Modern China (5) I&S
Dong Social, cultural, political, economic, and intellectual transformations and continuities in China from the end of the imperial period to the present. Offered: jointly with HSTAS 454.

SISEA 456 Topics in Chinese Social History (5) I&S
Ebrey, Guy Surveys major issues and approaches to the study of the role of the Chinese people in China's historical development. Historical focus of course varies with instructor. Recommended: HSTAS 211, HSTAS 452, HSTAS 453, or HSTAS/SISEA 454. Offered: jointly with HSTAS 456.

SISEA 459 United States-China Relations (5) I&S
Bachman Surveys the history of United States-China relations and examines the evolution of bilateral relations, particularly since 1949. Focus on the period since 1972 and the major issues as they have evolved since that time, including trade, human rights, security, and Taiwan. Offered: jointly with POL S 419.

SISEA 460 Cities in China: Past and Present (5) I&S
Economic, political, social, and cultural functions of the city in modern Chinese history. Changes in China's urban system. The city as cultural center and focus of literary and cinematic representation. Attention to architecture, commerce, urbanization, the role of capital cities in the power of the state. Offered: jointly with HSTAS 460.

SISEA 462 China and Globalization (5) I&S
Bachman Examines the dynamics of the rise of China, its growing interactions with the international system and how it is in turn affected by the processes associated with globalization. Specific areas of examination include flows of resources, people, and information, and conceptions of Chinese identity. Prerequisite: SISA 210.

SISEA 468 China's Economic Reforms: Integration Into World Economy (5) I&S
Wong A systematic survey of China's economic reforms

368
since 1978, including China's increasing integration into world economy. Prerequisite: ECON 201. Offered: jointly with ECON 489.

SISEA 469 Law, Development, and Transition in East Asia (5) I&S Examines the role of law and the courts in economic and political change in the developing world. Topics include variations in legal traditions and institutions, economic development, property rights, dispute resolution, democratization, and human rights. Empirical materials focus on East Asia. Offered: jointly with LSJ 469/POL S 469.

SISEA 470 Minority Peoples of China (5) I&S Harrell Interaction between China and the peoples of its periphery, including Inner Asia, Tibet, Northern Mainland, Southeast Asia, and aboriginal peoples of Taiwan. Emphasis on ethnicity, ethnic group consciousness, and role of the Chinese state. Prerequisite: either ANTH/ SISEA 370, HSTAS 454, LING 203, or one 200-level ANTH course. Offered: jointly with ANTH 470.

SISEA 474 Civil Society in Japan and East Asia (5) I&S Peckkan Examines a wide range of nongovernmental organizations (NGOs) nonprofits, and voluntary groups under the unifying rubric of civil society. Theoretical interaction to civil society and ideas of social capital. Investigates general aspects of civil society, focusing on its specific characteristics in Japan and other parts of Asia.

SISEA 478 Readings in the Social Sciences in Japanese (3-5) I&S Introduction to articles and short works in economics, history, political science, and other social sciences. Assignments chosen from major Japanese monthlies and academic works. All readings in Japanese. Prerequisite: JAPAN 313.

SISEA 479 Readings in the Social Sciences in Japanese (3-5) I&S Introduction to articles and short works in economics, history, political science, and other social sciences. Assignments chosen from major Japanese monthlies and academic works. All readings in Japanese. Prerequisite: JAPAN 313.

SISEA 480 New Orders in East Asia (5) I&S Pyle Rise and fall of successive international systems in East Asia over the past 150 years: Sino-centric, imperialist, Washington Treaty system, Japan's East Asian order, Yalta system, cold-war system. Post-cold-war search for a new order: Special attention to triangular relations among the United States, China, and Japan.

SISEA 481 Science, Technology, and Innovation Policies in East Asia (5) I&S Anchordoguy Examines sources of Asia's rise in world of technology and explores whether conditions for its success will continue. Recommended: SISEA or SISA course. Offered: jointly with I BUS 461.

SISEA 482 Japanese Business and Technology (5) I&S Anchordoguy Examination of Japan's postwar enterprise system in its historical context. Topics include corporate and financial structure, production and distribution, trade and investment policies, government-business relations, system of innovation, technological developments, prospects for the future. Offered: jointly with I BUS 462.

SISEA 490 Special Topics (1-5, max. 15) I&S Course content varies.

SISEA 494 Economy of Japan (5) I&S Analysis of the economic growth of Japan since about 1850 to the present. The reasons for rapid industrialization, various effects of sustained economic growth, and significant contemporary issues are investigated. Prerequisite: ECON 201. Offered: jointly with ECON 494.

SISEA 499 Undergraduate Research (1-5, max. 15) .

SISEA 517 Foreign Trade and Investment Law of the People's Republic of China (1-4, max. 4) Introduction to the regulatory regime governing foreign trade and investment in China and in-depth coverage of key aspects of the regime, with focus on issues faced by U.S. businesses. Covers specific regulations, their implementation in practice, as well as the political and economic background. Offered: jointly with LAW E 517.

SISEA 521 Seminar: Introduction to the Interdisciplinary Study of China (5-) Bachman, Dong, Guy .

SISEA 522 Seminar: Introduction to the Interdisciplinary Study of China (-5) Bachman, Dong, Guy .

SISEA 531 Chinese History: Research Methods and Bibliographic Guides (3, max. 6) Guy Introductory research seminar dealing with the methodological and bibliographical problems concerning all periods and aspects of Chinese history from the earliest times to the nineteenth century. Prerequisite: two years of classical or modern Chinese.

SISEA 532 The Chinese Political System (5) Bachman, Whiting Examination of key approaches, interpretations, and secondary literature in the study of contemporary Chinese politics. Prerequisite: permission of instructor. Offered: jointly with POL S 532.

SISEA 533 Seminar on Contemporary Chinese Politics (5) Research on selected problems in contemporary Chinese politics. Prerequisite: SISEA 532 or permission of instructor. Offered: jointly with POL S 533.

SISEA 535 International Relations of Modern China (5) Foreign policy of the People's Republic of China; historical antecedents; domestic and international systemic determinants; and Chinese policies toward major states, regions, and issues. Prerequisite: a course on contemporary Chinese politics or history, or permission of instructor. Offered: jointly with POL S 535.

SISEA 536 Political Parties in Japan and East Asia (5) Focus on political parties in Japan. Combines theoretical readings on political parties with intensive study of Japanese political parties. Recommended: either SISEA 242, SISEA 423, SISEA 440, or SISEA 442.

SISEA 538 Selected Topics on the Chinese Economy (5) Introduction to key issues of China's growth; the transition from planned economy; the changing role of the state; central-local relations; macro-management of the economy; income distribution; resources and agriculture; the external sector and the WTO.

SISEA 540 Japanese Law (4) Taylor Basic institutions and processes of the Japanese legal system. Historical development and traditional role of law, reception of Western law, and cultural and structural factors that influence the function of law and legal institutions. Offered: jointly with LAW B 540.

SISEA 541 Economic and Social History of Japan to 1900 (5) Analyses of landholding systems, the rise of commerce, demographic changes, urbanization, early industrialization, and social change. Prerequisite: previous course work in Japanese history or economic history, or permission of instructor. Not open to students who have taken 441. Offered: jointly with HSTAS 541.

SISEA 543 Law in East Asia: China (4) Introduction to the institutions and processes of the Chinese legal system. Focuses on the contemporary system and its role in relation to political, economic and social developments. Examines legal aspects governing foreign trade and investment in China. Offered: jointly with LAW B 541.

SISEA 549 Government Regulation of Business in Japan (3) Offered: jointly with LAW B 549.

SISEA 550 Japan, the United States, and New Orders in Asia (5) Pyle Seeks historical understanding of establishment of new order in contemporary East Asia. Analyzes the imperialist, Washington conference, and cold war systems and explores the present post-cold war search for a new order. Prerequisite: one course in modern Japanese political, historical economy, or political science.

SISEA 551 International Relations of Northeast Asia (5) Hellmann Comprehensive survey of contemporary international relations of Northeast Asia with emphasis on Russia, Japan, China, and the United States. Multidisciplinary approach placing contemporary problems in historical context, drawing on modern social science theories. Connections between defense and economics are examined. Prerequisite: permission of instructor. Offered: jointly with POL S 539.

SISEA 553 Chinese Legal Tradition (3) Concepts and principles of the legal tradition in China. Draws on primary and secondary sources in English and, for students with Chinese language competence, traces the concept and development of Chinese law as well as legal institutions in Chinese society. Offered: jointly with LAW B 553.

SISEA 555 Introduction to Japanese Studies (3-6, max. 6) Anchordoguy Interdisciplinary
introduction to the study of Japan, with emphasis on historical development. Required seminar for first-year graduate students.

SISEA 558 Readings on Japan in the Social Sciences (5) Seminar discussing articles in Japanese in economics, history, political science, and other social sciences. Assignments from major Japanese monthlies and academic works. Prerequisite: JAPAN 313 or equivalent and permission of instructor.

SISEA 559 Interdisciplinary Seminar on Japan (5) Advanced readings in history and the social sciences. Prerequisite: permission of instructor.

SISEA 574 Civil Society in Japan and East Asia (5) Pekkanen Examines a wide range of nongovernmental organizations (NGOs), nonprofits, and voluntary groups under the unifying rubric of civil society. Theoretical introduction to civil society and ideas of social capital. Investigates general aspects of civil society, focusing on its specific characteristics in Japan and other parts of Asia. Not open to students who have taken SISEA 474.

SISEA 575 Seminar on Japanese Society (5) Interdisciplinary seminar with class-led discussions on readings from anthropology, history, sociology, and multidisciplinary-specific articles on Japanese society. Prerequisite: background on Japan. Not open to students who have taken SISEA 475.

SISEA 577 Readings on Political Economy of Japan and Northeast Asia (5) Anchordoguy Analysis of major issues in Japan and also in Korea and China, such as the state's role in industrial development, trade and investment in Asia, trade and security relations with the U.S., and Asian models of capitalism.

SISEA 579 Modern Chinese History (5) Introduction to the major English-language literature on modern Chinese history and to the major historiographical issues of the period. Prerequisite: HSTAS 454 or equivalent, and permission of instructor. Offered: jointly with HSTAS 579.

SISEA 582 Japanese Business and Technology (5) Anchordoguy Examination of Japan's postwar enterprise system in its historical context. Topics include corporate and financial structure, production and distribution, trade and investment policies, government-business relations, system of innovation, technological developments, prospects for the future. Offered: jointly with I BUS 562.

SISEA 584 Survey of Korean Society (5) Sorensen Introduction to the social and political institutions of North and South Korea with an opportunity to master the most important literature on modern Korea. Focuses on the twentieth century with the major emphasis on the post-1945 period. Offered: A.

SISEA 585 Research Seminar: Modern Korea (6) Sorensen Advanced instruction in problems and methods of research in Korean history. Foreign language not required. Prerequisite: permission of instructor.

SISEA 590 Special Topics (2-5, max. 10) Seminar. Course content varies. Offered occasionally by visiting or resident faculty.

SISEA 600 Independent Study or Research (*). International Studies

SIS 103 Society and the Oceans (5) I&S/NW Explores the social and policy dimensions of the ocean environment and ocean management policy. Attention to how human values, institutions, culture, and history shape environmental issues and policy responses. Examines case studies and influential frameworks, such as the ocean as “tragedy of the commons”. Offered: jointly with ENVIR/SMAS 103.

SIS 123 Introduction to Globalization (5) I&S Sparke Provides an introduction to the debates over globalization. Focuses on the growth and intensification of global ties. Addresses the resulting inequalities and tensions, as well as the new opportunities for cultural and political exchange. Topics include the impacts on government, finance, labor, culture, the environment, health, and activism. Offered: jointly with GEOG 123.

SIS 200 States and Capitalism: The Origins of the Modern Global System (5) I&S Chiot, Kasaba, Migdal Origins of the modern world system in the sixteenth century and its history until World War I. Interacting forces of politics and economics around the globe, with particular attention to key periods of expansion and crisis.

SIS 201 The Making of the 21st Century (5) I&S Provides a historical understanding of the twentieth century and major global issues today. Focuses on interdisciplinary social science theories, methods, and information relating to global processes and on developing analytical and writing skills to engage complex questions of causation and effects of global events and forces. Recommended: SIS 200. Offered: WS.

SIS 202 Cultural Interactions in an Interdependent World (5) I&S Guy, Sorensen, Warren Cultural interaction among societies and civilizations, particularly Western and non-Western. Intellectual, cultural, social, and artistic aspects; historical factors.

SIS 225 The Silk Road (5) I&S Waugh History of cultural and economic exchange across Eurasia from the early Common Era to modern times. Topics include spread of religions such as Islam and Buddhism, overland trade in rare commodities, interaction between nomadic and sedentary cultures, the role of empires, the culture of daily life, and the arts. Offered: jointly with HIST 225.

SIS 301 War (5) I&S Origins and conduct of war; readings from anthropology, political science, economics, and history, as well as novels and some recent works on arms-control controversy. Modern forms of warfare, including guerilla war, world war, and nuclear war. Offered: jointly with SOC 301.

SIS 302 Intercultural Relations (5) I&S Perspectives on foreign cultures through literary example. Interdisciplinary approaches to the study of culture as such and problems of intercultural relations. Prerequisite: either one 200-level ANTH course, LING 203 or SIS 202.

SIS 325 Immigration (5) I&S Introduces key theoretical debates in international migration. Examines immigrants' political, economic, religious, and social integration into host societies, and continued ties to homelands. Experiences of voluntary and involuntary immigrants, of the second generation, and of incorporation into America and Europe. Designed around interdisciplinary texts and fieldwork in Seattle.

SIS 330 Political Economy of Development (5) I&S Poznanski, Wong Growth, income distribution, and economic development in less-developed countries today. Policies concerning trade, industrialization, the agricultural sector, human resources, and financing of development. Prerequisite: ECON 201 which may be taken concurrently.

SIS 332 Political Economy of International Trade and Finance (5) I&S Poznanski Theoretical and historical analysis to explore the causes and effects of the rise and decline of four major international trade and monetary regimes. Foundations and emerging features of the new international trade and monetary regime and its implications for the world economy.

SIS 333 Gender and Globalization: Theory and Process (5) I&S Ramamurthy Theoretical, historical, and empirical analysis of how current processes of globalization are transforming the actual conditions of women's lives, labor, gender ideologies, and politics in complex and contradictory ways. Topics include feminist exploration of colonialism, capitalism, economic restructuring policies, resistance in consumer and environmental movements. Offered: jointly with WOMEN 333.

SIS 335 Geography and the Developing World (5) I&S Characteristics and causes, external and internal, of Third World development and obstacles to that development. Special attention to demographic and agricultural patterns, resource development, industrialization, and urbanization, drawing on specific case studies from Asia, Africa, and Latin America. Offered: jointly with GEOG 335.

SIS 337 Collective Violence and the State (5) I&S Comparative study of collective violence in modern states with emphasis on riots and pogroms. Readings include case materials drawn from Russian pogroms of the nineteenth and twentieth centuries, Hindu-Muslim riots in modern India, and race riots in the United States and Great Britain. Offered: jointly with POL S 337.

SIS 342 Social Theory in International Context (5) I&S Comparative, historical introduction to the foundations of modern social theory in the work of Max Weber, Sigmund Freud, and Claude Levi-Strauss. Focus on tensions between universalist claims, European origins, and non-European applications of models of cultural formation and development.

SIS 344 Migration in the Global Economy (5) I&S Mitchell Analyzes the relationship between
human mobility in the late 20th century and changes in the global economy. Allows the student to gain familiarity with scholarly research on international migration from a diversity of approaches and methods. Offered: jointly with GEOG 344. W.

SIS 348 Alternative Routes to Modernity (5) I&S Routes to modernity followed by non-Western societies between 1600 and 1900. Historical experiences of non-Western societies seen in the context of European history and of development theory. Emphasizes primary sources and the techniques for posing theoretical questions of historical data. Offered: jointly with HSTAS 348.

SIS 350 Environmental Norms in International Politics (5) I&S Ingebritsen Surveys development of environmental consciousness from 1960s to present. Models of “green development”; ways in which norms for resource use have entered global politics. Patterns of state compliance with international environmental agreements, and why states fall short of meeting their international obligations. Offered: jointly with ENVIR 360/SCAND 350.

SIS 360 Technology, Growth, and Competition (5) I&S Poznanski Discusses theoretical accounts of empirical findings on technological change (invention, innovation, diffusion) and factors behind technological leadership, e.g., market structure, business cycle, state policies. Analyzes the impact of technology on economic growth, i.e., productivity. Discusses the role of technology in foreign trade, particularly in the United States.

SIS 362 Law and Justice: An Introduction to Social Theory (5) I&S Godoy Provides conceptual tools for understanding law and its role in society by acquainting students with major currents of social theory. Topics include liberalism, Marxism, critical feminist theory, and critical race theory. Offered: jointly with LSJ 362.

SIS 365 World Cities (5) I&S Kasaba, Sparke Factors that have propelled New York, London, and Tokyo into key positions in the organization of the late twentieth century international system. Asks historical and comparative questions and discusses the reasons behind the diminished position of cities such as Venice, Vienna, and Istanbul in that system.

SIS 375 Geopolitics (5) I&S An introduction to both political geography and geopolitics, addressing the fundamental links between power and space. Topics covered include: theories of power, space, and modernity; the formation of modern states; international geopolitics in the aftermath of the Cold War; the post-colonial nation-state; and the geopolitics of resistance. Offered: jointly with GEOG 375.

SIS 377 Turkic Peoples of Central Asia (3) I&S Cirtautas History of the Turkic peoples, AD 552 to present. Emphasis on current status of Turkic peoples in Central Asia. Geographical distribution, demographic data, reactions and adapta-
forced migration experiences across the global system. Explores how international policy makers, humanitarian workers, and scholars have constructed forced migration as a problem for analysis and action, including some of the ethical dilemmas involved. Recommended: SIS 325 or SIS 344. 

SIS 440 History of Communism (5) I&S Ellison Communism from its origins in Bolshevik faction of Russian social democracy to the present, treating the development of the ideology, the various communist parties, and the communist states. Recommended: two history or politics of Europe courses. Offered: jointly with HSTEU 440. 

SIS 444 Peasants in Politics (5) I&S Young Interdisciplinary study of peasants, with special attention to questions of rural transformation. Peasant involvement in an increasingly independent world. Rebellion and revolution, impact of the international market, agricultural development. Offered: jointly with POL S 446. 

SIS 446 History, Memory, and Justice (5) I&S Giebel Focuses on the complex interactions between history and historical representation, remembrance and commemoration, memory and identity, and notions of justice and reconciliation. Addresses these issues on methodological, theoretical, and practical grounds, drawing on examples from various genres, periods, and world regions. Offered. 

SIS 449 Social Transformation of Modern East Asia (5) I&S Sorensen Comparative study of social change in China, Japan, Korea, and Vietnam since 1945. Concentration on small-scale social units in rural and urban areas under both communist and capitalist political systems. Recommended: two history or anthropology of East Asia courses. Offered: jointly with ANTH 449. 

SIS 450 Political Economy of Women and Family in the Third World (5) I&S Theoretical and empirical aspects of the political economy of women and the family in the Third World during the process of development, with a focus on labor. Main theoretical approaches examined and applied to case studies from Asia and Latin America. Offered: jointly with SOC 450. 

SIS 452 Law and Politics of International Trade (5) I&S Pekkanen Survey of global trade politics in the context of the World trade Organization (WTO), with attention to positive and negative aspects of its governance. Examines the impact of the WTO legal framework on trade relations among developed and developing countries. Covers topics such as dispute settlement, development, safeguards, antidumping, intellectual property, and regionalism. 

SIS 455 Industry and the State (5) I&S Whiting Builds on states and markets approach of 200 and 201 through specific examination of effects of industry and industrial structure on political outcomes and roles of state. Emphasis on late-developing and newly developing economies. Prerequisite: SIS 200; SIS 201. 

SIS 460 Law, State, and Society (5) I&S Migdal Examination of both state law and non-state law (rules and ways of ordering behavior such as customary law, religious law, and social conventions). Focuses on the ways non-state law interacts with and affects state law and is affected by state law. 

SIS 465 Deeply Divided Societies (5) I&S Migdal Ethic conflict seen from two perspectives: 1. the study of theoretical approaches as a means of understanding deeply divided societies; 2. a focus on one or more specific conflicts. Recommended: SIS 201 or POL S 204. 

SIS 467 Nations and States in the Modern World (5) I&S Development of national consciousness in the "old nations" of Europe before the French Revolution. Replacement by the new nationalism and its spread into East Central Europe, Russia, Ibero-America, Asia, and Africa. Offered: jointly with HIST 467. 

SIS 470 Human Rights in Latin America (5) I&S Human rights in Latin America, focusing on twentieth century citizenship and current regional events and their implications for human rights. Cannot be taken for credit if GIS 174 or SISLA 120 previously taken. Offered: jointly with LSJ 410. Prerequisite: either ANTH 323, LSJ 320, LSJ 321, POL S 368, PHIL 338, SIS 200, or SIS 201. 

SIS 476 Comparative International Political Economy (5) I&S Ingebritsen, Poznanski Comparative analysis of four major approaches to international political economy: mercantilism, Marxism, liberalism, and evolutionary approach. Focus on international cooperation, social change, and economic institutions. Theoretical analysis of the four paradigms and applications to historic and current issues in international political economy: hegemonic cycle, post-communist transition, and cross-national income inequality. 

SIS 490 Special Topics (1-5, max. 15) I&S Content varies from quarter to quarter. 

SIS 491 Senior Honors Seminar (5-15) I&S Study of issues related to students' thesis topics. Develops thesis-writing skills. Open only to Jackson School honors students. 

SIS 492 Senior Honors Seminar (5-15) I&S Students write a senior thesis working with their individual writing advisers. 

SIS 494 Senior Research (2) Independent research and writing under supervision of a faculty member. Open only to International Studies majors. 

SIS 495 Task Force (5) I&S Small-group seminars address current problems in international affairs, each focusing on one specific policy question and producing a joint task force report. Restricted to senior majors in International Studies. Prerequisite: SIS 200; SIS 201; SIS 202; SIS 401. 

SIS 497 Internship (1-5, max. 15) Credit for the completion of an approved internship in international studies. Credit/no credit only. 

SIS 498 Readings in International Studies (5) I&S Reading and discussion of selected works of major importance in interdisciplinary international studies. Restricted to majors in International Studies. 

SIS 499 Undergraduate Research (1-5, max. 15). 

SIS 500 Seminar: Origins of the Modern Global System (3) Kasaba, Migdal Development of global interdependence from the fifteenth century to World War II. Interrelationship of politics and economics, International political economy from contextual, institutional, and historical perspectives. 

SIS 501 Seminar: Comparative International Studies (3) Kasaba, Poznanski Focuses on comparison across geographical areas including comparative political economy, comparative cultures, and comparative institutions. Provides familiarity with the comparative method of inquiry, an understanding of the interplay between area studies and cross-regional theories, and skills in conducting comparative research and writing. Prerequisite: ECON 200, ECON 201. 

SIS 502 Seminar: Globalization and International Relations (3) Jones Focuses on globalization, including international relations and transnational studies. Provides an understanding of the interplay of area studies with processes that transcend geographical areas and intersect political boundaries, an overview of transnationalism or international relations, and skills in undertaking a major research and writing project. 

SIS 511 Practicum: Methods in International Studies (3) Chirot Assumptions underlying leading methodologies for comparative study of societies and other large-scale social entities. Quantitative and nonquantitative methods illustrated by recent research. Prerequisite: SIS 502. 

SIS 512 Task Force in International Affairs (3) Chirot Seminar addressing a current problem in international affairs and resulting in a joint task-force report. Results presented to, and critiqued by, a distinguished outside evaluator at end of term. Prerequisite: SIS 511. 

SIS 520 Introduction to Theories and Quantitative Methods for Social Science Research (5) Selected social scientific theories and quantitative methods for students in international and area-studies programs. Introduction to methodological neoclassicism, neo-institutional analysis, "developmentalism," rational choice and dynamic institutionalist approaches, and selected theories from political science. Essentials of statistical analysis. 

SIS 522 Special Topics in Ethnicity and Nationalism (3, max. 6) Topics vary, but always focus on ethnic group relations and nationalism viewed from a broad, comparative, interdisciplinary perspective. Emphasis is heavily cross-cultural, and the geographical coverage worldwide. 

SIS 524 International Security (5) Kier, Mercer Introduces some of the major debates concerning the use of force in international politics. Covers traditional issues in international security such as alliances and the causes of war, as well as some of the new and important questions, such as explaining war outcomes and war termination. Offered jointly with POL S 524. 

SIS 534 International Affairs (3) Provides a broad understanding of international issues and United States policy. Students explore U.S. foreign policy and theories of major international actors in international trade, security, and...
strategic concerns, refugee policy, conflict resolution, development assistance, and the environment. Offered: jointly with PB AF 530/POLS 534.

SIS 542 Seminar: State and Society (5) Migdal
Examines the mutually conditioning relationship between the state and the economy in the context of the Westphalian state. Studies states as large, scale organizational and governmental units and their interactions with society. Examines the nature of the state and its relationship to the economy on different levels. Weeds that interactions on any level affect the nature of the state on other levels as well. Offered: jointly with POL S 542.

SIS 552 Law and Politics of International Trade (5) &S Peckkanen Survey of global trade politics in the context of the World Trade Organization (WTO), with attention to positive and negative aspects of its governance. Examines the impact of the WTO legal framework on trade relations among developed and developing countries. Covers topics such as dispute settlement, development, safeguards, antidumping, intellectual property, and nationalism.

SIS 553 Environment and Health in the World Trade Organization (5) Peckkanen Examines the environmental and health implications of international trade policies, focusing on the state of the World Trade Organization (WTO) jurisprudence and its interaction with sovereign laws and regulations. Cases include asbestos, reformulated gasoline, beef hormones, shrimp-turtle, and genetically modified organisms. Offered.

SIS 562 Law, Globalization, and Multinational Corporations (3) An interdisciplinary workshop that examines the role of multinational corporations in a global society. Topics include the legal construct of the multinational corporation, the multinational and the state, the multinational and human rights, and the multinational in the international arena. Offered: jointly with LAW E 512.

SIS 575 Advanced Political Geography (5) Sparke Provides resources for theorizing how political shapes and is shaped by geographical relationships. Examines how politics are situated in complex material and discursive geographies that are partly reproduced through political negotiations. Examines the role of international capital and its complex systems of social and political power relations. Offered: jointly with GEOG 575.

SIS 580 Teaching International Studies (2, max. 4) Migdal For current and prospective teaching assistants. Includes teaching writing, leading effective discussions, the art of evaluation, and teaching critical reading skills; videotaping of actual teaching sessions of participants in class. Credit/no credit only.

SIS 590 Special Topics (2-5, max. 10) Seminar. Course content varies. Offered occasionally by visiting or resident faculty.

SIS 600 Independent Study or Research (1) -

Jewish Studies

SISJE 177 The Jewish Community in the United States: Success, Influence, and Prospects (5) Burstein Examines relationships between American society and its ethnic-religious groups through study of the American Jewish community. Focuses on economic success; challenges to religious traditions; relationships between American and Jewish culture; and impact of Jewish ideas and organizations on American politics. Offered: jointly with SOC 177; S.

SISJE 250 Introduction to Jewish Cultural History (5) I&S Introductory orientation to the settings in which Jews have marked out for themselves distinctive identities as a people, a culture, and as a religious community. Examines Jewish cultural history as a production of Jewish identity that is always produced in conversation with others in the non-Jewish world. Offered: jointly with HIST 250.

SISJE 269 The Holocaust: History and Memory (5) I&S Explores the Holocaust as a crucial event of the twentieth century. Examines the origins of the Holocaust, perpetrators and victims, and efforts to come to terms with this genocide in Europe, Israel, and the United States. Offered: jointly with HIST 269.

SISJE 312 Jewish Literature: Biblical to Modern (5) I&S Examines Jewish literature from Biblical narrative and rabbinic commentary to modern prose and poetry with an emphasis on the erotic as an expression of Jewish religious and cultural identity. Examines how Jewish women's lives are written in their own voices and how they have been written by others in the non-Jewish world. Offered: jointly with WRLS 312.

SISJE 373 The Kings of Monarchic Israel (3) I&S Explores the history of the Israelite monarchy from the period of the United Monarchy (c. 1000 BCE) to the divided monarchy of the eleventh century CE. Topics include the role of the monarchy in the context of the larger Near East and the political and social implications of its collapse. Offered: jointly with HIST 373.

SISJE 375 The American Jewish Community (5) I&S Explores the history of the American Jewish community from its earliest days to the present, focusing on the role of Jewish immigrants in the development of American society. Offered: jointly with HIST 375.

SISJE 377 The American Jewish Community (5) I&S Explores the history of the American Jewish community from its earliest days to the present, focusing on the role of Jewish immigrants in the development of American society. Offered: jointly with HIST 377.

SISJE 378 Contemporary Jewish American Identities (5) I&S Explores the history of the American Jewish community from its earliest days to the present, focusing on the role of Jewish immigrants in the development of American society. Offered: jointly with HIST 378.

SISJE 399 Study Abroad — Jewish Studies (1-5, max. 15) I&S For participants in study abroad program. Specific course content varies. Courses do not automatically apply to major/minor requirements.

SISJE 438 Jewish Women in Contemporary America (5) I&S Examines how Jewish women’s identities are socially constructed and transformed in contemporary America, focusing on their role in society and their relationships with others in the non-Jewish world. Offered: jointly with WOMEN 438.

SISJE 452 The Biblical Song of Songs (3) I&S Explores the biblical Song of Songs within the context of ancient (and medieval) Near Eastern love poetry and correlates close readings of the book with various interpretations it has received from antiquity until today. No knowledge of Hebrew or the Bible is required. Offered: jointly with NEAR E 452.

SISJE 453 The Biblical Prophets (3) I&S Explores the biblical prophets (in translation) within their Near Eastern contexts. Studies them for their historicity, literary and rhetorical sophistication, and ideological agendas. This course seeks to uncover the meaning and distinctiveness of Israelite prophecy within the context of the larger Near East. No knowledge of the Bible is required. Offered: jointly with NEAR E 453.

SISJE 454 Israel: The First Six Centuries BCE (3) I&S Explores the historical and cultural development of the Israelite monarchy, with a focus on the period from the time of the Judges to the time of the Persian Empire. Offered: jointly with NEAR E 454.

SISJE 455 The Kings of Monarchic Israel (3) I&S Explores the historical and cultural development of the Israelite monarchy, with a focus on the period from the time of the Judges to the time of the Persian Empire. Offered: jointly with NEAR E 455.

SISJE 465 The Jews of Eastern Europe (5) I&S Explores the history of the Jewish community in Poland, Russia, the Habsburg Lands, and Romania from the late Middle Ages to the Holocaust. Offered: jointly with HSTEU 465.
SISJE 466 The Sephardic Diaspora: 1492-Present (5) I&S Stein Examines the history and culture of Sephardic Jewry from the expulsion from the Iberian Peninsula in 1492 to the present. Explores the creation of Sephardic communities in the Dutch and Ottoman Empires, Western Europe, the Americas, and Africa, and the history of the conversos and ‘hidden Jews.’ Offered: jointly with HSTEU 466.

SISJE 469 Enlightenment, Emancipation, Antisemitism: History of the Jews, 1770-1914 (5) I&S Stein The Jewish experience in the modern world from the European Enlightenment to the First World War. Focus on the debates surrounding Jewish emancipation, the reception of Jews within European society, modern antisemitism, nationalist movements, mass migration, and war. Offered: jointly with HSTEU 469.

SISJE 490 Special Topics (1-5, max. 15) I&S Content varies.

SISJE 495 Seminar in Jewish Studies (5) I&S Jaffee, Stein as a field-oriented field of academic inquiry. Explores the implications for Jewish Studies of its present setting within the context of the humanities and the social sciences.

SISJE 497 Field Archaeology (1-10, max. 20) Professionally-guided archaeological fieldwork at a recognized archeological dig in the United States or abroad. Offered: S.

SISJE 499 Undergraduate Research (1-5, max. 15).

Latin American Studies

SISLA 120 Introduction to Human Rights in Latin America (5) I&S Godyo Overview of human rights issues and how they have evolved in recent Latin American history, from the military dictatorships of the authoritarian period to contemporary challenges faced in the region’s democracies. Credit not allowed if LSJ 470/SIS 410 already taken.

SISLA 322 International Political Economy of Latin America (5) I&S Exploration of politics underlying Latin America’s economic development. Topics covered include import-substituting industrialization, mercantilism, the debt crisis, neoliberalism, European integration, and poverty. Review of major theoretical perspectives such as modernization theory, dependency, and the new political economy. Offered: jointly with POL S 322.

SISLA 342 Government and Politics of Latin America (5) I&S Analysis of the political dynamics of change in Latin America comparing various nations to the political problems of modernization, economic development, and social change. Offered: jointly with POL S 342.

SISLA 355 Social Change in Latin America (5) I&S Explores cultures, identities, political economy, and popular mobilization in Latin America. Examines relations of power and production between social classes and ethnic groups, as well as ideologies and intellectual movements. Offered: jointly with SOC 355.

SISLA 399 Study Abroad: Latin American Studies (1-5, max. 15) I&S For participants in study abroad program. Specific course content varies. Courses do not automatically apply to major/minor requirements.

SISLA 451 Cultural Geography of Latin America (5) I&S Interdisciplinary senior seminar examining how physical and social geographies are culturally constructed and interconnected with subjectivities and power in Latin America. Topics include identity formation grounded in particular territories and the social constitution of space via an interplay of material and cultural forces. Offered: jointly with GEOG 451.

SISLA 469 Concepts of Cannibalism in the Colonial World (5) I&S Carbon Study of textual and iconographic representations of American cannibalism in the 16th and 17th century. Introduction to research produced by literary critics, anthropologists, and historians. Prerequisite: either SPAN 303 or SPAN 316; SPAN 321 or SPAN 322; one additional 300-level course above SPAN 303. Offered: jointly with SPAN 469.

SISLA 470 Latin American Studies Internship (1-5, max. 10) Off-campus fieldwork with a community national, or international organization, in an apprenticeship or internship situation. Supervised by on-site field supervisor and Latin American Studies faculty member.

SISLA 480 Labor and Popular Movements in Latin America (5) I&S Bergquist Interdisciplinary approach to origins and trajectory of labor movement from late nineteenth century to present. Emphasis in contemporary period on popular movements, including neighborhood associations, religious base communities, women’s movement, and ethnic mobilization for democratic social and political reform. Recommended: two non-language Latin American studies courses. Offered: jointly with HSTAA 480.

SISLA 485 Cultural Studies of Latin America (5) I&S/VP/IA Steele Identify, representation, and transculturation in Latin American popular culture. Topics vary but may include, cinema, folk art, and historical, ethnographic, and travel writing. Prerequisite: either SPAN 303 or SPAN 316; SPAN 322; one additional 300-level course above SPAN 303. Offered: jointly with SPAN 485.

SISLA 486 Photography and Cultural Studies in Latin America (5) I&S/VP/IA Steele Interdisciplinary exploration of the connections between visual anthropology (ethnography through photography and film), documentary and art photography, and colonial and post-colonial discourse in Latin America during the twentieth century. Prerequisite: either SPAN 303 or SPAN 316; SPAN 322 and one additional 300-level course beyond 303. Offered: jointly with SPAN 486.

SISLA 489 The Mexico-U.S. Border in Literature and Film (5) I&S/VP/IA Dorenu, Stein Study of the border region in literature and film of the 1990s and early 2000s. Includes migration, tourism, NGOs globalization, transnational commerce, multiculturalism, and politics of gender, sexuality and race. Prerequisite: either SPAN 303 or SPAN 316; either SPAN 321 or SPAN 322; one additional 300-level course above SPAN 303. Offered: jointly with SPAN 489.

SISLA 490 Special Topics (1-5, max. 15) I&S Content varies.

SISLA 492 Latin American Studies Seminar (5, max. 15) I&S

SISLA 499 Undergraduate Research (1-5, max. 15).

Middle Eastern Studies

SISME 210 Introduction to Islamic Civilization (5) I&S/VP/IA DeYoung Major developments in Islamic civilization from advent of Islam in seventh century to present. Islamic history, law, theology, and mysticism, as well as the politics, cultures, and literatures of the various Islamic societies. Offered: jointly with NEAR E 210.

SISME 213 Introduction to the Modern Middle East (5) I&S/VP/IA Major social and political trends in the Middle East during the 18th, 19th, and 20th centuries. Basic principles of Islam and its diversity, changing balance of power during the early modern period; European colonialism and withdrawal; pan-Arabism, nationalism, feminism, and religious resurgence. Offered: jointly with NEAR E 213.

SISME 399 Study Abroad: Middle Eastern Studies (1-5, max. 15) I&S For participants in study abroad program. Specific course content varies. Courses do not automatically apply to major/minor requirements.

SISME 400 The Middle East in the Modern World (5) I&S Kasaba Economic, political, and cultural ties between the Middle East and the modern world between the eighteenth century and the present. Particular attention to the transformation of societies, formation of modern states, the relationship between Islam and democracy, and gender and society in the Middle East.

SISME 420 International Humanitarian Law (5) I&S/VP/IA Lorenz Investigates International Humanitarian Law (sometimes called the Law of Armed Conflict), the field concerned with rules developed by civilized nations to protect the victims of armed conflict, including the Geneva Conventions. Case studies include the conflict between Israel and the Palestinians, as well as developments in Afghanistan and Iraq.

SISME 430 Economic Development of the Middle East (5) I&S Kasaba Comparative examination of economic development in the Middle East. Includes population growth, agrarian change, industrialization, foreign trade, capital flows, and fiscal and monetary policies.

SISME 432 The Middle East and the World Economy (5) I&S Kasaba Early nineteenth century to the 1980s. Production and export of agricultural and raw materials, extension of loans and investments by Europeans, commercial exploitation and export of oil as major phases of economic interaction. These phases and their political repercussions; their significance and consequences.

SISME 458 Israel: Politics and Society (5) I&S Migdal Examines how parts of the mosaic of Israel’s ethnic groups and religions have interacted over time to create today’s society. Focus on politics, especially interaction of the state with the mosaic society. The religious divide; the Jewish ethnic divide; Palestinians in Israel; war and its effect on Israel; the long road to peace.

SISME 490 Special Topics (1-5, max. 15) I&S Content varies.

SISME 495 Trends in the Contemporary Middle East (3) I&S/VP/IA Perspectives on cultural, political, and other aspects of modern Middle Eastern societies. Focuses on background complexities rather than immediate political-military
confrontations. Topics vary. Offered: jointly with NEAR E 495.

SISRE 499 Undergraduate Research (1-5, max. 15).

SISRE 530 Reading Seminar on Middle East Studies (2) Middle Eastern historiography. Islamic law, Islamic theology, relations between the Middle East and the world economy, political structures, social movements in the Middle East. Credit/no credit only.

SISRE 531 Reading Seminar on Middle East Studies (2) Middle Eastern historiography. Islamic law, Islamic theology, relations between the Middle East and the world economy, political structures, social movements in the Middle East. Credit/no credit only.

SISRE 532 Reading Seminar on Middle East Studies (2) Middle Eastern historiography. Islamic law, Islamic theology, relations between the Middle East and the world economy, political structures, social movements in the Middle East. Credit/no credit only.

SISRE 560 Seminar in Turkish Studies (2, max. 12) Recent research and writings focused on the Ottoman Empire and modern Turkey. Credit/no credit only.

SISRE 590 Special Topics (3-5, max. 10) Content varies.

SISRE 600 Independent Study or Research (*).

SISRE 700 Master’s Thesis (*).

Russian, East European, and Central Asian Studies

SISRE 405 Peoples of Russia (5) I&S Traditional cultural and social organizations of the various nationalities in Russia. Particular emphasis on peoples of Siberia. Role of traditional culture in shaping contemporary lifestyles in a multiethnic, diversified setting. Prerequisite: one 200-level ANTH course or LING 203. Offered: jointly with ANTH 405.

SISRE 410 Writers and Intellectuals of Central Asia (3) I&S/VLPA Covers modern native writers and intellectuals of Central Asia and compares them with writers educated before the revolution of 1917. Prerequisite: NEAR E/ISISRE 375.

SISRE 418 Eastern Europe: the Political Economy of the Region (5) I&S Poznanski Focus on the classical command-type economy and the most recent economic and political transition in Eastern Europe. Analysis of current institutional reform, privatization, and trade relations.

SISRE 425 Anthropology of the Post-Soviet States (5) I&S Bilanik Analysis of Soviet and post-Soviet culture and identity. Historical transformations in Soviet approaches to ethnicity and nationality; contemporary processes of nationbuilding and interethnic conflict. Examination of culture through the intersection of social, political, economic, and environmental practices, and daily life. Regional focus will vary. Offered: jointly with ANTH 425.

SISRE 443 Kievan and Muscovite Russia: 850-1700 (5) I&S Waugh Development of Russia from earliest times to the reign of Peter the Great. Offered: jointly with HSTM 443.

SISRE 444 Imperial Russia: 1700-1900 (5) I&S Young Development of Russia from Peter the Great to Nicholas II. Offered: jointly with HSTEU 444.

SISRE 448 Twentieth-Century Russia (5) I&S Ellison Young From the death of Catherine the Great to Nicholas II. Offered: jointly with HSTEU 445.

SISRE 450 Survey of the Cultures of the Turkic Peoples of Central Asia (3) I&S/VLPA Nomadic and sedentary cultures of the Turkic peoples of Central Asia. Emphasis on languages, literature, and adherence to traditional modes of life. Offered: jointly with NEAR E 450.

SISRE 455 Marine Business Environment in Russia and Eastern Europe (3) I&S Kaczynski International marine business environment of Russia and the maritime nations of East Europe; their transition process from communist to free market economic systems. Covers aspects of doing business in marine-related fields such as shipping, fisheries, shipbuilding, ports, and land infrastructures, marine tourism, and water sports. Offered: jointly with SNA 455.

SISRE 490 Special Topics (1-5, max. 15) Topics vary.

SISRE 501 Bibliography and Research Methods (5) Introduction to bibliographic and other scholarly resources in field; development of research techniques. Some use of relevant language required. Required of all first-year MAIS students.

SISRE 502 Thesis Seminar (3) Required of all second-year MAIS students. Credit/no credit only.

SISRE 504 Approaches to East European Politics (3-5) Selected concepts and methodologies useful for the analysis of politics and social structure in the socialist countries of east-central and southeastern Europe. Prerequisite: permission of instructor. Offered: jointly with POL S 537.

SISRE 505 Seminar: Problems of Social and Political Development in Eastern Europe (3-6, max. 6) Research seminar dealing with selected problems of continuity and change in Eastern Europe. Prerequisite: some previous course work on Eastern Europe.

SISRE 555 Comparative Marine Business in the North Pacific (3) Strategies of Russian, Canadian, Japanese, and American enterprises and governments in promotion of marine business in the North Pacific. Socio-economic characteristics of the four powers; role of public and private sectors in foreign trade and investment; Russia's transition to free-market economic system; and business practices in the region. Offered: jointly with SMA 555.

SISRE 590 Special Topics (2-5, max. 10) Course content varies. Offered occasionally by visitors or resident faculty.

SISRE 600 Independent Study or Research (*).

SISRE 700 Master’s Thesis (*).

South Asian Studies

SISSA 200 South Asia Today (5) I&S Interdisciplinary introduction to the field of South Asian Studies. Overview of the topographic, social, and linguistic geography and history of India, Pakistan, Bangladesh, Sri Lanka, and Nepal. Examines politics, economy, social structure, religion, cultural production and the arts, popular culture, and transnationalism.

SISSA 316 Modern South Asia (5) I&S Sivarmanakrishnan Twentieth-century history and society of Indian subcontinent. Topics include nationalism, rural and urban life, popular culture gender and environmental politics. Offered: jointly with ANTH 316.

SISSA 339 Social Movements in Contemporary India (5) Ramamurthy, Sivarmanakrishnan Covers issues of social change, economic development, and identity politics in contemporary India studied through environmental and women’s movements. Includes critiques of development and conflicts over forests, dams, women’s rights, religious community, ethnicity, and citizenship. Offered: jointly with WOMEN 339/ANTH 339.

SISSA 340 Government and Politics of South Asia (5) I&S Comparison of problems of national integration and political development in India, Pakistan, and Ceylon. Offered: jointly with POL S 340.

SISSA 341 Political Violence and the Post-Colonial State in South Asia (5) I&S Examines theoretical approaches to the analysis of collective, state, and anti-state violence in post-colonial South Asia through the study of specific cases of political violence in modern India, Pakistan, Sri Lanka, and Nepal. Offered: jointly with ANTH 341.

SISSA 343 Comparative Geographies of Youth (5) I&S Jeffrey Examines how three key global processes - rising levels of formal education, changing health regimes, and environmental transformation - are shaping youth in the US and South Asia. Examines ways young people rework broader structures, paying particular attention to their economic livelihoods, cultural practices, and political engagements. Offered: jointly with GEOG 343; A.

SISSA 386 Introduction to the Philosophical Systems of India (5) I&S Pott Fundamental views of classical Indian philosophical schools on epistemology and metaphysics through readings in translation of basic works. Nyaya, Vaisesika, Samkhya, Yoga, Jain philosophy, Viṣṇunādana and Madhyamika Buddhism, Advaita Vedanta,
SISSA 399 Study Abroad: South Asian Studies (1-5, max. 15) I&S For participants in study abroad program. Specific course content varies. Courses do not automatically apply to major/ minor requirements.

SISSA 417 Political Economy of India (5) I&S Analysis of relationships among processes of economic change, political institutions, and structures of political power in contemporary India. Includes contrasting approaches to Indian economic development, land reform, radical and agrarian political movements, and role of foreign aid. Offered: jointly with POL S 417.

SISSA 436 Social and Political Geographies of South Asia (5) I&S Jeffrey Ramamurthy, Sivaramakrishnan Introduces the social and political geographies of South Asia through reference to agrarian change in India. Outlines key concepts related to the reproduction of inequality in the region, particularly theories of caste, class, gender, and religious communalism, and examines the mechanisms through which these inequalities are reproduced in South Asia. Offered: jointly with GEOG 436, Sp.

SISSA 490 Special Topics (1-5, max. 15) I&S Topics vary.

SISSA 494 Ramayana in Comparative Perspective (5) VLPA Pauwels Examines and compares different versions (mainly South Asian) of the Ramayana, including the widely popular television version. Focuses on some famous and controversial passages, with special attention to gender issues. Incorporates background readings from the most recent research. Offered: jointly with ASIAN 494.

SISSA 498 Undergraduate Colloquium on South Asia (5) I&S Interrelationship of the various social science disciplines in the study of South Asian history and culture.

SISSA 499 Undergraduate Research (1-5, max. 15).

SISSA 536 Advanced Research Seminar on South Asian Geographies (5) Jeffrey Examiners geographies of social inequality in South Asia through reference to how space, place, and the environment are shaping practices of political struggle in the region. Considers how liberalization, democratization and religious communalization are changing the political geography of South Asia. Offered jointly with GEOG 536, Sp.

SISSA 539 Social Movements in Contemporary India (5) Ramamurthy, Divyakshi Sivaramakrishnan Covers issues of social change, economic development, and identity politics in contemporary India studied through environmental and women’s movements. Includes critiques of development and conflicts over forests, dams, women’s rights, religious community, ethnicity, and citizenship. Offered: jointly with WOMEN 539/ANTH 539.

SISSA 590 Special Topics (2-5, max. 10) Seminar. Course content varies. Offered occasionally by visitors or resident faculty.

SISSA 600 Independent Study or Research (*).

SISSA 700 Master’s Thesis (*).

Southeast Asian Studies

SISSA 221 History of Southeast Asia (5) I&S Giebel, Sears Surveys Southeast Asian civilizations at the outset of Western colonial rule; the colonial impact on the traditional societies of Burma, Thailand, Cambodia, Laos, Vietnam, Malaysia, Indonesia, and the Philippines; nineteenth- and twentieth-century nationalist and revolutionary movements; emergence of Southeast Asia as a region in the modern world. Offered: jointly with HSTAS 221.

SISSA 265 The Viet Nam Wars (5) I&S Giebel Recent Vietnamese history and struggles for independence and national unification of South Vietnam. Vietnamese occupation, American intervention, and internal divisions. Covers historical roots and contemporary contexts of revolution and war, objectives and motivations of participants, and the enormous human costs. Emphasizes socio-cultural changes and wars’ legacies. Offered: jointly with HSTAS 465.

SISSA 469 Topics in Southeast Asian History and Society (5) I&S Introduces major issues within the history and culture of one country of Southeast Asia. Content varies. Topics may include religion, economics, colonialism, people perceptions on gender, labor history, literatures, popular culture, and performing arts. Focuses on a different Southeast Asian country each time offered.

SISSA 490 Special Topics in Southeast Asian Studies (1-5, max. 15) I&S Content varies.

SISSA 499 Undergraduate Research (1-5, max. 15)

Linguistics

French Linguistics

FRLING 400 The Syntactic Structure of French (5) VLPA Scientific study of the syntax of French: phrase structure and movement, with emphasis on passives, relatives, and interrogatives. Prerequisite: either FRENCH 203, FRENCH 223, or FRENCH 234; either LING 200 or LING 400.

FRLING 401 The Morphological Structure of French (5) VLPA Klausenburger Linguistic study of French morphology. Prerequisite: either FRENCH 203, FRENCH 223, or FRENCH 234; either LING 200 or LING 400.

FRLING 402 The Phonological Structure of French (5) VLPA Klausenburger The phonological component of the generative grammar of French; representations of syllabic and segmental units, phonological rules, distinctive features and their articulatory correlates. Prerequisite: either FRENCH 203, FRENCH 223, or FRENCH 234; either LING 200 or LING 400.

FRLING 403 Background of Modern French (5) VLPA Klausenburger Linguistic analysis of the important developments in the history of the French language from its Latin origin to contemporary speech. Prerequisite: either FRENCH 203, FRENCH 223, or FRENCH 234; either LING 200 or LING 400.

FRLING 405 Linguistics and the Teaching of French (5) VLPA Herschensohn A selection of linguistics that can be particularly helpful to the French teacher. Prerequisite: either FRENCH 203, FRENCH 223, or FRENCH 234; either LING 200 or LING 400.
LING 100 Fundamentals of Grammar (5) VLPA Introduction to basic grammatical concepts and terminology. Specifically intended for students planning to take a foreign language or linguistics. Does not count toward the linguistics major or minor.

LING 101 Fundamentals of Pronunciation for Language Learners (5) VLPA Kaisse Fundamentals of pronunciation for language learners. Introduces students to systematic characteristics of language sounds through examination of specific languages and their differences from English. Includes a laboratory component developing perceptual and productive skills of non-English sounds.

LING 200 Introduction to Linguistic Thought (5) I&S/ VLPA QSR Language as the fundamental characteristic of the human species; diversity and complexity of human languages; phonological and grammatical analysis; dimensions of language use; language and writing; impact of historical linguistics on contemporary theory. Not open for credit to students who have completed LING 201.

LING 201 Introduction to Linguistic Theory and Analysis (5) I&S/ VLPA, QSR Background and scope of modern linguistics; behaviorist versus rationalist theories of language; universal and cognitive aspects of language structure; interaction of genetic and social factors in language formation; linguistic analysis. Not open for credit to students who have completed LING 200.

LING 203 Introduction to Anthropological Linguistics (5) I&S/ VLPA, Hargus, Hunn, Palmer Linguistic methods, theories used within anthropology. Basic structural features of language; human language and animal communication compared; evidence for the innate nature of language. Language and culture; linguistic relativism, ethnography of communication, sociolinguistics. Language and nationalism, language politics in the U.S. and elsewhere. Offered: jointly with ANTH 203.

LING 220 Origins of the Germanic Languages (5) VLPA Barrack, Voyles Introduction to basic grammatical concepts, terminology, and linguistics with emphasis on German-English relationship. Overview of phonology, morphology, syntax, and history of Germanic languages and people, both ancient and modern. Languages covered include Old, Middle, and New High German; English, Frisian, Dutch, Old Saxon, and Gothic. Taught in English. Offered: jointly with GERMAN 220; AWSpS.

LING 242 Introduction to Meaning (5) VLPA Ogihara Non-technical introduction to meaning in language and how it functions in communication and thinking. Discussion of how and why meanings of words change through time. Prerequisite: either LING 200, LING 201, ANTH/LING 203, or LING 400.

LING 270 Introduction to Perl Programming for Linguists (5) Bender Fundamental programming techniques, including data types, control flow, regular expressions, file handling, GUI design, and CGI interaction. Content relates to a variety of linguistic concepts including syntax, morphology, phonology, lexicton building and foreign language corpora. No previous programming necessary; however, a background in general linguistic theory is assumed. Offered: W.

LING 300 Introduction to the Languages of the World (5) VLPA Bram, Klausenburger A survey of the world’s languages, focusing on their syntactic, phonological, and morphological properties. Prerequisite: either LING 200, LING 201, ANTH/LING 203, or LING 400.

LING 333 Linguistics and Society (3) I&S/ VLPA Interaction of language, culture, and society, and the relationship of linguistic theory to societal problems. Ethical and political considerations involved in the application of linguistic theory.

LING 347 Psychology of Language I (5) I&S/ VLPA Corina, Osterhout Introduction to the study of language, including language structure, speech perception, language acquisition, psychological processes underlying comprehension and production of language, the relation between brain and language, and the question of the species-specificity of human language. Prerequisite: 2.0 in either PSYCH 209 or either LING 200 or LING 201. Offered: jointly with PSYCH 347.

LING 372 Language and Translation (5) VLPA Tarlinskaja Role of linguistic concepts in the process of translation from one language to another. Attention to both language universals and language particulars.

LING 390 Foreign Studies in Linguistics (3-5, max. 10) I&S For students who take linguistics courses while participating in a University of Washington study abroad program and for which there is no direct University of Washington equivalent.

LING 400 Survey of Linguistic Method and Theory (5) I&S/ VLPA, QSR Major linguistic theories in phonology, syntax and semantics; linguistic analysis and argumentation. Intended for students who plan to pursue further linguistic or language-related study. Students who have taken LING 200 or 201 should not take LING 400, although credit is allowed for both if 400 is taken after 200 or 201.

LING 401 The Linguistic, Philosophical, and Political Thought of Noam Chomsky (3) I&S/ VLPA Relation of current work in Chomskyan linguistics to philosophical, psychological, political, and educational thought.

LING 403 Structure of American Sign Language (5) VLPA Hargus Introduction to the phonological, morphological, and syntactic structure of American Sign Language. Topics include acquisition, sociolinguistics, neurolinguistics, lexicography, history, and culture. Knowledge of American Sign Language is not required. Prerequisite: LING 200, 201, 203, or 400.

LING 404 Indo-European (3) VLPA Voyles Overview of the Indo-European languages, of comparative method, and of the phonology, morphology, and syntax of reconstructed Indo-European. Grammatical analyses and texts from various attested ancient and modern Indo-European languages, selected according to the interests of the students.

LING 405 Indo-European (3) VLPA Voyles Overview of the Indo-European languages, of comparative method, and of the phonology, morphology, and syntax of reconstructed Indo-European. Grammatical analyses and texts from various attested ancient and modern Indo-European languages, selected according to the interests of the students.

LING 406 Indo-European (3) VLPA Voyles Overview of the Indo-European languages, of comparative method, and of the phonology, morphology, and syntax of reconstructed Indo-European. Grammatical analyses and texts from various attested ancient and modern Indo-European languages, selected according to the interests of the students.

LING 411 Native Languages and Language Families of Washington State (3) VLPA Hargus Survey of linguistic structures of Washington native languages. Language families consist of Salish, Wakashan, Chemakuan, Athabaskan, Chinookan, Sahaptian, Cayuse. Structure and origin of Chinook jargon. Prerequisite: LING 450; either LING 461 or LING 481.

LING 415 History of the German Language (5) VLPA Traces the history of the German language from early Germanic to the present. Recommended: LING 200 and GERMAN 203 Offered: jointly with GERMAN 452.

LING 419 The Development of the Italian Language (5) VLPA Historical survey of Italian phonology, morphology, and syntax. Evolution of the language is illustrated with study of pertinent documents from various periods. Prerequisite: ITAL 303; either LING 400 or ROLLING 401. Offered: jointly with ITAL 400.

LING 432 Sosiolinguistics (5) I&S/ VLPA Wassink Social variation in the phonology, morphology, syntax, lexicon of languages and dialects. Nonstandard language, diglossia, pidgins and creoles, gender differences, bi- and multilingualism, ethnography of speaking, pragmatics, and language attitudes. Prerequisite: either LING 200 or LING 400; recommended: prior or concurrent registration in LING 450. Offered: jointly with ANTH 432.

LING 433 Language Politics and Cultural Identity (3) I&S/ VLPA Bilański Theories and case studies of the power of language an how it is manipulated. Multilingualism, diglossia, Role of language and linguistics in nationalism. Standardization, educational policy, language and ethnicity. World languages, language death
LING 441 Linguistics and Poetic Language (3) VLPA Introduction to the Relationship between linguistic structures, linguistic universals, and the poetic uses of language; linguistic description in the analysis of literature. Prerequisite: either LING 200, LING 201, ANTH/LING 203, or LING 400.

LING 442 Semantics I (5) NW/VLPA Oghara Introduction to the study of meaning as part of linguistic theory. Relation of semantics to syntax. Emphasis on semantics and pragmatics. Discussion of various semantic phenomena in natural language that are theoretically relevant. Prerequisite: LING 461, Syntax 1.

LING 443 Philosophy and Linguistics (3) I&S/ VLPA Philosophical problems that arise in the attempt to understand current linguistic theories and the implications of linguistics for philosophy. Offered: jointly with PHIL 443.

LING 444 Philosophy of Language-Pragmatics (3) I&S/VLPA Potter Language as communicative activity. Speech act theory in Austin, Grice, and contemporary writings. Applications to problems of reference, presupposition, metaphor, relativism. Offered: jointly with PHIL 444.

LING 445 Descriptive Aspects of English as a Foreign Language (3) VLPA Linguistic analysis as a basis for the teaching of English as a foreign language; language as rule-governed behavior. Prerequisite: either LING 200, LING 201, ANTH/LING 203, or LING 400.

LING 446 Descriptive Aspects of English: Phonology and Morphology (3) VLPA Hargus, Kaisse Descriptively oriented analysis of English phonology and morphology; dialect differences. Prerequisite: either LING 200, LING 201, ANTH/ LING 203, or LING 400.

LING 447 Psycholinguistics of Language II (6) I&S/ VLPA Corina, Osterhout Psychological principles applied to linguistic development and organization; language in both its stimulus and response aspects. Prerequisite: 2.0 in either PSYCH 347, PSYCH 355, or LING 400. Offered: jointly with PSYCH 447.

LING 449 Second-Language Learning (5) VLPA Herschensohn, Tarlinskaja Issues related to the linguistic aspects of second-language learning. Prerequisite: either LING 200, LING 201, ANTH/LING 203, or LING 400.

LING 450 Introduction to Linguistic Phonetics (5) NW/VLPA Wright Introduction to the articulatory and acoustic correlates of phonological features. Issues covered include the mapping of dynamic events to static representations, phonetic evidence for phonological description, universal constraints on phonological structure, and implications of psychological speech-sound categorization for phonological theory. Prerequisite: either LING 200 or LING 400.

LING 451 Phonology I (5) I&S/VLPA Hargus, Kaisse Speech sounds, mechanism of their production, and structuring of sounds in languages; generative view of phonology; autosegmental and metrical phonology. Prerequisite: LING 450.

LING 452 Phonology II (5) I&S/VLPA Hargus, Kaisse Speech sounds, mechanism of their production, and structuring of sounds in languages; generative view of phonology; autosegmental and metrical phonology. Prerequisite: LING 451.

LING 454 Methods in Comparative Linguistics (3) VLPA Krasnoperov, Voyles Method and theory of historical and comparative linguistics. Problems of morphological, morphological, syntactic, and semantic change and reconstruction. Prerequisite: either LING 200, LING 201, ANTH/LING 203, or LING 400.

LING 455 Areal Linguistics (3, max. 6) I&S/VLPA Issues involved in classification of languages. Systems of classification based on structure, word order, areal features. Ways in which languages may be classified for different purposes. Processes such as borrowing, vocabulary specialization, lexical change, and language death and revival. Prerequisite: either LING 200, LING 201, ANTH/LING 203, or LING 400. Offered: jointly with ANTH 455.

LING 456 Language Development (5) I&S/ VLPA First-language acquisition and use by children. Emphasis on theoretical issues and research techniques. Prerequisite: 2.0 in either PSYCH 206, PSYCH 306, LING 200, or LING 400. Offered: jointly with PSYCH 457.

LING 457 Language Development (5) I&S/ VLPA First-language acquisition and use by children. Emphasis on theoretical issues and research techniques. Prerequisite: 2.0 in either PSYCH 206, PSYCH 306, LING 200, or LING 400. Offered: jointly with PSYCH 457.

LING 458 Language and Gender (5) I&S/VLPA Bilaniuk Survey of the theoretical trends, methods, and research findings on the relationship between language and gender. Focus on power relations in gendered language use. Extensive study of research based on conversational analysis. Prerequisite: LING 200; either LING 201, LING 203, or ANTH 203. Offered: jointly with ANTH 450/WOMEN 450.

LING 461 Syntax I (5) I&S/VLPA Brame, Contreras, Kim, Newmeyer, Zagona Study of the structural properties of language; introduction to generative transformational syntax. Prerequisite: either LING 200 or LING 400.

LING 462 Syntax II (5) I&S/VLPA Brame, Contreras, Kim, Newmeyer, Zagona Study of the structural properties of language; introduction to generative transformational syntax. Prerequisite: LING 461.

LING 463 Syntax III (4) I&S/VLPA Brame, Contreras, Kim, Newmeyer Study of the structural properties of language; introduction to generative transformational syntax. Prerequisite: LING 462.

LING 472 Introduction to Computational Linguistics (5) NW/VLPA Hoard Introduction to computer applications of linguistic theory, including syntactic processing, semantic and pragmatic interpretation, and natural language generation. Prerequisite: either LING 200 or LING 400; either LING 461 or CSE 321. Offered: jointly with CSE 472.

LING 479 Semantics II (3) I&S/NW/VLPA Oghara Formal characterization of linguistic meaning. Emphasis on nature and purpose of formal semantics and on its relation to formal syntax. Prerequisite: LING 442. Offered: jointly with PHIL 479.

LING 480 Topics in Linguistics (3, max. 12) VLPA Introduction to an area of linguistic study not covered by the regular departmental course offerings.

LING 481 Introduction to Morphology (5) VLPA Brame, Hargus, Kaisse, Newmeyer Study of words and the processes by which they are formed. Morphological processes in a wide variety of languages. Prerequisite: either LING 200 or LING 400.

LING 484 Lexical Semantics and the Lexicon (3) VLPA Kim Role of the lexicon in syntax and semantics. Topics include the syntax-lexicon mapping; theories of argument structure; complex predicate formation and lexical subordination; the lexicon and language acquisition; the role of the lexicon in linguistic theory; and the lexicon and sentence processing. Prerequisite: LING 461.

LING 490 Undergraduate Fieldwork (1-3, max. 6) Individual consultation with faculty member and supervised practical experience in a broad range of industry, community, clinical settings dealing with linguistic issues. Credit/no credit only. Offered: AWSpS.

LING 499 Undergraduate Research (1-5, max. 10) Credit/no credit only.

LING 501 Field Methods (3) Guided analysis of a language unfamiliar to all students of the class; construction of a grammar based on material elicited from native informant. Prerequisite: LING 452, LING 462, or LING 508.

LING 502 Field Methods (3) Guided analysis of a language unfamiliar to all students of the class; construction of a grammar based on material elicited from native informant. Prerequisite: LING 452, LING 462, or LING 508.

LING 503 Field Methods (3) Guided analysis of a language unfamiliar to all students of the class; construction of a grammar based on material elicited from native informant. Prerequisite: LING 452, LING 462, or permission of instructor.

LING 507 Syntactic Theory I (4) Introduction to the principles and parameters model of syntactic theory. The lexicon and its relation to syntactic representations. Syntactic modules and problems. Problem solving.

LING 508 Syntactic Theory II (4) Further explorations in principles and parameters syntax. Topics include logical form, island phenomena, locality restrictions, and licensing. Prerequisite: LING 507 or permission of instructor. Offered: W.

LING 509 Syntactic Theory III (4) Focus on primary readings in syntactic theory, from classic
papers on constraints and the architecture of grammar to recently published articles. Prerequisite: LING 506 or permission of instructor. Offered: Sp.

LING 514 Seminar in Comparative Linguistics (3) Kaisse Nineteenth- and twentieth-century theories of phonological change. Prerequisite: LING 404 or permission of instructor.

LING 515 Topics in the History of Genetic Languages (5) Barrack, Voyles Topics in diachronic studies of Germanic languages such as Gothic, Old High German, Old Saxon.

LING 519 Mathematical Models of Grammar (3) Brame, Ohashi Study of some mathematical models of language recognition, emphasizing context-free and context-sensitive grammars. Prerequisite: graduate standing in mathematics, linguistics, or psychology, or permission of instructor.

LING 522 Topics in the History of Linguistics (3) Newmeyer Intensive investigation of the main trends in the history of linguistics, concentrating on the development of nineteenth-century historical linguistics, the various schools of structural linguistics, and transformational-generative grammar. Prerequisite: LING 451.

LING 524 Seminar in Theoretical Linguistics (4, max. 8) Individual and joint research on selected topics in theoretical linguistics. Topics change each quarter. Typical topics are semantics, generative grammar, phonological theories. Prerequisite: LING 453, LING 463.

LING 525 Seminar in Theoretical Phonology (4, max. 12) Individual and joint research on selected topics in theoretical phonology. Topics vary. Typical offerings include phonology and the lexicon, syntax and phonology, phonological representations. Prerequisite: LING 452.

LING 530 Dialectology (3) The principles of dialect deviation as related to linguistic structure and usage. Prerequisite: LING 452, LING 462, LING 506, or permission of instructor. Offered: jointly with ANTH 530.

LING 531 Problems in Romance Linguistics (2-5, max. 15) Group seminar, or individual conferences are scheduled under this number to meet special needs. Prerequisite: permission of graduate program coordinator. Offered: jointly with ROLING 531.

LING 550 Advanced Phonology (2-3) Hargus, Kassee Problems in phonological theory, generative phonology, phonological change. Theories of prosody. Prerequisite: LING 452.

LING 551 Advanced Phonology (2-3) Hargus, Kassee Problems in phonological theory, generative phonology, phonological change. Theories of prosody. Prerequisite: LING 452.

LING 552 Advanced Phonology (2-3) Hargus, Kassee Problems in phonological theory, generative phonology, phonological change. Theories of prosody. Prerequisite: LING 452.

LING 553 Analysis of Linguistic Structures (3, max. 6) Syntactic, semantic, and/or phonological analysis. Languages to be analyzed vary. Prerequisite: permission of instructor. Offered: jointly with ANTH 553.

LING 554 Advanced Linguistic Phonetics (3, max. 9) Wright, Wassink Individual and joint projects on selected topics in theoretical and experimental phonetics. Topics may include articulatory timing, the phonetics phonology interface, and constraints and constraint interaction. Prerequisite: LING 450 or LING 452. Offered: Sp.

LING 561 Advanced Syntax (2-3, max. 9) Advanced study in modern syntactic theory. Topics change each quarter. Typical topics are history of transformational grammar, anaphora, logical form. Prerequisite: LING 461, LING 462.

LING 562 Advanced Syntax (2-3, max. 9) Advanced study in modern syntactic theory. Topics change each quarter. Typical topics are history of transformational grammar, anaphora, logical form. Prerequisite: LING 461, LING 462.

LING 563 Advanced Syntax (2-3, max. 9) Advanced study in modern syntactic theory. Topics change each quarter. Typical topics are history of transformational grammar, anaphora, logical form. Prerequisite: LING 461, LING 462.

LING 566 Introduction to Syntax for Computational Linguistics (3) Bender Introduction to syntactic analysis and concepts with emphasis on the formally precise encoding in linguistic hypotheses and the design of grammars that can be scaled to practical applications. Coursework progressively builds up a consistent grammar for a fragment of English, while also considering data and phenomena from other languages. Offered: A.

LING 567 Knowledge Engineering for Deep Natural Language Processing (3) Bender Techniques and theoretical issues relating to the development of knowledge engineering resources required for deep processing (symbolic or hybrid), focusing on grammar engineering and semantic representations.

LING 575 Topics in Computational Linguistics (3, max. 15) In-depth study of a particular area of computational linguistics, with hands-on experience. Prerequisite: LING 570 and 571, or permission of instructor. Offered: WSP.

LING 579 Comparative Altaic Linguistics (3) Comparative phonology and morphology of Mongolian, Turkic, and other Altaic languages. Prerequisite: permission of instructor. Offered: jointly with ALTAI 579.

LING 580 Problems in Linguistics (2-3, max. 12) Advanced study in current theories of syntax, semantics, phonology, or morphology.

LING 590 Graduate Fieldwork (1-3, max. 6) Individual consultation with faculty member and supervised practical experience in a broad range of industry, community, clinical settings dealing with linguistic issues. Offered: AWSpS.

LING 599 Linguistics Colloquium (1, max. 6) Seminar attended by faculty and graduate students interested in research in progress and topics of general interest. Presentation of two seminars required for doctoral students. Prerequisite: permission of instructor.

LING 600 Independent Study or Research (*) .

LING 700 Master's Thesis (*) .

LING 800 Doctoral Dissertation (*) .

Romance Linguistics

ROLING 402 Historical Romance Linguistics (5) VLPA Klausenburger Comparative historical survey of the development of the principal Romance tongues. Prerequisite: LING 400.

ROLING 490 Senior Essay (2) VLPA Essay on linguistic problem of student’s choice written with faculty consultant.

ROLING 505 Advanced Romance Linguistics (5) Klausenburger, Zagona Advanced problems in the phonological, morphological, and syntactical analysis of the Romance languages. Descriptive, comparative, and historical considerations. Prerequisite: permission of instructor.

ROLING 506 Advanced Romance Linguistics (5) Klausenburger, Zagona Advanced problems in the phonological, morphological, and syntactical analysis of the Romance languages. Descriptive, comparative, and historical considerations. Prerequisite: permission of instructor.

ROLING 518 Foreign Language Teaching Methodology (2) Brandl Current foreign language teaching methods and approaches. Learning and teaching strategies and techniques for the four skills (reading, writing, speaking, listening) including cultural notions. Current and future trends in pedagogy and technology.

ROLING 521 Seminar in Romance Linguistics (5) Contreras, Klausenburger, Zagona Specific problems in linguistic analysis of the Romance languages. Prerequisite: permission of instructor.

ROLING 522 Seminar in Romance Linguistics (5) Contreras, Klausenburger, Zagona Specific problems in linguistic analysis of the Romance languages. Prerequisite: permission of instructor.

ROLING 531 Problems in Romance Linguistics (2-5, max. 15) Group seminar, or individual conferences are scheduled under this number to meet special needs. Prerequisite: permission of graduate program coordinator. Offered: jointly with LING 531.

ROILING 551 Romance Linguistics: History, Methodology, and Bibliography (5) For new graduate students in the Romance linguistics program. History of Romance linguistics and linguistic science in the nineteenth and twentieth centuries as it relates to Romance studies. Comparative and descriptive methods used in contemporary scholarship. Prerequisite: LING 200, LING 400, or equivalent.

ROLING 600 Independent Study or Research (*) .

Spanish Linguistics

SPLING 400 The Syntactic Structure of Spanish (5) VLPA Strozer, Zagona Scientific study of the syntax of Spanish: structure of phrases, transformationally derived structures, grammatical relations, principles of interpretation. Prerequisite: either SPAN 301 or SPAN 314; either ANTH 203, LING 200, LING 201, LING 202.
203, LING 400, or SPAN 323. Offered: jointly with SPAN 400.

SPLING 401 The Morphological Structure of Spanish (5) VLPA Strozer, Zagona Principles of word formation, including derivational and inflectional morphology. Relationship between inflectional morphology and other components of grammar. Prerequisite: either SPAN 301 or SPAN 314; either ANTH 203, LING 200, LING 201, LING 203, LING 400, or SPAN 323. Offered: jointly with SPAN 401.

SPLING 402 The Phonological Structure of Spanish (5) VLPA Strozer, Zagona Phonological component of the generative grammar of Spanish; representations of syllabic and segmental units, phonological rules, distinctive features and their articulatory correlates. Prerequisite: either SPAN 301 or SPAN 314; either ANTH 203, LING 200, LING 201, LING 203, LING 400, or SPAN 323. Offered: jointly with SPAN 402.

SPLING 403 The Evolution of the Spanish Language (5) VLPA Anderson, Strozer Problems of Spanish grammar. Difference from English grammar. Techniques for the effective teaching of Spanish. Prerequisite: either SPAN 301 or SPAN 316; either ANTH 203, LING 200, LING 201, LING 203, LING 400, or SPAN 323. Offered: jointly with SPAN 403.

SPLING 406 Advanced Spanish Grammar (5) VLPA Anderson, Strozer An introduction to dialectical variants of Spanish. Consider standardization and the real academia; variation and change; pragmatics and politeness; Spanish in contact; sound, word formation, and grammar variation. Taught in Spanish. Prerequisite: either SPAN 301 or SPAN 314; either SPAN 323, LING 200, or LING 400. Offered: jointly with SPAN 406.

SPLING 407 Dialects of World Spanish (5) Introduction to dialectical variants of Spanish. Considers standardization and the real academia; variation and change; pragmatics and politeness; Spanish in contact; sound, word formation, and grammar variation. Taught in Spanish. Prerequisite: either SPAN 301 or SPAN 314; either SPAN 323, LING 200, or LING 400. Offered: jointly with SPAN 407.

SPLING 409 Spanish Phonetics (5) VLPA Analysis of sounds: training in pronunciation, intonation, and close transcription of Spanish language phenomena. Prerequisite: either SPAN 301 or SPAN 314; either ANTH 203, LING 200, LING 201, LING 203, LING 400, or SPAN 323. Offered: jointly with SPAN 409.

Mathematics

MATH 098 Intermediate Algebra (0) Intermedi-ate algebra equivalent to third semester of high school algebra. Instruction provided by community colleges on UW campus. Extra fee required. Replaces MATH 101. Offered: AWSp.

MATH 103 Introduction to Elementary Functions (5) Continues the study of algebra begun in 100 and 102 with emphasis on functions (polynomial, rational, logarithmic, exponential, and trigonometric). Open only to students who have completed 102. Prerequisite: either score of 26-56% on MATHEA placement test or MATH 102. Offered: AWSp.

MATH 107 Mathematics: A Practical Art (5) NW, QSR For students who have at least 1.5 years of high school algebra and do not plan to take additional mathematics. The exponential function; how it applies to a wide variety of phenomena. Elementary probability and statistics; their use in a variety of applications. Offered: WSp.

MATH 111 Algebra with Applications (5) NW, QSR Use of graphs and algebraic functions as found in business and economics. Algebraic and graphical manipulations to solve problems. Exponential and logarithmic functions; various applications to growth of money. Prerequisite: either 2.0 in MATH 098, 2.0 in MATH 102, 2.0 in MATH 103, score of 35% on MATHIA placement test, or score of 56% on MATHEAP placement test. Offered: AWSp.

MATH 112 Application of Calculus to Business and Economics (5) NW, QSR Rates of change, tangent, derivative, accumulation, area, integrals in specific contexts, particularly economics. Techniques of differentiation and integration. Application to problem solving. Optimization. Credit does not apply toward a mathematics major. Prerequisite: 2.0 in MATH 111. Offered: WSp.

MATH 120 Precalculus (5) NW Basic properties of functions, graphs; with emphasis on linear, quadratic, trigonometric, exponential functions and their inverses. Emphasis on multi-step problem solving. Prerequisite: either 2.5 in MATH 098, 3.0 in MATH 103, score of 60% on MATHEIA test, score of 40% on MATHPC placement test, or score of 77% on MATHEA placement test. Offered: AWSp.

MATH 124 Calculus with Analytic Geometry I (5) NW, QSR First quarter in calculus of functions of a single variable. Emphasizes differential calculus. Emphasizes applications and problem solving using the tools of calculus. Prerequisite: 2.5 in MATH 120, score of 68% on MATHPC placement test, score of 75% on MATHEC placement test, or score of 2 on AP test. Offered: AWSp.

MATH 125 Calculus with Analytic Geometry II (5) NW Second quarter in the calculus of functions of a single variable. Emphasizes integral calculus. Emphasizes applications and problem solving using the tools of calculus. Prerequisite: either 2.0 in MATH 124, score of 3 on AB advanced placement test, or score of 3 on BC advanced placement test. Offered: AWSp.

MATH 126 Calculus with Analytic Geometry III (5) NW Third quarter in calculus sequence. Sequences, series, Taylor expansions, and an introduction to multivariable differential calculus. Prerequisite: either 2.0 in MATH 125, 2.0 in MATH 145, 2.0 in MATH 146, score of 5 on AB advanced placement test, or score of 4 on BC advanced placement test. Offered: AWSp.

MATH 134 Accelerated [Honors] Calculus (5) NW Covers the material of 124, 125, 126, 307, 308, 318. First year of a two-year accelerated sequence. May receive advanced placement (AP) credit for 125 after taking 134. For students with above average preparation, interest, and ability in mathematics. Offered: A.

MATH 135 Accelerated [Honors] Calculus (5) NW Covers the material of 124, 125, 126, 307, 308, 318. First year of a two-year accelerated sequence. May not receive credit for both 126 and 136. For students with above average preparation, interest, and ability in mathematics. Offered: W.

MATH 144 Calculus for Life Sciences (5) NW, QSR Curtis, Smith, Tuncel Introduction discrete probability, with examples from the life sciences. Exponential and logarithmic functions: exponential growth and decay. Prerequisite: either 2.5 in MATH 120, score of 68% on MATHPC placement test, score of 75% on MATHEC placement test, or score of 2 on advanced placement test.

MATH 145 Calculus for Life Sciences (5) NW, QSR Curtis, Smith, Tuncel Differential and integral calculus, with examples from the life sciences. Applications of the derivative to curve sketching; min/max problems. Antiderivatives and the fundamental theorem of calculus with applications. Continuous probability distributions; Normal and Poisson distribution. Prerequisite: either 2.0 in MATH 124, 2.0 in MATH 144, 3.2 in MATH 120, score of 75% on MATH PC placement test, or score of 3 on advanced placement test.

MATH 146 Calculus for Life Sciences (5) NW, QSR Curtis, Smith, Tuncel Further applications of integration; elementary differential equations, with examples from the life sciences. Growth models; Leslie matrices; compartment models. Prerequisite: either 2.0 in MATH 125 or 2.0 in MATH 145.

MATH 170 Mathematics for Elementary School Teachers (3) NW Basic concepts of numbers and operations. Emphasizes problem solving, communication of mathematical ideas, and analysis of sources of difficulty in learning/ teaching these concepts. Credit may not apply toward a mathematics major. Required for elementary education students. Credit/no credit only. Offered: AWS.

MATH 171 Mathematics for Elementary School Teachers (3) NW Basic concepts of geometry. Emphasizes problem solving, communication of mathematical ideas, and analysis of sources of difficulty in learning/ teaching these concepts. Credit may not apply toward a mathematics major. Credit/no credit only. Offered: Sp.

MATH 187 Elementary Mathematics Computer Laboratory (1, max. 3) NW Laboratory activities designed to introduce computing as a tool for doing mathematics, to be taken jointly with a designated section of a 100-level mathematics course. Credit/no credit only. Offered: AWSp.

MATH 197 Problem Solving in Mathematics (2, max. 4) NW Lectures and problem sessions in mathematics with applications. Enrollment
restricted to EOP students only. Credit/no credit only. Offered: AWSp.

MATH 198 Special Topics in Mathematics (1-5, max. 15) Independent reading in math. Does not count as credit toward a math major. Credit/no credit only. Offered: AWSp.

MATH 301 Elementary Number Theory (3) NW Brief introduction to some of the fundamental ideas of elementary number theory. Prerequisite: either 2.0 in MATH 126 or 2.0 in MATH 136.

MATH 307 Introduction to Differential Equations (3) NW Introductory course in ordinary differential equations. Includes first- and second-order equations and Laplace transform. Prerequisite: either 2.0 in MATH 125 or 2.0 in MATH145. Offered: AWSp.

MATH 308 Matrix Algebra with Applications (3) NW Systems of linear equations, vector spaces, matrices, subspaces, orthogonality, least squares, eigenvalues, eigenvectors, applications. For students in engineering, mathematics, and the sciences. Credit allowed for only one of MATH 308 or MATH 318. Prerequisite: either 2.0 in MATH 126 or 2.0 in MATH 146. Offered: AWSp.

MATH 309 Linear Analysis (3) NW First order systems of linear differential equations, Fourier series and partial differential equations, the phase plane and/or Laplace transforms. Prerequisite: either 2.0 in MATH 307 and either 2.0 in MATH 308 or 2.0 in MATH 318, or 2.0 in MATH 136. Offered: AWSp.

MATH 310 Introduction to Mathematical Reasoning (3) NW Mathematical arguments and the writing of proofs in an elementary setting. Elementary set theory, elementary examples of functions and operations on functions, the principle of induction, counting, elementary number theory, elementary combinatorics, recurrence relations. Prerequisite: either 2.0 in MATH 125, MATH 145, or MATH 135.

MATH 318 Linear Algebra (3) NW Introduction to the mathematical concepts, arguments, and proofs that occur in linear algebra. Vectors and matrices, systems of linear equations, determinants, subspaces, dimension, bases, linear transformations, eigenvalues and eigenvectors. Credit allowed for only one of MATH 308 or MATH 318. Prerequisite: either 2.0 in MATH 126 or 2.0 in MATH 146; 2.0 in MATH 310.

MATH 324 Advanced Multivariable Calculus I (3) NW Topics include the chain rule, Lagrange multipliers, double and triple integrals, vector fields, line and surface integrals. Culminates in the theorems of Green and Stokes, along with the Divergence Theorem. Prerequisite: either 2.0 in MATH 126 or 2.0 in MATH 136. Offered: AWSp.

MATH 326 Advanced Multivariable Calculus II (3) NW Elementary topology, general theorems on partial differentiation, maxima and minima, differentials, Lagrange multipliers, implicit function theorem, inverse function theorem and transformations, change of variables formula. Prerequisite: either 2.0 in MATH 136, 2.0 in MATH 308, or 2.0 in MATH 318; 2.0 in MATH 324. Offered: AWSp.

MATH 327 Introductory Real Analysis I (3) NW Limits and continuity of functions, sequences, series tests, absolute convergence, uniform convergence. Power series, improper integrals, uniform continuity, fundamental theorems on continuous functions, theory of the Riemann integral. Prerequisite: either 2.0 in MATH 126 and 2.0 in MATH 310, or 2.0 in MATH 136. Offered: AWSp.

MATH 328 Introductory Real Analysis II (3) NW Limits and continuity of functions, sequences, series tests, absolute convergence, uniform convergence. Power series, improper integrals, uniform continuity, fundamental theorems on continuous functions, theory of the Riemann integral. Prerequisite: 2.0 in MATH 327. Offered: AWSp.

MATH 334 Accelerated [Honors] Advanced Calculus (5) NW Introduction to proofs and rigor; uniform convergence, Fourier series and partial differential equations, vector calculus, complex variables. Students who complete this sequence are not required to take MATH 309, 310, 324, 326, 327, 328, and 427. Second year of an accelerated two-year sequence; prepares students for senior-level mathematics courses. Prerequisite: either 2.0 in MATH 136, or 2.0 in MATH 126; 2.0 in MATH 307; either 2.0 in MATH 205, 2.0 in MATH 308, or 2.0 in MATH 318. Offered: A.

MATH 335 Accelerated [Honors] Advanced Calculus (5) NW Introduction to proofs and rigor; uniform convergence, Fourier series and partial differential equations, vector calculus, complex variables. Students who complete this sequence are not required to take MATH 309, 324, 326, 327, 328, and 427. Second year of an accelerated two-year sequence; prepares students for senior-level mathematics courses. Prerequisite: 2.0 in MATH 334. Offered: AWSp.

MATH 336 Accelerated [Honors] Advanced Calculus (5) NW Introduction to proofs and rigor; uniform convergence, Fourier series and partial differential equations, vector calculus, complex variables. Students who complete this sequence are not required to take MATH 309, 324, 326, 327, 328, and 427. Second year of an accelerated two-year sequence; prepares students for senior-level mathematics courses. Prerequisite: 2.0 in MATH 335. Offered: Sp.

MATH 354 Math Enrichment for the Schools (5) NW Map and graph coloring, spanning trees, dominating sets, cryptography, interpretation of graphs, circular motion, statistics that mislead, other topics. Focus on middle school level, with sixth or seventh grade classroom visits lasting all Tuesday mornings in alternate weeks. Discussion of readings on math education reform. Prerequisite: MATH 126. Offered: A.

MATH 355 Math Enrichment for the Schools (5) NW Map and graph coloring, spanning trees, dominating sets, cryptography, interpretation of graphs, circular motion, statistics that mislead, other topics. Focus on middle school level, with sixth or seventh grade classroom visits lasting all Tuesday mornings in alternate weeks. Discussion of readings on math education reform. Prerequisite: MATH 354. Offered: W.

MATH 381 Discrete Mathematical Modeling (3) NW Introduction to methods of discrete mathematics, including topics from graph theory, network flows, and combinatorics. Emphasis on these tools to formulate models and solve problems arising in variety of applications, such as computer science, biology, and management science. Prerequisite: either 2.0 in MATH 136, 2.0 in MATH 308, or 2.0 in MATH 318.

MATH 387 Intermediate Mathematics Computer Laboratory (1-2, max. 6) NW Laboratory activities in the three calculus courses. Computer as tool for doing mathematics, to be taken jointly with a designated section of a 300-level mathematics course. Credit/no credit only.

MATH 390 Probability and Statistics in Engineering and Science (4) NW Concepts of probability and statistics. Conditional probability, independence, random variables, distribution functions. Descriptive statistics, transformations, sampling errors, confidence intervals, least squares and maximum likelihood. Exploratory data analysis and interactive computing. Students may receive credit for only one of STAT/ECOT 481, and ECON 580. Prerequisite: either MATH 126 or MATH 136. Offered: jointly with STAT 390; AWSp.

MATH 394 Probability I (3) NW Sample spaces; basic axioms of probability; combinatorial probability; conditional probability and independence; binomial, Poisson, and normal distributions. Prerequisite: either 2.0 in MATH 126 or 2.0 in MATH 136; recommended: MATH 324 or MATH 327. Offered: jointly with STAT 394; AWS.

MATH 395 Probability II (3) NW Random variables; expectation and variance; laws of large numbers; normal approximation and other limit theorems; multidimensional distributions and transformations. Prerequisite: 2.0 in STAT/MATH 394. Offered: jointly with STAT 395; WSp.

MATH 396 Probability III (3) NW Characteristic functions and generating functions; recurrent events and renewal theory; random walk. Prerequisite: 2.0 in MATH 395 or 2.0 in STAT 511. Offered: jointly with STAT 396; Sp.

MATH 398 Special Topics in Mathematics (1-5, max. 15) Independent reading in math. Does not count as credit toward a math major. Credit/no credit only. Offered: AWSp.

MATH 400 Mathematical Communication for Undergraduates (2) NW Techniques of effective writing and oral presentations in the mathematical sciences. Offered: jointly with AMATH 340; W. STAT 400. Prerequisite: at least 15 credits in MATH, STAT, AMATH, or CSE at the 300 or 400 level, including MATH 307 or AMATH 351 and MATH 308 or AMATH 352.

MATH 402 Introduction to Modern Algebra (3) NW Elementary theory of groups: Cosets and Lagrange’s theorem. Homomorphisms, normal subgroups, quotient groups, and the fundamental isomorphism theorems. Cyclic and symmetric groups. Orders and Cauchy’s theorem. Direct products. Automorphisms. Prerequisite: either 2.0 in MATH 136, 2.0 in MATH 327, 2.0 in MATH 336, or 2.0 in MATH 340. Offered: AS.

MATH 404 Introduction to Modern Algebra (3) NW Topics in algebra chosen from Galois theory, theory of modules, geometric group actions, and the theory of rings and fields. Specific content determined by instructor. Prerequisite: 2.0 in MATH 403. Offered: Sp.
MATH 407 Linear Optimization (3) NW
Maximization and minimization of linear functions subject to constraints consisting of linear equations and inequalities; linear programming and mathematical modeling. Simplex method, elementary games and duality. Prerequisite: either 2.0 in MATH 136, 2.0 in MATH 308, 2.0 in MATH 318, or 2.0 in AMATH 352. Offered: A,W,S.

MATH 408 Nonlinear Optimization (3) NW
Maximization and minimization of nonlinear functions and unconstrained nonlinear programming problems and methods; Lagrange multipliers; Kuhn-Tucker conditions, convexity. Quadratic programming. Prerequisite: either 2.0 in MATH 308 or 2.0 in MATH 318; either 2.0 in MATH 327 or 2.0 in MATH 334. Offered: W.

MATH 409 Discrete Optimization (3) NW
Maximization and minimization problems in graphs and networks (shortest paths, minimum spanning trees, maximum flows, minimum cost flows); transportation and trans-shipment problems, NP-completeness. Prerequisite: 2.0 in MATH 407. Offered: Sp.

MATH 411 Introduction to Modern Algebra for Teachers (3) NW
Basic concepts of abstract algebra with an emphasis on problem solving, constructing proofs, and communication of mathematical ideas. Designed for teaching majors; not open for credit to students who have taken 402, 403. Cannot be used as elective credit for either BS program in mathematics. Prerequisite: either 2.0 in MATH 205, 2.0 in MATH 308, 2.0 in MATH 318, or 2.0 in MATH 136. Offered: AS.

MATH 412 Introduction to Modern Algebra for Teachers (3) NW
Basic concepts of abstract algebra with an emphasis on problem solving, constructing proofs, and communication of mathematical ideas. Designed for teaching majors; not open for credit to students who have taken 402, 403. Cannot be used as elective credit for either BS program in mathematics. Prerequisite: 2.0 in MATH 411. Offered: WS.

MATH 414 Number Theory (3) NW
Congruences, arithmetic of quadratic fields, binary quadratic forms, Dirichlet's theorem on primes in an arithmetic progression, Chebyshev's theorem on primes, the partition function, equations over finite fields. Prerequisite: either 2.0 in MATH 301 or 2.0 in MATH 402.

MATH 415 Number Theory (3) NW
Congruences, arithmetic of quadratic fields, Dirichlet's theorem on primes in an arithmetic progression, Chebyshev's theorem on distribution of primes, the partition function, equations over finite fields. Prerequisite: 2.0 in MATH 414.

MATH 420 History of Mathematics (3) NW
Survey of the development of mathematics from its earliest beginnings through the first half of the twentieth century. Prerequisite: either 2.0 in MATH 402 or 2.0 in MATH 411, either of which may be taken concurrently. Offered: S.

MATH 421 Conceptual Calculus for Teachers (4) NW
In-depth conceptual study of calculus, approached from many points of view, including the study of patterns of physical change, discrete approximation to continuous phenomena, and the historical development of calculus. Intended for future teachers. Cannot be used as elective credit for either BS program in mathematics.

MATH 422 Conceptual Calculus for Teachers (3) NW
In-depth conceptual study of calculus, approached from many points of view, including the study of patterns of physical change, discrete approximation to continuous phenomena, and the historical development of calculus. Intended for future teachers. Cannot be used as elective credit for either BS program in mathematics.

MATH 423 Fundamental Concepts of Analysis (3) NW
One-variable differential calculus: chain rule, inverse function theorem, Rolle's theorem, intermediate value theorem, Taylor's theorem, and intermediate value theorem for derivatives. Multivariable differential calculus: mean value theorem, inverse and implicit function theorems, and Lagrange multipliers. Prerequisite: either 2.0 in MATH 326 or 2.0 in MATH 335; 2.0 in MATH 424. Offered: W.

MATH 426 Fundamental Concepts of Analysis (3) NW

MATH 427 Topics in Applied Analysis (3) NW
Elementary functions of a complex variable; Cauchy integral formula. Taylor and Laurent series; conformal mapping. Fourier series; orthogonal functions; boundary value problems; applications. Prerequisite: either 2.0 in MATH 327 or 2.0 in MATH 335; recommended: MATH 326. Offered: AS.

MATH 428 Topics in Applied Analysis (3) NW
Elementary functions of a complex variable; Cauchy integral formula. Taylor and Laurent series; conformal mapping. Fourier series; orthogonal functions; boundary value problems; applications. Prerequisite: either 2.0 in MATH 335 or 2.0 in MATH 309 and 2.0 in MATH 327. Offered: W.

MATH 429 Topics in Applied Analysis (3) NW
Elementary functions of a complex variable; Cauchy integral formula. Taylor and Laurent series; conformal mapping. Fourier series; orthogonal functions; boundary value problems; applications. Prerequisite: either 2.0 in MATH 427 or 2.0 in MATH 336; 2.0 in MATH 428. Offered: Sp.

MATH 435 Introduction to Dynamical Systems (3) NW
Examples of dynamical systems in mathematics and in natural phenomena. Iterated functions, phase portraits, fixed and periodic points. Hyperbolicity, bifurcations. Chaos. Interval maps; quadratic families; Fractals; iterated function systems. Elements of higher dimensional dynamics. Julia sets, the Mandelbrot set. Prerequisite: 2.0 in MATH 435.

MATH 436 Introduction to Dynamical Systems (3) NW
Examples of dynamical systems in mathematics and in natural phenomena. Iterated functions, phase portraits, fixed and periodic points. Hyperbolicity, bifurcations. Chaos. Interval maps; quadratic families; Fractals; iterated function systems. Elements of higher dimensional dynamics. Julia sets, the Mandelbrot set. Prerequisite: 2.0 in MATH 435.

MATH 437 Introduction to Partial Differential Equations (3) NW
Integral curves and surfaces of vector fields, initial value problems for first-order linear and quasi-linear equations, Cauchy-Kovalevsky theorem, general Cauchy problem characteristics, special equations. Prerequisite: either 2.0 in both MATH 309 and MATH 326 or 2.0 in MATH 336.

MATH 439 Introduction to Partial Differential Equations (3) NW
Continuation of 438. Laplace's equation and general elliptic equations, wave equation and general hyperbolic equations, heat equation and general parabolic equations. Initial value problems and Dirichlet problems. Green's functions. Maximum principles. Prerequisite: 2.0 in MATH 438.

MATH 440 Topology (3) NW
Metric and topological spaces, convergence, continuity, fixed points, products, connectedness, and compactness. Prerequisite: either 2.0 in MATH 328 or 2.0 in MATH 335. Offered: A.

MATH 442 Differential Geometry (3) NW
Curves in 3-space, continuity and differentiability in 3-space, surfaces, tangent planes, first fundamental form, area, orientation, the Gauss Map. Prerequisite: either 2.0 in MATH 335, or 2.0 in MATH 326 and 2.0 in MATH 328 and 2.0 in either MATH 308 or 2.0 in MATH 318. Offered: W.

MATH 443 Topics in Topology and Geometry (3) NW
Content selected from such topics as homotopy theory, topological surfaces, advanced differential geometry, projective geometry, hyperbolic geometry, spherical geometry, and combinatorial geometry. Offered: Sp.

MATH 444 Geometry for Teachers (3) NW
Concepts of geometry from multiple approaches; discovery, formal and informal reasoning, transformations, coordinates, theorems, using computers and models. Topics selected from Euclidean plane and space geometry, spherical geometry, non-Euclidean geometries, fractal geometry. Offered for teaching majors. Cannot be used as elective credit for either BS program in mathematics. Prerequisite: 2.0 in MATH 126; either 2.0 in MATH 136, 2.0 in MATH 205, 2.0 in MATH 308, or 2.0 in MATH 318. Offered: AS.

MATH 445 Geometry for Teachers (3) NW
Concepts of geometry from multiple approaches; discovery, formal and informal reasoning, transformations, coordinates, exploration using computers and models. Topics selected from Euclidean plane and space geometry, spherical geometry, non-Euclidean geometries, fractal geometry. Offered for teaching majors. Cannot be used as elective credit for either BS program in mathematics. Prerequisite: 2.0 in MATH 444. Offered: WS.

MATH 461 Combinatorial Theory (3) NW
Selected topics from among: block designs and finite geometries, coding theory, generating functions and other enumeration methods, graph theory, matroid theory, combinatorial algorithms, applications of combinatorics. Prerequisite: either 2.0 in MATH 308 or 2.0 in MATH 318.
MATH 462 Combinatorial Theory (3) NW
Selected topics from among: block designs and finite geometries, coding theory, generating functions and other enumeration methods, graph theory, matroid theory, combinatorial algorithms, applications of combinatorics. Prerequisite: 2.0 in MATH 461.

MATH 464 Numerical Analysis I (3) NW
Basic principles of numerical analysis, classical interpolation and approximation formulas, finite differences and difference equations. Numerical methods in algebra, systems of linear equations, matrix inversion, successive approximations, iterative and relaxation methods. Numerical differentiation and integration. Solution of differential equations and systems of such equations. Prerequisite: either 2.0 in MATH 136, 2.0 in MATH 308 and 2.0 in MATH 327, 2.0 in MATH 331 and 2.0 in MATH 327, or 2.0 in MATH 335. Offered: A.

MATH 465 Numerical Analysis II (3) NW
Basic principles of numerical analysis, classical interpolation and approximation formulas, finite differences and difference equations. Numerical methods in algebra, systems of linear equations, matrix inversion, successive approximations, iterative and relaxation methods. Numerical differentiation and integration. Solution of differential equations and systems of such equations. Prerequisite: 2.0 in MATH 464. Offered: W.

MATH 466 Numerical Analysis III (3) NW
Basic principles of numerical analysis, classical interpolation and approximation formulas, finite differences and difference equations. Numerical methods in algebra, systems of linear equations, matrix inversion, successive approximations, iterative and relaxation methods. Numerical differentiation and integration. Solution of differential equations and systems of such equations. Prerequisite: either 2.0 in MATH 136, 2.0 in MATH 308 and 2.0 in MATH 327, 2.0 in MATH 331 and 2.0 in MATH 327, or 2.0 in MATH 335. Offered: Sp.

MATH 480 Special Topics in Undergraduate Mathematics (3, max. 12)
Advanced topics in various areas of undergraduate mathematics.

MATH 487 Advanced Mathematics Computer Laboratory (1-2, max. 6) NW Laboratory activities in the use of computing as a tool for doing mathematics, to be taken jointly with a designated section of a 400-level mathematics course. Credit/no credit only.

MATH 492 Stochastic Calculus for Option Pricing (3) NW
Introductory stochastic calculus mathematical foundation for pricing options and derivatives. Basic stochastic analysis tools, including stochastic integrals, stochastic differential equations, Itô’s formula, theorems of Girsanov and Feynman-Kac, Black-Scholes option pricing, American and exotic options, bond options. Prerequisite: MATH STAT 394-5. Offered: jointly with STAT 492; W.

MATH 496 Honors Senior Thesis (1-5) NW
Problem seminar for honors students. Cannot be repeated for credit. Offered: AWSp.

MATH 497 Special Topics in Mathematics for Teachers (2-9, max. 9) NW
Study of selected areas of mathematics. Designed for the improvement of teachers of mathematics. Offered: jointly with EDCI 478.

MATH 498 Special Topics in Mathematics (1-5, max. 15)
Reading and lecture course intended for special needs of advanced students. Offered: AWSp.

MATH 499 Undergraduate Research (8)
Summer research opportunity for undergraduates. Credit/no credit only. Offered: S.

MATH 501 Special Topics in Teaching and Learning Mathematics (2-3, max. 15)
Selected Topics dealing with issues in the teaching and learning of mathematics.

MATH 502 Special Topics in Teaching and Learning Mathematics (2-3, max. 15)
Selected Topics dealing with issues in the teaching and learning of mathematics.

MATH 503 Special Topics in Teaching and Learning Mathematics (2-3, max. 15)
Selected Topics dealing with issues in the teaching and learning of mathematics.

MATH 504 Modern Algebra (5) First quarter of a three-quarter sequence covering group theory, field theory and Galois theory; commutative rings and modules, linear algebra, theory of forms; representation theory, associative rings and modules; commutative algebra and elementary algebraic geometry. Prerequisite: MATH 404 or equivalent.

MATH 505 Modern Algebra (5) Continuation of MATH 504. Prerequisite: MATH 504.

MATH 506 Modern Algebra (5) Continuation of MATH 505. Prerequisite: MATH 505.

MATH 507 Algebraic Geometry (3) First quarter of a two-quarter sequence covering the basic theory of affine and projective varieties, rings of functions, the Hilbert Nullstellensatz, localization, and dimension; the theory of algebraic curves, divisors, canonical genus, and the Riemann-Roch theorem; and related topics. Prerequisite: MATH 506.

MATH 508 Algebraic Geometry (3) Continuation of MATH 507. Prerequisite: MATH 507.

MATH 509 Theory of Optimal Control (3)
Trajectories from ordinary differential equations with control variables. Controllability, optimality, maximum principle. Relaxation and existence of solutions. Techniques of nonsmooth analysis. Prerequisite: real analysis on the level of MATH 426; background in optimization corresponding to MATH 515. Offered: jointly with AMATH 509; even years.

MATH 510 Seminar in Algebra (2-5, max. 5) Credit/no credit only. Prerequisite: permission of graduate program coordinator.

MATH 514 Networks and Combinatorial Optimization (3) Networks and directed graphs. Paths and trees. Feasible and optimal flows and potentials. Transportation problems, matching and assignment problems. Algorithms and applications. Prerequisite: MATH 305 or AMATH 352 and MATH 324. Offered: jointly with MATH 514.

MATH 515 Fundamentals of Optimization (5)

MATH 516 Numerical Optimization (3)
Methods of solving optimization problems involving random variables, with or without constraints. Steepest descent, quasi-Newton methods. Quadratic programming and complementarity. Exact penalty methods, multiplier methods. Sequential quadratic programming, cutting planes and nonsmooth optimization. Prerequisite: MATH 515. Offered: jointly with AMATH 516.

MATH 517 Optimization Under Uncertainty (3)
Sequential optimization problems involving random variables. Dynamic programming, stochastic programming. Control of uncertain dynamic systems in finite, discrete time. Risk, feedback, adaptivity. Probability and imperfect state information. Applications such as to optimal stopping, inventory control, resource management. Prerequisite: MATH 308, MATH 324 and an introduction to basic concepts of probability, such as MATH 390 or MATH 394, MATH 395. Offered: jointly with MATH 517.

MATH 521 Advanced Probability (3)
Measure theory and integration, independence, laws of large numbers, Fourier analysis of distributions, central limit problem and infinitely divisible laws, conditional expectations, martingales. Prerequisite: either MATH 426 or MATH 576. Offered: jointly with STAT 521.

MATH 522 Advanced Probability (3)
Measure theory and integration, independence, laws of large numbers, Fourier analysis of distributions, central limit problem and infinitely divisible laws, conditional expectations, martingales. Prerequisite: either MATH 426 or MATH 576. Offered: jointly with STAT 522.

MATH 523 Advanced Probability (3)
Measure theory and integration, independence, laws of large numbers, Fourier analysis of distributions, central limit problem and infinitely divisible laws, conditional expectations, martingales. Prerequisite: either MATH 426 or MATH 576. Offered: jointly with STAT 523.

MATH 524 Real Analysis (5)
First quarter of a three-quarter sequence covering the theory of measure and integration, point set topology, Banach spaces, LP spaces, applications to the theory of functions of one and several real variables. Additional topics to be chosen by instructor. Prerequisite: MATH 426 or equivalent.

MATH 525 Real Analysis (5) Continuation of MATH 524. Prerequisite: MATH 524.

MATH 526 Real Analysis (5) Continuation of MATH 525. Prerequisite: MATH 525.

MATH 527 Functional Analysis (3)
First quarter of a three-quarter sequence. Review of Banach, Hilbert, and LP spaces; locally convex spaces (duality and separation theory, distributions, and function spaces); operators on locally convex spaces (adjoints, closed graph/open mapping and Banach-Steinhaus theorems); Banach algebras (spectral theory, elementary applica- tions); spectral theorem for Hilbert space operators. Additional topics chosen by instructor.
A working knowledge of real variables, general topology, and complex variables is assumed.

**MATH 528 Functional Analysis (3)** Continuation of MATH 527. Prerequisite: MATH 527.

**MATH 529 Functional Analysis (3)** Continuation of MATH 528. Prerequisite: MATH 528.

**MATH 530 Seminar in Analysis (2-5, max. 5)** Credit/no credit only. Prerequisite: permission of graduate program coordinator.

**MATH 534 Complex Analysis (5)** First quarter of a three-quarter sequence covering complex numbers, analytic functions, contour integration, power series, analytic continuation, sequences of analytic functions, conformal mapping of simply connected regions, and related topics. Prerequisite: MATH 426.

**MATH 535 Complex Analysis (5)** Continuation of MATH 534. Prerequisite: MATH 534.

**MATH 536 Complex Analysis (5)** Continuation of MATH 535. Prerequisite: MATH 535.

**MATH 537 Several Complex Variables (3)** First quarter of a three-quarter sequence covering Weierstrass preparation theorem and its immediate consequences, analytic continuation, domains of holomorphic, pseudoconvexity, Cartan-Oka theory of coherence, embedding theorems; the CR equations, CR manifolds, connections with algebraic geometry. Prerequisite: MATH 536.

**MATH 538 Several Complex Variables (3)** Continuation of MATH 537. Prerequisite: MATH 537.

**MATH 539 Several Complex Variables (3)** Continuation of MATH 538. Prerequisite: MATH 538.

**MATH 541 Special Topics in Applied Mathematics (2-3, max. 15)** Such topics as mathematical quantum theory, fluid mechanics, optimization and operations research, and control theory.

**MATH 542 Special Topics in Applied Mathematics (2-3, max. 15)** Such topics as mathematical quantum theory, fluid mechanics, optimization and operations research, and control theory.

**MATH 543 Special Topics in Applied Mathematics (2-3, max. 15)** Such topics as mathematical quantum theory, fluid mechanics, optimization and operations research, and control theory.

**MATH 544 Topology and Geometry of Manifolds (5)** First quarter of a three-quarter sequence covering general topology, the fundamental group, covering spaces, topological and differentiable manifolds, vector fields, flows, the Frobenius theorem, Lie groups, homogeneous spaces, tensor fields, differential forms, Stokes’s theorem, deRham cohomology. Prerequisite: MATH 404 and MATH 426 or equivalent.

**MATH 545 Topology and Geometry of Manifolds (5)** Continuation of MATH 544. Prerequisite: MATH 544.

**MATH 546 Topology and Geometry of Manifolds (5)** Continuation of MATH 545. Prerequisite: MATH 545.

**MATH 547 Geometric Structures (3, max. 9)** First quarter of a three-quarter sequence covering differential-geometric structures on manifolds, Riemannian metrics, geodesics, covariant differentiation, curvature, Jacobi fields, Gauss-Bonnet theorem. Additional topics to be chosen by the instructor, such as connections in vector bundles and principal bundles, symplectic geometry, Riemannian comparison theorems, symmetric spaces, symplectic geometry, complex manifolds, Hodge theory. Prerequisite: MATH 546.

**MATH 548 Geometric Structures (3, max. 9)** Continuation of MATH 547. Prerequisite: MATH 547.

**MATH 549 Geometric Structures (3, max. 9)** Continuation of MATH 548. Prerequisite: MATH 548.

**MATH 550 Seminar in Geometry (2-5, max. 5)** Credit/no credit only. Prerequisite: permission of graduate program coordinator.

**MATH 554 Linear Analysis (5)** First quarter of a three-quarter sequence covering advanced linear algebra and matrix analysis, ordinary differential equations (existence and uniqueness theory, linear systems, numerical approximations), Fourier analysis, introductions to functional analysis and partial differential equations, distribution theory. Prerequisite: MATH 426 and familiarity with complex analysis at the level of 427 (the latter may be obtained concurrently).

**MATH 555 Linear Analysis (5)** Continuation of MATH 554. Prerequisite: MATH 554.

**MATH 556 Linear Analysis (5)** Continuation of MATH 555. Prerequisite: MATH 555.

**MATH 558 Introduction to Partial Differential Equations (3)** Continuation of MATH 557. Prerequisite: MATH 557.

**MATH 559 Introduction to Partial Differential Equations (3)** Continuation of MATH 558. Prerequisite: MATH 558.

**MATH 564 Algebraic Topology (3)** First quarter of a three-quarter sequence covering classical and modern approaches; complexes and their homology theory; applications; fixed points, products and Poincare duality; axiomatic approach. Prerequisite: MATH 506 and MATH 544, or equivalent.

**MATH 565 Algebraic Topology (3)** Continuation of MATH 564. Prerequisite: MATH 564.

**MATH 566 Algebraic Topology (3)** Continuation of MATH 565. Prerequisite: MATH 565.

**MATH 570 Seminar in Topology (2-5, max. 5)** Credit/no credit only. Prerequisite: permission of graduate program coordinator.

**MATH 574 Fundamental Concepts of Analysis (3)** Hoffman, Toro Sets, real numbers, topology of metric spaces, normed linear spaces, multivariable calculus from an advanced viewpoint. Introduction to Lebesgue measure and integration. Intended for students in Biostatistics and related fields; does not fulfill requirements for degrees in mathematics.

**MATH 575 Fundamental Concepts of Analysis (3)** Hoffman, Toro Sets, real numbers, topology of metric spaces, normed linear spaces, multivariable calculus from an advanced viewpoint. Introduction to Lebesgue measure and integration. Intended for students in Biostatistics and related fields; does not fulfill requirements for degrees in mathematics.

**MATH 576 Fundamental Concepts of Analysis (3)** Hoffman, Toro Sets, real numbers, topology of metric spaces, normed linear spaces, multivariable calculus from an advanced viewpoint. Introduction to Lebesgue measure and integration. Intended for students in Biostatistics and related fields; does not fulfill requirements for degrees in mathematics.
linear least squares problems, matrix eigenvalue problems, nonlinear systems of equations, interpolation, quadrature, and initial value ordinary differential equations. Offered: jointly with AMATH 584. A.

MATH 590 Seminar in Probability (2-5, max. 5) Credit/no credit only. Prerequisite: permission of instructor.

MATH 594 Special Topics in Numerical Analysis (2-3, max. 15) Various advanced topics in numerical analysis and scientific computing, such as iterative methods, eigenvalue computations, approximation theory, finite element methods, inverse problems, nonlinear conservation laws, computational fluid dynamics. Prerequisite: AMATH 584, AMATH 585, AMATH 586, or equivalent. Offered: jointly with AMATH 594.

MATH 595 Special Topics in Numerical Analysis (2-3, max. 15) Various advanced topics in numerical analysis and scientific computing. See the description for 594 for sample topics. Prerequisite: AMATH 584, AMATH 585, AMATH 586, or equivalent. Offered: jointly with AMATH 595.

MATH 596 Special Topics in Numerical Analysis (2-3, max. 15) Various advanced topics in numerical analysis and scientific computing. See the description for 594 for sample topics. Prerequisite: AMATH 584, AMATH 585, AMATH 586, or equivalent. Offered: jointly with AMATH 596.

MATH 597 Seminar on Teaching Math (1, max. 3) Issues in the teaching and learning of college mathematics, such as discovering and working with student background and expectations, increasing student engagement with course material, and evaluating student achievement. For graduate students who are, or soon will be, teaching mathematics courses on their own. Credit/no credit only.

MATH 598 Seminar on Technology (1, max. 3) Exploring the use of computer technology in teaching and research in mathematics. Develops the basic skills required for using computer mathematics software.

MATH 600 Independent Study or Research (*). MATH 700 Master's Thesis (*). MATH 800 Doctoral Dissertation (*).
MUSIC 270 World Popular Music (5) I&S/VLPA
A global survey of popular music, including Latin America, Africa, Eastern Europe, the Middle East, Asia, and the Pacific. Emphasis on students' ability to recognize styles and to analyze the social and historical processes that have shaped them.

MUSIC 291 Composition (3, max. 9) VLPA
One-hour private instruction and one-hour laboratory session per week. Prerequisite: MUSIC 191.

MUSIC 300 Fundamentals of Music Technology (3) VLPA
Introduction to the principles of music technology. Exploration of different categories of music technology, in terms of their functionality as well as the fundamental basis of these theories. Prerequisite: MUSIC 203 and MUSIC 206.

MUSIC 301 Second-Year Theory (3) VLPA
Further study of modulation and chromatic harmony; analysis of 18th- and 19th-century short forms; technical exercises; model composition. Prerequisite: 2.0 in MUSIC 203; 2.0 in MUSIC 206; corequisite: MUSIC 304; recommended: concurrent registration in MUSIC 304. Offered: W.

MUSIC 302 Second-Year Theory (3) VLPA
More advanced study in mid- to late 19th-century chromaticism and compositional style; analysis of representative works; technical exercises; model composition. Prerequisite: 2.0 in MUSIC 301; 2.0 in MUSIC 304; corequisite: MUSIC 305. Offered: Sp.

MUSIC 303 Second-Year Theory (3) VLPA
Core theory sequence for majors. Introduction to the theory and analysis of 20th-century music. Prerequisite: 2.0 in MUSIC 302; 2.0 in MUSIC 305; corequisite: MUSIC 306. Offered: A.

MUSIC 304 Second-Year Ear-Training I (0/1, max. 1) VLPA
Core ear-training sequence for majors. Prerequisite: 2.0 in MUSIC 203; 2.0 in MUSIC 206; corequisite: MUSIC 301. Offered: V.

MUSIC 305 Second-Year Ear-Training II (0/1, max. 1) VLPA
Core ear-training sequence for majors. Prerequisite: 2.0 in MUSIC 301; 2.0 in MUSIC 304; corequisite: MUSIC 302. Offered: Sp.

MUSIC 306 Second-Year Ear-Training III (0/1, max. 1) VLPA
Core ear-training sequence for majors. Prerequisite: 2.0 in MUSIC 302; 2.0 in MUSIC 305; corequisite: MUSIC 303. Offered: A.

MUSIC 307 Diction for Singers (2) VLPA
Application of basic rules of diction, enunciation, and articulation in Italian. Materials include texts from the basic vocal repertoire. Primarily for the voice majors at freshman and sophomore levels; nonmajors on a space-available basis.

MUSIC 308 Diction for Singers (2) VLPA
Application of basic rules of diction, enunciation, and articulation in French. Materials include texts from the basic vocal repertoire. Primarily for the voice majors at freshman and sophomore levels; nonmajors on a space-available basis.

MUSIC 309 Diction for Singers (2) VLPA
Application of basic rules of diction, enunciation, and articulation in German. Materials include texts from the basic vocal repertoire. Primarily for the voice majors at freshman and sophomore levels; nonmajors on a space-available basis.

MUSIC 316 Music Cultures of the World (5) I&S/VLPA
Near East, Central Asia, Far East, South and southeast Asia, Indonesia, and the Philippines. Content varies.

MUSIC 317 Music Cultures of the World (5) I&S/VLPA
Music of Africa, Americas, and Oceania. Content varies.

MUSIC 318 Music Cultures of the World (5) I&S/VLPA
Folk and popular music in western and eastern Europe and the Americas. Content varies.

MUSIC 319 Afro-American Music (5) I&S/VLPA
Centers on Black music in the United States, but also clarifies the relationship of this music to the musics of other Afro-American cultures as well as to their African roots.

MUSIC 326 Repertoire (2) VLPA
Repertoire for music majors.

MUSIC 327 Repertoire (2) VLPA
Repertoire for music majors.

MUSIC 328 Repertoire (2) VLPA
Repertoire for music majors.

MUSIC 331 History of Jazz (5) VLPA
Extensive overview of important musicians, composers, arrangers, and stylistic periods of jazz history from emergence of the first jazz bands at the turn of the 20th century through post-modern bebop era of the 1990s.

MUSIC 332 Music in European Society: Antiquity to 1700 (5) I&S/VLPA
Music and its relationship to aspects of European culture and society—philosophy, politics, social conditions, and the visual arts from antiquity to 1700.

MUSIC 333 Music in Western Culture (5) I&S/VLPA
Music in Europe and North America, drawn from classical, popular, jazz, opera, and musical theatre traditions. Emphasis on the relationship between musical works and their social, philosophical, political, and other contexts.

MUSIC 334 Band Arranging (2) VLPA
Prerequisite: MUSIC 303.

MUSIC 336 Jazz Arranging (2) VLPA
Writing in jazz style for various instrumental combinations. To be able to arrange for modern jazz orchestra. Prerequisite: MUSIC 303.

MUSIC 344 Psychology of Music: Cognition (5) I&S/VLPA
Critical examination of questions, designs, and conclusions of previous research in a variety of areas related to music cognition including music perception, music performance, musical development, musical affect, musical preference, social psychology, and neuroscience.

MUSIC 350 Choral Conducting (1) VLPA
Kaplan Overview of choral conducting patterns. Score, voice warm-up, and intonation. Tempo fluctuation, left hand, diction, discipline. Designed for music and music education majors. Prerequisite: MUSIC 351; corequisite: MUSEN 307.

MUSIC 351 Choral Conducting (1) VLPA
Kaplan Overview of choral conducting patterns. Score, voice warm-up, and intonation. Tempo fluctuation, left hand, diction, discipline. Designed for music and music education majors. Prerequisite: MUSIC 350; corequisite: MUSEN 307.

MUSIC 352 Choral Conducting (1) VLPA
Kaplan Overview of choral conducting patterns. Score, voice warm-up, and intonation. Tempo fluctuation, left hand, diction, discipline. Designed for music and music education majors. Prerequisite: MUSIC 351; corequisite: MUSEN 307.

MUSIC 356 Cylinders to Platters—A Survey of Recorded Music Since 1888 (3) VLPA
Music as reflected through the influences of the recording industry and the development of related technologies. Examines social and artistic impacts that the recording age has brought to American and European musical cultures. Recommended: MUSIC 120; MUSIC 162.

MUSIC 367 Beginning Jazz Improvisation I (1) VLPA
Beginning jazz improvisation techniques used in the performance of basic jazz styles such as the blues. Primarily for music majors. Prerequisite: MUSIC 302.

MUSIC 368 Beginning Jazz Improvisation II (1) VLPA
Beginning jazz improvisation techniques used in the performance of basic jazz styles such as the blues. Primarily for music majors. Prerequisite: MUSIC 367.

MUSIC 369 Beginning Jazz Improvisation III (1) VLPA
Beginning jazz improvisation techniques used in the performance of basic jazz styles such as the blues. Primarily for music majors. Prerequisite: MUSIC 368.

MUSIC 379 Junior Recital (1) VLPA
For participants in the Bachelor of Music degree program only.

MUSIC 380 Instrumental Conducting (1) VLPA
Acquaints the beginning conductor with beat patterns and their expressive modifications, basic rehearsal techniques and score study. Prerequisite: either MUSIC 212 or MUSIC 302.

MUSIC 381 Instrumental Conducting (1) VLPA
Acquaints the beginning conductor with beat patterns and their expressive modifications, basic rehearsal techniques and score study. Prerequisite: MUSIC 380.

MUSIC 382 Instrumental Conducting (1) VLPA
Acquaints the beginning conductor with beat patterns and their expressive modifications, basic rehearsal techniques and score study. Prerequisite: MUSIC 381.

MUSIC 384 Ideas In Music (5) I&S/VLPA
Taricani Examines selected sources and compositions of music from the Western tradition (from the tenth through the twentieth centuries), in relation to the intellectual background of the periods and countries that produced them. Musical studies accompanied by assigned readings in philosophical, religious, literary, and artistic texts in addition to the primary readings in musical history.

MUSIC 388 Jazz Pedagogy (2) VLPA
Stylistic and esthetic developments in the performance of jazz. Key musical ingredients in the evolution of jazz as an art form and the skills commensurate with teaching these. Designed for music majors.

MUSIC 390 Special Topics in Music (3, max. 9) VLPA
Topics vary.

MUSIC 391 Composition (3, max. 9) VLPA
One-hour private instruction and one-hour laboratory session each week. Prerequisite: MUSIC 291.
MUSIC 400 Computer Applications to Music (3, max. 9) VLPA Music workstation applications using microcomputers, music synthesizers, and analog-to-digital converters: music editing and score production, transcription, waveform and spectral analysis, and introduction to programming.

MUSIC 402 Digital Sound Processing (5) VLPA Introduction to digital sound processing techniques. Includes sampling techniques and time-domain transformation of samples sound; sample-rate conversion; sound granulation and time stretching; delay lines; introduction to digital filtering; FIR and IIR filters; digital effects; reverberation; virtual-room acoustics and dynamic sound location. Prerequisite: DXARTS 461/MUSIC 401. Offered: jointly with DXARTS 462; W.

MUSIC 403 Advanced Digital Sound Synthesis and Processing (5) VLPA Advanced sound processing and synthesis techniques. Includes sound time warping; analysis-synthesis techniques; linear predictive coding; the phase vocoder; frequency-domain sound transformations; introduction to physical modeling. Prerequisite: DXARTS 462/MUSIC 402. Offered: jointly with DXARTS 463; S.

MUSIC 405 Liturgics and Hymnology: Practical Applications I (2) VLPA Butler Prepares organ majors and other advanced organ students to play hymns in a manner that inspires congregational singing. Includes a study of hymnology as well as instruction on the realization of anthem accompaniments and piano scores at the organ. Prerequisite: MUSIC 302; MUSIC 305; MUHST 212. Offered: A.

MUSIC 406 Liturgics and Hymnology: Practical Applications II (2) VLPA Butler Survey of church choir repertoire with emphasis on the smaller choir, choir organization and rehearsal techniques, choral conductor’s preparation, a brief study of choral styles and editions, and choral arranging for the church choir. Prerequisite: either MUSIC 303, MUSIC 306, and MUHST 210, or MUSIC 405. Offered: W.

MUSIC 407 Liturgics and Hymnology: Practical Applications III (2) VLPA Butler History of Psalm singing, traditional and contemporary liturgics, plainsong, liturgical use of handbells, “contemporary” repertoire for the church, orchestral instruments and their use in worship (arranging for amateur players, basics of string bowing and editing, organizing instrumental ensembles), youth choir organization. Prerequisite: either MUSIC 303, MUSIC 306, and MUHST 210, or MUSIC 406. Offered: Sp.

MUSIC 410 ElectroAcoustic Music: History and Analysis (3) VLPA Home Examines the music of major electro-acoustic composers. Emphasis on the relationship between technological resources and compositional advances. Addresses issues raised by the diversity of approaches to musical composition; relates particular creative contributions to the historical, cultural, and technological contexts in which they originated. Prerequisite: MUSIC 303; MUSIC 306; MUHST 210. Offered: Sp.

MUSIC 418 Baroque Ornamentation and Improvisation (3) VLPA Terry The study of ornamentation and improvisation for keyboard, woodwinds, voice, and strings of selected German, Italian, French, and English repertoire from 1600 to 1800.

MUSIC 420 Organ Improvisation and Service Playing I (2) VLPA Prepares students to improvise, especially for the church/synagogue service. Includes a brief study of hymnology, hymn elaboration, altered harmonizations, improvisation based on existing hymn tunes, interludes, chorale preludes, ornamented chorales. Prerequisite: MUSIC 303; MUSIC 306. Offered: A.

MUSIC 421 Organ Improvisation and Service Playing II (2) VLPA Continuation of MUSIC 420. Includes brief review of figured bass and functional harmony, free improvisation in simple antecedent/consequent ABA forms and more complex forms (rondo, theme, and variation), improvising partitas, interludes, improvisations based on plainchant. A survey of important improvisation texts. Prerequisite: MUSIC 420. Offered: W.

MUSIC 422 Organ Improvisation and Service Playing III (2) VLPA Continuation of MUSIC 421. Advanced improvisation: baroque improvisation techniques, fuguetas, baroque praeludias and fantasias, chorale toccatas, duos, trios, and simple fugues. Prerequisite: MUSIC 421. Offered: Sp.

MUSIC 426 Advanced Jazz Arranging (2) VLPA Brockman Advanced arranging techniques for jazz ensembles of various sizes, exploring methods employed by Duke Ellington, Gil Evans, and others. Assignments include one original arrangement each for small-combo and full-jazz ensemble. Prerequisite: MUSIC 336. Offered: Sp.

MUSIC 427 Music of Africa (3) I&S/VLPA Music cultures of Africa. Traditional styles and more recent developments. Open to all students with an interest in the area. Prerequisite: MUSIC 317.

MUSIC 428 Music of North India (3) I&S/VLPA Classical music of North India, the Hindustani tradition with emphasis on the Dhrupad and Khyal styles. Recommended: ethnomusicology or South Asian studies background.

MUSIC 429 String Orchestral Repertoire (2, max. 18) VLPA Lieberman Patterson, Zaks, Watras Intended for undergraduate BA/BA and BM music majors. Offered: biannually; AWSp.

MUSIC 430 Organology (3) VLPA Systematic study of musical instruments, involving the history, acoustical phenomena, and physical topologies of instruments from around the world, with emphasis on non-Western music.

MUSIC 433 Music of Latin America (3) I&S/ VLPA The music of the Spanish-, French-, and Portuguese-speaking New World countries.

MUSIC 434 Pedagogy (2) VLPA Principles of effective studio teaching; survey and evaluation of teaching materials.

MUSIC 435 Pedagogy (2) VLPA Principles of effective studio teaching; survey and evaluation of teaching materials.

MUSIC 436 Pedagogy (2) VLPA Principles of effective studio teaching; survey and evaluation of teaching materials.

MUSIC 438 Problems in Contemporary Music Performance (3, max. 9) VLPA Kappy An active course examining and solving problems relevant to the successful performance of twentieth-century music. Preparation for complex rhythms, odd groupings, new notation, and extended performing techniques.

MUSIC 439 Music of Indonesia and the Philippines (3) I&S/VLPA Includes the traditions of Sumatra, Sunda, Java, Bali, Sunda Islands, and the Philippines. Open to students in music and to students with an interest in the area.

MUSIC 444 Music of the Near East (3) I&S/ VLPA Classical and folk musical traditions of Iran, Turkey, and the Arab world. Prerequisite: MUSIC 316.

MUSIC 445 Music in American Cultures (3) I&S/ VLPA Compares musical history and experience of selected American cultures that have fed into the American musical mainstream or had significant popularity on its periphery. Case studies may include African Americans, Latinx/Americans, Jewish Americans, Asian Americans, or European Americans. Considerations of social identity as well as musical styles. Offered: jointly with AES 446.

MUSIC 447 Music of Southern India (3) I&S/ VLPA Classical music of South India, the Karnatic tradition, with emphasis on the concert repertoire. Recommended: ethnomusicology or South Asian studies background.

MUSIC 448 Music of China (3) I&S/VLPA Confucian philosophies that relate to music, theory, scale systems, cosmology. Development of instrumental styles, vocal and dramatic regional forms from early historical periods to the present; recommended: background in either ethnomusicology or East Asian Studies. Recommended: ethnomusicology or East Asian studies background.

MUSIC 449 Advanced Piano Repertoire (2, max. 6) VLPA McCabe, Michaelian, Shepard For piano majors who wish an in-depth survey of major areas of the piano repertoire. Prerequisite: MUSIC 326. Offered: AWSp.

MUSIC 450 Percussion Education Institute II (2) VLPA Collier, Crouse Intensive four-week institute focusing on techniques in percussion, timpani, and mallet performance. Intended for music educators with little or no percussion experience desiring additional training to enhance their careers as music teachers. Includes private instruction, master classes, and percussion ensemble participation. Prerequisite: MUSAP 217.

MUSIC 451 Summer Jazz Institute (1) VLPA Brockman, Collier, Seales Intensive one-week institute designed for the serious jazz student as well as for music educators. Six hours of daily instruction in jazz theory, ear-training, improvisation, arranging, as well as emphasis on rehearsal and performance techniques through sectional workshops and small group “jam sessions.”

MUSIC 454 Organ Pedagogy (3) VLPA Terry Pedagogical approaches to organ techniques and performance practice, provides opportunity for practical application by means of student teaching.

MUSIC 455 Choral Arranging (3) VLPA Primarily for choral conductors who need to modify, arrange or compose material to suit the capabilities of specific choral groups and performance situations.

MUSIC 458 Organ Repertoire: Middle Ages through Baroque (3) VLPA Terry Analysis and
MUSIC 459 Organ Repertoire: Bach to Present (3) VLPA Terpny Analysis and performance practices of organ literature, classical period through the twentieth century. Development of the organ as a musical instrument. Prerequisite: either MUHST 408, MUHST 409, MUHST 410, MUHST 411, MUHST 412, MUHST 413, MUHST 414, MUHST 415, MUHST 417, MUHST 418, MUHST 419, MUHST 423, MUHST 424, or MUHST 426.

MUSIC 460 Advanced Vocal Repertoire: Pre-Nineteenth-Century Art Songs (2, max. 6) VLPA Professional preparation of pre-nineteenth-century songs with a view to total artistic-musical realization in performance. Appropriate style, character, balance, phrasing, diction, and projection for vocalists and pianists. Prerequisite: MUSIC 328.

MUSIC 461 Advanced Vocal Repertoire: Nineteenth-Century Art Songs (2, max. 6) VLPA Professional preparation of works from the literature of the nineteenth-century German lieders, with a view to total artistic-musical realization in performance. Appropriate style, character, balance, phrasing, diction, and projection for vocalists and pianists. Prerequisite: MUSIC 460.

MUSIC 462 Advanced Vocal Repertoire: Twentieth-Century Art Songs (2, max. 6) VLPA Preparation of works from the twentieth-century repertoire of French, German, Italian, Spanish, and English songs, with a view to total artistic-musical realization in performance. Appropriate style, character, balance, phrasing, diction, and projection for vocalists and pianists. Prerequisite: MUSIC 461.

MUSIC 464 Jazz Laboratory (1, max. 9) VLPA Seales Forum for testing new technical skills, improvisational techniques, and jazz compositions and/or arrangements in a formal laboratory setting.

MUSIC 465 Acting for Singers (2, max. 6) VLPA Workshop designed specifically for the singing actor, focusing on character analysis, movement, and audition department skills.

MUSIC 467 Advanced Jazz Improvisation I (1) VLPA Coller, Seales Performance techniques in jazz improvisation for the advanced student. Prerequisite: MUSIC 369.

MUSIC 468 Advanced Jazz Improvisation II (1) VLPA Coller, Seales Performance techniques in jazz improvisation for the advanced student. Prerequisite: MUSIC 467.

MUSIC 469 Advanced Jazz Improvisation III (1) VLPA Coller, Seales Performance techniques in jazz improvisation for the advanced student. Prerequisite: MUSIC 468.

MUSIC 470 Analysis of Tonal Music: Introduction to Schenker (3) VLPA Bernard, Kopp, Rahn Introduction to the theories of Heinrich Schenker and their subsequent development; analysis of music from the common-practice period (1700-1900), with possible excursions into the twentieth century. Prerequisite: either MUSIC 303 and MUHST 212 or MUSIC 312 and MUHST 215.

MUSIC 471 Introduction to Atonal Theory and Analysis (3) VLPA Bernard, Rahn Theory of atonal music, including the "classical" twelve-tone repertoire. Analysis of works by Schoenberg, Berg, Webern, and others. Prerequisite: either MUSIC 303 and MUHST 212 or MUSIC 312 and MUHST 215.

MUSIC 472 Analysis of Twentieth Century Music, 1900-1950 (3, max. 6) VLPA Bernard, Durand, Karp, Rahn, Thome Analytical examination of musical works of the first half of the twentieth century in Europe and the United States, with emphasis on music other than that of the second Viennese school. Prerequisite: either MUSIC 303 and MUHST 212 or MUSIC 312 and MUHST 215.

MUSIC 473 Keyboard Harmony and Transposition (3) VLPA Terry Keyboard harmonization from the baroque period to present; transposition of vocal and instrumental pieces to different pitch levels. Prerequisite: either MUSIC 303 and MUHST 212 or MUSIC 312 and MUHST 215. Offered: alternate years.

MUSIC 474 Keyboard Harmony and Transposition (3) VLPA Terry Keyboard harmonization from the baroque period to present; transposition of vocal and instrumental pieces to different pitch levels. Prerequisite: MUSIC 473. Offered: alternate years.

MUSIC 475 Figured Bass Realization (3) VLPA Terry Various styles of continuo realization for keyboardists, emphasizing Bach cantatas, Haydn symphonies, and Mozart operas. Prerequisite: MUSIC 474. Offered: alternate years.

MUSIC 476 Advanced Vocal Repertoire: Seventeenth and Eighteenth Centuries (2) VLPA Opera repertoire, 1600 to the Bel Canto era (Bellini, Rossini, Donizetti); style, traditions, embellishments in Italian, French, and German arias. Prerequisite: MUSIC 328.

MUSIC 477 Advanced Vocal Repertoire: Nineteenth Century (2) VLPA Opera repertoire, the post Bel Canto era through Verdi, Puccini and verismo, and significant German, French, and Slavic repertoire. Prerequisite: MUSIC 476.

MUSIC 478 Advanced Vocal Repertoire: Twentieth Century (2) VLPA Opera repertoire, twentieth-century opera literature (Barber, Menotti, Bartok, Dvorak); understanding of style, character and overall artistic and musical needs of the present. Prerequisite: MUSIC 477.

MUSIC 479 Senior Recital (1) VLPA

MUSIC 480 The Anthropology of Music (3) I&S/VLPA Analysis of aspects of anthropological thought influential in ethnomusicology. Critical evaluation of dominant theoretical schools and modes of explanation. e.g., evolutionist, diffusionist, historical particularist, structuralist, functionalist, symbolist, and semiotic, through detailed examination of seminal texts. Offered: jointly with ANTH 430.

MUSIC 481 Choral Repertoire: Sixteenth and Seventeenth Centuries (3) VLPA Sacred and secular choral literature from the Renaissance through the early baroque, covering Europe and England. Various genres and styles of major composers, including performance practice, rehearsals, and conducting.

MUSIC 483 Choral Repertoire: Nineteenth Century (3) VLPA Sacred and secular choral literature of the nineteenth century, covering mainland Europe and England. Analysis of accompanied and a cappella choral works by major composers with implications for conducting and programming of literature.

MUSIC 484 Choral Repertoire: Twentieth Century (3) VLPA Choral literature of the twentieth century, covering America, England, and mainland Europe. Various genres and styles, including score study and teaching strategies.

MUSIC 487 Tonal Counterpoint (3) VLPA Bernard, Durand, Kopp, Rahn Introduction to tonal counterpoint through exercises in analysis and composition, focusing on 18th-century styles. Study of melody principles of counterpoint in two and three voices, dance forms, inventions, fugue. Prerequisite: either MUSIC 311 or MUSIC 202.

MUSIC 490 Orchestration (3) VLPA Study of the instruments of the orchestra and practical experience in combining them; the student to score for various instrumental combinations. Ideally to be taken before band arranging or jazz arranging, but is not a prerequisite.

MUSIC 491 Composition (3, max. 18) VLPA One-hour private instruction and one-hour laboratory session each week. Prerequisite: MUSIC 391.

MUSIC 492 Opera Direction and Production (4) VLPA Practical experience with problems of the theater.

MUSIC 493 Opera Direction and Production (4) VLPA Practical experience with problems of the theater. Prerequisite: MUSIC 492.

MUSIC 495 Music of Japan (3) I&S/VLPA Survey of major Japanese musical traditions. Open to students in music and East Asian area studies. Prerequisite: MUSIC 316.

MUSIC 498 Senior Thesis (3, max. 9) VLPA Design and completion of an individual research project and writing of a thesis under supervision of a faculty member.

MUSIC 499 Undergraduate Research *(3, max. 6)*

MUSIC 511 Seminar in Field and Laboratory Methods (3) Methodology of field research in ethnomusicology along with practical experience. Prerequisite: graduate student standing in ethnomusicology or permission of instructor.

MUSIC 520 Music in Higher Education (3) Morrision Philosophical and practical issues surrounding music within the context of higher education. Topics include mission and structure of music programs, development of teaching expertise, teacher/student evaluation, academic freedom, and job opportunities. Appropriate for all graduate music students and does not require background in teaching or education.

MUSIC 523 Seminar in Music and Socialization (3, max. 9) Lurdoquist The socialization process and music, including the interaction
whereby music culture is learned. Prerequisite: MUSIC 345 or MUSIC 545 or permission of instructor.

MUSIC 526 History of Theory (3) Ancient, medieval, early Renaissance.

MUSIC 527 History of Theory (3) Renaissance, baroque, early classic.

MUSIC 528 History of Theory (3) Classic, romantic, twentieth century.

MUSIC 530 Seminar in Music Cognition (3, max. 9) Study of research literature in cognition and music cognition, particularly as it relates to nonverbal musical experience. Prerequisite: MUSIC 344 or MUSIC 544 or permission of instructor.

MUSIC 531 Proseminar in Ethnomusicology (3) Theoretical and methodological issues in ethnomusicology based on historical and contemporary major writings. Critical evaluations of works with a broad view toward developing ethnomusicological research. Prerequisite: permission of instructor.

MUSIC 532 Opera Direction and Production (4/6, max. 12) Practical experience with problems of the opera theatre.

MUSIC 533 Preceptorial Readings in Ethnomusicology (5) Significant ethnomusicological literature on the music cultures of Asia. Meets with MUSIC 318. Prerequisite: graduate student standing in ethnomusicology and permission of instructor.

MUSIC 534 Preceptorial Readings in Ethnomusicology (5) Significant ethnomusicological literature on the music cultures of Africa, the Americas, and Oceania. Meets with MUSIC 317. Prerequisite: graduate student standing in ethnomusicology and permission of instructor.

MUSIC 535 Preceptorial Readings in Ethnomusicology (5) Significant ethnomusicological literature on the music cultures of Europe and North America. Meets with MUSIC 318. Prerequisite: graduate student standing in ethnomusicology and permission of instructor.

MUSIC 536 Transcription and Analysis (3) Study of the methodological principles of transcription and analysis, together with practical exercises in developing transcription skills. Prerequisite: graduate student standing in ethnomusicology and permission of instructor.

MUSIC 544 Music Perception and Cognition (3, max. 9) Examines the systematic research literature on the cognitive operations involved in musical performance, composition, and listening. Topics include: the mental representation of musical concepts, communication of expressiveness in music, memory for music, processing of tonal and nontonal music; computer models of music cognition; melodic and rhythmic development; composition and improvisation.

MUSIC 551 Practicum in Music Instruction (3, max. 9) Practical application and validation of results of investigation in curriculum, music teaching and learning, performance and theoretical studies. Prerequisite: teaching experience or permission of instructor.

MUSIC 553 Advanced Choral Techniques (2, max. 18) Practical application of technique and pedagogy related to choral music. Surveys major choral repertoire. Concurrent enrollment in MUSIC 583 required.

MUSIC 559 Master's Recital (3, max. 6) Public performance for students in the Master of Music degree program. Prerequisite: permission of instructor and Master of Music program standing.

MUSIC 570 Seminar in Schenkerian Analysis (3, max. 9) Bernard, Kopp, Rahn Advanced theoretical and analytical work in serialism and other nontonal systems. Prerequisite: MUSIC 471 or equivalent.

MUSIC 571 Seminar in Tonal Analysis (3, max. 9) Modern theoretical and analytical methods appropriate to study of western music of the twentieth century. Prerequisite: MUSIC 471 or permission of instructor.

MUSIC 572 Advanced Topics in Computer Music (3)Karpen, Rahn Topics vary. Offered: AWSpS.

MUSIC 573 Seminar in Theorisation (3, max. 18) Bernard, Kopp, Rahn Development and discussion of current student and faculty research in compositional/analytical theory and metatheory.

MUSIC 574 Analysis of Twentieth-Century Music: 1950 — Present (3) Bernard, Durand, Karpen, Kopp, Rahn, Thome Analytical examination of major works of second half of twentieth century. Prerequisite: MUSIC 471 and MUSIC 472 or permission of instructor.

MUSIC 576 Critical Theory of Music (3, max. 18) Philosophical foundations of the criticism of music, including relevant contemporary thought in the criticism of literature and the other arts.

MUSIC 577 Composers of the Twentieth Century (3, max. 9) Bernard, Durand, Karpen, Kopp, Rahn, Thome Analytical examination of the work of a major composer of the twentieth century. Prerequisite: MUSIC 574 or permission of instructor.

MUSIC 580 Advanced Conducting (3, max. 9) Eros, Salzman.

MUSIC 581 Advanced Conducting (3, max. 9) Eros, Salzman.

MUSIC 582 Advanced Conducting (3, max. 9) Eros, Salzman.

MUSIC 583 Advanced Choral Conducting (2, max. 18) Kaplan.

MUSIC 590 Keyboard and Doctoral Lecture Recital or Concerto Recital (6, max. 18) Lecture recital or Concerto recital for students in the Doctor of Musical Arts in Piano Performance, in Harpsichord Performance, and in Organ Performance degree programs.

MUSIC 591 Graduate Composition (1, max. 30) Bernard, Durand, Karpen, Rahn, Thome.

MUSIC 599 Advanced Selected Topics (1-3, max. 27) Selected readings on current issues and problems in music. Prerequisite: permission of a supervising music faculty member.

MUSIC 600 Independent Study or Research (*) .

MUSIC 700 Master's Thesis (*) .

MUSIC 800 Doctoral Dissertation (*) .

Music Applied

MUSAP 133 Basic Keyboard (2) VLPA Keyboard harmony and simple keyboard pieces. Class instruction. Audition required. Prerequisite: MUSIC 116.

MUSAP 134 Basic Keyboard (2) VLPA Keyboard harmony and simple keyboard pieces. Class instruction. Audition required. Prerequisite: MUSAP 133.

MUSAP 135 Basic Keyboard (2) VLPA Keyboard harmony and simple keyboard pieces. Class instruction. Audition required. Prerequisite: MUSAP 134.

MUSAP 136 Basic Jazz Keyboard (2, max. 6) VLPA Seales Basics of jazz and pop chord voicings, reading lead sheets, basic accompanying in various jazz and pop styles. Audition required.

MUSAP 137 Class Instruction: Voice (1) VLPA Basic fundamentals of good singing: breathing, diction, voice focus. Materials include mainly early Italian art songs, some English and French songs. Audition required.

MUSAP 138 Class Instruction: Voice (1) VLPA Basic fundamentals of good singing: breathing, diction, voice focus. Materials include mainly early Italian art songs, some English and French songs. Audition required. Prerequisite: MUSAP 137.

MUSAP 139 Class Instruction: Voice (1) VLPA Basic fundamentals of good singing: breathing, diction, voice focus. Materials include mainly early Italian art songs, some English and French songs. Audition required. Prerequisite: MUSAP 139.

MUSAP 205 String Techniques (2, max. 12) VLPA Designed to prepare music education students to teach beginning and intermediate strings in the public schools.

MUSAP 210 Wind Techniques (2, max. 12) VLPA Designed to prepare music education students to teach beginning and intermediate woodwinds and brass in the public schools.

MUSAP 217 Percussion Techniques (2, max. 4) VLPA Collier The study of basic percussion techniques as they apply to music in the public schools. Acquaints the prospective music education major with percussion performance and teaching techniques.

MUSAP 218 Guitar Techniques (2, max. 4) VLPA Novacek Includes exercises to develop a good basic technique emphasizing correct position and movement of both hands, basic folk song accompaniments including a variety of strums, finger picking patterns, hammering on and bass runs, reading guitar music, classical pieces, special effects, and access to other styles. Offered: W.
MUSAP 233 Private Instruction: Trumpet (2-3, max. 27) VLPA Intended for undergraduate majors. Audition required.

MUSAP 334 Private Instruction: Trombone (2-3, max. 27) VLPA Intended for undergraduate majors. Audition required.

MUSAP 335 Private Instruction: Tuba (2-3, max. 27) VLPA Intended for undergraduate majors. Audition required.

MUSAP 336 Private Instruction: Harp (2-3, max. 27) VLPA Vokolek Intended for undergraduate majors. Audition required.

MUSAP 337 Private Instruction: Percussion (2-3, max. 27) VLPA Collier, Crushoe Intended for undergraduate majors. Audition required.

MUSAP 338 Private Instruction: Guitar (2-3, max. 27) VLPA Novacek Intended for undergraduate majors. Audition required.

MUSAP 339 Private Instruction: Viola da Gamba (2-3, max. 27) VLPA Tindemans Intended for undergraduate majors. Audition required.

MUSAP 340 Timpani (2-3, max. 27) VLPA Collier Intended for undergraduate majors. Audition required.

MUSAP 342 Jazz Drum Set (2-3) Primarily for jazz studies and percussion majors. Audition required for non-majors.

MUSAP 343 Private Instruction: Viola (2-3, max. 45) VLPA Watras Intended for undergraduate non-majors. Audition required.

MUSAP 346 Private Instruction: Violin (2-3, max. 27) VLPA Watras Intended for undergraduate majors. Audition required.

MUSAP 342 Private Instruction: Piano (2-3, max. 27) VLPA Hunter, Patrick Intended for undergraduate majors. Audition required.

MUSAP 342 Private Instruction: Piano (2-3, max. 27) VLPA McCabe, Michaelian, Seales, Sheppard Intended for undergraduate majors. Audition required.

MUSAP 342 Private Instruction: Piano (2-3, max. 27) VLPA Waits Intended for undergraduate majors. Audition required.

MUSAP 334 Private Instruction: Violin (2-3, max. 27) VLPA McCabe, Michaelian, Seales, Sheppard Intended for undergraduate majors. Audition required.

MUSAP 329 Private Instruction: Piano (2-3, max. 27) VLPA Vokolek Intended for undergraduate majors. Audition required.

MUSAP 328 Private Instruction: Oboe (2-3, max. 27) VLPA Groisman Intended for undergraduate majors. Audition required.

MUSAP 330 Private Instruction: Bassoon (2-3, max. 27) VLPA Groisman Intended for undergraduate majors. Audition required.

MUSAP 327 Private Instruction: Flute (2-3, max. 27) VLPA Groisman Intended for undergraduate majors. Audition required.

MUSAP 327 Private Instruction: Flute (2-3, max. 27) VLPA Vokolek Intended for undergraduate majors. Audition required.

MUSAP 326 Private Instruction: Double Bass (2-3, max. 27) VLPA Groisman Intended for undergraduate majors. Audition required.

MUSAP 326 Private Instruction: Double Bass (2-3, max. 27) VLPA Vokolek Intended for undergraduate majors. Audition required.

MUSAP 325 Private Instruction: Violoncello (2-3, max. 27) VLPA Groisman Intended for undergraduate majors. Audition required.

MUSAP 325 Private Instruction: Violoncello (2-3, max. 27) VLPA Vokolek Intended for undergraduate majors. Audition required.

MUSAP 324 Private Instruction: Violin (2-3, max. 27) VLPA Groisman Intended for undergraduate majors. Audition required.

MUSAP 324 Private Instruction: Violin (2-3, max. 27) VLPA Vokolek Intended for undergraduate majors. Audition required.

MUSAP 323 Private Instruction: Harpsichord (2-3, max. 27) VLPA Groisman Intended for undergraduate majors. Audition required.

MUSAP 323 Private Instruction: Harpsichord (2-3, max. 27) VLPA Vokolek Intended for undergraduate majors. Audition required.

MUSAP 322 Private Instruction: Organ (2-3, max. 27) VLPA Groisman Intended for undergraduate majors. Audition required.

MUSAP 322 Private Instruction: Organ (2-3, max. 27) VLPA Vokolek Intended for undergraduate majors. Audition required.

MUSAP 321 Private Instruction: Piano (2-3, max. 27) VLPA Groisman Intended for undergraduate majors. Audition required.

MUSAP 321 Private Instruction: Piano (2-3, max. 27) VLPA Vokolek Intended for undergraduate majors. Audition required.

MUSAP 320 Private Instruction: Piano (2-3, max. 27) VLPA Groisman Intended for undergraduate majors. Audition required.

MUSAP 320 Private Instruction: Piano (2-3, max. 27) VLPA Vokolek Intended for undergraduate majors. Audition required.

MUSAP 319 Private Instruction: Viola da Gamba (2-3, max. 27) VLPA Groisman Intended for undergraduate majors. Audition required.

MUSAP 319 Private Instruction: Viola da Gamba (2-3, max. 27) VLPA Vokolek Intended for undergraduate majors. Audition required.

MUSAP 318 Private Instruction: Guitar (2-3, max. 27) VLPA Groisman Intended for undergraduate majors. Audition required.

MUSAP 318 Private Instruction: Guitar (2-3, max. 27) VLPA Vokolek Intended for undergraduate majors. Audition required.

MUSAP 317 Private Instruction: Percussion (2-3, max. 27) VLPA Collier, Crushoe Intended for undergraduate non-majors. Audition required.

MUSAP 317 Private Instruction: Percussion (2-3, max. 27) VLPA Vokolek Intended for undergraduate non-majors. Audition required.

MUSAP 316 Private Instruction: Harp (2-3, max. 27) VLPA Groisman Intended for undergraduate majors. Audition required.

MUSAP 316 Private Instruction: Harp (2-3, max. 27) VLPA Vokolek Intended for undergraduate majors. Audition required.

MUSAP 315 Private Instruction: Tuba (2-3, max. 27) VLPA Groisman Intended for undergraduate non-majors. Audition required.

MUSAP 315 Private Instruction: Trombone (2-3, max. 27) VLPA Groisman Intended for undergraduate non-majors. Audition required.

MUSAP 314 Private Instruction: Trombone (2-3, max. 27) VLPA Groisman Intended for undergraduate non-majors. Audition required.

MUSAP 313 Private Instruction: Trumpet (2-3, max. 27) VLPA Groisman Intended for undergraduate non-majors. Audition required.

MUSAP 313 Private Instruction: Trumpet (2-3, max. 27) VLPA Vokolek Intended for undergraduate non-majors. Audition required.

MUSAP 312 Private Instruction: Horn (2-3, max. 27) VLPA Groisman Intended for undergraduate non-majors. Audition required.

MUSAP 312 Private Instruction: Horn (2-3, max. 27) VLPA Vokolek Intended for undergraduate non-majors. Audition required.
MUSAP 426 Private Instruction: Double Bass (2-3, max. 27) VLPA Lieberman Intended for undergraduate majors. Audition required.

MUSAP 427 Private Instruction: Flute (2-3, max. 27) VLPA Skowronek Intended for undergraduate majors. Audition required.

MUSAP 428 Private Instruction: Oboe (2-3, max. 27) VLPA Intended for undergraduate majors. Audition required.

MUSAP 429 Private Instruction: Clarinet (2-3, max. 27) VLPA McColl Intended for undergraduate majors. Audition required.

MUSAP 430 Private Instruction: Bassoon (2-3, max. 27) VLPA Grossman Intended for undergraduate majors. Audition required.

MUSAP 431 Private Instruction: Saxophone (2-3, max. 27) VLPA Brockman Intended for undergraduate majors. Audition required.

MUSAP 432 Private Instruction: Horn (2-3, max. 27) VLPA Kappy Intended for undergraduate majors. Audition required.

MUSAP 433 Private Instruction: Trumpet (2-3, max. 27) VLPA Intended for undergraduate majors. Audition required.

MUSAP 434 Private Instruction: Trombone (2-3, max. 27) VLPA Immel Intended for undergraduate majors. Audition required.

MUSAP 435 Private Instruction: Tuba (2-3, max. 27) VLPA Phillips Intended for undergraduate majors. Audition required.

MUSAP 436 Private Instruction: Harp (2-3, max. 27) VLPA Vokolek Intended for undergraduate majors. Audition required.

MUSAP 437 Private Instruction: Percussion (2-3, max. 27) VLPA Collier, Cruso Intended for undergraduate majors. Audition required.

MUSAP 438 Private Instruction: Guitar (2-3, max. 27) VLPA Novacek Intended for undergraduate majors. Audition required.

MUSAP 439 Private Instruction: Viola da Gamba (2-3, max. 27) VLPA Tindemans Intended for undergraduate majors. Audition required.

MUSAP 440 Timpani (2-3, max. 27) VLPA Collier Intended for undergraduate majors. Audition required.

MUSAP 441 Mallet Percussion (2-3, max. 27) VLPA Collier Intended for undergraduate majors. Audition required.

MUSAP 442 Jazz and Non-Western Drumming Techniques (2/3, max. 18) VLPA Collier Focused study of American jazz drumming and/ or hand drumming techniques of various world music cultures to broaden the skills of percussion students, preparing them for new demands of contemporary musical styles. Designed primarily for music undergraduates enrolled in the percussion program. Audition required.

MUSAP 463 Private Instruction: Viola (2-3, max. 27) VLPA Wiatras Intended for undergraduate majors. Audition required.

MUSAP 502 Private Instruction: Organ (2-3, max. 45) Terry Intended for graduate non-majors. Audition required.

MUSAP 503 Private Instruction: Harpsichord (2-3, max. 45) Terry Intended for graduate non-majors. Audition required.

MUSAP 504 Private Instruction: Violin (2-3, max. 45) Patterson Intended for graduate non-majors. Audition required.

MUSAP 505 Private Instruction: Violoncello (2-3, max. 45) Saks Intended for graduate non-majors. Audition required.

MUSAP 506 Private Instruction: Double Bass (2-3, max. 45) Lieberman Intended for graduate non-majors. Audition required.

MUSAP 507 Private Instruction: Flute (2-3, max. 45) Skowronek Intended for graduate non-majors. Audition required.

MUSAP 508 Private Instruction: Oboe (2-3, max. 45) Intended for graduate non-majors. Audition required.

MUSAP 509 Private Instruction: Clarinet (2-3, max. 45) McColl Intended for graduate non-majors. Audition required.

MUSAP 511 Private Instruction: Saxophone (2-3, max. 45) Brockman Intended for graduate non-majors. Audition required.

MUSAP 512 Private Instruction: Horn (2-3, max. 45) Kappy Intended for graduate non-majors. Audition required.

MUSAP 513 Private Instruction: Trumpet (2-3, max. 45) Intended for graduate non-majors. Audition required.

MUSAP 514 Private Instruction: Trombone (2-3, max. 45) Immel Intended for graduate non-majors. Audition required.

MUSAP 515 Private Instruction: Tuba (2-3, max. 45) Phillips Intended for graduate non-majors. Audition required.

MUSAP 516 Private Instruction: Harp (2-3, max. 45) Vokolek Intended for graduate non-majors. Audition required.

MUSAP 518 Private Instruction: Guitar (2-3, max. 45) Novacek Intended for graduate non-majors. Audition required.

MUSAP 519 Private Instruction: Viola da Gamba (2-3, max. 45) Tindemans Audition required.

MUSAP 520 Private Instruction: Voice (3, max. 18) Harper, Patrick Intended for graduate majors. Audition required.

MUSAP 521 Private Instruction: Piano (3, max. 18) McCabe, Michaelian, Seales, Sheppard Intended for graduate majors. Audition required.

MUSAP 522 Private Instruction: Organ (3, max. 18) Terry Intended for graduate majors. Audition required.

MUSAP 523 Private Instruction: Harpsichord (3, max. 18) Terry Intended for graduate majors. Audition required.

MUSAP 524 Private Instruction: Violin (3, max. 18) Patterson Intended for graduate majors. Audition required.

MUSAP 525 Private Instruction: Violoncello (3, max. 18) Saks Intended for graduate majors. Audition required.

MUSAP 526 Private Instruction: Double Bass (3, max. 18) Lieberman Intended for graduate majors. Audition required.

MUSAP 527 Private Instruction: Flute (3, max. 18) Skowronek Intended for graduate majors. Audition required.

MUSAP 528 Private Instruction: Oboe (3, max. 18) Intended for graduate majors. Audition required.

MUSAP 529 Private Instruction: Clarinet (3, max. 18) McColl Intended for graduate majors. Audition required.

MUSAP 530 Private Instruction: Bassoon (3, max. 18) Grossman Intended for graduate majors. Audition required.

MUSAP 531 Private Instruction: Saxophone (3, max. 18) Brockman Intended for graduate majors. Audition required.

MUSAP 532 Private Instruction: Horn (3, max. 18) Kappy Intended for graduate majors. Audition required.

MUSAP 533 Private Instruction: Trumpet (3, max. 18) Intended for graduate majors. Audition required.

MUSAP 534 Private Instruction: Trombone (3, max. 18) Immel Intended for graduate majors. Audition required.

MUSAP 535 Private Instruction: Tuba (3, max. 18) Phillips Intended for graduate majors. Audition required.

MUSAP 536 Private Instruction: Harp (3, max. 18) Vokolek Intended for graduate majors. Audition required.

MUSAP 537 Private Instruction: Percussion (3, max. 18) Collier, Cruso Intended for graduate majors. Audition required.

MUSAP 538 Private Instruction: Guitar (3, max. 18) Novacek Intended for graduate majors. Audition required.

MUSAP 540 Timpani (3, max. 18) Collier Intended for graduate majors. Audition required.
MUSAP 543 Private Instruction: Viola (2-3, max. 45) Watras Intended for graduate non-majors. Audition required. Offered: AWSpS.

MUSAP 563 Private Instruction: Viola (2-3, max. 45) Watras Intended for Master’s degree candidates. Audition required. Offered: AWSpS.

MUSAP 570 Private Instruction: Voice (3, max. 27) Harper, Patrick Intended for graduate majors. Audition required.

MUSAP 571 Private Instruction: Piano (3, max. 27) McCabe, Michaelian, Sheppard Intended for graduate majors. Audition required.

MUSAP 572 Private Instruction: Organ (3, max. 27) Terry Intended for graduate majors. Audition required.

MUSAP 573 Private Instruction: Harpsichord (3, max. 27) Terry Intended for graduate majors. Audition required.

MUSAP 574 Private Instruction: Violin (3, max. 27) Patterson Intended for graduate majors. Audition required.

MUSAP 575 Private Instruction: Violoncello (3, max. 27) Saks Intended for graduate majors. Audition required.

MUSAP 576 Private Instruction: Double Bass (3, max. 27) Lieberman Intended for graduate majors. Audition required.

MUSAP 577 Private Instruction: Flute (3, max. 27) Skowronek Intended for graduate majors. Audition required.

MUSAP 578 Private Instruction: Oboe (3, max. 27) Intended for graduate majors. Audition required.

MUSAP 579 Private Instruction: Clarinet (3, max. 27) McCell Intended for graduate majors. Audition required.

MUSAP 580 Private Instruction: Bassoon (3, max. 27) Grossman Intended for graduate majors. Audition required.

MUSAP 581 Private Instruction: Saxophone (3, max. 27) Brockman Intended for graduate majors. Audition required.

MUSAP 582 Private Instruction: Horn (3, max. 27) Kappy Intended for graduate majors. Audition required.

MUSAP 583 Private Instruction: Trumpet (3, max. 27) Intended for graduate majors. Audition required.

MUSAP 584 Private Instruction: Trombone (3, max. 27) Inmel Intended for graduate majors. Audition required.

MUSAP 585 Private Instruction: Tuba (3, max. 27) Phillips Intended for graduate majors. Audition required.

MUSAP 586 Private Instruction: Harp (3, max. 27) Vokolek Intended for graduate majors. Audition required.

MUSAP 587 Private Instruction: Percussion (3, max. 27) Collier, Crusoe Intended for graduate majors. Audition required.

MUSAP 588 Private Instruction: Guitar (3, max. 27) Novacek Audition required.

MUSAP 589 World Music Laboratory (2-3, max. 18) World music traditions taught by visiting artists with emphasis on cultural pedagogy and traditional theory. The particular culture studied changes from year to year. Required of all graduate students in ethnomusicology. Credit/no credit only. Audition required.

MUSAP 590 Timpani (3, max. 27) Crusoe Intended for graduate majors. Audition required.

MUSAP 591 Mallet Percussion (3, max. 27) Collier Intended for graduate majors. Audition required.

MUSAP 592 Private Instruction: Viola da Gamba (3, max. 27) Tindemans Intended for graduate majors. Audition required.

MUSAP 593 Private Instruction: Viola (2-3, max. 45) Watras Intended for Doctoral degree candidates. Audition required. Offered: AWSpS.

Music Education

MUSED 301 Techniques for Teaching Music to Children (2) VLPAPA Campbell Exercises and applied experiences in sight-singing, music reading, and error detection. Keyboard skills, record and instruments of the Orff ensemble relevant to the teaching of music to children. Prerequisite: either MUSIC 212 or MUSIC 302; MUSAP 135.

MUSED 304 Introductory Music Methods (2, max. 4) VLPAPA Demorest, Morrison Comprehensive examination of materials for training beginning vocal and instrumental students. Topics include recruiting, motivation, and problems associated with evaluation. Methods of starting beginners and rehearsing ensembles are demonstrated with techniques addressing problems unique to school music ensemble instruction. Must be taken concurrently with MUSED 301; MUSED 340. Offered: A.

MUSED 305 Introductory Music Methods II (2, max. 4) VLPAPA Demorest, Morrison Comprehensive examination of materials for training beginning vocal and instrumental students. Topics include recruiting, motivation, problems associated with evaluation. Methods of starting beginners and rehearsing ensembles are demonstrated with techniques addressing problems unique to public school ensemble instruction. Offered: W.

MUSED 306 Introductory Music Methods III (2, max. 4) VLPAPA Demorest, Morrison Comprehensive examination of materials for training beginning vocal and instrumental students. Topics include recruiting, motivation, problems associated with evaluation. Methods of starting beginners and rehearsing ensembles are demonstrated with techniques addressing problems unique to public school ensemble instruction. Offered: Sp.

MUSED 340 Music in Education (3) VLPAPA Demorest An orientation to the broad scope of issues regarding music in the schools (K-12), including curriculum, the development of instructional strategies, and evaluation techniques.

MUSED 401 Tin Pan Alley: Concepts and Teaching Strategies for Music Educators (1) VLPAPA Overview of Tin Pan Alley phenomenon that dominated the American popular music industry for nearly 70 years. For music educators. Focuses on cooperative learning strategies and performance considerations in the school environment. Recommended: MUSIC 162.

MUSED 402 Rock and Roll Roots for Music Educators (1) VLPAPA Overview of the musical and cultural roots of American Rock and Roll for music educators. Explores teaching strategies and performance possibilities in the school environment. Recommended: MUSIC 162.

MUSED 403 Part-Time Student Teaching in Music (6) VLPAPA Campbell, Demorest, Morrison Supervised teaching internship. Directed observations of distinguished teachers in an elementary or secondary music setting. Weekly seminars. Credit/no credit only. Offered: AWSp.

MUSED 404 Full-Time Student Teaching in Music (15) VLPAPA Campbell, Demorest, Morrison Supervised teaching internship. Directed observations of distinguished teachers in an elementary or secondary music setting. Weekly seminars. Credit/no credit only. Prerequisite: MUSED 403. Offered: AWSp.

MUSED 405 Marching Band Technique (2) VLPAPA McDavid, Morrison, Salzman Basics of marching and maneuvering discussed and used to write drill. Covers selection of music, use of marching procession, and show design. Students complete a drill for their own band or for an instrumentation determined by the instructor.

MUSED 410 Instrumental Rehearsal Techniques (3) VLPAPA Salzman Includes score preparation, rehearsal formats, and error detection.

MUSED 431 Curriculum in Music Education (3) VLPAPA Campbell, Demorest, Morrison Principles and practices of curriculum design applied to the development of the music curriculum. Individual or group work on elementary and secondary school music curriculum projects.

MUSED 432 Comprehensive Music in the Secondary School (3) VLPAPA Demorest Teaching of music and its literature in music classes other than traditional ensembles from grade six through adults. Prerequisite: MUSED 340.

MUSED 440 Music for Children (3) VLPAPA Campbell Identification and selection of appropriate objectives, materials, teaching strategies and evaluation techniques used in teaching music from birth through grade five, with consideration of various approaches (e.g., Delcroze, Kodaly, Orff) for the musical development of children. Prerequisite: MUSED 302; MUSED 340.

MUSED 442 Instrumental Curriculum: Methods and Materials (3) VLPAPA Morrison Study of the organization and administration of school instrumental music; the selection and use of materials and teaching strategies from beginning to advanced levels of instrumental instruction. Prerequisite: MUSED 340.

MUSED 443 Choral Curriculum: Methods and Materials (3) VLPAPA Demorest Study of the organization and administration of school choral music; the selection and use of materials and teaching strategies from beginning to advanced levels of choral instruction. Prerequisite: MUSED 340.

MUSED 452 Ethnomusicology in the Schools (3) VLPAPA Campbell Issues, teaching materials,
and techniques involved in incorporating music cultures of United States and related world music repertoires in K-12 classroom instruction. Prerequisite: MUSED 340.

MUSED 453 Approaches to Classroom Instruction: K-12 (3) VLPA Campbell Examines such approaches as MMCP, Orff, Kodaly, and Dalcroze. Included are the philosophy of each and the methods, materials, and instructional skills needed for classroom application. Prerequisite: MUSED 403.

MUSED 465 Classroom Management and Evaluation in Music Education (3) VLPA Morrison Provides future teachers with strategies and techniques for classroom management, motivation, assessment, and evaluation for applications to K-12 school music programs. Prerequisite: MUSED 340.

MUSED 475 Teaching the Music of Selected Cultures (1, max. 6) VLPA Campbell Music and culture of a specific world region with particular attention to songs, stories, and instrumental pieces applicable to the teaching of music and the arts in elementary and secondary schools.

MUSED 480 Music Methods for Classroom Teachers (3) VLPA Campbell Examines basic fundamentals of music and methods for teaching K-6 school children. Topics include repertoire appropriate for different age levels, methods and materials for integrating music into the K-6 curriculum.

MUSED 496 Special Topics in Music Education (1-3, max. 10) VLPA Campbell Special studies designed to reflect contemporary emphases and concerns in the music education profession.

MUSED 501 Introduction to Research in Music Education (3) Campbell, Demorest, Morrison Seminar in research design and method with emphasis on identification of problems in music instruction, interpretation of data, and application of findings to classroom settings.

MUSED 502 Quantitative Research in Music Education (3) Campbell, Demorest, Morrison Seminar in quantitative research utilizing experimental, quasi-experimental, and descriptive design, with emphasis on the pursuit of solutions to pedagogical problems through appropriate research procedures, analysis, and interpretation of findings. Prerequisite: MUSED 501.

MUSED 503 Qualitative Research in Music Education (3) Campbell, Demorest, Morrison Examination of qualitative modes of inquiry (including ethnographic, case study, phenomenological, and historical) to music instruction in classroom, studio, and community settings. Prerequisite: MUSED 502.

MUSED 522 Psychology of Music Learning and Teaching (3) Campbell, Demorest, Morrison Examines previous research in areas related to music cognition, including music perception, music performance, musical creativity, musical affect, musical preference, and social psychology. Explores how this research relates to MMCP, curriculum and practice in music education. Role of theory, method, and procedure for psychological research in music education.

MUSED 523 Tests and Measurement (3) Campbell, Demorest, Morrison Examination of currently published aptitude and achievement tests in music and their uses in music education. Explores the basic methods for constructing classroom tests and their use in evaluation. Selected readings include researching test construction and application of tests and measurement to program evaluation.

MUSED 524 Seminar in Music Education (3) Campbell, Demorest, Morrison Special problems in the teaching and supervision of music in the elementary grades. Prerequisite: one year of teaching experience.

MUSED 525 Seminar in Music Education (3) Campbell, Demorest, Morrison Special problems in the teaching and administration of music in the secondary school and community college. Prerequisite: one year of teaching experience.

MUSED 530 Administration and Supervision in Music Education (3) Campbell, Demorest, Morrison Survey of issues in policy and systems for facilities, student/personnel, technology, school/community relations, and special programs in music education. Focuses on evaluating and improving existing programs. Includes supervision of student teachers.

MUSED 535 Seminar in Musical Development (3) Campbell, Demorest, Morrison Critical review of theories, methods of inquiry, designs, and conclusions of research in musical development from early childhood through adolescence. Emphasis on evaluating theories and methods of studying musical development and exploring their relationship to theories of general intellectual development; adult music cognition research; and curriculum and practice in music education.

MUSED 540 History of American Music Education (3) Campbell, Demorest, Morrison A chronological examination of individual, social, and political events, and educational philosophies, that characterized the development of music instruction in American schools from colonial times to the present.

MUSED 542 Comparative Music Education (3) Campbell, Demorest, Morrison A transcultural examination of philosophy and practice of music instruction.

MUSED 550 Proseminar in Music Education (3) Campbell, Demorest, Morrison Examination of the major literature in the philosophy, history, psychology, and sociology of formal school music instruction.

MUSED 552 World Music Education (3) Campbell Seminar on issues of multiculturalism and the world music “movement” as they affect school music curriculum and instruction. Curricular content and cultural context examined in relation to teaching K-12 students, teachers, and undergraduate students in music education programs. Offered: AWSpS.

MUSED 554 Seminar in Musical Development (3) Campbell, Demorest, Morrison Seminar focusing on review of literature on psychological and sociological aspects of music education, including historical and philosophical foundations of music education in the United States. Appropriate for MA students seeking guidance in preparation of topic for examinations. Prerequisite: MUSED 501.

Music History

MUHST 210 Introduction to the History of Western Music I (3) VLPA Taricani Introduction to the critical study of Western music history, including representative composers, works, and genres, as well as significant concepts and issues. Origins of Western Music. Prerequisite: either 3.0 in MUSIC 120 or minimum score of 80% on music history placement test. Offered: W.

MUHST 211 Introduction to the History of Western Music II (3) VLPA Starr, Taricani Introduction to the critical study of Western music history, including representative composers, works, and genres, as well as significant concepts and issues. Baroque and Classical Periods. Prerequisite: either 3.0 in MUSIC 120 or minimum score of 80% on music history placement test. Offered: W.

MUHST 212 Introduction to the History of Western Music III (3) VLPA Starr Introduction to the critical study of Western music history including representative composers, works, and genres as well as significant concepts and issues. Nineteenth and Twentieth Centuries. Prerequisite: 2.0 in MUHST 211. Offered: Sp.

MUHST 213 Introduction to the History of Western Music IV (3) VLPA St. John Introduction to the critical study of Western music history including representative composers, works, and genres as well as significant concepts and issues. Nineteenth and Twentieth Centuries. Prerequisite: 2.0 in MUHST 211. Offered: Sp.

MUHST 260 Orchestral Music (5) VLPA Orchestral music from its beginnings in the seventeenth century through recent developments; evolution of the symphony.

MUHST 261 Mozart (5) VLPA Introduction to Mozart's music and to musical life in Habsburg Austria during the Enlightenment. Mozart's musical personality studied through masterpieces in all genres, with principal emphasis on listening. Ability to read music not required.

MUHST 262 Introduction to Twentieth-Century Music (3) VLPA Starr Listener’s survey of important composers and trends from Debussy through electronic music.

MUHST 301 Music and the American Experience (3) I&S/VLPA Starr Survey of American music from the colonial period to the present day, with emphasis on in-depth examination of representative works from both cultivated and vernacular traditions. Prerequisite: MUHST 210; MUSIC 303; MUSIC 306. Offered: W.

MUHST 310 Perspectives in Music History (3, max. 6) I&S/VLPA Overview of different stylistic periods in music history. Perspectives include music and philosophy, music and gender, and music and text. Students develop an insight into the manner in which similar questions have been approached in diverse cultures and periods. Prerequisite: MUHST 210; MUSIC 303; MUSIC 306. Offered: W.

MUHST 311 Beethoven in Western Culture (3) I&S/VLPA Comprehensive study of Beethoven's works and their nineteenth- and twentieth-century reception, with consideration of how Western culture has used Beethoven’s music in its constructions of subjectivity, genius, and national and other collective identities. Prerequisite: MUSIC 303; MUSIC 306; MUHST 210. Offered: W.

MUHST 330 Music in the United States (5) VLPA Contribution of music to the development of American culture.

MUHST 400 Medieval Music: To 1400 (3) VLPA Taricani Critical readings on issues in medieval music. Works to be studied included repertory from chant, motets, and sacred and secular music of the Middle Ages.

MUHST 401 Early British Music: 1300-1700 (3) VLPA Taricani Examines the history of British music from its earliest polyphony through the music of Purcell. Stylistic features of English music studied, including medieval polyphony, Tudor music, Elizabethan music, and seventeenth-century music through Purcell.

MUHST 402 Late Renaissance Secular Music: 1525-1630 (3) VLPA Taricani The madrigal in Italy, England, and Germany. The Chanson, Jannenquins through Lassus.

MUHST 403 Late Renaissance Sacred and Instrumental Music: 1525-1630 (3) VLPA Taricani Latin church music. Willaert through G. Gabrieli; early Reformation church music, Walther through Gibbons; instrumental music, Cabezón, the English virginal school, and Sweelinck.

MUHST 404 Baroque Keyboard Music (3) VLPA Forms and styles: Frescobaldi through J.S. Bach and C.P.E. Bach.
MUHST 406 Baroque Choral Music (3) VLPA
Bozarth Monteverdi through Handel. Prerequisite: 2.0 in MUHST 210; 2.0 in MUSIC 303; 2.0 in MUSIC 306.

MUHST 407 Baroque Opera (3) VLPA
Monteverdi through Handel.

MUHST 408 Keyboard Music: 1760-1830 (3) VLPA
Bozarth Haydn through Schubert. Prerequisite: 2.0 in MUHST 210; 2.0 in MUSIC 303; 2.0 in MUSIC 306.

MUHST 409 Chamber Music: 1760-1830 (3) VLPA
Haydn through Schubert. Prerequisite: 2.0 in MUHST 210; 2.0 in MUSIC 303; 2.0 in MUSIC 306.

MUHST 410 Orchestral Music: 1760-1830 (3) VLPA
Haydn through early Berlioz.

MUHST 411 Art Song, 1760-1830 (3) VLPA
The art song in European culture during the Classical and early Romantic periods. Prerequisite: 2.0 in MUHST 210; 2.0 in MUSIC 303; 2.0 in MUSIC 306.

MUHST 412 Choral Music: 1750-1830 (3) VLPA
Large works for chorus and orchestra, Haydn through Beethoven.

MUHST 413 Opera: 1750-1830 (3) VLPA
Gluck through Bellini.

MUHST 414 Keyboard Music: 1830-1915 (3) VLPA
Bozarth Schumann through Debussy. Prerequisite: 2.0 in MUHST 210; 2.0 in MUSIC 303; 2.0 in MUSIC 306.

MUHST 415 Chamber Music: 1830-1915 (3) VLPA
Schumann through Ravel. Prerequisite: 2.0 in MUHST 210; 2.0 in MUSIC 303; 2.0 in MUSIC 306.

MUHST 416 Orchestral Music: 1830-1915 (3) VLPA
Schumann and Mendelssohn through early Schoenberg and Stravinsky. Prerequisite: 2.0 in MUHST 210; 2.0 in MUSIC 303; 2.0 in MUSIC 306.

MUHST 417 Art Song: 1830-1915 (3) VLPA
Bozarth The Liefer of Schumann, Brahms, Wolf, Strauss, Mahler, and Schoenberg. Prerequisite: 2.0 in MUHST 210; 2.0 in MUSIC 303; 2.0 in MUSIC 306.

MUHST 418 Choral Music: 1830-1915 (3) VLPA
Bozarth Selected choral masterpieces. Mendelssohn through Schoenberg.

MUHST 419 Opera: 1830-1915 (3) VLPA
German, French, and Italian operatic traditions. Prerequisite: 2.0 in MUHST 210; 2.0 in MUSIC 303; 2.0 in MUSIC 306.

MUHST 420 Authenticity and Performance (3) VLPA
The practical and philosophical issues raised by historically informed performance of early music on period instruments. Prerequisite: 2.0 in MUHST 210; 2.0 in MUSIC 303; 2.0 in MUSIC 306.

MUHST 421 Music Criticism (3) VLPA
Starr Study of the various forms of music criticism, with an emphasis on the writing of valid examples and evaluation of one's own work along with that of others — classmatists, journalists, and academic critics. Prerequisite: 2.0 in MUHST 210; 2.0 in MUSIC 303; 2.0 in MUSIC 306.

MUHST 422 Gender and Music (3) VLPA
Tsou Investigates how gender issues have shaped the creation and perception of music; introduces women composers and their music. Topics include writing women's biography; creation of the music canon; gender issues in opera; interwining issues of race, class, and gender, blues women; and popular music. Offered: VI. Prerequisite: 2.0 in MUHST 210; 2.0 in MUSIC 303; 2.0 in MUSIC 306.

MUHST 423 Twentieth-Century Music to 1945 (3) VLPA
Starr Intensive study of selected composers and works exemplifying the new vocabularies, grammars, and styles of the early part of the twentieth century. Prerequisite: 2.0 in MUHST 210; 2.0 in MUSIC 303; 2.0 in MUSIC 306.

MUHST 424 Music Since 1945 (3) VLPA
Starr Diversity of the contemporary musical scene. Vocabularies appropriate for the description and understanding of the new music, developed through study of representative composers and works, and appropriate readings. Prerequisite: 2.0 in MUHST 210; 2.0 in MUSIC 303; 2.0 in MUSIC 306.

MUHST 425 Jazz History and Analysis (3) VLPA
Collier Major eras and styles of jazz with emphasis on technical aspects of jazz music: composition, arranging, improvisation practices. Prerequisite: 2.0 in MUHST 210; 2.0 in MUSIC 303; 2.0 in MUSIC 306.

MUHST 426 American Popular Music (3) VLPA
Starr An in-depth consideration of American popular music styles and repertory from about 1920 to the present day. Analysis of representative pieces; consideration of critical and aesthetic issues relating to popular music; relationship of popular music to “art” music and to American culture and society. Prerequisite: 2.0 in MUHST 210; 2.0 in MUSIC 303; 2.0 in MUSIC 306.

MUHST 427 Special Topics in Music History (1-3, max. 6) VLPA
Topics vary each quarter. Prerequisite: 2.0 in MUHST 210; 2.0 in MUSIC 303; 2.0 in MUSIC 306.

MUHST 500 Seminar in Methods of Music Research (3) Taricani Explores various critical approaches to research in music at the graduate level, examining specialized bibliographical resources, controversial arguments about musical issues, and other matters of musical criticism required to begin advanced study of music. Prerequisite for all graduate music history courses except MUHST 515.

MUHST 504 Seminar in Medieval Music (3, max. 6) Taricani Prerequisite: MUHST 500.

MUHST 505 Seminar in Renaissance Music (3, max. 6) Taricani Prerequisite: MUHST 500.

MUHST 506 Seminar in Baroque Music (3, max. 6) Bozarth Prerequisite: MUHST 500.

MUHST 508 Seminar in the Viennese Classical Period: 1760-1830 (3, max. 6) Bozarth Prerequisite: MUHST 500.

MUHST 509 Seminar in Nineteenth-Century Music: 1830-1890 (3, max. 6) Bozarth Prerequisite: MUHST 500.

MUHST 510 Seminar in Music Since 1890 (3, max. 6) Starr Prerequisite: MUHST 500.

MUHST 511 Seminar in Medieval and Renaissance Notation (5) Taricani Gregorian chant through sixteenth-century prints.

MUHST 512 Seminar in Modern Editorial Procedures (5) Bozarth Study of modern procedures for preparing critical editions. Related areas of study may include analysis of musical style and historical and performance problems inherent in works being edited.

MUHST 520 Seminar in American Music (3, max. 6) Starr Research in the life, works, and times of composers in the United States from colonial days to the present. Prerequisite: MUHST 500.

MUHST 537 Seminar on Opera (3, max. 6) Prerequisite: MUHST 500.

ARAB 401 Elementary Arabic (15)
ARAB 411 Elementary Arabic (5)
ARAB 412 Elementary Arabic (5) Study of grammar, with oral and written drill and reading of simple texts. (Cannot be taken for credit if 401 taken.) Prerequisite: ARAB 411.

ARAB 413 Elementary Arabic (5) Study of grammar, with oral and written drill and reading of simple texts. (Cannot be taken for credit if 401 taken.) Prerequisite: ARAB 412.

ARAB 414 Spoken Arabic (3) Study of grammar with emphasis on oral drill in modern spoken Arabic (Western or Eastern).

ARAB 415 Spoken Arabic (3) Study of grammar with emphasis on oral drill in modern spoken Arabic (Western or Eastern).

ARAB 416 Spoken Arabic (3) Study of grammar with emphasis on oral drill in modern spoken Arabic (Western or Eastern).

ARAB 421 Intermediate Arabic (5) VLPA Reading of selected texts in standard Arabic, with continuing emphasis on grammar and syntax. Prerequisite: either ARAB 401 or ARAB 413.

ARAB 422 Intermediate Arabic (5) VLPA Reading of selected texts in standard Arabic, with continuing emphasis on grammar and syntax. Prerequisite: ARAB 421.

ARAB 423 Intermediate Arabic (5) VLPA Reading of selected texts in standard Arabic, with continuing emphasis on grammar and syntax. Prerequisite: ARAB 422.

ARAB 424 Intensive Intermediate Arabic (15) VLPA Equivalent to one year of study of standard Arabic at intermediate level. Extension of knowledge in grammar, syntax and vocabulary, and skills in reading, writing, and conversation. May not be taken for credit if ARAB 421, 422, 423 previously taken for credit. Prerequisite: either ARAB 401 or ARAB 413. Offered: S.

ARAB 431 Advanced Arabic (5) VLPA Focus on Arabic at the advanced level through in-depth examination of grammar, reading of selected texts, and brief surveys of some major reference materials. Prerequisite: ARAB 423.

ARAB 432 Advanced Arabic (5) VLPA Focus on Arabic at the advanced level through in-depth examination of grammar, reading of selected texts, and brief surveys of some major reference materials. Prerequisite: ARAB 431.

ARAB 433 Advanced Arabic (5) VLPA Focus on Arabic at the advanced level through in-depth examination of grammar, reading of selected texts, and brief surveys of some major reference materials. Prerequisite: ARAB 432.

ARAB 451 Adab Prose: Jahiz (3) VLPA Readings in early Arabic prose. Prerequisite: ARAB 432.

ARAB 452 Maqamat: Hamadhan, Hariri (3) VLPA MacKay Reading of several maqamat (essays in rhymed prose) of al-Hamadhan and al-Hariri. Examination of the maqamat genre as a whole. Prerequisite: ARAB 432.

ARAB 453 Historical Texts (3) I&S/VLPA Readings in Arab historians with particular reference to scholars such as Tabari, Ibn al-Jawzi, and Ibn al-Athir. Prerequisite: ARAB 432.

ARAB 454 Quran and Its Interpretation (3) VLPA Reading of selected passages from the Quran in relation to their interpretation in classical commentaries (tafrijf) and in legal texts (ahkam al-Qur'an). Focus on the various types of classical scholarship applied to the text of the Quran (ulum al-Qur'an). Prerequisite: ARAB 432.

ARAB 455 Ritual and Legal Texts (3) VLPA Selected readings from well-known Islamic legal texts (funu al-fiqh) with attention to the sources of the law and methods of exegesis (usul al-fiqh). Prerequisite: ARAB 432.

ARAB 456 Islamic Political Theorists (3) I&S/VLPA Readings from the main political theorists: al-Baghdadi, al-Mawardi, and Ibn Khaldun. Prerequisite: ARAB 432.

ARAB 457 Grammatical and Lexical Texts (3) VLPA Introduction to concepts and terminology of Arabic grammar and lexicography through readings from scholars such as Sibawayh, Ibn Aqil, and Ibn Manzur. Prerequisite: ARAB 432.

ARAB 458 Modern Poetry (3) VLPA DeYoung Neoclassical poetry of the nineteenth and twentieth centuries, and the development of modern verse. Prerequisite: ARAB 432.

ARAB 459 Islamic Philosophical Literature (3) I&S/VLPA Reading of selected texts by representative Islamic philosophers. Prerequisite: ARAB 432.

ARAB 460 Islamic Theological and Mystical Literature (3) VLPA Reading of selected texts representative of Islamic theological and mystical schools. Prerequisite: ARAB 432.

ARAB 461 Modern Prose (3) VLPA DeYoung Modern essays, fiction, and ideological writings. Prerequisite: ARAB 432.

ARAB 462 Sirah and Maghazi Texts (3) I&S/VLPA Reading and discussion of selected historical texts devoted to the life of the Prophet Muhammad, such as Ibn Ishaq, Ibn Hisham, al-Waqidi, Ibn Sa’id, and al-Bayhaqi. Some attention to related genres and contemporary scholarship. Prerequisite: ARAB 432.

ARAB 465 Arabic Inscriptions (3) VLPA Reading of several inscriptions from selected Minaic, Sabaic, Qatabanic, and Hatran. No previous study of Egyptian or any other Near Eastern language is required. Taymanite, Dedanite, Lihiyanite, Safaitic, and Hassanein. No previous Arabic study required. Prerequisite: either ARAB 423, HEBR 423, or HEBR 426.

ARAB 472 Quran and Bible Masorah (3) VLPA Reading and discusses selected readings in textual apparatuses for the Quran and Bible. Attention to marginalia in Rabbinic texts, and Islamic scholars such as al-Zarkashi and as-Suyuti. Prerequisite: either ARAB 432, HEBR 427, or HEBR 432. Offered: jointly with HEBR 470.

ARAB 473 Quran and Bible (3) VLPA Introduction to epigraphic languages used in Southern Arabia from first half of first millennium BCE to mid-fifth century CE. Overview of script, basic grammar, and vocabulary with readings from selected Minaic, Sabaeic, Qatabanic, and Hadramitic inscriptions. No previous study of Arabic required. Offered: S.

ARAB 474 Quran and Bible (3) VLPA Introduction to Arabic Languages of pre-Islamic Northern Arabia from 6th century B.C.E. to 5th century C.E. Overview of scripts, grammar and vocabulary with readings from Thaudic, Egyptian Hieroglyphic Egyptian (5) VLPA Noegel Provides an introduction to hieroglyphic Egyptian as written during the Middle Kingdom (c. 2040-1782 BCE). Focuses on reading and writing hieroglyphics, including reading a complete Egyptian text. No knowledge of Egyptian or any other Near Eastern language is required.
EGYPT 411 Introduction to Coptic (5) Williams
Elements of grammar of the Sahidic dialect of the Coptic language.

EGYPT 422 Readings in Coptic (3) VLPA
Williams Readings from ancient Coptic Christian literature, with emphasis on the Nag Hammadi texts. Prerequisite: COPTC 411 or EGYPT 411.

EGYPT 423 Readings in Coptic (3) VLPA
Williams Readings from ancient Coptic Christian literature, with emphasis on the Nag Hammadi texts. Prerequisite: COPTC 411 or EGYPT 411.

Hebrew
HEBR 401 Intensive Elementary Modern Hebrew (15) Intensive study of grammar, with oral and written drill and reading of simple texts. (Cannot be taken for credit if 411, 412, 413 taken.) Offered: S.

HEBR 404 Beginning Modern Hebrew (3)
Reading, writing, listening, and speaking skills in modern Israeli Hebrew. Not open for credit to student who have taken HEBR 401 or HEBR 411/412/413.

HEBR 405 Beginning Modern Hebrew (3)
Reading, writing, listening, and speaking skills in modern Israeli Hebrew. Not open for credit to student who have taken HEBR 401 or HEBR 411/412/413.

HEBR 406 Beginning Modern Hebrew (3)
Reading, writing, listening, and speaking skills in modern Israeli Hebrew. Not open for credit to student who have taken HEBR 401 or HEBR 411/412/413.

HEBR 407 Beginning Modern Hebrew (3)
Reading, writing, listening, and speaking skills in modern Israeli Hebrew. Not open for credit to student who have taken HEBR 401 or HEBR 411/412/413.

HEBR 411 Elementary Modern Hebrew (5) Sokoloff Modern Israeli Hebrew. Core vocabulary, grammar, conversational text, and oral and written communication. Excerpts from modern Hebrew prose and poetry. (Cannot be taken for credit if 411 taken.)

HEBR 412 Elementary Modern Hebrew (5) Sokoloff Modern Israeli Hebrew. Core vocabulary, grammar, conversational text, and oral and written communication. Excerpts from modern Hebrew prose and poetry. (Cannot be taken for credit if 411 taken.) Prerequisite: HEBR 411.

HEBR 413 Elementary Modern Hebrew (5) Sokoloff Modern Israeli Hebrew. Core vocabulary, grammar, conversational text, and oral and written communication. Excerpts from modern Hebrew prose and poetry. (Cannot be taken for credit if 411 taken.) Prerequisite: HEBR 411.

HEBR 415 Elementary Biblical Hebrew (5) Noegel Continues the inductive introduction to the biblical Hebrew language begun in HEBR 414. Moves beyond the textbook and into select portions of the Hebrew Bible. Prerequisite: HEBR 331 or HEBR 414.

HEBR 421 Intermediate Modern Hebrew (5)
VLPA Sokoloff Readings of selected texts in modern Hebrew with continuing emphasis on grammar, syntax, composition, and conversation. Prerequisite: either HEBR 401 or HEBR 413.

HEBR 422 Intermediate Modern Hebrew (5)
VLPA Sokoloff Readings of selected texts in modern Hebrew with continuing emphasis on grammar, syntax, composition, and conversation. Prerequisite: HEBR 421.

HEBR 423 Intermediate Modern Hebrew (5)
VLPA Sokoloff Readings of selected texts in modern Hebrew with continuing emphasis on grammar, syntax, composition, and conversation. Prerequisite: HEBR 422.

HEBR 426 Biblical Hebrew Prose (5) VLPA
Noegel Explores select prose sections of the Hebrew Bible (Old Testament) in conjunction with English translations and commentaries. Emphasis on close readings, the grammatical insights of textual criticism, and the interpretive strategies and agendas of the English translations. Prerequisite: HEBR 332 or HEBR 415.

HEBR 427 Biblical Hebrew Poetry (5) VLPA
Noegel Explores select poetic sections of the Hebrew Bible (Old Testament) in conjunction with English translations and commentaries. Emphasis on close readings, the grammatical insights of textual criticism, and the interpretive strategies and agendas of the English translations. Prerequisite: HEBR 333 or HEBR 426.

HEBR 428 Inscriptions from Biblical Times (5) VLPA
Noegel Surveys Northwest Semitic inscriptions that bear significantly on our understanding of Biblical history and ancient Hebrew including the Moabite stone, Israelite ostraca, Siloam engraving, Gezer calendar, Deir Alla (Gilead) inscriptions, the Asherah texts, Ammonite fragments, and Phoenician monuments. Prerequisite: HEBR 333 or HEBR 426.

HEBR 431 The Book of Job (5) VLPA
Noegel Examines the language, style, and sophistication of the biblical Book of Job within the context of ancient Near Eastern dispute poetry. Correlates close readings of the book in the original Hebrew language with various interpretations it has received since antiquity. Prerequisite: HEBR 426. Offered: A.

HEBR 432 The Book of Proverbs (5) VLPA
Noegel Examines the language, style, and sophistication of the biblical Book of Proverbs within the context of ancient Near Eastern dispute poetry. Correlates close readings of the book in the original Hebrew language with various interpretations it has received since antiquity. Prerequisite: HEBR 426. Offered: W.

HEBR 433 The Book of Ecclesiastes (5) VLPA
Noegel Examines the language, style, and sophistication of the biblical Book of Ecclesiastes within the context of ancient Near Eastern dispute poetry. Correlates close readings of the book in the original Hebrew language with various interpretations it has received since antiquity. Prerequisite: HEBR 426. Offered: A.

HEBR 451 Introduction to Hebrew Literature (3) VLPA Sokoloff Literary texts and analysis. Grammar, composition, and dictionary skills. Primarily modern texts—short poetry, fiction, and essays—with some selections as well from biblical passages, the liturgy, midrash, and medieval poetry. Prerequisite: HEBR 423.

HEBR 452 Introduction to Hebrew Literature (3) VLPA Sokoloff Literary texts and analysis. Grammar, composition, and dictionary skills. Primarily modern texts—short poetry, fiction, and essays—with some selections as well from biblical passages, the liturgy, midrash, and medieval poetry. Prerequisite: HEBR 423.

HEBR 453 Introduction to Hebrew Literature (3) VLPA Sokoloff Literary texts and analysis. Grammar, composition, and dictionary skills. Primarily modern texts—short poetry, fiction, and essays—with some selections as well from biblical passages, the liturgy, midrash, and medieval poetry. Prerequisite: HEBR 423.

HEBR 454 Hebrew Poetry (3) VLPA Sokoloff Selections of poetry by prominent twentieth-century Hebrew poets whose texts comment or elaborate on biblical texts. Original source considered side-by-side with modern poetry, to examine ways recent literature models itself on, draws upon, and revises traditional sources. Prerequisite: HEBR 423.

HEBR 455 Hebrew Fiction (3) VLPA Sokoloff Selections of fiction by prominent modern Hebrew writers, including S.Y. Agnon, Aharon Appelfeld, David Shazar, Aharon Megged, and others. Prerequisite: HEBR 423.

HEBR 456 Hebrew Poems and Prayers (3) VLPA Sokoloff Examines modern Hebrew poems side by side with texts from the traditional Jewish liturgy, analyzing how contemporary writers have drawn on classical sources to reflect on matters of faith and the language of prayer. Prerequisite: HEBR 423.

HEBR 457 Hebrew in Song (3) VLPA Sokoloff Selections of Israeli folk songs, pop, rock, children's songs, and musika mizrahit. While building vocabulary and improving dictionary and composition skills, students examine the role of popular song in the construction of modern Hebrew culture and Israeli identity.

HEBR 470 Stories of the Prophets (3) I&S/ VLPA Reading and discussion of Jewish and Islamic exegetical traditions of selected Biblical and Quranic narratives dealing with such figures as Abraham, Jacob, or Adam and Eve. Prerequisite: either ARAB 437, HEBR 427, or HEBR 432. Offered: jointly with ARAB 470.

HEBR 472 Quran and Bible Masorah (3) VLPA Introduces and discusses selected readings in textual apparatuses for the Quran and Bible. Attention to marginalia in Rabbinic texts, and Islamic scholars such as al-Zarkashi and as-Suyuti. Prerequisite: either ARAB 437, HEBR 427, or HEBR 432. Offered: jointly with ARAB 472.

HEBR 490 Supervised Study (1-6, max. 18) Special work in literary texts for graduates and undergraduates. Prerequisite: HEBR 423.

HEBR 499 Undergraduate Research (1-6, max. 18)

HEBR 600 Independent Study or Research (*).
Near Eastern Languages and Civilization

NEAR E 205 Religion, Violence, and Peace: Patterns Across Time and Tradition (5) I&S/Noegel Examines the complex relationship between violence and peace in a variety of religious traditions. Examines case studies from the ancient Near East, medieval East Asia, and the contemporary West from the standpoint of lived experiences and contemporary theories derived from several academic disciplines. Offered: jointly with HUM/RELIG 205; W.

NEAR E 210 Introduction to Islamic Civilization (5) I&S/VLPA Major developments in Islamic civilization from advent of Islam in seventh century to present. Islamic history, law, theology, and mysticism, as well as the politics, cultures, and literatures of the various Islamic societies. Offered: jointly with SISME 210.

NEAR E 211 Islam (5) I&S/VLPA Introduction to important cultural and historical aspects of Islam, focusing on basic concepts and developments such as prophethood, Quran and Hadith, canon and law, ritual, social theory, Sufism, theology, and sectarianism. Special attention to comparision of varying Muslim practices and beliefs, and their relation to textual and personal authority. Offered: jointly with RELIG 211.

NEAR E 212 Introduction to the Quran (5) I&S/ VLPA Emphasis on the historical context of the Quran, the history of the text, its collection, organization, and interpretation. In English. Offered: jointly with RELIG 212.

NEAR E 213 Introduction to the Modern Middle East (5) I&S Major social and political trends in the Middle East during the 18th, 19th, and 20th centuries. Basic principles of Islam and its diversity, changing balance of power during the early modern period; European colonialism and withdrawal; pan-Arabism, nationalism, feminism and religious resurgence. Offered: jointly with SISME 213.

NEAR E 215 Prophets in Islam and Judaism (5) I&S/ Noegel Explores prophecy and prophets within the context of the ancient Mediterranean world. Particular attention to the exegetical traditions concerning prophets in the Bible and Quran. Examines the stories of Abraham, Moses, Gideon, Elijah/Khidr, and others. Prophecy and mysticism examined for their relationship to oracles, sufiism, and sacred texts. Offered: Sp.

NEAR E 220 Introduction to the Ancient Near East (5) I&S/Noegel Surveys the peoples, places and events of the ancient Near East. Examines the cultures of Mesopotamia, Egypt, Canaan, and Israel with an eye to each culture's cultural contributions. Pays special attention to shared cultural elements as well as distinguishing characteristics of the peoples of these regions.

NEAR E 221 Digital Egypt (3) I&S/ VLPA Uses technology to explore themes surrounding the study of Egypt, from ancient times through the early Islamic period. Intended as a broad interdisciplinary introduction to Egypt's history and cultural legacy.

NEAR E 230 Themes in Near Eastern Literature (5) VLPA, I&S Significant and interesting aspects of Near Eastern culture and society as represented by literary themes. Aspects of Near Eastern life and art such as women, minorities, groups, mysticism, and modern literature. Content varies.

NEAR E 242 Cultural History of Turkey: From Empire to Nation (5) I&S/ VLPA Topics include: social, economic, and political structures of Ottoman and Turkish Anatolia; language, literature, and artistic tradition; social status of women, literacy and illiteracy; the secular enterprise of Kemal Ataturk; Islamic fundamentalism, educational institutions, Kurdish nationalism. Offered: W.

NEAR E 250 Iranian Culture and Civilization (5) I&S/ VLPA Explores the culture and civilization of this Middle Eastern society through a multidisciplinary approach that includes such manifestations as architecture, carpet-weaving, story-telling, and the composition of poetry.

NEAR E 251 Jewish Life in Literature and Film (3) I&S/ VLPA Major themes of Jewish life treated in modern narrative and cinema. Topics include religious tradition and modernity, Jewish immigration to America, responses to the Holocaust and Zionism.

NEAR E 260 The Middle East in Film (3) I&S/ VLPA The cinema of Egypt, Iran, Israel, Turkey, and other Middle Eastern nations; compares and contrasts the films with Middle Eastern literature from the twentieth century. Both films and literature illustrate how Middle Easterners view the world: their concepts of self versus society, religion, art, and politics.

NEAR E 310 Modern Near Eastern Literatures in English Translation (3) VLPA Contemporary cultures of the Middle East studied through exposure to a representative sample of their literary work. Texts selected address major issues in Middle Eastern societies, e.g. tradition versus modernity, national identity and the challenge of the West, Arab-Israeli conflict.

NEAR E 325 Modern Hebrew Literature in English (3) VLPA Sokoloff Major developments in Hebrew literature from the Enlightenment to the current Israeli literature.

NEAR E 326 Israeli Identities (5) VLPA Sokoloff Examines fiction and film, as well as selected poetry, popular songs, and essays, to explore diverse groups within contemporary Israeli society. Topics include the sabra ideal, holocaust survivors, Sephardic/Mizrachi communities, religious and secular Jews, Israel's Arab minority, and questions of gender.

NEAR E 350 The City of Cairo (3) I&S/ VLPA Development of Fustat and Cairo, 600-1800, with special emphasis on art and architecture. Consideration of the economic, social, and geographical influences on the creation of the distinctive Egyptian styles of Islamic art. Offered: jointly with ART H 350.

NEAR E 363 Oral Literature of the Turkic Peoples of Central Asia I: the Heroic Epos (3) VLPA Cirtautas Representative heroic poems of Central Asian Turkic peoples now living in the Central Asian Republics and other former Soviet republics, their relationship to the romantic epos and other oral literary genres. Art of the singer and his role in nomadic Turkic society. Emphasis on Manas, the monumental epos of Kirghiz. Offered: jointly with TKIC 363.

NEAR E 402 Classical Arabic Literature in Translation (3) VLPA DeYoung Examines development of Arabic literature from its beginnings through the fall of the Abbasid dynasty to the Mongols. Coincides with period when Arabic language and literature were dominant forces in Islamic civilization. Topics include: impact of Islam on the literature, courtly love, mystical poetry, the Thousand-and-One Nights, and Hispanic-Arabic literature.

NEAR E 403 Colonialism, Nationalism, and the Modern Arabic Novel (3) VLPA DeYoung Examines how representative novels from the modern canon in Arabic have both endorsed and critiqued aspects of nationalism and colonialist ideology. Recommended: NEAR E 210.

NEAR E 420 Islamic Theological Literature in English (3) VLPA Readings from Mu'azzilite and Ash'arite works and from traditionalist works opposed to theology.

NEAR E 421 Islamic Mystical Literature in English (3) VLPA Readings from the works of principal Sufi writers and poets.

NEAR E 422 Islamic Philosophical and Scientific Literature in English (3) VLPA Readings in philosophy, the physical sciences, and medicine.

NEAR E 423 Persian Literature in Translation (3) VLPA Designed to familiarize students with an expanding collection of works translated from Persian literature, both classical and modern, into English. Focuses on a few representative texts and offers interpretations of the culture through close readings. Prior acquaintance with Iranian culture not required.

NEAR E 425 Current Trends in Modern Near Eastern Literature and Criticism (3) VLPA Modern literary tradition of the Near East with emphasis on major literary movements and/or genres and literary criticism in the modern period. The literatures of the Arab world, Persia, Turkey, and Israel are considered in alternate quarters.

NEAR E 430 Scripture and Law in Islam (5) I&S/ VLPA Examines concept and use of scripture in Islam, with special attention to issues of canon and commentary, heavenly books and talismanic uses, and the place of scripture in ritual. In English. Offered: jointly with RELIG 430.

NEAR E 432 Ritual and Territory in Islam (5) I&S/ VLPA Comparative study of Islamic ritual practices and related development of jurisprudence and law. Focus on sacrifice, political and social legal theory, pilgrimage, regulation of the
body, and the diversity of contemporary practices. In English. Offered: jointly with RELIG 432.

NEAR E 433 Life of Prophet Muhammad (5) I&S/VLPA Examines historical and religious traditions associated with the life of the Prophet Muhammad with particular attention to the biography in classical Islam. Focuses on Muhammad as prophet, holy man, law-giver, mystic, and statesman. Comparison with other religious figures such as Jesus and the Buddha. In English. Offered: jointly with RELIG 433.

NEAR E 435 Major Trends in Modern Arabic Fiction (3) VLPA De Young Development of Arabic prose fiction from the end of the nineteenth century to the present.

NEAR E 436 Arab American Writers (3) I&S/VLPA DeYoung Explores the influence of Arab American writing both in the United States and the Arab world during the nineteenth and twentieth centuries. Discusses issues of emigration to the United States from the Arab world and its impact on the formation of a distinctive Arab American identity.

NEAR E 437 Thousand and One Nights (3) VLPA DeYoung An examination of the major stories in the Thousand and One Nights collection, in its social and historical context.

NEAR E 440 Calligraphy in Islamic Culture (3) VLPA Survey of the esthetics, uses, interpretations of artistic writing in Islamic culture with a “hands on” approach to recognizing, appreciating, and creating Arabic script calligraphy. Students need not know Arabic script nor have calligraphic talent, although some familiarity with Islamic civilization is helpful.

NEAR E 442 Turkish Literature in Translation (3) VLPA Covers major theoretical issues concerning Ottoman court literature and Turkish epic and troubadour poetry. Major writers and works of modern Turkish literature read and analyzed in their social, political, and theoretical contexts. Previous study of Turkish literature not required.

NEAR E 443 The Word and the Empire: Reading Ottoman Literature (3-5) I&S/VLPA Kirsch Approaches Ottoman literature through translations and scholarly articles in English. Evaluates this particular literary tradition as an imperial production, through an analysis and critical reading of course materials.

NEAR E 450 Survey of the Cultures of the Turkic Peoples of Central Asia (3) I&S/VLPA Cirtautas Nomadic and sedentary cultures of the Turkic peoples of Central Asia. Emphasis on language, literature, and adherence to traditional modes of life. Offered: jointly with SISRE 450.

NEAR E 451 Pharaonic Egypt in the Context of the Ancient Near East (3) I&S/VLPA Noéel Surveys the history, literature, and archaeology of ancient Egypt from the first pharaohs to the conquest of Alexander the Great. Introduces the field of Egyptology, and focuses on the continuity of Egyptian history and culture in context. Slide presentations supplement the readings and in-class lectures.

NEAR E 452 The Biblical Song of Songs (3) VLPA Noéel Examines the erotic and beautiful Song of Songs within the context of ancient (and medieval) Near Eastern love poetry and correlates close readings of the book with various interpretations it has received from antiquity until today. No knowledge of Hebrew or the Bible is required. Offered: jointly with SISJE 452.

NEAR E 453 The Biblical Prophets (3) I&S/ VLPA Noéel Explores the biblical prophets (in translation) within their Near Eastern contexts. Studies them for their historicity, literary and rhetorical sophistication, and ideological agendas. This course seeks to uncover the meaning and distinctiveness of Israelite prophecy within the context of the larger Near East. No knowledge of the Bible is required. Offered: jointly with SISJE 453.

NEAR E 454 Israel: The First Six Centuries BCE (3) I&S/VLPA Noéel Traces the Israelites, from the Babylonian destruction of the Jerusalemite Temple (586 BCE) to events following the destruction of the second Temple (1st century CE). Focuses on primary historical and literary sources as well as archaeological and artistic evidence. No knowledge of Hebrew or the Bible is required. Offered: jointly with SISJE 454.

NEAR E 455 The Kings of Monarchic Israel (3) I&S/VLPA Noéel Examines the biblical accounts (in translation) concerning the formation and collapse of the united Israelite monarchy. Investigates the archaeological and textual evidence for their historicity, the literary sophistication of these accounts, and Israelite kingship within the wider context of the ancient Near East. No knowledge of the Bible is required. Offered: jointly with SISJE 455.

NEAR E 456 Women in Ancient Judaism (3) I&S/VLPA Noéel Explores those texts in early Jewish literature in which women play prominent roles and those in which women are surprisingly absent. Discusses the literary portrayal of women for what they tell us about the people who wrote the texts. No knowledge of Hebrew is required. Offered: jointly with RELIG 456.

NEAR E 457 The History of Biblical Interpretation (3) I&S/VLPA Noéel Traces biblical interpretation and translation technique from the earliest translations of the Hebrew Bible (Old Testament) to the various historical literary, deconstructionist, and holistic strategies of more recent times. Adopts a “hands-on” approach to the material and explores various hermeneutics by applying them in class. Offered: jointly with RELIG 457.

NEAR E 490 Supervised Study (1-6, max. 18) Special work in Near Eastern studies for graduates and undergraduates.

NEAR E 495 Trends in the Contemporary Middle East (3) I&S Bacharak, De Young Perspectives on cultural, political, and other aspects of Middle Eastern societies. Focuses on background complexities rather than immediate political-military confrontations. Topics vary. Offered: jointly with SISME 495.

NEAR E 496 Special Studies in Near Eastern Languages and Civilization (3-5, max. 15) VLPA Offered occasionally by visitors or resident faculty. Content varies.

NEAR E 498 Senior Essay (5) I&S/VLPA Supervised individual research and writing of a major paper during the senior year. Offered: AWSp.

NEAR E 499 Undergraduate Research (1-6, max. 18) NEAR E 518 Foreign Language Teaching Methodology (2) Brandl Current foreign language teaching methods and approaches. Learning and teaching strategies and techniques for the four skills (reading, writing, speaking, listening) including cultural notions. Current and future trends in pedagogy and technology. Offered: jointly with ASIAN 518/GERMAN 518/ SCAND 518/SLAV 518.

NEAR E 520 Seminar on Near Eastern Civilization and Thought (3, max. 27) Content varies.

NEAR E 521 Research Methods (3) Introduction to research in Islamic civilization. Research methods, primary sources, evidence and documentation, reference works, translation systems, scholarly writing style.

NEAR E 522 Islamic Theology (3) Various schools of Islamic theology.

NEAR E 523 Islamic Philosophy (3) Various topics and problems dealt with by the Islamic philosophers.

NEAR E 524 Islamic Law (3) Selected topics in Islamic law that highlight major aspects of Islamic civilization. Offered: jointly with LAW B 556.

NEAR E 525 Islamic Institutions (3) Islamic institutions of the caliphate, the sultanate, the bureaucracy, taxation, mosques, and madrasas, as well as theories of government.

NEAR E 530 Seminar on Near Eastern Literature (3, max. 27) Prerequisite: reading knowledge of at least one Near Eastern language. Content varies.

NEAR E 531 Proseminar in Literary Analysis (3, max. 9) Introduction to the theory and techniques of the study of literature in general and Near Eastern literatures in particular. Content varies. Prerequisite: reading knowledge of at least one Near Eastern language.

NEAR E 532 Theory and Practice in Modern Near Eastern Literature (3) Application of literary theory to works of modern Near Eastern literature. Concentrates on one major theory each year. Content varies.

NEAR E 533 Islamic Poetry and Poetics (3) Detailed introduction to prosody and rhyme in classical Arabic and Persian, followed by critical analysis of selected texts. Prerequisite: advanced level of Arabic or Persian; some knowledge of the other recommended.

NEAR E 595 Modern Methods and Materials in Teaching Near Eastern Languages (3) Elkhaffaf Theory and practice of communicative language teaching; current developments in foreign-language teaching; evaluation of teaching materials; includes participation at the departmental and university-wide fall orientation; required for beginning teaching assistants of Near Eastern languages; requires enrollment in Near E 518. Credit/no credit only. Offered: A.

NEAR E 596 Special Studies in Near Eastern Languages and Civilization (3-5, max. 15) Offered occasionally by visitors or resident faculty. Content varies.
NEAR E 600 Independent Study or Research (*)

Persian

PRSAN 401 Intensive Elementary Tajik (15) Intensive study of grammar with oral and written drill and reading of selected texts in Tajik, the literary language spoken and written in the Central Asian Republic of Tajikistan. Offered: S.

PRSAN 404 Intensive Persian for Native Speakers (15) VLPA Enables students with a degree of proficiency in spoken Persian to read and write, to translate rudimentary texts, and to conceptualize the use of the formal style of composition. Reading, writing, and comprehension, particularly of handwritten manuscripts of the scriptural tradition. Also covers calligraphy, translation, journalistic prose, and other facets of the language and the script. Offered: S.

PRSAN 411 Elementary Persian (5) Conversation, pronunciation, and graded reading. Persian alphabet and basic sentence constructions. Offers rudimentary conversational and reading ability with a vocabulary of about two thousand words.

PRSAN 412 Elementary Persian (5) Conversation, pronunciation, and graded reading. Persian alphabet and basic sentence constructions. Offers rudimentary conversational and reading ability with a vocabulary of about two thousand words. Prerequisite: PRSAN 411.

PRSAN 413 Elementary Persian (5) Conversation, pronunciation, and graded reading. Persian alphabet and basic sentence constructions. Offers rudimentary conversational and reading ability with a vocabulary of about two thousand words. Prerequisite: PRSAN 412.

PRSAN 421 Intermediate Persian (5) VLPA Reading of simple texts with emphasis on reading and writing, conversation skills, grammar, and syntax. Builds a vocabulary of standard Persian in preparation for advanced reading and comprehension of literary texts. Prerequisite: PRSAN 413.

PRSAN 422 Intermediate Persian (5) VLPA Reading of simple texts with emphasis on reading and writing, conversation skills, grammar, and syntax. Builds a vocabulary of standard Persian in preparation for advanced reading and comprehension of literary texts. Prerequisite: PRSAN 421.

PRSAN 423 Intermediate Persian (5) VLPA Reading of simple texts with emphasis on reading and writing, conversation skills, grammar, and syntax. Builds a vocabulary of standard Persian in preparation for advanced reading and comprehension of literary texts. Prerequisite: PRSAN 422.

PRSAN 431 Advanced Persian (3) VLPA Designed to improve reading and writing skills. Graded reading and writing and exposure to the writing system, textual history, newspaper reading, and translation. Cultural materials presented as appropriate. The art of calligraphy introduced. For students with a degree of proficiency in spoken Persian. Prerequisite: PRSAN 423.

PRSAN 432 Advanced Persian (3) VLPA Designed to improve reading and writing skills. Graded reading and writing and exposure to the writing system, textual history, newspaper reading, and translation. Cultural materials presented as appropriate. The art of calligraphy introduced. For students with a degree of proficiency in spoken Persian. Prerequisite: PRSAN 431.

PRSAN 433 Advanced Persian (3) VLPA Designed to improve reading and writing skills. Graded reading and writing and exposure to the writing system, textual history, newspaper reading, and translation. Cultural materials presented as appropriate. The art of calligraphy introduced. For students with a degree of proficiency in spoken Persian. Prerequisite: PRSAN 432.

PRSAN 451 Introduction to Persian Literature (3) VLPA Selected texts from modern and classical Persian poetry and prose. Provides insights into Iranian culture and its past and present achievements in literature. Prepares the student for a more comprehensive and critical study of Persian literature. Prerequisite: PRSAN 452.

PRSAN 452 Modern Persian Literature: A Survey (3) VLPA Development of poetry and prose after Iran felt and absorbed the impact of Western cultures. Periods and genres. Works of such authors as Jamali-zadeh, Hedayat, Dehkoda, Al-e Ahmad, Nima, Sepehr, and Forough. Prerequisite: PRSAN 423.

PRSAN 453 Classical Persian Literature: A Survey (3) VLPA History of Persian literature from Rudaki to Hafiz. Studies epic, lyric, and mystic traditions placed in historical settings. Covers the most important genres such as the Qasida, the Ghazal, the Ruba’i and the Masnavi. Prerequisite: PRSAN 423.

PRSAN 454 The Epic Tradition in Iran (3) VLPA Focuses on the Shahnameh of Firdawsi: explores the ancient legends that gave rise to it and follows the fortunes of epic poetry after Firdawsi, touching on the rise, development, and decline of romance in classical Persian literature. Prerequisite: PRSAN 433.

PRSAN 455 The Persian Ghazal (3) VLPA The Ghazal as the leading medium for lyrical expression in classical Persian tradition. Follows this genre from conception to culmination in the poetry of Hafiz, conventions and devices of the Ghazal. Development placed in historical and social context. Prerequisite: PRSAN 433.

PRSAN 456 Sufism: Thought and Expression (3) I&S/VLPA Dynamics of mystical thought and expression as evolved in the writings of the great Sufi masters and reflected in the poetry of Sana’i, Attar, Rumi, and others. The fundamental unity of the mystical vision, with special attention to the peculiarities of individual style and expression. Prerequisite: PRSAN 433.

PRSAN 490 Supervised Study (1-6, max. 18) Special work in literary texts for graduates and undergraduates. Prerequisite: PRSAN 423.

PRSAN 499 Undergraduate Research (1-6, max. 18)

PRSAN 600 Independent Study or Research (*)

Turkic

TKIC 401 Intensive Elementary Uzbek (15) Intensive study of grammar, with oral and written drill and reading of simple texts in Uzbek. Covers first-year Uzbek. Cannot be taken for credit if 411, 412, 413 taken. Offered: S.

TKIC 402 Intensive Elementary Kazakh (15) Intensive study of grammar, with oral and written drill and reading of simple texts in Kazakh. Covers first-year Kazakh. Cannot be taken for credit if 414, 415, 416 taken. Offered: S.

TKIC 403 Intensive Elementary Kirghiz (15) Intensive study of grammar with oral and written drill of selected texts. Offered: S.

TKIC 404 Intensive Intermediate Uzbek (15) VLPA Allows students to complete second-year Uzbek in one quarter. Reading of selected texts in Uzbek, with continuing emphasis on oral and written practice, grammar, and advanced readings. Cannot be taken for credit if 421, 422, 423 taken. Prerequisite: either TKIC 401 or TKIC 413. Offered: S.

TKIC 405 Intensive Intermediate Kazakh (15) VLPA Allows students to complete second-year Kazakh in one quarter. Reading of selected texts in modern literary Kazakh, with emphasis on grammar, syntax, and oral practice. Prerequisite: either TKIC 402 or TKIC 416. Offered: S.

TKIC 406 Intensive Advanced Uzbek (15) VLPA Advanced-level instruction in speaking, writing, reading, and listening skills. Students work independently on translation projects. Emphasis on extensive writing practices in Uzbek and student participation in an Uzbek email conversation circle. Prerequisite: TKIC 423. Offered: S.

TKIC 407 Intensive Elementary Uighur (15) VLPA Covers all four linguistic skills: reading, writing, speaking, and listening. Offered: S.

TKIC 411 Elementary Uyghur (5) Cirtautas Introduction to the modern written and spoken language. Cannot be taken for credit if 401 taken.

TKIC 412 Elementary Uzbek (5) Cirtautas Introduction to the modern written and spoken language. Cannot be taken for credit if 401 taken.

TKIC 413 Elementary Uzbek (5) Cirtautas Introduction to the modern written and spoken language. Cannot be taken for credit if 401 taken.

TKIC 414 Introduction to Kazakh (3) Cirtautas Position of Kazakh within the community of other Turkic languages; alphabets used for Kazakh; reading of texts from Kazakhstan and China (Xinjiang); oral and written exercises. Cannot be taken for credit if 402 taken.

TKIC 415 Introduction to Kazakh (3) Cirtautas Position of Kazakh within the community of other Turkic languages; alphabets used for Kazakh; reading of texts from Kazakhstan and China (Xinjiang); oral and written exercises. Cannot be taken for credit if 402 taken.

TKIC 416 Introduction to Kazakh (3) Cirtautas Position of Kazakh within the community of other Turkic languages; alphabets used for Kazakh; reading of texts from Kazakhstan and China (Xinjiang); oral and written exercises. Cannot be taken for credit if 402 taken.

TKIC 417 Introduction to Uighur (5) Cirtautas Designed for students with no prior knowledge of Uighur. Includes acquisition of Uighur Arabic.
alphabet, general phonological rules, and basic grammar. Basic reading, listening, and oral comprehension practice all offered throughout the course. Offered: A.

TKIC 418 Introduction to Uighur (5) Cirtautas Continuation of basic modern Uighur: phonological rules, grammar, and vocabulary. Practice in reading, listening, and oral comprehension. Prerequisite: TKIC 417. Offered: W.

TKIC 419 Introduction to Uighur (5) Cirtautas Continuation of basic modern Uighur: phonological rules, grammar, and vocabulary. Practice in reading, listening, and oral comprehension. Prerequisite: TKIC 418. Offered: Sp.

TKIC 421 Intermediate Uzbek (3) VLPA Cirtautas Continuation of elementary Uzbek. Oral work, grammar, and readings in Uzbek literature. Prerequisite: either TKIC 401 or TKIC 413.

TKIC 422 Intermediate Uzbek (3) VLPA Cirtautas Continuation of elementary Uzbek. Oral work, grammar, and readings in Uzbek literature. Prerequisite: TKIC 421.

TKIC 423 Intermediate Uzbek (3) VLPA Cirtautas Continuation of elementary Uzbek. Oral work, grammar, and readings in Uzbek literature. Prerequisite: TKIC 422.

TKIC 456 Introduction to Ottoman Turkish (3) VLPA Kuru Introduction to Turkish in Arabic characters to cover the peculiar grammatical and syntactical problems of Ottoman. Prerequisite: TKIC 423.

TKIC 490 Supervised Study (1-6, max. 18) Special work in literary texts for graduates and undergraduates. Prerequisite: TKIC 423.

TKIC 499 Undergraduate Research (1-6, max. 18)

TKIC 600 Independent Study or Research (*)

Neurobiology

NBIO 301 Introduction to Cellular and Molecular Neurobiology (5) NW Moody Introduces students to the physiological and molecular properties of individual nerve cells and the synaptic connections between them, and to principles of nervous system development. Includes weekly laboratory sessions. Prerequisite: either BIOL 202 or BIOL 220. Offered: W.

NBIO 302 Introduction to Systems and Behavioral Neurobiology (5) NW Kennedy, Perkel, Solis Introduces neuroethology, i.e., the mechanisms by which neurons and the synaptic connections among them produce sensory perceptions and complex behavioral outputs. Includes gross brain anatomy demonstration and computer tutorials. Prerequisite: NBIO 301. Offered: Sp.

NBIO 401 Systems Neurobiology (3) NW Robinson Introduces students to the anatomical and physiological organization of the major sensory, motor, and associative systems of the mammalian brain. Behavioral data used to stress functional integration of systems. Includes gross brain anatomy demonstration and computer tutorials. Prerequisite: NBIO 302. Offered: A.

NBIO 402 Neuropathophysiology (3) NW Crall Introduces students to the basic physiological mechanisms of information processing in the mammalian brain by having students study a series of human neurological diseases that result from a specific disruption of these mechanisms. Prerequisite: NBIO 401. Offered: W.

NBIO 403 Systems and Behavioral Neurobiology (3) NW Topics include information processing in sensory and motor systems, sensory-motor integration, learning, and memory. Using examples from the field of neuroethology, encourages students to independently work on problems taken from the recent neurobiological research literature. Prerequisite: NBIO 401. Offered: W.

NBIO 404 Neuropharmacology (3) NW Stella Actions of drugs on the brain at clinical, cellular, and molecular levels. Therapeutic use of drugs in treatment of neurological and psychiatric disorders (portulans), ambassadorial and secret service reports. Prerequisite: TKISH 456.

TKISH 454 Turkish Literary Genres: Prose (3) VLPA Major genres, styles, and themes of Turkish art-prose from Ottoman times to present; creation of stylistic and critical norms. Prerequisite: TKISH 423.

TKISH 455 Turkish Literary Genres: Poetry (3) VLPA Poetic traditions of Turkey with a focus on the development of peculiarly Turkish aspects of style and structure. Social functions of poetry and the poetic milieu. Prerequisite: TKISH 423.

TKISH 456 Introduction to Ottoman Turkish (3) VLPA Kuru Introduction to Turkish in Arabic characters to cover the peculiar grammatical and syntactical problems of Ottoman. Prerequisite: TKIC 423.

TKISH 490 Supervised Study (1-6, max. 18) Special work in literary texts for graduates and undergraduates. Prerequisite: TKISH 423.

TKISH 499 Undergraduate Research (1-6, max. 18)

TKISH 600 Independent Study or Research (*)

NBIQ 440 Topics in Current Neurobiology Research (2, max. 6) NW Credit/no credit only. Prerequisite: NBIQ 302.

NBIQ 450 Current Research Literature in Neurobiology (2, max. 6) NW Weekly journal club in neurobiology. Students read and discuss original research articles in neurobiology, centered around a specific topic each quarter. Credit/no credit only. Prerequisite: either BIOL 202 or BIOL 220.

NBIQ 496 Peer Teaching Assistant in Neurobiology (5) Direct classroom experience teaching in NBIQ 301 or 302. Credit/no credit only. Prerequisite: NBIQ 302. Offered: WSp.

NBIQ 499 Individual Research in Neurobiology (3-6, max. 18) Students carry out projects in laboratories of program faculty. Prerequisite: NBIQ 302.

Philosophy

PHIL 100 Introduction to Philosophy (5) I&S BonJour, Rosenthal Major philosophical questions relating to such matters as the existence of God, the foundations of knowledge, the nature of reality, and the nature of morality. Approach may be either historical or topical. Offered: AWSpS.

PHIL 102 Contemporary Moral Problems (5) I&S/VLPA Offered: AWSpS. Approach may be either historical or topical. Critical introduction to various types of questions relating to such matters as the nature of reality, and the nature of morality. Prerequisite: one previous PHIL course.

PHIL 206 Philosophy of Feminism (5) I&S Philosophical analysis of the concepts and assumptions central to feminism. Theoretical positions within the feminist movement; view of the ideal society, goals and strategies of the movement, intersections of the sex/gender system with other systems of oppression. Offered: jointly with POL S 212/WOMEN 206.

PHIL 230 Philosophic Issues in World Affairs (3) I&S Coburn Moral problems that arise in connection with such topics as affluence, hunger, and overpopulation; global environmental degradation; war and weaponry; restructuring the international order.

PHIL 240 Introduction to Ethics (5) I&S/VLPA Roberts, Smith, Talbott Critical introduction to various philosophical views of the basis and presuppositions of morality and moral knowledge. Critical introduction to various types of normative ethical theory, including utilitarian, deontological, and virtue theories.

PHIL 241 Topics in Ethics (5, max. 10) I&S/VLPA Study of one or more selected topics (e.g., limits of moral community, animal rights, moral education, and freedom). Topics vary.

PHIL 242 Introduction to Medical Ethics (5) I&S/VLPA Goering Introduction to ethics, primarily for first- and second-year students. Emphasizes philosophical thinking and writing through an in-depth study of philosophical issues arising in the practice of medicine. Examines the issues of medical ethics from a patient's point of view.

PHIL 267 Introduction to Philosophy of Religion (5) I&S Clatterbaugh, Coburn Consideration of the sources of religious ideas and practices, the main kinds of religious views and the problems they raise, and the different forms that spirituality can take. Issues concerning the relations of religion to science and morality also treated.

PHIL 301 Intermediate Topics in Philosophy (3-5, max. 10) I&S Zacker, Woody Philosophical topics at the intermediate level. Content varies each quarter, depending on instructor.

PHIL 314 Philosophy of Crime and Punishment (5) I&S/R. Moore Examination of philosophical theories regarding criminal habit and punishment and the philosophical problems connected with specific topics in criminal law. Examines proper subject matter of criminal law (drug use, pornography, euthanasia); limits of criminal sanctions; crime and privilege (corporate crime, white-collar crime, blackmail); justifications for punishment; mercy; and execution.

PHIL 320 Ancient Philosophy (5) I&S Cohen, Keyt, Roberts, Weller Survey of ancient Greek philosophy, beginning with the pre-Socratics and proceeding on through Plato to Aristotle.

PHIL 321 Medieval Philosophy (5) I&S Development of main lines of philosophical thought in the Latin West from 400 to 1400, with emphasis on Augustine, Anselm, Abaiald, Aquinas, and Ockham.

PHIL 325 Nineteenth-Century Philosophy (5) I&S Coburn Examination of post-Kantian thinkers through the end of the nineteenth century considering such major themes as idealism, romanticism, positivism, historicism, naturalism, existentialism, and pragmatism.

PHIL 327 American Philosophy (5) I&S Study of some of the major American philosophers such as Peirce, Royce, Dewey, William James, C. I. Lewis, Goodman, Quine.

PHIL 330 History of Ancient Political Philosophy (5) I&S/R. Moore A historical and philosophical consideration of some of the main moral problems of modern society and civilization, such as abortion, euthanasia, war, and capital punishment. Topics vary.

PHIL 332 History of Modern Political Philosophy (5) I&S BonJour, Clatterbaugh, Talbott Examination of major political philosophers from the sixteenth century to the nineteenth century, with attention to the underlying philosophical methods and foundations.

PHIL 334 Philosophy of Marxism (3) I&S Clatterbaugh Philosophy of Marx and the Marxist tradition with attention to key Marxist concepts such as exploitation, alienation, and historical materialism.

PHIL 335 Plato’s Republic (5) I&S/VLPA Kevt Designed especially for philosophy majors, but open to non-majors. Intensive study of Plato’s masterpiece. Prerequisite: one PHIL course.

PHIL 338 Philosophy of Human Rights (5) I&S Talbott Theories of human rights and the bearing of these theories on issues of public policy such as legitimacy of war and terrorism, economic justice, and whether future generations have rights.

PHIL 340 History of Ancient Ethics (5) I&S/VLPA Kevt, Roberts Development of moral thought from Socrates through the Stoics. Particular emphasis on the ethical writings of Plato and Aristotle.

PHIL 342 History of Modern Ethics (5) I&S/VLPA Jecker, Smith, Weller Development of moral thought from Hobbes through Nietzsche, with particular emphasis on the ethical writings of Hume, Kant, and John Stuart Mill.

PHIL 344 History of Recent Ethics (5) I&S/VLPA Study of major ethical writings in the twentieth century, with principal emphasis on the Anglo-American tradition.

PHIL 345 Moral Issues of Life and Death (5) I&S/VLPA Coburn, Goering Examination of such
topics as war and murder, famine relief, capital punishment, high-risk technologies, abortion, suicide, and the rights of future generations.

PHIL 346 Personal Values and Human Good (3) I&S Baker, Coburn, Goering, Smith Examination of the idea of a good human life. Emphasis differs from year to year. Typical topics include happiness and prudence, rationality and life plans, personal values and the meaning of life, autonomy and false consciousness, self-respect and self-esteem, honesty and self-deception, faith and “vital lies.”

PHIL 347 Philosophy in Literature (5) I&S/ VLP A Study of philosophical ideas expressed in works of literature.

PHIL 353 Introduction to the Philosophy of Language (5) I&S Philosophical theories about the nature of language. Topics include meaning, reference, truth, propositions, relations between language and thought.

PHIL 356 Introduction to Metaphysics (5) I&S Baker Introductory examination of some of the main problems in metaphysics, such as the nature of truth and reality, the metaphysical status of properties, the existence of free will.

PHIL 360 Introductory Topics in Philosophy of Science (5, max. 10) I&S Fine, Hankinson Nelson, Woody Study of one or more current topics in philosophy of science such as scientific realism, explanation, confirmation, causation. Prerequisite: one PHIL course; recommended: PHIL 120; PHIL 160.

PHIL 363 Introduction to the Philosophy of Mind (5) I&S Various theories of the nature of mind, the relationship between mind and body, the self, introspection, and knowledge of other minds.

PHIL 386 Introduction to the Philosophical Systems of India (5) I&S The fundamental views of classical Indian philosophical schools on epistemology and metaphysics through readings in translation of basic works. Nyaya, Vaiseshika, Samkhya, Yoga, Jain philosophy, Vijnanavada and Madhyamika Buddhism, Advaita Vedanta and later developments. Offered: jointly with SISSA 386.

PHIL 399 Foreign Study (2-5, max. 10) Upper division philosophy studies with no direct UW equivalents, taken through UW foreign study programs.

PHIL 401 Advanced Topics in Philosophy (3-5, max. 10) I&S Baker A study of philosophical topics at the advanced level. Topics vary.

PHIL 406 Philosophical Topics in Feminism (5) I&S Roberts, Hankinson Nelson, Woody Detailed examination of questions raised by recent feminist scholarship in particular areas of philosophy, such as political theory, ethics, epistemology, or philosophy of science. Emphasis varies.

PHIL 410 Social Philosophy (5) I&S Clatterbaugh, Coburn, Talbott An examination of topics pertaining to social structures and the institutions such as liberty, distributive justice, and human rights.

PHIL 411 Justice in Health Care (5) I&S/ VLPA Jecker Examination of the ethical problem of allocating scarce medical resources. Emphasis on fundamental principles of justice that support alternative health policies. Recommended: prior courses in philosophy or medical ethics. Offered: jointly with MHE 474.

PHIL 416 Ethics and Climate Change (5) I&S/ VLP A Gardenier Critical examination of the ethical issues surrounding climate change. Prerequisite: either one philosophy or one environmental studies course. Offered: jointly with ENVIR 416.

PHIL 422 Studies in Continental Rationalism (3, max. 9) I&S Clatterbaugh, Coburn Study of one or more of the major continental Rationalists: Descartes, Spinoza, Leibniz.

PHIL 425 Studies in Nineteenth-Century Philosophy (3) I&S/ VLP A Baker Study of post-Kantian metaphysical theories, with special emphasis on idealism, realism, and/or pragmatism. Typical authors include F. H. Bradley, J. McTaggart, Royce, and Green.

PHIL 426 Twentieth-Century Philosophy (5) I&S/ VLP A Baker, Weller A study of development of contemporary analytic philosophy, the revolt against idealism, and the linguistic turn in philosophy.

PHIL 431 Philosophy of Plato (3, max. 6) I&S Cohen, Keyt, Roberts, Weller Study of selected middle and late dialogues.

PHIL 433 Philosophy of Aristotle (3, max. 6) I&S Cohen, Keyt, Roberts, Weller Study of several major Aristotelian treatises.

PHIL 434 Philosophy of Thomas Aquinas (3) I&S/ VLP A Examination of the major philosophical positions of Thomas Aquinas in the theory of knowledge, metaphysics, and ethics.

PHIL 436 British Empiricism (3) I&S/ VLP A/Baker Examination of the metaphysical and epistemological views of Locke and Berkeley, with perhaps some attention also to Hume. Prerequisite: either PHIL 322 or PHIL 350.

PHIL 437 Philosophy of Hume (3) I&S Marks, Weller Study Hume’s analyses of knowledge, the passions, and morals.

PHIL 439 The Later Philosophy of Wittgenstein (3) I&S/ VLP A/Roberts Detailed study of topics in the later philosophy of Wittgenstein, with particular attention to the Philosophical Investigations.

PHIL 440 Ethics (5) I&S/ VLP A/Roberts, Smith, Talbott Critical examination of the concepts and judgments of value, including an analytical treatment of the notions of good and bad, right and wrong, and obligation. Emphasis varies from quarter to quarter.

PHIL 443 Philosophy and Linguistics (3) I&S/ VLP A Study of philosophical problems that arise in the attempt to understand current linguistic theories and of the implications of linguistics for philosophy. Offered: jointly with LING 443.

PHIL 444 Philosophy of Language-Pragmatics (3) I&S/ VLP A Language as communicative activity. Speech act theory in Austin, Grice, and contemporary writings. Applications to problems of reference, presupposition, metaphor, relativism. Offered: jointly with LING 444.

PHIL 445 Philosophy of Art (5) I&S/ VLP A R. Moore Critical examination of various accounts of the nature of art, artistic activity, the aesthetic experience. Problems in interpretation and evaluation of works of art.

PHIL 446 Development of Aesthetic Theory (5) I&S/ VLP A R. Moore, Historical development of aesthetics, emphasizing such major figures as Plato, Aristotle, Hume, Kant, Hegel, and Goodman.

PHIL 450 Epistemology (5) I&S/ VLP A Baker, Bonjour, Talbott Systematic study of some of the main problems of the theory of knowledge, such as: the definition of “knowledge;” a priori knowledge; perception and knowledge of the external world; and whether knowledge has or requires a foundation. Emphasis varies from quarter to quarter.

PHIL 456 Metaphysics (5) I&S/ VLP A Baker, Coburn Examination of such topics as freedom of the will, the nature of persons and personal identity, the existence of God, time, necessary truth, and universals. The emphasis vary from year to year.

PHIL 458 Phenomenology (5) I&S/ VLP A The contributions of phenomenology to selected topics in the theory of meaning, philosophy of mind, ontology, and epistemology.

PHIL 459 Philosophy of Medicine (5) I&S/ VLP A Jecker Familiarizes students with central issues in the philosophy of medicine. Focuses on the nature of medical knowledge, the connection between theory and observation, the meaning of medical concepts, and the relationship between theories and the world. Recommended: prior courses in philosophy, history of science, or history of medicine. Offered: jointly with MHE 440.

PHIL 460 Philosophy of Science (5) I&S/ NW Hankinson Nelson, Woody Critical study of the nature of scientific knowledge. Topics include the relation of theory to observation, the use of mathematics, how theories change, the requirements for the meaningfulness of a theory, and nature of confirmation. Recommended: PHIL 120 or PHIL 160; prerequisite: one PHIL course.

PHIL 463 Philosophy of Mind (5) I&S BonJour
Examination of current theories of the nature of the mind and mental processes.

PHIL 464 Philosophical Issues in the Cognitive Sciences (5) I&S/NW
Philosophical problems connected with research in psychology, artificial intelligence, and other cognitive sciences. Topics vary. Readings from both philosophical and scientific literature. Accessible to nonphilosophers with suitable interests and backgrounds.

PHIL 465 Philosophy of History (3) I&S Baker
Analyses of basic concepts employed in historical interpretation, and study of some of the principal philosophers of history, such as Plato, Saint Augustine, Hegel, Marx, Spengler, Toynbee.

PHIL 466 Philosophy of the Social Sciences
(5) I&S Hankinson Nelson, Talbott
Examination of fundamental issues in the foundations, methodology, and interpretation of the social sciences. Topics include value orientation and objectivity, methodological individualism, functionalism, reductionism, and the status of idealized models, including models involving idealized conceptions of individual rationality. Emphasis varies from quarter to quarter.

PHIL 467 Philosophy of Religion (5) I&S Clatterbaugh, Rosenthal
Study of selected topics and problems in the philosophy of religion, such as: arguments for the existence of God; the problem of evil; atheism; faith; religious experience and revelation; the attributes of God; miracles; immortality; and the relation between religion and morality. Readings from historical and contemporary authors.

PHIL 469 Existentialist Philosophy (3) I&S
Examination of major ideas of selected existentialist philosophers.

PHIL 470 Intermediate Logic (5) I&S/NW, QSR Fine
Keyt
An introduction to the concepts and methods of metatheory and their application to the sentential calculus.

PHIL 471 Advanced Logic (5) I&S/NW Keyt

PHIL 472 Axiomatic Set Theory (5) I&S/NW Kryft
Townsend Development of axiomatic set theory up to and including the consistency of the Axiom of Choice and Continuum Hypothesis with the Zermelo-Fraenkel Axioms.

PHIL 473 Philosophy of Mathematics (5) I&S/NW Fine
Study of the traditional accounts of the nature of mathematical entities and mathematical truth given by logicism, intuitionism, and formalism, and the impact of Godel's incompleteness theorems on these accounts.

PHIL 474 Modal Logic (5) I&S/NW Notions of necessity and possibility, using the classical systems T, S4, and S5, and the syntax and the semantics (Kripke models) of these systems.

PHIL 479 Semantics II (3) I&S/NW/VLPA Ogihara
Formal characterization of linguistic meaning. Emphasis on nature and purpose of formal semantics and on its relation to formal syntax. Prerequisite: LING 442. Offered: jointly with LING 479.

PHIL 481 Philosophy of Biology (5) I&S/NW
Hankinson Nelson
Study of several current topics in philosophy of biology, which may include the logical structure of evolutionary theory, fitness, taxonomy, the concept of a living thing, reductionism, the concept of a biological species, evolutionary explanations, and philosophical consequences of sociology. Recommended: college-level course in biological science; prerequisite: one PHIL course.

PHIL 482 Philosophy of Physical Science (5, max. 10) I&S/NW Fine, Woody
Study of philosophical issues raised by theories in physics or chemistry, such as whether space (time) is a substance, how causation and locality are treated in quantum mechanics, temporal anistropy and time travel, the nature of a field of force, the reduction of chemistry to physics. Prerequisite: one PHIL course.

PHIL 483 Induction and Probability (5) I&S/NW
Introduction to current accounts of evidence and observation, the confirmation of scientific theories, the logic of inductive reasoning, and the metaphysics and epistemology of chance. High-school-level math used. Specific topics vary from year to year. Prerequisite: PHIL 120.

PHIL 484 Reading in Philosophy (1-5, max. 15)
Individual study of selected philosophical works.

PHIL 490 Advanced Topics in Epistemology (5, max. 15) I&S BonJour, Talbott
Intensive study of a particular topic or area in epistemology. Prerequisite: either PHIL 350 or PHIL 450.

PHIL 498 Undergraduate Internship (1-5, max. 10) Baker, Clatterbaugh
Independent fieldwork under the supervision of a faculty member. Individual experiences vary but could include an off-campus practicum or being trained as study group leader or tutor. Offered: A/WSp.

PHIL 500 Proseminar in Philosophy (5)
Introduces incoming graduate students to topics representative of the field and the faculty's interest. Each class session is devoted to a separate topic taught by a different member of the faculty. In addition to reading and short written assignments. Students prepare a term paper on a topic presented. Offered: A.

PHIL 501 Foresight in Science and Technology: Choices and Consequences (3)
Examination of the foresight (or lack of it) with which we practice science and use technology. Contrasts potential risks of various choices with potential benefits. Credit/no credit only. Offered: jointly with ENVIR 535/PHYS 535/ZOOL 523.

PHIL 505 Seminar in Teaching Philosophy (1, max. 10) Baker
First quarter: seminar on topics of importance to a graduate student teaching two quiz sections of a large lecture course. Second quarter: focus on helping student prepare to teach own course. Prerequisite: graduate standing in philosophy. Offered: AW.

PHIL 510 Seminar in Social Philosophy (5, max. 20) Talbott

PHIL 514 Seminar in Legal Philosophy (5, max. 20) R. Moore

PHIL 520 Seminar in Ancient Philosophy (5, max. 20) Cohen, Keyt, Roberts, Weiler

PHIL 521 Seminar in Medieval Philosophy (5, max. 20)

PHIL 522 Seminar in Modern Philosophy (5, max. 20) Clatterbaugh, Weiler

PHIL 525 Seminar in Nineteenth-Century Philosophy (5, max. 20) Baker

PHIL 526 Seminar in Recent Philosophy (5, max. 20) Keyt

PHIL 538 Philosophy of Human Rights (5, max. 20) Coburn, Roberts, Smith, Talbott

PHIL 545 Seminar in the Philosophy of Art (5, max. 20) Moore

PHIL 550 Seminar in Epistemology (5, max. 20) BonJour, Talbott

PHIL 553 Seminar in Philosophy of Language (5, max. 20).

PHIL 556 Seminar in Metaphysics (5, max. 20) Baker, BonJour, Coburn

PHIL 560 Seminar in the Philosophy of Science (5, max. 20) Fine, Woody

PHIL 563 Seminar in the Philosophy of Mind (5, max. 20) BonJour

PHIL 566 Seminar in Philosophy of the Social Sciences (5, max. 20)

PHIL 567 Seminar in the Philosophy of Religion (5, max. 20) Coburn

PHIL 570 Seminar in Logic (5, max. 20) Keyt
Prerequisite: PHIL 470.

PHIL 584 Reading in Philosophy (1-5, max. 12)
Intensive reading in philosophical literature. Prerequisite: permission of graduate program coordinator.

PHIL 587 Contemporary Analytic Philosophy (5, max. 20) Baker

PHIL 600 Independent Study or Research (*)
Prerequisite: permission of graduate program coordinator.

PHIL 700 Master's Thesis (*)

PHIL 800 Doctoral Dissertation (*)

Physics

PHYS 101 Physical Science by Inquiry I (5)
NW, QSR Laboratory-based development of concepts and reasoning skills. Helps prepare preservice teachers to teach science by inquiry. Liberal arts students gain experience in the scientific process. Useful for students with weak science preparation before taking standard science courses. Forms foundation for scientific literacy. Offered: AW.

PHYS 102 Physical Science by Inquiry II (5)
NW, QSR Laboratory-based development of concepts and reasoning skills. Helps prepare preservice teachers to teach science by inquiry. Liberal arts students gain experience in the scientific process. Useful for students with weak science preparation before taking standard science courses. Forms foundation for scientific literacy. Prerequisite: PHYS 101. Offered: Sp.
PHYS 103 Physical Science by Inquiry I (5) NW, QSR See PHYS 101-102. Prerequisite: PHYS 102.

PHYS 110 Liberal Arts Physics (5) NW, QSR Basic concepts of physics presented with emphasis on their origin and their impact on society and the Western intellectual tradition. Primarily for students in the arts, humanities, and social sciences. Offered: AS.

Credit is not given for both 114 and 121.

PHYS 114 General Physics (4) NW, QSR Basic principles of physics presented without use of calculus. Suitable for students majoring in technically oriented fields other than engineering or the physical sciences. Mechanics. Credit is not given for both 114 and 121. Recommended: working knowledge of algebra and trigonometry; one year high school physics; concurrent registration in PHYS 117. Offered: AWSpS.

Credit is not given for both 115 and 122.

PHYS 115 General Physics (4) NW, QSR Basic principles of physics presented without use of calculus. Suitable for students majoring in technically oriented fields other than engineering or the physical sciences. Heat and electromagnetism. Credit is not given for both 115 and 122. Prerequisite: PHYS 114 or 121; recommended: concurrent registration in PHYS 118. Offered: AWSpS.

Credit is not given for both 116 and 123.

PHYS 116 General Physics (4) NW, QSR Basic principles of physics presented without use of calculus. Suitable for students majoring in technically oriented fields other than engineering or the physical sciences. Sound, light, and modern physics. Credit is not given for both 116 and 123. Prerequisite: PHYS 115 or 122; recommended: concurrent registration in PHYS 119. Offered: AWSpS.

PHYS 117 General Physics Laboratory (1) NW Mechanics laboratory. Credit/no credit only. Credit is not given for both 117 and the 121 lab. Prerequisite: PHYS 114 which may be taken concurrently. Offered: AWSpS.

PHYS 118 General Physics Laboratory (1) NW Heat and electromagnetism laboratory. Credit/no credit only. Credit is not given for both 118 and the 122 lab. Prerequisite: PHYS 115 which may be taken concurrently. Offered: AWSpS.

PHYS 119 General Physics Laboratory (1) NW Sound, light, and modern physics laboratory. Credit/no credit only. Credit is not given for both 119 and the 123 lab. Prerequisite: PHYS 116 which may be taken concurrently. Offered: AWSpS.

The courses 121, 122, 123, 224, 225 plus appropriate laboratory together make up the general physics sequence for science and engineering students.

PHYS 121 Mechanics (0/5, max. 5) NW, QSR Basic principles of mechanics and experiments in mechanics for physical science and engineering majors. Lecture tutorial and lab components must all be taken to receive credit. Credit is not given for both 114 and 121. Prerequisite: MATH 124, MATH 127, MATH 134, or MATH 145, any of which may be taken concurrently; recommended: one year high school physics. Offered: AWSpS.

PHYS 122 Electromagnetism and Oscillatory Motion (0/5, max. 5) NW Basic principles of electromagnetism, the mechanics of oscillatory motion, and experiments in these topics for physical science and engineering majors. Lecture tutorial and lab components must all be taken to receive credit. Credit is not given for both 115 and 122. Prerequisite: MATH 126, MATH 128, MATH 134, or MATH 146, any of which may be taken concurrently; PHYS 121. Offered: AWSpS.

PHYS 123 Waves (0/5, max. 5) NW Electromagnetic waves, optics, waves in matter, and experiments in these topics for physical science and engineering majors. Lecture tutorial and lab components must all be taken to receive credit. Credit is not given for both 116 and 123. Prerequisite: MATH 126, MATH 129, or MATH 134, any of which may be taken concurrently; PHYS 122. Offered: AWSpS.

PHYS 204 Radiation: Nature, Technology, and Society (3) NW Introduction to the science and implications of nuclear physics and radiation for non-science students. Prerequisite: PHYS 115 or 122. Credit is not given for both 115 and 122. Prerequisite: PHYS 114 or 121; recommended: concurrent registration in PHYS 118. Offered: AWSpS.

PHYS 210 Physics by Inquiry I (5) NW Selected topics in physics with emphasis on depth of understanding and development of skills essential to the scientific process. Background for teaching physics and physical science as a process of inquiry. Prerequisite: either PHYS 103, PHYS 116, or PHYS 123. Offered: A.

PHYS 211 Physics by Inquiry I (5) NW Selected topics in physics with emphasis on depth of understanding and development of skills essential to the scientific process. Background for teaching physics and physical science as a process of inquiry. Prerequisite: PHYS 210. Offered: W.

PHYS 212 Physics by Inquiry I (5) NW Selected topics in physics with emphasis on depth of understanding and development of skills essential to the scientific process. Background for teaching physics and physical science as a process of inquiry. Prerequisite: PHYS 211. Offered: Sp.

PHYS 214 Light and Color (5) NW, QSR Compares past explanation of certain familiar natural phenomena with present understandings. Lamps and lighting, outdoor light, optical devices, color vision, perspective, paints, and pigments. Quantitative comparison critical to the course, but college-level mathematics background not required. Intended for non-science students.

PHYS 215 A Way of Knowing (5) NW, QSR Boynton Insight to the character and culture of scientific inquiry through a historical examination of how we have interpreted our experience of the phenomena of gravitation. Specifically for non-science majors. Quantitative reasoning and critical thinking required, but no college-level mathematics.

PHYS 216 Science and Society (5) NW, QSR Chaloupka Investigation of the relationship between science, technology and society. Nuclear physics and molecular biology serves as concrete examples of fields with significant impact on society. Offered jointly with SIS 216; Sp.

PHYS 224 Thermal Physics (3) NW Introduction to heat, thermodynamics, elementary kinetic theory, and the physics of continuous media. Prerequisite: MATH 126, MATH 129, or MATH 136, any of which may be taken concurrently; PHYS 122 which may be taken concurrently. Offered: AWSpS.

PHYS 225 Modern Physics (3) NW Special theory of relativity; phenomena of modern physics with emphasis on photons, electrons, and atoms; introduction to quantum physics. Prerequisite: 2.0 in PHYS 123 which may be taken concurrently. Offered: AWSpS.

PHYS 227 Elementary Mathematical Physics (3) NW Applications of mathematics in physics with emphasis on the mechanics of particles and continuous systems. Prerequisite: either MATH 134, MATH 135, MATH 136, MATH 308, or MATH 318; 2.0 in PHYS 123. Offered: AS.

PHYS 228 Elementary Mathematical Physics (3) NW Applications of mathematics in physics with emphasis on the mechanics of particles and continuous systems. Prerequisite: PHYS 227. Offered: AW.

PHYS 231 Introductory Experimental Physics (3) NW Introduction to data acquisition and analysis using experiments which measure fundamental constants or properties of nature (Planck's constant, Boltzmann's constant, speed of light, charge of electron). Prerequisite: 2.0 in PHYS 123.

PHYS 232 Introduction to Computational Physics (3) Computational techniques applied to physics and data analysis in laboratory setting. Emphasis on numerical solutions of differential equations, least square data fitting, Monte Carlo methods, and Fourier Analysis. A high-level language taught and used; no previous computing experience required. Prerequisite: PHYS 227. Offered: Sp.

PHYS 311 Relativity and Gravitation (3) NW Special theory of relativity, Newtonian gravity, and relativistic effects of gravitation, including black holes, gravitational waves, and applications to cosmology. Prerequisite: 2.0 in PHYS 123.

PHYS 315 Applications of Modern Physics (3) Foundations of quantum physics, including Schroedinger equation, tunneling, atoms, spin, and applications. These include semiconductor devices, lasers, magnetic resonance imaging (MRI), quantum cryptography, atomic microscopes. Prerequisite: minimum grade of 2.0 in PHYS 224, minimum grade of 2.0 in PHYS 225, minimum grade of 2.0 in PHYS 227 which may be taken concurrently. Offered: W.

PHYS 321 Electromagnetism (4) NW First of a three-quarter sequence. Charges at rest and in motion; dielectric and magnetic media; electromagnetic waves; relativity and electromagnetism; physical optics. Prerequisite: either MATH 324 which may be taken concurrently, MATH 334, MATH 335, or MATH 336; minimum grade of 2.0 in PHYS 228. Offered: AW.

PHYS 322 Electromagnetism (4) NW Continuation of PHYS 321. Charges at rest and
in motion; dielectric and magnetic media; electromagnetic waves; relativity and electromagnetism; physical optics. Prerequisite: PHYS 321. Offered: WSp.

PHYS 323 Electromagnetism (4) NW Continuation of PHYS 322. Charges at rest and in motion; dielectric and magnetic media; electromagnetic waves; relativity and electromagnetism; physical optics. Prerequisite: PHYS 322.

PHYS 324 Quantum Mechanics (4) NW First part of a two-quarter sequence. Introduction to nonrelativistic quantum mechanics: need for quantum theory, Schroedinger equation, operators, angular momentum, the hydrogen atom, identical particles, and the periodic table. Prerequisite: either MATH 324, MATH 334, MATH 335, or MATH 336; minimum grade of 2.0 in PHYS 225; minimum grade of 2.0 in PHYS 228. Offered: ASu.

PHYS 325 Quantum Mechanics (4) NW Continuation of PHYS 324. Introduction to nonrelativistic quantum mechanics: perturbation theory, the radiation principle, radiation; application of quantum mechanics to atomic physics, magnetic resonance, scattering, and various special topics. Prerequisite: PHYS 324. Offered: W.

PHYS 326 Statistical Physics (3) NW Elements of statistical mechanics and their applications. Prerequisite: PHYS 224; PHYS 322. Offered: Sp.

PHYS 331 Optics Laboratory (3) NW Measurements of interference and diffraction, optical properties of matter, image processing, interference, holography. Prerequisite: PHYS 227. Offered: Sp.

PHYS 333 Electric Circuits Laboratory (3) NW Basic elements of DC, AC, and transient circuits; electronic devices; electrical measurements. Prerequisite: either MATH 126, MATH 129, or MATH 136; 2.0 in PHYS 123. Offered: WS.

PHYS 334 Electric Circuits Laboratory (3) NW Electrical measurements, data management, digital electronics of microprocessor systems. Building a microprocessor. Prerequisite: PHYS 334. Offered: SpS.

PHYS 401 Special Problems (*, max. 30) Supervised individual study. Offered: AWSpS.

PHYS 402 Special Problems (*, max. 30) Supervised individual study. Offered: AWSpS.

PHYS 403 Special Problems (*, max. 30) Supervised individual study. Offered: AWSpS.

PHYS 405 Physical Science by Inquiry II (5-5) NW Emphasis on depth of understanding and development of reasoning and representational skills essential to the scientific process. Provides background for teaching physical science as a process of inquiry and develops scientific literacy. Offered: A.

PHYS 406 Physical Science by Inquiry II (-5) NW Emphasis on depth of understanding and development of reasoning and representational skills essential to the scientific process. Provides background for teaching physical science as a process of inquiry and develops scientific literacy. Offered: W.

PHYS 407 Physics by Inquiry II (5) NW Selected topics in physics, with emphasis on depth of understanding and development of skills essential to the scientific process. Background for teaching physics at secondary school and introductory college levels. Some mathematical proficiency required. Prerequisite: PHYS 123. Offered: A.

PHYS 408 Physics by Inquiry II (5) NW Selected topics in physics, with emphasis on depth of understanding and development of skills essential to the scientific process. Background for teaching physics at secondary school and introductory college levels. Some mathematical proficiency required. Prerequisite: PHYS 407. Offered: W.

PHYS 409 Physics by Inquiry II (5) NW Selected topics in physics, with emphasis on depth of understanding and development of skills essential to the scientific process. Background for teaching physics at secondary school and introductory college levels. Some mathematical proficiency required. Prerequisite: PHYS 408. Offered: Sp.

PHYS 410 Physics by Inquiry for In-Service Teachers (1-2, max. 30) NW A "hands-on," inquiry-oriented approach designed to train in-service teachers in the use of the physical science content for any of several science programs selected by a school or school district. Credit/no credit only.

PHYS 411 Physics by Inquiry for Lead Teachers (1-4, max. 4) NW Extends the content covered in previous courses and helps prepare lead teachers to train colleagues to use any of several science programs selected by schools or districts. Credit/no credit only. Prerequisite: two courses selected from PHYS 405, PHYS 406, PHYS 407, PHYS 408, and PHYS 409. Offered: A.

PHYS 412 Physics by Inquiry for Lead Teachers (1-4, max. 4) NW Extends the content covered in previous courses and helps prepare lead teachers to train colleagues to use any of several science programs selected by schools or districts. Credit/no credit only. Prerequisite: two courses selected from PHYS 405, PHYS 406, PHYS 407, PHYS 408, and PHYS 409. Offered: A.

PHYS 413 Physics by Inquiry for Lead Teachers (1-4, max. 4) NW Extends the content covered in previous courses and helps prepare lead teachers to train colleagues to use any of several science programs selected by schools or districts. Credit/no credit only. Prerequisite: two courses selected from PHYS 405, PHYS 406, PHYS 407, PHYS 408, and PHYS 409. Offered: A.

PHYS 414 Physics by Inquiry for Lead Teachers (1-4, max. 4) NW Extends the content covered in previous courses and helps prepare lead teachers to train colleagues to use any of several science programs selected by schools or districts. Credit/no credit only. Prerequisite: two courses selected from PHYS 405, PHYS 406, PHYS 407, PHYS 408, and PHYS 409. Offered: A.

PHYS 421 Atomic and Molecular Physics (3) NW Survey of the principal phenomena of atomic and molecular physics. Prerequisite: PHYS 323; PHYS 325. Offered: W.

PHYS 422 Nuclear and Elementary-Particle Physics (3) NW Survey of the principal phenomena of nuclear and elementary-particle physics. Prerequisite: PHYS 323; PHYS 325. Offered: Sp.

PHYS 423 Solid-State Physics (3) NW Survey of the principal phenomena of solid-state physics. Prerequisite: PHYS 323; PHYS 325. Offered: A.

PHYS 424 Mathematical Physics (3) NW Advanced classical mechanics. Prerequisite: PHYS 323; PHYS 325. Offered: A.

PHYS 427 Applications of Physics (1-3, max. 12) NW Current applications of physics to problems in the sciences and technology.

PHYS 428 Selected Topics in Physics (1-5, max. 12) NW.

PHYS 431 Modern Physics Laboratory (3) NW Measurement in modern atomic, molecular, and solid-state physics. Recommended: 30 credits in physics. Offered: A.

PHYS 432 Modern Physics Laboratory (3) NW Measurement in modern atomic, molecular, and solid-state physics. Recommended: 30 credits in physics. Offered: W.

PHYS 433 Modern Physics Laboratory (3) NW Techniques in nuclear and elementary-particle research. Offered: Sp.

PHYS 434 Application of Computers to Physical Measurement (3) NW Laboratory giving specific instruction and experience in interfacing laboratory equipment to computers. Prerequisite: PHYS 334. Offered: A.

PHYS 436 Nonlinear Dynamics and Chaos (4) NW Variational Principle, Lagrangian and Hamiltonian Mechanics, phase space, nonlinear dynamics, approach to chaos, Lyapunov exponents, applications to physical systems. Numerical exercises to illustrate phenomena. Prerequisite: MATH 309.

PHYS 441 Quantum Physics (4) NW Introduction to concepts and methods of quantum physics: wave mechanics (de Brolgie wavelength, uncertainty principle, Schroedinger equation), one-dimensional examples (tunneling, harmonic oscillator), formalism of quantum physics, angular momentum and the hydrogen atom. Recommended: 30 credits in physical science or engineering. Offered: W.

PHYS 451 Issues for Ethnic Minorities and Women In Science and Engineering (3/5) I&S Addresses issues faced by women and ethnic minorities in physical sciences and engineering. Focuses on participation, barriers to participation, and solutions to those issues for women and ethnic minorities in physical sciences and engineering. Offered: jointly with WOMEN 485.

PHYS 460 Water in the Environment (3) NW Baker, Raymond, Waddington, Warren Discusses the unique physical and chemical properties of the water molecule in relation to the atmospheric greenhouse effect, precipitation formation, oceanic circulations, infiltration of water through soils, geyser eruptions, and glacier and sea ice thickness. Prerequisite: either MATH 124, MATH 126, MATH 129, or MATH 136; PHYS 123. Offered: jointly with ATM S 460/ESS 424. Offered: A.

PHYS 485 Senior Honors Seminar (1, max. 3) NW Offered: A.

PHYS 486 Senior Honors Seminar (1, max. 3) NW Offered: W.

PHYS 487 Senior Honors Seminar (1, max. 3) NW Offered: Sp.

PHYS 491 Independent Research (1-3, max. 3) Supervised, independent study requiring written and oral presentations summarizing work accomplished. Recommended: 12 credits in physics above 200 level. Offered: A.
PHYS 492 Independent Research (1-3, max. 3) Supervised, independent study requiring written and oral presentations summarizing work accomplished. Recommended: 12 credits in physics above 200 level. Offered: W.

PHYS 493 Independent Research (1-3, max. 3) Supervised, independent study requiring written and oral presentations summarizing work accomplished. Recommended: 12 credits in physics above 200 level. Offered: Sp.

PHYS 494 Seminar on Current Problems in Physics (1, max. 3) NW Supervised, independent study of topics (chosen by faculty in charge) of current interest in physics. Written and oral presentation summarizing work accomplished are required. Recommended: 12 credits in physics above 200 level. Offered: A.

PHYS 495 Seminar on Current Problems in Physics (1, max. 3) NW Supervised, independent study of topics (chosen by faculty in charge) of current interest in physics. Written and oral presentation summarizing work accomplished are required. Recommended: 12 credits in physics above 200 level. Offered: W.

PHYS 496 Seminar on Current Problems in Physics (1, max. 3) NW Supervised, independent study of topics (chosen by faculty in charge) of current interest in physics. Written and oral presentation summarizing work accomplished are required. Recommended: 12 credits in physics above 200 level. Offered: Sp.

PHYS 501 Tutorials in Teaching Physics (1, max. 2) Preparation for teaching introductory physics; use and critical analysis of instructional materials in a collaborative learning environment; supervised teaching practicum in which instructional materials are used with undergraduates. Credit/no credit only. Offered: A.

PHYS 502 Tutorials in Teaching Physics (1, max. 2) Preparation for teaching introductory physics; use and critical analysis of instructional materials in a collaborative learning environment; supervised teaching practicum in which instructional materials are used with undergraduates. Credit/no credit only. Offered: W.

PHYS 503 Tutorials in Teaching Physics (1, max. 2) Preparation for teaching introductory physics; use and critical analysis of instructional materials in a collaborative learning environment; supervised teaching practicum in which instructional materials are used with undergraduates. Credit/no credit only. Offered: Sp.

PHYS 505 Mechanics (3) Lagrangian and Hamiltonian dynamics, with applications to various topics such as coupled oscillators, parametric resonance, anharmonic oscillations, chaos. Offered: A.

PHYS 507 Physical Applications of Group Theory (3) Applications of finite and continuous groups, representation theory, symmetry, and conservation laws to physical systems. Offered: Sp.

PHYS 511 Topics in Contemporary Physics (3, max. 9) Topics of current experimental, theoretical, or technological interest in modern physics. Offered: Sp.

PHYS 513 Electromagnetism and Relativity (4) First of a three-part sequence. Principles of electrodynamics, complex variable techniques, boundary value problems and their associated mathematical techniques, Green's functions. Offered: A.

PHYS 514 Electromagnetism and Relativity (3) Continuation of PHYS 513. Electric and magnetic fields in free space and material media, wave guides and cavity resonators. Offered: W.

PHYS 517 Quantum Mechanics (4) First of a three-part sequence. Modern non-relativistic quantum mechanics developed, beginning with its basic principles. Dirac and abstract operator notation introduced, starting with simple examples. Offered: A.

PHYS 518 Quantum Mechanics (4) Continuation of PHYS 517. Modern non-relativistic quantum mechanics. The character of the theory illustrated both with physical examples and with conceptual problems. Topics include: atomic structure, scattering processes, density operator description of mixed states, and measurement theory. Abstract operator methods emphasized in the exposition of angular momentum, scattering, and perturbation theory. Offered: W.

PHYS 520 Advanced Quantum Mechanics — Introduction to Quantum Field Theory (4) Multi-particle systems, second quantization, diagrammatic perturbation theory, correlation functions and multi-particle scattering, relativistic theories, renormalizability, basic quantum electrodynamics, and other applications. Offered: A.

PHYS 521 Advanced Quantum Mechanics — Introduction to Quantum Field Theory (3) Multi-particle systems, second quantization, diagrammatic perturbation theory, correlation functions and multi-particle scattering, relativistic theories, renormalizability, basic quantum electrodynamics, and other applications. Offered: W.

PHYS 524 Thermodynamics and Statistical Mechanics (4) Statistical mechanical basis of the fundamental thermodynamical laws and concepts; classical and quantum statistical distribution functions; applications to selected thermodynamic processes and examples of Bose and Fermi statistics. Offered: W.

PHYS 525 Statistical Mechanics (3) Introduction to equilibrium and non-equilibrium aspects of many-body systems; scale invariance and universality at phase transitions and critical phenomena; exactly solvable models; Markov processes, master equations and Langevin equation in non-equilibrium stochastic processes. Prerequisite: PHYS 524. Offered: A.

PHYS 527 Current Problems in Physics (1) Introduction to current research topics for beginning graduate students. Credit/no credit only. Offered: A.

PHYS 528 Current Problems in Physics (1) Introduction to current research topics for beginning graduate students. Credit/no credit only. Offered: W.

PHYS 530 Laser Physics (4) Physics underlying laser design and operation in the context of common laboratory systems. Topics may include continuous and pulsed lasers; solid, liquid, and gas gain media; Q-switching, mode-locking, resonator theory, nonlinear optics, and others. Prerequisite: basic quantum mechanics, electromagnetism, and optics; recommended: PHYS 541.

PHYS 532 Liquid Crystal Devices (4) Physics of liquid crystals and applications to practical display devices. Phases, phase transitions, optical and dielectric properties, molecular and device "engineering," future prospects.

PHYS 536 Introduction to Acoustics and Digital Signal Processing (4) Chatoupek Introduces mathematical and physics principles of acoustics in digital signal processing applications. Complex analysis and Fourier methods, physics of vibrations and waves, solutions of the wave equation, digital convolution and correlation methods, and Maximum Length Sequence method in signal analysis and spread-spectrum applications. Prerequisite: PHYS 123; MATH 120.

PHYS 541 Applications of Quantum Physics (4) Techniques of quantum mechanics applied to lasers, quantum electronics, solids, and surfaces. Emphasis on approximation methods and interaction of electromagnetic radiation with matter. Prerequisite: PHYS 421 or PHYS 441 or equivalent. Offered: Sp.

PHYS 542 Numerical Methods in Physics (4) Numerical methods for analysis and computation in physics. Topics may include integration, differential equations, partial differential equations, optimization, data handling, and Monte Carlo techniques. Emphasis is applications in physics. Prerequisite: 30 credits in physical sciences, computer science, or engineering.

PHYS 543 Electromagnetic Theory (4) Principal concepts of electromagnetism. Static electric and magnetic fields. Boundary-value problems. Electric and magnetic properties of materials. Electromagnetic waves and radiation. Prerequisite: 30 credits in physical sciences, computer science, or engineering. Offered: A.

PHYS 544 Applications of Electromagnetic Theory (4) Emphasis may vary from year to year. Topics may include electromagnetic waves, radiation, scattering, wave guides, plasma physics, quantum electronics, and accelerator physics. Prerequisite: PHYS 543 or equivalent.

PHYS 545 Contemporary Optics (4) Coordinated lecture and laboratory treatment of topics in contemporary optics. Subjects include Fourier
optics, lens systems, interferometry, laser optics, holography, polarization, crystal optics, birefringence, and crystal light sources, optical detectors. Prerequisite: PHYS 543 or equivalent.

PHYS 546 Condensed-Matter Physics (4) Introduction to the theory of solids: crystal structure in real space and reciprocal space, phonons, free electrons, band theory, semiconductor devices. Prerequisite: PHYS 441 or equivalent.

PHYS 547 Electronics for Physics Research (4) Electronic techniques as applied in physics research. Topics include noise, control-system analysis, operational amplifiers, lock-in amplifiers, precision power supplies and metering, data transmission, microprocessors. Several integrated measurement systems are examined in the context of specific research problems. Prerequisite: elementary electronics.

PHYS 550 Atomic Physics (3) Theory of atomic structure and spectra; atomic and molecular beams; resonance techniques; atomic collisions; topics of current interest. Prerequisite: PHYS 519.

PHYS 551 Atomic Physics (3) Theory of atomic structure and spectra; atomic and molecular beams; resonance techniques; atomic collisions; topics of current interest. Prerequisite: PHYS 519.

PHYS 552 Introduction to Cosmic Ray Physics (3) The nature and cosmological significance of cosmic ray photons and particles. The motion and confinement of particles in the geocentric, interplanetary, and interstellar medium. Theories of the processes involved in the high-energy interaction of cosmic rays, including shower theory. Methods of measurement and current problems. Credit/no credit only. Prerequisite: introductory quantum mechanics.

PHYS 554 Nuclear Astrophysics (3) Big bang nucleosynthesis; nuclear reactions in stars; solar neutrinos and neutrino oscillations; core-collapse supernovae; nucleosynthesis in stars, novae, and supernovae; neutron stars; composition and sources of cosmic rays; gamma ray bursts; atmospheric neutrinos. Offered: jointly with ASTR 510; A.

PHYS 555 Cosmology and Particle Astrophysics (3) Big bang cosmology; relativistic world models and classical tests; background radiation; cosmological implications of nucleosynthesis; baryogenesis; inflation; galaxy and large-scale structure formation; quasars; intergalactic medium; dark matter. Offered: jointly with ASTR 513; W.

PHYS 557 High Energy Physics (3) First quarter of a three-quarter series. Emphasis on the experimental foundations of particle physics. Prerequisite: PHYS 519; recommended: PHYS 520, which may be taken concurrently. Offered: A.

PHYS 558 High Energy Physics (3) Second quarter of a three-quarter series. Phenomenology of the standard model of strong and electroweak interactions, including an introduction to Feynman diagrams. Prerequisite: PHYS 519; recommended: PHYS 520 and PHYS 521, which may be taken concurrently. Offered: W.

PHYS 559 High Energy Physics (3) Third quarter of a three-quarter series. Topics of current interest in high-energy particle physics. Prerequisite: PHYS 519; recommended: PHYS 520 and 521, which may be taken concurrently. Offered: Sp.

PHYS 560 Theoretical Nuclear Physics (3) First of a two-part sequence. Nuclear structure, scattering, reactions, and decays in terms of elementary properties of nucleons and current theoretical models. Prerequisite: PHYS 519. Offered: A.

PHYS 561 Theoretical Nuclear Physics (3) Continuation of PHYS 560. Nuclear structure, scattering, reactions, and decays in terms of elementary properties of nucleons and current theoretical models. Prerequisite: PHYS 519. Offered: W.

PHYS 564 General Relativity (3) First of a two-part sequence. General covariance and tensor analysis, the relativistic theory of gravitation as given by Einstein’s field equations, experimental tests and their significance, and applications of general relativity, particularly in the areas of astrophysics and cosmology. Prerequisite: PHYS 515.

PHYS 565 General Relativity (3) Continuation of PHYS 564. General covariance and tensor analysis, the relativistic theory of gravitation as given by Einstein’s field equations, experimental tests and their significance, and applications of general relativity, particularly in the areas of astrophysics and cosmology. Prerequisite: PHYS 515.

PHYS 567 Theory of Solids (3) First quarter of a course on modern solid state and condensed matter physics, aimed at bringing the student’s knowledge up to the level of current literature. Topics include structural, electronic, and vibrational properties; optical response functions and dynamics; transport theory; and cooperative phenomena. Prerequisite: PHYS 519, PHYS 524. Offered: AW.

PHYS 568 Theory of Solids (3) Second quarter of a course on modern solid state and condensed matter physics, aimed at bringing the student’s knowledge up to the level of current literature. Additional topics (see PHYS 567) include magnetism, quantum Hall effect, superconductivity. Offered: WSP.

PHYS 570 Quantum Field Theory (3) Emphasis varies in different years between relativistic quantum field theory and the many-body problem. Credit/no credit only. Prerequisite: PHYS 522.

PHYS 571 Quantum Field Theory (3) Emphasis varies in different years between relativistic quantum field theory and the many-body problem. Credit/no credit only. Prerequisite: PHYS 522.

PHYS 572 Modern Quantum Field Theory (3) Advanced topics in quantum field theory. Credit/no credit only. Prerequisite: PHYS 570, PHYS 571.

PHYS 575 Selected Topics in Experimental Physics (*, max. 30).

PHYS 576 Selected Topics in Theoretical Physics (*, max. 30).

PHYS 578 Physics Colloquium (*, max. 30) Credit/no credit only. Offered: A/WSp.

PHYS 581 Seminar in High-Energy Physics (1-3, max. 20) Credit/no credit only. Offered: A/WSp.

PHYS 582 Seminar in Particle Theory (1-3, max. 20) Credit/no credit only. Offered: A/WSp.

PHYS 583 Seminar in Relativistic Astrophysics (1-3, max. 20) Credit/no credit only. Offered: A/WSp.

PHYS 584 Seminar in Recent Developments in Atomic Physics (1-3, max. 20) Credit/no credit only. Offered: A/WSp.

PHYS 585 Seminar in Experimental Nuclear Physics (1-3, max. 20) Credit/no credit only. Offered: A/WSp.

PHYS 586 Seminar in Condensed Matter Physics (1-3, max. 20) Credit/no credit only. Offered: A/WSp.

PHYS 587 Seminar in Nuclear Theory (1-3, max. 20) Credit/no credit only. Offered: A/WSp.

PHYS 588 Particle Astrophysics Seminar (1-3, max. 20) Credit/no credit only. Offered: A/WSp.

PHYS 589 Seminar in Problems of Physics Education (1-3, max. 20) Credit/no credit only. Offered: A/WSp.

PHYS 590 Seminar in Statistical Physics (1-3, max. 20) Credit/no credit only. Offered: A/WSp.

PHYS 600 Independent Study or Research (*) Study or research under the supervision of individual faculty members. Credit/no credit only. Prerequisite: permission of supervisor. Offered: A/WSpS.

PHYS 800 Doctoral Dissertation (*) Credit/no credit only. Prerequisite: permission of Supervisory Committee chairperson. Offered: A/WSpS.

Political Science

Political Science

POL S 101 Introduction to Politics (5) I&S Political problems that affect our lives and shape the world around us. Offered: A/WSpS.

POL S 201 Introduction to Political Theory (5) I&S Philosophical bases of politics and political activity. Provides an introduction to the study of politics by the reading of a few books in political philosophy. Organized around several key political concepts, such as liberty, equality, justice, authority, rights, and citizenship. Offered: A/WSpS.

POL S 202 Introduction to American Politics (5) I&S Institutions and politics in the American political system. Ways of thinking about how significant problems, crises, and conflicts of American society are resolved politically. Offered: A/WSpS.
POL S 203 Introduction to International Relations (5) I&S

The world community, its politics, and government. Offered: A/WSp/S.

POL S 204 Introduction to Comparative Politics (5) I&S

Political systems in a comparative framework. Traditional and contemporary approaches to the study of governments and societies in different countries. Offered: WSp.

POL S 205 Political Science as a Social Science (5) I&S

Methodological perspectives of the various social science disciplines: commonalities and differences in assumptions, values, and paradigms. Current issues from the multiple perspective of social sciences; limits of the social sciences in resolving key social issues. Offered: W.

POL S 212 Philosophy of Feminism (5) I&S

Philosophical analysis of the concepts and assumptions central to feminism. Theoretical positions within the feminist movement; view of the ideal society, goals and strategies of the movement, intersections of the sex-gender system with other systems of oppression. Offered: jointly with PHIL 206/ WOMEN 206.

POL S 213 The Korean Peninsula and World Politics (5) I&S

Introduction to Korean politics, economics, and international relations since the late nineteenth century. Addresses the evolution of Korean in international society by comparing Korea’s experience with that of China and Japan. Offered: jointly with SISEA 213.

POL S 246 African American Politics (5) I&S

P. Rivers Survey of African Americans within the U.S. socio-political processes. Situates African Americans within a post-civil rights context where there is debate about race’s centrality to an African American politics. Recommended: either AES 150, AFRAM 201, or POL S 202. Offered: jointly with AFRAM 246.

POL S 249 Introduction to Labor Studies (5) I&S

Conceptual and theoretical issues in the study of labor and work. Role of labor in national and international politics. Formation of labor movements. Historical and contemporary role of labor in the modern world. Offered: jointly with HIST 249/SOC 266.

POL S 270 Introduction to Political Economy (5) I&S

Political economy as a tool for understanding and evaluating the political world. Combines theory, methods, and insights derived from economics and political science and applies them to a range of substantive issues.

POL S 273 The Concept of Political Power (5) I&S

How to understand and explain relationships of power. Readings from Marxism, Weberian sociology, anarchism, classical political philosophy, and contemporary political science. May also include works of fiction.

POL S 281 Introduction to American Political Culture (5) I&S

V/LPA Introduction to the methods and theories used in the analysis of American culture. Emphasizes an interdisciplinary approach to American literature, including history, politics, anthropology, and mass media. Offered: jointly with ENGL 251.

POL S 299 Special Topics in Political Science (2-5, max. 10) I&S

Examines a different subject or problem of current interest with the discipline.

POL S 301 Special Topics in Political Theory (5, max. 10) I&S

Selected contemporary political theories. Political principles as reflected in concrete political problems. Topics might include: women’s rights, civil disobedience, national health care, affirmative action, environmental protection, privacy, human rights, and redistribution of property. Recommended: POL S 101, POL S 201, POL S 202, POL S 203, POL S 204, or POL S 205.

POL S 303 Public Policy Formation in the United States (5) I&S

Policy decision making with emphasis on issues arise, the way they become part of the policy agenda of the executive and the legislature, how these institutions organize to handle policy issues, and the roles of the legislature, the executive, and the bureaucracy. Public policy literature and familiarization with key aspects of policy decision making at the national, state, and local levels.

POL S 304 The Press and Politics in the United States (5) I&S

Journalists’ role in elections and public policy. Relationship between news coverage and political campaigns. Study and analysis of local political newswriting, reporting, and TV news. Local and state political figures. Extensive off-campus experience included. Offered: jointly with COM 304.

POL S 305 The Politics of Mass Communication in America (5) I&S

In politics from the standpoint of the communication strategies used to shape their political involvement. Topics include: social structure and political participation, political propaganda and persuasion, the political uses of public opinion, and the mass media and politics. Offered: jointly with COM 305.

POL S 306 Media, Society and Political Identity (5) I&S

Explores how society and culture are both represented in and shaped by communication technologies and media content. Media include film, advertising, news, entertainment television, talk shows, and the Internet. Explores how media represent and affect individual identity, values, and political engagement. Offered: jointly with COM 306.

POL S 308 The Western Tradition of Political Thought, Ancient and Medieval (5) I&S

Origin and evolution of major political concepts from ancient Greece to the medieval period, from Thales through Aquinas.

POL S 309 The Western Tradition of Political Thought, Pre-Modern (5) I&S

Continuation of 308, treating materials from the fifteenth through eighteenth centuries, Machiavelli through Rousseau.

POL S 310 The Western Tradition of Political Thought, Modern (5) I&S

Continuation of 309, focusing on material from the eighteenth through twentieth centuries, from Rousseau through Lenin.

POL S 311 Individual and the State (5) I&S

Individualism and communitarian critics. Political and ethical implications of both. Nature of the state, liberty, responsibility, cooperation. Important individualist and collectivist literature, dealing with market theories and citizen politics, critically assessed.

POL S 313 Women in Politics (5) I&S

Theoretical, historical, and empirical studies of women’s participation in political and social movements. Women’s diverse efforts to improve their political, social, and economic status. Policy issues of particular concern to women. Women’s political experiences in household, local, regional, national, and international arenas. Offered: jointly with WOMEN 313.

POL S 315 Black Identities and Political Power (5) I&S

P. Rivers Related the deployment of political power within institutions to shifting racial identities. Shows how politics both reflect and inflect relations of domination and resistance within and between cultures in the black diaspora. Prerequisite: either AES 150, AFRAM 150, AFRAM 201, or POL S 201. Offered: jointly with AFRAM 315.

POL S 316 African-American Political and Social Thought (5) I&S

Race relations in U.S. Politics as defined by the struggle of African Americans for economic, political, and social equality. Studies of African-American political and social thought; expands and clarifies our understanding of the strengths and weaknesses of American democratic ideals.

POL S 317 The Politics of Race and Ethnicity in the United States (5) I&S

Introduction to the history and development of the American society, focusing on how race and ethnicity shape political institutions (e.g., the Constitution, political parties, voting systems). Examination of political relationships between Whites, African Americans, Latinos, and Asian Americans. Case studies of minority representation and the politics of welfare, crime, immigration, and terrorism. Offered: jointly with JS 331.

POL S 318 American Political Thought I (5) I&S

Major thinkers and themes in American political and cultural development from Puritan origins to the Civil War.

POL S 321 American Foreign Policy (5) I&S

Constitutional framework; major factors in formulation and execution of policy; policies as modified by recent developments; the principal policymakers-President, Congress, political parties, pressure groups, and public opinion.

POL S 322 International Political Economy of Latin America (5) I&S

Exploration of politics underlying Latin America’s economic development. Topics covered include import-substituting industrialization, mercantilism, the debt crisis, neoliberalism, market integration, and poverty. Review of major theoretical perspectives such as modernization theory, dependency, and the new political economy. Offered: jointly with SISLA 322.

POL S 324 Europe in World Politics (5) I&S

Independent and coordinated efforts of Britain, France, and West Germany to adapt to the post-World War II global system. Creation and development of the Atlantic Alliance. Relations with postcommunist states. Decolonization and the evolution of relations with the Third World. The movement for European integration. Recommended: POL S 203.

POL S 325 The Arab-Israeli Conflict (5) I&S

The politics of conflicting ideologies: Zionism and Arab nationalism; formation of the state of Israel; development of Palestinian nationalism; Arab-Israeli wars. Re-emergence of Palestinians for autonomous state; domestic sources of foreign policy; the role of the superpowers.

POL S 326 Scandinavia in World Affairs (5) I&S

Introduction to the foreign relations of Scandinavia with a focus on Nordic security, international economic pressures, and global conflict resolution. Survey of the national settings.
for international involvements and highlights the dilemmas for industrial societies exposed to the pressure of interdependence. Offered: jointly with SCAND 326.

POL S 327 Women’s Rights as Human Rights (5) I&S Women’s rights in comparative perspective, focusing on varying settings that alter the meaning and practical application. Domestic level: areas including abortion politics to trafficking in women. International level: areas including the new claims before European supranational judicial bodies, rape as war crime in international law. Offered: jointly with LSJ 327.

POL S 328 International Organizations (5) I&S Explores historical, theoretical, and empirical aspects of the United Nations, its specialized agencies, and other international organizations, both governmental and nongovernmental. Recommended: POL S 203.

POL S 329 Global Communication (5) I&S Introduction to the history, purpose, channels, content, technologies, policy, and regulation of international communication systems. Issues covered include disparities in media development between post-industrial and developing nations, imbalances in international news and information flow, and the emergence of global communications. Offered: jointly with COM 322.

POL S 330 Communications in International Relations (5) I&S Looks at communications in relations between international groups and states. Examines the range of functions and roles communication media play in international affairs, global issues, and intergroup relations. Also examines the strategic use of communications by various groups. Offered: jointly with COM 321.

POL S 331 Government and Politics in the Middle East and North Africa (5) I&S Breakdown of traditional society and the problems of building modern political systems.

POL S 337 Collective Violence and the State (5) I&S Comparative study of collective violence in modern societies with emphasis on riots and pogroms. Readings include case materials drawn from Russian pogroms of the nineteenth and twentieth centuries, Hindu-Muslim riots in modern India, and race riots in the United States and Great Britain. Offered: jointly with SIS 337.

POL S 340 Government and Politics of South Asia (5) I&S Comparison of problems of national integration and political development in India, Pakistan, and Ceylon. Offered: jointly with SISSA 340.

POL S 342 Government and Politics of Latin America (5) I&S Analysis of the political dynamics of change in Latin America comparing various national approaches to the political problems of modernization, economic development, and social change. Offered: jointly with SISLA 342.

POL S 343 Politics and Change in Southeast Asia (5) I&S Government and politics in the countries of Southeast Asia, with attention given to the nature of the social and economic environments that condition them. Offered: jointly with SISE 343.

POL S 346 Governments of Western Europe (5) I&S Modern government and politics of Great Britain, France, Germany, and Italy.

POL S 350 Government and Interest Groups in the United States (5) I&S Agrarian, labor, professional, business, and ethnic interest in politics; impact on representative institutions and governmental processes.

POL S 351 The American Democracy (5) I&S Democratic theory; constitutional theory; the Presidency; Congress; the Supreme Court; civil rights and civil liberties. Designed for nonmajors.

POL S 352 American Political Parties (5) I&S Theories of American parties, campaigns and voting behavior; party leadership; political socialization and participation.

POL S 354 Elections and Voting in the United States (5) I&S Electoral institutions and processes of the United States: the idea and practice of elections, the electoral system, individual voting behavior, collective voting behavior, and the impact of elections on policy.

POL S 355 The American Presidency (5) I&S The American presidency; its evolution, its occupants, and its place within the American system. Topics include presidential character, war, elections, Watergate, the economy, and the Constitution.

POL S 356 Society and Politics (5) I&S Focus on the causes of political change in democratic countries, including public opinion, social movements, interest group activity, and party organization. Offered: jointly with SOC 356.

POL S 357 Minority Representation and the Voting Rights Act (5) I&S Explores whether and how African-Americans and Latinos are able to organize effective groups to press their demands on the political system. Focuses on minority political behavior, the effect of these groups at the polls, the responsiveness of elected officials, and legal or constitutional obstacles affecting these phenomena.

POL S 360 Introduction to United States Constitutional Law (5) I&S Growth and development of the United States Constitution as reflected in decisions of the Supreme Court; political, social, and economic effects. Offered: jointly with LSJ 360.

POL S 361 United States Courts and Civil Liberty (5) I&S Cases and literature bearing on protection of constitutionally guaranteed private rights, with particular reference to the period since 1937. Offered: jointly with LSJ 361.

POL S 363 Law in Society (5) I&S Inquiry into how law matters in social practice. Examines general theories of law, the workings of legal institutions, and the character of legally constituted practices and relationships in diverse terrains of social life. Offered: jointly with LSJ 363.

POL S 365 Lawyers in American Politics (5) I&S Influence of lawyers on American politics. Official and unofficial political roles, lawyers as lobbyists, as legislators, in the bureaucracy, politics of the American Bar Association. Includes study of legal education, professional values, and avenues of political access.

POL S 367 Comparative Law and Courts (5) I&S Introduction to comparative judicial politics, focusing on the relationship between law and politics in cross-national perspective, as well as on the functioning of supranational and international legal entities in the international system. Offered: jointly with LSJ 367.

POL S 382 State Government (5) I&S Focus on the structures, processes, and policy outputs of state governments in the United States.

POL S 383 Environmental Politics and Policy in the United States (5) I&S Explores the issues between technological and environmental change and policy formation. Consideration of political behavior related to these phenomena and the capacity of urban public organizations to predict change and to formulate policies that can take future states into account.

POL S 384 Global Environmental Politics (5) I&S Examines the globalization of environmental problems, including climate change, ozone depletion, and loss of biodiversity, as well as the globalization of political responses to these problems within the framework of globalization as set of interconnected economic, technological, cultural and political processes. Offered: jointly with ENVIR 384.

POL S 398 Honors Seminar (5, max. 15) I&S Intensive and advanced studies in various aspects of political science. Open only to participants in the departmental honors program.

POL S 401 Advanced Special Topics in Political Theory (5, max. 10) I&S Topics can include, but are not limited to, analytical theory pertaining to justice, exploitation, and freedom; revolution and social changes; collective choice and action; sexuality and politics; critical theory; Marxist theory; post-structuralism. Content varies. Recommended: POL S 201.

POL S 403 Advanced Special Topics in International Relations (5, max. 10) I&S Examination of contemporary developments in the field of international relations. Content varies according to the nature of developments and research interests of the instructor.

POL S 404 Topics in Public Policy (3-5, max. 6) I&S Examines selected issues of importance in all areas of public policy. Focus on in-depth analysis of vital public policy issues and the integration of economic, political, and administrative perspectives on them. Offered: jointly with PB AF 499.

POL S 405 American Politics Seminar (5, max. 10) I&S Intensive reading and research in selected problems or fields of political analysis.

POL S 406 Marxian Political Economy (5) I&S Explores the relationship between social classes, the state, and political power in advanced capitalist societies. Investigates this relationship primarily by means of the tools of Marxian
politics and, in the process, evaluates these tools. Emphasis on theoretical perspec-
tives, although the reading list has a few
determinantal applications as well. Recommended: POL S 201.

POL S 407 International Conflict (5) I&S
Examines different theoretical explanations for the
causes of war, including the role of
ternational, state, organizational, and individual
actors; additional topics vary with instructor. May
include the development of warfare, deterring
wepons of mass destruction, terrorism,
intelligence, and the ethics of warfare.

POL S 409 Undergraduate Seminar in Political
Economy (5, max. 10) I&S in political
economy with focus on Marxian and public
choice approaches to political economy. Explores
the questions raised by each approach, the
assumption(s) and testability of hypotheses, and
applies these approaches to a number of
problems in political economy. Recommended:
ECON 300; POL S 270. Offered: jointly with
ECON 409.

POL S 410 Technology, Politics, and the State
(5) I&S Relationships between politics,
technological change, and development of
multinational corporations. Considers whether
the relations between political and economic
systems of industrial societies have been
fundamentally altered by the increased
importance and interdependence of government,
exerts, and new technological possibilities for
intervention in social life.

POL S 411 Theories of the State (5) I&S
Topics may include origins and development of the
state; arguments about the necessity, desirability,
and proper role of the state; the nature and
operation of modern states and the international
state system; the legitimacy of modern state
power.

POL S 413 Contemporary Political Theory (5)
I&S Analysis of political theorists, exploring
contemporary theories of humanity and society
that form the basis for differing political ideas.

POL S 414 Politics and Culture (5) I&S
How people interpret and shape the political world
around them through the use of such cultural
resources as language, symbolism, myth, and
ritual. The various uses of these cultural
elements establish the place of the individual in
society, influence the perception of political
events, and create opportunities for individual
and mass political responses.

POL S 415 Women's Rights in an Integrated
Europe (5) I&S Examines the transformation in
women's rights policy within the European
community from the late 1960s through the
present. Focuses on the legal rules and bodies
govern not only these policy domains, but
also their evolution and impacts. Offered: jointly
with LSJ 428.

POL S 416 Economic Theory as Applied to the
Political System (5) I&S Explanation and
evaluation of the political system, using
elementary economics theory. Topics include
alternative voting rules, the political effectiveness
of various types of groups, causes and
consequences of logrolling, and bureaucratic
organizations. Prerequisite: ECON 300. Offered:
jointly with ECON 452.

POL S 419 United States-China Relations (5)
I&S Surveys the history of United States-China
relations and examines the evolution of bilateral
relations, particularly since 1949. Focus on the
period since 1972 and the major issues as they
have evolved since that time, including trade,
human rights, security, and Taiwan. Offered:
jointly with SISEA 459.

POL S 420 Soviet and Russian Foreign Policy
(5) I&S Ideological, historical, and strategic
components of Soviet foreign policy;
Gorbachev’s “new thinking” and the collapse of
the USSR; post-Soviet “Russia”; Russian
military and security policy; Russia and the
West; Russian relations with the Newly-
Independent States.

POL S 421 Relations Among Communist and
Post-Communist States (5) I&S Major disputes
and types of relationships among different
communist states; international effects of the
communist collapse; comparative dynamics of
state-building, market reform, and democratic
transition; international integration and domestic
politics in the former Soviet bloc; ethnic conflict
and the problem of state boundaries; redefining
security in the post-communist milieu.

POL S 422 International Environmental
Politics Seminar (5) I&S Study of the practical
and theoretical challenges associated with global
ecological interdependence. Examination of
international treaties and institutions, state, and
nonstate actors with an emphasis on the
emerging concept of sustainability.

POL S 423 International Law (5) I&S
Origin and present status of efforts to make rules of
conduct for sovereign states; simulation of a
treaty-drafting conference, with students playing
roles of legal advisers to foreign governments.

POL S 425 War and Deterrence (5) I&S
Seminar addresses the strengths and weak-
nesses of deterrence theory and then applies it
to a variety of international security issues.
Topics may include deterrence the use of nuclear,
chemical, and biological weapons, the use of
brute force when deterrence fails, and the role
for humanitarian intervention.

POL S 426 World Politics (5) I&S The
nation-state system and its alternatives, world
distributions of preferences and power, structure
of international authority, historical world
societies and their politics. Offered: jointly with
SIS 426.

POL S 427 International Political Economy (5)
I&S Examines major theoretical problems,
substantive issues, and school of thought in
international political economy (IPE), including
issues of trade, production, and finance.
Preparation for critical analysis of dilemmas
entailed in establishing and maintaining an
instrumentally effective and ethically acceptable
IPE system.

POL S 428 Military Intervention (5) I&S
Historical and theoretical analysis of military
intervention in the post-World War II era.
Considers how and why interventions occur and
evaluates intervention as a foreign-policy
response.

POL S 429 Political Parties in Japan and East
Asia (5) I&S Focus on political parties in Japan.
Combines theoretical readings on political parties
with intensive study of Japanese political parties.
Recommended: either SISEA 242, SISEA 423,
SISEA 440, or SISEA 442. Offered: jointly with
SISEA 436.

POL S 430 Civil-Military Relations in
Democracies (5) I&S Kier Explores issues of
civil-military relations in the United States,
including debates about the garrison state
hypothesis; military advice on the use of force;
the civil-military “gap”; and issues of race,
gender, and sexual orientation in the military.

POL S 431 International Relations in the
Middle East (5) I&S Study of domestic sources
of foreign policy in the Middle East; politics of oil;
the East-West rivalry in the arena; and conflict
and collaboration among the local powers.

POL S 432 Political Islam and Islamic
Fundamentalism (5) I&S Study of resurgence,
since mid-1970s of political Islam and what has
come to be called Islamic fundamentalism,
especially in the Middle East. Topics include
the nature and variety of political Islam today, causes
and implications of the current resurgence, and
comparison with previous resurgences. Offered:
jointly with SIS 406.

POL S 433 International Relations in
Southeast Asia (5) I&S Analysis of the problems
affecting relations among the countries of
Southeast Asia.

POL S 434 International Relations of South
Asia (5) I&S Interrelationships of domestic,
interstate, and extraregional forces and their
effects upon the resolution or expansion of
interstate conflicts in South Asia. Offered: jointly
with SISSA 434.

POL S 435 Japanese Government and Politics
(5) I&S Government and politics of Japan with
emphasis on the period since 1945. Offered:
jointly with SISEA 435.

POL S 436 Ethnic Politics and Nationalism in
Multi-Ethnic Societies (5) I&S Provides a broad
theoretical base, both descriptive and analytical,
for the comparative study of ethnicity and
nationalism. Examples drawn from ethnic
movements in different societies. Some previous
exposure either to introductory courses in
political science or to courses in ethnicity in
other departments is desirable. Offered: jointly with
SIS 436.

POL S 437 Politics in Scandinavia (5) I&S
Twentieth-century politics in Scandinavia. How
Scandinavian countries have been governed.
Costs and consequences of their governmental
style and its uncertain future. Optimal size of
polities, problems of mature welfare states,
process of leadership and representation in
multiparty systems, decline of political parties.
Offered: jointly with SCAND 437.

POL S 438 Politics in France (5) I&S Study of
contemporary France. Structures of government
in the Fifth Republic; nature of French voting
behavior and evolution of the bipolarized political
party system; behavior of political interest
groups; training of France's administrative elite
and functioning of the state bureaucracy;
dynamics of policy-making.

POL S 439 Politics of Divided Korea (5) I&S
Governments, politics, and economy of South
and North Korea, the inter-Korea relations, and
the two Koreas' relationship with the major
powers — especially the United States — with
emphasis on the post-cold war period. Offered:
jointly with SISEA 439.

POL S 440 European Fascism (5) I&S Analysis of
fascism as revolutionary movement and type
of political system in post-World War I Europe: Hitler’s Third Reich, Mussolini’s Italy, and Vichy France. Consideration of dynamics of resistance, policies that produced Holocaust, and questions raised at trials of fascist leaders in Nuremberg and elsewhere.

POL S 441 Government and Politics of Russia (5) I&S Ideological and historical bases of Soviet politics; Leninism; Stalinism; Gorbachev’s perestroika and the collapse of the USSR; the role of Yeltsin in the problems of Russian state-building, market reform, and democratic transition; political parties and civil society; the relationship between the center and the regions; the problem of Russian national identity.

POL S 442 Government and Politics of China (5) I&S Post-1949 government and politics, with emphasis on problems of political change in modern China. Offered: jointly with SISEA 449.

POL S 443 Comparative Political Societies (5) I&S Analyses of modern and premodern types of stable political society; special attention to contemporary representative democracy.

POL S 444 Revolutionary Regimes (5) I&S Analysis of the several types of political regimes concerned with effecting fundamental social change; emphasis on the twentieth century.

POL S 446 Peasants in Politics (5) I&S Interdisciplinary study of peasants, with special attention to questions of rural transformation. Peasant involvement in an increasingly interdependent world. Rebellion and revolution, impact of the international market, agricultural development. Offered: jointly with SIS 444.

POL S 447 Comparative Politics Seminar (5, max. 10) I&S Selected comparative political problems, political institutions, processes, and issues in comparative perspective. Strongly recommended: POL S 204.

POL S 448 Politics of the European Union (5) I&S Examines the origins, structures, and political dynamics of the European Union. Attention given to theories of integration, to relations between the European Union and member states, and to the role of the European Union in world politics.

POL S 449 Politics of Developing Areas (5) I&S Comparative study of problems of national integration and political development in the new states of Asia and Africa.

POL S 451 Communication Technology and Politics (5) I&S Employs some core concepts of political communication and theories of democracy to examine the emerging role of information and communication technologies in candidate and issue campaigning; online voting, protest and advocacy movements; law-making and electronic governance in the United States and internationally. Offered: jointly with COM 407.

POL S 452 Mass Media and Public Opinion (5) I&S Examines the foundations of the idea of public opinion in an interconnected environment and the role of mass communication in the organization, implementation, and control of that opinion. Considers these relationships from the perspectives of societal elites, media, and citizens. Offered: jointly with COM 414.

POL S 453 The State Legislature (5) I&S Study of American state legislatures, with special reference to Washington State Legislature. Student must spend several Fridays in Olympia when the legislature is in session. Those desiring a more extensive involvement with the legislature should enroll in the political internship.

POL S 455 Political Deliberation (5) I&S Exploration of philosophical and empirical writings on political deliberation in small groups, campaigns, and other public settings. Contemporary deliberative theory. Participation in face-to-face discussions on current issues. Recommended: either COM 273 or COM 373. Offered jointly with COM 417.

POL S 457 Topics in Labor Research (5, max. 10) I&S Analysis of the post-World War II decline of national labor movements and strategies employed to reverse this trend. Requires a major research project on organizing, bargaining, or another question in labor studies. Prerequisite: either POL S 249, HIST 249, or SOC 266. Offered: jointly with HIST 457.

POL S 460 Political Economy of the European Union (5) I&S Historical foundation of the European Economic Community; major phases of its development; theoretical explanations for European integration.

POL S 461 Mass Media Law (5) I&S Survey of laws and regulations that affect the print and broadcast media. Includes material on First Amendment, libel, invasion of privacy, freedom of information, copyright, obscenity, advertising and broadcast regulation, and matters relating to press coverage of the judicial system. Offered: jointly with COM 440.

POL S 462 The Supreme Court in American Politics (5) I&S Introductory public law course that examines the interpaly of constitutional law and American politics with particular attention to the role of the Supreme Court in the formulation and implementation of public policy in such matters as criminal-law enforcement, civil rights political expression, and economic regulation.

POL S 463 Political Analysis of United States Social Programs (5) I&S Social problems in the United States and policy responses. National policies concerning poverty, health, welfare, manpower, and the Social Security system. Examination of subgovernment that cluster around each policy area.

POL S 464 The Politics of American Criminal Justice (5) I&S Political forces and value choices associated with the enforcement of criminal law. Distribution of resources among participants in the criminal justice system (e.g., police, attorneys, defendants, and judges). Understanding and evaluation of the interaction of criminal justice processes with the political system.

POL S 465 Law and Public Policy in the United States (5) I&S Relationship between law and public policy, with particular attention to problems of social, economic, and political change. Considers legal and constitutional processes as they relate to such problems of public policy as race relations, the environment, and the economy.

POL S 467 Comparative Law in Society (5) I&S Legal systems around the world as they actually work in their respective political, social, and economic contexts. Emergence and development of European legal systems, legal customs at variance with those of Europe, problems of legal processes in the modern state.

POL S 468 Comparative Media Systems (5) I&S Provides students an understanding of policies that shape national communication processes and systems. Uses comparative analysis to identify both similarities and differences among media structures of nations at different levels of development. Primary emphasis on broadcast media. Offered: jointly with COM 420/SIS 419.

POL S 469 Law, Development, and Transition in East Asia (5) I&S Examines the role of law and the courts in economic and political change in the developing world. Topics include variations in legal traditions and institutions, economic development, property rights, dispute resolution, democratization, and human rights. Empirical materials focus on East Asia. Offered: jointly with LSJ 469/SISEA 469.

POL S 470 Public Bureaucracies in the American Political Order (5) I&S Growth, power, and roles of governmental bureaucracies in America: conflict and conformity with American political thought, other political institutions, and the public.

POL S 473 Decision-Making in Politics (5) I&S Process of decision-making in politics at elite and mass levels, comparison of approaches based on the comprehensive rationality of decision makers with approaches based on limitations on the cognitive capacities of decision makers. Applications to real decision-making situations.

POL S 475 Public Choice (5) I&S Problems and prospects for collective action in a political democracy. Designing rules and institutions for effective central authority and effective constraints on governmental power, social choice theory and game theory. Recommended: POL S 270 or POL S 474.

POL S 476 Strategy in Politics (5) I&S Explores the problem of finding fair methods for making social decisions, and examines alternative methods of social choice. Emphasis on the importance of agenda control for outcomes, and
the implications of theories of social choice for common interpretations of concepts such as democracy and the general will. Recommended: POL S 101 or POL S 202; POL S 481.

POL S 481 Big City Politics (5) I&S Contemporary big city politics, focusing on Seattle and the largest twenty-five cities. Social, economic, and political trends that have shaped characteristics of large American cities. Distribution and use of economic and political power among parties and groups. Future of large cities and politics of change.

POL S 488 Honors Senior Thesis (5-15) I&S Students individually arrange for independent study of selected topics under the direction of a faculty member. Research paper is student's senior thesis. Students meet periodically as a group to discuss research in progress. Recommended: 15 credits POL S 398.

POL S 489 Honors Senior Thesis (5-15) I&S Students individually arrange for independent study of selected topics under the direction of a faculty member. Research paper is student's senior thesis. Students meet periodically as a group to discuss research in progress. Recommended: 15 credits POL S 398.

POL S 490 Foundations of Political Analysis (5) I&S Fundamental issues pertaining to research in political science: "logics of inquiry," problems of concept formation, and development of research methods. Positivist, postempiricist, and other arguments about the nature of scientific knowledge.

POL S 495 Study Abroad-Political Science (3-5, max. 15) I&S For study abroad program. Specific course content determined by assigned faculty member and announced in study abroad bulletin. Politics, political culture, and institutions related to their national setting.

POL S 496 Undergraduate Internship (5, max. 15) Students serving in approved internships.

POL S 497 Political Internship in State Government (5, max. 20) Students serving in approved internship program with state government agencies.

POL S 498 The Washington Center Internship (15) Full-time academic internship with the Washington Center in Washington, DC. Includes internship activities, academic seminar, assemblies, and related activities. Credit/no credit only. Recommended: POL S 202; 45 UW credits.

POL S 499 Individual Conference and Research (2-5, max. 20) Intensive study with faculty supervision. No more than one registration in 499 under same instructor.

POL S 500 Political Research Design and Analysis (5) I&S Major quantitative methods of empirical research in political science. Primary emphasis on research design, data collection, data analysis, and use of computers.

POL S 501 Advanced Political Research Design and Analysis (5) I&S Third methods course in political research. Testing theories with empirical evidence. Examines current topics in research methods and statistical analysis in political science. Content varies according to recent developments in the field and with interests of instructor. Offered: jointly with CS&SS 501.

POL S 502 Qualitative Research Methods (5) I&S Introduction to qualitative methods in political science, emphasizing practical experience with techniques. Readings and exercises cover research design, multiple methods, varieties of qualitative data, measurement and validation, participant observation, interviewing, and content analysis. Research decision-making issues include analytical strategies, presentation of data, ethics, epistemology, and theory-building.

POL S 505 Comparative Politics (5) Core course. Modern theories, approaches, and methods in the study of comparative politics.

POL S 509 Political Theory—Core (5, max. 10) Introduction to central themes in political theory and the works of major political theorists, past and present.

POL S 511 Seminar in Ethical and Political Theory (5) Ethical writings of major political philosophers. Coherent themes arising from these works and assessment of their impact on concepts of politics.

POL S 513 Issues in Feminist Theory (5, max. 10) Contemporary issues in feminist theory as they affect studies of women, politics, and society. Content varies according to recent developments in the field and the research interests of the instructor.

POL S 514 Selected Topics in Political Theory (5, max. 15) Selected topics, historical and conceptual, national, regional, and universal. Prerequisite: permission of instructor.

POL S 515 Political Theory Research Seminar (5) Survey of paradigmatic research approaches in political theory through the exploration of a theme (canoncal text, theoretical concept, and specific topic). Methods covered may include rational choice, psychoanalytic, Straussian, Marxian, and feminist approaches. Students carry out substantive theoretical research. Recommended: second- or third-year graduate standing.

POL S 516 Special Topics in American Political Thought (3-5) Special topics or themes in the development of American political culture.

POL S 517 Marxism and Critical Theory (5) Works of Marx and Engels as well as selected works of twentieth-century Marxist and critical theorists. Themes such as Marx's method, twentieth-century interpretations of Marx, and relationship of twentieth-century theorists to their eighteenth- and nineteenth-century forebears.

POL S 519 Modern Scandinavian Politics (5) Analyzes the political, economic, and historical development of Sweden, Norway, Denmark, Iceland, and Finland from World War II to the present. Readings focus on domestic and foreign policies that distinguish these countries from other advanced industrial societies. Offered: jointly with SCAND 519.

POL S 520 Seminar on Russian Foreign Policy (3) Selected topics in the development and objectives of the foreign policy of the Russian Federation. Prerequisite: permission of instructor.

POL S 521 International Relations I: Theory and Method (5) Part one of the core course in the field of international relations. Reviews contemporary theory, research, and methodology in the study of world politics.

POL S 522 International Political Economy (5) Theories of international political economy. Focuses on the emergence and development of the modern world system, the transition from feudalism to capitalism, and the institution of the nation-state system. Examines the political economy of trade, investment, and the international division of labor from a variety of theoretical perspectives. Prerequisite: POL S 521.

POL S 523 World System Analysis (4) Evolution of the world system. Historical-structural approaches to world politics: neorealism; long cycles; world economy. Prerequisite: POL S 521.

POL S 524 International Security (5) Kier, Mercer Introduces some of the major debates concerning the use of force in international politics. Covers traditional issues in international security such as alliances and the causes of war, as well as some of the new and important questions, such as explaining war outcomes and war termination.

POL S 525 International Law — Policy (5) Inputs of international law into the decisional process in foreign policy. Effect of policy on law. Relevant roles of individuals and institutions in routine and crisis situations. Prerequisite: POL S 423 or permission of instructor.

POL S 527 Special Topics in International Relations Research (5, max. 15) Examination of current topics in the theory and practice of world politics. Content varies according to recent developments in the field and research interests of the instructor.

POL S 528 Advanced International Relations Theory (5) Covers advanced works in international relations theory, e.g., realism, neorealism, game theory, and theories of cooperation and conflict. Includes some classic works. (Thucydides, Hobbes, E. H. Carr) to show continuity of debates in the present. Modern theories of war, conflict, cooperation, and international institutions also explored. Prerequisite: POL S 521.

POL S 529 Problems of American Foreign Policy (3) Critical analysis of the historical foundations and contemporary problems of foreign-policy making, with attention given to selected foreign-policy decisions. Prerequisite: POL S 321 or permission of instructor.

POL S 530 Transatlantic Relations: The United States and Europe in World Politics (5) Fulfills required component of "American Module" of Transatlantic Studies program. Addresses political dynamics of relations between United States and Europe from American republic's founding to post-Cold War era. Limited to students in Transatlantic Studies program.

POL S 532 The Chinese Political System (5) Examination of key approaches, interpretations, and secondary literature in the study of contemporary Chinese politics. Prerequisite: permission of instructor. Offered: jointly with SISEA 532.
POL S 533 Seminar on Contemporary Chinese Politics (5) Research on selected problems in contemporary Chinese politics. Prerequisite: POL S 532 or permission of instructor. Offered: jointly with SISEA 533.

POL S 534 International Affairs (3) Provides a broad understanding of international issues and United States policy. Students explore US foreign policy and theories of major international actors in international trade, security, and strategic concerns, refugee policy, conflict resolution, development assistance, and the environment. Offered: jointly with PB AF 530/SIS 534.

POL S 535 International Relations of Modern China (5) Foreign policy of the People's Republic of China: historical antecedents; domestic and international systemic determinants; and Chinese policies toward major states, regions, and issues. Prerequisite: a course on contemporary Chinese politics or history, or permission of instructor. Offered: jointly with SISEA 535.

POL S 536 Ethnic Politics and Nationality Formation: Theoretical foundations and the theoretical understanding of two interrelated processes: ethnic group persistence and change over time; and the transformation of ethnic groups into politically self-conscious and influential identities. The readings and discussions deal with these two processes in the contexts of both developing societies and advanced industrial societies.

POL S 537 Approaches to East European Politics (3-5) Selected concepts and methodologies useful for the analysis of politics and social structure in the socialist countries of east-central and southeastern Europe. Prerequisite: permission of instructor. Offered: jointly with SISEA 504; alternate years.

POL S 538 Government and Politics in the Middle East and North Africa (5) Political change in the area within the context of comparative politics; breakdown of traditional political systems; new range of choice expressed in competing ideologies; governmental and nongovernmental instrumentation of change and problems of international relations and regional conflict and integration.

POL S 539 International Relations of Northeast Asia (5) Comprehensive survey of contemporary international relations of Northeast Asia with emphasis on Russia, Japan, China, and the United States. Multidisciplinary approach placing contemporary problems in historical context, drawing on modern social science theories. Connections between defense and economics are examined. Prerequisite: permission of instructor. Offered: jointly with SISEA 561.

POL S 540 Problems in South Asian Politics (3) Research problems in contemporary Indian politics.

POL S 541 Institutions and Institutional Change in the Soviet Union, Russia, and the Newly Independent States (5) Critical appraisal of the principal theories and research methods dealing with the development of the Soviet state from 1917-1991 and the formation of the newly-independent states after the Soviet collapse. Prerequisite: permission of instructor.

POL S 542 Seminar: State and Society (5) Examines the mutually conditioning relationship between states and the societies they seek to govern. Studies states as large, complex organizations and their interactions with society on different levels. Shows that interactions on any level affect the nature of the state on other levels as well. Offered: jointly with SIS 542.

POL S 543 Latin American Politics (5) Theories of authoritarianism, corporatism, democratization, and revolution in Latin America. Examines political development, political economy, and political parties and functions. Offered: jointly with SISEA 543.

POL S 544 Problems in Comparative Government (5, max. 15) Selected problems in the comparative analysis of political institutions, organizations, and systems.

POL S 547 Politics of Reform (5) Examines cases of reform in democratic political systems, e.g., Roosevelt's New Deal, Allende's Chilean "revolution," Mitterand's socialist experiment in France, and the Thatcher government in Britain.

POL S 548 Comparative Political Parties (5) Role of political parties in the modern state. Similarities and differences in origins and development of political parties and functions they perform, both in established democracies and in developing countries.

POL S 549 Problems of Political Development (5) Concepts of development and modernization, with particular attention to their political dimensions and their application to various historical and contemporary cases.

POL S 551 Political Communication (5) Surveys classic works and new directions in political communication, including functionalist, structuralist, constructivist, network, and comparative approaches, reflecting a range of methods. Examines political organizing, electoral and legislative processes, civic (dis)engagement, media and politics, public deliberation and opinion formation, political identity and discourse. Offered: jointly with COM 551.

POL S 552 Special Topics in Political Communication (5, max. 10) Examination of current trends in the theory and practice of political communication.

POL S 553 Public Opinion (5) Selected problems in opinion formation, characteristics, and role of public opinion in policy-making process. Prerequisite: POL S 452.

POL S 554 Legislative Politics (5) Selected problems in legislative processes and leadership, state and national.

POL S 555 American Politics Topics (5, max. 10) Examination of current topics in American politics. Prerequisite: POL S 551/COM 551. Offered jointly with COM 555.

POL S 556 American Political Development (5) Price Examination of leading works in, and theories of, American political development. Topics include the development approach itself; critical junctures in U.S. political history; key changes in institutions, the American state, the representation of interests and party politics; and the relevance of development studies to current politics.

POL S 557 United States Party System (5) Examines the institutional and behavioral foundations of party politics in the United States, emphasizing key historical patterns of party system development and the major scholarly approaches to the study of the American parties and party politics.

POL S 558 Political Deliberation (5) VLPA I&S Gastil Exploration of deliberative theories of democracy and research on political discussion in campaigns, face-to-face meetings, on-line forums, and informal conversations. Presents different uses and understandings of deliberation and its role in democratic governance. Recommended: COM 577, POL S 551/COM 551. Offered jointly with COM 555.

POL S 559 Special Topics in Political Methodology (5, max. 10) Examination of current topics on the theory and practice of political methodology. Course content varies according to recent developments in the field and the research interests of the instructor.

POL S 560 Hierarchical Modeling for the Social Sciences (4) Explores models for clustered data and a set of tools to help make accurate inferences. Prerequisite: SOC 424-425/426 or equivalent; recommended: CS & SS 505-506 or equivalent. Offered: jointly with CS & SS 560/STAT 560.

POL S 561 Law and Politics (5) Points and levels at which law and politics intersect. What is distinctive about legal forms; how these legal forms influence, and are influenced by, politics. Conceptions of law, courts and public policy, law and bureaucracy, civil and criminal justice, and the legal profession.

POL S 562 Law, Politics, and Social Control (5) Explores works of social scientists and lawyers regarding these competing conceptions of social control: as the seamy side of law — reinforcing equitable patterns of domination and disciplining deviants; as law embodying society's basic values, articulating minimum rules for harmonious social interaction.

POL S 563 Supreme Court in American Politics (5) Explores the tendency in the United States to turn to the Supreme Court to provide constitutional solutions for some of our biggest social, economic, and political problems. Focuses on the controversies concerning the legitimacy and capacity of the Supreme Court to intervene in American politics and public policy.

POL S 564 Law and the Politics of Social Change (5) Explores the many ways that law figures into the politics of social struggle and reform activity. Analyzes law in terms of particular state institutions (courts, agencies), professional elites (lawyers, judges), and especially cultural norms (“rights” discourses) that are routinely mobilized by reform-movement activists.

POL S 565 Special Topics in Public Law (5, max. 10) Examination of current topics on the theory and practice of public law. Content varies according to recent developments in the field and the research interests of the instructor.
POL S 567 Discourse and the Politics of Resistance (5) Examines how disciplines that emphasize empirical or historical methods study discourse in the politics of resistance. Examines the discursive turn in U.S. and European “new” social movement theory. Ranges across disciplines, such as political sociology, cultural anthropology and human geography, to discover ways in which discourse is conceptualized and studied for its role in seeding social change. Offered: jointly with COM 554.

POL S 566 Comparative Law and Politics (5) Study of the interaction between law and politics, at both the macro and micro levels of politics, and discussion of research drawing from a wide array of geographical settings. Examination in comparative context of whether macro-structures are autonomous from underlying social structures of power and interest in the micro-level.

POL S 570 The American Racial State (5) Explores the mutually constitutive relationship between race and American political institutions, beginning both theories of race and racial constructions, race-making and nation-making, racial triangulation, and intersectionality. Examines various institutions and public policies as manifestations of the American racial state, focusing on the geographical settings of identifying race, racism, and racialization.

POL S 571 American National Institutions (5) Answers the question, “Do institutions matter?” Surveys American national institutions from theoretical perspectives, focusing on how they affect the manner in which decisions are made. Employs cross-institutional perspective of American institutions.

POL S 572 Administrative and Executive Leadership (3) Nature of executive life in the public sector, the function of leadership in implementing, making, and changing policy. Leadership styles, the relation of leadership to its constituencies and communities.

POL S 573 Topics in Public Policy (5, max. 10) Specialized research topics with a policy process or related theoretical content.

POL S 574 Environmental Regulation Policy (5) Scholarly and practical aspects of environmental regulation. Examines literature concerning regulation policy design, policy instruments, and analytical Marxism. Evolution and transformation of property rights over land, labor, and capital and the consequences of the property rights structure for political and economic institutions.

POL S 575 Public Policy Processes (5) Covers political science research about policy processes. Research seminar addressing frameworks and perspectives concerning policy processes as they concern issue emergence, agenda dynamics, policy subsystems, policy learning, and implementation.

POL S 576 Political Culture (5) Values, beliefs, and rituals that guide political action in society. Some approaches emphasize symbolic sphere of value and belief over material conditions of power and economic production. Other approaches emphasize material relations. Reconciles symbolic and materialist approaches that explain intervention of the modern state in cultural processes.

POL S 577 The Politics of Social Movements (5) Theoretical inquiry directed to questions of collective action and political tactics by social movement groups. Case studies include labor, civil rights, women’s, environmental, and other movements in twentieth-century United States.

POL S 578 Health Politics and Policy (5) Introduces central themes of health-policy research: health is not health care and politics has much to do with why our health-care system works as it does. Investigates how social science helps us understand health issues.

POL S 582 Institutional Analysis (5) Social change and property rights theory. Exploration of long-term secular change through works whose approaches derive from neoclassical economics and analytical Marxism. Evolution and transformation of property rights over land, labor, and capital and the consequences of the property rights structure for political and economic institutions.

POL S 583 Economic Theories of Politics (5) Problems of public goods provision and collective action. Collective action theories and applications as well as critical review of the concept of rationality.

POL S 584 Comparative Political Economy (5) Overview of current developments in comparative political economic policies. Topics may include globalization, the welfare state, partisan models of economic policymaking, economic development, and trade.

POL S 587 Politics of Urban Reform (5) Interpretations of urban reformers at turn of this century and during 1960s and 1970s. Historical and political science literature on the subject. Prerequisite: graduate student standing and permission of instructor.

POL S 588 Special Topics in Comparative Political Economy (5, max. 10) Examination of current topics in the theory and practice of comparative political economy. Content varies according to recent developments in the field and research interests of the instructor.

POL S 589 Special Topics in Political Economy (3-5, max. 10) Evaluating research in political economy as well as developing research problems. Topics vary with instructor and current problems in the literature. Prerequisite: POL S 406, POL S 416, ECON 400, and permission of instructor.

POL S 590 Seminar in Political Behavior (5, max. 10) Analysis of behavioral research in selected fields of political science.

POL S 593 Theories of Decision Making (5) Explanation of political decisions using models of such theoretical processes as preference formation, learning, heuristics, noncooperative games, collective action, agenda manipulation, and coalition formation. Examination of competing notions of political rationality and irrationality and criteria for their evaluation. Strategies for design of decision research. Prerequisite: POL S 491 or permission of instructor.

POL S 594 Political Communication Research Practicum: Community, Communication, and Civic Engagement (5) Overview of the research process, including literature review, hypothesis generation, data gathering, empirical analysis, and writing for publication. Topics vary with instructor, but generally address questions of how communication affects democracy and citizen engagement in national or international contexts. Offered: jointly with COM 556.

POL S 595 College Teaching of Political Science (1).

POL S 597 Directed Readings (1-10, max. 10) Intensive reading in the literatures of political science, directed by the chair of the doctoral supervisory committee. Credit/no credit only.

POL S 598 Independent Writing I (1-5, max. 5) Supervised research and writing for graduate students completing the MA essay of distinction.

POL S 599 Independent Writing II (3-5) Supervised research and writing for graduate students completing the Ph.C. essay of distinction.

POL S 600 Independent Study or Research (*)

POL S 800 Doctoral Dissertation (*).

Law, Societies, and Justice

LSJ 299 Special Topics in Law, Societies, and Justice (2-5, max. 10) I&S Examine a different subject or problem of current interest within the discipline.

LSJ 301 Internship (1-5, max. 5) Participation in an approved internship. Credit/no credit only.

LSJ 310 Research in Law, Societies, and Justice (1-5, max. 15) I&S Supervised introductory individual and/or seminar based research on some aspect of society and justice.

LSJ 321 Human Rights Law in Culture and Practice (5) I&S Introduces the complexities of issues surrounding human rights. Examines human rights concerns through critical analyses, taking into account legal, social, economic, and historical variables. Offered: jointly with ANTH 323.

LSJ 327 Women’s Rights as Human Rights (5) I&S Women’s rights in comparative perspective, focusing on varying settings that alter the meaning and practical application. Domestic level: areas including abortion politics to trafficking in women. International level: areas including equality claims before European supranational judicial bodies, rape as war crime in international law. Offered: jointly with POL S 327.

LSJ 330 Beyond Civil Rights: Law, Culture, and Change (5) I&S Assessment of the contemporary politics of civil rights as shaped by an identity politics that is both significant and passe. Recommended: LSJ 363 or one course in either AES or WOMEN. Offered: jointly with AES 330.

LSJ 331 The Politics of Race and Ethnicity in the United States (5) I&S Introduction to the history and development of racial hierarchy, focusing on how race and ethnicity shape political institutions (e.g., the Constitution, political parties, voting systems). Examination of political relationships between Whites, African Americans, Latinos, and Asian Americans.

LSJ 332 Disability and Society: Introduction to Disability Studies (5) I&S Introduction to the field of disability studies. Focuses on theoretical questions of how society predominantly understands disability and the social justice consequences. Examines biological, social, cultural, political, and economic determinants in social creation/construction (framing) of disability and effects on those claiming and/or labeled as disabled. Offered: jointly with CHID 332.

LSJ 355 Introduction to the American Court System (5) I&S Philosophical and structural bases of the American court system; roles of attorneys, judges and the public in that system. Some focus also on current challenges to the courts posed by court congestion and alternative dispute resolution, and on future prospects for the courts.

LSJ 360 Introduction to United States Constitutional Law (5) I&S Growth and development of the United States Constitution as reflected in decisions of the Supreme Court; political, social, and economic effects. Offered: jointly with POL S 360.

LSJ 361 United States Courts and Civil Liberty (5) I&S Cases and literature bearing on protection of constitutionally guaranteed private rights, with particular reference to the period since 1857. Offered: jointly with POL S 361.

LSJ 362 Law and Justice: An Introduction to Social Theory (5) I&S Godoy Provides conceptual framework for understanding law and its role in society by acquainting students with major currents of social theory. Topics include liberalism, Marxism, critical feminist theory, and critical race theory. Offered: jointly with SIS 362.

LSJ 363 Law in Society (5) I&S Inquiry into how law matters in social practice. Examines general theories of law, the workings of legal institutions, and the character of legally constituted practices and relations in diverse terrains of social life. Offered: jointly with POL S 363.

LSJ 367 Comparative Law and Courts (5) I&S Introduction to comparative judicial politics, focusing on the relationship between law and politics in cross-national perspective, as well as on the functioning of supranational and international legal entities in the international system. Offered: jointly with POL S 367.

LSJ 375 Crime, Politics, and Justice (5) I&S Reviews the major components — police, courts, and corrections — of the U.S. criminal justice system; investigates critical factors that shape criminal procedure; considers the relationship between criminal procedure and wider concerns of justice.

LSJ 376 Drugs and Society (5) I&S Beckett Explores the questions of drug use and abuse, social and political factors that shape response to their use, and the social conditions under which drug use is likely to have adverse consequences. Also covers U.S. drug control policy, the political economy of legal and illegal drugs, and political aspects of drug use. Offered: jointly with SOC 376.

LSJ 377 Punishment: Theory and Practice (5) I&S Lovell Examines the philosophical reasoning that underlies punishment practices such as sentencing, imprisonment, or capital punishment. Considers policy issues in these areas in light of theories about morality and the human nature. Helps students learn how to analyze punishment policies from ethical and philosophical perspectives.

LSJ 378 Policing the City (5) I&S Herbert Investigates how and why formal and informal order is established in urban areas, how this order produces advantages and disadvantages, and possibilities of alternative visions of order. Topics include formal means of control (zoning, laws, policing, building codes) and informal means of control (gossip, ostracism, peer pressure, local politics). Offered: jointly with GEOG 378; A.

LSJ 379 Prisons in Anthropological Perspectives (5) I&S Rhodes An introduction to prisons from an anthropological point of view, with focus on prisons as total institutions. Topics include the experiences of prisoners and staff, prison history, issues of race and gender associated with incarceration, and the imprisonment of the mentally ill. Offered: jointly with ANTH 379.

LSJ 380 Contemporary Issues in Law, Societies, and Justice (5, max. 10) I&S Theoretical, empirical, and comparative aspects of such topics as human rights, socio-legal concepts, justice, and legal policy. Recommended: POL S 101, POL S 202, POL S 204, or SOC 110.

LSJ 400 Senior Seminar (5, max. 10) For students in their final year as Law, Societies, and Justice majors. Incorporates material learned in student's primary field of specialization. Includes independent research, oral presentations, and the completion of a substantial paper.

LSJ 401 Field Experience in Law, Societies, and Justice (5) Participant observation in a public or private agency relevant to the study of law, justice, human rights, or court systems.

LSJ 410 Human Rights in Latin America (5) I&S Human rights in Latin America, focusing on twentieth century dictatorships and current regional events and their implications for human rights. Cannot be taken for credit if GIS 174 or SISLA 120 previously taken. Offered: jointly with SIS 470. Prerequisites: either ANTH 323, LSJ 320, LSJ 321, POL S 368, PHIL 338, SIS 200, or SIS 201.

LSJ 420 The Politics of Rights (5) M. McCann Examines rights in practical and social interaction, rights as social conventions, relations of rights practices to official state policies, disputing practices, interest formation, and identify construction at individual and group levels. Explores how rights practices figure into the constellation of contested power relations within modern societies.

LSJ 428 Women's Rights in an Integrated Europe (5) I&S Examines the transformation in women's rights policy within the European community from the late 1950s through the present. Focuses on the legal rules and bodies that govern not only these policy domains, but also their evolution and impacts. Offered: jointly with POL S 415.

LSJ 433 Disability Law, Policy, and the Community (5) Seminar addressing legal rights of disabled people, history of disability policy in the United States, and the role of community activism and other forces in policy development and systems change. Introduction to the existing social service systems that affect disabled people. Recommended: LSJ 332. Offered: jointly with CHID 433.

LSJ 434 Civil and Human Rights Law for Disabled People (5) I&S Designed for students interested in expanding their knowledge of civil and human rights for disabled people. Examines the American perspective (ADA) as well as various international models including the United Nations' International Human Rights treaties as they relate to disabled people. Recommended: LSJ 332. Offered: jointly with CHID 434; A.

LSJ 440 Criminal Law and Procedure (5) I&S Substantive and procedural criminal law for lay persons; analysis of the philosophy behind the law, with an emphasis on due process in adult and juvenile courts; case-analysis teaching technique.

LSJ 444 Ethics in Law and Justice (5) I&S Applies ethical theories, research, and practice to the law and justice system, with the goals of: (1) analyzing the moral dimensions of criminal law, (2) studying ethical issues in law enforcement, adjudications, and corrections, and (3) examining a variety of controversial ethical issues associated with the justice system.

LSJ 469 Law, Development, and Transition in East Asia (5) I&S Examines the role of law and the courts in economic and political change in the developing world. Topics include variations in legal traditions and institutions, economic development, property rights, dispute resolution, democratization, and human rights. Empirical materials focus on East Asia. Offered: jointly with POL S 469/SISEA 469.

LSJ 470 Evaluation Research in Criminal Justice (5) I&S Social science research methods relevant to criminal justice evaluation and operations research. Ethical considerations, formulation of goals and objectives, problem definition and research design, sources and methods of data collection, descriptive statistics, data interpretation, and utilities of research results.
Law and Society Studies, including the historical introduction to, the interdisciplinary field of Justice (1-5, max. 10)

**LSJ 474 Geography and the Law (5) I&S Herbert** Examines the relationship between geography, law, and socio-legal analysis; reviews significant instances where law and geography intersect, such as the regulation of public space, the regulation of borders and mobility, and disputes over property and land use. Offered: jointly with GEOG 474.

**LSJ 476 Miscarriages of Justice (5) I&S** Examines legal and social factors that shape criminal case outcomes, analyzing how one type of miscarriage of justice — wrongful conviction — occurs. How can cases of wrongful conviction be explained? Why are some people, against whom there is only weak evidence, convicted—and sometimes even executed? Offered: jointly with SOC 476.

**LSJ 480 The Police (5) I&S** Conceptual and empirical issues concerning multifaceted and changing roles of the American police.

**LSJ 485 Introduction to Organized and White Collar Crime (3) I&S** Overview of organized and white collar crime. Exposure to definitional problems, distinctive characteristics, potential areas of overlap, and barriers to more effective social control. Addresses impediments resulting from inadequate conceptualizations, legal and operational difficulties in pursuing offenders, and effects of corruption and discretion in the justice system.

**LSJ 488 Honors Thesis (5-10) I&S** First of a two-course hyphenated sequence. To be completed with LSJ 489.

**LSJ 489 Honors Thesis (1-5, max. 5) I&S** Thesis research honors option. Second of a two-course hyphenated sequence. To be completed with LSJ 488. Offered: A.

**LSJ 490 Special Topics in Law, Societies, and Justice (1-5, max. 15) I&S** Examination of socio-legal topics. Content varies.

**LSJ 495 Study Abroad-Law, Societies, and Justice (3-5, max. 15) I&S** Comparative studies abroad of legal institutions, rights, and justice as related to national settings. Specific course content determined by faculty member.

**LSJ 499 Readings in Law, Societies, and Justice (1-5, max. 10)** Individual readings in law, societies, and justice.

**LSJ 501 Law and Society Studies (5) Beckett, Herbert, McCann** Provides a broad overview of, and introduction to, the interdisciplinary field of Law and Society Studies, including the historical development of law and society studies and an overview of its main concerns and questions.

**Psychology**

**PSYCH 101 Introduction to Psychology (5) I&S** McDermott, Osterhout, Passer Surveys major areas of psychological science. Core topics include human social behavior, personality, psychological research methodology, treatment, learning, memory, human development, biological influences, and research methods. Related topics may include sensation, perception, states of consciousness, thinking, intelligence, language, memory, stress and health, cross-cultural psychology, and applied psychology. Offered: A/WS/S.

**PSYCH 200 Comparative Animal Behavior (5) NW Barash, Beecher, Brenowitz, O'Donnell** Research methods and findings of comparative animal behavior, their importance to an understanding of human behavior; rationale for study of behavioral differences/similarities between animal species, behavior viewed as part of adaptation of each species to its natural habitat. Not open for credit to students who have taken PSYCH 300.

**PSYCH 201 Human Performance Enhancement (4) I&S** Smith, Small Applications of psychological theories, research, and intervention strategies to enhancement of performance in a variety of life settings. Self-regulation models and techniques; stress and emotional control; attention control and concentration; mental rehearsal; time management; goal-setting; memory enhancement; communication and interpersonal conflict resolution. Participation in various psychological training procedures. Prerequisite: PSYCH 101.

**PSYCH 202 Biopsychology (5) NW Bernstein, Diaz, Mizumori, Olavarria** Examines the biological basis of behavior, the nervous system, how it works to control behavior and sense the world, and what happens when it malfunctions. Topics include learning and memory, development, sex, drugs, sleep, the senses, emotions, and mental disorders. Prerequisite: PSYCH 101. Offered: A/WS/S.

**PSYCH 203 Introduction to Personality and Individual Differences (4) I&S Cauce, Lengua, Linen, Marlatt, Smith** Overview of the major theories, research findings, and applications in the scientific study of personality. Covers research methods and approaches to measuring personality variables. Not open for credit to students who have taken PSYCH 303. Prerequisite: PSYCH 101.

**PSYCH 206 Human Development (5) I&S** Theoretical perspectives and research methods in child development with an overview of historical and current works. Includes prenatal and biological development, the development of cognitive, linguistic, and social and emotional abilities. Not open for credit to students who have taken PSYCH 306. Prerequisite: PSYCH 101.

**PSYCH 207 Psychology of Peace (5) I&S** Barash Examination of the psychological aspects of peace in the modern world. Topics include theories of individual aggressiveness and violence, leadership personalities, crisis decision making, nuclear psychology, images of the enemy, and psychological opportunities and obstacles to the establishment of a peaceful society.

**PSYCH 209 Fundamentals of Psychological Research (5) Buck, Kerr, Little, Passer** Psychological research methodologies and techniques. Topics include the logic of hypothesis testing, experimental design, research strategies and techniques, fundamentals of scientific writing, search and evaluation of research literature in psychology, and ethical issues in psychological research. Required for all psychology majors. Prerequisite: 2.0 in PSYCH 101. Offered: A/WS/S.

**PSYCH 210 Human Sexuality (5) I&S** McDermott Broad survey of biological, psychological, and social determinants of human sexuality and sexual behavior. Topics include cultural diversity, sexual development (physical and psychological), sexual health, reproduction (pregnancy, contraception, abortion), development of sex, gender and orientation, adult sexual bonding, sexual abuse and assault.

**PSYCH 245 Introduction to Social Psychology (5) I&S Brown, Short** Overview of major findings of social psychology, emphasizing the relevance for understanding the social behaviors of individuals and groups of individuals and their relationship to social context. Not open for credit to students who have taken PSYCH 345. Prerequisite: PSYCH 101.

**PSYCH 250 Racism and Minority Groups (5) I&S** Barrett Overview of psychological theories, research findings, and consequences of racism and its effects upon minority groups and society. Emphasis on historical, cultural, and socioeconomic structures that contribute to racism. Examination of current issues in race relations, cultural pluralism in U. S. and selected international topics.

**PSYCH 257 Psychology of Gender (5) I&S** Kenney Major psychological theories of gender-role development; biological and environmental influences that determine and maintain gender differences in behavior; roles in children and adults; topics include aggression, cognitive abilities, achievement motivation, affiliation. Recommended: either PSYCH 101 or WOMEN 200. Offered: jointly with WOMEN 257.

**PSYCH 260 Psychosocial Aspects of Nuclear War (3) I&S** Barash Introduction to basic issues of nuclear war, including its effects, weaponry, and history of the arms race. Primary focus on the psychologic underpinnings of deterrence, relations between nations, and the personal and social forces operative in the arms race and peace movements.

**PSYCH 300 Animal Behavior (5) NW Barash, Beecher, Ha, O’Donnell, Sianeros** Introduces important concepts and empirical findings in animal behavior. Emphasizes evolutionary and mechanistic approaches to understanding diversity and complexity of behavior. Topics include communication, mating, migration, and sociality. Prerequisite: either BIOL 101, BIOL 118, BIOL 161, BIOL 180, or BIOL 203.

**PSYCH 303 Personality (5) I&S** Lengua, Smith Overview of major perspectives, scientific issues, applications, and research findings in the area of personality. Direct exposure to scientific literature, writing assignments, and research-based class experiences prepare students for advanced work in personality, social, abnormal, and developmental psychology. Prerequisite: PSYCH 101; either PSYCH 202 or PSYCH 222; PSYCH 205; either PSYCH 213, PSYCH 217, PSYCH 315, or PSYCH 317.

**PSYCH 305 Abnormal Psychology (5) I&S** Beauchaine, George, Kohlenberg, Lengua, Simoni, Smith, Zelinger An overview of major categories of psychopathology, including description and classification, theoretical models, and recent research on etiology and treatment.
Prerequisite: 2.0 in PSYCH 202; 2.0 in PSYCH 209.

PSYCH 306 Developmental Psychology (5)
I&S Barrett, Carlson, Melzoff, Repacholi, Sommerville Overview of past and present theoretical and research-based approaches to biological, cognitive, and social development from the prenatal period to early adolescence. Prerequisite: 2.0 in PSYCH 202; 2.0 in PSYCH 209.

PSYCH 315 Understanding Statistics in Psychology (5) GSR Ha, Little Statistics for psychological research. Elementary probability theory, hypothesis testing, and estimation. Satisfies the statistics requirement for majors registered in the Psychology Bachelor of Arts degree program. Prerequisite: 2.0 in PSYCH 209; 2.0 in either MATH 111, MATH 112, MATH 120, MATH 124, or MATH 144. Offered: AWSpS.

PSYCH 317 Introduction to Probability and Statistics for Psychology (5) GSR Little, G. Loftus Probability theory as a model for scientific inference. Probabilistic variables and experimental outcomes, conditional probability, binomial and related distributions, experiments as samples, statistics and sampling distributions, the normal distribution, confidence intervals, problems of estimation from experiments. Prerequisite: 2.5 in PSYCH 209; 2.0 in either MATH 124, MATH 127, MATH 134, MATH 144, or MATH 112. Offered: AW.

PSYCH 322 Introduction to Drugs and Behavior (3) NW Diaz Basic concepts of drug action emphasizing the behavioral consequences of the intake of a variety of drugs. Prerequisite: either PSYCH 202 or PSYCH 222.

PSYCH 330 Laboratory in Animal Behavior (5) NW Brenowitz, Ha Experience with a variety of animal species and experimental procedures and instrumentation. Prerequisite: either 2.0 in PSYCH 213, 2.0 in PSYCH 217, 2.0 PSYCH 315, or 2.0 in PSYCH 317, 2.0 in PSYCH 209.

PSYCH 331 Laboratory in Human Performance (5) I&S Joaslyn Selected aspects of human cognition, perception, and performance. Prerequisite: 2.0 in PSYCH 203; either 2.0 in PSYCH 213, 2.0 in PSYCH 217, 2.0 in PSYCH 315, or 2.0 in PSYCH 317.

PSYCH 332 Laboratory in Animal Learning (5) NW Buck Selected aspects of animal learning emphasizing behavioral experiments with the rat. Prerequisite: either 2.0 in PSYCH 213, 2.0 in PSYCH 217, 2.0 in PSYCH 315, or 2.0 in PSYCH 317.

PSYCH 333 Sensory and Perceptual Processes (5) NW Beauchaine, Buck, Covey An overview of the major senses with emphasis on the structure and function of sensory systems and the relation of the underlying biology to perceptual processes and behavior. Prerequisite: 2.0 in PSYCH 202; 2.0 in PSYCH 209.

PSYCH 335 Human Factors Psychology (4) I&S Kerr Consideration of human performance factors in the design of equipment, tasks/jobs, and work and living environments. Focuses on the importance of human perception, memory, attention, and motor control for understanding ways to optimize the relationship between man and his environment. Prerequisite: 2.0 in PSYCH 202 or PSYCH 209.

PSYCH 345 Social Psychology (5) I&S J.D. Brown, Shoda The scientific study of how people’s thoughts, feelings, and action influence, and are influenced by, other people. Prerequisite: 2.0 in either PSYCH 202 or PSYCH 209.

PSYCH 347 Psychology of Language I (5) I&S VLPA Corina, Osterhout Introduction to the study of language, including language structure, speech perception, language acquisition, psychological processes underlying comprehension and production of language, the relation between brain and language, and the question of the species-specificity of human language. Prerequisite: either 2.0 in PSYCH 209, 2.0 in LING 200, or LING 201. Offered: jointly with LING 347.

PSYCH 350 Honors Research Seminar in Psychology (2-4) Bassok Presentations by professors and advanced students concerning the rationale, methodology, and progress of their research projects; assistance with research projects; preparation of junior paper. Four credits of 350 required for all junior honors and distinction candidates in conjunction with 498 and 499. Offered: AWSp.

PSYCH 355 Cognitive Psychology (5) I&S Current theory and research in perception, attention, memory and learning, attitudes, thinking and decision making, and language. For the student who wishes a survey or who intends additional work in any of the above content areas. Prerequisite: 2.0 in PSYCH 202; 2.0 in PSYCH 209.

PSYCH 357 Psychobiology of Women (5) NW Kenney Physiological and psychological aspects of women’s lives; determinants of biological sex; physiological and psychological events of puberty, menopause; sexuality; contraception, pregnancy, childbirth, and lactation; role of culture in determining psychological response to physiological events. Recommended: PSYCH/ WOMEN 257. Offered: jointly with WOMEN 357.

PSYCH 361 Laboratory in Social Psychology (5) I&S Greenwald Methodology of laboratory and field research on social behavior; data analysis and report writing; group research projects. Prerequisite: 2.0 in PSYCH 209; 2.0 in either PSYCH 213, PSYCH 217, PSYCH 315, or 2.0 in PSYCH 317, 2.0 in PSYCH 209.

PSYCH 380 Cross-Cultural Competence (4) I&S Facilitates development of multicultural competence; focuses on mental health/social service needs of ethnic and linguistic minorities, and developing personal/interpersonal skills to reduce barriers, enhance effective service provision to cross cultural groups, sexual minorities and disabled people. Prerequisite: PSYCH 250; either PSYCH 305 or PSYCH 306.

PSYCH 399 Foreign Study (3-5, max. 10) Upper division psychology courses for which there are no direct University of Washington equivalents taken through the University of Washington Foreign Study Program.

PSYCH 400 Learning (5) I&S experimental research and basic theories in animal learning. Prerequisite: 2.0 in PSYCH 202.

PSYCH 402 Infant Behavior and Development (3) I&S Melzoff Psychological development in the first two years of life. Basic and advanced techniques for assessing psychological development in infancy. Classical theories of human infancy and examination of a wide range of new experiments about infant behavior and development. Prerequisite: 2.0 in either PSYCH 206, PSYCH 306 or PSYCH 414.

PSYCH 403 Motivation (5) I&S Theory and research on reinforcement, punishment, frustration, preference, instinctual mechanisms, and other factors controlling animal behavior. Prerequisite: 2.0 in PSYCH 202.

PSYCH 404 Psychobiology of Motivation (5) I&S NW Physiological mechanisms underlying the sensory appetite, hunger, reproduction, drug addiction, and fear. Evolutionary and learning processes that influence motivation. Prerequisite: 2.0 in PSYCH 202.

PSYCH 406 Insect Behavior (4) NW O’Donnell Explores complexity and diversity of behavior in insects and related invertebrates animals. Overview of important lineages of insects and major behavioral traits. Examines how insect biology both constrains behavior and provides evolutionary opportunities. Prerequisite: either 2.0 in BIOL 180, 3.5 in PSYCH 200, or 2.0 in PSYCH 300. Offered: jointly with BIOL 406.

PSYCH 407 History of Psychology (5) I&S Historical and theoretical background of the basic assumptions of modern psychology, including such doctrines as behaviorism, determinism, and associationism and the scientists who developed them. Prerequisite: 2.0 in PSYCH 209.

PSYCH 408 Mechanisms of Animal Behavior (4) NW Beecher, Bronewitz Comparative exploration of physiological and perceptual mechanisms that control behaviors necessary for survival and reproduction in animals. Model systems discussed include animal communication, mate choice, escape behavior, learning and memory, orientation, biological rhythms, foraging behavior. Prerequisite: either 2.0 in BIOL 180, or 3.5 in PSYCH 200, or 2.0 in PSYCH 300. Offered: jointly with BIOL 408.

PSYCH 409 Sociobiology (5) NW Rohwer Biological bases of social behavior, emphasizing evolution as a paradigm. Emphasizes how to think like evolutionary biologist, especially with regard to interest conflict. Topics are individual versus group selection, kin selection, altruism, mating systems, sexual conflict, alternate reproductive strategies, and parent/offspring conflict. Prerequisite: either 3.5 in PSYCH 200, 2.0 in PSYCH 300, 2.0 in BIOL 162, or 2.0 in BIOL 180. Offered: jointly with BIOL 409.

PSYCH 410 Child and Adolescent Behavior Disorders (5) I&S Barrett, Beauchaine, Katz, McMahon Introduction to psychopathology in children and adolescents, and an overview of principal modes of intervention. Particularly for students interested in advanced work in clinical psychology, social work, or special education. Prerequisite: 2.0 in PSYCH 305: either 2.0 in PSYCH 306 or 2.0 in PSYCH 202, 2.0 in PSYCH 206 and 2.0 in PSYCH 209.
PSYCH 411 Perceptual Development (5) I&S/NW Metzoff Origins and development of perception in human infancy. Object, face, and speech perception; cross-modal relations between touch, vision, audition. Prerequisite: 2.0 in either PSYCH 206, PSYCH 306, or PSYCH 414. Offered: jointly with SPHSC 411.

PSYCH 413 Adolescent Development (5) I&S Provides an overview of physical, cognitive, psychosocial, and emotional development of adolescents. An emphasis on understanding the context in which young people grow up. Explores cultural, environmental, and social influences on development. Prerequisite: 2.0 in PSYCH 209; 2.0 in either PSYCH 315 or PSYCH 317.

PSYCH 414 Cognitive Development (5) I&S Sommerville Key theoretical and research approaches to cognitive development from infancy through adolescence. Sensorimotor development, language development, imitation, number concepts, logical reasoning, memory, cognition in adolescents, intelligence, and the role of the brain in the environment, and experience. Prerequisite: either 2.0 in PSYCH 306, or 2.0 in both PSYCH 206 and PSYCH 209.

PSYCH 415 Personality Development of the Child (5) I&S Carlson, Repacholi Socialization theory and research, infant attachment and social relationships, development of aggressive and altruistic behaviors, sex-role development, moral development, parent and adult influences. Applied issues in social development and policy. Prerequisite: 2.0 in either PSYCH 206 or PSYCH 306; 2.0 in either PSYCH 315 or PSYCH 317.

PSYCH 416 Animal Communication (5) NW Beecher, Brenowitz, O'Donnell, Sieneners Evolution and mechanisms of animal communication and related processes of perception, thinking, and social behavior. Prerequisite: either 2.0 in BIOL 180, 3.5 in PSYCH 200, or 2.0 in PSYCH 300.

PSYCH 417 Human Behavior as a Natural Science (5) I&S/NW Lockard Evolution of human social behavior and the adaptive significance of communication systems from a sociobiological and anthropological perspective. Prerequisite: either PSYCH 200, PSYCH 300, BIO A 201, or BIOL 180.

PSYCH 418 Primate Social Behavior (5) NW Lockard Social behavior, ecology, and group structure of monkeys and apes from an evolutionary, sociobiological, and anthropological perspective. Prerequisite: either 3.5 in PSYCH 200, 2.0 in PSYCH 300, 2.0 in BIO A 201, 2.0 in BIOL 180, or 2.0 in both BIOL 202 and BIOL 203.

PSYCH 419 Behavioral Studies of Zoo Animals (5, max. 10) NW Lockard Observational studies of behavior of zoo animals to expand basic knowledge of animal behavior, conservation of endangered species, and research methodology with discussions and tours focusing on zoo philosophy and operations. Offered in cooperation with Woodland Park Zoo. Prerequisite: either 2.0 in BIOL 180, 3.5 in PSYCH 200, or 2.0 in PSYCH 300.

PSYCH 420 Drugs and Behavior (3) NW Diaz Animal and clinical research on the behavioral consequences of drug intake. Prerequisite: PSYCH 322.

PSYCH 421 Neural Basis of Behavior (5) NW Diaz Anatomical and physiological principles and resultant behavior involved in the integrative action of the nervous system. 431 recommended but not required to follow 421. Prerequisite: 2.0 in PSYCH 202.

PSYCH 423 Sensory Basis of Behavior (5) NW Olavarria Study of sensory mechanisms as a way to understand behavior. Basic properties of neurons, anatomy, and physiology of sensory systems, with some emphasis on the visual system. Prerequisite: 2.0 in either PSYCH 202 or PSYCH 333.

PSYCH 424 Vision and Its Physiological Basis (5) NW Teller Behavioral neurobiology of human vision: color vision, acuity and spatial vision, light and dark adaptation, visual development. Correlation of visual functioning with known optical, biochemical, physiological, and anatomical substrates. Prerequisite: 2.0 in either PSYCH 333, NBIQ 302, or PHIL 160. Offered: jointly with PBIO 424.

PSYCH 425 Surgical and Histological Techniques (5) NW Pratcicum in basic and advanced surgical techniques used in psychophysiological experimentation. Prerequisite: PSYCH 421.

PSYCH 426 Neurobiology of Learning and Memory (4) NW Diaz Theory and research on how animals learn and remember, including basic concepts of brain plasticity, how brain areas and neurons adapt to changes in experiences throughout the lifespan, and cellular and structural substrates of a “memory trace.” Prerequisite: 2.0 in either PSYCH 222, PSYCH 322, PSYCH 333, PSYCH 421, PSYCH 422, or PSYCH 423.

PSYCH 427 Behavioral Endocrinology (5) NW Lattmann The endocrine system and how its secrets influence and are influenced by behavior; relationships between the nervous and endocrine systems. Prerequisite: PSYCH 421.

PSYCH 429 Brain Anatomy for the Behavioral Scientists (1) NW Diaz Detailed review of the neuroanatomical features of the sheep brain with laboratory demonstrations. Prerequisite: PSYCH 421 which may be taken concurrently.

PSYCH 430 Development of Brain Connections (4) NW Olavarria Analysis of innate and environmental factors that play a role in the development of brain connections. Critical review of current literature on the various strategies used by neurons to find their appropriate targets. Prerequisite: 2.0 in either PSYCH 202, PSYCH 333, PSYCH 421, PSYCH 422, or PSYCH 423.

PSYCH 432 Visual Perception (4) I&S/NW Rudd Surveys current facts/theories about how our brains interpret the images formed by our eyes to create a presentation of the visual environment. Topics include 3-D vision; color, form, motion, and object perception, and visual illusions. Prerequisite: 2.0 in either PSYCH 202, PSYCH 333, or PSYCH 355.

PSYCH 433 Regulatory Behavior (4) NW Kenney Neural and endocrine mechanisms in the control of food and water intake and the regulation of body weight and fluid balance. Prerequisite: either PSYCH 421 or PSYCH 427.

PSYCH 435 Human Color Vision (5) I&S/NW Buck Discusses how color does not exist in the physical environment but is instead a creation of our brains. Explores perceptual, physiological, developmental, evolutionary, genetic, and cultural aspects of human color vision, including its role in language, culture, and art. Prerequisite: PSYCH 202; PSYCH 209.

PSYCH 436 Developmental Aspects of Sport Competition (4) I&S Smoll Biophysical and psychological influences of sport participation on growth and development of children and youth. Competition readiness, injuries, stress, aggression, roles and responsibilities of parents and coaches. Prerequisite: 2.0 in PSYCH 209.

PSYCH 437 Motor Development (4) NW Smoll Analysis of motor development from prenatal origins through adolescence with emphasis on relations between biophysical and psychosocial development of children and youth. Prerequisite: 2.0 in PSYCH 209.

PSYCH 438 Social Psychology of Sport (4) I&S/Smoll Social Psychology of Sport. Explores sport participation in terms of interpersonal and group influence processes, e.g., social facilitation, behavior modification, observational learning, individual versus group performance, group cohesion, leadership, aggression. Prerequisite: 2.0 in PSYCH 101; 2.0 in PSYCH 202; 2.0 in PSYCH 209.

PSYCH 441 Perceptual Processes (5) I&S/NW Theory and findings in perception with a focus on visual perception in humans. Discrimination and constancy for simple judgments, segregation and identification of visual objects, and specific areas of investigation such as reading and computer vision. Prerequisite: 2.0 in PSYCH 333.

PSYCH 443 Motivational Theories in Social Psychology (5) I&S/Plaks Theories of motivation in social psychology. Emphasis on how motivation and cognition mutually influence each other to produce behavior. Explores such topics as persuasion, goal pursuit, self-regulation, achievement, and social comparison. Prerequisite: 2.0 in PSYCH 345.

PSYCH 445 Theories of Social Psychology (5) I&S J.D. Brown Evaluation of the major theories of human social behavior supported by the empirical literature; theories of social cognition and thought; major theories of social interaction, group processes, and social learning. Prerequisite: PSYCH 345.

PSYCH 446 Personality Assessment (3) I&S R. Smith Measurement of personality variables in personality research, social psychology, and clinical psychology. Theoretical conceptions underlying various clinical and experimental scales and an assessment of their construct validity and behavioral correlates. Prerequisite: 2.0 in PSYCH 303; 2.0 in PSYCH 315; 2.0 in PSYCH 317.

PSYCH 447 Psychology of Language II (4) I&S/VLPA Corina, Osterhout Psychological principles applied to linguistic development and organization; language in both its stimulus and response aspects. Prerequisite: 2.0 in either PSYCH 347, PSYCH 355, or LING 400. Offered: jointly with LING 447.

PSYCH 448 Seminar in Psychology (1-15, max. 15) Selected research topics of contemporary interest. Quarterly listings of specific offerings are available at departmental advisory office.
PSYCH 450 Honors Research Seminar in Psychology (2-, max. 4) Bassok Senior thesis research; preparation of senior thesis; oral presentation of research. Four credits of 450 required for all senior honors and distinction candidates in conjunction with 498 and 499. Offered: AWSp.

PSYCH 451 Health Psychology (5) I&S/NW Overview of the psychological and behavioral factors in health and disease. Includes research on both psychological causes and treatments. Topics include stress, risky behaviors, patient-provider interactions, pain, behavioral/medical treatments, and lifestyle interventions. Prerequisite: 2.0 in PSYCH 202; 2.0 in PSYCH 209; 2.0 in either PSYCH 303, or PSYCH 345.

PSYCH 452 Psychology of the Self-Concept (4) I&S J.D. Brown Examines psychological theory and research on the role of the self-concept in regulating behavior. Topics include the development of the self-concept; self-awareness; and self-esteem maintenance. Prerequisite: 2.0 in either PSYCH 245 or PSYCH 345.

PSYCH 454 Personality and Social Influence (4) I&S Shoda Survey of various theories and research for analyzing person-situation interactions — how the qualities of persons and situations combine to generate thoughts, feelings, and behaviors of a person in a given social situation. Prerequisite: PSYCH 209; either PSYCH 203, PSYCH 245, PSYCH 303, or PSYCH 345.

PSYCH 456 Social and Moral Development (5) I&S Kahn Theoretical approaches toward explaining children's social and moral development, including those that are nativistic, sociobiological, behavioristic, psychoanalytic, and constructivist. Use of theory to investigate applied problems related to parenting, education, peer relationships, authority, sexuality, culture, ecology, and technology. Prerequisite: either PSYCH 206 or PSYCH 306.

PSYCH 457 Language Development (5) I&S/ VLPA First-language acquisition and use by children. Experiential, theoretical issues and research techniques. Prerequisite: 2.0 in either PSYCH 206, PSYCH 306, LING 200, or LING 400. Offered: jointly with LING 457.

PSYCH 462 Human Memory (5) I&S Joslyn Research and theory in key areas of memory. Issues covered include information processing theory, the link between memory processes and their biological underpinnings, autobiographical memory, implicit memory, and the effect of emotion on memory. Prerequisite: 2.0 in PSYCH 209; recommended: PSYCH 355.

PSYCH 465 Intelligence (5) I&S Analysis of individual differences in cognition. Includes description/use of psychometric ("intelligence test") models, test scores' relationship to academic and non-academic performance, information processing and biological models of intelligence (including genetic models). Discussion of male-female and demographic group differences in cognition. Prerequisite: either PSYCH 315 or PSYCH 317; PSYCH 355.

PSYCH 466 Psychology of Judgment and Decision Making (5) I&S Miyamoto Human information processing in judgment and decision making, especially the interface between cognitive theories and normative and prescriptive theories of decision making. Prerequisite: 2.0 in either PSYCH 315 or PSYCH 317; either PSYCH 331, PSYCH 365, or PSYCH 361.

PSYCH 469 Psychology of Reasoning (4) I&S Bassok Cognitive processes in human learning, problem solving, deductive and inductive reasoning. Prerequisite: 2.0 in PSYCH 209.

PSYCH 470 Psychology and Music (5) I&S/ VLPA Covey Introduction to the scientific study of musical behavior, with an emphasis on current topics in the psychology of music from the areas of musical perception and cognition, musical development, music therapy, musical performance, and composition. Includes psychoacoustical and neuropsychological foundations, research methods, and some basic material in music theory. Prerequisite: 2.0 in either PSYCH 202 or NBIO 302.

PSYCH 471 Applied Issues in Cognition (4-5, max. 10) I&S Joslyn Examines cognitive issues in applied settings, such as the workplace and education. Topics include such issues as attention, expertise, problem solving, decision-making, human error, automation, navigation, and individual differences. Prerequisite: PSYCH 209.

PSYCH 480 Ideas of Human Nature (5) I&S Barash Reviews various approaches to the nature of human nature, including ideas from ancient philosophy, theories of the soul, empiricism, idealism, conditioning, social constructions, concepts of Freud, Marx, the existentialists, and neo-Darwinism. Prerequisite: PSYCH 101.

PSYCH 481 Seminar in Advanced Quantitative Methods (3) Little Examines the role of statistical methods in psychological research. Issues and controversies surrounding null hypothesis significance testing. Review of selected alternative statistical methods in psychology. Prerequisite: 2.0 in either PSYCH 315 or PSYCH 318.

PSYCH 482 Advanced Research Methods for Behavioral Psychology (4) QSR Greenwald Shoda Develops skills of collecting and analyzing behavioral research data, communicating the results orally and in writing, and expressing perspectives on issues of scientific method and practice. Prerequisite: either PSYCH 315 or PSYCH 317; either PSYCH 330, PSYCH 331, PSYCH 332, or PSYCH 350. Offered: Sp.

PSYCH 488 Stress and Coping (4) I&S/NW Reviews theories and research concerning stress and its roles in behavior, personality, development, health, and interpersonal relationships. Coping analyzed as a factor in the way people respond to stressful circumstances. Prerequisite: 2.0 in PSYCH 202; 2.0 in PSYCH 209.

PSYCH 490 Stress Management (3) I&S/NW Nature of stress. Physiological responses to stress and relaxation. Techniques of stress management with training in relaxation, biofeedback, meditation, cognitive restructuring, exercise, nutrition, interpersonal communication skills, and time management. Prerequisite: PSYCH 101.

PSYCH 494 Field Study in Animal Behavior (2-3, max. 9) Kyes Field experience in areas relating to animal behavior through participation in seminar discussion and field exercises and training at foreign and domestic field study sites.

PSYCH 496 Undergraduate Teaching Experience in Psychology (2-3, max. 6) Students are trained as assistants in quiz sections or as supplemental tutors for undergraduate psychology courses. Designed especially for those students planning graduate work or education certification. An overall maximum of 18 credits in 496, 497, 498, and 499 may apply toward a baccalaureate degree.

PSYCH 497 Undergraduate Fieldwork (2-5, max. 10) Individual consultation with faculty member and supervised practicum experience in a broad range of community settings and agencies dealing with psychological problems. An overall maximum of 18 credits in 496, 497, 498, and 499 may apply toward a baccalaureate degree.

PSYCH 498 Directed Reading in Psychology (1-3, max. 18) Readings in special interest areas under supervision of departmental faculty. Discussion of reading in conference with the instructor. An overall maximum of 18 credits in 496, 497, 498, and 499 may apply toward a baccalaureate degree.

PSYCH 499 Undergraduate Research (1-3, max. 18) Design and completion of individual research projects. An overall maximum of 18 credits in 496, 497, 498, and 499 may apply toward a baccalaureate degree.

PSYCH 500 Proseminar in Psychology (1, max. 10) Greenwald Presentations on professionally and practically useful topics by guest faculty presenters designed for first-year and second-year graduate students. Credit/no credit only. Prerequisite: graduate standing in Psychology, or permission of instructor.

PSYCH 502 Core Concepts in Animal Behavior (3) Barash, Beecher, O'Donnell Reading, reports, and discussion on animal behavior, with a focus on topics that lie at the interface of animal behavior, evolutionary science, neuroscience, and psychology. Include social organization, mating systems, foraging, learning, communication, and agonistic behavior. Prerequisite: Graduate standing in Psychology, or permission of instructor.

PSYCH 503 Core Concepts in Behavior Genetics (4) O'Donnell, Shoda Overview of current approaches to genetic analysis in Psychology. Role of genetics in behavioral variation, and in regulating behavioral development. Techniques for quantifying genetic variation, behavioral effects of genes, and patterns of gene expression. Genetic effects on major behavioral differences. Prerequisite: graduate standing in Psychology, or permission of instructor.

PSYCH 504 Core Concepts in Behavioral Neuroscience (3) Bernstein, Buch, Covey, Diaz, Kenney, Kim, Mizumori, Olavamina Historical and contemporary perspectives in behavioral neuroscience. Current methodologies and research strategies. May include sensory processing, genetics, behavioral neuroendocrinology, developmental neural plasticity, neuropsychology of learning and memory, lifespan perspectives on behavioral neurobiology, and psychopharmacology. Prerequisite: graduate standing in Psychology, or permission of instructor.
Required for all graduate students majoring in the major systems of psychotherapy, including the instructor. Offered: A.

PSYCH 507 Core Concepts in Cognitive Psychology (5) Bassek Survey of the major topics in human cognition. Discussion of memory, concepts and categories, language, decision-making, and problem solving. Prerequisite: graduate standing in Psychology, or permission of instructor.

PSYCH 508 Core Concepts in Perception (3) G. Loftus Current topics in perception, psychophysics, sensory memory, pattern recognition, letter and word perception, and visual masking. Prerequisite: graduate standing in Psychology, or permission of instructor. Offered: Sp.

PSYCH 510 Core Concepts in Social Psychology (4) Plaks, Shoda An overview of contemporary theories and research in social psychology, focusing on introducing graduate students to the field as practitioners of social psychological research. Prerequisite: graduate standing in Psychology, or permission of instructor.

PSYCH 511 Core Concepts in Personality (3) Shoda, R. Smith Review of personality research. Roles of cognitive, affective, motivational, and psychodynamic processes. Critical evaluation of current personality, its antecedents, and its influences over behavior. Attention to role of personality variables in social relationships. Prerequisite: graduate standing in Psychology, or permission of instructor.

PSYCH 513 Core Concepts in Biological Basis of Development (4) Bernstein Embryological, genetic, physiological, and evolutionary perspectives of human development; biological development in infancy; sensory development and its influence on the development of perception; primate models for human development. Prerequisite: graduate standing in Psychology, or permission of instructor.

PSYCH 514 Core Concepts in Early Cognitive and Linguistic Development (4) Meltzoff, Sommerville Origins and early development of thought and language. Piagetian theory and modern-day revisions. In depth examination of historical and philosophical bases for current empirical research. Prerequisite: graduate standing in Psychology or permission of instructor.

PSYCH 515 Core Concepts in Personality and Social Development (4) Carson Theories and empirical literature in personality and social development throughout infancy, childhood. Prerequisite: graduate standing in Psychology, or permission of instructor.

PSYCH 517 Core Concepts in Systems of Psychotherapy (3) George Theory and research of major systems of psychotherapy, including the psychodynamic, behavioral, cognitive, and family systems approaches as an introduction to specialization in clinical psychology. Required for all graduate students majoring in clinical psychology. Prerequisite: graduate standing in psychology, or permission of instructor. Offered: A.

PSYCH 518 Core Concepts in Behavior Disorders (5) Zoellner Major types of behavior disorders, with emphasis on clinical manifestations, relevant research, and theoretical perspectives. Required for all graduate students majoring in clinical psychology. Prerequisite: graduate standing in Psychology or permission of instructor. Offered: W.

PSYCH 522 Laboratory in Statistical Computation I (2) Miyamoto Techniques of computation using statistical software on personal computers. Organization of data files, transformations of variables, graphical representations of data, descriptive statistics, elementary inferential statistical analyses. Prerequisite: concurrent enrollment in PSYCH 524 or permission of instructor. Offered: A.

PSYCH 523 Laboratory in Statistical Computation II (2) Techniques of statistical computation using statistical software on personal computers and mainframe computers. Multiple regression, analysis of variance and covariance. Planned and post hoc comparisons and confidence intervals. Data analytic diagnostics for violations of regression assumptions. Prerequisite: PSYCH 522 and PSYCH 524, concurrent enrollment in PSYCH 525, or permission of instructor. Offered: W.

PSYCH 524 Introduction to Statistics and Data Analysis (4) Miyamoto Basic concepts of statistical theory and methods of data analysis. Emphasis on the integration of statistical theory, statistical computation, and psychological research methods. Required of all first-year graduate students in psychology. Prerequisite: concurrent enrollment in PSYCH 522 or permission of instructor. Offered: A.

PSYCH 525 Linear Models and Data Analysis (4) Miyamoto Concepts of statistical theory and methods of data analysis. Emphasis on the integration of statistical theory, statistical computation, and psychological research methods. Required of all first-year graduate students in psychology. Prerequisite: concurrent enrollment in PSYCH 522, or permission of instructor. Offered: W.

PSYCH 526 Multivariate Statistics (4) Rudd An introduction to statistical modeling; interactive data analyses; use of regression, ANOVA, logistic regression, and log-linear models in explanatory studies. Prerequisite: PSYCH 525.

PSYCH 527 Mathematical Modeling for Psychology and the Neurosciences (3) Rudd Introduces a collection of mathematical models increasingly important to research in psychology and neuroscience, including random walks, differential equations, linear systems theory, Fourier analysis, nonlinear systems, and neural modeling. Topics illustrated by examples from recent literature. Prerequisite: undergraduate statistics.

PSYCH 528 Practical Methods for Behavioral Research (4, max. 8) Greenwald Examination of methodological, practical, and communication problems associated with research on human behavior. Topics include: selecting research problems, use of theory, types of validity, common sense about statistics, when to replicate, dealing with unpredicted results, strategies for presentation and publication. Offered: Sp.

PSYCH 529 Advanced Research Methods (5) Beauchaine Surveys advanced clinical research methods not covered in other required statistics sequence. Examples include structural equation modeling, hierarchical linear modeling, growth curve modeling, and taxometric analyses. Hands-on experience gained through weekly assignments using each method. Prerequisite: PSYCH 525.

PSYCH 530 Introduction to Latent Variables (4) Greenwald Analyses techniques to assess effects of latent variables in presence of error in observed data. Provides experience with statistical tools for confirmatory structural equation modeling and testing of hypotheses concerning causal and other relations among latent variable. Prerequisite: PSYCH 515 or permission of instructor.

PSYCH 531 Research Methods in Clinical and Community Psychology (4) Lengua Addresses issues concerning the design and implementation of research in clinical and community psychology. Topics include validity; reliability; experimental, quasi-, and non-experimental designs; causual inference; interpretation of data; and research ethics. Provides students with tools to evaluate research, develop hypotheses, and design rigorous empirical studies. Offered: A.

PSYCH 532 Single Subject Design and Research (3) Kohlenberg Single subject designs (reversal, multiple baseline, changing criterion) and their application to clinical cases. Prerequisite: graduate major standing in clinical psychology or permission of instructor. Offered: W.

PSYCH 535 Scientific Writing in Psychology (5, max. 10) Loesche Addresses issues in scientific writing and publishing; laboratories assist with writing, and provide feedback on drafts of articles throughout the writing process. Students write a journal article to submit for publication. Other writing projects are also possible with instructor’s permission. Credit/no credit only.

PSYCH 536 Grant Preparation in Psychology (3,max. 6) Mizumori, Teller Prepare and submit an application for a major national fellowship. Joint registration in PSYCH 598 with faculty advisor is required. Credit/no credit only. Prerequisite: graduate standing in Psychology, and permission of instructor.

PSYCH 537 Teaching of Psychology (3) Pasler Examines issues concerning the teaching of psychology, including educational goals, course development, instructional methods, T.A.-student and T.A.-faculty relations, grading, student diversity, and problem situations. Assignments are designed to enhance students’ organizational, presentialational, and problem-solving skills. Credit/no credit only. Prerequisite: graduate standing in the Department of Psychology.

PSYCH 538 Interactive Software for Psychological Research (4) Loftus Introduction to computing concepts and basic programming skills. Includes principles of programming, the MATLAB programming environment, and the psychophysics toolbox. Data collection and management. Design and program experiments. No prior programming experience needed. Prerequisite: graduate standing in Psychology, or permission of instructor.

PSYCH 540 Advances in Psychology (3-5, max. 30) Intensive readings from the current
literature on an emerging topic or theoretical perspective in psychology. Student presentations and discussion. Prerequisite: graduate standing in Psychology, or permission of instructor.

PSYCH 541 Advances in Animal Behavior (3-5, max. 30) Barash, Beecher, Brenowitz, Kyes, O’Donnell Intensive readings from the current literature on an emerging topic or theoretical perspective in animal behavior. Student presentations and discussion. Prerequisite: graduate standing in Psychology, or permission of instructor.

PSYCH 542 Advances in Behavioral Neuroscience (3-5, max. 30) Buck, Teller Intensive readings from the current literature on an emerging topic or theoretical perspective in behavior science. Student presentations and discussion. Prerequisite: graduate standing in Psychology or permission of instructor.

PSYCH 543 Advances in Child Clinical Psychology (3-5, max. 30) Beauchaine, Cauce, Lengua, McMahon Intensive readings from the current literature on an emerging topic or theoretical perspective in child clinical psychology. Prerequisite: graduate student in Psychology, or permission of instructor.

PSYCH 544 Advances in Clinical Psychology (3-5, max. 30) Baer, Cauce, Dawson, George, Kohlenberg, Linehan, Marlatt, Smith, Zoellner Intensive readings from the current literature on an emerging topic or theoretical perspective in clinical psychology. Student presentations and discussion. Prerequisite: graduate standing in Psychology or permission of instructor.

PSYCH 545 Advances in Cognition/Perception (2) E. Loftus, G. Loftus Intensive readings from the current literature on an emerging topic or theoretical perspective in cognition/perception. Prerequisite: graduate standing in Psychology or permission of instructor.

PSYCH 546 Advances in Developmental Psychology (3-5, max. 30) Carlson, Kahn, Meltzoff, Smoll, Sommerville Teller Intensive readings from the current literature on an emerging topic or theoretical perspective in Developmental Psychology. Student presentations and discussion. Prerequisite: Graduate standing in Psychology or permission of instructor.

PSYCH 547 Advances in Social/Personality (3-5, max. 30) Passer Intensive readings from the current literature on an emerging topic or theoretical perspective in social psychology/personality. Student presentations and discussion. Prerequisite: graduate standing in Psychology or permission of instructor.

PSYCH 548 Advances in Quantitative Psychology (3-5, max. 30) Hunt, Lunneborg Intensive readings from the current literature on an emerging topic or theoretical perspective in quantitative psychology. Student presentations and discussion. Prerequisite: graduate standing in Psychology or permission of instructor.

PSYCH 549 Seminar in Physiological Psychology (2) Bernstein, Diaz, Kenney, Teller Prerequisite: permission of instructor.

PSYCH 550 Seminar in Psychology (1-2, max. 30) Weekly meetings for discussion of current topics. Prerequisite: graduate standing in Psychology, or permission of instructor.

PSYCH 551 Seminar in Animal Behavior (1-2, max. 30) Barash, Beecher, Brenowitz, O’Donnell Weekly meetings for discussion of current topics. Prerequisite: graduate standing in Psychology, or permission of instructor.

PSYCH 552 Seminar in Behavioral Neuroscience (1-2, max. 30) Bernstein, Buck, Covey, Diaz, Kenney, Misumori, O’Donnell Teller Weekly meetings for discussion of current topics. Prerequisite: graduate standing in Psychology, or permission of instructor.

PSYCH 553 Seminar in Child Clinical Psychology (1-2, max. 30) Beauchaine, Cauce, Dawson, Lengua, McMahon Weekly meetings for discussion of current topics. Prerequisite: graduate standing in Psychology, or permission of instructor.

PSYCH 554 Seminar in Clinical Psychology (1-2, max. 30) George, Kohlenberg, Linehan, Marlatt, Smith, Zoellner Weekly meetings for discussion of current topics. Prerequisite: graduate standing in Psychology, or permission of instructor.

PSYCH 555 Seminar in Cognition/Perception (1-2, max. 30) Bassok, Buck, Kerr, Loftus, Rudd, Teller Weekly meetings for discussion of current topics. Prerequisite: graduate standing in Psychology, or permission of instructor.

PSYCH 556 Seminar in Developmental Psychology (1-2, max. 30) Bernstein, Carlson, Meltzoff, Repacholi, Smoll, Teller Weekly meetings for discussion of current topics. Prerequisite: graduate standing in Psychology, or permission of instructor.

PSYCH 557 Seminar in Social/Personality (1-2, max. 30) Brown, Greenwald, Plaks, Shoda Weekly meetings for discussion of current topics. Prerequisite: graduate standing in Psychology, or permission of instructor.

PSYCH 558 Seminar in Quantitative Psychology (1-2, max. 30) Little, Miyamoto, Rudd Weekly meetings for discussion of current topics. Prerequisite: graduate standing in Psychology, or permission of instructor.

PSYCH 559 Seminar in Psychological Science (2, max. 30) Group discussions of problems and continuing strategies for ongoing and future research projects. Prerequisite: graduate standing in Psychology, others by permission.

PSYCH 560 Current Trends in Psychology (1-2, max. 30) Prerequisite: permission of instructor. Offered: AWSpS.

PSYCH 562 Evolutionary Psychology of Gender, Mating and Reproduction (3) Barash, Beecher, O’Donnell Reviews evidence for biological factors influencing human mating and reproductive behavior, through application of concepts and theory from animal behavior, behavioral genetics, and evolutionary biology. Offered: W.

PSYCH 563 Developmental Psychology and the Human Relationship with Nature (4) Kahn Theories of development used to investigate the ontogenesis of the human relationship with nature. An emphasis on social cognition, children’s environmental moral reasoning, the effects of technology in children’s lives, and evolutionary theory. Offered: W.

Topics include: definition of attitude, measurement of attitudes, information processing theories, functional theories, cognitive structure theories, the self as attitude object, unconscious attitudinal processes. Prerequisite: PSYCH 445; PSYCH 525 or equivalent; or permission of instructor.

PSYCH 565 Quantifying Brain Analysis (3) Covers concepts and applications of statistically unbiased methods for quantifying brain structure. Hands-on learning and application of concepts, sampling strategies and calculations for unbiased stereological measure of the size and number of various brain components.

PSYCH 566 Neural Correlates of Perceptual Cognition (3) Olavarria Contribution of sensory systems to perceptual capabilities. Critical review of literature on the neural correlates of abilities such as sensory discrimination, subjective perception, attention, imagery, object and face recognition, and spatial behavior. Some sensory disabilities reviewed. Offered: W.

PSYCH 567 Higher Order Cognition (3) Bassok Survey of research on higher-order cognition with an emphasis on theoretical accounts of knowledge representation. Topics include problem solving, inductive and deductive reasoning, hypothesis testing, causal inferences, similarity judgments, and categorization.

PSYCH 568 Cognitive Approaches to Human Memory (3) E. Loftus Examination of current topics in human memory from the perspective of cognitive psychology. Prerequisite: PSYCH 355 or permission of instructor. Offered: Sp.

PSYCH 570 Child Clinical Psychology (4) Issues and content of child clinical psychology, promotion of student’s beginning work in research. Prerequisite: graduate major or minor standing in child-clinical psychology.

PSYCH 571 Child Psychopathology (5) McMahon Broad survey of major categories of child and adolescent disorders. Emphasis on scientific, empirical approach to description, classification, and research literature on these disorders. Required for all graduate students majoring in child clinical psychology. Prerequisite: graduate standing in psychology or permission of instructor.

PSYCH 572 Approaches to Child Treatment (4) Barrett, Beauchaine, Dawson Major approaches to child psychotherapy, including specific applications, issues in treatment, and research. Prerequisite: graduate major standing in child-clinical psychology or permission of instructor. Offered: Sp.

PSYCH 573 Psychological Assessment of Children (5) Dawson Assessment techniques appropriate to children, including those for infants, special problems of preschool and school-age children; projective tests, family interviews, and target observational assessment; training in administration of selected techniques. Prerequisite: PSYCH 576 and permission of instructor.

PSYCH 574 Community Psychology (4) Overview of key issues and concepts in the field of community psychology. History of field and overview of different models used to conceptualize system-level mental health issues and
delivery systems. Emphasizes theory and research rather than intervention. Prerequisite: psychology graduate student or permission of instructor.

**PSYCH 575 Anxiety Disorders (3) Zoellner** General topics related to primary anxiety disorders (panic, OCD, GAD, posttraumatic stress disorder, and specific phobias), including diagnosis, theory, and treatment.

**PSYCH 576 Assessment of Intelligence (5) Lengua** Current theory and research on intelligence and intelligence testing; training in administration, scoring, and interpretation of major intelligence tests; ethical issues in assessment. Prerequisite: graduate major standing in child clinical or clinical psychology, or graduate minor standing in child clinical psychology. Offered: Sp.

**PSYCH 577 Psychological Assessment of Adults (3) Barrett** Training in adult assessment and development of skills in administration, scoring, and interpretation of the Rorschach with some attention to other projective techniques. Prerequisite: PSYCH 576 and permission of instructor.

**PSYCH 578 Approaches to Psychological Assessment (4) Fagan** Problem-solving approach to psychological assessment; review of psychological tests and procedures and presentation of approaches to their clinical interpretation and use. Required for all graduate students majoring in clinical and child-clinical psychology. Prerequisite: graduate major standing in clinical psychology. Offered: Sp.

**PSYCH 579 Behavioral Assessment (4) Linehan** Research, theory, and technique in behavioral assessment. Emphasis on assessing for change and relationship between assessment and therapy. Interviewing, observational techniques, self-monitoring, simulated environments, and physiological, self-report, and imaginal procedures. Prerequisite: clinical psychology graduate standing and permission of instructor.

**PSYCH 580 Minority Mental Health (3) Barrett** George Surveys topics on mental health and treatment of racial and ethnic minorities. Theory emphasized includes models addressing ethnic identity, cross-cultural differences, models of culturally sensitive intervention. Practice emphasizes include unique psychotherapy strategies for: African-, Asian-, and Latino-Americans, and American Indians. Prerequisite: graduate clinical major standing in psychology or permission of instructor.

**PSYCH 581 Cross-Cultural Competency I (2) Barrett** George Focuses on development of multicultural competence in the provision of psychological services to meet APA guidelines for ethnic, linguistic, and culturally diverse populations. Students address personal development, increase their knowledge of diverse groups, and study effective models of intervention in working with clients of diverse backgrounds. Prerequisite: PSYCH 575.

**PSYCH 582 Cross-Cultural Competency II (2) Barrett** George Third in the graduate multicultural-competence sequence. Focuses on American ethnic minorities, multiracial children and families, social action, and organizational development. Prerequisite: PSYCH 581.

**PSYCH 584 Behavioral Methods: Clinical Interventions (3) Linehan** Provides students with basic skills required for competent practice of cognitive behavioral psychotherapy. Topics include behavioral skills training, cognitive restructuring, contingency management, and exposure-based procedures. Prerequisite: second year of graduate clinical psychology, social work, psychosocial nursing, or psychiatric residency.

**PSYCH 585 Clinical Personality Assessment (3) R. Smith** Use of objective personality inventories in the description of normal and abnormal personality and use of such information in case conceptualization and treatment planning. Minnesota Multiphasic Personality Inventory, Millon Clinical Multiaxial Inventory. Credit/no credit only. Prerequisite: clinical psychology graduate standing.

**PSYCH 587 Clinical Methods: Interviewing (2) Fagan** Provides the foundation for developing good clinical skills. Enables students to conduct an initial clinical interview and generate a diagnostic formulation, problem list, and treatment plan. Prerequisite for taking a complete history. Limited to and required of all second-year clinical psychology graduate students. Credit/no credit only. Offered: A.

**PSYCH 588 Clinical Methods: Ethics (2) Fagan** Enables students to acquire a thorough working knowledge of the American Psychological Association’s Ethical Standards for Psychologists; an awareness of Washington state law as it affects psychologists and a knowledge of how to identify and solve ethical dilemmas. Limited to and required of all second-year clinical psychology graduate students. Credit/no credit only. Offered: W.

**PSYCH 589 Clinical Supervision (4) Cauce** Dawson, George, Kohlenberg, Marlatt, McMahon, Smith Supervised psychotherapy involving several individual clients. Separate consultations with instructor for intensive supervision of each case. Occasional meetings in small groups of instructors and students to discuss case material. Assigned readings appropriate to each case with opportunities to discuss these with instructor. Credit/no credit only. Prerequisite: clinical psychology graduate standing and permission of instructor. Offered: AWSpS.

**PSYCH 590 Practicum in Psychological Assessment (2) Demonstration and practice of selected psychological test procedures and interviewing skills. Concurrent registration in 535 required. Required for all first-year graduate students majoring in clinical and child-clinical psychology. Prerequisite: graduate major standing in clinical or child-clinical psychology and permission of instructor.**

**PSYCH 591 Issues in Clinical Psychology (1, max. 3)** Personal and professional issues in clinical psychology. Required for all first-year graduate students majoring in clinical and child-clinical psychology. Credit/no credit only. Prerequisite: graduate major standing in clinical psychology. Offered: AW.

**PSYCH 593 Clinical Practica and Colloquium (1-6, max. 24) Fagan** Required of all clinical psychology graduate students seeing clients in the clinic. Clinical colloquium required of all second-year students, optional for others. Credit/no credit only. Offered: AWS.

**PSYCH 594 Advanced Personality Theory (5)** Linehan Conceptual models of behavioral functioning, cognition, emotion, and environment as organizers of behavior and other critical issues in personality theory. Opportunity to integrate previous courses, research, and practice, and arrive at coherent theoretical framework. Required for graduate majors in clinical psychology.

**PSYCH 596 Advanced Teaching Practicum (2, max. 6)** Supervised participation in graduate teaching. Prerequisite: graduate student in Psychology and permission of instructor. Offered: AWSpS.

**PSYCH 597 Fieldwork in Clinical Psychology (1-5, max. 36) Baer, Cauce, Dawson, George, Kohlenberg, Linehan, Marlatt, R. Smith** Prerequisite: second-year graduate major standing and permission of departmental faculty.

**PSYCH 598 Directed Reading in Psychology (*, max. 30)** Selected topics. Prerequisite: permission of a supervising psychology faculty member.

**PSYCH 599 Directed Research in Psychology (1-3, max. 24)** Supervised participation in research. Prerequisite: permission of a supervising psychology faculty member.

**PSYCH 600 Independent Study or Research (*)** Offered: AWSpS.

**PSYCH 700 Master’s Thesis (*)** Offered: AWSpS.

**PSYCH 800 Doctoral Dissertation (*)** Offered: AWSpS.

**Romance Languages and Literature**

**French**

Credit: The sequence 121, 122, 123 is parallel to 101, 102, 103; students can receive credit for 101 and 121, but not for 102 and 122 or 103 and 123. 101 or 121 cannot be taken for credit after 102, 103, 122, or 123. 134 is a 15-credit intensive course exactly equivalent to 121, 122, 123; a maximum of 15 credits are allowed for 134 and any of 102, 103, 121, 122, and 123. A student who completes 134 cannot later take 101 for credit, but a student who earns credit for 101 can take 134 for 15 additional credits.

**FRENCH 101 Elementary (5)** Methods and objectives are primarily oral-aural. Oral practice in the language laboratory is required. Prerequisite: score of 0-14 on FR TL placement test if French is language of admission.

**FRENCH 102 Elementary (5)** Methods and objectives are primarily oral-aural. Oral practice in the language laboratory is required. Prerequisite: either FRENCH 101 or score of 15-30 on FR TL placement test.

**FRENCH 103 Elementary (5)** Methods and objectives are primarily oral-aural. Oral practice in the language laboratory is required. Prerequisite: either FRENCH 102, FRENCH 110, or score of 31-56 on FR TL placement test.

**FRENCH 110 Basic French Review (5)** Combines in one quarter the contents of 101 and 102. Designed for students who have studied French in high school but who are not ready for
102. Prerequisite: score of 10-30 on FR TL placement test.

FRENCH 121 French Immersion (5) Methods and objectives primarily interactive based on a multi-media approach using the Reflects method: covers the equivalent of FRENCH 101. Prerequisite: score of 0-14 on FR TL placement test if French is language of admission. Offered: A.

FRENCH 122 French Immersion (5) Methods and objectives primarily interactive based on a multi-media approach using the Reflects method: covers the equivalent of FRENCH 102. Prerequisite: FRENCH 121 or a score of 15-30 on FR TL placement test. Offered: W.

FRENCH 123 French Immersion (5) Methods and objectives primarily interactive based on a multi-media approach using the Reflects method: covers the equivalent of FRENCH 103. Prerequisite: FRENCH 122 or a score of 31-56 on FR TL placement test. Offered: Sp.

FRENCH 134 First-year Intensive French (15) Equivalent of 101, 102, 103. No more than 15 credits allowed for any combination of 101, 102, 103, and 134. Offered: S.

FRENCH 199 Foreign Study — Elementary (4-16, max. 16) Elementary instruction in approved foreign study program. Students who wish to satisfy foreign language proficiency requirement must see the departmental adviser and may be required to take additional courses through 103.

FRENCH 201 Intermediate (5) VLPA Designed to bring students to an intermediate level of proficiency. Emphasis on experiencing the language in context through a multi-media approach. Prerequisite: either FRENCH 103, FRENCH 134, or score of 57-100 on FR TL placement test.

FRENCH 202 Intermediate (5) VLPA Designed to bring students to an intermediate level of proficiency. Emphasis on experiencing the language in context through a multi-media approach. Prerequisite: FRENCH 201.

FRENCH 203 Intermediate (5) VLPA Designed to bring students to an intermediate level of proficiency. Emphasis on experiencing the language in context through a multi-media approach. Prerequisite: FRENCH 202.

FRENCH 207 Second-Year Reading (5) Intermediate vocabulary building and reading of literary texts. Students receiving credit for 207 may subsequently earn credit for lower-division French courses involving other skills.

FRENCH 210 Paris (5) I&S/VLPA Taught in English. Provides an introduction to the art, architecture, politics, and literature of the City of Light.

SWED 302 The Swedish Novel (5) VLPA Selected works by novelists of the nineteenth and twentieth centuries. Recommended: SWED 203.

SWED 352 Strindberg and His Works (5) VLPA Representative short stories, dramas, autobiographical works, poems, and one novel. Recommended: SWED 203.

SWED 395 Foreign Study: Swedish Area Studies (1-5, max. 10) I&S Courses in Swedish history, society, and/or politics.

SWED 399 Foreign Study: Topics in Swedish Literature and Culture (1-5, max. 15) VLPA Topics in Swedish literature, life, and civilization.

SWED 490 Supervised Reading (1-5, max. 10) Readings in a selected area of Swedish language, literature, or related fields.

Slavic Languages and Literatures

Bosnian, Croatian, Serbian

BCS 401 Elementary Bosnian/Croatian/Serbian (5) Comprehensive introduction to spoken and written literary Bosnian, Croatian, and Serbian. Offered: A.

BCS 402 Elementary Bosnian/Croatian/Serbian (5) Comprehensive introduction to spoken and written literary Bosnian, Croatian, and Serbian. Prerequisite: BCS 401, which may be taken concurrently. Offered: Sp.

BCS 403 Elementary Bosnian/Croatian/Serbian (5) Comprehensive introduction to spoken and written literary Bosnian, Croatian, and Serbian. Prerequisite: BCS 402, which may be taken concurrently. Offered: Sp.

BCS 410 Intensive Third Year Bosnian-Croatian-Serbian (10) VLPA Bilingual Advanced grammatical exercises and listening, reading, and writing skills development. Emphasis on strengthening of conversational and presentation competence. Prerequisite: BCS 406. Offered: A.

BCS 420 Literature, Film, and Culture of the Former Yugoslavia and the Yugoslav Successor States (5) VLPA A travelogue through the intellectual and cultural landscape of the former Yugoslavia and the Yugoslav successor states, studying the select literary works, films, and other artifacts, with the exploration of both how these phenomena are a part of their intellectual and historical environment, and how they transcend and change it.

Bulgarian

BULGR 401 Elementary Bulgarian (5) Introduction to Bulgarian phonology and grammar in terms of the modern spoken language. Writing conventions of literary Bulgarian. Offered: A.

BULGR 402 Elementary Bulgarian (5) Introduction to Bulgarian phonology and grammar in terms of the modern spoken language. Writing conventions of literary Bulgarian. Prerequisite: BULGR 401. Offered: W.

BULGR 403 Elementary Bulgarian (5) Reading of modern texts to increase command of grammar and vocabulary. Prerequisite: BULGR 402. Offered: Sp.

BULGR 404 Advanced Bulgarian (5) VLPA Continuation of 401, 402, 403. Selected readings in Bulgarian literature, history, and culture. Reinforces and extends basic knowledge of Bulgarian grammar and vocabulary. Prerequisite: 2.0 in BULGR 403. Offered: A.

BULGR 405 Advanced Bulgarian (5) VLPA Continuation of 401, 402, 403. Selected readings in Bulgarian literature, history, and culture. Reinforces and extends basic knowledge of Bulgarian grammar and vocabulary. Prerequisite: BULGR 404. Offered: W.

BULGR 406 Advanced Bulgarian (5) VLPA Continuation of 401, 402, 403. Selected readings in Bulgarian literature, history, and culture. Reinforces and extends basic knowledge of Bulgarian grammar and vocabulary. Prerequisite: BULGR 405. Offered: Sp.

Czech

CZECH 401 Elementary Czech (5) Introduction to spoken and written Czech. Offered: A.

CZECH 402 Elementary Czech (5) Introduction to spoken and written Czech. Prerequisite: CZECH 401. Offered: W.

CZECH 403 Elementary Czech (5) Modern Czech prose, leading to a command of the language as a research tool and providing an adequate basis for further study. Prerequisite: CZECH 402. Offered: Sp.

Polish

POLISH 401 Elementary Polish (5) Principal morphological and syntactic features of the Polish language through the medium of a basic vocabulary. Offered: A.

POLISH 402 Elementary Polish (5) Principal morphological and syntactic features of the Polish language through the medium of a basic vocabulary. Prerequisite: POLISH 401. Offered: W.

POLISH 403 Elementary Polish (5) Designed to enlarge general vocabulary by the reading of short texts selected from Polish authors of the nineteenth and twentieth centuries. Prerequisite: POLISH 402. Offered: Sp.

Romanian

ROMN 401 Elementary Romanian (5) Comprehensive introduction to spoken and literary Romanian. Offered: jointly with RMN 401; A.

ROMN 402 Elementary Romanian (5) Comprehensive introduction to spoken and literary Romanian. Prerequisite: ROMN/RMN 401. Offered: jointly with RMN 402; W.

ROMN 403 Elementary Romanian (5) Designed to increase vocabulary and enhance knowledge of grammar through readings in modern Romanian. Prerequisite: ROMN/RMN 402. Offered: jointly with RMN 403; Sp.

ROMN 404 Advanced Romanian (5) VLPA Continuation of 401, 402, 403. Introduction to Romanian literature, history, and culture through selected readings. Reinforces and extends basic knowledge of grammar and vocabulary. Prerequisite: 2.0 in ROMN/RMN 403. Offered: jointly with RMN 404; A.

ROMN 405 Advanced Romanian (5) VLPA Continuation of 401, 402, 403. Introduction to
Romanian literature, history, and culture through selected readings. Reinforces and extends basic knowledge of grammar and vocabulary. Prerequisite: ROMN/RMN 404. Offered: jointly with RMN 405. W.

RUSS 406 Advanced Russian (5) VLPA
Continuation of 401, 402, 403. Introduction to Romanian literature, history, and culture through selected readings. Reinforces and extends basic knowledge of grammar and vocabulary. Prerequisite: ROMN/RMN 405. Offered: jointly with RMN 406. Sp.

Russian

RUSS 101 First-Year Russian (5) Introduction to Russian. Emphasis on oral communication with limited vocabulary. Short readings and writing exercises. Basic grammar. Conducted mostly in Russian. See credit note above. Offered: A.

RUSS 102 First-Year Russian (5) Introduction to Russian. Emphasis on oral communication with limited vocabulary. Short readings and writing exercises. Basic grammar. Conducted mostly in Russian. See credit note above. Prerequisite: RUSS 101. Offered: W.

RUSS 110 Introduction to Russian Culture and Civilization (5) I&S/VLPA Introduction to Russian culture and history from pre-Christian times to the present, as seen through literary texts, music, film, visual art, and historical works. All lectures and written materials in English. No prior knowledge of Russian necessary. Offered in English.

RUSS 150 Intensive First-Year Russian (15) Covers material of 101, 102, 103 in one quarter. Meets three to four hours daily. For continuation, see 250 or 201, 202, 203. See credit note above. Offered: S.

RUSS 201 Second-Year Russian (5) VLPA Comprehensive review of Russian grammar with continuing oral practice and elementary composition. Conducted mostly in Russian. See credit note above. Prerequisite: either 2.0 in RUSS 103 or 2.0 in RUSS 150. Offered: A.

RUSS 202 Second-Year Russian (5) VLPA Comprehensive review of Russian grammar with continuing oral practice and elementary composition. Conducted mostly in Russian. See credit note above. Prerequisite: RUSS 201. Offered: W.

RUSS 230 Masterpieces of Russian Literature (5) VLPA Examines the greatest authors and masterpieces of Russian literature, including Tolstoy, Dostoievsky, and Chekhov. All readings, discussions, and assignments are in English.

RUSS 250 Intensive Second-Year Russian (15) VLPA Covers material of 201, 202, 203 in one quarter. Meets three to four hours daily. See credit note above. Prerequisite: either 2.0 in RUSS 103 or 2.0 in RUSS 150. Offered: S.

RUSS 301 Intermediate Russian (5) VLPA Extensive practice in spoken and written Russian based on a variety of prose readings. Intensive review and supplementation of strategic grammatical concepts. See credit note above. Prerequisite: either 2.0 in RUSS 203 or 2.0 in RUSS 250. Offered: A.

RUSS 302 Intermediate Russian (5) VLPA Extensive practice in spoken and written Russian based on a variety of prose readings. Intensive review and supplementation of strategic grammatical concepts. See credit note above. Prerequisite: RUSS 301. Offered: W.

RUSS 303 Intermediate Russian (5) VLPA Extensive practice in spoken and written Russian based on a variety of prose readings. Intensive review and supplementation of strategic grammatical concepts. See credit note above. Prerequisite: RUSS 302. Offered: Sp.

RUSS 304 Reading and Translation (1, max. 3) VLPA Translation techniques with emphasis on development of vocabulary and reading skills. Primarily for Russian regional studies majors. Credit/no credit only. Prerequisite: either RUSS 203 or RUSS 250. Offered: AWSp.

RUSS 313 Business Russian (5) VLPA Emphasizes the language and practice of business in Russia today. Prerequisite: either RUSS 203 or RUSS 250. Offered: W.

RUSS 321 Russian Literature and Culture 1700-1840 (5) I&S/VLPA Introduction to literary works, art, and architecture in relation to the development of Russian thought, both secular and religious. Attention given to the influences of Western Europe and what is distinctly Russian, and to the formation of national self-awareness. Offered: A.

RUSS 322 Russian Literature and Culture 1700-1900 (5) I&S/VLPA as an element in Russian culture. Art, architecture, music, and philosophy also treated. Periods covered include the age of Peter the Great, romanticism, realism, and impressionism. Offered: W.

RUSS 323 Russian Literature and Culture of the Twentieth Century (5) I&S/VLPA Literature as an element in modern Russian culture. Art, architecture, and music also treated. Periods covered include symbolism, revolution, postrevolution, Stalinist, the “thaw,” and contemporary. Offered: Sp.

RUSS 324 Russian Folk Literature in English (5) I&S/VLPA Russian popular tradition, including paganism and its survival into modern times. Genres of the oral tradition, including the folk tale, the epic, spiritual and historical songs, and legends. Special attention to modern theories and western European analogues.

RUSS 350 Intensive Third-Year Russian (15) VLPA Covers material of 301, 302, 303 in one quarter. Meets three hours daily. See credit note above. Prerequisite: either 2.0 in RUSS 203 or 2.0 in RUSS 250. Offered: S.

RUSS 351 Intermediate Russian Phonetics (3) VLPA Systematic study of the Russian sound system, including phonetic transcription and intonational patterns. Instruction in correcting individual pronunciation errors. Conducted partly in Russian. Prerequisite: either RUSS 203 or RUSS 250.

RUSS 352 Intermediate Russian Morphology (3) VLPA Examination of Russian morphology with emphasis on topics that help to prepare the student for advanced courses in Russian. Conducted partly in Russian. Prerequisite: either RUSS 203 or RUSS 250.

RUSS 401 Advanced Russian (5) VLPA Class discussion, oral presentations, and composition, based on reading a variety of texts, both literary and non-literary. Advanced grammar. Translation one full course period per week. See credit note above. Prerequisite: either 2.0 in RUSS 303 or 2.0 in RUSS 350. Offered: AWSp.

RUSS 402 Advanced Russian (5) VLPA Class discussion, oral presentations, and composition, based on reading a variety of texts, both literary and non-literary. Advanced grammar. Translation one full course period per week. See credit note above. Prerequisite: RUSS 401. Offered: AWSp.

RUSS 403 Advanced Russian (5) VLPA Class discussion, oral presentations, and composition, based on reading a variety of texts, both literary and non-literary. Advanced grammar. Translation one full course period per week. See credit note above. Prerequisite: RUSS 402. Offered: AWSp.

RUSS 420 Topics in Russian Literary and Cultural History (5, max. 20) VLPA A special topic in the literary and cultural history of Russia. Topics vary.

RUSS 421 Post-Soviet Literary and Cultural Scene (5, max. 15) VLPA Russian literature of the second half of the twentieth century. In English.

RUSS 422 Russian Literature in Emigration and Exile (5) VLPA Examines writers who left the Soviet Union during the post-Stalin period up to the fall of communism or who, though they resided in the USSR, published through unofficial channels. Discussion of Aksyonov, Siniavska, Voinovich, Zinoviev, and others.

RUSS 423 Russian Film (5, max. 15) VLPA Early Russian, Soviet, and post-Soviet film. Featured filmmakers include Sergei Eisenstein, Dziga Vertov, Vasliov Pudovkin, and others. Focuses on critical materials pertaining to filmmaking and film theory.

RUSS 424 Topics in Ethnicity and Cultural Identity (5, max. 15) I&S/VLPA Issues of cultural and ethnic identities and neo-colonialism. Special focus on Russian and East European Jewish literature and culture, and central Asian literature, art, and culture. Taught in English.

RUSS 425 Russian Drama (5, max. 15) VLPA Analysis of history and development of Russian drama from the 18th century to present times. Playwrights featured include Alexander Griboedov, Alexander Ostrovsky, Anton Chekhov, Vladimir Mayakovsky, and others. Taught in English.

RUSS 426 Russian Art and Architecture (5) VLPA West Survey of Russian art and architecture from the middle ages to the twentieth century, covering the place of the visual
RUSS 430 Major Authors (5, max. 15) VLPA Major Russian writers of the nineteenth and twentieth centuries. Among authors read are Pushkin, Dostoevsky, Turgenev, Tolstoy, Chekhov, Babel, Iif and Petrov, Olesha. Content varies.

RUSS 450 Intensive Fourth-Year Russian (15) VLPA Covers material of 401, 402, 403 in one quarter. Meets three hours daily. See credit note above. Prerequisite: either 2.0 in RUSS 303 or 2.0 in RUSS 350. Offered: S.

RUSS 451 Structure of Russian (5) VLPA Descriptive analysis of contemporary standard Russian. Detailed phonetic transcription, discussion of major Great Russian dialects as well as variations in popular speech, examination of common roots and productive derivational elements in Russian words, and elementary principles of syntax. Prerequisite: either RUSS 303 or RUSS 350. Offered: A.

RUSS 452 Structure of Russian (5) VLPA Descriptive analysis of contemporary standard Russian. Detailed phonetic transcription, discussion of major Great Russian dialects as well as variations in popular speech, examination of common roots and productive derivational elements in Russian words, and elementary principles of syntax. Prerequisite: RUSS 451. Offered: W.

RUSS 453 Russian Language in Russia (5, max. 15) VLPA Daily work in phonetics, grammar, conversation, translation, analytical reading, stylistics, newspaper analysis, and advanced syntax. Prerequisite: either RUSS 203 or RUSS 250. Offered: AWSP.

RUSS 454 Research Project in Russia (3, max. 15) VLPA Supervised research in student’s selected area of concentration, combined with language instruction tailored to the student’s field. Successful completion of course requires a 15-page term paper in Russian. Prerequisite: either RUSS 203 or RUSS 550. Offered: AWSP.

RUSS 455 Russian Literature in Russia (5, max. 15) VLPA Selection of courses on specialized topics in Russian literature: specific authors or periods. Prerequisite: either RUSS 203 or RUSS 250. Offered: AWSP.

RUSS 486 Culture in Russia (3, max. 15) I&S/ VLPA Lectures on education, history, economics, law, the arts, ethnography, architecture; complemented by visits to places of cultural and historical interest and meetings with Russian groups. 4 credits for summer program, 6 for semester program. Prerequisite: either RUSS 203 or RUSS 250. Offered: AWSP.

RUSS 490 Studies in Russian Literature (3-5, max. 15) VLPA In either Russian or English. Topics vary.

RUSS 499 Directed Study or Research (1-5, max. 15) Individual study of topics to meet specific needs. By arrangement with the instructor and the Department of Slavic Languages and Literatures office. Offered: AWSP.

RUSS 501 Russian Language for Graduate Students (2, max. 10) Develops skills of particular use to graduate students. Emphasis on rapid assimilation of variety of written materials with sophisticated understanding and maximum retention of vocabulary, and ability to discuss in Russian the more theoretical and abstract kinds of material. Prerequisite: RUSS 403 or equivalent and graduate standing in Russian, East European, and Central Asian Studies.

RUSS 502 Russian Translation (3) Introduction to the theory of translation; translation to and from Russian of selected prose passages in a variety of styles, with emphasis on idiomatic accuracy and stylistic compatibility. Prerequisite: two quarters of RUSS 501 or permission of instructor.

RUSS 512 Russian Literary Criticism (3) A study of critical positions, problems, and literary values of major Russian literary critics from Belinsky to the present.

RUSS 520 Topics in Russian Literature and Culture (5, max. 20) Detailed study of a single author or a movement, theme, or short period in Russian literature or culture.

RUSS 521 Russian Literature to 1800 (5) Representative works of East Slavic, Muscovite, and Russian literature from the beginnings to 1800. Studies include a varied selection of primary texts. Intended as an introduction to the study of modern literature for beginning graduate students in Russian literature. Offered: alternate years.

RUSS 522 Russian Literature of the Nineteenth Century (5) Survey of nineteenth-century Russian poetry and prose. Representative works of Russia’s major and minor authors, literary trends, and genres. Offered: alternate years.

RUSS 523 Russian Literature of the Twentieth Century (5) Survey of twentieth-century Russian poetry and prose. Pre-revolutionary, Soviet, and Emigre authors, trends, and genres. Includes survey of twentieth-century Literary Criticism as well, in particular Russian Formalists and Mikhail Bakhtin. Offered: alternate years.

RUSS 526 Modern Russian Literary, Cultural, and Film Studies (5, max. 15) Modern literature and film. Topics include post-colonialism, gender, reflections of social upheavals, artistic experimentation, issues of commercialism in art, search for new cultural expressions and identity. Readings in both Russian and English. Offered: Sp.

RUSS 542 Seminar in Russian Poetry (5, max. 20) One specific problem or theme in Russian poetry, seen in its widest possible dimensions. Students read, in Russian, the literary works involved and become familiar with the social, historical, and philosophical backgrounds that inspire them.

RUSS 543 Seminar in Contemporary Russian Prose (5, max. 20) Analysis of Russian prose fiction. Selected authors and topics.

RUSS 554 History of the Russian Literary Language (5) Russian literary language from the eleventh through the twentieth centuries, with special attention to syntax and lexicon and to the development of notions of literary styles. Offered in Russian. Prerequisite: RUSS 555 or SLAV 565, or permission of instructor. Offered: alternate years.

RUSS 570 Research Seminar in Russian Literature (5) Diment, Haney, Kramer, West Working in consultation with a faculty adviser, students formulate a topic and prepare a 30-minute oral presentation to be delivered at the seminar and submit a written paper to be read and critiqued. By all participants.

RUSS 577 Russian Folk Literature (5) Analysis of representative works of various genres of folk literature, including the bylina, skazki, historical and lyrical songs, and the spiritual stikh.

RUSS 600 Independent Study or Research (*) .

Slavic

SLAV 223 Russian and East European Cinema (5) VLPA Introduction to Russian and Eastern European film from the origins to present day. Highlights achievements of Russian and Eastern European filmmakers, both in their countries of origin and abroad.

SLAV 351 History of the Slavic Languages (5) VLPA External and internal history of Slavic literary languages from the beginnings to the present time, including the development of writing systems, external attempts at reform, and the development of vocabulary.

SLAV 420 The Other Europe: Contemporary East European Fiction (5, max. 15) VLPA Cankovic Contemporary fiction by Czech, East German, Hungarian, Polish, Baltic, and Balkan writers. Topics include: history of colonization, the imagination of social utopia, socialism and nationalism, everyday life under communism, cultural identity between East and West, experimental writing, new fiction in post-communist Eastern Europe. All readings in English.

SLAV 423 East European Film (5) VLPA Cankovic Survey of major East European film makers. Compares East European and Western production of those directors who worked partially in the West, e.g., Polanski, Forman, Holland, Makejjev. Topics include film in socialist versus market economy, politics, gender, sexuality.

SLAV 426 Ways of Feeling: Expressions of Emotions Across Languages and Cultures (5) I&S/ VLPA Dziwirek Universal and culture specific aspects of linguistic expression of emotion. Are there feelings that all people share independent of language, culture, gender, and race? Examination of the meaning and form of emotion words in different languages, facial expressions, cultural attitudes to emotion and emotional behavior, and gender-specific emotional expressions.
SLAV 470 Special Topics in Slavic Linguistics (3-5, max. 15) VLPA Augerot, Coats, Djizwiek Special topics in Slavic linguistics. Course offerings based on instructor’s specialty and student demand. Offered: AWSp.

SLAV 481 East European Language in Eastern Europe (5, max. 15) VLPA Daily work in phonetic, grammar, conversation, translation, analytical reading, stylistics, newspaper analysis, and advanced syntax. Provides an opportunity to earn credits while studying in Eastern Europe. Offered: AWSpS.

SLAV 482 Research Project in Eastern Europe (3, max. 15) VLPA Supervised research in student’s selected area of concentration, combined with language instruction tailored to the student’s field. Provides an opportunity to earn credits while studying in Eastern Europe. Offered: AWSpS.

SLAV 483 East European Literature in Eastern Europe (3, max. 15) VLPA Selection of courses on specialized topics in East European literature; specific areas vary. Provides an opportunity to earn credits while studying in Eastern Europe. Offered: AWSpS.

SLAV 486 East European Culture in Eastern Europe (3, max. 15) VLPA Lectures on various aspects of Eastern European culture, complemented by visits to places of cultural historical interest. Provides an opportunity to earn credits while studying in Eastern Europe. Offered: AWSpS.

SLAV 490 Studies in Slavic Literatures (3-5, max. 15) VLPA Topics vary.

SLAV 499 Directed Study or Research (1-5, max. 15) Individual study of topics to meet specific needs. By arrangement with the instructor and the Department of Slavic Languages and Literatures office. Prerequisite: permission of instructor and undergraduate adviser. Offered: AWSpS.

SLAV 501 Using Slavic Resources (2) Introduction to graduate studies in Slavic languages, literatures, and cultures. Discusses field of study and research materials and techniques employed.

SLAV 519 Slavic Language Pedagogy (3, max. 6) Doyle Introduction to current issues of foreign language pedagogy. Concentrates on the practical classroom application of methodological theory through lectures and micro-teaching presentation. Topics discussed and practiced include testing, proficiency teaching, teaching listening and reading skills, writing, teaching grammar, and computers. Offered: A.

SLAV 520 New Trends in Literary Theory (5) Cmkovic Explores recent theoretical trends which no longer search for a unified theoretical meta-narrative (i.e., post-structuralism or new historicism), but instead explore various literary genres (such as diary or fictional book reviews) and texts as the primary terrain of theory.

Bakhtin, Lem, Bruns, Corradi-Fiumara, Cmkovic, and others.

SLAV 550 Synchronic Slavic Linguistics (5) Linguistic analysis of the phonology, morphology, and syntax of Russian and other Slavic languages. Investigation of current theoretical work in these areas.

SLAV 551 The Introduction to the Study of Slavic Languages (5) External and internal history of Slavic literary languages from the beginnings to the present time, including the development of writing systems, external attempts at reform, and the development of vocabulary.

SLAV 561 History of the East Slavic Languages (5) Designed to acquaint majors in Slavic linguistics with the details of the historical development of the phonological and morphological structure of the Ukrainian and Byelorussian literary languages. Prerequisite: SLAV 560. Offered: alternate years.

SLAV 562 History of the West Slavic Languages (5) Designed to acquaint majors in Slavic linguistics with the details of the historical development of the phonological and morphological structure of the South Slavic languages. Prerequisite: SLAV 560.

SLAV 565 Old Church Slavic (4) Rise and development of earliest Slavic literary language and a descriptive study of its orthography, phonology, morphology, and syntax. Readings from normalized texts. Offered: alternate years.

SLAV 566 Readings in Old Church Slavic (4) Reading and grammatical interpretation of a selected group of canonical texts, as well as some examples of the various later recensions of Old Church Slavonic. Prerequisite: SLAV 565. Offered: alternate years.

SLAV 570 Special Topics in Slavic Linguistics (3-5, max. 15) Investigation and discussion of special topics in Slavic linguistics.

SLAVIC 600 Independent Study or Research (*)

SLAVIC 800 Doctoral Dissertation (*)

Ukrainian

UKR 401 Elementary Ukrainian (5) Introduction to spoken and written Ukrainian.

UKR 402 Elementary Ukrainian (5) Introduction to spoken and written Ukrainian. Prerequisite: UKR 401, which may be taken concurrently.

UKR 403 Elementary Ukrainian (5) Introduction to spoken and written Ukrainian. Prerequisite: UKR 402, which may be taken concurrently.

**Sociology**

SOC 100 Survey of Sociology (5) &S Human interaction, social institutions, social stratification, socialization, deviance, social control, social and cultural change. Course content may vary, depending upon instructor. Offered: AWSpS.

SOC 111 American Society (5) &S Explores the power of social structures using examples drawn primarily from the American culture. The impact of social institutions, the emergence of concrete patterns of social relations which organize and regulate social life and the inequality inherent in most social structures.

SOC 177 The Jewish Community in the United States: Success, Influence, and Prospects (5) &S Burstein Examines relationship between American society and its ethnic/religious groups through study of the American Jewish community. Focuses on economic success; challenges to religious traditions; relationships between American and Jewish cultures; and impact of Jewish ideas and organizations on American politics. Offered: jointly with SISJE 177; 5.

SOC 212 Evolution and Revolution: An Introduction to the Study of Comparative Social Change (5) &S Chirot, Hirschman Examines the major aspects of human societies, including political and economic systems, family structure, social stratification, and demographic patterns as influenced by environmental conditions, technology, cultural traditions, and legacies of prior history and relationships to other societies. Not open for credit to students who have taken SOC 112.

SOC 195 Study Abroad: Sociology (2-5, max. 10) &S Lower-division sociology courses for which there are no direct University of Washington equivalents, taken through a University of Washington study abroad program.

SOC 220 Introduction to Sociological Methods (5) &S, QSR Familiarizes students with the logic of analysis in social sciences. Students learn to recognize good research design, understand and interpret main arguments employing different methods, and evaluate whether research findings support stated conclusions.

SOC 222 Sociology of Sport (5) &S Weis Introduction to the sociological analysis of sport. Issues discussed include the history, definition, and functions of sport; role of sport in the socialization of children; the relationship between sport and values; athletics within the social organization of education; deviance, crime, and violence in sport; the business and economics of sport.
SOC 240 Introduction to Social Psychology: Perspectives on Individual Behavior (5) I&S Major perspectives on individual behavior in social settings. Social cognition, behaviorism, symbolic interaction, and attitudes. Ways people develop as social beings. Traditional lecture format is not used in this course. Student learning is based on individualized programs of reading and frequent tests of student comprehension. Offered: AWSp.

SOC 241 Introduction to Social Psychology: Perspectives on Social Interaction (5) I&S Major perspectives on social interaction. Social exchange, cooperation and competition, group dynamics, social influence, leadership, altruism and aggression. Situational and personal variables that determine social interaction. Traditional lecture format is not used in this course. Student learning is based on individualized programs of reading and frequent tests of student comprehension. Offered: AWSp.

SOC 246 Sects and Violence: Cults, Religious Innovation, and Social Conflict (5) I&S Examines controversial religious groups often called cults. Use sociological lenses to examine cults' occasionally catastrophic conflicts with government authorities, established religious organizations, and anti-cult movements.

SOC 247 Contemporary Social Movements (5) I&S Minkoff Introduction to theory and research on national-level collective mobilizations organized for political change. Emphasis on how political, organizational, and cultural factors shape social movement emergence and political, organizational, and cultural factors. Use sociological lenses to examine explanations for why human sexuality is conceptualized or practiced in a certain way.

SOC 250 African American Family (5) I&S Scott Explores the structures and functioning of various types of black families. Single-parent families, two-parent families, extended families, and consensual families are explored. Their consequences for male/female relationships are linked and critiqued. Offered: jointly with AFRAM 250.

SOC 260 African American Experience Through Literature (5) I&S/LVPA Scott Introduces students in hermeneutical and sociological methods of analyses. Analyzes selected novels, essays, poems, short stories, and plays with the purpose of understanding the structures and functions of both society and personality. Offered: jointly with AFRAM 260.

SOC 265 Globalization and the Transformation Economy and Society in Asia (5) I&S Hamilton Examines the rapid and extensive social and economic development throughout Asia since the mid-20th century; the corresponding retail revolution in the American economy; the evolution of characteristic Asian product categories; and the impact of these developments on the social and economic organization of Asian economies. Offered: jointly with SI/SAS 265.

SOC 270 Social Problems (5) I&S Black Processes of social and personal disorganization and reorganization in relation to poverty, crime, suicide, family disorganization, mental disorders, and similar social problems.

SOC 271 Introduction to the Sociology of Deviance and Social Control (5) I&S Crutchfield Examination of deviance, deviant behavior, and social control. Deviance as a social process; types of deviant behavior (e.g., suicide, mental illness, drug use, crime, "sexual deviance," delinquency); theories of deviance and deviant behavior; nature and social organization of societal reactions; and social and legal policy issues. Offered: AWSp.

SOC 275 Murder (5) I&S Weis Introduces topics related to the crime of murder, including: laws of homicide; research on the characteristics of victims, killers, and murders; theories of murder and related violence; investigation strategies; and crime and control policies.

SOC 287 Introduction to the Sociology of Sexuality (5) I&S Investigates sexuality on the basis of social construction of norms and values, within the context of gender, race, class, and sub-cultures and in the social control of sexuality and why it is so highly regulated. Looks for social, rather than biological or personal explanations for why human sexuality is conceptualized or practiced in a certain way.

SOC 292 Who Gets Ahead? Public Schooling in America (5) I&S LePore Addresses fundamental questions about the relationship between education and society. Examines why some students learn more and advance further than others; what factors shape how schools run/organized and which materials are taught; how race/class/gender affect students within schools; and how schools maintain our economic system and can become more effective.

SOC 299 Sociology Interest Group (2) I&S Provides opportunity for students new to the major, or contemplating the major, to meet twice weekly in a small group to discuss issues relating to two designated five-credit sociology courses. Concurrent enrollment in the two five-credit designated courses required. See department adviser. Offered: AWSp.

SOC 301 War (5) I&S Origin and conduct of war, readings from anthropology, political science, economics, and history, as well as two novels and some recent articles on the arms-control controversy. Modern forms of warfare, including guerrilla war, world war, and nuclear war. Offered: jointly with SIS 301.

SOC 316 Introduction to Sociological Theory (5) I&S Introduction to sociological theory. Includes classical theorists Adam Smith, Karl Marx, Emile Durkheim, and Max Weber and their influence on contemporary theoretical debate.

SOC 320 Evaluating Social Science Evidence (5) I&S QSR Morris A critical introduction to the methods used to collect data in social science: surveys, archival research, experiments, and participant observation. Evaluates "facts and findings" by understanding the strengths and weaknesses of the methods that produce them. Case based. Offered: jointly with CS/SS/S/STAT 320/ 320; A.

SOC 328 Methodology of Sociological Research (5) I&S, QSR Logic of formulating, testing, and modifying hypotheses. Methods of producing social data (survey research, evaluation research, field observation) and utilizing stored data (census tapes, historical materials). Methods of quantitative data analysis techniques commonly used in contemporary sociological analysis. Not open for credit to students who have taken 320 or 323. Offered: A/W.

SOC 329 Methodology of Sociological Research (5) I&S, QSR Logic of formulating, testing, and modifying hypotheses. Methods of producing social data (survey research, evaluation research, field observation) and utilizing stored data (census tapes, historical materials). Methods of quantitative data analysis techniques commonly used in contemporary sociological analysis. Not open for credit to students who have taken 320 or 323. Offered: A/W.

SOC 330 Human Ecology (5) I&S Factors and forces that determine the distribution of people and institutions.

SOC 340 Symbolic Interaction (5) I&S Role of language and culture in changing the human organism into a socialized human being; interpersonal processes and how they are shaped by the symbolic environment.

SOC 344 Cognitive Social Psychology (5) I&S Howard Cognitive structures and processes and their antecedents and consequences, both societal and individual. Reciprocal influences of social roles, social institutions, and social cognition.

SOC 346 Group Processes (5) I&S Systematic analysis of social processes in small groups, including conformity, deviance, cooperation, competition, coalition formation, status and role differentiation, inequity, communication, and authority and power. A variety of methods of research are considered: field studies, field experiments, laboratory studies, and the simulation of social processes.

SOC 347 National Social Movements: Current Trends and Explanations (5) I&S Minkoff Introduction to theory and research on a specific form of social movement: national-level collective mobilizations organized for political change. Emphasizes how political, organizational, and cultural factors shape social movement emergence and development. Focuses on American activism, New Left, women's movements, the abortion conflict, gay/lesbian activism, and Central American Peace movement.

SOC 352 The Family (5) I&S Pettit, Schwartz The family as a social institution: historical changes and societal variation in family patterns. Changes over the life cycle. Alternative family forms.
SOC 353 The Family in Cross-Cultural Perspective (5) I&S Scott, Form, content, and functions of families through case studies of different countries. Family organization, including family structure, inheritance, sexual division of labor, and socialization with attention given to life-cycle stages.

SOC 355 Social Change in Latin America (5) I&S Explores cultures, identities, political economy, and popular mobilization in Latin America. Examines relations of power and production between social classes and ethnic groups, as well as ideologies and intellectual movements. Offered: jointly with SISLA 355.

SOC 356 Society and Politics (5) I&S Burstein, Kiser Causes of political change in democratic countries, including public opinion, social movements, interest group activity, and party organization. Offered: jointly with PLS 356.

SOC 357 Sociology of Religion (5) I&S The relations between religion, polity, economy, and social structure; in particular, the political, economic, and social impact of religious beliefs and organizations, as well as the social determination of these beliefs and organizations; the rise of secularism, the rationalization of modern life, and the emergence of political quasi-religions.

SOC 360 Introduction to Social Stratification (5) I&S Social class and social inequality in American society. Status, power, authority, and wealth opportunity are examined in depth, using material from other societies to provide a comparative and historical perspective. Sociological origins of recurrent conflicts involving race, sex, poverty, and political ideology.

SOC 361 Age and Sex Differentiation (3) I&S Physiological and social bases of age and sex differentiation in human societies. The implications of age and sex distinctions for kinship, economic, and political structures. The relationship between age, sex, and other bases of social inequality.

SOC 362 Race Relations (5) I&S Black, Pitchford Interracial contacts and conflicts.

SOC 364 Women in the Social Structure (5) I&S Gender and social institutions; the family, politics, education, medicine, law, the labor force. Intersection of gender with other minority statuses such as race, age, socioeconomic status, and sexual orientation. Structural, ideological, and historical determinants of gender relations.

SOC 365 Urban Community (5) I&S Guest Comparative and analytic study of organization and activities of urban groups.

SOC 366 Bureaucracy in Society (5) I&S Hamilton The coming of organizational societies; historical causes of bureaucracy; informal relations and work groups; ideologies; authority and the division of labor; social change in bureaucracies; comparative organizations.

SOC 368 Sociology of Black Americans (5) I&S Black Socio-cultural context of the Black person’s environment and consequences of interaction with that environment. Not open for credit to students who have taken SOC 105.

SOC 371 Criminology (5) I&S Crutchfield, Matsueda Survey of legal definitions, types of criminal behavior, trends and patterns, recidivism, characteristics of offenders, environmental influences, diagnostic methods, prediction, theories of crime and delinquency prevention, social policy.

SOC 372 Introduction to Criminal Justice (5) I&S Examines role of police, courts, and corrections in criminal justice. Applies sociological theories and perspectives to issues in law enforcement, adjudication, and corrections. Legislative reforms. Innovations in policy.

SOC 374 Law and Society (5) I&S Stovel Introduces major issues of the sociological foundations and implications of legal institutions; examines social life within legal institutions, the individual and collective; the malleability of precedent, and truth and the effects of inequality on legal outcomes. Encompasses legal practice and social science.

SOC 376 Drugs and Society (5) I&S Beckett Explores the questions of drug use and abuse, social and political factors that shape response to their use, and the social conditions under which drug use is likely to have adverse consequences. Also covers U.S. drug control policy, the political economy of legal and illegal drugs, and political aspects of drug use. Offered: jointly with LSU 376.

SOC 377 The American Jewish Community (5) I&S Burstein Development and current status of American Jewish community: immigration; changes in religious practice, institutions in response to circumstances in American Society; creation of new types of secular communal organizations; assimilation; confrontation with antisemitism; family life; social, economic mobility; religious, secular education; internariage, and future of community. Offered: jointly with SISJE 377.

SOC 378 Contemporary Jewish American Identities (5) I&S Friedman Introduction to the debates about post-Holocaust Jewish identities in multicultural America. Explores whether a distinctive Jewish community is headed toward assimilation, experiencing revival, or merely transforming the multiple ways Jewish experience is lived. Topics include new Jewish immigrants, the new Orthodox, Black Jews, Jewish feminism, children of Holocaust survivors. Offered: jointly with SISJE 378.

SOC 379 Environmental Sociology (5) I&S/NW Lee Social processes by which environmental conditions are transformed into environmental problems: scientific claims, popularization of science, issue-framing, problem-amplication, economic opportunism, and institutional sponsorship. Examination of social constructs such as ecosystem, community, and free-market economy. Use of human ecology to assess whether the current framing of environmental problems promotes ecological adaptability. Offered: jointly with BSC 371/ENVIR 379; WS.

SOC 395 Study Abroad: Sociology (2-5, max. 15) I&S Upper-division sociology courses for which there are no direct University of Washington equivalents, taken through a University of Washington study abroad program.

SOC 399 Undergraduate Internship (2-5, max. 10) Students serve in approved internships. Credit/no credit only.

SOC 401 Special Topics in Sociology (5, max. 15) I&S Selected topics of contemporary interest taught by a sociologist active in the field. Topics vary and may be substantive, theoretical, or methodological.

SOC 410 History of Sociological Thought (5) I&S Contributions of individual theorists (from Comte to the present); emphasis on cumulative development of concepts and principles, emergence of sociology as a science, probable future developments.

SOC 416 Sociological Theory (5) I&S Kiser Theories of individual action, social order, and institutional change. Cumulative development of solutions rather than on works of given theorists. Theories of social order. How sociological treatments of these issues compare with those offered by economists and other social scientists.

SOC 431 Fertility and Mortality (3) I&S Theories of fertility and mortality, demographic transitions, individual variations. Specific analytic approaches. Familiarity with basic fertility and mortality measures, and with the life table, is assumed.

SOC 432 Population and Modernization (3) I&S Hirschman, Lavely Examines role of demographic factors in the process of social modernization and economic growth. The approach is both historical, focusing on populations of developed countries since 1700, and analytic, stressing the attempts made by different disciplines to model demographic relationships, with attention to less-developed regions. Offered: jointly with SIS 432.

SOC 433 Research Methods in Demography (3) I&S Hirschman Basic measures and models used in demographic research. Sources and quality of demographic data. Rate construction, standardization, the life table, stable population models, migration models, population estimation and projection, measures of concentration and dispersion, measures of family formation and dissolution.

SOC 434 Demographic Issues in Asia (3-5) I&S Hirschman, Lavely Contemporary Asian countries face a number of issues with demographic components, including environmental and resource issues, ethnic rivalry, international migration, and public health. This seminar addresses a set of these issues by focusing on the demography of one or more countries in Asia. Offered: jointly with SISEA 434.

SOC 445 Religious Movements: The Sociology of Cults and Sects (5) I&S Investigates the organizational dynamics of new religious movements. Seeks to understand why ‘cults’ emerge and how they proliferate or decay. Examines conflicts within established churches, counter-movements, and the state.
SOC 447 Social Movements (5) I&S Kim Social movements as collective attempts to change society; why people join; characteristics of successful and unsuccessful movements; consequences of social movement activities.

SOC 449 Social Relationships (5) I&S The structure of different kinds of relationships and the nature of interaction within them. Concept of social relationships in general; several specific types of relationships. Close personal relationships: marriage, nonmarital sexual relationships, and the parent-child relationship.

SOC 450 Political Economy of Women and Family in the Third World (5) I&S Theoretical and empirical aspects of the political economy of women and the family in the Third World during the process of development, with a focus on labor. Main theoretical approaches examined and applied to case studies from Asia and Latin America. Offered: jointly with SIS 450.

SOC 451 Theory and Process of Social Change (5) I&S Hamilton Basic trends in economic and social development; comparative and historical analysis of social and economic changes; the rise of capitalist societies.

SOC 453 Social Factors in the Family (5) I&S Review and analysis of empirical research in courtship and marriage, marital adjustment, and specific areas of marriage and family life.

SOC 456 Political Sociology (5) I&S Burstein Relationships between social change and political change. Focus on selected issues, including social bases of democracy, political organization, elections, and consequences of public policy.

SOC 460 Social Differentiation (5) I&S Analysis of societal organization based on sex, age, residence, occupation, community, class, caste, and race.

SOC 461 Comparative Ethnic Race Relations in the Americas (5) I&S Scott Sketches the ethnoracial systems operating in American society. Studies these systems as systems and examines their institutional and interpersonal dynamics. Compares ethnoracial systems in order to arrive at empirical generalizations about race ethnic relations in the Americas. Offered: jointly with AES 461.

SOC 462 Comparative Race and Ethnic Relations (5) I&S Race and ethnicity as factors of social differentiation in a number of Western and non-Western societies in Europe, Africa, Asia, and the Americas. Offered: jointly with AES 462.

SOC 463 African-American Political Thought (5) I&S Black Examines the historical and sociological experiences of African-Americans from slavery, emancipation, mobilization, and organization, to present socioeconomic situation. Reviews the political philosophy of Black leaders from the early Black Conventions to today, the Black experience in the American education system, and origins and evolution of the black middle class.

SOC 464 Contemporary Society in the Peoples Republic of China (5) I&S Lavely Separation of development of rural and urban social institutions in the Peoples Republic of China since 1949 from a sociological perspective. Family and marriage, social control, educational institutions. Dilemmas of contemporary China and reasons for institutional change. Offered: jointly with SISEA 464.

SOC 465 Complex Organizations (5) I&S Hamilton Examination of the structure of complex organizations. Attention to developing generalizations applicable to industrial organizations, businesses, hospitals, prisons, labor unions, governments, universities, armies, and similar formally instituted organizations. The major focus is on empirical research, with some attention to methodological problems in studying such organizations.

SOC 466 Economic Sociology (5) I&S Hamilton Changing focus of field; cultural variation, work, and the worker; technology, society, and the evolution of industrial forms; types and forms of industrial organizations; industrial organizations as social and technical systems; issues of control, process, and change; the individual in social and technical systems.

SOC 467 Immigration and Ethnicity (5) I&S Hirshman Focus on contemporary American diversity — the multi-ethnic, multicultural society created by recent immigrants from Latin America, Asia, and by people of European, African, and American Indian origins; its issues and debates, including ethnic conflict, integration, multiculturalism, and the dynamics of race, as viewed through comparisons with the past and with other societies.

SOC 468 Sociology of Occupations and Professions (5) I&S Frameworks for study of occupations and professions; occupational structure and mobility in American society in relation to adult socialization and career development; occupational and professional associations and society.

SOC 469 Balkan Societies (5) I&S Chirot Examination of the roots of Balkan social problems (economic backwardness, minority-group conflicts, peasant problem), the failure of pre-1945 attempts to solve these problems, the post-1945 communist failures, the causes of the upheavals of 1989, and the prospects for success in the 1990s.

SOC 470 Contemporary Southeast Asia (5) I&S Hirsberman Sociological survey of Southeast Asia, including development, demographic changes, family structure, and ethnic relations.

SOC 472 Juvenile Delinquency (5) I&S Crutchfield, Weis Factors in delinquency, juvenile courts. Programs of treatment and prevention.

SOC 476 Miscarriages of Justice (5) I&S Examines legal and social factors that shape criminal case outcomes, analyzing how one type of miscarriage of justice — wrongful conviction — occur. How rare are cases of wrongful conviction be explained? Why are some people, against whom there is only weak evidence, convicted — and sometimes even executed? Offered: jointly with LSJ 476.

SOC 482 Issues in Analytic Sociology (3, max. 9) I&S Preparation of senior honors thesis. Preparation of senior honors thesis. Sociology majors only.

SOC 483 Issues in Analytic Sociology (1-3, max. 9) I&S Examination of current issues in sociological analysis. Specific content of the course varies according to recent developments in sociology and the interests of the instructor.

SOC 484 Issues in Analytic Sociology (5) I&S Examination of current issues in sociological analysis. Specific content of the course varies according to recent developments in sociology and the interests of the instructor.

SOC 485 Family Change in Western Europe and the United States (5) I&S Investigates patterns of recent family change. Explores similarities and differences in family life between Western Europe and US as well as variations among countries and among population subgroups within countries. Focuses on differences and similarities in social, economic, political, and cultural environments. Offered: jointly with EURO 485.

SOC 486 Human Family Systems: Biological and Social Aspects (5) I&S Biological factors for human mating and reproduction, and an examination of the range of cross-cultural variability in human systems of kinship and marriage. Compares wide range of human and nonhuman species, and Western and non-Western human societies. Interplay of biological, ecological, and sociocultural factors in determining the structure and function of human family systems. Offered: jointly with ANTH 486.

SOC 487 Sociology of Gender and Sexuality (5) I&S Schwartz Addresses the intersection of gender and sexuality in U.S. society, social institutions and movements, families, and the individual. Topics include the history of sexuality as practiced and politicized since colonial times, major theoretical approaches to sexuality, and how gender and other social status characteristics influence the meanings of sexuality.

SOC 490 The Urban Underclass (5) I&S Crutchfield Examines underlying issues which have led to the emergence and perpetuation of an underclass within an affluent society. Explores some of the consequences for these people and for this society. Considers policies that might be used to address problems of the urban underclass.

SOC 492 Sociology of Education (5) I&S LePore Emphasizes the ways in which schools and colleges reproduce, reinforce, and challenge prevailing social, economic, and political relationships. Examines the structures, practices, content, and outcomes of schooling and its relationship to the wider society as well as the rise and dynamics of the modern education system.

SOC 494 Practicum in Sociology (5, max. 15) Exploration of selected sociological concepts or problems through advanced practical experience in research, internships, or other applications. Topics vary.

SOC 495 Honors Senior Thesis (1-5, max. 5) I&S Preparation of senior honors thesis. Sociology majors only.

SOC 496 Honors Senior Seminar ([3/5]+) I&S Exploration of selected sociological problems.
with emphasis on research experience and the interpretation of data. For sociology majors only, primarily for honors students. Offered: A.

SOC 497 Honors Senior Seminar (-3/5) I&S Exploration of selected sociological problems with emphasis on research experience and the interpretation of data. For sociology majors only, primarily for honors students. Offered: W.

SOC 498 Honors Senior Seminar (-3/5) I&S Exploration of selected sociological problems with emphasis on research experience and the interpretation of data. For sociology majors only, primarily for honors students. Offered: Sp.

SOC 499 Undergraduate Independent Study or Research (2-5, max. 10) Credit/no credit only.

SOC 500 Teaching Sociology as a Teaching Assistant (1) Techniques of quiz section administration, advising of students, and student evaluation important to successful teaching as a Teaching Assistant. Students develop presentations and classroom materials and develop and grade student examinations. Credit/no credit only. Prerequisite: admission to graduate program in sociology.

SOC 501 Proseminar (1-3, max. 3) Introduction for first-year graduate students to substantive areas of sociology, research and information resources, and issues in graduate education and professional socialization. Credit/no credit only. Offered: A.

SOC 502 Seminar on Teaching Sociology (3) Howard Techniques of lecturing, leading discussion, evaluating student performance, and other pedagogical skills ancillary to successful teaching. Students develop a course and obtain videotaped feedback of presentations. Prerequisite: completion of MA. Offered: W.

SOC 503 Seminar on Writing Social Science (3) Burstein, Howard Techniques, skills, and strategies helpful for publishing in the social sciences. Includes writing and revision of own work and evaluation of the writing of other students. Also includes social scientific analysis of writing and other forms of academic communication. Prerequisite: completion of MA. Offered: A.

SOC 504 Applied Social Statistics (3-5) I&S Applications of statistics in sociology and related social sciences. Emphasis on problems of analysis with imperfect data. Probability in statistical inference. Analysis of variance; contingency table analysis, nonparametric procedures; regression analysis in social research. Offered: W.

SOC 506 Methodology: Quantitative Techniques in Sociology (3) I&S Applied regression analysis with emphasis on interactive computer graphics techniques and interpretation. Application to typical sociological problems. Offered: jointly with S&S 507; A.

SOC 507 Statistical Classification and Measurement (3) Application of statistical principles and methods to problems of classification and measurement in social research.

SOC 508 Logic of Social Inquiry (3) Study design from problem formulation to the analysis and interpretation of data. Offered: Sp.

SOC 509 Practicum in Data Analysis (3) Introduction to selected programs for data analysis and practice in their application. Practice in coordination research problem, data, and mode of analysis into a coherent, interrelated set. Interpretation of results. Offered: A.

SOC 510 Seminar in Sociological Theory (3) Kiser Macrosociological theories; functionalism and neo-evolutionism; conflict and consensus approach; comparative strategies; models and long-range theories; ideology and sociology. From Marx and de Tocqueville to contemporary literature. Offered: A.

SOC 511 Classical Social Theory (3) Chriot Study of classical masters of social theory: Marx, Durkheim, and Weber, their predecessors, and their immediate successors.

SOC 513 Demography and Ecology (3) Hirschman Theories and research on human fertility, mortality, mobility, migration, and urbanization in social/economic context. Comparative and historical materials on Europe, the United States, and the Third World.

SOC 514 Current Theories in Social Psychology (3) Broad graduate-level introduction to the theories in the field of social psychology.

SOC 515 Current Research in Social Psychology (3) Howard Broad graduate-level introduction to the research in the field of social psychology.

SOC 516 Organizations (3) Hamilton Broad graduate-level introduction to the theory and research on complex organizations.

SOC 517 Deviance and Social Control (3) Bridges, Crutchfield, Weiss Survey of current research on deviant behavior and mechanisms of social control; definitions and forms of deviant behavior, causality analysis, and legal or other methods of social control.

SOC 518 Social Stratification (3) Burstein Intensive preparation in theoretical, methodological, and substantive topics in social stratification.

SOC 519 Fieldwork: Observation and Interviewing (3) I&S Perspective, logic, and techniques of qualitative social research and analysis. Nature and uses of intensive interviewing, participant observation, and analytic ethnography. Application of field research principles. Research project required in addition to reading and analysis of classic studies. Offered: W.

SOC 520 Fieldwork: Observation and Interviewing (3) Logic and techniques of qualitative social research and analysis. Intensive interviewing, participant observation, qualitative data analysis (including applications of data base technology, problem reformulation, and techniques of visual documentation). Results of student work reported and discussed in class. Offered: Sp.

SOC 525 Experimental Methods in Social Research (3) For graduate students who wish additional understanding of techniques, problems, and issues involved in the design and conduct of experimental social research. Considers strengths and weaknesses of various experimental designs, artifacts and their control, problems in going from the laboratory to the field, and ethical issues. Prerequisite: SOC 504-505 and SOC 508, SOC 509, or equivalents.

SOC 526 Causal Approach to Theory Building and Data Analysis (3) Theory construction and testing from a causal models perspective. Path analysis, standardized versus unstandardized measures, feedback models, identification problems, estimation in overidentified models, difference equations, differential equations, stability conditions. Multiplicative models as alternatives to additive ones. Causal approach to measurement error.

SOC 527 Measurement of Basic Sociological Concepts (3) Conceptualization and measurement problems in sociology, using major concepts as illustrations of basic issues. Causal approach to measurement to deal with problems of indirect measurement, cross-level measurement problems, aggregation and disaggregation. Consequences of crude measurement for data analysis. Prerequisite: SOC 504, recommended: SOC 506.

SOC 528 Seminar on Selected Statistical Problems in Social Research (3) Raftery Prerequisite: SOC 506.

SOC 529 Structural Equation Models for the Social Sciences (3) Structural equation models for the social sciences, including specification, estimation, and testing. Topics include path analysis, confirmatory factor analysis, linear models with latent variables, MIMIC models, nonrecursive models, models for nested data. Emphasizes applications to substantive problems in the social sciences. Prerequisite: SOC 504, SOC 505, SOC 506 or equivalent; recommended: C&S/SS 505 and C&S/SS 506, or equivalent. Offered: jointly with C&S/SS 526.

SOC 537 Modeling Emergence: Social Simulation (3) Seminar and practicum in computational modeling of social processes with emphasis on using agent-based simulation models to investigate and refine theory.

SOC 539 Selected Topics in Demography and Ecology (3, max. 9) Specialized problems in demography or ecology are covered; for example, migration, fertility, mortality, language, race and ethnic relations, metropolitan...
Current state of empirical knowledge on the
behavioral ecology, primatology, or animal
evolutionary theory, population genetics,
habitats. Prerequisite: upper-division course in
and forms of sociality linked to human mating,
stance. Historical Sociology (3)
Macro, Comparative, and
examining the role of gender. Examines
Research seminar considering theoretical and
Intimate relationships, divorce, and social policy.
SOC 551 Family and Gender Relations (3)
Overview of major research findings on
marriage, the family, and gender, including
demographic trends, the place of children in
society, courtship, the internal management of
affiliations, and their relationship to
to which is the focus of this course. Theoretical and
methodological debates on cognition. Sociologi-
cal aspects of attribution. Prerequisite: SOC 514
or equivalent.
SOC 550 Changing Patterns of Family
Organization (3) Schwartz History of the family
with emphasis on changes in European and
American families since 1600. Concomitant
changes in other institutions and their relation to
to changes in the family.
SOC 554 Seminar in the Sociology of Religion
Research seminar considering theoretical and
empirical approaches to gender, with particular
attention to the importance of gender. Examines
the social control of sexuality by the state and by
families, as well as social meanings of sexuality
within social movements related to various
aspects of sexuality.
SOC 554 Seminar in the Sociology of Religion
Survey of significant and active areas of
theory and research in contemporary social
scientific studies of religion.
SOC 555 Methods in Macro, Comparative,
and Historical Sociology (3) Systems of conducting
research with qualitative methods brought to
bear on broad questions.
SOC 556 The Evolution of the Family (3)
Biological evolution of species-specific behaviors
and forms of sociality linked to human mating,
reproduction, and parenting. Cultural evolution of
human systems of kinship and marriage as
fitness-maximizing adaptations to a wide range of
habitats. Prerequisite: upper-division course in
evolutionary theory, population genetics,
behavorial ecology, primatology, or animal
behavior. Offered: jointly with ANTH 556.
SOC 559 Seminar on Gender Roles (3) Brines,
Howard Graduate-level introduction to
theoretical issues concerning gender and society.
Current state of empirical knowledge on the
sociology of gender and strategies for research.
Cross-cultural variations in conception of gender
roles and how gender intersects with social
institutions and social interactions.
SOC 562 Seminar in Comparative Race
Relations (3) Cross-cultural approach to race and
ethnic relations, including case studies from
Africa and Latin America. Prerequisite: graduate
standing in social sciences.
SOC 565 Inequality: Current Trends and
Explanations (3) Morris Discussion of recent
growth in economic inequality in the U.S. and
competing explanations for these new trends
through examination of labor market demograph-
ics, industrial composition and restructuring, and
the broader political context that impacts policies
like minimum wage, strength of unions, and
foreign trade. Prerequisite: SOC 504, SOC 505,
SOC 506, or equivalent; recommended: CS&SS
505 and CS&SS 506, or equivalent. Offered:
jointly with CS&SS 565.
SOC 566 Seminar in Complex Organizations
(3) Special topic seminars in the field of complex
organizations or industrial sociology.
SOC 567 Seminar in Complex Organizations
(3) Special topic seminars in the field of complex
organizations or industrial sociology.
SOC 568 Social Mobility (3) Description and
measurement of social mobility. Determinants of
mobility and cross-national comparisons.
Consequences of mobility for social behaviors.
EmpHASIS more on the macroeconomics position of family to adult position.
SOC 569 Demographic Studies of Stratifica-
tion (3) Hirschi Overview of development of
models of socioeconomic achievement (*status
attainment* paradigm) in the field of stratification.
Begins with work of Blau and Duncan. Covers
elaboration of basic models to include race and
ethnicity, social psychological variables, class,
school and labor market effects, and other
structural variables. Prerequisite: SOC 513, SOC
516.
SOC 570 Seminar on Environmental
Sociology (3) Lee Perspectives on environment-
al sociology with emphasis on the socio-
construction of environmental problems.
European and American schools of thought and
their implications for environmental policy.
Examination of global and regional issues in the
context of risk society. Offered: jointly with CFR
570: A.
SOC 574 Seminar in Methods of Criminologi-
cal Research (3) Bridge, Weis Provides training in
the technical analysis of published research in
criminology; designs and processes studies in
parole prediction, prediction of prison adjustment,
and prediction of treatment effect.
SOC 575 Social Movements: Politics and
Organization (3) Theoretical perspectives and
research on the dynamics of national social
movements from a macrosociological perspec-
TIVE. Introduces dominant models that stress
organizational and political processes, with some
examination of approaches that consider the
intersection of politics, organization, and culture.
Emphasis on the United States.
SOC 581 Special Topics in Theory and the
History of Sociological Thought (3, max. 9)
Examination of current topics in theory and the
history of sociological thought. Content varies
according to recent developments in the field and
the interests of the instructor.
SOC 582 Special Topics in Research Methods
and Statistical Analysis in Sociology (3, max.
9) Examination of current topics in research
methods and statistical analysis in sociology.
Content varies according to recent developments
in the field and the interests of the instructor.
SOC 583 Special Topics in Demography and
Ecology (3, max. 9) Examination of current
topics in demography and ecology. Content
varies according to recent developments in the
field and the interests of the instructor.
SOC 584 Special Topics in Social Psychology
(3, max. 9) Examination of current substantive
topics in social psychology. Content varies
according to recent developments in the field
and the interests of the instructor.
SOC 585 Special Topics in Marriage and
Family (3, max. 9) Examination of current
substantive topics in marriage and the family.
Content varies according to recent developments in the field and the interests of the instructor.
SOC 586 Special Topics in Organization and
Industrial Sociology (3, max. 9) Reitman
Examination of current substantive topics in
organizational and industrial sociology. Content
varies according to recent developments in the
field and the interests of the instructor.
SOC 587 Special Topics in Deviance and
Social Control (1-3, max. 9) Examination of
current substantive topics in deviance and social
control. Content varies according to recent
developments in the field and the interests of the instructor.
SOC 588 Special Topics in Stratification and
Race Relations (3, max. 9) Examination of
current substantive topics in stratification and
race relations. Content varies according to recent
developments in the field and the interests of the instructor.
SOC 589 Special Topics in Macrosociology (3,
max. 9) Examination of current substantive
topics in macrosociology. Content varies
according to recent developments in the field and the interests of the instructor.
SOC 590 Special Topics in Sociology (1-3,
max. 9) Examination of current substantive
topics in sociology. Content varies according to
recent developments in the field and the interests of the instructor. Topics covered in courses with
this number lie outside those covered by other
special topics courses numbered 581 through 589.
SOC 591 Political Sociology (3) Introduction to
political sociology, considering the rise of the
modern state, power, political organization, social
movements, and other related topics.
SOC 600 Independent Study or Research (*)
Credit/no credit only.
SOC 700 Master's Thesis (*) Credit/no credit only.
SOC 800 Doctoral Dissertation (*) Credit/no
credit only.
Speech and Hearing Sciences

SPHSC 100 Voice and Articulation Improvement (3) VLPA For native speakers of English only. Voice production and the sound system of standard American speech. Speech standards, regional and social dialects, voice quality and basic language-oriented characteristics. Practice for improving speech style. May not be repeated. Offered: AWSpS.

SPHSC 111 The American English Sound System (2, max. 4) For non-native speakers of English only. Speech sounds of American English. Practice in listening and using American speech sounds and intonation patterns. Credit/No credit only. Offered: AWSpS.

SPHSC 250 Human Communication and Its Disorders (5) I&S NW Overview of normal and impaired human communication, including speech, language, and hearing disorders. Required for majors, open to nonmajors. Offered: AS.

SPHSC 302 Phonetics (3) VLPA Introduction to the description and classification of speech sounds with a focus on American English. Phonetic analysis of segmental and suprasegmental properties of speech. Practice using the International Phonetic Alphabet to transcribe normal and disordered speech patterns. Required for majors; open to nonmajors. Prerequisite: either SPHSC 303, LING 200, or LING 400. Offered: W.

SPHSC 303 Language Science (3) VLPA Introduction to techniques of linguistic analysis used in the study of phonology, morphology, syntax, and semantics. Required for majors; open to nonmajors. Offered: A.

SPHSC 304 Developmental Aspects of Communication (5) I&S Patterns of communicative development in English speaking children and adolescents. Introduction to the study of language and communication from a developmental perspective. Application to children with various types of communication impairments. Required for majors; open to nonmajors. Prerequisite: either SPHSC 303, ANTH 203, LING 200, or LING 400; may not be repeated. Offered: Sp.

SPHSC 305 Speech and Language Disorders (5) NW Etiology and nature of developmental and acquired communication disorders across the lifespan. Behavioral characteristics of language delay and disorders, developmental apraxia of speech, phonological disorders, stuttering, acquired aphasia, apraxia of speech and dysarthria, craniofacial anomalies, and voice disorders. Required for majors; open to nonmajors. Prerequisite: SPHSC 302; SPHSC 304; SPHSC 320. Offered: A.

SPHSC 308 Social-Cultural Aspects of Communication (3) I&S Introduction to human communication in context. Exploration of ways communication is influenced by context, including situational, social/interpersonal, and cultural variables. Studies systems and cultural practices as they influence communication. Required for majors; open to nonmajors. Offered: WSU.

SPHSC 320 Anatomy and Physiology of Speech (5) NW Anatomy and physiology of the respiratory, laryngeal, and articulatory systems. Examples and laboratory work are directed toward clinical issues in Speech-Language Pathology. Required for majors; open to nonmajors. Offered: Sp.

SPHSC 391 Practicum in Audiology (1-4, max. 10) Guided experiences in audiological assessment and aural rehabilitation of children and adults. Credit/No credit only. Offered: AWSpS.

SPHSC 405 Diagnosis of Speech and Language Disorders (3) NW Principles and procedures for the diagnosis of speech and language disorders. Required for majors. Prerequisite: SPHSC 305. Offered: W.

SPHSC 406 Treatment of Speech and Language Disorders (4) NW Principles and procedures for planning, implementing, and evaluating treatment for speech and language disorders. Required for majors. Prerequisite: SPHSC 405; may not be repeated. Offered: SpS.

SPHSC 411 Perceptual Development (5) I&S/ NW Melzoff Origins and development of perception in human infancy. Object, face, and speech perception; cross-modal relations between touch, vision, audition. Prerequisite: 2.0 in either PSYCH 205, PSYCH 306, or PSYCH 414. Offered: jointly with PSYCH 411.

SPHSC 425 Speech, Language, and the Brain (5) NW Historical perspectives and current research on speech acoustics, speech perception, and brain processing of speech information; speech development; techniques used in speech analysis; machine recognition of speech; brain imaging techniques, animal communication systems; speech evolution; implications for impaired populations. May not be repeated. Offered: A.

SPHSC 444 Models of Speech Processing (3) NW Examines models and basic issues concerning how spoken language is processed. Presents current issues, theories, and research relative to the levels of processing entailed in producing and comprehending speech. Required for majors; open to nonmajors. Recommended: SPHSC 302; SPHSC 303; SPHSC 320; SPHSC 425. Offered: SpS.

SPHSC 445 Special Studies in Speech Pathology and Audiology (*, max. 30) Selected special problems in speech pathology and audiology. Offered: S.

SPHSC 453 Augmentative and Alternative Communication: Implementation Strategies (2-3) NW Communication needs of nonspeaking individuals. Interdisciplinary approaches to the evaluation, selection, and implementation of aided and unaided communication augmentation systems. Recommended: basic course work in either SPHSC, OT, PT, or ENGR. Offered: jointly with REHAB 458; S.

SPHSC 454 Augmentative and Alternative Communication: Access for Technology (3) NW Communication technology and motor evaluation of augmentative and alternative users. Issues related to hardware, software, switch placement and access, with opportunities for clinical trials. Recommended: SPHSC 453 or REHAB 458. Offered: jointly with REHAB 459.

SPHSC 461 Introduction to Hearing Science (5) NW Basic aspects of hearing and the ear and auditory nervous system. How the auditory system constructs an image of the acoustic environment. How attention and memory influence hearing. Effects of damage to the auditory system. Prerequisite: either SPHSC 261 or PSYCH 333. Offered: Sp.

SPHSC 462 Hearing Development (3) NW Description of the changes that occur in human hearing during development. Consideration of the possible explanations for early immaturity. Prerequisite: SPHSC 461; may not be repeated. Offered: even years; A.

SPHSC 471 Basic Audiology (5) NW Theory and practice of the assessment of hearing function, including standard pure-tone audiometry, speech audiometry, and basic impedance audiometry. Required for majors. Prerequisite: SPHSC 371; SPHSC 461; may not be repeated. Offered: AWS.

SPHSC 481 Management of Hearing Loss (4) NW Introduction to methods of communicative rehabilitation of person with hearing loss. Remediation principles of auditory and visual perception, amplification, communication strategies, and information counseling. Required for majors. Prerequisite: SPHSC 471; may not be repeated. Offered: WSp.

SPHSC 491 Audiology Practicum in Schools (2) Special projects in clinical audiology practicum, offered only in the school setting. Provides an opportunity for students to extend audiology practicum experiences into the school environment. Prerequisite: SPHSC 471. Offered: AS.

SPHSC 499 Undergraduate Research (1-5, max. 15) Offered: AWSpS.

SPHSC 500 Clinical Methodology for Documenting Change (4) Introduction to clinical methodology for examining efficacy of treatments for individuals with communication problems. Students consider nature of intervention designed to alter communication disorders and types of accountability questions that need to be raised. They learn methodology for collecting and analyzing data to document effectiveness, effects, and efficiency of treatments.

SPHSC 501 Neural Bases of Speech, Language, and Hearing (4) Neuroanatomical and neurophysiological bases of language, hearing, sensory, and motor function. Special emphasis given to brain-behavior correlates and behavioral consequences to speech, language, and hearing as a result of neurologic injury or disease.

SPHSC 502 Advanced Anatomy of Speech and Hearing Structures (2) Directed independent dissection and study of selected anatomic structures of the speech or hearing mechanisms.

SPHSC 503 Current Issues in Speech and Hearing Sciences (3) Application of experimental methods to research in speech and hearing sciences.

SPHSC 504 Research Methods in Speech and Hearing Sciences (3) Introduction to empirical methods in the speech and hearing sciences.
SPHSC 505 Clinical Research in Communication Disorders (3) Introduction to clinical research. Methodological issues concerning the evaluation of treatment for speech, hearing, and language disorders. Primary emphasis on time series designs. Prerequisite: SPHSC 504 or permission of instructor.

SPHSC 509 Advanced Hearing Science (3) Souza Consideration of physiological acoustics and psychoacoustics, the pertinent literature, and the experimental techniques related to study in these areas. Offered: A.

SPHSC 510 Physiological Acoustics (3) Study of pertinent literature and experimental techniques incident to the physiology of the normal and abnormal auditory system. Prerequisite: SPHSC 461.

SPHSC 511 Psychoacoustics (3) Review of significant literature and theory pertinent to normal auditory sensitivity, pitch, loudness, and other attributes of auditory sensation. Prerequisite: SPHSC 461, SPHSC 510.

SPHSC 514 Speech Physiology (3) Study of the physiological parameters of acoustic speech production. Prerequisite: SPHSC 320, SPHSC 461.

SPHSC 515 Speech Acoustics (3) Study of the acoustical correlates of the distinctive parameters of speech. Prerequisite: SPHSC 320, SPHSC 461, SPHSC 514.

SPHSC 516 Speech Perception (3) Study of the perceptual and linguistic parameters of speech perception. Prerequisite: SPHSC 320, SPHSC 461, SPHSC 515.

SPHSC 519 Seminar in Speech Science (2, max. 6).

SPHSC 520 Advanced Instrumentation for Speech and Hearing Sciences (3) Design and use of electronic and electroacoustic devices in the speech and hearing sciences. Four hours of laboratory required each week.

SPHSC 521 Instrumentation for Audiology (4) Introduction to basic instrumentation used in audiology and hearing science; detailed instruction in audiometer calibration including a review of current national and international standards pertinent to audiology; emphasis on use rather than theory. Prerequisite: permission of instructor.

SPHSC 522 Hearing Instrument Modification/Repair (1) Minor repair of hearing aids or associated accessories. Includes operation of hand tools and small power tools used in repair. Familiarity with different materials used to make or repair hearing aids/accessories. Troubleshooting damaged, malfunctioning, or inoperative instruments. Interpreting acoustic and electroacoustic test results to aid in troubleshooting or repair.

SPHSC 523 Special Topics (3) Applied and theoretical issues related to audiology. Weekly seminar includes guest speakers discussing current and future trends in science that relate to hearing and the practice of audiology.

SPHSC 525 Speech Signal Processing (3) Theory, evaluation, and use of speech signal processing algorithms such as sampling, filtering, spectral analysis, autocorrelation, and speech synthesis. Laboratory assignments develop skills in using signal analysis and synthesis software applied to normal and pathological speech.

SPHSC 531 Neurogenic Motor Speech Disorders (4) The nature of apraxia of speech and dysarthria and the assessment and treatment of those disorders. Prerequisite: SPHSC 501 or permission of instructor.

SPHSC 533 Medical Speech Pathology (3) Nature of speech pathology practiced in medical settings. Prerequisite: SPHSC 501, SPHSC 531, and SPHSC 532, or permission of instructor.

SPHSC 534 Special Topics in Dysphagia and Associated Disorders (2, max. 4) Anatomophysiologic bases of function and dysfunction associated with speech-language disorders. Mastication and swallowing problems, their causes, assessments, and management. Prerequisite: SPHSC 501 or permission of instructor.

SPHSC 535 Voice and Resonance Disorders (4) Physiology, acoustics, and perception of voice quality and speech resonance. Etiology, evaluation, and treatment of voice and resonance disorders.

SPHSC 537 Fluency Disorders (4) Characteristics of fluent speech and the nature and treatment of stuttering in children and adults are studied in relation to normal speech production processes, human learning, principal explanations of stuttering, and treatment systems.

SPHSC 538 Management of Acquired Cognitive Disorders (2) Epidemiology, neuropathology, assessment, and management of acquired cognitive disorders. Focus on traumatic brain injury in adults and children, dementia, and right brain injury. Prerequisite: SPHSC 501 and SPHSC 532 or permission of instructor.

SPHSC 540 Phonological Development (3) Selected topics in the developmental sequence of phonological systems in normal-speaking children. Relationships between possible phonological inventories and rule systems in different languages. Prerequisite: LING 451, LING 452, or permission of instructor. Offered: jointly with LING 540.

SPHSC 542 Counseling and Interactive Skills for Speech-Language Pathologists and Audiologists (2-3) Introduction to counseling theory and practice in speech-language pathologies, audiology, and related fields. Provides opportunities for learning and practicing counseling skills. Addresses key counseling issues, including professional boundaries, intense emotions, and counselor's feelings and reactions. Prerequisite: graduate standing or permission of instructor.

SPHSC 551 Advanced Practicum in Speech Pathology Evaluation (1-10, max. 10) Laboratory experience in the evaluation of speech and language disorders. Credit/no credit only. Prerequisite: SPHSC 536 and permission of instructor.

SPHSC 552 Advanced Practicum in Speech Pathology Management (1-10, max. 10) Laboratory experience in the management of speech and language disorders. Credit/no credit only. Prerequisite: permission of instructor.

SPHSC 555 Preinternship in Speech and Hearing Sciences (1-10, max. 10) Practicum in speech pathology or audiology designed to teach the clinical regimen of a participating professional center prior to assuming a full internship assignment. Credit/no credit only.

SPHSC 560 Studies in Speech Science and Disorders (3) Examines contemporary models and research paradigms in speech science and disorders. Topics include respiratory physiology, laryngeal physiology, aerodynamics of speech production, articulatory dynamics, speech acoustics, and speech perception.

SPHSC 561 Studies in Hearing Sciences and Disorders (3) Examines contemporary models and research paradigms in the area of hearing science and disorders. Topics include psychoacoustics; amplification; electrophysiologic evaluation; physiological acoustics; and perceptual consequences of hearing loss.

SPHSC 562 Studies in Language Science and Disorders (3) Examines research in the area of language science and disorders including word recognition and production; storage of retrieval of word form and meaning; production and production of sentences and discourse; and language in social context. Topics examined relative to development, language impairments, and normal language processing.

SPHSC 563 Proseminar: Instructional Development Forum (1, max. 3) Otswang Emphasizes instructional techniques and issues as they relate to teaching in the discipline of communication sciences and its disorders. Topics include course development, grading, student-faculty relations, teaching methods, and diversity. Credit/no credit only. Prerequisite: graduate standing in Speech and Hearing Sciences.

SPHSC 564 Teaching Practicum (1-5, max. 5) Provides experience in preparing and giving lectures, leading discussions, preparing and grading assignments and tests, and working directly with undergraduate and graduate students. Prerequisite: doctoral student standing and permission of instructor. Credit/no credit only. Offered: AWSpS.

SPHSC 565 Speech and Language Pathology Proseminar (1, max. 6) Consideration of professional issues and student and faculty research. Credit/no credit only.

SPHSC 566 Seminar in Speech-Language Development (2, max. 6) Prerequisite: permission of instructor.

SPHSC 567 Research Seminar in Speech and Hearing Sciences (1) A platform for the presentation and exchange of scientific information (research data, new hardware and software development, scientific papers) resulting from ongoing research projects by graduate students and faculty within the Speech and Hearing Sciences department. Credit/no credit only.

SPHSC 568 Grant Writing in Hearing, Language, and Speech Science (3) Design and writing of grant proposals in speech, language, and hearing sciences and disorders. Explanation of the funding process at various agencies, particularly the National Institutes of Health. Students prepare a proposal and review the proposals of their peers. Prerequisite: upper-level doctoral standing and permission of instructor.

SPHSC 569 Seminar in Speech-Language Pathology (2, max. 6).
SPHSC 570 Assessment of Auditory Dysfunction I (4) Strategies and procedures in the auditory evaluation of hearing-impaired adults. Use of diagnostic tests in the evaluation of auditory pathologies. Laboratory required. Prerequisite: SPHSC 471.

SPHSC 571 Assessment of Auditory Dysfunction II (4) Strategies and procedures in the auditory evaluation of hearing-impaired adults. Use of diagnostic tests in the evaluation of auditory pathologies. Laboratory required. Prerequisite: SPHSC 471.

SPHSC 572 Pediatric Audiology (3) Assessment of auditory disorders in infants and young children. Examination of behavioral and electrophysiologic techniques and on the role of the audiologist in the clinical management of the young hearing-impaired child. Prerequisite: SPHSC 471 or equivalent.

SPHSC 574 Assessment of Balance Function (4) Examines normal anatomy and physiology of the peripheral and central vestibular system. Reviews peripheral and central vestibular disorders and treatment protocols. Major focus of assessment on electronystagmography with associated lab. Provides overview of rotational and posturography measures of balance function. Prerequisite: permission of instructor.

SPHSC 575 Medical Backgrounds in Audiology (3) Diseases and injuries of the ear resulting in reduced audition. Prerequisite: SPHSC 571 or permission of instructor.

SPHSC 576 Otolacoustic Emissions (2) Consideration of otolacoustic emissions and the physiologic techniques used to record them. Includes interpretation of responses in both the normal and disordered auditory system as well as clinical application of emissions in both adult and infant populations. Laboratory required. Prerequisite: SPHSC 571, SPHSC 572, and SPHSC 573, or permission of instructor.

SPHSC 577 Industrial and Community Hearing Conservation (2) Psychophysiologic effects of environmental noise on man. Techniques of noise measurement and attenuation, including the planning of hearing conservation programs in industry and in the community. Prerequisite: SPHSC 471 or permission of instructor.

SPHSC 578 Hearing Screening (2) Consideration of hearing screening programs and the statistical techniques used to evaluate them. Includes history, rationale, and technical aspects of hearing screening as well as current models for developing neonatal, school-age, and adult hearing screening programs. Prerequisite: SPHSC 571, SPHSC 572, and SPHSC 573, or permission of instructor.

SPHSC 579 Geriatric Audiology (2) Examines the biological, psychological, and social aspects which are common correlates of the aging process, and those changes which are disorders. Emphasizes the identification and diagnosis of hearing problems associated with the aging process and their rehabilitation. Prerequisite: SPHSC 571.

SPHSC 580 Rehabilitative Audiology (3) Explores technology to enhance communication effectiveness of hearing impaired persons. Selection and training in the use of assistive systems and cochlear implants. Advanced perception assessment and training methodology. Prerequisite: SPHSC 571 and SPHSC 583.

SPHSC 581 Management of Hearing-Impaired Children (2) Management of hearing-impaired children, including identification of target behaviors and methods for modification such as individualized therapy programs and parent and teacher involvement.

SPHSC 582 Hearing Aid Amplification (4) Acoustic amplification and methods of determining electroacoustic characteristics. Includes earmold technology. Prerequisite: SPHSC 471 and SPHSC 570 or permission of instructor.

SPHSC 583 Hearing Aid Selection (4) Consideration of strategies utilized in selecting acoustic amplification for the hearing impaired including review of pertinent research literature. Prerequisite: SPHSC 582 or permission of instructor.

SPHSC 584 Advanced Amplification (3) Current topics in hearing aids and amplification technology; review of pertinent research articles. Prerequisite: SPHSC 582, 583.

SPHSC 585 Pediatric Amplification (2) Consideration of strategies utilized in selecting and verifying acoustic amplification for infants and children, including review of pertinent research literature. Prerequisite: SPHSC 582 or permission of instructor.

SPHSC 587 Ethics (1) Analysis and discussion of ethical considerations in the clinical practice of audiology, codes of professional organizations, and additional consideration of research ethics and ethics in neonatal hearing screening.

SPHSC 588 Audiology Proseminar (1, max. 3) Consideration of professional issues and student/faculty research in specific areas of interest. Credit/no credit only.

SPHSC 589 Seminar in Audiology (2, max. 6) Prerequisite: permission of instructor.

SPHSC 590 Cerumen Management for Audiologists (1) Review of anatomy and physiology of the external auditory canal. Examination of the physiology and pathophysiology of cerumen. Instrumentation of examining and cleaning the ear canal. Cerumen management procedures including otoscopy with normal and abnormal findings. Contraindications for cerumen management. Discussion of scope of practice, medical/legal issues, and reimbursement.

SPHSC 591 Advanced Practicum in Audiology (1-10, max. 10) Credit/no credit only. Prerequisite: permission of instructor.

SPHSC 593 Electrophysiologic Assessment I (3) Tremblay Examines evoked and event-related potentials including recording techniques, neurophysiological mechanisms, and applications to clinical populations. Offered: Sp.

SPHSC 599 Research Practicum (*, max. 12) Supervised laboratory experience in experimental approach to problems in speech and hearing sciences. Prerequisite: permission of instructor.

SPHSC 600 Independent Study or Research (*, max. 10) Prerequisite: permission of instructor.

SPHSC 601 Internship (1-10, max. 10) Supervised field experiences in settings other than public schools. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSpS.

SPHSC 602 Internship in the Schools (3-10, max. 10) Supervised field experience in a public school setting. Credit/no credit only. Prerequisite: permission of instructor.

SPHSC 700 Master's Thesis (*, max. 10).

SPHSC 800 Doctoral Dissertation (*, max. 10).

Statistics

STAT 111 Lectures in Applied Statistics (1) NW Weekly lectures illustrating the importance of statistics in a variety of fields, including medicine and the biological, physical, and social sciences. Contact instructor for information on emphasized fields of applications. Credit/no credit only. Offered: jointly with BI/OST 111; Sp.

STAT 220 Basic Statistics (5) NW, QSR Objectives and pitfalls of statistical studies. Structure of data sets, histograms, means, and standard deviations. Correlation and regression. Probability, binomial and normal. Interpretation of estimates, confidence intervals, and significance tests. (Students may receive credit for only one of 220, 311, and ECON 311.) Offered: AWSpS.

STAT 311 Elements of Statistical Methods (5) NW, QSR Elementary concepts of probability and sampling; binomial and normal distributions. Basic concepts of hypothesis testing, estimation, and confidence intervals; t-tests and chi-square tests. Linear regression theory and the analysis of variance. (Students may receive credit for only one of 220, 311, and ECON 311.) Prerequisite: either MATH 111, MATH 120, MATH 124, MATH 127, or MATH 144. Offered: AWSpS.

STAT 316 Design of Experiments and Regression Analysis (4) NW Kapur Introduction to the analysis of data from planned experiments. Analysis of variance for multiple factors and applications of orthogonal arrays and linear graphs for fractional factorial designs to product and process design optimization. Regression analysis with applications in engineering. Prerequisite: IND E 315. Offered: jointly with IND E 316.

STAT 320 Evaluating Social Science Evidence (5) I&S, QSR A critical introduction to the methods used to collect data in social science: surveys, archival research, experiments, and participant observation. Evaluates "facts and findings" by understanding the strengths and weaknesses of the methods that produce them. Case based. Offered: jointly with CS&SS 320/ SOC 320; A.

STAT 390 Probability and Statistics in Engineering and Science (4) NW Concepts of probability and statistics. Conditional probability, independence, random variables, distribution functions. Descriptive statistics, transformations, sampling errors, confidence intervals, least squares and maximum likelihood. Exploratory data analysis and interactive computing. Students may receive credit for only one of 390, STAT/ECON 481, and ECON 580. Prerequisite: either MATH 126 or MATH 136. Offered: jointly with MATH 390; AWSpS.

STAT 391 Probability and Statistics for Computer Science (4) NW Meets Fundamentals of probability and statistics from the perspective of the computer scientist. Random variables, distributions and densities, conditional probability, independence. Maximum likelihood, decision theory, Markov chains, classification, Applications in computer science. Prerequisite: 2.5 in MATH 126; 2.5 in MATH 308; either CSE 326, CSE 373, CSE 417, or CSE 421.

STAT 394 Probability I (3) NW Sample spaces; basic axioms of probability; combinatorial probability; conditional probability and independence; binomial, Poisson and normal distributions; central limit theorem; random walk. Prerequisite: either 2.0 in MATH 126, or 2.0 in MATH 136; recommended: MATH 324 or MATH 327. Offered: jointly with MATH 394; AWS.

STAT 395 Probability II (3) NW Random variables; expectation and variance; laws of large numbers; normal approximation and other limit theorems; multidimensional distributions and transformations. Prerequisite: 2.0 in STAT/MATH 394. Offered: jointly with MATH 395; WSpS.

STAT 396 Probability III (3) NW Characteristic functions and generating functions; recurrent events and renewal theory; random walk. Prerequisite: either 2.0 in MATH 395 or 2.0 in STAT 395. Offered: jointly with MATH 396; Sp.

STAT 400 Mathematical Communication for Undergraduates (2) NW Techniques of effective writing and oral presentations in the mathematical sciences. Offered: jointly with AMATH 400/ MATH 400. Prerequisite: at least 15 credits in MATH, STAT, AMATH, or CSE at the 300 or 400 level, including MATH 307 or AMATH 351 and MATH 308 or AMATH 352.

STAT 403 Introduction to Resampling Inference (4) NW Introduction to computer-intensive data analysis for experimental and observational studies in empirical sciences. Students design, program, carry out, and report applications of bootstrap resampling, randomization, permutation, and subsampling of cases. Credit allowed for 403 or 503 but not both. Prerequisite: either STAT 220, STAT 301, STAT/ECON 311, STAT 341, STAT/MATH 390, or STAT/ECON 481. Offered: Sp.

STAT 425 Introduction to Nonparametric Statistics (3) NW Overview of nonparametric methods, such as rank tests, goodness of fit tests, x^2 tables, nonparametric estimation. Useful for students with only a statistical methods course background. Prerequisite: STAT/MATH 390. Offered: jointly with BIOST 425; when demand is sufficient.

STAT 427 Introduction to Analysis of Categorical Data (4) NW Techniques for analysis of count data. Log-linear models, logistic regression. Multinomial sampling, ordered response, contingency tables, clustering. Illustrations from the behavioral and biological sciences. Computational procedures. Prerequisite: either STAT 342, STAT 362, or STAT 421. Offered: alternate years.

STAT 428 Multivariate Analysis for the Social Sciences (4) NW Multivariate techniques commonly used in the social and behavioral sciences. Linear models for dependence analysis (multivariate regression, MANOVA, and discriminant analysis) and for interdependence analysis (principal components and factor analysis). Techniques applied to social science data using computer statistical packages. Prerequisite: either STAT 342, STAT 362, or STAT 421. Offered: alternate years.

STAT 430 Sampling Theory for Biologists (3) NW Gallucci, Rustagi Theory and applications of sampling finite populations including: simple random sampling, stratified random sampling, ratio estimates, regression estimates, systematic sampling, cluster sampling, sample size determinations, applications in fisheries and forestry. Other topics include sampling plant and animal populations, sampling distributions, estimation of parameters and statistical treatment of data. Prerequisite: Q SCI 483, recommended: Q SCI 482. Offered: jointly with Q SCI 480; even years.

STAT 467 Stochastic Process Theory I (4) NW An introduction to stochastic processes. Prerequisite: MATH 302, MATH 314, or MATH 324. Offered: W.

STAT 491 Introduction to Mathematical Statistics (5) NW Probability, generating functions; the d-method, Jacobians, Bayes theorem; maximum likelihood, Neyman-Pearson, likelihood, decision theory, regression, correlation, bivariate normal. (Credit allowed for only one of 390, 481, and ECON 580.) Prerequisite: STAT/ECON 311; either MATH 136 or MATH 126 with either MATH 308 or MATH 309. Recommended: MATH 324. Offered: jointly with CS/SS/ECON 481; A.

STAT 492 Stochastic Calculus for Option Pricing (3) NW Introductory stochastic calculus mathematical foundation for pricing options and derivatives. Basic stochastic analysis tools, including stochastic integrals, stochastic differential equations, Ito’s formula, theorems of Girsanov and Feynman-Kac, Black-Scholes option pricing, American and exotic options, bond options. Prerequisite: STAT MATH 394-5. Offered: jointly with MATH 492; W.

STAT 498 Special Topics (1-5, max. 15) NW Reading and lecture course intended for special needs of students. Offered: when demand is sufficient.

STAT 499 Undergraduate Research (1-5, max. 15) Offered: AWSpS.

STAT 502 Design and Analysis of Experiments (4) NW Design of experiments covering concepts such as randomization, blocking, and confounding. Analysis of experiments using randomization tests, analysis of variance, analysis of covariance. Prerequisite: either STAT 342, MATH/MATH 390, STAT 421, STAT/ECON 481, ECON 580 or equivalent; MATH 308 or equivalent. Offered: A.

STAT 506 Applied Probability and Statistics (4) NW Discrete and continuous random variables, independence and conditional probability, central limit theorem, elementary statistical estimation and inference, linear regression. Emphasis on physical applications. Prerequisite: some advanced calculus and linear algebra. Offered: jointly with AMATH 506.

STAT 510 Statistical Inference I (4) NW Review of random variables; transformations, conditional expectation, moment generating functions, convergence, limit theorems, estimation; Cramer-Rao lower bound, maximum likelihood estimation, sufficiency, ancillarity, completeness. Rao-Blackwell theorem. Hypothesis testing: Neyman-Pearson lemma, monotone likelihood ratio, likelihood-ratio tests, large-sample theory. Contingency tables, confidence intervals, invariance. Introduction to decision theory. Prerequisite: STAT 395 and STAT 421, STAT 423, STAT 504, or BIOL 502 (concurrent registration permitted for these three). Offered: A.

STAT 516 Stochastic Modeling of Scientific Data (4) Markovian and semi-Markovian models, point processes, cluster models, queuing models, likelihood methods, estimating equations. Prerequisite: STAT 511 or STAT 396. Offered: A.

STAT 517 Stochastic Modeling of Scientific Data (4) Markovian and semi-Markovian models, point processes, cluster models, queuing models, likelihood methods, estimating equations. Prerequisite: STAT 516. Offered: W.

STAT 518 Stochastic Modeling Project (4) Supervised, applied project based on stochastic modeling of scientific data. Prerequisite: STAT 517. Offered: Sp.

STAT 521 Advanced Probability (3) Measure theory and integration, independence, laws of large numbers. Fourier analysis of distributions, central limit problem and infinitely divisible laws, conditional expectations, martingales. Prerequisite: either MATH 426 or MATH 576. Offered: jointly with MATH 521; A.

STAT 522 Advanced Probability (3) Measure theory and integration, independence, laws of large numbers. Fourier analysis of distributions, central limit problem and infinitely divisible laws, conditional expectations, martingales. Prerequisite: either MATH 426 or MATH 576. Offered: jointly with MATH 522; W.

STAT 523 Advanced Probability (3) Measure theory and integration, independence, laws of large numbers. Fourier analysis of distributions, central limit problem and infinitely divisible laws, conditional expectations, martingales. Prerequisite: either MATH 426 or MATH 576. Offered: jointly with MATH 523; Sp.

STAT 524 Design of Medical Studies (3) Emphasis on randomized controlled clinical trials. Bias elimination, control, treatment assignment and randomization, precision, replication, power and sample size calculations, stratification, and ethics. Suitable for students in biostatistics and other scientific fields. Prerequisite: BIOST 511 or equivalent, and one of STAT 421, STAT 423, BIOST 513, BIOST 518, or EPI 512; or permission of instructor. Offered: jointly with BIOST 524; even years.

STAT 529 Sample Survey Techniques (3) Design and implementation of selection and estimation procedures. Emphasis on human populations. Simple, stratified, and cluster sampling; multistage and two-phase procedures; optimal allocation of resources; estimation theory; replicated designs; variance estimation; national samples and census materials. Prerequisite: either STAT 421, STAT 423, STAT 504, QMTH 500, BIOST 511, or BIOST 517, or equivalent; or permission of instructor. Offered: jointly with BIOST 529/CS&SS 529.

STAT 533 Classical Theory of Linear Models (3) Introduction to one-, two-way analysis of variance; randomized blocks; fixed, random effects, multiple comparisons. Statistical distribution theory for quadratic forms of normal variables. Fitting of the general linear model by least squares. Prerequisite: STAT 421 or STAT 423; and STAT 513, BIOST 515, and a course in matrix algebra. Offered: jointly with BIOST 533; Sp.

STAT 534 Statistical Computing (3) Introduction to scientific computing. Includes programming tools, modern programming methodologies, (modularization, object oriented design), design of data structures and algorithms, numerical computing and graphics. Uses C++ for several substantial scientific programming projects. Prerequisite: experience with programming in a high level language. Offered: jointly with BIOST 534; Sp.

STAT 535 Statistical Computing (3) Introduction to scientific computing. Includes programming tools, modern programming methodologies, (modularization, object oriented design), design of data structures and algorithms, numerical computing and graphics. Uses C++ for several substantial scientific programming projects. Prerequisite: experience with programming in a high level language. Offered: jointly with BIOST 535; A.

STAT 538 Statistical Computing (3) Introduction to scientific computing. Includes programming tools, modern programming methodologies, (modularization, object oriented design), design of data structures and algorithms, numerical computing and graphics. Uses C++ for several substantial scientific programming projects. Prerequisite: experience with programming in a high level language. Offered: jointly with BIOST 538; W.

Prerequisite: SOC 424, SOC 425, SOC 426, or equivalent; recommended: CS&SS 505 and CS&SS 506, or equivalent. Offered: jointly with SOC 536/CS&SS 536.

STAT 542 Multivariate Analysis (3) Multivariate normal distribution; partial and multiple correlation; Hotelling’s T²; Bartlett’s decomposition; various likelihood ratio tests; discriminant analysis; principal components; graphical Markov models. Prerequisite: STAT 582 or permission of instructor. Offered: alternate years.

STAT 547 Derivatives: Theory, Statistics, and Computation (4) Covers theory, statistical modeling, and statistics of options and derivatives pricing, including options on stocks, stock indices, futures, currencies, and interest rate derivatives. Prerequisite: STAT 506 or equivalent, or permission of instructor. Recommended: ECON 424.

STAT 549 Statistical Methods for Portfolios (4) Covers the fundamentals of modern statistical portfolio construction and risk measurement, including theoretical foundations, statistical methodology, and computational methods using modern object-oriented software for data analysis, statistical modeling, and numerical portfolio optimization. Prerequisite: ECON 424 or equivalent, or permission of instructor.

STAT 551 Statistical Genetics II: Quantitative Traits (3) Monks Statistical basis for describing variation in quantitative traits. Decomposition of trait variation into components representing genes, environment and gene-environment interaction. Methods of mapping and characterizing quantitative trait loci. Prerequisite: STAT/BIOST 550; STAT 423 or BIOST 515; or permission of instructor. Offered: jointly with BIOST 551; W.

STAT 561 Special Topics in Applied Statistics (1-5, max. 15) Data analysis, spectral analysis or robust estimation. Prerequisite: permission of instructor.

448
STAT 562 Special Topics in Applied Statistics (1-5, max. 15) Data analysis, spectral analysis or robust estimation. Prerequisite: permission of instructor.

STAT 563 Special Topics in Applied Statistics (1-5, max. 15) Data analysis, spectral analysis or robust estimation. Prerequisite: permission of instructor.

STAT 570 Advanced Applied Statistics and Linear Models (3) Generalized linear models, REML in mixed models for randomized blocks, split plots, longitudinal data. Generalized estimating equations, empirical model building, cross validation, recursive partitioning, generalized additive models, projection pursuit. Prerequisite: STAT 513; STAT 533 or STAT 421 and STAT 423, and a course in matrix algebra for STAT 570. Offered: jointly with BIOST 570; A.

STAT 573 Statistical Methods for Categorical Data (3) Advanced topics in generalized linear models and the analysis of categorical data: overdispersion, quaslikelihood, parameters in link and variance functions, exact conditional inference, random effects, saddlepoint approximations. Credit/no credit only. Prerequisite: STAT 571 and STAT 582. Offered: jointly with BIOST 573; alternate years.

STAT 574 Multivariate Statistical Methods (3) Use of multivariate normal sampling theory, linear transformation of random variables, one- and two-sample tests, profile analysis, partial and multiple correlation, multivariate ANOVA and least squares, discriminant analysis, principal components, factor analysis, robustness, and some special topics. Some computer use included. Prerequisite: STAT 570 or permission of instructor. Offered: jointly with BIOST 574; alternate years.

STAT 576 Statistical Methods for Survival Data (3) Statistical methods for censored survival data. Covers parametric and nonparametric methods, Kaplan-Meier survival curve estimator, comparison of survival curves, log-rank test, regression models including the Cox proportional hazards model, competing risks. Prerequisite: STAT 581 and either STAT 423, BIOST 515, or Q SCI 483, or equivalent. Offered: jointly with BIOST 576; alternate years.

STAT 577 Advanced Design and Analysis of Experiments (3) Concepts important in experimental design: randomization, blocking, confounding, Application and analysis of data from randomized blocks designs, Latin and Graeco-Latin squares, incomplete blocks designs, split-plot and repeated measures, factorial and fractional replicates, response

STAT 578 Special Topics in Advanced Biostatistics (*, max. 3) Advanced-level topics in biostatistics offered by regular and visiting faculty members. Prerequisite: permission of instructor. Offered: jointly with BIOST 578.

STAT 579 Data Analysis and Reporting (2) Analysis of real data to answer scientific questions. Common data-analytic problems, Sensible approaches to complex data. Graphical and tabular presentation of results. Writing reports for scientific journals, research collaborators, consulting clients. Graduate standing in statistics or biostatistics or permission of instructor. Offered: jointly with BIOST 579; AWSp.

STAT 581 Advanced Theory of Statistical Inference (3) Limit theorems, asymptotic methods, asymptotic efficiency and efficiency bounds for estimation, maximum likelihood estimation, Bayes methods, asymptotics via derivatives of functions, sample-based estimates of variability: (bootstrap and jackknife); robustness; estimation for dependent data, nonparametric estimation and testing. Prerequisite: STAT 513; either MATH 426 or MATH 576. Offered: A.

STAT 582 Advanced Theory of Statistical Inference (3) Limit theorems, asymptotic methods, asymptotic efficiency and efficiency bounds for estimation, maximum likelihood estimation, Bayes methods, asymptotics via derivatives of functions, sample-based estimates of variability: (bootstrap and jackknife); robustness; estimation for dependent data, nonparametric estimation and testing. Prerequisite: STAT 581. Offered: W.

STAT 583 Advanced Theory of Statistical Inference (3) Limit theorems, asymptotic methods, asymptotic efficiency and efficiency bounds for estimation, maximum likelihood estimation, Bayes methods, asymptotics via derivatives of functions, sample-based estimates of variability: (bootstrap and jackknife); robustness; estimation for dependent data, nonparametric estimation and testing. Prerequisite: STAT 582. Offered: Sp.

STAT 586 Martingales: Survival Analysis (3) Theory of counting processes and martingales to provide unified study of survival analysis methods. Focus on survival distribution estimators, censored data rank statistics, regression methods with censored survival data. Development of small samples moments, asymptotic distributions, and efficiencies. Prerequisite: STAT 521 or STAT 583 or permission of instructor; recommended: STAT 576. Offered: jointly with BIOST 586; W.

STAT 590 Statistics Seminar (*, max. 15) Credit/no credit only. Prerequisite: permission of graduate program coordinator. Offered: AWSp.

STAT 591 Special Topics in Statistics (1-5, max. 15) Distribution-free inference, game and decision theory, advanced theory of estimation (including sequential estimation), robustness, advanced probability theory, stochastic processes or empirical processes. Prerequisite: permission of instructor. Offered: A.

STAT 592 Special Topics in Statistics (1-5, max. 15) Distribution-free inference, game and decision theory, advanced theory of estimation (including sequential estimation), robustness, advanced probability theory, stochastic processes or empirical processes. Prerequisite: permission of instructor. Offered: W.

STAT 593 Special Topics in Statistics (1-5, max. 15) Distribution-free inference, game and decision theory, advanced theory of estimation (including sequential estimation), robustness, advanced probability theory, stochastic processes or empirical processes. Prerequisite: permission of instructor. Offered: Sp.

STAT 598 Techniques of Statistical Consulting (1) Seminar series covering technical and non-technical aspects of statistical consulting, including skills for effective communication with clients, report writing, statistical tips and rules of thumb, issues in survey sampling, and issues in working as a statistical consultant in academic, industrial, and private-practice settings. Prerequisite: entry code. Offered: jointly with BIOST 598; ASp.

STAT 600 Independent Study or Research (*) Prerequisite: permission of graduate program coordinator. Offered: AWSp.

STAT 700 Master’s Thesis (*) Prerequisite: permission of graduate program coordinator. Offered: AWSp.

STAT 800 Doctoral Dissertation (*) Prerequisite: permission of graduate program coordinator. Offered: AWSp.

Women Studies

WOMEN 200 Introduction to Women Studies (5) I&S Feminist analysis of the construction and enforcement of gender differences and gender inequalities in various contexts. Emphasis on the intersection of race, class, sexuality, and nation. Topics include feminist theory, motherhood, popular culture, sexual autonomy, racism, and activism in the United States, Asia, Latin America. Offered: AWSp.

WOMEN 206 Philosophy of Feminism (5) I&S Philosophical analysis of the concepts and assumptions central to feminism. Theoretical positions within the feminist movement; meaning of the ideal society, goals and strategies of the movement, intersections of the sex-gender system with other systems of oppression. Offered: jointly with PHIL 206/POL S 5 212.

WOMEN 207 Introduction to Feminist Theories (5) I&S Introduction to the multiplicity of feminist theories in both the United States and transnational contexts; examination of the histories of different theoretical positions and their relationship to feminist praxis. Topics include feminist analysis of knowledge production, power, and the categories of gender, race, class, sexualities, ethnicity, and nation.

WOMEN 257 Psychology of Gender (5) I&S Kenney Major psychological theories of gender-role development; biological and environmental
influences that determine and maintain gender differences in behavior, roles in children and adults; topics include aggression, cognitive abilities, achievement motivation, affiliation. Recommended: either PSYCH 101, PSYCH 102, or WOMEN 200. Offered: jointly with PSYCH 257.

WOMEN 283 Introduction to Women's History (5) I&S Includes units on American, European, and Third World women that examine centers of women's activity, women's place in male-dominated spheres (politics), women's impact on culture (health, arts), and the effect of larger changes on women's lives (technology, colonization). Offered: jointly with HIST 283; A.

WOMEN 290 Special Topics in Women Studies (2-5, max. 15) I&S Exploration of specific problems and issues relevant to the study of women. Offered by visiting or resident faculty members.

WOMEN 299 Women Studies Community in Colloquia (2) I&S Introduces new majors to the field of women's studies. Includes helping students develop a course of study for their major, meeting their departmental advisor and the faculty. Students are encouraged to take this course immediately upon declaring the major. May be linked to service learning.

WOMEN 302 Research Methods in Women Studies (5) I&S Jacobs Explores appropriate research methodologies for interdisciplinary work in women studies. Examines current debates and issues in feminist methodologies and critiques of methodology. Use of historical documents and theoretical texts. Computer applications in research in women studies. Prerequisite: either WOMEN 200 or WOMEN 206.

WOMEN 305 Feminism in an International Context (5) I&S Ramamurthy, Sunindyo Women and feminism from global theoretical perspectives. Critical theoretical ways of thinking about feminism. How women are differently situated throughout the world. How they are represented affects women's agency. Focus on how race and gender affect one another. Representations of and by women throughout the world.

WOMEN 310 Women and the Law (5) I&S Examines how laws address women, how the courts have made attempts to address women of color, poor women, lesbians, and women with disabilities. Topics include constitutional construction of equality, employment discrimination, reproductive rights, regulation of sexuality, families and motherhood, sexual harassment, violence against women and international women and human rights.

WOMEN 313 Women in Politics (5) I&S DiStefano Theoretical, historical, and empirical studies of women's participation in political and social movements. Women's diverse efforts to improve their political, social, and economic status. Policy issues of particular concern to women. Women's political experiences in household, local, regional, national, and international arenas Offered: jointly with POL S 313.

WOMEN 321 History of Afro-American Women and the Feminist Movement (5) I&S "Feminist Movement" from early nineteenth century to present. Treats relationship between Black and White women in their struggle for independence, at times together and at times apart. Discusses the reasons, process, and results of collaboration as well as opposition. Examines recent and contemporary attempts at cooperation. Offered: joint with AFRAM 321.

WOMEN 322 Race, Class, and Gender (5) I&S Ramamurthy, Sunindyo The intersection of race, class, and gender in the lives of women of color in the United States from historical and contemporary perspectives. Topics include racism, classism, sexism, activism, sexuality, and inter-racial dynamics between women of color groups. Offered: jointly with AEB 322.

WOMEN 323 History of Racial Formation in the United States: 1800-1990 (5) I&S Yee Traces the development of the concept of race in the United States from the nineteenth century to the late twentieth century. Specific topics include paid and unpaid labor, media, reproduction, migration, social activism, and the processes of identity and community formation.

WOMEN 333 Gender and Globalization: Theory and Process (5) I&S Ramamurthy Theoretical, historical, and empirical analysis of how current processes of globalization are transforming the actual conditions of women's lives, labor, gender ideologies, and politics in complex and contradictory ways. Topics include feminist exploration of Colonialism, Capitalism, economic restructuring, and resistance in consumer and environmental movements. Offered: jointly with SIS 333.

WOMEN 339 Social Movements in Contemporary India (5) Ramamurthy, Swaramakrishnan Covers issues of social change, economic development, and identity politics in contemporary India studied through environmental and women's movements. Includes critiques of development and conflicts over forests, dams, women's rights, religious community, ethnicity, and citizenship. Offered: jointly with ANTH 339/ SISA 339.

WOMEN 341 Native Women in the Americas (5) I&S Historiography, sociology, biography, autobiography, and fiction about native women in the United States and Canada. Offered: jointly with AIS 341; AWSQS.

WOMEN 350 Women in Law and Literature (5) I&S/ VLPA Tupper Representations of women in American law and literature. Considers how women's political status and social roles have influenced legal and literary accounts of their behavior. Examines how legal cases and issues involving women are represented in literary texts and also how law can influence literary expression. Offered: jointly with CHID 350.

WOMEN 351 Women of Color as Cross-Cultural Artists (5) I&S/ VLPA Habell-Pallan Provides a historical context for artistic forms produced by racialized women. Examines the cultural production of Chicanas and Latinas in relation to that Native American, African American, East and South Asian American , and Arab American women as well as those women of mixed heritage in the U.S. Offered: jointly with AES 310.

WOMEN 353 Anthropological Studies of Women (5) I&S Jacobs Critical examination of the intersections between anthropology, research on gender issues, and feminism. Readings and class discussions examine the ways women have been represented in the field of anthropology and the repercussions of these anthropological images of women on contemporary understandings of gender. Offered: jointly with ANTH 353; W.

WOMEN 355 Men and Masculinity (5) I&S Clatterbaugh Critical study of systematic responses of men to feminist movements, including conservative, pro-feminist, men’s rights, mythopoetic, and religious responses. How men of color and gay men view these various men's movements and their issues. Special attention given to philosophical problems such as nature of oppression, human nature, justice, and masculinity. Recommended: WOMEN 200.

WOMEN 357 Psychobiology of Women (5) NW Kenney Physiological and psychological aspects of women’s lives: determinants of biological sex; physiological and psychological events of puberty, menstruation, and menopause; sexuality; pregnancy, childbirth; the role of culture in determining the psychological response to the physiological events. Recommended: PSYCH/WOMEN 257. Offered: jointly with PSYCH 357.

WOMEN 383 Social History of American Women to 1890 (5) I&S Yee A multi-racial, multicultural study of women in the United States from the 17th century to 1890 emphasizing women’s unpaid work, participation in the paid labor force, charitable and reform activities, and 19th century social movements. Uses primary materials such as diaries, letters, speeches, and artifacts. Offered: jointly with HSTAA 373; W.

WOMEN 384 Social History of American Women in the 20th Century (5) I&S Analyzes major themes in the history of women in North America from 1890 through the 1990s. Themes include family and community formation, social activism, education, paid and unpaid labor patterns, war, migration, and changing conceptions of womanhood and femininity in the 20th century. Offered: jointly with HSTAA 374.

WOMEN 404 Critical Pedagogies of Social Change (5) I&S Examines theories of critical pedagogy as developed in struggles against race, class, and gender oppression in the U.S. and transnationally. Topics include the relation between theory and practice, the position of the educators in struggles for social change, and the role of the arts in movement-building. Offered: jointly with AES 404.

WOMEN 405 Comparative Women’s Movements and Activism (5) I&S Sunindyo Comparative cultural, national, and historical study of women’s movements and activism. Critically analyzes multiple arenas of women’s movements and resistance. Topics include feminist antiracism, pre-nationalism and nationalism, economics, electoral politics, women’s and human rights, and international/
transnational feminisms. Prerequisite: either WOMEN 205, WOMEN 305, or SOC 364.

WOMEN 435 Gender and Spirituality (5) I&S Exploration of ways in which gender informs spiritual teachings and practices of different groups in ancient and contemporary times, with particular attention to the relationship between spiritual beliefs and the construction of social, psychological, and political realities.

WOMEN 438 Jewish Women in Contemporary America (5) I&S Examines how Jewish women’s identities are socially constructed and transformed in contemporary America, using social histories, memoirs, and ethnographies to analyze scholars’ approaches to Jewish women’s lives. Topics include the role of social class, religion, migration, the Holocaust, and race relations in Jewish women’s lives. Offered: jointly with SJUE 438.

WOMEN 440 Reading Native American Women’s Lives (5) I&S Jacobs, Ross Seminar based on social science writings, autobiographies, biographies, and fiction written by, with, or about indigenous women of the United States and Canada. Offered: jointly with AIS 440.

WOMEN 442 Images of Natives in the Cinema and Popular Cultures (5) I&S Examines the role of Native Americans in cinema and popular culture based on social science writings and films by or about natives in the United States and Canada. Offered: jointly with AIS 442.

WOMEN 447 Economics of Gender (5) I&S Rose Microeconomic analysis of the sources of gender differences in earnings, labor force participation, occupational choice, education, and consumption. Economic theories of discrimination, human capital, fertility and intrahousehold resource allocation. Economics of the family in developed and developing countries. Prerequisite: ECON 300. Offered: jointly with ECON 447.

WOMEN 450 Language and Gender (5) I&S, VLPA Bilanikv Survey of the theoretical trends, methods, and research findings on the relationship between language and gender. Focus on power relations in gendered language use. Extensive study of research based on conversational analysis. Prerequisite: LING 201; either LING 201, LING 203, or ANTH 203. Offered: jointly with ANTH 450/LING 458.

WOMEN 451 Latina Cultural Production (5) I&S Examines the expressive culture of Chicanas/Mexican American/Latinas in the United States. Cultural and artistic practices in home and in literary, music, film, spoken word, performing and visual arts. Focuses on how Chicanas/Latinas writers and artists re-envision traditional iconography. Offered: jointly with CHSTU 410.

WOMEN 453 Lesbian Lives and Culture (5) I&S An exploration and overview of lesbianism in historical, social, cultural, and interpersonal contexts. Prerequisite: either WOMEN 200 or WOMEN 206.

WOMEN 454 Women, Words, Music, and Change (5) I&S Examines the role of language and music in the lives of women. Offered: jointly with VLPA 454.

WOMEN 455 Contemporary Feminist Theory (5) I&S Influences feminist theory and geography (women, gender, and the organization of space); women and urban poverty, housing and homelessness; gender roles and labor patterns; and ethnographies of childcare; and women and urban politics. Recommended: WOMEN 353. Offered: jointly with ANTH 454.

WOMEN 457 Women in China to 1800 (5) I&S Ebrey Gender in Chinese culture, women’s situations in the patrilineal family system, and the ways women’s situations changed as other dimensions of China’s political system, economy, and culture changed from early times through the nineteenth century. Offered: jointly with HSTAS 457.

WOMEN 462 Isak Dinesen and Karen Blixen (5) I&S Barlow The fiction of Isak Dinesen (pseudonym for Karen Blixen), her reevaluation of literature and critical thinking about a transnational feminism. Offered: jointly with ANTH 462.

WOMEN 468 Latin American Women (5) I&S/ VLPA Steele The elaboration of discourses of identity in relation to gender, ethnicity, social class, and nationality, by women writers from South America, Mexico, Central America, and the Caribbean. Testimonial literature, literature and resistance, women’s experimental fiction. Prerequisite: either SPAN 303 or SPAN 316; SPAN 321; one additional 300-level course above SPAN 303. Offered: jointly with SPAN 468.

WOMEN 476 Women and the City (5) I&S England Explores the reciprocal relations between gender relations, the layout of cities, and the activities of urban residents. Topics include feminist theory and geography (women, gender, and the organization of space); women and urban poverty, housing and homelessness; gender roles and labor patterns; and ethnographies of childcare; and women and urban politics. Offered: jointly with GEOG 476.
WOMEN 483 Topics in U.S. Women's History (5, max. 10) I&S Yee Selected topics in United States women's history from the nineteenth and twentieth centuries. Prerequisite: either WOMEN 200, WOMEN 283, or WOMEN 383.

WOMEN 485 Issues for Ethnic Minorities and Women In Science and Engineering (3/5) I&S Addresses issues faced by women and ethnic minorities in physical sciences and engineering. Focuses on participation, barriers to participation, and solutions for women and ethnic minorities in physical sciences and engineering. Offered: jointly with PHYS 451.

WOMEN 488 Women and/In Science (5) I&S Girodio Explores science as a method of inquiry and as a profession while also expanding knowledge about women through the use of biographies of women scientists, discipline-based and feminist critiques, and the psycho-social concept of socially defined identities. Recommended: one Women Studies course and one college-level science course.

WOMEN 489 Ethnicity, Gender, and Media (5) I&S Baid tasty Media portrayal of women and people of color; creation of alternative media systems by women and people of color in the United States. Offered: jointly with COM 489/AES 489.

WOMEN 490 Special Topics in Women Studies (2-5, max. 15) I&S Exploration of specific problems and issues relevant to the study of women. Offered by visiting or resident faculty members. Primarily for upper-division and graduate students.

WOMEN 494 Women Studies Capstone (5) I&S Provides graduating seniors with the opportunity to demonstrate facility with writing, critical thinking, documentation of scholarly work, research/gathering of information, and the ability to disseminate ideas to intended audiences via the creation of a capstone project. Offered: AWSpS.

WOMEN 495 Tutoring Women Studies (5) Students train to serve as tutors in designated courses. Facilitate weekly group discussions, assist with writing assignments, explain course materials. Credit/no credit only.

WOMEN 496 Global Feminisms: Women Studies International and Indigenous (3-5, max. 10) Participation in academic programs related to Women Studies emphasizing globalization and study in international contexts or indigenous communities within the United States. Credit/no credit only. Prerequisite: WOMEN 200.

WOMEN 497 Fieldwork in Women Studies (1-15, max. 15) Internships in local agencies. Allows development of specific skills in area of specialization. Credit/no credit only. Offered: AWSpS.

WOMEN 499 Undergraduate Research (1-5, max. 10) Independent study and research supervised by a faculty member with appropriate academic interest. Offered: AWSpS.

WOMEN 501 History of Feminism (5) Barlow, Yee Study of feminism from the 18th through the 20th centuries in the national, international, and intranational world system, with a focus on imperialism, colonialism, nationalism, and modernity. Surveys the literature in a global context, supplemented by critical essays and historiographic reviews.

WOMEN 502 Cross Disciplinary Feminist Theory (5) Barlow Raises questions about how feminism becomes theory and what the relationship of feminist theory is to conventional disciplines. Readings exemplify current crises in feminism (e.g., the emergence of neo-materialism; critical race theory; citizenship; identity; transnational and migrancy and questions of post-colonialism) to consider disciplinization.

WOMEN 503 Feminist Research and Methods of Inquiry (5) Allen Explores appropriate research methodologies for interdisciplinary work. Asks how scholarship is related to feminism as a social movement and to the institutions in which we work. Focuses on how similar objects of study are constituted in different disciplines for feminist scholars. Offered: Sp.

WOMEN 504 Philosophies and Techniques of Teaching (5) Acquaints students with professional and educational issues of college teaching. Students design a course, including a daily outline, reading materials, evaluation instruments, class activities, assessment plans. Includes weekly teaching exercises as well as videotaping an actual class. Prerequisite: experience as a TA or equivalent. Priority given to Women Studies graduate students.

WOMEN 505 Feminist Publishing (5) Howard Seminar on feminist academic publishing. Students revise a scholarly paper in preparation for submission to an academic journal and provide critical commentary on other students' scholarly work. Also addresses general and specific issues related to the profession of academic publishing.

WOMEN 512 Critical and Interdisciplinary Approaches to Women's Health (3) Ensign, Schroeder Critical examination of the historical, socio-political, and scientific influences on women's health. Issues of sexism, racism, and heterosexism discussed from the perspective of different disciplines. Offered: jointly with NURS 512; W.

WOMEN 513 Seminar in Contemporary Women's Health Issues (1-5, max. 12) Critical analysis of contemporary and historical literature relevant to health care for women across the life span. Synthesis of a holistic view of women's health to guide research and practice. Offered: jointly with NURS 513.

WOMEN 534 Feminism and History of Women in China (5) Explores historical question of gendered subjects in modern China and feminism of Chinese women's stories of emancipation of Chinese women asking how these render invisible other kinds of history. Prerequisite: background in China studies or ability to handle Chinese primary sources.

WOMEN 539 Social Movements in Contemporary India (5) Ramamurthy, Swaramakrishnan Covers issues of social change, economic development, and identity politics in contemporary India studied through environmental and women's movements. Includes critiques of development and conflicts over forests, dams, women's rights, religious community, ethnicity, and citizenship. Offered: jointly with SISSA 539/ ANTH 539.

WOMEN 546 Gender and Colonialism in Eastern Asia (5) Economic-political colonization, post colonialism, and statist-gendered citizenship; intra-Asian subimperial structuring domestic production, family, and gendered subjectivities; humanism and the New Woman; modern contests over new masculinity and new femininity; and the effect of war, imperialist occupation and colonial modernity on interregional flows of ideas, labor, capital, and jurisprudence. Offered: jointly with HSTAS 546, AWSpS.

WOMEN 547 Gender and the New International Division of Labor in Asia Pacific (5) Shift of the dynamic relation of gender, state, and citizens from modernization (national development) to globalization (intraglobal development) strategies in Pacific Asia, 1945 to present. Consumption, service provision, migratory labor, intra-Asian investment, localization. Offered: jointly with HSTAS 547.

WOMEN 553 Discourses in Feminist Anthropology Seminar (5) Jacobs Exploration of feminist anthropological theories and the works of their critics. Ways of using feminist anthropology in preparation for and conducting fieldwork. Topics include foundations in feminist anthropology, grand theories, variation in feminist theoretical foci within the "four fields," responses to critics. Prerequisite: graduate standing. Offered: jointly with ANTH 555; W.

WOMEN 556 Discourse and Sexuality (5) Seminar-based analysis of discourse and social construction of eroticism/desire in face-to-face/mediated talk and texts; examination of the reproduction of power, control and ideology through the linguistic and semiotic realization of sex/uality. Offered: jointly with COM 566.

WOMEN 589 Gender, Race, and Communication (5) Analysis of the role of media in the construction of reality, production processes, and their influence on media representation of women and people of color. Offered: jointly with COM 567.

WOMEN 590 Special Topics (1-5, max. 15) Offered by visitors or resident faculty as a one-time in-depth study of special interest.

WOMEN 596 Precept for Women Studies Graduate Students (5, max. 15) Graduate student and faculty member work collaboratively in developing or revising course content and pedagogical approach on a specialized area.

WOMEN 597 Fieldwork in Women Studies (2-5, max. 15) Supervised ethnographic and other on-site research by women studies graduate students. Women Studies graduate students only.

WOMEN 598 Directed Readings in Women Studies (1-15, max. 35) Selected topics for individualized or small group study.

WOMEN 600 Independent Study or Research (*) Offered: AWSpS.

WOMEN 700 Master's Thesis (*) Credit/no credit only. Offered: AWSpS.

WOMEN 701 Master's Practicum (*) Offered: AWSpS.

WOMEN 800 Doctoral Dissertation (*)
School of Business Administration

Accounting

ACCTG 199 Accounting for Problem Solving (2, max. 4) Supplementary lectures, discussions, and problem solving sessions in introductory accounting. Enrollment priority to EOP students and others by permission. Credit may not be applied to fulfill specific program requirements. Credit/no credit only. Corequisite: ACCTG 215.

ACCTG 225 Fundamentals of Managerial Accounting (5) Analyses and evaluation of accounting information as part of the managerial processes of planning, decision making, and control. Concentrates on information useful to enterprise managers. Prerequisite: either ACCTG 210, ACCTG 220, or ACCTG 215; ECON 200; may not be repeated.

ACCTG 301 Intermediate Accounting I (3) Concepts and principles of financial accounting. Analysis of controversies and problems related to measurement of enterprise income and asset and liability valuation. Prerequisite: 2.0 in ACCTG 225; may not be repeated.

ACCTG 302 Intermediate Accounting II (3) Concepts and principles of financial accounting. Analysis of controversies and problems related to measurement of enterprise income and asset and liability valuation. Prerequisite: 2.0 in ACCTG 301; may not be repeated.

ACCTG 303 Intermediate Accounting III (3) Concepts and principles of financial accounting. Analysis of controversies and problems related to measurement of enterprise income and asset and liability valuation. Prerequisite: 2.0 in ACCTG 302; may not be repeated.

ACCTG 311 Cost Accounting (3) Introduction to the theory of cost accounting, job order, process, and standard cost systems; overhead accounting; problems in accumulation and allocation of costs; decision making with cost data. Prerequisite: 2.0 in ACCTG 301; may not be repeated.

ACCTG 320 Introduction to Accounting Information Systems (3) Concepts of accounting information systems in organizations. Processes of analyzing and designing accounting information systems, with emphasis on those using computer facilities. Internal controls and auditing considerations. Prerequisite: 2.0 in ACCTG 225; I S 300 which may be taken concurrently; may not be repeated.

ACCTG 330 Introduction to Accounting Information Systems (3) Concepts of accounting information systems in organizations. Processes of analyzing and designing accounting information systems, with emphasis on those using computer facilities. Internal controls and auditing considerations. Prerequisite: 2.0 in ACCTG 302; 2.0 in I S 300; may not be repeated.

ACCTG 375 Topics in Financial Reporting (4) Critical examination of the uses and limitations of general purpose financial statements that have been prepared in accordance with generally accepted accounting principles. Not open for credit to accounting majors or to students who have completed 301. Prerequisite: either 2.0 in ACCTG 225 or 2.0 in ACCTG 230; may not be repeated.

ACCTG 401 Federal Income Tax Factors in Business Decisions (3) Service course in taxation recommendations for the junior year for non-accounting majors. May also be taken by MBA students for graduate credit. Not open to accounting majors. Prerequisite: either 2.0 in ACCTG 225 or 2.0 in ACCTG 230; may not be repeated.

ACCTG 411 Auditing Standards and Principles (3) Intensive introduction to the attest function in society today. The environment, the process, and the report of the public auditor are analyzed. Potential extensions of the attest function are examined. Prerequisite: 2.0 in ACCTG 302; 2.0 in ACCTG 311; 2.0 in either ACCTG 320 or ACCTG 330; may not be repeated.

ACCTG 420 Database Management for Accounting (3) Continuation of ACCTG 320, covering database and processing architectures, database reliability, database recovery, database security, database administration, internets and intranets, and network security. Not available for credit to information systems majors or to students who have completed I S 410 and 445. Prerequisite: 2.0 in ACCTG 320; may not be repeated.

ACCTG 421 Tax Effects of Business Decisions (3) Issues in taxation, including tax considerations in business decision making, tax effects of business transactions, taxation of compensation, fringe benefits, capital gains, fixed asset transactions, disposition of business distribution from corporations. Prerequisite: 2.0 in ACCTG 320; may not be repeated.

ACCTG 440 Accounting and Financial Management Decisions (3) Business financial planning with an emphasis of the role of accounting information in financial decisions. Topics include the accounting and finance aspects of business valuation, short and long term financing, short and long term investments, alternative types of debt and equity financing, and related topics. Prerequisite: 2.0 in ACCTG 302; 2.0 in ACCTG 311; FIN 350; may not be repeated.

ACCTG 450 Business Taxation (3) Issues of taxation for entities other than individuals, including corporations, subchapter S corporations, partnerships, estates, and trusts. Includes corporate distributions, liquidations, and reorganizations. Prerequisite: 2.0 in ACCTG 421; may not be repeated.

ACCTG 451 Individual Income Taxation (3) Political, economic, and social forces influencing federal income taxation, role of taxation in personal decisions. Coverage of individual income tax matters including business and investment income, business and personal deductions, property transactions, and tax issues of employees. Prerequisite: 2.0 in ACCTG 421; may not be repeated.

ACCTG 460 Advanced Cost Accounting (3) Advanced analysis of cost and management accounting problems; special applications of cost accounting techniques for management planning and control; current developments in cost accounting. Prerequisite: 2.0 in ACCTG 311; may not be repeated.

ACCTG 470 Strategic Overview of Accounting (3) Provides a strategic overview of accounting functions in industry, government, and public accounting. Includes comprehensive exam covering all required courses in the accounting major. Prerequisite: ACCTG 321; ACCTG 421 which may be taken concurrently; ACCTG 440 which may be taken concurrently; may not be repeated.

ACCTG 471 Internal Auditing (3) Independent appraisal function established within an organization. Role and nature of internal auditing; intensive review of internal control; management effectiveness audits; and financial audits from the point of view of the internal auditor. Prerequisite: 2.0 in ACCTG 411; may not be repeated.

ACCTG 480 Accounting for Not-for-Profit Organizations (3) Fund and budgetary accounting as applied to public sector organizations, such as governments, foundations, hospitals, and colleges. Prerequisite: 2.0 in ACCTG 302; may not be repeated.

ACCTG 485 Advanced Financial Accounting (3) Accounting for partnerships, accounting for business combinations, parent-subsidiary and branch relationships, foreign exchange. Prerequisite: 2.0 in ACCTG 302; may not be repeated.

ACCTG 490 Special Topics in Accounting (1-6, max. 6) Special topics of current concern to faculty and students. Offered only when faculty is available and student interest is sufficient. Class is announced in advance of scheduled offerings.

ACCTG 495 Accounting Internship (1-4, max. 8) One quarter’s internship with a certified public accounting firm, industrial organization, or government agency. Credit/no credit only. Prerequisite: ACCTG 301.

ACCTG 499 Undergraduate Research (1-6, max. 9) Arranged and supervised by individual members of the faculty.

ACCTG 500 Financial Accounting (4) Introduction to concepts and procedures underlying determination and presentation of information for financial decisions by investors and other decision makers outside the business enterprise. Study of problems of valuation, income determination, and financial reporting.

ACCTG 501 Managerial Accounting (4) Study of the generation and the use of accounting information within the firm for purposes of planning and controlling operations. Topics covered include cost concepts, responsibility accounting systems, cost control, and the use of accounting information in short- and long-term management decision problems. Prerequisite: ACCTG 500.

ACCTG 503 Introduction to Accounting for Managers (4) Nooren, Sundem Provides potential managers with a basic knowledge of financial and managerial accounting. Focuses on the use, not the preparation, of accounting information. Examples presented for a variety of for-profit and nonprofit organizations.
ACCTG 505 Intensive Analysis of Accounting Principles and Practices (18) Covers the subjects in the required core for undergraduate accounting majors: intermediate accounting, advanced accounting, cost accounting, auditing, and tax accounting. Credits will not count toward MBA degree. Prerequisite: ACCTG 215 and ACCTG 225 or equivalent, or permission of instructor.

ACCTG 510 Introduction to Financial Statement Analysis (4) Extension of the core financial accounting material, focusing on the use of financial statements to assess financial position and prospects of companies. Examines the critical financial reporting issues that influence interpretation of financial statements. Prerequisite: either B A 502, ACCTG 500, or permission of instructor.

ACCTG 511 Advanced Financial Statement Analysis (4) Covers accounting issues related to firm valuation and use of financial statement information to assess the risks and rewards of various firm strategies. Prerequisite: ACCTG 510 or permission of instructor.

ACCTG 513 Tax Effects of Business Decisions (4) Importance of tax considerations in making business decisions. Covers regulatory and economic impacts of the U. S. tax system. Prerequisite: either B A 502, ACCTG 500, or permission of instructor.

ACCTG 515 Problems in Managerial and Cost Accounting (4) Extension of the core management accounting material. Uses cases and discussion to analyze costing techniques, use of accounting data in planning and evaluation managerial performance, and use of accounting data in short-run and long-run decisions. Prerequisite: either B A 502, ACCTG 501, or permission of instructor.

ACCTG 517 Current Issues in Accounting (2) Analyzes recent literature, both professional and academic, in accounting. Focuses on the impact of recent events on the accounting profession. Prerequisite: either B A 502 or ACCTG 500, ACCTG 501, or permission of instructor.

ACCTG 519 Seminar in Financial Control Systems (4) Design and administration of formal information systems to aid the planning and control process in large organizations; formulation of divisional financial goals and control criteria; measurement of divisional performance and problems of goal congruence; administration of new investment programs. Prerequisite: B A 502 or permission of graduate office.

ACCTG 520 Information Quality and Assurance Services (4) Introduction to assurance services with a focus on financial statement audits. Auditing concepts and procedures, and the role of audits in financial markets.

ACCTG 521 Cases and Issues in Information Quality and Assurance Services (4) Analysis of cases and discussions of current issues dealing with assurance services. Prerequisite: ACCTG 520.

ACCTG 522 Advanced Financial Reporting (4) Advanced problems related to the measurement of enterprise income and asset and liability valuation.

ACCTG 523 Advanced Financial Analysis (4) Explores the use of published financial reports by decision makers external to the firm (e.g. investors and creditors). Emphasis is on traditional and non-traditional analyses of financial statements for the purposes of making economic decisions. Prerequisite: ACCTG 522.

ACCTG 524 Individual Taxation (4) Political, economic, and social forces influencing federal income taxation, role of taxation in personal decisions. Coverage of individual tax matters, including business and investment income, business and personal deductions, property transactions, and tax issues of employees.

ACCTG 525 Business and International Taxation (4) Issues of taxation for entities other than individuals, including corporations, subchapter S corporations, partnerships, estates, and trusts. Included corporate distributions, liquidations, and reorganizations. International dimensions of business taxation are introduced. Prerequisite: ACCTG 524.

ACCTG 526 Preparation for IPOs and SEC Reporting (4) Introduces legal issues pertaining to income and loss determination and the organization and operation of the SEC with an emphasis on the impact of its rules in regulating information disclosure. Prerequisite: ACCTG 522.

ACCTG 527 Communications in Professional Accounting (4) Introduction to the communications practices of professional accountants. Development of effective written and oral skills employed in accounting presentations such as audit reports. Study of results of organizational communications research applicable to accounting firms and units within firms.

ACCTG 530 Tax Issues in Property Ownership (4) Analysis of gain and loss realization, recognition, and characterization of such. Detailed exploration of statutory and case law regarding acquisition, ownership, and disposition of assets. Treatment of capital and ordinary gains and losses. Timing issues regarding deferral transactions and installment reporting are analyzed. Prerequisite: undergraduate accounting concentration or equivalent.

ACCTG 531 Timing and Periods of Taxation (3) Analysis of the cash and accrual methods of accounting, choice of taxable period and multi-period transaction analysis. Consideration of statute of limitations and mitigation thereof. Details of passive activity losses. Prerequisite: undergraduate accounting concentration or equivalent.

ACCTG 534 Fundamentals of Corporate Taxation (3) Detailed analysis of contribution of assets to corporations. Calculation of recognized gains and basic effects of asset contributions. Treatment of income and deduction items of corporate operations. Analysis of distribution of assets to shareholders with respect to their stock. Prerequisite: undergraduate accounting concentration or equivalent.

ACCTG 535 Advanced Issues in Corporate Taxation (3) A continuation of 534. Fundamentals of moving assets out of and within corporate solution. Basics of corporate reorganizations: acquisitive and divisive. The details of the election to obtain (or avoid) the Section 338 election are explored in detail. Prerequisite: undergraduate accounting concentration or equivalent; ACCTG 534 or permission of instructor.

ACCTG 536 Advanced Issues in Corporate Taxation (3) Continuation of 534 and 535. Study of complex issues in corporate taxation planning. Substantial portion of course involves resolving case studies to improve analytic skills and to interrelate disparate corporate planning opportunities. Corporate reorganizations are analyzed in detail. Prerequisite: undergraduate accounting concentration or equivalent; ACCTG 535 or permission of instructor.

ACCTG 537 Income Taxation of Conduits I (3) Tax consequences to owners and entity from formation, operation, distributions from, and liquidation of partnerships and S corporations. Study of taxable and tax-free formations, nature of “bottom line” income and separate item items, changes to owners’ tax basis, basics of non-liquidating and liquidating distributions. Prerequisite: undergraduate accounting concentration or equivalent. Offered: W.

ACCTG 538 Income Taxation of Conduits II (3) A continuation of 537. Study of complex issues in partnership and S corporation taxation. Substantial portion involves resolving case studies to improve analytic skills and interrelate partnership and S corporation planning issues. Sections 751(b) and 736 examined in detail. Prerequisite: undergraduate accounting concentration or equivalent; 537 or permission of instructor.

ACCTG 539 Tax Research and Decision Making (4) Decision-making processes in relation to problems of taxation. Tools of tax analysis and research and the communication of conclusions flowing from professional tax work. Role of the professional accountant in client business transactions and in negotiations with taxing authorities is highlighted and simulated on the basis of actual case histories. Prerequisite: undergraduate accounting concentration or equivalent.

ACCTG 540 Fundamentals of International Taxation (3) Covers the basic tax considerations of U. S. taxation of income earned worldwide by U. S. taxpayers as well as the tax issues regarding U.S. taxation of non-resident aliens for income earned in the United States. Source rules and treaty considerations examined in detail. Locating the proper source of income and optimal tax rates analyzed.

ACCTG 541 Communications for Taxation Professionals (4) Introduction to the communications forms and to practices professional accountants and accounting managers. Development of effective written and oral skills employed in accounting presentations, such as audit reports and consultants’ reports. Study of results of organizational communications research applicable to accounting firms and/or units within firms. Prerequisite: undergraduate accounting concentration or permission of instructor.

ACCTG 543 Income Taxation of Trusts and Estates (3) Development of fundamental skills regarding income taxation of trusts and estates. Calculation of distributable net income and the
distribution deduction for the fiduciary entity. Basic analysis of the throwback rules. Case studies. Prerequisite: undergraduate accounting concentration or equivalent.

ACCTG 547 Estate and Gift Taxation (3) Development of fundamental knowledge of the unified transfer tax on the transfer of property from one person to another. Calculation of gross estate, adjusted gross estate, and taxable estate. Calculation of gift and estate taxes owing. Discussion of estate planning concepts. Prerequisite: undergraduate accounting concentration or equivalent.

ACCTG 548 State and Local Taxation (3) Differences in definition of income at state and federal levels, treatment of state income taxes, piggyback for state income taxes, state tax rates, minimum tax, double taxation of income by home and host states, Uniform Division of Income for Tax Purposes Act, concept of nexus for taxation, multistate tax planning. Offered: S.

ACCTG 549 Employee Tax Problems and Deferral (3) Covers the tax issues facing employees and self-employed tax payers, including deferred compensation arrangements, fringe benefit packages, restricted property, independent contractor status, achieving favorable tax treatment of retirement plans, and substantiating employee business expenses. Offered: S.

ACCTG 551 Management Information Systems (4) Develops the professional accountant’s responsibilities in designing and operating management information systems with an emphasis on accounting systems. Data organization and management, effects on accounting functions, responsibilities for controls and security, and planning and acquisition of system resources. Prerequisite: ACCTG 330, IS 320 and BA 501 or equivalent.

ACCTG 555 Statistical Methods in Professional Auditing (4) Comparative analysis of the methods of statistical inference used in auditing and incorporation of these methods in the auditor’s decision processes. Prerequisite: undergraduate accounting concentration or equivalent.

ACCTG 558 Current Financial Accounting and Reporting Issues (4) Develops professional-level ability to understand, analyze, and report upon selected political, economic, social, and legal dimensions of current financial accounting and reporting issues. Issues vary each year. Prerequisite: undergraduate accounting concentration or equivalent.

ACCTG 559 Advanced Auditing Problems and Cases (4) Analysis of current developments in auditing and comprehensive case studies. Designed to extend knowledge of audit decision making and advanced techniques. Topics covered vary depending upon current issues facing professional auditors. Prerequisite: undergraduate accounting concentration or equivalent.

ACCTG 560 Special Topics in Professional Accounting (1-4, max. 4) Lectures, discussion, and case analyses dealing with special current topics relevant to professional accounting. Satisfies the professional accounting elective requirement for the M.P.Acc. degree program. Prerequisite: permission of instructor.

ACCTG 562 Accounting for Business

Combinations in a Global Marketplace (4) The examination of acquisitions and mergers in a global context. Explores the issues involved in accounting for domestic and foreign equity investments, partnerships with respect to financial statement interpretations.

ACCTG 564 Governmental Accounting (4) Budgetary and financial accounting/reporting as applied at the state, local, and special-purpose governments; financial accounting and reporting for not-for-profit organizations.

ACCTG 565 Issues in International Accounting (4) Insights into the conceptual, managerial, professional, and institutional issues of international accounting. Focus on current topics in international accounting and on the cultural, managerial, and governmental forces that shape both internal and external accounting in specific countries.

ACCTG 568 Advanced Management Accounting (4) Discussion and analysis of costing techniques, use of accounting data in planning and control, evaluation of managerial performance, and use of accounting data in short-term and long-run decisions. Special attention directed to issues in human behavior involved in cost allocation, budgeting, and performance evaluation. Prerequisite: ACCTG 502.

ACCTG 575 Internship (14) Professional internship in graduate accounting program. Prerequisite: enrollment in MPAcc program, accounting and assurances track.

ACCTG 576- Independent Research Project Proposal (2) Course requires a written proposal for research to be completed in ACCTG 577. Prerequisite: enrollment in MPAcc program, accounting and assurances track.

ACCTG 577 Independent Research Project (4) Development and completion of independent research project. Topic identification and proposal approval completed in ACCTG 576. Prerequisite: enrollment in MPAcc program, accounting and assurances track.

ACCTG 580 Introduction to Accounting Research (4) Examination of research problems and techniques in accounting. Interdisciplinary nature of accounting research emphasized. Work in finance, economics, and psychology used to develop current trends in accounting research. Prerequisite: doctoral student status.

ACCTG 581 Seminar in Managerial Accounting (4) Critical examination of conceptual and practical issues of cost and managerial accounting. Specific topics may change from quarter to quarter, and they include application of behavioral, quantitative, and economic models to managerial accounting problems. Prerequisite: ACCTG 511 or permission of instructor.

ACCTG 596 Seminar in Financial Accounting Research (4) Review and critical analysis of research strategies and methods applied to problems in financial reporting practice and financial accounting standard setting. Prerequisite: doctoral student status and ACCTG 580 or equivalent or permission of graduate office.

ACCTG 597 Seminar in Managerial Accounting Research (4) Critical analysis of current managerial accounting research, both published and unpublished. Prerequisite: doctoral student status and 581 or equivalent or permission of graduate office.

ACCTG 599 Doctoral Seminar in Accounting (1, max. 12) Study and research in advanced topics of Accounting. The seminar is generally concerned with unpublished areas of research as well as research methodology and philosophy. It is conducted by departmental faculty and occasional distinguished visiting faculty. Prerequisite: doctoral student status.

ACCTG 600 Independent Study or Research (*, max. 10).

Administration

ADMIN 510 Integrative Administration (11-15, max. 15) Huber Includes materials basic to study and analysis of administration in organizations; organization theory and administrative behavior; human resources management; resource allocation, accounting, and financial control, systems operation and analysis; marketing; governmental-societal framework; policy formulation and strategic planning. Faculty-team-teaching approach. Not open to administration majors. Credit/ no credit only.

Business Administration Research Methods

BA RM 580 Applied Econometrics I (4) Emphasizes the application of econometric methods rather than the mathematical proofs of statistical procedures. Introduction to the linear regression model, interpretation of summary statistics, bias and precision of regression estimates, analysis of the residuals, and hypothesis testing. Prerequisite: STAT 342 or STAT 481 or permission of instructor.

BA RM 590 Behavioral Research Methods-Theory and Design (4) Philosophy of science, development of scientific method, and meaning of behavioral research. Historical perspective of scientific investigation and the evaluation of research. The development of theory and its relationship to research. Various strategies and designs in behavioral research. Prerequisite: STAT 361, STAT 362, or permission of instructor.

BA RM 591 Behavioral Research Methods-Approaches and Applications (4) Considers alternative research approaches, such as laboratory and field experimentation, simulation, and surveys, with data-gathering techniques appropriate for each approach. It is primarily concerned with developing alternative approaches to research problems and with discussing specific applications. It builds upon a background of specific statistical tools and techniques and an understanding of theory development and research design. Prerequisite: STAT 361, STAT 362, or permission of instructor.

Business Administration

B A 300 Foreign Study-Business Administration (3-5, max. 15) For participants in approved foreign-study programs where equivalent UW business administration courses are not available.
B A 390 Business Honors Seminar (2-5, max. 5) Special topics in business. Required for honors students in Business Administration.

B A 410 Business Advantage (10) Four-week integrative course which focuses on business basics — finance, accounting, marketing strategy and human resources. Taught by faculty experts using case discussions, lectures, and student presentations. Not open for credit to students pursuing a Business degree.

B A 470 Accounting and Finance for Non-business Majors (3) QSR Addresses economic foundations of demand, supply, and costs as basis for accounting system. Focuses on using data for evaluating performance, budgeting and financial statement analysis. Short-term and long-term decision making compared. Not open for credit to students pursuing a Business degree. Offered: A.

B A 471 Marketing Analysis and Strategy for Non-business Majors (3) I&S Provides understanding of marketing principles and their use in everyday business and organizational situations. Includes study of controllable and uncontrollable factors in making marketing decisions; developing working knowledge of marketing strategy and understanding of implications of product life cycle for decision-making. Not open for credit to students pursuing a Business degree. Offered: W.

B A 472 Managing Human Assets for Non-business Majors (3) I&S Deals with understanding management of human resources in businesses and other organizations. Includes study of relevant theories and research, analyses of cases, and exercises in business and organizational situations. Includes overview of new work place, diversity, leadership, strategic planning, decision making, and team management. Not open for credit to students pursuing a Business degree. Offered: Sp.

B A 500 Business Administration I (16) Coordinated series consisting of accounting, business economics, business ethics, business policy, finance, information systems, international business, legal environment of business, management, and organizational behavior. Marketing, operations management, and quantitative methods for management. Prerequisite: permission of the School of Business Administration.

B A 501 Business Administration II (14) Coordinated series consisting of accounting, business economics, business ethics, business policy, finance, information systems, international business, legal environment of business, management, and organizational behavior. Marketing, operations management, and quantitative methods for management. Prerequisite: permission of the School of Business Administration.

B A 502 Business Administration III (8) Coordinated series consisting of accounting, business economics, business ethics, business policy, finance, information systems, international business, legal environment of business, management, and organizational behavior. Marketing, operations management, and quantitative methods for management. Prerequisite: permission of the School of Business Administration.

B A 541 Environmental Management I (4) Survey of environmental ethics, environmental laws and regulation, the economics of environmental decisions, and the relationship of business to public policy and the environment. Must be taken concurrently with B A 544. Prerequisite: permission of instructor.

B A 542 Environmental Management II (4) Applications of the functional areas of business to environmental concerns. Major federal legislation affecting these concerns applied to business problems in the areas of accounting, finance, marketing, management information systems, and organizational behavior. Must be taken concurrently with 544. Prerequisite: B A 541 or permission of instructor.

B A 543 Environmental Management III (4) Case studies that integrate the fundamentals of business and environmental management to address such issues as plant siting, regulatory compliance, production line changes, and innovative, proactive responses to environmental issues. Case studies include results of student consulting projects and a capstone case in environmental management. Must be taken concurrently with 544. Prerequisite: B A 542 or permission of instructor.

B A 544 Environmental Management Seminar (1, max. 3) Guest lecturers from academia, business, government, and advocacy groups discuss environmental science, ethics, law, regulation, economics, finance, accounting, and policy issues. Seminar topics supplement course material in 541, 542, 543 which are to be taken concurrently.

B A 545 The Global Business Forum: Current Issues in Global Business (1, max. 3) Discussion of current trends in the global business environment and of international issues facing companies. Leaders from international businesses and other organizations, as well as faculty members from various departments and specializations, invited to share their perspectives with seminar participants. Topics change each quarter.

B A 560 Cooperative Education in Business (1) Business practicum: internship with approved business or governmental agency. Open only to students who meet requirements of internship program. Internship credit may not be applied to specific course requirements or to credits required for graduation. Credit/no credit only. Offered: S.

B A 571 Research Reports (4-) Independent study in business administration; critical evaluation of business analysis and research methods. Effective communication of ideas emphasized. Methods and content of independent research studies subjected to critical evaluation. Open only to MBA non-thesis students. Prerequisite: instructor's approval of preliminary research topic outline.

B A 572 Research Reports (4-) Independent study in business administration; critical evaluation of business analysis and research methods. Effective communication of ideas emphasized. Methods and content of independent research studies subjected to critical evaluation. Open only to MBA non-thesis students. Prerequisite: B A 571.

B A 578 Practicum in Business Management (2) Provides an opportunity for first-year MBA students to apply the skills learned in the classroom to real world problems. Students participating in the Business Consulting Network (BCN) partner with client firms on an applied learning project that offers additional training opportunities not possible in the classroom. Credit/no credit only.

B A 580 Problems in Microeconomics (4) Study of microeconomic intuition, directed toward Business School Ph.D. students, showing the interconnections between formal, mathematical analysis and the unstructured economic questions posed by the world. Emphasis on setting up problems and examining the intuition behind the analysis of them. Many applications to specific business issues.

B A 700 Master’s Thesis (*). 800 Doctoral Dissertation (*, max. 10).

Business Communication

B CMU 301 Basic Written Business Communications (4) Broad analytical approach to written communications as a management tool. Analysis of the psychology, semantics, planning, and principles of effective business writing. Practical application through messages that inform and persuade, grant and refuse; plus short business reports and applications for positions. Cannot be taken for credit if B CMU 302 already taken. Offered: AWSp.

B CMU 302 Basic Written Business Communications for Accounting Majors (4) Broad analytical approach to written communications as a management tool for accountants. Analysis of the psychology, semantics, planning, and principles of effective business writing. Practical applications through messages that inform and persuade, grant and refuse; plus short business reports and applications for positions. Cannot be taken for credit if B CMU 301 already taken. Corequisite: ACCGT 301.

B CMU 410 Business Reports and Other Specialized Communications (4) Covers internal and external, written and oral business reporting. Considers communication strategies within the context of rapidly changing technologies. Students learn to apply primary and secondary research to quarter-long, individual projects resulting in a variety of reports: proposals, progress reports, feasibility studies, business plans, etc. Prerequisite: B CMU 301 or B CMU 302.

B CMU 490 Special Topics in Business Communications (1-6, max. 12) Students and faculty focus on current topics of concern. Prerequisite: either B CMU 301 or B CMU 302.

B CMU 499 Research in Business Communications (1-6, max. 9) 509 Finding your Voice (2) Develop a leadership communication style by discovering core values and learning how to translate those values into effective messages. Students give speeches as well as critique speeches of classmates, produce written evaluation of speeches given in class and receive instructor feedback. Prerequisite: BA 501.

B CMU 510 Business Communications for Managers (4) Develops understanding of communication theories, describes strategies for planning managerial communications, and builds skills in oral and written reporting and persuading. Looks at how new technologies are changing the way people in business communicate, and
the implications those changes have for organizations. Prerequisite: B A 501.

B CMU 579 Special Topics in Business Communication (2/4, max. 12) Business and managerial communication topics of current interest to faculty and students.

Business Economics

B ECON 301 Intermediate Macroeconomics (4) Analysis of economy with attention to the business cycle, output of goods and services (GNP), inflation, unemployment, and government fiscal and monetary policies. How the economy affects individuals and firms and how to deal effectively with the economic environment. Prerequisite: ECON 201; may not be repeated.

B ECON 420 Financial Markets (4) Analysis of the structure and functions of the money and capital markets; the saving-investment process and financial intermediaries; supply and demand for lendable funds and the level and structure of interest rates, role of Federal Reserve and Treasury in money market developments. Prerequisite: either B ECON 301 or ECON 301; may not be repeated.

B ECON 426 Competing in the Global Economy (4) Examines the global environment for business and the challenges facing managers in this environment. Explores the implications of the common phrase "think globally — act locally." Prerequisite: either B ECON 300 or ECON 300; may not be repeated.

B ECON 427 International Finance (4) Asset choice and institutional operations in international finance, foreign exchange problems, the impact of international financial problems and operations on business, short- and long-term international financing. Prerequisite: either B ECON 300 or ECON 300; either B ECON 301 or ECON 301. May not be repeated.

B ECON 490 Special Topics in Business Economics (1-6, max. 6) Study and research on topics of current concern to faculty and students. Only offered when allowed by faculty availability and sufficient student interest. Seminar content to be announced in advance of scheduled offerings.

B ECON 499 Undergraduate Research (1-6, max. 9). Research in selected areas of business economics. Recommended: either ECON 301 or B ECON 300 and B ECON 301.

B ECON 500 Introduction to Business Economics (4) Factors underlying the determination of cost and prices for the industry and the firm, demand and supply analysis and firm behavior. The relation of the economic environment to the microeconomic decisions of the firm.

B ECON 501 Macroeconomics and Global Issues (4) Analysis of real and monetary factors affecting national and international economies, supply and demand for money, interest rates and stabilization problems and policies, in relation to government policy effects on business and individual affairs. Focuses on global macroeconomic issues. Prerequisite: B ECON 500.

B ECON 520 Financial Markets (4) Analysis of the structures and functions of financial markets and institutions; the behavior of interest rates through time; the cross-sectional structure of interest rates; and the roles of the Federal Reserve and Treasury in financial markets. Prerequisite: FIN 509.

B ECON 526 Competing in the Global Economy (4) Examines the global environment for business and the challenges facing managers in this environment. Explores the implications of the common phrase "think globally — act locally." Offered: jointly with MGM 526; Wsp.

B ECON 579 Special Topics in Business Economics (2/4, max. 12) Business economics topics of current concern to faculty and students. Offered only when faculty are available and sufficient student interest exists. Seminar content announced in advance of scheduled offering. Prerequisite: permission of instructor.

B ECON 600 Independent Study or Research (1, max. 10).

Electronic Business

EBIZ 501 E-Business Marketing (4) Schlosser Uses current strategies for Internet marketing and explores new frontiers. Topics include examining the history, culture, and design of the Internet and the resulting impact on marketing; Web-based business models; consumer demographics; Web usage behavior; privacy issues; brand loyalty; virtual communities; and commercial Web site effectiveness metrics. Offered: W.

EBIZ 502 E-Business Technology (4) Mookerjee Examines the underlying information technologies that are driving the e-business revolution, including the overall technical infrastructure required to execute an e-business solution. Taught via lectures, projects, and hands-on sessions in the E-Business lab. Students implement and manage an e-business site. Offered: A.

EBIZ 503 E-Business Economics (4) Rice, Schall, Tarhouni Uses economic principles to assess the implications of evolving Internet technology for business decision-making, market prices, and market structure. Develop theoretical extensions of the models covered in B A 500 to analyze the Internet. Includes a group paper and a group evaluation of an Internet company. Offered: W.

EBIZ 504 E-Business Strategy (4) Kotha Integrates issues pertaining to management of technology and entrepreneurship: the emergence of the global digital economy and its impact on commerce, business models in e-commerce, "netentrepreneurship" and its place in existing corporations. Lectures and featured speakers from online and corporate finance discussions, and group projects. Offered: ASp.

EBIZ 509 Foundations of E-Business (2) Examines the fundamental technologies associated with business-to-consumer and business-to-business interaction and delivery of content via the Internet. Explores business models for online ventures, and examines the role of e-commerce in business. Offered: W.

EBIZ 579 Special Topics in E-Business (2-4, max. 12) Topics vary. Offered only when faculty members are available and there is sufficient student interest.

EBIZ 600 Independent Study or Research (1, max. 10).

Executive MBA

EMBA 501 Effective Communications Strategies (1) Focuses on effective communications strategies in the corporate environment with an emphasis on the conveying of ideas, presentation strategies and how to focus on clear and concise communication with the internal or external customer. Offered: A.

EMBA 502 Teamwork and Managerial Effectiveness (2) Focuses on issues of working and problem-solving effectively in small groups, with some attention to the personal and professional stress under which many general managers operate. Offered: A.

EMBA 503 Managing in the Workplace (2) Examines how intra- and extra-organizational factors influence the utilization of human capital, and how organizations’ responses to those factors determine their effectiveness. Topics include human resource policy and control, executive compensation and development, and HRM in the multinational context. Offered: A.

EMBA 504 Strategic Competitive Advantage (4) Examines the nature of the competitive process and the source of firm-level competitive advantage. Focuses on the economic principles of competition and applying these principles to the study of competitive advantage and strategy. Offered: A.

EMBA 505 Financial Reporting and Analysis (5) An introduction to financial accounting from a managerial perspective. Topics include preparation and use of financial statements; measurement and reporting of assets, equities, and income; and issues and implications of alternative methods of reporting. Cases based on actual corporate financial statements used to enhance the participants’ understanding of the issues. Participants will be required to evaluate financial statements of their own or a teammates’ company. Offered:

EMBA 506 Leadership and Motivation (1-5, max. 15).

EMBA 508 Leadership and Organizational Effectiveness (4)

EMBA 510 Statistics for Management (3) An introduction to statistical techniques useful for aiding management decisions. Emphasis is placed on use of interactive computer methods in basic business problems. Topics include summary statistics of numerical data, statistical inference, linear regression and elementary time series analysis. Offered: W.

457
EMBA 511 Dynamics of Negotiations (1) Explores negotiations a manager is involved with both internally and externally. Topics include the nature of negotiations, the role of power in negotiations, negotiation planning and strategies for improving negotiation relationships.

EMBA 512 Managerial Accounting (4) Overview of the preparation and use of accounting information by managers for decision-making purposes. Topics include cost concepts, cost behavior, overhead allocation (including activity-based costing), budgeting, responsibility accounting, short-term decisions and capital budgeting. Cases based on actual management decisions used to enhance understanding of concepts and techniques. Offered: W.

EMBA 520 Financial Management (5) Introduction to corporate financial management emphasizing relevant modern theory and practical applications. Topics include financial statement analysis, financial planning, financial markets, principles of valuation, capital budgeting, capital structure, the cost of capital, dividend policy, merger analysis and issues of financial policy. Offered: Sp.

EMBA 521 Creating Effective Organizations (4) Bigley Introduces concepts and principles fundamental to creating and leading effective organizations. Includes perception and decision-making, employee motivation, group and team process, human resource management practices, organizational design, power and politics, corporate culture, and organizational change. Special topics include creativity and innovation and managing organizational crises. Offered: Sp.

EMBA 527 Business Development Management (4) .

EMBA 529 Special Topics (1-5, max. 15) Explores issues of current interest and concern to general managers and feature business and community leaders recognized for their expertise in specific fields. Offered: Sp.

EMBA 530 Decision Support Models for Management (3) GE Presents and illustrates the use of techniques (such as simulation, heuristics, queuing, decision analysis and linear programming) that have been developed to help managers deal with complicated choice problems in manufacturing, service operations, marketing and other areas. Offered: A.

EMBA 531 Global Economic Environment of the Firm (2-5), max. 5) Builds a framework for understanding movements in economy-wide magnitudes – such as the price level, the gross domestic product, the unemployment rate, the interest rate and the exchange rate – that affect business decisions. Analyzes contemporary economic issues that impact business, including the recent conduct of monetary and fiscal policy, growth, competitiveness and trade. Offered: A.

EMBA 532 Marketing Strategies (1-4), max. 5) Examines the tactical and strategic relationships, and effects, of product management, promotion, distribution, and pricing in both consumer and business-to-business contexts. Particular attention is given to growth strategies, to cross-functional approaches to discovering and satisfying the customer, and to creating and sustaining a market-driven learning culture in an organization. Offered: AW.

EMBA 533 Operations Management and Systems Analysis (4) Explores how to continuously deliver superior value for customers in a profitable manner through the design, planning and control of goods and services operations. Develops problem-solving skills in describing process flows, resolving bottlenecks, and measuring and improving performance. Offered: W.

EMBA 534 Ethical Leadership (2) Examines business ethics through case studies and short readings in ethical history. Emphasizes the development of a framework that helps managers make ethical decisions in a business environment. Offered: AW.

EMBA 540 International Finance (2) Introduces international finance at the level of the firm. Topics include understanding exchange rates, international parity conditions, measuring and managing exchange exposure, international financial markets, and trade financing. Emphasizes the practical implications of modern theory. Offered: W.

EMBA 541 Managing Technology and Innovation (2) Explores a selected management issue from a strategic perspective. Offered: WSp.

EMBA 548 International Management (2-, max. 4) Studies the formulation of corporate responses to the international environment. Emphasized understanding international economic forces and national and international policies affecting trade and investment; developing corporate strategies in the context of global competition; and exploring issues in the management of international business. Offered: WSp.

EMBA 552 Managing Change (2) Explores why firms succeed or fail. Focuses on business or corporate level strategies and structures that increase the probability of success and decrease the probability of failure by establishing a competitive advantage. Offered: S.

EMBA 553 Corporate Entrepreneurship (2-, max. 4) Kotra Focuses on entrepreneurial activities in large corporations and the process of converting new ideas to new commercial products and businesses. Offered: WSp.

EMBA 558 General Management and Strategy (4) Hil Emphasizes the practical implications of modern strategic management: strategic planning and leadership, operations and business strategy, organizational and innovation strategy, diversification and vertical integration, global strategy, organizational architecture, and organizational change efforts.

EMBA 590 Special Topics in General Management (1-5, max. 15) Reviews one or more selected topics relevant to the enhancement of general management skills. Offered: .

Entrepreneurship

ENTRE 370 Introduction to Entrepreneurship (4) Introduction to entrepreneurial practices with an emphasis on learning how to find business ideas, how to evaluate their potential, and how to recognize the elements of success. Exposure to the stresses of a start-up business, the uncertainties that exist, and the behavior of entrepreneurs. Prerequisite: ACCTG 225, ECON 200, and ECON 201.

ENTRE 472 Creating a Company I (4-) Two-course sequence with ENTRE 473. Working in teams, students develop a business plan for a new venture, present their plans to a panel of investors, obtain funding, run the business, and exit the firm at the end of the second quarter. Prerequisite: ENTRE 370. Offered: AW.

ENTRE 473 Creating a Company II (4-) Two-course sequence with ENTRE 472. Working in teams, students develop a business plan for a new venture, present their plans to a panel of investors, obtain funding, run the business, and exit the firm at the end of the second quarter. Prerequisite: ENTRE 472. Offered: WSp.

ENTRE 475 Planning for Business Growth I (4-) Two-course sequence with ENTRE 476. Explores the challenges/requirements of transforming an idea into a business. Emphasizes developing business concepts/strategy, marshalling resources, proving the business model, and creating strategic plans for growth. Students are required to participate in the business plan competition held the following quarter. Prerequisite: ENTRE 370.

ENTRE 476 Planning for Business Growth II (-4) Two course sequence with ENTRE 475. Students supplement business plans with operational and financial details to demonstrate viability of the venture; learn how to present the company to corporate executives or outside investors; and enter the plan in the business plan competition. Prerequisite ENTRE 475.

ENTRE 509 Foundations of Entrepreneurship (2) Evaluation of new market opportunities and starting a new venture, focuses on identifying and evaluating new venture opportunities, developing and testing market strategies, evaluating test market performance, and evaluating business plans. Emphasizes the interplay between marketing, manufacturing, finance, accounting and team management. Prerequisite: Permission of School of Business Administration. Offered: Sp.

ENTRE 510 Entrepreneurial Ventures (4) Uses the tools of competitive strategy to analyze the success and failure of entrepreneurial ventures, identifying general strategic principles that might increase the probability that an entrepreneurial venture will succeed. Draws heavily on the principles of microeconomics and strategy. Prerequisite: B A 500; B A 502.

ENTRE 511 Entrepreneurial Marketing (2) Focuses on marketing issues related to the generation and development of innovative ideas, assessment of feasibility, implementation and execution, and valuation of business ventures, highlighting the real world applications by new ventures. Prerequisite: B A 501 andentrepreneurial bridge course.

ENTRE 521 Corporate Entrepreneurship (4) Focuses on entrepreneurial activities in large, established corporation. Introduces the theory and best practices on the process of converting new ideas to commercial products and new businesses. Prerequisite: B A 500; B A 501; B A 502.

ENTRE 530 New Venture Creation and Managing Growth (4) Siong Focuses on gaining experience in market analysis, new venture strategy formulation, and the management of a new venture. Topics include building an entrepreneurial firm, market opportunity analysis, product testing, developing and executing
business plans, venture financing, and managing a growing company. Prerequisite: B POL 509; B A 501. Offered: W.

ENTRE 531 Developing Business Models for Emerging Technologies (4) Song Focuses on the commercialization of emerging technologies. Topics include conducting feasibility assessments of intellectual property landscape, evaluating business opportunities, analyzing competition, developing business models and strategies, constructing a professional quality business plan, and presenting business plan, transforming a new technology into a market-ready technology-based business. Offered: W.

ENTRE 532 Software Entrepreneurship (4) A case- and project-based course, focusing on starting a software or hardware company. Guest entrepreneurs, lawyers, and financiers discuss market identification and analysis, planning the business, financing, and typical operating and administrative problems.

ENTRE 540 Entrepreneurship Practicum (2, max. 4) Bigley, Sundem Enables students interested in new venture creation to explore their entrepreneurial aptitude by competing in a Business Plan Competition offered by the Center for Technology Entrepreneurship. Requires enrollment in the CTE certificate program. Credit/ no credit only.

ENTRE 555 Entrepreneurial Finance (4) Analyzes the unique financial issues facing entrepreneurial firms. Topics include assessing financial performance, financial forecasting and planning, financial management of rapidly growing businesses, start-up ventures, valuation, business financial strategies, venture capital, initial public offerings, and the decision to harvest. Prerequisite: MBA core courses. Offered: jointly with FIN 557.

ENTRE 579 Special Topics in Entrepreneurship (2-4, max. 12) Topics vary. Offered only when faculty members are available and there is sufficient student interest.

ENTRE 581 Theoretical Foundations of Entrepreneurship (4) Song Focuses on theoretical overview, entrepreneurs, environment and organizational founding, entrepreneur’s links with other disciplines, venture capital and venture capitalists, new venture strategy and performance, growth processes and challenges, and entrepreneurial networks and alliances. Class sessions review and critique assigned readings associated with each topic. Offered: A.

ENRE 582 Technology, Innovation, and Entrepreneurship (4) Kotha Explores issues of how a knowledge-based economy competes and performs using technological innovations and entrepreneurship. Explores research on capabilities of broader entities; processes of learning at the firm, industry, technology, economy-level; development of know-how as evolutionary process; and explorations by firms, sectors and economies exploring new technologies and techniques. Offered: W.

ENTRE 590 New Venture Research Practicum (4) Kotha, Song Explores students to new venture creation phenomena. Teaches how to think about and understand empirical research methods such as case studies, participant-observation, and other field methods while contributing to on-going cumulative data collection process.

ENTRE 600 Independent Study or Research (‘, max. 10).

Global Executive MBA

GEMBA 500 Yonsei-Business Principles and Applications I (16) Business Administration core topics including business economics, human resources, data analysis, information technology, financial accounting, management, accounting, marketing, and other business related topics. Offered: S.

GEMBA 502 Yonsei-Business Principles and Applications II (16) Business Administration core topics including human resources, operations management, financial management, competitive strategy, international business, marketing research, case studies, and other business related topics. Offered: S.

GEMBA 510 Financial Management (4) Explores finance as the heart of business management. Reinforces and advances skills in financial management. In addition to reviewing basic financial principles, teaches advance techniques of financial analysis. Applies knowledge of business analysis, competition, and strategy. Offered: A.

GEMBA 511 Communication and Negotiation Skills for International Managers (4-6, max. 6) Focuses on learning to use the English language to conduct business more effectively. Active exercise negotiation and public speaking skills, learn about informative versus persuasive communication, and practice various modes of verbal and non-verbal communication. Offered: S.

GEMBA 512 Competitive Analysis in a Global Economy (4) Focuses on competitive strategy and structure in technology-driven industries in global industries. Requires student to integrate information on decisions requiring trade-off among various functional areas and strategies. Focuses on how the decision-maker operates, the pressures of performance, and resource limitations in which executives operate. Offered: A.

GEMBA 514 Organizational Effectiveness (4) Focuses on managing people in global organizations. Examines practical strategies for dealing with cultural differences and considers the managerial implications of contemporary debates about Asian values, the impact of globalization on workers worldwide, and the potential for a “clash of civilizations.” Offered: W.

GEMBA 516 Macroeconomics (4) Explores how market forces worldwide influence global business. Examines national income product and currency crisis. Offered: W.

GEMBA 520 Topics in General Management (4) Current business topics such as ethics, financial management, negotiations, and other topics of interest. Offered: Sp.

GEMBA 579 Special Topics in Global Business (2/4, max. 12) Study of special topics. Enrollment by permission only.

Finance

FIN 350 Business Finance (4) Sources, uses, cost, and control of funds in business enterprises. Internal management of working capital and income sources and cost of long-term funds; capital budgeting; financial analysis of the growing and expansion of business enterprises; government regulation of the financial process. Prerequisite: ACCTG 225; ECON 201; either MATH 112, MATH 124, MATH 125, MATH 134, MATH 145, or Q SCI 291; either IND 250 or MGMT 201, Q SCI 381, PSYCH 315, PSYCH 318, STAT 220, STAT 311, or STAT 390.

FIN 423 Banking and the Financial System (4) Role of banks and nonbank financial institutions in the financial system; asset choices of banks and nonbank financial institutions; problems in the management of financial institutions with emphasis on commercial banks. Prerequisite: FIN 350; either B ECON 300 or ECON 300; may not be repeated.

FIN 428 International Financial Management (4) Analysis of financial problems facing businesses engaged in international activities. Financing foreign investment, financial control of foreign operations, and working capital management including foreign exchange positions using cases and readings. Prerequisite: FIN 350.

FIN 450 Problems in Corporate Finance (4) Case problems in corporate financial management. Includes cases on management of current assets, obtaining short-term loans, raising long-term capital, capital budgeting, and dividend policy. The management point of view is stressed. Prerequisite: FIN 350; either B ECON 300 or ECON 300.

FIN 453 Financial Theory and Analysis (4) Business financial strategy. Topics include business valuation and financing, performance evaluation, risk analysis, capital budgeting, and inflation and taxes. Emphasizes tools with real-world applications while incorporating modern finance concepts. Prerequisite: FIN 350; either B ECON 300 or ECON 300; may not be repeated.

FIN 454 Business Valuation, Investment, and Financing (4) Key issues in financial management using both analytical and case study illustrations. Valuation of public and private companies; cost of capital estimation; investment complications, such as taxes, inflation, risk, project interdependencies, and financing-investment interactions; leasing; mergers; spin-offs and carve-outs. Prerequisite: FIN 350; either B ECON 300 or ECON 300.

FIN 457 Entrepreneurial Finance (4) Explores financial issues that face entrepreneurs, including the stages of financing, business cash flow models, and strategic positioning of the early-stage company. Examines the role of business angels, venture capital funds, institutional investors, strategic alliances, licensing agreements, and exit strategies. Prerequisite: FIN 350; either B ECON 300 or ECON 300. Offered: W.

FIN 460 Investments (4) Introduction to the nature, problems, and process of evaluating particular securities and portfolio construction and administration. Special attention is directed to the risk and rate-of-return aspects of particular securities portfolios, and total wealth. Prerequisite: FIN 350; either B ECON 300 or ECON 300; may not be repeated.

FIN 461 Financial Futures and Options Markets (4) Introduction to financial futures and options markets. Institutional aspects and social
functions of these markets, pricing of options and futures, and risk shifting by hedging. Prerequisite: FIN 350; either B ECON 300 or ECON 300; may not be repeated.

FIN 462 Management of Financial Risk (4) Modern tools for managing financial risk. Fixed income securities and interest rate risk, credit risk, foreign currency risk, and insurance. Emphasis on use of futures, forwards, swaps, and option contracts. Prerequisite: FIN 350; either B ECON 300 or ECON 300; FIN 461.

FIN 490 Special Topics in Finance (1-6, max. 6) Study and research on topics of current concern to faculty and students. Offered when allowed by faculty availability and sufficient student interest. Seminar content to be announced in advance of scheduled offerings.

FIN 495 Finance Internship (1-4, max. 8) Internship with a private firm, nonprofit organization or government agency, where work experience involves substantial application of finance concepts learned in classroom. Credit/no credit only. Prerequisite: FIN 350. Offered: A/W/Sp.

FIN 499 Undergraduate Research (1-6, max. 9) Research in selected areas of business finance, money and banking, or investments, with permission of instructor. Recommend: FIN 350; either B ECON 300 or ECON 300.

FIN 502 Business Finance (4) Financial management of the firm, including capital budgets, working capital analysis, and financing policy. Prerequisite: ACCTG 500, B ECON 500, QMETH 500.

FIN 509 Foundations of Asset Valuation (2) Introduction to valuation, focusing on topics in asset-pricing, fixed income, financial options, and international markets. Emphasizes both theoretical and applied concepts. Course material prepares students for advanced topics covered in the finance electives. Prerequisite: either B A 501 or FIN 502, or permission of School of Business Administration. Offered: Sp.

FIN 530 Financial Management of Banks (4) Analysis of problems in the financial management of commercial banks and other financial institutions. Loan and investment policies, liability management, capital policies, and other selected issues are discussed. Prerequisite: B ECON 520 or permission of graduate office.

FIN 550 Advanced Business Finance (4) Systematic coverage of key theoretical issues in financial management. Application of quantitative analysis to financial problems of the firm that are important in practice, including issues related to financing and investment. Prerequisite: FIN 509.

FIN 551 Problems in Business Finance (4) Uses case studies to examine a broad range of financial management topics, including forecasting financial statements, use of bank credit, working capital management, public and private securities issues, capital budgeting, and business valuation. Prerequisite: B A 502.

FIN 552 Problems in Corporate Planning and Financing (4) Uses case studies to examine business financing. Topics include financial statements analysis, financial planning and forecasting, banking relationships, and financing sources, including the use of derivative securities, venture capital, and private equity. Cannot be taken for credit in combination with FIN 551. Prerequisite: FIN 509.

FIN 553 Problems in Capital Investment Planning (4) Case discussions used to examine corporate resource allocation decisions. Topics include capital budgeting techniques, estimation of capital costs, capital budgeting systems, strategic investment decisions, and financial restructurings. Prerequisite: FIN 509.

FIN 555 Financing Decisions, Payout Policy, and Corporate Control (4) Analysis of business financing methods, payout policy, management compensation, ownership structure, and the distribution of control rights. Covers the major issues critical to structuring contracts within the corporation. Prerequisite: FIN 509.

FIN 557 Entrepreneurial Finance (4) Analyzes the unique financial issues facing entrepreneurial firms. Topics include assessing financial performance, financial forecasting and planning, financial management of rapidly growing businesses, start-up ventures, valuation, sources of financing, venture capital, initial public offerings, and the decision to harvest. Prerequisite: MBA core courses. Offered: jointly with ENRE 557.

FIN 558 Mergers and Acquisitions (4) Harford Advanced finance topics focusing on providing the necessary training to value, structure and close acquisitions. Additional topics include antitrust issues, the legal environment governing mergers, and antitakeover defense. Offered: WSp.

FIN 560 Investments (4) Introduction to the nature, problems, and process of evaluating particular securities and portfolio construction and administration. Special attention is directed to the risk and rate of return aspects of particular securities, securities portfolios, and total wealth. Prerequisite: FIN 509.

FIN 561 Financial Futures and Options Markets (4) Overview of futures markets and options markets, pricing of futures contracts and options; comparison of futures, forward, and options contracts; risk management with hedging; alternative investment strategies; and review of empirical evidence. Prerequisite: FIN 509.

FIN 563 Real Options (2) Short overview of option pricing theory, followed by applications of option analysis in evaluating complex investment projects by business firms. Prerequisite: B A 502.

FIN 579 Special Topics in Finance (2/A, max. 12) Finance topics of current concern to faculty and students. Offered only when faculty are available and sufficient student interest exists. Seminar content announced in advance of scheduled offerings. Prerequisite: permission of instructor.

FIN 580 Doctoral Seminar in Financial Economics (4) Study of the financing of the corporation, including recent theoretical and institutional developments. Extensive reading and discussion in designated areas covering problems relating to financial management and to the social and economic implications of the financial process. Prerequisite: ECON 500 or permission of instructor.

FIN 590 Doctoral Seminar in Capital Market Theory (4) Decision making under uncertainty, information and capital market efficiency, portfolio theory, capital asset pricing model, arbitrage pricing model, and options pricing model. Prerequisite: ECON 500 or permission of instructor.

FIN 591 Doctoral Seminar in Corporate Finance (4) Principles of intertemporal choice, alternative valuation models, theory of investment under uncertainty, impact of dividend and financing decisions on firm valuation in perfect and imperfect markets, and theory of firm organization and agency costs. Prerequisite: FIN 590 and BA RM 581 or ECON 582 or permission of instructor.

FIN 592 Doctoral Seminar in Financial Research (4) Empirical research in finance with emphasis on methodology and scientific method. Empirical research in market efficiency, capital asset pricing model, options pricing model, and impact of firm’s dividend and financing decisions on firm value. Prerequisite: FIN 590 and BA RM 581 or ECON 582 or permission of instructor.

FIN 599 Doctoral Seminar in Finance (1, max. 12) Study and research in advanced topics of finance. Generally concerned with unpublished areas of research, conducted by visiting professors and departmental faculty. Prerequisite: doctoral student status.

FIN 600 Independent Study or Research (*, max. 10).

Human Resources Management and Organizational Behavior

HRMOB 499 Undergraduate Research (1-6, max. 9).

Information Systems

I S 310 Fundamentals of Business Information Technologies (4) Exposure to fundamental programming and scripting concepts, conceptual data modeling, database management, and XML. Applying data types and control structures. Continues the concepts of I S 300 of entity-relationship diagrams and record structure diagrams. Database management component includes relational databases, basic SQL, data architecture issues. Prerequisite: I S 300.

I S 320 Fundamentals of Application Programming (4) Fundamental programming concepts including data types, control structures, modularization, and structure programming. Developing solutions for problems in interactive business applications. Introduction to data and file structures. Extensive use of an event-driven programming language. Prerequisite: I S 310, which may be taken concurrently; may not be repeated.
I S 432 E-Business System Development (4) Introduces key e-business enabling information technologies. Covers object-oriented principles, representing objects in software, object analysis and design, and use of modern programming language, and advanced database technology for web-based application development. Prerequisite: I S 320; may not be repeated.

I S 410 Business Data Communications (5) Technology and applications of business data communications including characteristics of data, fundamentals of transmission, communications hardware and software, network configurations (LAN, MAN, WAN), management, and security. Laboratory provides hands-on experience with these applications. Prerequisite: I S 300, which may be taken concurrently; may not be repeated.

I S 445 Database Management (4) Examines the business need for database processing. Discusses database design, development, and administration. Students practice real-world database design and implementation using SQL. Discusses issues related to transaction management, data warehouse, etc. Prerequisite: I S 310; I S 320, which may be taken concurrently; may not be repeated.

I S 460 Systems Analysis and Design (4) Analysis and design of business information systems. Concentrates on the analysis phase of systems development. Covers systems development life cycle, feasibility studies, analysis of user requirements, and development of logical system models. Prerequisite: I S 410; I S 445, which may be taken concurrently; may not be repeated.

I S 461 Systems Implementation (4) Develops business information systems integrating knowledge gained in previous 400-level I S courses. Topics include software project management, system/database design, GUI, software testing, systems implementation/support/maintenance, user training, integrating Web, and business environments. Prerequisite: I S 445; I S 460; may not be repeated.

I S 490 Selected Topics in Information Systems (1-6, max. 20) Topics of current concern to faculty and students. Potential topics include networks and distributed information-processing systems, office automation, artificial intelligence and knowledge-based systems, new approaches to systems development, fourth- and fifth-generation languages, economics of information systems. Prerequisite: I S 320.

I S 495 Practical Experience in Information Systems (1-4, max. 8) Undergraduate substantive I S internship and mentorship. Internships can be repeated up to two quarters for maximum of 4 credits; grades based on weekly status reports, paper, demonstration of knowledge. Mentorship program (maximum 1 credit/quarter) allows student to be matched with I S executive; grade based on status reports, other participatory events.

I S 499 Undergraduate Research (1-6, max. 12) Selected problems in information systems and computer applications.

I S 504 Computer-Based Information Systems for Management (4) Introduction to information systems and computer technology. Covers concepts of information use in decision making. Use of decision-support problem-solving tools (e.g., spreadsheet, database software). Management’s responsibility in defining, developing, using information systems is focal point.

I S 530 Management of Information Systems Resources (4) Topics include general control problem in organizations; performance evaluation of data processing managers; technology and cost trends; software cost estimation; capacity planning; short term utilization; queuing and associated externalities; issues in centralization and decentralization of the information system facilities. Prerequisite: B A 501 or I S 504 or equivalent.

I S 545 Database Systems and Applications (4) Logical data models, relational database systems, structured query language (SQL), conceptual modeling, database design, Web-connected databases, transaction management, distributed and heterogeneous systems, data warehousing, data mining, database administration issues. Focuses on the use/management of business data in areas such as finance. Prerequisite: B A 502 or I S 504.

I S 560 Information Systems Development (4) Offers comprehensive look at information systems development. Covers user requirements analysis, logical and physical system models, system implementation and maintenance, project valuation and contract management. Additional topics include object-oriented approach, systems development in online environments, and financial information systems. Prerequisite: B A 501 or permission of instructor.

I S 570 Business Data Communications and Networking (4) Networking basics, Internet/Web-based services, client-server architecture, fundamental concepts, messaging, networking protocols, physical layer, data-link layer, local-area networks, backbone networks, internetworking devices, metropolitan and wide-area networks, wireless networking, network security, network analysis and management. Combines technical, operational, and management issues in data communications. Prerequisite: B A 502 or I S 504.

I S 579 Selected Topics in Information Systems (2/4, max. 12) Topics of current concern to faculty and students. Potential topics include networks and distributed information-processing systems, office automation, artificial intelligence and knowledge-based systems, new approaches to systems development, fourth- and fifth-generation languages, economics of information systems. Prerequisite: B A 501 or I S 504 or permission of instructor.

I S 580 Advanced Research Topics in Information Systems I (4) Overview of research problems and techniques in Information Systems. Focused on application of microeconomic theories, mathematical, statistical, and operations research methods. Extensive reading and discussion in current and emerging research topics. Prerequisite: doctoral student or permission of instructor.

I S 581 Advanced Research Topics in Information Systems II (4) Advanced topics of current interest of faculty in heterogeneous database, temporal database, data warehousing, data uncertainty, active and deductive database systems, database design, and formal database languages. Prerequisite: doctoral student or permission of instructor.

I S 582 Advanced Research Topics in Information Systems III (4) Potential topics include formation systems design, software engineering, decision support and expert systems, empirical methods, optimal control theory. Prerequisite: I S 58 or doctoral student or permission of instructor.

I S 599 Doctoral Seminar (1, max. 12) Advanced topics of information systems. Generally concerned with unpublished areas of research and conducted by visiting professors and departmental faculty. Prerequisite: doctoral student status.

I S 600 Independent Study or Research (*, max. 10).

International Business

I BUS 300 The International Environment of Business (5) Prepares students to understand the most important aspects of the international political economy. Emphasis on the important relationships among nations and economic institutions that influence students’ performances as managers, consumers, and citizens. Prerequisite: ECON 200.

I BUS 339 Business Environment in Developing Nations (4) The international environment for transnational trade, investment, and operations in the less-developed countries; survey of the economics of underdevelopment; analysis of foreign economic, cultural, and political environments and their impact on international business; foreign investment in the development process; case studies. Prerequisite: I BUS 300; may not be repeated.

I BUS 340 Business Environment in Industrial Countries (4) Factors and conditions affecting business operations and behavior in developed countries, international integration, business relations among nation states and integrated supranational systems, direct investment and multinational industrial activities, analysis of sources and causes of international change. Prerequisite: I BUS 300; may not be repeated.

I BUS 440 Business in Asia (4) Major aspects of the Asian business environment and how Asian enterprises are managed. Problems and opportunities of foreign corporations in Asia. Prerequisite: I BUS 300; may not be repeated.

I BUS 461 Science, Technology, and Innovation Policies in East Asia (5) Role of state and technological change in economic development. Examines state and corporate technology policies historically. Basic technology concepts, institutions, and policies in Japan, South Korea, Taiwan, and China. Examines sources of Asia’s rise in world of technology and explores whether conditions for its success will continue.

I BUS 462 Japanese Business and Technology (5) Examination of Japan’s postwar enterprise system in its historical context. Topics include corporate and financial structure, production and distribution, trade and investment policies, government-business relations, system of innovation, technological developments, prospects for the future. Offered: jointly with SISEA 482.

I BUS 470 Management of International Trade Operations (4) Integrated study of international trade functions, practices, concepts, management, strategy, and policy. The approach utilizes lectures, case studies, research, guest speakers,
and extensive practical application. Prerequisite: I BUS 300.

I BUS 480 Multinational Operations Management (4) Case studies in foreign operations management: planning international objectives and strategies; developing multinational company structures and executives; adapting administrative practices and operating policies to international diversities. Prerequisite: I BUS 300; may not be repeated.

I BUS 490 Special Topics in International Business (1-6, max. 12) Students and faculty focus on current topics of concern. Offered when faculty, student interest, and availability allow. Prerequisite: I BUS 300.

I BUS 491 CISB Track Seminar (1, max. 9) Students meet with business community leaders to discuss international aspects of their companies. Allows for networking and sharing experiences with other students as well as practicing foreign languages. Credit/no credit only.

I BUS 495 International Business Internship (1-4, max. 8) An internship with a company, not-for-profit organization, or government agency in an international business capacity. Credit/no credit only. Prerequisite: IBUS 300. Offered: A/WSpS.

I BUS 496 International Business Practicum (4) Offers students opportunity to apply principles, concepts, and skills learned previously to actual business situation. Projects provide students an exposure to the issues and choices facing managers operating in an international business environment. Prerequisite: I BUS 300.

I BUS 499 Undergraduate Research (1-6, max. 9) Prerequisite: I BUS 300.

I BUS 509 Foundations of International Business (2) Introduction to governmental and organizational forces shaping international business. Considers the issues of trade, direct foreign investment, balance of payments, and comparative advantage. Looks at economic policies of governments and multilateral organizations such as WTO, IMF, and World Bank. Prerequisite: permission of School of Business Administration. Offered: Sp.

I BUS 520 International Trade Policy (4) Examines issues important to trade policy. Topics include trade policy basics, tariffs and non-tariff barriers, safeguards, voluntary restraints, dumping, subsidies and strategic trade theory, agricultural trade, developing country rules, regionalism, and services. Prerequisite: B A 500 or course in international economics, trade, or international finance, or permission of graduate office.

I BUS 530 International Business in Less Developed Countries (4) Understanding the economic, sociocultural, and political environment in the less developed countries. Problems of international trade and investment, north-south relations, commodities, technology transfer, foreign aid, and capital flows. Prerequisite: B A 500 or course in international economics or trade or international finance, or permission of graduate office.

I BUS 540 International Business in Industrialized Countries (4) Understanding the economic, sociocultural, and political environment in developed, industrialized countries. Problems of international trade and payments relations, economic integration, national policies, and supranational organizations’ impact on managerial environments. Prerequisite: B A 500 or course in international economics or trade or international finance, or permission of graduate office.

I BUS 550 International Business Consulting (4) Research, analysis, and report on a specific international business project with an existing organization involved with international trade. Possible tasks include identifying most viable foreign target markets, developing best market entry strategies, establishing international terms and conditions of sale, and completing a preliminary marketing or business plan for clients.

I BUS 560 Multinational Business Management (4) Managerial responses to problems of international business organizations and operations. Strategy formulation in an international context; design and control of multinational organization; adaptation of management systems and policies to different economic, sociocultural, and political environments. Prerequisite: B A 500 or course in international economics or trade or international finance, or permission of graduate office.

I BUS 561 Science, Technology, and Innovation Policies in East Asia (5) Role of state and technological change in economic development. Analyzes state and corporate policies historically. Technology concepts, institutions, and policies in Japan, South Korea, Taiwan, and China. Examines sources of Asia’s rise in world of technology and explores conditions for its sustainable continuation. Offered: jointly with SISEA 581.

I BUS 562 Japanese Business and Technology (5) Examination of Japan’s postwar enterprise system in its historical context. Topics include corporate and financial structure, production and distribution, trade and investment policies, government-business relations, system of innovation, technological developments, prospects for the future. Offered: jointly with SISEA 582.

I BUS 570 International Study Tour (2) Educational international study tour. Includes pre-tour and post-tour activities. Prerequisite: B A 502 and permission of School of Business Administration.

I BUS 572 Cross-Cultural Conversations on Contemporary Issues (1, max. 4) Creates opportunities for students from across the globe to share information and perspectives on contemporary issues important to international business. In weekly, facilitated, small-group conversations, students improve their ability to formulate and express ideas and opinions, and practice persuasion and facilitation skills. Credit/no credit only.

I BUS 575 Business Studies Abroad (*, max. 24) Research and study of foreign business problems in the country or countries where the firms are located. Limited to students who have the approval of their major adviser and a faculty member who has agreed to direct their work in conjunction with a definite program of studies. Credit/no credit only.

I BUS 579 Seminar: Special Topics in International Business (2/4, max. 12) Application of international business principles to the analysis of a specific issue in trade or resource transfer, or to the business conditions in a particular country. Japan and other Pacific Rim countries are frequent topics. Prerequisite: B A 500 or permission of instructor.

I BUS 600 Independent Study or Research (*, max. 10)
MGMT 401 Leadership, Critical Thinking, and Decision Making (4) The manager as leader and decision maker. Various leadership theories, styles, and behaviors. Decision-making models and techniques.

MGMT 402 Deal-Making and Negotiations (4) The art and science of negotiations with the goal of making students more effective negotiators in a variety of business situations, such as budget negotiations, buying and selling, contracts, and merger negotiations. Concept and skill development.

MGMT 403 Motivating High Performance (4) Various strategies for influencing employee motivation and performance. Reward systems, goal-setting procedures, and various techniques to enlarge and enrich one's job. Effects of these formal and informal strategies on job attitudes.

MGMT 404 Organization Development and Change (4) Provides a conceptual understanding of organization development theory, practice, and research. Organization development is an umbrella term for a collection of behavioral science techniques for increasing individual group, and organizational effectiveness.

MGMT 411 Recruiting and Hiring Talent (4) Affirmative action, recruitment, testing, interviewing, placement, promotion, and overall human resource planning. Prerequisite: MGMT 311.

MGMT 412 Performance Appraisal and Compensation (4) The various kinds of systems used by organizations to evaluate and reward employee performance. Job analysis, job evaluation, setting performance standards, giving appraisal feedback, designing incentive systems, administering a salary plan. Prerequisite: MGMT 311.

MGMT 421 Commercial Law (5) Principles of the law of contracts, agency, property, sales, negotiable instruments, and security transactions. Prerequisite: O E 200 or MGMT 200.

MGMT 422 Protecting Intellectual Property in a Global Economy (2) Provides instruction to help people who are not lawyers and who are starting new companies recognize, protect, develop, and manage intellectual property in a global economy. Assists managers of more mature firms better understand the intellectual property protection process. Includes topics related to e-commerce.

MGMT 430 Business Policy (4) Policy making and administration from a general management point of view. Emphasis is on problem analysis, the decision-making process, administration and control, and continuous reappraisal of policies and objectives. Integrates and builds upon the work of the core curriculum. Prerequisite: FIN 330, MKT 301, HRM 300 or MGMT 300; recommended: OPMGT 301. Offered: AWSp.

MGMT 490 Special Topics in Management (1-6, max. 6) Topics of current interest to faculty and students. Offered when allowed by faculty availability and sufficient student interest. Content announced in advance of scheduled offerings.

MGMT 495 Management Internship (1-4, max. 8) Internship with a private firm, nonprofit organization, or government agency, where work experience involves substantial application of management concepts learned in classroom. Credit/no credit only. Prerequisite: MGMT 300.

MGMT 500 Management and Leadership (4) Behavioral aspects of management with emphasis on leadership, motivation, and decision making. May include communication, conflict management, group dynamics, and organizational change.

MGMT 502 Business Strategy (4) Policy decisions and strategic leadership from the general management point of view. Determination of corporate product-service objectives, development of a network of internal operating policies and methods to achieve objectives at a cost satisfactory to the consumer and to society. Prerequisite: all first-year required courses in MBA curriculum.

MGMT 505 Business Ethics (2) Business organization, political, social and legal environments. Critical managerial issues from historical, theoretical, and socialethical perspectives. Corporate political power, corporate boards of directors, industrial power, social responsibility, role of ethics, roles of the corporation in society, themes of change.

MGMT 510 Professional Development (0-2-, max. 2) Assessment, instruction, and coaching to develop students' professional skills. Topics include written and oral presentation skills, conflict resolution, team-building, collaboration, and intercultural communication.

MGMT 511 Leadership and Coaching Practicum (2, max. 4) Gives Leadership Fellows a venue to analyze and assess their coaching activities with first-year MBA student teams, receive feedback from the instructor and their fellow coaches, discuss readings on leadership, coaching, collaboration, and communication, and hear guest speakers on related topics. Credit/no credit only.

MGMT 520 Designing a Corporate Strategy (4) Addresses the broad question: what business(es) should we compete in? Focuses on decisions related to an appropriate level of diversification and the means by which that diversification is implemented. Includes the following issues: mergers and acquisitions, strategic alliances, joint ventures, LBOs, and spin-offs.

MGMT 521 Strategic Management of Technology and Innovation (4) Dooley, Steenstra Examines how innovative firms often experience rapid and disruptive levels of growth and change and how without effective management of new technologies, the boom can quickly turn to bust. Investigates the micro-economic drivers of competition in technology industries, explores how technological change affects competition, and examines the implications for competitive strategy. Offered: WSp.

MGMT 523 Business Ethics in a High Technology Environment (4) Examines business ethics from philosophical, theoretical, and pragmatic perspectives. Explores ethical theory and values in business. Attempts to place ethical concepts into a framework useful to practicing managers. Places emphasis on the ethical implications of rapidly changing hi-tech environments such as e-commerce and biotech.

MGMT 526 Competing in the Global Economy (4) Dewenter, Steenstra Examines the global environment for business and the challenges facing managers in this environment. Explores the implications of the common phrase "think globally — act locally." Offered: jointly with B ECON 526; WSp.

MGMT 530 Entrepreneurship (4) Entrepreneurship, both in the form of (1) establishment of new independent businesses owned largely by those who manage them and (2) innovation of new enterprises having exceptional autonomy within larger organizations that finance and own them. Basic knowledge in accounting, marketing, and finance is assumed.

MGMT 531 Managing Intellectual Property Rights (4) Comprehensive analysis of the issues pertinent to the various forms of intellectual property, including how to recognize, develop, maintain, and capitalize on them.

MGMT 540 Managing Human Capital (4) Covers principles and techniques for recruiting, selecting, and developing employees, appraising their performance, and rewarding their contributions. Explores key topics primarily through case studies, readings, class discussion, and fieldwork. Reviews legal and regulatory issues that surround these methods. Intended for both general managers and human resource professionals.

MGMT 544 Managing Effectively Across Cultures (4) Chen Examines how, with increasing globalization of business, employees at all levels of corporations often work and interact with people from different nations, cultures, and how they need an understanding of cross-cultural management and challenges of international settings. Focuses on international organizational behavior and international human resource issues, practices. Offered: W.

MGMT 545 Leading and Managing High-Performance Organizations (4) Focuses on the nature and function of effective leadership in high-performance systems. Includes visionary and transformational leadership, decision-making and empowerment, power and influence in organizations desiring flexibility and innovation, and leading organizational change. Places emphasis on leadership of emerging forms of organization such as learning organizations, virtual organizations, and networks.

MGMT 546 High Involvement Employees (4) Focuses on two domains: (1) how managers can lead and motivate their people; and (2) how actual organizations, particularly high technology and entrepreneurial firms, employ these strategies. Specific topics include commitment, involvement, enthusiasm, effort, participation, citizenship, and performance. Student teams investigate how local companies utilize these ideas.

MGMT 547 Successful Negotiations (2) Focuses on a broad array of conflict resolution skills needed for effective management in a constantly changing business environment. Examines methods of conflict resolution — bargaining, distributive and integrative negotiation, mediation, and arbitration. Applies these tools to managerial challenges such as employment contracts, buyer-seller agreements, and mediated and arbitrated agreements.

MGMT 548 Dealmaking in High Velocity Ventures (2) Focuses on negotiations in
ventures that lack conventional customers, suppliers, employees, joint-venture partners, strategic allies, and money. Analyzes negotiations with early potential customers and essential suppliers, sources of funding (e.g., angels and venture capitalists), critical partners and/or strategic allies (including established firms), and key employees. Prerequisite: MGMT 547.

MGMT 549 Dealmaking in the Global Arena (2)
For students who expect to engage in significant international business negotiations. Includes deal-structuring skills needed in a range of cross-border transactions and relationships. Individual segments develop broad analytical themes, cross-cultural dimensions, and distinctive national approaches to corporate governance and their impact on negotiating strategy. Prerequisite: MGMT 547.

MGMT 570 Special Topics in Management (2/4, max. 12)
In-depth study and research on topics of special interest to faculty members and students in the fields of human resources management, organizational behavior, and strategic management. Offered on an ad hoc basis. Content announced before scheduled offering.

MGMT 580 The Individual and the Organization (4)
Focuses on attributes the individual brings to the organization. Covers important performance-related processes such as learning, motivation, and decision-making as well as an understanding of personal attitudes and personality traits.

MGMT 581 Power, Influence, and Citizenship Behavior (4)
Focuses on ways in which the individual and the organization get things done through working with others. Includes leadership, social influence, and the use and abuse of power, with attention given to positive organizational activities such as citizenship behavior and extra role activities.

MGMT 582 Organization Entry, Training, and Exit (4)
Focuses on the systems, processes, and experiences that newcomers to organizations undergo. Covers staffing, employee selection, training, socialization, and attachment.

MGMT 583 Contemporary Research in Organizational Behavior (4)
Focuses on the importance of group processes for organizational effectiveness. Covers concepts of group dynamics including interpersonal communication, role and norm development, and group decision making as well as organizational processes such as team development and organizational culture.

MGMT 584 Contemporary Research in Human Resource Management (4)
Focuses on the organization’s employee performance appraisal and compensation systems. Examines effects of different practices.

MGMT 590 Economic Foundations of Strategic Management (4)
Reviews the economic theories that support strategies pursued by firms and explores the links between market processes, firm strategy, and firm performance. Topics include agency theory, transaction cost economics, resource dependence, population ecology, and neo-Austrian economics.

MGMT 591 Sociological Foundations of Strategic Management (4)
Explores the sociology of organizations from multiple perspectives while introducing fundamental sociological questions and preparing students for conducting research in organizations. Emphasis on structural contingencies, institutions, resource dependence, population ecology, negotiated order and culture, organizational learning and decision making, organizational power and politics, networks, and inter-organizational relations.

MGMT 592 Contemporary Strategic Management Research (4)
Facilitates understanding of theoretical foundations of theory development and testing in contemporary strategic management research. Focuses on evaluation of ways in which the empirical tradition has evolved in the strategic management area. Attention to evaluating research methodologies used in the field.

MGMT 593 Special Topics in Strategic Management I (4)

MGMT 594 Special Topics in Strategic Management II (4)
Focuses on the social and political factors that help shape corporate strategy using stakeholder management as an integrating concept. Topics include corporate governance, corporate political activity, governmental regulation, comparative political economy, and normative aspects of strategic management, including ethics and corporate social responsibility.

MGMT 599 Doctoral Seminar in Management (1, max. 12)
Advanced topics in the fields of human resources management and organizational behavior. May be used by visiting faculty members to present topics of interest to students.

MGMT 600 Independent Study or Research (*, max. 12).

Marketing

MKTG 301 Marketing Concepts (4)
Tools, factors, and concepts used by management in planning, establishing policies, and solving marketing problems. Marketing concepts, consumer demand and behavior, location analysis, marketing, functions, institutions, channels, prices, and public policy. Prerequisite: ECON 200.

MKTG 335 Principles of Selling (4)
Focuses on selling from salesperson’s perspective, role of persuasion in professional selling and other organizational settings. In addition to coursework in such areas as consumer behavior, negotiation, and communication, students practice sales skills in role plays, presentations, and other exercises requiring practical application of selling theory. Prerequisite: MKTG 301.

MKTG 340 Advertising (4)
Management of the advertising function and its integration with other forms of promotion. Develops the program, determining the most effective approach, evaluation of media and budget, advertising research, advertising institutions, economic and social aspects. Prerequisite: MKTG 301; may not be repeated.

MKTG 370 Retailing (4)
Profit planning and business control; buying, stock control, pricing, promotion; store location, layout, organization, policies, systems, coordination of store activities. Prerequisite: MKTG 301; may not be repeated.

MKTG 410 Product Management (4)
Important aspects of product planning and development, concept testing, product-life cycle, portfolio analysis, targeting and positioning, branding issues, product-line extension, pricing policies, and implementing product decisions. Computer simulation project provides practice for implementing product strategies. Prerequisite: MKTG 301; may not be repeated.

MKTG 430 Sales Force Management (4)
Focuses on the role of the sales manager within the organization. Includes distribution planning, sales organization, management of the sales force, methods of sales, cost and financial analysis, and performance analysis. Prerequisite: MKTG 301; may not be repeated.

MKTG 445 Multicultural Marketing and Business Development (4)
Integrates tools from marketing, consulting, and multi-cultural business management to provide consulting services to small business in economically-distressed communities. Working in teams with assistance from industry mentors and alumni from the course, students gain practical experience in multi-cultural marketing, consulting, and managing a business. Prerequisite: MKTG 301.

MKTG 450 Consumer Behavior (4)
Theory and practice pertinent to marketing decisions; utilization of theories from behavioral sciences in marketing research; theories of fashion, characteristics of goods, shopping behavior, product differentiation, market segmentation, and opinion leadership; application of concepts to management of advertising, personal selling, pricing, and channels of distribution. Prerequisite: MKTG 301; may not be repeated.

MKTG 455 Entrepreneurial Marketing (4)
Examines the skills and tools entrepreneurs need for bootstrap marketing in their start-up firms. Students learn to identify target market segments, position their products, estimate demand, set prices, gain access to channels, and manage the issues of rapid growth. Prerequisite: MKTG 301; may not be repeated.

MKTG 460 Marketing Research (4)
Examines marketing research process; steps of research design, questionnaire construction, sampling, data analysis, evaluation/presentation of findings, online research, and web surveys. Class project provides practical application. Prerequisite: MKTG 301; either ECON 311, QMETH 201, STAT 220, STAT 301, STAT 311, or STAT 390; may not be repeated.

MKTG 465 Marketing Data: Measurement and Analysis (4)
Tools for aiding market segmentation, positioning, product design, and demand analysis. Examines multidimensional scaling, conjoint analysis, factor analysis, cluster analysis, discriminant analysis, multiple regression, logistic regression, and decision trees. Emphasis on applications of practical marketing problems and using statistical packages. Prerequisite: MKTG 301; may not be repeated.

MKTG 470 International Marketing (4)
Focuses on assessing international marketing opportunities, formulating and implementing international marketing strategies. Examines how to use marketing analyses and deductive decision modeling in assessing international marketing opportunities. Uses marketing tools and concepts in the planning, preparation, and presentation and discussion of cases and class project. Prerequisite: MKTG 301; may not be repeated.
MKTG 475 Retail Strategy: Internet and Global Dimensions (4) Explores how owners and top managers of retail firms analyze and solve problems, design, implement, and evaluate strategies and other wise manage for competitive advantage. Utilizes cases, readings, and writing assignments as the main tools for teaching and learning. Prerequisite: MKTG 370; may not be repeated.

MKTG 477 Merchandise Acquisition and Management (4) Integration of summer internship experiences with discussion of merchandise acquisition. Includes retail inventory management system, processes of planning and buying merchandise, private label and imported goods, and relevant personnel management area. Centers on major project done for and with company buying staff. Prerequisite: MKTG 301; MKTG 370; MKTG 495. Offered: A.

MKTG 478 Retail Merchandising and Design Management (4) Second of capstone seminars includes integration of summer internship experiences with customer service, customer communications, merchandise presentation, and leadership skills. Visit local retailers to observe visual presentations, prepare design plan for store, and examine management styles to determine philosophy for employees, and provide customer service. Prerequisite: MKTG 301; MKTG 370; MKTG 495. Offered: W.

MKTG 480 Advanced Marketing Management (4) Capstone course connecting principles, tools, and elements of multiple marketing disciplines to a manager's perspective and responsibilities in today's company. Emphasizes strategy, analysis, and problem solving. Analyzes marketing problems using conceptual and quantitative tools utilized in marketing decision making. Prerequisite: MKTG 301; MKG 450; MKTG 460; may not be repeated.

MKTG 485 Strategic Market Management (4) Utilizes cases and/or projects to examine strategic market-based management. Analyze marketing situations to identify market trends and understand consumer and competitor behavior. Develop and justify appropriate courses of action to address marketing problems and opportunities in terms of product planning, distribution channels, pricing, and promotion. Prerequisite: MKTG 301.

MKTG 490 Special Topics and Issues in Marketing (1-6, max. 12) Contemporary topics and issues in marketing: marketing in nonprofit organizations, marketing of services, marketing in the public sector, and marketing in an economy of scarcity. Ordinarily only one topic area is addressed in any one quarter. Course content reflects contemporary developments and the current interests of instructors and students. Prerequisite: MKTG 301.

MKTG 495 Marketing Internship (1-4, max. 8) An internship with a company, not for profit organization, or government agency in a marketing capacity. Prerequisite: MKTG 301.

MKTG 496 Marketing Practicum (4) Rhodes Offers opportunities to apply principles, concepts, and skills learned previously to actual business situations. Participation in class part-time and in an internship with a business employer part-time. Prerequisite: MKTG 301.

MKTG 499 Undergraduate Research (1-6, max. 9) Prerequisite: MKTG 301.

MKTG 501 Marketing Management (4) Analysis and management of customer satisfaction in goods and services markets by profit and nonprofit organizations. Buyer behavior, market segmentation and product positioning, product policy, pricing, distribution, sales force and advertising management, and market research in the contexts of strategy development, decision making, implementation, and control.

MKTG 509 Foundations of Marketing Analysis (2) Examines analytical and statistical tools useful in strategic decision making in marketing. A dynamic computer simulation activity allows students to develop and receive feedback on competitive marketing strategies. Prerequisite: either B.A. 501 or MKTG 501. Offered: Sp.

MKTG 510 New Product Development (4) Integrates business, design, and engineering functions in the presentation and application of structures, tools, and methodologies important for successful new product development. New product development projects are accomplished with a cross-functional team emphasis. Prerequisite: B.A. 501.

MKTG 512 Consumer Marketing and Brand Management (4) Analysis of marketing strategies for consumer products and services. Focuses on consumer satisfaction and brand management including product line and brand developments, pricing strategies, channel and retail relationships, and marketing communication strategies for consumer goods and services. Prerequisite: B.A. 501.

MKTG 520 Marketing Channels (4) Channels of distribution decisions for goods and services in profit and nonprofit organizations. Considers methods of optimizing the number, quality of institutions and activities employed in dealing with exchange, service and time aspects of channel management. Includes management of marketing channels to marketing mix, organization objectives. Prerequisite: B.A. 501.

MKTG 530 Managing the Sales System (4) Examines the revenue generation function of a firm from a system-wide perspective. Topics include: understanding the communication process, analyzing markets, working with suppliers, establishing objectives, determining budgets, selecting media, measuring and evaluating effectiveness, using publicity and promotions. Long term and economic consequences are considered. Prerequisite: B.A. 501.

MKTG 550 Managing Customer Relationships Through Direct Marketing (4) Management of customer relationships through the lens of direct marketing. Topics include direct marketing creative activity, strategy, and execution; media and segmentation; direct marketing budgeting and financials; targeting, database, and predictive modeling; customer relationship marketing; business-to-business complex sales; privacy. Prerequisite: B.A. 501.

MKTG 555 Entrepreneurial Marketing and Management (4) Examines the skills and tools entrepreneurs need for bootstrap marketing in their firms. Covers how to target market segments, position products, estimate demand, set prices, gain access to channels, and manage issues of rapid growth. Prerequisite: B.A. 501.

MKTG 560 Research for Marketing Decisions (4) Methods and applications of marketing research to solve marketing problems. Deals with: problem definition, research design, questionnaire construction, sampling, and data analysis using SPSS. Introduces promising new developments in online research, web surveys, and data analysis. Class research project provides practical application. Prerequisite: B.A. 501.

MKTG 565 Database Marketing and Decision Models (4) Examines methodologies that are useful for analyzing customer databases. Presents models that can be applied in the analysis of marketing problems and the support of marketing decisions. Prerequisite: B.A. 501.

MKTG 570 International Marketing (4) Analysis of the marketing strategies and tactics of multinational corporations. Choice of entry strategies for foreign markets, analyzing international competition at home and abroad, and developing global marketing strategies. Prerequisite: B.A. 501; recommended: one I BUS course.

MKTG 575 Marketing High-Technology Products (4) Management of the marketing requirements of high-technology products. Examines how markets for high-tech products involve shortened product life cycles, demand for continual product updates, perceived risk of adoption by customers, requirements for intensive customer service and relationships, and growing reliance on business partners. Prerequisite: B.A. 501.

MKTG 579 Special Topics in Marketing (2-4, max. 12) Marketing topics of current concern to faculty and students. Offered only when allowed by faculty availability and sufficient student interest. Seminar content to be announced in advance of scheduled offerings. Prerequisite: B.A. 501.

MKTG 581 Doctoral Seminar in Consumer Behavior (4) Louie, Yahcich Survey of the field of consumer behavior introduces fundamental topics in consumer behavior including cognitive processes, emotion, and consumer satisfaction. Provides exposure to a variety of research methods including experiments, surveys, and phenomenological research.

MKTG 582 Doctoral Seminar in Multivariate Analysis for Marketing Research (4) MacLachlan, Moinpour Survey of methods useful for empirical evaluation of marketing phenomena and relationships. Includes an overview of measurement theory and practice; multidimensional scaling; conjoint analysis;
cluster, factor, and discriminant analyses; multivariate analysis of variance; structural equation modeling; and other methods commonly encountered in academic marketing research.

MKTG 584 Doctoral Seminar in Research Issues in Marketing (4) Examination of research problems and issues in marketing. Specific topics vary depending on the interest of faculty and students.

MKTG 591 Doctoral Seminar in Consumer Behavior Research Topics (4) Louie, Yalch Investigates research topics of current interest in consumer behavior. Considers the processes used by consumers to acquire and evaluate marketing information including advertising, publicity, word of mouth, packaging, product description, price, and retail outlets, and examines ways the principles in social perception influence consumers’ individual responses to marketing-related activities.

MKTG 593 Doctoral Seminar in Marketing Models (4) Erickson Focuses on modeling research efforts in various areas of marketing. Discussion of mathematical and statistical modeling approaches which contribute to scientific development in the marketing area and ways in which modeling is used to characterize and summarize the nature of general marketing situations in complex environments.

MKTG 599 Doctoral Seminar in Marketing (1, max. 12) Study and research in advanced topics of marketing. The seminar is generally concerned with unpublished areas of research and conducted by visiting professors and departmental faculty. Prerequisite: doctoral student status.

MKTG 600 Independent Study or Research (*, max. 10) Operations Management

OPMGT 402 Introduction to Logistics (4) Logistics studies of the efficient delivery of goods and services. A total-cost approach recognizes this involves not only the obvious vehicle-routing issues but also shipment size and mix, warehouse location, product design, and customer services. Includes study of real companies’ logistics problems. Prerequisite: OPMGT 301.

OPMGT 443 Inventory and Supply Chain Management (4) Use of material and supply chain management in manufacturing and service organizations to reduce inventory levels while providing adequate service to customers. Specific topics include forecasting, Just-in-Time production, deterministic and stochastic inventory models, and material requirements planning (MRP). Prerequisite: OPMGT 301.

OPMGT 450 Introduction to Project Management (4) Focuses on the management of complex projects and the tools and techniques which have been developed in the past 25 years to assist managers with such projects. The course covers all elements of project planning, scheduling, and control as well as implementation and organizational issues. Prerequisite: OPMGT 301.

OPMGT 461 Business of Process Design (4) Examines systems theory, project design, and strategic decision-making in a teaming environment. Provides a unique opportunity to get involved with real-life design problems in the chemical and aeronautical industries. Prerequisite: OPMGT 301.

OPMGT 490 Special Topics in Operations Management (1-6, max. 20) Operations management topics of current concern to faculty and students. Potential topics are: logistics management, project scheduling, manufacturing strategy, site and location analysis, management of service operations. Prerequisite: OPMGT 301.

OPMGT 495 Operations Management Internship (1-4, max. 8) Internship with a private firm, nonprofit organization or government agency, where work experience involves substantial application of analysis techniques and management concepts learned in classroom. Credit/no credit only. Prerequisite: OPMGT 301.

OPMGT 499 Undergraduate Research (1-6, max. 9) Operations Research

OPMGT 502 Introduction to Operations Management (4) Managerial decision making in operations problems, including application of quantitative analysis and use of computers. Production of goods or services in any type of organization. Inventory management, scheduling, facility location, management of service systems, and quality assurance. Prerequisite: QMETH 500.

OPMGT 535 Global Logistics Management (4) Provides an overview of the concepts and substance of trade, transportation, and logistics. Deals with management of physical, documentation, and information flows within supply chains, including purchasing, distribution, intermodal transportation, ERP eCommerce and e-fulfillment, financial transactions, and regulations. Prerequisite: permission of instructor. Offered: jointly with GTTL 501; AW.

OPMGT 536 Seminar in Global Trade, Transportation, and Logistics (4) Interdisciplinary seminar that brings together students with academics and practitioners at the forefront of trade, transportation, and logistics in discussions of selected topics. Additionally, students research issues of special interest. Prerequisite: OPMGT 535, GTTL 501, or permission of instructor. Offered: jointly with GTTL 502; Sp.

OPMGT 550 Project Management (4) Management of complex projects, and tools and techniques (e.g., CPM and PERT) developed to aid the planning, scheduling, and control of projects. Includes work breakdown structures, precedence networks, Gantt charts, resource leveling and allocation, and the use of microcomputer programs. Prerequisite: B A 502 or OPMGT 502 or equivalent.

OPMGT 570 Operations Strategy (4) Strategic management of operations and manufacturing in domestic and international companies. Developing and implementing a coherent strategy based on continuous improvement of quality, productivity, products, processes, and customer services. Facilities, capacity, process/ work-force planning, organization, people, systems integration, coordination between operations, marketing, engineering, and R&D. Prerequisite: B A 502 or OPMGT 502 or equivalent.

OPMGT 579 Special Topics in Operations Management (2/4, max. 12) Major topics in operations management and systems analysis. Emphasis on research and, where appropriate, application of quantitative analysis and computers. Topics vary, including workforce planning, project management, research and development management, quality assurance, technology planning and forecasting, systems analysis of complex organizations, and urban systems analysis. Prerequisite: B A 502.

OPMGT 584 Fundamentals of Operations Management Research (4) Klaasen Surveys basic areas that form the foundations for much of the research in operations management today. Topic areas include facility location, scheduling, project management, and supply chain management. Prerequisite: QMETH 580. Offered: W.

OPMGT 587 Advanced Topics in Inventory Management (4) Survey of literature in inventory/production control with emphasis on current research. Topics include single-echelon deterministic and probabilistic models and multi-echelon stochastic models. Prerequisite: QMETH 592 and course in probability theory and stochastic processes.

OPMGT 599 Doctoral Seminar in Operations Management (1, max. 12) Study and research in advanced topics of operations management. The seminar is generally concerned with unpublished areas of research and is conducted by visiting professors and departmental faculty. Prerequisite: doctoral student status.

OPMGT 600 Independent Study or Research (*, max. 10) Organization and Environment

O E 499 Undergraduate Research (1-6, max. 9) Selected problem areas or issues in consultation among faculty members and students. Prerequisite: permission of the undergraduate office.

Quantitative Methods

QMETH 450 Spreadsheet Models for Managerial Decision Making (4) Formulation and solution of business problems using operations research techniques in a spreadsheet environment. Techniques of linear and integer programming, decision analysis, network optimization, queuing, and simulation. Applications from marketing, finance, and operations. Prerequisite: I S 300.

QMETH 490 Special Problems in Quantitative Analysis (1-6, max. 20) Specialized quantitative techniques useful for solving business problems. Topics from operation research, statistics, computer methods. Emphasis on application. Prerequisite: either ECON 311, QMETH 201, PSYCH 213, PSYCH 218, STAT 220, STAT 301, STAT 311, or STAT 390.

QMETH 499 Undergraduate Research (1-6, max. 9) Research in selected problems in
business statistics, operations research, decision theory, and computer applications.

QMETH 500 Statistical Data Analysis for Management (2) Statistical models, techniques, and tools for aiding management decisions. Use of spreadsheets in basic business problems. Probability distributions, random sampling and standard errors, hypothesis testing, multiple regression, ANOVA, chi-square tests. Prerequisite: preparation in elementary calculus and successful completion of university-administered proficiency exam.

QMETH 501 Decision Support Models (2) Introduction to computer-based modeling techniques for management decision making. Linear programming, decision analysis, and simulation. Formulation and interpretation. Prerequisite: QMETH 500.

QMETH 503 Practical Methods for Data Analysis (4) Presentation of basic exploratory data analysis with business examples. Data summaries, multivariate date, time series, multway tables. Techniques include graphical display, transformation, outlier identification, cluster analysis, smoothing, regression, robustness. Prerequisite: B A 500 or equivalent or permission of instructor. Offered: jointly with STAT 503.

QMETH 520 Managerial Applications of Regression Models (4) Data exploration and inference using regression models for business forecasting and management. Models include simple, multiple, logistic, and nonlinear regression, use of dummy variables, transformations, variable selection, and diagnostics. Prerequisite: QMETH 500 or B A 500.

QMETH 528 Survey Sampling Applications (4) Introduction to design and implementation of sample surveys with emphasis on business applications. Simple random, stratified, cluster, multistage sample methods. Probability sampling, optimal allocation of sampling units. Mail, telephone, interview methods. Estimation methods, Questionnaire design. Non-response. Prerequisite: QMETH 500 or B A 500 or equivalent or permission of instructor.

QMETH 530 Forecasting Models in Business (4) Introduction to time series analysis and forecasting. Topics include seasonal adjustment, decomposition, exponential smoothing, moving average, and autoregression as well as model identification, estimation, diagnostics, and adaptive forecasting illustrations using real data. Prerequisite: QMETH 500 or B A 500.

QMETH 551 Modeling with Spreadsheets (4) Advanced formulation and modeling of business problems in a spreadsheet environment. Techniques of linear, integer, and nonlinear programming, multi-objective goal programming, and simulation. Applications from finance, marketing, and operations. Prerequisite: B A 502 or QMETH 501 or equivalent.

QMETH 579 Special Topics in Quantitative Methods (2/4, max. 12) Presentation of topics of current concern to students and faculty in operations research and applied business statistics. Potential topics include applications and extensions of mathematical programming, stochastic processes, discrete programming, networks models, and the application of statistical techniques.

QMETH 580 Mathematical Programming (4) Advanced survey of mathematical programming with applications to business problems. Includes linear, integer, stochastic, nonlinear, and dynamic programming and network optimization. Treatment includes formulation, optimality conditions, duality theory, solution algorithms. Applications to production, scheduling, marketing, finance, and equipment replacement. Prerequisite: B A 501 or equivalent and doctoral student or permission of instructor.

QMETH 592 Stochastic Models: Queuing and Simulation (4) Application of stochastic processes to business problems. Focuses on development and application of queuing theory and discrete event simulation. Prerequisite: stochastic processes, knowledge of high level programming language, and doctoral student or permission of instructor.

QMETH 599 Doctoral Seminar in Operations Research (1, max. 12) Study and research in advanced topics of operations research. The seminar is generally concerned with unpublished areas of research and is conducted by visiting professors and departmental faculty. Prerequisite: doctoral student status. Credit/no credit only.

QMETH 600 Independent Study or Research (1-3).

Technology Management MBA

TMMBA 500 Overview of Technology and Teamwork (1) Bigley, Sundem Residential session to explore teamwork and managerial effectiveness, communication skills, and the high technology industries on which the Technology Management MBA program focuses. Prerequisite: permission of School of Business Administration. Credit/no credit only.

TMMBA 501 Competitive Analysis for Technology Managers (5) Boeker, Hill Examines the nature of the competitive process and the source of firm-level competitive advantage. Explores the economics of market competition and the strategies firms use to gain competitive advantage. Explores fundamental micro-economic principles of competition, and applies them to the study of competitive advantage and strategy. Prerequisite: Permission of School of Business Administration.

TMMBA 502 Financial Reporting and Analysis (4) Bowen, Seifcik Financial accounting information in technology companies from a management perspective. Topics include use of financial statements by managers, investors, financial analysts, and other firm stakeholders; measurement and reporting of assets, equities, income, analysis of financial ratios; and comparisons of financial performance across companies. Prerequisite: Permission of School of Business Administration.

TMMBA 503 Analysis of Data (2) Siegel, Tamura An introduction to statistical techniques useful for management decision-making, with analysis of problems using spreadsheet programs. Topics include visualization and summarization of data and variability; confidence intervals and hypothesis testing; and prediction using multiple regression and time series analysis. Prerequisite: Permission of School of Business Administration.

TMMBA 505 Marketing High-Tech Products and Services (4) Dodson, Schlosser Fundamentals of marketing analysis in the context of technology-based products and services. Topics include development of a marketing strategy, customer and competitor analyses, and marketing research. Prerequisite: Permission of School of Business Administration.

TMMBA 506 Capital Markets, Security Valuation, and Risk Management (4) Kamara, Karpoff Basic paradigms of modern financial theory, especially portfolio theory, asset pricing theory and financial derivatives. Includes construction of optimal portfolios, measuring risk of securities, the relations between risks and returns, the pricing and use of futures and options contracts. Prerequisite: Permission of School of Business Administration.

TMMBA 507 Analysis of Domestic and International Economic Conditions (4) Hadjimichalakis, Hess Examines economy-wide markets: markets for goods and services; money, bond and stock markets; foreign exchange markets; and markets for labor and other inputs. Includes interactions among markets to explain movements in output, interest rates, exchange rates, price levels and wages, foreign trade, and foreign investments. Prerequisite: Permission of School of Business Administration.
School of Dentistry

Dental Public Health Sciences

DPHS 201 Planning a Career in Dentistry for the Future (2) Future-oriented overview of important concepts in dental science, contemporary modes of patient treatment, and dental-care delivery systems. Provides firsthand exposure to practice of dentistry and prerequisite materials in oral anatomy, epidemiology, and other basic sciences subjects. Open to all second- and third-year undergraduate students. Offered: Sp.

DPHS 449 P-Directed Studies in Dental Public Health Sciences (*) Students and faculty with common academic interests pursue them together within the curriculum by means of independent study and a tutorial student-faculty relationship. Credit/no credit only. Offered: AWSpS.

DPHS 510 Social and Historical Perspectives in Dentistry (2) Examines dental care problems involving biological, behavioral, and community elements and has student develop hypotheses regarding nature and complexity of problem, set objectives, seek resources and information, and contribute to development of outcomes. Credit/no credit only. Offered: A.

DPHS 535 P-Scientific Literature in Clinical Decision Making (1) Introduction to critical reading of individual articles in professional journals and integrating the findings of several articles. Use of the literature to assist the practicing dentist in making clinical decisions. Offered: Sp.

DPHS 541 P-Ethics in Dentistry (1) Seminar improving ethical reasoning skills and conveying ethical and legal standards of the profession. Credit/no credit only. Offered: Sp.

DPHS 550 P-Directed Studies in Dental Public Health Sciences (*, max. 6) Students and faculty members who have common academic interests can pursue them together within the curriculum by means of independent study and a tutorial student-faculty relationship. Credit/no credit only. Offered: AWSpS.

DPHS 568 Biostatistics in Dentistry (3) Introduction to concepts and methods of descriptive and inferential statistics with applications in dentistry emphasized. Topics include comparison of means and proportions, hypothesis testing, confidence intervals, non-parametric methods, linear regression, and correlation. Prerequisite: enrollment in School of Dentistry or permission of instructor. Offered: jointly with BIOST 510.

DPHS 569 Clinical Epidemiology and Study Design in Dentistry (2) An introduction to epidemiological methods as they relate to dental research. Topics covered include the estimation of dental disease occurrence at patient level and site level and the design and analysis of clinical trials with special emphasis on designs unique to dentistry, such as split-mouth designs. Offered: S.

DPHS 575 Behavioral Dental Research (1) Survey of behavioral science research and methodology in dentistry and related fields. Emphasis in various quarters varies: literature review, research design, instrumentation, data analysis. Designed for advanced students who plan a research career. Credit/no credit only.
during the clinical program and in future dental practice including: obtaining a patient pool, treatment planning, patient management in accordance with professional codes, risk management strategies, patient financial account management, and contemporary biohazardous materials guidelines.

DENT 555 P-Clinical Practice Management 2 (1) Designed to provide the student with the experience required to manage a patient pool during the clinical program and in future dental practice including: obtaining a patient pool, treatment planning, patient management in accordance with professional codes, risk management strategies, patient financial account management, and contemporary biohazardous materials guidelines.

DENT 556 P-Clinical Practice Management 2 (1) Designed to provide the student with the experience required to manage a patient pool during the clinical program and in future dental practice including: obtaining a patient pool, treatment planning, patient management in accordance with professional codes, risk management strategies, patient financial account management, and contemporary biohazardous materials guidelines.

DENT 557 P-Clinical Practice Management 2 (1) Designed to provide the student with the experience required to manage a patient pool during the clinical program and in future dental practice including: obtaining a patient pool, treatment planning, patient management in accordance with professional codes, risk management strategies, patient financial account management, and contemporary biohazardous materials guidelines.

DENT 562 Elective Offering in Advanced Cardiac Life Support (2) Introduction to airway management (masking/intubation/oropharyngeal airways/nasopharyngeal airways/cricothyrotomy), 12-lead EKG recognition and diagnosis, cardiac physiology and pathophysiology, and pharmacologic action of several different medications. Students who pass AHA guidelines for completion on an ACLS course are awarded ACLS certification. Credit/no credit only. Offered: W.

DENT 563 Elements of Conscious Sedation (1-2) Details theory and techniques for rendering oral, inhalation, transmucosal, intramuscular, and intravenous forms of conscious sedation. Focuses on pharmacology and pharmacokinetics of nitrous oxide, benzodiazepines, narcotics, and barbiturates. Addresses usual applications, special considerations, legal issues, and proper record keeping. Emphasizes prevention and management of emergencies. Credit/no credit only. Offered: A.

DENT 565 Dental Photography (1) Provides student with sufficient knowledge and experience to select and use correct photographic equipment for photographing patients (facial and interoral), casts, instruments, x-rays, charts, and objects. Credit/no credit only. Offered: A.

DENT 566 Physical Diagnosis (1) Seminar on performing complete physical examination including basic assessment of overall patient, vital signs, cardiac, pulmonary, abdominal, extremity, neurologic, and head/neck. Examination techniques include observation, auscultation, percussion. Writing fundings and interpreting physical examinations. Offered: S.

DENT 568 Internal Medicine for Dentistry (1-3), max. 6 Review of major organ systems, including normal anatomy and physiology, common pathophysiologies, medical interventions. Details modifications necessary for dental treatment and medical emergency management. Credit/no credit only. Offered: AS.

DENT 569 Contemporary Dental Practice Management (1) Chasteen Didactic study designed to update dental graduate students in recent developments in the management of a modern dental practice. Focuses on the business and legal aspects of dental practice. Credit/no credit only. Offered: A.

DENT 610 Introduction to Clinical Dentistry (2) Introduction to clinical dental training including infection control, personal dental hygiene, oral anatomical landmarks, medical histories, fluoride application, fabrication on athletic mouth guards, and professional ethics. Students participate in classroom exercise followed by rotations in functioning dental clinics. Offered: W.

DENT 640 P-Extramural Clinics in Geriatric Dentistry (2) Extramural geriatric clinical experience, including three days at a nursing home or community clinic, and brief didactic component. Credit/no credit only. Offered: AWSpS.

DENT 645 P-Hospital Rotation (2) Clinical experience that puts into practice the material presented in 537. The student is involved in hospital procedures and protocol and in dental care of the hospital patient as well as after-hours call duty. Offered: AWSpS.

DENT 650 P-Extramurals (*, max. 12) Extramural sites arranged to provide dental students, at varying levels of their education, with opportunities to treat a wide variety of patients in the delivery systems outside the school. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSpS.

DENT 651 P-Anesthesia Rotation (6) 1.5-month rotation in anesthesia at one of three local hospitals. Objectives: administration of anesthesia, management of emergency situations and airway problems, familiarization with pharmacology of anesthetic drugs; increased efficiency with venipuncture. Credit/no credit only. Offered: AWSpS.

DENT 652 P-Clinical Medicine Clerkship (4) One-month clinical rotation in clinical medicine at a local hospital. Objective is to increase the student’s ability in physical evaluation of patients as well as to give in-depth knowledge of hospital procedures and commonly prescribed medications. Credit/no credit only. Offered: AWSpS.

DENT 655 Medical Emergency Management: Basic Life Support (1) Review of principles and practical applications for the management of medical emergencies in dental practice in conjunction with training and certification in Basic Life Support. Offered: S.

DENT 657 Comprehensive Clinic (1-10, max. 10) Clinical comprehensive care for patients. Offered: S.

DENT 659 Comprehensive Clinic (1-10, max. 10) Clinical comprehensive care for patients. Offered: S.
ENDO 563 Radiographic Interpretation (2) Various aspects of radiographic interpretation of particular relevance to endodontics, including interpretation of normal structures, acquired and developmental abnormalities, infections, sialoliths, dysplasias, cysts, malignant lesions, benign tumors, and various diseases other than tumors.

ENDO 568 Endodontic Practice Management (1) Essential elements for establishing and managing a successful specialty practice in Endodontics. Prerequisite: ENDO 562. Offered: A.

ENDO 580 Endodontic Seminar (2) Continuous weekly seminar devoted to review of endodontic and related literature and discussion of research methods.

ENDO 581 Endodontic Seminar (2) Continuous weekly seminar devoted to review of endodontic and related literature and discussion of research methods.

ENDO 582 Endodontic Seminar (2) Continuous weekly seminar devoted to review of endodontic and related literature and discussion of research methods.

ENDO 583 Endodontic Seminar (2) Continuous weekly seminar devoted to review of endodontic and related literature and discussion of research methods.

ENDO 584 Endodontic Seminar (2) Continuous weekly seminar devoted to review of endodontic and related literature and discussion of research methods.

ENDO 585 Endodontic Seminar (2) Continuous weekly seminar devoted to review of endodontic and related literature and discussion of research methods.

ENDO 586 Endodontic Seminar (2) Continuous weekly seminar devoted to review of endodontic and related literature and discussion of research methods.

ENDO 587 Endodontic Seminar (2) Continuous weekly seminar devoted to review of endodontic and related literature and discussion of research methods.

ENDO 590 Treatment Planning Seminar (2, max. 16) Weekly seminar to discuss controversial treatment problems and difficult diagnostic cases.

ENDO 593 Clinical Practice Teaching (1, max. 3) Closely supervised experience in teaching clinical endodontics to the undergraduate dental student.

ENDO 594 Current Endodontic Literature (1) A review and critical evaluation of the contemporary literature relative to endodontics.

ENDO 595 Endodontic Surgery (2) Comprehensive review of biological and technical aspects of endodontic surgery with emphasis on both the classical and current scientific surgical literature. Lectures and topic seminar discussion along with laboratory demonstration of various surgical techniques.

ENDO 597 Endodontics Teaching Seminar (2) Weekly seminars devoted to an examination of general problems of teaching and learning and specific problems of endodontics teaching. Offered: W.

ENDO 598 Endodontics Teaching Seminar (2) Weekly seminars devoted to an examination of general problems of teaching and learning and specific problems of endodontics teaching. Offered: Sp.

ENDO 600 Independent Study or Research (*) Prerequisite: permission of graduate program adviser.

ENDO 630 P-Clinical Endodontics (1-, max. 7) Student is required to complete endodontic treatment of anterior, premolar, and molar teeth. In addition to nonsurgical treatment of several endodontic cases, the student assists with a periapical surgery. Student must complete seven quarters of 630 and all course requirements before a grade is awarded.

ENDO 658 Endodontic Emergency Rotation (1) Clinical experience in managing and treating patients in pain. Offered: AWSpS.

ENDO 659 P-Endodontics Extended Learning (*, max. 4) Supplemental work in endodontics to correct an area of student deficiency. Credit/no credit only.

ENDO 660 Clinical Endodontics (4, max. 32) Clinical diagnosis and treatment of pulpitis pathology and related sequelae.

Oral Biology

ORALB 449 Undergraduate Research Topics in Oral Biology (*) Individual research on topics selected in collaboration with a faculty member. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSpS.

ORALB 520 P-Molecular Microbiology and Oral Diseases (3) Darveau Applies students' background knowledge in basic sciences to an understanding of the molecular bases of the interactions between microorganisms and oral tissues that lead to plaque formation and dental diseases. Principles of clinical asepsis and diagnosis of caries and periodontal diseases also covered. Offered: Sp.

ORALB 521 Medical Microbiology and Immunology (2) Darveau Bacterial structure, physiology and genetics. Viral structure and function. Bacterial and viral diseases of the respiratory tract, skin, GI tract, UG tract. Innate and adaptive immunity. Immune responses to infection, immunodeficiencies and autoimmunity. Offered: W.

ORALB 525 P-Advanced Oral Biology (2) Morton Consists of in-depth studies of specific oral diseases through use of seminar and discussion. Students are required to present literature reviews and to act as discussion leaders. Primarily designed for students with DDS, MD, or DVM degrees. Prerequisite: permission of instructor. Offered: AWSpS.

ORALB 567 Oral and Maxillofacial Surgery (2) Darveau Selected readings and seminars on a topic chosen by individual arrangement in collaboration with a faculty member. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSpS.

ORALB 568 Oral Tissue Development, Structure, and Function (3, max. 6) Popowics Selected readings and discussions explore recent advances in cellular and molecular biology relevant to oral biology and medicine. Special emphasis on craniofacial and dental development, oral mucosa and periodontal tissues, salivary gland function, and occlusion and gustation. Prerequisite: permission of instructor. Offered: WSp.

ORALB 569 Oral Biology (5-10) Directed and guided experience in selected topics in teaching techniques, teaching philosophy, and course design of courses given by the Department of Oral Biology. Students are required to participate in lecture and laboratory teaching under the supervision of the course director. Prerequisite: permission of instructor. Offered: AWSpS.

ORALB 570 Oral Pathology (1-3, max. 10) Morton Presentation of interesting oral lesions from the dental school and the University of Washington Medical Center and the correlation of the clinical findings with morphologic and pathogenetic mechanisms. Primarily designed for students with DDS, MD, or DVM students. Offered: AWSpS.

ORALB 571 Oral Pathology (1-3, max. 10) Morton Microscopic examination of oral lesions exhibiting basic histopathologic changes with gradual transition to the presentation of interesting cases from the Oral and Maxillofacial Biopsy Service, correlating the clinical findings with morphologic and pathogenetic mechanisms. Primarily designed for students with DDS, MD, or DVM degrees. Prerequisite: permission of instructor. Offered: AWSpS.

ORALB 572 Oral Pathology (3, max. 6) Oda Survey of the diseases of the oral facial regions in lecture and laboratory sessions. Diseases of teeth and their supporting structures and
diseases of the oral and paroral soft tissues and bones. Correlations between clinical findings and histopathologic features. Attendance in the laboratory is required. Offered: AW.

ORALB 574 Clinical Stomatology (3) Morton Diseases of the oral cavity and jaw are presented as the practitioner encounters them—detailed clinical pictures, laboratory tests, radiographic findings, surgical exploration for the establishment of a therapeutic diagnosis. Offered: Sp.

ORALB 575 Oral Biology Seminar (1-3, max. 10) Izutsu Presentation and discussion of current research problems by members of the staff, investigators from other departments in the University, visiting scientists, and trainees. Prerequisite: permission of instructor. Offered: AWSpS.

ORALB 576 Molecular Aspects of Epithelial Biology (1-2, max. 2) Dale In-depth discussion of cytoskeleton, cell junctions, influence of growth factors, retinoids, and other exogenous agents on differentiation and function of normal stratified epithelia. Prerequisite: BIOC 440 (or equivalent) or permission of instructor. Offered: odd years; Sp.

ORALB 577 Applied Therapeutics in Dentistry (2) Watson Practical information about drugs included in practice of dentistry. Topics include evaluation of case histories, dental considerations pertaining to medical conditions and drug therapies, types of drugs and dosages used for common medical conditions, the pharmacology of drugs prescribed by the clinician, and the mechanisms involved in drug interactions. Offered: odd years; A.

ORALB 578 Research Techniques in Oral Biology (2-4, max. 15) Introduction to biochemical, analytical, or morphological techniques employed in biochemical cytology or molecular pathology as well as in vitro techniques of tissue and organ culture. Prerequisite: permission of instructor. Offered: AWSpS.

ORALB 579 Molecular Biology (2) Presland Applications of molecular biology and recombinant DNA methodologies to oral biology topics of interest in dental sciences. Prerequisite: BIOCHEM 405 or BIOCHEM 406 or equivalent, and permission of instructor. Offered: even years; S.

ORALB 581 Secretory Process in Exocrine Glands (1-3, max. 3) Izutsu Biostructural, physiological, and biochemical aspects of individual secretory systems as integrated units. Faculty members with appropriate expertise participate in discussions and presentations during each of the three quarters. Offered: Sp.

ORALB 582 Secretory Process in Exocrine Glands (1-3, max. 3) Izutsu Biostructural, physiological, and biochemical aspects of individual secretory systems as integrated units. Faculty members with appropriate expertise participate in discussions and presentations during each of the three quarters.

ORALB 583 Secretory Process in Exocrine Glands (1-3, max. 3) Izutsu Biostructural, physiological, and biochemical aspects of individual secretory systems as integrated units. Faculty members with appropriate expertise participate in discussions and presentations during each of the three quarters.

ORALB 591 Advanced Topics in Oral Biology and Medicine I (1-2, max. 2) Herring Review of current molecular and cellular advances in developmental biology relevant to head and neck embryology, tooth development and epithelial differentiation. Offered: jointly with ORTHO 591; W.

ORALB 592 Advanced Topics in Oral Biology and Medicine II (1-2, max. 2) Herring Review of current scientific literature relevant to cranioskeletal development and growth, bone biology and orthodontic tooth movement. Offered: jointly with ORTHO 592; Sp.

ORALB 593 Advanced Topics in Oral Biology and Medicine III (1-2, max. 2) Herring Review of current scientific literature relevant to oral soft tissue structure and physiology, including mastication and swallowing, salivary glands, periodontum and dental pulp. Offered: jointly with ORTHO 593.

ORALB 600 Independent Study or Research (1) Prerequisite: permission of instructor. Offered: AWSpS.

ORALB 700 Master's Thesis (1) Offered: AWSpS.

ORALB 800 Doctoral Dissertation (1) Offered: AWSpS.

Oral Medicine

ORALM 404 Considerations in Care of the Patient with a Disability (*, max. 6) Role of auxiliaries in dental treatment of the special patient, including psychosocial issues, communication techniques, wheelchair transfers; dental prevention, medical and dental management of specific disabilities; drug therapy, sedation, and anesthesia. Offered: AWSpS.

ORALM 460 Clinical Management of Patients with Disabilities (*, max. 10) Participation in chair/side treatment of patients with disabilities; drug therapy, sedation, and anesthesia. Offered: AWSpS.

ORALM 465 Dental Care of the Disabled Literature Review (1) Review of the current scientific literature pertaining to disability issues, research, clinical management, resources, and legislation relating to oral health of persons with disabilities. Credit/no credit only. Offered: AWSpS.

ORALM 504 Communication Skills II - Cultural Competency (1) Continuation of basic communication skills. Credit/no credit only. Offered: A.

ORALM 517 Physical Examination II (2) Watson Clinical interviewing exercises. Development of skills through participation in clinical sessions.

ORALM 520 P-Introduction to Oral Radiology (2) Physical, biological, technical, and diagnostic aspects of dental x-ray procedures. Offered: AW.

ORALM 524 Communication Skills in Dentistry — Introduction to Patient Interviewing (1) Different aspects of verbal and non-verbal communication, recognizing obstacles to effective communication, and developing strategies to overcome communication obstacles. Clinical interviewing exercises.

ORALM 526 General Medicine (2) Addresses medical, physical, and psychological conditions that impact the practice of dentistry. Provides information regarding collection of appropriate medical and physical data and integration of information into plans relevant to the routine management of patients in dental practice. Instruction occurs via lectures, videos, assigned readings, and case scenarios.

ORALM 527 Introduction to Treatment Planning (1) Problem-oriented record system with basic concepts of treatment planning. Students prepare treatment plans in advance of seminar. Offered: Sp.

ORALM 528 Dental Education and Care of the Disabled (1) Addresses the special needs and dental management of patients with development-related disabilities such as Down syndrome and cerebral palsy, mental retardation, and other conditions such as head trauma. Utilizes instructional videos.

ORALM 529 Stomatology (4) Focuses on ability to recognize, diagnose, and treat non-dental oral diseases and conditions that are commonly encountered in clinical practice. Rotations through the oral medicine undergraduate clinic where students take history and examine patients presenting for comprehensive care or urgent care. Interpretation and management of non-dental oral pathology and medical/psychological issues. Offered: S.

ORALM 531 P-Acute and Chronic Orofacial Pain (1) Essential clinical and technical information and skills for diagnosis and treatment of acute and chronic pain, including differential diagnosis, and behavioral factors. Offered: A.

ORALM 532 P-Acute and Chronic Orofacial Pain (1) Essential clinical and technical information and skills for diagnosis and treatment of acute and chronic pain, including differential diagnosis, and behavioral factors. Offered: W.
ORALM 533 P-Acute and Chronic Orofacial Pain (2) Essential clinical and technical information and skills for diagnosis and treatment of acute and chronic pain, including differential diagnosis, and behavioral factors. Offered: Sp.

ORALM 540 P-Oral Medicine Senior Seminar (2, max. 4) Clinical conference devoted to case presentations of patients with dental treatment needs and complicating medical problems. Offered: AW.

ORALM 545 P-Clinical Conference in Oral Medicine (1-, max. 2) Clinical pathologic conference utilizing interdisciplinary approach to patient care and emphasizing basic science application. Offered: AW.

ORALM 550 P-Directed Studies in Oral Diagnosis (*, max. 12) See DPHS 449 for course description and prerequisite. Offered: AWSpS.

ORALM 560 Advanced Diagnostic Techniques (2) Advanced diagnostic procedures used to identify oral disorders, included are in-depth discussions of history analysis, methods for psychologic evaluation, soft and hard tissue diagnostic procedures, neurologic, salivary gland, and other tissue analyses requiring special procedures. Offered: AWSpS.

ORALM 564 Dental Care of the Disabled I (*, max. 10) Advanced topics in rehabilitation dentistry including psychosocial issues, characteristics and needs of patients with specific disabilities; patient management and use of portable equipment; drug therapy, sedation and anesthesia; dental prevention, and emergency procedures. Seminars and self-directed study. Prerequisite: permission of instructor. Offered: AWSpS.

ORALM 565 Oral Medicine Clinical Conference (*, max. 16) Clinical conference in which diagnostic data concerning patients seen in the oral medicine clinic are presented for evaluation. When possible, the patient is present with laboratory findings, radiographs, and the results of special tests. Offered: AWSpS.

ORALM 567 Behavioral Management of Acute and Chronic Orofacial Pain (2) Overview of adult psychopathology and illness behavior as it relates to psychosomatic concepts and chronic pain. review of assessment and behavioral management strategies for the dental practitioner. Open to graduate students, postdoctoral fellows, residents in dentistry, medicine, psychology. Offered: Sp.

ORALM 570 Oral Medicine and Therapy (2-, max. 6) Lecture directed toward the presentation and discussion of oral diseases and oral manifestations of systemic disease. Primarily the clinical manifestations' relationship to generalized disease processes and patient management with in-depth discussions of therapy. Offered: AWSpS.

ORALM 576 Oral Medicine Literature Review (1-) Seminar analyzes the recent literature concerning the area of oral medicine, diagnosis, and therapy for oral disease. Offered: AWSpS.

ORALM 578 Dental Care of the Disabled Literature Review (1, max. 3) Review of the current scientific literature pertaining to disability issues, including research, clinical management, resources, and legislation pertaining to oral health of persons with disabilities. Credit/no credit only. Offered: AWSpS.

ORALM 581 Advanced Seminars in Oral Radiology (2, max. 8) Explores aspects of oral and maxillofacial radiology and related fields. Offered: AWSpS.

ORALM 584 Dental Care of the Disabled III (*, max. 10) Field practice in community outreach to facilities and agencies serving disabled populations. Includes observation, dental screenings, patient education and in-service training of direct care staff. Prerequisite: ORALM 404 or ORALM 664. Offered: AWSpS.

ORALM 600 Independent Study or Research (*) Credit/no credit only. Offered: AWSpS.

ORALM 601 Oral Medicine Research Seminar (1, max. 10) Presentation and discussion of current research problems by graduate students, faculty, and investigators from other departments in the university. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSpS.

ORALM 630 P-Clinical Diagnosis and Oral Medicine (1[2]-, max. 5) Develops skills in assessment of patients requiring comprehensive dental care. Includes interviewing and physical examination, radiographic interpretation, problem list formulation, and chart documentation. Students participate in diagnosis and treatment of patients requiring emergency and specialized dental care. Offered: AWSpS.

ORALM 640 Advanced Clinical Diagnosis and Oral Medicine (1[2]-, max. 3) Advanced instruction in diagnosis and management of patients requiring emergency and specialized care. Includes participation in clinical rotations to oral medicine specialty clinics. Offered: AWSpS.

ORALM 650 P-Oral Medicine Clinical Elective (1-6, max. 6) Opportunities for students to work in various clinical activities at local hospitals or other sites outside the school. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSpS.

ORALM 660 Rotations in Medical Disciplines (1-4, max. 24) Clinic, oriented to the hospital practice of oral medicine, deals with examination and nonsurgical therapy of hospital patients. The conditions treated include primary oral diseases, oral manifestations of systemic diseases, and oral defects resulting from medical treatment of serious systemic disease. Credit/no credit only. Offered: AWSpS.

ORALM 663 Introduction to Educational Methods in Dentistry (2) Principles of teaching and learning, their applications in dental education. Basic principles include learning theory and cognitive processing, identifying prerequisite knowledge of learners, determining objectives of outcomes of learning, selecting appropriate methods and materials, using evaluation procedures. Increases understanding of instruction process to provide a sound foundation for teaching. Offered: AWSpS.

ORALM 664 Dental Care of the Disabled II (*, max. 10) Practicum in chair/bedside delivery of dental care to different disabled populations. Includes rotations to institutions, long-term care facilities, and homebound service, using mobile equipment. Prerequisite: ORALM 564 and permission of instructor. Offered: AWSpS.

ORALM 665 Clinical Oral Medicine (*, max. 33) Clinic involving the diagnostic evaluation of patients with difficult and unusual oral diseases. The student diagnoses and treats the patient. Types of therapy include medications and chemical agents, functional physical therapy, and counseling. Offered: AWSpS.

ORALM 670 Clinical Oral Medicine Teaching (1-4, max. 16) Clinic designed to give the student experience and instruction in the teaching of clinical oral diagnosis. Treatment of emergency dental problems as well as routine dental and special diagnostic procedures is emphasized. Offered: AWSpS.

**Oral Surgery**

O S 520 P-Local Anesthesia (2) Pharmacology, physiology, anatomy, and techniques of local anesthesia for dental students.

O S 530 Oral Surgery: Diabetic (1, max. 3) Covers the scope of oral and maxillofacial surgery as practiced in the United States today. Introductory course for predoctoral dental students.

O S 532 P-Sedation and Pain Control (2) Techniques of sedation (oral, inhalational, intravenous) and pain control.

O S 560 Dental Sedation (2) For graduates of the various dental specialties on the theory, application, and techniques of dental sedation. All forms of sedation, including oral, intramuscular, intravenous, and inhalation, are covered. Clinical experience is provided in the second half of the quarter.

O S 630 P-Clinical Oral Surgery (2, max. 6) Clinical experience in simple and complex dentoalveolar and pre-prosthetic surgery. A problem-based course using an auto-tutorial approach covering the extraction of teeth, impaction surgery, medications, surgical complications, treatment of infections, bone cysts, maxillary sinus complications, and salivary gland and mucoosal pathology. Credit/no credit only.

O S 651 P-Harborview Clerkship (2-10, max. 10) Six-week rotation at Harborview Medical Center, including intensive instruction in oral surgery procedures and observing and assisting oral and maxillofacial surgery in the operating room. Credit/no credit only. Prerequisite: permission of department chairperson.

**Orthodontics**

ORTHO 449 Directed Studies in Orthodontics (*) See DPHS 449 for course description and prerequisite. Credit/no credit only. Offered: AWSpS.

ORTHO 520 P-Growth and Development of the Face and Dentition (2) Covers basic concepts in orthodontic work. Exposes students to the growth and development of the orofacial structures and how orthodontists can use predict and use growth to treat malocclusion. Reviews
concepts from basic biology and covers specific topics related to orthodontic tooth movement and orthopedic treatment. Offered: A.

ORTHO 521 Growth and Development in Ortho Dx and Tx (3) Basic principles of pre and postnatal growth and development integrated with the recognition, analysis, and treatment of planning of problems encountered in dental and skeletal malocclusions.

ORTHO 522 P-Beginning Adjunctive Orthodontics (2) Lecture/laboratory instruction in indications for, and techniques of, simple orthodontic tipping, rotational and extrusive movements, as well as orthodontic study model fabrication. Prerequisite: ORTHO 520. Offered: S.

ORTHO 550 P-Directed Studies in Orthodontics (*, max. 6) See DPHS 449 for course description and prerequisite. Offered: AWSpS.

ORTHO 551 Review of Selected Literature in Orthodontics (1) Students select a topic for review, review appropriate literature, and prepare written critique. Offered: AW.

ORTHO 552 Journal Club (1) Predoctoral students join graduate students in review of current orthodontic literature. Offered: AWSp.

ORTHO 560 Orthodontics Seminar (1-5, max. 25) Methods of diagnosis, analysis, and treatment planning of malocclusion; analysis of methods and theoretical principles used in the treatment of malocclusion. The student presents a detailed case analysis and plan of treatment for each clinical patient supervised. Offered: AWSpS.

ORTHO 562 Orthodontic Theory (2) Lecture-seminar sequence dealing with interpretation and application of orthodontic principles and concepts. Pertinent literature, research findings, and current orthodontic theory are analyzed in depth. Offered: AWSpS.

ORTHO 563 Orthodontic Theory (2) Lecture-seminar sequence dealing with interpretation and application of orthodontic principles and concepts. Pertinent literature, research findings, and current orthodontic theory are analyzed in depth. Offered: AWSpS.

ORTHO 564 Orthodontic Theory (2) Lecture-seminar sequence dealing with interpretation and application of orthodontic principles and concepts. Pertinent literature, research findings, and current orthodontic theory are analyzed in depth. Offered: AWSpS.

ORTHO 565 Orthodontic Theory (2) Lecture-seminar sequence dealing with interpretation and application of orthodontic principles and concepts. Pertinent literature, research findings, and current orthodontic theory are analyzed in depth. Offered: AWSpS.

ORTHO 566 Orthodontic Theory (2) Lecture-seminar sequence dealing with interpretation and application of orthodontic principles and concepts. Pertinent literature, research findings, and current orthodontic theory are analyzed in depth. Offered: AWSpS.

ORTHO 567 Orthodontic Theory (2) Lecture-seminar sequence dealing with interpretation and application of orthodontic principles and concepts. Pertinent literature, research findings, and current orthodontic theory are analyzed in depth. Offered: AWSpS.

ORTHO 570 Orthognathic Cephalometry (2) Basic principles, history, and techniques of orthognathic cephalometry. Offered: AS.

ORTHO 575 Post-Retention Seminar (1, max. 2) Each student is required to locate three or more former orthodontic patients who qualify as at least ten years postretention. Complete orthodontic records must be obtained, analyzed, and discussed in the seminar. Instructor critiques the presentation and offers similar or contrasting cases for comparison. Offered: WS.

ORTHO 580 Functional Cranial Anatomy (3) Herring Lecture and laboratory dissection concentrating on clinical and functional anatomy of the head and neck. Offered: S.

ORTHO 582 Adult Orthodontics Seminar (2) Seminar for orthodontic, periodontic, and restorative dentistry graduate students in comprehensive, integrated diagnosis and treatment planning of the dental problems of the adult patient. Offered: AWSpS.

ORTHO 585 Surgical Orthodontic Diagnosis and Treatment Planning (3) Seminar and clinic for orthodontic graduate students and oral surgery residents in comprehensive, integrated diagnosis, and treatment planning for patients with severe facial deformities. Offered: AWSpS.

ORTHO 584 Clinical Management of Cleft Lip and Palate and Craniofacial Anomalies (2) Management of these complex patients involves members of a dedicated, highly specialized multidisciplinary team. Insight gained into specific evaluation and treatment modalities of each discipline through lectures, seminars, assigned readings. Integrated approach to management is illustrated by attendance at craniofacial staffing and clinics. Prerequisite: graduate students in orthodontics. Offered: AW.

ORTHO 587 Management of Debilitated Dentitions (1, max. 2) Integrated diagnosis and treatment planning for patients with edentulous spaces, emphasizing use of osseointegrated implants. Offered: AW.

ORTHO 589 Applied Psychology in Orthodontics (1) Application of psychological theories, research, and interventions to orthodontics and pediatric dentistry. Topics include the principles of behavior change, patient compliance with therapeutic regimens, and motivations for orthodontic treatment. Prerequisite: graduate standing in dentistry or permission of instructor. Offered: A.

ORTHO 590 Scientific Methodology in Dental Research (2) Review of the scientific method. Evaluation of dental literature. Discussion of proposed master’s degree research projects. Formulation and discussion of hypothetical research projects related to orthodontics. Offered: W.

ORTHO 591 Advanced Topics in Oral Biology and Medicine I (1-2, max. 2) Herring, Izutsu Review of current molecular and cellular advances in developmental biology relevant to head and neck embryology, tooth development and epithelial differentiation. Offered: jointly with ORALB 591; A.

ORTHO 592 Advanced Topics in Oral Biology and Medicine II (1-2, max. 2) Herring Review of current scientific literature relevant to cranioskeletal development and growth, bone biology and orthodontic tooth movement. Offered: jointly with ORALB 592; W.

ORTHO 593 Advanced Topics in Oral Biology and Medicine III (1-2, max. 2) Herring Review of current scientific literature relevant to oral soft tissue structure and physiology, including mastication and swallowing, salivary glands, periodontium and dental pulp. Offered: jointly with ORALB 593; Sp.

ORTHO 597 Preclinical Technique (1) Techniques of construction and manipulation of the edgewise arch mechanism. Offered: AWS.

ORTHO 598 Archwire Formation (1) Principles of wire bending and the use of orthodontic pliers. Offered: AS.

ORTHO 599 Biomechanics (1) Principles of biologic reactions to application of orthodontic forces. Credit/no credit only. Offered: S.

ORTHO 600 Independent Study or Research (*) Managing the experimental protocol. Data collection and analysis. Preparation and writing of a thesis or publishable manuscript. Prerequisite: permission of instructor. Offered: SpS.

ORTHO 630 P-Introduction to Clinical Orthodontics (1) Direct clinical application of principles of orthodontic diagnosis and treatment planning for simple orthodontic appliances to modify tooth position in preparation for definitive restorative and/or periodontal therapy. Prerequisite: ORTHO 522. Offered: ASpS.

ORTHO 631 Minor Orthodontic Treatment (1) Clinical treatment of clinical and functional problems suitable for the general dentist i.e., direct clinical application of principles of orthodontic diagnosis and treatment planning for simple orthodontic appliances to modify tooth position in preparation for definitive restorative or periodontal therapy. Offered: AWSpS.

ORTHO 660 P-Clinical Orthodontics (1-6, max. 24) Clinical application of the techniques in the treatment of malocclusion. Offered: AWSpS.

ORTHO 682 Adult Orthodontics Clinic (1) Clinic for orthodontic graduate students in the treatment of the dental problems of the adult patient. Offered: AWSpS.

Pediatric Dentistry

PEDO 520 P-Pediatric Dentistry (4) Introduction to clinical pediatric dentistry, including behavior management, oral diagnosis, preventive dentistry, dental anomalies, radiography, anesthesia, restorative procedures, pulpal therapy, interceptive orthodontics, and traumatic dental injuries of the child patient. Offered: S.

PEDO 550 P-Directed Studies in Pediatric Dentistry (*, max. 6) See DPHS 449 for course description and prerequisite. Offered: S.

PEDO 560 Fundamentals of Pediatric Dentistry (1) Preclinical laboratory, lecture course covering fundamentals of primary care in pediatric dentistry, including behavior management, dental emergencies, prevention, diagnosis and treatment planning, and infection control. Offered: S.

PEDO 570 Pediatric Dentistry Seminar I (2) Series of seminars covering principles and theory of child development and behavior management.
for pediatric patient, including sedation, general anesthesia, and principles of informed consent, pathology of oral manifestations of diseases of children and adolescents, pediatric radiology, and use of computers in didactic, clinical, and research endeavors, and the scientific basis for the prevention and treatment of dental caries, periodontal disease, and developmental anomalies. Offered: S.

PEDO 571 Pediatric Dentistry Seminar II (2) Series of seminars covering principles and theory of child development and behavior management for pediatric patient, including sedation, general anesthesia, and principles of informed consent, pathology of oral manifestations of diseases of children and adolescents, pediatric radiology, and use of computers in didactic, clinical, and research endeavors, and the scientific basis for the prevention and treatment of dental caries, periodontal disease, and developmental anomalies. Offered: A.

PEDO 572 Pediatric Dentistry Seminar III (2) Series of seminars covering principles and theory of child development and behavior management for pediatric patient, including sedation, general anesthesia, and principles of informed consent, pathology of oral manifestations of diseases of children and adolescents, pediatric radiology, and use of computers in didactic, clinical, and research endeavors, and the scientific basis for the prevention and treatment of dental caries, periodontal disease, and developmental anomalies. Offered: W.

PEDO 573 Pediatric Dentistry Seminar IV (2) Series of seminars covering principles and theory of child development and behavior management for pediatric patient, including sedation, general anesthesia, and principles of informed consent, pathology of oral manifestations of diseases of children and adolescents, pediatric radiology, and use of computers in didactic, clinical, and research endeavors, and the scientific basis for the prevention and treatment of dental caries, periodontal disease, and developmental anomalies. Offered: S.

PEDO 574 Pediatric Dentistry Seminar V (2) Series of seminars covering principles and theory of child development and behavior management for pediatric patient, including sedation, general anesthesia, and principles of informed consent, pathology of oral manifestations of diseases of children and adolescents, pediatric radiology, and use of computers in didactic, clinical, and research endeavors, and the scientific basis for the prevention and treatment of dental caries, periodontal disease, and developmental anomalies. Offered: A.

PEDO 575 Pediatric Dentistry Seminar VI (2) Series of seminars covering principles and theory of child development and behavior management for pediatric patient, including sedation, general anesthesia, and principles of informed consent, pathology of oral manifestations of diseases of children and adolescents, pediatric radiology, and use of computers in didactic, clinical, and research endeavors, and the scientific basis for the prevention and treatment of dental caries, periodontal disease, and developmental anomalies. Offered: A.

PEDO 576 Pediatric Dentistry Seminar VII (2) Series of seminars covering principles and theory of child development and behavior management for pediatric patient, including sedation, general anesthesia, and principles of informed consent, pathology of oral manifestations of diseases of children and adolescents, pediatric radiology, and use of computers in didactic, clinical, and research endeavors, and the scientific basis for the prevention and treatment of dental caries, periodontal disease, and developmental anomalies. Offered: W.

PEDO 678 Care of the Disabled Pediatric Patient (1) Clinical experiences in the management of disabled patients. Offered: S.

PEDO 680 Pediatric Dentistry under General Anesthesia (1-4, max. 4) Clinical course involving preoperative assessment of comprehensive dental treatment under general anesthesia and follow-up care. Offered: S.

PEDO 681 Pediatric Dentistry under General Anesthesia (1-4, max. 4) Clinical course involving preoperative assessment of comprehensive dental treatment under general anesthesia and follow-up care. Offered: A.

PEDO 682 Pediatric Dentistry under General Anesthesia (1-4, max. 4) Clinical course involving preoperative assessment of comprehensive dental treatment under general anesthesia and follow-up care. Offered: W.

PEDO 683 Pediatric Dentistry under General Anesthesia (1-4, max. 4) Clinical course involving preoperative assessment of comprehensive dental treatment under general anesthesia and follow-up care. Offered: A.

PEDO 684 Pediatric Dentistry under General Anesthesia (1-4, max. 4) Clinical course involving preoperative assessment of comprehensive dental treatment under general anesthesia and follow-up care. Offered: S.

PEDO 685 Pediatric Dentistry under General Anesthesia (1-4, max. 4) Clinical course involving preoperative assessment of comprehensive dental treatment under general anesthesia and follow-up care. Offered: S.

PEDO 686 Pediatric Dentistry under General Anesthesia (1-4, max. 4) Clinical course involving preoperative assessment of comprehensive dental treatment under general anesthesia and follow-up care. Offered: W.

PEDO 687 Pediatric Dentistry under General Anesthesia (1-4, max. 4) Clinical course involving preoperative assessment of comprehensive dental treatment under general anesthesia and follow-up care. Offered: Sp.

PEDO 690 Craniofacial Anomalies Clinic (1-4, max. 4) Multidisciplinary clinic in which children with craniofacial anomalies are evaluated and complex treatment plans developed and assessed. Offered: A.

PEDO 691 Craniofacial Anomalies Clinic (1-4, max. 4) Multidisciplinary clinic in which children with craniofacial anomalies are evaluated and complex treatment plans developed and assessed. Offered: W.

PEDO 692 Craniofacial Anomalies Clinic (1-4, max. 4) Multidisciplinary clinic in which children with craniofacial anomalies are evaluated and complex treatment plans developed and assessed. Offered: Sp.

PEDO 693 Craniofacial Anomalies Clinic (1-4, max. 4) Multidisciplinary clinic in which children with craniofacial anomalies are evaluated and complex treatment plans developed and assessed. Offered: S.

PEDO 694 Craniofacial Anomalies Clinic (1-4, max. 4) Multidisciplinary clinic in which children with craniofacial anomalies are evaluated and complex treatment plans developed and assessed. Offered: A.

PEDO 695 Craniofacial Anomalies Clinic (1-4, max. 4) Multidisciplinary clinic in which children with craniofacial anomalies are evaluated and complex treatment plans developed and assessed. Offered: W.

PEDO 696 Craniofacial Anomalies Clinic (1-4, max. 4) Multidisciplinary clinic in which children with craniofacial anomalies are evaluated and complex treatment plans developed and assessed. Offered: Sp.

PEDO 697 Craniofacial Anomalies Clinic (1-4, max. 4) Multidisciplinary clinic in which children with craniofacial anomalies are evaluated and complex treatment plans developed and assessed. Offered: S.

PEDO 699 Pediatric Orthodontic Clinic (1-4, max. 4) Clinical orthodontic care for pediatric patients. Offered: AWSpS.

Periodontics

PERIO 449 Directed Studies in Periodontics (1) See DPHS 449 for course description and prerequisite.

PERIO 517 Introduction to Periodontics (2) Epidemiology, natural history, etiology, histopathology, and genetics of various periodontal diseases. Offered: Sp.

PERIO 525 P-Prevention/Periodontics (2-) Introduction to periodontal therapy. Offered: W.

PERIO 526 P-Prevention/Periodontics (2-) Overview of preventive dentistry, introduction to periodontal therapy. Offered: Sp.

PERIO 530 P-Principles of Periodontics (2-) Diagnosis of periodontal diseases and development of a treatment plan including maintenance program, rationale for non-surgical, surgical, and antibacterial management of periodontal diseases. Discussion of principles of various periodontal procedures. Prerequisite: PERIO 525-526 and PERIO 527. Offered: A.

PERIO 531 P-Principles of Periodontics (2-) Seminar emphasizing multidisciplinary approach to comprehensive treatment planning. Offered: W.

PERIO 546 Advanced Periodontics (1) Designed to improve the understanding of sequencing of patient care and providing periodontal therapy into the perspective of a comprehensive care system. Offered: A.

PERIO 550 P-Directed Studies in Periodontics (1, max. 6) See DPHS 449 for course description and prerequisite.

PERIO 561 Periodontal Case Management (2-, max. 8) Didactic presentation of clinical periodontics to provide a comprehensive view of the field and a grasp of modern therapeutics. Offered: AWSp.

PERIO 566 Practice Management (1) Aspects of setting up and administering a private periodontal practice. Financing, insurance, office design, equipment, employees, professional forms, marketing strategies, and patient management. Prerequisite: PERIO 561. Offered: S.

PERIO 574 Periodontal Microbiology (2) Viral, bacterial classification; physiology; toxicity mechanisms reviewed. Formation and composition of plaque and calculus, and chemical methods of control discussed. Specific microbial flora of acute and chronic gingivitis, early onset forms of periodontitis, and adult periodontitis studied. Principles of antibiotic use reviewed. Offered: jointly with ORALB 569; A.

PERIO 575 Immunologic Aspects of Oral Diseases (2) Lecture course designed to acquaint students with basic concepts of immunology and immunopathology. Topics include cellular immunology, antibody structure and function, complement system, immunopathologic mechanisms, tumor immunology and immunologic manifestations in mucocutaneous oral lesions as well as immunology of caries and periodontal disease. Offered: W.

PERIO 577 Review of Literature (2, max. 16) Concise review of the scientific periodontal literature with specific focus on studies of periodontal diagnosis, wound healing, periodontal regeneration, microbiology, and implant procedures. Offered: AWSpS.

PERIO 578 Implant Literature Review (1) Verardi Reviews several topics related to dental implantology such as: history of dental implants, osseointegration, properties of materials, bone healing, bone augmentation procedures, success rates, pathogenesis of implant failure, and aesthetics in implantology. Discusses the relationship between surgical and restorative treatment phases. CR/NC only. Offered: AWSp.

PERIO 580 Foundations in Implant Dentistry (1) London, Raigrodski Details the core surgical and prosthetic considerations in dental implant patient care. Topics include case planning, anatomy, radiography, surgery, component, occlusion, and applications for implant dentistry. Offered: S.

PERIO 582 Periodontic Treatment Planning Seminar (1-, max. 12) Weekly seminar involved with the presentation, discussion, and tentative solution of moderate to complex problems in diagnosis and treatment. Offered: AWSpS.

PERIO 585 Periodontal Therapy Seminar (1-, max. 12) Weekly seminar utilizing the case review method and dealing with the treatment of moderate to advanced periodontal disease. Offered: AWSpS.

PERIO 586 Longitudinal Evaluation of Periodontal Therapy (1-, max. 9) Close examination of case progress from initial therapy to most recent maintenance visits to determine efficacy of method, demands upon patient, and temporal effect of therapy and survival. Preparation and delivery of a lecture on a therapeutic modality. Offered: AWSp.
PERIO 592 Prescription Surgery (1-). Clinical course in periodontal surgery in which surgical procedures are performed on prescription basis for patients undergoing therapy in the undergraduate dental clinic. Exposes student to a wider spectrum of patients and to stimulate an environment in which the student can encounter the problems of communication and patient management that occur in the private sector.

PERIO 600 Independent Study or Research (1). Prerequisite: permission of graduate program adviser.

PERIO 620 P-Introduction to Clinical Periodontics (1). Clinical periodontics, with emphasis on examination, assessment, and treatment planning. Offered: F, S.

PERIO 630 P-Periodontics (1-2). Students diagnose periodontal disease and plan and perform periodontal therapies, treating patients in a stepwise manner, describing clinical conditions, and integrating periodontal therapy in a comprehensive plan of care. Prerequisite: PERIO 525-526 and PERIO 517. Offered: A.

PERIO 631 P-Periodontics (1-2). Students diagnose periodontal disease and plan and perform periodontal therapies, treating patients in a stepwise manner, describing clinical conditions, and integrating periodontal therapy in a comprehensive plan of care. Prerequisite: PERIO 525-526 and PERIO 517. Offered: W.

PERIO 632 P-Periodontics (1-2). Students diagnose periodontal disease and plan and perform periodontal therapies, treating patients in a stepwise manner, describing clinical conditions, and integrating periodontal therapy in a comprehensive plan of care. Prerequisite: PERIO 525-526 and PERIO 517. Offered: Sp.

PERIO 639 Advanced Clinical Periodontics (1-2). Maintenance and treatment of patients with more complex periodontal involvement. Development of skill in comprehensive treatment planning and execution by the individual student. Allowance made for surgical periodontics and experience in assisting in the treatment of advanced cases.

PERIO 640 P-Advanced Clinical Periodontics (1). Maintenance and treatment of patients with more complex periodontal involvement. Development of skill in comprehensive treatment planning and execution by the individual student. Allowance made for surgical periodontics and experience in assisting in the treatment of advanced cases. Offered: A.

PERIO 641 P-Advanced Clinical Periodontics (1-2). Maintenance and treatment of patients with more complex periodontal involvement. Development of skill in comprehensive treatment planning and execution by the individual student. Allowance made for surgical periodontics and experience in assisting in the treatment of advanced cases. Offered: W.

PERIO 659 P-Periodontics Extended Learning (*, max. 4). Supplemental work in periodontics to correct an area of student deficiency. Credit/no credit only.

PERIO 660 Clinical Periodontics ([2-6], max. 60). Clinical experience in diagnosis and treatment of periodontal disease.

PERIO 661 Advanced Root Preparation (1). Daubert Advanced skill development in the use of the periodontal probe, gracey curettes, files and instrument sharpening. Includes laboratory sessions on dentoforms leading up to treatment of initial therapy patients. Offered: S.

PERIO 662 Stomatolgy Clinic (1, max. 4). The diagnosis and treatment of oral and perioral lesions including history taking, biopsies, hematological laboratory tests and chemotherapy. Periodontal therapy in medically compromised patients in the hospital setting. Microscopic review of biopsy specimens. Offered: AWSpS.

PERIO 663 Pre-Prosthodontics Clinical Periodontics (*). Clinical diagnosis and treatment of periodontal disease for nonprosthodontics student. Prerequisite: permission of department chairperson.

PERIO 665 Clinical Practice Teaching (*). Supervised experience in teaching clinical periodontics to undergraduate dental students.

PERIO 665 Hospital Periodontics (1). Preparation in periodontics to practice in hospital situations, including experience in operation of nitrous oxide analgesia, general anesthesia, intravenous premedication, treatment of out- and inpatients.

Prosthodontics

PROS 520 P-Introduction to Complete Dentures-Lecture (3). Didactic course in the treatment of completely edentulous patients. Instruction is provided in diagnostic procedures, complete denture construction, and maintenance care. Offered: A.

PROS 521 P-Management of Immediate Denture Patients (1). Lecture course describing and illustrating the clinical management of immediate denture patients (typical and overdenture). Offered: S.

PROS 523 P-Removable Partial Denture Design (2). Lectures in the basic principles of removable partial denture design. Practical drawings and more advanced designs are discussed in seminars. Certain technical aspects of design procedures are done in the classroom. Offered: W.

PROS 525 P-Removable Partial Denture Clinical Preparatory Course (4). Lecture-laboratory course dealing with those procedures the dentist must perform in order to fabricate a physiologically acceptable removable partial denture. The student gains experience via clinically simulated laboratory exercises prior to beginning prosthodontic treatment of a partially edentulous patient. Offered: S.

PROS 560 Complete and Immediate Dentures (2). Lecture/seminar devoted to the diagnosis and treatment of the completely edentulous patient and the immediate denture patient, with emphasis on management of patients with difficulties in treatment. Offered: A.

PROS 562 Removable Partial Dentures (2). Lecture/seminar concentrating on factors peculiar to fabrication of removable partial dentures, with emphasis on management of combined fixed and removable therapy. Offered: W.

PROS 563 Maxillofacial Prosthetics I (1). Introductory lecture/seminar series with emphasis on diagnosis and prosthodontic rehabilitative treatment of patients who have experienced trauma or have congenital or acquired defects in the oral region. Offered: S.

PROS 564 Maxillofacial Prosthetics II (1). Introductory lecture series focusing on the prosthodontic rehabilitation of patients with loss and compromise of facial anatomy, i.e., ocular, orbital, nasal, auricular, combination intraoral/extraoral, and other related facial deformities.

PROS 571 Review of Literature Seminar (1, max. 12). Continuous weekly seminar devoted to the review of prosthodontic and related literature.

PROS 572 Special Topics Related to Prosthodontics (1). Lecture-seminar series focusing on relating principles of basic science to clinical application in prosthodontics. A wide and varied range of topics including surgery, psychology, speech, pharmacology, practice management, physiologic/occlusal/ myofacial joint dysfunction.

PROS 600 Independent Study or Research (1). Prerequisite: permission of graduate program adviser.

PROS 620 P-Clinical Complete Dentures (1/3, max. 3). Basic principles of complete denture fabrication and of diagnosis and treatment of completely edentulous patient. In second quarter student completes denture patient care, provides follow-up treatment, and participates in four competency examinations. Offered: AW.

PROS 630 P-Clinical Prosthodontics ([1-2]-5). Clinical course involving the diagnosis and management of completely and partially edentulous patients. Removable partial dentures and immediate dentures are fabricated. Follow-up care provided for patients previously treated.

PROS 640 P-Clinical Prosthodontic Maintenance (1, max. 3). Clinic involving additional patient treatment with complete, partial, or intermediate dentures, plus indirect relines, managing adjustment chair, peer review, recall clinic, and follow-up care for patients previously treated. Offered: AWSpS.

PROS 650 P-Extramurals in Prosthodontics (*, max. 12). Elective clinical experiences or clinical practice teaching. Credit/no credit only. Prerequisite: permission of instructor.

PROS 660 Clinical Prosthodontics ([1-2], max. 6). Practical application of material covered in 560 and 562.

PROS 665 Clinical Practice Teaching (1, max. 4). Supervised experience in teaching clinical prosthodontics to the undergraduate dental student.

Restorative Dentistry

RES D 510 P-Dental Materials Science ([1-2], max. 3). Basic concepts of dental materials science including physical, mechanical, chemical, and biological properties of restorative dental materials. Clinical use of restorative dental materials also presented. Offered: WSSp.

476

RES D 515 P-Dental Anatomy (3) Lecture and laboratory on the morphology and nomenclature of individual teeth of the adult human dentition. Introduction to tooth histology and function and the influence of tooth anatomy on clinical dental procedures. Offered: A.

RES D 516 P-Introduction to Occlusion (3) Lecture/laboratory in the functional determinants of occlusal morphology. Preparation and waxing techniques for developing opposing quadrants by the additive waxing technique. Offered: W.

RES D 520 P-Introduction to Operative Dentistry Technique (3) Introduces processes of restoring diseased or damaged tooth structure to proper health, form, function, and esthetics. Emphasis on basic principles of cavity preparation for one-surface restorations. Other considerations include restoration design, proper selection and use of restorative materials, and clinical considerations for restorative treatment planning. Following demonstration of competence in didactic and practical aspects. Limited opportunity available for introduction to restorative care. Offered: A.

RES D 521 P-Introduction to Operative Dentistry Technique (3) Introduces processes of restoring diseased or damaged tooth structure to proper health, form, function, and esthetics. Emphasis on basic principles of cavity preparation for multiple-surface direct filling restorations. Other considerations include restoration design, proper selection and use of restorative materials, and clinical considerations for restorative treatment planning. Following demonstration of competence in didactic and practical aspects. Limited opportunity available for introduction to restorative care. Offered: W.

RES D 522 P-Introduction to Operative Dentistry Technique (3) Introduces processes of restoring diseased or damaged tooth structure to proper health, form, function, and esthetics. Emphasis on basic principles of cavity preparation for proper coverage cast gold and foundation buildup restorations. Other considerations include restoration design, proper selection and use of restorative materials, and clinical considerations for restorative treatment planning. Following demonstration of competence in didactic and practical aspects. Limited opportunity available for introduction to restorative care. Offered: Sp.

RES D 525 P-Fixed Prosthodontics (3) Serves as introduction to area of restorative dentistry dealing with indirect partial-coverage restorations and complete coverage restorations. Preclinical experience provided in tooth preparation, provisional restoration, and fabrication for various crown designs. Projects emphasize the various designs of single-tooth preparations and restoration. Offered: A.

RES D 526 P-Fixed Prosthodontics (3) Serves as introduction to area of fixed prosthodontics dealing with multiple-unit restorations. Preclinical experience provided with multiple tooth preparations and provisional restoration. Fabrication for various crown designs, singly and in conjunction with various pontic and connector types, to serve as fixed partial denture prostheses. Projects emphasize multiple-tooth preparation/restoration and implant-supported restorations. Offered: W.

RES D 527 P-Fixed Prosthodontics (3) Serves as introduction to area of fixed prosthodontics dealing with esthetic veneer indirect restorations. Preclinical experience provided in tooth preparation and restoration, fabrication for various esthetic veneer crown designs, singly and in conjunction with various pontic types to serve as fixed partial denture prostheses. Projects emphasize anterior single- and multiple-tooth preparation/restoration, provisional prostheses, and esthetic veneer restorations. Offered: Sp.

RES D 530 P-Restorative Dentistry (2) Lecture series related to 630 presenting restorative dentistry principles, including supportive material on clinical procedures. Emphasis on single-unit gold and esthetic veneer clinical procedures. Offered: A.

RES D 531 P-Restorative Dentistry (2) Lecture series related to 630 presenting restorative dentistry principles, including supportive material on clinical procedures. Emphasis on multiple-unit gold and esthetic veneer clinical procedures. Offered: W.

RES D 532 P-Restorative Dentistry (2) Lecture series related to 630 presenting restorative dentistry principles, including supportive material on clinical procedures. Offered: Sp.

RES D 535 Implant Dentistry (3) Junge Includes: history of implantology; basic science of osseointegration; clinical, prosthetic, and restorative considerations for the partially and fully edentulous patient; occlusal considerations of implant treatment; surgical placement and restorative procedures; management of patients; surgical and prosthetic complications; developing a treatment plan on assigned case; and restoring a single tooth implant. Offered: A.

RES D 540 Implant Dentistry (2) Introduction to dental implantology based on lectures and laboratory activities. Offered: A.

RES D 541 P-Advanced Restorative Dentistry (2) Broadens base of restorative procedures. Introduction of new techniques and presentation of complex restorative treatment involving other specialties. Offered: W.

RES D 542 P-New Developments in Dental Materials (1) Dental materials recently introduced to dental profession reviewed, compared to current materials, and clinically demonstrated. Offered: Sp.

RES D 570 Review of Literature Seminar (1, max. 6) Continuous weekly seminar devoted to a review of restorative dentistry principles and discussion of teaching methods, philosophy of teaching and treatment. Offered: AWSp.

RES D 580 Restorative Treatment Planning Seminar (1-, max. 8) Continuous weekly seminar to discuss controversial treatment problems and difficult diagnostic cases selected for graduate students. Offered: AWSp.

RES D 585 Advanced Dental Materials Science (2) Advanced concepts of dental materials science including physical, mechanical, chemical, and biological properties of restorative dental materials. Emphasis also on research design, testing methods, and proper selection of dental materials for clinical practice. Offered: W.

RES D 588 Mandibular Functional Analysis and Occlusal Adjustment (2) Lecture/seminar and clinical sessions in the study of the physiology of occlusion. Pertinent literature reviewed and discussed from the multidisciplinary viewpoint. The clinical sessions include training in mandibular functional analysis and treatment of occlusally related diseases. Offered: A.

RES D 589 Review of Literature in Occlusion (2) Seminar to review pertinent literature in occlusion. Offered: S.

RES D 590 Fundamentals of Fixed Prosthodontics (2, max. 4) Lecture/laboratory/clinical sessions in the study of gnathological principles and procedures as they pertain to the treatment of comprehensive cases assigned to the students. Use and application of several articulators. Offered: A.

RES D 600 Independent Study or Research (*) Prerequisite: permission of graduate program adviser. Offered: AWSp.

RES D 620 P-Comprehensive Treatment Planning in Restorative Dentistry (3) Orientation to restorative clinical operations, administrative procedures associated with patient management and completion of initial treatment plans. Emphasizes problem-based learning, treatment outcomes, the sequence of clinical treatment, and the diagnosis and management of caries-susceptible patients. Offered: S.

RES D 630 P-Clinical Restorative Dentistry (11-32, max. 9) Clinical training in fundamental restorative dentistry procedures, including diagnostic, treatment planning, and therapeutic aspects of operative dentistry, fixed prosthodontics, and occlusal treatment. Offered: AWSp.

RES D 635 Clinical Restorative Dentistry (3) Verhoef Knowledge and experience in the diagnosis and restoration of diseased, damaged, unesthetic, or missing teeth. Experience in management of complex, inter-disciplinary treatment plans. Skills in patient communication and management. Utilization of broader range of restorative materials and techniques.

RES D 650 Restorative Dentistry Clinical Elective (1-6, max. 12) Elective offering in
EDC&I 324 Physical Education and Health in the Schools (2) Techniques and procedures for teaching physical education and health in elementary and secondary schools. For students in Teacher Education Program. Credit/no credit only. Offered: S.

EDC&I 341 The Teaching of Art in the Secondary School (3) For majors in secondary art education planning to teach on the junior or senior high school level.

EDC&I 353 Teaching in the Elementary School (3) Emphasizes selected teaching modes; lesson planning; classroom management procedures; grouping to accommodate pupils with special needs; utilization of learning resources; evaluation of teaching. Attention also given to school culture.

EDC&I 354 Teaching in the Secondary School (3) Development of basic skills in instructional methods, lesson planning, classroom management procedures, evaluation of teaching. Attention also given to school culture.

EDC&I 355 Language Arts in the Elementary School (3) Basic course in planning and teaching elementary language arts: listening and speaking, written composition, handwriting, spelling, creative and practical writing.

EDC&I 356 The Teaching of English (3) Combines theoretical understanding of teaching with specific techniques and materials for literature, language, composition, and mass media at the secondary level; coordinated with concurrent experience in schools.

EDC&I 357 The Teaching of Speech (3) Special methods course in the teaching of speech communication at the elementary and secondary levels.

EDC&I 360 Reading in the Elementary School (3) Basic course in methods, techniques, and materials used the teaching reading through decoding, comprehension, strategies, and literature in primary and intermediate grades.

EDC&I 424 Multithecnic Curriculum and Instruction (3) Primarily for preservice and inservice teachers who have little or no previous exposure to issues related to ethnicity and schooling. Designed to help teachers better understand the school’s role in the ethnic education of students and acquire the insights, understandings, and skills needed to design and implement curricular and instructional strategies that reflect ethnic diversity.

EDC&I 425 Instructional Strategies for Minority Students (3) Designed to equip educators with appropriate skills in effective teaching of culturally and socioeconomically different students. Attention is directed to understanding how these students differ from mainstream youth and what the implications are for instructional strategies in the classroom.

EDC&I 434 Introduction to Computers in the Classroom (3) Overview of the uses of computers in education. Uses of computers in instruction, classroom management (gradebooks, utilities), evaluation of software, overview of programming, and word processing. Prior experience not required.

EDC&I 436 Design and Authoring of CAI (3) Introduction to the design of computer-assisted-instructional programs. Types of learning, characteristics of effective instruction. Students design and produce CAI programs using authoring systems for computers. Offered: jointly with T C 436.

EDC&I 437 Uses of Computer Application Packages in Schools (3) Introduction to the instructional and management uses of computer programs. Topics may include: databases, spreadsheets, word processing, graphics packages, graphing utilities, telecommunications, desktop publishing. Emphasis is on student development. Prerequisite: EDC&I 434.

EDC&I 440 Gender and Education (5) &S Gender bias, discrimination, and gender-equity efforts in education. Includes curriculum instruction, instructional materials, testing, counseling, athletics, teacher education, educational employment issues, and sexual harassment. Relevant federal and state laws, court decisions, and strategies for promoting gender equity also addressed. Recommended: WOMEN 200 or SOC 110. Offered: jointly with WOMEN 415.

EDC&I 443 Improvement of Teaching: Elementary School Music (3) Advanced studies in the teaching of music in the elementary school. For experienced teachers.

EDC&I 451 Second Language Acquisition and Language Study (3) Strtkus, Varghese Identifies the major theories, concepts, processes, and factors pertinent to learning a second language, especially in relation to English. Relates second language acquisition theories, concepts, processes, and factors to pedagogical implication for classroom teaching.

EDC&I 452 Approaches to Assessing Second Language Students in K-12 Schools (3) Strtkus, Varghese Examines the multiple ways of assessing linguistically diverse students in K-12 schools, including standardized and alternative assessments of these students. Prerequisite: EDC&I 457.

EDC&I 453 Teaching the Bilingual-Bicultural Student (3) Educational needs of bilingual students: research findings, special programs, materials, and methodologies that bilingual-bicultural education can provide to meet those needs. Cultural combinations of bilingual populations in American culture; historical, social, and linguistic factors affecting their K-12 education.

EDC&I 457 Methods in Teaching English as a Second Language (3) Prepares preservice and inservice teachers to teach English as a second language and to meet the educational and linguistic needs of students who have little or no English language skills. Emphasis on a survey of first- and second-language acquisition research and its educational implications, as well as instructional strategies consistent with the bilingual language arts, cognitive, and creative construction approaches to second-language learning. Includes diagnostic-prescriptive strategies for classroom application.

EDC&I 458 Content Area ESL Instruction (3) Strtkus, Varghese Exposes students and engages them in how to support their English Language Learners in their content areas through sheltered instruction, specifically through the framework, Sheltered Instruction Observation Protocol (SIOP). Focuses specifically on the academic language needs of these students. Prerequisite: EDC&I 457.

EDC&I 459 Workshop in Instructional Improvement: Reading (1-6, max. 15) Individual or group study projects on the improvement of instruction in language arts.

EDC&I 460 Early Literacy Instruction (3) Theory, research, and practice in early literacy acquisition including emergent literacy, phonemic awareness, word identification, comprehension, invented spelling, and writing. Emphasis on classroom instruction strategies for first and second language learners. Offered: A.

EDC&I 461 Materials for Teaching Reading: Children’s and Young Adult’s Literature (3) Designed to provide acquaintance with materials used in the teaching of reading. Trade books and materials from content areas are examined.
EDC&I 462 Reading Comprehension Instruction in Elementary and Secondary School (3) Research-based practices for explicit teaching of reading comprehension of both fiction and content-area texts including issues of reading strategies, text difficulty, teacher modeling, guided reading, discussion, assessment, and adaptations for struggling students. Offered: Sp.

EDC&I 463 Hands-On Science for Elementary School Teachers (3) Offers prospective and practicing teachers an opportunity to learn science through the hands-on teaching methods recommended for teaching science at the elementary level. Offered: jointly with MBT 463.

EDC&I 464 Educating Native-American Youth (3) Assists students in understanding the North American Indian child from cultural, socioeconomics, and psychological points of view. Provides opportunities for the student to apply knowledge and skills gained in other courses to prepare programs and learning aids relevant to the educational situation of the Indian child.

EDC&I 465 Social Studies Education: Elementary School Programs and Practices (3) Stresses curriculum patterns, instructional procedures, resource materials, and the selection of content in social studies. For elementary and middle school teachers and students in Teacher Education Program.

EDC&I 466 Social Studies Education: Secondary School Programs and Practices (3) Stresses curriculum patterns, instructional procedures, resource materials, and a selection of content in social studies for middle, junior, and senior high school teachers. For experienced teachers and students in Teacher Education Program.

EDC&I 467 Geography in the Social Studies Curriculum (3) I&S Discussion of the concepts and content of geography essential to effective social studies curricula. Offered: jointly with GEOG 467.

EDC&I 468 Workshop in Instructional Improvement: Social Studies (1-6, max. 15) Individual or group study projects on the improvement of instruction in social studies.

EDC&I 469 Teaching African American Students and Culture (3) Examination of sociocultural and pedagogical factors that influence African American students' learning styles, opportunities, and outcomes; exploration of ways to reform teaching techniques to better accommodate cultural styles and experiences to improve the educational achievement of African American students.

EDC&I 470 Science Education: Elementary School Programs and Practices (3) Designed for classroom teachers with reference to the teaching and learning of science from kindergarten through grade 6. Emphasis is placed on objectives, methods, and materials as related to the concepts and processes of science.

EDC&I 471 Science Education: Secondary School Programs and Practices (3) Survey of the status and potential role of science in education; trends and their implications for the teaching of both biological and physical sciences in the junior and senior high schools; representative curricula and related teaching procedures; the psychology of concept formation and problem solving; and organization of science programs.

EDC&I 472 Environmental Education for Teachers (3) Status, selected problems, and role of environmental education in program of elementary, middle, and junior high schools. Opportunity to examine and receive instruction in use of existing environmental education instructional materials. Instruction is in the spirit of inquiry/discovery.

EDC&I 473 Workshop in Instructional Improvement: Science (1-6, max. 15) Individual or group study projects on the improvement of instruction in science.

EDC&I 474 Multi-Ethnic Studies: Methods, Content, and Materials (3) Designed to help preservice and inservice teachers identify content and materials and devise methods for implementing ethnic studies programs and for incorporating ethnic content into regular K-12 social studies, language arts, and humanities curricula. Special attention is given to teaching about American Indians, Mexican Americans, African Americans, Asian Americans, Puerto Rican Americans, and White ethnic groups.

EDC&I 475 Improvement of Teaching: Elementary School Mathematics (3) Designed for elementary teachers. Emphasis is placed on the contributions of research to the improvement of the teaching of mathematics in the elementary school. For experienced teachers.

EDC&I 476 Improvement of Teaching: Junior High School Mathematics (5) Exploration of mathematical concepts for the purpose of improving the teaching of middle school mathematics.

EDC&I 478 Special Topics in Mathematics for Teachers (2-9, max. 9) NW Study of selected areas of mathematics. Designed for the improvement of teachers of mathematics. Offered: jointly with MATH 497.

EDC&I 479 Workshop in Instructional Improvement: Mathematics (1-6, max. 15) Individual or group study projects for the improvement of instruction in mathematics.

EDC&I 482 Educational Technology in Schooling (3) Introduction to the application of technologies (computers, telecommunications, interactive video) in schools. Designed primarily for pre- and in-service teachers, but of interest to anyone involved in technology in education.

EDC&I 485 Workshop in Instructional Improvement: Educational Communication and Technology (2-6, max. 6) Individual or group study projects on the improvement of instruction through use of educational communication and technology.

EDC&I 486 Educational Technology and Learning in Alternative Settings (3) How educational technology can be used to encourage learning in nonschool environments, such as museums, radio and television broadcasts, parks and recreation centers, and distance education programs. Students investigate one of these areas and prepare a project.

EDC&I 494 Workshop in Improvement of Curriculum (1-6, max. 15) Stresses the application of procedures for curriculum development, maintenance, and evaluation. Opportunities furnished to develop and perfect strategies for program development with occasions given to utilize the strategies in master plan and materials preparation for simulated or real school situations. Specific focus of workshop is determined by instructor or by arrangement with district.

EDC&I 495 Workshop in Improvement of Teaching: Selected Topics, Issues, or Problems (1-6, max. 15) Individual or group projects to help teachers adapt instruction to selected topics, issues, or problems and to identify the approaches and instructional resources that provide the soundest learning experiences.

EDC&I 496 Workshop in Instructional Improvement (2-6, max. 6) Individual or group study projects on the improvement of instruction with attention to designing instructional plans.

EDC&I 499 Undergraduate Research (2-5, max. 5) Students developing studies under this rubric should be advised that a report or a paper setting forth the results of their investigations should be regarded as a basic part of the program.

EDC&I 500 Field Study (1-10, max. 10) Individual study of an educational problem in the field under the direction of a faculty member. Prerequisite: approved plan of study and permission of the instructor must be filed in the Office of Curriculum and Instruction in the College of Education.

EDC&I 505 Seminar in Curriculum and Instruction (1-3, max. 15) Seminar on advanced topics in curriculum and instruction. Critical examination of current research and practice. Content varies; check quarterly Time Schedule for topics to be covered. Prerequisite: permission of instructor.

EDC&I 510 History of Educational Technology (3) Examines the role of technology in education through history. Early systems of instruction, advent of textbooks, models for school architecture, instructional machines and teaching machines, mediated and distance learning. Focuses on the interplay between designed educational approaches and contexts in which they were implemented, and consequent success for failure.

EDC&I 511 Current Issues in Technology and Education (3) Examines current genres of learning technology, novel approaches for integrating technology into curriculum and instruction, and recent theoretical perspectives that inform future work in educational technology. Prerequisite: EDC&I 510 or instructor permission.

EDC&I 512 Survey of Educational Technology Research (2, max. 4) Critically examines active research projects in educational technology. Critiques of research practice. Corequisite: EDC&I 511 and EDC&I 580.

EDC&I 524 Seminar in Teacher Education (3, max. 6) Focus on recent research, issues, and proposals for future development in teacher education, certification, and continuing professional growth. Alternate year offering focuses on either preservice or inservice issues. Prerequisite: permission of instructor.
EDC&I 530 Approaches to Literacy Instruction (3) Designed to aid experienced teachers who possess background in the teaching of literacy, this course presents a variety of approaches and actual analysis of approaches. Prerequisite: teaching experience and a basic course in the teaching of reading.

EDC&I 531 Seminar: Critical Review of Literacy Materials (3) Students formulate and apply criteria for assessing materials, with emphasis on linguistic, cultural, and psychological factors; instruction effectiveness, interest level; and educational objectives. Prerequisite: teaching experience and one basic course in the teaching of reading.

EDC&I 532 Seminar in Literacy Research (3, max. 9) Primary focus on those aspects of the literacy process that are of concern in a developmental literacy program. Emphasis on research design, evaluation of research, and research findings, dealing with factors influencing literacy ability, problems in skill development, recreational reading, and writing. Prerequisite: permission of instructor.

EDC&I 533 Seminar: Conducting Research in Reading (3, max. 6) Students design and conduct studies in the field of reading. Emphasis on research rationale, choice of productive research types, and reporting of research results and implications. Prerequisite: EDC&I 532.

EDC&I 534 Seminar in the Reading of Literature (3) Reading of literature and its effect on reading skills, language development, social values, and the development of children and adolescents. Emphasis on analysis of research in these areas and on the development of action research designed to study response to literature. Prerequisite: one 400- or 500-level education curriculum and instruction course in reading or language arts or one graduate course in literature for children or young adults.

EDC&I 535 Seminar: Conducting Research in Response to Literature (3, max. 6) Students design, conduct, and interpret original research studies in the field of reading literature within the context of the school curriculum. Emphasis on the analysis of content and structure and the relationship of those qualities to the literacy experience. Prerequisite: EDC&I 534.

EDC&I 536 Inquiry and Methods in Writing Instruction (3) Troia Covers methods of assessment and teaching written composition, spelling, and handwriting to children and youth with, and without, disabilities. Particular attention is given to how to establish a strong writing program in elementary classrooms and how to teach writing strategies. Offered: jointly with EDSP 526; 5p.

EDC&I 541 Seminar in Bilingual Education: Organization and Structure (4) Study of the structure and organization of bilingual programs. Includes study of the developmental and organizational factors affecting bilingual education. Assists graduate students in reviewing the historical antecedents in bilingual education and in developing a personal philosophy about bilingual education.

EDC&I 542 Seminar in Bilingual Education: Instructional Foundations and Issues (4) Study of the theoretical foundations and instructional implications of psychology and linguistics as they apply to bilingual education. Assists graduate students in exploring learning styles of bilingual children and in becoming familiar with the crucial issues in bilingual education.

EDC&I 543 Seminar in Bilingual Education: Instructional Strategies (4) Study of instructional factors affecting bilingual education. Particular emphasis is given to research related to the variables involved in teaching in a bilingual environment. Assists graduate students in exploring instructional methodologies and formats as they apply to bilingual education and in becoming familiar with the current issues in bilingual education.

EDC&I 544 Immigration and Education: Immigrant Student Perspectives (3) Stritikus, Varghese Examines the multitude of factors which shape the immigrant student experience in U.S. schools. Takes an interdisciplinary perspective drawing on research from sociology, anthropology, and education, to understand teaching and learning from the perspective of immigrant students.

EDC&I 545 Multilingual Socialization and Development (3) Stritikus, Varghese Explores the research base examining second language acquisition, in and out of school contexts. Focuses on the home language practices of linguistically diverse students with the purpose of understanding how these processes influence school learning.

EDC&I 547 Sociolinguistics (3) Stritikus, Varghese The study of language in its social context and the study of social life through language. Explores issues in the field of sociolinguistics and sharpens tools to explore educational issues related to linguistic and cultural diversity. Prerequisite: EDC&I 453 or equivalent.

EDC&I 550 Educational Technology Research (3) Analysis, critique, and practical experience with research studies of all types (experimental, ethnographic, evaluation) concerning questions of interest to educational technologists. Prerequisite: EDC&I 480, a research methods course, or permission of instructor.

EDC&I 551 Introduction to Instructional Design (3) An experimental course in analyzing, designing, developing and formatively creating instructional products using the Instructional Systems Design (ISD) Mode. Also, discussion of how to successfully implement an instructional product/program within an organization using change management principles. Business and industry training focus.

EDC&I 552 Management of Educational Technology Programs (3) Factors contributing to effective management of programs incorporating educational technology and microcomputers. Manager's role as agent of instructional change and processes leading to successful adoption and long-term implementation of a new instructional system. Prerequisite: EDC&I 510.

EDC&I 553 Seminar on Instructional Systems Development (3) Critical analysis of processes involved in the development of instructional systems. Prerequisite: EDC&I 481 or permission of instructor.

EDC&I 555 Educational Futures (3) Concept of alternative futures stressing manageability of the future. Attention is given to current and future events that can or might impact education. Basic future studies methods are considered with opportunities to apply such methods within educational arena. Prerequisite: prior graduate course work or experience in education.

EDC&I 558 Secondary School Curriculum (3) Systematic analysis of current curriculum practices, with particular emphasis on the social and historical forces affecting secondary-school curriculum.

EDC&I 559 Principles and Procedures of Curriculum Development (3) Intensive study of basic principles and procedures utilized in development of curricula. Participants have opportunities to apply such procedures in class activities. Attention given to curriculum foundations.

EDC&I 561 Seminar in Language Arts (3) Study of language with special attention to research pertaining to the social context of language in the classroom. Course work includes the study of language, written language, emphasizing psychological and interrelated aspects. Prerequisite: permission of instructor.

EDC&I 563 Current Issues in Literacy Education (1-3, max. 6) Discussion of problems and issues of current interest and importance in language arts education. Prerequisite: EDC&I 561.

EDC&I 565 Seminar in Social Studies Education: Elementary Emphasis (3) Intensive study of the social studies curriculum, with particular emphasis on current literature and research. Prerequisite: EDC&I 465 or equivalent.

EDC&I 566 Seminar in Social Studies Education: Secondary Emphasis (3) Intensive study of the social studies curriculum, with particular emphasis on current literature and research. Prerequisite: EDC&I 466 or equivalent.

EDC&I 567 Current Issues in Social Studies Education (1-3, max. 6) Discussion of problems and issues of current interest and importance in social studies education.

EDC&I 569 Educating Ethnic Minority Youths (4) Intensive analysis and review of the research and curricular programs related to the social, psychological, and political factors that influence the school experiences of ethnic minority youths. Special attention given to educational curricular programs for African-American, American-Indian, Mexican-American, Puerto Rican-American, and Asian-American students. Prerequisite: graduate standing or permission of instructor.

EDC&I 570 Seminar in Science Education: Elementary Emphasis (3) Investigation of curriculum and instruction in science at elementary-school levels, with particular emphasis on current literature and research. Prerequisite: EDC&I 470 or equivalent.

EDC&I 571 Seminar in Science Education: Secondary Emphasis (3) Investigation of curriculum and instruction in science at secondary-school levels, with particular emphasis on current literature and research. Prerequisite: EDC&I 470 or equivalent.
emphasis on current literature and research. Prerequisite: EDC&I 471 or equivalent.

EDC&I 572 Current Issues in Science Education (1, max. 6) Discussion of topics and problems of current interest and importance in science education. Prerequisite: graduate standing.

EDC&I 573 School Reform and Multicultural Education (3) Similarities and differences among the visions, goals, and strategies of proposals for school reform and multicultural education are analyzed; implications for practice in curriculum and instruction are deduced from these analyses. Prerequisite: one course in multicultural education or permission of instructor.

EDC&I 574 Race, Gender, and Knowledge Construction: Curriculum Considerations (3) Using historical and contemporary perspectives, considers ways in which knowledge related to race and gender has been and is constructed and the implications of ways in which knowledge is constructed for curriculum reform and teaching. Prerequisite: one course in ethnic studies, multicultural education, or women studies or permission of instructor.

EDC&I 575 Seminar in Mathematics Education: Elementary Emphasis (3) Investigation of curriculum and instruction in mathematics at the elementary-school level; review of research and preparation of proposals. Prerequisite: graduate standing.

EDC&I 576 Seminar in Mathematics Education: Secondary Emphasis (3) Investigation of curriculum and instruction in mathematics at the secondary-school level; review of research and preparation of proposals. Prerequisite: graduate standing.

EDC&I 577 Current Issues in Mathematics Education (1, max. 6) Discussion of problems and issues of current interest and importance in mathematics education. Prerequisite: graduate standing.

EDC&I 578 Qualitative Methods of Educational Research (5-7) Survey of various qualitative research methods from a variety of disciplinary perspectives (anthropology, sociology, applied linguistics, cognitive psychology, policy analysis, and evaluation) with intensive experience in collection, analysis, and reporting of data. Prerequisite: second-year doctoral standing and one course in statistics. Offered: jointly with EDPSY 586.

EDC&I 579 Qualitative Methods of Educational Research (5) Survey of various qualitative research methods from a variety of disciplinary perspectives (anthropology, sociology, applied linguistics, cognitive psychology, policy analysis, and evaluation) with intensive experience in collection, analysis, and reporting of data. Prerequisite: second-year doctoral standing and one course in statistics. Offered: jointly with EDPSY 587.

EDC&I 580 Technology in Context (3) Focuses on development of appropriate methods and concepts for research on technology in schools, workplaces, and other naturalistic settings. Fieldwork exercises and reading exemplary studies from multiple disciplinary perspectives. Prerequisite: EDC&I 510, EDC&I 511, EDC&I 512, or permission of instructor.

EDC&I 581 Cognitive Systems Design (3) Covers the design of applied technology-based learning systems, informed by current views of learning, technology, and cognition. Emphasizes synthesizing students’ knowledge of technology, learning and research in collaborative settings. Prerequisite: EDC&I 510, EDC&I 511, EDC&I 512, EDC&I 580, or permission of instructor.

EDC&I 582 Design Experimentation and Implementation in Context (3) Introduces theoretical, methodological, and practical issues involved with studying the designed use of learning technologies in real world settings. Focuses on engaging in empirical study of the designed system through partnerships involving education researchers, educators, and technologists. Prerequisite: EDC&I 510, EDC&I 511, EDC&I 512, EDC&I 580, EDC&I 581, or permission of instructor.

EDC&I 583 Message Design (3) Theory and design of instructional messages in various modalities (visual, auditory), and in various formats (pictorial, verbal, graphic). Prerequisite: EDC&I 480 or permission of instructor.

EDC&I 584 Instructional Graphics for Microcomputers (3) Study of current research on instructional uses of computer graphics. Development, selection, and application of design principles for graphically-based instructional and training programs. Prerequisite: EDC&I 436, EDC&I 481.

EDC&I 585 Technology and the Culture of Education (3) Social impact of technology on education in the United States and elsewhere: social, political, and cultural factors affecting educational communication and technology; roles and relationships among instructors and learners; appropriate technology in developing countries; technology’s long-term influence on thought and values. Prerequisite: EDC&I 480 or permission of instructor.

EDC&I 586 Current Issues for Computers in the Classroom (1, max. 6) Addresses many of the current topics in computer-related education. Issues and research related to computer uses in curriculum, instruction, and management of instruction.

EDC&I 587 Design and Application of Interactive and Immersive Instructional Systems (3) Theoretical and empirical questions involved in design of interactive instructional systems using such technologies as virtual reality and CAI. Specific problems inherent in design of complex learning environments: immersion, control, structure, sequence of experiences, navigation, learner guidance. Educational uses of systems. Prerequisite: either EDC&I 481 or EDC&I 583, EDC&I 436, or permission of instructor.

EDC&I 588 Seminar: Computers in Education (3) Provides opportunity for graduate students to analyze, discuss, and design research in areas of computers in education. Includes historical development of research in this area as well as a platform for the development of research proposals and refinement of ongoing research. Prerequisite: EDC&I 434 or EDC&I 436.

EDC&I 589 Current Issues in Educational Communications (1, max. 9) Discussion of problems and issues of current interest and importance in the field of educational communications. Serves also as a forum for discussion of doctoral research. Designed for master’s and doctoral candidates in educational communications. Credit/no credit only. Prerequisite: graduate standing.

EDC&I 590 Seminar in Elementary Education (3) Exploration of the philosophy, history, purposes, curriculum, methods, and school organization of elementary education. Prerequisite: elementary-school teaching experience, EDC&I 556.

EDC&I 591 Seminar in Curriculum Research (3) Analysis of past and current empirical, historical, ethnographic research, and philosophical analysis of the curriculum field. Studies considered include research in curriculum development, the curriculum plan, contextual characteristics, and factors related to curriculum participants. Group and individual analyses focus on theory generation and practical applications of research. Prerequisite: EDC&I 559 or permission of instructor.

EDC&I 592 Seminar in Secondary Education (3) Research and study of secondary education. Primary focus on factors involved changing in secondary-school curriculum and organization. Prerequisite: EDC&I 558.

EDC&I 593 Seminar in Curriculum: Theory and Practice (3) Investigation of curriculum theory and practice. Consideration is given to theoretical writings that address the relationships between various curricular variables. Theoretical positions are related to curricular practices and innovations. Prerequisite: EDC&I 559.

EDC&I 594 Seminar in Curriculum: Issues, Systems, Models (3) Emphasis on the current approaches to curriculum and curriculum innovation. Attention is given to major educational issues as they affect curricular activity. Prerequisite: EDC&I 559.

EDC&I 595 Seminar in Analysis of Teaching (3) Investigation of the ways in which classroom teaching has been analyzed from a variety of disciplinary perspectives. Focus on methods, findings, and implications of research on teaching. Prerequisite: teaching experience.

EDC&I 596 Seminar in Strategies of Instruction (3) Various instructional models applicable to all levels of schooling. Theoretical and philosophical bases for these instructional models are considered.

EDC&I 597 Curriculum Evaluation Seminar (3, max. 6) Focuses on the evaluators’ roles, evaluation theory and models, and selected curricular evaluations. Examples are drawn from the several disciplines commonly offered in the elementary and secondary schools. Students are expected to identify an evaluation problem and to develop an evaluation design that can be implemented as a practical solution to the problem. Prerequisite: EDC&I 559 and permission of instructor.

EDC&I 599 Independent Studies in Education (*) Independent studies or readings of specialized aspects of education. Prerequisite: permission of instructor.

EDC&I 600 Independent Study or Research (*) Prerequisite: permission of instructor.

EDC&I 601 Internship (1-10, max. 10) Credit/no credit only. Prerequisite: graduate standing and permission based on approval of proposal submitted during quarter preceding the internship.
Education

EDUC 301 Introductory Practice in Community Service Activity (1-10, max. 10) Observation and participation in a variety of activities in a K-12 classroom. Placement made according to participant interests and needs. Participation on a predetermined schedule plus scheduled orientation and debriefing sessions are required. Offered: AWSp.

EDUC 305 The Purpose of Public Schools in a Democracy (5) I&S Explores issues and questions pertaining to public schools in a democratic society through directed readings, dialogue, individual and group projects designed to engage students with a series of crucial issues in public schools.

EDUC 310 Current Issues in Education (5, max. 10) I&S Covers a current issue and provides the opportunity to read and discuss educational issues with other students and faculty and to learn of opportunities in the College of Education programs.

EDUC 401 Practicum in Community Service Activity (1-16, max. 18) Tutoring and teaching experiences in a school or community service organization. Placement made according to participant interests and needs. Participation on a predetermined schedule plus scheduled orientation and debriefing sessions are required. Offered: AWSp.

EDUC 402 Practicum in Classroom Teaching and Management: Primary (1-18, max. 18) Tutoring and teaching experiences in a primary school setting (grades K-3). Placements made according to participants interest and needs. Participation on a predetermined schedule plus scheduled orientation and debriefing sessions.

EDUC 403 Practicum in Classroom Teaching and Management: Intermediate (1-18, max. 18) Tutoring and teaching experiences in an intermediate school setting (grades 4-8). Placements made according to participants interest and needs. Participation on a predetermined schedule plus scheduled orientation and debriefing sessions.

EDUC 404 Practicum in Classroom Teaching and Management: Secondary (1-18, max. 18) Tutoring and teaching experiences in an intermediate school setting (grades 6-12). Placements made according to participants interest and needs. Participation on a predetermined schedule plus scheduled orientation and debriefing sessions.

EDUC 502 Advanced Practicum in Classroom Teaching and Management (1-18, max. 18) In-depth classroom practicum experiences to certificated teachers working on additional endorsements. Arrangements must be made prior to enrolling with an adviser in the Teacher Education Office. Offered: AWSpS.

EDUC 700 Master's Thesis (*) Prerequisite: permission of faculty advisor and graduate program coordinator. Offered: AWSpS.

EDUC 800 Doctoral Dissertation (*) Prerequisite: permission of supervisory committee chairperson and graduate program coordinator. Offered: AWSpS.

Educational Leadership and Policy Studies

EDLPS 444 Constitution and American Public Education (3-6, max. 6) I&S Emphasis on the principles, processes, and content of constitutional law in an effort to provide new insights and new tools with which school administrators and teachers may examine questions involving political and civil rights in the United States, especially as these affect the conduct of education. Specific topics on constitutional freedom include the obligation to go to school; legal controls over curriculum, teachers, and students; and racial integration and equal financing of public schools. Open to law students and to nonlaw students enrolled as graduate students or as upper-division undergraduates. Credit/no credit only. Offered: jointly with LAW 444.

EDLPS 479 Crucial Issues in Education (3) Selected educational issues, policies, and contexts. Evolution of the American education enterprise, legal issues, professionalism, finance, and other vital educational concerns.

EDLPS 496 Workshop: Education Programs and Problems (1-6, max. 12) Study of such topics as planning, development, supervision, organization, operation, or evaluation of current or emerging programs or problems in education.

EDLPS 499 Undergraduate Research (*) Students developing studies under this rubric should be advised that a report or a paper setting forth the results of their investigations should be regarded as a basic part of the program.

EDLPS 501 Introduction: Leadership Beyond the Classroom (3-4, max. 6) First course in principal certification program; explores Washington state laws, legal principles, context of public schools, multicultural issues, changing population. Essential skills of leadership: communication, human relations, strategies for shared decision making, and dealing with conflict. (Open only to students admitted to the EDLPS Principal/Program Administrator Preparation Program.)

EDLPS 502 Leadership Core (3-6, max. 6-12) Topics include moral dimensions of leadership; modes of inquiry; organizational theory and change; history of educational reform; curriculum deliberation and instructional leadership and supervision; school-centered inquiry and decision-making; policy, planning, and program evaluation; issues on diversity and multicultural education; American and Washington State school law; school finance and resource allocation; school-community relations. Instruction occurs in units and seminar throughout the academic year. Prerequisite: admission to Principal/Program Administrator Preparation Program.

EDLPS 503 Leadership Core (3-6, max. 6-12) Topics include moral dimensions of leadership; modes of inquiry; organizational theory and change; history of educational reform; curriculum deliberation and instructional leadership and supervision; school-centered inquiry and decision-making; policy, planning, and program evaluation; issues on diversity and multicultural education; American and Washington State school law; school finance and resource allocation; school-community relations. Instruction occurs in units and seminar throughout the academic year. Prerequisite: admission to Principal/Program Administrator Preparation Program.

EDLPS 504 Leadership Core (3-6, max. 6) Topics include moral dimensions of leadership; modes of inquiry; organizational theory and change; history of educational reform; curriculum deliberation and instructional leadership and supervision; school-centered inquiry and decision-making; policy, planning, and program evaluation; issues on diversity and multicultural education; American and Washington State school law; school finance and resource allocation; school-community relations. Instruction occurs in units and seminar throughout the academic year. Prerequisite: admission to Principal/Program Administrator Preparation Program.

EDLPS 505 Transition to Leadership (3-6, max. 6) Development and administration of systems for selection, evaluation and clinical supervision of certificated and classified personnel. Focuses on leadership models and transition to a leadership role, including opening a school or program and dealing with student/ school crises. (Only for students admitted to the EDLPS Principal/Program Administrator Program.)

EDLPS 507 Reflective Seminar (1-6, max. 6) Integration of theory and internship experience; group process laboratory and peer feedback and review of written work, oral presentations, and journals. Reading and discussion of crucial issues. (Only for students admitted to the EDLPS Principal/Program Administrator Preparation Program.) Credit/no credit only.

EDLPS 509 Planning, Organizing, and Decision Making (3) Application of principles utilized in planning, organizing, and decision making in districts and schools. Formation of policy and procedures; formal and informal organization; power, authority, and responsibility; utilization of people, time, and space.

EDLPS 510 School Finance (3) Financial practices and problems in districts and schools considered, including state and federal support plans, school plant planning, school business management, resource allocation, and budgeting and educational accountability.

EDLPS 511 School-Community Relations (3) Examines the dynamics of the interface between the public schools and the community. Special attention is given to the findings of research in relation to school-community power, types, and organizational influences.

EDLPS 512 Seminar in Personnel Administration and Development (3) Major emphasis on the analysis of factors to be considered in the selection and evaluation of teachers and administrators and considerations in staff development.
EDLPS 513 Seminar in Instructional Development and Supervision (3) Theory of the process of supervising instructionally effective school personnel, including an analysis of the techniques of supervision, theory of leadership and group process, interpersonal relations, and evaluation of teacher effectiveness.

EDLPS 514 Washington School Law (3) Overview of Washington State specific legal provisions affecting the operations and management of public schools, including school organization and operations, school finance, separation of church and state, school employment, student conduct, discipline and rights, equity, intergovernmental agreements, and student health and safety.

EDLPS 515 Management of Labor Relations in Education (3) Examination of procedures and techniques pertinent to the management of organizational conflict. Among the areas covered are collective bargaining, grievance procedures, mediation, fact finding, and arbitration.

EDLPS 516 Special Education and the Law (3) Overview of major state and federal laws affecting the operation and management of special education programs in public schools. Emphasis upon procedural and substantive rights of children with disabling conditions. Offered jointly with EDSP 504; W.

EDLPS 517 Seminar in Administration: Facilities (3) Controversial issues, problems, and techniques of educational facility administration. Emphasis placed on such factors as planning, financing, development, design, construction, operation, liabilities, property management, state regulation. Credit/no credit only.

EDLPS 518 Reflective Seminar: The Superintendent (1-6, max. 6) Overview of theory and internship experience. Readings and discussion of crucial issues, presentations by local school superintendents: district budgeting processes, personnel, staff relations and collective bargaining, superintendent-board relations, bond issues, facilities planning, superintendent as instructional leader. Credit/no credit only.

EDLPS 519 Special Topics in Educational Leadership (1-10, max. 15) Readings, lectures and discussions pertaining to significant topics of special and current interest to educators. Focus is on issues of particular concern to K-12 administrators and other educators in leadership roles in districts and schools. Topics vary; check Time Schedule for topic(s) to be covered.

EDLPS 520 Education as a Moral Endeavor (3) An exploration of fundamental questions that have faced educational leaders in the past and most likely will continue to face them in the future. Foundational studies in history, philosophy, and sociology provide the basis for discussion and writing about these fundamental questions. Credit/no credit only.

EDLPS 521 Philosophy of Education (3) Philosophy of education considered as a study of the conceptual basis for educational policy and practice. Emphasis on relationships between enduring educational problems and fundamental philosophic issues; concepts that feature centrally in educational discourse; and conceptual analysis as a means for clarifying decisions regarding educational policy and practice.

EDLPS 522 Contemporary Philosophies of Education (3) Intensive study of the writings of selected contemporary philosophers of education.

EDLPS 523 Analysis of Educational Concepts (3) Selected concepts central to conduct and understanding of education.

EDLPS 524 Seminar in Philosophy of Education (3, max. 6) Philosophical examination of questions; and of ways in which education might be studied. Uses and limits of conventional scientific approaches in education inquiry. Consideration of alternatives.

EDLPS 525 Educational Inquiry (3) General survey of epistemological issues underlying the several schools of thought or families of inquiry. Overview of various methods used in conduct of educational inquiry, examples of ways those methods are typically used, and exploration of strengths and weaknesses of those methods. Discussion throughout is in terms of assumptions regarding the nature of knowledge and purposes of inquiry. Must be taken in sequence. Credit/no credit only. Prerequisite: doctoral status in education.

EDLPS 526 Educational Inquiry (3) General survey of epistemological issues underlying the several schools of thought or families of inquiry. Overview of various methods used in conduct of educational inquiry, examples of ways those methods are typically used, and exploration of strengths and weaknesses of those methods. Discussion throughout is in terms of assumptions regarding the nature of knowledge and purposes of inquiry. Must be taken in sequence. Credit/no credit only. Prerequisite: doctoral status in education.

EDLPS 530 History of Education (3) Historical survey of education. Emphasis on relationship between idea and practice. Topics include education and colonialism, formation of state school systems, progressive education, equal educational opportunity, changes in textbooks and curricula, education and social structure, and education in the history of cultures.

EDLPS 531 History of American Higher Education (3) Examination of the historical development of the American higher education enterprise, including pre-colonial origins. Includes attention to the colonial colleges, the rise of new institutions in the nineteenth century, and the further development of American colleges and universities in the twentieth century. Leaders in these developments are identified.

EDLPS 532 Seminar: American Education in the Twentieth Century (3, max. 6) Selected problems in American education over the last century, with special emphasis on contemporary issues and trends.

EDLPS 533 Seminar in Educational Classics (3) Analysis in depth and in the context of the relevant history of several major works in educational thought from Plato to Dewey.

EDLPS 534 History of the Modern University (3) Growth of the modern university with attention to intellectual trends as well as organizational and curricular changes. Special attention is given to nine American universities in the twentieth century.

EDLPS 535 Historical Inquiry in Education Research (3, max. 6) Methods and critique of historical research in education. Examination of landmark works in education history and historiography. Hands-on experience framing historical questions, finding historical sources, using historical evidence, substantiating historical claims, and addressing issues in the history of education.

EDLPS 536 Historical Analysis of Educational Issues (3) Analysis and interpretation of the history of education in its broadest sense: the transfer of cultural values across generations. Examination of the problems of evidence and interpretation with which the authors of exemplary works in the history of education struggled.

EDLPS 540 Sociology of Education (3) Examination of education and educational institutions by using the major conceptual tools of sociology. Emphasis on sociological thought and findings that have particular bearing on the understandings and judgments of educators.

EDLPS 541 Topics in Comparative Education (3, max. 6) International efforts in education, including the role of the United States in overseas programs. Analysis of the relation of education and society in foreign areas, stressing social change and conflict. Regions of the world considered in the course vary from one offering to another.

EDLPS 542 Seminar in Educational Sociology (3) Application of sociological principles to school problems; individual problems and investigations. For teachers, administrators, and those using educational sociology as a field for advanced degrees.

EDLPS 543 Seminar: Research in Educational Sociology (3) Theory, concept, and method of sociological inquiry as applied to problems in education.

EDLPS 544 Comparative Education: Introduction to Concepts and Methods (3) Introduction to research methods used in comparative education studies. Considers ways to study familiar and unfamiliar contexts, identifies the common pitfalls of international comparisons. Reviews ethnomet hodological tools of interview construction, cross-cultural observation strategies, documentary analysis. Education policy and practice is primary focus; useful for comparing other public policy issues internationally.

EDLPS 545 Knowledge and Data in Relation to Action (3) Introduces L4L students to systematic inquiry—to fundamental ideas about knowing and knowledge, data and evidence, and to the applications of these ideas in settings that invite leadership action to address educational issues. (Only for students admitted to the Leadership for Learning Ed. D. Program.) Credit/ no credit only.

EDLPS 546 Leadership Inquiry I: The design of research on Local Problems of Practice (3) Examines evaluation design, action research, critical inquiry, and mixed method research. Equips L4L students to recognize and create viable, rigorous designs for action-oriented research into local problems of practice. (Only for students admitted to the Leadership for Learning Ed. D. Program.).

EDLPS 547 Leadership Inquiry II: Developing Useful Quantitative and Qualitative Evidence (3) Helps students, in the context of action-
EDLPS 548 Leadership Inquiry III: Refining the Design and Analysis of Research that Informs Practice (3) Teaches how to critically evaluate and improve research designs so that they are internally consistent, fully developed, and well-anchored to both substantive and methodological literatures. Builds largely around the students’ own emerging dissertation designs. (Only for students admitted to the Leadership for Learning Ed. D. Program.) Credit/no credit only.

EDLPS 556 Foundations III: The Dynamics of Organizations, Policy, and Systems Change (2-5, max. 6) Considers the nature and dynamics of organizations within large educational systems. Draws on theories concerning organizations, politics, administrative systems, and innovation. Explores how organizations are designed and function, how policy works, and how systems change, adapt, and learn. (Only for students admitted to the Leadership for Learning Ed. D. Program.) Credit/no credit only.

EDLPS 557 Foundations IV: Fiscal and Legal Contexts for Leadership of Complex Educational Systems (2-5, max. 3) Explores two major challenges facing leaders of complex educational systems: (1) securing and allocating resources (especially funds, but also time and expertise); and (2) conforming to the framework of legal principles and precedents that govern public education. (Only for students admitted to the Leadership for Learning Ed. D. Program.)}

EDLPS 564 Seminar in Economics of Education (3) Current problems in school finance, including costs, ability to support schools, and financial implications of educational principles. The economics of public education. Problems of federal, state, and local school support. Financing capital outlay, research, and public relations.

EDLPS 565 Power and Politics in Organizational Leadership and Decisionmaking (3) Focuses on conceptual frameworks that can be used to analyze power-influence processes in complex organizations and research methods that are well-suited to the study of these processes. Opportunities to design studies of power relations and political processes are provided.

EDLPS 566 Education Policy Serving Disenfranchised Groups (3) This seminar examines programs and policies aimed at ameliorating conditions that face disenfranchised groups in contemporary K-12 schooling. Seminar members critically analyze the assumptions, design, and likely impact of these programs and policies on institutions and individuals. Designed for advanced doctoral students. Others admitted with permission of instructor.

EDLPS 567 Education Policy and the Improvement of Teaching and Learning (3) Examines connections between classroom instruction, in P-12 and higher education settings. Of particular concern is the capacity of policy to improve the quality of curriculum and instruction. Students design and critique policies, drawing on research and feedback from policymakers.

EDLPS 570 Critical Views on Educational Leadership (3) Leadership theory is undergoing a wave of development influenced, in part, by critical theory and postmodern perspectives. Topics include the emerging literature on critical leadership perspectives with a particular goal of understanding how this informs leadership practice for those in educational organizations.

EDLPS 571 Instructional Renewal and the Achievement Gap (3) Examines the meaning of the performance gap between relatively advantaged and disadvantaged students in contemporary American schools and school districts, and the possibilities for reducing and closing it. Especially within classroom instruction. (Only for students admitted to the Leadership for Learning Ed. D. Program.)

EDLPS 572 Teaching, Learning, and Instructional Renewal in the Context of Learner Differences (2-5, max. 5) Examines the nature of learning and learner differences, and how educators can work productively with these differences, in relation to particular subjects (literacy, mathematics), diversity (language, culture, disability), assessment, and instructional technology. (Only for students admitted to the Leadership for Learning Ed. D. Program.) Credit/no credit only.

EDLPS 573 Title (2-4, max. 4) Text (Only for students admitted to the Leadership for Learning Ed. D. Program.)

EDLPS 579 Special Topics in Organizational and Policy Analysis (1-6, max. 15) Readings, lectures, and discussions pertaining to significant topics of special and current interest to educators. Focus is on issues related to the analysis of educational organizations, policies, and policy making. Topics vary; check Time Schedule for topic(s) to be covered.
EDLPS 580 The American College and University (3) Introduction to contemporary United States higher education, with special emphasis on emerging trends, roles of the several kinds of institutions, the composition and character of student bodies and faculty, and the state coordination of colleges and universities.

EDLPS 581 Principles and Practices of Adult and Continuing Education (3) History and development of adult and continuing education in the United States; component parts of the field; issues, theory, and research; program planning for adults; professionalism of the field.

EDLPS 582 Seminar in the History and the Organization of Higher Education (3) Advanced seminar in the history and the organization of higher education.

EDLPS 583 Higher Education and the Law (3) Legal implications of university operations and an explanation of the legal and constitutional rights of students, faculty, and staff within the university. Special attention given to faculty employment and termination decisions; student protections, including due process; and university liabilities.

EDLPS 584 Academic Governance and Collective Bargaining in Higher Education (3) Explores the concept and operation of collective bargaining in higher education: its origin; the reasons for its growing popularity as a governance mechanism; the legal framework within which it operates; the rights, powers, and duties subsumed under its operation; and its relationship to the traditional form of faculty governance mechanisms.

EDLPS 585 Resource Allocation in Higher Education (3) After attention to the basic tools of economic analysis, focus is on application of those tools to specific topics in higher education (e.g., access, budgeting, finance and policies, and funding alternatives).

EDLPS 587 Seminar in Teaching and Learning in Higher Education (3, max. 9) Theory and practice of instruction and learning in higher education.

EDLPS 588 Seminar in Administration of Community Colleges (3) For students preparing for administrative positions in community colleges. Principles and practices in organization and administration of community colleges.

EDLPS 589 The Community College (3) Intensive study of the community college—its history and present and future status. Curriculum, instruction, financial, and governance issues are also discussed.

EDLPS 590 Student Populations and Experiences in Higher Education (3) Examines foundational literature dealing with students in higher education. Primary focus is on how students change during college, how they make choices and decisions, what roles institutional climate and structure play in the students’ experiences, and what impact college has on students.

EDLPS 591 Higher Education and Public Policy (3) Covers public policy processes affecting higher education. Issues examined vary, but typically include fiscal context of higher education policy, access, equity, distance learning, and accountability policies.

EDLPS 598 Special Topics in Higher Education (1-6, max. 15) Readings, lectures, and discussions pertaining to significant topics of special and current interest to educators. Focus is on issues related to education in community colleges, four-year colleges and universities. Topics vary; check for topic(s) to be covered.

EDLPS 599 Independent Studies in Education (1-10, max. 10) Registration must be accompanied by a study prospectus endorsed by the appropriate faculty adviser for the work proposed, and which with permission of the instructor, must be filed with the Office of Leadership and Policy Studies in the College of Education. Prerequisite: permission of instructor.

EDLPS 600 Independent Study or Research (*) Registration must be accompanied by a study prospectus endorsed by the appropriate faculty adviser for the work proposed, and which with permission of the instructor, must be filed with the Office of Leadership and Policy Studies in the College of Education. Prerequisite: permission of instructor.

EDLPS 601 Internship (1-4, max. 12) Name of faculty member responsible for supervising the student should be indicated on program of studies. Credit/no credit only. Prerequisite: permission of Supervisory Committee chairperson or graduate program adviser.

EDPSY 228 Learning and Motivation in Contexts (5) I&S How people learn and remember, what motivates them to learn, and how learning and motivation are shaped by social contexts in homes, school, and communities. Cognitive and socio-cultural theories of learning and motivation (including distributed cognition, goal theories, self-determination theory, and interest theories), especially as related to college learners.

EDPSY 304 Educational Psychology (5) Human learning in the educational setting. Cognition, development, learning, motivation, affective processes, and socialization. Emphasis on skills in influencing classroom learning and discipline. Open to students in the Music Education program or by permission of instructor. Offered: A.

EDPSY 431 Strategies for Classroom Research and Evaluation (5) Techniques and strategies for the design and implementation of studies of classroom instruction. Directed toward classroom teachers as consumers of instructional research and as evaluators in their own classrooms. Credit/no credit only.

EDPSY 447 Principles of Guidance (3) Study of guidance programs in elementary and secondary schools. Attention is given to the roles of specialists who emphasize the role of the classroom teacher in school guidance programs. This course is designed for teachers, administrators, and prospective teachers.

EDPSY 490 Advanced Educational Statistics (3) Advanced statistics for counselors, teachers, administrators, and others concerned with student personnel and psychological services in schools and colleges. The course focuses on special topics that have either local or contemporary significance.

EDPSY 495 Introduction to Educational Measurement (3) Practical understanding of test reliability, validity, and derived scores and their application to educational assessments; concepts of criterion and norm-referenced testing; review of group administered norm-referenced and criterion-referenced tests and/or testing programs; test interpretation; issues and ethics in large scale assessment. Prerequisite: EDPSY 490. Offered: W.

EDPSY 499 Undergraduate Research (*) Students developing studies under this rubric should be advised that a report or a paper setting forth the results of their investigations should be regarded as a basic part of the program. Offered: AWSp.

EDPSY 500 Field Study (*) Individual study of an educational problem in the field under the direction of a faculty member. Prerequisite: approved plan of study and permission of the instructor must be filed in the Office of Educational Psychology in the College of Education. Offered: AWSp.

EDPSY 501 Human Learning and Educational Practice (3) Systematic examination of current research about human learning in educational settings, including the study of behavioral, information processing, social constructivist, and the developmental perspectives on learning. Offered: AWSp.

EDPSY 502 Developmental Foundations of Early Learning (3) Perceptual-motor, language, and overall cognitive development in children from birth through primary-school age. Emphasis on Piagetian and Vygotskian approaches to development with a special focus on the connections between learning and development. Field-based course projects may be required. Prerequisite: EDPSY 501 or permission. Offered: Sp.

EDPSY 503 Theories of Intelligence (3) Reading and discussion of theoretical and research papers from the extensive literature on Piagetian, psychometric, and information processing conceptions of intelligence. Historical approach to the topic is followed by analysis of current writings on intelligence and its measurement. Credit/no credit only. Prerequisite: EDPSY 501 and graduate status in education or psychology. Offered: alternate years; W.

EDPSY 506 Instructional Theory (3) Sources, current state, and utility of prescriptive instructional theories with emphasis upon theories having a potential for guiding the design of instruction. Prerequisite: EDPSY 501 or equivalent.

EDPSY 507 Reading, Writing, and Arithmetic: Educational Assessment and Consultation (5) Students administer and interpret tests of reading, writing, arithmetic, and related developmental skills; integrate test, observational, interview, and portfolio information in staffings and written reports; and consult with teachers regarding educational interventions. Prerequisite: graduate standing in the school psychology specialization and permission of instructor. Offered: A.

EDPSY 508 Clinical Supervision-Practicum (2-6, max. 12) Practicum in supervising counseling, group counseling, diagnostic activities, and remedial academic therapy. Prerequisite: advanced graduate standing. Offered: AWSp.
EDPSY 509 Educational Issues in Human Development (5) Human development theories and models. Educational implications of theory, methodology, and application. Current research complements the historical antecedents of current practice. Age range covered varies as function of current issues in professional literature. Prerequisite: 15 credits in educational psychology or psychology. Offered: alternate years; W.

EDPSY 510 Cognition in the Context of the School Curriculum (3) Contemporary issues and trends in human learning, with a focus on reasoning within subject-matter areas such as mathematics, history, and science. Prerequisite: EDPSY 501 or equivalent. Offered: alternate years.

EDPSY 511 Seminar in Applied Educational Psychology (1, max. 6) Designed for graduate students in educational psychology. Applications of theoretical constructs to particular problems encountered in school counseling, practice.

EDPSY 512 Classroom Assessment Strategies (3) Development and evaluation of traditional, observational, essay, performance-based, portfolio assessments and grading models as they are used in classroom assessment; some review of current research on classroom-based assessment; classroom assessment ethics.

EDPSY 513 Instrument Development (3) Instrument development techniques including construct development, test and item specifications, item writing, planning for reliability and validity studies, ethics in test administration and interpretation. Prerequisite: intended for doctoral or masters students to develop instruments for their own research. Prerequisite: EDPSY 490 or equivalent.

EDPSY 518 Assessment and Diagnosis of Reading Disabilities (3) Techniques for individual assessment of students with reading difficulties (K-12) including formal assessment using standard assessment tools and informal diagnostic teaching. Appropriate for classroom teachers, reading specialists, and school psychologists. Includes conducting and analyzing case studies. Prerequisite: EDCC&I 460, EDCC&I 462, other reading courses, or permission of instructor. Offered: alternate years; Sp.

EDPSY 519 Communication and Language in Young Exceptional Children (3) Review and discussion of theories of language acquisition as they relate to communication and language in young children. Review of research of language environments that relate to early literacy and education and how to use this information to modify environments for special needs children. Offered: jointly with EDSE 521; W.

EDPSY 520 Psychology of Reading (3) Reviews current empirical research on cognitive processes in reading, including word and sub-word processes, syntax and comprehension, reading and perception, word recognition, concept development and meaning in reading, psychology of reading interests and skills. Prerequisite: EDPSY 501 or equivalent.

EDPSY 521 Psychology of Writing (3) Examines writing as a cognitive process and reviews current empirical research on writing, emphasizing primarily studies from a psychological perspective. Explores both developmental differences and individual differences in writing skills, together with instructional implications. Prerequisite: EDPSY 501 or equivalent.

EDPSY 522 Reading Disability Clinic (3-5) Supervised practicum in diagnosis and remediation of reading disabilities. Prerequisite: EDTP 532, EDTP 533 or equivalent, EDCC&I 460 or permission of instructor.

EDPSY 524 Problem Solving and Critical Thinking in Education (3) Study of the classic and contemporary research literature concerned with human problem solving and critical thinking with emphasis upon applications to educational practice and further research. Prerequisite: EDPSY 501 or equivalent.

EDPSY 525 Creativity and Education (3) Study of the classic and contemporary research literature about creativity with emphasis upon applications to educational practice, evaluation of strategies to promote creativity in the schools and further research. Prerequisite: EDPSY 501 or equivalent.

EDPSY 526 Seminar on Metacognition (3) Students read and discuss theoretical and research papers from the extensive literature on metacognition. Focuses on defining the concept of metacognition, establishing its range of applicability to educational problems, and becoming familiar with excellent examples of metacognitive research. Prerequisite: graduate status in education or psychology and permission of instructor.

EDPSY 527 Transfer of Teaching (3) Students read and discuss a representative sample of theoretical and research papers from extensive literature on teaching to promote transfer of what students learn to non-teaching environments. Historical approach to the topic is followed by analysis of current writings on transfer. Credit/no credit only. Prerequisite: EDPSY 501 or equivalent.

EDPSY 531 Socialization of School-Age Children (3) Study of personal social development and behavior from preschool ages through adolescence. Developmental theory and research are reviewed on the socialization influences of parents and peers and on such topics as aggression, emotional regulation, and social cognition. Prerequisite: EDPSY 501 or equivalent. Offered: W.

EDPSY 532 Adolescence and Youth (3) Developmental processes and patterns examined with major theoretical and current research themes from behavioral sciences as applied to middle school and senior high students. Educational issues, social problems associated with adolescence in Western culture. Prerequisite: EDPSY 501 or equivalent.

EDPSY 533 Current Research in Adolescence (3) Contemporary trends and patterns of adolescent research are examined with emphasis upon theoretical foundations, contrasting methodologies, and implications for further research. Exemplary studies and integrative reviews of research on adolescence are featured. Prerequisite: EDPSY 532 and EDPSY 591 or equivalents.

EDPSY 534 School Problems of Adolescence (3) Study of the classic, contemporary, and emerging school problems of school age youth with emphasis upon problem solving strategies for educators and associated youth service personnel. Includes problems of academic achievement, interpersonal relations, and social deviancy in the schools. Prerequisite: EDPSY 532 or equivalent.

EDPSY 535 Education and the Highly Capable Learner (3) Examination of major issues and problems in study and nurture of highly capable children and youth in the educational setting. Emphasis placed on contributions of theory and research to educational problem solving for multiple aspects of advanced human capacity. Prerequisite: EDPSY 501 or equivalent.

EDPSY 536 Learning Variables of Minority Children: Instructional Implications (3) Provides students with data base regarding (1) four variables (language/dialect, cognitive style, locus of control, and motivational systems) that affect learning among minority students, and (2) teaching strategies appropriate for these cultural socioeconomic variables. No credit given for students who have completed EDCC&I 425.

EDPSY 540 School Psychological Assessment (5) Study of assessment of human intelligence with supervised training in the administration, scoring, and interpretation of individual intelligence tests with emphasis on Stanford-Binet and Wechsler scales. Prerequisite: graduate standing in the school psychology specialization and permission of instructor. Offered: A.

EDPSY 541 Group Tests in Counseling (5) Emphasis on the utilization of objective measures in counseling. Prerequisite: EDPSY 490 or equivalent. Offered: Sp.

EDPSY 542 Career Development (3) Emphasis on vocational development theory and research. Psychological, social, and economic determinants of vocational development and choice are examined as a basis for vocational counseling. Prerequisite: graduate standing or permission of instructor.

EDPSY 543 Facilitating Career Development (3) Theory and practice in exploring, self-identified strengths, interests, resources, and other considerations when developing career plans. Emphasizes career development in the schools. Offered: Sp.

EDPSY 544 Counseling (5) Emphasis on the theory and practice of counseling.

EDPSY 545 Prepracticum (3) Competency-based skills training for beginning counseling and school psychology students. Attending, listening, focusing, and intervening behaviors for use with adults and children. Introduction to theories of helping. Prerequisite: enrolled in school counseling or school psychology or permission of instructor. Offered: A.

EDPSY 546 Counseling Practicum (3-5) Supervised practice in counseling. Prerequisite: EDPSY 545 or permission of instructor. Offered: WSp.

EDPSY 548 Educational Implications of Personality Theory (5) Study of personality
EDPSY 549 Seminar in Consultation Methods (3) Theory and practice of process consultation in educational settings. Field practice in teams with clients. Offered: W.

EDPSY 550 Family Counseling (3) Introduction to family counseling theory and practice, emphasizing family dynamics and communication analysis. Prerequisite: permission of instructor. Offered: W.

EDPSY 551 Group and Behavioral Intervention (3) Introduction to competency-based skills for beginning school psychologists. Includes basic processes of group management skills with children including group process in social skills training, problem-solving techniques, behavioral principles, and parent training. Prerequisite: EDPSY 545 or course in counseling techniques or permission of instructor. Offered: Sp.

EDPSY 555 Seminar in Counseling Specialty (1-2, max. 6) Oriented toward the role of a counselor as a professional worker. Credit/no credit only. Offered: ASp.

EDPSY 560 Advanced Practicum in Personality Assessment (3) Designed for doctoral level school psychologists to learn advanced personality assessment for diagnosis of emotional and behavior disorders. Prerequisite: EDPSY 540; EDPSY 564. Open to Doctoral students only.

EDPSY 561 Group Process Laboratory (3) Explores the theoretical concepts of group process with a special emphasis in how to conduct group process in school and agency settings. Offered: A.

EDPSY 562 Group Counseling in Schools (3) Provides students with the opportunity to co-facilitate groups in elementary, middle, and secondary schools, supplemented by weekly didactic presentations of counseling and guidance models. Prerequisite: EDPSY 561 or permission of instructor. Offered: W.

EDPSY 564 Practicum in School Psychology (1-6, max. 6) Practicum in assessment and consultation, emphasizing diagnosis of behavior and learning disabilities, and focusing on techniques acquired in 507 and 540. Offered: W.

EDPSY 565 Advanced Practicum in Assessment and Cognitive Therapy with High Risk Students with E/BD (3) Mazza, Stage Designed for doctoral level school psychologists to learn advanced assessment and cognitive therapy techniques in working with students with EBD under the supervision of a licensed psychologist during a one-quarter sequence. Prerequisite: EDPSY 544, EDPSY 546 or equivalent and enrollment in the Ph.D. school psychology program.

EDPSY 566 Case Study Seminar (1-6, max. 6) Integrating theoretical concepts with practice/service issues. Cases selected for discussion represent a wide range of problems found in schools. Activities include group supervision and peer review. Offered: A/WSp.

EDPSY 568 Seminar in Professional Issues and Ethics (2) Professional ethics codes and cases, history of counseling or school psychology, legal problems, credentialing issues, conditions of practice, school education, publishing, and presenting research papers. Credit/no credit only. Offered: W.

EDPSY 569 Seminar in Counseling Psychology Research (2) Methodological and professional issues related to research in counseling and psychological services. Counseling psychology research literature with focus on content and methods. Prerequisite: EDPSY 591 or equivalent.

EDPSY 570 Introduction to School Psychology (2, max. 4) Current issues in professional psychology practice and research. Limited to graduate students in school psychology. Offered: A.

EDPSY 572 Social-Emotional Assessment (3) Techniques in social-emotional assessment of school-aged children. Diagnostic systems including DSM IV presented in conjunction with assessment techniques. Emphasis on integrative method for understanding social emotional assessment batteries and reliability and validity of their test score interpretation. Prerequisite: school psychology or counseling student or permission of instructor. Offered: A.

EDPSY 573 Psychological Assessment of Preschool Children (3) Students learn to give and interpret tests of intellectual development to assess language, play, and social/emotional functioning, and to write psychological assessment reports for infants, toddlers, and preschoolers. Credit/no credit only. Prerequisite: graduate standing in the school psychology specialization and permission of instructor. Offered: Sp.

EDPSY 575 Structural Equation Modeling (3) Theory and data analysis using linear structural equation models. Application to data in educational research. Prerequisite: EDPSY 594 or equivalent. Offered: alternate years.

EDPSY 576 Hierarchical Linear Models (3) Theory and data analysis for research models where random factors are nested, such as multi-level data, growth curve analysis, and meta-analysis. Prerequisite: EDPSY 593 or equivalent. Offered: alternate years.

EDPSY 577 Neuropsychology of School Learning and Behavioral Problems (3) The microstructure, macrostructure, and structural and functional development of the brain are reviewed with a focus on the educational relevance of developmental neuropsychology. Four areas are covered: Hemispheric differences and integration; neurological soft signs, attention deficit, and hyperactivity; language, reading, and learning disabilities; and medical syndromes. Credit/no credit only. Offered: Sp.

EDPSY 578 Educational Applications of Neuropsychology: Assessment and Intervention (5) Students observe and administer neuropsychological tests and plan and carry out educational interventions for children with neuropsychological disorders. Content focuses on various neuropsychological disorders for which school psychologists provide assessment and consultation. Prerequisite: EDPSY 540 or equivalent course in individual testing, and EDPSY 577 or permission of the instructor.

EDPSY 580 Seminar: The Emergence of Educational Psychology (3) Examination of documents by selected contributors to the field of educational psychology. Special focus on period from mid-nineteenth century to the later twentieth century. Prerequisite: graduate standing.

EDPSY 581 Seminar in Educational Psychology (1-5, max. 15) Advanced seminar on selected topics in educational psychology. A critical appraisal of current research. Prerequisite: advanced degree work in educational psychology. Offered: A/WSp.

EDPSY 582 Seminar in Development and Socialization (3, max. 15) Advanced seminar on selected topics concerned with human development and socialization processes. Emphasis placed upon empirical research and its theoretical underpinnings in such areas as cognitive development, moral development and education, self-concept development, and related concerns.

EDPSY 583 Seminar in Learning and Thinking (3, max. 15) Seminar in the psychology of learning language and language learning. Each seminar is offered with predesignated emphasis in one of the following topics: linguistics, phonology, pragmatics, psycholinguistics, semantics.

EDPSY 584 Seminar in Quantitative Methods (3, max. 15) Seminar on such topics as measurement techniques, research design, psychometrics, and statistics.

EDPSY 586 Qualitative Methods of Educational Research (5) Survey of various qualitative research methods from a variety of disciplinary perspectives (anthropology, sociology, applied linguistics, cognitive psychology, policy analysis, and evaluation) with intensive experience in collection, analysis, and reporting of data. Prerequisite: second-year doctoral standing and one course in statistics, and permission of instructor. Offered: jointly with EDCI 578; A.

EDPSY 587 Qualitative Methods of Educational Research (5) Survey of various qualitative research methods from a variety of disciplinary perspectives (anthropology, sociology, applied linguistics, cognitive psychology, policy analysis, and evaluation) with intensive experience in collection, analysis, and reporting of data. Prerequisite: EDPSY 586/EDCI 578; second-year doctoral standing and one course in statistics. Offered: jointly with EDCI 579; Sp.

EDPSY 588 Survey Research Methodology and Theory (3) Survey research, research, theory, and methodology. Probability theory, sampling, human subjects considerations, instrumentation, and analysis techniques. Review and critique by students of theoretical issues in survey research and development of a survey instrument. Prerequisite: EDPSY 490 or equivalent. Offered: A.

EDPSY 589 Scholarly Writing in Education and Psychology (3) Introduction to the demands
EDPSY 590 Computer Utilization in Educational Research (3) Computer utilization in solution of research problems, data reduction to forms amenable to computer solution, appropriate framing of problems for solutions by computer. Using an interactive system, editors, and program packages. Prerequisite: EDPSY 490. Offered: A.

EDPSY 591 Methods of Educational Research (3) Introduction to educational research. Primary focus on hypothesis development, experimental design, use of controls, data analysis and interpretation. Prerequisite: EDPSY 490. Offered: AWSp.

EDPSY 593 Experimental Design and Analysis (5) Experimental design with emphasis on the analysis of variance. Prerequisite: EDPSY 490 or equivalent. Offered: W.

EDPSY 594 Advanced Correlational Techniques (5) Multivariate analysis, including regression and multiple correlation; matrix algebra; factor analysis. Prerequisite: EDPSY 490 or equivalent. Offered: Sp.

EDPSY 595 Item Response Theory Models of Testing (3) In depth exploration of IRT models and their roles in the development of large scale educational and psychological tests. Prerequisite: EDPSY 490 or equivalent, EDPSY 592, EDPSY 594.

EDPSY 596 Program Evaluation (3) Advanced course in evaluation research emphasizing nontraditional designs, especially those that impose severe ecological constraints on the evaluators. Prerequisite: EDPSY 593, EDPSY 595, EDPSY 596, or permission of instructor.

EDPSY 597 Critical Analysis of Educational Research (3) Theoretical and practical understanding of the quantitative aspects of large-scale tests, including: scaling, norms development, and the development of derived and interpretive scores, evidence for validity and reliability. Prerequisite: EDPSY 490 or equivalent, EDPSY 490, EDPSY 592, EDPSY 595.

EDPSY 599 Independent Studies in Education (1-3) Independent study or readings of specialized aspects of education. Offered: AWSp.

EDPSY 600 Independent Study or Research (1-3) Prerequisite: permission of instructor. Required. Offered: AWSp.

EDPSY 601 Internship (3-10, max. 10) Offered: AWSp.

EDPSY 404 Exceptional Children (3) Edgar Children with disabilities studied from the point of view of education. Offered: AWS.

EDPSY 414 Introduction to Early Childhood Special Education (3) Schwartz Provides students with a comprehensive overview of major aspects of the field of early childhood special education. Theoretical foundations and program development and implementation are presented in an approach that integrates theory, research, and practice. Offered: W.

EDPSY 420 Classroom Management of the Physical Problems of Individuals with Severe or Profound Disabilities (3) Overview of physical management of pupils with severe or profound disabilities in educational settings. Principles of normal motor development, positioning, and handling are applied to the development of classroom strategies. Effects of abnormal motor development on educational programming. Offered: Sp.

EDPSY 496 Workshop in Special Education (1-10, max. 15) Demonstration, observation, and/or participation with groups of disabled children in laboratory or controlled classroom settings. Offered: AWSpSp.

EDPSY 498 Undergraduate Research (2-5, max. 5) Students developing studies under this rubric should be advised that a report or a paper setting forth the results of their investigations should be regarded as a basic part of the program. Offered: AWSpSp.

EDPSY 500 Field Study (1-6, max. 6) Individual study of an educational problem in the field under the direction of a faculty member. Prerequisite: approved plan of study and permission of the instructor. Offered: AWSpSp.

EDPSY 502 Collaboration: Working with Parents and Professionals (3) Sandall Provides students with knowledge and skills for working collaboratively with other professionals, family members, and paraeducators. Focus is on the role of the special educator in forming and sustaining school, family, and community partnerships. Offered: WS.

EDPSY 504 Special Education and the Law (3) Brown Overview of major state and federal laws affecting the operation and management of special education programs in public schools. Emphasis on procedural and substantive rights of children with disabling conditions. Offered: jointly with ELPDS 516; W.

EDPSY 505 Curriculum Development of Students with Moderate to Severe Disabilities (3) Addresses issues and practices in the development of appropriate curricula for students with moderate to severe or profound disabilities. Includes curriculum models, methods for the selection of appropriate skills for inclusion in Individualized Education Plans, and establishing priorities for instruction. Offered: W.

EDPSY 507 Instructional Methods for Students with Moderate to Severe Disabilities (3) Davis Details a systematic instructional process for the education of students with moderate to severe or profound disabilities. Includes instructional methods and materials designed to promote the development of skills that are required in school, home, and community settings, and to reduce challenging behaviors. Offered: Sp.

EDPSY 510 Behavioral Measurement and Management in the Classroom (3) White Response measurement in the classroom; use of data analysis for instructional decisions and behavior management for children with disabilities. Offered: A.

EDPSY 511 Methods of Applied Behavior Analysis Research (3) Schwartz Characteristics of applied behavior analysis are presented: direct, daily measurement, and the systematic investigation of important variables. Representative studies from various applied situations are discussed in terms of dependent and independent variables, research design, reliability, validity, and data analysis. Prerequisite: EDPSY 510 or equivalent preparation. Offered: WSp.

EDPSY 513 Principles of Clinical Appraisal for Teachers of Exceptional Children (3) Jenkins Diagnostic instruments used in the clinical appraisal of exceptional children. Theoretical and measurement considerations are used to buttress practical experiences in appraisal related to eligibility and intervention. Offered: A.

EDPSY 514 Fundamentals of Reading for Children with Disabilities (3) Jenkins Emphasis on basic prereading and reading skills, such as phonics and structural analysis, specifically for the disabled child. Acquisition of comprehension skills by the disabled. Diagnosis of reading problems, published materials appropriate for children with disabilities, material modification. Offered: W.

EDPSY 515 Problems and Issues in Special Education (3, max. 9) Intensive examination of the issues pertinent to special education, such as legislation, interdisciplinary functions, and the role of special education in general education and placement practices. Offered: Sp.

EDPSY 517 Practicum in Research Design and Analysis in Special Education (1-4, max. 10) Critical analysis of current research in special education and related fields serves as background for designing applied research projects. Projects are examined, evaluated, and revised in seminar discussion. Prerequisite: EDPSY 490 and EDPSY 591 or equivalent and permission of instructor. Offered: AWSpSp.

EDPSY 518 Seminar in Special Education Research (1-3, max. 9) Designed for doctoral students in special education during their first year of residency. Each candidate selects a dissertation problem and submits a proposal. Topics such as the procurement of subjects, the reporting and communication of research findings, and the evaluation of research are stressed. The seminar leads to the evolution of a viable dissertation proposal. Credit/no credit only. Offered: AWSp.

EDPSY 520 Seminar in Applied Special Education (1-12, max. 12) Designed for graduate students in special education. Focus on contemporary topics relating to the application of the theoretical constructs to special education. Offered: AWSp.

EDPSY 521 Communication and Language in Young Exceptional Children (3) Review and discussion of theories of language acquisition as they relate to communication and language in young children with special needs. Review of
research of language environments that relate to early literacy and education and how to use this information to modify environments for children with special needs. Offered: jointly with EDPsy 519; W.

EDSPE 522 Seminar on the Education of Students with Severe Disabilities (3) White Advanced graduate seminar arranged to study and discuss the essential components of providing a comprehensive approach to the identification and education of infants, children, adolescents, and young adults with special disabilities. Offered: Sp.

EDSPE 523 Specific Numeracy Techniques for Elementary Students with Mild Disabilities (3) Neel Provides the teacher with specific techniques for teaching numeracy to elementary students with mild disabilities in inclusive settings. Prerequisite: EDSPE 522 or equivalent. Offered: SpS.

EDSPE 524 Functional Behavioral Assessment (3) Provides a solid foundation in the theory and practice of functional behavioral assessment (FBA). FBA is a required practice under special education law and considered a best practice for students with challenging behavior. Offered: W.

EDSPE 525 Educating Students with Autism or Severe Behavior Disorders (3) Schwartz Consideration of the identification, etiology, education, and outcomes of individuals with autism or other severe behavior-disorders. Offered: Sp.

EDSPE 526 Techniques for Instructing Social Behavior (3) Elementary Students with Mild Disabilities (3) Cheney Provides prospective and practicing teachers with foundational theory and knowledge to select specific techniques to promote social competency in elementary children with mild disabilities. Discusses research related to use of these techniques and interventions. Develops schoolwide, classroom, and individual plans for teaching social skills. Offered: A.Sp.

EDSPE 527 Applied Behavior Analysis for Teachers (3) Presents principles of applied behavior analysis as applied to teachers. Focuses on classroom management and individual behavior change including methods for increasing and decreasing behavior, group and individual contingencies, and self-management and rule-based contingencies. Examples in general education/inclusion settings, integrated and self-contained are illustrated.

EDSPE 528 Inquiry and Methods in Writing Instruction (3) Covers methods of assessment and teaching written composition, spelling, and handwriting to children with and without disabilities. Particular attention is given to how to establish a strong writing program in elementary classrooms and how to teach writing strategies. Offered: jointly with EDC&I 536; Sp.

EDSPE 541 Education of Children with Behavior Disorders (3) Neel Introductory course covering characteristics of and educational practices for children with emotional/behavioral disabilities. Reviews theory, definitional issues, models, assessment, and instructional methods for educating children with emotional and behavioral disorders. Students develop a working knowledge of educational approaches for teaching students with emotional/behavioral disabilities. Offered: alternate years; W.

EDSPE 545 Instructional Modifications for the Education of Children with Mild Disabilities (3) In-depth analyses and applications of several modifications of instructional techniques necessary for the education of students with mild disabilities. Offered: WS.

EDSPE 546 Seminar in Educating Children with Behavior Disorders (3, max. 9) Cheney Advanced-level seminars focus on contemporary research topics relating to the effective education of children with serious behavior disorders. Students analyze and review research pertinent to the chosen topics and prepare a scholarly manuscript for dissemination. Offered: alternate years; W.

EDSPE 548 Special Topics in the Education of the Learning Disabled (3, max. 12) In-depth analysis of empirical findings in the specialty of learning disabilities with focus on the synthesis of research findings and their application to the educational environment. A paper suitable for publication required. Prerequisite: course in learning theory, introductory course in learning disabilities, or equivalent preparation.

EDSPE 551 Educational Assessment of Young Children with Special Needs (3) Special standardized and educational measurement and evaluation procedures for use with young children with a variety of disabling conditions. Observation, ecological assessment, and programming strategies are discussed in combination with practical application of the skills within an educational framework. Offered: A.

EDSPE 561 Educational Assessment of Young Children with Disabilities (3) Sandall Basic theoretical models and approaches to curricula for preschoolers with disabilities. Promote specific preschool curricula and develop skills to assist students in critiquing and evaluating curricula. How to adapt materials for specific populations and to plan a program for exceptional preschoolers. Offered: Sp.

EDSPE 563 Issues in Working with Families of Young Children with Special Needs (3) Adjustment of parents to the presence of a young child with disabilities, transactions that occur between parents and their children, procedures that facilitate the child’s development through these interactions, and strategies to promote relationships among families and professionals. Offered: W.

EDSPE 565 Seminar: Early Childhood Education for Children with Disabilities (3, max. 9) Sandall, Schwartz Advanced seminar on early childhood education for infants and young children with disabilities. Historical and current research from special education and related fields reviewed with regard to their application to the education of young children with disabilities.

EDSPE 566 Current Research in Early Childhood Special Education (2, max. 6) Introduces students to theory and current research related to early intervention with infants and toddlers and how to evaluate research articles. Selected topics cover typical and atypical development in the areas of cognitive, social communication, and social development, as well as issues in assessment, curricula, and intervention strategies.

EDSPE 599 Independent Studies in Education (*) Independent studies or readings of specialized aspects of education. Registration must be accompanied by a study prospectus endorsed by the appropriate faculty adviser for the work proposed. Offered: AWSpS.

EDSPE 600 Independent Study or Research (*) Registration must be accompanied by a study prospectus endorsed by the appropriate faculty adviser for the work proposed. Offered: AWSpS.

EDSPE 601 Internship (1-10) Prerequisite: graduate standing and permission based on rearrangement of internship placement and approval by adviser. Offered: AWSpS.

Teacher Education Program

EDTEP 501 First Quarter Field Experience — Elementary (2) Field experience and use of reflective process in small group discussions accompanying the first quarter of study in the Elementary Teacher Education Program. Field experience during the quarter in supervised school placements. Credit/no credit only. Prerequisite: elementary TEP student.

EDTEP 502 Second Quarter Field Experience — Elementary (3) Field experience and use of reflective process in small group discussions accompanying the second quarter of study in the Elementary Teacher Education Program. Field experiences during the quarter in supervised school placements. Credit/no credit only. Prerequisite: elementary TEP student.

EDTEP 503 Third Quarter Field Experience — Elementary (4) Field experience and use of reflective process in small group discussions accompanying third quarter of study in Elementary Teacher Education Program. Observe school-year opening full-time in late August through September; field experiences during the quarter in supervised school placements. Credit/no credit only. Prerequisite: elementary TEP student.

EDTEP 505 Portfolio: Tool for Reflection — Elementary (2) Group discussions fostering integration of course work and field experience through reflection. Using program goals and targets, students illustrate their learning through multiple forms of evidence. Final portfolio is presented to an audience; field experiences may be arranged. Credit/no credit only. Prerequisite: elementary TEP student.

EDTEP 511 School and Society (3) Exploration of issues regarding schooling and society, such as matters of value and value tension in American schools. Consideration of social values such as equality, opportunity, pluralism, and community; historical and contemporary evidence of values in schooling; and how values can conflict in policy and practice. Prerequisite: elementary TEP student.

EDTEP 521 Teaching and Learning in Numeracy I (3) Focus on mathematics from the perspective of the learner and on the meaning of understanding a mathematics concept. Examination of cultural aspects of the development of these concepts. Prerequisite: elementary TEP student.

EDTEP 522 Teaching and Learning in Numeracy II (3) Focus on pedagogy of mathematics. In conjunction with field experience, students extend understanding of mathematics and successfully integrate mathematics as a tool for learning science and art. Prerequisite: elementary TEP student.
EDTEP 523 Teaching and Learning in Science (3) Science teaching in a manner consistent with how young children learn science concepts and skills. Opportunities are provided for work on science activities similar to those used with elementary school children and to experience many of the problems and successes of preschool teachers. Prerequisite: elementary TEP student.

EDTEP 531 Teaching and Learning in Literacy (3) Investigation of the multiple nature of literacy development. Students study the impact of culture and family on literacy development by reading and discussing a variety of texts while also experiencing the development of their own learning through literature study, the writing process, and oral presentations. Prerequisite: elementary TEP student.

EDTEP 532 Teaching and Learning in Literacy II (3) Introduces participants to the content and process of literacy learning in elementary school. Study of abilities needed for effective literacy use, instructional strategies to help children acquire these abilities, and assessment strategies to evaluate student progress. Prerequisite: elementary TEP student.

EDTEP 533 Teaching and Learning in Literacy III (3) Introduces participants to the content and process of literacy learning in elementary school. Study of abilities needed for effective literacy use, instructional strategies to help children acquire these abilities, and assessment strategies to evaluate student progress. Prerequisite: elementary TEP student.

EDTEP 541 Dilemmas of Teaching and Learning in Elementary School (4) Covers human learning in the elementary school setting with emphasis on discipline-specific cognition and cognitive development. Prerequisite: elementary TEP student.

EDTEP 542 Meeting the Needs of All Students-Elementary (3) Overview of physical, cognitive, and social development of elementary school age children. Discussion of ways in which differences in development may affect children in school. Provides elementary teachers with understanding of how to facilitate the success of all children in general education classrooms. Prerequisite: elementary TEP student.

EDTEP 543 Teaching and Learning in Social Studies (3) Introduction to objectives, content, and teaching strategies of social studies and the arts as taught in elementary school.

EDTEP 551 Multicultural Teaching (3) Concepts, theories, and strategies that constitute major dimensions of multicultural education. Focus on racial and ethnic groups, social class, and gender. Dimensions of multicultural education examined include content integration, knowledge construction process, prejudice reduction, equity pedagogy, and empowering school culture and social structure. Prerequisite: TEP student.

EDTEP 552 Assessment in Elementary Education (3) Emphasis on methods of assessment that reinforce understanding of the various disciplines. Includes performance assessments, assessments of student projects and papers, traditional exams, and observational exams. Prerequisite: elementary TEP student.

EDTEP 561 Dilemmas of Teaching and Learning (5) Study of human learning in an educational setting, with an emphasis on learning of school subjects. Topics include nature of human learning, knowledge and teaching, motivation, culture, and cognition. Prerequisite: secondary TEP student.

EDTEP 562 Adolescent Development and Education I (3-3) Overview of trends and issues of adolescent development and behavior in relation to contemporary secondary schooling. Psychological perspectives on adolescent identity, interpersonal relationships, academic engagement, and social deviancy in schools examined with special attention to classroom management and accommodating differences. Prerequisite: secondary TEP student.

EDTEP 563 Adolescent Development and Education II (3-3) Overview of trends and issues of adolescent development and behavior in relation to contemporary secondary schooling. Psychological perspectives on adolescent identity, interpersonal relationships, academic engagement, and social deviancy in schools examined with special attention to classroom management and accommodating differences. Prerequisite: secondary TEP student.

EDTEP 564 Working in Secondary Schools (3) Organizational, personal, and interpersonal aspects of working as a teacher in a secondary school. Preparation for membership and leadership in a learning community and for continuing professional growth. Credit/no credit only. Prerequisite: secondary TEP student.

EDTEP 565 Planning and Teaching an Integrated Curriculum (3) Introduction of models for integrating curriculum, congruent instructional and assessment strategies, and team planning skills. Provides direct and experiential learning activities and results in production of team-planned curricular units based on two different models of curriculum integration. Prerequisite: secondary TEP student.

EDTEP 571 Topics and Tensions in School and Society (3) Exploration of issues of value and value tension in American schools. Consideration of social values of equality, opportunity, pluralism, and community, historical and contemporary evidence of values in schooling, and how values can conflict in policy and practice. Prerequisite: secondary TEP student.

EDTEP 573 Assessment in Secondary Education (3) Strong emphasis on methods of assessment that reinforce understanding of the various disciplines, including performance assessments, assessments of student projects and papers, traditional exams, and observational exams. Prerequisite: secondary TEP student.

EDTEP 580 Teaching English and Language Arts in Secondary School I (5-7) Teaching of English and Language Arts in middle, junior, or senior high school. Prerequisite: secondary TEP student.

EDTEP 581 Teaching English and Language Arts in Secondary School II (3-3) Teaching of English and Language Arts in middle, junior, or senior high school. Prerequisite: secondary TEP student.

EDTEP 582 Teaching Mathematics in the Secondary School I (5-7) Teaching of mathematics in middle, junior, or senior high school. Prerequisite: secondary TEP student.

EDTEP 583 Teaching Mathematics in the Secondary School II (3) Teaching of mathematics in middle, junior, or senior high school. Prerequisite: secondary TEP student.

EDTEP 584 Teaching Social Studies in the Secondary School I (5-7) Developing, teaching, and evaluating social studies courses on the middle, junior, and senior high school levels. Prerequisite: secondary TEP student.

EDTEP 585 Teaching Social Studies in the Secondary School II (3) Developing, teaching, and evaluating social studies courses on the middle, junior, and senior high school levels. Prerequisite: secondary TEP student.

EDTEP 586 Teaching Science in the Secondary School I (5-7) Teaching of science in middle, junior, or senior high school. Prerequisite: secondary TEP student.

EDTEP 587 Teaching Science in the Secondary School I (3-3) Teaching of science in middle, junior, or senior high school. Prerequisite: secondary TEP student.

EDTEP 588 Teaching World Languages I (5-7) Introduction to currently used foreign language teaching methods and approaches, including learning and teaching strategies and techniques for the four skills — reading, writing, speaking, listening — and culture. Current and future trends in pedagogy and technology. Prerequisite: secondary TEP student.

EDTEP 589 Teaching World Languages II (3-3) Introduction to currently used foreign language teaching methods and approaches, including learning and teaching strategies and techniques for the four skills — reading, writing, speaking, listening — and culture. Current and future trends in pedagogy and technology. Prerequisite: secondary TEP student.

EDTEP 591 First Quarter Field Experience — Secondary (3) Field experience and small group discussions accompanying the first quarter of study in the Secondary Teacher Education Program. Observe school year opening full-time for approximately one month in August and September and two weeks full-time during the quarter in supervised school placements. Credit/no credit only. Prerequisite: secondary TEP student.

EDTEP 592 Second Quarter Field Experience — Secondary (3) Field experience and small group discussions accompanying the second quarter of study in the Secondary Teacher Education Program. Observe school year opening full-time for approximately one month in August and September and two weeks full-time during the quarter in supervised school placements. Credit/no credit only. Prerequisite: secondary TEP student.

EDTEP 593 Third Quarter Field Experience — Secondary (3) Field experience and small group discussions accompanying third quarter of study in Secondary Teacher Education Program. Four weeks full-time during the quarter in supervised school placements. Credit/no credit only. Prerequisite: secondary TEP student.

EDTEP 595 Portfolio: Tool for Reflection — Secondary (3) Group discussions fostering integration of course work and field experience through reflection. Using program goals and targets, students illustrate their learning through multiple forms of evidence. Final portfolio is presented to an audience. Related field experience may be arranged. Credit/no credit only. Prerequisite: secondary TEP student.
Aeronautics and Astronautics

A A 101 Air and Space Vehicles (5) NW
Introduction to aircraft and spacecraft; how airplanes fly, how airplanes and rockets are made, how they are controlled, and how space missions are designed. Laboratory and computer simulations used as illustrations. Emphasis on conceptual, rather than mathematical, comprehension. Not recommended for upper-division students in physical sciences and engineering. Offered: AWSp.

A A 210 Engineering Statics (4) NW
Vector analysis applied to equilibrium of rigid body systems and subsystems. Force and moment resultants, free body diagrams, internal forces, and friction. Analysis of basic structural and mechanical components. Prerequisites: either MATH 126, MATH 129, or MATH 138; PHYS 121; recommended: graphics background. Offered: A/WSp.

A A 280 Introduction to System Engineering (4) Concepts of system approach, system hierarchies, functional analysis, requirements, trade studies, and other concepts used to define and integrate complex engineering systems. Prerequisite: CSE 142. Offered: jointly with IND E 280.

A A 301 Compressible Aerodynamics (4)
Aerodynamics as applied to the problems of performance of flight vehicles in the atmosphere. Kinematics and dynamics of flow fields. Thin airfoil theory; finite wing theory. Compressible fluids; one-dimensional compressible flow; two-dimensional supersonic flow. Prerequisite: CHEM E 260. Offered: W.

A A 302 Incompressible Aerodynamics (4)
Aerodynamics as applied to the problems of performance of flight vehicles in the atmosphere. Kinematics and dynamics of flow fields; incompressible flow about bodies. Thin airfoil theory; finite wing theory. Prerequisite: PHYS 123; either AMATH 351, MATH 136, or MATH 307. Offered: Sp.

A A 310 Orbital and Space Flight Mechanics (4)

A A 311 Atmospheric Flight Mechanics (4)
Applied Aerodynamics, aircraft flight “envelope,” minimum and maximum speeds, climb and glide performance. Range and endurance, take-off and landing performance, using both jet and propeller power plants. Longitudinal and dynamic stability and control, wing downwash, stabilizer and elevator effectiveness, power effects. Lateral and directional stability and control. Offered: A.

A A 312 Structural Vibrations (4)

A A 320 Aerospace Instrumentation (3) Hands-on laboratory experience in aerospace instrumentation. Students build sensors, power supplies, and circuits. Application of signal conditioning to wind tunnel data. Digital systems, A/D conversion, D/A conversion, and actuator control. Introduction to instrumentation requirements for space vehicles. Offered: A.

A A 321 Aerospace Laboratory I (3) The design and conduct of experimental inquiry in the field of aeronautics and astronautics. Laboratory experiments on supersonic flow, structures, vibrations, material properties, and other topics. Theory, calibration, and use of instruments, measurement techniques, analysis of data, report writing. Offered: W.

A A 322 Aerospace Laboratory II (3) The design and conduct of experimental inquiry in the field of aeronautics and astronautics. Laboratory experiments on subsonic aerodynamics, supersonic flow, structures, propulsion, and other topics. Theory, calibration, and use of instruments, measurement techniques, analysis of data, report writing. Offered: Sp.

A A 331 Aerospace Structures I (4) Analysis and design of aerospace structures. Review of concepts of stress, deformation, strain, and displacement and of the equations of elasticity. Applications to aerospace structural elements, including beams, torsion, plane stress and strain, thin walled structures, plates, buckling: energy principles; introduction to finite element analysis. Fatigue, yielding, and fracture. Prerequisite: CEE 220. Offered: W.

A A 332 Aerospace Structures II (4) Analysis and design of aerospace structures. Review of concepts of stress, deformation, strain, and displacement and of the equations of elasticity. Applications to aerospace structural elements, including beams, torsion, plane stress and strain, thin walled structures, plates, buckling: energy principles; introduction to finite element analysis. Fatigue, yielding, and fracture. Prerequisite: A A 331. Offered: Sp.

A A 400 Gas Dynamics (3) Introduction to kinetic theory and free molecule flow. Review of thermodynamics. One-dimensional gas dynamics: one-dimensional wave motion, combustion waves. Ideal and real gas application. Prerequisite: PHYS 123; CHEM E 260. Offered: W.

A A 405 Introduction to Aerospace Plasmas (3) Development of introductory electromagnetic theory including Lorentz force and Maxwell’s equations. Plasma description. Single particle motions and drifts in magnetic and electric fields. Derivation of plasma fluid model. Introduction to plasma waves. Applications to electric propulsion, magnetic confinement, and plasmas in space and Earth’s outer atmosphere. Prerequisite: PHYS 123; MATH 324. Offered: A.

A A 410 Aircraft Design I (4) Conceptual design of a modern airplane to satisfy a given set of requirements. Estimation of size, selection of configuration, weight and balance, and performance. Satisfaction of stability, control, and handling qualities requirements. Offered: W.

A A 419 Aerospace Heat Transfer (3) Fundamentals of conductive, convective, and radiative heat transfer with emphasis on applications to aerospace and space flight. Prerequisite: PHYS 123; MATH 307. Offered: W.

A A 421 Spacecraft and Space System Design II (-4) A continuation of 420. Course content varies from year to year and is dependent on the design topic chosen for 420. Prerequisite: A A 420. Offered: Sp.

A A 430 Finite Element Structural Analysis (3) Introduction to the finite element method and application. One-, two-, and three-dimensional problems including trusses, beams, box beams,
A 447 Control in Aerospace Systems (4)

A 449 Design of Automatic Control Systems (4) Design problems for aerospace vehicles, systems with unstable dynamics, lightly damped modes, nonminimum phase, nonlinear dynamics. Computer-aided analysis, design, and simulation, with laboratory hardware-in-the-loop testing. Team design reviews, oral presentations. Prerequisite: either A A 448 or E E 448. Offered: jointly with E E 449.

A 462 Rocket Propulsion (3) Physical and performance characteristics of rocket propulsion devices. Mission requirements, chemical rockets, arcjets, electrostatic and electromagnetic thruster.

A 480 Systems Dynamics (3) Equations of motion and solutions for selected dynamic problems; natural frequencies and mode shapes; response of simple systems to applied loads. Prerequisite: A A 312. Offered: Sp.

A 498 Special Topics in Aeronautics and Astronautics (0-1, max. 10) Lectures and discussions on topics of current interest in aviation and space engineering.

A 499 Undergraduate Research (1-5, max. 10) Research on special topics under the supervision of a faculty member. Application of fundamentals learned in the classroom to real problems in research. A maximum of 6 credits may be applied toward senior technical electives. Offered: AW/S.

A 501 Physical Gasdynamics I (3) Equilibrium kinetic theory; chemical thermodynamics; thermodynamic properties derived from quantum statistical mechanics; reacting gas mixtures; applications to real gas flows and gas dynamics. Offered: odd years; A.

A 502 Physical Gasdynamics II (3) Introduction to vibrational relaxation and nonequilibrium chemistry. Nonequilibrium physics applied to flow. Brief introduction to nonequilibrium kinetics. Application to a variety of research and development areas such as high-temperature energy systems and gas lasers. Prerequisite: A A 501 or permission of instructor. Offered: even years; W.

A 503 Kinetic Theory/Radiative Transfer (3) Boltzmann and Collisionless Boltzmann (Vlasov) equations. Instabilities in homogeneous and inhomogeneous gasdynamics. Linear diffusion, wave-particle interaction, collisional (Fokker-Planck) equation. Introduction to radiative non-equilibrium, scattering and absorption processes. Integral equation of radiative transfer. Prerequisite: A A 501 or permission of instructor. Offered: even years; Sp.

A 505 Fluid Mechanics of Inviscid Flow I (3) Ideal incompressible flow; potential and stream functions. Airfoil theory and lifting line theory. Introduction to nonsteady flow; sound waves and surface waves; special topics. Offered: even years; W.

A 506 Fluid Mechanics of Inviscid Flow II (3) Ideal compressible flow; supersonic airfoils; shock waves; slender-body theory; lifting surface theory; approximate methods. Transonic flow; similarity; special topics. Prerequisite: A A 505. Offered: even years; Sp.

A 507 Aerodynamics of Viscous Fluids I (3) Introduction to viscous flow; exact solutions of the laminar equations of motion; approximate equations. Exact solutions for laminar boundary-layer equations. Approximate methods for compressible laminar boundary layers. Offered: odd years; W.

A 508 Aerodynamics of Viscous Fluids II (3) The phenomena of turbulence; transition prediction; Reynolds stresses; turbulent boundary-layer equations. Approximate methods for turbulent boundary layers. Prerequisite: A A 507 or permission of instructor. Offered: odd years; Sp.

A 510 Mathematical Foundations of Systems Theory (4) Mathematical foundations for system theory presented from an engineering viewpoint. Includes set theory; functions, inverse functions; metric spaces; finite dimensional linear spaces; linear operators on finite dimensional spaces; projections on Hilbert spaces. Applications to engineering systems stressed. Prerequisite: graduate standing or permission of instructor. Offered: jointly with CHEM E 510/E E 510/M E 510; A.

A 513 Gas Laser Theory and Practice (3) Physics and fluid mechanics of gas lasers, with emphasis on performance of gas dynamic lasers, flowing chemical lasers, and gaseous electric lasers. Development of laser optics, interaction of radiation and matter, laser oscillation conditions, and methods of obtaining population inversions. Applications of high-power lasers emphasized. Offered: even years; Sp.

A 518 Automatic Control of Flight Vehicles (3) Specifications of flight vehicle performance. Synthesis of stability augmentation systems and autopilot control laws in the frequency-domain and using multivariable control methods. Reduced-order controller synthesis, digital design, and implementation. Use of computer-aided control design packages. Prerequisite: A A 516 and A A 548. Offered: odd years; Sp.

A 520 Seminar (1-, max. 10) Topics of current interest in aerospace engineering. Credit/no credit only. Prerequisite: A A major. Offered: AW/S.

A 523 Special Topics in Fluid Dynamics (3) Offered: AW/S.

A 525 Aerothermodynamics of Aircraft Engines Components (3) Estimation of component performances. Inlets and nozzles. Aerodynamics of turbines and compressors. Radial equilibrium theory, through-flow theory. Offered: even years; W.

A 527 Energy Conversion I (3) Energy resources. Heat generation by combustion, solar collection. Analysis of power systems for space and advanced commercial power generation. High-temperature cycles. Offered: even years; A.

A 528 Energy Conversion II (3) Heat exchangers, energy storage. Direct conversion of heat to electricity. Electrochemical processes. Recommended: A A 527. Offered: odd years; W.

A 529 Space Propulsion (3) Nucleonics, and heat transfer of nuclear-heated rockets. Electrothermal, electromagnetic, and electrostatic thrusters. Power/propulsion systems. Prerequisite: permission. Offered: odd years; Sp.

A 531 Structural Reliability and Damage (3) Theory of plasticity, yield surfaces, flow rules,
limit theorems. Concepts of failure and fatigue in aerospace structures, residual strength, cumulative damage, probability aspects and case histories. Prerequisite: A A 530 or equivalent or permission of instructor. Offered: odd years; W.

A A 532 Mechanics of Composite Materials (3) Analyses and design of composite materials for aerospace structures. Micromechanics. Anisotropic elasticity. Laminated plate theory. Thermo-viscoelastic behavior and fracture of composites. Prerequisite: A A 530 or permission of instructor. Offered: odd years; Sp.

A A 535 Analysis of Shells I (3) General development of the geometrically non-linear theory of thin elastic shells. Topics include an introduction to tensor analysis with applications to curved two dimensional spaces, theory of surfaces, Kirchhoff approximations, membrane theory and non-linear shallow shells. Offered: even years; Sp.

A A 540 Finite Element Analysis I (3) Formulation of the finite element method using variational and weighted residual methods. Element types and interpolation functions. Application to elasticity problems, thermal conduction, and other problems of engineering and physics. Offered: W.

A A 544 Computational Fluid Dynamics II (3) Numerical approximation of equations of compressible viscous flow. Mesh requirements for resolving viscous effects in high Reynolds number flows. Analysis of numerical accuracy, stability, and efficiency. Use of explicit and implicit methods, boundary condition procedures. Applications to solution of the Navier-Stokes equations. Prerequisite: A A 543 or permission of instructor. Offered: odd years; Sp.

A A 546 Advanced Topics in Control System Theory (3) Topics of current interest for advanced graduate students with adequate preparation in linear and nonlinear system theory. Prerequisite: permission of instructor. Offered: when adequate enrollment develops prior to close of advance registration.

A A 547 Linear Systems Theory (4) Linearity, linearization, finite dimensionality, time-varying vs. time-invariant linear systems, interconnection of linear systems, functional/structural descriptions of linear systems, system zeros and invertibility, linear system stability, system norms, state transition, matrix exponents, controllability and observability, realization theory. Prerequisite: either A A 447, E E 447 or M E 471. Offered: jointly with E E 547/M E 547; A.

A A 548 Linear Multivariable Control (3) Introduction to MIMO systems, successive single loop design comparison, Lyapunov stability theorem, full state feedback controller design, observer design, LQR, LQG, LQG/LTR statement, design, stability analysis, and tracking design. LQG design, separation principle, stability robustness. Prerequisite: A A 547/E E 547/M E 547. Offered: jointly with M E 548/E E 548.

A A 550 Nonlinear Optimal Control (3) Calculus of variations for dynamical systems, definition of the dynamic optimization problem, constraints and Lagrange multipliers, the Pontryagin Maximum Principle, necessary conditions for optimality, the Hamilton-Jacobi-Bellman equation, singular arcs, and numerical techniques for solution of the necessary conditions. Prerequisite: graduate standing; recommended: A A 548, E E 548, or M E 548. Offered: jointly with E E 550/M E 550; odd years; A.

A A 553 Vibrations of Aerospace Systems (3) Continuous and discrete systems, natural frequencies, and modal analysis; forced vibrations and motion-dependent forces. Structural damping; control augmented structures. Measurements for structural dynamic testing. Prerequisite: A A 571 or equivalent. Offered: odd years; Sp.

A A 554 Aeroelasticity (3) Static and dynamic aeroelasticity, unsteady aerodynamics, aeroelastic modeling, and active control. Offered: even years; Sp.

A A 556 Space and Laboratory Plasma Physics (3) Discussion of waves, equilibrium and stability, diffusion and resistivity, basic plasma kinetic theory, and wave-particle interactions. Recommended: A A 405, E E 515, or PHYS 505, or permission of instructor. Offered: jointly with E E 576; Sp.

A A 557 Physics of Fusion Plasmas (3) Review and comparison of single particle and fluid descriptions of plasmas. MDH equilibrium, flux surfaces, and basic toroidal description. Collisional processes including physical and velocity space diffusion. Introduction to island formation, stochasticity, and various plasma instabilities. Prerequisite: A A 405 or PHYS 505. Offered: even years; W.

A A 558 Plasma Theory (3) Equilibrium, stability, and confinement. Classical transport, collisionless and resistive skin depths. Ideal MHD equations formally derived and properties of plasmas in the ideal limit are studied. Straight and toroidal equilibrium. Linear stability analysis with examples. Taylor minimum energy principle. Prerequisite: either A A 405, A A 556, A A 557, E E 576, or PHYS 537. Offered: even years; Sp.

A A 559 Plasma Science Seminar (1, max. 10) Current topics in plasma science and controlled fusion with presentations by invited speakers, on-campus speakers, and students. Students are expected to give a seminar once or twice a year with instructor reviewing the method of presentation and material used for the presentation. Credit/no credit only. Offered: A/WSp.

A A 565 Fusion Reactor Fundamentals (3) Introduction to basic engineering features of fusion power plants. Brief description of basic fusion physics and discussion of power plants for leading thermonuclear concepts. Engineering problems; blanket, shield neutronics; materials, thermal hydraulics; tritium, superconducting systems. Prerequisite: completion of or concurrent enrollment in A A 405 or permission of instructor. Offered: odd years; W.

A A 575 Continuum Mechanics (3) General foundations of the fundamental concepts of motion, stress, energy, and electromagnetism for a continuum. General equations of conservation of mass, momentum, and energy. Linear and nonlinear elastic, viscous, and inelastic materials. Offered: jointly with CEE 505; even years; W.

A A 578 Optimization in System Sciences (3) Mesbahi Covers convex sets, separation theorems, theorem of alternatives and their applications, convex analysis, convex functions, conjugation, subgradients, convex optimization, duality and applications, linear and semi-definite programming. Linear matrix inequalities, optimization algorithms, applications in system theory and control, bilinear, rank minimization, optimization software. Recommended: A A 547/E E 547/M E 547. Offered: jointly with E E 578/M E 578; W.

A A 589 Special Topics in Solid Mechanics (3) Offered: AWSp.

A A 591 Robotics and Control Systems Colloquium (1, max. 3) Colloquium on current topics in robotics and control systems analysis and design. Topics presented by invited speakers as well as on-campus speakers. Emphasis on the cross-disciplinary nature of robotics and control systems. Credit/no credit only. Offered: jointly with CHEM E/E/ENVR 591; AWSp.

A A 593 Feedforward Control (3) Devasia Design feedforward controllers for precision output tracking; inversion-based control of non-minimum-phase systems; effect of plant uncertainty on feedforward control; design of feedforward controllers for applications such as vertical take off and landing aircraft, flexible structures and piezo-actuators. Prerequisite: A A 547/E 547/M E 547. Offered: jointly with E E/ M E 593.

A A 594 Robust Control (3) Basic foundations of linear analysis and control theory, model realization and reduction, balanced realization and truncation, stabilization problem, coprime factorizations, Youla parameterization, matrix inequalities, H-infinity and H2 control, KYP lemma, uncertain systems, robust H2, integral quadratic constraints, linear parameter varying synthesis, applications of robust control. Offered: jointly with E E 594/M E 594; odd years; Sp.

A A 599 Special Projects (1-5, max. 15) Investigation on a special project by the student under the supervision of a faculty member. Offered: AWSpS.

A A 600 Independent Study or Research (*) Offered: AWSpS.

A A 700 Master’s Thesis (*) Offered: AWSpS.

A A 800 Doctoral Dissertation (*) Offered: AWSpS.

Chemical Engineering

CHEM E 260 Thermodynamics (4) NW Introduction to the basic principles of thermodynamics from a macroscopic point of view. Emphasis on the First and Second Laws and the State Principle, problem solving methodology. Prerequisite: either CHEM 140, CHEM 142, or CHEM 145; either MATH 126, MATH 129, or MATH 136; PHYS 121. Offered: AWSpS.

CHEM E 309 Creativity and Innovation (2) VLPA Allan Understanding creativity and creative thinking; its challenges and dynamics through knowledge, judgment, planning, and observation. Techniques of creative thinking. Design and development of creative games. Computer-aided creative thinking. Creation, protection, and exploitation on feedforward and feedback, including bargaining and negotiations. Offered: jointly with PSE 309; Sp.

CHEM E 310 Material and Energy Balances (4) Chemical and physical process calculations: steady- and unsteady-state material and energy balances with specific examples in vapor-liquid contact operations and multiphase extraction, and introductory thermochemistry. Prerequisite: either CHEM E 260 or ENGR 260 with either ENGR 142 or CSE 142. Offered: A.

CHEM E 326 Chemical Engineering Thermodynamics (4) Phase equilibria and chemical equilibria in multicomponent systems; theories of solution; chemical reaction analysis. Prerequisite: CHEM E 310 with either CHEM E 260 or CHEM 456. Offered: W.

CHEM E 341 Energy and Environment (3) NW Malte Energy use. Fossil energy conversion. Oil, gas, coal resources. Air impacts. Nuclear energy principles, reactors, fuel cycle. Prerequisite: either MATH 112, MATH 124, or Q SCI 291; either CHEM 120, CHEM 142, PHYS 114, or PHYS 121. Offered: jointly with ENVR 341/M E 341; A.

CHEM E 442 Renewable Energy (4) NW Malte Introduction to renewable energy. Principles and practices: solar, wind, water, and biomass energy conversion. Prerequisite: either MATH 112, MATH 124, or Q SCI 291; either CHEM 120, CHEM 142, PHYS 115, or PHYS 122. Offered: jointly with M E 442/ENVR 442; W.

CHEM E 345 Introduction to Fuel Cells (3) Adler, Schwartz, Stowe Overview of fuel cells, fuel cell efficiency, types of fuel cells, applications of fuel cells, and fuel cells. Intended for students in science and engineering and fuel cell professionals desiring a technical knowledge of fuel cells. No credit available, if already given for CHEM E 445. Prerequisite: CHEM 162; PHYS 122; recommended CHEM E 260. Offered: A.

CHEM E 355 Biological Frameworks for Engineers (3) For engineers with no prior experience in biological sciences. Hands-on, project-based course covers fundamental concepts and language of biology, from an engineering perspective. Topics include functions of life, information processing, proteins, DNA, genetic variability, control loops, energetics, tissues, organisms, ecosystems. Prerequisite: CHEM 142; PHYS 123; MATH 307; recommended: CHEM 220. Offered: A.

CHEM E 375 Chemical Engineering Computer Skills (2) Flnayson Use Excel, Matlab, and AspenPlus to solve typical chemical engineering problems. Solve realistic problems and explore alternatives through the use of computer models. Application of fundamentals in examining polmers, metals and ceramics as used in the electronics and aviation industries. Prerequisite: CHEM E 340; CHEM E 465. Offered: W.

CHEM E 455 Surface and Colloid Science Laboratory I/3, max. 3 Berg Laboratory techniques, equipment, and underlying fundamentals in surface and colloid science. Experiments in the measurement of surface tension, adsorption, wetting and spreading, colloid properties, emulsion preparation and stability, electrophoresis, and interfacial hydrodynamics. Recommended: CHEM E 326; CHEM E 330; CHEM 461. Offered: Sp.

CHEM E 458 Surface Analysis (3) Understanding of solid surfaces for research and development in microelectronics, catalysis, biomaterials science, wear, and corrosion science. Newer methods available to study surfaces of materials. Electron emission spectrometers (ESCA, Auger); ion scattering, ion spectroscopic, photon spectroscopic, and thermodynamic methods. Offered: jointly with BIOEN 492; W.

CHEM E 461 Electrochemical Engineering (3) Schwartz Explores role of thermodynamics, charge transfer kinetics, and mass transfer on behavior of electrochemical systems. Includes cell thermodynamics, faradaic and non-faradaic rate processes, ionic transport, nucleation and growth theories. Applications to chemical sensors, batteries, corrosion, thin film deposition. In-class demonstrations to illustrate concepts. Offered: W.

CHEM E 462 Application of Chemical Engineering Principles to Environmental Problems (3) Environmental problems in chemical engineering. Team taught; topics vary from year to year. Includes: geo-media, flow and dispersion through porous media water flow in dry soils, chemistry of radioactive waste, in situ site cleanup, ex situ site cleanup, colloid and surface science. Prerequisite: CHEM E 330. Offered: Sp.

CHEM E 465 Reactor Design (4) Application of principles of chemical kinetics to the design of
commercial-scale chemical reactors; characterization of batch and flow reactors in homogeneous and heterogeneous systems. Prerequisite: CHEM E 326; CHEM E 340. Offered: A.

CHEM E 467 Biochemical Engineering (3) Baneyx Application of basic chemical engineering principles to biochemical and biological processes such as fermentation, enzyme technology, and biological waste treatment. Rapid overview of relevant microbiology, biochemistry, and molecular genetics. Design and analysis of biological reactors and product recovery operations. Prerequisite: CHEM E 340; either CHEM 223, CHEM 237, or CHEM 335; recommended: CHEM E 465. Offered: jointly with BIOEN 467; W.

CHEM E 468 Air-Pollution Control Equipment Design (3) Designs to control air pollutants from stationary sources. Procedures for calculating design and operating parameters. Fundamental mechanisms and processes of gaseous and particulate control equipment for absorption and adsorption of gaseous pollutants; electrostatic precipitators and filtration of particulate pollutants. Actual case studies. Offered: jointly with CEE 494/ME 468; W.

CHEM E 470 Chemistry of Wood (3) Chemical and physical properties of cellulose, lignin, hemicellulose, and extractives; wood as a raw material for the chemical industry. Prerequisite: either CHEM 220, CHEM 238, or CHEM 336. Offered: A.

CHEM E 471 Pulping and Bleaching Processes (3) Conversion of wood to mechanical and chemical pulps, Kraft, sulfite, and semichemical pulping processes. Chemical recovery systems. Bleaching of mechanical and chemical pulps. Offered: jointly with PSE 476; W.

CHEM E 473 Pulp and Paper Laboratory (2) Laboratory experiments in chemical and semichemical pulping of wood. Bleaching of chemical and high-yield pulps. Physical and chemical characteristics of pulp fibers. Prerequisite: PSE 476. Offered: jointly with PSE 478; Sp.

CHEM E 480 Process Dynamics and Control (4) Analysis of the dynamics of simple chemical process units and systems; applications to stability, control, and instrumentation of such processes. Weekly two-hour laboratory included. Majors only. Prerequisite: CHEM E 435; CHEM E 465. Offered: W.

CHEM E 481 Process Optimization (3) Concepts and techniques of optimizing chemical engineering processes and systems, including classical and direct methods of search, linear and nonlinear programming, dynamic programming, statistical experimental design, and evolutionary operation. Offered: Sp.

CHEM E 482 Advanced Topics in Process Control (3) Holt, Ricker Current topics in process control design and analysis. Possible topics include robust control, analysis and design, time delay compensation, modern frequency response techniques, discrete control, adaptive control, model-based control, and nonlinear control. Prerequisite: CHEM E 480.

CHEM E 484 Electronic and Optoelectronic Polymers (3) Janecke Covers the chemistry, physics, materials science, and engineering applications of semiconducting and metallic conjugated polymers. Examines the structural origins of the diverse electronic and optoelectronic properties of conjugated polymers. Exemplifies applications by light-emitting diodes, lasers, solar cells, thin film transistors, electrochromic devices, biosensors, and batteries. Prerequisite: either CHEM 237, CHEM 455, CHEM E 340, or MSE 310. Offered: A.

CHEM E 485 Process Design I (4) Applied economics in chemical engineering design and operations; market survey and plant location; introduction to plant and process design. Prerequisite: CHEM E 480 which may be taken concurrently. Offered: W.

CHEM E 486 Process Design II (5) Comprehensive design of a specific process, including economic feasibility studies, utilization of market survey and plant location studies, process equipment design and optimization, and overall plant integration and layout. Prerequisite: CHEM E 485. Offered: Sp.

CHEM E 490 Engineering Materials for Biomedical Applications (3) Hoffman Combined applications of the principles of physical chemistry, biochemistry, materials engineering, mass transfer, and fluid mechanics to biomedical problems. Case studies include considerations of the selection of materials, the design and operation of instruments, components of, or entire, artificial organs (heart, kidney, lung) and artificial structural elements (bone, teeth, skin), all for use in contact with body fluids. Offered: jointly with BIOEN 490; W.

CHEM E 491 Controlled Release Systems-Principles and Applications (3) Hoffman Mechanisms or controlled release of active agents and the development of useful systems for this purpose. Release mechanisms include diffusive, convective, or erosive driving forces. Applications to the biomedical, agricultural, forestry, and oceanography fields. Some special case studies covered in detail. Offered: jointly with BIOEN 491; every years; W.

CHEM E 497 Special Projects in Chemical Engineering Design (1-12) Chemical engineering design instruction and experience in special projects, such as industrially motivated, timely, or interdisciplinary projects. Project subject and content varies. Majors only. Prerequisite: CHEM E 340.

CHEM E 498 Special Topics in Chemical Engineering (1-12) Topics of current interest in the field. Subject matter changes from year to year.

CHEM E 499 Undergraduate Research (1-6) Hoffman, Horbett, Rather Presentation of student research results. Credit/no credit only. Prerequisite: permission of instructor. Offered: jointly with BIOEN 511; AWSp.

CHEM E 510 Mathematical Foundations of Systems Theory (4) Mathematical foundations for system theory presented from an engineering viewpoint. Basic principles of system behavior, functions, inverse functions; metric spaces; finite dimensional linear spaces; linear operators on finite dimensional spaces; projections on Hilbert spaces. Applications to engineering systems stressed. Prerequisite: graduate standing or permission of instructor. Offered: jointly with A A 510/E E 510/M E 510; A.

CHEM E 511 Biomaterials Seminar (1) Hoffman, Horbett, Rather Presentation of student research results. Credit/no credit only. Prerequisite: permission of instructor. Offered: jointly with BIOEN 511; AWSp.

CHEM E 512 Methods of Engineering Analysis (3) Applications of mathematics to problems in chemical engineering; vector calculus; properties and methods of solution of first and second order partial differential equations; similarity transforms, separation of variables, Laplace and Fourier transforms. Prerequisite: MATH 205, MATH 307 or AMATH 351, MATH 324 or permission of instructor. Offered: jointly with AMATH 512; A.

CHEM E 515 Experimental Methods in Chemical Engineering Research (3) Baneyx, Berg, Jiang Lecture and laboratory studies in current research methods of chemical engineering. Includes surface science, biochemical engineering, colloidal chemistry, light scattering, and nanoscience techniques.

CHEM E 523 Seminar in Chemical Engineering (1) Topics of current interest in chemical engineering. Credit/no credit only. Offered: AWSp.

CHEM E 525 Chemical Engineering Thermodynamics (4) Review of principles of thermodynamics. Applications to problems in multiphase and multicomponent systems; theories of solutions. Prerequisite: undergraduate thermodynamics. Offered: A.

CHEM E 526 Topics in Thermodynamics (3) Classical and molecular thermodynamics of phase equilibria, solution theory, thermodynamic stability, and critical phenomena. Prerequisite: CHEM E 525 or permission of instructor.

CHEM E 530 Momentum, Heat, and Mass Transfer II (3) Continuation of 530. Flows of fluid-particle systems; convective heat transfer, natural convection. Prerequisite: CHEM E 530. Offered: W.

CHEM E 554 Nanoscience Seminar I: Contact Mechanics and Rheology on the Nanoscale (3) Overview introductory nanoscience with emphasis on contact mechanics, principle and concept of forces, scanning force microscopy, tribology (friction, wear, lubrication), rheology, ultrathin organic films, physical properties of polymers, and computer simulation.

CHEM E 555 Interfacial Phenomena (4) Berg Surface tension, capillary statics, wetting and spreading phenomena; thermodynamics of capillary systems, adsorption, surfactant monolayers and micellar solutions; capillary hydrodynamics, interfacial turbulence and applications in distillation, absorption, and extraction. Prerequisite: CHEM E 525, CHEM E 530, or permission of instructor. Offered: every years.

CHEM E 556 Principles and Applications of Colloidal Materials (3/4) Berg, Hoffman Preparation, stabilization, properties, and destruction of important colloidal materials. The theory and structure of the electrical double layer,
electrokinetics. Includes selected case studies pertinent to air and water pollution, biological fluids, industrial processes. Offered: odd years.

CHEM E 557 Research in Interfacial and Colloid Science (1) BergWeekly research seminar and discussion of scientific literature pertaining to interfacial and colloid science. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSp.

CHEM E 558 Surface Analysis (3) RatnerUnderstanding of solid surfaces for research and development in microelectronics, catalysis, adhesion, biomaterials science, wear, and corrosion science. Newer methods available to study surfaces of materials. Electron emission spectroscopies (ESCA, Auger); ion scattering, ion spectroscopic, photon spectroscopic, and thermodynamic methods. Offered: jointly with BIOEN 592; W.

CHEM E 559 Thin Film Science, Engineering, and Technology (3) StuveThe physics, chemistry, and engineering aspects of thin film deposition. Vapor phase deposition emphasized. Topics include reactor types, vapor phase transport and hydrodynamics, surface and mass transport limited kinetics, nucleation and growth, homoeptaxy, heteroeptaxy, and thin film characterization. Prerequisite: permission of instructor. Offered: jointly with MSEE 559.

CHEM E 560 Reactions at Solid Surfaces (3) StuveFundamental studies of adsorption systems and reactions that occur at surfaces with application toward heterogeneous catalysis, electrochemistry, etching, and corrosion. Analysis of reaction promoters and promoters, acid-base theory of metal surfaces, jellium theory of metals, and water and ion adsorption, plus other topics of current interest. Recommended: CHEM E 558 or CHEM 560.

CHEM E 561 Electrons at Surfaces (3) StuveProperties of electrons at solid surfaces and their role in surface chemical reactions pertaining to electrochemistry, corrosion/etching, and catalysis. Topics include the jellium model of surfaces, surface electronic structure, work function, surface electric fields, reactions involving electrons, ions, and net charge transfer, and relationships between catalysis and electrochemistry.

CHEM E 564 Applications of Chemical Kinetics (3) Fast reactions and highly energetic reactions with applications to combustion, explosions, and lasers. Coupling of transport processes and reaction rate, photochemical kinetics, intermolecular energy transfer, free radical, and chain reaction kinetics. Rate parameters, flames, and biological systems.

CHEM E 565 Kinetics and Catalysis (3) Finlayson, Krieger, StuveHomogeneous and heterogeneous systems with emphasis on chemical engineering principles applied to industrial reactor design. Prerequisite: CHEM E 525. Offered: W.

CHEM E 566 Control of Gaseous Air Pollutants (3) Pilot Physical and chemical processes used to control gaseous air pollutants. Absorption into liquids. Aqueous spray dryer scrubbers. Adsorption beds. Control of sulfur oxide and nitrogen oxide. Case studies of control systems. Prerequisite: CHEM E 435 or CHEM E 468 or permission of instructor. Offered: jointly with CEE 558; even years; Sp.

CHEM E 567 Control of Particulate Air Pollutants (3) Pilot Processes used to control emissions of particulate air pollutants. Use of settling chambers, cyclones, fabric filters, wet scrubbers, and electrostatic precipitators to control aerosol particles. Case studies of particulate air pollution control systems. Prerequisite: CHEM E 468 or permission of instructor. Offered: jointly with CEE 559; odd years; A.

CHEM E 570 Chemistry of High Polymers (3, max. 6) AllanFundamentals of high polymer chemistry, including kinetics of addition and condensation polymerization, the determination of average molecular weight and chain length distributions, solution properties and the relationship between molecular structure and plastic film and fiber properties of various polymers. Prerequisite: an undergraduate course in organic chemistry. Offered: W.

CHEM E 571 Polymer Physics and Engineering (3) SeferisDescription and analysis of methods for processing polymeric materials. Introduction to solid polymer physics with emphasis on the coupling of structure morphology and properties. Development of structure-property models for quantitative description and control of properties in synthetic and natural polymers and composites materials. Offered: A.

CHEM E 572 Advanced Polymeric Composites (3) SeferisDesign, manufacture, and properties of organic and inorganic particle and fiber-reinforced polymers. Advanced techniques for characterization of processing and properties, including anisotropic elasticity/viscoelasticity theory, polymerization and network formation of matrices, theory of reinforcement, environmental and chemical effects. Prerequisite: CHEM E 571 or MSEE 423 or permission of instructor. Offered: Sp.

CHEM E 575 Nonlinear Analysis in Chemical Engineering (3) FinlaysonComparison of numerical techniques: similarity, perturbation, finite difference, Galerkin, orthogonal collocation methods as applied to nonlinear chemical engineering problems.

CHEM E 580 Topics in Chemical Engineering Design (3, max. 9) Lectures and seminars on current design methods in chemical engineering, including technical and economic feasibility of processes, design and optimization of process equipment, and environmental and social constraints. Prerequisite: undergraduate chemical engineering design, admission to chemical engineering non-thesis master’s program, or permission of instructor.

CHEM E 582 Advanced Topics in Process Control (3) Holt, RicherCurrent topics in process control design and analysis. Possible topics include robustness analysis and design, time delay compensation, modern frequency response techniques, discrete control, adaptive control, model-based control, and nonlinear control. Prerequisite: undergraduate control class and graduate standing.

CHEM E 584 Electronic and Optoelectronic Polymers (3) JenekheCovers the chemistry, physics, materials science, and applications of semiconducting and metallic conjugated polymers. Examines the structural origins of the diverse electronic and optoelectronic properties of conjugated polymers. Examples applications by light-emitting diodes, lasers, solar cells, thin film transistors, electrochromic devices, biosensors, and batteries. Prerequisite: either CHEM 237, CHEM 455, CHEM 540, or MSE 310. Offered: A.

CHEM E 588 Research in Applied Microbiology (1) ListstromWeekly research seminar and discussion of scientific literature pertaining to applied microbiology. Credit/no credit only. Prerequisite: permission of instructor. Offered: jointly with MICROM 588; AWSp.

CHEM E 590 Advanced Topics in Biomaterials (3) Major, controversial issues in application of synthetic materials to medical problems. Blood compatibility, bioadhesion, intraocular lenses, contact lenses, polyurethanes, biodegradation, protein adsorption, corrosion, bone fixation, new materials, artificial heart, medical device regulation. Prerequisite: CHEM E 490 or BIOEN 490. Offered: jointly with BIOEN 590; odd years; Sp.

CHEM E 591 Robotics and Control Systems Colloquium (1, max. 3) Colloquium on current topics in robotics and control systems analysis and design. Topics presented by invited speakers as well as on-campus speakers. Emphasis on the cross-disciplinary nature of robotics and control systems. Credit/no credit only. Offered: jointly with A/A/E E/M E 591; AWSp.

CHEM E 598 Effective Teaching of Chemical Engineering ([1/2]-, max. 3) FinlaysonTopics/activities include: curriculum development: outlining a course, comparing textbooks, preparing lectures, use of lectures versus quiz sections, microteaching, other modes of instruction, e.g., self-paced, use of design problems. Tests: creating and grading. Rule of computers, review of engineering software, diversity, international teaching assistants, sexual harassment, assessment of teaching, resume. Offered: WSp.

CHEM E 599 Current Topics in Chemical Engineering (1-3, max. 12) Readings or lectures and discussions of topics of current interest in the field of chemical engineering. Subject matter changes from year to year. Prerequisite: permission of instructor.

CHEM E 600 Independent Study or Research (*) Offered: AWSp.

CHEM E 700 Master’s Thesis (*) Offered: AWSp.

Civil and Environmental Engineering

CEE 220 Introduction to Mechanics of Materials (4) NWIntroduction to the concepts of stress, deformation, and strain in solid materials. Development of basic relationships between loads, stresses, and deflections of structural and machine elements such as rods, shafts, and beams. Load-carrying capacity of these elements under tension, compression, torsion, bending,
and shear forces. Prerequisite: A A 210. Offered: AW/SpS.

CxEE 306 Construction Engineering I (3) Introduction to construction engineering, planning, methods, contracts, and specifications. Scheduling manually and by using computer software. Production estimates; equipment selection; ownership and operating costs; role of the engineer in construction and cost estimating.

CxEE 320 Transportation Engineering I (3) Study of vehicular transportation fundamentals including geometric design, pavement design, traffic flow concepts, level of service analysis, intelligent transportation systems, travel demand prediction methods, and management of transportation systems. Includes a review of relevant vehicle operating characteristics.

CxEE 345 Hydraulic Engineering (4) Extension and application of fluid mechanics principles to hydraulic engineering problems. Open channel flow, pipeline systems, turbomachinery, unsteady flow in pipes, diffusion and mixing processes, groundwater, surface water hydrology. Prerequisite: CxEE 342. Offered: W.

CxEE 350 Environmental Engineering — Water and Air Quality (4) Description of water and air resources and parameters that characterize their quality, how their use alters their properties. Municipal and industrial systems and environmental systems. Global environment change. Basics of aquatic chemistry and microbiology applied to municipal water and wastewater treatment operations. Offered: Sp.

CxEE 363 Basic Soil Mechanics (4) General treatment of physical and mechanical properties and engineering behavior of metallic and nonmetallic materials. Steel, aluminum, asphalt concrete, Portland cement concrete, wood. Laboratory testing, instrumentation, and investigation into macrobehavior. Correlation with microstructure and various aspects of materials science.

CxEE 366 Basic Soil Mechanics (4) Introduction to basic soil properties, soil classification, volumetric relationships, compaction, consolidation, soil rheology, shear strength, bearing capacity, and lateral stresses against retaining structures. Prerequisite: CxEE 220. Offered: Sp.

CxEE 370 Elementary Structures I (4) Eberhard, Miller, Turkiyyah Fundamental analysis and modeling of civil structural systems (trusses, beams, and frames), including design applications. Linear equilibrium, kinematics, and constitutive relations; formal solution procedures emphasizing element-based stiffness methods; computer-based and manual techniques; verification and interpretation of results; case studies involving local structures.

CxEE 380 Elementary Structures II (4) MacRae, Roeder, Stanton Structural design concepts, approaches, procedures, and codes. Characterization and determination of leads (dead, live, seismic, wind, etc.) Structural systems and system behavior (load paths, lateral and vertical response, failure modes and limit states). Structural component behavior and design (composite action, inelastic bending, column stability, member capacities). Prerequisite: CxEE 379. Offered: Sp.

CxEE 390 Civil Engineering Systems (3) Introduction to civil engineering systems processes. Decision methods, economic considerations, and optimization. Examples illustrating quantitative and subjective aspects of civil engineering practice. Offered: A.

CxEE 391 Graphics Communication and Computer-Aided Design (3) Introduction to graphics communication and computer-aided design tools to manipulate drawings, data, and geometric representations in civil engineering applications.

CxEE 392 Basic Civil Engineering Computing (1) Introduction to computer-based methods in civil and environmental engineering problems using Matlab.

CxEE 404 Infrastructure Construction (4) Muench Basic concepts of large infrastructure construction projects including planning, scheduling, life-cycle cost analysis (LCGA), construction cost, logistics, productivity and, where applicable, traffic impacts. Uses current and prototype industry software and involves direct contact with agency and contractor personnel involved in infrastructure projects. Prerequisite: CxEE 306. Offered: Sp.

CxEE 405 Construction Planning and Scheduling (3) Principles of construction planning and scheduling, including network analysis of construction activities, examination of arrow and precedence diagrams, time-cost tradeoffs, resource leveling, and cost allocation. PERT, integrated cost/schedule systems, computer applications, and a CPM project.

CxEE 406 Construction Engineering II (3) Heavy construction equipment. Equipment economics, contractor equipment policies, equipment specifications, selection and performance of equipment, estimating productivity of construction equipment, and engineering support for construction planning. Prerequisite: CxEE 306.

CxEE 407 Contracts and Specifications (3) Construction industry, forms of organizations, real property laws, and bidding procedures. Basic elements of contracts, types of specifications, general conditions of standard construction contracts, legal disputes related to contract construction provisions, surety bonds and construction insurance. Prerequisite: CxEE 306.

CxEE 410 Traffic Engineering Fundamentals (3) General review of fundamentals of traffic engineering, including their relationship to transportation operations management and planning, with emphasis on calculations and procedures in the Highway Capacity Manual, field surveys and data analysis. Prerequisite: CxEE 320.

CxEE 412 Transportation Data Management (3) Introduction to modern concepts, theories, and tools for transportation data management and analysis. Applications of software tools for transportation data storage, information retrieval, knowledge discovery, data exchange, on-line information sharing, statistical analysis, system optimization, and decision support.

CxEE 416 Urban Transportation Planning and Design (3) Brief review of major issues in urban transportation planning. Planning process discussed and transportation models introduced. Uses a systems framework, including goals and objectives, evaluation, implementation, and monitoring. A design term project, individual or small groups, utilizes material presented on a contemporary problem. Prerequisite: CxEE 320. Offered: A.

CxEE 418 Computer-Aided Planning of Urban Systems (3) Survey of on-line planning applications; use of various on-line systems to solve urban systems design problems; investigations of hardware/software tradeoffs; human factors in man-computer systems design theory as it relates to problem-solving activity. Offered: jointly with URBDP 429.

CxEE 422 Construction Materials II (4) Types, sources, uses, performance behavior from construction point of view of aggregates; asphalt products and mixtures; Portland cement, concrete, and other materials the civil engineer is responsible for selecting and manufacturing on job site. Includes laboratory work. Prerequisite: CxEE 363. Offered: A.

CxEE 423 Heritage of Civil Engineering (3/4) I&S Contribution of civil engineering to civilization based on the lives and projects of prominent engineers and cultures. Incidents and individuals from prehistory to the nineteenth century give the student an awareness of the profession and its influence on society. Industrial archaeology and historic sites are considered. An additional 1 credit may be earned by participating in a special project. Emphasis on the control of elements and the methodology, planning, objectives, and reasons for the project. May be used as social science distribution. Offered: W.

CxEE 424 GIS for Civil Engineers (3) GIS in civil engineering applications. Geographic and spatial data types and acquiring considerations. Data models and structures. Projections and transformations. Attribute-based operations, spatial operations. Surfaces and near neighbors. Training on ArcGIS software. Recommended: CxEE 316.

CxEE 425 Reinforced Concrete Construction (3) Janssen Processes in constructing reinforced concrete structures. Identification and development of solutions to potential constructability problems. Lectures augmented with industry speakers and a field trip to a building under construction. Requires senior or graduate standing in Civil Engineering or Construction Management and familiarity with reinforced concrete design/construction.
CxEE 382 Lightweight Cementious Composites (2) Janssen Introduction to the process of designing with concrete and introductory experimental design. Importance of proper laboratory documentation. Examines the characteristics of cementious binders and elementary composite behavior. Considers constructability. Interprets pre- and post-cracking elastic behavior. Organization and production of technical report the documents worked performed. Offered: A.

CxEE 383 Seismology and Earthquake Engineering (3) NW Presents an overview of the characteristics of destructive ground motion; techniques of analysis of effects of such motion on engineering structures; reviews current practice in estimating earthquake hazards for important structures such as nuclear power plants. Prerequisite: either MATH 136 or both MATH 307 and MATH 308. Offered: jointly with ESS 465.

CxEE 384 Foundation Design (3) Design considerations for foundations and retaining structures: Subsurface investigations and determination of soil properties and engineering design. Design of shallow and deep foundations and retaining structures. Foundations and soil considerations for waterfront structures.

CxEE 385 Engineering Geology (3) General overview of engineering geology and its importance to civil engineers. Topics include geologic processes, hazards, oring and classification of geologic materials, data synthesis, and natural construction materials.

CxEE 386 Professional Practice Studio (2) Fundamentals of integrated civil engineering design, professional services marketing, project management, team dynamics, total quality management, value engineering, professional liability, and applied ethics in engineering practice. Emphasis on written and oral communications and on ethical, social, and economic factors.

CxEE 387 Transportation and Construction Capstone (4) Comprehensive design project focusing on planning, design and construction of transportation projects such as highways, transit, and airports. Prerequisite: CxEE 320; CxEE 440, which may be taken concurrently.

CxEE 388 Structural Geotechnical Design Project (4) Comprehensive team design project focusing on structural and geotechnical engineering. Requires design drawings, written reports, and oral presentations interfacing with related fields such as aesthetics and architecture, mechanical systems, traffic, environmental planning. Prerequisite: CxEE 440; two courses from CxEE 438, CxEE 451, CxEE 452, CxEE 453, CxEE 454, or CxEE 457.

CxEE 389 Design of Subsurface Remediation Activities (4) Technologies for cleaning sites with subsurface contamination, including groundwater extraction, vapor extraction, groundwater containment, and in-situ treatment. Analytical tools and methods for making design calculations are emphasized. Comprehensive design project involving design and evaluation of site remediation activities required. Prerequisite: CxEE 440.

CxEE 390 Water Resources and Hydraulic Engineering Design (4) Opportunity to effect design solutions for projects or major project components in such representative areas as reservoirs and associated systems for flood control, water supply, irrigation, and hydroelectric power, surface water control systems, fisheries related projects, small harbors, and coastal engineering problems. Prerequisite: CxEE 440.

CxEE 445 Environmental Engineering Design Project (4) Individual and group design studies addressing environmental engineering problems such as stormwater management, water and wastewater treatment facilities, and residual processing. Prepare proposals, engineering reports, and alternative evaluations; process equipment design, present reports on selected design problems. Prerequisite: CxEE 345; either CxEE 482 or CxEE 483; CxEE 440.

CxEE 451 Design of Metal Structures (3) Introduction to the design and behavior of metal structures using LRFD concepts. Application of design methods and codes to columns, beams, frames, connections, and tension members. Prerequisite: CxEE 380; recommended: CxEE 457, CxEE 458.

CxEE 452 Design of Reinforced Concrete Structures (3) Fundamentals of design of buildings in reinforced concrete in accordance with current codes and practices. Prerequisite: CxEE 380.

CxEE 453 Prestressed Concrete Design (3) Analysis, design, and construction of prestressed concrete structures.

CxEE 454 Design of Timber Structures (3) The design and construction of timber structures, using elements made of sawn wood, glued-laminated wood, and plywood. Prerequisite: CxEE 380.

CxEE 455 Structural Unit Masonry (3) Structural behavior and design of reinforced brick, tile, and unit concrete masonry structures. Prerequisite: CxEE 380. Offered: jointly with ARCH 426.

CxEE 456 Advanced Structures I (3) The displacement method in matrix form with programming applications. Fundamentals of modeling of various types of structures. Prerequisite: CxEE 380.

CxEE 457 Advanced Structures II (3) Introduction to stability, including a consideration of elastic and inelastic buckling with applications to beam-columns and plates. Introduction to plastic analysis. Prerequisite: CxEE 379.

CxEE 458 Advanced Structural Mechanics (3) Formulation and solution of the basic equations of elasticity. Applications in 2-D stress analysis, torsion, thermal stresses, and beams on elastic foundation. Plate theory optional. Prerequisite: CxEE 379.

CxEE 459 Advanced Structural Mechanics (3) Formulation and solution of the basic equations of elasticity. Applications in 2-D stress analysis, torsion, thermal stresses, and beams on elastic foundation. Plate theory optional. Prerequisite: CxEE 379.

CxEE 460 Biological Problems in Water Pollution (3/5) NW Ecological risk assessment of toxic chemicals and problems associated with electrical power production. Considers safety and toxicity and effects on individuals, populations, and communities. Laboratory covers simulation models of chemical exposure and community effects. Recommended: senior or graduate standing in fisheries, engineering, or related field. Offered: jointly with FISH 430.

CxEE 462 Water Quality and Pollutant Effects on Freshwater (3/5) NW Principles of aquatic ecology that relate to causes and effects of water quality problems in lakes and streams. Population growth kinetics, nutrient cycling, eutrophication; acidification, oxygen/temperature requirements, and effects of various wastes on aquatic animals.

CxEE 464 Subsurface Contaminant Transport (3) Principles of transport through porous media used to study fate and movement of subsurface contamination. Processes include aqueous phase transport, flow of immiscible fluids, vapor transport, solid-liquid-vapor interactions. Techniques for simulating transport processes presented. Effects of subsurface heterogeneities and uncertainties are emphasized. Prerequisite: CxEE 342.

CxEE 472 Introduction to Hydraulics in Water Resources (3) Principles related to environmental and social issues. Global hydrology; stratified flows; two-phase (bubble) flows; pollutant transport and mixing in reservoirs, lakes, coastal waters, and oceans; diffuser design and related case studies. Prerequisite: CxEE 342; CxEE 345.

CxEE 473 Coastal Engineering I (3) Linear theory of water waves, wave transformations due to boundary conditions, sediment motion, elementary tidal theory; applications illustrated by laboratory experiments and selected case histories. Prerequisite: CxEE 342.

CxEE 474 Hydraulics of Sediment Transport (3) Introduction to sediment transport in steady flows with emphasis on physical principles governing the motion of sediment particles. Topics include sediment characteristics, initiation of particle motion, particle suspension, bedforms, streambeded roughness analysis, sediment discharge formulae, and modeling of scour and deposition in rivers and channels. Prerequisite: CxEE 345.

CxEE 475 Analysis Techniques for Groundwater Flow (3) Development of appropriate equations to describe saturated groundwater flow, and application of numerical methods for solving groundwater flow problems and flow to wells. Participants required to solve specific problems using numerical techniques developed during the course. Prerequisite: CxEE 342.

CxEE 476 Physical Hydrology (3) Global water picture, data sources and data homogeneity, precipitation, evapotranspiration, hydrographs. Hydrologic data frequency analysis. Hydrologic design: flood mitigation, drainage. Introduction to deterministic and stochastic models.

CxEE 477 Open-Channel Engineering (3) Water flow in natural and constructed channels. Analysis and design of canals, transitions, energy dissipators, and similar structures. Analysis of surface profiles and effect of nonlinear alignment on flow. Introduction to river mechanics. Design-oriented problems. Prerequisite: CxEE 345.

CxEE 480 Air Quality Modeling (3) Evaluation of air-quality models relating air pollution emissions to environmental concentrations. Topics include meteorological dispersion models and various “receptor” models based on chemical “fingerprinting” of sources. Emphasizes current problems. Offered: jointly with ATM S 480.

CxEE 481 Hydraulic Design for Environmental Engineering (3) Stensel Introduction to the theory and the practice of planning and design of urban water supply distribution, pump stations, and sewage and storm-water collection systems. Evaluation of service areas and service requirements and their relationships to urban and urban water supply systems.
CEE 482 Wastewater Treatment and Reuse (3) Introduction to wastewater treatment and systems, fundamentals of biological, chemical and physical processes related to protection of public health and water pollution control. Process analysis of the configuration of major types of treatment processes for various sizes of plants and effluent requirements. Prerequisite: CEE 350.

CEE 483 Drinking Water Treatment (3) Scientific and engineering principles underlying drinking water treatment; analysis of key contaminants; development of conceptual models for how and why treatment processes work and mathematical models describing their performance under various design and operating scenarios; field trips to water treatment systems. Prerequisite: CEE 350.

CEE 484 On-Site Wastewater Disposal (3) Latest information on design, construction, operation, maintenance of individual and small community wastewater disposal systems. Conventional water carriage septic tank soil absorption systems considered with new alternatives, such as mounds, evapotranspiration systems, anaerobic filters, pressure drainfields, sand filters. Nonwater carriage methods studied. Pressure and vacuum sewers introduced.

CEE 486 Environmental Analysis Laboratory (3) Introduction to water quality parameters; theory of instrumentation and methods used for the environmental analysis. Laboratory analysis of environmental samples using a variety of techniques including titrations, chromatography, and absorption and emission spectrophotometry. Recommended: one year of general chemistry.

CEE 487 Solid-Waste Disposal (3) Describes sources and handling of municipal and industrial solid waste, with examination of collection, processing, recycling and resource recovery, and disposal alternatives. Public policy issues, local agencies and solid waste facilities, the legal and regulatory framework are all addressed in context of solid waste engineering.

CEE 488 Hazardous Wastes Engineering (3) Classification of hazardous wastes; resource conservation, Recovery Act regulations; characteristics and behavior of toxic organics; superfund; groundwater contamination, solutions. Hazardous waste site remedial action; case histories; sampling; landfill design. Stabilization and processing technologies, including incineration, carbon adsorption, emerging techniques. Prerequisite: CEE 351.

CEE 489 Water and Air Quality Sampling (2) Samples collected from lakes, streams, precipitation, and air and resulting (and supplemental) data interpreted for cause-effect and statistical inference. Design for water and air quality monitoring programs. Prerequisite: CEE 482.

CEE 490 Air-Pollution Control (4) Fundamental concepts of air pollution. Emission sources, atmospheric dispersion, ambient concentrations, adverse effects, governmental regulations, emission standards, processes and equipment for controlling emissions. Offered: jointly with ENV H 461.

CEE 491 Deterministic Systems (3) Development of mathematical methods with emphasis on computer applications. Linear programming, mathematics of the simplex algorithm, sensitivity analysis, dynamic programming, systems simulation, and goal programming. Class project required. Prerequisite: CEE 390.

CEE 492 Stochastic Systems (3) Introduction to probability distributions and statistics useful in systems analysis, conditional distributions, queuing theory and applications, Monte Carlo simulation, chance-constrained mathematical programming, and stochastic dynamic programming. Emphasis on application of the techniques to civil engineering systems problems, including transportation, water resources, and structures. Prerequisite: CEE 491.

CEE 493 Air-Pollution Source Testing and Equipment Evaluation (3) Engineering evaluation of air pollutant sources and air control equipment. Air-pollutant source testing and stack sampling. Analysis of equifunction and source emissions in the field and in the laboratory.

CEE 494 Air-Pollution Control Equipment Design (3) Designs to control air pollutants from stationary sources. Procedures for calculating design and operating parameters. Fundamental mechanisms and processes of gaseous and particulate control equipment for absorption and adsorption of gaseous pollutants; electrostatic precipitation and filtration of particulate pollutants. Actual case studies. Offered: jointly with ChEM E M/E E 468.

CEE 495 Sustainability and Design for Environment (3) Cooper Analysis and design of technology systems within the context of the environment, economy, and society. Applies the concepts of resource conservation, pollution prevention, life cycle assessment, and extended product responsibility. Examines the practice, opportunities, and role of engineering, management, and public policy. Offered: jointly with ENVIR 415/M E E 415; S.

CEE 496 Special Topics (1-5, max. 5) Special topics in civil engineering offered as course with lecture and/or laboratory. Maximum of 6 credits in combination of 496 and 499 may be applied toward an undergraduate degree.

CEE 499 Special Projects (1-5, max. 5) Individual undergraduate research projects. Maximum of 6 credits in combination of 498 and 499 may be applied toward an undergraduate degree. Recommended: 400-level CEE course.

CEE 500 Civil and Environmental Engineering Seminars (1) Credit/no credit only. Prerequisite: graduate standing in Civil and Environmental Engineering.

CEE 501 Structural Mechanics (6) Elias, Miller, Turkiyyah Equations of a continuum for small displacements, applications to linear elasticity.

CEE 502 Structural Dynamics (3) Eberhard, MacRae, Reed Lagrange’s equations. Free vibrations of linear, single, and multiple degree of freedom systems. Damping, Mode superposition. Forced vibrations by time history and by response spectrum methods. Free and forced vibrations of continuous systems. Wave propagation in rods and beams. Prerequisite: CEE 501. Offered: W.

CEE 511 Advanced Reinforced Concrete (3) Eberhard, MacRae, Stanton Behavior and design of reinforced concrete members and structures. Members subject to torsion and torsion combined with flexure and shear; members with small shear span/depth ratios, slabs. Offered: A.

CEE 512 Advanced Structural Systems (3) Eberhard, Stanton Prestress loss. Design of statically indeterminate structures; continuous beam, frame, and slab structures (cast in place or assembled from precast units). Prerequisite: CEE 453 or equivalent. Offered: Sp.

CEE 513 Advanced Steel I (3) MacRae, Roeder Factors influencing strength and serviceability of steel structures; LRFD limit state design procedures. Use of theories of plasticity and stability in development of design methods and specifications, bolted and welded connections, temperature effects, and effect of different fabrication methods on behavior of structure. Prerequisite: CEE 501, CEE 503. Offered: W.

CEE 515 Earthquake Engineering I (3) Earthquake mechanism and ground shaking, response spectra, linear elastic methods for prediction of behavior, displacement prediction methods for inelastically behaving structures, modeling and solution schemes, earthquake design philosophy, capacity design. Reinforced concrete, steel, and base-isolated structures. Prerequisite: CESM 501, CESM 502.

fragility curves, characteristics and effects of ground-shaking records, design methods, passive and active control, dynamic and elastic time history analysis, design of parts, system detailing, soil-structure interaction, repair and retrofit of structures. Prerequisite: CEE 515.

CEE 517 Wind Engineering Design (3) Wind effects on structures, including atmospheric boundary layer flow; bluff body aerodynamics; structural dynamics and aerelasticity; development and use of the ASCE Standards; estimation of along-wind, across-wind, and torsional response of tall buildings; design strategies for avoiding wind-induced discomfort. Fundamentals of wind tunnel testing.

CEE 518 Reliability and Design (3) Introduction to theory of structural reliability and its application to design procedures in civil engineering, including probability theory; assessment of uncertainties; code specification (first-order, second-moment format) and the related concept of risk and the influence of socioeconomic factors; loads, load combinations, and probabilities of damage.

CEE 521 Seepage and Consolidation (3) Confined and unconfined seepage through porous media, flow net solutions, consolidation, settlement, numerical solution of seepage, and consolidation problems. Prerequisite: CEE 366 or equivalent.

CEE 522 Shear Strength and Slope Stability (3) Shear strength of cohesive and cohesionless soils and slope stability analysis of natural and man-made slopes. Prerequisite: CESM 561.

CEE 523 Advanced Foundation Engineering (3) Design of shallow and deep foundations for bearing capacity and settlement. Construction considerations. Prerequisite: CEE 522 and CEE 527.

CEE 524 Lateral Earth Pressures and Retaining Structures (3) Lateral earth pressure theory. Design of temporary and permanent retaining structures including in situ reinforce- ment. Prerequisite: CEE 522, CEE 527.

CEE 526 Geotechnical Earthquake Engineering (3) Plate tectonics and elastic rebound theory of earthquake and faults; characteristics of ground motions; seismicity; seismic risk analysis; effect of local soil conditions on ground response; development of design ground motions; liquefaction; dynamic lateral earth pressures; seismic slope stability. Prerequisite: CEE 525 or permission of instructor.

CEE 527 Advanced Geotechnical Laboratory (4) Soil and site investigation, classification and engineering properties of soils and rock as determined by standard and advanced test procedures and equipment. Evaluation of test data. Report writing. Prerequisite: CEE 366 or equivalent.

CEE 528 Geosynthetic Engineering (3) Identification and testing of geosynthetics. Design of geosynthetic filters, roadway stabilization, earth reinforcement, and waste containment systems. Prerequisite: CEE 522 and CEE 523.

CEE 529 Foundation Soil Improvement (3) Analysis and design of physical and chemical treatment techniques commonly applied to problem foundation soils for civil engineering structure. Prerequisite: CEE 523.

CEE 530 Engineering Geology II (3) Application of engineering geology fundamentals to: location, design and maintenance of engineered structures; policy decisions related to potential geological hazards. Case histories, governmental policy discussions, interpretation of geological maps for engineering purposes. Prerequisite: graduate standing and CEE 437 or permission of instructor.

CEE 531 Rock Engineering (3) Engineering classification, physical and mechanical properties of rocks, failure modes and initial stresses in rocks, laboratory and field testing of rocks, rock slope engineering, underground openings, foundations on rocks. Prerequisite: graduate standing and CEE 366 or permission of instructor.

CEE 540 Microbiological Process Fundamen- tals (3) Stensel Fundamental concepts for microbial processes including organic chemical structure, nomenclature and environmental properties, principles of microbial metabolism, study of specific types of bacteria important to environmental engineering and their metabolism, development of microbial kinetic equations, including substrate utilization, energetics, and stoichiometry. Prerequisite: permission of instructor.

CEE 541 Biological Treatment Systems (3) Basic reactions, design principles, current design models, and operational considerations for biological treatment systems used in environ- mental engineering. Applications include activated sludge design and optimization, fixed film reactors, nitrification, nitrogen removal, phosphorous removal, anaerobic treatment, and toxic organic removal. Prerequisite: CEE 540 and CEE 482 or equivalent.

CEE 542 Bioremediation of Environmental Pollutants (3) Herwig, Strand Detailed survey of current understanding of biological pathways for transformation and degradation of toxic organic compounds, pesticides, oil, and metals. Microbial and plant transformations of pollutants and requirements for bioremediation. Requires basic understanding of metabolism and organic chemistry. Prerequisite: biological science course. Offered: jointly with ESC 518/MICROM 518; W.

CEE 543 Aquatic Chemistry (3) Benjamin, Ferguson, Murray Principles of chemical equilibrium applicable to natural water systems and water and waste treatment processes. Chemical thermodynamics. Characteristics of acid/base, gas/liquid, solid/liquid, oxidation/ reduction, and adsorption and equilibria. Computer models for chemical speciation. Prerequisite: Graduate standing or permission of instructor.

CEE 544 Physical-Chemical Treatment Processes (4) Principles and design of major physical-chemical unit processes used in water, wastewater, and hazardous waste treatment. Processes include chemical and reactor kinetics, filtration, chemical coagulation, ion exchange, adsorption, and gas transfer. Development of mathematical models, laboratory demonstrations and evaluation of current design practice. Prerequisite: CEE 485 or permission of instructor.

CEE 545 Advanced Environmental Chemistry (3) Behavior of controlled chemical species (heavy metals, pesticides, disinfection by-products, and endocrine disruptors) and persistent organic pollutants in the environment. Modeling of chemical interactions pertinent to environmental technologies (ozonation, advanced oxidation, photochemical transforma- tions, halogenation, dehalogenation, application of zero-valence metals and electrochemical controls). Prerequisite: aquatic chemistry or permission of instructor.

CEE 546 Topics in Ecological Effects of Wastewater (3) Application of ecological concepts for analysis and interpretation of bioenvironmental problems and data (eutrophica- tion, acid, rain, and toxicity). Students participate in presentation and discussion of current research. Prerequisite: CEE 462 or BIOL 473 or permission of instructor.

CEE 547 Lake and Watershed Management (3) Application of current techniques for lake and watershed analysis and modeling using fundamentals of limnology. Approaches to restoring eutrophic lakes, land use impacts on water quality. Practical exercises using data from real lake systems. Prerequisite: CEE 462/FISH 434, BIOL 473, or permission of instructor.

CEE 549 Advanced Topics in Environmental Engineering, Chemistry, and Biology (3) Special topics of current importance in environmental engineering. Applications of fundamental chemical and biological principles to the study of such phenomena as the behavior of aqueous colloids, corrosion processes, bacterial metabolism in chemically complex solutions, and acid precipitation. May be taken more than once for credit. Prerequisite: CEE 540, CEE 541.

CEE 550 Environmental Chemical Modeling (3) Benjamin, Murray Physical/chemical principles controlling the fate and distribution of environmental pollutants, and use of models to apply those principles. Includes modeling of physical transport in conjunction with chemical equilibrium and reaction kinetics. Applications include acid mine drainage, acid deposition, and groundwater and lake water contamination. Offered: jointly with OCEAN 524.

CEE 553 Seminar-Topics in Atmospheric Chemistry (1-3, max. 6) Charlson, Harrison Seminar for atmospheric scientists, chemists, engineers in problems associated with the chemical composition of the atmosphere. Covers wide variety of topics, ranging from the natural system to urban pollution and global atmospheric change. Faculty lectures, student participation. Prerequisite: ATM S 301 or permission of instructor. Offered: jointly with ATM S 525.

CEE 554 Acoustics of Environmental Noise (4) Offered: jointly with M E 528.

CEE 555 Topics in Environmental Health (3) Introduction to human biology, including physiology, epidemiology, and toxicology. Study of contemporary environmental health problems and practices as they relate to radiological health, solid-waste disposal, occupational health, biometeorology, and bioengineering.

CEE 557 Air Resources Management (3) Technical, administrative, and legal aspects of air
conservation. Current case studies involving engineering analysis, air-quality modeling, and regulatory aspects at local, state, and federal governmental levels.

CEE 558 Control of Gaseous Air Pollutants (3) Physical and chemical processes used to control gaseous air pollutants. Absorption into liquids. Aqueous spray dryer scrubbers. Adsorption beds. Control of sulfur oxide and nitrogen oxide. Case studies of control systems. Prerequisite: CHEM E 435 or permission of instructor. Offered: jointly with CHEM E 566; even years.

CEE 559 Control of Particulate Air Pollutants (3) Processes used to control emissions of particulate air pollutants. Use of settling chambers, cyclones, fabric filters, wet scrubbers, and electrostatic precipitators to control aerosol particles. Case studies of particulate air-pollutant control systems. Prerequisite: CEE 468 or permission of instructor. Offered: jointly with CHEM E 567; odd years.

CEE 560 Risk Assessment for Environmental Hazards (3) Faustman Examines context, methodologies, data, uncertainties, and institutional arrangements for risk assessment. Qualitative and quantitative approaches to identification, characterization, and control of environmental hazards to health emphasized through didactic and case studies. Offered: jointly with ENV H 577/PA AF 589; A.

CEE 570 Hydrodynamics (4) Applications of the equations of motion to the flow of ideal and real fluids. Fundamentals of fluid potential motion. Viscous flows; Navier-Stokes equations and some exact solutions. Boundary-layer theory. Introduction to turbulence. Two- and three dimensional examples, including free surface flows. Applications of field equations to problems of engineering significance. Prerequisite: CEE 342 or equivalent.

CEE 571 Hydrodynamics in Water Quality (3) Theoretical, field study, and laboratory model approaches to diffusion in transport problems of concern to water resources engineers. Prerequisite: CEE 342 or permission of instructor.

CEE 573 Advanced Computational Hydraulics (4) Review of hydrodynamic and transport equations for hydraulic engineering application; numerical solution methods; implementation and practice with existing two- and three-dimensional numerical models; numerical model calibration and verification techniques; case studies. Theoretical and civil engineering decision makers aspects. Prerequisite: CEWA 474, CEE 570, CEE 571 or permission of instructor.

CEE 574 Advanced Hydrology (3) Detailed treatment of statistical methods used in hydrologic analysis. Stochastic hydrology, detailed examination and use of a deterministic watershed model (e.g., Stanford Watershed Model). Prerequisite: graduate standing in civil engineering or permission of instructor.

CEE 575 Groundwater Transport Modeling (3) Review of equations for flow and transport in porous media; techniques for simulating transport as boundary value problems; analytical and numerical solution techniques; finite element models; field-scale applications and case histories.

CEE 576 Water Resources Planning (3) Palmer Engineering, social, and economic factors involved in water resource development and management; policy and program development; and administration; use relationships and conflicts; considerations for regional water resource systems. Offered: W.

CEE 577 Water-Quality Management (3) Application of biological, ecological, and chemical processes to modeling of water quality and use of such models in appropriate management of water resource systems. Includes units on the modeling of temperature, BOD, nutrient, phytoplankton, zooplankton, and other processes in lakes, streams, and estuaries. Recommended: CEE 476, CEE 485, CEE 462/ FISH 434, and CEE 491.

CEE 578 Water Resource System Management and Operations (3) Burges, Palmer A readings course in recent literature related to the modeling and management of water resources. Topics include drought management, expansion of existing water supplies, hydropower production, streamflow forecasting, water demand forecasting, regional water planning, climate change, and other topical issues. Recommended: 557, 558. Offered: A.

CEE 579 Advanced Traffic Detection Systems (3) Wang Introduction to advanced tracking and detection technologies in transportation engineering, including Global Positioning Systems (GPS), inductance loop detection systems, remote traffic microwave radar; computer-vision based technologies, and other emerging detection technologies with cutting-edge research in these areas.

CEE 580 Urban Transportation Planning (4) Rutherford Introduction to transportation planning, including trends and issues, land use and transportation interaction, surveys, public involvement, demand management, technology, forecasting, impacts, and policy strategies.

CEE 581 Travel Demand Forecasting (4) Rutherford Application of mathematical models to forecast urban travel behavior. Introduces emerging methods, land use models, travel demand models, including trip generation, trip distribution, mode choice, and network assignment. Discusses validation and ethics.

CEE 582 Intelligent Transportation Systems (3) Application of modern computer and communication technologies to transportation systems. Benefits to public agencies, commercial companies, and travelers. Coordination between private and public sectors. Intelligent Transporta tion System's (ITS) social, organizational, and operational changes.

CEE 583 Airport Engineering (3) Definitions and terminology relating to airport engineering. Characteristics of aircraft, air traffic control, and resulting impact upon design process. Airport capacity, configuration, and planning associated with terminal design. Emphasis on geometric and structural design of pavements and airside. Design projects relating to airport engineering required. Prerequisite: permission of instructor.

CEE 584 Analytical Methods in Transportation I (3) Application of analytical and statistical methods to transportation planning problems. Analysis of probability distributions that describe variables. Development of statistical models for predicting transportation phenomena. Elementary sampling theory hypothesis testing, regression analysis, time series analysis, applied to transportation data. Prerequisite: graduate standing or permission of instructor. Offered: Sp.

CEE 585 Analytical Methods in Transportation II (3) Applications of advanced econometric methods to transportation issues. Topics include, but not limited to, systems of equations, duration models, limited dependent variable approaches, and count models. Handling data with numerous data sets, available for application. Collaborative projects. Prerequisite: CEE 584 or permission of instructor.

CEE 586 Transportation Infrastructure Management (3) CEE 587 Transportation Networks (3) Manning, Shankar Traffic flow, theories of traffic, user equilibrium and systemic optimal assignments, and various methods for network assignment. Theoretical and empirical traffic assignments, multimodal characteristics of traffic flow on networks. Interactive work with network and econometric models.

CEE 588 Land Use/Transportation Models (3) Review of theoretical basis of several existing models used to forecast urban growth patterns and their associated land use, transportation, and energy requirements. Model validation studies in relation to empirical studies of urban growth and change. Environmental implications of alternative urban growth patterns. Offered: jointly with URBDP 530.

CEE 589 Transit Systems Planning (3) Planning, operational methods for urban public transportation. Review of technological, operating characteristics of vehicles and systems; financing, management, institutional aspects. Paratransit. Short-range planning, operational strategies, revenue-fare structures. Service monitoring. Mode choice, transit demand relating to service. Computer models for planning, design of transit systems. Prerequisite: graduate standing or permission of instructor.

CEE 590 Traffic Systems Operations (3) Operational planning, management of arterial and freeway traffic systems. Review of transportation system management strategies to achieve more efficient use of existing infrastructure, including improved and innovative traffic control systems and demand management policies, measures of effectiveness, impact assessment, traveler response. Introduction to use of relevant computer models and packages.

CEE 591 Freight Transportation (3) Overview of the technical and institutional aspects of transporting freight. Topics include the different modes of moving freight, the technology of transferring freight between modes at ports and terminals, issues that impact freight movement such as congestion and government regulation, and the future of freight mobility.

CEE 592 Statistical Fundamentals for Construction and Materials Applications (1) Mahoney Overview of statistical measures used in various construction and materials decision-making processes. Subjects include data distributions, hypothesis tests (making decisions with statistics), regression analysis, sampling, and quality control and assurance. Uses
construction data to illustrate these measures. Offered: Sp.

CSE 593 Construction Labor Law (3) Goldblatt
In-depth study of construction labor topics, including labor-management organization, legislation, and regulation, collective bargaining, and law and administration. Emphasizes the importance of labor relations in construction firms, whether in a union setting or an open shop environment.

CSE 594 Computer-Aided Construction (3) Wang
Application of information technology to construction management and cost estimating. Topics include, but are not limited to, computerized construction, fundamentals of computer hardware, construction management software tools, Web publishing, GPS application, and construction data management. Offered: S.

CSE 595 Construction Materials (3) Mahoney; Muench
Examines the use of aggregates, bituminous mixtures, Portland cement concrete, roller compacted concrete, soil and site stabilization, utility cuts and flowable backfill in construction projects. Emphasis on the behavior of materials in various construction applications. Offered: W.

CSE 596 Pavement Construction (3) Mahoney; Muench
Examines pavement construction, including pavement contracts and specifications, quality control and assurance programs, and plant and laydown operations. Reviews both national and international pavement construction practices. Offered: Sp.

CSE 597 Construction Productivity (3) Work
Improvement techniques applied to construction operations. Review of major contributions in behavioral science that may be applicable to the construction industry. Case studies. Innovative productivity programs successfully implemented on construction projects. Safety on construction projects, especially as influenced by managerial practices.

CSE 599 Special Topics in Civil and Environmental Engineering (1-3, max. 15)
Rutherford Special topics in civil and environmental engineering offered occasionally by permanent or visiting faculty members.

CSE 600 Independent Study or Research (2-5, max. 5)
Rutherford Topics covered depend on the faculty who offer the course and student interest. Prerequisite: permission of instructor.

CSE 601 Internship (2) Internship in an established program between industry, government, and the University. Prerequisite: permission of graduate program coordinator and committee chair.

CSE 700 Master’s Thesis (*) Prerequisite: permission of adviser.

CSE 800 Doctoral Dissertation (*) Prerequisite: permission of adviser.

Computer Science and Engineering

Computer Science and Engineering

CSE 100 Fluency in Information Technology (5) QSR Introduces skills, concepts, and capabilities necessary to effectively use information technology. Includes logical reasoning, managing complexity, operation of computers and networks, and contemporary applications such as effective Web searching and database manipulation, ethical aspects, and social impacts of information technology. Not available for credit to students who have completed CSE 101 or ENGR 142. Offered: jointly with INFO 100.

CSE 321 Discrete Structures (4) Fundamentals of set theory, graph theory, enumeration, and algebraic structures, with applications in computing. Prerequisite: CSE 143; either MATH 126, MATH 129, or MATH 136.

CSE 322 Introduction to Formal Models in Computer Science (3) Finite automata and regular expressions; context-free grammars and pushdown automata; nondeterminism; Turing machines and the halting problem. Emphasis on understanding models and their applications and on rigorous use of basic techniques of analysis. Induction proofs, simulation, diagonalization, and reduction arguments. Prerequisite: CSE 321.

CSE 326 Data Structures (4) Data types, abstract data types, and data structures. Efficiency of algorithms. Sequential and linked implementation of lists. Binary tree representations and traversals; priority queues, hashing, directed graphs, depth-first algorithms. Garbage collection. Dynamic storage allocation. Internal and external sorting. No credit to students who have completed CSE 373, CSE 374, or E E 374. Prerequisite: CSE 321.

CSE 341 Programming Languages (4) Basic concepts of computer languages, including abstraction mechanisms, types, and scoping. Detailed study of several different programming paradigms, such as functional, object-oriented, and logic programming. No credit if CSE 413 has been taken. Prerequisite: CSE 143.

CSE 370 Introduction to Digital Design (4) Introductory course in digital logic and its specification and simulation. Boolean algebra, combinational circuits including arithmetic circuits and regular structures, sequential circuits including finite-state-machines, use of programmable logic devices. Simulation and high-level specification techniques are emphasized.

CSE 373 Data Structures and Algorithms (3) Fundamental algorithms and data structures for implementation. Techniques for solving problems by programming. Linked lists, stacks, queues, directed graphs. Trees: representations, traversals. Searching (hashing, binary search trees, multiway trees). Garbage collection, memory management. Internal and external sorting. No credit to students who have completed 326, 374, or E E 374. Prerequisite: CSE 143.

CSE 378 Machine Organization and Assembly Language (4) Differences and similarities in machine organization; central processors; fundamentals of machine language and addressing; assembly language programming, including macros; operating system interfaces. No credit to students who have completed 410. Prerequisite: CSE 143; CSE 370.

CSE 399 CSE Foreign Study (*) Upper division computer science or computer engineering course, taken through an approved study abroad program, which there are no direct University of Washington equivalents. Credit/no credit only.

CSE 401 Introduction to Compiler Construction (3) Fundamentals of compilers and interpreters; symbol tables; lexical analysis, syntax analysis, semantic analysis, code generation, and optimizations for general-purpose programming languages. No credit to students who have taken 413. Prerequisite: CSE 322; CSE 326; CSE 341; CSE 378.

CSE 403 Software Engineering (4) Fundamentals of software engineering using a group project as the basic vehicle. Topics covered include software crisis, managing complexity, requirements specification, architectural and detailed design, testing and analysis, software process, and tools and environments. Prerequisite: CSE 326; CSE 341; recommended: project experience in an academic or work setting.

CSE 410 Computer Systems (3) Structure and components of hardware and software systems. Machine organization, including central processor and input-output architectures; assembly language programming; operating systems, including process, storage, and file management. No credit to students who have completed 378 or 451. Prerequisite: CSE 373.

CSE 415 Introduction to Artificial Intelligence (3) NN Principles and programming techniques of artificial intelligence: LISP, symbol manipulation, knowledge representation, logical and probabilistic reasoning, learning, language understanding, vision, expert systems, and social issues. Not open for credit to students who have completed 473. Prerequisite: CSE 373.

CSE 421 Introduction to Algorithms (3) Techniques for design of efficient algorithms. Methods for showing lower bounds on computational complexity. Partial algorithms for sorting, searching, set manipulation, arithmetic, graph problems, pattern matching. Prerequisite: CSE 322; CSE 326.

CSE 431 Introduction to Theory of Computation (3) Models of computation, computable and noncomputable functions, space and time complexity, tractable and intractable functions. Prerequisite: CSE 322.

CSE 444 Introduction to Database Systems (3) Fundamental concepts, system organization, and implementation of database systems. Relational, hierarchical, and network data models; file organizations and data structures; query languages; query optimization; database design; concurrency control; security; issues involving distributed database systems. Prerequisite: CSE 326.

CSE 450 Animation Production Seminar (1)
Open to all students who have an interest in digital animation. Reviews and analyzes films, animated feature films, and television commercials. Emphasizes the technical and aesthetic basics of animation production in industry studio environments.

CSE 451 Introduction to Operating Systems (4) Principles of operating systems. Process management, memory management, auxiliary
CSE 454 Advanced Internet and Web Services
(5) Design of Internet search engines, including spider architecture, inverted indices, frequency rankings, latent semantic indexing, hyperlink analysis, and refinement interfaces. Construction of scalable and secure web services. Datalog/Webservice log providers to provide personalized and user-targeted services. Large project. Prerequisite: CSE 326.

CSE 456 Story Design for Computer Animation
(4) Animation principles and production for story development and design. Design, development, and production of several storyreels, which are a tool for the pre-production of animated features and shorts. Students use authoring tools to present finished work.

CSE 458 Computer Animation
(5) Introduction to basic principles of computer generated animation. Focus on the modeling and lighting of animated characters. Students create storyboards, write scripts, and script using Code, Art, CSE, and Music team up on projects to be built on commercially-available modeling and lighting packages. Prerequisite: either CSE 457, ART 380, or MUSIC 403.

CSE 459 Pre-Production for Collaborative Animation
(5) Pre-production of collaboratively designed animated shorts. In-depth analysis of classical and computer generated works. Character design and pre-planning, model sheets, character rigging, storyreel and animatics, character motion, design for multiple characters, and principles of animation as applied to character motion and effects. Prerequisite: CSE 458.

CSE 460 Animation Capstone
(5) Apply the knowledge gained in previous animation courses to produce a short animated film. Topics include scene planning, digital cinematography, creature and hard surface modeling, animation and basics of character animation, and rendering techniques. Prerequisite: CSE 456, CSE 459.

CSE 461 Introduction to Computer-Communication Networks
(4) Computer network architectures, protocol layers, network protocols, Transmission media, encoding systems, switching, multiple access arbitration. Network routing, congestion control, flow control. Transport protocols, real-time, multicast, network security. Prerequisite: CSE 143; either MATH 300/STAT 300, STAT 391, IN 315, or CSE 321. Offered: jointly with E E 461.

CSE 464 Advanced Topics in Digital Animation
(5) Students design individual animated works for professional quality demo reels. 2- and 3-D animation, special effects design, advanced character animation techniques, 3-D paint techniques and integration, short design, sequence planning, non-photorealistic rendering options, interactive animation for pre-planning, and advanced production techniques and strategies. Prerequisite: CSE 458.

CSE 466 Software for Embedded Systems
(4) Software issues in the design of embedded systems. Microcontroller architectures and peripherals, embedded operating systems and device drivers, compilers and debuggers, timer and interrupt systems, interfacing of devices, communications and networking. Emphasis on practical application of development platforms. Prerequisite: CSE 326; CSE 370; CSE 378.

CSE 467 Advanced Digital Design
(4) Advanced techniques in the design of digital systems. Hardware description languages, combinational and sequential logic synthesis and optimization methods, partitioning, mapping to regular structures. Emphasis on reconfigurable logic as an implementation medium. Memory system design and simulation including serial/parallel and synchronous/asynchronous methods. Prerequisite: CSE 326; CSE 370.

CSE 468 Very Large Scale Integration
(5) Introduction to CMOS technology and circuit design; implementation of combinational and sequential logic; VLSI design methodologies; CAD tools for layout, simulation, and validation. Students design a VLSI chip using modern CAD tools. Prerequisite: CSE 370.

CSE 471 Computer Design and Organization
(4) CPU instruction addressing models, CPU structure and functions, computer arithmetic and logic unit, register transfer level design, hardware and microprogram control, memory hierarchy design and organization, I/O and system components. Introduction to computer architecture. Laboratory project involves design and simulation of an instruction set processor. Prerequisite: CSE 370; CSE 378.

CSE 472 Introduction to Computational Linguistics
(5) NW/PLDA: Introduction to computer applications of linguistic theory, including syntactic processing, semantic and pragmatic interpretation, and natural language generation. Prerequisite: either LING 200or LING 400; or either LING 461 or CSE 321. Offered: jointly with LING 472.

CSE 473 Introduction to Artificial Intelligence
(3) Principles and applications of artificial intelligence: theorem proving, problem-solving methods, representation of knowledge, natural language analysis and synthesis, programming languages for artificial intelligence. Not open for credit to students who have completed 415. Prerequisite: CSE 326; recommended: CSE 341.

CSE 476 Embedded System Design
(5) System building course to provide students with a complete understanding of embedded system design. Students will design, simulate, construct, debug, and document a substantial project of their choosing. Lectures will focus on case studies and emerging components and platforms. Prerequisite: CSE 451; CSE 466.

CSE 477 Digital System Design
(5) Capstone design experience. Prototype a substantial project mixing hardware, software, and communication components. Focuses on use of embedded processors and programmable logic in digital system design, case studies, and emerging components and platforms. Provides a complete experience in embedded system design and management. Prerequisite: CSE 451; CSE 466; CSE 467.

CSE 490 Special Topics in Computer Science
(1-5, max. 15) Lectures, discussions, and possibly labs on topics of current interest in computer science and engineering not covered by other CSE undergraduate courses.

CSE 497 Undergraduate Research Seminar
(1) Students prepare and give a public talk on their faculty-sponsored research projects.

CSE 498 Senior Project
(1-9, max. 9) A report (and perhaps demonstration) describing a development, survey, or small research project in computer science or an application to another field. Objectives are: (1) integrating material from several courses, (2) illustrating relevant literature, (3) gaining experience in writing a technical document, and (4) showing evidence of independent work. Work normally extends over more than one quarter, for a maximum of 6 credits for 498; 9 credits are required for 498H.

CSE 499 Reading and Research
(1-24) Available in special situations for advanced computer science majors to do reading and research in field, subject to approval of undergraduate adviser and CSE faculty member. Fee elective, but does not replace core course or computer science elective. Credit/no credit only.

CSE 500 Computers and Society
(2) Study of impact of computer technology on present and future society, including political, economic, cultural, social, and moral issues. Includes guest lecturers and discussion leaders. Each student is required to complete a term project. Credit/no credit only. Prerequisite: graduate standing in computer science or permission of instructor.

CSE 503 Software Engineering
(3) Specification, implementation, and testing of large, multiperson, software systems. Topics include abstraction, information hiding, software development environments, and formal specifications. Prerequisite: CSE major and CSE 322, CSE 326, and CSE 378 or equivalents.

CSE 504 Advanced Topic in Software Engineering
(3) Topics vary but may include software design and evolution, formal methods, requirements specifications, software and system safety, reverse engineering, real-time software, metrics and measurement, programming environments, and verification and validation. Prerequisite: CSE major or permission of instructor.

CSE 506 Advanced Topics in Programming Languages
(3) May include functional, object-oriented, parallel, and logic programming languages; semantics for languages of these kinds; type declaration, inference, and checking (including polymorphic types); implementation issues, such as compilation, lazy evaluation, combiners, parallelism, various optimization techniques. Implementation required. Prerequisite: CSE major, CSE 501 which may be taken concurrently, and CSE 505.

CSE 510 Advanced Topics in Human-Computer Interaction
(3) Content varies, including interface issues for networks, embedded systems, education applications, safety and critical systems, graphics and virtual reality, databases, and computer-supported cooperative work.

CSE 515 Statistical Methods in Computer Science
(3) Introduction to the probabilistic and statistical techniques used in modern computer systems. Graphical models, probabilistic inference, statistical learning, sequential models, decision theory. Prerequisite: either STAT 341 or STAT 391, and graduate standing in computer science, or permission of instructor.

CSE 519 Current Research in Computer Science
(1, max. 3) Weekly presentations on current research activities by members of the faculty. Only Computers Science graduate students may register, although others are encouraged to attend. Credit/no credit only.
CSE 520 Computer Science Colloquium (1, max. 9) Weekly public presentations on topics of current interest by visiting computer scientists. Credit/no credit only.

CSE 521 Design and Analysis of Algorithms I (3) Principles of design of efficient algorithms: recursion, divide and conquer, balancing, dynamic programming, greedy method, data structure selection. Correctness and analysis of algorithms. Examples drawn from problems in sorting, manipulation, pattern-matching, graphs, matrices, polynomials, and integers. Prerequisite: CSE major and CSE 326 or equivalent.

CSE 522 Design and Analysis of Algorithms II (3) Analysis of algorithms more sophisticated than those treated in 521. Content varies and may include such topics as algebraic algorithms, combinational algorithms, techniques for proving lower bounds on complexity, and algorithms for special computing devices such as networks or formulas. Prerequisite: CSE major and CSE 521.

CSE 523 Computational Geometry (3) Algorithms for discrete computational geometry. Geometric computation, range searching, convex hulls, proximity, Voronoi diagrams, intersection. Application areas include VLSI design and computer graphics. Prerequisite: CSE major and CSE 521; recommended: CSE 457 or equivalent.

CSE 524 Parallel Algorithms (3) Design and analysis of parallel algorithms: fundamental parallel algorithms for sorting, arithmetic, matrix and graph problems and additional selected topics. Emphasis on general techniques and approaches used for developing fast and efficient parallel algorithms and an understanding of limitations to their efficacy. Prerequisite: CSE major and CSE 521.

CSE 527 Computational Biology (3) Introduces computational methods for understanding biological systems at the molecular level. Problem areas such as mapping and sequencing, sequence analysis, structure prediction, phylogenetic inference, regulatory analysis. Techniques such as dynamic programming, Markov models, expectation-maximization, local search. Prerequisite: graduate standing in biological, computer, mathematical or statistical science, or permission of instructor.

CSE 528 Computational Neuroscience (3) Introduction to computational methods for understanding nervous systems and the principles governing their operation. Topics include representation of information by spiking neurons, information processing in neural circuits, and algorithms for adaptation and learning. Prerequisite: elementary calculus, linear algebra, and statistics, or by permission of instructor. Offered: jointly with NEUBH 528.

CSE 531 Computability and Complexity (3) Computational models including deterministic and nondeterministic Turing machines, and techniques for analyzing them. Fundamentals of computability theory and undecidability. Fundamentals of computational complexity theory and NP-completeness. . Prerequisite: CSE majors only; CSE 322 or equivalent.

CSE 532 Complexity Theory (3) Deterministic, nondeterministic, alternating, and probabilistic Turing machines. Time and space complexity, complexity classes, complexity hierarchies, and provably intractable problems. Prerequisite: CSE major and CSE 531.

CSE 533 Advanced Topics in Complexity Theory (3) Topics in computational complexity more sophisticated than those treated in 532. Topics are expected to vary from year to year, but might typically focus on such areas as parallel complexity, probabilistic complexity, circuit- or automaton-based complexity, or logic. Prerequisite: CSE major.

CSE 536 Theory of Distributed Computing (3) Formal approaches to distributed computing problems. Topics vary, but typically include models of distributed computing, agreement problems, impossibility results, mutual exclusion protocols, concurrent reading while writing protocols, knowledge analysis of protocols, and distributed algorithms. Prerequisite: CSE major.

CSE 543 Computer System Performance (3) Emphasizes the use of analytic models as tools for evaluating the performance of centralized, distributed, and parallel computer systems. Prerequisite: CSE major and CSE 451.

CSE 546 Data Mining (3) Methods for identifying valid, novel, useful, and understandable patterns in data. Induction of predictive models from data: classification, regression, and probability estimation. Discovery of clusters and association rules.

CSE 549 High-Performance Computer Architectures (3) Algorithm design, software techniques, computer organizations for high-performance computing systems. Selected topics from: VLSI complexity for parallel algorithms, compiling techniques for parallel and vector machines, large MIMD machines, reconfigurable systems, memory hierarchies in multiprocessors, algorithmically specialized processor and their architectures. Prerequisite: CSE major and CSE 548 or permission of instructor.

CSE 551 Operating Systems (3) Operating system design and construction techniques. Concurrent programming, operating system kernels, correctness, deadlock, protection, transaction processing, design methodologies, comparative structure of different kinds of operating systems, and other topics. Prerequisites: CSE major and CSE 451.

CSE 552 Distributed and Parallel Systems (3) Principles, techniques, and examples related to the design, implementation, and analysis of distributed and parallel computer systems. Prerequisite: CSE major and CSE 551.

CSE 557 Computer Graphics (3) Introduction to image synthesis and computer modeling, emphasizing the underlying theory required for undertaking computer graphics research. Topics include color theory, image processing, affine and projective geometry, hidden-surface determination, photorealistic image synthesis, advanced curve and surface design, dynamics, realistic character animation. Prerequisite: CSE major, solid knowledge of linear algebra.

CSE 558 Special Topics in Computer Graphics (3) Advanced topics in computer graphics not treated in CSE 557. Topics vary from year to year but typically include advanced aspects of image synthesis, animation, and 3D photography. Prerequisite: CSE major and CSE 557 or permission of instructor.

CSE 563 Fault Tolerant Computing (3) Faults and their manifestation, issues, theory, and techniques of reliable systems design, testing, design for testability, self-checking and fail-safe circuits, coding techniques, system-level fault diagnosis, fault-tolerant communication, reliable software design, and evaluation criteria. Prerequisite: basic knowledge of digital systems design or permission of instructor. Offered: jointly with E 563.

CSE 567 Principles of Digital Systems Design (3) Principles of logic design, combinational and sequential circuits, minimization techniques, structured design methods, CMOS technology, complementary and ratioed gates, delay estimation and performance analysis, arithmetic circuits, memories, clocking methodologies, synthesis and simulation tools, VLSI processor architecture. Prerequisite: CSE major and basic knowledge of logic design.

CSE 568 Introduction to VLSI Systems (3) Introduction to CMOS technology and circuit design; combinational logic-design alternatives; register-design and system-clocking methodologies; data path and subsystem design; VLSI system design methodologies; CAD tools for synthesis, layout, simulation, and validation; design of a complex VLSI chip. Prerequisite: CSE 567 or permission of instructor. CSE majors only.

CSE 571 AI-based Mobile Robotics (3) Overview of mobile robot control and sensing. Behavior-based control, world modeling,
CSE 576 Computer Vision (3) Introduction to computer vision, emphasizing the middle ground between image processing and artificial intelligence. Topics include search algorithms, data dependencies and truth-maintenance systems, approaches to knowledge representation, automated deduction, reasoning under uncertainty, and machine learning. Prerequisite: CSE 421 or equivalent; exposure to logic, LISP programming experience, CSE major.

CSE 577 Special Topics in Computer Vision (3) Topics vary and may include vision for graphics, probabilistic vision and learning, medical imaging, content-based image and video retrieval, robot vision, or 3D object recognition. Prerequisite: CSE/E E 576 or permission of instructor. Offered: jointly with E E 576.

CSE 581 Parallel Computation in Image Processing (3) Parallel architectures, algorithms, and languages for image processing. Cellular array, pipelined and pyramid machines, instruction sets, and design issues. Parallel implementations of filtering, edge detection, segmentation, shape, stereo, motion, relaxation algorithms, multiresolution methods, and iconic-to-symbolic transforms. Students write and debug programs for parallel computers. Prerequisite: permission of instructor.

CSE 580 Doctoral Dissertation (*) Credit/no credit only.

CSE 577 Principles of Software Engineering (4) Study of major developments in software engineering over the past three decades. Topics may include design (information hiding, layering, open implementations), requirements specification (informal and formal approaches), quality assurance (testing, verification and analysis, inspections), reverse and re-engineering (tools, models, approaches). Prerequisite: CSE majors only.

CSE 585 Principles of Programming Languages (4) A survey of non-imperative programming paradigms such as functional, object-oriented, logic, and constraint programming. Programming language semantics and type theory. Prerequisite: CSE majors only.

CSE 582 Applied Algorithms (4) Principles of design of efficient algorithms with emphasis on algorithms with real world applications. Examples drawn from computational geometry, biology, scientific computation, image processing, combinatorial optimization, cryptography, and operations research. Prerequisite: CSE majors only.

CSE 583 Parallel Computation (4) Survey of parallel computing including the processing modes of pipelining, data parallelism, thread parallelism, and task parallelism; algorithmic implications of memory models; shared memory and message passing; hardware implementations; bandwidth and latency; synchronization, consistency, interprocessor communication; programming issues including implicit and explicit parallelism, locality, portability. CSE majors only.

CSE 584 Database Management System (4) Introduction to the principles of database management systems. Topics include database system architecture, data models, theory of database design, query optimization, concurrency control, crash recovery, and storage strategies. CSE majors only.

CSE 585 Transaction Processing (4) Technology supporting reliable large-scale distributed computing, including transaction processing models, TP monitors, transactional communications, persistent queuing, software fault tolerance, transactional control and recovery algorithms, distributed transactions, two-phase commit, data replication. Prerequisite: CSE majors only.

CSE 590 Research Seminar (*) Several offerings each quarter, on topics of current interest. Prerequisite: permission of instructor.

CSE 591 Group Projects in Computer Science (1-3, max. 3) Focuses on specialized topics and research activities in computer science. Credit/no credit only.

CSE 592 Independent Study or Research (*) Credit/no credit only.

CSE 593 Master’s Thesis (*) Credit/no credit only.

CSE 594 Doctoral Dissertation (*) Credit/no credit only.

CSE 595 Software Entrepreneurship (4) Provides an overview of the major elements of entrepreneurial activity in software, including market identification and analysis, evaluation and planning of the business, financing, technical operating and administrative problems, and alternatives for growth or sale.
CSE P 596 Business Basics Computer Science Professionals (4) Business principles relevant to the software industry in four areas: competitive strategy, finance, accounting, and human resources. Organized as a series of case studies and lectures. Progresses from an emphasis on tools to a more high-level look at competitive dynamics in high-tech industries.

CSE P 600 Independent Study or Research (1-4, max. 8).

**Electrical Engineering**

E E 271 Digital Circuits and Systems (5) Overview of digital computer systems. Digital logic, Boolean algebra, combinational and sequential circuits and logic design, programmable logic devices, and the design and operation of digital computers, including ALU, memory, and I/O. Weekly laboratories. Prerequisite: CSE 142.

E E 299 Special Topics in Electrical Engineer- ing (1-5, max. 5) New and experimental approaches to basic electrical engineering. May include design and construction projects.

E E 331 Devices and Circuits I (5) Physics, characteristics, applications, analysis, and design of circuits using semiconductor diodes and field-effect transistors with an emphasis on large-signal behavior and digital logic circuits. Classroom concepts are reinforced through laboratory experiments and design exercises. Prerequisite: 1.0 in E E 233.

E E 332 Devices and Circuits II (5) Characteristics of bipolar transistors, large- and small-signal models for bipolar and field effect transistors, linear circuit applications, including low and high frequency analysis of differential amplifiers, current sources, transistors, and transistors in feedback configurations, internal circuitry of op-amps, op-amp configurations, op-amp stability and compensation. Weekly laboratory. Prerequisite: 1.0 in E E 331.

E E 351 Energy Systems (5) Develops understanding of modern energy systems through theory and analysis of the system and its components. Discussions of generation, transmission and utilization are complemented by environmental and energy resources topics as well as electromechanical conversion, power electronics, electric safety, renewable energy, and electricity blackouts. Prerequisite: 1.0 in E E 233.

E E 399 Special Topics in Electrical Engineer- ing (1-5, max. 5) New and experimental approaches to current electrical engineering problems. May include design and construction projects.

E E 400 Advanced Topics in Electrical Engineering (1-5, max. 10) Contemporary topics at the advanced undergraduate elective level. Faculty presents advanced elective topics not included in the established curriculum.

E E 401 Engineering Design in Large Teams (4) Engineering design process, including project management, team formation, working with technical literature, concept development (e.g., brainstorming, morphological analysis, biomimetics, theory of inventive problem solving), intellectual property, high-tech ventures. Prerequisite: E E 215.

E E 402 Engineering Design in Large Teams: Robotics II (5) Engineering design process applied to robot design. Involves project management, mentoring, marketing, and multi-disciplinary collaboration. The team designs, prototypes, manufactures, assembles, tests, modifies, troubleshoots, and learn to operate a system that competes in an international design contest. Prerequisite: E E 215; E E 401.

E E 406 Engineering Design for K-12 Outreach (3) Wilson Design process targeted toward development of relevant activities for K-12 audiences in such areas of science and engineering. Instruction in basic design process, design specification combined with an overview of relevant cognitive/social development in K-12. Prerequisite: E E 271, E E 331, E E 341, E E 351 or E E 361.

E E 415 Computer-Aided System Analysis and Design (3) Concepts, principles, and techniques concerned with the design, testing, and application of general-purpose problem-oriented computer programs for analyzing large-scale systems. Offered: Sp.

E E 418 Network Security and Cryptography (3) Fundamental principles of cryptography and its application to network and communication security. An introduction to the fundamental tools in cryptography and the protocols that enable its application to network and communication security. Prerequisite: MATH 308; either MATH 330, STAT 390, or IND E 315. Offered: Sp.

E E 420 Design in Communications (4) Design projects in communications. Frequent projects solved by student teams. Reports and presentations. Prerequisite: 1.0 in E E 417 which may be taken concurrently.

E E 433 Analog Circuit Design (5) Design of analog circuits and systems applying modern integrated circuit technology: operational amplifiers, differential amplifiers, active filters, voltage references and regulators. Prerequisite: 1.0 in E E 332.

E E 436 Medical Instrumentation (4) Introductory course in the application of instrumentation to medicine. Topics include transducers, signal-conditioning amplifiers, electrodes and electrochemistry, ultrasound systems, electrical safety, and the design of clinical electronics. Laboratory included. For upper-division and first-year graduate students who are preparing for careers in bioengineering—both research and industrial. Offered: jointly with BIOEN 436.

E E 449 Design of Automatic Control Systems (4) Design problems for aerospace vehicles, systems with unstable dynamics, lightly damped modes, nonminimum phase, nonlinear dynamics. Computer-aided analysis, design, and simulation, with laboratory hardware-in-the-loop testing. Team design reviews, oral presentations. Prerequisite: either AA 448 or E E 448. Offered: jointly with AA 449.

E E 452 Power Electronics Design (5) Electronic conversion and control of electrical power. Includes semiconductor switching devices, power converter circuits, design of magnetics, and control of power converters. Also ac/ dc, ac/dc, and dc/dc power converters; circuit simulation; extensive laboratory work a four-week power converter design project. Prerequisite: 1.0 in E E 332; 1.0 in E E 351.

E E 454 Power System Analysis (4) Introduc- tion to methods of analyzing power systems. Includes symmetrical components, calculation of line parameters, representation of transmission lines and power components, and power flow control. Prerequisite: 1.0 in E E 351.
E E 455 Power System Dynamics and Protection (4) Analysis of symmetrical and unsymmetrical power systems’ networks, fault analysis, and stability studies. Prerequisite: 1.0 in E E 351.

E E 456 Computer-Aided Design in Power Systems (4) Design-oriented course in power system engineering. Students are assigned a project concerning system operation and planning, steady-state and dynamic behaviors of power systems, and distribution systems. Each involves formulation of design criteria, development of a project, and application of existing software. Prerequisite: either 1.0 in E E 454 or 1.0 in E E 455.

E E 457 Electric Energy Distribution Systems (4) Introduction to electric utility distribution systems. Primary and secondary network analysis and design, distribution substations, distribution transformers, capacitor application, overcurrent and overvoltage protection. System planning and reliability. Prerequisite: 1.0 in E E 351.

E E 461 Introduction to Computer-Communications Networks (4) Computer network architectures, protocol layers, network programming, transmission media, encoding systems, switching, multiple access arbitration, routing protocols, real-time, multicast, network security. Prerequisite: CSE 143; either MATH 390/STAT 390, STAT 381, IND E 315, or CSE 321. Offered: jointly with CSE 461.

E E 462 Principles of Mobile Robotics (4) Design-oriented course in autonomous mobile robots. C programming, microprocessors, motors, gears, sensors, advanced sensing techniques, serial communications, PID control, algorithmic control, reactive control, multi-tasking. Laboratory exercises include design, construction, and testing of autonomous mobile robots, which compete at the end of the term.

E E 463 Autonomous Mobile Robots (4) Design-oriented course in autonomous mobile robots. C programming, microprocessors, motors, sensors, advanced sensing techniques, serial communications, PID control, algorithmic control, reactive control, multi-tasking. Laboratory exercises include design, construction, and testing of autonomous mobile robots, which compete at the end of the term. Prerequisite: E E 462.

E E 465 Fiber Optics, Devices, and Applications (4) Wave propagation in optical waveguiding structures, signal distortion, coupling of modes, modulation, sources and detectors, fabrication and measurement methods, communication and sensor systems. Prerequisite: 1.0 in E E 332; recommended: E E 361.

E E 467 Antennas Analysis and Design (4) Fundamentals of antennas, analysis, synthesis and computer-aided design, and applications in communications, remote sensing, and radars. Radiation pattern, directivity, impedance, wire antennas, arrays, numerical methods for analysis, microstrip antennas, and reflector antennas. Prerequisite: 1.0 in E E 361.

E E 471 Computer Design and Organization (5) Introduction to computer architecture, algorithms, hardware design for various computer subsystems, CPU control unit design, hardwired and microprogrammed control, memory organization, cache design, virtual memory, I/O organization, and I/O hardware design. Prerequisite: either E E 271 or E E 371; CSE 143.

E E 472 Microcomputer Systems (5) Concepts of multi-level machines and computer systems organization. Utilizing microprocessors, digital computer studied at assembly- and high-level languages with emphasis on concepts of central processor architecture, memory organization, input/output and interrupts. Assembly language programming concepts applied to solution of various laboratory problems including I/O programming. Prerequisite: either E E 271 or E E 371; CSE 143.

E E 473 Linear Integrated Circuits (4) Design of linear integrated circuits applying modern MOS and BJT integrated circuit technologies: single-stage amplifiers; current-mirror DC bias and active load circuits; stability and frequency compensation of single-stage and two-stage operational amplifiers; output stages; current and voltage reference circuits. Prerequisite: 1.0 in E E 332.

E E 476 Digital Integrated Circuit Design (5) Sechen Comprehensive view of digital integrated circuit design. Topics to be covered include the design of inverters, static logic circuits, switch logic, and dynamic CMOS technology. Gives students extensive experience with industry-standard computer-aided design tools including Cadence (Virtuoso, DRC, LVS) and Avanti (Hspice). Credit not allowed for both E E 477 and E E 525. Prerequisite: E E 476.

E E 477 VLSI II (5) Sechen Provides a fairly deep understanding of how IC-based memory and datapath blocks are designed using static and dynamic CMOS technologies. Gives students extensive experience with industry-standard computer-aided design tools, including Cadence (Virtuoso, DRC, LVS) and Avanti (Hspice). Credit not allowed for both E E 477 and E E 525. Prerequisite: E E 476.

E E 480 Microwave Engineering I (4) Analysis and design of microwave lines and matching circuits. Lossy transmission lines. Mode structures in metallic and dielectric waveguides. Microwave resonators and magnetic devices. Smith chart and matching techniques. Prerequisite: 1.0 in E E 361.

E E 481 Microwave Electronic Design (4) Design of microwave circuits using S-parameter techniques. Measurement techniques, CAD of microwave systems. Includes design, fabrication, and evaluation of a microwave amplifier. Prerequisite: 1.0 in E E 332; 1.0 in E E 361.

E E 482 Semiconductor Devices (4) Fundamentals of semiconductor theory: carrier diffusion and drift; concept of direct and indirect energy materials, effective mass of mobile carriers; device physics, current- and potential-controlled devices, operating principles of bipolar, junction, and MOS field-effect transistors. Prerequisite: E E 332; E E 361.

E E 484 Sensors and Sensor Systems (4) Introduction to optical and solid-state chemical and physical sensors. Topics include transduction mechanisms, design parameters, fabrication methods and applications.

E E 489 Integrated Circuit Laboratory (1) Hands-on experience in the building of a PMOS device, complete with oxidation, diffusion, photolithography, etching, metallization, and testing. Credit/no credit only. Prerequisite: E E 486/MSE 486, which may be taken concurrently. Offered: jointly with MSE 489.

E E 495 Electrical Engineering Design: Integrated Circuit I (3-4) Engineering design process applied to integrated circuit design implemented in a design project selected by student teams. E E 496 must be taken to receive E E 495 credit. Credit not allowed for both E E 495/496 and E E 497/498. Prerequisite: E E 332; either E E 271 or E E 371.

E E 496 Robust Electrical Engineering Design: Integrated Circuit II (3-4) Robust engineering design process applied to integrated circuit design implemented in a design project selected by student teams, including sensitivity analysis and definition of design specifications. Second course of a two-course sequence. Credit not allowed for both E E 495/496 and E E 497/498. Prerequisite: E E 495.

E E 497 Electrical Engineering Design: Consumer Electronics I (3-4) Engineering design process applied to consumer electronics design implemented in a design project selected by student teams, including sensitivity analysis and definition of design specifications. Prerequisite: E E 495/496 and E E 497/498. Offered: jointly with MSE 496.

E E 498 Robust Electrical Engineering Design: Consumer Electronics II (3-4) Robust engineering design process applied to consumer electronics design implemented in a design project selected by student teams, including sensitivity analysis and definition of design specifications. Credit not allowed for both E E 495/496 and E E 497/498. Prerequisite: E E 497.

E E 499 Special Projects (2-5, max. 10) Assigned construction or design projects carried out under the supervision of the instructor.

E E 500 Graduate Seminar (1, max. 3) Weekly seminars on current topics in electrical engineering. More than one section may be offered in a given quarter. Credit/no credit only.

E E 502 Introduction to Microelectro
Mechanical Systems (4) Theoretical and practical aspects in design, analysis, and fabrication of MEMS devices. Fabrication processes, including bulk and surface micromachining. MEMS design and layout, MEMS CAD tools. Mechanical and electrical designs of components such as micro sensors and actuators, or chemical and thermal transducers, recent advances. Offered: jointly with M E 504/ M E 508.

E E 505 Probability and Random Processes (4) Foundations for the engineering analysis of random processes: set theoretic fundamentals, basic axioms of probability models, conditional probabilities and independence, discrete and continuous random variables, multiple random variables, sequences of random variables, limit theorems, models of stochastic processes, noise, stationarity and ergodicity, Gaussian processes, power spectral densities. Prerequisite: graduate standing and understanding of probability at the level of E E 416.

E E 510 Mathematical Foundations of Systems Theory (4) Mathematical foundations for system theory presented from an engineering viewpoint. Includes set theory; functions, inverse functions; metric spaces; finite dimensional linear spaces; linear operators on finite dimensional spaces; projections on Hilbert spaces. Applications to engineering systems stressed. Prerequisite: graduate standing or permission of instructor. Offered: jointly with CHEM E 510/A 510/M E 510; A.

E E 511 Introduction to Statistical Learning (4) Covers classification and estimation of vector observations, including both parametric and nonparametric approaches. Includes classification with likelihood functions and general discriminant functions, density estimation, supervised and unsupervised learning, feature reduction, projections such as microstructures or pattern recognition. Prerequisite: either E E 505 or CSE 515. Offered: W.

E E 512 Graphical Models in Pattern Recognition (4) Bayesian networks. Markov random fields, factor graphs, Markov properties, standard models as graphical models, graph theory (e.g., moralization and triangulation), probabilistic inference (including pearl’s belief propagation, Hugin, and Shafer-Shenoy), junction trees, dynamic Bayesian networks (including hidden Markov models), learning new models, models in practice. Prerequisite: E E 508; E E 511. Offered: Sp.

E E 515 Information Theory II (4) Includes advanced modern statistical coding techniques (statistical coding), advanced codes n graphs, source coding with errors (rate distortion), alternating minimization principles, channel coding with errors, network information theory, multiple description coding, and information theory in other areas including pattern recognition, bio-informatics, natural language processing, and computer science. Prerequisite: E E 514.

E E 516 Computer Speech Processing (4) Bilmis, Kirchoff, Ostendorf Introduction to automatic speech processing. Overview of human speech production and perception. Fundamental theory in speech coding, synthesis and reproduction, as well as system design methodologies. Advanced topics include speaker and language identification and adaptation. Prerequisite: E E 505; E E 516.

E E 517 Statistical Language Processing (4) Bilmis, Kirchoff, Ostendorf Introduction to major issues in natural language processing and human language technology, with emphasis on statistical approaches. Addresses topics in statistical parsing and tagging, dialogue systems, information extraction, and machine translation. Prerequisite: E E 505.

E E 518 Digital Signal Processing (4) Atlas Digital representation of analog signals. Frequency domain and z-transforms of digital signals and systems design of digital systems; IIR and FIR filter design techniques, fast Fourier transform algorithms. Sources of error in digital systems. Analysis of noise in digital systems. Prerequisite: knowledge of Fourier analysis techniques and graduate standing, or permission of instructor.

E E 519 Stochastic Analysis of Data From Physical Systems (4) Atlas Computer systems for acquisition and processing of stochastic signals. Calculation of typical descriptors of such random processes as correlation functions, spectral densities, power spectral densities and power spectral densities. Interpretation of statistical measurements made on a variety of physical systems (e.g., electrical, mechanical, acoustic, nuclear). Lecture plus laboratory. Prerequisite: E E 505 or equivalent.

E E 521 Multidimensional Signal Processing (3) Marks Multidimensional (MD) signals and systems, MD sampling theorem, sample dependence in higher dimensions, MD FIR filter design using windows and the McClellan transform, MD IIR filter stability and design. Current topics in MD signals and systems. Prerequisite: E E 442 or E E 518 or equivalent.

E E 525 VLSI II (5) Sechen Analyses how IC-based memory and datapath blocks are designed using static and dynamic CMOS technologies. Gives students extensive experience with industry-standard computer-aided design tools, including Cadence (Virtuoso, DRC, LVS) and Avanti (Hspice). Credit not allowed for both E E 477 and E E 525. Prerequisite: E E 476.

E E 526 VLSI III (4) Wilmans High-speed digital logical families based on output prediction logic; high-speed division, input and output pad design; state-of-the-art latch and flip-flop design; clock distribution, including PLLs and DLLs; noise considerations in high-speed digital IC design. Prerequisite: E E 477 or E E 525.

E E 527 Solid-State Laboratory Techniques (4) Darling Principles and laboratory techniques used in solid-state electronics research. Basic familiarity with practices and equipment used on-campus. Laboratory safety; materials handling, storage and disposal; clean room use; photoresist characteristics; mounting, bonding, and probing; wet chemical clean-up; evaporation; patterning of metal films using photore sist. Extensive laboratory with limited enrollment. Prerequisite: graduate standing and permission of instructor.

E E 529 Micron Optics and Optical Devices (4) Afte rnowitz, Yee Perturbations of energy states in semiconductors; direct and indirect transitions; absorption processes; optical constants; absorption spectroscopy; radiative and nonradiative transitions; processes occurring at p-n junctions; junction devices: LEDs and lasers, photovoltaics; self-electro-optic effect device; modern laser structures. Prerequisite: graduate standing or permission of instructor.

E E 531 Semiconductor Devices and Device Simulation (4) Darling, Lauringten, Yee Physical principles in semiconductor devices. Generation, recombination, p-n junctions, MOS, metal-semiconductor and other interface structures. Carrier transport at low and high level injection levels. Device simulation used to demonstrate physical principles and basic device operation. Project using device simulation. Prerequisite: E E 482 or graduate standing.

E E 532 Device Modeling for Circuit Simulation (4) Darling Compact modeling of semiconductor devices. Analytical models,
standard SPICE models, lumped-charge models using AHDL language. Emphasis on basic diodes, MOSFET, BJTs, and other models of interest, including sensor, photonic, and power models. Compact models using AHDL language model design project. Prerequisite: E E 531 or permission of instructor.

E E 533 Photodetectors and Photodetection (4) Aftonowitz, Yee Includes both the device physics and signal processing aspects of photodetectors. Photodiodes, photodetectors, photomultipliers, and solar cells are covered. Noise, signal to noise ratios and imaging considerations are also discussed. Prerequisite: E E 462 or graduate standing.

E E 534 Power Electronics (4) Detailed study of DC-to-AC inverters, pulse-width modulated and resonant DC-to-DC converter topologies; drive and protection circuits for efficient switching of semiconductor devices. Includes extensive computer-aided circuit simulation and power supply control. Prerequisite: graduate standing.

E E 536 Design of Analog Integrated Circuits and Systems (4) Helms, Soma Design of analog VLSI: specifications, design, simulation, layout. Covering CMOS and Bi CMOS technologies. Prerequisite: E E 433 or equivalent and graduate standing in electrical or computer engineering, or permission of instructor.

E E 537 Computation Methods for Circuit Analysis and Simulation (3) Introduction to numerical algorithms and computer-aided techniques for the simulation of electronic circuits. Theoretical and practical aspects of important analyses: large-signal nonlinear DC, small-signal AC, nonlinear transient, and large-signal steady-state. Simulation concepts applied to the modeling and characterization of various electronic devices.

E E 538 Topics in Electronic Circuit Design (1-5, max. 5) Topics of current interest in electronic circuit and system design. Course content varies from year to year, based on current professional interests of the faculty member in charge. Prerequisite: permission of instructor.

E E 539 Advanced Topics in Solid-State Electronics (1-5, max. 5) Lectures or discussion of topics of current interest in the field of solid-state electronics for advanced graduate students having adequate preparation in solid-state theory. Subject matter may vary according to the interests of students and faculty. Prerequisite: permission of instructor.

E E 541 Automatic Layout of Integrated Circuits (4) Sechen Examines the algorithms behind the following commonly used physical design automation tools: floorplanning, partitioning, placement, routing, compaction, and verification. Prerequisite: E E 271 or equivalent; experience programming in either C, C++, or Java.

E E 542 Advanced Embedded Systems Design (5) Peckol Studies advanced embedded system design principles and practices. Emphasizes formal design methods, architectures such as hardware/software co-design, investigates techniques for performance optimization, and examines distributed embedded systems. Prerequisite: E E 478. Offered: A.

E E 543 Models of Robot Manipulation (3) Hannaford Mathematical models of arbitrary articulated robotic (or biological) arms and their application to realistic arms and tasks, including the homogeneous coordinate model of positioning tasks, the forward and inverse kinematic models, the Jacobian Matrix, and the recursive Newton-Euler dynamic model. Prerequisite: linear algebra and graduate standing or permission of instructor.

E E 544 Advanced Robot Manipulation (4) Hannaford, Meinrad Continuation of the analysis of robot manipulation, considering kinematic redundancy, control of robot manipulators in contact with the environment, teleoperation, and grasping with multi-fingered hands. Students will perform a project and critique a research paper in the area of the project. Prerequisite: E E 543.

E E 545 Autonomous Multi-Robot Systems (4) Design-oriented course in autonomous multi-robot systems. Wireless peer communication protocols, multi-robot control methodologies and computational issues. Laboratory exercises include design, construction, and testing of multiple autonomous mobile robots, which compete as a team at the end of the term. Prerequisite: either E E 462 or E E 463 or graduate student standing.

E E 546 Advanced Topics in Control System Theory (1-5, max. 5) Topics of current interest in control system theory for advanced graduate students with adequate preparation in linear and nonlinear system theory. Prerequisite: permission of instructor. Offered when adequate enrollment develops prior to close of advanced registration.

E E 547 Linear Systems Theory (4) Linearity, linearization, finite dimensionality, time-varying vs. time-invariant linear systems, interconnection of linear systems, functional/structural description. Prerequisites: A A 447 or E E 447 and M E 471. Offered: jointly with A A 547/M E 547.

E E 548 Linear Multivariable Control (3) Introduction to MIMO systems, successive single loop design comparison, Lyapunov stability theorem, full state feedback, controller design, observer design, LQR problem statement, design, stability analysis, and tracking design. LQG design, separation principle, stability robustness. Prerequisites: A A 447 or E E 447 or M E 471. Offered: jointly with A A 548/M E 548.

E E 550 Nonlinear Optimal Control (3) Calculus of variations for dynamical systems, definition of the dynamic optimization problem, constraints and Lagrange multipliers, the Pontryagin Maximum Principle, necessary conditions for optimality, the Hamilton-Jacobi-Bellman equation, singular arc problems, computational techniques for solution of the necessary conditions. Prerequisite: graduate standing; recommended: A A 548 or E E 548. Offered: jointly with A A 550/M E 550.

E E 551 Power System Protection (4) Liu The protection of electric power systems from overcurrents and overvoltages. Analysis and design of overcurrents resulting from faults, lightning induced or otherwise, or from excessive loads or power swings. Analysis and design of overvoltages resulting from switching transients or lightning. Principal concern is with relays and lightning arrestors as protection means. Prerequisite: E E 455 or equivalent.

E E 552 Power Systems Dynamics and Control (4) Damborg, El-Sharkawi Advanced computer modeling and analysis of power systems. Application of modern systems and control theories. Prerequisite: E E 351 and E E 455 or permission of instructor.

E E 553 Power System Economics (4) Christia, Damborg, Liu Economic structure of power systems. Problem formulation, optimization methods and programming for economic analysis of power system operation and planning. Economic dispatch, load forecasting, unit commitment, interchange, planning and reliability analysis. Provides background to pursue advanced work in planning and operation. Prerequisite: graduate standing or permission of instructor.

E E 554 Large Electric Energy Systems Analysis (4) Christia, Liu Deals with problems whose solution depends upon the inversion of sparse matrices that occur in the planning and operational studies of large interconnected energy systems. Application studies include system model development, state estimation, and load flow. Prerequisite: E E 456 or permission of instructor.

E E 555 Fundamentals of Intelligent Systems (4) Fundamentals and applications of intelligent systems and biologically inspired algorithms such as neural networks, evolutionary computations, swarm optimization and fuzzy systems. Solving complex engineering applications with a combination of these technologies as well as with more traditional approaches such as statistical system theories.

E E 559 Special Topics in Electrical Energy Systems (1-5, max. 5) Topics of current interest in electrical power and energy devices and systems. Content varies from year to year, based on current professional interests of faculty members in charge. Prerequisite: permission of instructor.

E E 562 Artificial Intelligence for Engineers (3) Shapiro Covers main areas of artificial intelligence (AI) without need for extensive prerequisites. Programming languages for AI; problem solving; representations; control strategies; searching strategies; predicate calculus; rule-based deduction; goal-directed planning; knowledge-based systems. Prerequisite: CSE 373 or equivalent.

E E 563 Fault-Tolerant Computing (3) Soma Faults and their manifestation, issues, theory, and techniques of reliable systems design, testing, design for testability, self-checking and fail-safe circuits, coding techniques, system-level fault diagnosis, fault-tolerant communication, reliable software design, and evaluation criteria. Prerequisite: basic knowledge of digital systems design or permission of instructor. Offered: jointly with CSE 563.

E E 564 Parallel Computer Systems (3) Hwang, Kim Pipelined and vector processors; interconnection network for parallel processing, array and associative processors; multiprocessors; data-flow machines; systolic arrays and
Applications in large scale problems such as array antennas, radar cross section, rough surface scattering, and dense media scattering. Prerequisite: E E 573 or permission of instructor.

E E 575 Waves in Random Media (4) Taang Propagation and scattering of electromagnetic, optical, and acoustic waves by random media, scattering from rough surfaces and randomly distributed particles. Atmospheric turbulence, fog, rain, smog, clear-air turbulence detection, tomography, terrain scattering, scattering from blood cells and tissues, scattering by ocean waves. Applications to atmospheric sciences, bioengineering, geoscience, ocean engineering. Prerequisite: graduate standing or permission of instructor.

E E 576 Computer Vision (3) Overview of computer vision, emphasizing the middle ground between image processing and artificial intelligence, image formation, preattentive image processing, boundary and region representations, and case studies of vision architectures. Prerequisite: Solid knowledge of linear algebra, good programming skills, CSE or E E major or permission of instructor. Offered: jointly with CSE 576.

E E 577 Special Topics in Computer Vision (3) Topics vary and include: vision for graphics, probabilistic vision and learning, medical imaging, content-based image and video retrieval, robot vision, or 3D object recognition. Prerequisite: CSE/E E 576 or permission of instructor. Offered: jointly with CSE 577.

E E 579 Advanced Topics in Electromagnetics, Optics, and Acoustics (1-5, max. 5) Topics of current interest in electromagnetics, optics, and acoustics. Content varies from year to year, based on current professional interests of faculty member in charge. Prerequisite: permission of instructor.

E E 581 Digital Control (3) Chizeck Sampled-data systems, and z-transform, Frequency domain properties. Sampling D/A and A/D conversion. Controller design via discrete-time equivalents, direct methods, state feedback and observers. Quantization effects. LQR control and introduction to LQG optimal control. Prerequisite: either E E/A A/ or M E 548. Offered: jointly with A A/M E/E E 581; W.

E E 586 Digital Video Coding Systems (4) Sun Introduction to digital video coding algorithms and systems. Theoretical and practical aspects of important topics on digital video coding algorithms, motion estimation, video coding standards, systems issues, and visual communications. Prerequisite: graduate standing or permission of instructor.

E E 587 Multimedia Compression and Networking (4) Hwang Addresses four major components of multimedia: 1) data compression of multimedia (e.g., speech, audio, image, and video); 2) quality of service (QoS) issues for data transmission over IP; 3) multimedia streaming and conferencing applications; and 4) intellectual property management and protection (IPMP) of multimedia contents. Co-requisite: E E 518.

E E 588 Advanced Topics in Sensors and Sensor Systems (3) Topics of current interest in sensors and sensor systems. Prerequisite: permission of instructor.

E E 590 Advanced Topics in Digital Computer Systems (2-5, max. 15) Lectures or discussions of topics of current interest in the field of digital system. Subject matter may vary from year to year. Prerequisite: permission of instructor.

E E 591 Robotics and Control Systems Colloquium (1, max. 3) Colloquium on current topics in robotics and control systems analysis and design. Topics presented by invited speakers as well as on-campus speakers. Emphasis on the cross-disciplinary nature of robotics and control systems. Credit/no credit only. Offered: jointly with A A/CH E.E M E 591.

E E 592 Electrical Engineering Research Survey (1) Weekly presentations on current research activities by members of the department. Credit/no credit only.

E E 593 Feedforward Control (3) Devasia Design feedforward controllers for precision output tracking; inversion-based control of non-minimum-phase systems; effect of plant uncertainty on feedforward control; design of feedforward controllers for applications such as vertical take off and landing aircraft, flexible structures and piezo-actuators. Prerequisite: A A 547/E E 547/M E 547. Offered: jointly with A A/M E 593.

E E 594 Robust Control (3) Basar Foundations of linear analysis and control theory, model realization and reduction, balanced realization and truncation, stabilization problem, coprime factorizations, Youla parameterization, matrix inequalities, H-infinity and H2 control, KYP lemma, uncertain systems, robust H2, integral quadratic constraints, linear parameter varying synthesis, applications of robust control. Offered: jointly with A A/594/M E 594; odd years; Sp.
E E 595 Advanced Topics in Communication Theory (1-5, max. 5) Extension of 507, 508, 518, 575 to 595. Covers each year, covering such topics as: detection theory, decision theory, game theory, adaptive communication systems, nonlinear random processes. Prerequisite: permission of instructor.

E E 596 Advanced Topics in Signal and Image Processing (2-5, max. 5) Topics of current interest in signal and image processing. Content may vary from offering to offering. Prerequisite: permission of instructor.

E E 599 Selected Topics in Electrical Engineering (*) Prerequisite: permission of instructor.

E E 600 Independent Study or Research (*)

E E 700 Master’s Thesis (*)

E E 800 Doctoral Dissertation (*)

Engineering

ENGR 100 Introduction to Engineering Design (5) I&S Introduction to design and communication principles through engineering project approach, stressing teamwork, design process, specialties and tools of engineering, creative and analytical thinking, professional ethics, social, economic and political context, open-ended problems. Grading based on quality of engineering projects and presentation of design through written, oral, and graphical communication. Offered: AWSp.

ENGR 101 Technology and Society (5) I&S Examines revolutionary technologies and how they have shaped the world. Investigates how railroads, computers, automobiles, airplanes, the Internet, nanotechnology, and other innovations affect everyday life. Includes examination of how geographers, philosophers, scientists, artists, engineers, and others are involved in creation, implementation, and criticism of technology.

ENGR 197 Engineering Problem Solving (1, max. 12) Lectures and problem sessions in mathematics, chemistry, and physics with engineering applications. Enrollement restricted to Minority Science, Engineering Program (MSEP), and Women in Science and Engineering (WISE) students. Credit/no credit only. Offered: AWSp.

ENGR 199 Special Projects (1-3, max. 3) Students propose problems to solve to an engineering faculty member. The problems may be selected from the student’s own experiences and interests, from the interest of the faculty member, or from other sources such as faculty or graduate students doing research projects, or from personnel in the physical medicine area, occupational therapy, hospital, industry, government. Corroboration by an engineering faculty member is required. Project suggestions are available. Offered: AWSp.

ENGR 202 Special Projects (1-3, max. 3) Projects on topics of current interest in engineering. Offered: A.

ENGR 321 Engineering Cooperative Education (1-2, max. 16) Engineering practicum: integration of classroom theory with on-the-job training. Periods of full-time work alternate with periods of full-time study. Open only to students who have been admitted to the Engineering Cooperative Education Program. Requires subsequent completion of ENGR 322 to obtain credit. Credit/no credit only. Offered: AWSpS.

ENGR 322 Engineering Cooperative Education Postwork Seminar (0-0) Reporting and evaluation of co-op work experience, and discussion of current topics in engineering. To be taken during the first quarter in school following each work session. Offered: AWSpS.

ENGR 360 Introductory Acoustics (3) NW Introduction to propagation of acoustical waves; emphasis on propagation of sound waves in air, but material is applicable to propagation of sound waves in liquids, including underwater acoustics, and to propagation of stress waves in solids. Includes a historical development of acoustics, terminology, and units employed. Prerequisite: either MATH 136 or MATH 307; PHYS 123. Offered: Sp.

ENGR 498 Special Topics in Engineering (1-5, max. 6) Offered: AWSpS.

ENGR 499 Special Projects in Engineering (1-3, max. 6) Offered: AWSpS.

ENGR 598 Seminar Series in Engineering (1, max. 12) Kalonji, Reed Graduate seminar series on topics of interest to all engineering students.

Industrial Engineering

IND E 101 Introduction to Industrial Engineering (1) I&S Examines the basic concepts and methods of industrial engineering through team-based hands-on activities. Explores the profession of industrial engineering. Discusses resources available to Industrial Engineering students at the University of Washington. Offered: Sp.

IND E 295 Product Dissection (3) Jorgensen, Kumar Examination of the way products and machines work, their physical operation, the manner in which they are constructed, and the interaction between design, materials, and manufacture. Laboratories involve dissection and assembly of several common industrial and consumer products by student teams. Offered: jointly with M E 295.

IND E 310 Linear and Network Programming (4) Zabinsky Modeling and optimization of linear network problems. Topics include: optimization of linear systems, mathematical model design, simplex method, primal-dual algorithms, parametric programming, goal programming, network problems and algorithms, and PERT/CPM. Prerequisite: either MATH 136 or MATH 308; CSE 142. Offered: A.

IND E 311 Stochastic Models and Decision Analysis (4) Zabinsky Stochastic models applied to decision problems in engineering. Topics include: Markov chains, queuing theory, queuing applications, and decision analysis. Prerequisite: IND E 315; IND E 310. Offered: W.

IND E 315 Probability and Statistics for Engineers (3) NW Application of probability theory and statistics to engineering problems, distributions theory and discussion of particular distributions of interest in engineering, statistical estimation and data analysis. Illustrative statistical applications may include quality control, linear regression, and analysis of engineering data sets. Prerequisite: either MATH 136 or MATH 307. Offered: AWSpS.

IND E 316 Design of Experiments and Regression Analysis (4) NW Kapur Introduction to the analysis of data from planned experiments. Analysis of variance for multiple factors and applications of orthogonal arrays and linear graphs for fractional factorial designs to product and process design optimization. Regression analysis with applications in engineering. Prerequisite: IND E 315. Offered: jointly with STAT 316.

IND E 337 Introduction to Manufacturing Systems (4) Storch Description of manufacturing systems. Includes discussion of current trends in manufacturing. Introduces process flow analysis, manufacturing organizations including job-shop, assembly lines, and group technology, manufacturing inventory philosophies (just-in-time, MRP, OPT), work environment, and work simplification.

IND E 351 Human Factors in Design (4) Kapur, Storch Examination of the abilities and limitations of the human aspect in the design of operational systems and components. Functional, psychological, physiological, and environmental considerations.

IND E 424 Simulation (4) Beamon Discrete-event simulation methodology emphasizing model formulation and construction with modern simulation languages and environments, statistical basis for evaluating model results, design and management of simulation projects. Application to manufacturing, retail, and service industries. Prerequisite: IND E 337, which may be taken concurrently. IND E 311. Offered: W.

IND E 430 Manufacturing Scheduling and Inventory (4) Beamon, Storch Manufacturing scheduling and inventory control for different
work organizations. Coverage of workforce scheduling, job- and flow-shop scheduling and order release; production line balancing, MRP II, Lean Production, and data management. Particular attention to computer-based aspects of management and scheduling for manufacturing and service industries. Prerequisite: IND E 337; IND E 311.

IND E 431 Computer Integrated Manufacturing (4) Design and control of computer-based production systems. Focus on selection and integration of flexible manufacturing technology, computer hardware, application and operating system software, data communication networks, data management systems. Laboratory assignments concentrate on programming and integration of system components. Current literature and recommended texts used as reference sources. Prerequisite: IND E 337; CSE 142.

IND E 439 Plant Layout and Material Handling (4) Beamon, Storch Design of new or expanding industrial facilities. Consideration of work organization and layout. Study of basic design of plant systems, including plumbing, electrical, HVAC, illumination, acoustics, and waste handling. In depth coverage of material handling system design and equipment choices. Prerequisite: IND E 310.

IND E 445 User Interface Design (4) Furness Design oriented to cover fundamentals of user interface design; models on human computer interaction, software psychology, input devices, usability, cognitive and perceptual aspects of human-computer interaction, advanced interface, and research methodologies are discussed. Offered: jointly with T C 455; A.

IND E 494 Design in the Manufacturing Firm (4) Engineering design in manufacturing firms is presented. Topics include design methodology, concurrent engineering, and project management. Focus on the relationship between product design and manufacturing (design for production and assembly). Prerequisite: IND E 337; T C 333. Offered: W.

IND E 495 Industrial Engineering Design (4) Capstone senior design project involving identification and synthesis of industrial engineering students. Students apply their knowledge of industrial engineering to actual industrial problems. Prerequisite: IND E 494; IND E 351. Offered: Sp.

IND E 496 Technology-Based Entrepreneurship (3) Concentrates on hands-on aspects of innovation and entrepreneurial enterprise development. Examines relationships between innovation, iterative prototyping, and marketing testing. Students identify market opportunities, create new technology-based products and services to satisfy customer needs, and construct and test prototypes. Prerequisite: IND E 250. Offered: jointly with M E 496.

IND E 498 Special Topics in Industrial Engineering (1-5, max. 9) Lecture and/or laboratory.

IND E 499 Special Projects (2-5, max. 9).

IND E 513 Linear Optimization Models in Engineering (3) Zabinsky Advanced formulation techniques to expand applications of linear programming to large-scale models. Appreciation of role of optimization models in engineering applications through introduction of techniques such as decomposition. Individual engineering projects. Prerequisite: IND E 310 and MATH 308 or permission of instructor.

IND E 516 Applications of Optimization in Engineering (3) Zabinsky Discussion of issues arising in applications of optimization to engineering design. Emphasis on formulating problems and selecting appropriate solution techniques. Random search methods for problems otherwise computationally intractable. Individual projects in engineering optimal design. Prerequisite: AMATH/MATH IND E 515 and MATH 328 or permission of instructor. Offered: jointly with MATH 510.

IND E 518 Seminars on Advances in Manufacturing and Management (1) Mescher, Ramulu, Woo Current topics and advances made in manufacturing and management. Topics presented by invited speakers from academia and industry. Emphasis on the multidisciplinary nature of manufacturing and management. Offered: jointly with M E 518 AWSp.

IND E 521 Quality Control in Manufacturing (3) Kapur, Storch Design of quality control systems in manufacturing. Use of advanced statistical process controls, sampling inspection techniques, process capability, and other statistical tools. Also includes vendor sourcing and control tools, methods for establishing specifications and tolerances, quality function deployment, and other quality control techniques. Prerequisite: graduate standing.

IND E 524 Robust Design and Quality Engineering (3) Kapur Introduction to robust design and quality engineering. Applications of design of experiments for product and process design optimization. Experimental design using orthogonal arrays and linear graphs. System models using Chebyshev's orthogonal polynomials. Robustness in design and quality improvement for complex systems including Taguchi methods for quality engineering. Prerequisite: IND E 316 or equivalent.

IND E 531 Computer Integrated Manufacturing (3) Design and analysis of advanced manufacturing systems from a strategic as well as technological perspective. Focus on information generation, management, and coordination aspects of complex manufacturing organizations. Examination of system integration alternatives and consequences for relationships with customers and suppliers. Prerequisite: IND E 431 or equivalent. Offered: jointly with M E 505.

IND E 535 Engineering Simulation (3) Beamon Advanced applications of discrete event, continuous, and combined discrete-continuous simulation modeling. Detailed examination of fundamental computer programming concepts underlying the design and development of simulation languages, variance reduction techniques, and output analysis for various engineering, service systems, and manufacturing applications. Prerequisite: IND E 424 or equivalent.

IND E 537 Introduction to Manufacturing Systems (3) Storch Description of manufacturing systems. Includes discussion of current trends in manufacturing, especially lean principles. Introduces process flow analysis, manufacturing organizations including job-shop, assembly lines, and group technology, manufacturing inventory philosophies (just-in-time, MRP, OPT), work environment, and work simplification. Offered: jointly with ENV H 537; A.

IND E 538 Large Assembly Manufacturing Systems (3) Storch Presents principles of group technology, zone construction, product-oriented work breakdown structure. Application to shipbuilding, aircraft, rail-car, and truck manufacturing. Techniques of production planning, scheduling and control, organization, and plant layout, as well as the role of the computer, are studied in detail. Prerequisite: graduate standing.

IND E 543 Virtual Interface Technology (1/3, max. 3) Furness Explores advanced concepts and technologies for interfacing humans to complex machines, with focus on virtual interfaces. Interface design principles reviewed from psychological and technological perspectives. Hardware, software, and mindware aspects of virtual interfaces investigated. Applications postulated and designed. Prerequisite: graduate standing in College of Engineering or permission of instructor.

IND E 544 Virtual World Development (3) Furness Software implementation, physiological and cognitive constraints, and the mathematics and philosophy of inclusion. Development of software tools, editing and interaction techniques, disposition of virtual world entities, nature of space, situated knowledge, divergent models for multiple participants, experiential mathematical, cyberspace, cultural, legal, moral, ethical issues. Prerequisite: IND E 543 or permission of instructor.

IND E 545 User-Centered Design (4) Tuska Explores the user-centered design paradigm.
from a broad perspective, emphasizing how user research and prototype assessment can be integrated and safely diffuse in the design process. Students learn to think like a user-centered designer and carry out activities that are key to user-centered design. Offered: jointly with T C 518.

IND E 551 Elements of Dynamic Enterprise Modeling (3) Introduces practical techniques for modeling, analyzing, and implementing real-time enterprise systems in application areas such as manufacturing, supply chain flow control, and logistics decision schemas. Uses basic mathematical tools supported with a symbolic algebra software tool. Requires basic computer skills. Offered: A.

IND E 552 Introduction to Real-Time Enterprise Control (3) Provides students with principles, designs, techniques and algorithms for synthesizing real-time control of enterprise processes, using hybrid systems theory. Application areas include supply chain flow control, logistics decision schemas, transportation systems, dynamic reconciliation procedures, minimum cost production, and maximum profit price/ordering strategies. Prerequisite: IND E 551, or permission of instructor. Offered: W.

IND E 553 Modeling and Automation of Enterprise Processes (3) Third course in a three-course sequence. Provides architecture, algorithms and procedures for designing and implementing enterprise control policies for automating and enhancing enterprise functionality. Emphasis on hybrid system theories. Prerequisite: IND E 552, or permission of instructor. Offered: W.

IND E 554 Recognition of Health and Safety Problems in Industry (4) Develops skills in occupational health and safety hazard recognition in a variety of important northwest industries. Focuses on process understanding and hazard recognition skills during walk-through inspections of several local facilities, stressing a multidisciplinary approach. Offered: jointly with ENV H 564.

IND E 556 Introduction to Ergonomics (3) Basic principles of ergonomics in work environment applied to problems of worker and management. Topics include measurement of physical work capacity, problems of fatigue and heat stress, applied biomechanics, worker-machine interactions and communication, design of displays and controls. Prerequisite: basic human physiology or permission of instructor. Offered: jointly with ENV H 566/NSG 508; odd years; Sp.

IND E 557 Applied Occupational Health and Safety (3) Camp, Johnson Application of occupational safety and health principles. Student teams perform evaluations, assess production methods/processes and exposures, health and safety procedures and programs, and develop engineering and administrative controls. Students perform on a consulting project with a local company including budgeting, project reporting, and presentation. Offered jointly with ENV H 559 and NSG 550. Offered: Sp.

IND E 570 Supply Chain Systems (3) Beamon Concepts developed related to the design, engineering and implementation of supply chain systems through an exploration of contemporary practice and research, focusing on current issues, analytical frameworks, and case studies. Prerequisite: IND E 315 or equivalent.

IND E 591 Seminar (1) Credit/no credit only. Topics of current interest in industrial engineering. Prerequisite: graduate standing in Industrial Engineering or permission of instructor.

IND E 592 Seminar (1) Credit/no credit only. Topics of current interest in industrial engineering. Prerequisite: graduate standing in Industrial Engineering or permission of instructor.

IND E 593 Seminar (-1) Credit/no credit only. Topics of current interest in industrial engineering. Prerequisite: graduate standing in Industrial Engineering or permission of instructor.

IND E 594 Seminar (-1) Credit/no credit only. Topics of current interest in industrial engineering. Prerequisite: graduate standing in Industrial Engineering or permission of instructor.

IND E 595 Special Topics in Industrial Engineering (1-5, max. 9) Prerequisites: permission of supervisor.

IND E 600 Independent Study or Research (*). Offered: Sp.

IND E 700 Master’s Thesis (*). Offered: W.

IND E 800 Doctoral Dissertation (*). Offered: W.

Materials Science and Engineering

MSE 288 Introduction to Modern Materials (1) Materials and advances in materials are at the core of a large number of significant technological advances. Seminar format highlights processing, properties, and uses of a broad class of materials for a variety of applications, each introduced by a faculty member from the department.

MSE 310 Introduction to Materials Science and Engineering (2) Introduces the materials field to new department majors. Examples are drawn from ceramics, metals, polymers, electronic materials and composites. Structure-properties-manufacturing-design relationship are emphasized. Materials selection design project. Introduction to research. Offered: A.

MSE 311 Integrated Junior Laboratory I (2) Laboratory experimental techniques including writing, literature search, research planning and computer applications. Optical microscopy experiments, sample preparations, X-ray equipment, and x-ray diffraction analysis of materials. Offered: A.

MSE 312 Integrated Junior Laboratory II (2) Materials processing related laboratory experiments, including powder synthesis, redox reactions of particulate materials, grain growth, recrystallization, phase transformation, green tape processing, particle interaction and rheology, slip and tape casting, and dry processing, soft-gel processing, polymer processing, sintering behavior, metal welding, and heat treatment. Offered: W.

MSE 313 Integrated Junior Laboratory III (2) Kinetics and phase transformation related laboratory experiments, including solidification, Mechanical properties related laboratory experiments, including stress-strain behavior of materials and elastic modulus of materials, effect of work hardening on stress strain behavior, and effect of surface condition of the strength of glass. Offered: Sp.

MSE 321 Thermodynamics and Phase Equilibrium (4) Phase equilibria in materials systems of one, two and three components. Determination of phase diagrams. Quantitative applications of thermodynamics to systems of interest to materials scientists; detailed review of thermodynamic laws and principles. Offered: A.

MSE 322 Kinetics and Microstructural Evolution (4) Applications of thermodynamic and kinetic principles to the study of transport processes, transformations and reactions in engineering materials. Thermal activation and rates of processes, nucleation and growth, phase transformations, grain growth, sintering, among other processes. Prerequisite: MSE 321. Offered: W.

MSE 331 Crystallography and Structure (3) Theory and practice of x-ray diffraction with applications to materials systems. Principles of crystal symmetry, lattice systems, and stereographic projections. Bragg’s law of diffraction, Laue conditions, diffraction by a single crystal and powder diffraction techniques and their applications to lattice, phase, strain, and texture analyses. Prerequisite MSE 170. Offered: A.

MSE 332 Materials Characterization (3) Principles and applications of analytical techniques, imaging, diffraction and spectroscopy for materials characterization including crystal structures, texture formation, phase analysis. Nano- and micro-structures of materials including defects and second phases, chemistry, bonding, compositions of materials. Demonstrations and lab experiments involving light scattering and diffraction techniques. Prerequisite: MSE 170; MSE 331. Offered: S.

MSE 342 Materials Processing I (3) Provides students with the fundamentals and applications of metal and alloy processing techniques. Focuses on relationships between the processing fundamentals and practice, and between processing, microstructure, and properties. Ferrous and non-ferrous metal and alloy processing are discussed. Prerequisite: MSE 170; MSE 322. Offered: W.

MSE 351 Electron Theory of Engineering Materials (3) Introduction to elementary solid-state concepts in materials, free electrons, and band theories. Principles to conduction in metals, insulators, semiconductors, and applications of semiconductors and devices. Prerequisite: MSE, 170, MSE 331. Offered: W.

MSE 352 Functional Properties of Materials I (3) Introduction to thermal properties, electrical (ionic and polaron) conduction and optical properties, including origins of color, interaction of light wave with materials, lasers and optoelectronics. Focuses on the relations between physical properties and chemical composition, crystal structure and microstructure. Prerequisite: MSE 351. Offered: S.

MSE 431 Physical Materials Principles (3) Principles of relationships between processing, properties and structure of materials with emphasis on microstructures, phase compositions and physical properties of materials systems, including ceramics, metals, polymers, composites, compound semiconductors, magnetic systems, and biological hard tissues. Prerequisite: MSE 310; MSE 351; MSE 342; MSE 362. Offered: A.

MSE 442 Materials Processing II (3) Develops a basic understanding of both engineering and science aspects of ceramic processing. Fundamentals of powder processing and characterization, green body formation, sintering, microstructural development and properties. Prerequisite: MSE 342. Offered: A.

MSE 443 Extractive Process Analysis (3) Extractive processes analyzed by the methods of material and energy balances, computational thermodynamics, process kinetics and reactor theory. Introduction to process optimization. Prerequisite: MSE 321. Offered: S.

MSE 452 Functional Properties of Materials II (4) Dielectric materials including ferroelectrics, piezoelectrics and pyroelectrics, magnetic properties, high temperature superconductivity, shape memory materials. Detained discussion on relations of these properties with atomic and crystal structures, and applications. Prerequisite: MSE 351, MSE 352. Offered: W.

MSE 462 Mechanical Behavior of Materials II (4) Influence of structure on the mechanical properties of materials. Stress-strain tensors and response of materials to multiaxial loads. Effect of symmetry on elastic properties; spring dashpot analogs for viscoelasticity; strengthening mechanisms and continuum plasticity; failure probability and toughening mechanisms; creep, fatigue and stress corrosion cracking. Prerequisite: MSE 362. Offered: W.

MSE 463 Corrosion and Wear of Materials (4) Mechanisms of corrosion, thermodynamics, kinetics of corrosion. Passivity; Pourbaix diagrams; corrosion rate testing and measurements; forms of corrosion; effects of alloy and environmental variables; corrosion testing. Wear mechanisms: adhesive, abrasive, erosive. Fretting; surface roughness, wear testing. Coatings for corrosion and wear protection. Offered: S.

MSE 471 Introduction to Polymer Science and Engineering (3) Introduction of preparative methods of polymers; physical chemistry of polymeric molecules in solution, liquid and solid phase; thermodynamics of polymers; methods of characterization; mechanical properties; fabrication techniques; properties of commercial polymers. Recommended: one quarter of physical chemistry and one quarter of organic chemistry. Offered: A.

MSE 473 Noncrystalline State (4) Chemistry and physics of inorganic glass and amorphous semiconductors; structure, properties, and processing of vitreous materials. Prerequisite: MSE 170; MSE 321; MSE 331. Offered: S.

MSE 475 Introduction to Composite Materials (4) Microstructural design and processing of composite materials; polymeric, metallic, and ceramic matrices; fibers and fiber-reinforced composites, thermal, mechanical, and electrical properties. Recommended: basic background in materials science and engineering (level of MSE 170), mechanics of materials (level of CEE 220), and linear algebra and familiarity with matrix operations (level of MATH 308 or 318). Offered: A.

MSE 477 High Temperature Materials (4) Chemical and mineralogical composition; processing methods; thermal, physical, and chemical properties and tests; application in high-temperature processes. Prerequisite: MSE 310, MSE 321.

MSE 481 Science and Technology of Nanostructures (3) Comprehensive introduction to the developing field of nanoscience and nanotechnology. Includes materials properties as a function of length-scale and dimensionality, applications in medicine/biology, electronics, magnetism, and electro-mechanical systems. Cooperative learning approaches involving student participation with team assignments, class activities, lectures, and laboratory visits. Offered: W.

MSE 484 Materials Chemistry (3) NW Overview of basic principles, techniques, and applications associated with solid materials. Topics include description of crystals, examples of crystal structures, structural analysis, band structures of solid materials, preparation of materials, materials for microelectronics, and materials for information technology. Prerequisite: CHEM 453 or CHEM 455. Offered: jointly with CHEM 484; Sp.

MSE 485 Introduction to Electronic Packaging and Materials (3) The governing equations of transport phenomena: mechanical, thermal, and electromagnetic behavior, thermomechanical and electromagnetic properties of packaging materials, electromagnetic characteristics of circuit and transmission lines, thermal management and reliability analysis of packaging, interconnect and material processing technology. Prerequisite: MSE 170. Offered: jointly with M E 485; A.

MSE 486 Fundamentals of Integrated Circuit Technology (3) Processing physics, chemistry and technology, including evaporation, sputtering, epitaxial growth, diffusion, ion implantation, laser annealing, oxidation, chemical vapor deposition, photolithography, Design considerations for bipolar and MOS devices, materials and process characterization. Future trends. Prerequisite: either E E 482 or MSE 351. Offered: jointly with E E 486; W.

MSE 489 Integrated Circuit Laboratory (1) Hands-on experience in the building of a PMOS device, complete with oxidation, diffusion, photolithography, etching, metallization, and testing. Prerequisite: E E 486/MSE 486, which may be taken concurrently. Offered: jointly with E E 489; W.

MSE 491 Materials Design and Failure (1) Develop understanding of mechanical design of all engineering materials (metals, ceramics, polymers, glasses, elastomers, composites); classes of engineering materials; materials, process selection, optimization for engineering applications; statistical quality control principles; common mechanical failure mechanisms; lab experiments and term projects involving design, hands-on processing, failure analysis. Offered: W.

MSE 492 Design in Materials Engineering II (3) Materials engineering design criteria including: materials selection, process design, and manufacturability issues; statistical methods and quality control concepts for engineering design; engineering economics for safety. Primary focus is on the completion of the two-quarter team design project on materials engineering. Prerequisite: MSE 491. Offered: Sp.

MSE 497 Undergraduate Research (1-5, max. 12) Research in materials under faculty supervision other than the MSE senior project. Cannot be used toward the technical elective requirements in the MSE major. Credit/no credit only.

MSE 498 Special Topics (1-5, max. 5) Special topics in materials science and engineering offered as a course with lectures, conferences, or laboratory. Offered: AWSpS.

MSE 499 Special Project (+, max. 5) Materials science and engineering field or laboratory investigations in group or individual setting. Written report required. Offered: AWSpS.

MSE 501 Advanced Processing of Inorganic Materials (3) Discusses advanced processing of inorganic materials including metals, ceramics and electronic materials, such as high temperature processing, sintering, solidification, single crystal growth form liquid, and vapor phase deposition. Emphasizes both the fundamentals and practical approaches of these processing techniques. Offered: every year; A.

MSE 502 Sol-Gel Processing (3) Fundamentals of colloid science and the physics and chemistry of the sol-gel process. Emphasizes the synthesis and applications of various materials, such as multi-component oxides, nano-composites, meso- and microporous materials, organic/inorganic hybrids, and biomaterials that have important applications in both leading technologies and modern industries. Offered: odd years; A.

MSE 504 Introduction to Microelectro Mechanical Systems (4) Theoretical and practical aspects in design, analysis, and fabrication of MEMS devices. Fabrication processes, including bulk and surface micromachining, MEMS design and layout. MEMS CAD tools. Mechanical and electrical design. Applications such as micro sensors and actuators, or chemical and thermal transducers, recent advances. Offered: jointly with E E 502/M E 504; A.

MSE 510 Bonding, Crystallography, and Symmetry-Related Properties of Materials (3) Rigorous introduction to the fundamentals of bonding, symmetry, crystallography, and related properties. Quantum mechanical foundation of cohesion and properties of solids. Geometric approach to understanding symmetry elements in 2-D and 3-D, including point groups, space groups, stereographic projections, and bravais
lattices. Tensor properties of crystals related to crystallography and symmetry. Offered: A.

MSE 512 Experimental Transmission Electron Microscopy (3) Fundamentals of electron optics as applied to microscopy; applications of contrast theories and electron diffraction with emphasis on electron diffraction; quantification of elemental compositional analysis with energy dispersive x-ray spectroscopy and electron energy loss spectroscopy; high voltage electron microscopy. Prerequisite: MSE 512 which may be taken concurrently. Offered: W.

MSE 513 Transmission Electron Microscopy Laboratory (2) One four-hour laboratory and one two-hour discussion/demonstration per week; metallic, ceramic, electronic biological sample preparation techniques; diffraction, imaging, and spectroscopy techniques in electron microscopy. Prerequisite: MSE 512 which may be taken concurrently. Offered: W.

MSE 515 Advanced Transmission Electron Microscopy (3) Principles of image formation in crystalline and amorphous materials at the atomic resolution level; high spatial resolution electron diffraction with emphasis on convergent beam electron diffraction; quantitative elemental compositional and chemical analysis with energy dispersive x-ray spectroscopy and electron energy loss spectroscopy; high voltage electron microscopy. Prerequisite: MSE 512 and MSE 513. Offered: odd years; Sp.

MSE 516 Advanced Mineralogy (3) Crystal symmetry: point groups, space groups. Mathematical description of crystal structures; group theory and irreducible representations; tensor description of physical properties; stress, strain, piezoelectricity, elasticity; structural and magnetic phase transition, Landau theory, deformation and creep in crystals; elasto-viscous properties of Earth’s mantle, crystal chemistry and solid state reactions. Offered: jointly with ESS 537; Sp.

MSE 520 Seminar (1, max. 6) Review of research problems in recent literature. Registration required for all graduate students. Credit/no credit only. Offered: AWSp.

MSE 524 Applied Rate Phenomena (3) Introduction to rate theory and transport processes. The principal thrust is on applications in ceramics and metallurgy. Prerequisite: basic course in transport phenomena or permission of instructor. Offered: W.

MSE 530 Fundamentals and Applications of Metal Finishing (3) Fundamentals and applications of corrosion to the finishing and processing of metals. Corrosion, electrochemical fundamentals, materials cleaning processes, electrodeposition, finishing processes. Offered: odd years; A.

MSE 541 Defects in Materials (3) Detailed study of the general properties and effects of point, line, and magnetic defects in crystalline solids. Prerequisite: MSE 331 or equivalent. Offered: W.

MSE 544 Mechanical Behavior of Materials (3) Mechanical properties of metals, ceramics, and polymers. Elasticity and viscoelasticity. Macroscopic and microscopic aspects of deformation and fracture. Continuum plasticity and microscopic hardening mechanisms. High temperature deformation. Fracture mechanics, brittle and ductile fracture. Deformation and fracture mechanisms maps. Prerequisite: MSE 510 and MSE 541 or permission of instructor.

MSE 550 Magnetism, Magnetic Materials, and Related Technologies (3) A comprehensive introduction to magnetism, magnetic materials, and related applications. Discusses intrinsic and phenomenological concepts of magnetism, ordered magnetic materials (emphasizing their structure-sensitive properties), magnetic phenomena, small particles/thin films, and applications (magnetic recording, permanent magnets, quantitative imaging of magnetic domains, surface and interface magnetism, giant magneto-resistance). Offered: Sp.

MSE 553 Vacuum Science and Technology (3) Fundamental theory and gas kinetics and treatment of gas flow, working principles of vacuum pumps and gauges, characteristics required of vacuum components, material selection, fundamentals essential to vacuum system design. Covers both fundamental and practical aspects of modern vacuum science and technology.

MSE 555 Biomimetics: Bioinspired Design and Processing of Materials (4) How biological organisms produce materials with controlled structure, chemistry and hierarchy to attain physical properties far superior to traditional engineering materials. Fundamental biological building materials, their synthesis, and their self-assembly with emphasis on examples of soft and hard tissues.

MSE 559 Thin Film Science, Engineering, and Technology (3) The physics, chemistry, and engineering aspects of thin film deposition and technology. Vapor phase deposition emphasized. Topics include reactor types, vapor phase transport and hydrodynamics, surface and mass transport limited kinetics, nucleation and growth, homoepaxy, heteroepaxy, and thin film characterization. Prerequisite: permission of instructor. Offered: jointly with CHEM E 559.

MSE 562 Introduction to Electronic Composites (3) Fundamentals of microstructure-macro-

MSE 563 Advanced Composites: Design and Manufacturing (3) Manufacturing and processing techniques of metal-, polymer-, and ceramic-matrix composites; design considerations related to manufacturing techniques; non-destructive testing of composite structures. Fiber-matrix interfacial features and interfacial thermodynamics applied to selection of fiber-matrix combinations. Prerequisite: MSE 475 or M E 450 or equivalent by permission of instructor. Offered: jointly with M E 563; Sp.

MSE 565 Electron Theory of Materials (3) Solid-state concepts of materials. Atomic bonding, statistical mechanics, Brillouin zone theory. Applications to conducting, semiconducting, and magnetic properties of metals, semiconductors, and insulators. Prerequisite: MSE 466 or equivalent. Offered: W.

MSE 590 Advanced Seminar in Materials Science and Engineering (2) Advanced topics in materials science, led by faculty with specific expertise in the area of interest. Topics to be chosen and announced quarterly.

MSE 599 Special Topics in Materials Science (1-5, max. 5) Studies of special advanced topics in materials science. Prerequisite: permission of instructor. Offered: AWSpS.

MSE 600 Independent Study or Research (*) Offered: AWSpS.

MSE 700 Master's Thesis (*) Offered: AWSpS.

MSE 800 Doctoral Dissertation (*) Offered: AWSpS.

Mechanical Engineering

M E 123 Introduction to Visualization and Computer-Aided Design (4) NW/VLPA Adee Methods of depicting three-dimensional objects and communicating design information. Development of three-dimensional skills through freehand sketching and computer-aided design using parametric solid modeling. Offered: AWSpS.

M E 124 Visualization and Computer-Aided Design Laboratory (2) NW/VLPA Adee Methods of depicting three-dimensional objects and communicating design information. Development of three-dimensional visualization skills through computer-aided design using parametric solid modeling. Offered: AWSpS.

M E 230 Kinematics and Dynamics (4) NW Fabien Kinematics of particles, systems of particles, and rigid bodies; moving reference frames; kinetics of particles, systems of particles, and rigid bodies; equilibrium, energy, linear
M E 295 Product Dissection (3) Kumar
Examination of the way products and machines work, their physical operation, the manner in which they are constructed, and the interaction between design, materials, and manufacture. Laboratories involve dissection and assembly of several common industrial and consumer products by student teams. Offered: jointly with IND E 295.

M E 323 Engineering Thermodynamics (5) Kramlich
Engineering thermodynamics, including thermodynamic concepts and properties, the first and second laws of thermodynamics, energy conversion, refrigeration, humidification, and combustion. Engineering design applications. Prerequisite: CHEM 142; MATH 126; PHYS 121.

M E 331 Introduction to Heat Transfer (4) Forster
Study of heat transfer by conduction, radiation, and convection; elementary heat-exchanger design. Prerequisite: either M E 333 or CEE 342.

M E 341 Energy and Environment (3) NW
Malte
Energy use. Fossil energy conversion. Oil, gas, coal resources. Air impacts. Nuclear energy principles and cycle. Prerequisite: either MATH 112, MATH 124, or Q SCI 291; either CHEM 120, CHEM 142, PHYS 114, or PHYS 121. Offered: jointly with ENVR 341/ CHEM E 341; A.

M E 354 Mechanics of Materials Laboratory (5) Tuttle
Properties and behavior of engineering materials including stress-strain relations, strength, deformation mechanisms, strength, deformation, fracture, creep, and cyclic fatigue. Introduces experimental techniques common to structural engineering, interpretation of experimental data, comparison of measurements to numerical/analytical predictions, and formal, engineering report writing. Lecture and laboratory. Prerequisite: MSE 170, CEE 220.

M E 355 Introduction to Manufacturing Processes (4) Ramulu
Study of manufacturing processes, including interrelationships between the properties of the material, the manufacturing process and the design of components. Interpretation of experimental data, comparison of measurements to numerical/analytical predictions, and formal, engineering report writing. Prerequisite: M E 354.

M E 356 Machine Design Analysis (4) Kumar
Analysis, design, and selection of mechanical and electromechanical subsystems and elements, such as gears, linkages, cams, motors, and bearings. Lecture and laboratory. Prerequisite: M E 354.

M E 373 Introduction to System Dynamics (5) Garbini
Mathematical modeling, analysis, and design of physical dynamic systems involving energy storage and transfer by lumped-parameter linear elements. Time-domain response by analytical methods and numerical simulation. Laboratory experiments. Prerequisite: either AMATH 351 or MATH 307; either AMATH 352 or MATH 308; E E 215; M E 230.

M E 374 Systems Dynamic Analysis and Design (5) Garbini
Extension of M E 373. Frequency response analysis, generalized impedance concepts and applications, Fourier series analysis and Laplace transform techniques. Modeling and analysis of electromechanical actuators and rotating machinery. Laboratory experiments and design projects. Prerequisite: M E 373.

M E 392 Concurrent Engineering (3) Focus on the need for and the tools of concurrent engineering in all engineering disciplines. Functional and cross-function organizations, new product development, market need identification and design for manufacturing are explored. Offered: jointly with IND E 392.

M E 403 Material-Removal Processes (3) Ramulu
Cutting and noncutting processes for material removal in the shaping of manufactured products. Study of forces and of power consumption and relative costs in the various processes. Prerequisite: M E 355 which may be taken concurrently.

M E 406 Corrosion and Surface Treatment of Materials (3) Sandwith
Corrosion fundamentals and forms (galvanic, crevice, pitting, stress corrosion, erosion, hydrogen and leaching). Principles of design, materials selection, cathodic protection and surface treatments (coatings, carburizing, nitriding and plating) applied to reduce corrosion. Failure analysis applied to case studies.

M E 409 Introduction to Numerical Control and Computer-Aided Manufacturing (3) Ramulu
Control system fundamentals, numerical control (NC) machine control systems, and the design aspect of NC machine tools, program-ming methods of NC machines, computer-aided manufacturing (CAM), CNC, DNC, and process optimization. Prerequisite: M E 355 which may be taken concurrently.

M E 415 Sustainability and Design for Environment (3) Cooper
Analysis and design of technology systems within the context of the environment, economy, and society. Applies the concepts of resource conservation, pollution prevention, life cycle assessment, and extended product responsibility. Examines the practice, opportunities, and role of engineering, management, and public policy. Offered: jointly with ENVR 415/CEE 495.

M E 424 Combustion Systems and Pollutant Formation (4) Malte
Combustion theory, including chemical thermodynamics, chemical kinetics, mixing and diffusion, and flame structure. Combustion chamber design concepts and performance. Combustion formation and combustion methods for minimizing pollutant formation. Prerequisite: M E 323; recommended: M E 331; M E 333.

M E 425 HVAC Engineering (4) Emery
Heating, ventilating, and air conditioning of built environment. Human comfort, psychrometric processes, load computations, fluid distribution, and controls. Design analysis of HVAC system is taught in the lectures and applied in the class project. Prerequisite: M E 323; M E 331.

M E 426 Sustainable Energy Design (4) Malte
Energy systems with renewable (solar) energy and efficient use of energy. Project-based learning: analysis, systems engineering, design, component characterization, and environmental impacts. Prerequisite: CHEM E/ENVR/M E/ PHYS 342 or M E 430; recommended: M E 331.

M E 430 Advanced Energy Conversion Systems (4) Kramlich
Advanced and renewable energy conversion systems and technologies are treated. Included are high efficiency combined cycles; renewable energy conversion involving solar, wind, and biomass; direct energy conversion and fuel cells; and nuclear energy. Environmental consequences of energy conversion and environmental control are discussed. Prerequisite: M E 333.

M E 431 Advanced Fluid Mechanics (4) Forster
Advanced topics in fluid mechanics, including kinematics, potential theory and vortex dynamics, viscous flow, turbulence, experimental and numerical methods, and design. Prerequisite: M E 333.

M E 432 Gas Dynamics (3) Dynamic and thermodynamic relationships for the flow of a gas. Application of thermodynamic processes involving nozzles, diffusers, compressors, and turbines. Prerequisite: either M E 333 or CEE 342. Offered: by request only.

M E 433 Turbomachinery (4) Thermodynamics, gas dynamics, and fluid mechanics of axial and centrifugal compressors, pumps, and turbines. Selection of components for engineering applications. Design problems and/or laboratory experiments to illustrate operating characteristics of turbomachines.

M E 436 Friction and Wear of Materials (3) Wilson
Study of principles of friction and wear behavior of materials and of those material properties that affect such behavior. Principles of lubrication. Applications to design of surfaces for wear resistance. Prerequisite: M E 333; M E 356.

M E 440 Advanced Mechanics of Materials and Solids (3) Labossiere

M E 442 Renewable Energy (4) NW
Malte
Introduction to renewable energy. Principles and practices: solar, wind, water, and biomass energy conversion. Prerequisite: either MATH 112, MATH 124, or Q SCI 291; either CHEM 120, CHEM 142, PHYS 115, or PHYS 122. Offered: jointly with CHEM E 442/ENVR 442; W.

M E 445 Introduction to Biomechanics (4) Sanders
Prepares the mechanical behavior of tissues in the body and the application to design of prostheses. Tissues studies include bone, skin, fascia, ligaments, tendons, heart valves, and blood vessels. Discussion of the structure of these tissues and their mechanical response to different loading configurations. An important part of the class is a final project. Offered: jointly with BioEEN 440.

M E 450 Introduction to Composite Materials and Design (3) Tuttle
Stress and strain analysis of continuous fiber composite materials. Orthotropic elasticity, laminate theory, failure criterion, and design philosophies, as applied to structural polymeric composites. Recommended: MSE 475.

M E 459 Introduction to Fracture Mechanics (3) Ramulu
Deformation processes leading to fracture, and linear elastic fracture mechanics. Fatigue crack propagation. Fracture control and failure analysis. Prerequisite: M E 354, M E 356.

M E 460 Kinematics and Linkage Design (3) Ganter
Synthesis of linkage-type mechanisms using graphical and computer methods.
M E 468 Air-Pollution Control Equipment Design (3) Khalil Designs to control air pollutants from stationary sources. Procedures for calculating design and operating parameters. Fundamental mechanisms and processes of gaseous and particulate control equipment for absorption and adsorption of gaseous pollutants; electrostatic precipitation; scrubber design of particulate pollutants. Actual case studies. Offered: jointly with CHEM E 468/CEE 494.

M E 469 Applications of Dynamics in Engineering (4) Storl Application of the principles of dynamics to selected engineering problems, such as suspension systems, gyroscopes, electromechanical devices. Includes introduction to energy methods, Hamilton’s principle and Lagrange equations and the design of dynamic system. Prerequisite: M E 374.

M E 471 Automatic Control (4) Berg Dynamic system modeling; control system stability and performance; compensator design by Bode and root-locus methods. Prerequisite: M E 374.

M E 473 Instrumentation (4) Garbini Principles and practice of industrial and laboratory measurement. Dynamics of instrument response; generalized performance analysis of sensor systems; theory of transducers for motion, force, pressure, flow, and other measurements. Lecture and laboratory. Prerequisite: M E 374.

M E 474 Systems Modeling and Simulation (3) Fabien Unified approach to modeling of systems, and computer simulation of systems behavior. Selecting system variables; writing state, loop, and node equations; modal response and state transition response; system functions and convolution; analogs. Applications to control, vibrations, and other problems. Prerequisite: M E 374.

M E 477 Embedded Computing in Mechanical Systems (3) Garbini Analysis of electromechanical systems employing microcomputers for control or data acquisition. Microcomputer architecture, memory organization, assembly language programming, interfaces, and communications. Particular emphasis on design of hardware and software interfaces for real-time interaction with mechanical systems. Weekly laboratory. Prerequisite: M E 374.

M E 478 Finite Element Analysis (4) Labossiere, Reinhall Development of theory and concepts of finite element analysis. Applications in all areas of mechanical engineering, including mechanics of solids, heat transfer, and design of dynamical systems. Weekly computer exercises. Prerequisite: M E 123; M E 374; either MATH 308 or AMATH 352.

M E 480 Introduction to Computer-Aided Technology (4) Principles of computer-aided technology. Computer-aided design, engineering, drafting, and manufacturing; computer-aided design systems, geometry, computer graphics, hardware, computer-aided vehicle/system design synthesis. System demonstrations, laboratories, and site visits. Prerequisite: M E 123; CSE 142.

M E 485 Introduction to Electronic Packaging and Materials (3) Taya The governing equations of transport phenomena: mechanical, thermal, and electromagnetic behavior, thermomechanical and electromagnetic properties of packaging materials, electromagnetic characteristics of circuit and transmission lines, thermal management and reliability analysis of packaging, interconnect and material processing technology. Prerequisite: M E 170. Offered: jointly with M E 485.

M E 490 Naval Architecture (3) Adee Theory of naval architecture; ship’s lines, hydrostatic curves, intact and damaged stability, launching.

M E 491 Naval Architecture (3) Adee Theory of naval architecture; strength, ABS rules, water waves, ship and platform motions.

M E 492 Naval Architecture (3) Adee Theory of naval architecture; dimensional analysis, resistance, model testing, propellers, steering.

M E 495 Mechanical Engineering Design (4) Design laboratory involving the identification and synthesis of engineering factors to plan and achieve specific project goals. Current literature and prerequisite texts are used as reference sources. Lecture and laboratory. Prerequisite: M E 395.

M E 496 Technology-Based Entrepreneurship (3) Concentrates on hands-on aspects of innovation and entrepreneurial enterprise development. Examines relationships between innovation, iterative prototyping, and market testing. Students identify market opportunities, create new technology-based products and services to satisfy customer needs, and construct and test prototypes. Prerequisite: IND E 250. Offered: jointly with IND E 465.

M E 498 Special Topics in Mechanical Engineering (1-5, max. 6) Lecture and/or laboratory. Maximum of 6 credits may be applied toward an undergraduate degree.

M E 499 Special Projects (2-5, max. 6) Written report required.

M E 501 Modern Manufacturing Processes (3) Ramulu General survey and introduction to modern manufacturing engineering processes. Fundamental principles and practices of modern manufacturing processes. Case studies and exercises relating the course material directly to modern industrial practice. Offered: A.

M E 504 Introduction to Microelectro Mechanical Systems (4) Theoretical and practical aspects in design, analysis, and fabrication of MEMS devices. Fabrication processes, including bulk and surface micromachining. MEMS design and layout, MEMS CAD tools. Mechanical and electrical design. Applications such as micro sensors and actuators, or chemical and thermal transducers, recent advances. Offered: jointly with E E 502/ MSE 504.

M E 505 Computer Integrated Manufacturing (3) Wilson Design and analysis of advanced manufacturing systems from a strategic as well as technological perspective. Focus on information generation, management, and coordination aspects of complex manufacturing organizations. Examination of system integration alternatives and consequences for relationships with customers and suppliers. Offered: jointly with IND E 531; W.

M E 508 Theory and Design for Mechanical Measurements (3) Fundamental concepts of mechanical measurements, principles of sensors and transducers, signal conditioning and data acquisition, advanced experiment planning and analysis, and applications in mechanical engineering. Offered: W.

M E 510 Mathematical Foundations of Systems Theory (4) Damborg Mathematical foundations for system theory presented from an engineering viewpoint. Includes set theory; functions, inverse functions; metric spaces; finite dimensional linear spaces; linear operators on finite dimensional spaces; projections on Hilbert spaces. Applications to engineering systems stressed. Prerequisite: graduate standing or permission of instructor. Offered: jointly with AA 546/CHEM E 510/E E 510;

M E 518 Seminars in Advances in Manufacturing and Management (1) Ramulu Current topics and advances made in manufacturing and management. Topics presented by invited speakers from academia and industry. Emphasis on the multidisciplinary nature of manufacturing and management. Offered: jointly with IND E 518; AWSp.

M E 519 Seminar (0-4) Credit/no credit only. Offered: AWSp.

M E 520 Seminar (-1, max. 6) Credit/no credit only. Offered: AWSp.

M E 521 Thermodynamics (3) Kramich Fundamental concepts of temperature, thermodynamic properties, and systems. The first, second, and combined laws. Development of the relations of classical thermodynamics. Introduction to statistical thermodynamics. Prerequisite: M E 223 and graduate standing in mechanical engineering or permission of instructor. Offered: A.

M E 522 Thermodynamics (3) Malte Topics from statistical thermodynamics, including the
Boltzmann, Bose-Einstein, and Fermi-Dirac statistics. Solutions of the Schrödinger wave equation and evaluation of the partition function for translation, rotation, and vibration. Prerequisite: M E 521 or permission of instructor. Offered: by request only.

M E 523 Energy and Environment Seminar (1) Malte Student discussions of topics in combustion science and technology, alternative fuels, renewable energy, environmental consequences of energy consumption, and design for environment. Also, presentations by outside experts. May be repeated for credit. Credit/no credit only. Offered: A W S.

M E 524 Combustion (3) Kramich Chemical and physical processes of combustion with applications to design of combustors, fuel selection, and consideration of environmental effects. Prerequisite: graduate standing in mechanical engineering or permission of instructor. Offered: odd years; Sp.

M E 525 Acoustics in Engineering I (3) Forster Acoustics, reflection, refraction, and diffraction. Review of continuum mechanics and examples from electromechanical systems. Prerequisite: graduate standing in mechanical or electrical engineering, or permission of instructor. Offered: W.

M E 526 Acoustics in Engineering II (3) Forster Continuation of 525. Material differs each year, covering such topics as scattering, moving media, ultrasonics, acoustic holography, optoacoustics, transducer design, propagation in an isotropic medium. Prerequisite: M E 525 or permission of instructor. Offered: Sp.

M E 528 Acoustics of Environmental Noise (4) Offered: jointly with CEE 554.

M E 530 Heat Conduction and Radiation (3) Mesccher Heat conduction advanced fundamentals, emphasizing microscale applications. Radiative transfer for transparent and for absorbing and scattering media, emphasizing combustion, biomedical, and atmospheric/oceanic environmental applications. Forward and inverse problems for both conduction and radiation. Prerequisite: graduate standing in mechanical engineering or permission of instructor. Offered: W.

M E 531 Conductive Heat Transfer (3) Analysis of steady-state and transient heat conduction in single- and multidimensional systems by mathematical, graphical, numerical, and analogical methods. Prerequisite: graduate standing in mechanical engineering or permission of instructor. Offered: by request only.

M E 532 Convective Heat Transfer (3) Kramich Introduction to fluid flow and boundary-layer theory as applicable to forced- and natural-convection heat transfer. Condensation and boiling heat transfer. Prerequisite: graduate standing or permission of instructor. Offered: Sp.

M E 533 Fluid Mechanics I (3) Riley Basic conservation laws and kinematics of fluid flow constitutive relationships. Newtonian fluids, dimensional analysis, vorticity dynamics, inviscid flows, applications. Offered: A.

M E 534 Fluid Mechanics II (3) Riley Review of basic principles, some exact solutions and their interpretations, waves (water waves, sound waves, shock waves), boundary layers, jets and wakes, flow stability, turbulence, applications. Prerequisite: M E 533 or permission of instructor. Offered: W.

M E 535 Computational Techniques in Mechanical Engineering (3) Emery Advanced heat transfer studies of interest to mechanical engineers. Subject coverage varies from year to year. Prerequisite: permission of instructor. Offered: Sp.

M E 537 Topics in Fluid Mechanics (3) Selected fluid mechanics relevant to current advances in research and application. Topics selected vary with faculty and student interest, but have included flow stability, special topics in turbulence, and turbulent reacting flows. Offered: by request only.

M E 538 Turbulent Boundary Layer Theory (3) Characteristic features of turbulent boundary layers; development of the turbulent boundary layer equations; equilibrium boundary layers; integral methods of solution based on power law and wall-wake velocity profiles; methods of solution based on higher order constitutive equations; application to diffuser flows and free shear flows; new developments and physical models. Offered: odd years; A.

M E 541 Fatigue of Materials (3) Ramulu Macro and micro aspects of fatigue of metals and fatigue mechanisms. Analytical methods for fatigue and life assessment in advanced materials. Offered: W.

M E 543 Fluid Turbulence (3) Methods of characterizing fluid turbulence; probability concepts; spatial and temporal velocity correlations; spectral energy transfer; turbulent diffusion; isotropic turbulence and Kolmogorov's hypothesis; Taylor's hypothesis; hot-wire measurement techniques. Prerequisite: 3 credits of graduate level fluid mechanics or permission of instructor. Offered: even years; W.

M E 544 Advanced Turbulence Modeling Techniques (3) Riley The Reynolds stress transport equations; plane homogeneous shear flow; modeling the pressure-strain, diffusion, and dissipation rate correlation tensors; one and two-equation turbulence models; near-wall turbulence and wall functions; limitations of length scale and eddy viscosity modeling. Prerequisite: 3 credits of turbulence related coursework. Offered: every years by request only; Sp.

M E 547 Linear Systems Theory (4) Linearity, linearization, finite dimensionality, time-varying vs. time-invariant linear systems, interconnected systems, functional/structural descriptions of linear systems, system zeros and invertibility, linear system stability, system norms, state transition, matrix exponentials, controllability and observability, realization theory. Prerequisite: either A A 447, E E 447 or M E 447. Offered: jointly with E E 547/A A 547; A.

M E 548 Linear Multivariable Control (3) Introduction to MIMO systems, successive single loop design comparison, Lyapunov stability theorem, full state feedback controller design, observer design, LQR problem statement, design, stability analysis, and tracking design. LQG design, separation principle, stability robustness. Prerequisite: A A 547/E E 547/M E 547. Offered: jointly with A A 548/E E 548.

M E 550 Nonlinear Optimal Control (3) Calculus of variations for dynamical systems, definition of the dynamic optimization problem, constraints and Lagrange multipliers, the Pontryagin Maximum Principle, necessary conditions for optimality, the Hamilton-Jacobi-Bellman equation, singular arc problems, computational techniques for solution of the necessary conditions. Prerequisite: graduate standing; recommended: A A 548 or E E 548. Offered: jointly with A A 550/E E 550; odd years.

M E 551 Elasticity I: Elastostatics (3) Taya Elastostatics, including general formulations of 2D and 3D elastostatic problems (stress function method, complex variable method, displacement potential method). Esheyb's method is emphasized and used to solve 2D and 3D problems with special application to composite materials. Offered: W.

M E 552 Elasticity II: Viscoelasticity and Elastodynamics (3) Taya Elastodynamics includes wave propagation in linear elastic and linear viscoelastic solids where solids are monolithic materials, composite materials. Viscoelasticity part includes the stress-strain equations in terms of convolution integral. Fourier transform and Laplace transform modes. Simple and fundamental problems are solved by several techniques as demonstration. Offered: every years; Sp.

M E 553 Adhesion Mechanics (3) Tuttle Introduction to adhesive systems and test/evaluation techniques. Stress/strain analysis methods used with adhesive joints. Examples of practical applications. Prerequisite: graduate student status or permission of instructor. Offered: every years; Sp.

M E 555 Thermoelasticity (3) Emery Basic equations of thermoelasticity for isotropic elastic solids. Analysis of disks, cylinders, spheres, beams, and plates under steady temperature and sudden and slow heating and cooling. Introduction to thermoelastic stability. Prerequisite: M E 551 or permission of instructor. Offered: by request only.

M E 556 Experimental Stress Analysis I (3) Tuttle Theory and practice of experimental techniques including strain gages and strain gage-based devices, thermocouples, LVDTs, and transducer design. Lecture and laboratory. Prerequisite: graduate standing or permission of instructor. Offered: A.

M E 557 Experimental Stress Analysis II (3) Tuttle Theory and practice of optical mechanics, including interferometric techniques (more and holographic), geometric mori methods, and photoelasticity. Lecture and laboratory. Prerequisite: graduate standing or permission of instructor. Offered: every years; W.

M E 559 Introduction to Fracture Mechanics (3) Ramulu Applications of linear fracture mechanics to failure analysis and fracture control based on actual case studies. Stress, toughness and fatigue testing techniques, crack initiation and propagation fatigue life prediction of mechanical components subjected to environmental effects. Offered: W.
M E 560 Advanced Theory of Fracture (3) Ranolu Theories of linear fracture mechanics, fracture dynamics, ductile fracture, brittle crack growth and mixed mode fracture. Discussion of advanced topics from recent literature. Prerequisite: M E 559 or permission of instructor. Offered: even years; Sp.

M E 562 Introduction to Electronic Composites (3) Taya Fundamentals of microstructure-macro-property relation of electronic composites. This course covers applications (computer packaging, laser packages, medical devices, MEMS, microelectronics), functions (mechanical, thermal, electromagnetic and optical), microstructure-macro-property relations, processing issues, and material properties/breakdown. Prerequisite: 450 or MSE 423. Offered: jointly with MSE 562; Sp.

M E 563 Advanced Composites: Design and Manufacturing (3) Manufacturing and processing techniques of metal-, polymer-, and ceramic-matrix composites; design considerations related to manufacturing techniques; non-destructive testing and testing of composite structures. Fiber-matrix interfacial features and interactions. Interfacial thermodynamics applied to selection of fiber-matrix combinations. Prerequisite: M E 450 or MSE 423 or equivalent by permission of instructor. Offered: jointly with MSE 563; Sp.

M E 564 Mechanical Engineering Analysis (3) Storti Application of mathematical methods to the description and analysis of systems in mechanical engineering. Analogies in heat transfer, fluid flow, stress distribution, dynamics, and feedback control. Prerequisite: graduate standing in mechanical engineering or permission of instructor. Offered: A.

M E 565 Mechanical Engineering Analysis (3) Storti Applications of vectors, matrices, and partial differential equations to mechanical engineering systems, including computational techniques and analogies. Prerequisite: graduate standing in mechanical engineering or permission of instructor. Offered: W.

M E 572 Methodologies for Engineering Design: Conceptual Design (3) Kumar Methodologies particularly useful in the conceptual or preliminary phase of a design. The design process. Impact of formulating independent functional requirements. Physical and functional coupling in design. Case studies in conceptual design of products and processes. Prerequisite: graduate standing or permission of instructor. Offered: even years; W.

M E 573 Methodologies for Engineering Design: Probabilistic Mechanical Design (3) Ramulu Study, implementation of probabilistic methods to design. Loading, geometry, stress, strain/deformation described as random variables, consistent with statistical properties/breakdown in terms of random variables. Design, analysis, reliability, risk analyses conducted on common structures with results compared to conventional deterministic approaches. Projects using probabilistic methods to optimize selected component designs. Offered: every years; Sp.

M E 578 Optimization in System Sciences (3) Mesbahi Covers convex sets, separation theorems, theorem of alternatives and their applications, convex analysis, convex functions, conjugation, subgradients, convex optimization duality and applications, linear and semi-definite programming. Linear matrix inequalities, optimization algorithms, applications in system theory and control, bilinear, rank minimization, convex optimization software. Recommended: A/M E E 547. Offered: jointly with A/A E 578; W.

M E 584 Combustion in Airbreathing Propulsion (3) Fundamentals of gasdynamics, mixing, and thermodynamics applies to the analysis and design of gas turbine, ramjet and scramjet engine combustors, with treatment of computer simulation. Offered: by request only.

M E 585 Dynamics and Vibrations (3) Shen Variational techniques, Hamilton’s principle, Lagrange’s equations applied to dynamics of particles and rigid bodies. Vibration analysis of multi-degree-of-freedom and coupled systems. Prerequisite: graduate standing in engineering or permission of instructor. Offered: A.

M E 589 Vibrations (3) Storti Study of systems with nonlinear damping and restoring forces excited by deterministic or random inputs. Applications in measurement, testing, and design of mechanical systems. Nonlinear systems are emphasized. Prerequisite: M E 588 or permission of instructor. Offered: every years; W.

M E 590 Vibrations (3) Reinhall Study of systems with nonlinear damping and restoring forces excited by deterministic or random inputs. Applications in measurement, testing, and design of mechanical systems. Random inputs are emphasized. Prerequisite: M E 588 or permission of instructor. Offered: every years; Sp.

M E 591 Robotics and Control Systems-Colloquium (1, max. 3) Berg Colloquium on current topics in robotics and control systems analysis and design. Topics presented by invited speakers as well as on-campus speakers. Emphasis on the cross-disciplinary nature of robotics and control systems. Credit/no credit only. Offered: jointly with A A/CH E E E 591; A W S p.

M E 593 Feedback Control (3) Devasia Design feedforward controllers for precision output tracking; inversion-based control of non-minimum-phase systems; effect of plant uncertainty on feedforward control design of feedback controllers for applications such as vertical take off and landing aircraft, flexible structures and piezo-actuators. Prerequisite: A A 547/E E 547/M E 547. Offered: jointly with A A E 593.

M E 594 Robust Control (3) Basic foundations of linear analysis and control theory, model realization and reduction, balanced realization and truncation, stabilization problem, coprime factorizations, Youla parameterization, matrix inequalities, H-infinity and H2 control, KYP lemma, uncertain systems, robust H2, integral quadratic constraints, linear parameter varying synthesis, applications of robust control. Offered: jointly with A A 594/E E 594; odd years; Sp.

M E 598 Topics in Research (1) Doctoral seminar. Credit/no credit only. Offered: A W S p.

M E 599 Special Projects (1-5, max. 9) Written report required. Prerequisite: permission of department Chairperson. Offered: A W S p.

M E 600 Independent Study or Research (*) Written report required. Offered: A W S p.

Technical Communication

T C 100 Introduction to Technical Communication (5) Topics may include: virtual communities, written communication, usability testing, web design, and others. Explores course content through individual and group hands-on projects. Offered: A.

T C 231 Introduction to Technical Writing (3) Principles of organizing, developing, and writing technical information. Recognizes forms and rhetorical patterns common to scientific and technical disciplines. Technical writing conventions such as headings, illustrations, style, and tone. Numerous written assignments required. Required for all engineering majors. Prerequisite: either C LIT 240, both ENGL 104 and ENGL 105, ENGL 111,
ENGL 121, ENGL 131, ENGL 182, ENGL 197, ENGL 198, ENGL 199, or ENGL 281. Offered: AWSp.

T C 310 Introduction to Communication Design (5) Turns Functions of, and relationships among, major software tools in the context of common communication design problems. Students practice explaining and justifying design solutions in terms of key features and user characteristics. Offered: ASp.

T C 317 Survey of Usability Research Techniques (5) Introduces usability research methods used in the product-development process; contextual inquiry, surveys and interviews, focus groups, user profiling, usability testing, cognitive walkthroughs, heuristics, and others. Offered: Sp.

T C 318 Survey of User Experience Design (5) Provides a project-based introduction to the user interface design process and is oriented toward others. Offered: Sp.

T C 319 Survey of Concepts in Human-Computer Interaction (5) Studies the social, cognitive, behavioral and contextual aspects of information systems and informational dimensions of the human-computer interface, and other user-centered design concepts. Surveys research literature of human information behavior, as well as ethical standards. Offered: Sp.

T C 333 Advanced Technical Writing and Oral Presentation (4) Emphasis on the presentation of technical material to various audiences. Style of writing required for proposals, reports, and journal articles. Oral presentation principles, including use of visuals, as well as organizing and presenting an effective talk. For engineering majors. Prerequisite: T C 231. Offered: AWSp.

T C 400 Scientific and Technical Communication (5) Kasonic, Kolko Principles and practices of writing to communicate scientific and technical information to a variety of readers, including the expert, general scientific and technical reader, manager, and general public. Examines research and issues in the TC field including social contexts and environments (legal, ethical, cultural). Required of technical communication majors. Prerequisite: T C 231. Offered: ASp.

T C 401 Style in Scientific and Technical Writing (5) Coney, Syrtiskie Grammatical structures and stylistic strategies within specific professional contexts. Achieving clarity and conciseness through word choice and placement, using a variety of sentence structures for appropriate emphasis, handling details, establishing effective tone. Required of technical communication majors. Prerequisite: T C 231. Offered: ASp.

T C 402 Scientific and Technical Editing (5) Farkas, Kolko Editorial responsibilities and practice in the communication of scientific and technical information; the editor’s role both as editor of technical documents and as a member of publication groups. Addresses managing collaborative teams and basic SML concepts and metadata. Required of technical communication majors. Prerequisite: T C 400 with a minimum grade of 3.0. T C 401 with a minimum grade of 3.0. Offered: W.

T C 403 Publication Project Management (3) Plum Responsibilities and practice in managing publication projects in scientific and technical organizations. Project design, coordination, production, and evaluation, including planning, organizing, staffing, and directing. Required of technical communication majors. Offered: WSp.

T C 407 Software User Assistance (5) Farkas Concepts and skills for preparing manuals, online help systems, performance-support systems, and other forms of locally stored and Web-based software user assistance. Includes principles of human-computer interaction, usability evaluation, and the software-development process. Students create both end-user and developer documentation. Prerequisite: T C 310. Offered: W.

T C 408 Public Documents: Proposals, EIs, Assessments (3) Bereano Analyzing special documents of public character: proposals, EIs, questionnaires, technology assessments. Understanding socio-political milieu in which they are planned, organized, written; the specialized audiences (e.g., agencies with their missions, guidelines, constituencies; citizen groups; commercial interests) they serve. Documents, the decision-making process. Offered: odd years; Sp.

T C 409 Writing for Publication (3) Coney Writing for professional and trade periodicals in science, engineering, and technology. Examination of the publication process, including the roles of author, editor, and reviewer; selecting the appropriate periodical; organizing and writing the article. Prerequisite: T C 400; T C 401. Offered: W.

T C 411 Visual Media in Technical Communication (5) I&S/VIPLA Williams Use of visuals in print and electronic publication. Topics include vision, perception, comparison of text and visual media principles for the selection and use of visual media, information graphics icons, page and screen design typography, and color. Offered: ASp.

T C 412 Print Production (5) Sauer, Williams Introduction to print production for technical communicators. Topics include digital pre-press, printing, binding, and finishing. Prerequisite: T C 411. Offered: W.

T C 415 Production Editing (4) Williams The editorial role in the preparation of text and visual materials for production. The editor’s responsibilities and prerogatives as they relate to those of other professionals in the production phase of the publications field.

T C 420 Introduction to Technology as a Social and Political Phenomenon (5) I&S Bereano Introductory survey presenting some of the issues pertaining to technology and social change, technology and values. Emphasis on the social, political, and economic aspects of current problems that have important technological components. Prior technical background not required; readings from diverse sources. Offered: A.

T C 422 Style in Technical Writing (3) Grammatical structures and stylistic strategies. Achieving clarity and conciseness through word choice and placement, using a variety of sentence structures for appropriate emphasis, handling details, establishing effective tone.

T C 425 Technology Assessment (5) I&S Bereano In-depth analysis of the concept, practice, and methods of technology assessment (policy analysis that concentrates on social consequences of technological development); social, political, economic, and environmental impacts of new technologies; options for channeling these developments; and relevant decision-making institutions and processes. Offered: W.

T C 428 Policy Dimensions of Genetic Engineering (3) I&S Bereano Explores technological discourse in public policy formation and decision-making regarding genetic engineering, analyzing a variety of media and formats to explore the contending ideological paradigms, imagery, and argumentation used by the major policy actors. No prerequisite, although prior work in biology, communication, or policy sciences is useful. Offered: Sp.

T C 435 Introduction to Content Management (3) Principles and practices of building, managing and using content management systems in the technical communication workplace. Examines both the intricacies of collaborative workflow technologies and the organizational contexts that surround them.

T C 436 Design and Authoring of CAI (3) Winn Introduction to the design of computer-assisted-instructional programs. Types of learning, characteristics of effective instruction. Students design and produce CAI programs using authoring systems for computers. Offered: jointly with EDCI 436; A.

T C 437 Web Design and Web Publishing (5) I&S/VIPLA Farkas Design principles and skills including navigation, functional design, visual design, and content development. Includes the ongoing process of Web publishing. Addresses societal issues pertaining to the Web and Internet. Students build a website and plan for ongoing Web publishing. Prerequisite: T C 310; T C 411. Offered: Sp.

T C 438 Web Technologies (5) Markup languages and styles, JavaScript, Flash, Photoshop, and the fundamentals of digital sound and video. Includes an introduction to server-side technologies. Students expand their existing design skills to encompass the use of these Web technologies. Prerequisite: T C 310; T C 437.

T C 440 Science and Engineering News Writing (5) Ilman Explores the science news publishing process, from researching topics and interviewing sources to the structure of news articles and production. Writing assignments address the press release, news brief, and news articles. Offered: A.

T C 454 Alternative Technology (3) I&S Bereano Exploration of the evolution of technological forms that are small-scaled, decentralized, emphasizing the public policy aspects of these developments. Topics include the relationship between alternative technologies and worker-controlled enterprises, community planning, the politics of technological change, the Third World, and decentralized development. Background in engineering or technical design is not required. Offered: A.

T C 455 User Interface Design (4) Furness Design oriented to cover fundamentals of user interface design; models on human computer interaction, software psychology, input devices, usability, cognitive and perceptual aspects of human-computer interaction, advanced interface, and research methodologies are discussed. Offered: jointly with IND E 455; A.
T C 498 Special Topics (1-5, max. 15) Offered: S. taken through the Department of Technical University of Washington equivalents, communication courses, for which there are no papers prepared either for submission to a working in teams under the supervision of instructor. Offered: A.

T C 498 Japanese for Technical and Business Professions II (5) VLPA Kato Covers the functional/situational conversation skills necessary in technical and business communication situations, plus the cultural concepts underlying these situations. Reviews skills (such as prediction) for more effective reading and improves skills for analyzing complex sentence structure. Additional grammar, vocabulary, and kanji are introduced. Lab work required. Prerequisite: T C 461. Offered: W.

T C 462 Senior Study (5) Integration of knowledge and skills acquired during major program into one paper or project. Offered: AWSpS.

T C 495 Professional Practice (3-10, max. 10) Williams Supervised internship in a publications organization approved by the faculty advisor. A minimum of one internship is required of students majoring in technical communication. Credit/no credit only. Offered: AWSpS.

T C 496 Directed Research in Technical Communication (1-5, max. 10) Students, working in teams under the supervision of individual faculty members, review relevant literature, pose research questions, design and conduct studies, and present the results in papers prepared either for submission to a professional journal or for presentation at a professional conference. Credit/no credit only. Offered: AWSpS.

T C 497 Study Abroad: Technical Communication (3-5, max. 15) Upper-division technical communication courses, for which there are no direct University of Washington equivalents, taken through the Department of Technical Communication's Study Abroad Program. Offered: S.

T C 498 Special Topics (1-5, max. 15) Special topics in technical communication to be offered occasionally by permanent or visiting faculty members.

T C 499 Special Projects (1-5, max. 10) Individual undergraduate projects in technical communication. Offered: AWSpS.

T C 501 Theoretical Dimensions of Technical Communication (4) Coney, Sauer Theories and research drawn from a variety of fields that inform such topics as the historical and social context of technical communication, the aims of technical discourse, readability, invention and audience, audience analysis, technical style, and graphics. Prerequisite: admission to an engineering systems program or permission of instructor. Offered: A.

T C 502 Empirical Traditions in Technical Communication (4) Williams Introduction to empirical traditions that inform research and practice in field of technical communication. Topics include epistemological assumptions underlying empirical research, empirical methods, and the results of empirical research on effects of text and visual media on comprehension, recall, and performance. Prerequisite: graduate standing or permission of instructor. Offered: W.

T C 505 Computer-Assisted Communication (4) Kolko Explores computer-assisted communication from three perspectives: (1) cultural roles of communication technologies; (2) relationships between communication and information including information technologies in the workplace, academe, and other settings; and (3) application to design including models for audience analysis, task analysis, and cognitive systems engineering. Prerequisite: graduate standing or permission of instructor. Offered: A.

T C 599 Writing the Scientific Article (3) Haselkorn Teaches skills to analyze sentence structure for accurate interpretation. Lab work required. Prerequisite: admission or permission of instructor. Offered: W.

T C 509 Information Design (4) Farkas Examination of the design principles and procedures underlying the creation of both print and electronic information presentations. Topics include: print vs. electronic media, designing for the page and screen, information technologies, and hypermedia. Seminar includes a design project. Prerequisite: T C 501 or permission of instructor. Offered: Sp.

T C 510 Visual Media in Technical Communication (5) Williams Use of visuals in print and electronic media. Topics include: print vs. electronic media, designing for the page and screen, information technologies, and hypermedia. Seminar includes a design project. Prerequisite: T C 501 or permission of instructor. Offered: Sp.

T C 511 Visual Media in Technical Communication (5) Williams Use of visuals in print and electronic media. Topics include: print vs. electronic media, designing for the page and screen, information technologies, and hypermedia. Seminar includes a design project. Prerequisite: T C 501 or permission of instructor. Offered: Sp.

T C 512 Theories and Methods of Technical Communication (4) Spyridakis Examines theory, research, and practice in the internationalization and localization of paper and electronic documents. Topics include cultural models and schemata, contrastive rhetoric, controlled languages, translation, visuals, and usability testing. Prerequisite: graduate standing or permission of instructor. Offered: W.

T C 513 Ecological Information Systems (4) Introduction to cognitive work analysis framework. Prepares for active role in design and evaluation of information systems. Familiarizes with basic concepts of cognitive systems engineering and practice in field study, data analysis, and transforming field findings into requirements for the design of an information system. Offered: jointly with LIS 515.

T C 517 Usability Testing (4) Ramsey Discusses the human-computer interface (HCI) as the communicative aspect of a computer system. Analyzes usability issues in HCI design, explores design/phase methods of predictability, and introduces evaluative methods of usability testing. Prerequisite: substantial experience with computers and graduate standing, or permission of instructor. Offered: W.

T C 518 User-Centered Design (4) Turnes Explores the user-centered design paradigm from a broad perspective, emphasizing how user research and prototype assessment can be integrated into different phases of the design process. Students learn to think like a user-centered designer and carry out activities that are key to user-centered design. Offered: jointly with IND E 545.

T C 520 Technical Communication Systems (4) Haselkorn Emphasizes the role and function of communication as a key to understanding organizational frameworks and managerial practices. Traditional and innovative approaches to viewing and managing communication. Roles, responsibilities, impact of technology. Offered: Sp.

T C 521 Seminar: Current Issues in Technical Communication (1-2, max. 3) Presentations on current issues in technical communication. Credit/no credit only. Prerequisite: T C graduate student status or permission of instructor. Offered: AW.

T C 523 Seminar: Issues in Technical Communication (1-2, max. 3) Exploration of current issues in technical communication scholarship and practice. Credit/no credit only. Prerequisite: TC PhD student status or permission of instructor. Offered: AWSpS.

T C 525 Assessing Communications Technologies (4) Bereano Analysis of development, deployment of new communication technologies; emphasis on public policy issues they present (e.g., videotelephone, mobile telephoning, hypermedia, electronic mail transfer, virtual reality). Impacts explored include access, privacy, civil liberties; power of elites; changes in social organization. Prerequisite: T C 425 or other background in policy analysis, technology, and society. Offered: Sp.

T C 535 Content Management (4) Kasonic Priniciples and practices of building, managing, and analyzing content management systems in the technical communication workplace. Collaborative workflow technologies and the organizational contexts that surround them.

T C 537 User-Centered Web Design (5) Farkas Theory and practice of the user-centered web development process. Principles and processes for documenting and implementing various development stages, including requirements analysis, user needs analysis, information architecture, prototyping, mockups, and production.

T C 540 SciTech Writing Practicum I (4) Illman An advanced experience in science and engineering news writing for graduate students and upper division undergraduates. Participants serve as science writing interns on the staff of...
Northwest Science & Technology magazine and develop a portfolio of professional quality science articles which may be eligible for publication in the magazine. Prerequisite: T C 498 or permission of instructor. Offered: W.

T C 541 Scitech Writing Practicum II (4) Illman Advanced science writing, focusing on the narrative feature and other forms of creative non-fiction used to present technical content to general audiences. Participants develop a portfolio of professional quality science technology news articles which may be eligible for publication in Northwest Science and Technology magazine. Prerequisite: T C 540 or permission of instructor. Offered: Sp.

T C 596 Directed Research in Technical Communication (1-5, max. 10) Students, working in teams under the supervision of individual faculty members, review relevant literature, pose research questions, design and conduct studies, and present the results in papers prepared either for submission to a professional journal or for presentation at a professional conference. Credit/no credit only. Prerequisite: permission of instructor. Offered: T C 597 Approaches to Teaching Technical Communication (1-2, max. 2) Plumb Readings in pedagogical theory of technical communication and discussion of practical applications. Credit/ no credit only. Prerequisite: concurrent teaching appointment or permission of instructor. Offered: A/WSpS.

T C 598 Special Topics (1-5, max. 6) Prerequisite: permission of instructor.

T C 599 Special Projects (1-5, max. 5) Written report required. Prerequisite: permission of graduate adviser or committee chair. Offered: A/WSpS.

T C 600 Independent Study or Research (*) Written report required. Prerequisite: permission of committee chair. Offered: A/WSpS.

T C 601 Internship (2-10, max. 10) Written report required. Prerequisite: permission of committee chair. Offered: A/WSpS.

T C 700 Master's Thesis (*) Prerequisite: permission of thesis adviser. Offered: A/WSpS.

T C 800 Doctoral Dissertation (1-10, max. 30) Credit/no credit only. Prerequisite: permission of thesis adviser. Offered: A/WSpS.

---

**College of Forest Resources**

**CFR 500 Graduate Orientation Seminar (1)** Introduction to graduate study. Presentations on College resources and services and current research in the College division. Offered: A.

**CFR 501 Forest Ecosystems-Community Ecology (5) Brubaker Community ecology of forest ecosystems. Quantitative methods of community description. Role of limiting factors, competition and disturbance in determining community composition, structure and stability. Introduction to forest ecosystem productivity. History and application of successional theory. Prerequisite: basic ecology course or permission of instructor. Offered: A.

**CFR 502 Data Collection, Analysis, and Presentation (3) Ewing Design of scientific experiments, collection of data, and use of computers to store, analyze and present data. Limited by equipment availability to 8 students; Urban Horticulture students have priority. Offered: Sp.

**CFR 503 Current Issues in Urban Horticulture (1, max. 10)** Critical evaluation and discussion of published research in urban horticulture and restoration. Students and faculty present and discuss research methods and questions from current literature. Offered: A/WSpS.

**CFR 504 Research Processes in Forest Resources (4) Lee Comprehensive survey of research processes for entering graduate students. Diagnostic and prescriptive evaluation of student research capabilities. Problem and hypothesis formulation, study design, multi- method strategies for gathering and analyzing data, and interpretation and presentation of results. Prerequisite: graduate standing. Offered: A.

**CFR 505 Introduction to Pulp and Paper Technology (3) Hodgson, McKeen, Gustafson Introduction to pulp and paper technology for PSE graduate students who do not have a prior background in pulp and paper. Broad overview of pulp and paper technology and the pulp and paper industry. Offered: concurrently with PSE 201; A.

**CFR 507 Soils and Land Use Problems (4) Harrison Environmental concerns of soils; how soil properties control potential and reasonable possibilities of land use. Includes factors controlling soil stability, hydrology, fertility, and movement of pollutants. Field trip oriented with weekly activity summaries. Students also conduct field trips to soil-use problem sites.

**CFR 509 Natural Resource Issues: Unspoken Basics (3) Natural resource issues emerge from interactions between humans and their biophysical world. Understanding resource problems and solutions requires integration of numerous areas of knowledge and methods of discovery. Objectives include exposure to, and development of, fundamental issues and skills essential for natural resource professionals. Offered: A.

**CFR 510 Advanced Forest Soil Microbiology (5) Edmonds Detailed examination of microbial processes in forest ecosystems; types of organisms, biomass, decomposition and nutrient cycling, microbial transformations of N, impacts of management-clear-cutting, fertilization, pesticide addition. Graduate project required. Prerequisite: general biology, basic soils or permission of instructor. Offered: even years; A.

**CFR 512 Biogeochemoical Cycling in Soils and Forest Ecosystems (3) Zabowski Elemental cycles in forests and soils. Fundamentals of processes involved in cycling are addressed along with alterations resulting from environment, vegetation, and soil types. Consideration of cycles of nutrients, metals, and other elements. Weekly discussion section reviews literature on biogeochemoical cycling. Prerequisite: one soils course or permission of instructor. Offered: every other year; W.

**CFR 513 Advanced Soil Genesis and Classification (5) Zabowski Soil formation, morphology, classification, and relationship to the environment. Labs and field trips illustrate properties and processes of forest and grassland soils in Washington. Requires two weekend field trips and a graduate project. Prerequisite: ESC 210 or permission of instructor. Offered: every other year; Sp.

**CFR 514 Advanced Forest Soil Fertility and Chemistry (4) Harrison Chemical properties of soil, nutrient and toxic elements; supply, retention, and loss of nutrients in soils; utilization of geochemical and ecosystem models such as GEOCHEM, MAGIC, TRICLE-DOWN, and ILWAS in developing a quantitative understand- ing of the chemical function of forest ecosys- tems. Prerequisite: general chemistry and geology of soils. Offered: every other year; Sp.

**CFR 515 Advanced Soil and Plant Analysis (3) Harrison Plants and animals must acquire nutrient elements from their environment. Quantifying the composition of samples is the first step in understanding the processes in natural and manmade systems. Sampling, handling, preparation, storage, and analysis stressed. Prerequisite: one botany or plant science course, instrumental analysis, soils. Offered: every other year; Sp.

**CFR 520 Geographic Information Systems in Forest Resources (5) Applications of GIS technology to forest science and management. Fundamental of GIS systems: data sources, preprocessing, map analysis, output; remote sensing as a source of GIS data, image analysis, and classification. Emphasis on GIS as a source of management and technical information requests. Offered: AW.

**CFR 521 Current Topics in Forest Resources (2-5, max. 10)** Critical evaluation and discussion of published research in the broad field of forest resources. Topics and requirements vary. Offered: A/WSpS.

**CFR 525 Advanced Wildland Hydrology (4) Botton Advanced treatment of hydrologic cycle and basic hydrologic methods as applied to wildlands. Effects of forest management activities on hydrologic processes. Graduate focus on a detailed field or modeling hydrologic analysis. Offered: W.

**CFR 526 Seminar in Advanced Silviculture (3) Ford Seminar on current and emerging silvicultural issues and underlying biological principles. Topics include: stand management to enhance wildlife, biodiversity and high productiv- ity in sub-tropical and tropical regions; computer applications in silviculture; research design and analysis; forest genetics; forest ecosystem modeling; planning a research project in silviculture. Prerequisite: permission of instructor. Offered: A/WSpS.

522
simulation of stand growth; adaptation to changes in management objectives; soil conditions and productivity during stand rotation; and minimizing effects of catastrophic disruption. Prerequisite: ESRM 428.

CFR 527 Ecosystems Seminar (1) Sprague Discussion by invited speakers on current research related to ecosystems. Credit/no credit only. Offered: A.

CFR 528 International Forestry (3) Gara, Greulich Discussion on biological, social, and economic basis linked with forest practices in the world. Focuses on examples of how forests and renewable resources are both exploited and managed, with thoughts on how these resources can be sustainability managed. Emphasizes group presentations and seminar style discussion. Offered: even years; W.

CFR 529 Topics in Streamside Studies (1) Discussion by invited speakers on current research related to streamside studies. Credit/no credit only. Offered: jointly with FISH 529; AWSp.

CFR 535 Fire Ecology (3) Agee Fire regime concept as applied to fire ecology. Methodology for fire history research. History and function of forest fire in western United States with emphasis on Pacific Northwest. One weekend field trip. Prerequisite: permission of instructor. Offered: A.

CFR 545 Principles of Forest Entomology (3) Gara Historical perspective of the discipline, introduction to general entomology and taxonomy, forest insect ecology, integrated pest management concepts for defoliators, bark beetles, wood borers, and urban forestry pests. Prerequisite: general biology, botany, zoology or permission of instructor.

CFR 549 Urban Horticulture Seminar (1, max. 6) Discussion by invited speakers on current topics in urban horticulture. Credit/no credit only. Offered: A.

CFR 550 Graduate Seminar (2-5, max. 10) Eastin, Paul Graduate seminar to evaluate and assess policy inquiry. Consideration of implications for policy development and management. Students develop a study design for course project. Offered: jointly with PB AF 592.

CFR 576 Research in Urban Ecology (5) Alberti, Bradley, Hill, Marzluff, Ryan, ZumBrunnen Teams analyze, present, and begin to interpret data that is relevant to addressing issues in urban ecology. Write and orally present revised Objectives and Methods sections of interdisciplinary project and present a draft Results section. Prerequisite: CFR 574 or permission of instructor. Offered: W.

CFR 578 Paper Science and Engineering Seminar (1, max. 6) Discussion of current topics in the science and technology of pulping and paper production, including wood and polymer chemistry. Offered: Asp.

CFR 590 Graduate Studies (1-5, max. 5) Study in fields for which there is not sufficient demand to warrant the organization of regular courses. Offered: AWSpS.

CFR 591 Seminar in Resource Policy and Management (1) Ryan Introduction and orientation for concurrent degree program between the Evans School of Public Affairs and the College of Forest Resources. Examines research and literature on contemporary issues related to the integration of natural resource policy, science, and management, through discussion among faculty, students, and invited speakers. Offered: jointly with PB AF 591; A.

CFR 592 Environmental Policy Processes (3) Cullen Presents background to establish the need for environmental policy. Explores in a comparative manner, examining both successes and failures, various strategies that have been used or proposed to protect the environment. Offered: jointly with PB AF 590.

CFR 595 Graduate Teaching Practicum (1-5, max. 5) Principles of teaching and learning applied to undergraduate instruction in Ecosystem Science and Conservation. Development, delivery, and evaluation of lectures and homework assignments. Graduate teaching experience for ESC students only. Credit/no credit only. Offered: AWSp.

CFR 600 Independent Study or Research (*) Offered: AWSpS.

CFR 610 Graduate Internship in Forest Resources (3-9, max. 9) Graduate internship under the supervision of a college faculty member. Credit/no credit only. Offered: AWSpS.

CFR 700 Master’s Thesis (*) Offered: AWSpS.

CFR 800 Doctoral Dissertation (*) Offered: AWSpS.

Environmental Sciences and Resource Management

ESRM 100 Introduction to Environmental Science (5) I&S/NW Harrison Covers the importance of the environment in society with particular emphasis on worldwide distribution and uses of resources, the role of natural and man-made environments, and causes of environmental degradation. Introduces ethics of conservation and recycling. Prerequisite: Cannot be taken for credit if ESC 110 already taken. Offered: jointly with ENVIR 110; AWSp.

ESRM 101 Forests and Society (5) I&S/NW Gara, Vogt Survey course covering forest ecosystems of the world, history of forestry and forest conservation, how forest ecosystems function, wildlife in forests, environmental issues in forestry, forest management, economics and products, and new approaches to forest management. Open to majors and nonmajors. Offered: AWSpS.

global issues are also treated. Examples of topics include the conservation of large predators, effects of toxic chemicals on wildlife, old-growth wildlife, conservation of marine wildlife, recovery of the bald eagle, and gray wolf. Offered: A.

ESRM 210 Introductory Soils (4) NW Salezowski Physical, chemical, and biological properties that affect distribution and use patterns of this important ecosystem component. Includes soil morphology, plant nutrition and nutrient cycling, soil water, microbiology, and application of soil properties to environmental concerns. One Saturday field trip. Offered: A.

ESRM 250 Introduction to Geographic Information Systems in Forest Resources (5) NW, QSR Applications of GIS technology to forest science and management. Fundamentals of GIS systems: data sources, preprocessing, map analysis, output; remote sensing as a source of GIS data, image analysis, and classification. Emphasis on GIS as a source of management and technical information requests. Offered: AW.

ESRM 255 Wildlife and Society (5) I&S/NW Manuwal Covers ecological processes, wildlife habitats, conservation theory, and historical as well as contemporary issues in wildlife conservation. Offered: W.

ESRM 301 Maintaining Nature in an Urban and Urbanizing World (5) I&S/NW The conservation, restoration, and management of nature in highly human impacted environments present unique challenges. Teams of students work on real Pacific Northwest problems, with stakeholders and experts to understand patterns, processes, and drivers of these systems. Prerequisite: either BIOL 162 or BIOL 200. Offered: W.

ESRM 302 Sustainability in Production Lands (5) I&S/NW Covers the role of farming, forestry, grazing, dams, water extraction, fishing, and their ecological and environmental impacts, and the remediation and restoration of their impacts. Utilizes field trips, studios, and problem-solving exercises to understand, integrate, and generalize processes and issues across diverse production systems. Prerequisite: either BIOL 162 or BIOL 200. Offered: Sp.

ESRM 303 Preserving and Conserving Wildlands (5) I&S/NW The stewardship of pristine terrestrial environments is of great importance and contention. Teams of students work with stakeholders and experts on real Pacific Northwest issues (e.g., pollution, invasive organisms, mining, burning, grazing, logging, hunting, skiing) to understand patterns, structure, processes, and drivers of these environments. Prerequisite: either BIOL 162 or BIOL 200. Offered: A.

ESRM 304 Environmental and Resource Assessment (5) I&S/NW, QSR The processes of measuring, monitoring, and assessment; illustrated in diverse environmental and resource case studies. Explores the scientific method, hypothesis testing, sampling, and experimental designs, the role of questionnaires and polling techniques, remote sensing techniques, and population measurements. Prerequisite: either Q SCI 361 or STAT 311, either of which may be taken concurrently. Offered: A.

ESRM 310 Trees in Our Environment (5) NW Brubaker Explores tree form and function from perspectives of dendrology, ecology, and adaptation in wildland and urban environments. Lectures, projects, and field investigations introduce 50-60 trees of the Pacific Northwest. Acquire skills to increase knowledge of trees. Prerequisite: either BIOL 162 or BIOL 220. Offered: Sp.

ESRM 311 Soils and Land Use (3) NW Harrison Intended for students concerned with environmental problems in the Puget Sound basin; also for those who desire to pursue professionally involved in land-planning decisions. Focus is on the significance of soils in understanding environmental problems and in promoting intelligent land-use decisions. Basic concepts of soil systems are presented, stressing those aspects important in making land-planning decisions. Offered: W.

ESRM 320 Marketing and Human Resource Management from an Environmental Perspective (5) I&S/NW Paun Introduction to business concepts relating to marketing, human resource management, small businesses and entrepreneurship, and economics in the context of environmental resource management. Offered: A, S.

ESRM 321 Finance and Accounting from an Environmental Perspective (5) I&S/NW Paun Introduction to business concepts relating to marketing, human resource management, small businesses and entrepreneurship, and economics in the context of environmental resource management. Offered: W.

ESRM 323 Silviculture (5) NW Ewing Silviculture techniques, including nursery practices, clear-cutting, seed trees, shelterwood, selection cutting, site preparation, regeneration methods, thinning, fertilization, chemicals, and regional silviculture in the Northeast, Southeast, Midwest, Rocky Mountains, California, Pacific Northwest, and Alaska. Multiple-use field trips. Offered: Sp.

ESRM 326 Wildlife Habitat and Silviculture (3) NW Agee Principles of wildlife habitat in forest and range ecosystems. Silvicultural principles applicable to wildlife conservation and management. Prerequisite: either ESRM 302 or ESRM 303. Offered: Sp.

ESRM 328 Forestry-Fisheries Interactions (4) NW Turnbull Introduction to principles of measurement, basic field measurement skills, measurement of vegetation, including stand examination, timber cruising, size, weight, volume and biomass of trees, and stream flow. Laboratories include field exercises on sampling techniques for trees and lesser vegetation and linear regression modeling to predict quantities from basic measurements. Prerequisite: either INQ E 315 or Q SCI 381; recommended ESRM 304. Offered: W.

ESRM 368 Natural Resource Measurements (4) NW Tumblin Introduction to principles of measurement, basic field measurement skills, measurement of vegetation, including stand examination, timber cruising, size, weight, volume and biomass of trees, and stream flow. Laboratories include field exercises on sampling techniques for trees and lesser vegetation and linear regression modeling to predict quantities from basic measurements. Prerequisite: either INQ E 315 or Q SCI 381; recommended ESRM 304. Offered: W.

ESRM 371 Environmental Sociology (5) I&S/NW Lee Social processes by which environmental conditions are transformed into environmental problems; scientific claims, popularization of science, issue-framing, problem-epitomization, economic opportunism, and institutional sponsorship. Examination of social constructs such as ecosystem, community, and free-market economy. Use of human ecology to assess whether the current framing of environmental problems promotes ecological adaptability. Offered: jointly with SOC 379/ENVIR 379; WS.

ESRM 381 Management of Wildland Recreation and Amenities (3) NW Lee Introduction and overview of wildland recreation and amenities management. Agency history and objectives explored along with integration of recreation with other land uses. Water, forestry, wildlife, and wilderness resources for recreational uses discussed along with role of private enterprise in recreation and amenities. Topics of current and local interest. Offered: W.

ESRM 399 Undergraduate Internship (1-5, max. 15) Lee Internship experience with a public agency or private company, supervised and approved by a faculty member. Preparation of professional report reflecting on the experience is required. Credit/no credit only. Offered: AVSpS.

ESRM 400 Natural Resource Conflict Management (3) I&S/NW Ryan Introduction to
the causes, dynamics, and consequences of natural resource conflicts as well as the range of procedural interventions used to manage conflict. Specific cases of environmental conflict and alternative dispute resolution procedures are examined. Emphasis on developing skills to effectively analyze, manage, and resolve natural resource conflicts. Offered: W.

ESRM 401 Spring Comes to the Cascades (3) NW Examines the interaction between forests, environment and growth at three locations in the Cascades, from lowlands to alpine. Field trips and associate observations are linked to classroom or group project activities and are used to understand a number of ecological, physiological and meteorological concepts.

ESRM 402 Curation and Education in Public Gardens (3) I&S/NW "Wolt Techniques of curatorial practice relevant to living collections of plants, including documentation, policies, conservation, and display. Aspects of establishing and implementation of a public horticulture program including assessment, program tools and methods, and funding in a public environment. Offered: even years; A.

ESRM 403 Forest and Economic Development in the Developing World (4) NW Examines the relationship between forests and economic development in tropical countries. Topics include the role of population growth, poverty, land tenure, and international trade on forest use as well as theories of economic development. Case examples of forest-based economic development in different countries and regions. Offered: Sp.

ESRM 404 Forest Science Inquiry for Teachers (5) Lee Inquiry-based scientific methods for K-12 instruction; asking how and why questions; stating answerable questions; forming hypothesis to answer questions; testing hypothesis by making observations, making measurements, and conducting experiments; displaying results. Writing curriculum plans to implement district and state requirements. Offered: S.

ESRM 410 Forest Soils and Site Productivity (5) NW "Harrison Considers unique properties and processes occurring in forest soils throughout the world with emphasis on soils of Pacific Northwest, and aspects of forest soils that affect productivity. Two all-day Saturday field trips and one Saturday-Sunday field trip required. Recommended: ESRM 210. Offered: odd years; A.

ESRM 411 Plant Propagation: Principles, and Practice (3) NW "Wott Science and practice of plant propagation including sexual (seed) and asexual (cutting, layering, grafting) propagation. Includes discussion of physiological effects, methodology and laboratory exercises. Wide variety of plants covered. Intended for majors in urban horticulture and urban forestry and others interested in reproducing landscape plants. Recommended: 10 credits of introductory biology or botany, or equivalent. Offered: Sp.

ESRM 412 Native Plant Production (3) NW "Reichard, Wott Advanced plant propagation techniques, emphasizing native plants, propagation for restoration projects, and unique problems associated with providing appropriate plant material for restoration or conservation purposes. Emphasizes greenhouse and fieldwork, and includes lectures, field trips, and a class project. Recommended: ESRM 411, which may be taken concurrently.

ESRM 413 Soil Genesis and Classification (5) NW "Zawobisk Soil formation, morphology, classification, and relationship to the environment. Labs and weekend field trips illustrate properties and processes of forest and grassland soils in Washington. Recommended: ESRM 210. Offered: even years; Sp.

ESRM 414 Forest Soil Fertility and Chemistry (3) NW "Harrison Tree growth depends, in part, on the interaction between chemical and biological activities within a given soil: the biological and chemical parameters that influence the growth; soil solution chemistry and surface reactions; reactions and processes that control essential plant nutrient levels and forms in soil solutions. Recommended: ESRM 210. Offered: even years; Sp.

ESRM 415 Biology, Ecology, and Management of Plant Invasions (5) NW "Reichard Examines how biological invasions are one of the most serious threats to the preservation of biodiversity worldwide. Explores the vectors which move plants and their pests, the biology and impacts of the invasive species, and management and policy approaches. Prerequisite: one of the following: BIO 162, BIO 220, BIO 333, BIOL 471, BIOL 472, ESRM 401, ESRM 472, or ESRM 473. Offered: A; odd years.

ESRM 416 Field Survey of Wildland Soils (3) NW "Harrison, Zawobisk Study of soils in remote sites about which little information is available. Focus is field trip in Cascade Mountains north of Glacier Peak with prior study of hiking area, soil and ecosystem changes, and wilderness use. Offered: S.

ESRM 421 Marketing of Forest Products (3) I&S/NW "Roos Introduction to forest products marketing in North America. Examines products marketing, industry structure, and strategic management issues in selecting marketing concepts. Topics include product management, distribution channels, strategic industry analysis, and marketing research techniques. Case studies used to understand forest products industry decision making. Offered: W.

ESRM 422 Marketing of Forest Products (3) I&S/NW "Eastin Introduction to forest products marketing in North America. Examines products marketing, industry structure, and strategic management issues in selecting marketing concepts. Topics include product management, distribution channels, strategic industry analysis, and marketing research techniques. Case studies used to understand forest products industry decision making. Offered: W.

ESRM 423 International Marketing of Forest Products (3) I&S/NW "Roos Introduction to international marketing concepts and their application to forest products. Analysis of forest products trade patterns, resource base changes, policy, industrial policies, and environmental concerns. Discussion of market distorting practices including log export bans and tariff and non-tariff barriers. Offered: Sp.

ESRM 425 Ecosystem Management (5) NW "Franklin Scientific and social basis for ecological forestry. Forest practices to achieve integrated environmental and economic goals based upon material models of disturbance and stand development including alternative harvesting methods; adaptive management and monitoring; certification and global issues. Offered: A.

ESRM 426 Wildland Hydrology (4) NW "Bolton Introduction to the hydrologic cycle and basic hydrologic methods as applied to wildlands. Effects of forest management activities on hydrologic processes. Offered: W.

ESRM 428 Principles of Silviculture and Their Application (5) NW "Ford Focuses on the biology of major tree species in the PNW and their use in silviculture, stand development including alternative harvesting methods; adaptive management and monitoring; and integrated pest management systems. Offered: W.

ESRM 429 Seminar in Streamside Studies (1, max. 6) NW "Steinemann Discussion by invited speakers on current research and issues related to streamside studies. Speakers are a mix of on-campus and off-campus experts. Credit no credit only. Offered: jointly with FISH 429; AWSp.

ESRM 430 Aerial Photos/Remote Sensing Natural Resources (3) NW "Schreuder Principles of photogrammetry, interpretation, and remote sensing; and their application to inventory of natural resources and wildlands. Uses for watersheds, forest resources, wildlife, point and nonpoint pollution, land-use planning, and outdoor recreation. Offered: Sp.

ESRM 435 Forest Entomology (3) NW "Gara Introduction to general entomology, characteristics, life histories, ecological relations, prevention, and control of forest insects. Offered: A.

ESRM 436 Laboratory in Forest Entomology (2) NW "Gara Introduction to the insect orders; identification of forest insects and their damage. One field trip to study insect problems required. Offered: A.

ESRM 441 Landscape Ecology (5) NW "Franklin Basic landscape ecology concepts, including patches, corridors, networks, spatial dynamics; island biogeographic principles; landscape analysis methods; landscape models. Applications of landscape ecology in resources management (e.g., cumulative effects, cutting, patterns, anadromous fisheries, management of wildlife populations, and open-space planning). Recommended: ESRM 326. Offered: W.

ESRM 444 Forest Ecosystems Protection: Insects and Diseases (5) NW "Edmonds, Gara Examines the effects of insects and diseases on wildland and managed forest ecosystems: defoliators, bark beetles, wood boring insects, abiotic and biotic diseases, insects and diseases in intensively managed forests, principles of insect and disease management. Prerequisite: either ESRM 301, 302 or 303 (can be taken concurrently). Offered: odd years: Sp.

ESRM 450 Wildlife Ecology and Conservation (5) NW "Marzluff Covers advanced principles of wildlife ecology such as habitat selection, population viability, and landscape ecology, and illustrates how they apply to wildlife conservation problems with terrestrial, aquatic, and marine wildlife. Students must share costs of field trips. Prerequisite: either ESRM 350 or ESRM 360; either CFR 250 or ESRM 250; recommended: introductory statistics. Offered: W.

ESRM 451 Urban Plant Protection (5) NW "Gara Working knowledge on insects and diseases of plants growing in the urban environment. Emphasis placed on pest and damage recognition, control methods, and integrated pest management systems. Offered: even years; Sp.
ESRM 452 Field Ornithology (3) NW Manuel
Students learn field identification skills and are introduced to field methodologies through required indoor labs, field trips, and field exercises. Exercises include study of survey techniques, feeding ecology, and behavior. Students are required to share field trip costs. Prerequisite: either BIOL 102, BIOL 162, BIOL 180, BIOL 202, BIOL 203, or BIOL 220, any of which may be taken concurrently. Offered: odd years; A.

ESRM 453 Biology and Conservation of Mammals (3) NW West Introduction to mammals of the world: mammalian evolution, taxonomy, morphology, reproduction, population biology, ecology, and conservation. Prerequisite: ESC 350; recommended: concurrent registration in ESC 454. Offered: irregularly.

ESRM 454 Biology and Conservation of Mammals Laboratory (3) NW West Identification and natural history of mammals of the Pacific Northwest. Laboratory work on morphology, taxonomy, and natural history; fieldwork on natural history, hunting methods. Time permitting, weekend field trips required; students share travel costs. Prerequisite: ESC 350; recommended: concurrent registration in ESC 453. Offered: irregularly.

ESRM 455 Wildlife Seminar (1, max. 4) NW Manuel, West Discussion of current research and application in wildlife biology and conservation. Credit/no credit only. Offered: AWSp.

ESRM 456 Biology and Conservation of Birds (3) NW Manuel Major principles of natural history, avian reproductive biology, population ecology, and international conservation strategies for both hunted and unhunted birds. Emphasis on western United States. Prerequisite: either BIOL 102, BIOL 162, BIOL 180, BIOL 202, BIOL 203, or BIOL 220, any of which may be taken concurrently. Offered: odd years; A.

ESRM 457 Fish and Wildlife Toxicology (3/5) NW Overview of fish/wildlife toxicology; history of the discipline; regulations; methods used to assess risks; contaminants pose to fish/wildlife; classes of contaminants and their direct, sublethal and indirect effects; and contemporary threats of contamination to fish/wildlife, their habitats and prey. Includes laboratory. Offered: jointly with FISH 455; W.

ESRM 458 Management of Endangered, Threatened, and Sensitive Species (5) NW Marzluff Biological underpinnings and political realities of endangered species management, including: legal issues, recovery teams, citizen rights, extinction, rarity, proactive management, captive propagation, reintroduction, species endangered in the Pacific Northwest. Students revise endangered species recovery plans. Offered: A.

ESRM 459 Wildlife Conservation in Northwest Ecosystems (3) NW Agee, Manuel, West Extended field course offers Wildlife Science students personal interactions with wildlife managers and wildlife populations in strategic public and private lands in the northwestern United States and southern Canada. Students will share costs of trip. Offered when there is sufficient student demand. Prerequisite: ESRM 350; may not be repeated. Offered: Sp.

ESRM 461 Forest Management and Economics II (4) I&S/NW Greulich Basic concepts of timber harvest scheduling, sustained-yield models, contemporary analytical techniques, timber supply, and forest product markets. Offered: W.

ESRM 462 Restoration Ecology Capstone: Introduction (2) NW First of a three-course capstone sequence in restoration ecology. Students review and assess project plans and installations. Class meets with members of previous capstone classes to review their projects. Offered: jointly with ENVIR/TESC/DES 462. Offered: A.

ESRM 463 Restoration Ecology Capstone: Proposal and Plan Preparation (4) NW Students prepare proposals in response to requests for proposals (RFPs) from actual clients. Clients may be governments, non-profit organizations, and others. Upon acceptance of the proposal, teams prepare restoration plans. Prerequisite: ESRM 462. Offered: jointly with ENVIR/TESC/DES 463. Offered: W.

ESRM 464 Restoration Ecology Capstone: Field Site Restoration (5) NW Teams take a restoration plan developed in ESRM 463 and complete the installation. Team participation may include supervision of volunteers. Teams prepare management guidelines for the client and conduct a training class for their use. Prerequisite: ESRM 463. Offered: jointly with ENVIR/TESC/DES 464. Offered: Sp.

ESRM 470 Natural Resource Policy and Planning (3) I&S/NW Bradley, Ryan Introduction to and analysis of environmental policy-making processes, with a focus on forest and land policy and law. Use of policy models to examine the interaction of agencies, interest groups, Congress, and the courts in the legislative process. Policy implementation, evaluation, and change are also addressed. Offered: A.

ESRM 471 Urban Forest Landscapes (5) NW Bradley Comprehensive view of urban forest and urban forest landscapes. Includes close examination of factors that differentiate urban forest landscapes along the urban to wildland gradient. Compare legal, social, political, administrative, physical, and biological variations. Offered: A.

ESRM 473 Principles of Ecological Restoration (5) NW Ewing Philosophy of restoration, structural components of ecosystem degradation, analysis of restoration projects and methods, and an ecosystem by ecosystem review of how systems are restored. An ecology course that emphasizes applied scientific knowledge of ecosystems. Recommended: previous ESRM course and plant identification, horticulture, landscape ecology. Coursework. Offered: W.

ESRM 474 Problem Analysis in Urban Ecology (5) I&S/NW Alberti, Bradley, Hill, Marzluff, Paun, Ryan, ZumBrunnen Investigates pressing local issues in urban ecology and develops each into a researchable project proposal. Examines and evaluates how different disciplines study environmental issues, explores criteria for conducting and evaluating quality research, develops skills in problem formulation, and sharpens proposal writing skills. Offered: jointly with ENVIR 486/GEOG 486/URBDP 443; A.

ESRM 475 Applied Theory and Methods in Urban Ecology (5) I&S/NW Alberti, Bradley, Hill, Marzluff, Paun, Ryan, ZumBrunnen Teams analyze, present, and begin to interpret data that is relevant to addressing urban ecology problems. Students write objective and methods for a selected urban ecology problem that critiques different methodological approaches and reviews/synthesizes literature. Prerequisite: CFR 475/ENVIR 496/GEOG 486. Offered: jointly with ENVIR 487/GEOG 487. Offered: W.

ESRM 477 Wetland Restoration (5) NW Ewing A Web-delivered, self-paced course covering wetland science, restoration ecology, freshwater restoration, coastal restoration, monitoring and maintenance, and case histories. Completion of extensive readings, assignment and test required for each module. Prerequisite: either BIOL 102, BIOL 162, or BIOL 203; recommended: either ESRM 473, ESRM 472, BOTANY 354, BOTANY 456, BIOL 471, or BIOL 472. Offered: irregularly.

ESRM 480 Selection and Management of Landscape Plant (5) NW Principles of plant selection and management in urban and modified environments. Site analysis and preparation; physiological basis for plant selection; techniques for successful plant installation and aftercare; plant performance evaluation; long-term management and plant health care. Group and individual projects. Prerequisite: either ESRM 210 or ESRM 311; recommended: either BIOL 116 or BIOL 117. Offered: A.

ESRM 481 Field Practicum in Plant Selection and Management (2) NW Practical application of plant selection and management in urban and modified environments. Site analysis and preparation; evaluation of nurseries; techniques for successful plant installation and aftercare; plant performance evaluation; plant health care assessment. Group project. Prerequisite: ESRM 480, which may be taken concurrently. Offered: A.

ESRM 489 Foreign Study (1-5, max. 15) Individual foreign study of topics for which there
is not sufficient demand to warrant the organization of regular classes. Offered: AWSpS.

ESRM 490 Special Topics (1-5, max. 15) Individual tutorial study of topics for which there is not sufficient demand to warrant the organization of regular classes. Offered: AWSpS.

ESRM 494 Senior Thesis Proposal (5) Selection of a thesis topic, literature review, and preparation of a formal senior thesis proposal. Students select a faculty advisor to assist them in the proposal writing process. Regular or Honors credit. Offered: AWSpS.

ESRM 495 Senior Project (5) Individual study of an environmental science and resource management problem under direction of a faculty member. Requires a written project report. Generally taken in last year of residence. Offered: AWSpS.

ESRM 496 Senior Thesis (5) Statistical analysis and presentation of research results and discussion of results in a thesis paper. Students work with faculty advisors to complete field or laboratory research and then prepare the senior thesis. Offered: AWSpS.

ESRM 499 Undergraduate Research (1-5, max. 15) Individual research supervised by a faculty member. For advanced students desiring to extend their educational experience. Credit/no credit only. Offered: AWSpS.

**Paper Science and Engineering**

PSE 104 Products and Energy from Renewable Resources (5) I&S/NW Gustafson Introduction to the structured composition, and availability of renewable resources. Conversion of these materials into solid products, energy, and useful chemicals. Particular attention to the production of fiber (paper/board), fuels (ethanol/aromatics), and specialty chemicals (biopolymers, medicines, etc.). Includes weekly laboratory session. Offered: Sp.

PSE 201 Introduction to Pulp and Paper Technology (3) NW Gustafson, Hodgson, McKean Overview of the science and technology of producing pulp and paper. Introduction of the PSE major course sequence and various options. Examination of Pacific Northwest pulp and paper production facilities. Offered: A.

PSE 202 Pulp and Paper Lab and Field Studies (1) NW Gustafson, Hodgson, McKean Laboratory and field trip studies in pulp and paper technology. Visits to local forest product manufacturing facilities. Required for PSE majors. Credit/no credit only. Offered: A.

PSE 211 Creativity and Society (5) VLPA, I&S Allan Explores the nature of creativity and innovation in U.S. and other societies. Investigates the processes of thinking and techniques of idea generation in fields such as art, music, science, engineering and medicine. Offered: A.

PSE 248 Paper Properties (4) NW Johnson Acquaints students with raw material characteristics, physical and mechanical concepts, nomenclature, and procedures related to evaluating paper and paperboard product properties. Emphasizes structural, optical, mechanical, and moisture related properties. Prerequisite: PSE 201. Offered: W.

PSE 309 Creativity and Innovation (2) VLPA Allan Understanding creativity and creative thinking; its challenges and dynamics through knowledge, judgment, planning, and observation. Techniques of creative thinking. Design and development of creative games. Computer-aided creative thinking. Creation, protection, and exploitation of a useful idea, including bargaining and negotiations. Offered: jointly with CHEM E 309; Sp.

PSE 399 Undergraduate Internship (1-5, max. 15) Internship experience with a public agency or private company, supervised and approved by a faculty member. Preparation of professional report reflecting on the experience is required. Credit/no credit only. Offered: AWSpS.

PSE 402 Paper Physics (3) NW Johnson Exploration of paper product behavior from a materials science perspective. Fundamental laws of physics, both deterministic and statistical, will be used to explain experimental results. Discusses and analyzes theoretical models to explain paper behavior. Prerequisite: PSE 248; PHYS 121, 122, 123. Offered: A.

PSE 406 Wood Chemistry I (3) NW Chemistry of cellulose, hemicellulose, and lignin. Pulping and bleaching chemistry of wood. Prerequisite: either CHEM 237 or CHEM 335.

PSE 409 Wood Extractives Chemistry (2) NW Northey Nature, origin, and occurrence of the extraneous components of wood, their influence on pulp and paper preparation, and their utilization. Prerequisite: either CHEM 237 or CHEM 335.

PSE 450 Paper Science and Engineering Seminar (1, max. 4) Discussion of current topics in the science and technology of pulp and paper production. Emphasis on employer expectations of students in the paper science industry. Credit/no credit only. Offered: Sp.

PSE 476 Pulping and Bleaching Processes (3) Gustafson Conversion of wood to mechanical and chemical pulps. Kraft, sulfate, and semi-chemical pulping processes. Chemical recovery systems. Bleaching of mechanical and chemical pulps. Offered: jointly with CHEM E 471; W.

PSE 478 Pulp and Paper Laboratory (2) Laboratory experiments in chemical and semi-chemical pulping of wood. Bleaching of chemical and high-yield pulps. Physical and chemical characteristics of pulp fibers. Prerequisite: PSE 476. Offered: jointly with CHEM E 473; Sp.

PSE 479 Pulp and Paper Laboratory II (3) McKean Paper testing, paper addsitives, flowculation, drainage, retention, heat transfer, and fluid dynamics in papermaking from virgin and recycled raw materials. Prerequisite: PSE 402; PSE 477. Offered: W.

PSE 480 Pulp and Paper Process Control (3) Gustafson Control of pulp and paper processes. Sensors, actuators, interface equipment, and computer control strategies common to this industry. Prerequisite: PSE 476; PSE 477. Offered: W.

PSE 481 Pulp and Paper Unit Operation (3) Unit operations of particular interest in the pulp and paper industry in addition to those covered in CHEM E 330 and 340. Prerequisite: CHEM E 540. Offered: W.

PSE 482 Paper Science and Engineering Design I (3) I&S/NW Briggs, Gustafson Basic engineering economics applied to design of pulp and paper facilities. Analysis of engineering alternatives based on use cost analysis and accounting tools. Introduction to process and mill design. Prerequisite: 2.0 in PSE 406; 2.0 in PSE 476; 2.0 in PSE 477. Offered: Sp.

PSE 487 Paper Science and Engineering Design II (5) Comprehensive design of pulp and paper processes, including: economic feasibility studies; process equipment design, optimization, and control; and overall process integration and layout. Safety and ethics in the design process. Prerequisite: PSE 482, which may be taken concurrently. Offered: Sp.

PSE 488 Polymer Chemistry (3) Allan Fundamental review of synthetic and natural polymers, including kinetics of formation, molecular weight distributions, and solid-state and solution properties. Prerequisite: either CHEM 237 or CHEM 335. Offered: W.

PSE 489 Foreign Study (1-5, max. 15) Individual foreign study of topics for which there is not sufficient demand to warrant the organization of regular classes. Offered: AWSpS.

PSE 490 Special Topics (1-5, max. 15) Individual tutorial study of topics for which there is not sufficient demand to warrant the organization of regular classes. Offered: AWSp.

PSE 491 Undergraduate Studies (1-5, max. 5) Individual tutorial study of topics for which there is not sufficient demand to warrant the organization of regular classes. Offered: AWSp.

PSE 492 Undergraduate Studies (1-5, max. 5) Individual tutorial study of topics for which there is not sufficient demand to warrant the organization of regular classes. Offered: AWSp.

PSE 494 Senior Thesis Proposal (5) Selection of a thesis topic, literature review, and preparation of a formal senior thesis proposal. Students select a faculty advisor to assist them in the proposal writing process. Regular or Honors credit.

PSE 495 Senior Project (5) Individual study of an environmental science and resource
management problem under direction of a faculty member. Requires a written project report. Generally taken in last year of residence. Offered: AWSpS.

PSE 496 Senior Thesis (5) Statistical analysis and presentation of research results and discussion of results in a thesis paper. Students work with faculty advisors to complete field or laboratory research and then prepare the senior thesis. Offered: AWSpS.

PSE 497 Pulp and Paper Internship (1-2, max. 3) Technical and economic analysis of commercial pulp and paper installations. Structured visits to industrial operations to observe technical aspects of pulp and paper curriculum in practice. Preparation of visitation reports and analysis in seminar setting. Offered: AWSpS.

PSE 499 Undergraduate Research (1-5, max. 15) Individual research supervised by a faculty member. For advanced students desiring to extend their educational experience. Credit/no credit only. Offered: AWSpS.

The Information School

Informatics

INFO 100 Fluency in Information Technology (5) QSR Introduces skills, concepts, and capabilities necessary to effectively use information technology. Includes logical reasoning, managing complexity, operation of computers and networks, and contemporary applications such as effective Web searching and database manipulation, ethical aspects, and social impacts of information technology. Not available for credit to students who have completed CSE 142 or ENGR 142. Offered: jointly with CSE 100.

INFO 198 Introductory Seminars in Informatics (1-5, max. 13) Selected introductory topics in informatics oriented toward freshman and non-major undergraduates and presented in a seminar format. Topics and content vary to represent the interests of the Information School faculty. Credits do not automatically apply to major/minor requirements.

INFO 220 Information Research Strategies (3/5) I&S Use information technology for research and information problem-solving. Create web sites or other presentations, as well as find, manage, and evaluate information, and learn the ethical and legal constraints on information use. AWSp.

INFO 221 Information Research Strategies in History (3) I&S Information research and problem solving in the context of history. Focuses on identifying research need, information seeking, evaluation and presentation, and selection of the appropriate sources. Offered: jointly with HIST 221.

INFO 222 Understanding Photographs as Historic Documents (3) I&S/NW Introduction to understanding how to view and interpret information contained in photographs. Examines the photograph as artifact, intent of the photographer, photographic codes and meanings; how such information is used, misused, and manipulated for various purposes and how to navigate archival institutions in search of photographs. Offered: jointly with INFO 222.

INFO 299 Study Abroad - Informatics (1-5, max. 15) For participants in study abroad program. Specific course content varies. Credits do not automatically apply to major requirements.

INFO 300 Intellectual Foundations of Informatics (5) Information as an object of study, including theories, concepts, and principles of information, information seeking, cognitive processing, knowledge representation and restructuring, and their relationships to physical and intellectual access to information. Development of information systems for storage, organization, and retrieval. Experience in the application of theories, concepts, and principles.

INFO 310 Individual Perspectives on Information Systems (5) I&S Social, cognitive, behavioral, and contextual aspects of information systems, including human information behavior, interpersonal interaction, and social responses to information technology. Emphasis on well-being and information exchanges as a communicative event. Exposure to experimental and naturalistic methodologies through laboratory assignments and field work.

INFO 311 Organizational, Societal, and Global Perspectives on Information Systems (5) I&S Social, ethical, economic, political, and cross-cultural implications of current and future information systems. Information transfer and use within groups, organizations, and cultures. Focus on organizations as information processors, the new knowledge economy, and national and international information policy, intellectual property, privacy, censorship, and freedom of information.

INFO 320 Information Needs, Searching, and Presentation (5) Introduction to information needs, database and information organization, and structure, Web and database searching and browsing, and information presentation. Examination of underlying principles in knowledge representation, indexing, record structures, online search process, search strategies and tactics, assessment of user needs, reference interviewing, post-processing, organization and presentation of information.

INFO 340 Database Management and Information Retrieval (5) NW Theories and models in system-centered approaches to information retrieval and database management. Information retrieval and database management systems include text and multimedia databases, web search engines and digital libraries. Issues in system design, development and evaluation, and tools for searching, retrieval, user interfaces, and usability. Prerequisite: CSE 373.

INFO 341 Computer Networks and Distributed Applications (5) NW Basic concepts of local and wide area computer networking including an overview of services provided by networks, network topologies and hardware, packet switching, client/server architectures, network protocols, and network servers and applications. Also addresses management, security, authentication, and policy issues associated with distributed systems. Prerequisite: CSE 143.

INFO 344 Web Tools and Development (5) Introduction to fundamental Web technologies with an emphasis on scripting and programming. Includes both client and server technologies. Examines effective information architecture for Web sites, information presentation on Web pages, privacy policies, and Web security. Prerequisite: CSE 142.

INFO 380 Information Systems Analysis and Management (5) Examines the evolution of how information is managed in order to add value to organizations. Views information management and the CIO as key facilitators in creating or improving relationships, processes, competitiveness, products, and services.

INFO 414 Information Behavior (5) Advanced study of information behavior. Focus on the user-centered approach and the research literature of human information behavior. Introduces methods for evaluating and translating the results of user behavior studies into the design of information services and systems. Prerequisite: INFO 310.

INFO 419 Special Topics in Social Aspects of Information (1-5, max. 10) Various topics in the social aspects of information. Offered by visitors or resident faculty.

INFO 424 Information Visualization and Aesthetics (5) VLPVA Examines the visualization of information: the effects of human perception, the aesthetics of information design, the mechanics of visual display, and the semiotics of iconography. Examples may include census, epidemiological, crime, earth satellite, and medical data in the contexts of special computer applications, user populations, and cultures. Prerequisite: CSE 143.

INFO 430 Knowledge Organization and Representation (5) Advanced study of knowledge organization using classificatory structures and creation of metadata element sets for representation. Conceptual and practical foundations for creating systems for information organization and representation. The creation, application, and use of a variety of systems and techniques for information organization and representation. Prerequisite: INFO 300; INFO 320.

INFO 440 Design Methods for Interaction and Systems (5) NW Theoretical and practical examination of the information systems design process. Techniques for assessing the need for technology, specifying the system design, and involving users in the design process are explored. Design methods include social impact statements, future scenarios, mock-ups, rapid prototyping, field-testing, heuristic evaluation. Prerequisite: CSE 373.

INFO 444 Value-Sensitive Design (5) Introduction to value-sensitive design (VSD), information system design that accounts for human values in a principled and comprehensive manner. Examination of existing systems from a VSD perspective. Explores VSD research methods including conceptual, technical, empirical investigations. Key values include accountability, autonomy, consent, privacy, property, trust, sustainability. Prerequisite: CSE 373.

528
Operational databases, decision support systems, and data warehousing. Projects in database implementation and integration. Social implications of large distributed database systems. Prerequisite: INFO 340; CSE 373.

INFO 446 Advanced Search Engine Systems (5) Focuses on design, development, and evaluation of search engines. Theories and models in information retrieval for text and multimedia databases, Web search engines, recommenda-
tion systems, and digital libraries. Topics include language issues, data-mining, machine learning, user-profiling, visualization, user interfaces, usability. Coursework involves analytical comparisons of search engines. Prerequisite: INFO 340.

INFO 447 Computer Supported Cooperative Work (5) Focuses on design and use of collaboration technologies to communicate, share information, and coordinate activity. Emphasis on behavioral and social aspects of adopting and using these technologies. Topics include the history of work in this and related fields, collaboration support for teams, organizations, and communities. Prerequisite: INFO 310.

INFO 449 Special Topics in Information Technology (1-5, max. 10) Various topics in information technology. Offered by visitors or resident faculty.

INFO 454 Information Policy: Domestic and Global (5) National and international information policy; public and private sector policy in terms of privacy, access, and exploitation; technology infrastructures and policies supporting the information industries; digital convergence and the emerging mega-industries. Prerequisite: INFO 310.

INFO 456 Reading Seminar in Social Aspects of Information Systems (2, max. 12) Addresses foundational issues in social aspects of information systems. Introduction to the intellectual traditions that underlie fields such computer ethics, social informatics, and value sensitive design. Format entails in-depth discussions based on careful reading of primary source texts selected by seminar participants.

INFO 459 Special Topics in Information Policy (1-5, max. 10) Various topics in information policy. Offered by visitors or resident faculty.

INFO 470 Research Methods in Informatics (5) Introduction to the research process investigating information needs, creation, organization, flow, retrieval, and use. Stages include: research definition, questions, objectives, data collection and management, data analysis, and data interpretation. Techniques include: observation, interviews, questionnaires, and transaction-log analysis. Prerequisite: STAT 220 or STAT 311.

INFO 484 Information Entrepreneurship (5) Investigates the development of innovative human-centered informatics products, with emphasis on the unique challenges and opportunities in high-value information products. Includes competition, strategic planning, tactical marketing, informatics product launches, and applied infopreneurship. Teamwork to create and present plans for innovative informatics products/services. Prerequisite: either INFO 300, INFO 310, or INFO 311.

INFO 489 Special Topics in Information Management (1-5, max. 10) Various topics in information management, offered by visitors or resident faculty.

INFO 490 Design and Development of Interactive Systems (4-8, max. 8) Design and formative evaluation of an interactive information system to solve a real problem. Student-organized team projects are encouraged. Must be taken for a minimum of 5 credits. Prerequisite: INFO 340; INFO 310; INFO 440.

INFO 491 Research in Informatics (4-8, max. 8) Provides hands-on experience conducting a research project related to information behavior and technology. This project may be carried out in a natural setting or in the laboratory by preparing students to carry out similar research projects in their professional work. Prerequisite: INFO 310; INFO 440; INFO 470.

INFO 495 Internship in Informatics (1-5, max. 12) Internship in the private or public sector as approved by faculty member. Work jointly supervised by faculty member (or approved academic sponsor) and an on-site work supervisor.

INFO 498 Special Topics in Informatics (1-5, max. 15) Various topics in informatics. Offered by visitors or resident faculty. Topics vary.

INFO 499 Independent Study (1-5, max. 15) Readings, design projects, or research under faculty supervision.

Information Management and Technology

IMT 440 Technology Foundations for Information Professionals (1-5, max. 5) Introduction to selected topics in information technology including computer architecture, computer network communication, discrete mathematics, algorithms and data structures, imperative programming, markup languages, and end-user programming tools.

IMT 480 Management Foundations for Information Professionals (1-5, max. 5) Introduction to selected topics in information management including organizational theory, learning, change, planning, organizing, leading, and controlling. Covers communication skill building topics as well, including presentation, written communication, and collaboration.

IMT 500 The Information Management Framework (1) Overview of the major concepts in the MSIM curriculum. Includes an introduction to the concept of information as well as its relation to organizational management, technology, and design and culture.

IMT 510 Human Aspects of Information Systems (4) Social, organizational, cognitive, behavioral and contextual aspects of information, including basic concepts in human information behavior, conceptual and practical frameworks used to study human-information interaction, and social responses to information technology. User-based and work-based evaluation and design of information systems. Exposure to experimental and interview methodologies.

IMT 520 Information Services and Resources (4) Concepts, processes, and skills of information involving creation, production, distribution, selection, collection, and services to facilitate access. Analysis of the information mediation process, including determining information needs; searching for, evaluation and presentation of appropriate results; and modalities for delivery of services.

IMT 530 Organization of Information Resources (4) Introduction to issues in organization of information and information objects including analysis of intellectual and physical properties of information objects; use of metadata and metadata standards for information systems; theory of classification, including semantic relationships and facet analysis; creation of controlled vocabularies; and display and arrangement.

IMT 540 Design Methods for Interaction and Systems (4) Introduction to the theory and practice of user-centered design. Examines design methods for identifying and describing user needs, specifying and prototyping new systems, and evaluating the usability of systems. Examines design methodologies such as contextual design and value-sensitive design, giving specific emphasis to human-information interaction. Prerequisite: permission of instructor.

IMT 541 Principles of Database and Semi-Structured Data Systems (5) Introduction of database management systems for teeh storage and access of structured and semi-structured information. Examines the relational model, Structured Query Language (SQL), Entity-Relationship modeling, database design methodology (conceptual, logical, and physical design), and Extensible Markup Language (XML) for storage, retrieval, and interchange. Prerequisite: IMT 540.

IMT 542 Principles of Information Retrieval Systems (3) Introduction to information systems for the storage and retrieval of information. Examines information retrieval architectures, processes, retrieval models, query languages, and methods of system evaluation. Gives emphasis to Internet-based services for storing and accessing information to be used in integrated application development. Prerequisite: IMT 540.

IMT 546 Data Communications and Networking (4) Local and wide area computer networking including network topologies and hardware, packet switching, client/server architectures, network protocols, and network servers and applications. Addresses server operating systems, management, security, authentication, and policy issues associated with distributed networks. Prerequisite: IMT 510.

IMT 548 Information System Design (5) Theoretical and practical examination of information systems analysis and design processes as they apply in the workplace. Explores techniques for assessing the need for technology, defining specifications, and involving users in the design process. Design methods include social impact statements, future scenarios, mock-ups, rapid prototyping, and field-testing. Prerequisite: IMT 540.

IMT 550 Policy, Law, and Ethics in Information Management (3) Select concepts, processes, and issues related to the organizational context within which information professionals practice. Topics include information as public/private good, intellectual property, privacy, confidentiality, information liability, and information policy. Focus on contemporary issues affecting the role of the information management.

IMT 580 Management of Information Organizations (4) Survey of leadership
competencies in business information, social process, human factors, and Information Technology (IT) contexts. Examines manager and director level leadership activities in conveying the relevance of IT, managing critical relationships, and implementing IT-based solutions, in an effort to ensure information resource initiatives are aligned with organizational objectives.

IMT 581 Information and the Management of Change (3) Practical application of the critical roles and aspects of information and information processes in the management of organizational change. Topics include organization learning, knowledge management as a process, business process change, change project management, business/competitive intelligence, benchmarking, and best practices. Prerequisite: IMT 580.

IMT 582 Strategic Information Initiatives (4) Studies and applies strategic information initiatives within an organization, including: readiness assessment, organizational mandates, information inventories, content management, information audits, and information architecture initiatives. Focuses on building business cases for and leading information initiatives in organizations. Prerequisite: IMT 581.

IMT 583 Finance and Accounting Foundations for Information Professionals (3) Introduction to financial accounting, including the principles of double-entry accounting, balance sheets, income, and cash flow statements. Covers key financial ratios and their use for various analytical purposes, along with the elements of a financial plan or budget. Prerequisite: IMT 510; IMT 580.

IMT 584 Marketing Foundations for Information Professionals (3) Introduction to the principles of marketing. Looks at how to assess an environment from a marketing perspective, consumer and business behavior, market segmentation, product/service strategies, new product development processes, pricing, channels, retail/wholesale, marketing communication, and direct selling. Prerequisite: IMT 510; IMT 580.

IMT 585 Human Resource Management Foundations for Information Professionals (3) Introduction to human resource management for information professionals. Covers the principles of job analysis, employee selection, interviewing, training, and appraisal. Prerequisite: IMT 510; IMT 580.

IMT 586 Information Dynamics I (4) Introduction to the concepts and methods of information feedback, systems thinking, soft systems methodology (SSM), and “soft operations research,” as well as the quantitative modeling of complex dynamic systems by means of differential and integral equations (system dynamics).

IMT 587 Information Dynamics II (4) Advanced concepts and methods of information feedback, systems thinking, soft systems methodology (SSM), and “soft operations research,” as well as the quantitative modeling of complex dynamic systems by means of differential and integral equations (system dynamics), including model building, testing, and validating. Prerequisite: IMT 586.

IMT 589 Special Topics in Information Management (1-4, max. 12) Special study and research in topics of current concern to faculty and students.

IMT 595 Stakeholders, Information, and Technology (3-5, max. 5) Capstone experience. Addresses system integration and the increasing demand to apply a broad range of technologies to the information needs of diverse user groups during the implementation of comprehensive information systems across an organization. Encourages students-organized group projects. Prerequisite: completion of IMT core courses 510 through 582.

IMT 598 Emerging Trends in Information Management and Technology (3) Focus on emerging trends in information management and information technology. Attention given to their impact on the functions of the chief information officer and others managing the acquisition, retention, use and disposition of information and the enabling technologies. Exploration of methods and resources for trend discovery and tracking. Prerequisite: IMT 510.

IMT 590 Fieldwork in Information Management (1-4, max. 12) Supervised fieldwork. May be taken in as many as six consecutive quarters. Prerequisite: enrollment in the MSIM program.

IMT 600 Independent Study or Research in Information Management (1-4, max. 12) Supervised independent study or research. May be taken in as many as six consecutive quarters. Prerequisite: enrollment in the MSIM program.

Information Science

INSC 500 Faculty Seminar(2) Presentations by faculty concerning research projects in which they are involved.

INSC 501 Theoretical Foundations for Information Science (3) In-depth exploration of the philosophical, theoretical, methodological, and historical foundation of information science and the study of information.

INSC 510 Theoretical Foundations of Human Information Behavior (4) Study of constructs, concepts, models, and theories information scientists use in studying human information behavior. Socio-cognitive aspects of individuals needing, seeking, giving, and using information. Models of information behavior, conceptual frameworks, assumptions, analytical tools, and the factors that differentiate groupings of information users and predict or influence information behavior.

INSC 530 Knowledge Representation (2/4) In-depth survey of the various approaches to knowledge representations in areas such as taxonomy, library classification, anthropology, cognitive psychology, linguistics, and artificial intelligence.

INSC 540 User-Centered Information System Design (4) Seminar in theories and methods for user-centered and system-centered approaches to information system design. Research and issues in the design process, development, and evaluation of information systems. Technical context typically includes one or more of the following: information retrieval, human-computer interaction, or computer-supported cooperative work. Prerequisite: permission of instructor.

INSC 550 Information Policy (4) Doctoral seminar in the foundations of information policy including intellectual freedom, public/private good, intellectual property, privacy, and digital convergence, and the reshaping of information practices and information industries. Prerequisite: Permission of instructor.

INSC 565 Teaching Practicum I (3) Doctoral student participation in teaching in a faculty-taught course. Credit/no credit only.

INSC 566 Teaching Practicum II (3) Doctoral student takes primary teaching responsibility for a course under supervision of a faculty liaison. Credit/no credit only. Prerequisite: INSC 565.

INSC 570 Research Design (4) Introduction to empirical research, basics of theory construction and research design, types of research, ethical issues, instruments and techniques for descriptive research, measures of association. Employs an integrated (qualitative and quantitative) and focused approach.

INSC 571 Quantitative Methods in Information Science (5) Describes uses, characteristics, and theoretical bases of research methods and data analysis techniques used in quantitative research, emphasizing uses in information and library science. Topics include experimental design, descriptive and inferential statistics, the normal distribution, elementary probability, nonparametric statistics, and exploratory data analysis techniques. Prerequisite: INSC 570.

INSC 572 Qualitative Methods in Information Science (5) Principles and approaches to conducting qualitative research in information science, including how to design a qualitative study, role of context, methods of data collection and analysis, increasing the trustworthiness of data, minimizing observer effect, how to incorporate and build theory. Exposure to field research and data analysis. Prerequisite: INSC 570.

INSC 575 Research Practicum I (3) Students work with a researcher from the Information School as an active member of a research team. Credit/no credit only.

INSC 576 Research Practicum II (3) Students will work with an approved researcher as an active member of a research team. Credit/no credit only. Prerequisite: INSC 575 or permission of instructor.

INSC 598 Special Topics in Information Science (3, max. 12) .

INSC 599 Independent Study in Information Science (1-5, max. 15) Readings, design projects, or research under faculty supervision. Prerequisite: permission of instructor and Ph.D. program chair.

INSC 600 Independent Study or Research (*) Credit/no credit only.

INSC 800 Doctoral Dissertation (*) Credit/no credit only.

Information Technology Applications

ITA 340 Introduction to Web Publishing (3) Introduction to markup languages and publishing web content. Students gain understanding of HTML coding and extensions, image manipulation, information architecture, and web site publishing. Other topics include: the Web Accessibility Initiative, survey of Graphical User Interface (GUI) HTML editors, online privacy and security, and Extensible Markup Language (XML).
ITA 341 Client-side Scripting and Design (3)
Introduction to web browser design environment, scripting languages, JavaScript, Document Object Model (DOM), and creation of dynamic HTML web pages (DHTML) in combination with Cascading Style Sheets (CSS). Other topics include: client-server architecture and web design principles in the contexts of technical feasibility, usability, and accessibility. Prerequisite: ITA 340.

ITA 342 Introduction to SQL and Data Storage Technologies (3) Fundamentals of database design in a client-server architecture useful for web applications. Subsequent topics build upon foundation by introducing the Structured Query Language (SQL), open source tools MySQL and PHP for database processing, security issues in database applications, and XML as a alternate database storage technology. Prerequisite: ITA 341.

ITA 343 Server-Side Programming and Web-data Integration (3) Provides framework to integrate server-side programming concepts and techniques, database technologies, and client-side scripting to design and implement dynamic web applications. Examines techniques using PHP, design and implementation of database (MySQL) connections, web application security, and XML data publication. Prerequisite: ITA 342.

Library and Information Science
LIS 462 Skills Approach to Information, Communications, and Technology (ICT) Literacy (3) Introduction to the Big6™ Skills approach to information, communications, and technology (ICT) literacy for personal, school, district, or higher education settings. Includes technology within the Big6 framework, connection to standards, instructional design, assessment, curriculum mapping, peer collaboration, the parent connection, program planning, and implementation.

LIS 498 Special Topics (1-5, max. 15) Library service and information science subject matter in seminars, workshops, or other appropriate formats. Topics vary and may be repeated for credit.

LIS 500 The Life Cycle of Information (2) Overview of the major concepts, processes and systems, actors, and operations in the life cycle of information. Introduction to the creation, publishing and distribution, evaluation and selection, organization, access, retrieval, and use of information. Exploration of the social context in which these processes and their stakeholders interact. Credit/no credit only.

LIS 505 Archival and Manuscript Services (3) Selection, organization, and use of archival and manuscript collections. Emphasis on the principles and techniques; some attention to the administration of state archival and historical institutions' collections. Lecture, demonstration, and laboratory.

LIS 507 Preservation and Conservation of Library Materials (3) Consideration of the many factors contributing to the physical vulnerability of library materials, all kinds and an overview of resources and strategies for those who determine preservation policy or manage the application of such policy. No technical background necessary.

LIS 508 History of Recorded Information (4) Exploration of the history and ongoing transformation of recorded information within three broad spheres of human life: public communication, administrative and commercial operation, and personal communication.

LIS 510 Information Behavior (4) Introduction to the user-centered approach to information behavior. Theoretical foundations of various information behaviors such as information need, utilizing, gathering, seeking, and evaluating. Synthesis of user studies, construction of user profiles, personalization of gap analysis, and application of the results of user studies to improve services and system design. Prerequisite: LIS 500.

LIS 511 Systems Analysis (4) Introduction to the systems approach including basic concepts in the approach, dimensions of systems and steps in systems design. Emphasis is on the analysis, evaluation and design of information systems and services. Prerequisite: LIS 500.

LIS 512 Community Analysis (4) Key concepts of community in its broadest sense, methodological approaches for analyzing information needs and available resources, how to design information services in response to identified needs, and service evaluation. Facilitating the information behavior of all groups within a community to identify how their needs interconnect. Prerequisite: LIS 510.

LIS 515 Ecological Information Systems (4) Introduction to cognitive work analysis framework. Prepares for active role in design and evaluation of information systems. Familiarization with basic concepts of cognitive systems engineering and practice in field study, data analysis, and transforming field findings into requirements for the design of an information system. Offered: jointly with T C 515.

LIS 519 Special Topics in Information Behavior (1-4, max. 18) Introduction to innovative and specialized topics in information behavior. Course may be offered irregularly and may be repeated for credit. Prerequisite: LIS 510; others as determined by the specific topics covered.

LIS 520 Information Resources, Services, and Collections (4) Concepts, processes, and skills related to parts of the life cycle of knowledge involving creation, production, distribution, selection, collection, and services to facilitate access. Specific discussion topics include characteristics of recorded knowledge; organizations and services devoted to managing access to recorded knowledge; principles associated with development of recorded knowledge and collections. Prerequisite: LIS 500.

LIS 521 Principles of Information Services (4) Analysis of the information mediation process, including determination and analysis of information needs; searching for, evaluation, and presentation of appropriate results; modalities for delivery of services; and current and future techniques. Prerequisite: LIS 520.

LIS 522 Collection Development (3) Access to materials as context for development and management of library collections in academic, public, school libraries. Community analysis, library mission; collection development policies, criteria, levels, responsibilities; aids to selection; collection evaluation, use studies; controversial materials.

LIS 523 Advanced Information Services (4) Investigation of the development, administration, and evaluation of information services for supporting the research process both within and across organizations. Prerequisite: LIS 521 or permission of instructor.

LIS 526 Government Publications (3) Introduction to government publications of the United States and their acquisition, organization, and use. Other topics covered include the public’s right to know, the Federal Depository Library Program, government influences in our daily lives, and future directions in government information. Credit/no credit only.

LIS 527 Business Information Resources (3) Survey of the extent and nature of business information and its sources, and of business information producers and consumers. Study and use of both print and on-line sources.

LIS 528 Health Sciences Information Needs, Resources, and Environment (3) Characteristics of users of health sciences information; health professionals, researchers, consumers and patients; environments (academic health sciences centers, hospitals, clinics, and public libraries); evaluation of information resources in health care; types and uses of health information management systems; policy issues, professional standards, education, and certification. Offered: jointly with MEDED 570.

LIS 529 Special Topics in Information Resources, Services and Collections (1-5, max. 18) Introduction to innovation and specialized topics in information resources, services and collections. Prerequisite: LIS 500, LIS 520; others as determined by the specific topic covered.

LIS 530 Organization of Information and Resources (4) Introduction to issues in organization of information and documents including: analysis of intellectual and physical characteristics of documents; principles and practice in surrogate creation, including standards and selection of metadata elements; theory of classification, including semantic relationships and facet analysis; creation of controlled vocabularies; and display and arrangement. Prerequisite: LIS 500, which may be taken concurrently.

LIS 531 Catalogs, Cataloging, and Classification (4) Develops an understanding of library catalogs as information retrieval systems. Introduces library cataloging and classification. Focus on principles and standards in the creation of catalogs and cataloging records. Includes practice in descriptive and subject cataloging and classification. User perspective emphasized throughout. Prerequisite: LIS 500, LIS 530.

LIS 533 Advanced Cataloging and Classification (4) In-depth theory and practice in library cataloging and classification. Includes introduction to cataloging materials in a variety of formats. Prerequisite: LIS 500, LIS 530, and LIS 531.

LIS 535 Classification Theory (3) Survey of classificatory principles from bibliographic, philosophical, socio-cognitive, and linguistic perspectives. Overview of history of bibliographic classification and exploration of some existing bibliographic classification systems. Ramification of theoretical approach for classification practice. Prerequisite: LIS 530.
LIS 536 Indexing and Abstracting (3)
Exploration of issues in subject representation. Survey of different approaches, techniques, and methods for representing the subject matter of documents, including an evaluation of the role of users and context in subject representation. Formulation of policies for indexing and abstracting services. Prerequisite: LIS 530.

LIS 537 Construction of Indexing Languages (4)
Exploration of the design, construction, evaluation, and maintenance of controlled indexing languages, including studies of how users are integrated into the design process. Through completion of thesaurus construction project, prepares students to design index languages, plan and implement a design project, and evaluate indexing languages. Credit/no credit only. Prerequisite: LIS 530.

LIS 538 Metadata: Evolving Principles and Practices (3)
Principles, skills and practices in the conceptualization and implementation of metadata and metadata systems with a focus on semantic interoperability in distributed environments. Topics include theory and metadata development for attribute and value spaces, metadata registry roles and services, organizational mechanisms, Web Services and advanced search engines. Prerequisite: LIS 530, LIS 540 or equivalent.

LIS 539 Special Topics in Organization of Information and Resources (1-4, max. 18)
Introduction to innovative and specialized topics in the organization of information and resources. Prerequisite: LIS 500; LIS 530; others as determined by the specific topic covered.

LIS 540 Information Systems, Architectures and Retrieval (3)
Introduction to structured object-oriented programming for information systems. Focuses on fundamental principles of programming with attention to elementary algorithms and data structures, interface design, user testing, and knowledge representation. Prerequisite: LIS 540 or permission of instructor.

LIS 541 Information Technologies and Applications (3)
Overview of information technologies including networking hardware, the TCP/IP protocol suite, addressing, packets and routing, the client/server model. End-user applications for communication and collaboration such as telnet, FTP, email, conferencing, and streaming media. Web site creation, development, and management. Credit/no credit only. Prerequisite: LIS 511 or LIS 540.

LIS 542 Conceptual Database Design (5)
Introduction to relational database theory and technology from an information science perspective. Focuses on traditional transactional database theory, architecture and implementation in a user-centered systems context. Introduces set and graph theory, relational algebra, and data warehouses. Credit/no credit only. Prerequisite: LIS 511 or LIS 540.

LIS 543 Design of Information Systems (3)
Discusses how theories of conceptual data modeling affect design of database and information systems, examines relationships between modeling and implementation, and bridges gaps between theoretical understanding of database design and implementation issues. Implements conceptual schemata development in 542.

LIS 544 Information Retrieval System (3)
Covers theories and models in information retrieval (IR) and reviews user-centered and system-centered approaches. Issues involved in the design, development and evaluation of IR systems are examined including: methods and tools for document analysis, retrieval techniques, search engines, interfaces, usability, evaluation. Prerequisite: LIS 545 Programming for Information Systems (5)
Introduction to structured object-oriented programming for information systems. Focus on fundamental principles of programming with attention to elementary algorithms and data structures, interface design, user testing, and knowledge representation. Prerequisite: LIS 540 or permission of instructor.

LIS 546 Network System Administration (4)
Introduction to local area network hardware, topologies, operating systems, and applications. Covers aspects of network setup and management including network and application protocols, system configuration, security and Internet connectivity. Hands-on experience with network applications and operating systems. Prerequisite: LIS 500.

LIS 547 Special Topics in Information Systems, Architectures and Retrieval (1-4, max. 18)
Introduction to innovative and specialized topics in information systems, architectures, and retrieval. Prerequisite: LIS 540, plus others as determined by topic.

LIS 550 Information in Social Context (4)
Concepts, processes, and issues related to the larger social context within which the life cycle of knowledge is played out. Discussion topics include intellectual freedom, information as public/private good, intellectual property, privacy, confidentiality, information liability, information and telecommunications policy, the economics of information, and other professional values. Prerequisite: LIS 500, which may be taken concurrently.

LIS 551 Intellectual Freedom in Libraries (3)
Analysis of issues related to intellectual freedom, particularly to implications for libraries and librarians. Consideration of current legal climate, conformity versus freedom in modern world, librarian as censor, social responsibility and individual freedom, intellectual freedom of children, prospects for future. Credit/no credit only.

LIS 554 Information Policy: Domestic and Global (5)
National and international information policy: public and private sector policy in terms of privacy, access, and exploitation; technology infrastructures and policies supporting the information industries; digital convergence and the emerging mega-industries. Prerequisite: LIS 550 or permission of instructor.

LIS 558 Reading Seminar in Social Aspects of Information Systems (2)
Addresses foundational issues in social aspects of information systems. Introduces students to the intellectual traditions that underlie fields such as computer ethics, social informatics, and value-sensitive design. Format entails in-depth discussions based on careful reading of primary source texts selected by seminar participants. Prerequisite: permission of instructor.

LIS 559 Special Topics in the Social Context of Information (1-4, max. 18)
Introduction to innovative and specialized topics in the social context of information. Course may be offered irregularly and may be repeated for credit. Prerequisite: LIS 550 and others as determined by the specific topic covered.

LIS 560 Instructional and Training Strategies for Information Professionals (3)
Develops knowledge and skills in instruction and training functions for library and information settings. Issues and strategies for learning and teaching, Design, development, and evaluation of information and technology literacy programs. Addresses the needs of users when designing and delivering instruction. Prerequisite: LIS 500, which may be taken concurrently.

LIS 561 Storytelling: Art and Techniques (3)
Storytelling, past and present, noting its development as an art form. Analyzing storytellers materials (folk literature and literary forms) throughout historical periods. Essential techniques necessary to this artistic skill. Planning storytelling programs for various ages, interest groups, and situations, utilizing folk, classic, and contemporary literature.

LIS 565 Children's Materials: Evaluation and Use (4)
Library materials for children from infancy through elementary grades. Focus on resources in all media that serve informational, educational, cultural, and recreational needs of the young. Focuses on standard bibliographies and other resources designed to meet informational needs of adults serving children. Prerequisite: LIS 500, LIS 510, LIS 520, or permission of instructor.

LIS 566 Young Adult Materials: Evaluation and Use (4)
An overview of materials reflecting adolescents' interest in media and addressing their educational, cultural, and recreational needs. Students evaluate print literature, electronic ad other non-print media for young adults. Content also designed to assist adult caregivers of adolescents. Prerequisite: LIS 500, LIS 510, and LIS 520 or permission of instructor.

LIS 567 Public Library Services for Youth (3)
Administration of youth departments in public libraries; planning and promoting programs and services; evaluation of library collections; community and professional roles of the youth librarian. Prerequisite: LIS 500 or permission of instructor.

LIS 568 Information Literacy for Teaching and Learning (5)
Theories, process, and practical applications of information literacy. Development of information literacy programs for libraries, community agencies, business, education or other information settings. Intrinsic themes include the integral relationship between technology and information literacy, and continual evaluation.

LIS 569 Special Topics in Instructional and Training Strategies for Information Professionals (1-5, max. 18)
Introduction to innovative and specialized topics in instructional and training strategies for information professionals. Prerequisite: LIS 560 and others as determined by the specific topic covered.

LIS 570 Research Methods (4)
Research as a process from problem definition and formulation of questions to design, data collection, analysis, and reporting. Students recognize research opportunities, translate them into researchable frameworks, design research projects, and implement results in libraries and other information agencies. Prerequisite: LIS 500, which may be taken concurrently.

LIS 579 Special Topics in Research Methods (1-4, max. 18)
Introduction to innovative and specialized topics in research methods.

532
LIS 580 Management for Information Organizations (4) Introduction to internal and external management issues and practices in information organizations. Internal issues include organizational behavior, organizational theory, personnel, budgeting, planning. External issues include organizational environments, politics, marketing, strategic planning, funding sources. Prerequisite: LIS 500, which may be taken concurrently.

LIS 581 Marketing and Planning for Libraries (3) Approaches to planning and marketing library products/services. Examines partnerships that can be forged between elements of marketing and appropriate futures strategies for libraries. Discusses marketing and planning as integrated processes with attention to short- and long-term goals and objectives. No particular library institutional setting is assumed. Prerequisite: LIS 500, which may be taken concurrently.

LIS 582 Strategic Planning and Management of Information Technology (3) Exploration of methods of strategic planning for managing information resources and technology to support online information services and the role of the systems librarian and CIO. Topics include mission and goals, strategic planning, the information technology function within organizations, and the desirable abilities of managers and leaders. Prerequisite: LIS 580.

LIS 583 Staffing Information and Information Technology Positions (3) Staffing and human resources related to information organizations and the information technology unit. Examination of demand for and supply of information and information technology workers, recruitment, training, and retention. Prerequisite: LIS 580.

LIS 584 Knowledge Management (3) Introduction to contemporary topics in management of knowledge creation and use in organizations. Discussion topics include knowledge generation, knowledge taxonomy, knowledge transfer, organizational knowledge management practice, and knowledge management systems. Prerequisite: LIS 500; LIS 580, or permission of instructor.

LIS 585 Administration of the School Library Media Program (3) Develops competency in administering materials, equipment, and services of library media program as integral part of educational process of school. Focuses on developing skills in acquiring, organizing, and managing full range of learning resources for access and use, and communicating the program to users. Required for school library media specialists. Prerequisite: LIS 560.

LIS 586 Public Libraries and Advocacy (3) Examines the purpose and role of public libraries in an information society. Includes governance, services, and planning with special emphasis on advocacy for the library and community.

LIS 587 Library Technology Systems (4) Developing criteria for selection and design of information technology systems for libraries and information centers. Applying criteria in evaluation of hardware and software. Examining related management challenges, such as vendor relations, financing options, personnel requirements, and design of auxiliary activities. Prerequisite: LIS 540, LIS 580, or permission of instructor.

LIS 588 Special Librarianship (3) Seminar in the practice of special librarianship in business and industrial firms, government agencies, and the free-lance sector. User services and information resources. Credit/no credit only. Prerequisite: LIS 580.

LIS 589 Special Topics in Management of Information Organization (1-4, max. 18) Introduction to innovative and specialized topics in management of information organizations. Prerequisite: LIS 500, LIS 580; others as determined by the specific topic covered.

LIS 590 Directed Fieldwork (2-4, max. 8) Minimum of 100 hours, maximum of 200 hours of professional, supervised fieldwork in a library or professional information setting. Fieldwork is a one-quarter experience; however, this may be repeated in a different setting with a different set of learning objectives for a subsequent quarter. Library and Information Science majors only. Credit/no credit only. Prerequisite: 30 credits in Library and Information Science program.

LIS 592 Legal Research II (3/4) Legal tools that answer more complex legal research problems, such as federal legislative histories, sources of administrative law, specialized subject research. Federal emphasis. Builds on skills and techniques taught in LIS 591/LAW A 598. Extensive work with online resources. Prerequisite: LIS 591 or permission of instructor. Offered: jointly with LAW A 599.

LIS 593 Selection and Processing of Law Library Materials (3) Study of tools for collection development and collection development plans in law libraries. All law library technical processes, including acquisitions, budgeting, cataloging, and serials. Prerequisite: LIS 591 or permission of instructor.

LIS 594 Law Library Administration (4) Administration in law libraries, including organization, personnel, and management issues (e.g., interviewing, hiring, firing), communications, library planning, and bookkeeping. Credit/no credit only. Prerequisite: LIS 591 or permission of instructor.

LIS 595 Current Issues in Law Librarianship (4-, max. 4) From a list of current topics in law librarianship, students select a topic, research it fully, write a major paper, and present their paper. Topics may include citation reform, ethics, and publisher practices. Credit/no credit only. Prerequisite: Law Librarianship majors or permission of instructor.

LIS 596 Special Topics in Information and Library Science (1-6, max. 18) Seminar dealing with various topics in information and library science. Offered by visitors or resident faculty. Topics are changed from quarter to quarter. May not be offered every quarter. Prerequisite: determined by specific course.

LIS 600 Independent Study or Research (*) Credit/no credit only.

LIS 700 Master's Thesis (*) Credit/no credit only.
Interdisciplinary Graduate Programs

Biomolecular Structure and Design

BMSD 520 Research Seminar (0.5, max. 9) Group conferences on graduate student research. Prerequisite: BMSD graduate student or permission of instructor. Offered: AWSp.

BMSD 540 Literature Review (2) Emphasizes critical evaluation of original articles in literature from all fields relevant to Biomolecular Structure and Design. Scientific writing and oral presentations emphasized. Prerequisite: first-year BMSD student or permission of instructor. Offered: A.

BMSD 541 Literature Review in Biomolecular Structure and Design (2) Emphasizes critical evaluation of original articles in literature from all fields relevant to Biomolecular Structure and Design. Scientific writing and oral presentations emphasized. Prerequisite: first-year BMSD student or permission of instructor. Offered: W.

BMSD 542 Literature Review in Biomolecular Structure and Design (2) Emphasizes critical evaluation of original articles in literature from all fields relevant to Biomolecular Structure and Design. Scientific writing and oral presentations emphasized. Prerequisite: first-year BMSD student or permission of instructor. Offered: Sp.

BMSD 599 Introduction to Research in Biomolecular Structure and Design (3-6, max. 24) Student works with one of the research groups within the Biomolecular Structure and Design Program for one quarter and then rotates to another laboratory for one additional quarter. Minimum two quarters, maximum four. Prerequisite: BMSD student or permission of instructor. Offered: AWSp.

Global Trade, Transportation, and Logistics

GTTL 501 Global Logistics Management (4) Provides an overview of the concepts and substance of trade, transportation, and logistics. Deals with management of physical, documentation, and information flows within supply, including purchasing, distribution, intermodal transportation, ERP commerce and e-fulfillment, financial transactions, and regulations. Prerequisite: permission of instructor. Offered: jointly with OPMGT 535; AW.

GTTL 502 Seminar in Global Trade, Transportation, and Logistics (4) Interdisciplinary seminar that brings together students with academics and practitioners at the forefront of trade, transportation, and logistics in discussions of selected topics. Additionally, students research issues of special interest. Prerequisite: OPMGT 535, GTTL 501, or permission of instructor. Offered: jointly with OPMGT 536; Sp.

GTTL 598 Global Aviation Management (3) Integrates aviation-related engineering, marketing, logistics, global trade, transport geography, and finance disciplines. Introduction to airplane, airport, and air traffic technology; aircraft/air traffic control/airline terminology; and aviation practices.

GTTL 599 Special Topics in Global Trade, Transportation, and Logistics Studies (1-5, max. 15) Selected topics with special emphasis on issues of pressing importance to the world trading community. Topics vary with departmental discretion. Prerequisite: Graduate students or permission of instructor.

GTTL 600 Independent GTTL Studies(*, max. 30) Opportunity to pursue GTTL-related issues that may not be explored in established UW courses. May involve projects undertaken in conjunction with entities beyond the University, subject to instructor approval.

GTTL 601 Internship in GTTL Studies(3-5, max. 9) Opportunity to pursue relevant research or to gain practicum experience in the employment of a department-approved public or private entity.

Graduate School

GRDSCH 610 Teaching Mentorship (3, max. 6) Individualized project, under the direction of a faculty member, focused on issues of teaching and learning at the college/university level and designed to enhance the student's ability to make innovative contributions in teaching. Credit/no credit only. Prerequisite: permission of graduate program coordinator and the Associate Dean of the Graduate School.

GRDSCH 615 Teaching Assistant Preparation (1-6, max. 6) Department or University-wide training for teaching and research assistants. Credit/no credit only.

GRDSCH 616 Research Assistant Preparation (1-6, max. 6) Department or University-wide training for research assistants. Credit/no credit only.

GRDSCH 620 Teaching Mentorship Seminar (2) Interdisciplinary seminar. Individual mentorship projects are presented and discussed. Prerequisite: permission of the Associate Dean of the Graduate School.

GRDSCH 630 Special Topics in College/University Teaching (2, max. 6) Interdisciplinary discussion of a variety of topics related to college/university teaching with an emphasis on innovation in teaching. Topics of broad campus interest complement similar offerings in individual disciplines. Credit/no credit only.

Individual Ph.D.

IPHD 600 Independent Study (*)

IPHD 800 Independent Study (*)

Molecular and Cellular Biology

MCB 511 Cell Cycle Control (3) Breden, Roberts, Edgar Studies recent advances in understanding cell-cycle control, arising from genetics and biochemical studies of fission and budding yeast, marine invertebrates, Drosophila, amphitons, and cultured cells. Addresses the biochemical processes and molecular interactions and the rate-limiting events in the cell cycle, and the coupling of those events to physiological signals. Offered: A.

MCB 513 Development Journal Seminar (1, max. 12) Mohns, Soriáno, Swalla Examines current literature about specific topics in developmental biology. The seminar chooses current monthly topics and the group meets weekly to discuss published research papers. Topics may include germ cell specification; cell migration and morphogenesis; axis formation; somitogenesis and stem cells. Offered: AWSp.

MCB 514 Molecular and Cellular Biology Literature Review (2) Roelink Emphasizes critical evaluation of the original literature orally and in writing. Open only to first-year students in the Molecular and Cellular Biology Program. Offered: W.

MCB 515 Molecular and Cellular Biology Literature Review (2) Stoddard Emphasizes critical evaluation of the original literature orally and in writing. Open only to first-year students in the Molecular and Cellular Biology Program. Offered: S.

MCB 517 Topics in Molecular and Cellular Biology (1-5, max. 12) Advanced in-depth coverage of specific areas of molecular and cellular biology of current interest. Lectures by University of Washington faculty and invited speakers involved in research in this area. A basic knowledge of principles of molecular and cellular biology assumed.

MCB 519 Topics in Cancer (1, max. 6) Examination of ways to integrate basic, clinical, and public health sciences to increase understanding of human biology and disease. Seminars in introduction to cancer research as viewed by basic, clinical, and public health sciences, origins of cancer, cancer prevention, cancer progression, and therapies for cancer. Credit/no credit only.

MCB 520 Tutorial in Molecular and Cellular Biology (1-2, max. 2) Stoddard Special topics reading and discussion. Offered: A.

MCB 521 Embryos, Genes and Development (4) Parkhurst, Priess, Soriano Introduction to vertebrate and invertebrate development emphasizing cellular, genetic, and molecular mechanisms. Focuses on development of fruit flies, nematodes, and mice. Emphasizes embryological processes including induction, determination, pattern formation. Relationship between development and evolution. Technologies include transgenic animals, genetics, mosaic analysis, homologous recombination, somatic cell genetics, embryonic manipulations. Offered: W.

MCB 532 Human Pathogenic Viruses (3) Galloway, Linial Replication, regulation, and pathogenesis of several groups of human viruses, including human immunodeficiency virus and papillomaviruses. Emphasis on the unique
aspects of the viral-like cycles as they relate to effects on infected cells and organisms. Guest lectures focus on viral immunology, measles, herpes simplex virus and HHV-8. Offered: W.

MCB 542 Nucleic Acids and Enzymes (2)
Stoddard Covers the biology, evolution, mechanisms, and structure/function relationships of enzymes that act on DNA and RNA. Focuses both on various molecular systems, and also on important techniques used for their study, including high resolution structure determination, single molecule methods, kinetics and thermodynamic binding analyses, and protein engineering. Offered: Sp.

MCB 560 Biotechnology Externship (2-12, max. 12)
Moon Supervised research in a biotechnology company. Prerequisite: permission of instructor and doctoral candidacy. Offered: AWSpS.

MCB 562 Cell Signaling and Oncogenesis (3)

MCB 580 Teaching Practicum in Molecular and Cellular Biology (3, max. 6)
Supervised training in the teaching of molecular and cellular biology. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSpS.

MCB 599 Introduction to Research in Molecular and Cellular Biology (*, max. 20)
The student rotates through one research laboratory involved in the Molecular and Cellular Biology Program per quarter. Open only to first-year students in the Molecular and Cellular Biology Program. Credit/no credit only. Offered: AWSpS.

MCB 600 Independent Study or Research (*)

MCB 700 Master's Thesis (*) Offered: AWSpS.

MCB 800 Doctoral Dissertation (*)

Museology

MUSEUM 480 Introduction to Museology (3)
I&S Museum history, philosophy, and basic operations, including organization, income, collection management, conservation, exhibition, security, education, research, and ethics. Offered: jointly with ANTH 480.

MUSEUM 488 Special Topics in Museology (3-5)
In-depth examination of selected current issues within the field of museology.

MUSEUM 600 Independent Study or Research (1-10, max. 10)

MUSEUM 700 Master’s Thesis (1-10, max. 10).

MUSEUM 710 Master’s Project (1-10, max. 10) Credit/no credit only.

Near and Middle Eastern Studies

N&MES 800 Doctoral Dissertation (*).

Neurobiology and Behavior

NEUBEH 501 Introduction to Neurobiology (3)
Survey of all aspects of neuroscience, including molecular and cellular neurobiology. Lecture and laboratory discussion of original literature, observation of demonstrations, and examination of macroscopic and microscopic neural tissue. Offered: A.

NEUBEH 502 Introduction to Neurobiology (4)
Survey of all aspects of neuroscience, including an introduction to neuroanatomy and modules on sensory and motor systems. Lecture and laboratory discussion of original literature, observation of demonstrations, and examination of macroscopic and microscopic neural tissue. Offered: W.

NEUBEH 503 Cognitive and Integrative Neurobiology (4)
Survey of all aspects of neuroscience, including a discussion of higher neural processes such as learning, memory, and neuroendocrinology. Lecture and laboratory discussion of original literature, observation of demonstrations, and examination of macroscopic and microscopic neural tissue. Offered: Sp.

NEUBEH 510 Seminar in Neurobiology and Behavior (0.5) Biweekly seminar on current topics. Required for students in the Graduate Program in Neurobiology and Behavior and for students supported on Graduate Neuroscience Program Training Grant. Credit/no credit only. Offered: AWSp.

NEUBEH 515 Teaching Practicum in Neurobiology and Behavior (3-6, max. 15)
Supervised training in the teaching of neuroscience and related scientific topics. Prerequisite: standing in the Neurobiology and Behavior graduate program and permission of the instructor. Offered: AWSpS.

NEUBEH 526 Introduction to Laboratory Research in Neurobiology (4) Students become familiar with, and assist in, the performance of research on ongoing projects in designated laboratories. Emphasis on employed methodology and techniques. Credit/no credit only. Prerequisite: first-year graduate students in neurobiology. Offered: AWSpS.

NEUBEH 527 Current Topics in Neurobiology and Behavior (1) Presentation and discussion of current research provides exposure to diverse areas of neurobiology and behavior research. Credit/no credit only. Prerequisite: graduate student in neurobiology and behavior program or permission of instructor. Offered: AWSp.

NEUBEH 528 Computational Neuroscience (3) Introduction to computational methods for understanding nervous systems and the principles governing their operation. Topics include representation of information by spiking neurons, information processing in neural circuits, and algorithms for adaptation and learning. Prerequisite: elementary calculus, linear algebra, and statistics, or by permission of instructor. Offered: jointly with CSE 528.

NEUBEH 532 Discussion in Cell Signaling and Molecular Physiology (2) Discusses fundamental issues in cell excitability and molecular and cellular physiology. Focuses on problem solving and reading from original literature. Emphasizes student participation. Prerequisite: first-year graduate students in neurobiology or physiology and biophysics. Offered: jointly with P BIO 532; A.

NEUBEH 541 Neuroendocrinology (3)
Steiner Emphasizes the cellular and molecular aspects of several topics in neuroendocrinology, including neuropeptide genes, reproduction, steroid hormone regulation of gene expression, mechanisms of hormone action, endocrine rhythms, and neural oscillations. Prerequisite: either BIOI 201, BIOI 202, and BIOI 203, or BIOI 180, BIOI 200, and BIOI 220; BIOI 440, BIOI 441, BIOI 442 or permission of instructor. Offered: jointly with P BIO 509; W, odd years only.

NEUBEH 545 Quantitative Methods in Neuroscience (3) Rieke, Shadlen Discusses quantitative methods applicable to the study of the nervous system. Revolves around computer exercises/discussion of journal papers. May include linear systems theory, Fourier analysis, ordinary differential equations, stochastic processes, signal detection and information theory. Prerequisite: NEUBEH 501, 502, 503, or by permission of instructor. Offered: jointly with P BIO 545; W.

NEUBEH 549 Molecular Basis of Neurodegenerative Disease (2) La Spada, Muchowski, Pallanck Introduces a broad range of neurodegenerative diseases, focusing upon the approaches that have led to recent discoveries and emphasizing the elucidation of mechanisms and pathways of disease pathogenesis. Offered: jointly with GENOME 549/PHCOL 549; W.

NEUBEH 550 Biophysics of Calcium Signaling (1) Hillis, Santana Introduction to cellular calcium signaling including theoretical and technical issues of calcium signal detection and biological conclusions. Prerequisite: CONJ 531 Offered: jointly with P BIO 550; odd years; Sp.

NEUBEH 551 Mouse Models (1) Illustrates the use of transgenic and targeted-gene disruption technologies for developing mouse models of the disease. Introduces the methodology of producing transgenic and knock out mice. Discusses several examples of disease models using the most recent primary literature as a source. Offered: jointly with P BIO 551.

NEUBEH 552 Synaptic Integration (1) Binder, Powers Discussion of recent papers on how neurons in the central nervous system integrate concurrent synaptic inputs. Includes: effects of driving force on synaptic currents, effects of conductances on dendritic properties, transfer of currents from dendrites to soma, and transformation of currents into spike train outputs. Offered: jointly with P BIO 552.

NEUBEH 553 Learning and Memory: Synapses and Systems (2) Jagadeesh, Sullivan Five-week mini-course evaluates the current state of knowledge on the mechanisms that allow people to learn and remember. After introductory overviews of the cellular and molecular mechanisms underlying long-term synaptic plasticity and the multiple systems existing for learning and memory, students choose specific topics for discussion. Offered: jointly with P BIO 553.
NEUBEH 554 Motor Learning: Cellular and Network Mechanisms (1) Fetz, Perlmutter Five-week mini-course reviews the current state of research on cellular and network mechanisms of motor learning. After an introductory overview of behavioral and physiological examples of motor learning in various species and systems, students choose specific topics for discussion, using the primary literature as a source. Offered: jointly with P BIO 554.

NEUBEH 555 Sensory Receptors (1) Deitler, Rieke Five-lecture mini-course examines how different kinds of sensory receptors detect and respond to different modalities of sensory stimuli. Discussion focuses on the cellular and molecular mechanisms of the underlying transduction processes and the experimental evidence that they are based on. Offered: jointly with P BIO 555.

NEUBEH 556 Axon Pathfinding Mechanisms (1) Bothwell Examines mechanisms governing axon growth cone behavior during embryonic development and during regeneration in the injured adult. Discusses approaches employing both invertebrate and vertebrate model systems. Offered: jointly with P BIO 556.

NEUBEH 557 Ion Channel Gating (1) Gordon, Zagotta Compares and contrasts mechanisms of gating in ligand-gated and voltage-gated ion channels. Covers basics of ligand gating and voltage gating, kinetic schemes, inactivation and desensitization, gating currents and partial agonists, and ion channel structure. Offered: jointly with P BIO 557.

NEUBEH 600 Independent Study or Research (*, max. 10) Credit/no credit only. Offered: AWSpS.

NEUBEH 700 Master’s Thesis (*, max. 10) Offered: AWSpS.

NEUBEH 800 Doctoral Dissertation (*, max. 10) Offered: AWSpS.

**Nutritional Science**

NUTR 330 Nutrition for Today (3) NW Bruemmer Science of nutrition as it relates to individual food choices, health behaviors, public health. Health topics include wellness, obesity, eating disorders, sports nutrition, prevention of chronic disease. Nutrients and nutritional needs across the lifespan. Issues facing society including food safety, biotechnology, use of supplements and botanicals. Offered: A.

NUTR 441 Chemistry of Foods (3) Peck Principles of food science integrated with laboratory sessions that observe the effects of various parameters of food composition, and applied sensory evaluation. Explores current trends in the culinary sciences to promote pleasurable eating. Recommended: general and organic chemistry. Offered: every year; S.

NUTR 445 Food Safety and Production Laboratory (2) Peck Examination of food safety systems including HACCP methodology. Experimental study of food production, receiving systems, inventory control, menu planning, budget consideration, and cost control. Offered: W.

NUTR 462 Medical Nutrition Therapy I (2) Peck Intervention strategies, counseling skills, and diet modifications that pertain to chronic disease prevention and management. Corequisite: NUTR 562. Offered: Sp.

NUTR 463 Medical Nutrition Therapy II (2) Peck Didactic training in nutrition support theories and skill development for interpretation of laboratory values. Management of fluids and electrolytes, and nutrition interventions in acute care. Prerequisite: NUTR 462; corequisite: 563. Offered: S.

NUTR 465 Nutritional Anthropology (3) I&S/ NW Shell-Duncan Concerns interrelationships between biomedical, sociocultural, and ecological factors, with an emphasis on the ability of humans to respond to variability in nutritional resources. Topics covered include diet and human evolution, nutrition-related biobehavioral influences on human growth, development, and disease resistance. Prerequisite: BIO A 201. Offered: jointly with BIO A 465.

NUTR 499 Undergraduate Research (1-5, max. 10) Independent study and research supervised by a faculty member with appropriate academic interest. Offered: AWSpS.

NUTR 500 Graduate Seminar: Current Issues in Nutrition (1, max. 4) A review of current topics in nutritional science and public health nutrition. Provides a forum for student and faculty presentation, and review of current research efforts. Prerequisite: graduate student in nutrition. Offered: AWSpS.

NUTR 527 Nutrition: Childhood Through Adolescence (3) Rees, Tratman Interactions of nourishment with behavior, growth, and development of children, from infancy through adolescence. Critical evaluation of normative data and special problems, as well as strategies for individual and public health interventions. Prerequisite: graduate student in nutritional sciences or permission of instructor. Offered: every year; S.

NUTR 528 Nutrition in Aging (3) Drewnowski Physiological, psychological, social, cultural, and economic factors affecting health nutrition and status in the middle and later years. Prerequisite: human nutrition and human physiology. Offered: odd years; Sp.

NUTR 529 Nutrition Research Design (3) Duncan Critical review of selected nutrition literature. Evaluation of experimental design, research protocols, data analyses, and data presentations. Prerequisite: BIOST 511. Offered: odd years; W.

NUTR 530 Nutrition for Children with Special Health Care Needs (3) Lucas Principles of nutrition screening and assessment, clinical nutritional care, family-centered care, and health services as applied to meeting nutritional needs of children with special health care needs. Both population-based and individual care concepts are explored for children with a variety of chronic conditions. Offered: odd years; Sp.

NUTR 531 Public Health Nutrition (4) Johnson Examines the functions and essential services of public health as they apply to assuring access to a safe and nutritious food supply. Examines the practice of public health nutrition: nutrition environment, program planning, implementation, and evaluation; policy development, implementation, and evaluation, and links between basic science and public health nutrition practice. Prerequisite: introductory nutrition. Offered: Sp.

NUTR 532 Fieldwork in Public Health Nutrition (1-12, max. 12) Peck Experience and service learning in organizations that plan, deliver, and promote population-based nutrition education and nutrition services. Prerequisite: Nutritional Sciences graduate student and permission of instructor. Offered: AWSpS.

NUTR 537 Laboratory Rotation (1-4, max. 6) Exposure to research being conducted in the laboratories of the graduate nutrition faculty. Provides hands-on experience in laboratory research. Introduces the student to on-going research for preparation of dissertation topics. Prerequisite: permission of instructor. Offered: AWSpS.

NUTR 538 Nutritional Epidemiology (3) Beresford, Drewnowski Application of epidemiological methods to current studies of diet, nutrition, and chronic disease. A discussion of current issues and controversies enable students to plan studies in nutritional epidemiology and disease prevention. Prerequisite: EPI 511 or EPI 512 and BIOST 511 or permission of instructors. Offered: jointly with EPI 536; A.

NUTR 539 Nutrition Journal Club (1-3, max. 9) Duncan Critical evaluation of research on selected topics in the field of nutrition. Credit/no credit only. Prerequisite: graduate student in nutrition. Offered: AWSpS.

NUTR 545 Food Safety and Health (3) Bruemmer Presentation of emerging issues in food safety, sustainable agriculture and biotechnology. Examines both domestic and global pressures on the food supply. Examines international policies that promote regional solutions for a safe food supply and access to nutritious foods. Recommended: course in microbiology. Offered: W.

NUTR 551 Nutrition and Gene Expression (3) Rosenfeld Lectures, student presentations, and discussions of current research on nutrient:gene
interactions. Focus on how dietary factors act both directly as transcriptional regulators or indirectly as inducers of signal transduction cascades leading to alterations in expression of proteins associated with cellular nutrient metabolism. Prerequisite: NUTR 520, NUTR 521, NUTR 522, or permission of instructor. Offered: W.

NUTR 555 Nutrition in Developing Countries (3) Bruemmer, Gorstein Introduces issues of nutrition in developing countries, with an emphasis on the control and prevention of undernutrition and micronutrient deficiencies. Offered: jointly with HSERV 540; Sp.

NUTR 561 Dietetics Internship (6-10, max. 30) Peck Focuses on the competencies for entry-level practice in dietetics. Autumn and winter quarters include core experiences in wellness, public health, food service, ambulatory care, home health, and clinical services. Spring quarter activities are devoted to either nutrition therapy or public health, depending on student's career goals. Prerequisite: clinical students only. Offered: A/W/Sp.

NUTR 562 Nutrition and Chronic Disease (4) Bruemmer, Drewnowski Epidemiological pathophysiology of chronic disease related to nutrition (e.g., obesity, cardiovascular disease, osteoporosis, hypertension, diabetes). Examines nutritional risk/protective factors in relation to public health, individual nutrition, and clinical intervention. Prerequisite: physiology, biochemistry. Offered: Sp.

NUTR 563 Nutrition in Acute Care (4) Bruemmer, Peck Assessment of the nutritional demands and hypermetabolic response of trauma, surgery, organ failure, burns, AIDS, and neoplastic disease. Examines specialized nutritional support and substrate requirements in the acute care setting. Prerequisite: NUTR 562, or permission of instructor. Offered: S.

NUTR 564 Management of Nutrition Services (4) Bruemmer Policy and administrative issues that impact delivery of nutrition services in healthcare environments. Topics include organization behavior, productivity, financial environments, clinical management, and human resources. Offered: odd years; S.

NUTR 581 Strategies of Health Promotion (4) Bowen Assessment of health promotion planning, implementation, and evaluation strategies for their strengths, weaknesses, and effectiveness. Students critique strategies to modify behavioral factors that influence lifestyles of individuals, including decisions influencing their reciprocal relationship with environmental factors affecting the health of individuals, organizations, and communities. Offered: jointly with HSERV 581. Prerequisite: HSERV 511. Offered: Sp.

NUTR 595 Nutritional Sciences Master’s Practicum (1-12, max. 12) Peck Supervised practice experience providing students an opportunity to learn how nutritional sciences are applied to public health settings and in the formulation and application of public health policy. Credit/no credit only. Prerequisite: HSERV 511; NUTR 531; EPI 511; NUTR 520; 521; 522. Offered: A/W/Sp.

NUTR 600 Independent Study or Research (*) Offered: A/W/Sp.

NUTR 700 Master’s Thesis (*) Offered: A/W/Sp.

NUTR 800 Doctoral Dissertation (*) Credit/no credit only. Offered: A/W/Sp.

Quantitative Ecology and Resource Management

QERM 502 Statistical Consulting for the Life Sciences (1-4) Conquest Consulting experience in data analysis, applied statistics, experimental design, parameter estimation, and sampling. Student provides consultation services to students and faculty. Students spend one classroom hour per week under faculty supervision discussing problems encountered. Prerequisite: QERM 482, QERM 483, STAT 421, STAT 423, or BIOST 514, BIOST 515, or equivalents, and permission of instructor. Offered: W.

QERM 514 Analysis of Ecological and Environmental Data I (4) Conquest Overview of generalized linear models (GLMs), their use in forestry, fisheries, wildlife ecology, and environmental monitoring. Analysis of the statistical tests that fall under GLMs: chi-square tests on contingency tables, t-tests, analysis of variances, etc. Statistical software S+R used throughout. Offered: Sp.

QERM 521 Scientific Method in Resource Management (4) Ford Describes process of scientific discovery and strategies used for problems in ecology and natural resources management. Relationships between growth and use of objective knowledge in natural resources management is explored through case studies. Offered: W.

QERM 550 Ecological Modeling and Spatial Analysis (5) Ford Describes the principles of ecological modeling, and theoretical and methodological issues involved in their design and implementation. Emphasizes the analysis of spatial processes and how such analyses are used in developing ecological models. Students make and analyze a spatial process and/or construct a model of their own choice. Offered: W.

QERM 551 Model Building: Organism Dynamics (3) Anderson Application of techniques of stochastic differential equations, time series analysis, and simulating dynamic processes to plant and animal growth.

QERM 598 Special Topics in Quantitative Resource Management (1-3, max. 12) Population and community ecology, systems ecology, and physical processes in ecosystems. Prerequisite: permission of instructor.

QERM 599 Research in Quantitative Resource Management and Ecology (*, max. 12) Topics can be theoretical in nature or combined theory and experiment. Research might be a prelude to thesis or dissertation research. Credit/no credit only.

QERM 600 Independent Study or Research (*).

QERM 700 Master’s Thesis (*).

QERM 800 Doctoral Dissertation (*).

Quaternary Sciences

QUAT 417 Environmental Change in the Glacial Ages (3) NW Porter Physical, biological evidence of climatic change during Quaternary Period; emphasizing stratigraphy, chronology, impact of alternating glacial/interglacial cycles on earth’s terrestrial, marine environments. Theories on causes of climatic variation. Offered: jointly with ESS 433.

QUAT 501 Seminar/Conference in Quaternary Environments (1, max. 6) Interdisciplinary seminar or conference in the changing natural environments of the Quaternary Period, with emphasis on climatic changes and their effects. Speakers from the University and elsewhere present lectures on their specialties, followed by discussion. Credit/no credit only.

QUAT 502 Interdisciplinary Quaternary Investigations (2, max. 6) Research course for interdisciplinary investigation of Quaternary problems. Students attend sessions of QUAT 501 and pursue a problem-oriented case study concurrently under faculty direction. Required paper on case study. Credit/no credit only. Prerequisite: graduate standing.

QUAT 504 Special Topics in Quaternary Sciences (1-3, max. 3) Environments and climate changes of past two million years (Quaternary Period) in context of modern surface processes, including historical changes, prehistorical environments of postglacial period, and Ice Age events. Provides scientific perspective on scale of modern and man-made environmental changes, including those of climate, in context of recent earth history. Credit/no credit only. Prerequisite: background courses in earth sciences and ecology.
Interschool or Intercollege Programs

Bioengineering

BIOE 201 Bioengineering Laboratory (2) Caster Introduction to bioengineering; laboratory safety, acquisition and analysis, presentation tools for biomedical applications. Prerequisite: MATH 124; PHYS 121. Offered: W.

BIOE 299 Introduction to Bioengineering (1) Verdugo Lectures on the various aspects of bioengineering; orientation in bioengineering studies and practice. Credit/no credit only. Offered: ASp.

BIOE 301 Bioengineering Systems Analysis (4) Speisman Investigates static and dynamic problems that are found in medicine and biology. Exposes students to real biomedical applications of first- and second-order differential equations. Students analyze current bioengineering and biomedical problems and make measurements of the systems present those problems. Weekly laboratories. Prerequisite: BIOL 200 or BIOL 202; E E 215. Offered: Sp.

BIOE 302 Introduction to Biomedical Instrumentation (4) Folch Introduces students to the theory of measurement and the practicalities of measuring of biological variables. Basic amplifier theory, discussion of noise in physical systems and its reduction. Some actuators used to test biomedical systems. Prerequisite: BIOE 301; CSE 142. Offered: A.

BIOE 303 Bioengineering Signal Processing (4) Li, Vicini Introduction of signal processing techniques necessary to record and analyze medical and biological data. Students use transform calculus to analyze differential equations and develop approximations to functions. Introduction sampling and applies it to biological data. Prerequisite: BIOE 302. Offered: W.

BIOE 304 Introduction to the Bioengineering Analysis of Physiology I (4) Pollack Introductions of engineering analysis of physiological systems. Course covers cellular function through its control by the central nervous system. Prerequisite: BIOE 301; CSE 142. Offered: A.

BIOE 305 Introduction to the Bioengineering Analysis of Physiology II (4) Martyn Introduction to the cardiovascular system. Explores the cardiovascular system as an engineering system in which the heart is a pump, and the load and distribution of blood to organs on the heart depend on the demands of the system. Introduces principles of fluid transport. Prerequisite: BIOE 302; BIOE 304. Offered: W.

BIOE 357 Introduction to Molecular Bioengineering (4) Vogel Introduces molecular bioengineering. Molecules as building blocks to engineer surfaces. Molecular therapeutics, drug delivery, diagnosis and biomaterials. Examines design principles for biomedical materials and devices. Prerequisite: either BIOL 200 or BIOL 202; PHYS 122; either CHEM 223, CHEM 237, or CHEM 335. Offered: W.

BIOE 420 Medical Imaging (4) Kim, Yuan Various medical imaging modalities (x-rays, CT, MRI, ultrasound, PET, SPECT, etc.) and their applications in medicine and biology. Extends basic concepts of signal processing (BIOE 303) to the two and three dimensions relevant to imaging physics, image reconstruction, image processing, and visualization. Prerequisite: BIOE 303; MATH 308; CSE 143. Offered: A.

BIOE 436 Medical Instrumentation (4) Introduction to the application of instrumentation to medicine. Topics include transducers, signal-conditioning amplifiers, electrodes and electrochemical systems, electrical safety, and the design of clinical electronics. Laboratory included. For juniors, seniors, and first-year graduate students who are preparing for careers in bioengineering, both research and industrial. Offered: jointly with E E 436; Sp.

BIOE 440 Introduction to Biomechanics (4) Sanders Presents the mechanical behavior of tissues in the body and the application to design of prostheses. Tissues studies include bone, skin, fascia, ligaments, tendons, heart valves, and blood vessels. Discussion of the structure of these tissues and their mechanical response to different loading configurations. An important part of the class is a final project offered: jointly with M E 445; Sp.

BIOE 467 Biochemical Engineering (3) Banky Application of basic chemical engineering principles to biochemical and biological process industries such as fermentation, enzyme technology, and biological waste treatment. Rapid overview of relevant microbiology, biochemistry, and molecular genetics. Design and analysis of biological reactors and product recovery operations. Prerequisite: either CHEM 223 with CHEM E 340 or either CHEM 237 or CHEM 335; recommended: CHEM E 465. Offered: jointly with CHEM E 467; W.

BIOE 470 Systems Engineering and Electronic Medicine (4) Kim Provides students with understanding and hands-on experience in systems engineering, healthcare information systems, and core technologies for electronic medicine; including how large-scale engineering systems are defined, architected, built, and tested. Focus is on current and future medical systems. Prerequisite: BIOE 303; MATH 308. Offered: W.

BIOE 481 Research and Design Fundamentals (4) Engineering design, planning and managing an open-ended project, bioengineering and society. Prerequisite: BIOE 303; BIOE 305. Offered: AWSPS.

BIOE 482 Bioengineering Senior Capstone Research/Design ([2-6], max. 8) Independent capstone design/research project; final paper. Prerequisite: BIOE 303; BIOE 305. Offered: AWSPS.

BIOE 485 Computational Bioengineering (4) Vicini Introduction to computational, mathematical and statistical approaches to the analysis of biological systems, including systems and control theory, molecular models and bioinformatics. Lectures and laboratory sessions emphasize practical problems in genetics, metabolism and genomics. Prerequisite: CSE 143; BIOE 305; MATH 308. Offered: W.

BIOE 490 Engineering Materials for Biomedical Applications (3) Bonadio, Horbett Combined application of principles of physical chemistry and biochemistry, materials engineering, to biomedical problems and products. Applications include implants and medical devices, drug delivery systems, cell culture processes, diagnostics, and bioseparations. Offered: jointly with CHEM E 490; Sp.

BIOE 491 Controlled-Release Systems: Principles and Applications (3) Hoffman Mechanisms for controlled release of active agents and the development of useful drug delivery systems for this purpose. Release mechanisms considered include diffusive, convective, and anisive driving forces. Delivery routes include topical, oral and in vivo. Some special case studies covered in detail. Offered: jointly with CHEM E 491; even years; W.

BIOE 492 Surface Analysis (3) Ratner Understanding of solid surfaces for research and development in microelectronics, catalysis, adhesion, biomaterials, science wear, and corrosion science. Newer methods available to study surfaces of materials. Electron emission spectroscopy (ESCA, Auger); ion scattering, ion spectrosopic, photon spectrosopic, and thermodynamic methods. Offered: jointly with CHEM E 458; W.

BIOE 497 Bioengineering Education Outreach (1-2, max. 6) Work with K-12 schools or community organizations. Current science education research and instructional techniques. May involve presentations or instruction in hands-on activities. Offered: ASp.

BIOE 499 Special Projects (2-6, max. 6) Individual undergraduate bioengineering projects under the supervision of an instructor. In addition, classes on selected topics of current interests as announced. Offered: AWSpS.

BIOE 508 Physical Aspects of Medical Imaging (4) Stewart Quantitative physical principles of medical imaging are presented for electromagnetic and sonic radiation. Methods of image formation and analysis are discussed for conventional film radiography, CT, DSA, PET, B-mode ultrasound and Doppler ultrasound. Offered: jointly with RADGY 508/ENV H 528; W.

BIOE 510 Bioengineering Seminars (1) Introductory seminar for new graduate students; review of departmental research.

BIOE 511 Biomaterials Seminar (1) Hoffman, Horbett, Ratner Presentation of student research results. Credit/no credit only. Prerequisite: permission of instructor. Offered: jointly with CHEM E 511; AWSp.
BIOEN 520 Orthopedic Biomechanics (4)
Ching
Mechanical engineering applied to musculoskeletal system with emphasis on techniques in orthopedic surgery. Measurement of mechanical properties of tissues. Mechanics of bone, soft tissue, and muscle, mechanics of upper extremity, spine, and lower extremity. Engineering in surgery: gait analysis, joint replacement, fracture fixation. Prerequisite: BIOEN 440. Offered: odd years; W.

BIOEN 540 Bioystem Identification (4)
Vicini
Fundamentals of mathematical modeling in biology and medicine. Introduction to compartmental models: a priori, a priori identifiability. Data measurement error, parameter estimation. Maximum likelihood, least squares. Introduction to tracer-tracee models, pharmacokinetics, pharmacodynamics. Models to test hypotheses. Hands-on computer experience. Prerequisite: ordinary differential equations, introductory statistics, or permission of instructor. Offered: even years; A.

BIOEN 542 Computer Simulation in Biology (3)
Bassingthwaighte, Graham
Introduction to mathematical modeling of biological phenomena. Tutorial text explains how to derive equations for simple models and apply them to generate simulation data. Application topics include kinetic reactions, molecular reactions and enzyme saturation, membrane transport, organismal predation, competition and growth, compartmental and spatially distributed models, physiological control systems, probabilistic models. Prerequisite: P BIO 405 and P BIO 406 or equivalent or permission of instructor. Offered: even years; A.

BIOEN 545 Fractals in Biology and Medicine (3)
Bassingthwaighte
Introduction to fractal and chaos. Conceptual approaches to using fractals for characterizing structures and growth processes, describing heterogeneities, and evaluating properties of tissues. The behavior of non-linear systems, often chaotic, describes physiological homeodynamics, regulation without set points in feedback control.

BIOEN 550 Mass Transport and Exchange in Biological Systems (3)
Bassingthwaighte
Review of basic mechanisms of transport; transport through vascular system and blood-tissue exchange processes in organs; integrated systems analysis of closed systems and applications to physiological regulation, medical imaging, and pharmacokinetics. Prerequisite: calculus, introduction to differential equations; cardiovascular physiology; E E network analysis or systems analysis, chemical engineering transport. Offered: Sp.

BIOEN 555 Introduction to Biomechanics (3)
Pollack
Mechanical properties of biological tissues, with emphasis on the underlying histological bases. Bones, joints, cartilage, blood vessels, connective tissue, muscle, heart. Many laboratory sessions. Offered: odd years; W.

BIOEN 560 Ultrasound in Bioengineering (4)
Vaezy
Fundamentals of ultrasonic generation, formation, reception, and treatment of absorption, scattering, and transmission. Conventional and new methodology. (A, B, TM mode, imaging, Doppler, tissue characterization, and nonlinear effects.) Prerequisite: E E/M E 525 for nonbioengineering students or permission of instructor. Offered: odd years; Sp.

BIOEN 561 Biomedical Optics (4)
Advanced theories of optical and spectroscopic measurement with emphasis on biomedical laser applications. Laser principles, instrumentation, and current practice in various biomedical uses, covering such areas as medicine, surgery, and biology. Prerequisite: BIOEN 302 or equivalent, or permission of instructor. Offered: every years; Sp.

BIOEN 565 Nuclear Magnetic Resonance in Biomedicine (2)
Basic physics of nuclear magnetic resonance (NMR) imaging and spectroscopy are presented. Research applications of NMR in physiology and biochemistry are reviewed with emphasis on the brain. Grade based on written tests and small research paper. Prerequisite: permission of instructor. Offered: jointly with RADGY 550; odd years; W.

BIOEN 568 Image-Processing Computer Systems (4)
Kim
Components of digital processing computer systems. Two-dimensional filtering and optimal filter design as well as basic image-processing operations. Selected advanced image-processing topics introduced. Individual student project. Prerequisite: permission of instructor. Offered: jointly with E E 568; Sp.

BIOEN 571 Polymeric Materials (3)
Ratner
Relationships between configuration, conformation, molecular structure, properties of polymeric materials. Concepts relevant to tailoring polymer molecules and microstructures for specific applications. Interactions between polymers and their in-service environment. Characterization and processing techniques relevant to polymeric materials. Prerequisite: one semester or two quarters of organic chemistry. Offered: jointly with MSE 571.

BIOEN 573 Biosensors and Biomedical Sensing (3)
Yager
In-depth overview of the principal types of biosensors. Topics include: how biological molecules are used in sensing, how the sensors operate, how different sensors compare, under what circumstances sensors can be useful, and the applicability of sensors to biomedical sensing. Prerequisite: BIOEN 436 or permission of instructor. Offered: odd years; A.

BIOEN 575 Molecular Modeling Methods (4)
Beard
Introduction to theory and practice of computer simulation studies of molecules with emphasis on applications to biological molecules and complexes. Discussion of background theory, implementation details, capabilities and practical limitations of these methods. Prerequisite: previous coursework in biochemistry and physical chemistry and/or permission of instructor. Offered: jointly with CHEM 575; A.

BIOEN 576 Laboratory Techniques in Protein Engineering (4)
Stayton
Practical introduction to fundamentals of recombinant DNA technology and protein engineering. Gene design, bacterial molecular biology, genetic engineering strategy. Laboratory project focused on making site-directed protein mutations. Techniques include the Polymerase Chain Reaction, DNA sequencing, DNA cutting/splicing, protein expression. Prerequisite: background in biochemistry or molecular biology or consent of instructor. Offered: W.

BIOEN 577 Cell and Protein Reaction with Foreign Materials (3)
Horbett
Study of ways in which cell and protein interactions with foreign materials affect the biocompatibility of biomaterials. Description of the phenomenology and mechanisms of protein adsorption, mammalian cell adhesion, and cell receptor biology and of methods used to study these phenomena. Surface properties of materials discussed in context of the course. Prerequisite: permission of instructor. Offered: every years; A.

BIOEN 578 Biomembranes (3)
Yager
Develops an understanding of the molecular principles that underlie the self-assembly of surfactants into natural and model membranes; in particular, on the relationship between the chemical structure of lipid molecules and the three-dimensional aggregates that they form in water. Offered: A.

BIOEN 579 Host Response to Biomaterials (3)
Giachetti
Basic cell and molecular biology of the pathologies associated with biomaterial implantation that limit bioprosthesis use, including hemostasis, infection, acute and chronic inflammation, wound healing and fibrosis, and structural alterations. Major methods for histological analysis of retrieved implants. Prerequisite: general biology; BIOEN 490 (may be taken concurrently) or permission of instructor. Offered: odd years; W.

BIOEN 584 Computational and Integrative Bioengineering (4)
Vicini
Advanced computational, mathematical, and statistical approaches to the analysis of biological systems, including molecular models, time series, fractal populations, and kinetic analysis, including simulation. Lectures and laboratory sessions emphasize practical problems in kinetic analysis, metabolism, and genomics. Final project, written and oral reports. Prerequisite: BIOEN 485. Offered: odd years; Sp.

BIOEN 588 Bioengineering Principles of Physiology (4)
Bonadio
Kushnerick Muscle exemplifies: protein-protein interactions; molecular recognition; proteins as machines; functional scaling; computing and signaling with metabolic machines; metabolic processes as chemical networks; membrane separation into functions; channels as communication machines; neural control and function. Prerequisite: BIO 200 or equivalent or permission of instructor; recommended: BIOEN 304, P BIO 405. Offered: A.

BIOEN 589 Integrative Physiological Systems Analysis (4)
Bassingthwaighte
Physiological systems, emphasizing cardiovascular, pulmonary and to a lesser extent, renal, hepatic, and endocrine systems, described in quantitative terms, using model representation for examples and problems. Laboratories. Prerequisite: BIOEN 565, calculus and ordinary differential equations. Offered: W.

BIOEN 590 Advanced Topics in Biomaterials (3)
Bonadio
Major, controversial issues in application of synthetic materials to medical problems. Blood compatibility, bioadsorption, intraocular lenses, contact lenses, polyelectrolytes, biodegradation, protein adsorption, corrosion, bone fixation, new materials, artificial heart, medical device regulation. Prerequisite: BIOEN 490 or CHEM E 490. Offered: jointly with CHEM E 590; odd years; Sp.

BIOEN 592 Surface Analysis (3)
Ratner
Understanding of solid surfaces for research and development in microelectronics, catalysis, adhesion, biomaterials science, wear and corrosion science. Newer methods available to study surfaces of materials, Electron emission spectroscopies (ESCA, Auger, ion sputtering, ion spectroscopic, photon spectroscopic, and thermodynamic methods. Offered: jointly with CHEM E 558; W.
Q SCI 291 Analysis for Biologists I (5) NW, illustrated systems concepts and to design, build, biological examples. Uses STELLA software to management, environmental science, and system models for studying the dynamics of

Q SCI 292 Analysis for Biologists II (5) NW, 67% on MATHPC placement test. Offered: AWS.

Q SCI 293 Analysis for Biologists III (5) NW, QSR Briggs, Greulich, Johnson Introduction to differential calculus, emphasizing development of basic skills. Examples promote understanding of mathematics and applications to modeling and solving biological problems. Topics include optimization and curve analysis. Prerequisite: either MATH 120, a minimum score of 2 on advanced placement test, or a minimum score of 67% on MATHPC placement test. Offered: AWS.

Q SCI 292 Analysis for Biologists II (5) NW, QSR Gallucci, Greulich, Johnson Introduction to integral calculus, emphasizing development of basic skills. Examples promote understanding of mathematics and applications to modeling and solving biological problems. Topics include areas under curves, volumes, and differential equations. Prerequisite: Q SCI 291. Offered: WSp.

Q SCI 293 Analysis for Biologists III (5) NW, QSR Gallucci, Johnson Additional topics in calculus and matrix algebra. Examples promote understanding of mathematics and applications to modeling and solving biological problems. Topics include infinite series, differential equations, vectors, functions of several variables, partial derivatives, and use of computer software. Prerequisite: Q SCI 292.

Q SCI 381 Introduction to Probability and Statistics (5) NW, QSR Applications to biological and natural resource problems stressing the formulation and interpretation of statistical tests. Random variables, expectations, variances, binomial, hypergeometric, Poisson, normal, chi-square, "t" and "F" distributions. Prerequisite: either MATH 120, 124, 125, 126, 144, or QSCI 291 and QSCI 292, a minimum score of 2 on advanced placement test, or a minimum score of 67% on MATHPC placement test. Offered: A/WSp.

Q SCI 392 Techniques of Applied Mathematics in Biology I (3) NW Ordinary differential equations-linear and nonlinear, systems of differential equations; approximation techniques, numerical solution techniques; applications to biological processes. Prerequisite: Q SCI 292.

Q SCI 393 Techniques of Applied Mathematics in Biology II (3) NW Applications of advanced ordinary differential equations, special functions, and partial differential equations to descriptions of biological phenomena. Particular emphasis on transport in biological systems, including diffusion and fluid flow. Prerequisite: Q SCI 392.

Q SCI 456 Introduction to Quantitative Fishery Science (5) NW Conveys fundamental concepts of fish population dynamics and fishery management within context of real-world fisheries problems. Lectures discuss notation, terminology, mathematical models, fisheries principles, and case studies. Laboratory time devoted to practical applications, problems. Recommended: either MATH 125, MATH 135, or Q SCI 292; Q SCI 381. Offered: jointly with FISH 456; A.

Q SCI 458 Fisheries Stock Assessment (4) NW Francis Emphasizes quantitative analysis of fisheries data to determine how the fishery would respond to alternative management actions. Major topics include production models, stocks and recruitment, catch at age analysis, and formulation of harvest strategies. Recommended: either Q SCI 456 or FISH 456. Offered: jointly with FISH 458; Sp.

Q SCI 477 Quantitative Wildlife Assessment (5) NW Skalski Focuses on wildlife sampling techniques for estimating animal abundance, home range, and survival rates in terrestrial populations. The design of wildlife investigations for the purposes of impact assessment, research, and resource management is integrated with estimation schemes and demographic models in a quantitative framework. Prerequisite: Q SCI 292; Q SCI 482.

Q SCI 480 Sampling Theory for Biologists (3) NW Gallucci, Rustagi Theory and applications of sampling finite populations including: simple random sampling, stratified random sampling, ratio estimates, regression estimates, systematic sampling, cluster sampling, sample size determinations, applications in fisheries and forestry. Other topics include sampling plant and animal populations, sampling distributions, estimation of parameters and statistical treatment of data. Prerequisite: Q SCI 482; recommended: Q SCI 483. Offered: jointly with STAT 480; even years.

Q SCI 482 Statistical Inference in Applied Research (5) NW Analysis of variance and covariance; chi square tests; nonparametric procedures multiple and curvilinear regression; experimental design and power of tests. Application to biological problems. Use of computer programs in standard statistical problems. Prerequisite: either STAT 311 or Q SCI 381. Offered: A.

Q SCI 483 Statistical Inference in Applied Research (5) NW Analysis of variance and covariance; chi square tests; nonparametric procedures multiple and curvilinear regression; experimental design and power of tests. Application to biological problems. Use of computer programs in standard statistical problems. Prerequisite: either Q SCI 381 or Q SCI 482. Offered: W.

Q SCI 486 Experimental Design (3) NW Topics in analysis of variance and experimental designs: choice of designs, comparison of efficiency, power, sample size, pseudoreplication, factor structure. Prerequisite: Q SCI 482; recommended: Q SCI 483. Offered: jointly with STAT 486.

Q SCI 497 Special Topics in Quantitative Science (1-15, max. 15) NW Topics not normally offered in regular curriculum. Format ranges from seminar/discussion, formal lectures, laboratory or modeling work. Offered: A/WSp.

Q SCI 498 Internship (1-15, max. 15) Internship experience with a public agency or private company, supervised and approved by a faculty member. Preparation of professional report reflecting on the experience is required. Credit/no credit only. Offered: A/WSp.

University Conjoint

UCONJ 100 Introduction to Health Professions (1) Garcia Opportunities in health professions. Information on educational requirements, professionalism, interaction, licensing, registering for practice in profession, salaries, and career opportunities.

UCONJ 290 Diversity Issues in the Health Care Environment (1-2, max. 2) Introduces to the complexity of the issues surrounding culture and health, the interrelatedness of ethnic and cultural characteristics and health care access, health and health care concerns of specific communities, traditional and alternative health care practices, and community-based promotion and disease prevention programs.

UCONJ 410 Health in the Context of Italian Culture (5) While in Italy, participants study relationship between current health issues, contemporary Italian history, socio-cultural environment, and European Union; health status of vulnerable populations; characteristics of culture and health care system that promote healthy outcomes; differences between health behaviors and outcomes in Italy and US. Offered: A.

UCONJ 411 Psychology of Aging (3) Kyak Focuses on developing the skills necessary for critically evaluating current psychological theories of aging, research findings in this area, and the implications of findings on the aging person. Special consideration given to the effects of socioeconomic, sex, and ethnic differences in the psychology of aging. Open to upper-division undergraduates and beginning graduate students interested in the field of gerontology.

UCONJ 412 The Family in Later Life (3) Focuses on issues affecting older persons and their families. Addresses demographic influences on families; roles, rules for and function of family members; inter-generational relationships; economics, political, and social policy affecting family life; and cultural variations and supportive resources for older persons and their families.

UCONJ 413 Current Issues in Aging (3) Describes the population trends at work in the United States, and other demographic trends with significant societal implications for care and management of elders. Evaluates selected public policies related to aging. Gives students proficiency in using resources related to aging on the Internet. Evaluates alternative long-term care models.

UCONJ 420 Biological Safety Practices (1) Kenny General introduction to appropriate
laboratory procedures used for handling potentially hazardous biological agents. Focus for health professionals is on laboratory safety and appropriate protocols that should be employed by those engaged in infectious disease and recombinant DNA research. Credit/no credit only.

**UCONJ 422 Sexually Transmitted Diseases: An Overview (2)** Gardner Clinically oriented course designed to provide a knowledge base for upper division health science students to participate effectively in community outreach programs for the prevention of sexually-transmitted diseases. Offered cooperatively by the departments of Pharmacy and Medicine.

**UCONJ 440 Biological Aspects of Aging (3)** Introductory course on aspects of the biology of human aging and of functional changes associated with normal aging and with those illnesses that may be present in the elderly. Focus on the relationship between changes in physical function, environment, and quality of life. Includes theoretical perspective on aging as well as the aging process in specific physiological systems. Designed for upper-level undergraduate students with an interest in aging.

**UCONJ 442 Social and Cultural Aspects of Aging (3)** Involves faculty members from the various social science fields examining the range and variation of relationships among age-linked attitudes and cultural values related to aging; the social and economic factors that influence the elderly in contemporary society; the effects of ethnic and sex differences in sociocultural aging. Open to upper-division undergraduates and beginning graduate students interested in gerontology.

**UCONJ 443 Interdisciplinary Seminar on Aging (1-6, max. 15)** Borgatta Interdisciplinary examination of the contemporary theoretical literature on gerontology and long-term care. Credit courses open to students in UW Health Sciences schools. Students function as an interdisciplinary learning group within a problem based learning system. Pharmacy students, nurses, and other health professionals study application of theory in an appropriate clinical setting within the conceptual framework of each student's professional field.

**UCONJ 450 Health Care in the Underserved Community (4)** Recommended for students who are working with underserved communities. Students learn about the underserved population served by the community health projects on campus with a focus on inter-professional patient care.

**UCONJ 490 Social Sensitivity in Health Care (3)** & Multidisciplinary course for health professions students. Health professionals' roles in dealing with social, cultural, and physical barriers to health care of low-income groups and ethnic people of color. Personal involvement through field experiences and faculty drawn from affected communities as well as health sciences, social work schools. Credit/no credit only.

**UCONJ 497 Health Care in a Rural Community (3)** Critical analysis built upon concepts relative to interdisciplinary health-care delivery in a rural community. Students develop an organizational model for rural health and study innovative ways of mobilizing community resources and support for a comprehensive rural health-care system. Pharmacy students, nurses, and other health professionals study application of theory in an appropriate clinical setting within the conceptual framework of each student's professional field.

**UCONJ 500 Seminar in Interprofessional Collaboration (1-3, max. 7)** Interdisciplinary teams composed of students and community members placed in diverse urban settings to address an identified community need by developing and implementing collaborative, community-based projects. Seminars emphasize interprofessional collaborative practice, intrapersonal understanding, interpersonal group process skills, organizational savvy, community awareness, and sociocultural sensitivity. Graduate School of Public Affairs. Offered: A/WSp.

**UCONJ 501 International Health (1) Wade** Weekly seminar introduces students to issues and opportunities of participating in health care systems in other countries. Guest speakers bring many perspectives of international health care experiences. Class discussions help prepare students for international placements.

**UCONJ 502 International Health (1) Wade** Weekly seminar introduces students to issues and opportunities of participating in health care systems in other countries. Guest speakers bring many perspectives of international health care experiences. Class discussions help prepare students for international placements.

**UCONJ 503 International Health (1) Wade** Weekly seminar introduces students to issues and opportunities of participating in health care systems in other countries. Guest speakers bring many perspectives of international health care experiences. Class discussions help prepare students for international placements.

**UCONJ 505 Professional Interpersonal Styles of Communication with Families to Enhance Health Outcomes (3)** Complex communication processes evaluated and applied to the family as unit of interaction within interdisciplinary context. Empirical based communication practices analyzed considering family variables adherence, satisfaction, health outcomes, and cost effectiveness. Engagement in experiential learning through challenging clinical scenarios. Emphasizes cultural competencies. Prerequisite: professional student or permission of instructor.

**UCONJ 510 Integrating Arts in the Classroom (4)** Prepares prospective elementary education teachers to understand and acquire arts literacy through a comprehensive approach to learning and teaching in and through the arts. Course is school and arts-site based, inclusive of multiple art forms. Based on comprehensive art principles, and project oriented. Credit/no credit only. Offered: Sp.

**UCONJ 511 Issues in Home Health Care Delivery (3)** Service delivery issues relevant to provision of health care services across the life span in the home setting. Home health care as an important component of the health care delivery system. Individual and multidisciplinary practice of health care disciplines. Emphasis on research literature. Prerequisite: graduate student standing, upper division with permission of instructor.

**UCONJ 513 Dynamics of Patient Management: Diabetes Mellitus (2)** Analysis of advanced knowledge related to interdisciplinary management of diabetes. Commonalities and differences in provider approaches, recent research and its effect on management practices, collaborative communication, knowledge application. Brief interactive presentations, decision-making opportunities, discussion. Credit/no credit only. Prerequisite: graduate standing in pharmacy, dietetics, nursing; third- or fourth-year medical student; or permission of instructor.

**UCONJ 515 Promoting Health Behavior for Individuals and Families (2, max. 4)** Brandt, Jordan, Kieckhefer, Lewis, Solichany, Speiker Practice-focused, evidence-based, theory-driven intervention strategies to promote healing and health behavior at selected points from birth to death. Relevant for clinicians from diverse health settings. Emphasis on clinical skill development including decision-making and outcome management applicable for individuals and families. Prerequisite: permission of instructor. Offered: Sp.

**UCONJ 520 Molecular Biophysics Research Seminar (1)** Parsons A series of research seminars for faculty and students involved with the molecular biophysics program. Credit/no credit only.

**UCONJ 524 Developmental Neurobiology (3)** Raible, Reh, Roelink, Rubel Survey of contemporary issues in developmental neurobiology, including neurogenesis and differentiation; electrophysiological, morphological, and neurochemical regulation of cellular phenotype; neuronal pathways and synaptic contacts; cellular and synaptic plasticity; and behavior. Examination of molecular biological, morphological, electrophysiological, and behavioral approaches. Prerequisite: background in neurophysiology, neuroanatomy, molecular neurobiology. Offered: Sp.

**UCONJ 525 Overview of Faculty Research in Neurobiology (1)** Reviews research topics currently being studied in neurobiology. Student preparation consists of reading pertinent articles published on each topic. Credit/no credit only. Prerequisite: first-year graduate student in neurobiology.

**UCONJ 530 Issues in Indian Health (3)** Survey of historical and contemporary issues in Indian Health. Covers Indian contributions to health, traditional Indian Medicine, current disease epidemiology, development of Indian Health policy, the Indian Health Service, tribal health programs, and consequences of major legislation on Indian Health. Prerequisite: current health science student or permission of instructor.
School of Law

**Law**

**LAW 300 Introduction to Law (3-6, max. 5)** I&S. Understanding the legal system, its functions in the social-economic order, legal reasoning, and the world of legal education and the legal profession. Open to nonlaw students only.

**LAW 410 Problems in Professional Responsibility (4)** I&S.

**LAW 415 Criminal Justice (3)** I&S. Examines pre-trial rights of persons suspected or accused of crime, primarily those rights covered by the Fourth, Fifth, Sixth, and Fourteenth Amendments of the U.S. Constitution.

**LAW 416 International Contracting: Negotiation and Drafting (3)** I&S. Skills course designed to introduce process and problems of negotiating and drafting international agreements. Client interviewing and counseling and negotiation and drafting of a contract between parties in the United States and Japan. Credit/no credit only. Open to nonlaw students only.

**LAW 422 Copyright (3)** I&S.

**LAW 429 Public Land Law (3)** I&S.

**LAW 440 Legal Issues of Internet Law (3)** I&S. Introduces the basic legal issues raised by networked digital technologies, such as the Internet. Covers jurisdiction, speech, privacy/access, property rights (copyrights, domain names), emerging law, leading policy debates, as well as fundamental Internet technical skills. Offered: S.

**LAW 442 Land Law and the Urban Environment (3)** I&S. Examination of the major legal tools available to shape the urban environment by controlling the use of land. Considers zoning, subdivision controls, urban renewal, private land-use restrictions, and the rules of nuisance law. Credit/no credit only. Open to law and nonlaw students.

**LAW 443 The Legal Process I (3/5)** I&S. The system of law and its functions rather than substantive law pertaining to any particular subject or discipline. Open only to nonlaw students. Credit/no credit only.

**LAW 444 Constitution and American Public Education (3-6, max. 6)** I&S. Examines the relationships between the Constitution of the United States and the American system of public education, excluding higher education, in areas of constitutional freedom and legal controls, racial desegregation, and equal educational opportunity, including equal financing of the public schools. Credit/no credit only. Offered: jointly with EDLPS 444.

**LAW 445 Major Issues in American Constitutional Law (3)** I&S. Significant themes in American constitutional law. Doctrine of judicial review, application of the Bill of Rights to the states, Supreme Court’s recognition of fundamental rights, the Equal Protection clause, the Religion clauses, freedom of speech, and Presidential powers. Open to law and nonlaw students.

**LAW 447 Critical Perspectives in Law (3)** I&S. Examination of modern critical legal thought and critiques of alternative forms of social ordering.

**LAW 467 American Law and the American Indian (3)** I&S. Relationship between Indians and the United States from 1789 to the present. Significant constitutional, legislative, and judicial actions. Legal events explored within their political, military, social, and cultural contexts. Comparisons with other minority-group experiences. Offered: jointly with HSTAA 416.

**LAW 476 International Economic Relations and Trade Policy (3)** I&S. Consideration of international control of national trade policies and permissible transnational reach of national trade or other regulation. The General Agreement on Tariffs and Trade (GATT) and the international monetary system examined from legal and economic perspective. Examination and comparison of prescriptive jurisdiction to public international law.

**LAW 477 Law Literature and Film (2-4, max. 4)** I&S/VLPA. An examination of literary and cinematic portrayals of and issues important to law, lawyers, and the legal system. Considers both portrayals purporting to depict the legal system as well as works envisioning lawyers and the legal system in a “better world.”

**LAW 481 Land, American Culture and the Law: Perspectives on the Use and Ownership of the Natural Environment (1-6, max. 6)** I&S.

**LAW 489 Law and Aging (3)** I&S. Survey of principal areas of law of special concern to aging population, considering health care and health care decision-making, public and private income maintenance programs, taxation, guardianships, conservatorships and other means of protecting the property of the elderly, counseling, and professional responsibility.

LAW A 563 Urban Government (3).
LAW A 564 Legal History (1-4, max. 4).
LAW A 565 American Indian Law (4).
LAW A 566 Theories of Justice (2-4, max. 4).
LAW A 574 International Law (2-4).
LAW A 577 Immigration Law (4).
LAW A 578 International Commercial Law (1-4, max. 4).
LAW A 579 Child Advocacy (4).
LAW A 580 Family Law (4-5).
LAW A 581 Washington Constitutional Law Seminar (1-4, max. 4).
LAW A 582 Bankruptcy (3).
Introduction to business and consumer bankruptcy law based on the bankruptcy code and recent cases. Covers transactions and litigation aspects of bankruptcy law and practice. Considers the impact of bankruptcy law on areas covered in other courses such as business organizations, commercial transactions, environmental law, family law, torts, and intellectual property.
LAW A 583 Insurance Law (4).
LAW A 584 American Public School Law (3).
Constitutional, statutory, and common law principles common to all public education systems within the United States. Applicable law are a variety of substantive legal areas such as torts, property, contracts, administrative law, and fundamental rights. Offered: Sp.
LAW A 585 Admiralty (4).
LAW A 586 Secured Transactions IV (4).
LAW A 594 International Trademark and Copyright (3).
Focuses on international treaties as they relate to protection of trademarks and copyrights. Introduces international aspects of branches of intellectual property, including general principles of comparative and international law, and specific law related to obtaining and enforcing intellectual property rights in foreign countries. Prerequisite: either Law A 522 or Law E 598.
LAW A 598 Legal Research I (3).
Introduction to legal bibliography and law librarianship. Basic primary and secondary legal bibliographic tools. Integration of manual and computer resources for effective legal research. Emphasis on state materials. Prerequisite: law librarianship major or LIS 503 and LIS 530 which may be taken concurrently. Offered: jointly with LIS 591.
LAW A 599 Legal Research II (3/4).
Legal tools that answer more complex legal research problems, such as federal legislative histories, sources of administrative law, specialized subject research. Federal emphasis. Builds on skills and techniques taught in LIS 591/LAW A 598. Extensive work with online resources. Prerequisite: LIS 591 or permission of instructor. Offered: jointly with LIS 592.

LAW B 522 Mediation of Disputes (3) Credit/no credit only.
LAW B 523 Negotiation (2-4, max. 4) Credit/no credit only.
LAW B 525 Alternative Dispute Resolution (3)
Overview of alternative dispute resolution including negotiation, mediation, arbitration, med-arb, early neutral evaluation, mini-trials, summary jury trials, and E-ADR. Critical evaluation of each process occurs through a combination of
LAW B 526 Mediation Clinic ([1-10]-, max. 10) Credit/no credit only.

LAW B 527 Criminal Law Clinic (8) Credit/no credit only.

LAW B 528 Unemployment Clinic ([2-8]-, max. 8) Credit/no credit only.

LAW B 529 Advanced Environmental Law and Practice (1-4, max. 4).

LAW B 530 Judicial Externship (1-15, max. 15).

LAW B 531 Immigration Law Clinic ([1-8]-, max. 8) Credit/no credit only.

LAW B 532 Advanced Clinic (1-4, max. 4) Advanced clinical training under the supervision of a law school faculty member in order to complete a project or case begun by the student during a clinic, or to pursue in more depth the subject of the clinic. Credit/no credit only. Prerequisite: Clinical basis for continued work.

LAW B 533 Interviewing and Counseling for Lawyers (2/3) Credit/no credit only.

LAW B 534 Affordable Housing Development Clinic ([1-12]-, max. 12).

LAW B 535 Legislative Externship (1-15, max. 15) Credit/no credit only.

LAW B 536 Drafting Basic Business Documents (1-3, max. 3)-.

LAW B 537 Refugee Advocacy Clinic ([1-12]-, max. 12) Credit/no credit only.

LAW B 538 Agency Externships (1-15, max. 15) Credit/no credit only.

LAW B 539 Public Interest Law Externship ([1-15]-, max. 15) Credit/no credit only.

LAW B 540 Japanese Law (4) Basic institutions and processes of the Japanese legal system. Historical development and traditional role of law, reception of Western law, and cultural and structural factors that influence the function of law and legal institutions. Offered: jointly with SISEA 540.

LAW B 541 Law in East Asia: China (4) Introduction to the institutions and processes of the Chinese legal system. Focuses on the contemporary system and its role in relation to political, economic and social developments. Examines legal aspects governing foreign trade and investment in China. Offered: jointly with SISEA 543.

LAW B 542 Korean Law (3) TaylorIntroduction to basic institutions and processes of the Korean legal systems. Emphasis on the historical development and traditional roles of law, the reception of Western law, and cultural and structural factors that influence the function of law and legal institutions.

LAW B 543 Intellectual Property Law in East Asia (3).

LAW B 544 Transnational Litigation: United States-Japan ([2-4]-, max. 4).

LAW B 545 Survey of American Law and Practice (6) Provides an integrated introduction to the U.S. legal system, legal analysis, legal research, and legal writing. Introduces tools and techniques for basic legal research in U.S. materials. Credit/no credit only.

LAW B 546 United States-Japanese Corporate Relations ([2-4]-, max. 4).

LAW B 547 Government Regulation of Business in Japan (3) Offered: jointly with SISEA 549.

LAW B 550 Legal Analysis and Research for Students Not Trained in the Common-Law System ([1-4]-, max. 4).

LAW B 551 Comparative Law Seminar ([2-6]-, max. 6).

LAW B 552 Tutorial in Comparative Law ([1-4]-, max. 4).

LAW B 553 Chinese Legal Tradition (3) Offered: jointly with SISEA 553.

LAW B 555 Roman Law (3).

LAW B 556 Islamic Law (3) Selected topics in Islamic law that highlight major aspects of Islamic civilization. Offered: jointly with NEAR E 524.

LAW B 557 Southeast Asian Law (2-4, max. 4) Two or three countries in Southeast Asia are selected as case studies. Examines their legal and political histories; legal institutions and legal professions; commercial and investment laws; and compliance questions relating to labor standards, corruption, and human rights.

LAW B 558 Doctoral Thesis Seminar (2) Students draft thesis abstracts, tables of contents, preliminary chapters, and presents arguments orally to identify core theories and applied studies to incorporate in their work. Read a selection of published work and indicative articles drawn from the list of relevant sources for individual thesis-in-development.

LAW B 559 Comparative Law: Europe, Latin America, and East Asia (4).

LAW B 560 Criminal Justice Externship (1-15, max. 15) Credit/no credit only.

LAW B 561 International Law of the Sea (3) Offered: jointly with SMA 506.

LAW B 562 Quantitative Methods (4).

LAW B 563 Ocean Policy and Resources Seminar (3) Study and research in selected legal problems relating to ocean and coastal law, marine trade and transportation, marine resources, and protection of the marine environment. Students prepare and present a research paper and critique papers prepared by other students. Prerequisite: LAW B 561, LAW B 565.

LAW B 565 U.S. Coastal and Ocean Law (4) Allen Study of the legal framework in the United States controlling allocation and use of coastal and marine resources. Topics include coastal zone management, fisheries management, protection of marine mammals and endangered species, marine pollution, offshore oil and gas development, and marine transportation. Offered: jointly with SMA 515.

LAW B 566 General Externship Perspectives Seminar (2) Credit/no credit only.

LAW B 573 Supreme Court Decision Making (2-4, max. 4) Examines Supreme Court decision making from both a theoretical and practical perspective. Surveys representative cases on the Court’s current docket. Extensive preparation required of participants, who play the roles of lawyers, justices, and commentators. Emphasis on developing appellate advocacy skills.

LAW B 577 Law, Literature and Film ([2-4]-, max. 4) An examination of literary and cinematic portrayals of, and issues important to law, lawyers, and the legal system. Considers both portrayals purporting to depict the legal system as well as works envisioning lawyers and the legal system in a “better world.”.

LAW B 578 Seminar on Legal Problems of Economic Development (1-6, max. 6).

LAW B 580 Externship Tutorial (2) Credit/no credit only.

LAW B 581 Land, American Culture, and the Law: Perspectives on the Use and Ownership of the Natural Environment ([1-6]-, max. 6).

LAW B 584 Indian Law Seminar ([2-6]-, max. 6).

LAW B 589 Intellectual Property Law Seminar ([1-4]-, max. 4).

LAW B 590 The United States Constitution: Past, Present, and Future (2).

LAW B 593 Natural Resources Commons Property (3) A review of the different forms of natural resources and an exploration of the desirability of managing certain resources as commons or private property. Covers a review of the successes and failures by various groups in setting policy in this area.

LAW B 596 International Protection of Human Rights ([2-4]-, max. 6) Still.

LAW B 597 History of the Formation of the United States Constitution Seminar ([2-6]-, max. 6).

LAW B 599 Special Topics (1-12, max. 12).

Law E

LAW E 500 Advanced Writing Project (1-3, max. 3) Independent research and writing project supervised by a faculty member. Projects are structured to develop skills in research, analysis, and writing. Offered: AWSpS.

LAW E 502 White Collar Crime (4).

LAW E 503 Analytic Writing (3).

LAW E 504 Emerging Issues in Urban Government Seminar (6) Focuses on currently emerging issues in local government, such as municipal regulation of land use, the initiative process, technology and privacy, governmental responses to urban social problems and regional challenges. Production of publishable paper by student satisfies the advanced writing project requirement.

LAW E 505 Frontiers of Tort Law (3).

LAW E 506 Asian Contract Law and Practice
(3) Examines how economic deregulation, financial restructuring and technological change affect contracts in Asia. Topics include licensing, franchise and e-commerce contract in Japan, China, and Taiwan; contract law and practice in Vietnam and Indonesia; cultural norms in contracting; convergence toward “global standards,” and the role of lawyers and other agents.

LAW E 507 Access to Justice Seminar (2) Explores the legal, ethical, and financial issues involved in providing legal services to moderate income persons. Uses a combination of lectures and interactive discussion. Credit/no credit only.

LAW E 509 European Union Law (3) Survey of the legal origins of the European Union and the synthesis of the major European legal traditions achieved. Focus on the process of harmonizing national laws of the member states and economic integration in the area of competition law and free movement of goods and services.

LAW E 512 Law, Globalization, and Multina-
tional Corporations (3) An interdisciplinary workshop that examines the role of multinational corporations in a global society. Topics include the legal construct of the multinational corporation, the multinational and the state, the multinational and human rights, and the multinational in the international arena. Offered jointly with SIS 562.

LAW E 514 The Law of Nonprofit Organiza-
tions (2-4, max. 4) Examines laws generally applicable to nonprofit corporations and legal issues relating to cooperatives, credit unions, and thriftmutual associations. Attention given to the Washington Nonprofit Corporations Act with comparable statutes and model legislation.

LAW E 515 Criminal Justice (3) .

LAW E 516 Advanced Criminal Procedure (5) Covers the formal charging, trial, and appellate stages of criminal proceedings, including grand jury proceedings, prosecutorial discretion in charging, pretrial release and detention, charging and venue joinder and severance, double jeopardy assistance of counsel, discovery, and disclosure, criminal trials appeals, and collateral post conviction remedies. Prerequisite: LAW A 505; LAW B 515.

LAW E 517 Foreign Trade and Investment Law of the People's Republic of China (1-4, max. 4) Introduction to the regulatory regime governing foreign trade and investment in China and in-depth coverage of key aspects of the regime, with focus on issues faced by U.S. businesses. Covers specific regulations, their regime, with focus on issues faced by U.S. businesses. Covers comparable statutes and model legislation.

LAW E 518 Philosophy of Law (4) Explores jurisprudence as “the jurist's quest for a systematic vision that will order and illuminate the realities of the law” and legal philosophy as “the philosopher’s effort to understand the legal order and its role in human life.” Examines various texts, emphasizing works of one or more proponents and critics of liberalism.

LAW E 521 Advanced Trial Advocacy (3) .

LAW E 522 Sexual Orientation, Gender Identity, and the Law Seminar (1-4, max. 4) Nicolas Examines questions regarding sexual orientation and gender identity as they relate to the areas of criminal, constitutional, employment, tort, and family law. Topics include equal protection, freedom of association, public and private employment discrimination, same-sex marriage and non-marital alternative to marriage, parenting, hate crimes legislation, sodomy laws, and the legal profession. Offered: S.

LAW E 523 Intellectual Property Law Clinic (3) Clinical training in intellectual property law. Prerequisite: LAW A 526, LAW E 547, or LAW A 546. Offered: S.

LAW E 524 Child Advocacy Clinic (1-12, max. 12) Credit/no credit only.

LAW E 525 Poverty Law (4) Overview of legal issues affecting poor people, including relevant background readings on poverty and access to justice, and selection problems such as housing and homelessness, education, employment, issues of low-wage workers, income support and welfare reform, consumer law, family law, and child care.

LAW E 526 Law Reform in Transition Economies Seminar (2, max. 6) Clarke, Ramasasy, Taylor Using interdisciplinary perspectives and case studies, this seminar probes the assumptions, methods and outcomes of commercial law reform in transition econom-
ies. Also highlights and critiques the role of international lawyers in this important, emerging area of practice.

LAW E 527 Automobile Impoundment Defense Clinic (3/4) Clinical training protecting rights of low-income people who stand to lose their vehicles under Seattle’s Driving While License Suspended (DWLS) car impoundment law (akin to a forfeiture program) without having been convicted of DWLS. Counsel walk-up clients at Seattle Municipal Court, conduct legal research on possible challenges to vehicle seizure.

LAW E 528 Appellate Advocacy Clinic (2-, max. 4) Clinical training in appellate litigation with both seminar and practical components dealing with appellate procedure, strategy, and applicable standards of review. Students represent clients in state appellate court, writing at least one appellate brief and participating in oral argument.

LAW E 529 Tribal Court Criminal Defense Clinic (4-, max. 12) Offers clinical training in substantive areas of law implicated in represen-

LAW E 531 Basic Income Tax Concepts (3) Basic federal income tax principles, how the tax law impacts a wide variety of business and personal transactions and decisions, and what a reformed tax law might look like.

LAW E 532 Sports Law (3/4) Analyzes sports cases and materials that cover multiple disciplines, including contracts, torts, constitu-
tional, antitrust, labor and employment, intellectual property, and criminal law. Participation in problem solving exercises and drafting and negotiations sessions, which explore areas like player and coaching contracts, investigation of NCAA rules infractions, and possible sanctions against universities.

LAW E 536 Practical and Professional Responsibility Issues in the Small or Solo Law Practice (3-4, max. 4) Credit/no credit only.

LAW E 537 Refugee Law (2) Examines the processes in the United States for the admission of refugees and for the adjudication of asylum claims. Explores international refugee policy and evolving legal norms concerning asylum, temporary protection, repatriation, resettlement and internal displacement.

LAW E 538 International Civil Litigation in U.S. Courts (4) Examines the special procedural and substantive law governing both private as well as semi-public disputes in U.S. Courts and arising out of transnational transactions. Explores international arbitration and considers compara-
tive aspects.

LAW E 539 Workshop on E.U., U.K. and U.S. Regulation of E-Commerce and Information Society (2/3) Compares the different attitudes to regulation of e-commerce and the information society in the U.S. and the European Union. Topics may include: an introduction to European Union institutions, regulatory, cultural themes in the Internet; e-society and e-commerce in Europe; regulation of illegal, harmful content, and Internet Service Provider liability, etc.

LAW E 540 Legal Issues of Internet Law (3) Introduces the basic legal issues raised by networked digital technologies, such as the Internet. Covers jurisdiction, speech, privacy/access, proprietary rights (copyrights, domain names), emerging law, leading policy debates, as well as fundamental Internet technical skills. Offered: S.

LAW E 541 Electronic Commerce and Information Technology (3) Introduction to legal and policy issues raised by electronic commerce and other emerging information technologies. Topics vary and may include intellectual property and contract issues raised by establishing an online commercial presence, rights and obligations of users of network services including constitutional rights, information privacy, electronic contracts, electronic payments, etc.

LAW E 543 Crime, Privacy, and Accountability on the Internet (2) An exploration of criminal activity on the Internet and issues that arise in investigating it. Examines the tension between privacy rights and the need for accountability. Includes substantive criminal statutes, constitutional rights and procedural laws that implement privacy and protections, and the practicalities of Internet crime investigations.

LAW E 544 Privacy Law (2) Examines the legal doctrines of privacy and confidentiality used to protect personal information. Aims to understand how courts and legislatures seek to protect information as new technologies and institutional practices emerge. Studies scope and implica-
tions of federal statutes that attempt to establish fair information practices with respect to electronic personal information.

LAW E 547 Legal Protection for Computer Software (3) .

LAW E 548 Litigation Strategies in Technology Protection (3) Deals with procedural and substantive legal issues in enforcement of patents. Provides a research in the litigation in the order that parties normally would. Substantive legal issues will be taught in conjunction with procedural and strategic considerations. Prerequisite: LAW A 546.
LAW E 550 Patent Prosecution (4) Addresses fundamentals of patent application drafting, through a combination of lectures and assignments. Addresses all aspects of proceedings before the U.S. Patent and Trademark Office, including preparing new applications, and examiner interviews. Recommended: engineering or science background. Prerequisite: LAW A 546.

LAW E 551 Representing Start-ups (4) Plans, uses the problem method to explore the corporate tax, and securities law, general business and financial considerations related to small business formation and financing. Prerequisite: LAW A 515; LAW A 530.

LAW E 552 Strategic Technology Licensing (3) Comprehensive coverage of issues related to exploitation of intellectual property rights as a business asset for new companies, or as a source of income for existing businesses.

LAW E 553 Technology Law and Public Policy (12) Survey of public policies that have been affected by the information revolution. Examines issues from Internet taxation, to personal data privacy, information warfare. Discusses the implications of the new public policies and whether it is feasible for states to enact different information policies.

LAW E 554 Technology Law and Public Policy Clinic (2-4), max. 10) Clinical training in legislative and public policy advocacy under supervision of law school faculty. Examines legislative process, drafting, commentary and advocacy, appellate advocacy, and professional responsibility concerns. Supervised practice experience representing public interest with respect to law and technology. Credit/no credit only. Prerequisite: LAW E 553, which may be taken concurrently.

LAW E 555 Advising Privately-Owned Businesses (3) The role of lawyers as advisors to privately-owned businesses. Uses case studies to examine a broad range of structural planning issues, with emphasis on tax and business considerations, tax traps, and creative planning strategies. Analyzes, compares, and contrasts different business types. Prerequisite: LAW A 530.

LAW E 566 Innocence Project Northwest Clinic (3-4, max. 10) Offers students clinical training investigating and litigating claims of actual innocence on behalf of prisoners serving lengthy sentences for serious crimes. Open to second- and third-year students in the JD program.

LAW E 567 Survey of Intellectual Property (2-4, max. 4) O'Connor Intended for both law students who are only interested in a general overview of intellectual property and non-law students who are seeking a certificate in intellectual property law and policy. Designed as an alternative to Patents, Trademark and Unfair Competition Law, and Copyrights. Offered: W.

LAW E 568 Indian Law Clinic (4, max. 12) Supervised practice component on Indian law practice and profession advocacy skills. Provide legal advice, brief services and representation to low income Indian clients under the direct supervision of a practicing attorney. Client counseling research, negotiation, and community education. Offered: AWSp.

LAW E 569 Advanced Mediation Practicum (3) Ewalt Advanced clinical practicum in mediation under the supervision of the faculty using experienced mediators. Students convene and mediate cases referred to the Mediation Clinic from government agencies and other sources. Only for students who have successfully completed the Mediation Clinic LAW E 526, or have other comparable experience. Offered: A.

LAW E 575 Telecommunications Law and Policy (2) Survey basic policy principles underlying our nation’s telecommunications laws. Focus on administrative and statutory law, paying special attention to the design and implementation of the Telecommunications Act of 1996. Addresses the role played by antitrust, economic regulation and constitutional law (particularly the First Amendment) in shaping our nation’s telecommunications landscape.

LAW E 577 Drafting Technology Contracts (3) An advanced course in drafting and negotiating representative technology business agreements. Surveys such documents as a technology development agreement, a technology license agreement, an employee agreement, a web site development, a web commerce agreement, a source code agreement, and a technology evaluation agreement.

LAW E 579 International and Foreign Law Research (2) Overview of international law materials. Examine primary materials in the vernacular and in translations: constitutions, charters, codes, administrative rules, cases, treaties and other international agreements. Focuses on practice tools such as directories, guides, digests, and proceedings. Prerequisite: LAW A 506 or permission of instructor.

LAW E 582 Information Policy: Domestic and Global (5) National and international information policy: public and private sector policy in terms of privacy, access, and exploitation; technology infrastructures and policies supporting the information industries. Coverage includes freedom of information privacy, copyright, telecommunications, and emerging technologies.

LAW E 588 Trademark and Unfair Competition Law (3) Hoffmann Provides a comprehensive review of issues relating to protection of trademarks and other trade identity symbols under the common law and the Federal Lanham Act. Offered: A.

LAW E 590 IP Innovations in Science and Technology (2, max. 6) Takanaka Covers controversial intellectual property law and policy questions arising from evolving science, technology and e-commerce, and addresses cutting edge issues from a multidisciplinary perspective. Examines the current legal regimes and research environment and explores innovative methods for maximizing the exploitation of advanced science and technology. Offered: AWSp.

LAW E 592 Federal Appellate Advocacy (1-6, max. 6) Representation of an otherwise pro se litigant in an appeal in the Ninth Circuit.

LAW E 593 Environmental Law Litigation and Practice (4-, max. 12) Survey of environmental litigation and practice regarding various environmental issues. Examines information-gathering (Freedom of Information Act), formal discovery, case selection, document control, and presentation in complex litigation, representation of groups, professional responsibility issues, working with scientists/presenting scientific evidence, and trial techniques. Prerequisite: LAW A 527, which may be taken concurrently.

LAW E 594 Environmental Law Clinic (4-, max 12) Examines applicable environmental law and procedure, skills training, and professional responsibility concerns. Participation in a carefully supervised practice experience representing clients in cases involving environmental issues. Students must be Rule 9 qualified. Credit/no credit only. Prerequisite: LAW A 527; LAW E 593, which may be taken concurrently.

Health Law

LAW H 502 Medical Malpractice (3/4).

LAW H 503 Medical Ethics and Jurisprudence (3-).

LAW H 504 Legal, Ethical, and Social Issues in Public Health Genetics (3) Kuszler, Mastroiainni Equips the student to anticipate and assess potential legal, ethical, and social barriers complicating the incorporation of new genetic advances, information, and technologies into public and private health care delivery efforts. Prerequisite: GENET 371 or equivalent. Offered: jointly with PHG 512/MHE 514.

LAW H 507 Law, Medicine, and Ethics in the Context of Pain Management (2) Reviews the problem of physicians failing to relieve pain of the patients in the dying process and the legal and ethical issues they face as well as the cultural sources of the problem.

LAW H 508 Beginning of Life: Rights and Choices (2) Addresses the controversial legal issues engendered by our increasing control over the beginning of life. Focuses on the law, regulation, and policy implications of contraception; new reproductive and genetic technologies, including surrogate parenthood, sperm and egg donation, in-vitro fertilization, and other methods of conquering infertility; and abortion.

LAW H 510 Topics in Law and Medicine ([1-4]-, max. 4).

LAW H 520 Genetics and the Law (2) Kuszler Considers the legal issues arising from new genetic technologies and information. Statutes, regulations, and cases used to demonstrate the constitutional, contract, and tort law complications resulting from dissemination of these technological advances. Prerequisite: LAW E 562/MHE 514/PHG 512 or permission of instructor. Offered: jointly with PHG 523.

LAW H 524 Forensic Evidence (3) Examines the application of the rules of evidence in cases that involve forensic evidence. Examines paradigmatic cases involving homicide and
physical or sexual assault, although the principles examined are applicable generally in civil and criminal cases.

LAW H 525 Criminal Law and Procedure (3) Provides an understanding of U.S. criminal law and criminal procedure. Explores basic principles of liability, defenses, and basic constitutional principles governing interactions between police and suspects. Open to forensic nursing students and graduate law students, but not JD students.

LAW H 530 Disability Law (3) Considers the definition of disability as defined by statute (ADA, FRA), case law, and social perception. Focuses on education law and entitlements, assess to and discrimination in employment, housing, public transportation, and health care.

LAW H 531 Disability Clinic (4-, max. 12) Clinical training in disability law issues, including access to Medicaid and other public benefits, assistive technology issues, transit accessibility, and low-wage worker accommodation issues, among other possible issues. Students represent clients at Columbia Legal Services under supervision of CLS attorneys. Prerequisite: LAW A 567.

LAW H 534 Mental Health and the Law (3) Considers mental and legal issues as well as major civil and criminal law issues, including standards and procedures for involuntary commitment; consent for, and informed refusal of, treatment; de-institutionalization including standards and procedures for placement within the community; and the insanity defense; competency to stand trial; and punishment of the mentally ill convict.

LAW H 536 Research Ethics and Regulation (3) Mastroianni Explores the ethical principles and concepts and U.S. laws related to (1) research conducted with animals, (2) research on humans, and (3) the responsible conduct of research Required for graduate students in the Department of Medical History and Ethics, School of Medicine. Offered: jointly with MHE 536. W.

LAW H 540 Health and Human Rights (3) Examines the basic concepts in the fields of human rights law and public health, and uses those concepts to examine the interdependence and tensions between the two fields. Introduction to the fields of public health and human rights law, examining the impact of health policies and programs on human rights.

LAW H 547 Biotechnology and the Law (3) .

LAW H 548 Advanced Health Law (3) Considers the impact of antitrust law, fraud, and abuse prohibitions, the corporate practice of medicine doctrine, tax law and other state and federal laws upon emerging health care entities. Focuses on integrated health care delivery systems. Prerequisite: LAW A 597.

Intellectual Property Law

LAW P 501 Intellectual Property Law Core (8) Intensive study of intellectual property law core subjects: patents, copyrights, trade secrets, and trademarks. Examines fundamental principles their underlying policies, and how the laws inter-relate. Open to J.D students with permission of instructor. Not open to students who have taken LAW A 522, LAW A 546, or LAW E 588.

LAW P 504 Economic Analysis of Intellectual Property (2-3) Explores the intersection between intellectual property law and economics from both a macro and micro economic perspective, economic justification of intellectual property law; and portfolio management tools that can evaluate intellectual property protection as an investment. Prerequisite: either LAW P 501 or LAW E 557. Recommended: economics. Offered: W.

LAW P 509 Intellectual Property and Unfair Competition (2-3) Bangasser Examines in-depth application of competition law and policy to the creation and exploration of the intellectual property. Offered: Sp.

LAW P 528 LL.M. Intellectual Property Law Practicum (1-4, max. 6) Experience with an approved non-profit organization, judicial or legislative body, or governmental agency on issues related to intellectual property law and policy. Students work under the guidance of experienced practitioners; both student and field supervisor provide the supervising law faculty member with a final written evaluation. Credit/no credit only.

LAW P 545 Advanced Patent Law Seminar (3) Taylor Study of public policy and practice considerations relating to patenting research results in high technology. Examines the most up-to-date issues in legal protection of technology from the comparative law perspective. Students write and present a research paper on a topic related to patent law and policy. Prerequisite: LAW A 546. Offered: W.

LAW P 590 Graduate Intellectual Property Law Tutorial (1-4, max. 4) Focuses on a specialized area of intellectual property law. Limited to students in the Graduate Program in Intellectual Property Law and Policy. Tutorial must be approved by the program director.

Taxation Law

LAW T 502 Federal Tax Controversies and Procedures (3) .

LAW T 503 Problems of Timing (2-3, max. 3) .

LAW T 504 Property Dispositions and Transactions (3) .

LAW T 505 Introduction to Income Taxation (2) Addresses a number of fundamental income tax concepts, including the computation of individual tax liability, statutory exclusions, deductions, and gains. Also deals with issues related to character and timing.

LAW T 506 Tax Practice and Skills (1) Orientation to core concepts of tax practice, including administrative structure and nature of tax law, nuances of statutory interpretation, and the relative roles of statutory, administrative, and judicial sources. Includes overview of print and online tools for federal tax research.

LAW T 507 Federal Tax Policy Seminar (2-, max. 4) Examines the theoretical and policy considerations applied in assessing existing and proposed federal tax regimes. Topics include: the nature of the income tax as a tax on saving and consumption; consumption taxes as alternatives to taxes on income; tax policy and charitable giving; taxes and the poor; and more.

LAW T 510 Estate and Gift Taxation (3) .

LAW T 511 Taxation of Partners and Partnerships (1-[4], max. 4) .

LAW T 512 Exempt Organizations (2-[4], max. 4) .

LAW T 513 Estate Planning (3) .

LAW T 515 International Taxation (1) .

LAW T 516 International Taxation II (3) .

LAW T 517 Estate and Gift Taxation II (2) .

LAW T 518 Taxation of S Corporations (2) .

LAW T 519 Canadian-United States Tax Issues (2) Ko Overview to various cross-border issues, including the Canadian income tax (and its GST), residency for Canadian tax purposes, principles relating to operation of Canadian business in the United States and profit repatriation and U.S. investment in Canada and similar repatriation issues.

LAW T 520 Tax Ethics (2) Considers the role of ethics in tax practice and its application to specific problems faced by tax professionals. Explores substantive rules governing tax. Addresses ethical problems of tax professionals in connection with structuring transactions, resolving tax controversies with and presenting cases to the IRS, and representing litigants in tax controversies.

LAW T 521 Compensation and Benefits (1) .

LAW T 522 Compensation and Benefits II (2) .

LAW T 523 International Estate Planning (2) .

LAW T 524 Transfer Pricing Seminar (2) Andrade Reviews section 482 of U.S. Internal Revenue Code and the Treasury regulations thereunder with a focus on multinational corporations (MNCs) and their related party transactions that are subject to the arm’s length standard. Application of U.S. transfer pricing regulations to related party transactions involving MNCs.

LAW T 525 Advising Privately-Owned Businesses (3) Explores the role of the lawyer as an advisor through case studies examining a range of structural planning issues and the practical and analytical challenges of the planning process. Emphasizes tax and business considerations, and creative planning strategies. Prerequisite: LAW A 530; LAW A 515, which may be taken concurrently.

LAW T 526 Low-Income Tax Payer Clinic (2-3, max. 9) Clinical training in federal tax litigation under the supervision of members of the law school faculty.

LAW T 528 Graduate Tax Practicum (2) Field-based experience in a department-approved public or private entity, of eight hours per week minimum under the guidance of experienced practitioners. The student and practitioner produce a final report summarizing the practicum experience to the supervising faculty member, who decides whether to award academic credit. Credit/no credit only.

LAW T 530 Corporate Reorganizations and Acquisitions (3) Examines the federal income taxation of business entities and their owners. Limited to coverage of the fundamental concepts of corporate and partnership taxation.

LAW T 531 Advanced Corporate Tax Problems (2) Examination (through case studies) of
consolidated tax returns, limits on the use of tax benefits, carryover of tax attributes, classifications of debt versus equity, and corporate penalty taxes.

LAW T 532 Taxation of Estates, Trusts, and Beneficiaries (2-3, max. 3).

LAW T 533 Tax Crimes: Investigations, Prosecutions, and Penalties (2) Chiconie Focuses on elements of tax and related crimes with a view of the governmental investigative tools and powers, including IRS summons, search warrants, and Grand Jury investigations. Covers taxpayer’s rights and defenses in a criminal case; the IRS voluntary disclosure program; and the elements of civil penalties. Offered: AWSpS.

LAW T 534 State and Local Taxation (4).

LAW T 536 Taxation of Trans-Pacific Transactions (2/3).

LAW T 537 Business Planning (2-6), max. 6.

LAW T 538 Estate Planning for Business Interests (2-3) Business succession and estate planning issues for the owners of closely held business, including shareholder agreements, recapitalizations, family limited partnerships and limited liability companies, taxable acquisitions, split dollar agreements, redemptions to pay death taxes, electing small business trusts and more. Prerequisite: LAW T 510.

LAW T 539 Matrimonial Tax (2) Covers tax aspects of married relationships and the tax impact of the dissolution of a marriage. Includes joint returns, the marriage tax penalty, innocent spouse relief from joint return liability, pre-nuptial agreements, transfer tax effects of inter-spousal transfers, alimony, child support, and marital property transfers incident to divorce.

LAW T 541 Limited Liability Companies (2).

LAW T 543 Advanced Partnership Tax (2) Builds on the material covered in the basic course, Taxation of Partners and Partnership. It covers more sophisticated aspects of partnership allocations; transactions between partners and partnerships; and sale and exchange of partner- ship interests. Prerequisite: LAW T 511.

LAW T 544 Tax Aspects of Charitable Giving (20) Examines income, gift and estate tax consequences of charitable gifts of cash and property. Includes: theoretical and policy bases of charitable deduction; technical requirements; effect of receipt of benefits; percentage limitations based on donee and type of property; application of carryover rules; effect of partial cash or cash equivalent consideration.

LAW T 545 International Taxation of Intellectual Property (2) Smith Overview of the tax consequences of various types of common commercial arrangements that involve the development, ownership, and use of intangible property within multinational groups. Explores tax efficient arrangements such as contract research and licensing arrangement, cost-sharing arrangement, and the use of intangible holding companies.

LAW T 546 Taxation of Real Estate Interests (2) An in-depth study and analysis of the tax consequences of acquiring, developing, operating, and disposing of interests in real property. Focuses on practical approaches to structuring sale-leaseback transactions, syndications, installment sales, and like-kind exchanges. Considers the application of the passive activity loss rules in real estate.

LAW T 547 International Taxation of Electronic Commerce (2-, max. 4) Electronic commerce is defined as the exchange of digital information in connection with the purchases and sale of goods and services. Seminar and discussion format. Explores the potential methods and approaches for the taxation of earnings associated with electronic commerce.

LAW T 548 Tax Writing (2) Designed to improve writing skills as they relate to practice of tax law. Students draft many types of tax documents. Also considers professional responsibility aspects of tax practice. Recommended: LAW T 556.

School of Medicine

Anesthesiology

ANEST 498 Undergraduate Thesis (*) Sivarajan By special arrangement. Time and credit to be determined. Offered: AWSpS.

ANEST 499 Undergraduate Research (*) Sivarajan Specific research problems relating to pulmonary, cardiovascular, renal, obstetric, and central nervous system functions, and their alteration by anesthetic techniques and agents. (Six weeks, full-time. Limit: two students.) Offered: AWSpS.

ANEST 501 P-Preceptorship in Anesthesiology (1) Sivarajan An opportunity for first- and second-year medical students to gain experience with medical practice situations by observing clinical faculty members in their offices. Prerequisite: permission of instructor. Offered: AWSpS.

ANEST 680 P-Basic Anesthesia Clerkship (4) Sivarajan Introduction to the principles of airway management, ventilatory support, use of local anesthetics, techniques of patient monitoring and fluid therapy. Skills taught include airway management, venipuncture, lumbar puncture and endotracheal intubation. Prerequisite: third- or fourth-year student. (Two weeks, full-time. Limit: three to five students each two-week period.) Affiliated hospitals. Offered: AWSpS.

ANEST 681 P-Advanced Clerkship in Anesthesiology (8) Sivarajan Clerkship for students desiring greater exposure to anesthesiology as a specialty. Individual programs can be arranged in the following areas: surgical anesthesia, obstetrical anesthesia, and pain clinic. Prerequisite: Third- or fourth-year student. (Four weeks, full-time. Limit: two students per period.) Affiliated hospitals. Offered: AWSpS.

ANEST 697 P-Anesthesiology Special Electives (*, max. 24) Sivarajan Special clerkships, externships, or research opportunities can at times be made available at institutions other than the University of Washington. Students wishing to elect this course should obtain a special assignment form from the Dean’s office at least one month before advance registration. Prerequisite: permission of instructor. (Four to twelve weeks, full-time.) Offered: AWSpS.

ANEST 699 P-PWWAMI Anesthesiology Special Electives (*, max. 24) By special arrangement for qualified students, special clerkships or externships may be available at institutions other than the University of Washington located within the WWAMI region. Prerequisite: permission of department.

Biochemistry

BIOC 396 Research in Chemistry and the Chemical Sciences (1) NW Presentations by researchers in academia and industry describing the opportunities for research chemistry and biochemistry. Credit does not count toward biochemical laboratory techniques. Prerequisite: either BIOC 440, which may be taken concurrently. Offered: ASp.

BIOC 406 Introduction to Biochemistry (3) NW Hurley; Petra Survey of basic principles of biochemistry and molecular biology, emphasizing broad understanding of chemical events in living systems in terms of metabolism and structure-function relationships of biologically important molecules. Suitable for pre-majors, for students interested in careers in medicine, dentistry, pharmacy, medical technology. Prerequisite: BIOC 405. Offered: W.

BIOC 426 Basic Techniques in Biochemistry (4) NW Chung, Petra Introduction to basic biochemistry experiments. Acquaints students (largely Biochemistry majors) with basic biochemical laboratory techniques. Prerequisite: BIOC 440, which may be taken concurrently. Offered: ASp.

BIOC 440 Biochemistry (4) NW Davis, Klevec Biochemistry and molecular biology (with quiz sections) for undergraduate students in molecular and cellular biology, for biochemistry majors, and graduate students in other science departments. Prerequisite: 2.5 in either BIOC 201 or BIOC 202; 2.5 in either CHEM 224, CHEM 239, or CHEM 337; 2.0 in either MATH 124 or MATH 134. Offered: A.

BIOC 441 Biochemistry (4) NW Young Biochemistry and molecular biology (with quiz sections) for undergraduate students in molecular and cellular biology, for biochemistry majors, and graduate students in other science departments. Prerequisite: 2.0 in BIOC 440. Offered: W.

BIOC 442 Biochemistry (4) NW Kimelman, Palminteri Biochemistry and molecular biology
(with quiz sections) for undergraduate students in molecular and cellular biology, for biochemistry majors, and graduate students in other science departments. Prerequisite: either 1.7 in BIOC 406 or 2.0 in BIOC 441. Offered: Sp.

BIOC 496 Research Seminar for Undergraduates (1, max. 2) NW formal presentations of student research. One credit applies to research component of a relevant major. Credit/no credit only. Offered: jointly with CHEM 496; Sp.

BIOC 498 Undergraduate Thesis (*) For senior medical students. Offered: AWSpS.

BIOC 499 Undergraduate Research (*) Investigative work on enzymes, proteins, lipids, molecular biology, developmental biology, intermediary metabolism, physical biochemistry, and related fields. Credit/no credit only. Offered: AWSpS.

BIOC 515-519 (For description, see listing for “Current Literature Conferences” at the end of this section.)

BIOC 520 Seminar (1) Seminar dealing with timely topics in the field of biochemistry. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSp.

BIOC 525-529 (For description, see listing for “Current Literature Conferences” at the end of this section.)

BIOC 530 Advanced Biochemistry (3) Baker, Gelb, Hol, Klevit, Stenkamp, Stoddard Graduate-level discussion of the structure, function, and chemistry of proteins, control of enzymatic reactions. Prerequisite: a comprehensive course in biochemistry and permission. Offered: A.

BIOC 533 Topics In Biochemistry (1, max. 30) Daum, Davie, Fischer Provides in-depth examination of current topics in biochemistry, molecular biology, and structural biology. Designed to help participants in basic science departments become acquainted with latest ideas on selected topics. Emphasis on analysis of key concepts in the field with reference to classical papers and recent literature. Prerequisite: permission of instructor. Offered: AWSp.

BIOC 534 Topics In Molecular Biophysics (1.5) Parson Emphasis on methods used to study macromolecular structure and dynamics, including x-ray crystallography, NMR, optical spectroscopy, computer modeling, protein folding and ligand binding. Two topics covered each quarter; students may register for one or both. Prerequisite: permission of instructor. Offered: AWSp.

<BIOC 535-539 (For description, see listing for “Current Literature Conferences” at the end of this section.)

BIOC 540 Literature Review (2) Parson Emphasizes critical evaluation of original articles in the literature. For first-year graduate students in biochemistry and students of other science departments, with permission. Offered: jointly with BMSD 540 A.

BIOC 541 Literature Review (2) Palmiter Emphasizes critical evaluation of original articles in the literature. For first-year graduate students in biochemistry and students of other science departments, with permission. Offered: W.

BIOC 542 Literature Review (2) Morris Emphasizes critical evaluation of original articles in the literature. For first-year graduate students in biochemistry and students of other science departments, with permission. Offered: Sp.

BIOC 546-548 (For description, see listing for “Current Literature Conferences” at the end of this section.)

BIOC 555-559 (For description, see listing for “Current Research Conferences” at the end of this section.)

BIOC 556-559 (For description, see listing for “Current Research Conferences” at the end of this section.)

BIOC 557-557 (For description, see listing for “Current Research Conferences” at the end of this section.)

BIOC 581 Introduction to Biochemical Research (4, max. 16) Student works with one of the research groups within the department for one quarter and then rotates to other laboratories for second and third quarters. Credit/no credit only. Prerequisite: graduate standing in biochemistry or permission of instructor. Offered: AWSpS.

BIOC 586-588 (For description, see listing for “Current Research Conferences” at the end of this section.)

BIOC 600 Independent Study or Research (*) Offered: AWSpS.

BIOC 700 Master’s Thesis (*) Offered: AWSpS.

BIOC 800 Doctoral Dissertation (*) Offered: AWSpS.

Current Literature Conferences

BIOC 515-519, 525-529, 535-539, 546-548 Current Literature Conference in Biochemistry

Weekly group conferences concerning ongoing graduate student and postdoctoral research in biochemistry. Students may register for more than one conference each quarter. Credit/no credit only. Prerequisite: permission of instructor. (Only 25 credits may be counted toward degree.)

BIOC 555 Cell and Molecular Biology of Connective Tissue Proteins (1, max. 30) Borenshtein Offered: AWSpS.

BIOC 556 Enzymatic and Genetic Aspects of Blood Clotting (1, max. 30) Davie Offered: AWSpS.

BIOC 557 Growth Regulation by Calcium Binding Proteins (1, max. 30) Davis Offered: AWSpS.

BIOC 559 Membrane Biochemistry and Cell Growth (1, max. 30) Glomset Offered: AWSpS.

BIOC 560 Protein Folding (1, max. 30) Baker Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSpS.

BIOC 561 Origin of Polarity (1, max. 30) Ruohola-Baker Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSpS.

BIOC 565 Plant Molecular Genetics (1, max. 30) Offered: AWSpS.

BIOC 566 Growth and Differentiation of Skeletal and Cardiac Muscle (1, max. 30) Hauschka Offered: AWSpS.

BIOC 568 Molecular and Genetic Aspects of G Protein Signal Transduction (1, max. 30) Hurley Offered: AWSpS.

BIOC 569 Inductive Events in Early Development (1, max. 30) Kimelman Offered: AWSpS.

BIOC 575 NMR Analysis of Proteins and Nucleic Acids (1, max. 30) Klevit Offered: AWSpS.

BIOC 576 Sequential Analysis of Growth Regulation (1, max. 30) Morris Offered: AWSpS.

BIOC 577 Gene Regulation in Transgenic Mice (1, max. 30) Palmiter Offered: AWSpS.

BIOC 578 Electron Transport in Photosynthesis (1, max. 30) Parson Offered: AWSpS.

BIOC 588 Molecular Biology of Yeast Gene Regulation (1, max. 30) Young Offered: AWSpS.
Biological Structure

B STR 301 General Anatomy (4) NW Pittack Survey of systemic human anatomy, including human skeletal system, muscular system, respiratory system, circulatory system, nervous system, digestive system, endocrine system, urinary system, and reproductive system. For second-, third-, and fourth-year undergraduates. Offered: Sp.

CONJ 401, 402, 403 Human Anatomy and Physiology (4, 4, 4) See Conjoint Courses.

B STR 431 Introduction to Neuroanatomy (4) NW Broderston, Mulligan, Westrum Survey of the anatomy and functional organization of the human central nervous system, with clinical applications. Prerequisite: admission to the School of Dentistry. Offered: W.

CONJ 480 Neuroscience and Rehabilitation Professionals (5) See Conjoint Courses.

B STR 498 Undergraduate Thesis (*) Individual research projects under the supervision of an instructor. For senior medical students. Offered: A/WSpS.

B STR 499 Undergraduate Research (*) Individual research projects in cellular and developmental biology, experimental immunology, reproductive biology, neurobiology, molecular structure, morphometrics, computer modeling, and related fields under the supervision of an instructor. Offered: A/WSpS.

B STR 502 Gross Anatomy (1-5, max. 5) Graney Lecture and laboratory dissection course in regional anatomy: upper and lower extremities. Prerequisite: permission of instructor. Offered: W.

B STR 503 Gross Anatomy (1-5, max. 5) Graney Lecture and laboratory dissection course in regional human anatomy; head and neck. Prerequisite: permission of instructor. Offered: Sp.

B STR 510 Seminar in Anatomy (1) Graney Scientific and historical basis of selected studies in biological structure, anatomy, and human development. Original literature used as basis for textbook descriptions is reviewed. Credit/no credit only. Prerequisite: permission of instructor. Offered: A/WSp.

B STR 512 Human Microanatomy (4) Lectures and laboratory treating the specialized tissues and organs of the body from the microscopic and ultramicroscopic points of view. Prerequisite: permission of instructor. Offered: A.

B STR 515 Biological X-Ray Structure Analysis (3) Stenkamp Theory of x-ray diffraction, with emphasis on applications to biological systems. Prerequisite: permission of instructor. Offered: W.

B STR 519 Current Problems in Macromolecular Structure (2, max. 10) Hol A discussion of macromolecular structures related to specific areas of biological research. Emphasis on discussion of relevant research papers and use of computer graphics to visualize the molecular structures. Offered: A/WSpS.

CONJ 520 Anatomy and Autopsy (1/2, max. 2) Fligner See Conjoint Courses.

B STR 520 Structure Based Design of Drugs (3) Hol, Verlinde Lecture and discussion on research papers illustrating protein structure based design of new drugs. Review of methods and extensive discussion of all known mechanisms of drug resistance. Offered: even years; W.

B STR 521 Advanced Biomacromolecular Crystallography (3) Hol, Merritt, Stenkamp Aspects of protein crystallography ranging from crystal growth, phase determination methods, density averaging to refinement, fiber diffraction of DNA and proteins. Offered: odd years; Sp.

CONJ 524 Structural Basis of Neural Transduction (1.5) See Conjoint Courses.

UCONJ 524 Developmental Neurobiology (3) Rabie, Reh, Roeplink, Rubel See University Conjoint Courses.

B STR 530 P-Gross Anatomy and Embryology for Dental Students (8/13, max. 13) Broderston, Clark Normal anatomy of the thorax, abdomen, pelvis, and perineum are discussed and dissected employing cadavers. The development of the organ systems is presented and related to definitive adult structure. Developmental anomalies and diagnostic anatomy are also discussed. Prerequisite: admission to School of Dentistry. Offered: A.

B STR 540 Special Problems in Anatomy (1-6, max. 6) Special projects in anatomy under sponsorship of faculty member. Prerequisite: graduate, medical, or dental student standing and permission of instructor. Offered: A/WSpS.

B STR 541 P-Microscopic Anatomy for Dental Students (4) Lecture and laboratory work in microscopic anatomy. For dental students taking HUBIO 510; others by permission of instructor. Offered: A.

CONJ 542 Development (1.5) See Conjoint Courses.

CONJ 545 Molecular Interactions and Medicine (1.5) See Conjoint Courses.

B STR 550 P-Head and Neck Anatomy for Dental Students (4) Broderston, Clark, Graney Normal anatomy of the head is discussed and dissected, employing human cadavers. The fundamentals of diagnostic anatomy are also discussed. Restricted to first-year dental students. Prerequisite: B STR 530. Offered: Sp.

B STR 555 Laboratory Rotation in Biological Structure (*, max. 5) Introduction to experimental design, research methods, and scientific thought in laboratories of faculty members. Provides hands-on experience, an entrance into the literature of the field, and opportunities for discussion with all members of the laboratory. First-year dental students only. Prerequisite: permission of instructor. Offered: A/WSpS.

B STR 556 Topics in Developmental and Systemic Cell Biology (1-3, max. 3) Recent advances in molecular and developmental aspects of cell biology. Emphasis on neoplastic organs systems. Differentiation of lymphocytes, germ cells, muscle, epidermis; cell biology of lens, vessel wall, visual cortex; computer modeling; cell-cell and cell-matrix interactions. Prerequisite: undergraduate biochemistry and/or molecular biology and general cell biology or permission of instructor. Offered: A/WSpS.

B STR 557 Biomolecular Structure Seminar (1) Hol Literature review of key research in Biomolecular Structure in the form of short presentations by participants followed by discussion. Critical evaluation of methods and results regarding properties and protein structure determination. Credit/no credit only. Prerequisite: graduate standing in biological structure or biochemistry and permission of instructor. Offered: A/WSp.

B STR 559 Developing Research Proposals (2) Developing research proposals in cellular, molecular, and developmental biology, neurobiology, morphometrics and computer modeling; experimental immunology and hemopoiesis; reproductive biology; molecular structure. Weekly seminars by faculty and written proposals by students to include background and significance of projects’ specific hypotheses and aims, methodology, analyses of possible outcomes. Prerequisite: permission of instructor. Offered: even years; Sp.

B STR 580 P-Anatomy Teaching Practicum (*, max. 8) Dacey, Graney, Mulligan Opportunity for medical student (or other professional student) to gain teaching experience in biological structure and human biology courses, including gross anatomy, histology, and neuroanatomy. May include lecture, laboratory, conference, and discussion with all members of the laboratory. First-year dental students only. Prerequisite: permission of course chairperson. Offered: A/WSp.

B STR 584 Seminar in Neurogenesis (1) Reh Discussion of current research on processes by which neurons are generated in the nervous system. Offered: A/WSpS.

CONJ 585 Surgical Anatomy (1-3, max. 12) Graney See Conjoint Courses.

B STR 591 X-Ray and NMR Analysis of Macromolecular Structure (1, max. 9) Hol Weekly discussion of current topics in research on molecular structure, usually emphasizing techniques of x-ray crystallography. Credit/no credit only. Prerequisite: permission of instructor. Offered: A/WSp.

B STR 595 Skin Biology Seminar (1, max. 5) Smith Presentation, discussion of ongoing multidisciplinary research in basic and clinical problems of adult and fetal skin biology. Genetic diseases of epidermis and dermis, percutaneous absorption in adult and fetal skin, wound healing, cutaneous blood flow, development and prenatal diagnosis of inherited disorders, pigment cell biology. Credit/no credit only. Prerequisite: permission of instructor. Offered: A/WSp.

B STR 597 Topics in Neurobiology (1, max. 5) Harris Presentations by participants of topics in
neuroanatomy, neurophysiology, neurochemistry, and other areas relating to the nervous system. Problems of current research interest. Credit/no credit only. Prerequisite: permission of instructor. Offered: A.

**B STR 598 Reading in Biological Structure (2)** Critical evaluation of research in biological structure, including current problems, methods and future directions by reading and discussing research and review papers. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSpS.

**B STR 600 Independent Study or Research (*)** Offered: AWSpS.

**B STR 700 Master’s Thesis (*)** Offered: AWSpS.

**B STR 800 Doctoral Dissertation (*)** Offered: AWSpS.

---

**Comparative Medicine**

**C MED 407 Principles of Animal Experimentation: The Mouse (3)** Brabb, Grossmann, Treuting Focus on biology and care of mice used in medical research, and the experimental design and ethics of animal research. Includes lectures and problem-based learning. For graduate and advanced undergraduate students. Prerequisite: permission of instructor. Offered: AWSp.

**C MED 499 Undergraduate Laboratory Research (1-6, max. 6)** Ladiges, Price Specific problems in comparative medicine. Credit/no credit only. Offered: AWSpS.

**C MED 512 Introduction to the Anatomical Analysis of Animal Disease (2)** Brabb, Iritani, Treuting Use of animals in experimental study of disease; techniques of animal necropsy, characterization, interpretation of gross and microscopic lesions, correlation of lesions with altered physiological processes, differentiation between naturally occurring and experimentally induced lesions. Prerequisite: PATH 444, PATH 445, or equivalent, and permission of instructor. Enrollment limited: two students per quarter. Offered: AWSpS.

**C MED 514 Comparative Pathology Conference (1, max. 6)** Liggett, Treuting Focus on histopathology of naturally occurring and experimentally induced lesions of primates, laboratory and domestic animals, fish, wildlife, and birds. Participants discuss the lesions and the basic pathogenetic mechanisms that underlie them. Prerequisite: PATH 500 or equivalent and permission of instructor. Credit/no credit only. Offered: AWSpS.

**C MED 516 Current Literature in Laboratory Animal Medicine (1, max. 12)** Liggett Critical evaluation of recent articles on laboratory animal medicine and science. Emphasis on literature dealing with spontaneous diseases of laboratory animals, biology and husbandry, zoonotic diseases, and animal models of human disease. Experimental design, use of animals in research, and methods of reviewing manuscripts. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSpS.

**C MED 518 Clinical Conference Seminar (1, max. 12)** Price Clinical reports of cases of spontaneous and induced diseases, animal models of human disease, and zoonotic diseases discussed. Disease prevalence and preventive medicine measures. Diagnostic exercises. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSpS.

**C MED 520 Biology of Laboratory Animals (1)** Brabb, Iritani, Treuting Fundamentals of the morphological, functional, and applied aspects of anatomy, physiology, pharmacology, biochemistry, and immunology of the commonly used laboratory animal species. Similarities and differences within, and between, species, including man. Husbandry, genetics, behavior, and nutrition. Prerequisite: permission of instructor. Offered: A.

**C MED 521 Biology of Laboratory Animals (1)** Brabb, Iritani, Treuting Analysis of etiology, pathogenesis, pathology, and disease processes in rodent, lagomorphs, carnivores, and nonhuman primates. Prerequisite: permission of instructor. Offered: W.

**C MED 526 Epidemiology of Diseases Communicable from Nature (3)** DiGiaccamo, Rausch, Weigler Explores the public health aspects of zoonotic diseases, their epidemiology and approach; focuses on the major viral, rickettsial, bacterial, protozoal, helminthic, and fungal diseases transmitted from wild and domesticated animals to humans. Prerequisite: C MED 511, C MED 512, or C MED 520 or permission of instructor. Offered: jointly with EPI 526; Sp.

**C MED 530 Diseases of Laboratory Animals (1)** Brabb, Iritani, Treuting Analysis of etiology, pathogenesis, pathology, and disease processes in rodents, lagomorphs, carnivores, and nonhuman primates. Prerequisite: permission of instructor. Offered: A.

**C MED 531 Diseases of Laboratory Animals (1)** Brabb, Iritani, Treuting Analysis of etiology, pathogenesis, pathology, and disease processes in rodents, lagomorphs, carnivores, and nonhuman primates. Prerequisite: permission of instructor. Offered: W.

**C MED 540 Animal Models (1)** Brabb, Iritani, Treuting Natural, spontaneous, and experimentally induced analogs of human diseases in animals with emphasis on diseases in search of animal models, and approaches to identifying new models. Animal models of categorical disease (e.g., cancer, atherosclerosis, gerontology) discussed. Prerequisite: permission of instructor. Offered: Sp.

**C MED 590 Selected Topics in Animal Medicine (2-5, max. 10)** Brabb, Iritani, Treuting Radiation biology, genetics, anesthesiology and experimental surgery, preventive medicine, and ethical aspects of use of animals in biomedical teaching and research. Specific topics vary from year to year, depending on the expertise of the annual visiting professor. Prerequisite: permission of instructor. Offered: AWSpS.

**C MED 600 Independent Study or Research (*)** Credit/no credit only. Offered: AWSpS.

**C MED 601 Internship Rotation — Laboratory Animal Medicine (1-5)** Credit/no credit only. Prerequisite: DVM degree. Offered: AWSpS.

**C MED 700 Master’s Thesis (*)** Credit/no credit only. Offered: AWSpS.

---

**Conjoint Courses**

**CONJ 401 Human Anatomy and Physiology (4)** Linder, Melby An integrated course on the structure and function of the human body with laboratory work in gross anatomy, histology, and physiology. Primarily for pharmacy doctoral students. Others by special permission of instructors. Prerequisite: either BIOL 201, BIOL 202, and BIOL 203, or BIOL 220 either CHEM 155, CHEM 160, or CHEM 162. Offered: A.

**CONJ 402 Human Anatomy and Physiology (4)** Linder, Melby An integrated course on the structure and function of the human body with laboratory work in gross anatomy, histology, and physiology. Primarily for pharmacy doctoral students. Others by special permission of instructors. Prerequisite: CONJ 401. Offered: W.

**CONJ 475 Alcoholism: A Course for Medical Students and Students in the Allied Health Sciences (2)** Kivlahan, Samson A lecture course for medical students in the allied health sciences in any year that will cover an introduction to the epidemiology, diagnostic strategies, natural history, physiologic effects, and treatment of alcohol-related disorders. Offered: Sp.

**CONJ 480 Neuroscience for Rehabilitation Professionals (5)** Anderson, Mulligan, Slimp Survey of the structure and function of the central nervous system, emphasizing sensorimotor systems and higher integrative functions, coupled with clinical correlations. Required for occupational therapy, physical therapy, and prosthetic/orthotic students. Others by permission.

**CONJ 505 P-Pain Clinic Preceptorship (1)** One morning a week for a total of 30 hours per quarter spent observing patient care in either inpatient or outpatient settings at University of Washington Medical Center; associated readings. Prerequisite: first- or second-year medical student standing. Coordinator: Pain Center.

**CONJ 514 Molecular Medicine (3)** Rosen Graduate-level introduction to the interplay of basic science and clinical medicine. Covers inflammation, vascular disease, metabolic disorders, cancer biology, and molecular-, gene-, and cell-based therapies. Each topic introduced with a patient history. Offered: jointly with PATH 514; W.

**CONJ 515 Interdisciplinary Health and Human Services Delivery in Rural Communities (1)** House Provides opportunities for students in health and human services to explore current trends and issues of service delivery in rural communities. Demographics, economics, community structure, culture, and professional/personal issues are addressed. Prerequisite: major standing in a health or human services profession. Credit/no credit only. Offered: W.

**CONJ 516 What Every Physician Should Know About Oral Health (1)** Lewis, Mouradian, Slutzman Didactic elective for students interested in understanding oral health and its relationship
to systemic health. Special interest to students planning careers in primary care, public health, or who are likely to practice in rural or underserved communities. Includes weekly seminars and clinical demonstrations. Credit/no credit only. Offered: Sp.

CONJ 520 Anatomy and Autopsy (1/2, max. 2) Fligner Students attend autopsies at UWMC affiliated hospitals for demonstration of normal anatomic relationships and gross pathological changes in various diseases. Offered as elective concurrent with HUBIO 520P. Prerequisite: HUBIO 510P or equivalent, permission of instructor, and orientation. Offered: WSp.

CONJ 524 Structural Basis of Signal Transduction (1.5) Xu Focuses on the structure-function relationship of key enzymes in signal transduction (protein/lipid kinases; phosphatases etc.) and the structural consequences of protein phosphorylation. Teaches students to look into critical structural details using PC or Mac. Prerequisite: undergraduate course in biochemistry and basic cell biology, or permission of instructor. Offered: W.

CONJ 531 Signaling Mechanisms in Excitable Cells (1.5) Hille Membrane electricity. Structure and roles of voltage-gated and ligand-gated ion channels in excitatory signaling. Calcium as a second messenger. Excytosis and its regulation. Phototransduction in photoreceptors. Prerequisite: comprehensive undergraduate course in general biochemistry and molecular biology, or permission of instructor. Offered: A.

CONJ 532 Signal Transduction from the Cell Membrane to the Nucleus (1.5) Beavo, Moon, Storm Intracellular pathways leading from cell membrane receptors to nucleus. Pathways activated by seven transmembrane G-protein-coupled receptor and G-proteins, insulin/Pi3 kinase, nitric oxide and WNTs and mechanisms of signal termination. Cytokine/Jak/Stat signaling and role of subcellular localization in signal transduction. Prerequisite: basic knowledge of biochemistry. Offered: A.

CONJ 533 The Dynamic Chromosome (1.5) Henikoff, Roth The chromosome viewed as the ultimate organelle. How chromosomes are maintained and propagated. Epigenetic regulation of gene expression, genomic, biochemical, and cytologic methods for understanding chromosome functions. Prerequisite: cell biology, biochemistry, and genetics. Offered: A.

CONJ 534 Selected Problems in Nervous System Development (1.5) Grady Introduces students to current issues in developmental neurobiology. Topics include regionalization of the neuroectoderm, mechanisms of neurogenesis, axon patterning and plasticity, and cell death. Not intended to be comprehensive; examines the experimental basis for current views in the field of a few topical issues.

CONJ 535 RNA Structure and Biological Function (1.5) Ferre-D'Amare, Stoddard Survey of the diversity of cell-biological roles played by RNA with emphasis on structural principles and structure-function relationships. Readings from the current literature to cover both, methods for the study of RNA, and examples of the function of this nucleic acid as part of the machinery for gene expression. Offered: W.

CONJ 536 Experimental Design in Cell Biology (1.5) Wakimoto, Wright, Hille, Cooper Focuses on experimental design in cell biology. A topic of current research interest is covered in depth in order to follow a line of investigation and critically evaluate the strengths and limitations of various experimental strategies. Offered: jointly with BIOL 546; W.

CONJ 537 Mechanism of Transcriptional Regulations (1.5) Takaoka Focuses on biochemical mechanisms of gene transcription covering a broad array of transcriptional regulation, including mechanisms of transcriptional initiation, elongation and termination. Discusses regulation of transcription by chromatin. Includes a special lecture regarding regulation of transcription in cell growth and differentiation. Offered: A.

CONJ 538 Genetic Instability and Cancer (1/1.5) Maizels, Monat Seminar focusing on molecular pathways that maintain genomic stability in all cells and that carry out programmed changes in genomic structure in the immune system. Special attention devoted to understanding how failure in these pathways leads to genomic instability and malignancy. Prerequisite: permission of instructor.

CONJ 539 Biological Basis of Neoplasia (1.5) Kemp, Zarbl Lecture/discussion on cellular and molecular mechanisms underlying phenotypes associated with cancer, including genetic predisposition, injury, and instability; alteration in control of cell division and cell death; failure of differentiation; tumor angiogenesis and metastasis. Molecular biology of tractable model systems is emphasized. Prerequisite: introductory biochemistry and cell biology. Offered: S.

CONJ 541 Molecular Biology of Cellular Processes (1.5) Storm Translational control; cytoskeleton and molecular motors; protein targeting, sorting and secretion; apoptosis; regulation of cell function by extracellular matrix. Prerequisite: comprehensive undergraduate course in biochemistry and molecular biology or permission of instructor. Offered: Sp.

CONJ 542 Development (1.5) Raible, Roelink Molecular mechanisms of development; molecules and pathways used for the patterning of developing organisms. Similarities and differences in the making of organ, invertebrates, and vertebrates. Prerequisite: Comprehensive undergraduate courses in Biology, Molecular Biology, or permission of instructor. Offered: W.

CONJ 544 Protein Structure, Modification and Regulation (1.5) Stoddard, Strong Overview of general principles of protein structure, including forces that contribute to folding and stabilization, followed by an extended coverage of the means by which protein structure and function are modified and regulated. Examples from recent developments in protein folding, processing, and allosteric regulation. Prerequisite: introductory biochemistry and cell biology.

CONJ 545 Molecular Interactions and Medicine (1.5) Verlinde Forces governing molecular interactions in biology, with a focus on medicine. Principles of computer modeling techniques in use for predicting the molecular behavior of proteins, ligands and their complexes. In computro ligand discovery; drug design, and understanding the atomic level of some genetic diseases. Two computer lab sessions. Offered: Sp.

CONJ 546 Survey of Technologies for Molecular Biology (1.5) Bumgarner Provides a broad overview of modern technologies used in molecular biology with particular emphasis on DNA sequencing and gene expression. In addition to methods and applications for the technologies, examines the theoretical basis and underlying instrumentation through which these technologies are implemented. Offered: A.

CONJ 547 Molecular Evolution of Viral-Host Interactions (1.5) Katze Focuses on the interactions between viruses and the cells they infect, with special emphasis on evolutionary battle that occurs between the invading virus and its host. Examines new technologies being used to molecularly dissect virus-host interactions. Offered: Sp.

CONJ 548 Modeling Proteins and Proteomes (1.5) Bernado Provides hands-on experience for modeling protein structures, using the models to predict function, and applying the prediction methods to all proteins encoded by an organismal genome. Provides an overview of protein structure, how it mediates function, and its importance for understanding protein interaction networks. Offered: W.

CONJ 549 Microbial Population Biology (1.5) Mittler Principles of ecology and evolution as they apply to microorganisms. Prerequisite: advanced undergraduates with permission of instructor. Offered: even years; Sp.

CONJ 550 P-Clinical Infectious Diseases (3) Spach Lecture series by faculty members from various departments, authorities in the field of clinically important infectious diseases. Lectures, reading assignments, and handouts emphasize epidemiology, clinical manifestations, laboratory findings, diagnosis, treatment, and prevention. Oriented for second-year medical students. Credit/no credit only. Offered: W.

CONJ 551 Immunity (1.5) Strong Provides an understanding of the central cellular and molecular players in the mammalian immune system at a level appropriate for the non-specializing graduate student. Selected topics include the molecular basis of B and T cell activation and effector functions and the mechanisms of innate immunity. Offered: Sp.

CONJ 552 Metabolic Flexibility in Biology (1.5) Focuses on small molecules and the ways that chemistry of these molecules facilitates life under changing conditions. Includes systems from microbiology to human physiology to understand aspects of cancer, aging, and animation. Explores topics including bioenergetics/metabolic flux, adaptation, and allometric scaling. Prerequisite: undergraduate organic chemistry and biochemistry.

CONJ 555 Surgical Anatomy (1-3, max. 12) Graney Guided dissection of selected regions, supplemented by conferences. Offered conjointly by the departments of Biological Structure and Surgery. Prerequisite: permission of department. Coordinator: Department of Biological Structure.

CONJ 577 P-Clinical Allergy and Immunology (*, max. 12) Callanan (Boise Veterans Affairs Hospital), Henderson (University of Washington Medical Center) Clinic and office experience in diagnosing and managing allergic disease. Clinical conferences, hospital rounds on clinic immunology and allergy. Student may elect a flexible program, emphasizing adult or pediatric allergy. Prerequisite: MED 665 or basic clerkships in Departments of Family Medicine or Pediatrics. (Four weeks, full-time.) Offered: AWsSp.

CONJ 678 P-Pain Clinic Clerkship (8) Full-time,
four-week clerkship emphasizing comprehensive care of patients with chronic pain from benign diseases and cancer. Faculty members from multiple departments provide student with didactic and bedside experiences; student member of treatment team. Involves both inpatient and outpatient activities. Prerequisite: completion of human biology series, MED 665.

CONJ 680 P-Detoxification and Rehabilitation Program for Alcoholism and Drug Abuse (*, max. 18) Focus Supervised introduction to alcoholic detoxification and rehabilitation and drug abuse. Supervised clinical experience in a variety of alcoholism and drug abuse treatment programs; accompanied by a core series of lectures and discussions. For medical students only. Prerequisite: PBSCI 664, PBSCI 665, PBSCI 666, or PBSCI 668.

CONJ 690 P-Clerkship in Chronic Care (8) Exposure to four areas: Rehab Medicine, Geriatrics, Pain, and Palliative Care. While students choose one focus area; weekly group didactic sessions expose students to all areas through lectures, group discussions, standardized patients, and case scenarios. Offered: AWSpS.

CONJ 696 P-WRITE Clinical Electives (*, max. 24) Clinical electives for WRITE program. Offered: AWSpS.

CONJ 697 International Exchange Clerkship (12) Hunt Participation in health care delivery systems in developing countries; observation of relationship of host country’s traditional medicine with Western medicine. Students live in cross-cultural setting to better understand their own assumptions about health care and life styles. Offered: Sp.

CONJ 698 P-Foreign Medical Student Clerkship (*, max. 24) A limited number of students from foreign medical schools are accepted for individually designed clinical clerkships at available sites after all UWMC students are accommodated. Prerequisite: permission of Associate Dean for Academic Affairs, School of Medicine. Offered: F.

CONJ 699 P-Clinical Clerkships (*, max. 32).

Family Medicine

FAMED 499 Undergraduate Research (*) Research activities arranged with University-based or community physicians in diversified areas relating to family medicine. Prerequisite: permission of course coordinator. Offered: AWSpS.

FAMED 501 P-Introduction to Family Medicine: Preceptorship (2.5) Students spend one morning per week for one or more quarters working with a practicing community family physician. Prerequisite: first- and second-year medical students, permission of course coordinator. Offered: AWSpS.

FAMED 505 P-Rural/Urban Preceptorship (*, max. 12) Opportunity to work in a variety of underserved medical settings in rural and urban areas of Washington, Wyoming, Alaska, Idaho, and Montana. Prerequisite: permission of course coordinator. Offered: AWSpS.

FAMED 545 Preclinical Geriatric Elective (2) Covers disease and disability prevention, health promotion, and positive attitudes that can contribute to successful aging. Emphasis on optimum aging, site visits, and extensive contact with diverse older people.

FAMED 546 Preclinical Hospice Volunteer Training Elective (3) Using lectures, small groups, role play, and readings, covers the basic knowledge, skills and attitudes that need to be mastered as a hospice volunteer. Students participate as hospice volunteers as part of their field experience. Offered: jointly with MHE 517.

FAMED 547 Spirituality in Medicine (2) Examination of the beliefs, values, meaning, and spirituality of health professionals for the well-being of their patients as well as for themselves. Offered: jointly with MHE 518.

FAMED 555 P-Wilderness Medicine (1/2) Elective provides didactic and field experience for third-year medical students in types of medical emergencies and clinical problems unique to rural and wilderness communities, including trauma, survival hypothermia, altitude, frostbite, heat illness, lightning, and river rescue. Credit/no credit only. Prerequisite: permission of course coordinator.

FAMED 556 Spanish for Health Professionals (1) Instruction in interviewing Spanish-speaking patient. Credit/no credit only. Prerequisite: health professions student.

FAMED 565 P-Indian Health Problem-Based Learning Cases (1) For second-year medical students. Presents common Indian health problems via problem-based learning cases over two to three days per case. Offered: A.

FAMED 630 P-WRITE Family Medicine Clinical Clerkship (*, max. 24) Basic clinical clerkship for students enrolled in the WRITE Program.

FAMED 640 P-Clinical Clerkship in Family Medicine — Boise (12) Stresses ambulatory primary care with emphasis on comprehensive, integrated care to patients of both genders and all ages. Student functions as clerk in community/residency site. Participates in care of assigned patients, using office, hospital, home, community resources. Prerequisite: third- or fourth-year medical students. Offered: A.

FAMED 641 P-Clinical Clerkship in Family Medicine — Spokane (12) For description and prerequisite, see 640. Offered: AWSpS.

FAMED 642 P-Clinical Clerkship in Family Medicine — Madigan (12) For description and prerequisite, see 640. Offered: AWSpS.

FAMED 643 P-Clinical Clerkship in Family Medicine — Tacoma (12) For description and prerequisite, see 640. Offered: AWSpS.

FAMED 644 P-Clinical Clerkship in Family Medicine — University of Washington Medical Center (12) For description and prerequisite, see 640. Offered: AWSpS.

FAMED 645 P-Clinical Clerkship in Family Medicine — Group Health (12) For description and prerequisite, see 640. Offered: AWSpS.

FAMED 646 P-Clinical Clerkship in Family Medicine — Swedish (12) For description and prerequisite, see 640. Offered: AWSpS.

FAMED 647 P-Clinical Clerkship in Family Medicine — Providence (12) For description and prerequisite, see 640. Offered: AWSpS.

FAMED 648 P-Clinical Clerkship in Family Medicine — Renton Valley (12) For description and prerequisite, see 640. Offered: AWSpS.

FAMED 649 P-Clinical Clerkship in Family Medicine — Olympia (12) For description and prerequisite, see 640. Offered: AWSpS.

FAMED 650 P-Clinical Clerkship in Family Medicine — Anacortes (12) For description and prerequisite, see 640. Offered: AWSpS.

FAMED 651 P-Clinical Clerkship in Family Medicine — Omak (12) For description and prerequisite, see 640. Offered: AWSpS.

FAMED 652 P-Clinical Clerkship in Family Medicine — Spokane Valley (12) For description and prerequisite, see 640. Offered: AWSpS.

FAMED 653 P-Clinical Clerkship in Family Medicine — Anchorage (12) For description and prerequisite, see 640. Offered: AWSpS.

FAMED 655 P-Clinical Clerkship in Family Medicine — Havre (12) For description and prerequisite, see 640. Offered: AWSpS.

FAMED 656 P-Clinical Clerkship in Family Medicine — Whitefish (12) For description and prerequisite, see 640. Offered: AWSpS.

FAMED 657 P-Clinical Clerkship in Family Medicine — Pocatello (12) For description and prerequisite, see 640. Offered: AWSpS.

FAMED 658 P-Clinical Clerkship in Family Medicine — Sea Mar Clinic (12) For description and prerequisite, see 640. Offered: AWSpS.

FAMED 659 P-Clinical Clerkship in Family Medicine — Country Doctor (12) For description and prerequisite, see 640. Offered: AWSpS.

FAMED 660 P-Clinical Clerkship in Family Medicine — Yakima (12) For description and prerequisite, see 640. Offered: AWSpS.

FAMED 661 P-Clinical Clerkship in Family Medicine — Bremerton (12) For description and prerequisite, see 640. Offered: AWSpS.

FAMED 670 P-Advanced Preceptorship in Underserved WWAMI Area (*, max. 24) Students gain experience, knowledge, and skills needed to care for rural, specific ethnic or underserved populations in Washington, Wyoming, Alaska, Montana, and Idaho. Prerequisite: third- or fourth-year medical students, permission of course coordinator. Offered: AWSpS.

FAMED 671 P-Advanced Preceptorship in United States (*, max. 24) Supplemental experience in rural/urban practice or a family medicine department in a setting not already established through the family medicine curriculum. Prerequisite: third- or fourth-year medical students, permission of course coordinator. Offered: AWSpS.

FAMED 672 P-Advanced Preceptorship International (*, max. 24) For medical students desiring primary care experience abroad. Special project deals with influences of social, cultural, educational, and economic forces on health care delivery. Prerequisite: third- or fourth-year medical students, permission of course coordinator. Offered: AWSpS.
FAMED 673 P-Advanced Preceptorship at WWAMI Clinical Centers (*, max. 12) Supplementary experience in Family Medicine for late junior or senior medical students at selected WWAMI clinical centers. Prerequisite: completion of basic 6-week clerkship in Family Medicine. Offered: AWSpS.

FAMED 674 Advanced Interviewing in Primary Care (8) Emphasizes the learning of patient-centered interviewing and counseling skills necessary for effective practice of primary care medicine. Prerequisite: permission of course coordinator.

FAMED 675 P-Clinical Elective in Complementary and Alternative Medicine (8) Clinical elective for students interested in a better understanding of CAM. Includes four different weekly clinical placements with selected CAM providers in the community: naturopathic physician, chiropractor, acupuncturist, and massage therapist. Also includes a weekly two-hour seminar discussing the evidence supporting the use of alternative treatments.

FAMED 680 P-Traditional Indian Medicine Clerkship in Primary Care Setting (*, max. 16) Students learn how Western physicians collaborate with traditional Indian healers in the provision of health care to an urban Indian population. Prerequisite: completion of required third-year clerkship, UCONJ 530 or permission of instructor. Offered: AWSpS.

FAMED 681 P-Indian Health Care Clerkship (*, max. 16) Individually designed learning experience allows students to choose training opportunities, including Indian IHS Clinics, Tribal 538 Health Programs, and Public Health Program, Urban Indian Health programs, Tribal Council Health activities, and Tribal/IHS Alcoholism Treatment programs. Prerequisite: completion of required third-year clerkships, UCONJ 530, and permission of instructor. Offered: AWSpS.

FAMED 688 P-Family Medicine Subinternship (8) Students serve as interns for Family Medicine services at WWAMI with residency programs under the supervision of family medicine residents and attending physicians. Schedules mix inpatient and ambulatory experiences as determined by the site and the student has the same call as R-1 on service.

FAMED 698 P-Clinical Clerkship in Family Medicine, Away (12) For description and prerequisites, see 640. Offered: AWSpS.

FAMED 699 P-WWAMI Family Medicine Special Electives (*, max. 24) By special arrangement for qualified students, special clerkships or externships may be available at institutions other than the University of Washington located within the WWAMI region. Prerequisite: permission of course coordinator. Offered: AWSpS.

Genome Sciences

GENOME 261 Genomes and Society (4) NW Schivel Explores current technological advances in genome research and how these advances are impacting society. Topics include sequencing of the human genome, stem cell research, cloning, genetically modified foods, immunizations/public health, and genetic therapy. Appropriate for non-science majors. Offered: W.

GENOME 351 Human Genetics: The Individual and Society (4) NW Principles of Mendelian inheritance as illustrated by human traits and diseases; chromosomes and sex determination; distribution of genes in populations; natural selection and evolution; counseling and genetic engineering, ethical issues. Appropriate for non-science majors. Offered: W.

GENOME 371 Introductory Genetics (5) NW Covers gene transmission, including chromosomal mapping, gene frequency; mutation; analysis biological processes emphasizing mutations affecting chromosome transmission. Introduction to genomics—cloning and sequence analysis of whole genomes. Emphasizes formal genetic mechanisms and molecular techniques. For biological sciences majors. Prerequisite: minimum grade of 1.5 in BIOL 180; minimum grade of 1.5 in either BIOL 200 or BIOL 201; may not be repeated. Offered: AWSpS.

GENOME 372 Gene Structure and Function (5) NW Explores the structure of genes and genomes, the mechanism and control of transcription and translation; the molecular mechanisms of mutation, transposition and cancer, and the identification of human disease genes. Prerequisite: GENOME 371. Offered: W.

GENOME 373 Genomic Informatics (4) NW Focuses on methods for analyzing large genetic data sets and their application to biological problems, including sequence alignment and search methods, gene prediction, phylogenetic trees, and microarray analysis. Requires basic programming skills.

GENOME 411 Gene Action (5) NW Molecular genetics: discovery of the molecular genetics processes such as mutation, repair, genetic exchange, recombination, and gene expression. Use of genetic strategies to analyze complex biological processes. Focus is on prokaryotic organisms. Prerequisite: BIOL 201; either CHEM 223, CHEM 237, or CHEM 335. Offered: jointly with MICROM 411; W.

GENOME 414 Molecular Evolution (5) NW Survey of empirical approaches to the study of molecular evolution and ecology, drawing on examples from a variety of taxa and the recent literature. Topics include DNA sequencing and systematic fingerprinting approaches in behavioral ecology, and adaptive evolution at the molecular level. Prerequisite: BIOL 354. Offered: jointly with BIOL 414.

GENOME 453 Genetics of the Evolutionary Process (3) NW Contributions of genetics to the understanding of evolution. Processes of mutation, selection, and random genetic events as they affect the genetic architecture of natural populations and the process of speciation. Emphasis on experimental data and observation, rather than mathematical theory. Prerequisite: either GENOME 371 or GENOME 372.

GENOME 454 The Origins of Genetics (4) NW Discovery and eventual triumph of Mendelism in the early twentieth century. Concepts of heredity from ancient times to the nineteenth century. Mendel's work and rediscovery. Evidence contributing to cornerstone of classical genetics — the chromosome theory of heredity. Prerequisite: either GENOME 351, GENOME 371, or GENOME 372. Offered: A.

GENOME 465 Advanced Human Genetics (4) NW King, Olson Explores genetic analysis of naturally occurring variation in humans; origins and consequences of mutation, as mediated by selection, migration, population structure and drift; approaches to finding human genes and characterizing them at the molecular level; relevance of to other species to analysis of human genes. Prerequisite: GENOME 371; either GENOME 372 or BIOC 440. Offered: W.

GENOME 466 Cancer Genetics (3) NW Focuses on three types of cancer-related genetics. DNA repair, mitotic recombination, chromosome loss and imbalance, and other aspects of genomic instability. Metastatic cancer as an example of natural selection and evolution. Yeast and nematodes as models for the study of cancer genetics. Prerequisite: either GENOME 371 or GENOME 372. Offered: odd years.

GENOME 475 Debates in Genetics(3) Utilizes the original scientific literature as the basis for discussion of a range of genetic issues that impact society. Discussions are student-led; evaluations are based both on participation in class and on a research paper. Prerequisite: BIOL 200; either GENET 371 or GENOME 371.

GENOME 490 Undergraduate Seminar (2, max. 6) NW Seminar for advanced undergraduate students engaged in individual research projects or those who wish to gain an understanding of genetic research by analysis of the primary literature. Assignments emphasize the rationale for research projects and the presentation and interpretation of research findings. Offered: AWSpS.

GENOME 496 Peer Teaching Assistants in Genome Sciences (1-5, max. 5) Direct experience in the classroom teaching a discussion section for non-major in genome sciences courses. Peer teaching assistants attend lectures and weekly preparation meetings and gain in-depth background on the subject material. In addition, peer TAs are given training in teaching techniques and course preparation. Credit/no credit only. Prerequisite: GENOME 371.

GENOME 499 Undergraduate Research (*, max. 30) Credit/no credit only. Offered: AWSpS.

GENOME 501 Introduction to Research Materials (1-10) The student undertakes a research project in one of the research groups within the department for a quarter at a time. Credit/no credit only. Prerequisite: graduate standing in the Department of Genome Sciences or permission of graduate program coordinator. Offered: AWSpS.

GENOME 503 An Inquiry Approach to Teaching Genetics at the Introductory High School Level (2, max. 6) Provides advanced science content on topics in genetics and bioethics that are taught in secondary biology classrooms, as well as pedagogical strategies for conveying concepts to pre-college students. Workshop participation required.

GENOME 504 StarNet: Research Experiences for Students and Teachers (3, max. 9) Explores the scientific knowledge, technical skills, and pedagogical strategies related to teaching DNA sequencing and bioethics in a high school classroom. Workshop participation required.

GENOME 505 StarNet: Teacher Research Experience (9) Participating teachers carry out an independent research project in a University of Washington laboratory. Teachers, scientists,
and StarNet staff meet weekly for an informal research talk.

GENOME 506 The Science Education Partnership (5, max. 15) Provides secondary school teachers training in molecular biology, genetics and biotechnology, as well as resources and ongoing support designed to enhance biology instruction. Workshop participation required.

GENOME 520 Seminar (1, max. 15) Credit/no credit only. Prerequisite: graduate standing in the Department of Genome Sciences or permission of graduate program coordinator. Offered: A/Wsp.

GENOME 525 Current Literature in Human Genetics (1) Topics from current literature in human genetics. Students and faculty each present one topic per quarter. Credit/no credit only. Prerequisite: graduate or postdoctoral status. Offered: A/WSp.

GENOME 540 Introduction to Computational Molecular Biology: Genome and Protein Sequence Analysis (4) Algorithmic and probabilistic methods for analysis of DNA and protein analysis. Students must be able to write computer programs for data analysis. Prior coursework in biology and probability highly desirable. Prerequisite: permission of instructor. Offered: W.

GENOME 541 Introduction to Computational Molecular Biology: Molecular Evolution (4) Computational methods for studying molecular evolution. Students must be able to write computer programs for data analysis. Prior coursework in biology and probability highly desirable. Prerequisite: MBT/GENOME 540 or permission of instructor. Offered: W.

GENOME 547 Scientific Writing (1.5) For graduate students principally in their second and third year. Focuses on the preparation of research manuscripts for publication. Also considers other scientific writing such as thesis research manuscripts for publication. Also considers other scientific writing such as thesis proposals and fellowship and grant applications.

GENOME 549 Molecular Basis of Neurodegenerative Disease (2) La Spada, Muchowski, Pallanck Introduces a broad range of neurodegenerative diseases, focusing upon the approaches that have evolved to recent discoveries and emphasizing the elucidation of mechanisms and pathways of disease pathogenesis. Offered: jointly with NEUBHE 549/PHCOL 549; W.

GENOME 550 Methods and Logic in Genetics (3) Critical reading and detailed discussion of genetics-related scientific research papers. Material emphasizes methodological and logical themes of importance in modern genetics, for example: origin of mutants, genetic epistasis, pulse labeling, and in vivo gene function. Prerequisite: first-year genetics graduate students only. Offered: A.

GENOME 551 Mechanisms of Gene Regulation in Prokaryotes and Eukaryotes (1.5) &S A detailed examination of the mechanisms of transcription and translation in prokaryotes and eukaryotes as determined by experimental genetics, molecular biology and biochemistry.

GENOME 552 Technologies for Genome Analysis (1.5) Discussion of current and newly-emerging technologies in genome analysis with regard to applications in biology and medicine and to potential advantages and limitations. Prerequisite: permission of instructor. Offered: A.

GENOME 553 Advanced Genetic Analysis (1.5) Classical genetic analysis is a powerful approach to dissect complex biological processes. Selective removal, addition, or alteration of specific proteins to identify and order genes in a pathway, define protein function, determine tissue and temporal requirements for gene function, and distinguish among competing hypotheses to explain biological phenomena.

GENOME 554 Genomic Informatics (1.5) Many complete genome sequences are known. Each of these encodes the instructions for making an entire organism, but how can we hope to decipher the code? Focuses on methods for analyzing genome sequences, ranging from large-scale organismal pattern to gene prediction and detailed local alignment methods.

GENOME 555 Protein Technology (1.5) Focuses on current and emerging technologies and approaches in protein analysis, and considers applications of these technologies in biology, biotechnology and medicine. Prerequisite: BIOC 440; GENOME 551; GENOME 552; GENOME 553; GENOME 554.

GENOME 556 Developmental Genetics (1.5) Genetic control of early development in a range of organisms, emphasizing systems in which cellular, genetic, developmental and molecular approaches have combined to make significant contributions to understanding. Prerequisite: permission of instructor. Offered: W.

GENOME 557 Melosis (1.5) A comprehensive consideration of meiotic mechanisms emerging from genetic and molecular analysis of model organisms focuses on the molecular basis of chromosome synapsis, homologous recombination, and meiotic disjunction. The relationship of these mechanisms to the structure of the human genome and the analysis of complex traits are also considered.

GENOME 559 Introduction to Statistical and Computational Genomics (1.5) Rudiments of statistical and computational genomics. Emphasis on basic probability and statistics, introduction to computer programming, and relevant Web databases.

GENOME 561 Molecular Population Genetics and Evolution (1.5) Surveys recent literature to gain an understanding of the basic principles of molecular population genetics and evolution as applied to analysis of genome data. Requires some computer analysis of genome data.

GENOME 562 Population Genetics (4) Felsenstein Mathematical and experimental approaches to the genetics of natural populations, especially as they relate to evolution. Emphasis on theoretical population genetics. Prerequisite: permission of instructor. Offered: Sp.

GENOME 570 Phylogenetic Inference (3) Felsenstein Methods for inferring phylogenies (evolutionary trees) — biological assumptions, statistical foundations, and computational methods. A comprehensive introduction for graduate students in the biological sciences to phylogenetic methods using data from molecular sequences, continuous and discrete characters, and gene frequencies. Prerequisite: introductory courses in evolution and in statistics. Offered: alternate years; Sp.

GENOME 576 Genetic and Genomic Analysis of Bacteria (1.5) in-depth coverage of genetic and genomic strategies used to analyze complex biological processes in bacteria. Focuses on general approaches, with examples drawn from studies of pathogenic organisms where possible. A combination of lectures and seminar-style discussions of primary literature.

GENOME 580 Ethics in Biomedical Research and Teaching (1) Explores ethical issues in research and teaching and discusses avenues of responsible conduct.

GENOME 582 Seminar in Mouse Genetics (1) Braun Discussion of contemporary research in and novel methods for genetic, cell biological, and molecular analysis of mammalian development, with utilization of transgenic techniques. Credit/no credit only. Offered: A/WSp.

GENOME 583 Seminar in Molecular Cytology (1) Byers Discussions of contemporary research in and novel methods for genetic, cell biological, and molecular biological analysis of spindle behavior in the mitotic cell cycle of budding yeast. Credit/no credit only. Offered: A/WSp.

GENOME 584 Seminar in DNA Replication (1) Brewer, Fangman Discussions of contemporary research in and novel methods for genetic, cell biological, and molecular biological analysis of budding yeast, with emphasis on the mechanisms and control of DNA replication. Credit/no credit only. Offered: A/WSp.

GENOME 585 Seminar in Bacterial Genetics (1) Manoil Discussions of contemporary research in and novel methods for genetic, cell biological, and molecular biological analysis of bacterial assembly mechanisms, with emphasis on the topogenesis of membrane proteins. Credit/no credit only. Offered: A/WSp.

GENOME 586 Seminar in Mammalian Genetics (1) Sibley Discussions of contemporary research in and novel methods for genetic, cell biological, and molecular biological analysis of mammalian genetics, with emphasis on lymphoblast development. Credit/no credit only. Offered: A/WSp.

GENOME 587 Seminar in Nematode Genetics (1) Thomas Discussions of contemporary research in and novel methods for genetic, cell biological, and molecular biological analysis of nematode development, with emphasis on neurogenesis and other developmental processes. Credit/no credit only. Offered: A/WSp.

GENOME 590 Population Genetics Seminar (1) Felsenstein Weekly presentation by participants of current literature and ongoing research in evolution, molecular evolution, evolutionary genetics of natural populations, human population genetics, and quantitative genetics applied to animal and plant breeding. Credit/no credit only. Prerequisite: GENOME 562 or permission of instructor.

GENOME 599 Special Topics in Molecular Biotechnology (*, max. 12) Prerequisite: permission of instructor. Offered: A/WSp.

GENOME 600 Independent Study or Research (*) Credit/no credit only. Offered: A/WSp.
Human Biology

HUBIO 500 P-Medical Practice Preceptorship at WWAMI Sites (1, max. 3) Personal experience with, and insight into, medical practice situations. Student is stationed with carefully selected clinical faculty members in their offices in accordance with the student's preferences. Must have completed 4 semesters at the WWAMI site. Registration limited to first-year medical students at WWAMI sites. Offered: AWSpS.

HUBIO 501 P-Human Biology Special Projects (*) MacLaren Designed for medical students electing a special study project related to the Introduction to Clinical Medicine or other human biology courses, which are offered during the first and second years in the School of Medicine. Primarily intended for students in remedial or extended programs. Prerequisite: permission of assistant dean for curriculum. Offered: AWSpS.

HUBIO 505 P-WWAMI Preceptorship (1) Opportunity for first-year medical students at WWAMI sites to gain personal experience with medical practice situations by being assigned to selected clinical faculty members in their offices. Offered: AWSpS.

HUBIO 511 P-Gross Anatomy and Embryology (8/13, max. 13) Clark Structural organization of human body at the macroscopic level to provide a foundation for physical examination and functional assessment of the human organism. Integrates embryological development with study of the cadaver and examination of the normal living body. Concentrates on exploration of the body cavities and the viscera they contain. Offered: A.

HUBIO 512 P-Mechanisms in Cell Physiology (5) Detweiler Physiology of the cell membrane, including ionic and electrical potential gradients; active transport, excitability, and action potentials; biophysics of sensory receptors; neuromuscular transmission; muscle energetics and contractility; spinal reflexes and central synaptic transmission; autonomic nervous system; energy metabolism and temperature regulation; epithelial transport; gastrointestinal motility and secretions. Offered: A.

HUBIO 513 P-Introduction to Clinical Medicine (3) Goldstein Instruction in communication skills and interview techniques to form the basis for the doctor-patient relationship and for the skills of communicating with patients. The patient profile is obtained. Attention to developing comfort in the physician role. Offered: A.

HUBIO 514 P-Biochemistry I-A (4) Maizels Classical molecular and cellular biochemistry, cellular physiology and molecular genetics. Metabolic interrelationships as they occur in the individual stressed and related to disturbances in disease states. Offered: A.

HUBIO 516 P-Systems of Human Behavior I-A (3-4) Murray, Walker Effects of behavioral factors in major management problems faced in medical practice relating to cultural background, social role, sexual identity, and belief systems. Acquisition of skills in analyzing behavior, defining objectives, and designing precise treatment strategies. Offered: A.

HUBIO 520 P-Molecular and Cellular Basis of Disease (6) Norwood Patterns of cell and tissue response to injury; Mechanisms of cell injury, the inflammatory process, immunology, immunopathology, thrombosis, normal and abnormal growth, neoplasia, clinico-pathological correlation. Offered: W.

HUBIO 522 P-Introduction to Clinical Medicine (4-5) Goldstein Medical history is introduced and instruction in data collection is begun. Experience in conducting medical interviews with patients to obtain the medical history and patient profile. Special problems related to interviewing are addressed. Offered: W.

HUBIO 523 P-Introduction to Immunology (2) Wilson Basic concepts such as antigens; antibodies; complement; B- and T-lymphocyte function, including interactions with each other and with accessory cells; immunological tolerance; major histocompatibility complex; and role of these basic concepts in immunopathology (immunodeficiencies, hypersensitivities, autoimmunity, blood transfusion, and transplantation). Offered: W.

HUBIO 524 P-Biochemistry I-B (4) Maizels Classical molecular and cellular biochemistry, cellular physiology and molecular genetics. Metabolic interrelationships as they occur in the individual stressed and related to disturbances in disease states. Offered: W.

HUBIO 526 P-Systems of Human Behavior I-B (2) Johnston, Walker Effects of behavioral factors in major management problems faced in medical practice relating to cultural background, social role, sexual identity, and belief systems. Acquisition of skills in analyzing behavior, defining objectives, and designing precise treatment strategies. Offered: W.

HUBIO 530 P-Clinical Epidemiology and Evidence-Based Medicine (2) Kestenbaum Community health and disease, including assessment of disease risk and mechanisms of epidemic detection, spread, and control; interpretation of research design, data analysis, bias source; and clinical epidemiology, including evaluation and application of diagnostic tests, natural history of disease, and quantitative aids for clinical decision making. Offered: W.

HUBIO 531 P-Head, Neck, Ear, Nose, and Throat (5) .

HUBIO 532 P-Nervous System (8) Dacey, Mulligan An integrated approach to the normal structure and function of the nervous system, including the eye. Presents neuropathological examples as well as clinical manifestations of neurological disease.

HUBIO 535 P-Introduction to Clinical Medicine (4) Goldstein Adult screening physical examination is taught through the use of lecture, audiovisual aids, and small-group tutorial, where students in supervised setting practice the physical examination on one other. Further practice in the performance and recording of the patient profile and medical history. Offered: Sp.

HUBIO 540 P-Cardiovascular System (6) Feig Interdisciplinary approach to cardiovascular medicine, including anatomy, physiology, radiology, pathology, medicine, and surgery. Function of the cardiovascular system in health and disease. Offered: A.

HUBIO 541 P-Respiratory System (4) Culver Interdisciplinary approach to the respiratory system, including anatomy of thorax and lungs, ventilation mechanics, blood-gas transport, gas exchange, acid-base balance, and the physiology and pathology of obstructive, restrictive, and pulmonary-vascular diseases. Offered: A.

HUBIO 542 P-Introduction to Clinical Medicine (4-5) Goldstein Advanced instruction in interview technique, history taking, and physical examination, with emphasis on detection of abnormalities. Offered: A.

HUBIO 543 P-Principles of Pharmacology (1) Vincenzi Includes general principles of pharmacology and the specific pharmacology of major drugs acting on the autonomic and cardiovascular systems. Offered: A.

HUBIO 544 P-Endocrine System (3) Anawalt Normal, gross, and microscopic anatomy and physiology of the endocrine system. Illustrations examining the clinical relevance of homeostasis, feedback, and other controlling mechanisms previously learned. Endocrine integration of metabolism. Clinically important endocrine pathophysiology. Offered: A.

HUBIO 546 P-Systemic Pathology (4) Schmidt Multidisciplinary approach to some diseases that affect more than one organ system (nervous, cardiovascular, respiratory) and that are caused by different mechanisms (congenital, inflammatory, vascular, traumatic, metabolic, neoplastic). Offered: Sp.

HUBIO 550 P-Introduction to Clinical Medicine (4-5) Goldstein Advanced instruction in interview technique, history taking, and physical examination, with emphasis on identification of problems and correlation of findings with pathophysiological mechanisms. Offered: W.

HUBIO 551 P-Gastro-Intestinal System (4) Saunders Anatomy of the gastrointestinal system; physiology and pathology of digestion and hepatic function; and physical and laboratory examination. Offered: W.

HUBIO 552 P-Hematology (3) Becker Familiarizes students with the basic pathophysiologic mechanisms leading to disturbances of red cell, white cell, and platelet production, as well as abnormalities of hemostasis presenting clinical problems. Pathophysiology, rather than minute details of individual disease, is stressed. Offered: W.

HUBIO 553 P-Musculoskeletal System (4) Schmale Gross, surface, applied, and radiographic anatomy. Clinical manifestations in the
HUBIO 554 P-Genetics (2) Horwitz Review of basic genetic principles and their applications in clinical medicine. Includes human chromosomal disorders; patterns of inheritance, genetic counseling, amniocentesis; pathogenesis of hereditary diseases, monogenic and multifactorial; role of genetics in common diseases; behavioral genetics; drug-gene interactions; and prevention and treatment of genetic diseases, including prenatal diagnosis and population screening. Offered: A.

HUBIO 555 P-Medicine, Health, and Society (3) Harris Interdisciplinary introduction to health services designed for future health care practitioners. Examines the history, organization, and effectiveness of the U.S. health care system. Stresses the student's ability to adopt a broad perspective across health care disciplines and traditional boundaries. Offered: W.

HUBIO 559 P-Problem Based Learning (3) Teitz Teaches students to methodically solve medical problems by gathering, sorting, and interpreting data. Students learn life-long self-education and self-evaluation skills. Provides practice working as a health care team by including medical, nursing, and physician assistant students in each group. Offered: W.

HUBIO 562 P-Urinary System (4) Ryan Anatomy, physiology, and pathology of the kidney, ureter, bladder, and prostate; pathophysiology and treatment of common fluid and electrolyte problems; renal pharmacology; major clinical urinary system syndromes, with current diagnostic approaches and therapy. Offered: Sp.

HUBIO 563 P-Brain and Behavior (3) Pascua Major psychiatric disorders are defined and described, and a systematic approach to differential diagnosis is presented. Conceptual development, pathogenesis, epidemiology, nomenclature, and the terminology used in psychiatry are discussed. Offered: Sp.

HUBIO 564 P-Principles of Pharmacology II (3) Chavkin Lectures and conferences on drugs that act on the central nervous system. Emphasis on physiological and biochemical mechanisms, with consideration of therapeutic and adverse effects. Offered: Sp.

HUBIO 565 P-Reproduction (4) Steiner Normal development of the human reproductive system. Sexual differentiation, puberty, endocrine control of testicular and ovarian function, gamete biology, fertilization, implantation, immunology and endocrinology of pregnancy, labor and delivery, pathology of the male and female reproductive organs, contraception, prolactin and lactation, aging and infertility. Offered: Sp.

HUBIO 567 P-Skin System (2) Colven Gross and microscopic anatomy. Physiology, protection, temperature control, pigmentation, and photosensitivity. Pathology and genetics of skin abnormalities, including tumors. Introduction to clinical evaluation, including physical examination and illustrating examples of inflammatory, vascular, immunological (including drug hypersensitivity), and neoplastic diseases. Offered: A.

HUBIO 568 Clinical Nutrition (1) Lipkin Principles and practice of clinical nutrition, including role of nutrients in normal growth and development, pathogenesis of chronic disease, and nutrition in the management of certain disease states. Offered: Sp.

HUBIO 590 P-Introduction to Critical Reading and Evaluation of the Medical Literature (1) Wolf An introduction to methods for identifying and retrieving Web-based high quality, relevant evidence, and to methods for describing and applying rigorous criteria when reading primary research studies or reviewing primary studies that report on the effectiveness of therapeutic or preventive interventions. Prerequisite: first-year medical student standing. Offered: W.

HUBIO 596 P-Non-Clinical Selectives II (*). Offered: W.

HUBIO 597 P-Independent Investigative Inquiry (8) Independent research with faculty sponsor and completion of paper in fulfillment of the independent investigative inquiry graduation requirement. Offered: Sp.

HUBIO 598 P-Non-Clinical Selectives II (*). Courses offered at WWAMI university sites designed to satisfy the non-clinical selective graduation requirement for medical students. Offered: AWSp.

HUBIO 599 P-Independent Study in Medical Science (6) Marshall Independent research with faculty sponsor and completion of paper as partial fulfillment of non-clinical selective graduation requirement. Offered: Sp.

HUBIO 600 PA-Capstone Course: Preparation for Residency (2, max. 4) Norris A combination of large group lectures and small group discussions and workshops reviewing clinical skills in history-taking and physical examinations, imaging studies, common and emergency drugs, ACLS, infectious disease control, common clinical problems, and other topics that are encountered in residency training. Offered: Sp.

Immunology

IMMUN 441 Introduction to Immunology (4) NW General properties of immune responses; cells and tissues of immune system; lymphocyte activation and specificity; effector mechanisms; immunity to microbes; immunodeficiency and AIDS; autoimmune diseases; transplantation. Prerequisite: either BIOL 220 or BIOL 202; may not be repeated; recommended: GENET 371, GENET 372, BIOL 405, or BIOL 440. Offered: jointly with MICROM 441; A.

IMMUN 499 Undergraduate Research (*, max. 24) Investigative work on a variety of topics, including mechanisms of antigen recognition, T-cell development and differentiation, immunogenetics, lymphocyte activation, MHC gene structure and function, retrovirology, and the pathogenesis of autoimmune diseases, among others. Prerequisite: permission of instructor. Offered: AWSp.

IMMUN 532 Advanced Immunology (4) Examines the molecular and cellular basis of immune function. Students must have completed a baccalaureate degree in a biological specialty and be conversant with molecular genetics. Topics include: hematopoiesis, antigen receptor structure, lymphocyte development, antigen presentation, and cytokines. Offered: W.

IMMUN 533 Host Defense to Cancer (2) Clark, Mccune Addresses the mechanisms of cellular homeostasis, balancing cells of immune system, programmed cell death, immune surveillance, cancer immunotherapy. Companion course with IMMUN 535. Prerequisite: graduate standing in immunology; other graduate students with permission of instructor. Offered: odd years, Sp, weeks 1-5.

IMMUN 534 Central Issues in Immunology, (2, max. 4) Presentations by participants of topics relating to the broad study of immunology. Prerequisite: graduate standing in Immunology. Offered: Sp.

IMMUN 535 Host Defense to Infection (2) Clark, Mccune Addresses the mechanisms protecting against pathogens that infect patients with cancers; immune regulation; new developments in vaccines. Companion course with IMMUN 533. Prerequisite: graduate standing in Immunology; other graduate students with permission of instructor. Offered: even years, Sp, weeks 1-5.

IMMUN 411 Current Research Conferences Weekly group conferences concerning ongoing graduate students and postdoctoral research in immunology. Students may register for more than one conference each quarter.

IMMUN 550 Selected Topics in Immunology (1, max. 30) Formal seminar-discussion course for advanced students focused on recent developments in the field and consisting of literature research and intensive in-depth study of important and timely topics. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSp.

IMMUN 551 Regulation of T Cell-Dependent B Cell Maturation (1, max. 30) Clark Credit/no credit only. Prerequisite: graduate standing in Immunology. Offered: AWSp.

IMMUN 552 Immunogenetics and Autoimmunity (1, max. 30) Concannon Credit/no credit only. Prerequisite: graduate standing in Immunology. Offered: AWSp.

IMMUN 553 Recombination and Repair in B Cell Development (1, max. 30) Maizels Weekly group conferences concerning ongoing graduate students and postdoctoral research in immunology. Students may register for more than one conference each quarter. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSp.

IMMUN 554 Immunogenetic Aspects of Human Autoimmunity (1, max. 30) Nepom Credit/no credit only. Prerequisite: graduate standing in Immunology. Offered: AWSp.

IMMUN 555 Model of Autoimmune Disease and Their Regulation (1, max. 30) Goverman Credit/no credit only. Prerequisite: graduate standing in Immunology. Offered: AWSp.

IMMUN 556 Research in Conference in Regulation of Autoimmunity and Allergic Inflammation (1, max. 30) Ziegler Weekly group conferences concerning ongoing graduate student and postdoctoral research in immunology. Students may register for more than one conference each quarter. Credit/no credit only.
Prerequisite: immunology graduate students only; permission of instructor. Offered: AWSpS.

IMMUN 557 Thymic Environment (1, max. 30) Farr Credit/no credit only. Prerequisite: standing in Immunology. Offered: AWSpS.

IMMUN 558 Research Conference in Apoptosis and Autoimmunity (1, max. 30) Elkon Weekly group conferences concerning ongoing graduate student and postdoctoral research in immunology. Students may register for more than one conference each quarter Credit/no credit only. Prerequisite: immunology graduate students only; permission of instructor. Offered: AWSpS.

IMMUN 559 Cytokine Gene Regulation (1, max. 30) Elkon Cytokine Gene Regulation. Credit/no credit only. Prerequisite: standing in Immunology. Offered: AWSpS.

IMMUN 560 Progress in T Cell Research (1, max. 30) Bevan, Fink, Rudensky Cytokine Gene Regulation Credit only. Prerequisite: standing in Immunology. Offered: AWSpS.

IMMUN 561 Mechanisms of Peripheral Tolerance (1, max. 30) Fink Cytokine Gene Regulation credit only. Prerequisite: standing in Immunology. Offered: AWSpS.

IMMUN 562 Developmental Regulation of T Cell Function (1, max. 30) Wilson Cytokine Gene Regulation credit only. Prerequisite: standing in Immunology. Offered: AWSpS.

IMMUN 563 Macrophage Biology: Signaling and Phagocytosis (1, max. 30) Adar and no credit only. Prerequisite: standing in Immunology. Offered: AWSpS.

IMMUN 564 Cellular/Molecular Regulation of T Cell Responses (1, max. 30) Greenberg Cytokine Gene Regulation credit only. Prerequisite: standing in Immunology. Offered: AWSpS.

IMMUN 565 Signaling and Costimulatory Regulation of T Cell Function (1, max. 30) Dong Weekly group conferences concerning ongoing graduate student and postdoctoral research in immunology. Students may register for more than one conference each quarter Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSpS.

IMMUN 566 Role of Innate Mechanisms in Generation and Maintenance of Protective Immune Memory (1, max. 30) Kaj Pertaining to important topics. Credit/no credit only. Prerequisite: standing in Immunology. Offered: AWSpS.

IMMUN 567 Antigen Processing and Presentation (1, max. 30) Rudensky Cytokine Gene Regulation credit only. Prerequisite: standing in Immunology. Offered: AWSpS.

IMMUN 568 Antibody Structure and Function (1, max. 30) Foote Cytokine Gene Regulation credit only. Prerequisite: standing in Immunology.

IMMUN 569 Genetics of Diabetes (1, max. 30) Lernmark Cytokine Gene Regulation credit only. Prerequisite: standing in Immunology.

IMMUN 570 Cytokine Signaling in Lymphocytes (1, max. 30) Nelson Cytokine Gene Regulation credit only. Prerequisite: standing in Immunology.

IMMUN 571 Research Conference in Development and Activation of B Cells (1, max. 30) Rawlings Weekly group conferences concerning ongoing graduate student and postdoctoral research in immunology. Students may register for more than one conference each quarter Credit/no credit only. Prerequisite: immunology graduate students only; permission of instructor. Offered: AWSpS.

IMMUN 572 Research Conference in Signal Transduction in B-Cells (1 max. 30) Scharenberg Weekly group conferences concerning ongoing graduate student and postdoctoral research in immunology. Students may register for more than one conference each quarter Credit/no credit only. Prerequisite: immunology graduate students only; permission of instructor. Offered: AWSpS.

IMMUN 573 Immunology Seminar Series (1, max. 30) Weekly discussion in which original research results are presented and discussed. Emphasis is on new and original contributions to field of immunology and related areas; occasional seminars are concerned with review of important topics. Credit/no credit only. Prerequisite: firm background in immunology, permission of instructor. Offered: AWSpS.

IMMUN 574 Research Conference in Kaposi's Sarcoma-Associated Herpesvirus: Interactions with B-Cells and Endothelial Cells (1, max. 30) Lagunoff Weekly group conferences concerning ongoing graduate student and postdoctoral research in immunology. Students may register for more than one conference each quarter Credit/no credit only. Prerequisite: immunology graduate students only; permission of instructor. Offered: AWSpS.

IMMUN 575 Research Conference in Infection and Immunity (1, max. 30) Bevan Weekly group conferences concerning ongoing graduate student and postdoctoral research in immunology. Students may register for more than one conference each quarter Credit/no credit only. Prerequisite: immunology graduate students only; permission of instructor. Offered: AWSpS.

IMMUN 576 Transcriptional Regulation in the Immune System (1, max. 30) Weinmann Credit no credit only. Prerequisite: standing in Immunology. Offered: AWSpS.

IMMUN 577 Lymphocyte Homing and Function (1, max. 30) Campbell Cytokine Gene Regulation credit only. Prerequisite: standing in Immunology. Offered: AWSpS.

IMMUN 578 Immunology and the Pathogenesis of Tuberculosis (1, max. 30) Ramakrishnan Cytokine Gene Regulation credit only. Prerequisite: standing in Immunology. Offered: AWSpS.

IMMUN 579 Costimulation and Autoimmune Disease (1, max. 30) Latchman Cytokine Gene Regulation credit only. Prerequisite: standing in Immunology. Offered: AWSpS.

IMMUN 580 Doctoral Dissertation (*) Credit/no credit only. Offered: AWSpS.

IMMUN 800 Doctoral Dissertation (*) Credit/no credit only. Offered: AWSpS.

IMMUN 567 Antigen Processing and Presentation (1, max. 30) Rudensky Cytokine Gene Regulation credit only. Prerequisite: standing in Immunology. Offered: AWSpS.

Laboratory Medicine

LAB M 321 Medical Technology: Introductory Clinical Hematology (6) McDonnell Lecture and laboratory coverage of theoretical and practical aspects important in the evaluation of blood cells, to include their production, morphology, function, and associated pathology. Instrumentation used in testing included, as well as quality control and quality assurance issues. Offered: W.

LAB M 322 Medical Technology: Introductory Clinical Chemistry (5) Chen-Levy Lecture and laboratory covering the theoretical and practical concepts associated with testing procedures performed in clinical chemistry. Offered: A.

LAB M 418 Topics in Clinical Chemistry (5) Chen-Levy Continuation of LAB M 322. Lecture and laboratory exercises covering fundamentals of instrumentation and methodology in the clinical chemistry laboratory. Offered: Sp.

LAB M 419 Clinical Coagulation (4) McDonnell Lecture and laboratory coverage of the theory of the hemostatic system, to include tests used in the diagnosis/monitoring of patients with abnormal bleeding and/or thrombosis. Instrumentation as appropriate for testing included. Quality control and quality assurance discussed. Offered: S.

LAB M 420 Laboratory Analysis of Urine and Body Fluids (3) Wilcock Lecture and laboratory covering urinalysis testing procedures and associated disease entities. Analysis of other body fluids. Methods of microscopic examination by use of bright-field, phase, and polarizing microscopy. Offered: S.

LAB M 421 Medical Microbiology (1/6, max. 6) Goodyear Lecture and laboratory coverage of human infections and diagnostic procedures used for isolation, identification, and antimicrobial susceptibility testing of the microorganisms associated with disease. Offered: S.

LAB M 423 Clinical Chemistry (1, max. 24) Wilcock Clinical testing using automated and manual methods. Measurement of pancreatic function and intestinal absorption, renal and liver function, enzymes, electrolytes, blood gases, lipids, toxicology, urinalysis, endocrinology, and immunology. Offered: AWSpS.

LAB M 424 Clinical Microbiology (1, max. 24) Goodyear Techniques used in the diagnostic microbiology laboratory, including quality control, specimen evaluation, identification of pathogenic microorganisms, and antimicrobial susceptibility testing. Offered: AWSpS.

LAB M 425 Clinical Hematology (1, max. 24) McDonnell Clinical study of techniques used in the diagnostic evaluation of blood cells, including production, proliferation, survival, morphologic, and functional features. Assessment of proteins and cells important in hemostasis included. Quality control and quality assurance issues considered. Biomolecular techniques appropriate for evaluation of the hematologic and hemostatic systems discussed. Offered: AWSpS.

LAB M 426 Clinical Immunohematology (1, max. 24) Nestor Lecture and laboratory covering theory of transfusion medicine and serological procedures used in the evaluation of cellular
antigen systems. Principles of immunology and genetics included as appropriate for the techniques performed; screening of donor units to provide a safe product discussed. Quality control and quality assurance issues considered. Offered: W.

LAB M 427 Selected Studies in Laboratory Medicine (*, max. 24) Lampe Selected clinical study in the major scientific disciplines of laboratory medicine, to include molecular diagnostics, or pursuance of a clinical research study. Credit/no credit only. Offered: AWSpS.

LAB M 499 Undergraduate Research (*) Specific project in clinical laboratory investigation. Offered: AWSpS.

LAB M 502 Laboratory Medicine Grand Rounds (1, max. 6) Fine Grand rounds are concerned with current topics in the field of laboratory medicine. Credit/no credit only. Offered: AWSp.

LAB M 510 Laboratory Medicine Research Seminar (1, max. 6) Tait Presentation and discussion of ongoing research and development projects by faculty, residents, fellows, and graduate students. Open to graduate students in laboratory medicine and other medical sciences. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSp.

LAB M 520 Seminar in Organization and Management in Laboratory Medicine (3) Chandler Core course for the Master of Science degree in laboratory medicine. Prerequisite: graduate student standing in laboratory medicine or permission of instructor. Offered: odd years; Sp.

LAB M 521 Advanced Laboratory Hematology (1, max. 6) Sabath Lectures on diagnostic clinical hematology with emphasis on clinico-pathological correlation. For laboratory medicine graduate students with special interest in diagnostic clinical hematology. Prerequisite: graduate standing and permission of instructor. Offered: AWSp.

LAB M 522 Hematopathology Seminar (2) Wood Identification of normal lymphocyte and bone marrow subpopulations, diagnosis of leukemia, lymphomas, and benign conditions that resemble them. Emphasis on histopathology, cytochemical, immunological, and molecular markers. Clinico-pathologic correlation. Offered: jointly with PATH 522; even years; W.

LAB M 590 P-Research Projects in Laboratory Medicine (*) Tait Opportunity for laboratory experience on a research problem related to laboratory medicine. Students investigate areas of potential clinical importance. Projects selected from areas such as chemistry, coagulation, hematology, immunology, microbiology, virology, molecular diagnostics, and computer applications. Research goals established by instructor in discussion with student. Prerequisite: permission of instructor. Offered: AWSpS.

LAB M 601 Internship (3-9, max. 9) Credit/no credit only. Prerequisite: graduate standing in laboratory medicine. Offered: AWSpS.

LAB M 680 P-Clinical Laboratory Testing: Methods and Interpretation (*) Werner Provides the third- and fourth-year medical student with the opportunity to evaluate clinical laboratory data in the clinical laboratory setting. One-on-one teaching using case material and actual clinical samples. Offered: AWSpS.

LAB M 685 P-Laboratory Case Studies for Clinical Diagnosis (4) Atoll Clinical case presentations and discussions aimed at test selection, disease-induced alterations, efficient algorithms, factors confounding interpretation, testing economics. Prerequisite: completion of required clerkships. (Four weeks half-time) Offered: A.

LAB M 699 P-WWAMI Laboratory Medicine Special Electives (*, max. 24) By special arrangement for qualified students, special clerkships or externships may be available at institutions other than the University of Washington located within the WWAMI region. Prerequisite: permission of department.

LAB M 700 Master's Thesis (*) Credit/no credit only. Offered: AWSpS.

MEDEX Northwest

MEDEX 450 Basic Science in Clinical Medicine for PAs (6) Evans Stoll Intensive review course on important basic science concepts relevant to clinical medicine at the physician assistant level. Topics covered include cell biology, microbiology, genetics and immunity. Prerequisite: admission to the MEDEX Program. Offered: S.

MEDEX 451 Anatomy and Physiology for the MEDEX Practitioner (6) Caudwell, Landel Anatomy and physiology of the following organ systems: H&E, respiratory, cardiovascular, gastrointestinal, reproductive, renal, musculoskeletal, and neurologic. Required for entering students to the MEDEX program who have not satisfied program prerequisites in anatomy and physiology. Offered: S.

MEDEX 453 Basic Clinical Skills for the MEDEX Practitioner (5) Coup Provides the student with mastery of a screening history and physical examination and thoroughness in data-collection skills. Branching examinations of major organ systems and medical record-keeping and verbal presentation skills by the problem-oriented method are taught. Offered: A.

MEDEX 454 Adult Medicine I (1) Coup, Evans Problem-oriented approach to the diagnosis and management of common primary care conditions. Introduction to relevant laboratory and radiological procedures. Organ system approach. Offered: W.

MEDEX 456 Maternal and Child Health for the MEDEX Practitioner (1) Plummer Designed to acquaint students with principles of prenatal care and primary-care pediatrics. Offered: W.

MEDEX 457 Behavioral Medicine I (2) Lurie Process skills and interpersonal skills needed for primary-care practice, assessment skills needed for the diagnosis of emotional problems, and management skills used in primary-care practice to deal with these problems. Offered: A.

MEDEX 458 Behavioral Medicine II (2) Lurie In-depth coverage of common emotional problems seen in primary care. Offered: W.

MEDEX 460 Principles of Patient Management for the MEDEX Practitioner I (3) Stoll Systematic approach to patient management applicable to a primary-care setting. Majority of course is devoted to drug therapy and its administration. The other half includes health maintenance, risk factor identification, and nonpharmacological models of therapy. Offered: W.

MEDEX 461 Principles of Patient Management for the MEDEX Practitioner II (3) Stoll Continuation of 460. Offered: Sp.

MEDEX 463 Clinical Clerkships for the MEDEX Practitioner I (19) Scott Full-time clinical clerkship spent in institution-based or specialty practice settings, with emphasis on inpatient medicine. Credit/no credit only. Offered: AWSpS.

MEDEX 465 Clinical Clerkships for the MEDEX Practitioner II (19) Plummer Continuation of clinical clerkships spent in institution-based or specialty practice settings, with emphasis on inpatient medicine. Credit/no credit only. Offered: AWSpS.

MEDEX 466 Family Practice Clerkship for the MEDEX Practitioner I (19) Ballweg Family practice under the supervision of physicians throughout the Pacific Northwest. Common primary-care problems. Students and preceptors are educated in the utilization and management of the physician assistant in practice. Students keep computerized records of patient encounters and complete a variety of written assignments. Credit/no credit only. Offered: AWSpS.

MEDEX 467 Family Practice Clerkship for the MEDEX Practitioner II (19) Flynn Further experience in primary-care practice with emphasis on independent patient management by the student supervised by family practitioners. Credit/no credit only. Offered: AWSpS.

MEDEX 468 Emergency Medicine I for the MEDEX Practitioner (2) Landel Approach to the diagnosis and management of common emergency conditions for primary care physician assistants. Organ system approach. Offered: W.

MEDEX 470 PA Role Course I (1) Ballweg Introduction to the history, current status and future development of the PA profession. Description and discussion of state medical practice acts and reimbursement status. Other course topics are the roles of physicians and nurse practitioners. Offered: A.

MEDEX 471 PA Role Course II (1) Ballweg Continuation of MEDEX 470. Health access issues, health care politics and managed care issues. Offered: W.

MEDEX 472 PA Role Course III (1) Ballweg Continuation of MEDEX 471. Focuses on health care issues for specific underserved populations. Cross-cultural simulations introduce course
concepts. Students work in small groups and present their findings to fellow students. Offered: Sp.

**MEDEX 473 Technical Skills I (1) Coerver** Introduces clinical skills and procedures through hands-on experiences to physician assistant students. Offered: A.

**MEDEX 474 Technical Skills II (1) Coerver** Introduces clinical skills and procedures through hands-on experiences to physician assistant students. Continuation of Technical Skills I. Offered: W.

**MEDEX 475 Technical Skills III (1) Coerver** Introduces clinical skills and procedures through hands-on experiences to physician assistant students. Continuation of Technical Skills II. Offered: Sp.

**MEDEX 499 Special Field Projects/Independent Study (1-12, max. 12)** Clerkships and independent study activities for students enrolled in the MEDEX Northwest Physician Assistant Program. Credit/no credit only. Offered: AWSpS.

**Medical Education and Biomedical Informatics**

**MEBI 499 Undergraduate Research (*, max. 12)** Investigative research or directed readings in medical education and in biomedical and health informatics. Prerequisite: permission of instructor.

**MEBI 510 Topics in Medical Education Research (1/3, max. 12)** Selected research topics in medical education. Development of skills in critical analysis and production of original research. Optional: 1 additional credit for seminar focusing on application of issues in education practice. Credit/no credit only. Offered: AWSpS.

**MEBI 511 Current Issues in Medical Education (2) Doehner, Robins, Scott, Wolf** Addresses current issues in medical education in the context of historic and contemporary developments. Topics include curriculum development, teaching, and learning, clinical knowledge and reasoning, assessment, professional development, program evaluation, and certification. Offered: A.

**MEBI 512 Leadership in Academic Medicine (1) Doehner, Robins, Scott, Wolf** Explores the theoretical and practical aspects of leadership in academic medicine. Topics include qualities of effective leadership, leadership styles, and impact of institutional organization and culture on leadership. Prerequisite: permission of instructor. Offered: S.

**MEBI 520 Teaching Methods in Medical Education (2) Ambrozey** Empirical and theoretical merits of different teaching methods as applied to medical education. Structuring and leading group discussions, using questions, organizing and delivering lectures, identifying styles of clinical supervision, providing constructive feedback, and presenting effective clinical demonstrations. Offered: W.

**MEBI 521 Evaluation of Learning in the Health Sciences (3) Carlile** Basic issues and methods for evaluation of learning: cognitive performance, psychomotor skills, and reasoning abilities in classroom, laboratory, and clinical settings. Practical applications of instruments such as multiple-choice questions, essays, oral examinations, checklists, rating scales, simulations, and patient management problems. Recommended: 520. Offered: Sp.

**MEBI 522 Research in Medical Education (2) Scott** Individualized, problem-based overviews of research methods and research design pertinent to research and scholarship in medical education. Development and sequencing of research projects from conceptualization through literature review, fixed and random-effects models, and guidelines for appraising published systematic reviews/meta-analyses. Prerequisite: introductory level courses in statistics, epidemiology or biostatistics. Prerequisite: permission of instructor. Offered: jointly with HSERV 529: Sp.

**MEBI 530 Medical Informatics (3) Masuda** Overview of biomedical and health informatics concepts, theories, and applications, including the historical evolution and the current and future research directions within the context of information flow in health care settings. Offered: A.

**MEBI 532 Computing Concepts for Medical Informatics (3) Karras** Continuation of topics begun in MEBI 531: multiprogramming and operating system principles, client-server, network programming with sockets, macros, higher level languages, software engineering. Prerequisite: MEBI 531 or equivalent. Offered: W.

**MEBI 534 Biology and Informaticists (3) Brinkley** A computing and information oriented treatment of the core concepts of human biology, addressing structure and function at three levels of organization: organism, cell, and gene. Each level includes examples of key anatomic and physiologic concepts, presented from a computational perspective and with the use of electronic resources. Offered: A.

**MEBI 535 Clinical Topics for Informaticists (3) Karras** Builds on Biology for Informaticists and introduces the student to a variety of clinical disciplines, representative clinical problems from these disciplines, and informatics issues and applications within these disciplines. Lecturers include faculty from the Schools of Medicine, Nursing, Pharmacy, and Dentistry. Prerequisite: MEBI 530, MEBI 531, MEBI 534. Offered: W.

**MEBI 536 Bioinformatics and Gene Sequence Analysis (3) Rose** Nature and relevance of molecular sequence information, computer-based protein, and DNA sequence analysis, molecular sequence and genomic databases, and methods for database access and interrogation. Prerequisite: background in molecular biology and permission of instructor. Offered: jointly with PABIO 536; W.

**MEBI 537 Informatics Research and Evaluation Methods (4) Carlile, Brock** Introduces the many facets of evaluation and research for Biomedical and Health Informatics projects. Focuses on formal studies of the application of information technology in medicine, conducted while an information resource is under development and after the resource is in routine service. Offered: W.

**MEBI 540 Critically Appraising and Applying Evidence in Health Care (3) Wolf** Literature appraisal skills for various articles (therapy effectiveness, diagnostic tests, literature reviews, clinical measurement, prognosis, quality of care, decision analysis, causation/etiology, guidelines, and economic evaluation). Appraisal of clinical information from literature, strengths/weaknesses of data, analyses, study design/applicability to a current patient’s problem. Prerequisite: permission of instructor. Offered: jointly with HSERV 528: W.

**MEBI 541 Introduction to Systematic Reviews and Meta-analysis of Evidence (2) Wolf** Conceptual understanding of the quantitative methods used to synthesize evidence. Methods for pooling evidence across independent studies, pooling binary/continuous outcomes, differences in treatment, fixed and random effects models, and guidelines for appraising published systematic reviews/meta-analyses. Prerequisite: introductory level courses in statistics, epidemiology or biostatistics. Prerequisite: permission of instructor. Offered: jointly with HSERV 529: Sp.

**MEBI 550 Knowledge Representation and Applications (3)** A readings class in knowledge representation, as described in the primary artificial intelligence and biomedical informatics literature. Topics may include: frame-based systems, description logics, theorem proving, complexity vs. tractability, ontologies, rule-based systems, and biomedical databases. Prerequisite: any artificial intelligence course (e.g., CSE 415 or better), or permission of instructor.

**MEBI 552 Clinical Decision Support (3) Doctor** Provides foundation in clinical decision making and support (including decision analysis, Bayesian analysis, belief networks, artificial intelligence, neural networks) presented in the context of local and national decision support systems and the movement to decrease errors in healthcare. Prerequisite: MED 530, MED 531, MED 535, MED 537, CSE 415 or permission of instructor. Offered: A.

**MEBI 570 Health Sciences Information Needs, Resources, and Environment (3)** Characteristics of users of health sciences information; health professionals, researchers, consumers and patients; environments (academic health sciences centers, hospitals, clinics, and public libraries); evaluation of information resources in health care; types and uses of health information management systems; professional standards, education, and certification. Offered: jointly with LIS 528.

**MEBI 580 Computing Fundamentals for Health Providers (3)** Enables health professionals to solve work/practice challenges using existing features of common software packages, as well as basic concepts/methods of small system management and support. Prerequisite: admission to Health Informatics Certificate Program or by instructor permission. Offered: jointly with NURS 521:W.

**MEBI 590 Selected Topics in Health Informatics (1-3, max. 12)** Computers and information technology are improving and changing healthcare education, research, and clinical practice. Informatics faculty and researchers from the UW and affiliated institutions present their research findings as well as discuss their views of national developments in their respective disciplines. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSpS.

**MEBI 591 Biomedical Health Informatics Research Colloquium (1)** Provides forum for extensive interactive research discussions. Format is round table with short presentations and long facilitated discussion amongst students.
and core BHI faculty. Both students and faculty present. Topics primarily research focused (ongoing and proposed research.), but also journal articles, current topics of debate, and other. Credit/no credit only.

MEBI 598 Special Topics in Biomedical and Health Informatics (1-4, max. 12) Readings, lectures, and discussions pertaining to a significant biomedical and health informatics problem or an emerging issue. Topics vary. Offered: AWSpS.

MEBI 599 Independent Study or Research (*, max. 12).

MEBI 600 Independent Study/Research (1-10, max. 10) Individual readings or study, including independent study in preparation for doctoral examinations, research, etc. Prerequisite: permission of instructor.

MEBI 700 Master’s Thesis (1-15, max. 15) Examinations, research, etc. Prerequisite: permission of instructor. Offered: joint with PHIL 411.

MEBI 800 Doctoral Dissertation (1-10, max. 10).

Medical History and Ethics

MHE 401 History of Modern Medicine (3) &S Whorton Survey of evolution of medical theory, practice, and institutions in European and American society from the late 18th century present. Medical background not required. Recommended: prior courses in sciences and/or history.

MHE 402 Ethical Theory (5) &S Jecker Reviews the principal theories for normative ethical discourse, such as utilitarianism and deontology, and major metaethical commentary on those theories. Illustrated by classical and modern authors. Recommended: one basic course in ethics.

MHE 404 Metaethical Theory (5) &S Jecker Study of major ethical writings in the twentieth century, with principal emphasis on the Anglo-American tradition. Recommended: one introductory philosophy course.

MHE 411 Introduction to Bioethics (3) &S Basic concepts, principles, and methods of analysis, with application to some major issues in the field of bioethics. Case studies utilized to illustrate nature of questions arising in bioethics and to provide students with opportunity to develop skills in ethical analysis.

MHE 413 History of Alternative Healing (3) &S Whorton Analysis of historical development of alternative healing in American society over last two centuries. Emphasis on evolution of theory, practice, and professional institutions for major alternative systems and interactions of alternative modalities with conventional medicine. Medical background not required.

MHE 417 Disease in History (3) &S Whorton Study of Western civilization’s experience with epidemic disease, the growth of understanding of the causes of disease, the formation of a philosophy of prevention, and the development of programs to protect the public health. Emphasis on the last two centuries. Medical background not required.

MHE 440 Philosophy of Medicine (5) &S Jecker Familiarizes students with central issues in the philosophy of medicine. Focuses on the nature of medical knowledge, the connection between theory and observation, the meaning of medical concepts, and the relationship between theories and the world. Recommended: prior courses in philosophy, history of science, or history of medicine. Offered: jointly with PHIL 459.

MHE 474 Justice in Health Care (5) &S/LVPA Jecker Examination of the ethical problem of allocating scarce medical resources. Emphasis on fundamental principles of justice that support alternative health policies. Recommended: prior courses in philosophy or medical ethics. Offered: jointly with PHIL 411.

MHE 481 The Pursuit of Health in American Society (3) &S Berryman, Whorton Examination of the development of concern for personal health over the past two centuries, and of the evolution of philosophies and practices of health promotion. Emphasis on the influence of both medicine and popular culture on shaping of attitudes toward diet, exercise, dress, sex, and other health behavior.

MHE 483 The Rise and Development of Sports Medicine (3) &S Berryman Evolution of medical thought related to exercise for good health, training for sport participation, and intensive and rapid treatment of sport-related injuries. Begins with ancient period, concludes with present. Development of specialization in sports medicine, sport team physicians, preventive medicine, concepts of fitness and wellness as related to exercise prescription, and sports medicine clinics.

MHE 485 Concepts of the Body in Nineteenth- and Twentieth-Century America (3) &S Berryman Investigation of ideas relating to corporeal self in nineteenth- and twentieth-century America. Evolution of physical ideals of manliness/femininity, how ideals related to surrounding culture, how different bodily activities developed to realize ideals. Athleticism, physiognomy, beauty contests, body building, decorations, cosmetics, anthropology, artificial parts.

MHE 497 Medical History and Ethics Special Electives (*).-.

MHE 498 Undergraduate Thesis (*).-.

MHE 499 Undergraduate Research (*, max. 5) Investigative work in biomedical ethics or history of the biomedical sciences.

MHE 501 Alternative Approaches to Healing (2) Whorton Philosophies and practices of the major alternative approaches to healing. Historical characterization of alternative medicine accompanied by presentations by practitioners of chiropractic, naturopathy, homeopathic, and traditional Chinese medicine. Credit/no credit only.

MHE 503 The Historical Background of Modern Medicine (1) Whorton Major elements of thought, practice, and values that have directed the evolution of medicine in Western civilization. Medical culture examined as both an expression and modifier of the culture of its ambient society. Limited to: medical students and others in health professional schools. Credit/no credit only.

MHE 505 Professional Seminar I (3) Methods for identifying a bioethics research question and developing a systematic approach to investigating it, including utilization of bibliographic sources in bioethics, philosophy, history. Prerequisite: permission of instructor.

MHE 506 Professional Seminar II (2) Capstone course for M.A. in Bioethics. Includes conducting research in ethics, writing, giving oral presentations, facilitating seminars, developing curriculum vitae, and career planning.

MHE 511 P-Medical Ethics (2) Ethics course designed especially for first- and second-year medical students. Study of ethical problems arising in clinical setting of medicine, introducing students to philosophical analysis and argument in practical contexts. Seminar-discussion format with readings from contemporary authors. Credit/no credit only.

MHE 512 P-The Human Face of Medicine (2) Foundation of human values underriding medical practice. Images of physician — motivations for medicine, empathy versus detachment in doctor-patient relationship, health for the health-professional — the art of coping, limits of power — when medicine fails to cure, uses/abuses of technology, physician’s role in public health issues, the healing process.

MHE 513 P-Ethical Responsibilities of Medical Practice (2) Provides interdisciplinary understanding of ethical problems in medicine and how to approach them. Topics include: professional responsibilities, physician’s role in medical decision-making, patient’s role in treatment decisions, and physician’s role in public health issues.

MHE 514 Legal, Ethical, and Social Issues in Public Health Genetics (3) Kuszler, Mastroianni Equips the student to anticipate and assess potential legal, ethical, and social barriers complicating the incursion of new genetic advances, information, and technologies into public and private health care delivery efforts. Prerequisite: GENET 371 or equivalent. Offered: jointly with LAW H 504/PHG 512.

MHE 515 Public Commentary on Ethical Issues in Health Genetics (3) Explores issues in public health genetics through academic commentary, personal narratives, science fiction, and film using ethical frameworks from narrative ethics, feminist ethics, and perspectivism. Includes cloning, assisted reproduction, prenatal genetic testing, genetic testing, genetic therapy, scientific responsibility, and GMOs. Graduate students only. Offered: jointly with PHG 525.

MHE 516 Ethical Frameworks for Public Health Genetics (2) Mastroianni Case-based application of ethical principles in genetics medicine to range of problems arising in genetics practice, policy, research, Examination of traditional problems including eugenics and testing/screening for genetic disease, as well as emerging problems in population and environmental genetics. Prerequisite: MHE 514/PHG 512. Offered: jointly with PHG 522.

MHE 517 Preclinical Hospice Volunteer Training Elective (3) Farber, McCormick Using lectures, small groups, role play, and readings, covers the basic knowledge, skills and attitudes that need to be mastered as a hospice volunteer. Students participate as hospice volunteers as part of their field experience. Offered: jointly with FAMED 546; WSp.
MHE 518 Spirituality in Medicine (2) Farber, McCormick Examination of the beliefs, values, meaning, and spirituality of health professionals, for the well-being of their patients as well as for themselves. Offered: jointly with FAMED 547.

MHE 520 Seminar in the History and Philosophy of Medicine (3) Origins and philosophical foundations of medical sciences. Critical analysis of processes of evaluation and explanation in biomedical sciences. Consideration of evolution and nature of modern biomedical investigation; concepts of life/death, health/disease; philosophical dimensions of clinical medicine. Open to majors, medical students, arts and sciences graduate students, and others.

MHE 521 The Ethical Challenges of Modern Medicine (3) McCormick Case study approach to contemporary ethical issues in medicine, utilizing techniques of ethical analysis and argument in examining actual cases arising in our pluralistic culture, where values are often in conflict. Open to graduate and professional students and others with appropriate background.

MHE 522 Ethical Problems Surrounding Death (3) McCormick Issues arising in care and treatment of dying patients and their families, including truthful disclosure, use of life-supports, “euthanasia,” coping with death and grief. Intersection of patient and professional values related to care in terminal phase of illness. Open to graduate and professional students and others with appropriate background.

MHE 530 Genetic Discovery in Medicine and Public Health (3) Burke Addresses the clinical and societal implications of genetic knowledge, with an emphasis on the ethical and policy issues surrounding the use of genetic technology in medicine and public health from 1900 to the present. Offered: jointly with PHG 542; W.

MHE 533 Medical Ethics and Jurisprudence (3) Jonassen Relationship between bioethics and law. Review of basic concepts of both disciplines; their theoretical and practical connections. Analysis of principal legal cases and statutes illustrating such issues as informed consent to treatment, foregoing life support, research with human subjects, confidentiality, allocation of health care resources. For graduate and professional students.

MHE 536 Research Ethics and Regulation (3) Mastroianni Explores the ethical principles and concepts and U.S. laws related to (1) research conducted with animals, (2) research on humans, and (3) the responsible conduct of research. Offered: jointly with LAW H 536; W.

MHE 540 Seminar in the History of Health and Physical Exercise (3) Selected topics in the development of medical thought as it relates to exercise, sport, and overall well-being. Open to majors and graduate students in medicine, the arts and sciences, and others with appropriate background and interest. Prerequisite: permission of instructor.

MHE 541 Exercise in Modern Medicine (1) Berryman Survey of role and place of exercise in modern medicine. Historical and contemporary analysis of physical activity and sports medicine in the American health system. Presentations by clinicians about their experiences in: orthopedics, exercise physiology, sports nutrition, sports psychology, pediatric sports medicine, special issues of female athletes, environmental medicine.

MHE 542 Legal and Ethical Issues in Advanced Practice Nursing (3) Shannon Reviews selected ethical issues in health care and legal guidelines relevant to health care decision-making. Explores bioethics as a type of applied ethics. Focuses on preparing students for ethical challenges in advanced nursing roles. Offered: jointly with NURS 522; Sp.

MHE 548 Introduction to Clinical Ethics (5) Burke Introduction to history, practice, and research methods in clinical ethics. Case-based examination of methods including principism, casuistry, narrative methods, virtue ethics. Prerequisite: permission of instructor.

MHE 549 Current Topics in Clinical Ethics I (3) Dudzinski Analysis of complex ethical cases from UWSOM clinical departments, literature, and media. Case discussion focuses on implications for medical care delivery. Prerequisite: MHE 548 or permission of instructor.

MHE 550 Current Topics in Clinical Ethics II (3) Fryer-Edwards Analysis of complex ethical cases from UWSOM clinical departments, literature, and media. Case discussion focuses on public policy implications. Prerequisite: MHE 548 or permission of instructor.

MHE 558 Ethics Practicum (1-6, max. 6) Students participate in clinical ethics rounds, case discussions, review of research protocols, or other professional activities related to bioethics. Credit/no credit only. Prerequisite: by permission of instructor.

MHE 596 Masters Research Project ([1-12]-, max. 12) Research project culminating in a scholarly paper suitable for publication in a peer-reviewed journal. Credit/no credit only. Majors only.

MHE 597 Special Topics in Medical Ethics (1-, max 15) Various special topics in medical ethics. Offered: AWSPS.

MHE 600 Independent Study or Research (*). Medicine

MED 498 Undergraduate Thesis (*) Pauw Offered: AWSPS.

MED 499 Undergraduate Research (*) Pauw Case studies, with laboratory research. Available to undergraduates and medical students. Offered: AWSPS.

MED 505 P-Preceptorship in Medicine (1) Pauw To provide opportunity for first- and second-year medical students to gain personal experience with medical practice situations by being stationed with carefully selected clinical faculty members in their offices. Credit/no credit only. Prerequisite: permission of department. Offered: AWSPS.

MED 510 Health Issues of Sexual Minorities (1) Greenberg Introduction to the special health care issues and barriers confronting persons identified as bisexual, gay, lesbian, or transgender. Includes lectures, panels, and case presentations by faculty and community experts. Offered: Sp.

MED 530 AIDS: A Multidisciplinary Approach (2) Hawes Comprehensive overview of the public health, clinical, and laboratory aspects of human immunodeficiency virus (HIV) infection and disease. Topics include the pathogenesis, natural history, and management of (HIV) infections. The impact of HIV/AIDS on community and global health care and prospects for prevention and control. Credit/no credit only. Offered: jointly with EPI 530, A.

MED 531 P-Human Genetics (*) Stamatoyanopoulos Weekly seminar dealing with a variety of topics in medical genetics given by faculty of the Division of Medical Genetics and related departments and divisions. Open to medical students with a good foundation in genetics. Offered: AWSPs.

MED 532 Statistical Methods in Medical Genetics (2) Wijisman Theory and application of statistical techniques used in medical genetics. In-depth discussion of linkage and segregation analysis and ascertainment problems. Applications stressed with reference to assumptions and limitations. Data sets analyzed with current computer programs. Prerequisite: knowledge of genetics or permission of instructor. Offered: jointly with BIOST/PHG 532; Sp.

MED 533 P-Clinical Endocrinology (2) Cummings Emphasis on the most major and dependable symptoms, signs, laboratory tests, and therapy for clinical endocrinopathies. Patient illustrated. Limited to second-year medical students. Offered: W.

MED 546 Clinical Applications of Gene Therapy (2) Lieber Overview of the current status of gene therapy. Discusses its role in the future practice of medicine. Lecture and literature reviews. Offered: S.

MED 547 Quantitative Methods in Medical Genetics (2) Wijisman Computational methods of use for medical genetics. Review of problem sets. Topics range from basic probability to linkage analysis. Prerequisite: genetics and permission of instructor.

MED 549 Clinical Medical Genetics (1) Review of current clinical advances in medical genetics. Includes lectures and discussion of cases from medical genetics clinic. Prerequisite: genetics or human genetics and permission of instructor. Offered: AWSPS.

MED 550 P-An Introduction to Emergency Medicine (1) Mengert Presentation of common medical and surgical emergencies and their urgent management, especially within the framework of rapid patient assessment and stabilization. Lecture topics include chest pain and myocardial infarction, basic arrhythmia management, and burn and wound care. Offered: Sp.

CONJ 550 P-Clinical Infectious Diseases (3) Spach See Conjoint Courses.
MED 555 P-Mind, Body, and Pen: Writing and the Art of Becoming a Physician (1) Provides foundation for medical students to write about issues in medicine and medical education. Focuses on writing as a process for giving voice to the conflicting demands and dilemmas of becoming a physician. Explores personal narratives, dreams and disappointments, chronic illness and death, empathy and revulsion, authenticity and power. Offered: W.

UCONJ 555 Principles of STD/HIV Research (3) Lukehart See University Joint Courses.

MED 560 P-Advanced Global Health (2) Kimball Prepares health profession students for work in developing countries. Includes health care delivery systems, political, social, and economic determinants of health, major global health issues, and personal well-being while abroad. Lecture and seminar format with guest speakers, student presentations, and discussion. Offered: Sp.

MED 561 Tropical Medicine (1) Intended for preclinical health science students interested in learning the pathophysiology, epidemiology, and clinical presentation of disease conditions that are more commonly seen in less-developed countries, resource-limited settings, or tropical climates, and how to diagnose, treat, and follow the resolution of these diseases with commonly limited resources. Credit/no credit only.

MED 565 P-The Healer’s Art: Awakening the Heart of Medicine (1) Wicks Encourages cultivation of human dimensions in practice of medicine while strengthening personal commitment to medicine as a life’s work. Facilitates student recognition of commonality of personal concerns among peers and student response to the dimension of mystery in the experience of illness as well as development of the capacity for awe. Offered: W.

MED 599 P-Transfusion Machine (3) Reiner Group discussions and didactic sessions cover broad category of transfusion medicine. Hands-on laboratory experience in red cell serology/ compatibility, coagulation, and histocompatibility with emphasis on diagnosis and management of clinical problems. Based at Puget Sound Blood Center. Prerequisite: fourth-year medical student standing; third-year student standing with permission of instructor.

MED 604 P-Clinical Preceptorship in Internal Medicine (8) Shima (Forks) Working closely with primary-care physicians, the student is exposed to the private practice of internal medicine in a small community. Operating on a one-to-one basis with an internist, the student evaluates and manages inpatients and outpatients on a primary care, consultative, and emergency basis. Prerequisite: MED 665. (Four weeks.) Offered: AWSpS.

MED 630 P-WRITE Medicine Clinical Clerkship (*, max. 24) Basic clinical clerkship for students enrolled in the WRITE Program. Prerequisite: completion of basic curriculum; third- and fourth-year students; acceptance in the WRITE program.

MED 640 P-Dermatology Clinic (*, max. 5) Olerud Students attend dermatology clinic on Monday mornings and Thursday afternoons for twelve weeks. Two half-days per week. Prerequisite: MED 665. Offered: AWPSpS.

MED 642 P-Clinical Oncology (8) Stewart (Fred Hutchinson Cancer Research Center) Students functioning as primary physicians are responsible for the workups and daily care of patients receiving marrow transplants, high-dose chemotherapy or immunotherapy on an intensive-care research ward. Emphasis is on the management and supportive care of patients with pancytopenia and immunosuppression, transplantation biology, cancer chemotherapy, and infectious disease problems. Prerequisite: MED 665. (Four weeks.) Offered: AWPSpS.

MED 644 P-Management of Sexually Transmitted Diseases (2) Golden, Handsfield Instruction and clinical experience in diagnosis, treatment, management, and patient counseling of sexually transmitted diseases. Instruction in genitourinary physical examination skills; relevant laboratory techniques and management of patients with STDs. Prior to the elective, each student must review a packet of didactic materials. Prerequisite: MED 665, SURG 665, and OB GYN 665. Offered: AWPSpS.

MED 650 P-Advanced Medical Genetics (*, max. 5) Janvik, Horvitz, Stamatakis Summer course intended for third-year students who would like to increase their background in specific areas of medical genetics. Involves seeing patients under the supervision of a resident and attending physician, reviewing the literature, analyzing clinical information, and writing a review on a selected topic. Prerequisite: HUBIO 554. Offered: S.

MED 655 P-Clinical HIV Care (8) Harrington Full-time outpatient and inpatient elective in HIV care for senior medical students. Students see patients for routine care and acute medical problems that do not require hospitalization, as well as provide inpatient consults. Prerequisite: MED 665.

MED 656 P-Clinical Nutrition (8) Bruce, Purnell, Weigle Instruction in nutritional assessment and care of both inpatients and outpatients. Students work with preceptors at a variety of hospital and clinic teaching sites, attend nutrition-related seminars, and practice interview skills on standardized patients. Prerequisite: HUBIO 556; MED 665.

MED 665 P-Clinical Clerkship (*, max. 24) Paauw Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (Twelve weeks, full-time.) Offered: AWPSpS.

MED 666 P-Advanced Clinical Clerkship in Internal Medicine-WWAMI (12) Paauw Advanced clinical clerkship in internal medicine in three small urban communities. Supervised, structured experience in dealing with situations commonly encountered by the practicing internist. Continuity of care and the relationship between care given in the ambulatory setting and in the hospital, as well as by other community health services, is emphasized. Prerequisite: MED 665. (Six weeks, full time. Limit: six students.) Offered: AWPSpS.

CONJ 677 P-Clinical Allergy and Immunology (*, max. 12) Henderson See Joint Courses.

MED 678 P-Clinical Dermatology (8) Olerud Participation in dermatology clinics and inpatient consultations at University of Washington Medical Center; Harborview Medical Center; Children’s Hospital Medical Center; Seattle V.A. Hospital; Meridian, Idaho; Casper, Wyoming; and Bellingham, Washington. Journal club and clinical conferences each week with entire staff. A continuing series of teaching seminars and weekly dermatopathology conferences. Prerequisite: MED 665. (Four weeks.) Offered: AWPSpS.

MED 679 P-Clinical Gastroenterology (8) Lee, Novan (Sacred Heart Spokane) Participation in consulting ward rounds, procedures, conferences, and selected clinics with full-time divisional staff at University and Veterans Administration hospitals, and at Pacific and Harborview medical centers, plus directed tutorial work. Prerequisite: MED 665. (Four weeks, full-time.) Offered: AWPSpS.

MED 680 P-Rheumatology (8) Elkon Full-time inpatient-outpatient clerkship in rheumatology. Clinical experience provided in diagnosis and treatment of rheumatic diseases, utilizing outpatient clinics and hospitalization at the University of Washington Medical Center, Harborview Medical Center, or VAMC. Emphasis on concepts in pathophysiology, diagnosis, and treatment of these diseases. In addition to patient contact, reading, seminars, and preceptorial sessions are the methods of instruction. Prerequisite: MED 665. Offered: AWP.

MED 681 P-Dermatologic Surgery (8) Dermatologic surgery elective for senior medical students. Instruction in Mohs surgery, conventional skin surgery, cosmetic procedures, wound healing and closure, and intraoperative and postoperative patient management. Prerequisite: MED 665.

MED 682 P-Clinical Cardiology and Electrocardiography (8) Caldwell (Seattle V.A. Hospital), Corson (Harborview Medical Center), Herzog (Anchorage Veterans Administration Hospital), Mascette (Madigan Hospital Medical Center), Novan (Sacred Heart, Spokane), Otto (University of Washington Medical Center) Clerkship in clinical cardiology-combined inpatient-outpatient assignments. ECG interpretation. Prerequisite: MED 665. (Four weeks.) Offered: AWPSpS.

MED 683 P-Clinical Respiratory Disease and Critical Care Medicine (8) Lakshmimaharay (Seattle V.A. Hospital), Pierson (Harborview Medical Center), Roth (Madigan) Thompson (Boise Veterans Administration Medical Center), Tonelli (University of Washington Medical Center) Training in respiratory disease diagnosis and pulmonary therapy, with special emphasis on cardiopulmonary function testing and interpretation. Inpatient and outpatient teaching rounds, conferences, and basic science integration. Prerequisite: MED 665. (Four weeks.) Offered: AWPSpS.

MED 684 P-Clinical Hematology/Oncology (8) Ackowitz (University of Washington Medical Center), Broudy (Harborview Medical Center), Collins (Boise Veterans Administration Medical Center), Roth (Seattle V.A. Hospital), Zuckerman (Boise Veterans Administration Medical Center) Outpatient and inpatient experience with hematologic/oncologic disorders. The elective includes teaching rounds, conferences, and evaluation of laboratory work. Prerequisite: MED 665. (Four weeks.) Offered: AWPSpS.
MED 688 P-Ward Medicine Subinternship (*, max. 24) Harvey (Anchorage), R. Jones (Madigan Hospital Medical Center), McGee (Veterans Administration Medical Center), Paaue (University of Washington Medical Center), Schoene (Providence), Sheffield (Harborview Medical Center) Students act in the capacity of interns on the medical wards under supervision of house staff and visiting physicians. They attend all regular medical rounds and conferences as their schedules permit. Prerequisite: MED 665. Offered: AWSpS.

MED 695 P-Cardiovascular Outpatient Service (8) Albright, Davis (University of Washington Medical Center), Cusak (Boise V.A. Medical Center) Work with patients as subintern with Senior Care Program. Students are strongly encouraged to participate for four quarters. Prerequisite: MED 665 and permission of instructor. Offered: AWSpS.

MED 696 P-Volume Medicine Subinternship (*, max. 24) Aperia, Davis (University of Washington Medical Center), Cusak (Boise V.A. Medical Center) Work with patients as subintern with Senior Care Program. Students are strongly encouraged to participate for four quarters. Prerequisite: MED 665. Offered: AWSpS.

MED 698 P-Pediatric Infectious Diseases (8) Stamm (University of Washington Medical Center) Students participate in the consulting service throughout the hospital, attend daily rounds, conferences, and seminars. (Four weeks.) Corey (Fred Hutchinson Cancer Research Center), Holmes (Harborview Medical Center), Miller (Seattle V.A. Hospital), Morris (Madigan Army Medical Center), Novan (Spokane), Stevens (Boise Veterans Administration Hospital) Participate in consulting service throughout hospital to learn microbiological aspects of infectious diseases through the clinical laboratories. Prerequisite: MED 665. (Four weeks.) Offered: AWSpS.

MED 690 P-Pediatric Subinternship (8) Otto (University of Washington Medical Center) Students act in the capacity of interns on the cardiology service under the supervision of house officer. Prerequisite: MED 665. (Four weeks.) Offered: AWSpS.

MED 691 P-Pediatric Primary Care (B12/13) Paaue Six-week, full-time ambulatory care block in primary care internal medicine. Students participate in several clinics at University of Washington Medical Center following a panel of patients in medicine, rheumatology, and virology clinics. Prerequisite: MED 665 and permission of instructor. Offered: AWSpS.

MED 692 P-Immunological Endocrinology and Metabolism (*, max. 12) Weigle (Seattle-based program); Bunner (Madigan) Clerkship in clinical endocrinology and metabolism combined inpatient and outpatient assignments at selected hospitals. Prerequisite: MED 665. Offered: AWSpS.

MED 693 P-Nephrology and Fluid Balance (8) Coulier (University of Washington Medical Center), Narasimhan (Boise Veterans Administration Hospital), Novan (Spokane Sacred Heart), Sherrard (Seattle V.A. Hospital), Zager (Harborview Medical Center) Students see clinical nephrological problems under close supervision, participate in nephrology and transplant rounds, see consultations with renal fellow and attending, and work up patients in renal clinics, participate in seminars with clerks from all three hospitals. Prerequisite: MED 665. (Four weeks.) Offered: AWSpS.

MED 694 P-Harborview Evening Clinic (2) Asself A longitudinal elective for seniors. Students see patients in the outpatient clinic. Direct care of patients is supplemented by didactic sessions dealing with issues in ambulatory care. Students are strongly encouraged to participate for four quarters. Prerequisite: MED 665 and permission of instructor. Offered: AWSpS.

MED 694 P-Primary Care (8) Hamlin Full-time outpatient and inpatient elective in perioperative medical consultation for senior medical students. Students see patients in the medical consultation clinic, then follow them daily when they come in for surgery. Prerequisite: MED 665. Offered: AWSpS.

MED 688 P-Clinical Aspects of Aging (8) Abrass, Hazzard (Harborview Long Term Care Service, Harborview Medical Center, and Seattle V.A. Medical Center), Cusak (Boise V.A. Medical Center) Work with elderly patients as subintern with Senior Care Program. Students are strongly encouraged to participate for four quarters. Prerequisite: MED 665 and permission of instructor. Offered: AWSpS.

MED 695 P-Primary Care (8) Hamlin Full-time outpatient and inpatient elective in perioperative medical consultation for senior medical students. Students see patients in the medical consultation clinic, then follow them daily when they come in for surgery. Prerequisite: MED 665. Offered: AWSpS.

MED 693 P-Primary Care (8) Hamlin Full-time outpatient and inpatient elective in perioperative medical consultation for senior medical students. Students see patients in the medical consultation clinic, then follow them daily when they come in for surgery. Prerequisite: MED 665. Offered: AWSpS.

MED 690 P-Pediatric Subinternship (8) Otto (University of Washington Medical Center) Students act in the capacity of interns on the cardiology service under the supervision of house officer. Prerequisite: MED 665. (Four weeks.) Offered: AWSpS.

MED 691 P-Pediatric Primary Care (B12/13) Paaue Six-week, full-time ambulatory care block in primary care internal medicine. Students participate in several clinics at University of Washington Medical Center following a panel of patients in medicine, rheumatology, and virology clinics. Prerequisite: MED 665 and permission of instructor. Offered: AWSpS.

MED 692 P-Immunological Endocrinology and Metabolism (*, max. 12) Weigle (Seattle-based program); Bunner (Madigan) Clerkship in clinical endocrinology and metabolism combined inpatient and outpatient assignments at selected hospitals. Prerequisite: MED 665. Offered: AWSpS.

MED 693 P-Nephrology and Fluid Balance (8) Coulier (University of Washington Medical Center), Narasimhan (Boise Veterans Administration Hospital), Novan (Spokane Sacred Heart), Sherrard (Seattle V.A. Hospital), Zager (Harborview Medical Center) Students see clinical nephrological problems under close supervision, participate in nephrology and transplant rounds, see consultations with renal fellow and attending, and work up patients in renal clinics, participate in seminars with clerks from all three hospitals. Prerequisite: MED 665. (Four weeks.) Offered: AWSpS.

MED 694 P-Harborview Evening Clinic (2) Asself A longitudinal elective for seniors. Students see patients in the outpatient clinic. Direct care of patients is supplemented by didactic sessions dealing with issues in ambulatory care. Students are strongly encouraged to participate for four quarters. Prerequisite: MED 665 and permission of instructor. Offered: AWSpS.

MED 695 P-Primary Care (8) Hamlin Full-time outpatient and inpatient elective in perioperative medical consultation for senior medical students. Students see patients in the medical consultation clinic, then follow them daily when they come in for surgery. Prerequisite: MED 665. Offered: AWSpS.
Medical Technologists (1) NW Anderson
Limited introduction to basic microbiology, with focus on structure, metabolism, and genetics of medically important organisms. Open only to medical technology students. Credit/no credit only. Offered: A.

MICROM 441 Introduction to Immunology (4)
NW General properties of immune responses; cells and tissues of immune system; lymphocyte activation and specificity; effector mechanisms; immunity to microbes; immunodeficiency and AIDS; autoimmune diseases; transplantation. Prerequisite: either BIOL 220 or BIOL 202; recommended: either GENET 371, GENET 372, BIOL 405, or BIOL 440. Offered: jointly with IMMUN 441; A.

MICROM 442 Medical Bacteriology (3) NW Cookson, Fulton
Medically important bacterial pathogens are discussed in terms of the clinical, therapeutic, and epidemiological aspects of diseases caused by them, molecular mechanisms of pathogenesis and their identification in the clinical laboratory. Laboratory course 443 coordinates with either BIOL 200 or BIOL 201; recommended: MICROM 410; MICROM 441. Offered: W.

MICROM 443 Medical Microbiology Laboratory (3) NW Anderson, Chandler, Fulton
Required for medical technology students, microbiology majors; elective for medical students. Procedures for isolation and identification of pathogenic bacteria, testing their susceptibility to antibiotics. No auditors. Prerequisite: either BIOL 200 or BIOL 201; recommended: MICROM 410. Offered: A.

MICROM 444 Medical Mycology and Parasitology (4) NW Anderson, Fulton, Schmer, White
Consideration of medically important fungi and parasites, with emphasis on their biology in relation to disease and its laboratory diagnosis. For medical technology students, microbiology majors, and medical students as an elective. Prerequisite: either BIOL 200 or BIOL 201; recommended: immunology. Offered: S.

MICROM 445 Medical Virology (2) NW Langhoff
An introductory course emphasizing basic understanding of medical virology and viral pathogenesis. The biochemical, replication, host-parasite relationships and pathogenesis of animal viruses are examined. Prerequisite: either BIOL 180, BIOL 200, or BIOL 201; Sp.

MICROM 447 Immunity, Disease and Society (2) Clark
Impact and controversies associated with breakthroughs in immunology and infectious diseases. Topics include vaccines, complementary medicine (herbal boosts of the immune system), the mind and the immune system, allergies (asthma), cancer immuno-therapy, genetic screening and autoimmune disease and natural history of infectious disease. Prerequisite: MICROM 441. Offered: jointly with IMMUN 447.

MICROM 450 Molecular Biology of Viruses (3) NW Champoux
Introduction to the molecular biology of viruses and virus-host relationships. Designed for advanced undergraduates and graduate students in the biological sciences. Coverage includes bacterial and animal viruses, with an emphasis on the molecular mechanisms of viral gene expression and regulation. Prerequisite: either BIOL 200 or BIOL 201; recommended: MICROM 410, MICROM 411, GENET 371, or GENET 372. Offered: W.

MICROM 482 Peer Teaching Assistants in Microbiology (1-5, max. 10)
Direct experience in teaching a microbiology laboratory class. Peer TA's attend concurrent accompanying lecture course, meet weekly to coordinate, give introductory lab remarks, supervise the execution of lab exercises, and assist in preparing/examining quizzes/exams. Training in teaching techniques, approaches. Student evaluation provided. CR/NC only. Prerequisite: MICROM 402 and MICROM 410. Offered: A.

MICROM 490 Aquatic Microbiology (3/5) NW Herwig
Basic principles of aquatic microbiology and aquatic microbial ecology: role and identity of aquatic microorganisms; introduction to modern methodologies for research. Laboratory work with local freshwater and marine samples for those enrolled in the five-credit section. Recommended: 15 credits of biological science, 10 credits of chemistry. Offered; jointly with FISH 490; Sp., odd years.

MICROM 495 Honors Undergraduate Research (1-5)
Leigh
Specific problems in microbiology or immunology. Offered: AWSpS.

MICROM 496 Undergraduate Library Research (2)
An introduction to library research techniques and to microbiological literature. Staff assign a topic and supervise the project. Offered: AWSpS.

MICROM 499 Undergraduate Laboratory Research (1-5)
Leigh
Specific problems in microbiology or immunology. Credit/no credit only. Offered: AWSpS.

MICROM 500 Introduction to Research (*, max. 20)
Introduction to research areas of the faculty and the techniques employed in their investigations. Credit/no credit only. Prerequisite: graduate standing in microbiology or permission of instructor. Offered: AWSpS.

MICROM 510 Physiology of Bacteria (3)
Traxler
Topics of current interest concerning the molecular biology and physiology of bacteria. Prerequisite: MICROM 410 and BIOL 440, 442, or permission of instructor. Offered: odd years; W.

MICROM 518 Bioremediation of Environmental Pollutants (3) Herwig
Strand
Detailed survey of current understanding of biological pathways for transformation and degradation of toxic organic compounds, pesticides, oil, and metals. Microbial and plant transformations of pollutants and requirements for bioremediation. Requires basic understanding of metabolism and organic chemistry. Prerequisite: biological science course. Offered: jointly with CEE 542/ESC 518; W.

MICROM 520 Seminar (1)
Leigh
Credit/no credit only. Offered: AWSp.

MICROM 522 Current Research in Microbiology (1) Champoux
Weekly student and faculty seminar presentations based on the current literature. Credit/no credit only. Prerequisite: graduate standing in microbiology. Offered: AWSp.

MICROM 525 Cell Surface Membrane in Cell Sociology and Immunology (2) Carter, Hakomori
Structure and function of cell surface membranes in relation to development of various diseases, particularly infection, cancer, and inflammation. Examines how specific cell surface molecules are targets of recognition by microbes, tumor cells, and recruited inflammatory cells. Prerequisite: BIOL 440, BIOL 441, BIOL 442, and permission of instructor. Offered: jointly with PABIO 525.

MICROM 526 Research of Cell Surface Problems (1) Traxler
Weekly research seminar and discussion of scientific literature pertaining to the process of membrane protein biogenesis. Credit/no credit only. Prerequisite: permission of instructor.

MICROM 527 Genetic Approach to Complex Biological Processes (1)
Current research as it applies to genetic approaches to complex biological processes in the area of microbiology.

MICROM 528 Salmonella Genetics (1)
Review current literature in the area of gene regulation in Salmonella typhimurium and related studies in Escherichia coli. Prerequisite: graduate student standing; advanced undergraduates by permission of instructor.

MICROM 529 Mechanisms of Bacterial Pathogenesis (1) Fang
Student and faculty seminar presentations based on current research pertaining to mechanisms of bacterial pathogenesis at the molecular and cellular levels. Credit/no credit only. Prerequisite: graduate standing in microbiology. Offered: AW.

MICROM 530 Evolution of Prokaryotic Diversity (3) Leigh
Evolution, diversity, and genomics of prokaryotic microorganisms. Lectures, discussions, and reading of current literature. Open to graduate students in the biological sciences and advanced undergraduates with permission of instructor. Offered: even years; W.

MICROM 531 Prokaryotic Diversity and Evolution Laboratory (2)
Leigh
Enrichment, isolation, and molecular phylogenetic characterization of selected prokaryotic organisms. Prerequisite: permission of instructor. Offered: even years; W.

MICROM 532 Seminar in General Microbiology (1, max. 15)
Leigh
Weekly seminar concerning research topics in the genetics and biochemistry of selected bacteria. Credit/no credit only. Prerequisite: MICROM 410, permission of instructor. Offered: AWSpS.

MICROM 533 Herpesvirus Research Meeting (1)
Lagunoff
Weekly research seminar and discussion of scientific literature pertaining to the study of molecular virology of Kaposi's Sarcoma-associated herpesvirus. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSpS.

MICROM 534 Research Seminar in Salmonella Pathogenesis (1) Fang
Provides a formal group setting for discussion and evaluation of a student's research progress. Credit/no credit only. Offered: AWSpS.

MICROM 540 Virology (3) Katze
Lecture-seminar course concerning host-viral interactions. Prerequisite: permission of instructor. Offered: even years; W.

MICROM 553 Molecular Mechanisms of Bacterial Pathogenesis (3) Collins
Mechanisms of bacterial pathogenesis explored at the molecular, genetic, and cellular levels through selected models as presented in the current scientific literature. Prerequisite: MICROM 410 or equivalent. Offered: odd years; A.

MICROM 554 Seminar in Molecular and Medical Microbiology (1, max. 15) Collins,
Cookson Weekly one-hour seminar in which recent advances in molecular biology of microbial pathogenesis or the current research of the participants is presented and discussed critically. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSpS.

MICROM 555 Advanced Clinical Microbiology (2.5) Limaye Attendance at daily plate rounds of the Division of Clinical Microbiology. Designed to increase understanding of clinical microbiological work and its application to the care of the patient. Credit/no credit only. Prerequisite: MICROM 443 and permission of instructor. Offered: AWSp.

MICROM 556 Clinical Microbiology Training and Research (*) max. 12 Training in clinical microbiology and applied research. Attendance at daily laboratory rounds in addition to bench-side training and research. For medical students and microbiology graduate students only. Credit/no credit only. Prerequisite: MICROM 443 and permission of instructor.

MICROM 560 Research and Journal Club in Retrovirology (1) Linial, Overbaugh Weekly discussion of ongoing research related to retroviral replication and transformation. Prerequisite: graduate standing or permission of instructor. Offered: AWSpS.

MICROM 562 Oncogene and Retrovirus Research Seminar (1) Linial, Overbaugh, D'Ambrosio, Ellenbogen, Goodkin, Klotz, Ojemann, Rostomily, Sekar, Silbergold Opportunity for first- and second-year medical students to observe the research, teaching, and patient-care activities of academic neurosurgery. Prerequisite: permission of instructor. Offered: AWSpS.

MICROM 542 Clinical and Basic Research Correlates of Epilepsy (2) Avellino, G. Ojemann, J. Ojemann, Silbergold Clinical symptoms and treatment of epilepsy; related basic research in neuroanatomy, neurophysiology, neuropathology, and neuropharmacology of epilepsy. Prerequisite: HUBIO 532 for medical students; permission of instructor for others.

NEUR S 680 P-Neurological Surgery Clerkship (*) Avellino, Ellenbogen Student serves clinical clerkship as an intensive member of the staff, participating in inpatient and outpatient care, both preoperative and postoperative, involving neurological surgery patients. University of Washington Medical Center or a University-affiliated hospital may be selected, subject to approval of the department. Prerequisite: HUBIO 563. (Four weeks.) Offered: AWSpS.

NEUR S 697 P-Neurological Surgery Special Electives (*) max. 24 Avellino, Ellenbogen By specific arrangement, for qualified students, special clerkships in neurology or research opportunities can be made available at institutions other than the University of Washington. Students wishing to elect this course should obtain from the Dean's office a special assignment form at least one month before preregistration. Prerequisite: permission of instructor. Offered: AWSpS.

NEUR S 699 P-WWAMI Neurosurgical Surgery Special Electives (*) max. 24 Avellino, Ellenbogen By special arrangement for qualified students, special clerkships or externships may be available at institutions other than the University of Washington located within the WWAMI region. Prerequisite: permission of department.

Neurology

NEURL 495 Community Rehabilitation of the Neurologically Impaired: Internship (*) max. 5 Fraser, Cleemans Supervised work with a neurologically disabled vocational rehabilitation population within a multidisciplinary vocational rehabilitation unit. Offered: AWSpS.

NEURL 499 Undergraduate Research (*) max. 25 Provides an opportunity to gain research experience and direct participation in clinical or basic science investigation in neurological topics. Offered: AWSpS.

NEURL 505 P-Preceptorship in Neurology (1) Kraus Provides an opportunity for first and second-year medical students to gain personal experience with neurology practice situations by being stationed with carefully selected clinical faculty members in their offices. Prerequisite: permission of instructor. Offered: Sp.

NEURL 536 Topics in Clinical Neurology (1) Spain Lectures on epilepsy, stroke, coma, drug overdose, dementia, headache, myelopathies, infectious disease. Offered: S.

NEURL 555 Frontiers in Neuroimmunology (1) Moeller Current concepts and developments in neuroimmunology. Credit/no credit only. Prerequisite: either NBIO 301 or IMMUN 441. Offered: AWSpS.

NEURL 665 P-Introduction to Neurology (8) Kraus Provides the medical student with a general understanding of basic clinical neurology, at sites in Seattle and the WWAMI region. For fourth-year students. Prerequisite: medicine, or family medicine, or surgery, or pediatrics for third-year students. Offered: AWSpS.

NEURL 681 P-Seizure Clinic Clerkship (2.5) A. Wilensky Evaluation and follow-up of patients with seizure disorders. Limited contact with inpatients. Prerequisite: MED 665 and permission of instructor. Offered: AWSpS.

NEURL 686 P-Clinical Neurology (8) Swanson Clerkship including both inpatient and outpatient experiences and didactic sessions on neurological subjects. Student assigned to one of the affiliated hospitals and supervised by neurology residents and full-time staff. Offered: AWSpS.

NEURL 687 P-Advanced Clinical Clerkship in Child Neurology (*) max. 8 Gospe Advanced course in course neurology dealing with neurological disease in children. Supervision by child neurology residents and attending. Prerequisite: NEURL 665, third- and fourth-year medical students. (Limit: one student.) Offered: AWSpS.

NEURL 697 P-Neurology Special Electives (*) max. 24 By special arrangement for qualified students, special clerkships or externships may be available at institutions outside the WWAMI region. Students should obtain special assignment form from the Dean's Office at least one month prior to preregistration. Prerequisite: permission of department advisor. Offered: AWSpS.

NEURL 699 P-WWAMI Neurology Special Electives (*) max. 24 By special arrangement for qualified students, special clerkships or externships may be available at institutions other than the University of Washington located within the WWAMI region. Prerequisite: permission of department advisor. Offered: AWSpS.

Obstetrics and Gynecology

OB GYN 498 Undergraduate Thesis (*) Vontver By arrangement.

OB GYN 499 Undergraduate Research (*) Vontver.

OB GYN 550 P-Voluntary Pregnancy Termination: An Overview of Medical and Social Issues (2) Easterling, Miller A flexible curriculum which allows the medical student to
OB GYN 551 Perinatal Care Elective (1)
Provide an introduction and overview of perinatal care for first- or second-year medical students with emphasis on intrauterine, labor, delivery, and postpartum. Opportunity to observe the patient-provider relationship. Optional labor and delivery observation. Offered: AWSp.

OB GYN 579 P-Obstetric and Gynecologic Investigation (*) Vontver The investigation may cover any one of the following fields: normal and complicated pregnancy, hormone assays in obstetrics and endocrinology, obstetric and gynecologic oncology, genetics. By arrangement.

OBGYN 590 HIV and STIs in Women and Children (3) Examines the emerging global public health crisis and the plight of women and children with HIV/STIs. Reviews targeted approaches pertaining to women and children and their vulnerability to HIV/STIs. Prerequisite: EPI 511 or EPI 512-513. Offered jointly with EPI 507: Sp.

OB GYN 665 P-Introduction to Obstetrics and Gynecology, UH-HMC (*, max. 12) Vontver Introduces students to providing comprehensive medical care and counseling to female patients. Includes management and delivery of obstetrical patients, diagnosis and management of gynecologic diseases, hospital rounds, outpatient clinics, seminars, tutorials, and community health-care agencies for women. Rotations occur at UWMC and Harborview Medical Center. Prerequisite: HUBIO 565. (Six weeks. Limit: six students.)

OB GYN 666 P-Introduction to Obstetrics and Gynecology, Boise (*, max. 12) Vontver Clerkship equivalent to 665 offered at Boise, Idaho (WWAMI). Includes experience in several private physician offices. Prerequisite: HUBIO 565. (Six weeks. Limit: two students. Not offered summer quarter.)

OB GYN 667 P-Introduction to Obstetrics and Gynecology, Madigan (*, max. 12) Vontver Clerkship equivalent to 665 offered at Madigan Army Medical Center, Tacoma. Prerequisite: HUBIO 565. (Six weeks. Limit: three students.)

OB GYN 668 P-Introduction to Obstetrics and Gynecology, Spokane (*, max. 12) Vontver Clerkship equivalent to 665 offered at Spokane (WWAMI). Includes experience in several private physicians' offices. Prerequisite: HUBIO 565. (Six weeks. Limit: three students.)

OB GYN 669 P-Introduction to Obstetrics and Gynecology, Swedish (*, max. 12) Vontver Clerkship equivalent to 665 offered at Swedish Hospital Medical Center. Prerequisite: HUBIO 565. (Six weeks. Limit: two students.) Not offered summer quarter.

OB GYN 670 P-Introduction to Obstetrics and Gynecology, GH-Central (*) Vontver Clerkship equivalent to 665 offered at the Central facility of Group Health Cooperative of Puget Sound in Seattle. Students spend time in delivery room, surgery, and clinic, and have a specific preceptor assigned. Prerequisite: HUBIO 565. (Six weeks. Limit: two students.)

OB GYN 671 P-Introduction to Obstetrics and Gynecology, Anchorage (*) Vontver Clerkship equivalent to 665 offered at Anchorage, Alaska (WWAMI). Includes experience in several private physicians' offices as well as Providence Hospital. Prerequisite: HUBIO 565. (Six weeks. Limit: three students.)

OB GYN 672 P-Introduction to Obstetrics and Gynecology, GH-East (12) Vontver Clerkship equivalent to 665 offered at the Eastside facility of Group Health Cooperative of Puget Sound in Redmond. Students spend time in delivery room, surgery, and clinic, and have a specific preceptor assigned. Prerequisite: HUBIO 565. (Six weeks. Limit: one student.)

OB GYN 673 P-Introduction to Obstetrics and Gynecology, Military, Madigan (12) Vontver Clerkship equivalent to 665 offered at Madigan Army Medical Center. Students spend time in delivery room, surgery, and clinic, and have a specific preceptor assigned. Prerequisite: HUBIO 565. (Six weeks. Limit: two students.)

OB GYN 675 P-Introduction to Obstetrics and Gynecology, Highline (12) Clerkship equivalent to 665 offered at Highline Community Hospital. Students spend time in delivery room, surgery, and clinic, and have a specific preceptor assigned. Prerequisite: HUBIO 565. (Six weeks. Limit: one student.)

OB GYN 676 P-Introduction to Obstetrics and Gynecology, Missoula (12) Clerkship equivalent to 665 offered in Missoula, Montana. Students spend time in delivery room, surgery, and clinic, and have a specific preceptor assigned. Prerequisite: HUBIO 565. (Six weeks. Limit: one student.)

OB GYN 681 P-Gynecological Oncology Subspecialty (8) Vontver Experience in reproductive tract malignancy, chemotherapy, and radiation therapy. Student follows selected patients through primary surgery, recovery, and initial adjuvant treatment, as well as continuing treatment in both clinic and inpatient settings. Prerequisite: basic OB GYN Clerkship. (Limit: two students each four weeks.)

OB GYN 682 P-Antenatal High-Risk Obstetrics (8) Vontver Four weeks on high-risk antenatal obstetrics ward and clinic. Students responsible for initial workups, daily laboratory evaluations, continuing care of high-risk antepartum patients. Weekly conference with obstetrics attending; presentation of one or more topics per rotation. Excellent coordination with resident and attending staff required to maintain patient-care continuity. (Limit: two students each four weeks.)

OB GYN 684 P-Endocrinology of Reproduction (8) Vontver The biochemistry of steroids. Steroid metabolism as related to clinical problems. Diagnosis and treatment of endocrine disorders. Case studies with special emphasis on modern methods of investigation and assisted reproductive technology. (Limit: one student each four weeks.)

OB GYN 685 P-Obstetrics and Gynecology Elective (*, max. 8) Close working relationship with a physician or physicians in the practice of obstetrics and gynecology. May include clinics, hospital rounds, surgery, deliveries, and business aspects of practice.

OB GYN 697 P-Obstetrics and Gynecology Special Electives (*, max. 24) Vontver By arrangement, for qualified students, special clerkship or research opportunities can sometimes be made available at other institutions. Students wishing this course should obtain special assignment form one month before preregistration. Department evaluates student performance. Prerequisite: permission of instructor.

OB GYN 698 P-Introduction to Obstetrics and Gynecology, Away (*, max. 12) Vontver Clerkship equivalent to 665 at sites being evaluated as permanent WWAMI sites (currently includes Silverdale, Evergreen, Fairbanks, Sandpoint, Cheyenne, and Billings). By arrangement. Subject to Dean's Office approval. Department evaluates student performance. Prerequisite: HUBIO 565; permission of instructor.

OB GYN 699 P-WWAMI Obstetrics and Gynecology Special Electives (*, max. 24) By special arrangement for qualified students, special clerkships or externships may be available at institutions other than the University of Washington located outside the WWAMI region. A special assignment form must be obtained one month in advance of preregistration. Prerequisite: permission of department.

Ophthalmology

OPHTH 499 Undergraduate Research (*) Kinyoun (University of Washington Medical Center) Laboratory or clinical research in morphology, biochemistry, immunology, experimental pathology, or clinical studies of the eye and visual system. Offered: AWSp.

OPHTH 501 P-Ophthalmology Preceptorship (1) Kinyoun Individualized experiences with one or more of the full-time faculty members of the department covering research, teaching, and patient care. Students observe activities in the clinic, hospital ward, operating room, and research laboratories. Prerequisite: first- and second-year medical student standing and permission of instructor. Offered: AWSp.

OPHTH 681 P-Ophthalmology Clerkship (4) Sires (Harborview Medical Center) Students gain experience in the diagnosis and treatment of common ocular disorders. Basic examination techniques, including tonometry, ophthalmoscopy, and biomicroscopy. Prerequisite: completion of human biology series. (Limit: one student.) Offered: AWSp.

OPHTH 683 P-Pediatric Ophthalmology Clerkship (4) Weiss (Children's Hospital and Regional Medical Center) Student examines and observes treatment of children with ocular diseases and learns to differentiate trivial from potentially blinding disorders. Programmed text in general ophthalmology furnished. Prerequisite: University of Washington student and completion of human biology series. (Two weeks, full-time. Limit: one student.) Offered: WS.

OPHTH 685 P-Ophthalmology Clerkship (4) Orcutt (VA. Puget Sound Health Care System) Participation in diagnosis and treatment of medical and surgical ocular disease. Outpatient
examinations, inpatient surgery, as well as neuro-ophtalmologic, retinal, and glaucoma consultations. Patients involved in orthopaedics include the care of walk-in and urgent patients, which may demonstrate findings pertinent to the future practice of primary-care physicians. Examination techniques, including tonometry, ophthalmoscopy, and biomicroscopy. Prerequisite: completion of human biology series. (Limit: one student.) Offered: AWSpS.

ORTHP 687 P-Ophthalmology Clerkship (4) Kinyoun (University of Washington Medical Center) Diagnosis and management of eye diseases. Subspecialty clinics include cornea, retina, neuro-ophtalmology, glaucoma, contact lenses, and strabismus. Students attend scheduled conferences in ophthalmic basic and clinical science. Prerequisite: completion of human biology series. (Limit: one student.) Offered: AWSpS.

ORTHP 688 P-Ophthalmology Clerkship (8) Kinyoun, Werner Four-week externship at Alaska Native Medical Center in Anchorage. Opportunity to learn and practice common eye examination techniques, including slit-lamp biomicroscopy, tonometry, and funduscopy. Patients seen three days a week; two days spent in the operating room. Prerequisite: completion of human biology series, MED 665, and SURG 665; fourth-year medical students only. Offered: AWSpS.

ORTHP 697 P-Ophthalmology Special Electives (*, max. 24) Kinyoun By specific arrangement, for qualified students, special clerkship, externship, or research opportunities can be made available at institutions other than the UW. Students wishing to elect this course should obtain from the Dean’s office a special assignment form at least one month before preregistration. Prerequisite: permission of instructor. Offered: AWSpS.

ORTHP 699 P-WWAMI Ophthalmology Special Electives (*, max. 24) By special arrangement for qualified students, special clerkships or externships may be available at institutions other than the University of Washington located within the WWAMI region. Prerequisite: permission of department. Offered: AWSpS.

Orthopaedics

ORTHP 498 Undergraduate Thesis (*) Eyre Student works directly with a preceptor in selecting a suitable area for laboratory or clinical research in the basic science of orthopaedics, and develops a thesis for recognition. Offered: AWSpS.

ORTHP 499 Undergraduate Research (*) Eyre Investigation of pertinent musculoskeletal problems in the orthopaedic laboratories as part of the research group. Offered: AWSpS.

ORTHP 505 P-Preceptorship in Orthopaedic Surgery (1) Opportunity for first- and second-year medical students to gain experience with clinical faculty members in the community. Students observe general aspects of private practice from a longitudinal perspective. Prerequisite: permission of department. Offered: AWSpS.

ORTHP 585 P-Sports Medicine (2) O’Kane Lectures, patient problem presentations, and seminar discussions to explore impact of exercise and sport participation on various body systems. Includes normal and pathologic concerns, biomechanics of certain sports injuries and cardiovascular, pulmonary, and musculoskeletal concerns. Prerequisite: second-year medical student standing. Offered: Sp.

ORTHP 675 P-Preceptorship in Orthopaedics (*, max. 4) Simonian Student spends full time with the preceptor during all his or her working day in order to gain a better understanding of the diagnosis and the management of problems of the musculoskeletal system as seen in the private orthopaedic practice. Prerequisite: SURG 665 or HUBIO 553 and permission of department. (Two weeks, full-time.) Offered: AWSpS.

ORTHP 676 P-Pediatric Orthopaedics (*, max. 6) Diab, Mosca, Song Acquaints students with all aspects of musculoskeletal problems in childhood. Didactic conferences and seminars, and opportunities for active participation in both inpatient and outpatient care at Children’s Hospital and Medical Center, and correlative anatomy and pathology. Prerequisite: SURG 665 or HUBIO 553. (Four weeks, full-time.) Offered: AWSpS.

ORTHP 677 P-Musculoskeletal Trauma (*, max. 8) Benirschke, Chapman, Hanel, Hansen, Henley, Mills, Mirza, Nork, Rout, Sangeorzan, Smith Harborview Medical Center. Emergency room, wards, operating room, and outpatient clinics. Instruction in general and special clinics, including hand, hip, foot, and fracture, with emphasis placed on physical examination of the patient. Students take correlative anatomy and pathology. Prerequisite: SURG 665, HUBIO 553. (Four weeks, full-time.) Offered: AWSpS.

ORTHP 678 P-Musculoskeletal Oncology (8/553) Conrad In-depth experience on musculoskeletal oncology service with primary involvement in initial evaluation, treatment, and postoperative follow-up of patients with various musculoskeletal malignancies. Elective involves experience in surgical, oncologic, radiologic, and pathologic principles of managing sarcomas. Prerequisite: basic orthopaedic elective or permission of instructor. Offered: AWSpS.

ORTHP 680 P-General Orthopaedic Clerkship (*, max. 8) Chansky Veteran’s Administration Hospital; structured to provide a basic education in the fundamentals of the musculoskeletal system. Heavy emphasis is placed on the reconstructive alternatives in the treatment of degenerative joint diseases. Prerequisite: completion of HUBIO series; third- and fourth-year students. Enrollment limited to three. Offered: AWSpS.

ORTHP 681 P-Sports Medicine Orthopaedic Clerkship (8) Allain, Bigos, Bruckner, Clark, Conrad, Larson, Matsen, Mirza, Simonian, Smith, Teitz, Troumble Orthopaedic subspecialty clerkship at University of Washington Medical Center. Preceptor-based outpatient, inpatient, emergency, or operative orthopaedic care. Students work primarily in one subspecialty area and in one general orthopaedic clinic. For students who plan careers in orthopaedic surgery. Prerequisite: completion of HUBIO series, third- and fourth-year medical students. Offered: AWSpS.

ORTHP 682 P-Outpatient Orthopaedics (8) Outpatient orthopaedic experience at University of Washington Medical Center. Emphasis on physical exam, diagnosis, radiographic evaluation, and non-operative treatment. Rotation through general orthopaedics as well as all subspecialty areas. For students who plan careers in primary care. Prerequisite: completion of HUBIO series. Offered: AWSpS.

ORTHP 684 JP-Adult Reconstructive Spine Surgery Clerkship for Orthopaedic Residents (8) Chapman Preceptor-based outpatient, inpatient, emergency, and operative orthopaedic care. Work with faculty specializing in adult reconstructive spine surgery, with a goal to maintain the highest standards of care in the evaluation and management of all patients with spinal disorders. Opportunities to participate in each aspect of this mission. Offered: AWSpS.

ORTHP 685 P-Adult Reconstruction: Total Joint Service (8) Clark Preceptor-based outpatient, inpatient, emergency, and operative orthopaedic care. Students work with faculty in the Total Joint Service which specializes in lower extremity adult reconstructive surgery, including: complex primary hip/knee arthroplasty; less invasive approaches to hip/knee arthroplasty; revision hip/knee arthroplasty; periacetabular and proximal femoral osteotomy; osteotomy about the knee; and hip arthroscopy. Offered: AWSpS.

ORTHP 687 P-Shoulder and Elbow (8) Matsen, K. Smith Preceptor-based outpatient, inpatient, emergency, and operative orthopaedic care. Work with the faculty in the Shoulder and Elbow Service, which provides comprehensive evaluation and management for a wide range of shoulder and elbow problems, including: arthritis, dislocation or instability, fractures, rotator cuff/tendon tears, joint stiffness, and unsuccessful previous surgery. Offered: AWSpS.

ORTHP 697 P-Orthopaedic External Elective (*, max. 12) Simonian Special arrangements can be made for students desiring to take orthopaedic electives at other institutions. Programs generally approved include orthopaedic clerkships at other universities and at large orthopaedic institutes. Prerequisite: HUBIO 553 and permission of department. Offered: AWSpS.

ORTHP 699 P-WWAMI Orthopaedics Special Electives (*, max. 24) By special arrangement for qualified students, special clerkships or externships may be available at institutions other than the University of Washington located within the WWAMI region. Prerequisite: permission of department. Offered: AWSpS.

Otolaryngology—Head and Neck Surgery

OTOHN 498 Undergraduate Thesis (*) Rubel, Weymuller Student works directly with department faculty in selecting a suitable area for laboratory or clinical research in the area of otolaryngology, and develops a thesis for recognition. Offered: AWSpS.

OTOHN 499 Undergraduate Research (*) Rubel, Weymuller Research opportunities offered under direction in the area of otolaryngology. (Twelve weeks.) Offered: AWSpS.

OTOHN 501 P-Preceptorship in Otolaryngology — Head and Neck Surgery (1) Killi One morning a week for a total of 30 hours per quarter spent observing patient care in either
inpatient or outpatient settings at the University of Washington Medical Center, associated
readings. Prerequisite: first- or second-year medical student standing. Coordinator: OTOHNS
office. Offered: AWSpS.

OTOHN 680 Otologyngology — Head and Neck
Surgery Clerkship UW (4/8, max. 24) Hillek,
Makelkoski, Manning, Weymuller Introduction to
surgeon subspecialty of otologyngology-head and
neck surgery. Structured to allow broad
exposures to breadth of specialty. Students see
patients in clinic, join inpatient rounds, have
opportunity to go to operating room. Rotations at
UWMC, VAH, HMC, CHMC, Swedish. Prerequi-
tsite: human biology series; recommended: MED
665 or SURG 665. Offered: AWSpS.

OTOHN 683 P-Otolaryngology — Head and
Neck Surgery Clerkship Madigan (*, max. 8)
(Madigan Army Medical Center) Individual
externship training at outpatient clinic, where
visits average twelve hundred per month,
supplemented by inpatient assignments.
Students may reside at the hospital during
externship, using facilities of bachelor officer
quarter and hospital mess. Prerequisite: completion of human biology series. (Two or four
weeks, full-time;): recommended: MED or SURG
665. Offered: AWSpS.

OTOHN 686 P-Otolaryngology — Head and
Neck Surgery Clerkship Greater Seattle
Private Practice (*, max. 4) Weymuller Clinical
in-depth study for the student whose interest lies in
pathology of the head and neck. Reasonable
flexibility to arrange course content that provides
exposure to all aspects of patient care.
Prerequisite: permission of chairman; recom-
manded: MED 665 or SURG 665. Offered:
AWSpS.

OTOHN 697 P-Otolaryngology — Head and
Neck Surgery Away Externship (8) Weymuller
By specific arrangement. Special clerkship,
externship, or research opportunities can at
times be made available at institutions other than the University of Washington. Students wishing to
elect this course should obtain from the Dean’s
office a special assignment form at least one
month before preregistration. Prerequisite:
permission of chairman. Offered: AWSpS.

OTOHN 699 P-Otolaryngology — Head and
Neck Surgery Clerkship WWAMI (4/8, max. 8)
By special arrangement for qualified students,
special clerkships or externships may be
available at institutions other than the University
of Washington located within the WWAMI region.
Prerequisite: permission of department.

Pathology

PATH 410 Introduction to Pathology (3)
Narayanan Basic pathologic processes, including
and biochemical alterations. Required for physical
therapy students. Others with suitable biology
background by permission of instructor. Offered: A.

PATH 444 General and Systemic Pathology
(2-3), max. 5 Narayanan Basic pathologic
processes that underlie disease, including cell
alterations, genetic and developmental
pathology, environmental pathology, neoplasia,
immunopathology, inflammation, infection, and
systemic diseases. Correlates gross, functional,
and biochemical alterations. For first-year dental
students and graduate students. Requires
reasonable grounding in biological and chemical
sciences. Prerequisite for nondental students:
permission of instructor.

PATH 450 Cell Biology of Aging (3) Martin,
Rabinovitch, Wolf Pathophysiology of aging at
cell and tissue levels (cell replication limits,
telomere shortening, accrual of oxidative
damage, caloric restriction effects, loss of
postreplicative cells, longevity assurance genes).
Proseminar based on student participation.
Undergraduate honors students, graduate
students with biology, zoology, genetics or
medical sciences back grounds. Prerequisite:
permission of instructor. Offered: W.

PATH 498 Undergraduate Thesis (*) Elective.

PATH 499 Undergraduate Research (*)
Elective.

PATH 500 Molecular Basis of Disease (3)
Parks Designed for first and second-year
graduate students to introduce the concepts of
general pathology at the cellular and molecular
levels.

PATH 501 Pathology Proseminars (1) Small
group discussions and presentations by students
based on critical reading of original papers, or on
concurrent seminars, in many areas of
experimental pathology and medicine. Topic
varies by quarter. Prerequisite: permission of
instructor. Offered: AWSpS.

PATH 502 Inflammation and Repair (2) Lecture-
seminar; a seminar course dealing with an
in-depth examination of the processes involved in
inflammation and repair. Credit/no credit only.
Prerequisite: permission of instructor. Offered:
even years.

PATH 507 Introduction to Pathology Research
(2) Bornfeldt, Swiswheim Current developments
and approaches to investigation of the molecular
and cellular basis of disease. Members of the
Pathology faculty present and discuss their own
research projects. Credit/no credit only.
Prerequisite: permission of instructor. Offered: A.

PATH 510 Introduction to Pathology Methods
(3) Bowen-Pope Laboratory course designed to
introduce graduate students to the fundamentals
of image analysis, histology, histopathology, post
mortem evaluation, surgical pathology, and other
methods used to investigate disease etiology,
progression, and manifestation in humans and in
animal models. Prerequisite: permission of
instructor. Offered: Sp.

PATH 511 Topics in Experimental Pathology
(1-2, max. 10) Bornfeldt Focus on areas of
research relevant to experimental pathology.
Prerequisite: permission of instructor. Offered:
AWSpS.

PATH 512 Molecular Basis of Disease: Death
and Repair (1.5) First in a series designed to
introduce students to medically important
diseases and physiologic processes and
experimental approaches to elucidating the
cellular processes underlying these diseases.

COVERS BASIC CELL/TISSUE PROCESSES THAT UNDERLIE NORMAL HOMEOSTASIS AND MOST DISEASE AND, INCLUDING APOPTOSIS, NEROSIS, STEM CELLS, IMMUNOMODULATION, GRANULATION TISSUE, TISSUE REGENERATION, REPAIR AND FIBROSIS.

PATH 513 Mechanisms of Neurodegeneration
(1.5) Introduction to the cellular and molecular
mechanisms that underlie neurodegenerative
diseases, including introduction to the normal
development and anatomy of the central nervous
system, a review of epidemiologic, genetic,
and clinical research tools used in the investigation
of these diseases, and a systematic review of
the major neurodegenerative diseases.

PATH 514 Comparative Pathology Conference
(1, max. 6) See Comparative Medicine
courses.

PATH 515 Molecular Medicine (3) Rosen
Graduate-level introduction to the interplay of
basic science and clinical medicine. Covers
inflammation, vascular disease, metabolic
disorders, cancer biology, and molecular-, gene-, and cell-based therapies. Each topic discussed
with a patient history. Offered: jointly with CONJ
514; W.

PATH 516 Molecular Basis of Human Genetic
Disease (3) Introduction to the underlying
mechanisms in human genetic disorders,
ranging from the single nucleotide, through
inherited instability, and chromosomal rearrange-
ments. Includes tissue and organ specific
eamples of the manner in which these disorders
provide insights into human biology. Offered: Sp.

PATH 520 Experimental Pathology Seminar (1)
Review of current research in various areas of
experimental pathology by members of the
department and visiting scientists. Credit/no
credit only.

CONJ 520 Anatomy and Autopsy (1/2)
See Conjoint Courses.

PATH 522 Hematopathology Seminar (2)
Sabath Identification of normal lymphocyte and
cellular marrow subpopulations, diagnosis of
leukemias, lymphomas, and benign conditions
that resemble them. Emphasis on histopathology,
cytotoxic, immunologic, and molecular markers.
Clinicopathologic correlation. Offered: jointly with LAB M 522; even years.

PATH 530 Human Cytogenetics (*, max. 4)
DISTChee Sources and methods of preparation
and identification of human chromosomes,
Molecular structure and mapping of chromo-
somes. Human cytogenetic pathology: karyotype-
phentype interactions, chromosome breakage,
and cancer cytogenetics. Prerequisite:
permission of instructor. Offered: even years.

PATH 535 Fundamentals of Human Disease (*,
max. 20) Students study human pathology
through participation in the autopsy service under
direct supervision of a faculty member. They
analyze the histologic, cellular, and biochemical aspects of selected cases, and present their observations in weekly seminars. Prerequisite: PATH 444 or PATH 555 and permission of course director: graduate students only.

PATH 551 Experimental and Molecular Pathology (2-5, max. 20) Introduction to experimental pathology. A tutorial course designed to introduce a graduate student (medical, dental) or senior undergraduate to selected methods and problems through literature surveys and/or laboratory experience. Exploration of causes at the cellular and molecular levels in the study of disease is emphasized. Prerequisite: permission of instructor.

PATH 552 Contemporary Anatomic Pathology (2-5, max. 30) Schwartz Study of recent developments in anatomic pathology. Subject includes areas of basic science and review of systemic pathology. Recent developments and interpretation of these findings are stressed. For pathology residents, fellows, and trainees. Credit/no credit only. Prerequisite: permission of instructor.

PATH 555 Environmental Pathology (3) Monnat, Rhim Modern morphologic, cell biological, and molecular approaches to environmental disease associated with exposure/predisposition. Lectures, seminar discussion, and student presentations. Prerequisite: PATH 410 or PATH 444 or HUBIO 520; recommended: ENV H 514 and ENV H 515. Offered: alternate years.

CONJ 560, 561 Tumor Biology (3, 2) See Conjoint Courses.

PATH 560 Molecular Analysis of Human Disease (*, max. 10) Review and discussion of contemporary research on molecular basis of human disease. Focus on mutational mechanisms, genetic instability, AIDS, and cancer. Students participate in weekly group discussion and work with faculty to select, develop, and present discussion topic. Prerequisite: medical, graduate, or professional standing and permission of instructor. Offered: AWSp.

PATH 562 P-Cardiovascular Pathology Conference (*) Reichenbach Course consists of two parts: a laboratory review of gross and microscopic cardiovascular pathology of selected autopsied cases followed by a combined clinical (medical and/or surgical) and pathology conference discussing these cases. Prerequisite: HUBIO 540 and permission of instructor.

PATH 563 Neuropathology (*) Alvord, Shaw, Sumi Course consists of ten parts. Conferences on gross neuropathology (brain cutting and clinicopathologic correlations) held at six hospitals. Weekly neurology or surgical neuropathology conferences, neuropathology slide show, and neuropathology laboratory case studies. Prerequisite: permission of instructor.

PATH 564 Neuropathology Brain Modeling (4) Alvord Designed along clinically important, functional, neuroanatomic lines, generally based first on the embryologic development of the most primitive segmental elements (sensory, motor and association cells, and simple reflexes), followed by the more elaborate suprasegmental elements (cerebellum, colliculi, and forebrain).

PATH 571 Neuroanatomic Pathology (*) Alvord, Shaw, Sumi The particular diseases occurring in specific parts of the nervous system are considered in terms of the segmental, intersegmental, and suprasegmental components. Clinicopathologic correlations are emphasized. Prerequisite: permission of instructor; recommended as concurrent course: 563.

PATH 572 Neuropathologic Reactions (*) Alvord, Shaw, Sumi The reactions of the nervous system, considered in terms of congenital malformations, inflammations, vascular, traumatic, metabolic-toxic, degenerative, and neoplastic diseases peculiar to the nervous system as a whole. Clinicopathologic correlations are emphasized. Prerequisite: permission of instructor; recommended as concurrent course: PATH 563.

PATH 576 Systemic Pathology II (3) Case examples of gastrointestinal, hematopoietic, lymphoreticular, musculoskeletal, urinary, skin systems, and forensic pathology discussed by students. Relevant laboratory interpretations. Student presentations. Prerequisite: HUBIO 520 or equivalent general pathology course, and permission of instructor.

PATH 584 Neuropathology Brain Modeling Laboratory (4) Alvord Clinically important, functional neuroanatomic study based on embryologic motor, sensory, and association cells and simple reflexes, followed by the more elaborate suprasegmental elements (cerebellum, colliculi, forebrain). Three-dimensional neuroanatomical relationships, critical for understanding neuropathology, can best be obtained in constructing a brain model. Prerequisite: PATH 564, which may be taken concurrently.

PATH 600 Independent Study or Research (*) Credit/no credit only.

PATH 665 P-Surgical Pathology (*) Study of fresh current gross surgical specimens and autopsy specimens and their correlation to a patient’s clinical course through observation of pathologists working in a large hospital setting. Prerequisite: permission of instructor.

PATH 666 P-Renal Pathology Conference (1) Conference-seminar on the histopathologic aspects of renal disease. May be taken concurrently with MED 693. For third- and fourth-year students. Prerequisite: permission of instructor.

PATH 667 P-Renal Pathology Laboratory (*, max. 6) Laboratory elective for third- and fourth-year medical students. Read current literature, review various renal biopsies and urine sediments, and read standard texts prior to a weekly topic-oriented conference. All students earn 1 credit for one-hour seminar per week. May be taken concurrently with MED 693. Prerequisite: permission of instructor.

PATH 668 P-Skin Pathology (*) Histopathologic aspects of skin diseases are presented and discussed in a group-conference type of seminar. Current dermatologic cases also are discussed. Prerequisite: dermatology elective and permission of instructor.

PATH 673 P-Cardiovascular Pathology (*) Reichenbach Spectrum of cardiovascular pathology covered in depth by case studies and gross and microscopic material. Case analysis for presentation, including clinical and gross and microscopic material, prepared outside of class time. Clinicopathologic correlation is emphasized. Prerequisite: HUBIO 540 and permission of instructor and second-year medical student standing.

PATH 679 P-Pathology Summer Clerkship (*, max. 24) Dissection, writeup, and literature review of autopsy. Emphasis on etiology and pathogenesis of disease as a biological process. Designed for students who have not completed organ systems as covered in Human Biology courses. Prerequisite: HUBIO 520 and completion of first year of medical school.

PATH 680 P-Diagnostic Pathology Clerkship — University of Washington Medical Center (*, max. 24) Swanson Medical student participation in dissection and study of autopsy and surgical pathology cases. Cases worked up under senior staff, including dissection, microscopic examination, and literature review. Attendance at pathology conferences and seminars expected. Prerequisite: third- or fourth-year student standing.

PATH 681 P-Diagnostic Pathology Clerkship — Harborview Medical Center (*, max. 24) Deubner.

PATH 682 P-Diagnostic Pathology Clerkship — Veterans Administration Hospital (*, max. 24) Thorning.

PATH 683 P-Diagnostic Pathology Clerkship — Medical Examiner’s Office (*, max. 24) Raven.

PATH 685 P-Diagnostic Pathology Clerkship — Sacred Heart Hospital, Spokane (*, max. 24) Williamson.

PATH 686 P-Diagnostic Pathology Clerkship — Overlake Medical Center (*, max. 24).

PATH 687 P-Diagnostic Pathology Clerkship — Children’s Hospital and Medical Center (*, max. 24) Patterson.

PATH 688 P-Diagnostic Pathology Clerkship — Madigan Army Medical Center (*, max. 24).

PATH 689 P-Diagnostic Pathology Clerkship — Valley Medical Center (*, max. 24).

PATH 690 P-Diagnostic Pathology Clerkship — Northwest Medical Center (*, max. 24) Patton.

PATH 691 P-Diagnostic Pathology Clerkship — General Hospital of Everett (*, max. 24).

PATH 692 P-Diagnostic Pathology Clerkship — Group Health Cooperative (*, max. 24).

PATH 697 P-Pathology Special Electives (*, max. 24) By special arrangement, students can have clerkships, externships, or research opportunities at institutions other than the University of Washington. Students who wish to elect this course should obtain Special Assignment forms from the Dean’s office at least one month before advance registration. Prerequisite: permission of instructor.

PATH 699 P-WWAMI Pathology Special Electives (*, max. 24) By special arrangement for qualified students, special clerkships or externships may be available at institutions other than the University of Washington located within the WWAMI region. Prerequisite: permission of department.
PATH 700 Master’s Thesis (*).
PATH 800 Doctoral Dissertation (*).

Pediatrics

PEDS 498 Undergraduate Thesis (*) Bennett For medical students. Offered: AWSpS.

PEDS 499 Undergraduate Research (*) Bennett Participation in various clinical or basic research programs in progress, specifically: child development, developmental biology, human embryology and teratology, medical genetics, infectious diseases, neonatology, neuroembryology, cardiology, endocrinology and metabolism, immunology, respiratory disease. Offered: AWSpS.

PEDS 505 P-Preceptorship in Pediatrics (1) Bennett To provide opportunity for first- and second-year medical students to gain personal experience with medical practice situations for pediatrics by being stationed with carefully selected clinical faculty members in their offices. Prerequisite: permission of instructor. Enrollment limited. Coordinator: Department of Pediatrics. Credit/no credit only. Offered: AWSpS.

PEDS 530 P-Homeless Youth and Their Medical Care (1) Deisher, Smith Clinic-based setting for seminar and interview practice with adolescents; students learn how to deal with special health problems and other related problems of "street kids" through interviews and observations. Credit/no credit only. Offered: W.

PEDS 611 City Doc FREE-TEEN Clinic (*, max. 24) Breuner, Giesel Participation in a free clinic for out-of-home youth, either Monday or Tuesday evenings. Clinical services include general medical care, with a focus on reproductive health. STD evaluations/treatment, and the impact of a homeless lifestyle on general health. Offered: AWSpS.

PEDS 630 P-WRITE Pediatrics Clinical Clerkship (*, max. 24) Basic clinical clerkship for students enrolled in the WRITE Program. Prerequisite: completion of basic curriculum; third- and fourth-year students; acceptance in the WRITE program.

PEDS 661 P-Pediatric General Clerkship, Anchorage (*, max. 24) Lyon General introductory pediatric clerkship. One-half in hospital setting; one-half in outpatient department, clinic, or private office. Open to all third- and fourth-year medical students. Prerequisite: HUBIO 563. (Six weeks, full time. Limit: twenty-four students.) Offered: AWSpS.

PEDS 662 P-Pediatric General Clerkship (*, max. 24) Newman General introductory pediatric clerkship. One-half in hospital setting; one-half in outpatient department, clinic, or private office. Location preferences are considered. Open to all third- and fourth-year medical students. Prerequisite: HUBIO 563. (Six weeks, full time. Limit: twenty-four students.) Offered: AWSpS.

PEDS 663 P-Pediatric General Clerkship (*, max. 24) Schweich General introductory pediatric clerkship. One-half in hospital setting; one-half in outpatient department, clinic, or private office. Location preferences are considered. Open to all third- and fourth-year medical students. Prerequisite: HUBIO 563. (Six weeks, full time. Limit: twenty-four students.) Offered: AWSpS.

PEDS 664 P-Pediatric General Clerkship (*, max. 24) Bradford General introductory pediatric clerkship. One-half in hospital setting; one-half in outpatient department, clinic, or private office. Open to all third- and fourth-year medical students. Prerequisite: HUBIO 563. (Six weeks, full time. Limit: twenty-four students.) Offered: AWSpS.

PEDS 665 P-Pediatric General Clerkship (*, max. 24) Bennett General introductory pediatric clerkship. One-half in hospital setting; one-half in outpatient department or clinic. Open to all third- and fourth-year medical students. Prerequisite: HUBIO 563. (Six weeks, full time. Limit: twenty-four students.) Offered: AWSpS.

PEDS 666 P-Pediatric General Clerkship (*, max. 24) Marron General introductory pediatric clerkship. One-half in hospital setting; one-half in outpatient department, clinic, or private office. Open to all third- and fourth-year medical students. Prerequisite: HUBIO 563. (Six weeks, full time. Limit: twenty-four students.) Offered: AWSpS.

PEDS 667 P-Pediatric General Clerkship (*, max. 24) Newman General introductory pediatric clerkship. One-half in hospital setting; one-half in outpatient department, clinic, or private office. Open to all third- and fourth-year medical students. Prerequisite: HUBIO 563. (Six weeks, full time. Limit: twenty-four students.) Offered: AWSpS.

PEDS 668 P-Pediatric General Clerkship (*, max. 24) Stucky General introductory pediatric clerkship. One-half in hospital setting; one-half in outpatient department, clinic, or private office. Open to all third- and fourth-year medical students. Prerequisite: HUBIO 563. (Six weeks, full time. Limit: twenty-four students.) Offered: AWSpS.

PEDS 669 P-Pediatric General Clerkship (*, max. 24) Gleason Participation in the activities of the newborn and premature divisions; ward rounds, seminars, conferences, and familiarization with certain laboratory techniques, particularly those relating to acid-base balance. Prerequisite: PEDS 665. (Limit: two students.) Offered: AWSpS.

PEDS 670 P-Pediatric Infectious Diseases (*, max. 24) Rubens Students see and work up clinic consultations and present in detail to attending physician. Daily rounds include problem-solving discussions and didactic presentations in broad category of infectious diseases. Opportunity for experience in clinical research and laboratory techniques. Prerequisite: PEDS 665 or permission; third- and fourth-year medical student standing. (Limit: one student.) Offered: AWSpS.

PEDS 671 P-Pediatric Endocrinology (*, max. 24) Focuses on the evaluation of the normal progression of hormone mediated processes in children and the recognition, diagnosis and management of a variety of endocrine problems. Includes participation in clinics, impatient endocrine rounds and a variety of conferences at Children’s Hospital and Regional Medical Center. Prerequisite: PEDS 665. (Limit: one student.) Offered: AWSpS.

PEDS 673 P-Office Practice (*, max. 12) Bennett Opportunity to observe and function in the private patient settings of a number of clinical pediatric faculty and to accompany pediatricians as they pursue their daily activities in the community. Prerequisite: PEDS 665. Offered: AWSpS.

PEDS 677 P-Clinical Allergy and Immunology (*, max. 12) See Conjoint Courses.

PEDS 679 P-Clinical Problems in Developmental Disabilities (*, max. 12) Bennett Experience in multidisciplinary evaluation and management of the handicapped child. Prerequisite: PEDS 665. (Limit: one student.) Offered: AWSpS.

PEDS 680 P-Pediatric Clinics (*, max. 24) Bennett One to ten half-day sessions may be elected each week for four weeks in the following areas: general pediatrics, endocrinology, neurology, immunology, arthritides, cardiology, congenital defects and retardation, well-child, teratology, adolescent medicine, allergy, cystic fibrosis, hematology, prematurity, neonatology, and poison control. Enrollment limited.

PEDS 681 P-Pediatric Genetics (*, max. 24) Pagon Clinical focus on evaluation and management of children with genetic disorders. Exposure to genetic counseling, the evaluation of children with hereditary structural defects, and diagnosis and management of children with inborn errors of metabolism. Emphasis on genetic mechanisms that cause human disease. Prerequisite: PEDS 665. (Two, four, six, or twelve weeks. Limit: one student.) Offered: AWSpS.

PEDS 682 P-Congenital Defects-Clinical Experience (*, max. 24) Chance, Davis Advanced course in pediatrics providing experience in the clinical diagnosis and management of structural and metabolic congenital defects. Prerequisite: permission of instructor. (Limit: one student.) Offered: AWSpS.

PEDS 683 P-Pediatric Nephrology (8) Eddy Four-week elective clerkship at Children’s Hospital and Medical Center. Students participate in nephrology and transplant rounds, consult with renal fellows and attend transplant work sessions. Prerequisite: three- or fourth-year medical student, PEDS 665, and MED 665 or equivalent. (Limit: two students.) Offered: AWSpS.

PEDS 684 P-Pediatric Pulmonary Medicine (8) Redding Respiratory disorders, diagnostic techniques and treatments unique to children in the inpatient, intensive care, and outpatient settings. Application of principles of pulmonary physiology to clinical problems. Students conduct consultations under the supervision of the attending and present a topic of choice. Inpatient rounds and clinics. Prerequisite: PEDS 665, fourth-year medical student standing. (Limit: one student.) Offered: AWSpS.

PEDS 685 P-Pediatric Hematology and Oncology (*, max. 24) Bernstein One-on-one teaching plus four weekly didactic sessions. Specific training in techniques and interpretation of bone marrow aspirations, intravenous chemotherapy, transfusions, and laboratory techniques of hematologic evaluation. Self-learning programs available. Prerequisite: PEDS 665. (Two, four, six, or twelve weeks, full-time.) (Limit: one student.) Offered: AWSpS.

PEDS 686 P-Pediatric Cardiology (*, max. 24) Guntheroth, Kawabata Emphasis on physical diagnosis and electrocardiography and on clinical
Knowledge of diagnostic techniques and surgical possibilities for inpatients and outpatients with cardiovascular problems. Opportunity to observe catheterizations and cardiovascular operations. Weekly clinics and twice-daily inpatient rounds. Prerequisite: PEDS 665. (Limit: one student.) Offered: AWSpS.

PEDS 691 P-Advanced Pediatric Clerkship (*, max. 24) Bennett Inpatient and/or outpatient experience with responsibilities comparable to intern for patient workup, diagnosis, and care. Available at any one, or combination, of affiliated hospitals, including WWAMI units in Alaska, Idaho, Montana, or Washington. Students interested in this option should make arrangements well in advance of registration. Prerequisite: PEDS 665. (Limit: two students.) Offered: AWSpS.

PEDS 699 P-WWAMI Pediatrics Special Electives (*, max. 24) Bennett By specific arrangement, for qualified students, special clerkship externship or research opportunities at institutions other than the University of Washington. The faculty can advise on possible opportunities. Obtain special assignment form from Dean’s office at least one month before preregistration. Prerequisite: permission of instructor at away site. Offered: AWSpS.

PEDS 699 P-WWAMI Pediatrics Special Electives (*, max. 24) Bennett By special arrangement for qualified students, special clerkships or externships may be available at institutions other than the University of Washington located within the WWAMI region. Prerequisite: permission of department at away site.

**Pharmacology**

PHCOL 401 General Pharmacology I (2-4, max. 4) Wang Principles governing drug-receptor interactions, dose-response relationships, desensitization, and tolerance. Drug toxicity, allergy, mutagenesis, and carcinogenesis. Pharmacogenomics and DNA/RNA therapies. General pharmacology of drugs acting on the endocrine and vascular systems. For pharmacy students and other undergraduates. Offered: A.

PHCOL 402 General Pharmacology II (3/4) Storm General pharmacology of drugs acting on the autonomic, cardiovascular, and central nervous systems. For Pharmacy students and other undergraduates. Prerequisite: PHCOL 401. Offered: W.

PHCOL 434 General Pharmacology (2) Halpern, Watson Lectures concerning the action of drugs on physiological and pathological processes with special emphasis on agents of special importance in the practice of dentistry. For dental students. Offered: A.

PHCOL 435 General Pharmacology (2) Halpern, Watson Lectures concerning the action of drugs on physiological and pathological processes with special emphasis on agents of special importance in the practice of dentistry. For dental students. Offered: W.

PHCOL 498 Undergraduate Thesis (*) Offered: A.

PHCOL 499 Undergraduate Research (*) Participation in departmental research projects. Offered: AWSpS.

PHCOL 507 Pharmacology Seminar (1) Presentation of comprehensive reports on recent medical and scientific literature in fields of current importance. Research progress reports, and reports on results of completed research. Prerequisite: permission of instructor. Offered: AWSp.

PHCOL 510 Drug Discovery and Emerging Therapeutics (2) Zheng Consideration of the general principles and current approaches involved in modern drug discovery and development, with an emphasis on basic concepts in drug action, delivery, and metabolism. Discussion of novel drug discovery techniques and emerging non-standard therapeutics. Prerequisite: organic chemistry, biochemistry, and introductory anatomy and physiology. Offered: W.

PHCOL 511 General Pharmacology I (2) Nathanson Consideration of the pharmacology of the cardiovascular and autonomic nervous systems. Emphasizes the mechanisms of neurotransmitter, hormone, drug action at autonomic synapses, and the molecular basis for physiology and pathophysiology of the cardiovascular system. Lectures, group discussion, and analysis of recent research. Prerequisite: organic chemistry, biochemistry, introductory anatomy, and physiology. Offered: W.

PHCOL 512 General Pharmacology II (1-5, max. 5) Bagaielh Consideration of the neurobiological basis of drug action on the central nervous system, including mechanism of action and therapeutic use in psychiatric disorders; neurodegeneration/neuroinflammation; control of neuronal excitability and pain; drug addiction and dependence. Lecture, group discussion, and analysis of recent research. Prerequisite: organic chemistry, biochemistry, introductory anatomy, and physiology. Offered: Sp.

PHCOL 513 Endocrine Pharmacology and Chemotherapeutics (2) McKnight Consideration of the pharmacology of endocrine systems including the hypothalamic/pituitary regulatory peptides, glucocorticoid hormones/growth factors, peptide and steroid hormones. Basic principles of chemotherapeutics of endocrine and other cancers, as well as viral and microbial diseases. Lecture, group discussion and analysis of recent research. Prerequisite: organic chemistry, biochemistry, introductory anatomy, and physiology. Offered: Sp.

PHCOL 514 Current Topics in Pharmacology (1) McKnight Current research related to the mechanisms of drug action presented in a seminar format. Presentations include relevant background material as well as detailed experimental results taken from current research articles. Prerequisite: permission of instructor. Offered: AWSp.

PHCOL 515 General Pharmacology Laboratory (*, max. 9) Laboratory course for professional and graduate students who wish to do independent laboratory research under the direction of a specific faculty member. Prerequisite: permission of instructor. Offered: AWSp.

PHCOL 519 Introduction to Laboratory Research in Pharmacology (4) Storm On a rotation basis, students discover individual research projects in the laboratories of different faculty members. At the end of each quarter students make formal presentations of their work. For first-year graduate students in pharmacology. Offered: AWSp.

PHCOL 527 Drug Metabolism (4) Rettie Considerations of the biochemical mechanisms for the biotransformation of drugs and foreign compounds. Open to medical and graduate students. Prerequisite: one year graduate, medical, or dental biochemistry, or permission of instructor. Offered: jointly with MEDCH 527; odd years; W.

PHCOL 529 Ion Channel Pharmacology (2) Catterall, Tempe! Current topics in ion channel structure, function, genetics, and pharmacology, including consideration of role in electrical signaling in cell membranes and information transfer and processing in nervous system, inherited diseases of ion channels, and sites and mechanisms of action of drugs and toxins. Prerequisite: CONJ 532 and CONJ 536 or permission of instructor. Offered: even years; A.

PHCOL 530 Neuronal Signaling Pathways (2) Beavo, Pham, Storm, Xia Advanced consideration of the molecular events between drug or hormone binding to receptors and the resulting responses. Emphasizes roles played by signal transduction pathways in regulation of synaptic plasticity, memory formation, neuronal apoptosis and developmental neurobiology. Prerequisite: UCONJ 532 or permission of instructor. Offered: every year; W.

PHCOL 531 Genetic Analysis of Signaling Systems (3) McKnight, Moon Current topics involving signal transduction are discussed with an emphasis on genetic analysis of multicellular systems and creative experimental design. Prerequisite: 9 credits of graduate-level courses in molecular and cellular biology, biochemistry, or genetics, or permission of instructor. Offered: odd years; Sp.

PHCOL 534 Molecular Basis of Addictive Drug Action (2) Chavkin, Mackie, Stella Advanced consideration and discussion of current literature addressing the basis of opiate, phychostimulant, and cannabinoid effects on signal transduction events, electrical activity of neurons, and drug-motivated behaviors in animal models of human drug abuse. Prerequisite: PHCOL 512 or permission of instructor. Offered: even years; A.

PHCOL 535 Transcriptional Control in Human Disease (3) Bornsztyk, Wang Advanced consideration and discussion of the mechanisms regulating transcription/gene expression and of aberrant transcription factors which disrupt this process found in cancer and other human diseases. Prerequisite: PHCOL 512 or permission of instructor. Offered: even years; A.

PHCOL 536 Free Radicals in Health and Disease: A Pharmacological Perspective (2) Hinds, Vincenzi Exploration of chemistry and properties of free radicals and related reactive-oxygen and nitrogen species. Review of biological effects of free radicals and reactive oxygen and nitrogen species with a view toward pharmacological intervention. Analysis of literature implicating free radicals in disease processes. Prerequisite: permission of instructor. Offered: odd years; Sp.

PHCOL 549 Molecular Basis of Neurodegenerative Disease (2) La Spada, Muchowski, Pallanck Introduces a broad range of neurodegenerative diseases, focusing upon the approaches that have led to recent discoveries and emphasizing the elucidation of mechanisms...
and pathways of disease pathogenesis. Offered: jointly with GENOME 549/NEUBEH 549.

PHCOL 550 An Overview of Faculty Research (1) Wang Reviews research topics currently being studied in pharmacology. Student reads articles published on each topic. Credit/no credit only. Prerequisite: first-year student standing in pharmacology. Offered: A.

PHCOL 560 Regulation of Cell Function by Carboxylic Phosphodiesterases (1) Beavo Discussion of research strategies, methodologies, and literature relating to regulation of cyclic nucleotide levels in the cell. Emphasis on practical problem solving, data analysis, and presentation of methods important to understanding published data and designing new experiments in this area of research. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSpS.

PHCOL 561 Molecular Properties of Ion Channels (1) Catterall Discussion of research strategies and methodologies involved in the regulation of signal transduction and synaptic physiology. Emphasis on practical problem solving, data analysis, and presentation. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSpS.

PHCOL 562 Regulation of Synaptic Physiology (1) Chavkin Discussion of research strategies and methodologies, and literature concerning the structure, function, and regulation of sodium and calcium channels and the mechanism of action of drugs on them. Emphasis on experimental problem solving, data analysis, and presentation. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSpS.

PHCOL 563 Signal Transduction Mechanisms in Neuroplasticity and Neuron Growth (1) Storni Discussion of research strategies, methodologies, and literature relating to signal transduction mechanisms important for neuroplasticity and regulation of neuron growth in the central nervous system. Emphasis on practical problem solving, data analysis, and presentation methods important to modern scientific work. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSpS.

PHCOL 564 Cellular Regulation by Protein Kinases (1) McKnight Analysis of research problems, techniques, and emerging concepts in the study of the function of protein kinases. Emphasis on critical evaluation of research and development of presentation skills. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSpS.

PHCOL 565 Intercellular Signaling in Development (1) Moon Molecular genetic approaches to dissecting the roles and mechanisms of intracellular signaling during development. Emphasis on vertebrate genes related to Drosophila segment polarity genes. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSpS.

PHCOL 566 Molecular Pharmacology of Neurotransmitter and Neuroreceptor (1) Nathanson Discussion of research strategies and methodologies in the areas of molecular neurobiology and signal transduction of muscarinic receptors, G-proteins, and neurokinine receptors. Emphasis on practical problem solving, data analysis, and presentation methods important to modern scientific work. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSpS.

PHCOL 567 Mechanisms of Carcinogenesis (2) Xin Lectures/presentations of biochemical and molecular basis of carcinogenesis induced by environmental agents, including approaches to identification of carcinogens. Role of cell proliferation and cell death (apoptosis) in cancer formation and cancer treatment. Molecular mechanisms that regulate proliferation and apoptosis. Prerequisite: ENV H 516, ENV H 405, or permission of instructor. Offered: jointly with ENV H 567; A.

PHCOL 568 Pharmacology of Free Radicals (1) Vencini Advanced considerations of current literature and experimental design, implementation and interpretation of research dealing with the effects of reactive oxygen species and free radicals on cell membranes and cells. Discussion of the relationships of such phenomena to human disease and the effects of drugs thereon. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSpS.

PHCOL 569 Molecular Genetics of Potassium Channel Function (1) Tempel Discussion of research strategies, methodologies, and literature concerning the structure, function, and regulation of potassium channel genes and their role in behavior as studied in mutant mice. Emphasis on experimental problem solving, data analysis, and presentation. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSpS.

PHCOL 570 Molecular Mechanisms of Neurosecretion (1) Zigler Discussion of research strategies, methodologies, and literature relating to regulation of cyclic nucleotide levels in the cell. Emphasis on experimental problem solving, data analysis, and presentation. Credit/no credit only. Prerequisite: permission of instructor.

PHCOL 571 Transcriptional Regulation of Growth Control Genes (1) Wang Discussion of research strategies, methodologies, and literature relating to proliferative growth control, cellular differentiation, and gene expression. Emphasis on practical problem solving, data analysis, and presentation. Credit/no credit only. Prerequisite: permission of instructor.

PHCOL 572 Transcriptional Regulation of Growth Control Genes (1) Wang Discussion of research strategies, methodologies, and literature relating to proliferative growth control, cellular differentiation, and gene expression. Emphasis on practical problem solving, data analysis, and presentation. Credit/no credit only. Prerequisite: permission of instructor.

PHCOL 573 Signaling Systems Linked to Neuroinflammation (1) Steife Discussion of research strategies, methodologies, and literature related to neuroinflammation, microglial cell activation, and the cannabinoid signaling pathway. Emphasis on solving practical problem, data analysis, and presentation. Prerequisite: permission of instructor. Offered: A, W, Sp, S.

PHCOL 574 Molecular and Cellular Basis of Chaperone Function and Protein Misfolding Diseases (1) Muchowski Analysis of research problems, techniques and emerging concepts in the study of the molecular chaperones and protein misfolding diseases. Emphasizes experimental problem solving, data analysis, and development of presentation skills. Prerequisite: permission of instructor. Offered: AWSpS.

PHCOL 575 Structural Biology of Ubiquitination (1) Zheng Discussion of research strategies, methodologies, and literature concerning the structure, function, and regulation of ubiquitin-protein ligases and the mechanism underlying ubiquitination and ubiquitin-dependent proteolysis. Emphasis on experimental problem solving, data analysis, and presentation. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSpS.

PHCOL 600 Independent Study or Research (*) Pharmacology graduate students only. Offered: AWSpS.

PHCOL 700 Master's Thesis (*) Pharmacology graduate students only. Offered: AWSpS.

PHCOL 800 Doctoral Dissertation (*) Pharmacology graduate students only. Offered: AWSpS.

**Physiology and Biophysics**

CONJ 401, 402, 403 Human Anatomy and Physiology (4, 4, 4) Linder, Melby See Conjoint Courses.

P BIO 405 Human Physiology (4) Wordeman Intensive coverage of physiology through lectures, conference. Autumn Quarter: excitable tissue, skeletal muscle; spinal reflex; cardiovascular, respiratory physiology; acid base balance; autonomic nervous system; temperature regulation. Winter Quarter: renal, body fluids; neuroendocrinology; reproductive, gastrointestinal, neurophysiology. Required for dental, graduate nursing, and bioengineering students. Also offered for graduate students. Offered: A.

P BIO 406 Human Physiology (4) Hilstad Intensive coverage of physiology through lectures, conference. Autumn Quarter: excitable tissue, skeletal muscle; spinal reflex; cardiovascular, respiratory physiology; acid base balance; autonomic nervous system; temperature regulation. Winter Quarter: renal, body fluids; neuroendocrinology; reproductive, gastrointestinal, neurophysiology. Required for dental, graduate nursing, and bioengineering students. Also offered for graduate students. Offered: W.

P BIO 424 Vision and Its Physiological Basis (5) NW Tailor Behavioral neurobiology of human vision: color vision, acuity and spatial vision, light and dark adaptation, visual development. Correlation of visual functioning with known optical, biochemical, physiological, and anatomical substrates. Prerequisite: 2.0 in either PSYCH 333, NBIO 302, or PHIL 160. Offered: jointly with PSYCH 424; W.

P BIO 498 Undergraduate Thesis (*) Offered: AWSpS.

P BIO 499 Undergraduate Research (*) Offered: AWSpS.

P BIO 505 Topics in Physiology (0.5) Topics include excitation-contraction coupling, muscle structure, and molecular basis of contraction, regulation of contraction, muscle mechanisms, energetics, and adaptation. Emphasis on skeletal muscle with some discussion of cardiac and smooth muscle. Series of six lecture discussions. Prerequisite: first-year P BIO graduate student. Offered: A.

P BIO 507 Cardiovascular and Respiratory Physiology (3) Cardiovascular physiology: the heart, microcirculation, hemodynamics, regional circulation, and reflex integration. Respiratory physiology: the lung, pulmonary circulation, alveolar ventilation, gas exchange, control of
breathing, acid-base regulation, exercise. Offered: W.

P BIO 508 Introduction to Laboratory Research in Physiology (2-5) Students participate in the performance of ongoing projects in designated research laboratories. Emphasizes experimental design, methodology and techniques. For first- and second-year graduate students in physiology and biophysics to provide a basis for future independent research. Offered: AW/Sp/S.

P BIO 509 Neuroendocrinology (3) Steiner Emphasizes the cellular and molecular aspects of several topics in neuroendocrinology, including neuropeptide genes, reproduction, steroid hormone regulation of gene expression, mechanisms of hormone action, endocrine rhythms, and neural oscillations. Prerequisite: either BIOL 201, BIOL 202, and BIOL 203, or BIOL 180, BIOL 200, and BIOL 220; BIOL 440, BIOL 441, BIOL 442 or permission of instructor. Offered: jointly with NEUBEH 541; W, odd years only.

P BIO 510 Physiology Survey (2) Reading and discussion of the research literature in cellular, molecular, and systems physiology. Students write a critical evaluation of each paper in the manner of a peer review. All three quarters are required for second-year P BIO students. Prerequisite: completion of one year of P BIO graduate study. Offered: A.

P BIO 511 Physiology Survey (2) Reading and discussion of the research literature in cellular, molecular, and systems physiology. Students write a critical evaluation of each paper in the manner of a peer review. All three quarters are required for second-year P BIO students. Prerequisite: completion of one year of P BIO graduate study. Offered: W.

P BIO 512 Physiology Survey (2) Reading and discussion of the research literature in cellular, molecular, and systems physiology. Students write a critical evaluation of each paper in the manner of a peer review. All three quarters are required for second-year P BIO students. Prerequisite: completion of one year of P BIO graduate study. Offered: Sp.

P BIO 513 Practicum in Teaching Physiology and Biophysics (4) Students undertake instructional material development, presentation of materials and develop problem-solving techniques. Credit/no credit only. Offered: AW.

P BIO 516 Physiological Proseminar (7) Hlastala Guided survey of the experimental literature in cardiovascular and respiratory physiology. Course conducted as seminar with oral analysis of assigned papers and topics. Prerequisite: permission of instructor. Offered: A.

P BIO 518 Research Topics in Cardiovascular Physiology (1) Feigl Graduate students and faculty members present and discuss current literature and research. Prerequisite: permission of instructor.

P BIO 519 Membrane and Muscle Biophysics Seminar (1) Hille Lectures on current research topics in cell membrane function and muscle contraction. Credit/no credit only. Prerequisite: permission of instructor. Offered: Sp.

P BIO 520 Physiologic Seminar (*) Selected topics in physiology. Prerequisite: permission of instructor.

P BIO 521 Biophysics Seminar (*) Selected topics in biophysics. Prerequisite: permission of instructor.

P BIO 525 Readings in Advanced Physiology and Biophysics (*) Guided study of the experimental literature of physiology and biophysics. Essays are written and discussed with the staff. Emphasis is placed on critical analysis, accuracy of expression, bibliographical technique, and other factors of good scholarship. Prerequisite: permission of instructor. Offered: A.

P BIO 526 Readings in Advanced Physiology and Biophysics (*) Guided study of the experimental literature of physiology and biophysics. Essays are written and discussed with the staff. Emphasis is placed on critical analysis, accuracy of expression, bibliographical technique, and other factors of good scholarship. Prerequisite: permission of instructor. Offered: W.

P BIO 527 Readings in Advanced Physiology and Biophysics (*) Guided study of the experimental literature of physiology and biophysics. Essays are written and discussed with the staff. Emphasis is placed on critical analysis, accuracy of expression, bibliographical technique, and other factors of good scholarship. Prerequisite: permission of instructor. Offered: Sp.

CONJ 531 Signaling Mechanisms in Excitable Cells (1.5) See Conjunct Courses.

P BIO 532 Discussion in Cell Signaling and Molecular Physiology (2) Discusses fundamental issues in cell excitation and molecular and cellular physiology. Focuses on problem solving and reading from original literature. Emphasizes student participation. Prerequisite: first-year graduate students in neurobiology or physiology and biophysics. Offered: jointly with NEUBEH 532; A.

P BIO 541 Motor Systems I: Peripheral, Spinal, and Cortical Mechanisms (3) Binder, Fetzer; Fetz Discussion of research papers on the physiology of the motor unit and the spinal and cortical neurons that control motor unit activity. Prerequisite: NEUBEH 501-503 or permission of instructor.

P BIO 542 Motor Systems II: Brainstem Mechanisms (3) Anderson, Fuchs Critical discussion of research papers and resulting concepts regarding the roles of various brainstem systems in controlling somatic and ocular movements. Each student is responsible for leading the discussion of one topic. Prerequisite: NEUBEH 502 and NEUBEH 503 or equivalent and permission of instructor.

P BIO 544 Properties of Neurons (3) Critical reading and discussion of papers on passive, active, and integrative properties of single invertebrate and mammalian neurons. Provides understanding of how a variety of cellular mechanisms contribute to neuronal discharge patterns. Prerequisite: CONJ 501, CONJ 502, CONJ 503 and NEUBEH 501, NEUBEH 502, NEUBEH 503 or equivalent and permission of instructor. Offered: even years; A.

P BIO 545 Quantitative Methods in Neuroscience (3) Reike, Shadlen Discusses quantitative methods applicable to the study of the nervous system. Revolves around computer exercises/discussion of journal papers. May include linear systems theory, Fourier analysis, ordinary differential equations, stochastic processes, signal detection and information theory. Prerequisite: NEUBEH 501, 502, 503, or by permission of instructor. Offered: jointly with NEUBEH 545; W.

P BIO 547 Readings in Cell Physiology (2/3, max. 15) Hille Reading and discussion of research literature on excitable cells. Emphasis on membrane excitability, transport, contractility, growth factors, and extracellular matrix. Topics vary. Prerequisite: CONJ 501 or equivalent. Offered: W.

P BIO 549 Plasticity in the Vertebrate Nervous System (2) Emphasizes mammalian CNS. Examples of anatomical, pharmacological plasticity chosen from literature. Structure changes during development and in adult (hippocampus, spinal cord, nerve-muscle) studied and as correlates of learning. Students responsible for leading class discussion of one topic. Credit/no credit only. Prerequisite: graduate-level courses in neurophysiology and neuroanatomy; understanding of basic neuronal mechanisms. Offered: even years; Sp.

P BIO 550 Biophysics of Calcium Signaling (1) Hille, Santana Introduction to cellular calcium signaling including theoretical and experimental issues of calcium signal detection and biological conclusions. Prerequisite: CONJ 531 Offered: jointly with NEUBEH 550; odd years; Sp.

P BIO 551 Mouse Models (1) Illustrates the use of transgenic and targeted-gene disruption technologies for developing mouse models of the disease. Introduces the methodology of producing transgenic and knockout mice. Discusses several examples of disease models using the most recent primary literature as a source. Offered: jointly with NEUBEH 551.

P BIO 552 Synaptic Integration (1) Binder, Powers Discussion of recent papers on how neurons in the central nervous system integrate concurrent synaptic inputs. Includes: effects of driving force on synaptic currents, effects of conductances on dendritic properties, transfer of currents from dendrites to soma, and transformation of currents into spike train outputs. Offered: jointly with NEUBEH 552.

P BIO 553 Learning and Memory: Synapses and Systems (2) Jagadeesh, Sullivan Five-week mini-course evaluates the current state of knowledge on the mechanisms that allow people to learn and remember. After introductory overviews of the cellular and molecular mechanisms underlying long-term synaptic plasticity and the multiple systems existing for
learning and memory, students choose specific topics for discussion. Offered: jointly with NEUBEH 553.

P BIO 554 Motor Learning: Cellular and Network Mechanisms (1) Fetze, Permutt Five-week mini-course reviews the current state of research on cellular and network mechanisms of motor learning. After an introductory overview of behavioral and physiological examples of motor learning in various species and systems, students choose specific topics for discussion, using the primary literature as a source. Offered: jointly with NEUBEH 554.

P BIO 555 Sensory Receptors (1) Detwiler, Riske Five-lecture mini-course examines how different kinds of sensory receptors detect and respond to different modalities of sensory stimuli. Discussion focuses on the cellular and molecular mechanisms of the underlying transduction processes and the experimental evidence that they are based on. Offered: jointly with NEUBEH 555.

P BIO 556 Axon Pathfinding Mechanisms (1) Bothwell Examines mechanisms governing axon growth cone behavior during embryonic development and regeneration in the injured adult. Discusses approaches employing behavior from vertebrate model systems. Offered: jointly with NEUBEH 556.

P BIO 557 Ion Channel Gatting (1) Gordon, Zagotta Compares and contrasts mechanisms of gating in ligand-gated and voltage-gated ion channels. Covers basics of ligand gating and voltage gating, kinetic schemes, inactivation and desensitization, gating currents and partial agonists, and ion channel structure. Offered: jointly with NEUBEH 557.

P BIO 560 Muscle and Cell Motility (*) Selected topics in muscle contraction and cell motility. Reading of original papers. Presentations by students and faculty. Topics vary. Prerequisite: permission of instructor.

P BIO 594 Neurological Study Unit (0.5) Faculty and student discussion of neurological topics illustrated with clinical cases or demonstrations include the following: physiology, neuroanatomy, neurology, neuropsychology, neurosurgery, and psychiatry. Credit/no credit only. Prerequisite for medical students: HUBIO 532. Offered: AW.

P BIO 600 Independent Study or Research (*) Offered: AWSp.

P BIO 700 Master's Thesis (*) Offered: AWSpS.

P BIO 800 Doctoral Dissertation (*) Offered: AWSpS.

Psychiatry and Behavioral Sciences

CONJ 475 Alcoholism: A Course for Medical Students in the Allied Health Sciences (2) See Conjoint Courses.

PBSCI 498 Undergraduate Thesis (*) Opportunity to complete work on psychiatric research projects or to pursue a specific psychiatric topic in depth, for instance, through library research.

PBSCI 499 Undergraduate Research (*, max. 15) Opportunities are available for participation in a wide variety of ongoing research in the behavioral sciences and clinical psychiatry, or for the development of an individual investigative project under the supervision of a faculty sponsor.

PBSCI 525 P-Psychiatry and the Law (3) Goldberg Concentration on major issues in psychiatry and law. Outside speakers from legal, judicial, and psychiatric communities. Lectures on assessment in forensic settings, competence to stand trial, and criminal responsibility. Discussions on personality disorders and correctional environments. For psychiatric residents and graduate psychology, psychosocial nursing, social work, and law students.

PBSCI 530 P-Developmental Psychoanalytic Psychotherapy (2) Schimmelbusch Examines how failures of psychological development lead to disorders of regulation of affects and cognition, and how psychoanalytic treatment reinstates normal development. Treatment process viewed from a psychoanalytic and psychobiological perspective. Clinical case discussion integrates theoretical concepts.

PBSCI 535 Modern Concepts of Psychoanalytic-isis (2) Schimmelbusch Examines childhood developmental stages in light of inborn and environment. Correlates developmental phases with adult personality functioning. Views emotional development from a psychoanalytic and psychobiological point of view. Clinical case discussion integrates theoretical concepts.

PBSCI 546 Psychosocial Epidemiology (3) Vander Stoep Application of epidemiological methods to behavioral and mental illnesses. Topics include occurrence and distribution of mental illness, classification of psychiatric disorders; treatment-based vs. community-based studies; epidemiology of depression and schizophrenia; familial transmission; developmental epidemiology; mental illness and violence. Prerequisite: one course in epidemiology or permission of instructor. Offered: jointly with EPI 546; Sp.

PBSCI 548 P-Aging and Adult Development (1-3, max. 3) Aging in Western technologically advanced societies frequently involves losses in status, stamina, and economic and social supports. Correlates losses among the aged. Students select projects in the area of aging and work at their own levels of expertise and sophistication. Seminar format with guided reading.

PBSCI 560 P-Psychological Interventions for Primary Care Physicians (1) Kent Focuses on the integration of primary care and mental health issues. Reading, lectures, videos, and role plays are utilized to review evidenced-based psychological interventions which can be employed in an outpatient primary care setting. Emphasizes issues of somatization, depression, anxiety, and health behavior change.

PBSCI 591 P-Seminars and Conferences in Psychiatry: Seminar in Clinical Neuropsychol-ogy (*) Introduction to neuropsychological studies of brain-behavior relationships. Exposure to neuropsychological assessment procedures and manifestations of neurocognitive deficits in selected mental and medical disorders, e.g., epilepsy, AIDS, sleep disorders, trauma, toxic exposure, vascular, psychiatric disorders. Develop knowledge of neuropsychological assessment procedures and applications to diverse medical conditions. Prerequisite: psychological assessment experience.

PBSCI 600 Research in Psychiatry (1-15, max. 15) GE Independent laboratory research under the guidance and supervision of research scientists in the Psychiatry Department. Faculty permission required. Offered: .

PBSCI 630 P-WRITE Psychiatry Clinical Clerkship (*, max. 24) Basic clinical clerkship for students enrolled in the WRITE Program. Prerequisite: completion of basic curriculum; third- and fourth-year students; acceptance in the WRITE program.

PBSCI 665 P-Basic Clinical Clerkship (12) Daggadakis, McCreery, Mehta Inpatient clerkship in psychiatry. Students have primary responsibility under the direction of attending psychiatrists and residents for diagnosis and care of patients at University of Washington Medical Center, Harborview Medical Center, or Veterans Administration Hospital. Emergency room, crisis intervention, consultation to patients with psychiatric dysfunction. Familiarity with psychopharmacology and short-term hospitalization emphasized. (Six weeks, full-time.)

PBSCI 666 P-WWAMI Psychiatry and Behavioral Sciences Clerkship (12) Kletti Rotation aims to increase student’s skills in basic psychiatry, social psychiatry, transcultural psychiatry, and community psychiatry. Orientation is around the diagnosis, treatment, and clinical management of White, Aleut, Indian, and Eskimo children and adults in outpatient, inpatient, and community settings. Third-, fourth-year medical students. Prerequisite: HUBIO 563. (Limit: three students.)

PBSCI 667 P-Basic Psychiatry Clerkship, Boise (12) Hines Basic psychiatry clerkship at Veterans Administration Medical Center in Boise, Idaho. Fulfills graduation requirement for clerkship in Psychiatry.

PBSCI 668 P-Psychiatry Clerkship, Spokane (12) Bakker Students work on adult, geriatric, and adolescent inpatient psychiatric units of Sacred Heart Medical Center, following patients after transfer to partial hospitalization or outpatient clinic. Didactics include basic psychiatric diagnosis, treatment, and pharmacotherapy. Prerequisite: completion of HUBIO series; third and fourth-year medical students.

PBSCI 669 Basic Psychiatry Clerkship, Wyoming (12) Students work in the Wyoming Behavioral Institute with adult, adolescent, and child inpatients. Students have some outpatient experience and emergent care assessment experience at the Wyoming Medical Center. Didactics and discussion include topics such as psychopharmacology, emergent care and assessment, diagnosis, and substance abuse issues.

PBSCI 670 P-Clerkship in Consultation/ Liaison Psychiatry UWMC (*, max. 24) Walker Assessment of patients with major psychosocial problems associated with physical disease, including: problems stemming from the way the illness is perceived and experienced, liaison with other clinical disciplines on complex diagnosis and treatment of problems. (Limit: one student; four weeks.) Prerequisite: HUBIO 563; either PBSCI 665, PBSCI 666, PBSCI 667, or PBSCI 668.
PBSCI 671 P-Clerkship in Consultation/Liaison Psychiatry HMC (*, max. 24) Elliott Prerequisite: either PBSCI 665, PBSCI 666, PBSCI 667, or PBSCI 668. (Limit: two students.)

PBSCI 672 P-Elective Clerkship in Primary Care Psychiatry at Boise VAMC (8/12) Blackburn, Marsh Assessment and treatment of patients with acute psychiatric problems in a primary care/rural setting. Consultation work on general medicine and surgical patients, and assessment and dealing with outpatient psychiatric problems as they initially present. Evaluations, crisis intervention strategies, and brief therapies stressed. Prerequisite: either PBSCI 665, PBSCI 666, PBSCI 667, or PBSCI 668. (Four to six weeks; UW students only.)

PBSCI 673 P-Outpatient Psychiatry Elective (*, max. 24) Foster Offered at Harborview Outpatient Center. Students function as subinterns, conducting diagnostic interviews, initiating and managing pharmacotherapeutic treatment regimens, and providing crisis intervention, under the supervision of the full-time attending staff of the Psychiatric Clinic. Prerequisite: either PBSCI 665, PBSCI 666, PBSCI 667, or PBSCI 668. (Four to six weeks; full-time.)

PBSCI 676 P-Inpatient Clerkship in Psychiatry at American Lake VA (8/12) Chandran For medical students with a defined interest in psychiatry who wish to develop their knowledge and skills in the evaluation, management, and treatment of a wide range of acute and chronic psychiatric conditions requiring inpatient hospital treatment. Prerequisite: either PBSCI 665, PBSCI 666, PBSCI 667, or PBSCI 668. (Four to six weeks; full-time.)

PBSCI 677 P-Alcohol and Drug Treatment Clerkship at American Lake VA (8/12) Lim Student assists in every phase of the substance-abuse treatment, including admission interviews, patient evaluation, problem identification, group and individual psychotherapy, assertiveness training, anger control, human sexuality, medical evaluation and treatment, couples therapy, discharge and aftercare planning. Experience primarily clinical. Prerequisite: either PBSCI 665, PBSCI 666, PBSCI 667, or PBSCI 668. (Four to six weeks; full-time.)

PBSCI 678 P-Clerkship in Psychiatric Long-Term Care and Rehabilitation (*, max. 12) Chandran Two- to six-week clerkship provides learning experiences in rehabilitation of long-term psychiatric patients with medical illness. Multidisciplinary team approach, working with homeless mentally ill. Diagnostic skills emphasized. Spectrum of diseases (cardiovascular, Huntington's, organic brain syndrome) is emphasized. Spectrum of diseases (cardiovascular, Huntington's, organic brain syndrome) is emphasized. Students function as subinterns, conducting diagnostic interviews, initiating and managing pharmacotherapeutic treatment regimens, and providing crisis intervention, under the supervision of the full-time attending staff of the Psychiatric Clinic. Prerequisite: either PBSCI 665, PBSCI 666, PBSCI 667, or PBSCI 668. (Four or six weeks, full-time.)

PBSCI 680 P-Clerkship in Emergency Psychiatry (*, max. 24) Gardner Emphasis on clinical evaluation, acute management, and treatment planning for individual patients. Experience in coordinating these activities with other emergency room personnel, and various hospital and community resources. Emphasis on skills useful to physicians in any specialty. Third- and fourth-year medical students only. Prerequisite: either PBSCI 665, PBSCI 666, PBSCI 667, or PBSCI 668. (Four or six weeks, full-time.)

PBSCI 685 P-Geriatric Psychiatry Clerkship (*, max. 12) Pasqually Two- to six-week elective (four weeks highly recommended). Participation in the evaluation and care of older persons with psychopathology, such as intellectual impairment and depression, in a variety of settings. Emphasis on improving clinical skills regarding diagnosis and treatment of common behavioral problems in the elderly. Prerequisite: either PBSCI 665, PBSCI 666, PBSCI 667, or PBSCI 668.

PBSCI 688 P-Subinternship in General Psychiatry (*, max. 16) Students function as interns under the supervision of house staff and attending psychiatrists. Further development of their diagnostic and therapeutic skills emphasized. Special areas of interest, such as family intervention, substance abuse, psychoses, neuropsychiatry, community psychiatry, administration, research pursued. Prerequisite: either PBSCI 665, PBSCI 666, PBSCI 667, or PBSCI 668; permission of instructor. (Four or six weeks, full-time.)

PBSCI 695 P-Clinical Cancer Management (*, max. 8) Koh Participation in the clinical management of patients with cancer, emphasizing a multi-modality approach. Includes clinical assessment, planning of radiation treatment, and follow-up evaluation of patients. Special procedures include three-dimensional treatment planning, imaging, brachytherapy and inoperative radiation. Daily teaching conferences with faculty and residents. Prerequisite: MED 665 or permission of instructor.

PBSCI 697 P-Psychiatry Special Electives (*, max. 24) By special arrangement for qualified students, special clerkships or externships may be available at institutions other than the University of Washington. Students should obtain a “Special Assignment” form from the Dean’s Office at least one month before advance registration. Prerequisite: permission of instructor.

R ONC 699 P-WWAMI Radiation Oncology Special Electives (*, max. 24) By special arrangement for qualified students, special clerkships or externships may be available at institutions other than the University of Washington located within the WWAMI region. Prerequisite: permission of department.

Radiology

RADGY 498 Undergraduate Thesis(*) Supervised clinical and/or laboratory research in the broad field of medical imaging, culminating in a thesis. Offered: AWSpS.

RADGY 499 Undergraduate Research (*) Opportunity to gain research experience and direct participation in either clinical or basic sciences investigation in diagnostic and/or nuclear medicine. Offered: AWSpS.

RADGY 505 P-Preceptorship in Nuclear Medicine (1, max. 24) Early (University of Washington Medical Center) Opportunity for first- and second-year medical students to gain experience with faculty in clinical and academic environments. Students observe general aspects of the Nuclear Medicine Division, including clinical problems, the different relationships in the clinic between physician and patient, and several research aspects of the division. Prerequisite: permission of instructor. Offered: AWSpS.

RADGY 508 Physical Aspects of Medical Imaging (4) Stewart Quantitative physical principles of medical imaging are presented for electromagnetic and sonic radiation. Methods of image formation and analysis are discussed for conventional film radiography; CT, DSA, PET, B-mode ultrasound and Doppler ultrasound. Offered: jointly with BIOEN 508/ENV H 528.

RADGY 550 Nuclear Magnetic Resonance in Biomedicine (2) Hayes, Kushmerick, Richards, Yuan Basic physics of nuclear magnetic resonance (NMR) imaging and spectroscopy are presented. Research applications of NMR in physiology and biochemistry are reviewed with emphasis on the brain. Grade based on written tests and small research paper. Prerequisite: permission of instructor. Offered: jointly with BIOEN 565; odd years; Sp.

RADGY 580 P-Nuclear Medicine Technique, Physics, and Instrumentation (2.5) Lewellen Provides familiarization with basic nuclear phenomena and with the instrumentation used in the practice of nuclear medicine. There are discussions and laboratory exercises. Practical experience in instrument operation and sample counting are provided. Prerequisite: permission of instructor. Offered: S.

RADGY 693 P-Introduction to Diagnostic Radiology (4) Schulte Half-time clerkship in the field of medical imaging. Lectures, case discussions, film reading, and independent study provide an overview of the subspecialty areas of diagnostic radiology and nuclear medicine. Emphasis on utilization and selection of imaging tests, radiologic anatomy, and interpretation of
commonly encountered studies. Offered: AWSpS.

RADGY 694 P-Advanced Clinical Clerkship (8) Schulte Full-time clerkship provides a more in-depth experience in diagnostic radiology and nuclear medicine. Required rotations in the sub-specialties of radiology augment the basic lecture series and case discussions of Radiology 693. For those with a special interest in diagnostic radiology. Prerequisite: permission of instructor and departmental education coordinator. Offered: AWSpS.

RADGY 695 P-Radiology Sub-specialty Elective (*, max. 8) Schulte Clinical rotation in one of the sub-specialty areas of radiology at the University of Washington and affiliated hospitals. Requires special arrangements and permission from a preceptor and the education coordinator in Radiology. Two or four weeks. Offered: AWSpS.

RADGY 696 P-Nuclear Medicine Clerkship (*, max. 12) Eary Daily participation at University of Washington Medical Center nuclear medicine clinic emphasizing technical performance, diagnostic interpretation, and clinical relevance of nuclear imaging. Daily clinical teaching conferences of the division. Four- and six-week clerkships can be preplanned in areas such as pulmonary, cardiovascular, renal, bone, computer analysis. Prerequisite: permission of instructor. Offered: AWSpS.

RADGY 697 P-Radiology Special Electives (*, max. 24) Schulte Radiologic training in a nonaffiliated institution. Permission and arrangements must be made at the time of registration through direct communication between the student and the education coordinator in Radiology. A written outline from a preceptor at the intended site required. Prerequisite: permission of radiology education coordinator. Offered: AWSpS.

RADGY 699 P-WWAMI Radiology Special Electives (*, max. 24) By special arrangement for qualified students, special clerkships or externships may be available at institutions other than the University of Washington located within the WWAMI region. Prerequisite: permission of department.

Rehabilitation Medicine

REHAB 300 Introduction to Occupational Therapy (1) Introduction to occupational therapy profession. Provides historical perspectives, theoretical foundations, and clinical case studies in various practice arenas. Credit/no credit only. Offered: ASp.

REHAB 340 Spinal Orthotics (5) Yaman Instruction and review of anatomy and biomechanics of the spine, patient evaluation, and prescription considerations as related to spinal orthotics. Lectures provide background knowledge of orthotic treatment principles for spinal pathologies. Laboratory experience includes patient evaluation, impression and measurement techniques, fabrication methods, and fitting criteria. Required for prosthetics and orthotics majors.

REHAB 341 Upper Extremity Prosthetics I (4) Okumura Principles of upper extremity prosthetic management and prescription considerations: functional evaluation, preprosthetic care, use of prosthetic components and materials, fabrication, harnessing, prosthesis training, documentation, and billing. Incorporates anatomy, biomechanics, and pathomechanics with clinical experience as they pertain to upper extremity prosthetics. Required for prosthetics and orthotics majors.

REHAB 342 Upper Extremity Prosthetics II (4) Okumura Principles of upper extremity prosthetic management and prescription considerations: functional evaluation, preprosthetic care, use of prosthetic components and materials, fabrication, harnessing, prosthesis training, documentation, and billing. Incorporates anatomy, biomechanics, and pathomechanics as they pertain to upper extremity prosthetics. Required for prosthetics and orthotics majors. Prerequisite: REHAB 341.

REHAB 343 Upper Extremity Orthotics (2-4, max. 4) Yamane Lecture and laboratory instruction in patient evaluation, prescription considerations, componentry, and fabrication procedures for upper extremity orthoses. Required for prosthetics and orthotics majors.

REHAB 400 Medical Science (4) Greenberg, Frinkow Lectures in fields related to: general surgery, obstetrics and gynecology, internal medicine, neurology, rehabilitation medicine, orthopaedics, psychiatry and behavioral sciences, rheumatology, and pediatrics. Required for occupational therapy, prosthetics and orthotics majors. Credit/no credit only.

REHAB 401 Medical Science (4) Abrahamson, Greenberg Lectures in fields related to: general surgery, obstetrics and gynecology, internal medicine, neurology, rehabilitation medicine, orthopaedics, psychiatry and behavioral sciences, rheumatology, and pediatrics. Required for occupational therapy, prosthetics and orthotics, and physical therapy students. Credit/no credit only.

REHAB 402 Medical Science Laboratory (1, max. 2) To introduce students to the role of allied health professionals in the treatment of pathologies presented in 400, 401 lectures. Credit/no credit only.

REHAB 403 Exercise Physiology for Rehabilitation Professionals (2) Anderson, Slimp Normal and pathological physiology of the cardiovascular, respiratory, and musculoskeletal systems as a basis for evaluation and intervention in occupational therapy, physical therapy, and prosthetics/orthotics. Required for majors.

REHAB 413 Special Studies in Physical Therapy (1-15, max. 24) Theory and practice in specialized areas of physical therapy. Credit/no credit only.

REHAB 414 Psychological Aspects of Rehabilitation (2) I&S Patterson Psychological processes underlying adjustment to disability; application of behavioral/analysis systems in patient therapy management; effects of cognitive or personality deficits on patient performance and treatment strategies. Credit/no credit only.

REHAB 416 Principles of Physical Therapy Administration (2, max. 4) Guthrie The nature of administration, economic trends, operational policy, aspects of supervision, ethical and legal influences applicable to a physical therapy department. Required for physical therapy students. Credit/no credit only.

REHAB 420 Lower Extremity Prosthetics I (8) Abrahamson Instruction in patient evaluation, casting, cast modification, socket fabrication, static and dynamic alignment, alignment duplication, suspension systems, and documentation for transtibial amputation. Required for prosthetics and orthotics majors; others by permission of instructor.

REHAB 421 Lower Extremity Prosthetics II (11) Abrahamson Instruction in transfemoral patient evaluation, casting, cast modification, socket fabrication, static and dynamic alignment, alignment duplication, suspension systems, and documentation. Methods of fitting through knee and hip disarticulation levels demonstrated. Required for prosthetics and orthotics majors; others by permission of instructor.

REHAB 423 Lower Extremity Orthotics I (6) Yamane Patient evaluation and prescription considerations for orthotic management of the lower extremity. Lectures provide instruction in the biomechanics of the lower extremity during ambulation, clinical indications and fitting criteria for a variety of orthotic devices. Laboratory sessions provide experience in fabrication principles, and impression and measurement techniques. Required for prosthetics and orthotics majors.

REHAB 424 Lower Extremity Orthotics II (8) Yamane Orthotic treatment of pathological conditions that affect the knee and hip addressed. Focus is placed on development of prescription recommendation, fabrication, fitting, and follow-up of orthoses that support, assist, or stabilize the knee and hip. Required for prosthetics and orthotics majors; others by permission of instructor.

REHAB 427 Applied Prosthetics and Orthotics (1-4, max. 4) Hafner Presentation and discussion of current clinical practice using research and journal articles and case presentations. Required for prosthetics and orthotics majors; others by permission of instructor. Credit/no credit only.

REHAB 428 Applied Prosthetics and Orthotics II (1-4, max. 13) Experience in patient management under the preceptorship of certified practitioners at clinical affiliation sites. Required for prosthetics and orthotics majors.

REHAB 429 Immediate Post-Operative and Early Fitting (2) Hafner Lecture and laboratory designed to introduce the student to the principles of immediate postsurgical prosthetic fitting, including patient management.

REHAB 430 Engineering Concepts (2) @ Okumura Principles of mechanics and strength of materials, force analysis, and hydraulic control in relationship to orthotics and prosthetics design. Required for prosthetics and orthotics majors.

REHAB 442 Applied Kinesiology (4) Guthrie, Shumway-Cook Study of joint motion and muscle function in relation to both the normal and abnormal state, emphasizing gait. Specific techniques employed in the field of rehabilitation medicine are analyzed. Required for Department of Rehabilitation Medicine students; others by permission.

REHAB 444 Functional Musculoskeletal Anatomy (4) Guthrie Functions of musculoskeletal system as applied to patterns of motion. Anatomy of peripheral-vascular and peripheral-nervous system. Required for occupational therapy students, prosthetics and orthotics students, and physical therapy students; others by permission of instructor.
REHAB 445 Functional Musculoskeletal Anatomy (4) Guthrie Functions of musculoskeletal system and applied to patterns of motion. Anatomy of peripheral-vascular and peripheral-nervous system. Required for occupational therapy students, prosthetics and orthotics students, and physical therapy students; others by permission of instructor.

REHAB 448 Applied Kinesiology Laboratory (1) Abrahamson, Guthrie, Okumura, Powell, Robinson, Mullens Instruction and laboratory focus on practical experience and clinical problem solving in kinesiology. Potential topics include muscle and joint motion testing, sensory/ perceptual assessment, prosthetic and orthotic devices, wheelchair use, gait training.

REHAB 451 Functional Anatomy Laboratory (1) Bennett, Rollinger Study of musculoskeletal, peripheral-vascular, and peripheral-nervous systems from prospected material. Required for physical therapy, occupational therapy, and prosthetic/orthotic students.

REHAB 452 Functional Anatomy Laboratory (1) Bennett, Rollinger Study of musculoskeletal, peripheral-vascular, and peripheral-nervous systems from prospected material. Required for physical therapy, occupational therapy, and prosthetic/orthotic students.

REHAB 458 Augmentative and Alternative Communication: Implementation Strategies (2-3) NW Communication needs of non-speaking individuals. Interdisciplinary approaches to the evaluation, selection, and implementation of aided and unaided communication augmentation systems. Recommended: basic course work in either SPHSC, OT, PT, or ENGR. Offered: jointly with SPHSC 453.

REHAB 459 Augmentative and Alternative Communication: Access for Technology (3) NW Communication technology and motor evaluation of augmentative and alternative users. Issues related to hardware, software, switch placement and access, with opportunities for clinical trials. Recommended: SPHSC 453 or REHAB 458. Offered: jointly with SPHSC 454.

REHAB 476 Prosthetic and Orthotic Evaluation and Use (2) Okumura Instruction in mechanical component substitution for functional losses. Emphasis is on biomechanical principles, prosthetic-orthotic components, and alignment and fitting techniques. Credit/no credit only. Required for physical therapy students.

REHAB 496 Special Topics in Rehabilitation (1-9, max. 14) Guided opportunity for in-depth study in specific areas of rehabilitation. Topics vary.

REHAB 498 Undergraduate Thesis (*). 

REHAB 499 Undergraduate Research (*). Opportunity to design, perform, and analyze research investigation in problem areas in rehabilitation medicine. These include clinical and basic research problems in, for example, head and spinal injury, chronic disease, pain neurophysiology, neurophysiology, electrodiagnosis, communication, and bioengineering.

REHAB 502 Lifespan II: Pediatrics (2-3, Max. 6) Kartin, Mullenix, Washington Provides an overview of pediatric physical therapy practices for children with atypical development. Assessment, development of physical therapy plans, care for children with various disabilities will be presented within the frameworks of family-centered care and disablement models.

REHAB 503 Lifespan III: Geriatric Physical Therapy (3) Shumway-Cook Theory and principles of exercise procedures used when treating the geriatric patient. Includes a discussion of age related changes in the systems essential to movement control; factors contributing to physical disability and frailty with aging; adaptation of assessment and treatment procedures to the geriatric patient. Lectures and laboratories.

REHAB 505 Introduction to Pharmacology (2) Guthrie Pharmacological survey of drugs commonly prescribed for clients seen in a physical therapy practice setting. Presentations on basic principles. Additional data search and group reports. Overview of medical emergencies. Credit/no credit only.

REHAB 506 Physical Therapy Procedures II: Assessment (2) Robinson Development of clinical competence in patient assessment techniques from a functional and musculoskeletal perspective. Discussion of normal and pathological findings. Special emphasis on lower quadrant anatomy, posture evaluation, and medical record documentation skills. Lecture and laboratory format.

REHAB 510 Rehabilitation Psychology (2) Jensen Processes and management methods for assimilation of disability, enhancing patient participation in rehabilitation process, and for helping in maintenance of performance; behavioral management and case conference strategies; rehearsal of contingency management techniques. Required for residents; others by permission of instructor.

REHAB 511 Musculoskeletal IV: Clinical Management (5) Physical therapy clinical evaluation and management of patients with musculoskeletal dysfunction. Special emphasis on lower quadrant anatomy. Lecture and laboratory format.

REHAB 512 Musculoskeletal V: Clinical Management (4) Physical therapy clinical evaluation and management of patients with musculoskeletal dysfunction. Special emphasis on lower quadrant anatomy. Lecture and laboratory format.

REHAB 513 Special Studies in Physical Therapy (1-5, max. 15) Theory and practice in specialized areas of physical therapy. Includes organization and administration of specialized programs, advanced evaluation and treatment techniques, role of the consultant. Credit/no credit only.

REHAB 516 Medical Information for Rehabilitation Counselors (3) Johnson Lectures in medical science field regarding the etiology, prognosis, and physical restoration of common disabling conditions. Case studies are used extensively, and major emphasis is placed on vocational implications of physical disability. Prerequisite: permission of instructor.

REHAB 517 Physical Therapy Seminar (2-3, max. 21) Kartin Group seminar format focused on physical therapy topics pertaining to transcultural and professional practice issues. Credit/no credit only.

REHAB 518 Infants and Young Children: Current Research (3) Deitz, Swanson Introduces students to recent research relating to assessment and intervention with infants and young children who are “at risk” or who are disabled. Critical evaluation of the current research emphasized. Prerequisite: clinical experience or coursework related to infants and young children with disabilities and permission of instructors.

REHAB 519 P-Preceptorship in Rehab Medicine (1) Explores the field of physical medicine and rehabilitation. Students observe a physiatrist one half day each week, and gain understanding of the management of acute injuries, chronic disease, and disabilities. Offered: AWSP5.

REHAB 520 Seminar (1-5, max. 9) Conferences, seminars, discussions of advanced physical medicine and rehabilitation topics for graduate students, residents and postdoctoral fellows in rehabilitation medicine. Lectures, discussion, and laboratory work in selected aspects appropriate to elected area of study for applicants for master-level degree.

REHAB 522 Neurophysiological Topics in Rehabilitation Medicine (2) Anderson Review of traditional neurophysiological concepts and an exposition of recent advances in neurophysiological research related to the practice of rehabilitative medicine. Prerequisite: resident standing in rehabilitation medicine or permission of instructor.

REHAB 523 Neuroscience III: Applied Neurology (4) Shumway-Cook Theory and principles of advanced exercise procedures used when treating patients with neurologic pathology. Includes the application of principles of motor learning and control; facilitation and inhibition of variables affecting functional motor performance; adaptation of assessment and treatment procedures to patients with different types of neurologic impairments. Lectures and laboratories.

REHAB 527 Neuroscience IV: Physical Rehabilitation of Adult Neurological Disorders (2) Kelly Critical analysis and application of physical therapy assessment and treatment techniques to problems related to specific adult neurological disorders. Neurological disorders to be covered include stroke, spinal cord injury, traumatic brain injury, and multiple sclerosis.

REHAB 528 International Clinical Clerkship (2) Short-term clinical education experience outside the United States. Participants work in a mentored relationship as part of a multi-disciplinary rehabilitation team providing direct clinical services and consultation to patients and their care-givers. Sponsored sites selected and screened by Clinical Coordinator. Students may choose area of clinical focus. Credit/no credit only.

REHAB 529 Professional and Practice Issues in Physical Therapy (2) Guthrie Augments the student’s understanding of the profession and current issues in healthcare. Includes healthcare delivery, scope of practice, professional organization, political activism, specialist certification, licensure, collaboration, therapeutic relationships, disclosure, privacy, and informed consent. Credit/no credit only.
REHAB 530 Medical Aspects of Vocational Counseling (2-3) Johnson Introduction to vocational implications of physical and emotional disabilities. Methods, counseling techniques, therapeutic modalities, community resources used in producing vocational assistance for persons with disabilities. Prerequisite: resident standing in rehabilitation medicine or permission of instructor.

REHAB 532 Clinical Affiliation for Rehabilitation Counselors (5-6) Johnson Under preceptorship of rehabilitation counseling staff, students counsel and evaluate patients with severe physical, emotional, or social problems; administer vocational testing; obtain placement on job sites; work with community resources for vocational/educational placement; and develop activity-oriented schedules. Prerequisite: permission of instructor.

REHAB 537 Functional Mobility Skills (2) McGough, Robinson Principles and practice of physical therapy interventions related to functional mobility skills, including transfer training, wheelchair fitting, wheelchair mobility, gait training, and caregiver training.. Lecture and laboratory format.

REHAB 538 Integumentary, Edema Management, and Circulatory Screening for PT (2) McGough, Robinson Principles and practice of physical therapy evaluation and interventions related to wound care, burn care, edema management, circulatory screening, and splinting applications. Lecture and laboratory format.

REHAB 539 Communication Disorders in Rehabilitation Medicine (1) Yorkston Overview of communication disorders secondary to central and peripheral nervous system impairment. Emphasis on facilitating identification of speech/language disorders with discussion of implica- tions for rehabilitation.

REHAB 540 Acute Care Practice in Physical Therapy (2) Robinson Principles and practice of physical therapy evaluation and interventions related to individuals with diagnoses in the recent onset (or acute) stage of development.

REHAB 544 Functional Anatomy for Physiatrists (2) Goldstein Lectures and demonstrations to illustrate functional anatomy as applied by physicians in the practice of clinical rehabilitation. Intended to enhance functional assessments and to improve neuro/musculo/skeletal diagnosis and treatment through greater understanding of the underlying anatomy. Prerequisite: resident standing in rehabilitation medicine; others by permission of instructor.

REHAB 545 Functional Anatomy for Physiatrists (2) Goldstein Lectures and demonstrations to illustrate functional anatomy as applied by physicians in the practice of clinical rehabilitation. Intended to enhance functional assessments and to improve neuro/musculo/skeletal diagnosis and treatment through greater understanding of the underlying anatomy. Prerequisite: resident standing in rehabilitation medicine; others by permission of instructor.

REHAB 546 Teaching Practicum in Occupational and Physical Therapy (1-3, max 3) Integration of knowledge and skills in teaching through teaching in the classroom or presenta- tion of a minicourse, workshop, or in-service training series. Prerequisite: MEDEP 520 and permission of instructor.

REHAB 550 Neuropsychology in Rehabilitation (2) Bobardier, Ehde Examination and management of patients with brain lesions, as well as an understanding of the consequences of such conditions. Prerequisite: graduate standing in rehabilitation medicine.

REHAB 555 P-Neuromuscular Electrodiagnosis (2.5) Kraft Demonstration of fundamentals of electromyography and peripheral nerve stimulation followed by participation in clinical electrodiagnosis examinations. Develops awareness of knowing when such procedures are indicated for patients and interpreting results rather than developing proficiency in performing these examinations. Prerequisite: HUBIO 560 and permission of instructor.

REHAB 556 Assistive Technology in Rehabilitation and School System Practice (3) Introduction to the use of assistive technology in rehabilitation and special education. Content includes set-up and use of alternative input systems on microcomputers and applications of technology to neuromuscular retraining, augmentative communication, and facilitation of learning in the classroom. Prerequisite: familiarity with basic computer operations and permission of instructor.

REHAB 565 Special Topics in Rehabilitation (1-9, max. 14) Philosophy and concepts in the interdisciplinary rehabilitation of persons with major disabilities, including advanced content in the rehabilitation theory and process of selected categories.

REHAB 566 Special Topics in Rehabilitation (1-9, max. 14) Philosophy and concepts in the interdisciplinary rehabilitation of persons with major disabilities, including advanced content in the rehabilitation theory and process of selected categories.

REHAB 567 Practicum in Rehabilitation (1-12, max. 24) Specialized practicum experience in environment providing rehabilitation services. Prac- ticum arrangements and permission by instructor.

REHAB 568 Biophysics as Applied to Physical Medicine (2) Goldstein and Propagation and absorption characteristics of physical forms of energy used for treatment in physical medicine. Physiologic effects basic to prescription of the physical therapy modalities. Prerequisite: resident standing in rehabilitation medicine; others by permission of instructor.

REHAB 570 Foundations of Occupational Therapy (5) Powell An overview of the practice of occupational therapy, emphasizing the role of occupational performance in context, frames of reference, clinical reasoning, and purposeful activity. Introduces the diversity of occupational therapy practice environments through didactic and clinical experiences. Offered: A.

REHAB 571 Occupational Performance through the Life Span (4) Overview of human development as it relates to occupations, performance and functional adaptation in the ages and stages of life from infancy through old-old age. Emphasis will be placed on environmen- tal influences, activity, and occupational roles and tasks, and component behaviors as they relate to individuals in different ages and stages. Offered: W.

REHAB 572 Occupational Therapy Theory and Practice in Psychosocial Dysfunction I (5) Engel-Knowles Overview of knowledge in psychosocial practice as related to occupational performance. Learning topics include major frames of reference, effects of psychosocial disorders on occupational performance (life activities), and occupational therapy evaluation and intervention skills. Lectures, reading, class discussions, role-playing, problem-based learning, and fieldwork comprise the learning experiences. Offered: S.

REHAB 573 Occupational Therapy in Community Practice (4) Engel-Knowles Bodies of knowledge in occupational performance as they relate to the emerging area of community-based practice. Includes traditional and evidence based practice in the realms of health promotion, prevention, evaluation, and intervention. Lectures, assigned readings, class discussions, role playing, site visits, films, laboratory exercises, and problem-based learning tutorials. Offered: Sp.

REHAB 574 Occupational Therapy Theory and Practice in Physical Disabilities I (6) Dudgeon Provides theoretical bases and clinical practice skills used in evaluation and intervention of occupational performance (life activities). Focus is on individuals with sensorimotor (physical) and/or cognitive impairments. Practical applications of theory occur through lecture, laboratory, and problem-based learning approaches. Offered: A.

REHAB 575 Occupational Therapy Theory and Practice in Physical Disabilities II (5) Powell Provides theoretical bases and clinical practice skills used in evaluation and intervention of occupational performance (life activities). Focus is on individuals with sensorimotor (physical) and/or cognitive impairments. Practical applications of theory occur through lecture, laboratory, and problem-based learning approaches. Offered: W.

REHAB 576 Occupational Therapy Theory and Practice in Pediatrics (1-7, max. 7) Dietz Provides knowledge and skills necessary for providing occupational therapy evaluation, intervention, and transition services focused on occupational performance (life activities) for children and teens with disabilities and their families. Offered: W.

REHAB 578 Occupational Performance Analysis (3) Dudgeon Skills in the analysis, adaptation, and sequencing of therapeutic and functional activities as they apply to occupational performance. Analysis focuses on performance components (sensorimotor, cognitive, psychoso- cial, psychosocial, psychological), temporal aspects (chronological, developmental), and environmental aspects (physical, social, cultural). Offered: S.

REHAB 579 Therapeutic Communication (3) Kanny Introduces basic principles and skills of effective interpersonal communication in dyadic interactions and in groups. Emphasis on effective
listening, interviewing, and principles and concepts of occupational therapy groups. Lectures, readings, class discussions, role playing, and in-class exercises comprise the learning experiences. Offered: Sp.

REHAB 580 Introduction to Research in Rehabilitation (3) Delz Evaluation of rehabilitation research literature and design of research studies relevant to rehabilitation. Offered: S.

REHAB 581 Application of Measurement Systems (3) Delz Provides basis for critically evaluating and using tests and measurements in occupational therapy evaluation. Focus on reliability, validity, norms, test development process, statistical relevance to tests and measurement, and ethical implications of testing. Critical evaluation of selected standardized test used in occupational therapy. Offered: A.

REHAB 582 Assistive Technology in Rehabilitation (3) Dudgeon Overview of the field of assistive technology as it impacts occupational performance in self-care, work, and leisure activities. Covers interface devices, computer applications, environmental controls, augmentative communications, power mobility, seating and positioning systems, and sensory enhancements. Offered: W.

REHAB 584 Health-Care Trends and Issues (3) Kanny Overview of the health services system in the United States and current trends and issues facing occupational therapists within this system. Content includes: health service providers, reimbursement of health care services, regulation, personnel and role delineation, and health policy and advocacy. Offered: A.

REHAB 585 Leadership: Administration and Management (4) Kanny Provides student with knowledge and skills needed for leadership positions in occupational therapy practice. Focuses on administration and management functions including strategic planning, program planning, marketing, fiscal management, program evaluation, and personnel management. Offered: W.

REHAB 587 Industrial Rehabilitation (3) Dudgeon Provides knowledge and skills related to vocational assessment and industrial rehabilitation for individuals with medical or psychosocial problems. Emphasizes worker characteristics, job analysis, and accommodation in business and industrial settings. Clinical simulation components provide applications to specific diagnostic, impairment, or disability conditions. Offered: Sp.

REHAB 591 Master’s Project (1-4, max. 7) Graduate project focused on research, administration, education, practice, policy, or other scholarly or creative work. Required of graduate, entry-level occupational therapy and physical therapy students. Offered: A/W/S.

REHAB 592 Principles of Orthotic Use in Rehabilitation (2) Chang General principles and clinical applications of orthoses in patient management, with exposure to research issues in orthotic design.

REHAB 593 Principles of Prosthetic Use in Rehabilitation (1) Czerniacki General principles of prevention of amputation, prosthetic design, biomechanics, and clinical applications of upper and lower extremity prostheses.

REHAB 594 Clinical Fieldwork in Occupational Therapy (10, max. 20) Rollinger Six months of supervised fieldwork education. Experience in delivering occupational therapy services to clients focusing on application of purposeful and meaningful occupation. Exposure to a variety of clients across the lifespan and in a variety of settings reflective of current practice in the profession. Credit/no credit only. Offered: A/W/S.

REHAB 595 Clinical Affiliation in Physical Therapy (2-3, max. 30) Robinson Clinical practice of physical therapy techniques under supervision in community-based clinics. Credit/no credit only.

REHAB 596 Electromyography and Clinical Neurophysiology (4) Kraft Didactic course covering electromyography and clinical neurophysiology. First part covers basic neuromuscular medicine and second covers electromyography, nerve conduction studies, somatosensory-evoked potentials, residual- and auditory-evoked potentials, single fiber EMG, late response, quantitative analysis, and macro EMG. Prerequisite: resident standing in rehabilitation medicine; others by permission of instructor.

REHAB 597 Electromyography and Electrodiagnosis Laboratory (-1-) Kraft Elective work in clinical electromyography and other electrodiagnostic methods. Prerequisite: resident standing in rehabilitation medicine; others by permission of instructor.

REHAB 598 Electromyography and Electrodiagnosis Laboratory (-1-) Kraft Elective work in clinical electromyography and other electrodiagnostic methods. Prerequisite: resident standing in rehabilitation medicine; others by permission of instructor.

REHAB 599 Electromyography and Electrodiagnosis Laboratory (-1-) Kraft Elective work in clinical electromyography and other electrodiagnostic methods. Prerequisite: resident standing in rehabilitation medicine; others by permission of instructor.

REHAB 600 Independent Study or Research (*) Credit/no credit only.

REHAB 685 P-Chronic Disease and Disability (4) Cox, Hays Meets medical-care requirement for medical students. Structured clinical experience on rehabilitation medicine services. Differences between acute and chronic medicine, identification of disability problems, and therapeutic techniques for removing disability. Hospitals are within University system, local area, and WWAMI area. Prerequisite: third-year medical student standing.

REHAB 686 P-Rehabilitation Medicine Clerkship — Pediatrics (8/12) Hays, Jaffe, Massagi Meets chronic-care requirement for medical students. Incorporates material of 685 and expands into disabling pediatric disease. School planning, family counseling, community support services included. Four- or six-week package permits inpatient, outpatient, and consultation experience. Recommended for students contemplating pediatrics. Prerequisite: third-year medical student standing.

REHAB 687 P-Rehabilitation Medicine Clerkship (8/12) Hays Meets chronic-care requirement for medical students. Incorporates material of 685 and expands into disabling problems. Four- or six-week package permits inpatient, outpatient, and consultation experience. Recommended for careers in family medicine, internal medicine, rheumatology, cardiology, neurology, geriatrics, orthopedic surgery, neurosurgery, and cardiovascular surgery. Prerequisite: third-year medical student standing.

REHAB 688 P-Spinal Cord Injury (8/12) Little Introduction to diagnosis, management, rehabilitation of patients with spinal-cord injuries. Interaction with rehabilitation team, psychiatrists, and sub-specialists in urology, neurosurgery, and plastic surgery. Performance at subinturn level expected. Veterans Administration Medical Center only. Prerequisite: MED 665, SURG 665.

REHAB 689 P-Rural Rehabilitation Medicine Clerkship (8) Hays Structured clinical experience in identification and treatment of disability problems in rural (nonmajor urban) communities. Satisfies chronic care/rehabilitation medical graduation requirements. Prerequisite: completion of at least six months of clinical clerkships, permission of instructor.

REHAB 697 P-Rehabilitation Medicine Special Elective (*, max. 24) Equivalent to 686, 687, or 688. Satisfies requirements in rehabilitation medicine/chronic care. Student arranges with another university, using the "Special Assignment Form." Students can qualify after review, similar experience at another university. Prerequisite: permission of instructor.

REHAB 699 P-WWAMI Rehabilitation Medicine Special Electives (*, max. 24) By special arrangement for qualified students, special clerkships or externships may be available at institutions other than the University of Washington located within the WWAMI region. Prerequisite: permission of department.

REHAB 700 Master’s Thesis (*) Credit/no credit only.

SURGERY

SURG 498 Undergraduate Thesis (*) Langdale Offered to those students who have engaged in undergraduate research in general surgery. (Full- or part-time.)

SURG 499 Undergraduate Research (*) Langdale Provides an opportunity to participate in ongoing research projects or carry out an independent research project under supervision of Department of Surgery faculty. Practical experience in experimental design and execution is provided under direct supervision of selected faculty members. (Full- or part-time.)

SURG 505 P-Preceptorship in Surgery (1) Langdale Opportunity for first- and second-year medical students to gain personal experience with clinical faculty members in the community. Students observe general aspects of private practice, including clinical problems seen; practice limitation; doctor-doctor, doctor-patient, and doctor-nurse relationships in the office and hospital. Prerequisite: permission of department.

SURG 600 Independent Study or Research (*) Langdale .

SURG 630 P-WRITE Surgery Clinical Clerkship (*, max. 24) Basic clinical clerkship for students enrolled in the WRITE Program. Prerequisite: completion of basic curriculum; third- and fourth-year students; acceptance in the WRITE program.
SURG 665 P-Clinical Clerkship (*, max. 12) Langdale (Harborview Medical Center, Providencia Medical Center, University of Washington Medical Center, Veterans Affairs Medical Center, Virginia Mason Medical Center) Diagnosis and management of problems amenable to surgical therapy. Physiological basis of surgical care, differential diagnosis and decision making, and the basic principles of surgical management. Care of inpatients and outpatients, including participation in the operating rooms. Prerequisite: HUBIO 563. (Six weeks. Limit: twenty students.)

SURG 666 P-Clinical Clerkship Boise (12) Diagnosis and management of surgical problems. Physiological basis of surgical care, differential diagnosis and decision making, and basic principles of surgical management. Care of inpatients and outpatients, including participation in the operating rooms. Fulfills graduation requirement for Surgery. Prerequisite: completion of HUBIO series. (Six weeks. Limit: two students.)

SURG 667 P-Clinical Clerkship Spokane (12) Diagnosis and management of surgical problems. Physiological basis of surgical care, differential diagnosis and decision making, and basic principles of surgical management. Care of inpatients and outpatients, including participation in the operating rooms. Fulfills graduation requirement for Surgery. Prerequisite: completion of HUBIO series.

SURG 680 Emergency Medicine Elective (8) Basics of emergency medicine, including the primary survey, secondary survey, and approach to the critically ill patient. Students supervised by emergency boarded staff physicians at Madigan Army Medical Center Emergency Department. Prerequisite: basic clerkship in medicine, surgery, obstetrics, or pediatrics.

SURG 681 Peripheral Vascular Disease (4/8, max. 8) Clowes (Veterans Affairs Medical Center) Peripheral arterial and venous problems, including methods of clinical evaluation; new diagnostic procedures; and the available medical and surgical treatments. Patient workup, performance of diagnostic studies, and presentation of case material to the staff. Prerequisite: SURG 665, HUBIO 563. (Two or four weeks. Limit: one student.)

SURG 682 P-Clinical Burn Care (*, max. 12) Heimbach (Harborview Medical Center) Offered on the burn unit of Harborview Medical Center. Exposure to the care of patients with thermal injury, including management of severe metabolic and septic problems and opportunity to participate in surgical procedures. Exposure to plastic and reconstructive surgery. Prerequisite: SURG 665. (Four or six weeks. Limit: two students.)

SURG 683 P-Pediatric Surgery Externship (8/12) Tapper (Children's Hospital and Regional Medical Center) Surgical conditions peculiar to the particular age group with a preponderance of congenital and neoplastic conditions that are amenable to surgical treatment. A reasonable background of knowledge in human embryology and genetics is recommended. Prerequisite: SURG 665. (Four or six weeks. Limit: two students.)

SURG 685 P-Cardiothoracic Surgery Externship (*, max. 12) Venter (University of Washington Medical Center) Serve as subintern, participate in patient care while learning cardiopulmonary hemodynamics of cardiac and thoracic surgery. Observe a wide variety of both cardiac and thoracic disease entities. Participate in the open-heart procedures in the operating room. Opportunity to gain additional understanding of physiology of cardiopulmonary bypass. (Four or six weeks. Limit: two students.)

SURG 686 P-Plastic Surgery Clerkship and Preceptorship (*, max. 12) Vedder (University of Washington affiliated hospitals) Introduces fundamental technical skills and enhances knowledge of plastic surgery, wounds, trauma, burns, cancers, and pediatric and adult cosmetic and reconstructive surgery. Participate in all surgery-related activities. Prerequisite: SURG 665, MED 665, MS III only, two weeks, 4 credits, limit 2; MS II/III IV four/six weeks (recommended), 8/12 credits, limit 4.

SURG 687 P-Transplantation Surgery Clerkship (8) Perkins (University of Washington Medical Center) Clerkship is in the University regional multi-organ transplantation center. Student participates fully in the care of all transplant patients, from hospital admission to discharge, daily multidisciplinary rounds, in pre-operative conference, and in the operating room and on the donor harvest team. Weekly didactic teaching sessions. Prerequisite: SURG 665 and MED 665. (Four weeks. Limit: two students.)

SURG 688 P-Subinternship in General Surgery (*, max. 16) Langdale (Veterans Affairs Medical Center, Harborview Medical Center, Providence Medical Center, University of Washington Medical Center) Offered on the general surgery wards of the University-affiliated hospitals. Diagnosis, preoperative care, and postoperative care; management of surgical emergencies, the ICU patient, and outpatient follow-up of discharged patients. Students participate at the intern level under close supervision of the staff and house staff. Prerequisite: SURG 665. (Four or six weeks. Limit: six students.)

SURG 689 P-Community Surgery Clerkship (8) Langdale Designed to supplement basics learned in 665. Excellent opportunity to participate in general, thoracic, vascular, and plastic surgery in a group practice in a smaller city. Recommended for students entering primary care. Prerequisite: SURG 665 and permission of department. (Four weeks. Longview: Limit: one student. Coeur d'Alene: Limit: one student.)

SURG 690 P-Plastic Surgery Clerkship and Preceptorship (8/12) Langdale Designed to supplement basics learned in 665. Excellent opportunity to participate in general, thoracic, vascular, and plastic surgery in a specialized population of patients. Recommended for students entering primary care. Prerequisite: SURG 665 and permission of department. (Four or six weeks. Alaska Native Medical Center, Anchorage: Limit: one student.)

SURG 691 P-Sub-internship in General Surgery (8) Langdale Designed to augment experience gained in 665. Excellent opportunity to participate in general, thoracic, vascular, and plastic surgery in a specialized population of patients. Recommended for students entering surgery or primary care. Prerequisite: SURG 665. (Harborview Medical Center: Limit: two students. Veterans' Affairs Medical Center: Limit: one student.)

SURG 692 P-Ambulatory Surgery Clerkship (4) Waldhausen Rotation focuses on increasing the student's ability as a primary care physician to recognize and form an initial plan of management for common surgical problems seen in the outpatient setting. Offered: AWSpS.

SURG 697 P-Surgery Special Electives (*, max. 24) Langdale Special clerkship, externship, or research opportunities can at times be made available at institutions other than the University of Washington. Students wishing to elect this course should obtain from the Dean's office a special assignment form at least one month before preregistration. Prerequisite: SURG 665 and departmental permission. (Four, six, or twelve weeks.)

SURG 698 P-Clinical Clerkship Away (*, max. 24) Clerkship equivalent to SURG 665, at sites outside the Seattle metropolitan area.

SURG 699 P-WWAMI Surgery Special Electives (*, max. 24) By special arrangement for qualified students, special clerkships or externships may be available at institutions other than the University of Washington located within the WWAMI region. Prerequisite: permission of department.

Urology

UROL 498 Undergraduate Thesis (*) Provides an opportunity for medical students to write in the area of urology.

UROL 499 Undergraduate Research (*) The student participates in current urologic research projects under supervision of full-time staff. Certain specific problems may be elected by the student. Elective for medical students.

UROL 501 P-Urology Preceptorship (1) Individual experiences with one or more of the full-time department faculty members covering research, teaching, and patient care. Students observe activities in the clinic, hospital ward, operating room, and research laboratories. Prerequisite: first- or second-year medical student standing; permission of instructor.

UROL 675 P-Urology Preceptorship (*, max. 8) Student follows a private practice preceptor in all of his or her work. Becomes acquainted with the office management of urological problems. Prerequisite: UROL 680, HUBIO 562. (Two or four weeks.)

UROL 680 P-Urology Clerkship (*, max. 8) Berger, Ellis, Grady, Krieger, Lange, Mayo, J. Miller, L. Miller, Mitchell, Penison, Porter, Takayama, Wessells Full activities of clinical service. Basic principles of urology emphasized. Prerequisite: HUBIO 562. (Two or four weeks.)

UROL 681 P-Female Urology (4) J. Miller, L. Miller Observation of cases of lower urinary tract disorders specific to women, emphasizing behavioral management and multidisciplinary care. Ninety-five percent of cases observed are women. Not intended as the only exposure to urology for students considering urology as career choice. Prerequisite: third- or fourth-year standing and permission of instructor.

UROL 685 P-Urology Subinternship (*, max. 12) Berger, Ellis, Grady, Krieger, Lange, Mayo, J. Miller, L. Miller, Mitchell, Penison, Porter, Takayama, Wessells Subintern is responsible for patient workups and for preoperative and postoperative care and participates in the operating room. Prerequisite: MED 665 or
Nursing

NURS 200 Critical Approach to Women’s Health (3) Interdisciplinary examination of women’s health from a critical social-political approach. Discusses issues of gender, race, class, heterosexism, etc. in relation to women’s health policies.

NURS 201 Growth and Development Through the Life Span (5) I&S Focuses on processes of human growth and development from prenatal life to old age. Emphasizes influence of growth and development on achievement of health, and how awareness of growth and development theory and research helps guide health promotion efforts directed toward persons of various ages and life styles. Open to nonmajors.

NURS 202 Difference and Identity on University Campus (5) Allen Novels, autobiographies, films, and music are used to explore how American who are seen as white are characterized by people who are seen as non-white. Since many freshmen find campus life more socially diverse than their home communities, the focus is on young adults and college environments.

NURS 301 Clinical Applications of Anatomy and Physiology (3) Application of anatomic and physiologic concepts to selected clinical phenomena. Focuses on integrated responses and functional health patterns. Examples of developmental and lifespan factors are identified. Includes experiential activities to enhance integration of content. Offered: AS.

NURS 302 Foundations of Professional Nursing (2-3) Exploration of the profession of nursing, including past and present work of nurses, the experience of being ill and seeking health care, and the U.S. health care system. Offered: Sp.

NURS 303 Human Responses I (3) Examines normal and pathophysiological responses to states of health and illness. Examines internal and external defense systems, balance and regulation of body systems, and integration of these concepts in the assessment and management of patient problems. Offered: A.

NURS 304 Human Responses II (3) Examines normal and pathophysiological responses to states of health and illness. Examines internal and external defense systems, balance and regulation of body systems, and integration of these concepts in the assessment and management of patient problems. Offered: W.

NURS 309 Pharmacotherapeutics in Nursing Practice I (2) Emphasizes the principles of pharmacology, drug therapy, pharmacologic-therapeutic classes of drugs, clinically important prototype drugs, and drug information resources.

Nursing issues related to drug administration are also discussed. First of a 2-quarter sequence. Offered: A.

NURS 313 Introduction to Nursing Informatics (1) Combines understanding of computers, information literacy, and nursing science into a field that assists health care professionals to provide quality care. Provides an introductory overview. Emphasizes development of computer skills and impact of information on the clinical arena. Credit/no credit only. Offered: WS.

NURS 404 Gerontological Nursing (2) Focuses on theoretical and practical information about basic and complex concepts and issues relevant to the nursing care of older people across the continuum of care.

NURS 405 Care in Illness II (6) Continuation of 404, further examining selected psychopathology and pathophysiological alterations in health of individuals in context of families across life span. Emphasizes assessing functioning in psychosocial, cultural, person-environment relationships, and health care resources to plan nursing strategies for acutely/chronically ill individuals of all ages.

NURS 407 Cultural Variation and Nursing Practice (3) Analyzes the impact of cultural, social, and global factors on the health of multicultural and diverse groups at the individual, population, and systems levels. Students gain knowledge and skills to effectively respond to the health care needs of multicultural societies through non-discriminatory and culturally appropriate nursing care practice. Offered: Sp.

NURS 408 Nursing Care with Families in the Community (3) Application of biopsychosocial and social environmental theories and assessments to diagnose alterations in health/mental health of families, small groups in community settings. Emphasizes interpersonal and clinical therapies; coordination of community resources, evaluating effectiveness of changes; characteristics of nursing care in home visiting.

NURS 410 Legal and Ethical Issues in Clinical Practice (3) Identification of ethical and legal issues and the ensuing dilemmas relevant to the profession of nursing and nurses as health professionals and citizens. Selected problems and dilemmas affecting nurses, nursing, and the delivery of health care analyzed using specific moral-ethical perspectives. Offered: AW.

NURS 412 Health Care Systems (3) Introduction to health care systems with emphasis on political economy of health, access and utilization, disparities in health, public and private health insurance and reimbursement issues. Comparison of U.S. and other national health care systems. Offered: Sp.

NURS 415 Nursing of Families: Childbearing and Childrearing (5) Applies family concepts to nursing of childbearing and childrearing families. Focuses on family as context for care of individuals. Emphasizes use of physiological, psychological, developmental, cultural, and environmental theories for health promotion, disease prevention, and nursing therapeutics. Offered: AW.

NURS 417 Psychosocial Nursing in Health and Illness (3) Examines psychosocial disorders/issues of life transitions from integrated perspective of biological, social sciences, nursing, and humanities. Emphasizes utilizing psychosocial nursing and interpersonal therapeutics for assessment, intervention, health promotion with individuals/families/groups at risk for experiencing psychosocial disorders. Prerequisite: NCLIN 416, which may be taken concurrently. Offered: AW.

NURS 430 Interpersonal Relationships in Nursing (3) Theory, current research, and practice in communication to develop and maintain interpersonal relationships with clients and health care colleagues. Lecture/discussion and laboratory learning opportunities include concepts of relationship development and disorder, interpersonal and group therapeutic communication processes, health care interviewing, and social support.

NURS 445 Topics in Nursing (1-10, max. 10) Guided survey and discussion of current literature on major topics in physiological nursing. Seminar/lecture with analysis and discussion of selected topics and readings. May have clinical component. Implications for nursing practice and health care emphasized.

NURS 450 Study Abroad Preparation: International Nursing in Context (1-4 max 4) Carr, Kennedy, Lindenberg, Muecke Introduction to the language (if other than English), history and culture of the host country, and examination of international health issues pertinent to the country. Required course for students taking a Study Abroad quarter. Course may be taken as distance learning. Offered: AWSpS.

NURS 466 Continuing Education in Nursing (3) Planning, developing, and evaluating continuing education programs in various institutions and agencies. Includes the application of adult learning principles to a variety of situations, such as workshops, in-service and staff development programs.

NURS 488 Youth at High Risk for Drug Abuse, Suicide Behaviors, Aggression, and Depression (3) Study of adolescent problem behaviors: causes, connections, and contexts. Two central themes are understanding vulnerability to drug abuse, suicide behaviors, and other related behaviors within social network before preregistration. Prerequisite: permission of instructor. (Six or twelve weeks.)
contexts and exploring implications for prevention and early intervention programming.

NURS 489 Alcohol Problems in Family and Society (3) Analysis of family problems associated with alcoholism. Emphasis on psychological, cultural, and social implications; examination of humanistic counseling practices employed and theories of prevention.

NURS 492 Anthropology of Refugees (3) &S The human experience. Its emergence in postcolonial worlds, and structure of life history of refugees. Ethnic change, involuntary deculturation, and acculturation as they occur in refugee life histories. Prerequisite: one 200-level ANTH course or LING 203. Offered: jointly with ANTH 492.

NURS 495 Child Rearing, Culture, and Health (3) &S Cross-cultural study of the child-rearing practices, cultural norms, and health behavior of children and adolescents in different societies. Comparative approaches, diverse theoretical postures, and empirical research findings are used. Offered: jointly with ANTH 440.

NURS 499 Special Electives (1-4, max. 15) Seminars on selected nursing issues of clinical problems, with independent study option, under supervision of nursing faculty. Offered: A/WSPS.

NURS 500 Children and Adolescents with Special Health Needs, Their Families and Communities (3/4, max. 4) Advanced practice with infants, children, and adolescents at risk for or with chronic physical, neurobiological, developmental, or psychosocial problems. Focus on assessment and referral with select management strategies relevant for primary and specialty health care. Includes care coordination, multidisciplinary, culturally competent, and family centered approaches. Prerequisite: permission of instructor. Offered: A

NURS 501 Advanced Mental Health Interventions with Children (3) Developmentally based assessment and therapeutic approaches relevant for children with psychosocial health problems. Consideration to matching therapeutic approaches with specific nature of symptomatology and other child, family, cultural, and environmental characteristics, including social and educational systems. Individual and group evaluation research emphasized. Prerequisite: NURS 500.

NURS 502 Human Responses in Health and Illness I (3) Survey of selected human responses to environmental demands in health and illness as expressed at physiologic, pathophysiologic, experiential, and behavioral levels. Such concepts as host defenses, ventilation, circulation, elimination, and nutrition are discussed. Prerequisite: graduate standing.

NURS 503 Human Responses in Health and Illness II (3) Survey of selected human responses to environmental demands in health and illness at physiologic, pathophysiologic, experiential, and behavioral levels. Such concepts as immune response, stress response, circadian rhythms, pain, sleep, cognition, and consciousness. Prerequisite: graduate standing.

NURS 504 Clinical Nursing Therapeutics (1-6, max. 6) Critical analysis of therapeutic modalities to include a variety of responses to health problems. Includes selected therapies such as suction/drainage, positioning to address responses in critical, life threatening, and chronic/continuing health states. Varying credits assigned for modules covering particular therapies. Prerequisite: NURS 502, NURS 503, or permission of instructor.

NURS 505 Selected Topics in Psychosocial and Community Health Nursing (2-10, max. 10) In-depth exploration of the major theoretical issues in psychosocial nursing. Seminar with analysis and discussion of selected topics and readings and implications for research and health care.

NURS 506 Role and Context of Advanced Practice Psychiatric Mental Health Nursing (3) Introduction to advanced practice roles in Psychiatric Mental Health Nursing. Diverse populations, practice settings, health care systems, standards of practice, certification, and licensing criteria relevant to the advanced practice role examined within the context of a broad range of ethical, clinical, and educational issues. Examines future directions. Credit/no credit only.

NURS 507 Mental Health of Older Adults (3) Examines the dimensions of mental health research and practice in normal, optimal and pathological aging. Focuses on psychosocial and environmental influences on mental health of older adults. Topics include: models of aging, cognitive impairment, depression, severe mental illness, and successful strategies to enhance mental health in older adults.

NURS 508 Seminar in Group Treatment (2) Seminar on the theoretical basis for working with various treatment groups. Analysis of selected approaches to group treatment. Analysis of leader responsibilities and functions in the development of therapeutic group experiences.

NURS 509 Issues in Violence and Aggression for Health Professionals (3) Focuses on research and theory of violent/aggressive behavior. Perspectives of victim, offender, family, community, society examined. Focus is recognition of violence against women. Course is designed to challenge students to clarify beliefs, values related to topics such as rape, homicide, domestic violence. Prerequisite: graduate nursing student or permission of instructor.

NURS 510 Primary Care Foundations: Diagnosis and Management of Common Health Concerns (1-3, max. 9) Focus on diagnosis and management of common primary care problems of adolescents and adults, including older adults, within advanced nursing practice. Emphasizes individual and family responses and nursing strategies including differential diagnosis, treatment, patient education, and follow-up. Content focus changes each quarter. Prerequisite: permission of instructor; recommended: concurrent field work.

NURS 511 Seminar in Neonatal Nursing (3) Neonatal neurobehavioral and physiologic adaptation within context of physical and social environment. Neonatal responses to alterations in growth and illness. Assessment modalities and therapeutic strategies used during the neonatal period. Prerequisite: NURS 514 or permission of instructor.

NURS 512 Critical and Interdisciplinary Approaches to Women's Health (3) Critical examination of the historical, socio-political, and scientific influences on women's health. Issues of sexism, racism, and heterosexism discussed from the perspective of different disciplines. Offered: jointly with WOMEN 512.

NURS 513 Seminar in Contemporary Women's Health Issues (1-5, max. 12) Critical analysis of contemporary and historical literature relevant to health care for women across the life span. Synthesis of a holistic view of women's health to guide research and practice. Offered: jointly with WOMEN 513.

NURS 515 Common Adolescent Health Problems (3) Focuses on assessment, clinical decision making, and management of common adolescent problems. Concepts and theories of health promotion, adolescent development, and intervention strategies are explored to provide a broad framework for caring for adolescents in primary settings. Offered: jointly with EPI 549.

NURS 516 Pediatric Pulmonary Anatomy and Physiology: Clinical Applications (2) Lung development, anatomy, and physiology: clinical application when caring for children with acute and chronic lung disease. Prerequisite: permission of instructor.

NURS 517 Pediatric Pulmonary Pathophysiology: Clinical Applications (2) Applies knowledge of pediatric anatomy and physiology to assessment and treatment of pulmonary pathophysiology in children. Nursing issues in caring for children and families with acute and chronic lung disease. Prerequisite: permission of instructor.

NURS 518 Advanced Practice Pediatric Primary Care Management (3) Focuses on use of clinical decision making framework to develop theoretically and empirically sound individualized comprehensive management plans for the young child who presents with common physical and behavioral symptoms in the primary care setting. Prerequisite: permission of instructor.

NURS 519 Curriculum Development in Nursing Education (3) Theoretical rationale for curriculum development, study of curricular problems in nursing in relation to the elements of the curriculum as described in a curricular design. Prerequisite: graduate standing.

NURS 520 Evaluation of Clinical Performance in Nursing (3) For graduate students preparing for faculty or staff development positions in nursing. Theory and principles of evaluation. Instruments to appraise clinical nursing performance developed as part of course requirements. Prerequisite: graduate standing or permission of instructor.

NURS 521 Computing Fundamentals for Health Providers (3) Enables health professionals to solve work/practice challenges using existing features of desktop computers. Emphasizes productivity concepts. Introduces extended features of common software packages, as well as basic concepts/methods of small system management and support. Prerequisite: permission to Health Informatics Certificate Program or by instructor permission. Offered: jointly with MEDED 580/W.
NURS 522 Legal and Ethical Issues in Advanced Practice Nursing (3) Shannon Reviews selected ethical issues in health care and legal guidelines relevant to health care decision-making. Explores bioethics as a type of applied ethics. Focuses on preparing students for ethical challenges in advanced nursing roles. Offered: jointly with MHE 542; Sp.

NURS 524 Conceptual Foundations for Care Systems Management (3) Critical analysis of nature and theoretical bases of care systems management practice. Concepts of nursing and organizational theory, and design to person-provider transaction management and leadership in context of economic, political, and social environments and health outcomes. Prerequisite: graduate standing. Offered: jointly with MHE 542; Sp.

NURS 525 Managing Clinical Effectiveness Within Care Systems (3) Optimizing person-provider clinical therapeutic treatments at multiple levels of care systems complexity and population aggregation. Emphasis on designing, managing and evaluating clinical effectiveness and efficiency within care systems. Prerequisite: NURS 524 or permission of instructor.

NURS 526 Managing Organizational Effectiveness Within Care Systems (3) Analysis of management strategies for attaining effective and efficient organizational structures and processes within health care systems. Prerequisite: NURS 524 or permission of instructor.

NURS 527 Managing Effective Access and Utilization Within Care Systems (3-4) In-depth inquiry into health care access and resource utilization patterns among diverse populations, with emphasis on management strategies for establishing effective population-system fit. Additional credit for exploring access and utilization patterns within specific populations.

NURS 528 Implications of Human Embryology and Genetics for Clinical Practice (3) Normal development of the human embryo and fetus and principles of human genetics. Alterations in development leading to common anomalies and implications for clinical practice. Prerequisite: graduate standing or permission of instructor.

NURS 529 Childhood Common Developmental and Behavior Issues (2) Focus on common developmental and behavioral issues presented by children and their families in primary care setting. Emphasis on the developmental, family, and cultural aspects of assessment and management of the common issues.

NURS 530 Conceptual Frameworks for Parent-Child Nursing (3) Designed to assist graduate students in exploration, criticism, and analysis of selected concepts, frameworks, and models relevant to parent-child nursing practice. Group seminar work focuses on the discussion of issues influencing the roles and practice of clinical nurse specialists in parent-child nursing. Skills necessary for developing a conceptual framework for practice.

NURS 531 Selected Topics in Family and Child Nursing (1-6, max. 12) In-depth examination of the literature pertinent to major theoretical issues in parent and child nursing. Seminar with analysis and discussion of selected topics and readings. Implications for research, prevention, and health care stressed. Prerequisite: permission of instructor.

NURS 532 Professional Issues in Advanced Parent and Child Nursing (2-5, max. 5) History and current issues in advanced parent and child nursing practice and interface with health care systems. Advanced practice roles in provision, implementation, and evaluation of health care services for women, children, and families. Opportunity for application to specific advanced practice roles. Prerequisite: permission of instructor.

NURS 533 Healthcare of Cancer Survivors (2) Focuses on teaching the health science graduate students about cancer survivorship issues. Discusses the health concerns of those who have been cured of their initial malignancy but are still at risk of long-term effects of chemotherpay, radiation, and surgery. Prerequisite: PHARM 560 (PHARM D students only). Offered: jointly with PHARM 568.

NURS 534 Seminar in Nursing in Gerontology (3) Gerontological research findings applied to complex nursing problems in maintenance of health and maximum functioning in the aged.

NURS 535 Seminar in Neuroscience Nursing (3) Guided survey of clinical and experimental literatures regarding selected concepts of human functioning mediated by the nervous system: consciousness, mentation, movement, sensation, integrated regulation, coping with disability. Clinical and research measurement, current research and implications for further research, clinical applications.

NURS 536 Biological Aspects of Cancer: Implications for Care (3) Survey of major concepts from tumor biology and implications for advanced oncology nursing practice. Areas covered include carcinogenesis, cancer epidemiology, pathology, metastasis, treatments (chemotherapy, radiation, surgery, immunotherapy), and cancer detection and prevention. Discussion of role of advance nurse clinician and complex patient responses are incorporated into discussion of basic biological concepts.

NURS 537 Symptom Management in Cancer Care and Serious Illness (3) Berry, Nguyen Focuses on assessment, integration of research findings into clinical decision-making, diagnostic reasoning, and management of common symptoms experienced by adult patients with cancer and/or serious illness. Explores individual and family responses to serious illness and malignant processes. Emphasizes concepts of prevention, tailored patient/family education, management and evaluation strategies. Offered: Sp.

NURS 538 Management of Adults with Respiratory Dysfunction (3) In-depth examination of problems such as abnormal secretions and shortness of breath associated with respiratory dysfunction due to pulmonary diseases and other pathophysiological states.

NURS 539 Seminar in Critical-Care Nursing (3, max. 9) Systematic inquiry into pathophysiology, initial nursing management, and systems of care for the critically ill adult or child.

NURS 540 Special Topics in Biobehavioral Nursing and Health Systems (3-6, max. 9) Guided survey of the experimental literature of major topics in physiological nursing, including cardiopulmonary, biology of aging, neuromuscular, cancer, and endocrine. Course conducted as a seminar with analysis and discussion of selected topics and readings. Implications for future research and health care are emphasized.

NURS 541 Care of Well Women (4) Examines components the components of advanced nursing/midwifery care of well women. Emphasis on assessment, diagnosis, and management of common health issues and problems of women across the life span. Prerequisite: permission of instructor.

NURS 542 Care During Childbearing I (4) Advanced nursing/midwifery care and management of the low-risk childbearing woman and fetus through conception, prenatal, intrapartum, and postpartum periods. Prerequisite: NURS 541.

NURS 543 Advanced Practice Childbearing and Women’s Health Care (1-4, max. 4) Assessment and management related to advanced nursing/midwifery perinatal care and women’s health care problems. Topics covered are ambulatory antepartum and postpartum care, intrapartum care, and advanced women’s health care and adolescents at risk. Module(s) selected depends on program requirements or student elective. Offered: W.

NURS 544 Psychosocial Adaptations of Individuals and Families during the Perinatal Period (3) Adaptation of individuals and families during the perinatal period, with emphasis on psychosocial adaptation, consumer education, transition to parenthood, parent-infant interaction and community based support. Prerequisite: permission of instructor.

NURS 545 Care of the Neonate and Infant (2-3, max. 3) Adaptation of neonate to the extruterine environment and continuum of care to promote the health of infants within the context of family, community, and other environments. Prerequisite: NURS 514, NURS 528, or permission of instructor.

NURS 546 Interpersonal Aspects of Behavior (3) Selected theories in relation to psychosocial development and adaptation across life span for individuals, families, and small groups and as explanatory models of major psychosocial disabilities. General and psychosocial nursing models evaluated for heuristic value for research and practice. Prerequisite: graduate standing or permission of instructor.

NURS 547 Biologic Aspects of Psychosocial Disabilities (3) Analysis of biological processes influencing psychosocial behavior in response to internal and external stimuli. Research and theory of neuroendocrine mechanisms in psychosocial disabilities. Analysis of nursing management and evaluation of biopsychosocial modalities used in modification of behavior. Prerequisite: graduate standing in nursing or permission of instructor.

NURS 549 Assessment in Psychosocial Nursing (3) Conceptual and clinical approaches
to advanced-level data collection and diagnostic reasoning in psychiatric/psychosocial disorders. Synthesizes knowledge from psychosocial nursing and multiple allied fields to enhance learners’ cognizance of principles for establishing accurate and comprehensive data bases and sound multifaceted diagnostic formulations. Emphasizes DSM diagnostic scheme.

NURS 550 White Privilege and Racism in Health and Human Services (3) Explores relationships between the psychosocial health of people of color, American cultural patterns of intersecting forms of oppression (e.g., gender, race, and class) and the role of health professionals in defining, ameliorating and/or aggravating psychosocial distress. Credit/no credit only.

NURS 551 Theoretical Foundations of Primary Care (1-3, max. 3) Presentation and interpretation of theoretical basis of advanced nursing practice in primary care. Provides students with conceptual foundation upon which to base their development as nurse practitioners. Prerequisite: graduate standing; permission of instructor.

NURS 552 Health Promotion (2-3) Emphasis on health promotion, screening, and disease prevention in primary care. Examination of individual and family wellness, models of risk assessment and behavior change, health promotion strategies, and barriers to achieving health. Opportunity to explore age-related health risks. Prerequisite: graduate standing and permission of instructor; recommended: nurse practitioner students take fieldwork concurrently.

NURS 553 The Mentally Ill Offender in Correctional and Community Settings (3) Survey of social, political, economic, legal, and moral problems posed by individuals with mental disorders who commit crimes. Covers historical antecedents and current responses of correctional and mental health systems to mentally ill offenders, prevalence and correlates of incarceration, and roles of professionals in correctional mental health field. Credit/no credit only. Offered: W.

NURS 554 Psychosocial Interventions in Nursing (3) Course focuses on conceptual foundations and interpersonal skills for therapeutic relationships to promote personal change and effective adaptation. Emphasizes forming and maintaining a therapeutic alliance and utilizing a client-centered approach to define problems and select appropriate therapeutic interventions. Examines traditional, non-traditional, and multicultural therapeutic perspectives.

NURS 555 Psychopathology, Assessment, and Diagnostics of Children 3 and Under (2-, max. 4) Psychopathology, mental health assessment, and diagnostics in children aged 3 and under, framed by the Diagnostic Classification for Developmental and Mental Health Disorders (DC:O-3). Develops skills and techniques necessary in infant mental health. Prerequisite: acceptance into Infant Mental Health Certificate program or permission of instructor. Offered: WSp.

NURS 557 Health, Culture, and Community (3) A theory and skills class concerning development of person-environment-cultural competence in community-based participatory research. Core concepts of cultural competence are considered as they are practiced in community settings. Fieldwork required. Offered: jointly with HSERV 576.

NURS 559 Theories of Psychiatric Disabilities (3) Theories from psychosocial nursing, psychiatry, and behavioral sciences explanatory of psychiatric disabilities provide basis for identifying psychosocial problems. Structure and functions of mental health organizations and social networks analyzed. Prerequisite: NURS 547 or permission of instructor.

NURS 560 Dynamics of Community Health Practice (3/5) Examination of and experience with principles of clinical practice in community settings. Included are family as community constituent, populations at risk, community assessment, and community development. Prerequisite: graduate standing or permission. Offered: jointly with HSERV 508.

NURS 561 Selected Topics in Comparative Nursing Care Systems (2-3, max. 10) In-depth examination of the literature pertinent to major theoretical issues in cross-cultural nursing and health-care systems. Seminar with analysis and discussion of selected topics and readings. Implications for research and health care stressed. Offered: jointly with ANTH 562.

NURS 562 Clinically Applied Anthropology (3) Anthropology as it relates to interdisciplinary delivery of culturally relevant health care. Cultural variation in such antecedents to behavior, types of healing practices, illness prevention, social support networks. Prerequisite: graduate standing, permission of instructor. Offered: jointly with ANTH 562.

NURS 563 Advanced Community Health Nursing (3) Systematic inquiry into the nature and foundations of community health nursing. Analytic and theoretical perspectives on health policy, risk assessment and nursing interventions in the community. Implications for community health nursing services. Prerequisite: permission of instructor and graduate standing.

NURS 564 Biopharmacological Management in Psychosocial Nursing (3) Biological and pharmacological interventions pertinent to practice of psychosocial nursing, including psychopharmacology, electroconvulsive therapy, and phototherapy. Emphasis on empirical neuroendocrine bases and then nursing management issues pertaining to these interventions. Prerequisite: issues pertaining to advanced practice and putative neurological mechanism are examined. Prerequisite: NURS 547 or permission of instructor.

NURS 565 Self-Management Strategies and Techniques in Patient Care (3) Theories underlying cognitive/behavioral self-management strategies and techniques in patient care. Evaluation of the clinical appropriateness and utility for nursing. Application to such clinical problems as abstinence in the recovering alcoholic, depression, and eating disorders. Prerequisite: graduate standing or permission of faculty.

NURS 566 Occupational Stress and Stress Management (3) Relationships between occupational stressors and worker’s health, well-being, productivity. Analyzes models of occupational stress. Investigates similarities, differences between job-related stressors and stress responses in various occupations. Explores elements of workplace stress management programs. Prerequisite: graduate standing in nursing or allied health discipline; advanced undergraduates with permission of instructor. Offered: jointly with EN VH 565.

NURS 567 Theoretical Basis of Management of Stress Response (3) Theories of physiologic responses linked to theories of cognitive/affective and behavioral responses to stressors. Conceptual basis of self-management techniques. Research findings relevant to these theories and techniques examined and analyzed. Prerequisite: course in human physiology or physiologic psychology, permission of instructor.

NURS 568 Health Politics and Policy (3) Analyzes the formal and informal political context of health care delivery, professionals, and institutions in the United States. Addresses medical coverage and public persuasion, as well as policy analysis. Special attention is paid to women’s political resources and participation. Credit/no credit only.

NURS 595 Observation and Assessment of Relationships (3) Speaks to identifying patterns of behavior in interactions between young children and their caregivers. Assessment of relationships in the early years. Students learn to incorporate an attachment theory approach and observation tools from research into the work of their own discipline or field. Offered: Sp.

NURS 570 Family Concepts: Health and Illness (3) Emphasizes the family as unit of care across the life span. Reviews psychosocial factors influencing family health promotion, including resilience, vulnerability, risk reduction, and health policy; continuity, change and transition; and promotion of family health during acute and chronic illness episodes.

NURS 571 Advanced Interpersonal Therapeutics with Families (3) Models and research on therapeutic relationships and interpersonal processes evaluated and applied to group interactions among family members, among professionals, and between the family, professionals, and macrosystems. Partnership building emphasized. Individual and group characteristics examined across the life span in social, cultural, and health contexts. Prerequisite: permission of instructor.

NURS 573 Professional Issues for Nurse Practitioners (2) Presentation and analysis of current health care trends and key professional issues influencing nurse practitioner practice. The NP’s leadership role, role of health policy, accountability to the profession/public, marketability, and legal dimensions of practice are stressed. Prerequisite: NP student nearing program completion or permission.

NURS 574 Family Interpretation and Management of Disordered Behavior across Cultures (3) Examines interpretation and management of disordered behavior from the perspective of families — intergenerational and across cultures. Critically reviews selected theoretical frameworks for understanding families. Emphasizes theory, cultural perspective, and family assessment skills to plan relevant family interventions to assist families in managing disordered behaviors of family members.

NURS 575 Grief and Loss in Clinical Practice (2-4, max. 4) Analysis and study of social, cultural, and psychological conditions that influence human loss, grief, and death in modern society. Research findings, selected readings, and direct experience provide base for examination of philosophic, theoretical, and pragmatic issues underlying choices and decisions in clinical practice. Open to graduate students with permission of instructor. (Limit: sixteen students.)
NURS 576 Assessment and Collaboration with Communities and Systems (3) Examine, critique, and apply theory and practice in assessing and collaborating with communities, populations and systems cross-culturally. Develop techniques for working with communities and systems, including using multiple data sources, performance indicators, community mobilization, capacity building, and coalition development. Graduate level. BSN senior with permission.

NURS 577 Seminar in Infant Mental Health Intervention Models, Consultation, and Leadership (1-, max. 3) Capstone course in Infant Mental Health Certificate Program. Explore the role of consultation, role of collaboration and leadership in the field. Field work in Infant Mental Health Program serves as context for exploring consultation and leadership roles. Synthesis and reflection of personal preparation and role encouraged. Offered: AWS.

NURS 578 Social Determinants of Health (3) Analyze the distribution and causes of health disparities in populations and communities, including but not limited to social, psychological, biological and environmental factors, to assess social determinants of health problems and their remedies. BSN senior with permission of instructor.

NURS 579 Transcultural Nursing Practices (3) Seminars examine four decades of nursing practice literature and other disciplines related to appropriate and competent care of diverse and multicultural populations. Concepts and methods from anthropology and other behavior sciences are considered in relationship with current health practice guidelines. Graduate standing or instructor permission.

NURS 580 Current Issues in Occupational and Environmental Medicine (2, max. 12) Kaufman Interdisciplinary seminar on current and emerging topics in the practice of environmental and occupational health. Faculty- and student-lead presentations with an interdisciplinary focus, including occupational hygiene, nursing, and medical issues. Prerequisite: environmental health graduate student, occupational health nursing student, or permission of instructor. Offered: jointly with ENV H 596; AWSp.

NURS 581 Study of International Health (2-3) Hegyvary International health based on the concept of health ecology. Assigned readings, discussions, and analyses include different perspectives, strategies, systems, and the wide range of conditions and forces that affect global and local health and illness. Emphasizes roles of health care providers. Credit/no credit only.

NURS 582 Socio-Cultural Perspectives of Public Health Genetics (3) Examines social and cultural issues of human genome sequencing and control of genetic expression. Attitudes and behaviors toward health, illness, and disability are studied using historical, contemporary, and cross-cultural case study material. Offered: jointly with ANTH 574/PHG 521.

NURS 583 Emotions and Mental Health: From Adversity to Adaptation (3) Betsur, Elmore Provides an understanding of nature and function of emotions as well as relationship of emotion to mental health/illness. Emphasizes adversity arising from individual and community sources and its impact on emotional health. Addresses implications for interpersonal and social policy interventions.

NURS 584 Critical and Interdisciplinary Approach to Health Policy (3) Advanced seminar to critically analyze various policy makers, including but not limited to social, psychological, biological and environmental factors, to assess social determinants of health problems and their remedies. BSN senior with permission of instructor.

NURS 585 Introduction to Forensic Nursing and Health Care (3) Baker Examination of the roles, functions, and evolution of the forensic nurse specialty; its relationship to other disciplines and professions; its roles working with victims of crime, violence and abuse, along with offender populations. Introduction to ethical issues in forensic health services.

NURS 586 Forensic Nursing and Health Care for Vulnerable Populations (3) Baker Focuses on the roles of forensic nurses and other workers with populations at risk for violence, assault, and abuse; emphasizing issues related to age, race/ ethnicity and gender. Examines concepts of vulnerability, dependence, and victimization; interactions with criminal justice and health care systems.

NURS 587 Role Transition Seminar (2) Emphasis on transition to doctoral study and eventual post-graduate roles. Includes information to clarify expectations and skills to facilitate success: various forms of scholarly and interpersonal communication, principles of scholarly collaboration, giving, receiving and critiquing, and other topics developed by participants. Credit/no credit only.

NURS 588 Philosophical Basis of Nursing Inquiry (3) Overview and critical analysis of historical and contemporary views of knowledge development and of science, with particular emphasis on the ways these views influence approaches to nursing inquiry. Emphasis on analyzing the underlying epistemological and ontological assumptions and implications of diverse approaches to knowledge generation in nursing.

NURS 589 Theoretical Perspectives in Nursing (3) Critical analysis of theory development, including evaluation of relationships among theories, evidence, and explanation. Diverse approaches used to analyze historical and contemporary milestones in the development and evaluation of nursing knowledge. Emphasis on process and implications of theory development for nursing research, practice, education, and systems. Prerequisite: NURS 588. Offered: W.

NURS 590 Ecology of Human Health (5) Focus on the pluralistic constructions of health as related to different environments. Personal and biological characteristics vary, interact with, and transform the person and the environment. Emphasis on nursing as a social construction which is interactive with the human's experience of health and healing.

NURS 591 Advanced Seminar in Nursing Science (3, max. 15) In-depth analysis and evaluation of literature in focused areas of research. Synthesis of literature related to selected fields of nursing science. Oral analysis of assigned papers and topics. Prerequisite: graduate standing or permission of instructor.

NURS 592 The Science of Nursing Therapeutics (4) Addresses the state of the science of nursing therapeutics. Students examine the practices of nursing to promote, maintain, and restore human health from an ecological perspective. Therapeutics considered from the perspectives of the individual, family, and community systems.

NURS 593 Preventive Therapeutics (3) Examines literature in the field of health promotion and illness prevention with the purpose of students developing their individual model of health promotion and illness prevention in their own foci of interest considering the social and political forces prevailing.

NURS 594 Advanced Seminar on Healing (3) Advanced seminar to critically analyze current thinking and practice applications that fall under the heading of “healing.”

NURS 595 Synthesis of Nursing Science (3) Provides a forum for critical analysis, integration, and synthesis of core content provided during the initial year of the Ph.D. in Nurse Scientist Program and further planning of program of study. Prerequisite: completion of first year required courses of doctoral program. Credit/no credit only.

NURS 596 Colloquium, Scientific Conduct, and Dissertation Seminar (2, max. 12) Focuses on group discussion of issues pertinent to research conduct. Scientific conduct topics include guidelines relevant to designing, conducting, and disseminating research; risk management in reference to scientific misconduct and negligence; and collaborative and peer-review skills relevant to intra- and interdisciplinary research.

NURS 599 Selected Readings in Nursing Science (1-3, max. 18) Analysis of synthesis of selected readings with faculty mentor. Credit/no credit only. Prerequisite: permission of instructor.

Nursing

NSG 501 Teacher Practice Essentials-Models of Teaching & Learning (3) Integrative approach to understanding teaching learning that explores how various educational models and principles frame the processes of teaching and learning. Focus toward advanced practice nurses interested in teaching. Prerequisite: permission of instructor and graduate student status.

NSG 503 Advanced Teacher Practice Essentials-Diverse Learners (3) Focus on relevance and inclusiveness of addressing diversity of learners within teaching and learning activities. Aimed toward advance practice nurses interested in teaching. Further expands content of NSG 501 and NSG 502. Prerequisite: NSG 501 and graduate student status.

NSG 504 Advanced Teacher Practice Challenges in Teaching (3) Focus on challenges facing educator during teaching encounters. Addresses influence of belief structures on learner’s motivation for change. For advance practice nurses interested in teaching. Prerequisite: NSG 501 and graduate student status.

NSG 505 Applied Occupational Health and Safety (3) Camp, Johnson Application of occupational safety and health principles. Student teams perform evaluations, assess production methods/processes and exposures,
Nursing Clinical

NCLIN 302 Practicum: Health Assessment (1-5, max. 5) Lecture and lab emphasize nursing skills in communication, interviewing, functional and physical health assessment. Includes: basic communication skills, beginning physical and psychosocial assessment of the individual across the lifespan, and family assessment. Credit/no credit only. Offered: AS.

NCLIN 306 Practicum: Basic Skills of Nursing Practice (4) Practicum in communication, interviewing, health assessment, identification of threats to health in clinical settings. Explores risk, vulnerability identification, communication, physical/psychosocial assessment of individuals across lifespan, nursing care planning, documentation, psychomotor skills development. Credit/no credit only. Prerequisite: NCLIN 302, which may be taken concurrently.

NCLIN 402 Practicum: Care in Illness I (4) Provides supervised nursing care to individuals/families with acute/chronic illness across the lifespan. Emphasizes beginning skills in systematic assessment, including person/environment fit, developing competency in selected nursing therapies, and developing role as care agent for persons of all ages. Credit/no credit only. Prerequisite: NCLIN 401, which may be taken concurrently.

NCLIN 406 Practicum: Care in Illness II (1-10, max. 10) Provides supervised nursing care to individuals and families with acute and chronic illness. Emphasis on increasing skill in systematic assessment, developing competency in selected nursing therapies, and developing role as caring agent for persons of all ages. Credit/no credit only.

NCLIN 409 Partnerships in Community Health (6) Analysis, application, and evaluation of community partnership process for health. Analysis of nursing role in community/public health, including community building, collabora-
tion, policy. Development and formulation of community interventions to maintain/promote biopsychosocial health. Teaching methods: seminar on the theoretical basis for working with various treatment groups. Analysis of selected treatment modalities to these concepts. Prerequisite: Recent (within 5 yrs.) upper division anatomy/physiology course or permission of instructor.

NCLIN 501 Diagnostic Testing and Monitoring in Serious Illness (2) Lecture, discussion, and laboratory sessions to develop students' assessment, diagnostic, and monitoring expertise in the care of acutely ill individuals. Students refine clinical decision-making skills, apply specialized assessment, gain insight into clinical experts' critical thinking, and refine assessment knowledge for a specific patient population. Prerequisite: NCLIN 501 or equivalent.

NCLIN 503 Advanced Fieldwork Community Nursing (2-6, max. 12) Guided experience in delineating nursing roles in community settings. Development of a philosophy of community health nursing. Application of core concepts pertaining to health, ethics, care, and community. A minimum of four hours of guided experience weekly. Prerequisite: graduate standing and permission of instructor.

NCLIN 505 Teaching Methods and Practicum in Nursing Education (2-10, max. 10) Guided experience in selected teaching-learning situations in nursing, in both classroom and clinical situations. Identification, analysis, and solution of teaching-learning problems in clinical nursing. Minimum of seven hours of guided experience weekly.

NCLIN 510 Group Work with High-Risk Youth (3-6, max. 6) Theory and application course in group counseling for high-risk youth. Central theme is group leader effectiveness in helping young people increase school performance, decrease drug involvement, and increase emotional well-being. Open to graduate students in nursing, education, and related human services professions.

NCLIN 512 Advanced Practicum in Parent and Child Nursing I (1-12, max. 25) Clinical seminar and practicum provide opportunities to develop...
NCLIN 554 Advanced Practice Specialist Clinical Practicum IV (1-10, max. 20) Apply, synthesize, evaluate, and communicate knowledge about a specific domain of advanced medical/surgical or forensics nursing practice. Fieldwork serves as capstone experience. Seminar emphasis is on consultation and collaboration. Credit/no credit only. Prerequisite: NCLIN 543.

NCLIN 556 Management of Acute and Chronic Wounds (2-3) Evaluation and treatment of acute and chronic wounds. Includes wound healing physiology, pathophysiology, patient evaluation, evaluation of environmental and systemic factors related to risk of impaired healing, methods for assessing wound progress, and evidenced based treatment options. Optional one credit clinical and lab experience. Prerequisite: graduate standing or permission of instructor.

NCLIN 549 Nurse Practitioner Clinical Practicum I: Adults/Older Adults (1-10, max. 10) Clinical fieldwork and seminar in advanced nursing practice with individual/groups. Students practice under clinical preceptor supervision. Focuses on data collection/critical thinking related to relevant theories and relation to health, incorporating knowledge from the biological, behavioral, and social sciences. Credit/no credit only. Prerequisite: permission of instructor, or NCLIN 501 or equivalent.

NCLIN 550 Nurse Practitioner Clinical Practicum II: Adults/Older Adults (1-10, max. 10) Clinical fieldwork and seminar in advanced practice nursing. Students practice under preceptor supervision. Addresses selected role issues in advanced practice nursing. Credit/no credit only. Prerequisite: NCLIN 549 or permission of instructor.

NCLIN 551 Advanced Practice Nursing Clinical Practicum III: Adults/Older Adults (1-10, max. 10) Clinical fieldwork and seminar in advanced practice nursing. Builds on NCLIN 550, emphasizing the integration and application of previous learning in the practice of nursing with people with multiple health problems. Students practice under preceptor supervision. Addresses selected role issues in advanced practice nursing. Credit/no credit only. Prerequisite: NCLIN 550 or permission of instructor.

NCLIN 552 Nurse Practitioner Clinical Practicum IV: Adults/Older Adults (1-10, max. 10) Intensive clinical experience in which students integrate previous learning to assume responsibility for care of older adults and/or adults with multiple health problems. Students practice as an advanced practice nurse supervised by a preceptor, assuming increasing responsibility for planning/implementing therapies and for documenting/evaluating outcomes. Credit/no credit only. Prerequisite: NCLIN 551.

NCLIN 553 Seminar in Primary Care I: Health Promotion (2) Weekly seminars with supervised field study within selected primary-care and wellness settings. Emphasis on health assessment and strategies related to improving health in people of all ages. Analysis of, and for documenting/evaluating outcomes. Credit/no credit only. Prerequisite: NCLIN 551.

NCLIN 555 Seminar in Primary Care II: Management of Common Health Concerns (3) Focus on research questions, patient presentations, and group discussions drawn from field study. Supervised clinical field study within selected primary-care settings and weekly seminar discussions related to theory presented in NURS 510. Credit/no credit only. Prerequisite: graduate standing and permission of instructor.

NCLIN 556 Seminar in Primary Care III: Management of Common Health Concerns (3) Focus on research questions, patient presentations, and group discussions drawn from field study. Supervised clinical field study within selected primary-care settings and weekly seminar discussions related to theory presented in NURS 510. Credit/no credit only. Prerequisite: graduate standing and permission of instructor.

NCLIN 557 Seminar in Primary Care IV: Management of Common Health Concerns (3-5) Focus on research questions, patient presentations, and group discussions drawn from field study. Supervised clinical field study within selected primary care settings and weekly seminar discussions related to theory presented in NURS 510. Credit/no credit only. Prerequisite: permission of instructor; nurse practitioner students register for NURS 510 concurrently.

NCLIN 558 Occupational Health Nursing: Program Development (2-6, max. 6) In-depth examination of occupational health and safety programs including organizational analyses, budgeting, marketing, case management, and workers' compensation; also political, economic, legal, and ethical issues. Focuses on development, implementation, and evaluation of programs including health promotion, EAP, and health surveillance. Applies public health and nursing sciences to selected work-related problems.

NCLIN 559 Seminar in Primary Care V: Complex Clinical Decision Making (1-11), max. 11) Seminar with associated field study. Synthesis of advanced knowledge base and clinical family nurse practitioner skills with effective management of complex clinical problems. No grade given until 11 total credits completed. Credit/no credit only. Prerequisite: graduate standing and permission of instructor.

NCLIN 566 Advanced Clinical Practicum in Psychosocial Nursing (1-9, max. 20) Seminar and practicum focus on development of advanced clinical and role-function skills. Practicum in settings with select populations under supervision of expert clinicians. Seminars use evidenced-based practice criteria to integrate cases into discussion. Credit/no credit only. Prerequisite: NURS 570, NURS 564, one theory course, or permission of instructor.

NCLIN 570 Practicum in Adult Psychosocial Assessment (2) Under supervision of faculty/
preceptors from clinical agencies, students use evidence-based practice criteria to assess individuals, groups, and families. Students gain skills in psychosocial interviewing, mental status examinations, and assessing psychosocial variables by standardized instruments and clinical interview. Credit/no credit only. Prerequisite: NURS 549 or permission of instructor.

NCLIN 572 Practicum in Physical Assessment (3) Physical assessment in practicum with the opportunity to refine skills in taking a complete health history and in performing physical examinations in a clinical setting. Credit/no credit only. Prerequisite: either NURS 510 modules ABC or NURS 510 modules HI; NCLIN 500; 501, or permission of instructor.

NCLIN 573 Advanced Field Study in Family Nursing (2-9, max. 9) Advanced practice development in direct care, consultation, and/or care coordination with individual families or groups of families across the life span. Opportunities provided to strengthen interpersonal and therapeutic process skills, family nursing approaches relevant to family health promotion, problematic family health patterns. Prerequisite: concurrent registration in NURS 572, NCLIN 574; recommended: NURS 571.

NCLIN 599 Independent Study Clinical Practicum (1-12, max. 25) Clinical practicum to develop advanced-practice nursing skills in care of individuals, groups, communities, or care systems. Individually arranged with faculty member for application of theory and principles to direct care, consultation, education or care coordinator roles. Prerequisite: matriculated MN student or post-master's student, and permission of academic adviser and instructor. Offered: AWSpS.

Nursing Methods

NMETH 403 Introduction to Research in Nursing (3) Organization of the structure of nursing knowledge through research. Concepts and processes of research utilized in the investigation of nursing science.

NMETH 499 Undergraduate Research (1-5, max. 12) Supervised individual scholarly inquiry on a specific nursing problem.

NMETH 515 Sociobehavioral and Prevention Research Methods for HIV and STI (3) Kurth Focuses on prevention methods for controlling HIV/STI epidemics, identifying a range of alternatives along the prevention continuum as most appropriate and feasible for settings and populations, and solutions to increase HIV/STI prevention agenda in public health and clinical policy and practice. Offered: jointly with EPI 549; Sp.

NMETH 521 Methods of Research in Nursing (2) Continuation of 520, with emphasis on methods of research applied to the solution of problems in all fields of nursing.

NMETH 522 Data Management for Research Professionals (4) Surveys industrial strength data management, using techniques applicable to multi-center, longitudinal research trials with survey instruments. Involves challenges research professionals face as they graduate from a student project to a study with hundreds of cases, variables, multiple survey instruments and a staggered, repeated sampling protocol. Credit/no credit only.

NMETH 526 Patient-Centered Interactive Health Communication Technologies (3) Overview of current and emerging consumer-centric eHealth tools and technologies. Researchers and practitioners from multiple disciplines present theories, concepts, and principles from health, information, cognition, and human-factor design to relate to development and use of these tools and technologies.

NMETH 527 Introduction to Health Informatics and Systems Thinking (3) Masuda, Oyler Examines how informatics aids in the transformation of healthcare delivery and how to most effectively use the theories and best practices in informatics toward building and deploying informatics solutions. Offered: jointly with MEBI 581. Offered: A.

NMETH 528 Computing Concepts: From Theory to Application (3) Johnson Survey of conceptual and applied computing concepts. Conceptual topics include a global survey of hard/software, networking, information systems analysis/design, and systems development. The applied component emphasizes desktop system management skills and the creative use of spreadsheets to enhance personal productivity. Offered: jointly with MEBI 580. Offered: W.

NMETH 529 Database Concepts and Applications in Clinical Informatics (3) Oyler Introduction to relational database theory and technology from a health informatics perspective. Focuses on transactional database theory, architecture and implementation in a socio-technical context. Examines database applications used in clinical environments. Introduces knowledge bases and data warehouses. Offered: jointly with MEBI 571. Offered: W.

NMETH 575 Seminar in Clinical Research in Nursing (3) Philosophy, problems of design; use of criterion measures in terms of patient care.

NMETH 576 Scholarly Proposal Development (2) Jarrett, Killien, Schepp, Simpson Focuses on the application of methods of inquiry to develop a scholarly proposal through faculty-guided small group discussion and individual composition. Prerequisite: NMETH 520. Offered: AWSpS.

NMETH 577 Seminar in Clinical Research in Nursing (3) Methodological Issues in Family Research (3) Emphasizes research with the family as unit of analysis. Examines patterns of family functioning in relation to responses to health situations. Reviews family units from generational and intergenerational perspectives. Critiques methods assessing dyadic and triadic relationships and therapeutic interventions on family outcomes. Prerequisite: permission of instructor.

NMETH 580 Methodological Perspectives in Nursing Inquiry (5) Allows students to translate philosophical and theoretical perspectives into research methodologies. Focus will include: the relationship of theoretical perspectives to methodologies; the methodological issues among and between varying schools of thought (including contemporary empiricist, interpretive, and critical/postmodern); and how the methodological choices influence choices of research design and methods.

NMETH 581 Observational Research Methods (2-6, max. 6) Examines observational methods for conducting verbal and nonverbal behavioral research. Emphasizes critical analysis and rigor in research question formulation, measurement decisions, coding scheme development, data collection, and analysis and interpretation of data. In-depth application of observational method optional. Prerequisite: graduate standing and basic research methods course or permission of instructor. Offered: W.

NMETH 570 Methods in Nursing Research (1-4) Seminar and field practicum for interpretative research methods. Study on health-related issues using a selected tradition in interpretative methods. Prerequisite: permission of instructor.

NMETH 573 Interpretive Methods in Nursing Research (4) Seminar and field practicum for interpretative research methods. Study on health-related issues using a selected tradition in interpretative methods. Prerequisite: permission of instructor.

NMETH 574 Methods: Physiologic Measures (4) Exploration of the measurement of physiologic functioning in human and animal models. Examples include biochemical and biophysical measurements. Study of beginning skills with one physiologic measure. Prerequisite: physiology and chemistry and permission of instructor.

NMETH 585 Meta-Analysis (4) Meta-analysis examined as a method to synthesize research. Overview of meta-analytic methods; description of the collection, analysis, synthesis, and reporting of studies; explanation of statistical calculations; and discussion of reliability and validity measures incorporated into meta-analytic design. Prerequisite: permission of instructor.

NMETH 586 Instrument Development and Testing (4) Includes measurement theory, reliability, validity, level of measurement, and the process of scale development, modification, or translation. Students learn to evaluate, develop, modify, translate, and test instruments for use in research. Prerequisite: student in health science discipline and permission of instructor.

NMETH 587 Methods of Theory Testing: Causal Modeling with Path Analysis and Structural Equation Modeling (4) Includes causal inferencing and theory testing through causal modeling with path analysis and structural equations modeling. Students learn to evaluate theory models and to apply the content by developing and testing models. Prerequisite: student in health science discipline and permission of instructor.

NMETH 590 Special Topics in Nursing Research (2-3, max. 9) Examination of a specific research method, with evaluation of appropriateness, efficiency, rigor of measurement, and potential for inference for nursing research. Prerequisite: minimum of 5 credits of basic nursing research methodology at graduate level and permission of instructor.

NMETH 591 Clinical Outcome Research I (4) Examination of philosophical, analytical, and methodological decisions and processes in evaluating the effectiveness of interventions and programs designed to enhance health outcomes. Alternative designs are addressed in consideration of underlying assumptions about prevention/causation research; clinical human phenomena; design sensitivity; and threats to validity. Theory development emphasized. Prerequisite: permission of instructor.

NMETH 592 Clinical Outcome Research II (2-
College of Ocean and Fishery Sciences

Aquatic and Fishery Sciences

FISH 101 The Living Aquatic World (5) I&S/NW

FISH 210 Methods in Fisheries and Aquatic Sciences: Theory and Applications (5) NW
Comprehensive survey of the theory and techniques of field research in aquatic sciences. Topics emphasize sampling design, data collection, and interpretation across a broad suite of topics and approaches. Field trips and laboratory sections are mandatory. Recommended: 10 credits in biology.

FISH 250 Marine Biology (3/5) I&S, NW
Lecture-laboratory course in Marine Biology focusing on physical, biological, and social aspects of the marine environment. Topics include oceanography, ecology, physiology, behavior, conservation, fisheries, exploration, and activism. Evening marine biology movies and weekend field trip. Honors section research project. Offered: jointly with BIOL/OCEAN 250.

FISH 296 Study Abroad: Aquatic and Fishery Sciences (0) NW
For participants in UW study abroad program. Specific content varies and must be individually evaluated. Credit not does not apply to major requirements without approval.

FISH 297 Special Topics in Fisheries (1-5, max. 5) NW
Selected topics in aquatic science and fisheries.

FISH 310 Biology of Shellfishes (5) NW
Commercially important mollusks, crustaceans, and other harvested invertebrates highlighted with respect to systematics, anatomy, reproductive strategies, feeding, and growth. Examples of species that demonstrate variability in recruitment and complex life cycles. Laboratories, field trips. Recommended: 10 credits biological science.

FISH 311 Biology of Fishes (3/5) NW
Lecture and laboratory, of the morphological, physiological, behavioral, and ecological diversity of fishes of the world; designed to provide a basic foundation for advanced courses in all areas of finfish fisheries. 3-credit option does not include laboratory. Recommended: 10 credits biological science. Offered: jointly with BIOL 311; W.

FISH 312 Fisheries Ecology (3/5) NW
Ecological characteristics of fishes and shellfishes in the important freshwater and marine habitats of North America. Relationship between physical aspects of the habitats and community structure. Impacts of human activities on diversity and abundance. Prerequisite: either BIOL 162 or 220; recommended: FISH 210; FISH 311. Offered: Sp.

FISH 323 Conservation and Management of Aquatic Resources (5) NW
Topics include population growth, population extinction risk, dynamics of populations at low densities, meta-populations, marine reserves, endangered species classification, sustainable harvesting and management institutions. Examines case studies such as salmon, abalonnos and whales as representative of conservation issues in aquatic sciences. Sampling, experimental design, computer skills and research writing.

FISH 324 Aquatic Animal Physiology and Reproduction (3/5) NW
Adaptations of aquatic animals to environmental challenges. Energy pathways from feeding and digestion through maintenance (rest, sleep, growth, repair), homeostasis (respiration, osmoregulation, thermoregulation), growth and reproduction (sex determination, manipulation, sex change). Roles of sensory, nervous, and endocrine systems in mediating environmental information. Hands-on laboratory. Prerequisite: either BIOL 161 or BIOL 220.

FISH 328 Forestry-Fisheries Interactions (4) NW
Characteristics of forestry-fisheries interactions in terrestrial and aquatic landscapes. Effects of changes in landforms on forest and aquatic communities. River basin and watershed features. Forest stand dynamics, forest hydrology, fish and wildlife histories and behavior. Resource conflicts and resolution. Offered: jointly with ESRM 328; W.

FISH 340 Genetics and Molecular Ecology (5) NW
Application of molecular markers to ecology, evolution, and the management of living resources. Emphasis on understanding the strengths and weaknesses of the approach based on case studies. Offered: jointly with BIOL 340. Prerequisite: either BIOL 102 or BIOL 200.

FISH 350 Marine Ecosystems of Coastal Systems (5)
Explores the ecological relationships of marine organisms in coastal systems, including kelp forests and coral reefs, the physical forces that shape these systems, and the impacts of environmental change. Recommended: BIOL 250/FISH 250/OCEAN 250. Offered: jointly with SMA 350; W.

FISH 351 Field Investigations in Marine Biology (5)
Evaluating the relationships between man and marine systems in a field-oriented class. Case studies directly investigate marine biology. Studies include human activities and our effects on marine species and communities. Multiple field trips, lectures, and labs. Prerequisite: FISH 311 or FISH 312.

FISH 381 Marine Ecology (5)
Evaluating the relationships between man and marine systems in a field-oriented class. Case studies directly investigate marine biology. Studies include human activities and our effects on marine species and communities. Multiple field trips, lectures, and labs. Prerequisite: FISH 311 or FISH 312.

FISH 401 Systematics, Zoogeography, and Evolution of Fishes (5) NW
Advanced course in ichthyology with emphasis on living bony fishes of the world; past and present biodiversity, evolutionary history, classification, comparative morphology, geographic distribution, and historical zoogeography. Recommended: 10 credits biological science.

FISH 404 Diseases of Aquatic Animals (5) NW
Overview of communicable and noncommunicable diseases that affect fish and shellfish. Major pathogens of free-ranging as well as captive animals discussed. Students learn to recognize, prevent, and control economically and ecologically important disease syndromes. Recommended: 10 credits biological science.

FISH 405 Molluscan Aquaculture and Fisheries (5) NW
Biology, ecology, management, and economic importance of oysters, clams, scallops, mussels, abalones, cephalopods, and other mollusks. Emphasis on techniques for production through aquaculture as well as harvest strategies for wild stocks. Field trips. Recommended: 10 credits biological science.

FISH 406 Crustacean Fisheries and Aquaculture (4) NW
Biology, ecology, management, and economic importance of shellfish, emphasizing crustaceans. Wild populations and aquaculture production of important phyla discussed. Field trips. Recommended: 10 credits biological science.

FISH 415 Fish Physiology (5) NW
Examines physiological principles and adaptations of finishes for growth, metabolism, and water balance. Digestion, locomotion, special senses, reproduction, and neural and endocrine control mechanisms. Emphasis on environmental physiology and evolution. A nine-week laboratory component involves original experiments with juvenile salmon in hatchery on campus.

FISH 420 Ecology of Marine Fishes (4) NW
Focuses on the unique ecological challenges facing marine fishes, including individual, population, community, and ecosystem-scale processes. Prerequisite: either FISH 311 or FISH 312.

FISH 424 Biology and Culture of Aquatic Organisms (5)
Explores the concept of sustainability and the interrelationship between environment, aquatic species, and culture of aquatic animal and plant species globally. Current practices, animal biology and health, near-shore ecosystem conservation, water quality, and strategies to improve the sustainability of aquaculture for food production and species conservation. Lecture and lab.
FISH 428 Restoration of Fish Communities and Habitats in River Ecosystems (5) NW Examines opportunities to encourage recovery through natural developmental processes that enhance the complexity of habitats and connectivity between habitats in the river basin. Class discussion and participation on field trips focuses on restoration concepts for ecosystems, designs of projects, and case studies. Recommended: fish ecology and hydrology courses. Offered: odd years; Sp.

FISH 429 Seminar in Streamside Studies (1, max. 6) Discussion by invited speakers on current research and issues related to streamside studies. Speakers are a mix of on-campus and off-campus experts. Credit/no credit only. Offered: jointly with CFR 429; AWsp.

FISH 430 Biological Problems in Water Pollution (3/5) NW Ecological risk assessment of toxic chemicals and problems associated with electrical power production. Considers safety and toxicity and effects on individuals, populations, and communities. Laboratory covers simulation models of river chemistry, exposure and community effects. Recommended: senior or graduate standing in fisheries, engineering, or related field. Offered: jointly with CEE 461.

FISH 438 Biological Monitoring and Assessment (5) NW Explores the technical questions (conceptual, sampling, and analytical), the rationale, policy relevance, and legal basis for tools — existing and needed — to assess ecological health. Prepares students to see the biological components of ecological systems in diverse ways. Offered: jointly with BIOL 438.

FISH 439 Attaining a Sustainable Society (1/3, max. 3) I&S/NW Kerr Discusses diverse environmental issues, the importance of all areas of scholarship to evaluating environmental challenges, and the connections between the past and the future, to reveal integrative approaches to protect the long-term interests of human society. Offered: jointly with BIOL 439.

FISH 444 Conservation Genetics (5) NW Advanced genetic concepts and methods related to aquatic species’ conservation and management. Includes genetic diversity, small populations and fragmentation, genetic viability, management of and capitalist populations (including aquaculture), reintroductions, hatchery-wild interactions and forensics. Labs include molecular techniques. Recommended: GENET 371.

FISH 447 Watershed Ecology and Management (3) NW Explores fundamental ecological processes at the watershed scale, identifies human-induced changes to ecological systems, and discusses approaches to improve watershed management. Includes lectures, field trips, and discussions with organizations and agencies about how they are addressing ways to improve watershed management. Offered: W.

FISH 450 Salmonid Behavior and Life History (3/5) NW Marine distribution, homing migration, and spawning behavior of adult salmon: incubation, emergence, migration, and residence of fry; fingerling distribution and residence with reference to species interaction and population evolution. Recommended: FISH 311. Offered: A.

FISH 451 Reproduction and Early Development of Fishes (4) NW Reproductive development, sexual maturation, spawning and incubation in selected fish species; embryology and developmental traits of different salmonid and non-salmonid species; practical experience in artificial spawning techniques, egg handling and care, incubation techniques and the handling of newly-hatched alevins. Recommended: FISH 310; FISH 311.

FISH 452 Aquatic Animal Nutrition (5) NW Nutritional requirements, nutrient interactions of aquatic animals in the wild or raised in captivity for purposes such as stock enhancement, food production, the aquarium/ornamental fish industry. Nutritional needs of marine mammals. Feed ingredients, formulation techniques, environmental impacts. Experimental design, completion of laboratory nutritional study. Recommended: 10 credits biological science.

FISH 453 Spatial Information Technologies in Ecosystem Sciences (3) NW Logsdon Introduction to the use of GPS, GIS, and Remote Sensing in the ecosystem sciences. Integrates these technologies in an applied research setting. Two overnight weekend field trips required. Offered: jointly with OCEAN 452.

FISH 454 Ecological Modeling (4) Key concepts in ecological modeling and quantitative methods, focusing on the rational, interpretation, and motivation for modeling in ecological sciences. Individual-based, population matrix, and ecosystem models. Excel and Matlab-based computer exercises, simple model building, readings.

FISH 455 Fish and Wildlife Toxicology (3/5) NW Overview of fish/wildlife toxicology: history of the field; regulations; methods used to assess risks contaminants pose to fish/wildlife; classes of contaminants and their direct, sublethal and indirect effects; and contemporary threats of contaminants to fish/wildlife, their habitats and prey. Includes laboratory. Offered: jointly with ESC 457; W.

FISH 456 Introduction to Quantitative Fishery Science (5) NW Conveys fundamental concepts of fish population dynamics and fishery management within context of real-world fisheries problems. Lectures discuss rotation, terminology, mathematical models, fisheries principles, and case studies. Laboratory time devoted to practical applications, problems. Recommended: either MATH 125, MATH 135, or Q SCI 292; Q SCI 381. Offered: jointly with Q SCI 456; A.

FISH 457 Design and Evaluation of Marine Protected Areas (4) NW Ecological basis for designing and implementing Marine Protected Areas (MPA) as part of a conservation or management program, and techniques used to evaluate effectiveness of MPA networks. Metapopulation and community structure, landscape ecology, spatial analysis, geographic information systems (GIS), sampling design, mapping, and monitoring methods. Recommended: Q SCI 381.

FISH 458 Fisheries Stock Assessment (4) NW Francis Emphasizes quantitative analysis of fisheries data to determine how the fishery would respond to alternative management actions. Major topics include production models, stock and recruitment, catch at age analysis, and formulation of harvest strategies. Recommended: either Q SCI 456 or FISH 456. Offered: jointly with Q SCI 458; Sp.

FISH 473 Limnology (3) NW Ecology, conservation, and management of inland aquatic ecosystems. Explores interactions among biological, chemical, and physical features of lakes and other aquatic habitats. Prerequisite: either BIOL 102, BIOL 162, BIOL 18 0, or BIOL 203. Offered: jointly with BIOL 473.

FISH 474 Limnology Laboratory (2) NW Examination of biota of fresh waters, survey of limnological methods, analysis of data, and writing of scientific papers. Prerequisite: BIOL/FISH 473, which may be taken concurrently. Offered: jointly with BIOL 474; A.

FISH 475 Marine Mammalogy (3/5) NW Evolution, taxonomy, physiology, life history, and behavior of marine mammals; the techniques of studying and the management and conservation of them. Recommended: 15 credits of biological science, vertebrate anatomy, and physiology, for laboratory sections.

FISH 489 Aquatic Microbiology (3/5) NW Basic principles of aquatic microbiology and aquatic microbial ecology: role and identity of aquatic microorganisms; introduction to modern methodologies for research. Laboratory work with local freshwater and marine samples for those enrolled in 5-credit section. Offered: jointly with MICROM 490; Sp, odd years. Recommended 15 credits of biological science, 10 credits of chemistry.

FISH 491 Aquatic Ecological Research in Alaska (12) NW Intensive, full-time research training experience where a team of students works on focused research problems guided by a group of faculty, postdoctoral, and graduate student mentors. Examines behavioral ecology, limnology, and population dynamics. Students also choose specific research questions for their own exploration. Course location: Alaska. Offered: S.

FISH 492 Friday Harbor Labs Apprenticeship (9/15) NW Intensive, full-time research training experience where teams of students work on focused research problems guided by a group of faculty, postdoctoral and graduate student mentors. Research questions vary. Course location: Friday Harbor Laboratories.

FISH 494 Capstone Project (1-12, max. 24) Self-directed research or project under direction of a faculty member. Typically includes defining research question, determining methodology, data collection and analysis, writing a paper, and presenting findings. Course is first of two-quarter requirement for graduation for majors. May be taken concurrently with FISH 495, if approved.
FISH 495 Capstone Project II (3) Self-directed research project under direction of a faculty member. Typically includes defining a research question, determining methodology, data collection and analysis, writing a paper, and presenting findings. May be taken concurrently with FISH 494 with permission of instructor.

FISH 496 Study Abroad: Aquatic and Fishery Sciences (1-15, max. 30) NW For participants in UW study abroad program. Specific content varies and must be individually evaluated. Credit does not apply to major requirements without approval.

FISH 497 Special Topics in Aquatic and Fishery Sciences (1-15, max. 15) One-time offerings of topics in fisheries by resident or visiting faculty.

FISH 498 Internship/Experiential Learning (1-15, max. 15) Structured, practical training in the fishing industry, government agencies and other areas utilizing fisheries, food science, or quantitative science expertise. Experiences are supervised and evaluated. Written reports required. Credit/no credit only. Offered: A-WSpS.

FISH 499 Undergraduate Research (1-15, max. 15) Individual research within the School of Aquatic and Fishery Sciences. Each project supervised by an individual faculty member. Written reports required.

FISH 504 Fish and Shellfish Pathology (5) Pathological effects of infectious and non-infectious diseases in fish and shellfish. Emphasis on immunological responses, contemporary diagnostic methods, control strategies, and environmental factors that influence disease transmission.

FISH 507 Special Topics in Fisheries (1-15, max. 15) Recommended: permission of instructor.

FISH 510 Current Topics in Genetics and Physiology (2, max. 8) Contemporary problems and issues in genetics and physiology as they relate to fisheries and aquatic sciences. Topics vary. Credit/no credit only.

FISH 511 Current Topics in Evolution, Ecology, and Behavior (2, max. 8) Contempo- rary problems and issues in evolution, ecology and behavior as they relate to fisheries and aquatic sciences. Topics vary. Credit/no credit only.

FISH 512 Current Topics in Quantitative Science (2, max. 8) Contemporary problems and issues in quantitative science as they relate to fisheries and aquatic sciences. Topics vary. Credit/no credit only.

FISH 513 Current Topics in Management, Conservation, and Restoration (2, max. 8) Contemporary problems and issues in management, conservation, and restoration as they relate to fisheries and aquatic sciences. Topics vary. Credit/no credit only.

FISH 514 Current Topics Aquaculture, Utilization, and Pathology (2, max. 8) Contemporary problems and issues in aquaculture, utilization, and pathology as they relate to fisheries and aquatic sciences. Topic varies. Credit/no credit only.

FISH 521 Research Proposal Writing for Graduate Students (4) Practice in reading, writing, critiquing, and evaluating research grant and contract proposals. Lecture and discussion of funding resources, structure of proposals, proposal review, evaluation criteria, and agency feedback. Examples of successful and unsuccessful grant applications. Preparing proposals and critiquing other’s efforts.

FISH 522 Classical Literature of Fisheries Science and Aquaculture (2) Discussion of the classical literature of aquatic and fishery sciences. Both oral and writing communication skills stressed. Credit/no credit only. Offered: A.

FISH 525 Ecology and Behavior of Fishes (3) Basic principles of ecology and behavior (e.g., habitat associations, competition and predation, migrations and movements, reproductive patterns) as applied to fishes. Critical evaluation of current literature and fieldwork required. Recommended: 311 or equivalent or permission of instructor.

FISH 526 Advanced Fisheries Ecology II: Populations, Communities, and Ecosystems (5) Recent advances in the study of aquatic communities and ecosystems in relation to a number of contemporary issues in fisheries science and management. Focus on case histories drawn from freshwater, estuarine, and marine ecosystems. Emphasis on relationships between science and public policy in attempting to resolve these issues.

FISH 527 Aquatic Community Responses to Chemical Stress (3) Aquatic ecotoxicology; bridging the gap between physiological and ecosystem responses to toxic chemicals. Detecting effects against natural variability; altered species abundances and dominance, counter-intuitive responses. Case histories, controversies on data interpretation. Recommended: at least one course in ecology, limnology, oceanography or permission of instructor.

FISH 529 Topics in Streamside Studies (1) Discussion by invited speakers on current research related to streamside studies. Offered: jointly with CFR 529; A-WSpS.

FISH 530 Application of Bioenergetics Models to Aquatic Food Webs (4) Modeling framework quantifying bioenergetic, including consumption, growth, nutrient recycling and contaminant bioaccumulation; links physiology and behavior of individual organisms to ecological processes within populations and aquatic webs. Common applications include estimating predation, carrying capacity, or growth potential in different habitats. Recommended: regression course.

FISH 533 Aquatic Toxicology (3) Principles of toxicology applied to aquatic organisms. Recognition of physiological and biochemical responses of organisms to toxins and practical application of toxicity testing methods to identification of pollution and toxins in aquatic environment. Toxicity test design, interpretation, and data analysis. Recommended: organic or biochemistry and physiology or equivalent or permission of instructor.

FISH 539 Forestry-Fisheries Interactions: Case Studies (3) Case studies of streamside management situations within the watershed and basin level. Topics include resource conflict resolution, current and future management alternatives, landscape dynamics, role of disturbance, and policy options. Prerequisite: graduate standing in forestry, fisheries, or related field; undergraduates by permission of instructor. Offered: jointly with ESC 539.

FISH 542 Principles and Applications of Molecular Methods (3) Applications of molecular techniques to questions in ecology, evolution, and natural resource management, with emphasis on advanced genome-enabled technologies and the analysis and interpretation of genetic data. Includes weekly discussion of empirical papers, and preparation/peer-review of a proposal. Prerequisite: permission of instructor. Offered: jointly with OCEAN 574; A.

FISH 543 Molecular Techniques (4) Laboratory on DNA methods. Experiments analyzing genetic variation at the intra- and interspecific level, including one experiment of student’s own design. Techniques include DNA extraction and quantitation, PCR, DNA sequencing, RFLP, analysis and cloning. Prerequisite: FISH 542 or OCEAN 574 or permission of instructor. Offered: jointly with OCEAN 575.

FISH 548 Special Topics in Streamside Studies (2, max. 6) Contemporary problems and issues in forestry, fisheries, and wildlife management in watersheds. Topics vary, yet focus on interactions of land and water resources in the forests of the Pacific Northwest. Recommended: permission of instructor. Offered: jointly with ESC 548.

FISH 554 Mathematical Analysis in Fisheries Stock Assessment (3) Deterministic and stochastic representations of age-dependent and size-dependent models for stock assessment; analysis of multi-species models; risk analysis and uncertainty in fisheries management strategies; analysis of population data on computers. Recommended: Q SCI 292, 392, 456, and 483 or permission of instructor.

FISH 557 Estimation of Population Parameters (4) Statistical analysis of population data; design and analysis of mark-recapture experiments on natural populations; laboratory work on computers. Recommended: probability theory and Q SCI 292 and 483.

FISH 558 Advanced Analysis in Fisheries Stock Assessment (3) Deterministic and stochastic representations of age-dependent and size-dependent models for stock assessment; analysis of multi-species models; risk analysis and uncertainty in fisheries management strategies; analysis of population data on computers. Recommended: 456, 458, 557, or permission of instructor.

FISH 565 Marine Fish Biology (9) Taxonomy, ecology, and life history of the fishes of the San Juan Islands and northeast Pacific Ocean. Prerequisite: permission of instructor. Offered: Friday Harbor Laboratories.
FISH 578 Graduate Topics in Sustainable Fisheries (2, max. 6) Parish Seminar series features national and internationally known speakers in fisheries management and conservation. Case studies. Conservation/ restoration in practice. Post-seminar discussion section led by speaker on topics covered in lecture. Topics include harvest management, whaling, by-catch, salmon, marine protected areas, introduced species, citizen action, co-management, and marine ethics.

FISH 581 Fishery Management: Case Studies (3) Examination of historical case studies chosen to illustrate specific fishery management problem areas. Faculty presentations occupy first half of quarter, student presentations the second half. Prerequisite: FISH 580. Offered: jointly with SMA 581.

FISH 582 Fishery Management: Contemporary Issues (5) Focuses on multi-disciplinary, in-depth analysis of specific problems, including biological and economic assessments, evaluation of alternative management systems, and formulation of specific research, data collection, and management recommendations. Prerequisite: FISH 581. Offered: jointly with SMA 582.

FISH 600 Independent Study or Research (*) Credit/no credit only.

FISH 700 Master’s Thesis (*) Credit/no credit only.

FISH 800 Doctoral Dissertation (*) Credit/no credit only.

School of Marine Affairs

SMA 103 Society and the Oceans (5) I&S/NW Explores the social and policy dimensions of the ocean environment and ocean management policy. Attention to how human values, institutions, culture, and history shape environmental issues and policy responses. Examines case studies and influential frameworks, such as the United Nations “Tragedy of the commons”. Offered: jointly with ENVIR/SIS 103.

SMA 433 Environmental Degradation in the Tropics (5) I&S/NW Considers theories and controversies of environmental degradation in the tropics, ecological and social case studies of Central American rain forests and Southeast Asian coral reefs, and implications of environmental management techniques. Offered: jointly with SIS 433/SMA 433.

SMA 455 Marine Business Environment in Russia and Eastern Europe (3) I&S Kaczynski International marine business environment of Russia and the maritime nations of East Europe; their transition process from communist to free market economic systems. Covers aspects of doing business in marine-related fields such as shipping, fisheries, shipbuilding, ports, and land infrastructures, marine tourism, and water sports. Offered: jointly with SISRE 455.

SMA 476 Introduction to Environmental Law and Process (3) I&S Bryant, Herschman Use and application of key statutes in marine living resources management. Overview of administrative law and process. Basic legal research, reading, and briefing selected judicial opinions. Participatory case study component. Designed for non-law graduate and advanced undergraduate students. Offered: jointly with ENVR 476; A.

SMA 485 Pacific Recreation and Tourism Issues (3) I&S/NW Miller Explores how marine tourism links people to one another and to the environment. Utilizes concepts from cultural anthropology, sociology, political science, geography, ecology, conservation biology, and planning. Topics include ecotourism, ethnic tourism, marine parks and protected area, fisheries, sustainable development, tourism ethics, and marine environmental education.

SMA 499 Undergraduate Research (1-15, max. 15) Research on assigned topics under the supervision of faculty members. Prerequisite: permission of instructor.

SMA 501 Integrated Marine Affairs Practice (3) Introduction to the practice of integrated assessment in marine affairs through the use of case studies and group analysis projects. Prerequisite: SMA 500 plus two of the following: SMA 519, SMA 536, SMA 591, or permission of instructor. Offered: A.

SMA 506 International Law of the Sea (3) Offered: jointly with LAW B 561.

SMA 507 International Organizations and Ocean Management (3) Miles Survey of the manner in which international regimes and organizations attempt to manage and regulate the uses of the ocean. Primary emphasis is on the analysis of the effectiveness of regimes and of processes that support or constrain these organizations. Prerequisite: SMA 500 or permission of instructor. Offered: jointly with PB AF 538.

SMA 508 National Marine Policy Processes (3) Miles Comparative institutional dimensions of marine policy processes. Marine policy context at the national level and the dynamics that drive policy formulation and policy implementation.

SMA 509 Integrated Coastal Management (3) Christie, Herschman Managing multiple uses of coastal waters and the adjacent land; conflicts arising from competition for space and resources; organization, scientific, and economic problems associated with coastal management; planning and management experience in the United States and Southeast Asia. Prerequisite: SMA 500 or permission of instructor.

SMA 510 Topics in Marine Ecology (3) Klinger Study of ecological principles as they apply to marine species, populations, and ecosystems, using current examples from the primary literature, including contemporary issues such as species declines, species additions, pollution, and global change. Offered: W.

SMA 512 Interviewing Methods and Environmental Topics (3) Miller Focuses on qualitative techniques employed by social scientists and other researchers (e.g., sociologists, cultural anthropologists, political scientists, journalists, reporters) in interview situations. Students conduct interviews and limited participant observation with people in public, private, and activist sectors. Relevant to students with interests in marine affairs, forestry, fisheries, and environmental studies.

SMA 514 Marine Pollution Management Issues (3) Lesch S Management and policy aspects of marine environmental protection, emphasizing the two-way interaction between environmental management and policy scientists which shapes policy.

SMA 515 U.S. Coastal and Ocean Law (4) Herschman Study of the legal framework in the United States controlling allocation and use of coastal and marine resources. Topics include coastal zone management, fisheries management, protection of marine mammals and endangered species, marine pollution, offshore oil and gas development, and marine transportation. Offered: jointly with LAW B 565.

SMA 516 Seaport Management (3) Role of port and harbor agencies in management of marine uses: cargo and trade, economic development, tourism and recreation, fisheries, environmental protection. Management functions of planning, marketing, finance, engineering, environmental assessment. Examples and guest speakers from Port of Seattle and other Puget Sound ports. Prerequisite: SMA 500 or permission of instructor.

SMA 517 Marine Uses: Transportation and Commerce (3) Herschman Role of the oceans in the transportation of people and materials, character and trends in vessel design and terminal facilities, pattern and nature of industry organization, regulations, economics of the shipping industry, management of fleets and vessels, individuals at sea and ashore, national policies affecting the merchant marine and port facilities. Prerequisite: SMA 500 or permission of instructor.

SMA 519 Marine Policy Analysis (3) Leschine On appreciation for and basic working knowledge of techniques used in policy analysis. Techniques are explored in both quasi-realistic settings and in application to real world problems of marine policy.

SMA 521 Governmental Responses to Global Climate Change (3) Miles Exploration of major scientific, policy and legal issues pertaining to problems of global climate change including regime design, use of climate models, impact on hydrology water resources, and forests.

SMA 523 International Science and Technology Policy (3) Miles Analyzes the relationships between research and development policy, capabilities, and national technological strategies for advanced industrial and less-developed countries. Deals with international implications as countries make policies in regional and global organizations. Examples chosen from space telecommunication, weather and climate modification, airline transportation, nuclear energy, and seabed exploration.

SMA 525 Marine Protected Area Management and Science (3) Fluharty, Klinger Examine management and scientific issues involved with the design, establishment, operation, and maintenance of MPAs. Offered: Sp.

SMA 536 Applied Microeconomics for Marine Affairs (3) Huppert Acquaints students with microeconomic tools commonly employed in policy analysis. Emphasis is placed on mastery of basic concepts, definitions, and models useful to marine policy, including determinants of price
and outputs in competitive markets, effects of other market structures, market failure, and applied welfare economics.

SMA 537 Economic Aspects of Marine Policy (3) Huppert Development of pertinent economic concepts and their application to selected topics in marine resource decision making, including maritime policy, OCS oil and gas development, and wetlands management. Prerequisite: SMA 500 or permission of instructor. Offered: jointly with ECON 537; W.

SMA 538 Economics of Living Marine Resources (3) Huppert Develops pertinent economic concepts and applications for conservation, regulation, and restoration of fisheries and other living resources. Gives special attention to fishery management, including harvest regulation and enforcement, recreational fisheries evaluation, property rights regimes, contemporary issues, and marine protected area management. Offered: jointly with ECON 538; Sp.

SMA 540 International Strategic Planning for Marine Resources (3) Kaczynski Marine economies are affected by shrinking resources, population pressure, expanding economic globalization. Case studies from the third world and oceanic transition illustrate strategic economic planning. Students research selected topics. Prerequisite: SMA 500 or permission of instructor. Offered: A.

Oceanography

OCEAN 101 Survey of Oceanography (5) NW Strickland Holistic view of fundamental principles of ocean science; the geography and geology of ocean basins; chemistry of sea water; physical dynamics of currents, waves, and tides; coastal processes; and the biology of diverse ecosystems such as deep sea vents, coral reefs, and estuaries. Intended for nonmajors. Offered: A.

OCEAN 102 The Changing Oceans (5) I&S/NW Historical case studies of research on the ancient oceans, deep-sea exploration, climate change and the oceans, and human impacts on marine life. Students consider societal factors affecting progress in marine science, changing popular attitudes toward the oceans, and key current policy implications of marine science. Intended for nonmajors. Offered: W.

OCEAN 200 Introduction to Oceanography (3) NW Ambrust Description of the oceans. Emphasis on relationships of biology, chemistry, geology, and physics in marine environments. Examination of relationships and interactions at macro-, meso-, and microscales in the ocean. Intended for science majors. Offered: Sp.

OCEAN 210 Ocean Circulation (3) NW The large-scale circulation of the ocean. Topics include temperature-salinity analysis; water mass identification; water, salt, and heat budgets; chemical tracer distributions; advection and diffusion. Prerequisite: either OCEAN 101 or Ocean 200; either PHYS 114 or PHYS 121. Offered: A.

OCEAN 220 Introduction to Field Oceanography (3/5) NW Design and conduct a field study in oceanography. Field trip required (usually during Spring break). Focus on active learning, deployment of instruments, data collection, interpretation, and presentation. Honors section incorporates additional field experimentation and study in marine biology. Writing class. Prerequisite: either OCEAN 210 or OCEAN/FISH 250. BIOL 250. Offered: Sp.

OCEAN 230 Rivers and Beaches (3/5) NW Montgomery, Nittrouer Introduction to Earth surface environments, the processes that shape them, how humans affect them and are affected by them. Weekend field trips examine mountains, rivers, deltas/estuaries, beaches, and environments beyond. Focus on linkages between these environments to illustrate coupling between landscapes and seascapes. Offered: jointly with ESS 230.

OCEAN 250 Marine Biology (3/5) I&S, NW Lecture-laboratory course in Marine Biology focusing on physical, biological, and social aspects of the marine environment. Topics include oceanography, ecology, behavior, conservation, fisheries, exploration, and activism. Evening marine biology movies and weekend field trip. Honors section research project. Offered: jointly with BIOL/FISH 250.

OCEAN 300 Study Abroad Marine Sciences (1-12, max. 12) Robigou For participants of Marine Language Exchange Scholarship Program. Specific content varies and must be individually evaluated. Credit does not apply to major requirements without approval. Offered: AWSpS.

OCEAN 310 The Puget Sound Nearshore: Processes and Problems (3) I&S/NW An introduction to the geology, ecology, and politics of Puget Sound beaches. Content focuses on beach formation and sediment dynamics, with application to nearshore ecology and shoreline management. Three filed trips to local beaches complement topics discussed in class.

OCEAN 351 Field Investigations in Marine Biology (5) Evaluates the relationships between marine and marine systems in a field-oriented class. Case studies directly investigate marine biology. Studies include human activities and our effects on marine species and communities. Multiple field trips, lectures, and labs. Prerequisite: FISH 350/OCEAN 350. Offered: jointly with FISH 351; Sp.

OCEAN 360 Marine Field Research (10) NW,QSR Scott Veirs, Val Veirs Intensive off-campus marine research experience. Includes 5 weeks designing a field experiment and a 5-week cruise aboard a sailing research vessel to implement it. Offered: jointly with OCEAN 365; Asp.

OCEAN 365 Practicing Sustainability Science (8) I&S/NW Scott Veirs, Val Veirs Intensive off-campus experience. Studies sustainability science, marine policy, and "clean" technologies. Includes interaction with community stakeholders for 5 weeks and experimentation with sustainable technologies and practices in the marine environment during a 5-week cruise aboard an energy-efficient sailing catamaran. Offered: jointly with OCEAN 360; Asp.

OCEAN 400 Chemical Oceanography (4) NW Physical and chemical properties of seawater and marine processes; processes determining the chemical makeup of the oceans. Prerequisite: either CHEM 150, CHEM 152, or CHEM 155; either OCEAN 202 or OCEAN 210. Offered: W.

OCEAN 401 Special Topics in Chemical Oceanography (3) NW.

OCEAN 410 Marine Geology and Geophysics (4) NW Sedimentological and petrologic processes that determine the geologic record. Prerequisite: either ESS 101 or ESS 210. Offered: A, jointly listed with ESS 410.
OCEAN 411 Special Topics in Marine Geology and Geophysics (3) NW.

OCEAN 420 Physical Processes in the Ocean (4) NW Physical properties and processes of the ocean: methods of describing ocean currents, waves, tides and mixing and their effect on movement of water parcels. Prerequisite: either PHYS 116 or PHYS 123; either MATH 126, MATH 129, MATH 146, or Q SCI 293; either OCEAN 202 or OCEAN 210. Offered: W.

OCEAN 421 Special Topics in Physical Oceanography (3) NW.

OCEAN 422 Ocean Dynamics (3) NW Equations of motion governing flow of sea water. Conservation of mass, tracers, heat and momentum. Energy and vorticity balance. Buoyancy and rotational effects. Scale analysis. Applications to upper ocean dynamics, surface and internal waves, and wind-driven currents in the ocean. Prerequisite: MATH 126; PHYS 123; OCEAN 420.

OCEAN 423 Ocean Circulation and Climate (3) NW Quantitative treatment of ocean basin to global scale ocean circulation systems and their interaction with climate variability. Prerequisite: PHYS 123; either MATH 126 or MATH 129; OCEAN 401.

OCEAN 430 Biological Oceanography (4) NW Marine organisms, their quantitative distribution in time and space and their interactions with the ocean. Prerequisite: either BIOL 102, BIOL 203, or BIOL 220; either OCEAN 202 or OCEAN 210. Offered: A.

OCEAN 431 Special Topics in Biological Oceanography (3) NW.

OCEAN 442 Oceanography of the Puget Sound (3) NW Explores the role of oceanography in regional issues. Field opportunities and active investigation of applied oceanographic problems. Lectures, research trip, student co-teaching, discussion. Prerequisite: either CHEM 221, BIOL 203, BIOL 220, ESS 210, or GEOL 205; either OCEAN 430 or OCEAN 433. Offered: A.

OCEAN 443 Design of Oceanographic Field Experiments (3) NW Case histories, presentations, and class exercises used to teach methods of formulating a research problem and proposal writing. Methods of data analysis, presentation, error estimation, library resource and data base use; web page implementation and design. Principles of cruise planning. Prerequisite: OCEAN 400; OCEAN 410; OCEAN 420; OCEAN 430; OCEAN 442. Offered: W.

OCEAN 444 Advanced Field Oceanography (5) NW Conduct field experiment (designed in OCEAN 443) during a week-long cruise aboard a research vessel. Analyze samples data and present results in a series of drafts and a final term paper. Results are presented at a two-day-long public research symposium and on the students' individual Web sites. Prerequisite: OCEAN 443. Offered: Sp.

OCEAN 450 Climatic Extremes (4) NW Course examines earth history for extreme climatic conditions to predict future climate changes. Numerical models use PC-based computer programs to identify processes and feedbacks that control climate. Prerequisite: MATH 125, MATH 145, or Q SCI 292; and PHYS 115 or PHYS 122.

OCEAN 451 Fluid Dynamics Laboratory (4) NW Individual projects in experimental fluid dynamics with applications to practical problems. Experimental design, visualization, and measurement techniques applied to a problem selected by each student. Prerequisite: PHYS 123.

OCEAN 452 Spatial Information Technologies in Ecosystem Sciences (3) NW Logsdon Introduction to the use of GPS, GIS, and Remote Sensing in the ecosystem sciences. Integrates these technologies in an applied research setting. Two overnight weekend field trips required. Offered: jointly with FISH 453; A.

OCEAN 454 Hydrothermal Systems: An Interdisciplinary View (3) NW Lilley Provides a general, interdisciplinary overview of seafloor hydrothermal systems including important geological, chemical and biological processes. Topics include tectonic and volcanic controls on hydrothermal systems, water/rock reactions, phase separation, temporal variability, fluxes to the deep sea, micro- and macro-biology. Offered: Sp.

OCEAN 499 Undergraduate Research (1-15, max. 24) Research on assigned topics that may involve laboratory work, fieldwork, or literature surveys. Offered: AWSp.

OCEAN 500 Current Problems in Oceanography (1) Discussion of research topics that are currently being investigated within the school. Credit/no credit only. Prerequisite: permission of instructor. Offered: AW.

OCEAN 501 Estuarine Circulation and Mixing (3) Observations, measurements, mixing and stratification from deep fjords to shallow coastal plain estuaries. Physical understanding of basic processes, such as tides, wind stress, topographic effects on turbulence, sill hydraulics, and exchange flow. Vertical mixing and residence times important to biological and pollution studies. Prerequisite: permission of instructor.

OCEAN 506 Interdisciplinary Seminar in Oceanography (1-3, max. 12) Lectures, discussions, and work on selected problems of an interdisciplinary nature. Prerequisite: permission of instructor.

OCEAN 509 Seminar (1) Introduction to current research topics for beginning graduate students. Credit/no credit only. Offered: AWSp.

OCEAN 510 Physics of Ocean Circulation (3) Structure of ocean basins; physical properties of seawater and the equation of state; heat, salt, fresh water budgets; tidal potential; Coriolis effect and geostrophic balance; major current systems and water masses; mixing, stirring in the ocean; simple waves; modern experimental methods in physical oceanography. Prerequisite: permission of instructor. Offered: A.

OCEAN 511 Introduction to Fluid Dynamics (4) Eulerian equations for mass-motion; Navier-Stokes equation for viscous fluids, Cartesian tensors, stress-strain relations; Kelvin's theorem, vortex dynamics; potential flows, flows with high-Low Reynolds numbers; boundary layers, introduction to singular perturbation techniques; water waves; linear instability theory. Prerequisite: AMATH 403 or permission of instructor. Offered: jointly with AMATH/ATM S 505; A.

OCEAN 513 Geophysical Fluid Dynamics II (3) Theories, models of large-scale dynamics of oceans, atmospheres. Potential vorticity, Q principles; Rossby waves, ray tracing, Green's function, setup of general circulation; atmospheric "channels" versus ocean "basins"; wave-mean flow interaction, mountain drag, internal momentum flux; "Lagrangian" motion of particles, tracers; cascades, eddy flux of heat, moisture. Q. Prerequisite: OCEAN 512. Offered: Sp.

OCEAN 514 Waves (3) Application of marine hydrodynamics principles to wave motion in oceans. Offered: W.

OCEAN 515 Ocean Circulation: Observations (3) Modern large- and mesoscale ocean observations, interpreted in terms of contemporary circulation theories. Spectrum of temporal variability; eddies and eddy fluxes; ventilation; advection and diffusion in the abyss; transports of heat and salt; climatic scale of variability; modern methods for determining circulation. Prerequisite: OCEAN 510 or permission of instructor. Offered: Sp.

OCEAN 516 Ocean Circulation: Theories (3) Hydrodynamic theories concerning origin and characteristics of major ocean currents. Prerequisite: OCEAN 512 or permission of instructor.

OCEAN 517 Methods and Measurements in Physical Oceanography (2) Principal instruments and experimental methods of physical oceanography. Devices and systems that measure pressure, temperature, electrical conductivity, sea state, and velocity. Prerequisite: permission of instructor. Offered: alternate years.

OCEAN 519 Seminar in Physical Oceanography (1, max. 9) Discussion of selected problems of current interest in physical oceanography. Prerequisite: OCEAN 510 or permission of instructor.

OCEAN 520 Marine Chemistry (3) Processes controlling the chemical composition of seawater. Chemical distributions in the ocean, marine physical chemistry, chemical equilibrium, and concepts of mass balance. Mechanisms and models used to explain distributions of stable and radioactive isotopes, gases, trace metals, and biochemicals in the world's oceans. Offered: A.

OCEAN 521 Aquatic Chemistry (3) Application of physical chemistry and thermodynamics to processes that control chemical composition of natural waters. Equilibrium approach. Acid-base chemistry, the carbonate system, dissolution and precipitation, metal ions in solution, oxidation-reduction chemistry, silicate mineral reactions. Prerequisite: OCEAN 520 or permission of instructor. Offered: A.

OCEAN 522 Marine Organic Geochemistry (3) Sources, reactions, and fates of organic molecules in the marine environment along with the stable isotope geochemistry of marine organic substances. Prerequisite: CHEM 237 and CHEM 239 or permission of instructor.
OCEAN 523 Geochemical Cycles (4)
Descriptive, quantitative aspects of earth as a biogeochemical system. Study of equilibria, transport processes, chemical kinetics, biological processes; their application to carbon, sulfur, nitrogen, phosphorus, other elemental cycles. Stability of biogeochemical systems; nature of human perturbations of their dynamics. Prerequisite: permission of instructor. Offered: jointly with CHEM 523 and ATM S 508.

OCEAN 524 Environmental Chemical Modeling (3) Benjamin, Murray Physical/chemical principles controlling the fate and distribution of environmental pollutants, and use of models to apply those principles. Includes modeling of physical transport in conjunction with chemical equilibrium and reaction kinetics. Applications include acid mine drainage, acid deposition, and groundwater and lake water contamination. Offered: jointly with CEE 550.

OCEAN 529 Seminar on Chemical Oceanography (*, max. 9) Lectures, discussions, and readings on selected problems of current interest. Prerequisite: permission of instructor. Offered: AWSp.

OCEAN 530 Biological Oceanography: Bacteria and Protozoa (3) Bacteria in the marine environment; fate of organic carbon in the ocean and the interrelationship of the carbon cycle with other biogeochemical cycles. Prerequisite: permission of instructor. Offered: W.

OCEAN 531 Biological Oceanography: Phytoplankton (3) Phytoplankton in the marine environment: ecology, primary productivity, and physiology. Phytoplankton growth and photosynthetic patterns and spatial and temporal distributions of phytoplankton; methods for determining distributions and rates of production and growth. Prerequisite: permission of instructor. Offered: W.

OCEAN 532 Biological Oceanography: Zooplankton (3) Distribution and abundance of pelagic animals in space and time; analysis of their interactions. Small-scale distributions and behavior, population dynamics and energetics, trophic structure and dynamics, pelagic community structure, models of populations and food chains, secondary production and biogeography. Prerequisite: permission of instructor. Offered: Sp.

OCEAN 533 Biological Oceanography: Benthos (3) Analysis of marine benthic communities; new research questions and method; ecologically important physics of benthic boundary layer; theories, mechanisms, and observations of deposit feeding; succession as consequence of physical processes and biological interactions. Environments include deep-sea, continental shelves, estuaries, and intertidal, focusing on soft substrata. Prerequisite: permission of instructor. Offered: Sp.

OCEAN 534 Methods and Measurements in Biological Oceanography (2) Methods for bacteria, phytoplankton, and zooplankton population assessment. Rate measurements of phytoplankton, zooplankton, and bacterial production. Remote measurements, including deep-sea environments. Prerequisite: permission of instructor.

OCEAN 535 Biological Oceanography: An Overview (3) Principles and practice of biological oceanography for students with strong background in physical sciences but little recent exposure to biology. Ecological principles at individual, population, and community levels; overview of discipline of biological oceanography; case studies of interdisciplinary problems shared with the physical sciences. Offered: W.

OCEAN 536 Seminar in Geostatistics (1-3, max. 3) Lectures and discussions on selected problems in the applications of statistics in earth science.

OCEAN 539 Seminar in Biological Oceanography (*, max. 9) Lectures, discussions, and work on selected problems of current interest. Prerequisite: permission of instructor. Offered: AWSp.

OCEAN 540 Marine Geological Processes (3) McDuff, Russ Principles of thermodynamics, heat and mass transfer, fluid mechanics, continuum mechanics, and time-series analysis applied to marine geological and geophysical data with special applications to thermal balance of the oceanic lithosphere. Offered: W.

OCEAN 541 Marine Sedimentary Processes (3) Investigates fundamental process of marine sedimentation, including equations characterizing boundary-shear flows, initiation of grain motion, bedload and suspended-load transport, and sediment accumulation. Applies concepts to sediment dispersal in rivers, deltas, estuaries, beaches, continental shelves, slopes, and rises, with emphasis on the relationships between active processes and resulting deposits.

OCEAN 542 Sediment Dynamics and Boundary-Layer Physics (4) Parsons Theoretical descriptions of sediment transport processes constrained by laboratory demonstrations. The physical properties of boundary layers, initiation of motion, suspended load, bedload, bedforms, and continua transport (turbidity currents, debris flows, and suspensions) and its application to the geological record. Offered: jointly with ESS 526; W.

OCEAN 545 Physics of the Oceanic Lithosphere (3) Basic principles of elasticity, fluid flow, and heat transport with specific applications to the formation and evolution of the oceanic lithosphere. Includes deformation of the earth's flow in porous media, heat transport, and marine seismological and potential field techniques. Prerequisite: OCEAN 540. Offered: jointly with ESS 568.

OCEAN 546 Continental-Margin Sedimentation (3) Detailed evaluation of recent studies into processes forming strata on continental margins, including the diverse time scales ranging from sediment transport to sequence stratigraphy. Highlights the linkages with physical oceanographic processes, the rates of geochemical components, and the relationship to biological communities. Offered: jointly with ESS 527.

OCEAN 548 Seminar in Geological and Geophysical Oceanography (*, max. 9) Lectures, discussions, and field and laboratory work on selected problems of current interest. Prerequisite: permission of instructor. Offered: AWSp.

OCEAN 550 Geochemistry and Geophysics of Melt Generation (3) Mantle flow beneath mid-ocean ridges and hotspots, major element systematics, constraints from trace elements and isotopes on melting and mantle reservoirs, melt extraction, and crustal thickness and axial topography. Prerequisite: OCEAN 544 or permission of instructor. Offered: alternate years.

OCEAN 551 Marine Seismology (3) Practical application of seismic techniques to the study of the oceanic basins. Analysis of reflection data, multichannel reflection profiling, surface wave studies, and earthquake analysis. Prerequisite: GPHYS 502 or permission of instructor. Offered: jointly with GPHYS 551.

OCEAN 552 Seminar in Geophysics and Geological Data Analysis (1) Practical geophysical data analysis, map projections, gridding multibeam bathymetry processing, gravity and magnetic anomalies, downward continuation, magnetic inversion, seismic refraction and reflection, and microearthquake locations. Prerequisite: permission of instructor.

OCEAN 559 Advanced Seminar on Mid-Ocean Ridge Processes (*, max. 9) Lectures, discussions, and practical work on selected topics of current interest in mid-ocean ridge research. Prerequisite: permission of instructor.

OCEAN 560 Atmosphere/Ocean Interactions (3) Observations and theory of phenomena of the coupled atmosphere-ocean system. El Niño-Southern Oscillation; decadal tropical variability; atmospheric teleconnections; midlatitude atmosphere-ocean variability. Overview of essential ocean and atmospheric dynamics, where appropriate. Credit/no credit only. Prerequisite: ATM S 509 or OCEAN 512. Offered: jointly with ATM S 560; alternate years; Sp.

OCEAN 569 Topics in Physical Oceanography (1-4, max. 9) Lecture series on topics of major importance in physical oceanography. Offered: AWSp.

OCEAN 570 Marine Microbial Interactions (1-3, max. 9) Structure, function, and dynamics of natural mixed-species populations of marine bacteria and their interactions with higher organisms; mixed-species culture methods; synecological field methods; species assemblages in specialized environments; mutualisms; sites and patterns of genetic exchange. Prerequisite: OCEAN 530 or permission of instructor. Offered: alternate years.

OCEAN 571 Marine Primary Productivity (1-3, max. 9) Patterns and mechanisms of marine phytoplankton primary production. Small- to global-scale patterns of production; environmental regulation of production; absorption of electromagnetic radiation; fluorescence; carbon fixation; trophic interactions; remote sensing and other optical methods. Prerequisite: OCEAN 531 or permission of instructor. Offered: alternate years.

OCEAN 572 Zooplankton Ecology (1-3, max. 9) Life history strategies, dynamics and production of populations, vertical migration, interspecific interactions and community structure, models of complex assemblages of zooplankton, sampling methods and analysis, spatial heterogeneity. Prerequisite: OCEAN 532 or permission of instructor. Offered: alternate years.

OCEAN 573 Benthic Biological Processes (1-3, max. 9) Processes characteristic of soft-bottom benthic environments; areas and methods of rapid current progress; open research questions; deposit feeding; passive larval recruitment; physical, chemical, biological, and biological feedbacks in ecological succession; scaling of laboratory systems. Prerequisite: OCEAN 533 or permission of instructor. Offered: alternate years.

596
OCEAN 574 Principles and Applications of Molecular Methods (3) Applications of molecular techniques to questions in ecology, evolution, and natural resource management, with emphasis on advanced genome-enabled technologies and the analysis and interpretation of genetic data. Includes weekly discussion of empirical papers, and preparation/peer-review of a proposal. Prerequisite: permission of instructor. Offered: jointly with FISH 542; A.

OCEAN 575 Molecular Techniques (4) Laboratory on DNA methods. Experiments analyzing genetic variation at the intra- and interspecific level, including one experiment of student's own design. Techniques include DNA extraction and quantitation, PCR, DNA sequencing, RFLP analysis and cloning. Prerequisite: FISH 542 or OCEAN 574 or permission of instructor. Offered: jointly with FISH 543; W.

OCEAN 578 Advanced Topics in Biological Oceanography (*, max. 18) Specialized research areas. Topic varies each year. Offered at Friday Harbor Laboratories. Prerequisite: permission of director of Friday Harbor Laboratories. Offered: S.

OCEAN 580 Aquatic Kinetics (3) Reaction rates and mass transport in water. Theories of chemical kinetics; experimental results from: CO$_2$ hydrolysis, Fe, Mn, and H$_2$S oxidation, stable isotope fractionation, mineral dissolution; homogeneous, heterogeneous, microbial catalysis; reaction and transport at air-water, sediment-water, and O$_2$/H$_2$S interfaces. Prerequisite: permission of instructor.

OCEAN 581 Geochemical Modeling (3) Background to modeling concepts frequently encountered in chemical oceanography: box models, advection-diffusion problems, sediment diagenesis equations, and boundary layer (air-water and sediment-water interface) models. Problems requiring application of the models to chemical distributions in the ocean. Prerequisite: permission of instructor.

OCEAN 582 River Basin Biogeochemistry (3) The function of rivers and river basins in transporting materials to the oceans and their importance in biogeochemical cycles. Origin of water and water routing within drainage basins, sources and modification of dissolved and particulate materials in transport, ecological theory, and estuarine mixing zone transformations. Prerequisite: permission of instructor.

OCEAN 583 Isotope Biogeochemistry (3) The use of stable isotopes to study biogeochemical cycles in the oceans and atmosphere; specifically carbon, nitrogen, and sulfur cycles. Isotopic effects during photosynthesis, respiration, organic matter degradation. CaCO$_3$ dissolution, methaneogenesis, nitrification/denitrification, and sulfate reduction. Prerequisite: permission of instructor.

OCEAN 584 Ocean Tracers and Mixing (3) The applications of tracers to studies of ocean circulation and ventilation. Processes within the ocean for which tracers have provided important information include gas exchange, mixed layer dynamics, thermocline ventilation, deep water formation and spreading, and mixing. Knowledge of partial differential equations suggested.

OCEAN 585 Paleoceanography (3) History of environmental changes on earth over the past 100 million years as reconstructed from records in deep-sea sediments, ice sheets, and other ocean/terrestrial substrates. Examination of isotopic, geochemical, micropaleontological, and dating techniques. Role of the ocean in climate change. Prerequisite: permission of instructor.

OCEAN 586 Current Research in Climate Change (2, max. 20) Weekly lectures focusing on a particular aspect of climate topic to change each year from invited speakers (both UW and outside), plus one or two keynote speakers, followed by class discussion. Offered: jointly with ATM S 586/ESS 586.

OCEAN 587 Climate Dynamics (3) Hartman, Thompson Examines Earth’s climate system; distribution of temperature, precipitation, wind ice, salinity, and ocean currents; fundamental processes determining Earth’s climate; energy and constituent transport mechanisms; climate sensitivity; natural climate variability on interannual to decadal time scales; global climate models; predicting future climate. Offered: jointly with ATM S 587/ESS 587. Offered: A.

OCEAN 588 The Global Carbon Cycle and Climate (3) Quay Oceanic and terrestrial biogeochemical processes controlling atmospheric CO2 and other greenhouse gases. Records of past changes in the earth’s carbon cycle from geological, oceanographic and terrestrial archives. Anthropogenic perturbations to cycles. Develop simple box models, discuss results of complex models. Offered: jointly with ATM S 588/ESS 588. Offered: W.

OCEAN 590 Advanced Topics in Oceanography (9-18, max. 18) Advanced topics examining specialized and interdisciplinary areas of oceanographic research. Offered at Friday Harbor Laboratories. Prerequisite: permission of Director of Friday Harbor Laboratories. Offered: S.

OCEAN 591 Marine Science in the Coastal Zone (3) Klinger Presentation and analysis of the marine science of estuarine, coastal, and open ocean systems, including evaluation and interpretation of scientific information necessary for management. Lectures, discussions, and readings emphasize the relevance of natural processes to marine environmental management and decision-making. Offered: jointly with SMA 591; A.

OCEAN 600 Independent Study or Research (*) Offered: AWSpS.

OCEAN 700 Master’s Thesis (*) Offered: AWSpS.

OCEAN 800 Doctoral Dissertation (*) Offered: AWSpS.
School of Pharmacy

Medicinal Chemistry

MEDCH 400 Fundamental Concepts in Medicinal Chemistry (3) W. Nelson Principles of physical organic chemistry; chemical bonding, stereochemistry, acids/bases, and reaction mechanisms relevant to processes such as drug distribution, specificity, and metabolism. Prerequisite: either CHEM 239 or CHEM 337. Offered: A.

MEDCH 401 Immunizing and Antimicrobial Agents (4) Daggett, Elmer Chemical and biologic properties of agents used to prevent or treat infectious diseases, including diagnostic, prophylactic, and therapeutic uses of immunizing biologicals and spectrum, action mechanisms, resistance patterns, toxicity, and therapeutic applications of antibiotics, antifungals, and antivirals. Prerequisite: MICROM 301, MICROM 302, MEDCH 450, or equivalent, PharmD major, or permission of instructor. Offered: Sp.

MEDCH 402 Medicinal Chemistry (3) S. Nelson Study of the various classes of medicinal compounds with particular emphasis on biological activity, mechanism of action, biotransformation, and the structural and physical properties governing absorption, distribution, and excretion. Prerequisite: MEDCH 400 or satisfactory completion of qualifying exam. Offered: A.

MEDCH 403 Medicinal Chemistry (3) W. Nelson, Rettie Study of the various classes of medicinal compounds with particular emphasis on biological activity, mechanism of action, biotransformation, and the structural and physical properties governing absorption, distribution, and excretion. Prerequisite: MEDCH 400 or satisfactory completion of qualifying exam. Offered: W.

MEDCH 404 Medicinal Chemistry (3) Atkins, W. Nelson Study of the various classes of medicinal compounds with particular emphasis on biological activity, mechanism of action, biotransformation, and the structural and physical properties governing absorption, distribution, and excretion. Prerequisite: MEDCH 400 or satisfactory completion of qualifying exam. Offered: Sp.

MEDCH 420 Alternative and Complementary Medicines (2) Elmer Study of popular alternative and complementary medicines used in the United States. Focus on herbal products with some coverage of homeopathic and other non-nutritional dietary supplements. Demonstration of resources for current objective information on these controversial medicines. Credit/no credit only. Offered: A.

MEDCH 435 Diagnostic Medicinal Chemistry (3) S. Nelson Examination of clinical diagnostic tests with regard to the chemical or biochemical rationale of the testing method, interpretation of test results, and major factors influencing test values with special emphasis on the effects of medications. Clinical laboratory data from patients considered in light of these factors. Prerequisite: MEDCH 451 or BIOL 406 or equivalent, or permission of instructor. Offered: W.

MEDCH 450 Medicinal Biochemistry I (3) Campbell, Kunze Introduction to biochemistry for Pharm.D. students with an emphasis on those aspects of biochemistry which are particularly relevant to understanding human disease and therapeutic intervention strategies. Offered: W.

MEDCH 451 Medicinal Biochemistry II (3) Campbell, Kunze Continuation of discussions of those aspects of biochemistry which are particularly relevant to understanding human disease and therapeutic intervention strategies. Offered: Sp.

MEDCH 495 Special Studies in Medicinal Chemistry (*, max. 6) Opportunity to expand the breadth and depth of understanding in specific areas. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSpS.

MEDCH 499 Independent Study/Research (*, max. 24) Research problems in medicinal chemistry. Prerequisite: cumulative GPA of 2.50 and permission of instructor. Offered: AWSpS.

MEDCH 501 Advanced Medicinal Chemistry (4) S. Nelson Advanced study of the various classes of medicinal compounds, with particular emphasis on biological activity, mechanism of action, biotransformation, and the structural and physical properties governing absorption, distribution, and excretion. Prerequisite: permission of instructor. Offered: AWSp.

MEDCH 502 Advanced Medicinal Chemistry (4) W. Nelson, Rettie Advanced study of the various classes of medicinal compounds, with particular emphasis on biological activity, mechanism of action, biotransformation, and the structural and physical properties governing absorption, distribution, and excretion. Prerequisite: permission of instructor. Offered: AWSp.

MEDCH 503 Advanced Medicinal Chemistry (4) Atkins, W. Nelson Advanced study of the various classes of medicinal compounds, with particular emphasis on biological activity, mechanism of action, biotransformation, and the structural and physical properties governing absorption, distribution, and excretion. Prerequisite: permission of instructor. Offered: AWSp.

MEDCH 520 Seminar (1, max. 15) Graduate students attend seminars and make one formal presentation per year while in residence; maximum of three presentations. Credit/no credit only. Offered: jointly with PCEUT 520; AWSpS.

MEDCH 521 Advanced Medicinal Chemistry (3) Atkins, W. Nelson Application of integrated data from the physical and biological sciences to problems of chemotherapy, including transport of drugs to site of action, biotransformation of drugs, interaction of drugs with enzyme systems, and recent advances in drug design. Prerequisite: CHEM 457, CHEM 531, and BIOC 442, or permission of instructor. Offered: Sp.

MEDCH 527 Drug Metabolism (4) Rettie, Thummel Considerations of the biochemical mechanisms for the biotransformation of drugs and foreign compounds. Includes reaction mechanisms, ultrastructural considerations, induction mechanisms, methodology, kinetics of inhibition and activation, steroid and amine metabolism. Offered: jointly with PCHOL 527; odd years; W.

MEDCH 528 Proteins in Therapy and Disease (2) Atkins, Daggett Examination of enzyme catalysis and of protein structure and dynamics. Principles applied to topics of therapeutic relevance including: peptides and proteins as drugs, structure-based drug design, drug metabolism, protein engineering, and role of mutant or incorrectly folded proteins in disease states. Prerequisite: comprehensive course in biochemistry or consent of instructor. Offered: even years; W.

MEDCH 530 Mass Spectrometry of Drugs, Toxicants, and Metabolites (3) Howald Current approaches to the combination of liquid chromatography with mass spectrometry for small molecules. Mass spectrometry of drugs, toxicants, metabolites. Emphasis on interpretation skills, with problem sets each week. Introduction to LC/MS instrumentation. Ionization methods appropriate for small molecules. Capillary LC/MS and capillary electrophoresis. Offered: odd years; Sp.

MEDCH 541 Mass Spectrometry Based Proteomics (3) Covers basics of sample preparation, data generation, instrumentation, ionization, and data interpretation of peptide tandem mass spectra manually. Uses database search engines and bioinformatics in systems biology related proteomics. Prerequisite: MEDCH 530 or permission of instructor. Offered: odd years; Sp.

MEDCH 550 Mechanistic Studies in Medicinal Chemistry (1) S. Nelson Discussion of research strategies and methods used to carry out studies of mechanisms of drug action, metabolism, and toxicities. Emphasis is on problem solving through theoretical and experimental approaches and on data analysis and interpretation. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSpS.

MEDCH 551 Flavin and Heme-Containing Monoxygenases (1) Rettie Discussion of research strategies and methodologies concerning the structure, function, and polymorphic expression of human monoxygenases, especially the cytochrome P450s and flavin-containing monoxygenases. Emphasis placed on experimental problem solving, data analysis, and presentation. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSpS.

MEDCH 552 Medicinal Chemistry Aspects of Drug Action and Drug Metabolism (1) W. Nelson Discussion of research strategies, methodologies, and literature concerning the mechanisms of drug action and drug metabolism, particularly as these apply to opioid drugs and beta blockers. Emphases placed on problem solving, data analysis, and presentation. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSpS.

MEDCH 553 Structure and Function of Macromolecular Protein Assemblies (1) Atkins Discussion of research strategies, methods, and current literature concerning macromolecular self-assembly processes and protein-protein interactions as they relate to biological specificity. Emphasis on experimental approaches used in current literature. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSpS.
Pharmaceutics

PCEUT 405 Clinical Pharmacokinetics (5) Anderson, Levy Basic principles of pharmacokinetics and their application to the clinical setting, including: single-dose intravenous and oral kinetics, multiple dosing, nonlinear pharmacokinetics, metabolite kinetics, pharmacoogenetics, and the role of disease in drug clearance and dose requirements, and kinetics of drug-drug interactions. Prerequisite: PCEUT 331. Offered: W.

PCEUT 406 Biopharmaceutics and Drug Delivery (3) Ho, Levy, Shen, Thummel Basic principles of biopharmaceutics and drug delivery, and their application to therapeutics including oral and non-parenteral routes of administration for traditional and biotechnology drugs. Fundamental principles related to assessment of bioavailability and bioequivalence, drug and food-drug interactions for orally administered drugs. Prerequisite: PCEUT 405. Offered: Sp.

PCEUT 495 Special Studies in Pharmaceutics (*, max. 6) Opportunity to expand the breadth and depth of understanding in specific areas. Credit/no credit only. Prerequisite: permission of instructor. Offered: A/W/S/P/S.

PCEUT 499 Undergraduate Research (1-6, max. 12) Research problems in drug disposition, drug targeting, and drug development. Prerequisite: Cumulative GPA of 2.5 and permission of the instructor. Offered: A/W/S/P/S.

PCEUT 501 Advanced Pharmacokinetics I (5) Ho, Shen, Unadkat Drug absorption, distribution, excretion, metabolism, and effects in mammalian systems. Compartmental model and model-independent approaches examined. Drug disposition studied in a physiologically realistic context taking nonlinear events into account. Aimed at development of innovative methods for data analysis and evaluation in biological systems. Prerequisite: PCEUT 405 or PCEUT 506, or permission of instructor. Offered: Sp.

PCEUT 503 Drug Transport and Delivery (4) Ho, Hu, Mao, Unadkat, Wang Provides advanced knowledge of the physico-chemical and biological concepts underlying in vivo transport and delivery of drugs. Prerequisite: PCEUT 506. Offered: odd years; Sp.

PCEUT 506 Pharmacokinetic Principles (2) Thummel Advanced study of pharmacokinetic concepts. Topics emphasize the physiological basis for mathematical models of drug distribution, clearance, and effect. Material presented in a didactic format with additional interactive discussions. Offered: W.

PCEUT 508 Drug Discovery and Development (2) Gardner, W. Nelson Overview of steps that lead to the introduction of new pharmacologic agents for the treatment of disease. Included are the scientific underpinnings of drug discovery, preclinical evaluation, clinical trials, regulatory considerations, and outcomes research. Credit/no credit only. Prerequisite: Pharm D. student, graduate student, or permission of instructor.

PCEUT 510 Pharmacokinetics of Drug Interactions (3) Levy, Shen, Thummel, Unadkat Common pharmacokinetic mechanisms underlying the clinically important interactions between drugs. Interactions involving gastrointestinal absorption, serum drug protein binding, excretory and metabolic clearance processes are discussed. Prerequisite: PCEUT 405 or equivalent. Offered: A.

PCEUT 513 Basic Concepts in Pharmacogenetics and Toxicogenetics (3) Eaton, Thummel Addresses current DNA sequencing and genotyping approaches, and basic concepts of pharmacogenetics and toxicogenetics. Emphasis placed on applications of genomic technologies to the understanding of “gene-environment interactions” that cause diseases of public health importance, including cancer, chronic neurological diseases, and adverse drug reactions. Prerequisite: GENET 372 or equivalent. Offered: jointly with ENV H 513/PHG 513; A.

PCEUT 520 Seminar (1, max. 15) Wang Graduate students attend seminars and make one formal presentation per year while in residence; maximum of three presentations. Credit/no credit only. Offered: jointly with MEDCH 520; A/W/S/P/S.

PCEUT 534 Pharmaceutical Analysis (3) Kalhorn Methods of drug and metabolite analysis from biologic matrices. Emphasis on practical aspects of assay design, optimization, and validation. Approaches to troubleshooting both assay methodology and instrumentation problems are also covered. Credit/no credit only. Offered: W.

PCEUT 583 Topics in Pharmaceutics (1, max. 15) Ho Discussion of pertinent articles from current literature and recent laboratory results. Credit/no credit only. Offered: A/W/S/P.

PCEUT 584 Pharmacokinetic Discussion Group (2) Student initiated discussions of pharmacokinetics concepts in relation to current literature. Preparatory to departmental cumulative examinations. Credit/no credit only. Offered: S.

PCEUT 590 Doctor of Pharmacy Thesis (1) Writing intensive course in which students develop a high quality scientific paper that
PHARM 301 Self-Care Products and Practices
PHARM 304 Profession of Pharmacy
PHARM 305 Introductory Pharmacy Practicum
PHARM 309 Quantitative Methods I
PHARM 403 Chemical Dependency Concepts
PHARM 408 Managed Care Pharmacy: Principles and Practice
PHARM 409 Applied Pharmacokinetics
PHARM 410 Pharmacy and Women's Health
PHARM 411 Medical Devices for Home Health Care
PHARM 412 Nonprescription Drug Therapy
PHARM 414 Therapy and the Media
PHARM 420 Drug Therapy and the Media
PHARM 421 Foundations and Principles of Pharmacy Education
PHARM 422 Immunization
PHARM 423 Pharmacy-Based Immunization
PHARM 424 Pharmacy-Based Immunization
PHARM 447 Overview of Contraceptive Management (2) Gardner. Didactic overview of contraceptive methods, fertility interventions, and medical abortions. Establishes forum for interactive discussion. Includes patient screening criteria and selection and monitoring outcomes of currently available barrier and hormonal methods of contraception and medical abortions. Open to all PharmD students, as well as other health science professional students.

PHARM 452 Contemporary Problems (1) Discussion of current trends affecting the role of pharmacy in health-care delivery. Credit/no credit only.

PHARM 459 Pharmacy Ownership and Entrepreneurship (2) Hammer Discusses barriers to and benefits of independent pharmacy ownership. Describes the role, responsibilities and different management styles of the pharmacy owner. Evaluates differences with regard to purchasing an existing practice vs. starting a new practice. Explains legal considerations of ownership. Discusses how to create and the importance of a business plan. Offered: A.

PHARM 460 Principles of Professional Practice Management (2) Downing Emphasizes the major issues and barriers of providing pharmaceutical care in institutional and community pharmacies. Topics include evaluating workflow and facility design, complying with legal and safety standards, managing drug distribution services, payment for pharmacist services, human resource management and marketing pharmaceutical care services.

PHARM 468 Case Studies in Pharmaceutical Care (3, max. 9) Dawson Small groups of students work with an instructor to review cases illustrating various aspects of specific diseases: pathophysiology, clinical features, psychosocial factors, therapeutic interventions with emphasis on drug therapies, and community resources. Analytic reasoning, self-study skills, and knowledge are emphasized.

PHARM 475 Experiential Learning (1-6, max. 6) O’Sullivan Under faculty supervision, pharmacy students gain experience working on advanced practice projects, in a pharmacy practice setting, prior to the final year of the pharmacy program. Credit/no credit only. Prerequisite: satisfactory completion of the first quarter of pharmacy school.

PHARM 476 Quantitative Methods II (4) Blough Introduction to basic biostatistical concepts in the field of pharmacy. Prerequisite: PHARM 309.

PHARM 483 Institutional and Healthcare Systems Pharmacy Practice (2) Sorani Presentation of topics regarding current contemporary institutions pharmacy practice. Discussion of new systems technology, home care programs, managed care, computer applications, budgeting, formulary systems, drug information services, intravenous admixture programs, quality assurance process, and patient oriented services.

PHARM 485 Elective Advanced Practicum (1-16, max. 40) Plein Advanced-level geriatric clinical pharmacy experience in institutional (hospital, nursing home, long-term-care facility) and ambulatory patient-care facilities under direct supervision of a clinical preceptor.

PHARM 490 Fluid and Electrolytes and Parenteral Nutrition (2) Edwards Principles of fluid and electrolyte therapy, including saline, water, and acid-base balance, carbohydrate, protein, lipid, vitamin, and mineral requirements in parenteral nutrition. Nutritional assessment, complications of parenteral nutrition, stability and compatibility of intravenous solutions, modifications of parenteral nutrition in pediatrics and specific disease states are also covered.

PHARM 491 Cancer Pharmacotherapeutics (2) Kwok Pharmacotherapy of cancer, covering supportive care (antibiotics, antineoplastics, analgesics, nutrition) to the antineoplastic agents themselves. Specialists in each area serve as guest lecturers.

PHARM 492 Pharmaceutical Services for Long-Term Care (2) Lam Scope of pharmaceutical services for long-term care (LTC) and systems for services. Responsibilities of the pharmacist for distributive, administrative, and clinical pharmacist services in long-term care homes and other long-term-care facilities. Economic considerations in provision of LTC pharmaceutical services, role of the consultant pharmacist for home-health-care organizations. Pharmaceutical services for independently living elderly.

PHARM 495 Special Studies in Pharmacy (1, max. 6) Special studies of professional topics in pharmacy and pharmaceutical care. Emphasis on understanding the breadth and depth of understanding in specific areas. Students undertake independent study under the individual direction of a faculty member.

PHARM 497 Drug Therapy for the Elderly (3) Gray, Christiansen Clinical application of drug knowledge in the treatment of disease in older adults with multiple comorbidities. Application of age-related changes in pharmacokinetics and pharmacodynamics in the selection and monitoring of drug regimens of older adults. Emphasis on problem solving, using case examples. Prerequisite: nurse practitioner students or permission of instructor.

PHARM 499 Independent Study/Research (1, max. 6) Applied pharmaceutical research problems. Credit/no credit only.

PHARM 502 Neonatal Drug Therapy (3) Blackburn Clinical applications of drugs used with acute and chronically ill preterm and term neonates. Review of neonatal pharmacotherapeutics. Examination of selected therapeutic agents in relation to indications, efficacy, therapeutic and adverse effects, monitoring parameters, and dosing principles in the neonate.

PHARM 503 Critical Care Pharmacotherapeutics (2) Rohrs Introduction to the application of critical care pharmacotherapy topics to patient care. Covers: hemodynamic principles, vasoactive medications, sedation/analgiesia, acute respiratory failure, ACLS, shock, fluid management, acute renal failure, severe infections, AAS/AMI. Prerequisite: 3rd-year PharmD student, or approval by instructor.

PHARM 504 Topics in Drug Safety (1) Gardner. Hazlewood Introduces current policy issues in the area of safety of marketed pharmaceutical products and medical devices. Examines contemporary controversies and drug safety problems being addressed by regulatory agencies, pharmaceutical and medical device industries, academicians, policy makers, researchers, health care providers, consumers, and consumer advocates.

PHARM 506 Seminar in Pharmacy Education I (1) Murphy, Odgaard Discussion of scholarship and teaching in pharmacy education, focusing on the critical evaluation of educational research. Designed in a journal-club format, students participate in small group discussions and write an analysis paper. Prerequisite: PHARM 421 or permission of instructor. Offered: W.

PHARM 507 Seminar in Pharmacy Education II (1) Hammer, O’Sullivan Students lead discussion about current issues in pharmacy and higher education as well as critically evaluate educational research. Weekly seminar includes small group discussions and journal-club methods. Prerequisite: PHARM 506 or permission of instructor. Credit/no credit only. Offered: Sp.

PHARM 509 Medical Literature Evaluation (2) O’Sullivan Introduction to the processes involved in the assessment of primary and tertiary medical literature. Students are required to read and critique medical literature. Classes are conducted in a journal club format.

PHARM 510 Contemporary Concepts in Clinical Nutrition Support (1) Chan Addresses current topics and concepts in clinical nutrition support. Topics include assessment and management of patients requiring specialized nutrition support, enteral nutrition, and parenteral nutrition. Prerequisite: biochemistry, anatomy and physiology, or permission of instructor. Offered: A.

PHARM 511 Current Topics in Immunology and Immunotherapeutics (2) Hebert Overview of the immune system and pharmacologic agents which modulate the immune response. Credit/no credit only. Prerequisite: second-, third-, or fourth-year Pharm.D. student or permission of instructor.

PHARM 512 Clinical Applications of Drug Interactions (2) Horn Discussion of the clinical evaluation and management of drug-drug interactions using patient situations. Focus on patient- and drug-related factors that predispose patients to adverse drug interactions, as well as clinical management of patients found to be at risk. Credit/no credit only. Prerequisite: third- or fourth-year Pharm.D. student.

PHARM 514 Primary Care Pharmacotherapeutics (3-4, max. 4) Kirkness Explores clinical applications and therapeutic issues for selected drug categories commonly used in primary care settings and across age groups. Selected drug categories defined by pharmacokinetics, indications for use, efficacy, therapeutic and adverse effects, monitoring parameters, dosing principles, common drug interactions, patient education, socioeconomic, and behavioral factors emphasized.

PHARM 515 Pharmacoepidemiology for Acute/ Critical Illness (3) Landis Analysis of issues that impact the assessment, prescription, and evaluation of pharmacotherapeutic regimes for patients who are acutely or critically ill. Current
research, clinical contextual considerations, and pharmacotherapeutic principles are emphasized as the basis for decisions relevant to the management of pharmacotherapy in acute care clinical practice.

PHARM 516 Certificate Program in Biomedical Regulatory Affairs (3) Hazlet Comprehensive overview of the knowledge and skills necessary to be an effective regulatory affairs compliance specialist overseeing the design, development, testing, and production of drugs, biotechnology-derived therapeutics, and medical devices. Credit/no credit only.

PHARM 517 Certificate Program in Biomedical Regulatory Affairs (3) Hazlet Comprehensive overview of the knowledge and skills necessary to be an effective regulatory affairs and compliance specialist overseeing the design, development, testing, and production of drugs, biotechnology-derived therapeutics, and medical devices. Credit/no credit only.

PHARM 518 Certificate Program in Biomedical Regulatory Affairs (3) Hazlet Comprehensive overview of the knowledge and skills necessary to be an effective regulatory affairs and compliance specialist overseeing the design, development, testing, and production of drugs, biotechnology-derived therapeutics, and medical devices. Credit/no credit only.

PHARM 519 Pharmacotherapeutics for Infectious Disease and Infection (2) Black Analysis of pharmacotherapeutics to control infection and manage infectious disease through seminar discussion of cases, critical analysis of a pharmacotherapeutic regimen, and development of references to enhance students’ clinical expertise. Emphasis on principles of anti-infective therapy, problem solving clinical cases with complex medication regimes, and identifying judicious pharmacotherapeutic plans.

PHARM 522 Current Topics in Acute Care Pharmacotherapy (1) Increase understanding and stimulate discussion in the current topics related to acute care pharmacotherapy. Students have opportunities to review the management of patients in the acute care setting through current cases presented by the instructors. Emphasizes interactive learning. May be taken alone or concurrently with PHARM 503.

PHARM 523 Survey of Biomedical Regulatory Affairs (3) Hazlet Overview of the knowledge, terminology, and skills necessary to be an effective regulatory affairs or compliance specialist in the design, development, testing and production of drugs, biotechnology-derived therapeutics, and medical devices. A class project is required. Offered: even years.

PHARM 532 Methods in Pharmaceutical Policy Analysis (4) Hazlet, Introduction to the tools used in and the framework and dominant contexts for pharmaceuticals policy development and analysis. Methods reviewed in a series of sessions presenting a specific method and case analyses involving pharmaceuticals development. Project and in-class presentation required. Prerequisite: graduate standing in pharmacy or permission of instructor.

PHARM 533 Pharmacoepidemiology (3) Gardner, Heckbert Overview of pharmacoepidemiology including drug development and approval; application of epidemiologic methods to study drug safety and effectiveness; exploration of the interplay between research and public policy; introduction to resources for information about drugs; introduction to pharmacology principles pertinent to pharmacoepidemiology. Prerequisite: Graduate student or with permission. Offered: jointly with EPI 533.

PHARM 534 Economic Evaluation in Health and Medicine (3) Patrick, Sullivan Methods and techniques for evaluating costs and cost-effectiveness of health, medical, and pharmaceutical interventions. Emphasis on economic evaluation, decision modeling, and modeling techniques for resource allocation and decision making. Applications to technology assessment, health policy, clinical practice, and resource allocation. Prerequisite: permission of instructor. Offered: jointly with HSERV 583.

PHARM 536 Principles of Publishing Clinical Evidence (2) Cummings, Johnson, Olson Explains advanced methodologic principles for improving the clarity of published clinical evidence. Students prepare and revise a 1000-word research letter for The Lancet using their own clinical evidence. Credit/no credit only. Prerequisite: permission of instructor. Offered: jointly with EPI 534.

PHARM 541 Health Care and Society (3) Introduction to health services and pharmacy practice designed for future health-care practitioners. Examines the history, organization, and effectiveness of the U.S. health-care system. Stresses the student’s ability to adopt a broad perspective across health-care disciplines and traditional boundaries.

PHARM 543 Pharmacy Laws and Ethics (4) Hazlet Study of the laws regulating the practice of pharmacy. Professional liability, warranties, and contracts are discussed. Case studies of ethical considerations of pharmacy practice.

PHARM 544 Survey of Pharmacy Laws (1) Hazlet Prepare, discuss, present responses to assigned questions developed by faculty regarding laws governing pharmacy practice in the course of reviewing for the Multistate Pharmacy Jurisprudence Examination. Class meets for two consecutive Saturdays in March. E-mail and web-access required. Non-matriculated students by permission only. Credit/no credit only.

PHARM 549 Pharmacotherapeutics for Older Adults (3) Gray Clinical application of drug knowledge in the treatment of disease in older adults with multiple comorbidities. Application of age-related changes in pharmacokinetics and pharmacodynamics in the selection and monitoring of drug regimens of older adults. Emphasis on problem solving, using case examples. Prerequisite: PHARM 560, PHARM 561 or permission of instructor.

PHARM 550 Current Topics in Geriatric Pharmacotherapy (1) Gray Review primary medical literature to discuss contemporary issues related to geriatric pharmacotherapy. Credit/no credit only. Prerequisite: PHARM 509 or permission of instructor.
Evans School of Public Affairs

Public Affairs

PB AF 499 Topics in Public Policy (3-5, max. 6) &S Examines selected issues of importance in all areas of public policy. Focus on in-depth analysis of vital public policy issues and the integration of economic, political, and administrative perspectives on them. Offered: jointly with POL S 404.

PB AF 500 General Seminar (1, max. 9) .

PB AF 501 Legislative Relations (3) Studies role of legislative bodies in American public policy making. Builds on case studies and focuses on tactics, constraints, and options involved in working within a legislative process to achieve public policy goals.

PB AF 502 Political Management of Policy Process (3) Analyzes the issues which public managers address when they seek to make and implement public policy and programs. Pays particular attention to the institutional and political constraints on policy making and the skills needed to address them.

PB AF 503 Administrative and Executive Leadership (3) Nature of executive life in the public sector, the function of leadership in implementing, making, and changing policy. Leadership styles, the relation of leadership to its constituencies and communities.

PB AF 504 Leadership Ethics (3) Addresses the moral challenges facing leaders in the public and nonprofit sectors. Examines the values and virtues important to sustained ethical leadership as well as strategies to build strong institutional cultures and support ethical practices in institutions.

PB AF 505 The Law of Public Administration (3) Legal framework of public administrative action in the United States, emphasizing constitutional requirements; operation of the administrative process; management of personnel, funds, and contracts; and judicial review of administrative activity.

PB AF 506 Ethics and Public Policy (3) Teaches students to identify moral issues in public life. Special focus on the integration of moral concerns into public discussion in a manner which contributes to good policy and does not polarize issues. Discusses moral and political theory by focusing on contemporary cases and issues.

PHARM 590 Doctor of Pharmacy Thesis (1) Writing intensive course in which students develop a high quality scientific paper that demonstrates grammatical and organizational excellence and the ability to critically evaluate biomedical literature. Credit/no credit only.

PHARM 595 Special Studies in Pharmacy (1-6, max. 24) Special studies of professional topics in pharmacy. An opportunity to expand the breadth and depth of understanding in specific pharmaceutical areas. Students may undertake independent study under the individual direction of a faculty member. Credit/no credit only.

PHARM 596 Seminars in Pediatric Pharmacotherapy (2) Weber, Sawyer Overview of drug disposition and medication utilization as it applies to the pediatric patient. Specific emphasis on neonatology and ambulatory pediatrics. Credit/no credit only. Prerequisite: third-year Pharm.D. student or permission of instructor.

PHARM 597 Graduate Seminar (1) Blough, Gardner, Hazlett, Sullivan, Veenstra Interactive discussion of topical issues, methods, or analytic techniques. Topics vary. Credit/no credit only. Prerequisite: graduate program student.

PHARM 598 Case Conference: Geriatrics (1) Plein Students taking geriatric pharmacy clerkships in various clinical settings meet with faculty to present case studies of elderly patients requiring complex drug therapies. Credit/no credit only. Prerequisite: Pharm.D. fourth-year practicum in geriatrics or general medicine.

PHARM 599 Independent Study/Research (1-6, max. 24) Applied pharmaceutical research problems. Credit/no credit only.

PHARM 600 Independent Study or Research (*) Credit/no credit only.

PHARM 700 Master's Thesis (*) Credit/no credit only.

PHARM 800 Doctoral Dissertation (*) Credit/no credit only.
which statistical tools or research methods are appropriate to answer different types of policy or management questions. Covers probability, descriptive statistics, hypothesis testing, and confidence intervals. Prerequisite: graduate status in School of Public Affairs or permission of instructor. Offered: W.

PB AF 528 Quantitative Analysis II (3) Second quarter of a two-quarter sequence aimed at helping students become informed users and critics of research and statistical analysis. Combines material on research design and data collection methods with tools for multivariate analysis. The multivariate analysis methods include correlation and an introduction to multivariate regression. Prerequisite: PB AF 527. Offered: Sp.

PB AF 529 Advanced Multivariate Analysis (3) Klawitter Prepares students for advanced work with multivariate methods in program evaluation and policy analysis. Includes a data project what results in a professional quality product; reading examples of professional work and presentations of methods and results Offered: A.

PB AF 530 International Affairs (3) Provides a broad understanding of international issues and United States policy. Students explore U.S. foreign policy and the roles of major international actors in international trade, security, and strategic concerns, refugee policy, conflict resolution, development assistance, and the environment. Offered: jointly with POL S/SIS 534.

PB AF 531 Development Management in the 21st Century (3) Addresses organization, administration and evaluation in governmental and non-governmental agencies involved in development efforts. Students examine development strategies, alternative management approaches, and management skills such as budgeting, finance, human resource development and program evaluation. Other topics include communication, expatriate/local power imbalances, decentralization, community involvement, culture, and personnel issues.

PB AF 532 Managing Policy in a Global Context (3) Examines different policy environments leaders must address to achieve policy in comparative and international settings. Includes strategies, tactics, and frameworks needed to initiate and sustain policy dealing with authoritarian, democratic, liberal, and one-party states. Focuses on pressures from the international system and issues such as globalization.

PB AF 533 Economics of International Development (3) Introduction to sustainable international development and its physical, human, social, and natural capital components. Students examine the new growth theories and evidence, and their relationship to democracy, trade, and other policies and institutions. Topics include income distribution, poverty, and the environment.

PB AF 534 Rural Development: Economics and Policy (3) Fichtscher Survey of current microeconomic questions related to well-being of rural people in developing countries. Strengthens the ability to design appropriate policy tools for rural development by enhancing understanding of economic theory and its applications to rural households and by reviewing findings. Offered: W.

PB AF 536 Program Evaluation in the Developing World (3) Gugerty Provides an overview of issues in the analysis and evaluation of development projects focusing on the developing world with three themes: understanding and analyzing development programs, understanding and using the logic of impact assessment; identifying practical, field-based tools for monitoring and evaluation in low resource environments. Offered: Sp.

PB AF 537 Topics in International Affairs (3, max. 12) Examines topics of interest and import in foreign policy and international affairs. Focuses on the in-depth analysis of issues and the integration of economic, institutional, and political dimensions.

PB AF 538 International Organizations and Ocean Management (3) Survey of the manner in which international regimes and organizations attempt to manage and regulate the uses of the ocean. Primary emphasis is on the analysis of the effectiveness of regimes and of processes that support or constrain these organizations. Prerequisite: SMA 500 or permission of instructor. Offered: jointly with SMA 507.

PB AF 539 Values in International Development (3) Fichtscher Examines and clarifies international development values, including underlying theories of justice on which they seem to be built, the ways in which they are justified to stakeholders, the general public, and impacts they have upon people, especially the poorest and most vulnerable. Offered: W.

PB AF 540 Integrated Public Management Sequence (3) Analyzes the institutional and political context of modern public management. Cases, readings, and discussion provide an integrated introduction to the major skills needed to successfully lead and manage government and nonprofit organizations. Offered: A.

PB AF 541 Integrated Public Management Sequence (3) Analyzes the institutional and political context of modern public management. Cases, readings, and discussion provide an integrated introduction to the major skills needed to successfully lead and manage government and nonprofit organizations. Prerequisite: PB AF 540. Offered: W.

PB AF 542 Integrated Public Management Sequence (3) Analyzes the institutional and political context of modern public management. Cases, readings, and discussion provide an integrated introduction to the major skills needed to successfully lead and manage government and nonprofit organizations. Prerequisite: PB AF 541. Offered: Sp.

PB AF 543 Public Leadership Seminar (3) Focus on the societal context of managerial life. Credit/no credit only. Prerequisite: permission of instructor. Prerequisite: graduate standing in Public Affairs Evening Degree Program. Offered: A.

PB AF 544 Public Leadership Seminar (1-3, max. 3) Integrated use of analytic and management concepts in the making of policy. Prerequisite: PB AF 543. Offered: W.

PB AF 545 Public Leadership Seminars (3) Provides a forum to reflect on the major dimensions of modern managerial leadership at the end of the program. Includes a team project working with outside clients or organizations. Prerequisite: PB AF 544.

PB AF 550 Management of Not-for-Profit Organizations (3) Focuses upon the roles played by not-for-profit organizations in meeting the public good. Examines internal management issues such as structure, budget, and operations; and external issues such as board functions, legal status, marketing, media relations, and fund-raising.

PB AF 551 Public Management: Program Planning and Design (3) Policy context of planning and programming, the institutionalization of purpose, the planning process, activity design, work scheduling and measurement, and program evaluation.

PB AF 552 Public Arts Policy and Management (3) Role of government in arts. Range of public support at federal, state, and local levels; reasons for its development and viability. Nature evolution, functions of public arts agencies in implementing arts policy; relation of such agencies to their constituencies. Seattle, King County, and Washington State serve as case studies.

PB AF 553 Financial Management in the Nonprofit Sector (3) Breither Provides an understanding of the financial framework on nonprofit organizations. Focuses on the financial principles of management of nonprofits, with an emphasis on financial reporting, financial planning, managerial decision-making and budgeting. Offered: A.

PB AF 554 Nonprofit Organizations and Public Policy (3) Examines the changing role of nonprofit organizations in American society. Selected policy topics include privatization, for-profit/nonprofit competition, public-private partnerships, tax policy, and new sources of revenues.

PB AF 555 Topics in Nonprofit Management (3, max. 12) Examines various topics of public importance in nonprofit management. Integrates the political, managerial, and economic dimensions of these issues.

PB AF 560 Urban Affairs (3) Explores national/local urban policy concerning the major problems confronting cities and metropolitan regions today. Economic globalization, income inequality, and metropolitan decentralization shape the urban agenda, the context for urban policy, and the analytic focus of the course. A project allows the exploration of strategies for intervention. Offered: jointly with URBDP 560.

PB AF 561 Urban Economics and Public Policy (3) Examines the rationale for and consequences of public intervention in urban land, housing, and transportation markets through land use regulations such as zoning and urban growth boundaries, infrastructure investments, and fiscal policies to manage urban development and traffic. Prerequisite: PB AF 516 or equivalent. Offered: jointly with URBDP 561.

PB AF 562 Introduction to Neighborhood Planning and Community Development (3) Provides introduction to basic practices in neighborhood planning and community development, including theoretical/historical bases; developing neighborhood plans/projects; indicators and evaluation of neighborhood quality; community participation; institutional framework, ethical dilemmas, and professional roles. Addresses current issues, including Seattle’s experience, NIMBYism, security, neighborhood character, housing segregation, environmental racism. Offered: jointly with URBDP 562.
PB AF 563 Seminar in Urban Planning and Policy (1) Seminar for students in the MPA/MUP concurrent degree program. Explores topics that intersect urban planning and policy, through exchange with faculty and professionals working in this arena. Focuses on developing thesis topics that explore this intersection. Offered: jointly with URBDP 563.

PB AF 565 Topics in Urban Affairs (3, max. 12) Examines various topics of public importance in urban policy. Integrates the political, managerial, and economic dimensions of these issues.

PB AF 569 Race and Public Policy (3) Analyzes the way in which the persistent problem of race is expressed in the formation and implementation of social and public policy.

PB AF 570 Social Policy Analysis and Management (3) Examines major institutions and programs in the human resources policy area: education, regulation of labor market, health care, income maintenance, social services. Discusses alternative policy instruments, analytic perspectives, intergovernmental issues, and management issues arising across policy areas. Explores challenges of linking services and clients across separate agencies.

PB AF 571 Education, The Workforce, and Public Policy (3, max. 6) Examination of policy issues involving education, training, the economy, and the development of the nation's human resources. Relationship between education, training, and work, underutilized workers, race and gender discrimination issues, and the role of education and training in economic development. Offered: jointly with EDLPS 563.

PB AF 573 Topics in Education and Social Policy (3, max. 12) Examines various issues of public importance in the areas of education and social policy. Focuses on in-depth analysis of relevant issues and the integration of the economic, administrative, and political dimensions of these issues.

PB AF 575 Public Policy Processes (5) Political science frameworks, approaches, and theories concerning development and implementation of public policies within American political systems. Governmental processes, including rational, political, and bureaucratic models of governmental decision-making; agenda-building processes; and normative perspectives concerning role of governmental entities.

PB AF 581 Information Technology and the Policy-Making Process (3) Demystifies information base for policy making in democracies. Examines theoretical and practical issues associated with information processing in the public sector. Considers role of new technologies in collecting, analyzing, and disseminating information with special attention to the relationship between these technologies and effective government service, public participation, and organizational accountability.

PB AF 582 News Media and Public Policy (3) Explores impacts of news coverage on public policy. Exposure to journalists’ approaches to coverage of public affairs, as well as to strategies used by leaders of public/non-profit agencies to attract favorable coverage and minimize damaging coverage. Students learn techniques for assessing impacts of news coverage.

PB AF 585 Topics in Science, Technology, and Public Policy (3) Examines relationship between advancement of technological knowledge and pace of technological change, and public policies to induce or respond to these trends. Generic issues of government research, development, and personnel training programs are addressed. Applications of policy issues involving biomedicial, communications, energy, environmental, transportation, and weapons technologies.

PB AF 586 International Science and Technology Policy (3) Seminar is designed: first, to analyze the relationships between research and development policy, capabilities, and national technological strategies for advanced industrial and less-developed countries; second, to deal with the international implications of particular technologies as countries try to make policy for them in regional and global organizations. Examples of specific technologies are chosen from such fields as space telecommunication, weather and climate modification, airline transportation, nuclear energy, and seabed exploitation.

PB AF 589 Risk Assessment for Environmental Health Hazards (3/4) Context, methodologies, types of data, uncertainties and institutional arrangements for risk assessment. Both qualitative and quantitative approaches to the identification, characterization, and control of environmental hazards to health emphasized through didactic and case studies. Offered: jointly with CEE 560/ENV H 577.

PB AF 590 Environmental Policy Processes (3) Presents background to establish the need for environmental policy. Explores in a comparative manner, examining both successes and failures, various strategies that have been used or proposed to protect the environment. Offered: jointly with CFR 592.

PB AF 591 Seminar in Resource Policy and Management (1-4) Introduction and orientation for concurrent degree program between the Evans School of Public Affairs and the College of Forest Resources. Examines research and literature on contemporary issues related to the integration of natural resource science, policy, and management, through discussion among faculty, students, and invited speakers. Offered: jointly with CFR 591.

PB AF 592 Resource Policy and Administration (5) Study based on understanding of the actors, arenas, issues, and policy communities that form the context for policy development and implementation. Exploration of approaches to policy inquiry. Consideration of implications for both policy and management. Students develop a study design for course project. Offered: jointly with CFR 571.

PB AF 593 United States Energy Policy (3) Energy policy formulation and implementation with emphasis on post-1973 developments. Energy conservation programs; changing roles of oil, coal, gas, nuclear, and solar energy; institutional, environmental and equity considerations; government research and development programs.

PB AF 594 Economic Approaches to Environmental Management (3) Layton Examines the economic tools relevant to natural resource and environmental management. Tools are developed in the context of a series of resource problems, with an eye towards building intuition useful for addressing complex policy problems that do not fit neatly into textbook examples. Offered: W.

PB AF 595 Topics in Environmental Policy and Management (1-3, max. 12) Examines various topics of public importance in environmental policy and management. Integrates the political, managerial, and economic dimensions of these issues.

PB AF 596 Ethics and Values in Environmental and Natural Resource Policy (3) Zerbe Examines environmental values and ethics and their relationship to the policy process. Includes content on value foundation of economic efficiency and its relationship to fairness, legal entitlements, duty to other creatures, and incommensurabilities in valuing goods. Current policy controversies are addressed.

PB AF 597 Role of Scientific Information in Environmental Decisions (3) Cullen, Snoover Examines how science contributes to decisions that involve the natural environment; how science and scientists help frame debates and decisions; how scientific findings are incorporated into decision-making processes; how scientists and non-scientists deal with uncertainty about scientific questions. Offered: Sp.

PB AF 598 Administrative and Policy Skills Workshop (1-3, max. 3) Teaches practical administrative, leadership, and analytic skills commonly required of managers and analysts in the public and non-profit sectors. The workshops emphasize hands-on problem resolution, simulations, and actual practice.

PB AF 599 Special Topics (1-6, max. 6) Study and analysis of special topics in public affairs. Topics vary each quarter depending on curricular needs and interests of students and faculty. Prerequisite: permission of instructor.

PB AF 600 Independent Study or Research (*)

PB AF 605 Degree Project ([1-6], max. 6) Serves to meet the degree project requirement as part of the Evans School curriculum. Students work in a supportive environment facilitated by peer and faculty to connect the research, organizational change, and capacity-building needs of community organizations and public agencies.

PB AF 607 Public Service Clinic (-3) Serves to meet the degree project requirement as part of the Evans School curriculum. Students work in a supportive environment facilitated by peer and faculty to connect the research, organizational change, and capacity-building needs of community organizations and public agencies.

Public Affairs Executive MPA

PA EX 501 Strategic Leadership (5) Executive MPA foundation course. Introduces key concepts required to lead effectively in the public and nonprofit sectors, including: the authorizing environment, leadership, organizational cultures, strategic decision-making, the use of data in evaluation, strategic and operational planning, and placing the modern organization in regional and global economic context. Workshop participation.
PA EX 502 Partnership and Accountability (3) Deepens the understanding of collaboration and partnerships in the public and nonprofit sectors, including the importance of customer service, the value of teams, developing and managing a functional team, and creating accountability in frameworks for intergovernmental relations and governmental partnerships.

PA EX 503 Negotiation and Conflict Resolution (3) Theory and practice of negotiation in two-party, multi-party, and multi-issue situations. Structural analysis, interest identification, positions, power and dependence, resolving disputes, finding mutual gains, perceptions of conflict and methods of resolution. Focuses on techniques and nuances of negotiation most useful to a manager working in a complex public service environment.

PA EX 504 Effective Communication (3) Theory and practice of effective communication, including speech, memoranda, and working with broadcast media. Philosophy and ethics of persuasion in public and non-profit sectors, psychology of compliance, advocacy and motivational facets of leadership. Continuation of power and dependence, perceptions of conflict and mutual gains from previous modules. Intensive workshop participation.

PA EX 505 Leading with Integrity (3) Campbell, Macaluso Moral and ethical dimensions of leadership. Understanding diversity and developing multi-cultural competence and self-awareness. Expanding leadership capacity in others, including employees. Developing judgment and emotional intelligence, defining and earning public trust, and understanding complexity of leadership in the public sector. Continuation of leadership development, exercises, and assessments.

PA EX 506 The Performance Challenge (5) Benson, Breitner, Klawitter Performance management, including performance measurement, as a framework for defining and achieving value in public and nonprofit organizations. Development and evaluation of policy alternatives. Use and interpretation of data for both managerial decision making and policy agenda-setting, including decision analysis and interpretation of research results.

PA EX 507 Strategic Financial Management I (3) GE Breitner, Smith Introduction to state and local public finance and nonprofit financial management and analysis. Political context and economic forces causing fundamental shift in sources of revenue and types of financing for public service. Fundamental concepts of financial statements, their nature and use in the public and nonprofit sectors.

School of Public Health and Community Medicine

Biostatistics

BIOST 111 Lectures in Applied Statistics (1) NW Weekly lectures illustrating the importance of statistics in a variety of fields, including medicine and the biological, physical, and social sciences. Contact instructor for information on which fields of applications emphasized. Credit/no credit only. Offered: jointly with STAT 111; Sp.

BIOST 290 Introduction to Biomedical Research: Study Design and Interpretation (3) NW Biostatistical concepts necessary for the interpretation, evaluation, and communication of biomedical research are introduced. Course topics include biomedical study design, randomization, graphical data displays, control of bias, variability, confounding, interaction, and ethics of human experimentation. Students participate in group and individual projects, group discussions, and oral presentations.

BIOST 499 Undergraduate Research (*) Supervised reading programs; library and field research; special projects. Credit/no credit only.

BIOST 502 Introduction to Statistics in Health Sciences (4) Description and examples of common concepts in biostatistics. Probability, point and confidence interval estimation, hypothesis testing including two-sample and paired t and chi-square tests, introduction to simple linear regression. Examples in health sciences stressed. Offered: S.

BIOST 503 Application of Statistics to Health Sciences (4) Standard statistical techniques presented and drawn from the health sciences literature. Critical interpretation of research results, and introduction to the computer for data processing and statistical analysis. Prerequisite: BIOST 502 or equivalent. Offered: S.

BIOST 509 Special Emphases in Biostatistics (3-5, max. 5) Introduction to concepts and methods of descriptive and inferential statistics, with applications in specific disciplines emphasized. Topics include comparison of means and proportions, hypothesis testing, confidence intervals, nonparametric methods, linear regression and correlation. Different sections target specific student populations.

BIOST 510 Biostatistics in Dentistry (3) Introduction to concepts and methods of descriptive and inferential statistics with applications in dentistry emphasized. Topics include comparison of means and proportions, hypothesis testing, confidence intervals, non-parametric methods, linear regression, and correlation. Prerequisite: enrollment in School of Dentistry or permission of instructor. Offered: jointly with DPHS 568.

BIOST 511 Medical Biometry I (4) Presentation of the principles and methods of data description and elementary parametric and nonparametric statistical analysis. Examples are drawn from the biomedical literature, and real data sets are analyzed by the students after a brief introduction to the use of standard statistical computer packages. Statistical techniques covered include description of samples, comparison of two sample means and proportions, simple linear regression and correlation. Offered: AS.

BIOST 512 Medical Biometry II (4) Multiple regression, analysis of covariance, and an introduction to one-way and two-way analyses of variance, including assumptions, transformations, outlier detection, dummy variables, and variable selection procedures. Examples drawn from the biomedical literature with computer assignments using standard statistical computer packages. Prerequisite: either BIOST 511 or BIOST 517, or equivalent. Offered: W.

BIOST 513 Medical Biometry III (4) Analysis of categorical data including two sample methods, sets of 2 x 2 tables, 3 x 2 tables, 2 x r tables, chi-square tests, residuals, and logistic regression. Classification and discrimination techniques. Survival analysis including product limit estimates and the Cox proportional hazards model. Prerequisite: BIOST 512 or permission of instructor. Offered: SP.

BIOST 514 Biostatistics I (4) Mathematically sophisticated presentation of principles and methods of data description; graphics; point, confidence interval estimation; hypothesis testing; relative risk; odds ratio; Mantel-Haenszel; chi-square test (matrix algebra required). Examples drawn from biomedical literature; real data sets analyzed using statistical computer packages. Prerequisite: biostatistics majors or permission of instructor. Offered: A.

BIOST 515 Biostatistics II (4) Mathematically sophisticated introduction to linear models; multiple regression, correlation; residual analysis; dummy variables; analysis of covariance; one-, two-way analysis of variance; randomized blocks; fixed, random effects (repeated measure, factorial designs); multiple comparisons (matrix algebra required). Real biomedical data sets analyzed. Prerequisite: BIOST 514, biostatistics major, or permission of instructor. Offered: W.

BIOST 516 Statistical Methods in Genetic Epidemiology (3) Theory and application of statistical techniques used in genetic epidemiology. Includes discussion of association studies, linkages and segregation analyses. Examples stressed with reference to assumptions and limitations. Prerequisite: either BIOST 513 or BIOST 518; PHG 511/EPI 517, or permission of instructor. Offered: jointly with EPI 516/PHG 519.

BIOST 517 Applied Biostatistics I (4) Introduction to the analysis of biomedical data. Descriptive and inferential statistical analysis for discrete, continuous, and right censored random variables. Analytic methods based on elementary parametric and non-parametric models for one sample; two sample (independent and paired), stratified sample, and simple regression problems. Offered: A.

BIOST 518 Applied Biostatistics II (4) Multiple regression for continuous, discrete, and right censored response variables, including dummy variables, transformations, and interactions. Introduction to regression with correlated outcome data. Model and case diagnostics. Computer assignments using real data and standard statistical analysis packages. Prerequisite: BIOST 517 or permission of instructor. Offered: W.

BIOST 519 Topics in Epidemiologic Methods (3) Davis Introduces advanced methodologic methods, including recursive partitioning, developing clinical prediction rules, analyses of community-level associations or interventions,
BIOST 521 Biostatistics for Experimentalists
(4) Statistical aspects of design, data analytic methods appropriate to classes of experiments most commonly employed in biomedical sciences. One-, two-way analyses of variance; factorial, crossed, nested, repeated measures designs, and messy real-data sets analyzed using standard statistical computer packages. Prerequisite: either BIOST 511 and BIOST 512, or BIOST 517 and BIOST 518, or equivalent. Offered: alternate years; Sp.

BIOST 524 Design of Medical Studies (3) Design of medical studies, with emphasis on randomized controlled clinical trials. Bias elimination, controls, treatment assignment and randomization, precision, replication, power and sample size calculations, stratification, and ethics. Suitable for graduate students in biostatistics and for research-oriented graduate students in other scientific fields. Prerequisite: BIOST 511 or equivalent, and one of BIOST 513, BIOST 518, STAT 421, STAT 423, STAT 512, or EPI 512; or permission of instructor. Offered: jointly with STAT 524; Sp.

BIOST 529 Sample Survey Techniques (3) Design and implementation of selection and estimation procedures. Emphasis on human populations. Simple, stratified, and cluster sampling; multistage and two-phase procedures; optimal allocation of resources; estimation theory; replicated designs; variance estimation; national samples and census materials. Prerequisite: either STAT 421, STAT 423, STAT 504, QMETH 500, BIOST 511, or BIOST 517, or equivalent or permission of instructor. Offered: jointly with CS&SASS 529/STAT 529.

BIOST 533 Classical Theory of Linear Models (3) Introduction to one-, two-way analysis of variance; randomized blocks; fixed, random effects, multiple comparisons. Statistical distribution theory for quadratic forms of normal variables. Fitting of the general linear model by least squares. Prerequisite: BIOST 515, STAT 421 or STAT 423; and STAT 513; and a course in matrix algebra. Offered: jointly with STAT 533; Sp.

BIOST 534 Statistical Computing (3) Introduction to scientific computing. Includes programming tools, modern programming methodologies, (modularization, object oriented design), design of data structures and algorithms, numerical computing and graphics. Uses C++ for several substantial scientific programming projects. Prerequisite: experience with programming in a high level language. Offered: jointly with STAT 534; Sp.

BIOST 535 Statistical Computing (3) Introduction to scientific computing. Includes programming tools, modern programming methodologies, (modularization, object oriented design), design of data structures and algorithms, numerical computing and graphics. Uses C++ for several substantial scientific programming projects. Prerequisite: experience with programming in a high level language. Offered: jointly with STAT 535; A.

BIOST 536 Categorical Data Analysis in Epidemiology (4) Summary of univariate categorical data analysis; introduction to multivariate analysis of categorical epidemiologic data using multiplicative models. Experience at interpretation; familiarity with available programs gained by analysis of bona fide data, critiques of analyses appearing in literature. Prerequisite: BIOST 515; EPI 513 and either BIOST 513 or BIOST 518; or permission of instructor. Offered: jointly with EPI 536; A.

BIOST 537 Survival Data Analysis in Epidemiology (4) Introduction to multivariate analysis of survival data using multiplicative models. Applicability to epidemiologic studies. Familiarity with interpretation and available computer programs gained by analysis of bona fide sets of data and critiques of analyses appearing in the literature. Prerequisite: BIOST 536 or permission of instructor. Offered: jointly with EPI 537; W.

BIOST 538 Statistical Computing (3) Introduction to scientific computing. Includes programming tools, modern programming methodologies, (modularization, object oriented design), design of data structures and algorithms, numerical computing and graphics. Uses C++ for several substantial scientific programming projects. Prerequisite: experience with programming in a high level language. Offered: jointly with STAT 538; W.

BIOST 540 Correlated Data Regression (3) Introduction to regression modeling of longitudinal and clustered data from epidemiology and health sciences. Interpretation and familiarity with available programs gained by analysis of bona fide data; critiques of analyses appearing in literature. Prerequisite: Either BIOST 513, BIOST 515, BIOST 518, BIOST 536, or permission of instructor. Offered: Sp.

BIOST 551 Statistical Genetics II: Quantitative Traits (3) Monks Statistical basis for describing variation in quantitative traits. Use of statistical methods for censored survival data: overdispersion, quasilikelihood, parameters in link and variance functions, exact conditional inference, random effects, saddlepoint approximations. Credit/no credit only. Prerequisite: BIOST 515 and BIOST 517, or equivalent. Offered: jointly with STAT 547; alternate years; Sp.

BIOST 552 Statistical Genetics III: Design and Analysis (3) Witjsman Overview of probability models, inheritance models, penetrance. Association and linkage. The lod score method. Affected sib method: fitting complex inheritance models. Design mapping studies; multipoint, disequilibrium, and fine-scale mapping. Ascertainment. Prerequisite: STAT/BIOST 551; GENET 371; or permission of instructor. Offered: jointly with STAT 552; Sp.

BIOST 573 Statistical Methods for Categorical Data (3) Advanced topics in generalized linear models and the analysis of censored survival data: overdispersion, quasilikelihood, parameters in link and variance functions, exact conditional inference, random effects, saddlepoint approximations. Credit/no credit only. Prerequisite: BIOST 571 and STAT 582. Offered: jointly with STAT 573; alternate years; Sp.

BIOST 574 Multivariate Statistical Methods (3) Use of multivariate normal sampling theory, linear transformations of random variables, one- and two-sample tests, profile analysis, partial and multiple correlation, multivariate ANOVA and least squares, discriminant analysis, principal components, factor analysis, robustness, and some special topics. Some computer use included. Prerequisite: BIOST 570 or permission of instructor. Offered: jointly with STAT 574; alternate years.

BIOST 576 Statistical Methods for Survival Data (3) Statistical methods for censored survival data arising from follow-up studies on human or animal populations. Parametric and nonparametric methods, Kaplan-Meier survival curve estimator, comparison of survival curves, log-rank test, regression models including the Cox proportional hazards model, competing risks. Prerequisite: STAT 547 or STAT 548, or equivalent. Offered: jointly with STAT 576.

BIOST 577 Advanced Design and Analysis of Experiments (3) Concepts important in experimental design: randomization, blocking, confounding. Application and analysis of data from randomized blocks designs, Latin and Graeco-Latin squares, incomplete blocks designs, split-plot and repeated measures, factorial and fractional replicates, response surface experiments. Prerequisite: BIOST 570 or STAT 421 (minimum 3.0) or permission of instructor. Offered: jointly with STAT 577.

BIOST 578 Special Topics in Advanced Biostatistics (*, max. 3) Advanced-level topics in biostatistics offered by regular and visiting faculty. Prerequisite: permission of instructor. Offered: jointly with STAT 578; AWSpS.

BIOST 579 Data Analysis and Reporting (2) Analysis of real data to answer practical questions. Common data-analytic problems. Sensible approaches to complex data. Graphical and tabular presentation of results. Writing reports for scientific journals, research
collaborators, consulting clients. Graduate standing in statistics or biostatistics or permission of instructor. Offered: jointly with STAT 578; AWSp.

BIOST 580 Seminar in Biostatistics (*, max. 9) Presentation and discussion of special topics and research results in biostatistics. Speakers include resident faculty, visiting scientists, and advanced graduate students. Offered: AWSp.

BIOST 586 Martingales: Survival Analysis (3) Theory of counting processes and martingales to provide unified study of survival analysis methods. Focus on survival distribution estimators, censored data rank statistics, regression methods with censored survival data. Development of small samples moments, asymptotic distributions, and eficiencies. Prerequisite: STAT 521 or STAT 583 or permission of instructor; recommended: STAT 576. Offered: jointly with STAT 586; alternate years; W.

BIOST 590 Biostatistical Consulting (*) Training in consulting on the biostatistical aspect of research problems arising in the biomedical field. Students, initially under the close supervision of a faculty member, participate in discussions with investigators leading to the design of and/or the analysis of a quantitative investigation of a problem. With experience, independent associations of student and research worker are encouraged, with subsequent review by faculty of resulting design and analysis. Prerequisite: permission of instructor. Offered: AWSpS.

BIOST 593 Cancer Prevention Research Laboratory (3) White Research experience for pre- and postdoctoral students working on cancer prevention projects at the Fred Hutchinson Cancer Research Center. Credit/no credit only. Offered: jointly with EPI 593; AWSpS.

BIOST 595 Biostatistics Master's Practicum (1-12, max. 12) Supervised practice experience providing students an opportunity to learn how biostatistics is applied in a public health setting and in the implementation of public health policy. Prerequisite: 514; 515; 536; 537.

BIOST 596 Techniques of Statistical Consulting (1) Seminar series covering technical and non-technical aspects of statistical consulting, including skills for effective communication with clients, report writing, statistical tips and rules of thumb, issues in survey sampling, and issues in working as a statistician consultant in acadmeic, industrial, and private-practice settings. Prerequisite: entry code. Offered: jointly with STAT 598; ASp.

BIOST 600 Independent Study or Research (*) Offered: AWSpS.

BIOST 700 Master's Thesis (*) Offered: AWSpS.

BIOST 800 Doctoral Dissertation (*) Offered: AWSpS.

Environmental and Occupational Health Sciences

ENV H 111 Exploring Environment and Health Connections (3) I&S Camp. Keifer Introduction to environmental health concepts. Examines current events to illustrate and better appreciate the relationship between environment and health and to explore whether an environmental condition is or is not an important threat to health. Emphasizes the roles of environmental scientists and related professionals. Offered: A.

ENV H 205 Environmental Health in Film (2) I&S Fenske, Luchtel Viewing and discussion of popular films that explore issues in environmental health. After viewing films, a discussion follows focusing on the ethical, legal, social, and scientific issues raised by the films. Intended for UW freshmen and sophomorees from all backgrounds who may have an interest in majoring in Environmental Health. Offered: W.

ENV H 311 Introduction to Environmental Health (3) NW Treser Relationship of people to their environment, how it affects their physical well-being and what they can do to influence the quality of the environment and to enhance the protection of their health. Emphasis on environmental factors involved in transmission of communicable diseases and hazards due to exposure to chemical and physical materials in our environment. Offered: ASp.

ENV H 405 Toxic Chemicals and Human Health (3) Gallagher, Kavanagh Basic principles governing human and/or environmental aspects of toxic chemicals released into the environment; sources, distribution, and fate of toxic chemicals in the environment; chemicals and cancer; chemicals and birth defects; government regulation of chemical hazards. Focus on human health impacts of chemicals found in the workplace and general environment. Prerequisite: 2.0 in BIOL 220; and 2.0 in CHEM 224 or 2.0 in CHEM 239 or 2.0 in CHEM 337. Offered: Sp.

ENV H 417 Non-Ionizing Radiation and Electrical Safety (2) Yost Introduction to health hazards from UV, optical laser hazards, infrared radiation, radio-frequency radiation, heat stress, electrical shock, electric and magnetic fields. Application of current standards for these physical agents. Emphasis on occupational hazards with additional discussion of environmental exposures where appropriate. Offered: odd years; W.

ENV H 431 Environmental and Occupational Sampling and Analysis I (3) NW Fenske, Yost Laboratory and lecture on sampling. Field and laboratory analysis of chemical and physical agents found in the occupational and ambient environments. Prerequisite: CHEM 162; PHYS 116/119; ENV H 311. Offered: A.

ENV H 432 Environmental and Occupational Sampling and Analysis II (4) NW Simpson Laboratory and lecture on sampling. Field and laboratory analysis of chemical and physical agents found in the occupational and ambient environments. Prerequisite: ENV H 431. Offered: W.

ENV H 433 Environmental and Occupational Sampling and Analysis III (4) NW Butterfield, Meschke Laboratory and lecture related to the evaluation of water quality. The identification and analysis of microorganisms in water, food, and air. Prerequisite: ENV H 431; MICROM 301. Offered: Sp.

ENV H 440 Water, Wastewater and Health (3) Butterfield, Meschke Review of water supply, water quality, and wastewater treatment as they relate to human health. Includes water law and regulations, source water protection, basic treatment technologies for water and waste, chemical and microbial contaminants, and recreational water. Prerequisite: ENV H 311. Offered: A.

ENV H 441 Food Protection (3) Easterberg Study of identification and characteristics of chemicals and biological agents implicated in foodborne disease outbreaks and conditions or circumstances by which food contamination occurs. Examination of food protection activities conducted by local and state government at the retail level. Prerequisite: either 2.0 in CHEM 155 or 2.0 in both CHEM 160 and CHEM 161, or 2.0 in CHEM 162; 2.0 in MICROM 302. Offered: W.

ENV H 442 Vector Control (3) Treser Study of the impact and control of rodents and arthropod vectors of disease, including consideration of economic poisons used, their regulation, and safety measures. Prerequisite: 2.0 in BIOL 203. Offered: Sp.

ENV H 445 Solid Waste Management (3) Busch Examination of the public health, environmental, economic, and materials conservation aspects of solid wastes management; amounts and sources of solid wastes, waste reduction and recycling, methods of storage, transportation and disposal, integrated waste management, identification of present problems and future needs. Prerequisite: 2.0 in CHEM 155, 2.0 in CHEM 160, or 2.0 in CHEM 162; either 2.0 in MATH 124, 2.0 in MATH 127, 2.0 in MATH 134, or 2.0 in MATH 144; recommended: PHYS 115. Offered: Sp.

ENV H 446 Hazardous Waste Management (3) Kissel Characterization of hazardous wastes and introduction to pertinent federal and state regulations. Discussion of exposure pathways and description of management options at pre-release, pre-release, and post-release stages. Emphasis on public health significance. Supplemented with case studies. Prerequisite: either 2.0 in CHEM 155, 2.0 in CHEM 160, 2.0 in CHEM 162; either 2.0 in MATH 112, 2.0 in MATH 124, 2.0 in MATH 127, 2.0 in MATH 234, or 2.0 in MATH 144; recommended: MATH 125, CHEM 224, PHYS 115. Offered: W.

ENV H 449 Health Effects of Air Pollution (2) Koenig Structure and function of the respiratory system and the changes that may be produced by specific air pollutants, such as ozone, SO2, and fine particles. Air quality criteria and the economic costs of disease are discussed. Several classroom demonstrations. Offered: even years; W.

ENV H 451 Ecology of Environmentally Transmitted Microbiological Hazards (3) Butterfield, Meschke, Shin Focuses on the transmission of infectious microorganisms by air, food, water, and other environmental media. Provides an introduction to environmentally transmitted pathogens, and discusses factors affecting their environmental fate, transport, and persistence. Offered: A.

ENV H 452 Detection and Control of Environmentally Transmitted Microbiological Hazards (3) Butterfield, Meschke, Shin Focuses on the detection and control of infectious microorganisms in air, food, water, and other environmental media. Provides a discussion on sample collection, processing and detection for infectious microorganisms. Provide coverage of engineered controls and disinfection/decontamination processes for infectious microorganisms. Recommended: ENV H 451. Offered: W.
ENV H 453 Industrial Hygiene (3) Morgan
Introduction to the principles and scientific foundation of industrial hygiene. Examines the anticipation, recognition, evaluation, and control of work place hazards to health and safety. Focuses on the first three functions, but includes some consideration of control methods. Prerequisites: either BIOL 200 or BIOL 202; CHEM 224; either PHYH 116 or PHYH 123. Offered: A.

ENV H 457 Industrial and Environmental Noise (3) Neitzel, Seixas
Survey of industrial and community noise problems, including sources, effects, measurement, control, and legislation. Prerequisite: 2.0 in PHYH 115. Offered: Even years, Sp.

ENV H 461 Air Pollution Control (4) Pilat
Fundamental concepts of air pollution. Emission sources, atmospheric dispersion, ambient concentrations, adverse effects, governmental regulations, emission standards, air-quality standards, processes and equipment for controlling emissions. Offered: jointly with CEE 490; A,Sp.

ENV H 470 Environmental Health Practice: Administration and Management (2) Osaki, Treser
Explores selected aspects of the management of environmental health programs in the community, including organization theory and practice, budgeting, personnel management, program planning and evaluation, and community relations. Prerequisite: ENV H 482. Offered: A.

ENV H 471 Environmental Health Regulation (3) Treser
Introduction to administrative regulation and process. Authority, jurisdiction, and structure of environmental health control programs and agencies; the regulatory process; agency acquisition and retention of information; administrative actions; enforcement of environmental health laws; major statutes and cases affecting programs. Prerequisite: ENV H 482. Offered: W.

ENV H 472 Environmental Risk and Society (3) Fenske
Examines scientific determinations of environmental risks and explores how such determinations are evaluated by affected communities and society. Employs risk analysis to integrate technical knowledge in hazard identification and exposure assessment to provide a more rational basis for environmental policies. Role of public participation in risk-based decision making discussed. Offered: A.

ENV H 480 Environmental Health Problems (*, max. 6) Treser
Individual projects involving library, laboratory, or field study of a specific environmental health problem. Offered: AWSpS.

ENV H 482 Environmental Health Internship (2-15, max. 15) Treser
Assignment to an environmental health or environmental protection agency for supervised observation and experience in environmental health technology, program planning and utilization of community resources. Prerequisite: 2.5 in ENV H 311. Credit/no credit only. Offered: AWSpS.

ENV H 490 Community Air Pollution (3) NW Liu
Fundamental concepts of ambient and indoor air pollution, focusing on quality issues affecting public health. Discusses sources of air pollution, building dynamics, microenvironments and activity patterns, biological air contaminants, community air pollution issues, management strategies, and monitoring and modeling skills. Offered: Sp.

ENV H 497 Environmental Health Special Electives (*) Offered: AWSpS.

ENV H 499 Graduate Research (*)
Individual research on a specific topic in environmental health upon which specific conclusions, judgments, or evaluation can be made or upon which facts can be presented. Offered: AWSpS.

ENV H 511 Environmental and Occupational Health (1-3, max. 3) Danieli
Effects of exposure to chemical, physical, and biological agents, embracing the community and workplace environments. Current issues, using specific cases from recent literature as basis for classroom discussion and written assignments. Offered: W.

ENV H 512 Waste Management, Recycling, and Pollution Control (3) De Walle Survey of selected technological components of environmental health infrastructure via lecture and weekly field trips to full facilities. Sites visited vary each year, but may include paper and steel plants, using reclaimed biomass. Cement kiln using waste as supplemental fuel, municipal wastewater treatment facility, and steam generation plant.

ENV H 513 Basic Concepts in Pharmacogenetics and Toxicogenomics (3) Eaton, Thummel
Addresses current DNA sequencing and genotyping approaches, and basic concepts of pharmacogenetics and toxicogenomics. Emphasis placed on applications of genomic technologies to the understanding of "gene-environment interactions" that cause diseases of public health importance, including cancer, chronic neurological diseases, and adverse drug reactions. Prerequisite: GENET 372 or equivalent. Offered: jointly with ENV H/PCIEUT 513.

ENV H 514 Environmental and Occupational Toxicology I (3) Xia
Major topical areas in human and environmental toxicology, including the biochemical, cellular, and physiological mechanisms by which chemicals produce toxic responses; the toxicology of the major classes of chemicals; principles of toxicity testing; interpretation of toxicological data. Prerequisite: BIOL 212, BIOG 440, or permission of instructor. Offered: A.

ENV H 515 Environmental and Occupational Toxicology II (3) Luchtel
Major topical areas in human and environmental toxicology, including the biochemical, cellular, and physiological mechanisms by which chemicals produce toxic responses; the toxicology of the major classes of chemicals; principles of toxicity testing; interpretation of toxicological data. Prerequisite: BIOL 212, BIOG 440, or permission of instructor. Offered: W.

ENV H 516 Environmental and Occupational Toxicology III (3) Costa
Major topical areas in human and environmental toxicology, including the biochemical, cellular, and physiological mechanisms by which chemicals produce toxic responses; the toxicology of the major classes of chemicals; principles of toxicity testing; interpretation of toxicological data. Prerequisite: BIOL 212, BIOG 440, or permission of instructor. Offered: Sp.

ENV H 517 Children's Environmental Health (3) Burbacher
Discussion of environmental health issues as they pertain to children's health. Includes historical perspective of public health research and policies directed at protecting children's health and emerging scientific and public health issues such as childhood exposure to mercury and pesticides, childhood asthma, cancer, and environmental justice. Offered: Sp.

ENV H 531 Neurotoxicology (3) Coats
Advanced discussions of the principles and methodological approaches to neurotoxicology (including behavioral toxicology), classes of neurotoxic agents, types and mechanisms of neurotoxic effects, as well as the role of neurotoxicology in toxicology and public health. Prerequisite: ENV H 514, ENV H 515, ENV H 516 or ENV H 405 or permission of instructor. Offered: every years; W.

ENV H 532 Reproductive and Developmental Toxicology (2) Faustman
Investigates chemicals that can induce adverse reproductive and developmental outcomes. Discussion topics include identification and characterization of specific classes of toxic agents, mechanisms of action of these agents at the molecular and cellular level, and risk assessment and regulatory issues. Prerequisite: ENV H 514 and ENV H 515 or ENV H 405 or permission of instructor. Offered: every years; S.

ENV H 533 Molecular Toxicology (2) Gallagher
Advanced discussion of mechanisms whereby chemical, physical, and biological agents produce their harmful effects on biological tissues. Prerequisite: permission of instructor. Offered: jointly with PHCOL 533; odd years; W.

ENV H 535 Inhalation Toxicology (3) Koenig, Luchtel
Advanced course on the toxicity of air pollutants and the response of the respiratory system to inhaled gases and particulate toxicants. Issues and concepts covered include biology of the respiratory system, exposure technology, experimental design and methodological issues, health effects of air pollutants, and regulatory aspects. Prerequisite: ENV H 514-516, or ENV H 405 or permission of instructor. Offered: every years; A.

ENV H 537 Introduction to Manufacturing Systems (3) Storch
Description of manufacturing systems. Includes discussion of current trends in manufacturing, especially lean principles. Introduces process flow analysis, manufacturing organizations including job-shop, assembly lines, and group technology, manufacturing inventory philosophies (just-in-time, MRP, OPT), work environment, and work simplification. Offered: jointly with INF H 537; A.

ENV H 541 Ecology of Environmentally Transmitted Microbial Hazards (3) Focuses on the transmission of infectious microorganisms by air, food, water, and other environmental media. Provides an introduction to environmentally transmitted pathogens, and discusses factors affecting their environmental fate, transport, and persistence. Offered: A.

ENV H 542 Detection and Control of Environmentally Transmitted Microbial Hazards (3) Focuses on the detection and control of infectious microorganisms in air, food, water, and other environmental media. Provides a discussion on sample collection, processing, and diction for infectious microorganisms. Provides coverage of engineered controls and disinfection/decontamination processes for infectious organisms. Offered: W.

ENV H 543 Quantitative Microbial Risk Assessment (3) Focuses on the principles of
ENH 545 Water, Wastewater and Health (4) Butterfield, Mischke Review of water supply, water quality, and water/wastewater treatment as they related to human health. Includes water law and regulations, source water protection, basic treatment technologies for water and waste, chemical and microbial contaminants, and recreational water. Offered: A.

ENH 546 Pesticides and Public Health (3) Fennema, Koller Examines real health risks and benefits associated with pesticide use in the United States and internationally; reviews exposure, toxicity, epidemiology, and regulation of pesticides, focusing on populations such as workers and children; discusses benefits derived from vector control, food production, and food preservation. Offered: odd years; W.

ENH 550 Microscopy: Image Acquisition and Analysis (2) Luchter Sample preparation methods, principles and practical aspects of light microscopy (bright-field, phase, differential interference, polarizing, and confocal), electron microscopy (transmission, scanning, electron diffraction, and energy dispersive x-ray analysis), photographic and digital imaging, computerized image analysis techniques. Student research project required. Prerequisite: permission of instructor.

ENH 552 Environmental Chemistry of Pollution (4) Kalman, Liu Chemical and physical processes determining distribution and fate of chemical hazards, detection of low levels of hazardous compounds, and environmental evaluation and prediction. Fundamental chemical concepts and measurable properties of individual compounds to interpret and relate measured values. Prerequisite: admission to graduate program or permission of instructor. Offered: W.

ENH 553 Instrumental Methods for Industrial Hygiene Measurement: Lecture (3) Morgan Strategy, methods, instrumentation, and theory of atmospheric sampling and analysis, emphasizing evaluation of potential occupational hazards and exposure to chemical agents. Prerequisite: ENH 453 or permission of instructor. Offered: W.

ENH 555 Instrumental Methods for Industrial Hygiene Measurement: Laboratory (3) Monteith, Simpson, Yost Utilizes typical instrumental techniques and analytical methods for the evaluation of potential occupational exposures. Prerequisite: ENH 453 and ENH 553 or permission of instructor. Offered: Sp.

ENH 556 Quantitative Occupational Exposure Analysis (3) Seixas Exploration of industrial hygiene data to understand nature of airborne exposures in the occupational environment, and their interpretation for human health. Focus on reading and discussion of primary exposure assessment literature and statistical analysis of real dataset. Prerequisite: one quarter of statistics or biostatistics and basic industrial hygiene. Offered: W.

ENH 557 Workplace Exposure Controls (4) Yost Principles of engineering controls and protective equipment needed to prevent overexposures to workplace contaminants, including design of industrial ventilation systems, general building ventilation and indoor air quality, respiratory protection, and protective clothing. Offered: even years, W.

ENH 559 Applied Occupational Health and Safety (3) Camp, Johnson Application of occupational safety and health principles. Student teams research real safety and health problems, assess production processes/techniques and exposures, health and safety procedures and programs, and develop engineering and administrative controls. Students perform on a consulting project with a local company including budgeting, project reporting, and presentation. Offered jointly with IND E 567 and NSG 505. Offered: Sp.

ENH 560 Organizing and Administering Industrial Safety and Health Programs (4) Gleason Explores industrial organization and methods of integrating safety and industrial hygiene programs with industrial operations. Investigates philosophic issues related to industrial safety and health such as responsibility for safety, dependency on safe practice, and hierarchy of prevention. Contains numerous case problems and student involvement opportunities. Offered: jointly with NSG 506; A.

ENH 562 Technical Aspects of Safety and Health (3) Gleason Explores specific hazards associated with the operations of facilities, as well as hazards common to all industries. Covers machine guarding, electrical safety, systems safety analysis, materials handling, and working at heights. Offered: jointly with NSG 507; W.

ENH 564 Recognition of Health and Safety Problems in Industry (4) Camp, Seixas Develops skills in occupational health and safety hazard recognition and of important northwest industries. Focuses on process understanding and hazard recognition skills during walk-through inspections of several local facilities, stressing a multidisciplinary approach. Offered: jointly with IND E 566; A.

ENH 565 Occupational Stress and Management (3) Beaton Relations between occupational stressors and worker's health, well-being, productivity, and psychological models of occupational stress. Investigates similarities, differences between job-related stressors and stress responses in various occupations. Explores elements of worksite stress management programs. Prerequisite: graduate standing in nursing or allied health discipline. Offered: jointly with NURS 566; even years; A.

ENH 566 Introduction to Ergonomics (3) Johnson, Stewart Basic principles of ergonomics in work environment applied to problems of worker and management. Topics include measurement of physical work capacity, problems of fatigue and heat stress, applied biomechanics, worker-machine interactions and communication, design of displays and controls. Prerequisite: basic human physiology or permission of instructor. Offered: jointly with IND E 566/NSG 508; W.

ENH 567 Mechanisms of Carcinogenesis (2) Xia Lectures/presentations of biochemical and molecular basis of carcinogenesis induced by environmental agents, including approaches to identification of carcinogens. Role of cell proliferation and cell death (apoptosis) in cancer formation and cancer treatment. Molecular mechanisms that regulate cell proliferation and apoptosis. Prerequisite: ENH 516, ENH 405, or permission of instructor. Offered: jointly with PHCOL 567; even years, A.

ENH 568 Molecular Epidemiology of Infectious Diseases (2) Application of molecular typing techniques to study of microbial pathogens to increase understanding of epidemiology of infectious diseases. Brief review of molecular biology, Evaluation of methods used in outbreaks and epidemics reported in literature. Prerequisite: ENH 511 or ENH 512 or permission of instructor. Offered: jointly with EPI 568/PABIO 568; W.

ENH 569 Occupational Biomechanics (4) Johnson Lectures and laboratories address human occupational biomechanical and physiological limits and measurement, analysis, and modeling techniques that are used by ergonomists for design of safe, healthful, and productive physical work. Prerequisite: ENH 566 or permission of instructor. Offered: jointly with IND E 569; even years, Sp.

ENH 570 Occupational and Environmental Epidemiology (3) Checkoway, Daniel Research in occupational and environmental determinants of disease. Defining exposed populations, characterizing exposure levels, estimating disease risks relative to exposure. Cohort, case-control, cross-sectional designs for various health outcomes. Applications to exposure standard setting and risk assessment. Prerequisite: EPI 511 or EPI 512, EPI 513 or permission of instructor. Offered: jointly with EPI 570; Sp.

ENH 571 Neuroepidemiology and Environmental Risk Factors (3) Focus on neurologic diseases and etiology. Presentation of descriptive epidemiology, clinical features, and risk factors, including stroke, Parkinson's disease, Alzheimer's disease, multiple sclerosis, and other disorders. Discussion of NIH grantsmanship. Guest experts present some topics. Recommended: EPI 511 or equivalent. Offered: jointly with EPI 571; odd years; W.

ENH 572 Clinical Occupational Medicine (2) Stusterman For clinicians in training, comprehensive overview of occupational disease principles, occupational history-taking, and the provider's role in workers' compensation. Epidemiologic evidence and pathophysiologic basis for occupational diseases reviewed, emphasizing organ system approach to diagnosis and management. Prerequisite: occupational medicine or preventive medicine residents/fellows, nursing students, or permission of instructor. Offered: S.

ENH 573 Methods and Issues in Using Biological Measurements in Epidemiologic Research (3) Introduction to use of measurements from biological specimens in epidemiologic studies. Prepares epidemiology and laboratory science students for conduct of interdisciplinary human studies. Evaluation of biomarkers, preliminary studies, methodologic issues, quality control. Brief review of molecular biology. Applications and current literature discussed. Prerequisite: EPI 511 or EPI 512. Offered: jointly with EPI 573; W.

ENH 574 Quantitative Methods for Environmental Exposure Assessment (3) Kisek Examination of probabilistic (in contrast to deterministic) approaches to prediction of human exposure to environmental contaminants including explicit separation of population variability from uncertainty due to ignorance. Discussion of data needs, pitfalls, policy ramifications, and current state of development and regulatory acceptance. Examples from real world. Offered: Sp.
ENV H 577 Risk Assessment for Environmental Health Hazards (3/4) Faustman Examines current theories, methodologies, data, uncertainties, and institutional arrangements for risk assessment. Qualitative and quantitative approaches to identification, characterization, and control of environmental hazards to health emphasized through didactic and case studies. Prerequisite: ENV H 515 and B/OST 511 or permission of instructor. Offered: jointly with CEE 560/PAF 589; A.

ENV H 580 Environmental Health and Occupational Health Sciences Seminar (1, max. 6) Presentation of current environmental and occupational health research and issues. Credit/no credit only. Offered: A/WSpS.

ENV H 581 Environmental Health Reading I (1) Critical reading of selected basic and applied research publications on environmental health problems and programs. Offered: A.

ENV H 582 Environmental Health Reading II (1) Discussion of controversial and current issues facing public health and the environmental health professional.

ENV H 583 Environmental Health Reading III (1) Preparation and presentation of master's thesis proposal. Offered: Sp.

ENV H 584 Occupational Health and Safety: Policy and Politics (3) Camp, Morris Designed to provide a better understanding of the historical, political, and policy issues in occupational health safety through selected readings and discussion with experts in the field. Particular emphasis on the Occupational Safety and Health Act. Students present testimony in a mock congressional hearing on a health and safety issue. Offered: Sp.

ENV H 588 MPH Degree Program Project (*, max. 18) Supervised project work on a topic related to student's concentration in graduate study that results in a paper. Offered: A/WSpS.

ENV H 590 Selected Topics (1-6, max. 6) In-depth study of a current environmental health topic. For more information and permission, consult department program advisor. Offered: A/WSpS.

ENV H 591 Current Topics in Toxicology (1, max. 6) Kavanagh, Xia Provides in-depth examination of current topics in environmental and occupational toxicology taken from recently published journal articles. Consists of presentations led by students, postdoctoral fellows, and faculty. Students expected to participate actively in discussion. Assigned weekly readings given according to the schedule of speakers and topics. Credit/no credit only. Offered: A/WSp.

ENV H 592 Current Topics in Occupational Health Sciences (113) Weekly discussion of current research on a broad range of topics relevant to occupational and environmental health including exposure assessment, occupational epidemiology, occupational hygiene, and control of environmental hazards. Presentation and discussion sessions designed to help students organize and prepare a critical analysis of research findings. Credit/no credit only. Offered: A.

ENV H 593 Current Topics in Risk Assessment (1, max. 6) Faustman Examines current topics in risk assessment and risk communication with a focus on issues in environmental health. Consists of presentations led by students, postdoctoral fellows, and faculty. Students expected to participate actively in discussion. Credit/no credit only. Offered: A/WSp.

ENV H 594 Current Topics in Environmental Health (1, max. 2) Critical review and discussion of current scientific literature of particular relevance to the Environmental Health Program. Primary presentations rotate among faculty and students. Credit/no credit only. Offered: W.

ENV H 595 Research Rotation (3, max. 9) Research laboratory rotation for predoctoral graduate students. Students commit to a laboratory research project aimed at introducing the student to current methods in laboratory research, and to familiarize the student with specific faculty research interests. Prerequisite: graduate standing and permission of program director. Offered: A/WSpS.

ENV H 596 Current Issues in Occupational and Environmental Medicine (2, max. 12) Kaufman Interdisciplinary seminar on current and emerging topics in occupational and environmental health. Faculty- and student-led presentations with an interdisciplinary focus, including occupational hygiene, nursing, and medical issues. Prerequisite: environmental health graduate student, occupational health nursing student, or permission of instructor. Offered: jointly with NURS 580; A/WSpS.

ENV H 599 Field Studies (2-6, max. 6) Assignment to an environmental research or service program to develop field research and evaluation skills. Credit/no credit only. Offered: A/WSpS.

ENV H 600 Independent Study or Research (*) Prerequisite: permission of departmental adviser. Offered: A/WSpS.

ENV H 700 Master's Thesis (*) Prerequisite: permission of departmental adviser. Offered: A/WSpS.

ENV H 800 Doctoral Dissertation (*) Credit/no credit only. Prerequisite: permission of departmental adviser. Offered: A/WSpS.

Epidemiology

Epidemiology

EPI 101 Public Health Issues in the Media (5) I&S DeRoos Reviews epidemiologic studies and popular media to compare original research results with the message disseminated to the public, and to analyze how and why data from public health research can sometimes be misleading to the public.

EPI 420 Introduction to Epidemiology (3) NW Goldberg For the undergraduate student wishing to devote only one quarter to a course in epidemiologic methods. Description of ways in which variation in disease occurrence is documented and how that variation is studied to understand causes of disease. Offered: Sp.

EPI 497 Epidemiology Special Electives (*) Offered: AWSpS.

EPI 499 Undergraduate Research (*) Offered: AWSpS.

EPI 503 Public Health Informatics and Surveillance (3) Covers collection and use of public health surveillance data in formulating policy and managing programs through lectures and real-world interactive exercises. Discusses surveillance for birth defects, environmental exposures, and hospital-acquired infections, and use of tools such as small area analysis and geographic information systems. Offered: jointly with HSERV 503.

EPI 507 HIV and STIs in Women and Children (3) Examines the emerging global public health crisis and the plight of women and children with HIV/STIs. Reviews targeted approaches pertaining to women and children and their vulnerability to HIV/STIs. Prerequisite: EPI 511 or EPI 512-513. Offered: jointly with OB GYN 590; Sp.

EPI 511 Introduction to Epidemiology (3-4, max. 4) Koepsell, Weiss Principles and methods of epidemiology. Covers measures of disease frequency, measures of effect, causal inferences, descriptive epidemiology, study types, misclassification, and effect modification. Designed for students who want to take 513. Prerequisite: prior or concurrent enrollment in BIOST 511 or equivalent. Offered: A.

EPI 512 Epidemiologic Methods I (4) Koepsell, Weiss Principles and methods of epidemiology. Covers measures of disease frequency, measures of effect, causal inferences, descriptive epidemiology, study types, misclassification, and effect modification. Designed for students who want to take 513. Prerequisite: prior or concurrent enrollment in BIOST 511 or equivalent. Offered: A.

EPI 513 Epidemiologic Methods II (4) Koepsell, Weiss Continuation of 512. Considers how designs of epidemiologic studies may be constructed to maximize etiologic inferences. Covers confounding, randomized trials, cohort studies, case-control studies, and selected topics. Prerequisite: EPI 512. Offered: W.

EPI 514 Application of Epidemiologic Methods (4) Hawes, Mueller, Schiff Practical experience in analysis of data. Students analyze data sets currently on file using contemporary epidemiologic methods as taught in 512 and 513. Prerequisite: EPI 510 or experience in statistical programming; EPI 512, EPI 513 and epidemiology major. Offered: Sp.

EPI 515 Topics in Epidemiologic Methods (3) Introduces advanced methodologic methods, including recursive partitioning, developing
clinical prediction rules, analyses of community-level associations or interventions, case-crossover and case-only designs, propensity scores, two-stage sampling, and missing data imputation. Prerequisite: EPI 512; EPI 513. Offered: jointly with BIOST 519; A; odd years.

EPI 516 Statistical Methods in Genetic Epidemiology (3) Monks Theory and application of statistical techniques used in genetic epidemiology. Includes discussion of association studies, linkage and segregation analyses. Examples stressed with reference to assumptions and limitations. Prerequisite: either BIOST 513 or BIOST 518; PHG 511/EPI 517; or permission of instructor. Offered: jointly with BIOST 516/PHG 519.

EPI 517 Genetic Epidemiology (3) Austin Research methods for evaluating genetic influences on disease and risk factors and genetic-environmental interactions. Study designs and statistical methods include twin studies, family studies, population-based association studies, segregation analysis, and linkage analysis. Prerequisite: EPI 511, BIOST 511, and GENET 371, or equivalent. Offered: jointly with PHG 511.

EPI 518 Computer Demonstrations in Genetic Epidemiology (2-4, max. 4) Edward Demonstrate and use of computer programs designed specifically for analysis of genetic epidemiologic data, including heritability, segregation, and sib-pair linkage analysis. Discussions focus on interpretation of results. Laboratory sections apply methods to data provided by instructor. Corequisite: EPI 517/PHG 511 or permission of instructor. Offered: jointly with PHG 518.

EPI 519 Epidemiology of Cardiovascular Disease (3) Psaty, Siscovick Principles, methods, and issues in the epidemiology of cardiovascular disease. Focuses on coronary heart disease and its major risk factors; also covers other topics such as stroke and sudden death. The format includes informal lectures and discussions of the current literature. Prerequisite: EPI 511 or EPI 512, EPI 513. Offered: A.

EPI 520 Epidemiology of Infectious Diseases (3) Marshall Infectious diseases from a public health perspective. Topics include analytic methods, study design, outbreak investigations, surveillance, vaccine evaluations, global eradication, screening, modeling, and infectious causes of chronic diseases. Homework and discussion based on current examples from the published literature. Prerequisite: EPI 511, EPI 512, or permission of instructor. Offered: W.

EPI 521 Epidemiology of Maternal and Child Health Problems (3-4, max. 4) Schiff, Williams Contributions to understanding and prevention of major maternal and child health problems, including pregnancy outcome, infant and child morbidity and mortality, maternal morbidity and mortality, abnormal child growth and development, and early-life factors in adult health problems. Prerequisite: graduate, medical, or dental school standing and EPI 511 or EPI 512 or permission of instructor. Offered: jointly with HSERV 542; W.

EPI 522 Reproductive Epidemiology (3) Holt Focuses on conditions and diseases of the female reproductive system, as well as pregnancy outcomes other than birth. Presentation of current epidemiologic knowledge and discussion of issues on topics including contraception; infertility; spontaneous abortion; induced abortion; breast, uterine, and ovarian disease; and menopause. Prerequisite: EPI 511 or EPI 512-513. Offered: odd years; Sp.

EPI 523 Injury Epidemiology (3) Discussion of research methods which are useful in studying the causes of injury and outcomes after injury. Information regarding the impact of injuries on health and known or suspected risk factors for some injuries. Assigned readings from literature in the field. Prerequisite: EPI 511 or EPI 512 or permission of instructor. Offered: Sp.

EPI 524 Epidemiologic Studies of Cancer Etiology and Prevention (3/4) Deroos, Li Current knowledge of the role of environmental factors (e.g., smoking, hormonal, nutrition, vial, radiation) and genetic susceptibility in the etiology of several major cancers. Illustrates principles and conduct of research in cancer etiology and cancer prevention. Prerequisite: EPI 511 or EPI 513. Offered: W.

EPI 526 Epidemiology of Diseases Communicable from Nature (3) D’Agostino, Rausch, Weinberg Epidemiologic health aspects of zoonotic diseases, their epidemiology and approaches to control. Focuses on the major viral, rickettsial, bacterial, protozoal, helminthic, and fungal diseases transmitted from wild and domesticated animals. Prerequisite: EPI 511, EPI 512, or EPI 520 or permission of instructor. Offered: jointly with C MED 526; Sp.

EPI 528 Exposure Measurement in Epidemiology (3) White Principles and methods of measuring exposures and covariates in epidemiological studies. Validity and reliability of measures, questionnaire design, effects of measurement error, maximizing response rates, quality-control procedures, measurement of specific exposures. Credit/no credit only. Prerequisite: EPI 513. Offered: Sp.

EPI 529 Emerging Infections of International Public Health Importance (3-, max. 3) Kimball Overview of current emerging infections worldwide and contributing factors. Design of a surveillance and prevention strategy required. Offered: jointly with PHG 518, in residence, even years; online, odd years; W.

EPI 530 AIDS: A Multidisciplinary Approach (2) Fanghans Comprehensive overview of the public health, clinical, and laboratory aspects of human immunodeficiency virus (HIV) infection and disease. Topics include the pathogenesis, natural history, and management of HIV infections. The impact of HIV/AIDS on community and global health care and prospects for prevention and control. Credit/no credit only. Offered: jointly with MED 530; A.

EPI 531 Problems in International Health (4) Gloyd Explores social, political, economic, environmental determinants of developing countries’ health; traces development of societal responses to problems. Includes: origins of primary health care; child survival; traditional systems; population; water; sanitation; international agencies; impact of economic policies. Case study formulating pharmaceutical policy in developing country. Offered: jointly with HSERV 531; A.

EPI 532 Epidemiology of Infectious Diseases in Resource-Limited Countries (3) McLellan A review of major infectious diseases problems of the developing world, including AIDS, malaria, tuberculosis, measles, and diarrhoea, with an emphasis on public health control strategies.

EPI 533 Pharmacoepidemiology (3) Heckbert, Johnson Overview of pharmacoepidemiology including drug development and an application of epidemiologic methods to study drug safety and effectiveness; exploration of the interplay between research and public policy; introduction to resources for information about drugs; introduction to pharmacoepidemiology principles pertinent to pharmacoepidemiology. Prerequisite: health sciences graduate student or with permission. Offered: jointly with PHARM 533; even years; Sp.

EPI 534 Principles of Publishing Clinical Evidence (2) Johnson, Olson Expands advanced methodologic principles for improving the clarity of published clinical evidence. Students prepare and revise a 1000-word research letter for The Lancet using their own clinical evidence. Credit/no credit only. Prerequisite: permission of instructor. Offered: jointly with PHARM 536; Sp.

EPI 536 Categorical Data Analysis in Epidemiology (4) Summary of univariate categorical data analysis; introduction to multivariate analysis of categorical epidemiologic data using multiplicative models. Experience at interpretation; familiarity with available programs gained by analysis of bona fide data, critiques of analyses appearing in literature. Prerequisite: BIOST 515; EPI 513 and either BIOST 513 or BIOST 518; or permission of instructor. Offered: jointly with BIOST 536; A.

EPI 537 Survival Data Analysis in Epidemiology (4) Introduction to the multivariate analysis of survival data using multiplicative models. Application to epidemiologic studies. Familiarity with interpretation and available computer programs gained by analysis of bona fide sets of data and critiques of analyses appearing in the literature. Prerequisite: EPI 536 or permission of instructor. Offered: jointly with BIOST 537; W.

EPI 538 Nutritional Epidemiology (3) Beresford, Drzewinski Application of epide- moilogical methods to current studies of diet, nutrition, and chronic disease. A discussion of current issues and controversies enable students to plan studies in nutritional epidemiology and disease prevention. Prerequisite: EPI 511 or EPI 512 or permission of instructor. Offered: jointly with NUTR 538; A.

EPI 539 Research Methods in Developing Countries (3/4) Gloyd, Mock Simple, practical methodologies to obtain and validate information regarding health status and health services in developing countries. Usefulness, validity, limitation of vital records, health reports, household (and cluster) surveys, nutritional anthropology, and qualitative methods discussed. Lectures, computer lab, and student participation in community-based survey. Offered: jointly with HSERV 539; W.

EPI 540 Introduction to Cancer Biology (3) Ulrich Provides a general understanding of cancer biology, covering the carcinogenic process and various biological causes of cancer. Integrates knowledge from different fields of cancer research, guiding students through diverse literature on cancer and carcinogenesis. Prerequisite: GENOME 372, or permission of instructor. Offered: even years; Sp.

EPI 542 Clinical Epidemiology (2) Weiss Principles and methods involved in studying outcome of illness. Prerequisite: EPI 511, or EPI 512 and EPI 513. Offered: S.
EPI 544 Maternal and Child Health in Developing Countries (3) Mercer Emphasizes critical health problems of women and children in developing countries in social, economic, and cultural contexts. Practical approaches to developing MCH programs shared via lecture/ discussions, exercises, and small group work. Students acquire skills in baseline assessment, setting objectives, planning and evaluating interventions, and involving communities. Offered: jointly with HSERV 544; Sp.

EPI 546 Psychosocial Epidemiology (3) Vander Stoop Application of epidemiological methods to the study of mental illnesses. Topics include occurrence and distribution of mental illness, classification of psychiatric disorders; treatment-based vs. community-based studies; epidemiology of depression and schizophrenia; familial transmission; developmental epidemiology; mental illness and violence. Prerequisite: one course in epidemiology or permission of instructor. Offered: jointly with PBSCI 546; Sp.

EPI 548 Social Determinants of Health Research (3) Bereford, Smith Explores study design, measurement and analytic issues applicable to research into the social determinants of health. Semi-weekly graduate-level seminar offered to students with a basic knowledge of epidemiological and biostatistical principles. Prerequisite: either EPI 511 or EPI 512/EPI 513; BIOST 511/BIOST 512 or BIOST 517/BIOST 518. Offered: jointly with HSERV 548; W.

EPI 549 Sociobehavioral and Prevention Research Methods for HIV and STI (3) Kurth Focuses on prevention methods for controlling HIV/STI epidemics, including the use of alternative behavioral models to study the prevention continua of disease and population-level changes in HIV/STI risk behaviors. Students are expected to develop and present a research proposal. Offered: jointly with NMETH 515; Sp.

EPI 568 Molecular Epidemiology of Infectious Diseases (2) DiGiacomo, Samadpour, Roberts Application of molecular typing techniques to study of microbial pathogens to increase understanding of epidemiology of infectious diseases. Brief review of molecular biology. Evaluation of methods used in outbreaks and epidemics reported in literature. Prerequisite: EPI 511 or EPI 512 or permission of instructor. Offered: jointly with ENV H 568/PABIO 568. Offered: W.

EPI 570 Occupational and Environmental Epidemiology (3) Checkoway Research methods for studying occupational and environmental determinants of disease. Defining exposed populations, characterizing exposure levels, estimating disease risks relative to exposure. Cohort, case-control, cross-sectional designs for various health outcomes. Application of molecular typing techniques to study of microbial pathogens to increase understanding of epidemiology of infectious diseases. Brief review of molecular biology. Evaluation of methods used in outbreaks and epidemics reported in literature. Prerequisite: EPI 511 or EPI 512, EPI 513 or permission of instructor. Offered: jointly with ENV H 570; Sp.

EPI 571 Neuroepidemiology and Environmental Risk Factors (3) Kukul Focus on neurologic diseases and etiology. Presentation of descriptive epidemiology, clinical features, and risk factors, including stroke, Parkinson's disease, Alzheimer's disease, multiple sclerosis, and other disorders. Discussion of NIH grantmanship. Guest experts present some topics. Recommended: EPI 511 or equivalent. Offered: jointly with ENV H 571; odd years; W.

EPI 581 Methods in Epidemiologic Research (3) Shift Focuses on broad concepts including a conceptual model, surveillance, research methods, control and prevention of injuries. Topics include unintentional injuries from motor vehicle crashes, falls, drowning, sports injuries and intentional injuries from youth violence, intimate partner violence, homicide and suicide. Recommended: EPI 511. Offered: A.

EPI 588 Preparing and Writing Research Proposals (2) Kristal, Reiber Experience in preparing, organizing, and writing research proposals, following NIH and AHRQ guidelines. Includes weekly assignments and didactic exercises, leading to final research proposal. All students participate in mock study section to review and critique proposals. Credit/no credit only. Prerequisite: second-year graduate student (PhD recommended), or PhD or MD in health-related field. Offered: odd years; A.

EPI 589 Epidemiologic Research in Aging Populations (3) LaCroix Explores application of epidemiological methods to the study of older populations. Topics include: compression of morbidity; successful aging; methodological challenges in studying older populations; physical, cognitive and social function as epidemiologic endpoints; chronic conditions of the aging (heart disease, cancer, Alzheimer's disease, dementia, osteoporosis, fractures) and health promotion strategies. Prerequisite: EPI 511 or EPI 513. Offered: jointly with HSERV 589.

EPI 590 Selected Topics in Epidemiology or International Health (1-6, max. 6) Tutorials are arranged for a small number of students for in-depth examination of an area of epidemiology or international health, usually of current nature. Seminar format. Prerequisite: EPI 511. Also a special summer format presenting introductory material. May be offered with ENV H 590 and/or HSERV 590. For more information and permission, consult the department program adviser. Offered: AWSpS.

EPI 591 Current Literature in Epidemiology (1) Articles pertaining to epidemiology and related subjects selected from the current literature to be distributed by all participants. Faculty members and enrolled students alternate being responsible for conducting sessions and choosing articles to read. Credit/no credit only. Prerequisite: EPI 513. Offered: EPI 591.

EPI 592 Program Seminars (1-6, max. 6) Graduate seminars organized to address specific educational needs of students in various specialized programs within the Department of Epidemiology (i.e., Maternal and Child Health). Prerequisite: permission of instructor. Offered: AWSpS.

EPI 593 Methods of and Issues in Using Biological Measurements in Epidemiologic Research (3) Schwartz Introduction to use of measurements from biological specimens in epidemiologic studies. Prepares epidemiology and laboratory science students for conduct of interdisciplinary human studies. Evaluation of biomarkers, preliminary studies, methodologic issues, quality control. Brief review of molecular biology. Applications and current literature discussed. Prerequisite: EPI 511 or EPI 512. Offered: jointly with BIOST 593; AWSpS.

EPI 595 Epidemiology Master's Practicum (1-6, max. 6) Supervised practice experience providing students an opportunity to learn how epidemiology is applied in a public health setting and in the formulation and application of public health policy. Credit/no credit only. Prerequisite: EPI 512 and BIOST 511 or equivalent and permission of instructor. Offered: AWSpS.

EPI 600 Independent Study or Research (*) Credit/no credit only. Prerequisite: permission of departmental adviser and independent study supervisor. Offered: AWSpS.

EPI 700 Master's Thesis (*) Credit/no credit only. Prerequisite: permission of thesis chair. Offered: AWSpS.

EPI 800 Doctoral Dissertation (*) Credit/no credit only. Prerequisite: permission of dissertation chair. Offered: AWSpS.

Public Health Genetics

PHG 509 Multidisciplinary Communication in Public Health Genetics (2) Watts Focuses on effective communication in a multi-disciplinary context. Students will read and critique published public health genetics literature and learn to apply principles of effective written and oral communication to public health genetics topics of their choice. Credit/no credit only. Offered: jointly with HSERV 509.

PHG 510 Genetic Principles for Public Health (3) Austin, Doyle, Leboeuf Basic principles of human genetics in a public health context; the molecular components of life, organization of the genome, gene expression, recombinant DNA technology, gene regulation, Mendelian inheritance, quantitative genetics, nutrition and gene expression, mitochondrial inheritance, gene mapping, gene-environment interactions, Human Genome Project, and genetic service in public health.

PHG 511 Genetic Epidemiology (3) Austin, Edwards Research methods for evaluating genetic influences on disease and risk factors and genetic-environmental interactions. Study designs and statistical methods include twin studies, family studies, population-based association studies, segregation analysis, linkage analysis. Prerequisite: EPI 511, BIOST 511, and GENET 371, or equivalent. Offered: jointly with EPI 517.

PHG 512 Legal, Ethical, and Social Issues in Public Health Genetics (3) Kuszier, Mastroianni Equips the student to anticipate and assess potential legal, ethical, and social barriers complicating the incursion of new genetic advances, information, and technologies into public and private health care delivery efforts. Prerequisite: GENET 371 or equivalent. Offered: jointly with LAW H 504/MHE 514.

PHG 513 Basic Concepts in Pharmacogenetics and Toxicogenomics (3) Eaton, Thummel Addresses current DNA sequencing and genotyping approaches, and fundamental concepts of pharmacogenetics and toxicogenomics. Emphasis placed on applications of genomic
PHG 532 Statistical Methods in Medical Genetics (2-4, max. 4) Edwards Demonstrations and use of computer programs designed specifically for analysis of genetic epidemiologic data, including heritability, segregation, and sib-pair linkage analysis. Discussions focus on interpretation of results. Laboratory sections apply methods to data provided by instructor. Corequisite: EPI 517/PHG 511 or permission of instructor. Offered: jointly with EPI 518.

PHG 519 Statistical Methods in Genetic Epidemiology (3) Theory and application of statistical techniques used in genetic epidemiology. Includes discussion of association studies, linkages and segregation analyses. Examples stressed with reference to assumptions and limitations. Prerequisite: either BIOST 513 or BIOST 518; PHG 511/EPI 517; or permission of instructor. Offered: jointly with BIOST/EPI 516.

PHG 521 Socio-Cultural Perspectives of Public Health Genetics (3) McGrath Examines social and cultural issues of human genome sequencing and control of genetic expression. Attitudes and behaviors toward health, illness, and disability are studied using historical, contemporary, and cross-cultural case study material. Offered: jointly with NURS 582/ANTH 574.

PHG 522 Ethical Frameworks for Public Health Genetics (2) Mastroianni Case-based application of ethical principles in genetic medicine to range of problems arising in genetics practice, policy, research. Examination of traditional problems including eugenics and testing/screening for genetic disease, as well as emerging problems in population and environmental genetics. Prerequisite: LAW E 562/MHE 514/PHG 512 or permission of instructor. Offered: jointly with MHE 516.

PHG 523 Genetics and the Law (2) Kuszler Considers the legal issues arising from new genetic technologies and information. Statutes, regulations, and cases used to demonstrate the constitutional, contract, and tort law implications of genetic knowledge. Statutes, regulations, and cases used to demonstrate the constitutional, contract, and tort law implications of genetic knowledge. Prerequisite: LAW E 562/MHE 514/PHG 512 or permission of instruction. Offered: jointly with LAW H 520.

PHG 525 Public Commentary on Ethical Issues in Health Genetics (3) Explores issues in public health genetics through academic commentary, personal narratives, science fiction, and film using ethical frameworks from narrative ethics, feminist ethics, and principlism. Includes cloning, assisted reproduction, prenatal genetic testing presumptomatic genetic testing, gene therapies, scientific responsibility, and GMOs. Graduate students only. Offered: jointly with MHE 515.

PHG 532 Statistical Methods in Medical Genetics (2) Wijsman Theory and application of statistical techniques used in medical genetics. In-depth discussion of linkage and segregation analysis and ascertainment problems. Applications with stress on inference to assumptions and limitations. Data sets analyzed with current computer programs. Offered: jointly with BIOST/ MED 532.

PHG 537 Pharmacoeconomics, Genetics, and Health Care (2) Ramsey, Veenstra Introduction to outcomes research and economic evaluation related to pharmaceuticals and genetic technologies. Covers cost-effective analysis and quality of life evaluation. Discusses the use of economic evaluation in healthcare to affect policy decisions.

PHG 541 Economic and Policy Issues for Genetic Technologies and Services (3) Ramsey, Watts Introduction to economic evaluation in healthcare. Students learn and apply economic principles to the political and policy issues surrounding genetic technologies and services. Focus on formulation of facts and policy alternatives in several areas of public controversy with regard to genetic testing and treatment.

PHG 542 Genetic Discovery in Medicine and Public Health (3) Burke Addresses the clinical and societal implications of genetic knowledge, with an emphasis on the ethical and policy issues surrounding the use of genetic technology in medicine and public health from 1900 to the present. Offered: jointly with MHE 530; W.

PHG 543 Social and Behavioral Research Methods in Public Health Genetics (3) Bowen, McGrath Provides an overview of social and behavioral research and theory used in the study of public health genetics. Examples are from a range of disciplines, using a variety of methodologies. Prerequisite: graduate standing in Public Health Genetics, or permission of instructor.

PHG 580 Interactive Seminar (1, max. 6) Veenstra Seminar series on topics related to public health genetics, including current bioethical, legal, medical, biotechnology, and public policy issues.

PHG 581 Introduction to Bioinformatics and Genetics Services in Public Health Genetics (1) Austin, Boyle, Rose Introduces the fields of bioinformatics and computer science services related to public health genetics. Credit/no credit only.

PHG 590 Selected Topics in Public Health Genetics (1-4, max. 6) Tutorials are arranged for a small number of students for in-depth examination of an area of public health genetics,usually of a current nature.

PHG 595 Master's Practicum (1-12, max. 12) Supervised practice experience providing students an opportunity to learn how genetics is applied in a public health setting and in the formulation and application of public health policy. Prerequisite: EPI 517/PHG 511, LAW E 562/MHE 514/PHG 512, ENV H/PABI/O/PCEUT/ PHG 513, or permission of instructor.

PHG 600 Independent Study or Research (*) Credit/no credit only.

PHG 700 Master's Thesis (*) Credit/no credit only.

PHG 800 Doctoral Dissertation (*) Credit/no credit only.

Health Services

Health Information Administration

HIA 409 Disease Concepts for Managers (4) Develops a methodology for understanding and communicating dimensions of disease states as all health state that a person might experience. Presents clear, effective ways to describe the diversity of health conditions and focuses on disease from a health information systems perspective. Offered: S.

HIA 410 Introduction to Health Care Systems and Health Data Systems (6) Covers current issues in health care; accreditation, licensure and professional standards; health records analysis, statistics, data linkage, application of professional standards to health records and record management systems; retrieval, tracking and retention systems.

HIA 420 Health Care Computer Systems and Electronic Health Records (5) Current health information systems and the role of health informatics; technology infrastructure and health informatics standards, electronic health records, definitions, functions, issues, and barriers; hospitals, ambulatory care, home health and long-term care and computer applications. Prerequisite: HIA 410; HIA 411.

HIA 421 Health Information Systems Analysis (5) Examines lifestyle systems development process, project management, analysis of health information systems, and user requirements. Prerequisite: HIA 420.

HIA 450 Organizational Theory in Health Facilities and Healthcare Delivery (3) Addresses the organization of healthcare services across the spectrum of healthcare delivery systems – both governmental (federal, state, local) and private. Financing of healthcare services and related policy issues are explored.

HIA 460 Management Project I (3) Explores the development of management skills and competencies.

HIA 462 Management Project II (3) Explores management project using a formal project. Prerequisite: HIA 460.

HIA 470 Legal Concepts for Health Fields (3) Examines principles of law as applied to the health field, with reference to health information management.

HIA 480 Management, Problem-Solving and Decision-Making (4) Provides the tools and experiences useful at a management level for problem-solving and decision-making in health information administration.

HIA 499 Independent Study (2-5)
Health Services
HSERV 475 Perspectives in Medical Anthropology (3) Rhodes Introduction to medical anthropology. Explores the relationship among culture, society, and medicine. Examples from Western medicine as well as from other medical systems, incorporating both interpretive and critical approaches. Offered: jointly with ANTH 475.

HSERV 480 Issues in Public Health (1-3, max. 6) Bezruchka, Sappington, Wing Problems and issues in health services delivery and administration, environmental health, pathobiology, biostatistics, and related fields. Offered: W.

HSERV 481 Issues in Public Health (2) Bekemeier Introduction to public health taking an in-depth look at local public health practice. Focuses on practical solutions for real-life problems in local public health settings. Uses modified problem-based learning (PBL) format. Framework is 10 Essential Public Health Services. Student groups prepare for and explore new issues. Offered: W.

HSERV 482 The Health of Populations (2) Bezruchka Explores what makes a population health or unhealthy. Examines why the USA is less healthy than all the other rich countries, despite being one of the healthiest fifty years ago. Offered: Sp.

HSERV 490 Undergraduate Special Topics (1-6, max. 12) Collect and analyze literature related to historical and current public health issues, problems and programs; analyze information and develop written summaries to demonstrate increased knowledge and competencies as applied to public health. Prerequisite: HSERV 480.

HSERV 499 Independent Study in Health Services (1-12, max. 12) Individual library or field study project selected in consultation with a faculty adviser. Offered: jointly with EPI 501; Sp.

HSERV 501 Public Health Practice at the Local Level (3) Thompson Basic overview of state and local public health practice with leaders in the field and case studies focusing on rural and urban public health challenges. Offers preparation for practice in public health agencies. Prerequisite: HSERV 511 or permission of instructor. Offered: jointly with EPI 501; Sp.

HSERV 503 Public Health Informatics and Surveillance (3) Covers collection and use of public health surveillance data in formulating policy and managing programs through lectures and real-world interactive exercises. Discusses surveillance for birth defects, environmental exposures, and hospital-acquired infections, and use of tools such as small area analysis and geographic information systems. Offered: jointly with EPI 503.

HSERV 504 Health Communication ([1-3], max. 3) Downer Overview of the theory and practice of designing, producing, and evaluating public health communication campaigns, including the use of mass media. Develops greater capacity for critical judgment about the use of communication strategies for achieving public health goals.

HSERV 505 Topics in Preventive Medicine (2) Discusses current scientific knowledge and state of the art of preventive medical interventions. Discusses and considers options for current practice. Recommended for MDs, RNs, and others with a clinical background. Credit/no credit only. Offered: jointly with EPI 525.

HSERV 507 Communication for Health Promotion: Theory and Application (3) Meischke Discusses and evaluates health communications theories and applications at the individual level (i.e., persuasion), interpersonal level (i.e. doctor/patient communication), and societal level (i.e., mass media). Investigates intercultural communication cutting across all levels of health communication. Examines the steps involved in the design of a health communication intervention.

HSERV 508 Dynamics of Community Health Practice (3-5, max. 5) Chrisman Examination of and experience with basic principles of clinical practice in community settings. Includes family as community constituent, populations at risk, community assessment, and community development. Prerequisite: Graduate standing or permission of course faculty. Offered: jointly with NURS 560.

HSERV 509 Multidisciplinary Communication in Public Health Genetics (2) Watts Focuses on effective communication in a multi-disciplinary context. Students will read and critique published public health genetics literature, and learn and apply principles of effective written and oral communication to public health genetics topics of their choice. Credit/no credit only. Offered: jointly with PHG 509.

HSERV 510 Society and Health (3) Spigner Analysis of social inequalities in health and service use by age, gender, and the social construction of race. Examines biological, cultural, social, political, and economic determinants which consistently put certain minority groups within Eurocentric societies at higher risk for inequitable health status and provision. Prerequisite: HSERV 511 or equivalent or permission of instructor.

HSERV 511 Introduction to Health Services and Public Health (3-4) Thompson History, organization, and effectiveness of United States health care and public health systems. Determinants of health, need, and utilization. Public and nonprofit perspectives; supply and provision of personal and public health services. Managed care. Government and private sector roles. Prerequisite: graduate standing or permission of instructor.

HSERV 512 U.S. Health and Health Care: Organization, Financing, and Delivery (3) Dowling, Wickizer Students review and examine selected topics from literature. Includes: need and access to care; theory and effects of health insurance; private and public insurance programs; managed care; costs/expenditures; availability and organization of health resources; and quality assessment and improvement. Enrollment priority for Health Services PhD students. Prerequisite: HSERV 511. Offered: A.

HSERV 513 U.S. Health and Health Care: Population Health, Social Determinants, and Health Disparities (3) Patrick Explores the elements and actions of a population health approach, including conceptualizing the determinants of health, synthesizing knowledge about major social determinants, and applying knowledge to improve population health and reduce health disparities. Enrollment priority for Health Services PhD students. Prerequisite: HSERV 511, and permission of instructor; recommended: HSERV 512. Offered: W.

HSERV 516 Introduction to Health Services — Extended Degree (4) Wickizer Provides overview of health care system, exposes students to current issues and developments affecting organization and delivery of health services, helps students develop ability to frame and analyze questions and issues related to health services. Prerequisite: registration in Extended Degree program. Offered: A.

HSERV 517 Provision of Health Services — Extended Degree (2) Baessler Builds on material covered in 516 and provides students with tools used to evaluate alternative health delivery systems; exposes students to various international health delivery systems; encourages students to decide how to organize such a system. Prerequisite: HSERV 516, registration in Extended M.P.H. Degree program. Offered: W.

HSERV 518 Social and Ethical Issues (2-4, max. 4) Mastroianni Provides introduction to ethical issues in public health policy and practice. Additional one credit option focuses on health administration/managed care. Coursework designed to train students in basic skills of ethical analysis and increase competency in recognizing, researching, and analyzing issues arising in public health and health services delivery.

HSERV 520 Methods in Applied Community Research ([1-3], max. 3) Astley Skills necessary to conduct orderly investigation of specific problems in preparation for M.P.H. thesis or project. Includes problem identification, posing research questions, literature review, consideration of theoretical/practical context, choosing study design, data collection, protection of human subjects, and recognizing potential errors. Credit/no credit only. Prerequisite: registration in Extended M.P.H. Degree program.

HSERV 522 Health Program Evaluation ([1-4], max. 4) Grumbkowski, Pollock, theory, methods of evaluation, from simple health programs to evaluation of large-scale interventions. Emphasizes experimental and quasi-experimental designs to estimate program impacts, as well as recognizing potential errors. Credit/no credit only. Prerequisite: background in introductory statistics.

HSERV 523 Advanced Health Services Research Methods I (4) Diehr, Maciejewski Examines how to apply research methods and addresses recurring issues in health services research. Covers statistical theory that motivates the methods and empirical work that demonstrates a method's use. Enrollment priority for Health Services PhD students. Prerequisite: either HSERV 511, BIOST 515/521/513, BIOST 517/518, or EPI 511/512, and permission of instructor. Offered: A.

HSERV 524 Advanced Health Services Research Methods II (4) Zimmerman
Emphasizes the application of advanced biostatistical/epidemiologic techniques in applied research. Examines a wide variety of posed research questions and demonstrates how to best obtain answers. Enrollment priority for Health Services PhD students. Prerequisite: either HSERV 511, BIOST 511/512/513, BIOST 517/518, or EPI 511/512, and permission of instructor. Offered: W.

HSERV 525 Advanced Health Services Research Methods (4) Sales Introduction to methods of handling data and conducting basic analyses in the broad and heterogeneous field of health services research. Examines concepts and conduct hands-on research using large, public use data. Enrollment priority for Health Services PhD students. Prerequisite: either HSERV 511, BIOST 511/512/513, BIOST 517/518, or EPI 511/512, and permission of instructor. Offered: Sp.

HSERV 527 Survey Research Methods (4) Martin Provides students with skills in questionnaire design and survey methods. Develop a questionnaire and design a survey research proposal in a health-related or social topic. Prerequisite: either HSERV 511-513; BIOST 517–518; or EPI 512-513, which may be taken concurrently or permission of instructor is required, and students should have a survey project in mind. Offered: jointly with CS&SS 527.

HSERV 526 Qualitative Research Methods for Public Health (4) Bezruckha Covers a range of qualitative, ethnographic tools for practical applications in public health. Methods covered include direct observation, informant interviews, focus groups, and formal methods. Covers Rapid Assessment Procedures and Participatory Action Research. Student teams investigate research questions using these techniques. Offered: Sp.

HSERV 528 Critically Appraising and Applying Evidence in Health Care (3) Pinsky, Wolf Literature appraisal skills for various articles (therapy effectiveness, diagnostic tests, literature reviews, clinical measurement, prognosis, quality of care, decision analysis, causation/etiology, guidelines, and economic evaluation). Appraisal of clinical information from literature, strengths/weaknesses of data, analyses, study design/applicability to a current patient’s problem. Prerequisite: permission of instructor. Offered: jointly with MEDED 540; W.

HSERV 529 Introduction to Systematic Reviews and Meta-analysis of Evidence (2) Wolf Conceptual understanding of the quantitative methods used to synthesize evidence. Methods for pooling evidence across independent studies, pooling binary/continuous outcomes, differences between fixed and random effects models, and guidelines for appraising published systematic reviews/meta-analyses. Prerequisite: introductory-level courses in statistics, epidemiology, or biostatistics. Offered: jointly with MEDED 541; Sp.

HSERV 531 Problems in International Health (4) Gloyd Explores social, political, economic, environmental determinants of developing countries’ health; traces development of societal responses to problems. Includes: origins of primary health care; child survival; traditional systems; population; water; sanitation; international agencies; impact of economic policies. Case study formulating pharmaceutical policy in a developing country. Offered: jointly with EPI 531; A.

HSERV 532 International Health-Introduction and Topics (4-, max. 8) Encourages students to demonstrate their facility with concepts and readings by creating short essays on selected topics. Overview emphasizing assessment, accuracy, policy development, and the future of global health.

HSERV 533 Population, Health, and Development (2) Povey Provides students with an introduction to demographic conditions in Third World countries and an understanding of the consequences of rapid population growth on health and the environment. The context and effectiveness of family planning programs is a major focus.

HSERV 534 Global Population Health and Development (3) Bezruckha Looks at determinants of population health in different countries, to learn about the constraints of typical public health and development paradigms. Topics include colonialism, development and underdevelopment, political economy, culture, health behaviors, hierarchy, health care and medical harm. Prerequisite: experience working in a health program.

HSERV 536 Emerging Infections of International Public Health Importance (3-, max. 3) Kimball Overview of current emerging infections worldwide and contributing factors. Design of a surveillance and prevention strategy required. Offered: jointly with EPI 529; in residence, odd years; online, even years; W.

HSERV 537 Economic Development and Health (1, max. 3) Gish Discusses issues of broad interest in the areas of economics, development, and health. Credit/no credit only. Offered: AWSp.

HSERV 539 Research Methods in Developing Countries (3/4) Gloyd, Mock Simple, practical methodologies to obtain and validate information regarding health status and health services in developing countries. Usefulness, validity, limitation of vital records, health reports, household (and cluster) surveys, nutritional anthropology, and qualitative methods discussed. Lectures, computer lab, and student participation in community-based survey. Offered: jointly with EPI 539; W.

HSERV 540 Nutrition in Developing Countries (3) Bruemmell, Gorstein Introduces issues of nutrition in developing countries, with an emphasis on the control and prevention of undernutrition and micronutrient deficiencies. Offered: jointly with NUTR 555; Sp.

HSERV 541 Topics in Maternal and Child Health I (3-, max. 3) Beil Historic, legislative, organizational, and financial basis of health and social services for families and children in United States. Effects of changing family structure and norms; factors affecting health care needs of specific populations, including racially and ethnically diverse groups; impact of policies/programs on health and well-being of families and children.

HSERV 542 Epidemiology of Maternal and Child Health Problems (3-4), max. 4) Emanuel, Williams Contributions to understanding and prevention of major maternal and child health problems, including pregnancy outcome, infant and child mortality, maternal morbidity and mortality, adolescent child growth and development, and early-life factors in adult health problems. Prerequisite: graduate, medical, or dental school standing and 511 or 512 or permission of instructor. Offered: jointly with EPI 521.

HSERV 543 Topics in Maternal and Child Health III (3) Huebner Provides an overview of contextually based frameworks for understanding growth and development. Identifies and describes the conceptual basis and theory of change that underlie successful preventive intervention efforts to promote the well being of children and reduce common MCH problems.

HSERV 544 Maternal and Child Health in Developing Countries (3) Mercer Emphasizes critical health problems of women and children in developing countries in social, economic, and cultural contexts. Practical approaches to developing MCH programs shared via lecture/discussions, exercises, and small group work. Students acquire skills in baseline assessment, setting objectives, planning and evaluating interventions, and involving communities. Offered: jointly with EPI 544; Sp.

HSERV 548 Social Determinants of Health Research Methods (3) Beresford, Smith Explores study design, measurement and analytic issues applicable to research into the social determinants of health. Semi-weekly graduate-level seminar offered to students with a basic knowledge of epidemiological and biostatistical principles. Prerequisite: either EPI 511 or EPI 512/EPI 513; BIOST 511/BIOST 512 or BIOST 517/BIOST 518. Offered: jointly with EPI 548; W.

HSERV 550 Policy and Economics: Fundamentals and Applications (3) Katz, Watts Explores how values drive the structure of societies, economic systems, public policies, and ultimately, allocation and distribution of resources. Explores how science and community values intertwine in the development of health policy, and how ideology, culture, and history influence structure and change a nation’s health system. Offered: W.

HSERV 551 Health Law (2) Analysis of law, the legal system and current legal problems as they relate to the financing and delivery of health care services. Offered: Sp.

HSERV 552 Health Policy Development (3-, max. 3) Katz. Watts Focuses on development of public policy concerning medical care and public health and the relationship between public decisions and the market place. Using contemporary policy issues as case studies, examines the role science, ideology, culture, and history play in influencing the structure of and changes to a nation’s health system.

HSERV 553 Politics of Health Care (3) Hagens Understanding of health policy making within the context of American politics. Health policy making is examined in light of political leadership, the legislature, the initiative process, rule making, interest groups, and lobbying. Prerequisite: HSERV 551, a basic understanding of the American health care system, or permission of instructor.

HSERV 554 Health Legislation Seminar (1) Beyer, Seib Discussion of current state of health policy, topics with legislative staff and others involved with state health policy. In addition to four sessions on campus, course meets once in Olympia during legislative session. Credit/no credit only.
HSERV 560 Adult Learning: Theory and Practice (3) Downer Designed to help students apply popular education theory and practice to preparation, presentation, and evaluation of health education. Students design, teach, and evaluate four separate teaching sessions (one between each seminar) using theory and principles of Popular Education learned to date. Prerequisite: graduate standing or permission of instructor.

HSERV 561 Introduction to Health Promotion and Planning (3) Downer Overview of behavior change theory and comprehensive approach to planning, implementing, and evaluating health promotion interventions. Links theory to practice. Uses PRECEDE/PROCEED planning model by Green and Kreuter as framework.

HSERV 570 Seminar on Issues in Social Medicine (3) Rhodes Qualitative research organized around selected works in sociology, anthropology, and public health. Readings and discussion of literature, individual class presentations. Addresses fellowship programs and student research projects.

HSERV 571 Cultural Competency for Public Health Practice (1-4, max. 4) Thornton Application of cultural competency to clinical public health, health care management, and health services research when working with culturally diverse populations. Methodological orientation is qualitative, historical, and ethnographic. Lecture, narratives, discussions, guest presentations, film, video. Interdisciplinary perspective appropriate for graduate students in public health, health administration, nursing, social work, and anthropology. Offered: Sp.

HSERV 572 Community Development for Health (4) Hagopian, House Learn the literature, theory, history, and accepted knowledge in the fields of community development, activism, and community organizing within a health systems context. Provides a forum for exploring approaches to community development and organizing. Gain specific skills and master techniques. Offered: W.

HSERV 573 Community Development for Health Seminar (1) Explores the importance of community as a determinant of health, and how public health workers can help strengthen communities. Companion course to HSERV 572. Meets Friday afternoons to hear community organizers and leaders in community development.

HSERV 574 Seminar in Biobehavioral Interventions, Communications, and Cancer Outcomes (3) An intensive, case-focused review of methods for conducting research in cancer prevention and control, covering areas related to epidemiology, genetic epidemiology, clinical trials, and translational research as it applies to cancer. Includes faculty lectures, discussions of new proposals, and trainee presentations of research ideas.

HSERV 575 Cancer Prevention and Control (3) Bowen Provides an overview of research in cancer prevention and control for students training for a career in this field. Students identify major areas of prevention and control research, conduct an analysis of data in cancer prevention and control, and learn to prepare a research project grant. Prerequisite: permission of instructor.

HSERV 576 Health, Culture, and Community (3) A theory and skills class concerning development of personal and organizational cultural competence in community-based participatory research. Core concepts of cultural competence are considered as they are practiced in community settings. Fieldwork required. Offered: jointly with NURS 557.

HSERV 580 Society, Chronic Illness, and Disability (3) Hedrick Definition and assessment of chronic illness, disability, and health status. Analysis of chronic illness and disability using frameworks for function and public health. Dimensions of disablement as they affect provision of health services. Research on effectiveness of services and approaches to improvement. Prerequisite: HSERV 511 or permission of instructor.

HSERV 581 Strategies of Health Promotion (4) Bowen, Drewnowski Assessment of health promotion planning, implementation, and evaluation strategies for their strengths, weaknesses, and effectiveness. Students critique strategies to modify behavioral factors that influence lifestyles of individuals, including decisions influence their reciprocal relationship with environmental factors affecting the health of individuals, organizations, and communities. Offered: jointly with NUTR 581. Prerequisite: HSERV 511.

HSERV 582 Theoretical Perspectives on Health Behavior Change (3-4, max. 4) Meischke Overview of theoretical perspectives in health behavior at the individual, interpersonal, and community level. Focuses on increasing skills in describing, applying, and integrating these frameworks in the design and evaluation of health promotion interventions. Prerequisite: HSERV 511 or permission of instructor.

HSERV 583 Economic Evaluation in Health and Medicine (3) Sullivan, Veenstra Methods and techniques for evaluating costs and cost-effectiveness of health, medical, and pharmacoeutical interventions. Emphasis on economic evaluation, decision analysis, and modeling techniques for resource allocation and decision making. Applications to technology assessment, health policy, and resource allocation. Prerequisite: permission of instructor. Offered: jointly with PHARM 534; A.

HSERV 584 Evaluating Cost and Outcomes in Health and Medicine 2 (3) Patrick, Sullivan, Veenstra Concepts and methods for evaluating cost and outcomes of health and medical interventions with a focus on cost-effectiveness analysis, pharmacoeconomics, health and quality of life assessment, resource allocation, and medical decision-making. Prerequisite: permission of instructor. Offered: jointly with PHARM 535.

HSERV 585 Seminar in Medical Geography (5, max. 10) Intensive research seminar dealing with new and promising research themes in medical geography and public health. Offered: jointly with GEOG 581; A.

HSERV 586 Medical Geography (3) Mayer Geography of disease, consideration to health systems planning, distributions, diffusion models, migration studies. Application of distance, optimal location models to health systems planning; emergency medical services, distribution of health professionals; cultural variations in health behavior. Prerequisite: familiarity with social science research, health-related issues. Offered: jointly with GEOG 580.

HSERV 587 Health Policy Economics (3) Watts Applies economic theory to selected topics in health care, including insurance, industry organization, government regulation, and public health issues. Emphasizes policy implications of these applications.

HSERV 588 Community Approaches to Health Promotion (3) Thompson Provides opportunities to critically examine community-based health promotion interventions and the design, evaluation, and implementation of the issues they raise. A wide range of disciplinary perspectives is presented. Case studies and class projects are designed to give students the skills needed to critically assess community projects around health promotion.

HSERV 589 Epidemiologic Research in Aging Populations (3) LaCroix Emphasizes application of epidemiologic methods to the study of older populations. Topics include: compression of morbidity; successful aging; methodological challenges in studying older populations; physical, cognitive and social function as epidemiologic endpoints; chronic conditions of the aging (heart disease, cancer, Alzheimer’s disease, dementia, osteoporosis, fractures); health promotion strategies. Prerequisite: EPI 511 or EPI 513. Offered: jointly with EPI 589.

HSERV 590 Selected Topics in Health Services (*) By individual arrangement, the student and faculty member(s) develop a program of reading and conference appropriate to the topic selected by the student. The topics chosen will be within the special competence of the faculty participating in the course, in the areas of health-care delivery and health-care administration. Also special summer format presenting introductory material may be taken with ENV H 590 and/or EPI 590. For more information and permission, consult department program adviser.

HSERV 591 Community Oriented Public Health Practice (1-6, max. 42) Seven-quarter integrated sequence covers public health aspects of community assessment, biostatistics, epidemiology, health promotion/disease prevention, behavior change, environmental health, community development, policy development and analysis, and program planning and management. It is taught in a problem-based format. Prerequisite: enrollment in the COPHP program.

HSERV 592 Program Seminars (1-6, max. 6) Graduate seminars organized to address specific educational needs of students in various fellowships, residencies, and other specialized programs within the Department of Health Sciences (i.e., maternal and child health, international health, preventive medicine, social and behavioral sciences). Prerequisite: permission of instructor.

HSERV 595 Practicum/Field Work in Community Medicine (1-12, max. 12) Experience in variable time blocks in community health activities in agencies delivering and planning health services. Sites include neighborhood clinics, health planning offices, medical practice settings, public health agencies, special problem clinics and facilities, environmental programs and services. Prerequisite: master’s student in health services and permission of instructor.

HSERV 598 Extended Degree Program Project Option (*, max. 9) Supervised project work on a
selected topic related to student's concentration in graduate study. Includes survey of literature, development of approach, and written paper on conclusions. Prerequisite: registration in extended MPH degree program and satisfactory completion of the first summer's course work.

HSERV 600 Independent Study or Research (*) Prerequisite: permission of instructor.

HSERV 700 Master's Thesis (*) Prerequisite: permission of instructor.

HSERV 800 Doctoral Dissertation (*).

Health Services Management

HSGMT 501 Epidemiology/Critical Evidence Appraisal (3-4) Kopjar Basic knowledge about methods used in epidemiology and their application to critical appraisal of clinical, epidemiological, and health administration literature for evidence-based management of healthcare organizations, improvement of delivery of health services, and for creating health policies. Offered: W.

HSGMT 502 Evidence-Based Health Care Planning (3-4) Kopjar, Richardson Applies the techniques of statistics, epidemiology, and critical evidence appraisal to the design and evaluation of population-based health care programs. It is the third course in a three-course sequence. Offered: Sp.

HSGMT 512 Introduction to Management in Health Services (3) Dowling Overview of managerial roles, such as supervising and motivating, approaches to organizational and environmental assessment and change, and development of systems analysis skills. For students pursuing careers in research and teaching who are likely to have management responsibilities.

HSGMT 513 Seminar in Healthcare Finance(4) Conrad Focuses on case studies and modern theory in managerial finance relevant to health services. Students prepare group presentations and individual case study analyses of health services finance problems. Builds on accounting and finance principles ACCTG 503 and HSMGMT 571, or the equivalent, are recommended prerequisites, but not required. Offered: Sp.

HSGMT 514 Health Economics (3/4) Wickizer Uses economic concepts and tools to examine range of issues pertaining to health care, delivery of health care services. Includes demand analysis, production of health services, expenditure growth, markets for hospital and physician services, externalities. Emphasis on using economics to examine issues and solve problems. Prior economics courses not required. Offered: W.

HSGMT 522 Applied Data Analysis (3) Cheadie, Connell Practical experience in quantitative research, using a data set of their choosing to formulate a research question, clean and edit the data, and do the analysis. For second-year students in the School of Public Health who plan to do quantitative analysis for their thesis or project. Credit/no credit only. Offered: W.

HSGMT 523 Informatics in Health Care Management (3) Masuda Medical informatics concerns the representation, organization, and manipulation of biomedical information and knowledge. Exposes students to a high-level understanding of informatics and its health care applications. Discussion of successes and failures in implementing information technology focuses on gaining leadership and management knowledge that embraces informatics. Offered: W.

HSGMT 543 Social and Behavioral Strategies for Improving Health (3) Sloma Explores social dimensions of health and medical care. Learn to identify societal and cultural principles that guide appropriateness in health care. Introduced to tools used to influence social expectations and personal behavior in relation to illness, health, and demand for medical treatments. Offered: S.

HSGMT 545 Capstone Integrative Seminar (4) Scott Designed to assist students in the transition from theory to practice. Emphasis on sharpening analytical and intuitive leadership practices through the use of interactive case studies and team building exercises and field projects. Prerequisite: second-year MHA students. Offered: Sp.

HSGMT 546 Long-Term Care (3) Hawley Learning experience for graduate students in health services administration, planning, other graduate students to increase their ability to identify and solve problems related to long-term care they confront in their employment. Students are exposed to available knowledge in the field; effective problem-solving attitudes and techniques for organizing information and/or developing strategies, and agencies in the field. Prerequisite: HSERV 511 or permission of instructor.

HSGMT 550 Management Practice in Health Care and Public Health Organizations (1-3, max. 3) Richardson, Sappington Introduction to leadership and management, focusing on effective strategies for creating a productive work environment. Organizational structure and strategy introduced. Case studies and other problem-solving methods, using health services applications are utilized in order to apply theoretical knowledge. Prerequisite: graduate student. Offered: Sp.

HSGMT 561 Health Planning: The Management of Change (4) Pinsky, Forschner Integrates realistic implementation strategies at beginning of planning process to optimize impact of planning on real problems. Discussion of ways in which change is brought about and decisions are made and implemented. Includes managing planning process, work plans, stakeholders, negotiation, and working with groups. Prerequisite: HSERV 511 or permission of instructor. Offered: A.

HSGMT 562 Strategic Management of Health Care Organizations (3-4, max. 4) Dowling Management of goals, strategy, and structure in health care organizations. Design of external relationships and internal structures, strategy formulation, decision-making, and change. Integration of professional, social, and organizational values. Theory, student and practitioner experience, and case studies used to enhance repertoire of management approaches and skills. Prerequisite: HSERV 511 and HSMGMT 560 or equivalent.

HSGMT 563 Personnel Management for Health Professionals (3) Kienast Designed for midcareer health services professionals developing strategies and skills in human resource management. Focuses on policy and practice issues important to handling day-to-day personnel management dilemmas and problems, performance appraisal, discipline, grievances. Prerequisite: registration in Extended M.P.H. Degree program or permission of instructor; non-business majors.

HSGMT 565 Quantitative Decision Making for Health Services Management (3) Pilcher Applications of various quantitative techniques for problem solving, monitoring, controlling, decision making in health services. Identifying problem area, communications with consultant, evaluation to the quality and applicability of analyst's work. Statistical, mathematical, operations research, industrial engineering techniques. Prerequisite: QMETH 500 or BIOST 509 or permission of instructor.

HSGMT 566 Decision Support Models for Health Services (3) Pilcher Management science and approaches developed as applied to problems in public health. Emphasizes conceptual understanding of processes/applications of systematic, and rational approach to managerial problem solving, including cost-benefit, cost effectiveness analysis. Prerequisite: BIOST 502 and 503, or BIOST 511; registration in Extended M.P.H. Degree program; non-business majors.

HSGMT 571 Health Care Financial Management (4) Conrad, Stillman Third course in a three-course sequence dealing with the management of health services institutions and programs. Topics covered are: health services law, hospital and program policy decisions, financial planning, and hospital design and architecture; and the presentation of hospital survey and health services research project reports. Prerequisite: HSERV 511 and ACCTG 500 or ACCTG 501 or permission of instructor.

HSGMT 572 Financial Management for Health Professionals (3) Intensive review of basic accounting principles/terminology and an introduction to financial management/managerial accounting, including budgeting for managerial control, planning, cost accounting, financing health programs. Managerial accounting, program costing, rate setting, budget preparation. Prerequisite: BIOST 502 and BIOST 503, or BIOST 511; registration in Extended M.P.H. Degree program or permission of instructor; non-business majors.

HSGMT 573 Seminar in Health-Care Finance (3) Pinsky, Wolf Practical applications of corporate finance principles. Applies theoretical framework to health-care financial problems, including capital investment analysis, leasing vs. borrow-to-buy, debt capacity analysis, bond refunding, control of capital, joint ventures. Prerequisite: either HSMGMT 514, HSMGMT 587; ECON 400, or ECON 500; ACCTG 503 (or equivalent); HSMGMT 571; or permission of instructor.

HSGMT 574 Financial Management I (3-4) Stillman Prepares clinical professionals for participating intelligently in, and contributing to, financial decisions of health care organizations. Learn the language and fundamental concepts of accounting and finance, and become comfortable with what is required in formal financial analysis. Offered: A.

HSGMT 575 Financial Management II (4) Conrad, Stillman Second in a two part series, the emphasis of this financial management course is
on preparing medical executives for managerial and leadership roles in health care organizations. Focus is on tools and analytic frameworks that health care managers use to make forward-looking decisions, including capital budgeting and risk analysis. Offered: W.

HSMGMT 590 Select Topics (1-6, max. 12) By arrangement, students and faculty members develop a program of reading and conference appropriate to the selected topic. The topic chosen is within the special competence of the faculty member participating in the course in the area of health services management.

HSMGMT 592 Health Management Program Seminar (1-6, max. 6).

Pathobiology

PABIO 201 Newly Emerging Diseases in Public Health (2) NW Kenny Newly recognized and emerging disease pose a major problem for public health. AIDS, hantavirus infections, Ebola virus infections, and the role of bacterial infection in the causation of stomach ulcers are examples of problems to be studied. Other timely diseases are presented in this lecture discussion course. Offered: A.

PABIO 301 Prevention of Infectious Diseases (3) NW Kenny Consideration of means of prevention of major classes of infectious diseases from the public-health view point. Classes of diseases are defined by site of infection (e.g. respiratory) or common mechanisms of spreading. Respiratory, sexually transmitted, water-borne, and tropical diseases. Prerequisite: either MICROM 301 or BIOL 201. Offered: Sp.

PABIO 302 Advanced Seminar in Pathobiology Research (3-9, max. 9) Rotation through research laboratory. Credit/no credit only.

PABIO 500 Introduction to Pathobiology Research (3-9, max. 9) Rotation through research laboratory. Credit/no credit only.

PABIO 511 Pathobiological Frontiers (2) Kenny Molecular and immunological concepts of infectious and noninfectious diseases presented in format suitable for graduate students knowledgeable in health-related areas who are not in biology-oriented programs. Allergy, immune responses, nature of infectious agents, prevention of disease with emphasis on newly defined diseases and disease agents. Prerequisite: permission of instructor.

PABIO 525 Cell Surface Membrane in Cell Sociology and Immunology (2) Carter, Hakomori Structure and function of cell surface membranes in relation to development of various diseases, particularly infection, cancer, and inflammation. Examines how specific cell surface molecules are targets of recognition by microbes, tumor cells, and recruited inflammatory cells. Prerequisite: BIOC 440, BIOC 441, BIOC 442, and permission of instructor. Offered: jointly with MICROM 525.

PABIO 536 Bioinformatics and Gene Sequence Analysis (3) Rose Nature and relevance of molecular sequence information, computer-based protein, and DNA sequence analysis, molecular sequence and genomic databases, and methods for database accession and interrogation. Prerequisite: background in molecular biology and permission of instructor. Offered: jointly with MEDED 536; Asp.

PABIO 540 Antibiotic Resistance Mechanisms and Their Impact on Public Health (3) Roberts Lectures covering resistance mechanisms against bacterial antibiotics, antiviral, antiparasitic, and cancer drugs. Topics also include the effects that resistant microorganisms have on therapy and cancer treatment and their impact on public health. Prerequisite: permission of instructor.

PABIO 548 Molecular and Cellular Parasitology (3) Feagin Molecular and cellular biology of parasites of health-related significance, emphasizing current research topics unique to parasites, particularly well-suited for study in host-parasite systems. Prerequisite: familiarity with molecular and cellular biology and permission of instructor. Offered: even years; Sp.

PABIO 550 Diseases of Public Health Importance and Strategies for their Control (3) Public Health perspective of major disease of national and global importance. Discussion of origins, establishment, progression, and pathogenesis of diseases. Importance of immunological, intercellular and external factors, and strategies of disease prevention. Requires a grounding in cellular and molecular biology, microbiology, and immunology. Prerequisite: permission of instructor.

PABIO 551 Biochemistry and Genetics of Pathogens and Their Hosts (4) Provides a strong foundation in biochemistry, molecular biology, and genetics for students interested in disease. Principles will be illustrated through examples focusing on pathogens, and infectious and non-infectious disease. Prerequisite: undergraduate level course work in molecular biology or biochemistry or permission of instructor.

PABIO 552 Cell Biology of Human Pathogens and Disease (4) Cell biology and immunology explored through diseases of public health importance with examples of pathogen interaction with host cell biology and immune systems, unique aspects of the cell biology of pathogens, perturbations of these systems in non-infectious diseases and design of therapeutics and vaccines to combat diseases of public health importance. Prerequisite: undergraduate level coursework in biology or molecular biology or permission of instructor.

PABIO 553 Survival Skills for Scientific Research (2) Lukehart, Parsons Focuses on skills needed for scientific career: writing abstracts, curriculum vitae, research proposals; preparing for oral presentations; lab management skills; discussion of mentorship/trainee relationships; case-based discussions of various topics in ethics and scientific misconduct. Credit/no credit only. Offered: Sp.

PABIO 554 Molecular Epidemiology of Infectious Diseases (2) Application of molecular typing techniques to study of microbial pathogens to increase understanding of epidemiology of infectious diseases. Brief review of molecular biology; Evaluation of methods used in outbreaks and epidemics reported in literature. Prerequisite: PABIO 511 or PABIO 512 or permission of instructor. Offered: jointly with ENV H 586/EP 586; W.

PABIO 580 Pathobiology Seminar (1, max. 15) Research from students, faculty members, and invited speakers is presented and discussed. Topics include immunocompetence, viruses, membranes, infectious diseases, immune response and other related topics.

PABIO 581 Current Literature in Pathobiology (1, max. 15) Develops skills in analyzing data and assessing conclusions through an analysis of current literature in Pathobiology. Focuses on breadth and analytical skills. Prerequisite: enrollment in the pathobiology graduate program.

PABIO 582 Critical Thinking and Research Design in Pathobiology (1.5) Lingappa Analysis of issues, hypothesis and experimental design and testing. Credit/no credit only. Prerequisite: graduate standing in pathobiology. Offered: W.

PABIO 590 Selected Topics (1-20, max. 20) Individual offerings focusing on topics such as pathogenesis, immunology, virology, disease agents, bioinformatics and grant writing. Small lecture format. Credit/no credit only. Prerequisite: permission of instructor.

PABIO 598 Didactic Pathobiology (1, max. 12) Supervised teaching experience in pathobiology courses for Ph.D. candidates. Prerequisite: permission of instructor.

PABIO 600 Independent Study or Research (*) Credit/no credit only. Prerequisite: permission of graduate program adviser.

PABIO 700 Master's Thesis (*) Credit/no credit only. Prerequisite: permission of graduate program adviser.

PABIO 800 Doctoral Dissertation (*) Credit/no credit only. Prerequisite: permission of graduate program adviser.
Aerospace Studies

A S 101 Aerospace Studies 100 (1) Focuses on the basic characteristics of air doctrine; US Air Force mission and organization; functions of United States strategic offensive and defensive, general-purpose, and aerospace support forces; officership/professionalism and an introduction to communicative skills. Additional one-hour leadership laboratory is mandatory for cadets, but not special students. Offered: A.

A S 102 Aerospace Studies 100 (1) Focuses on the basic characteristics of air doctrine; US Air Force mission and organization; functions of United States strategic offensive and defensive, general-purpose, and aerospace support forces; officership/professionalism and an introduction to communicative skills. Additional one-hour leadership laboratory is mandatory for cadets, but not special students. Offered: W.

A S 103 Aerospace Studies 100 (1) Focuses on the basic characteristics of air doctrine; US Air Force mission and organization; functions of United States strategic offensive and defensive, general-purpose, and aerospace support forces; officership/professionalism and an introduction to communicative skills. Additional one-hour leadership laboratory is mandatory for cadets, but not special students. Offered: A.

A S 332 Aerospace Studies 300 (3) Emphasis on leadership and management fundamentals, professional knowledge, leadership ethics, and communicative skills required of an Air Force officer. Case studies used to examine leadership and management situations. An additional leadership laboratory (mandatory for cadets but not special students) provides leadership experiences, giving students the opportunity to apply learned principles. Offered: A.

A S 333 Aerospace Studies 300 (3) Emphasis on leadership and management fundamentals, professional knowledge, leadership ethics, and communicative skills required of an Air Force officer. Case studies used to examine leadership and management situations. An additional leadership laboratory (mandatory for cadets but not special students) provides leadership experiences, giving students the opportunity to apply learned principles. Offered: W.

A S 431 Aerospace Studies 400 (3) I&S Needs for national security, evolution of American defense strategy and policy, methods for managing conflict, alliances and regional security to preserve American interests. Arms control and terrorism. The military as a profession, officership, the military justice system, current military issues; refinement of communicative skills. A one-hour leadership laboratory is also required for cadets, but not special students. Offered: Sp.

A S 432 Aerospace Studies 400 (3) I&S Needs for national security, evolution of American defense strategy and policy, methods for managing conflict, alliances and regional security to preserve American interests. Arms control and terrorism. The military as a profession, officership, the military justice system, current military issues; refinement of communicative skills. A one-hour leadership laboratory is also required for cadets, but not special students. Offered: W.

A S 433 Aerospace Studies 400 (3) I&S Needs for national security, evolution of American defense strategy and policy, methods for managing conflict, alliances and regional security to preserve American interests. Arms control and terrorism. The military as a profession, officership, the military justice system, current military issues; refinement of communicative skills. A one-hour leadership laboratory is also required for cadets, but not special students. Offered: A.

Military Science

M SCI 101 Military Science I: Basic (2) History, organization, and mission of the United States Army and the Reserve Officer Training Corps. Relationship to the citizen's military and civilian obligations. Functions and organization of the United States defense establishment. Fundamentals of leadership and management. Leadership laboratories and two field training exercises conducted during the year encompass training in field craft, survival, and small unit tactics. Offered: AWSp.

M SCI 102 Military Science I: Basic (2) History, organization, and mission of the United States Army and the Reserve Officer Training Corps. Relationship to the citizen's military and civilian obligations. Functions and organization of the United States defense establishment. Fundamentals of leadership and management. Leadership laboratories and two field training exercises conducted during the year encompass training in field craft, survival, and small unit tactics. Offered: AWSp.

M SCI 201 Military Science II: Basic (2) Develops proficiency in oral and written communications. Presents a perspective on the world wide military threat; an evaluation of tactical methodologies of the hostile nations to include conventional weapon systems employment. Control, prevention, and treatment of combat or emergency medical situations. Fundamentals of military map reading, compass and field navigation, are taught and applied. Leadership laboratories and two field training exercises during the year. Offered: AWSp.

M SCI 202 Military Science II: Basic (2) Develops proficiency in oral and written communications. Presents a perspective on the world wide military threat; an evaluation of tactical methodologies of the hostile nations to include conventional weapon systems employment. Control, prevention, and treatment of combat or emergency medical situations. Fundamentals of military map reading, compass and field navigation, are taught and applied. Leadership laboratories and two field training exercises during the year. Offered: AWSp.

M SCI 203 Military Science II: Basic (2) Develops proficiency in oral and written communications. Presents a perspective on the world wide military threat; an evaluation of tactical methodologies of the hostile nations to include conventional weapon systems employment. Control, prevention, and treatment of combat or emergency medical situations. Fundamentals of military map reading, compass and field navigation, are taught and applied. Leadership laboratories and two field training exercises during the year. Offered: AWSp.
military units from squad to company level. Students are introduced to the planning and conduct of individual and group physical conditioning activities, stressing positive motivation to establish high standards of morale and esprit. Principles and techniques of command, control, military management, and leadership are taught and practiced throughout the academic year. Leadership laboratories and two field training exercises during the year. Offered: AWSp.

M SCI 303 Military Science II: Advanced (3)
Small-unit tactics, emphasizing the importance of firepower, movement, and communications. Duties, responsibilities, and methods of employment of basic military units. Leader’s role in directing and coordinating individuals and military units from squad to company level. Students are introduced to the planning and conduct of individual and group physical conditioning activities, stressing positive motivation to establish high standards of morale and esprit. Principles and techniques of command, control, military management, and leadership are taught and practiced throughout the academic year. Leadership laboratories and two field training exercises during the year. Offered: AWSp.

M SCI 305 Practicum-Techniques of Military Instructions (1-3, max. 3)
Analysis, review of techniques used in military training and instructions. Students plan, rehearse, deliver, provide written critique on block of military instruction from the Military Qualification Skills Manual.

M SCI 401 Military Science IV: Advanced (3)
I&S The Army officer’s position in contemporary world and impact on problems within the military service. Use of a developmental study to provide awareness of personal responsibilities and official relationships of an Army officer. Organization and functions of command and staff positions. Coordination of administration, logistics, and planning for military operations. Basic concepts of legislative and executive authority for the Uniform Code of Military Justice (to include a study of the officer’s authority and responsibility within the military justice system). Problem-solving techniques used by small-unit leaders, emphasizing coordination and planning by the junior officer. Leadership laboratories and two field training exercises during the year. Offered: AWSp.

M SCI 402 Military Science IV: Advanced (3)
I&S The Army officer’s position in contemporary world and impact on problems within the military service. Use of a developmental study to provide awareness of personal responsibilities and official relationships of an Army officer. Organization and functions of command and staff positions. Coordination of administration, logistics, and planning for military operations. Basic concepts of legislative and executive authority for the Uniform Code of Military Justice (to include a study of the officer’s authority and responsibility within the military justice system). Problem-solving techniques used by small-unit leaders, emphasizing coordination and planning by the junior officer. Leadership laboratories and two field training exercises during the year. Offered: AWSp.

M SCI 403 Military Science IV: Advanced (3)
I&S The Army officer’s position in contemporary world and impact on problems within the military service. Use of a developmental study to provide awareness of personal responsibilities and official relationships of an Army officer. Organization and functions of command and staff positions. Coordination of administration, logistics, and planning for military operations. Basic concepts of legislative and executive authority for the Uniform Code of Military Justice (to include a study of the officer’s authority and responsibility within the military justice system). Problem-solving techniques used by small-unit leaders, emphasizing coordination and planning by the junior officer. Leadership laboratories and two field training exercises during the year. Offered: AWSp.

Naval Science

N SCI 111 The Naval Service (3) Beznoska
General introduction to the Navy, its organization, missions, roles, tasks, and operating methods. The relationship to the other services within the Department of Defense is emphasized. Offered: A.

N SCI 112 History of U.S. Sea Power I (2) Neely
A comprehensive study of the role of sea power in the history of the United States, the current status of the various elements of the nation’s sea power as they influence the development and implementation of national security policy. Offered: W.

N SCI 113 History of U.S. Sea Power II (2) Neely
A comprehensive study of the role of sea power in the history of the United States, the current status of the various elements of the nation’s sea power as they influence the development and implementation of national security policy. Offered: Sp.

N SCI 211 Naval Weapon Systems (3) Longazel
Study of fundamental principles of sensor, tracking, weapon delivery subsystems, and current naval weapons. Includes techniques of linear analysis of ballistics and weapons, and dynamics of basic components of weapon-control systems. Offered: A.

N SCI 212 Naval Ship Systems I (3) Longazel
Study of fundamental principles of energy transfer and thermodynamics. An introduction to nuclear propulsion, gas turbines, and auxiliary power systems. Offered: Sp.

N SCI 213 Naval Ship Systems II (3) Longazel
Study of ship characteristics, ship design, hydrodynamic forces, stability, damage control, and shipboard electrical systems. Includes introduction to engineering documentation, electrical safety, preventative maintenance, and personnel qualifications. Offered: Sp.

N SCI 311 Navigation (3) NW Partridge
The science and practice of maritime coastal navigation, including visual fixing, dead reckoning, and piloting methods. Computation of tides and currents and nautical rules of the road. Offered: A.

N SCI 312 Navigation II (3) NW Partridge
Basic theory and practice of celestial and electronic navigation. Navigation within the Navy and contact coordination practice in a multiple ship environment. Offered: W.

N SCI 313 Naval Operations (3) Partridge
Introduction to naval operations, the employment of naval forces, naval tactics, formulation of operations plans and orders, employment of detection equipment, and meteorology. Offered: Sp.
School of Social Work

Social Welfare

SOC WF 101 Social Work in Action: Bridging the Gap From Science to Service (5) I&S
Explores current social work practice and research applied to major societal problems. Lectures and discussions by leading faculty introduce students to the evidence-based perspective underlying program planning and practice innovation. Topics include: juvenile delinquency, child maltreatment, domestic violence, foster care reform, mental health, school violence, substance abuse, and poverty. Offered: A.

SOC WF 200 Introduction to Social Welfare Practice (5) I&S
Introduction to the field of social work, including the theoretical concepts and institutional framework that guide practice. Overview of social work profession and social welfare system within which it operates. Lectures supplemented by exercises, films, guest lectures, and class discussions. Offered: A.

SOC WF 310 Social Welfare Practice I (3) Whitaker
Provides an introduction to the roles, tasks, and functions of the social welfare practitioner and to theories and methods of intervention; a conceptual framework for social work practice with individuals, families, and small groups; and an opportunity to develop skills in problem assessment, intervention, termination, and evaluation. Offered: A.

SOC WF 311 Social Welfare Practice II (3) Whitaker
Provides an introduction to the roles, tasks, and functions of the social welfare practitioner and to theories and methods of intervention; a conceptual framework for social work practice with individuals, families, and small groups; and an opportunity to develop skills in problem assessment, intervention, termination, and evaluation. Prerequisite: SOC WF 310. Offered: W.

SOC WF 312 Social Welfare Practice III (3) Duplica, Whitaker
Focus on macro systems in a diverse society using the generalist perspective. The implications of system resources and configurations for meeting human needs are considered. The role and function of generalist social workers to understand and advocate for system development and change is emphasized. Prerequisite: SOC WF 311. Offered: Sp.

SOC WF 320 Social Welfare Policy (5) I&S
Duplica
Emphasizes policy and program development in social welfare with emphasis on the context, making, and unmaking of social policy. Covers policy formulation as well as current and emerging policies in social welfare. Prerequisite: SOC WF 200. Offered: WSp.

SOC WF 390 Introduction to Social Welfare Research (5) Balassone, Roffman
Introduction to the logic of the scientific method as applied to social work and social welfare practice, to the design and conduct of a research study, and to data collection and summarization. Skill development in critical consumption of social welfare research. Prerequisite: either STAT 220 or GMETH 201. Offered: A.

SOC WF 402 Human Behavior and Social Environment I (5) I&S
First of two-semester sequence focusing on understanding human development across the lifespan. Integrates biological, psychological, structural, environmental, political, global, and socio-cultural perspectives. Explores relationship between the person and the environment including families, groups, organizations, communities, and institutions. Offered: W.

SOC WF 403 Human Behavior and Social Environment II (5) I&S
Continuation of SOC WF 402. Prerequisite: SOC WF 402.

SOC WF 404 Cultural Diversity and Justice (5) I&S
Duplica, Sohng
History and culture of disadvantaged and oppressed groups served by Social Welfare generalist practitioners. Offered: Sp.

SOC WF 409 Readings in Social Welfare (1-5, max. 15)

SOC WF 419 Adult Development and Aging (3) I&S
Introduces the field of adult development. Interdisciplinary perspective stressing the interaction of psychological, social, and physiological factors affecting the aging process. Goals are to help the student understand the processes and diversity in the aging process that can assist one’s own aging and help the learner work with older adults. Offered: Sp.

SOC WF 421 Methods of Child Care and Treatment (3) Whitaker
Focuses on an introduction to the continuum of child welfare services and presents practical approaches to working with children and adolescents in a wide variety of practice settings. Offered: alternate years; A.

SOC WF 430 Child Care Work Practice (3) Whitaker
Specialized practice with emotionally disturbed and delinquent children in group-care settings with focus on providing child-care staff with specific tools for teaching alternative behavior. Major topics include: etiology and diagnosis, observing and recording children’s behavior, special problems of group living, activity space, interviewing, token economies, activity programming, group interventions, parental involvement, organizational requisites and community linkages. Offered: alternate years; A.

SOC WF 442 Building Competencies for Intergroup Dialogue Facilitation (3) Whitaker
Focuses on both knowledge and skills development for peer facilitators. Topics include philosophy and principles of dialogic education and dialogic communication; intergroup communication; social identity development; principles of working with conflict; group dynamics, observation, and facilitation; team building among co-facilitators; and creating a support system among instructors and facilitators. Credit/no credit only.

SOC WF 443 Facilitating Intergroup Dialogue (5) Practicum seminar providing instruction, consultation, and supervision of peer group facilitators. Focuses on comparison of facilitation experiences and consultations, trouble-shooting with other facilitators, co-facilitator team building, and planning for dialogues. Exploration of specific, current intergroup issues, such as affirmative action and immigration. Continuation of team-building work begun in 452. Credit/no credit only.

SOC WF 450 Research in Social Welfare (1-3, max. 10)
Individual work with faculty member to assist with current research project(s). Students trained and supervised in some or all of the following research tasks: literature review, data analysis, record-keeping, interviewing, report writing, data entry and coding, data collection, and other tasks commonly found in research problems in social welfare. Credit/no credit only.

SOC WF 485 Special Topics in Generalist Social Welfare (1-5, max. 5) Readings, lectures, and discussions pertaining to significant topics of special and current interest to social workers.

SOC WF 554 Globalization and International and National Social Welfare Issues and Politics (3) Critical examination of globalization and its implications for the historic and contemporary development, formulation, and adoption of policies related to international and national social welfare. Emphasizes the development of conceptual frameworks that further understanding of the complex interplay of international and national issues and social welfare policies.

Social Welfare

SOC WL 552 Analytical Perspectives on Social Welfare Policy (3) Broad overview of the social welfare policy process, including epistemological issues, content on social problem construction and definition, policy agenda and case study methodology. Introduction to analytical tools and concepts needed to take a proactive role in policy development, advocacy, implementation, and policy research. Offered: Sp.

SOC WL 558 Integrative Seminar (1-2, max. 2) Teams of seminars that targets professional development of the first and second years (scholarship, research, teaching). Active participation expected in discussions and reflective papers. May require preparation for presentation or demonstration. Offered: A.

SOC WL 559 Doctoral Seminar in Teaching Preparation (3) Focus on teaching content and issues integral to being a skillful instructor. Issues and related skills generalized to range of post-graduate positions. Promote understanding of pedagogical issues and development of specific teaching skills. Credit/no credit only. Prerequisite: doctoral student. Offered: A.

SOC WL 578 Seminar in Special Topics for NIMH Prevention Research Trainees (1, max. 9) Interdisciplinary overview of major concepts in promotion of mental health and prevention of mental distress, with prevention science as framework. Provides conceptual foundations for advanced study in specialized aspects of mental health prevention research. Prerequisite: enrollment in Social Welfare Predoctoral Training Program in Prevention of Mental Health Problems and Disorders. Credit/no credit only. Offered: AWSp.
SOC WL 579 Interdisciplinary Approaches to Prevention Science: Children and Adolescents (3) Overviews of theory, research, and practice in prevention science. Developmental perspective examining factors that promote or inhibit health development at different stages and during transitions (focus on birth through age 21). Designed for inter-disciplinary dialogue, and includes guest faculty from around the University who are specialists in course topics. Credit/no credit only. Offered: A.

SOC WL 580 Introduction to Advanced Research Method and Design (3) Introduction to the broad scientific issues and the specific methodological strategies used in formulating and answering research questions within the field of social welfare. Offered: A.

SOC WL 581 Introduction to Advanced Research Method and Design (3) Introduction to the broad scientific issues and the specific methodological strategies used in formulating and answering research questions within the field of social welfare. Offered: W.

SOC WL 582 Research Practicum (3-) Development of specific methodological skills in social welfare research through participation in an ongoing research project. Learning contract used to target specific research competencies. Credit/no credit only. Offered: A SpS.

SOC WL 583 Research Practicum (3-) Development of specific methodological skills in social welfare research through participation in an ongoing research project. Learning contract used to target specific research competencies. Credit/no credit only. Offered: A SpS.

SOC WL 584 Teaching Practicum (3) Supervised teaching of a required course or teaching as a co-instructor with a faculty member. Learning contract used to target specific teaching competencies, e.g., assessing and evaluating student outcomes, identifying class session goals and objectives, tailoring instruction methods to diverse learning styles. Offered: AW SpS.

SOC WL 585 Qualitative Methods in Social Work Research I (3) The first in a two-quarter sequence offering intensive experience in the theory and application of qualitative and ethnographic research methods. Prepares students for conducting qualitative studies and for combining qualitative and quantitative research methods. Focuses on applications especially relevant to social welfare.

SOC WL 586 Qualitative Methods in Social Work Research II (3) The second in a two-quarter sequence offering intensive experience in the theory and application of qualitative and ethnographic research methods. Prepares students for conducting qualitative studies and for combining qualitative and quantitative research methods. Focuses on applications especially relevant to social welfare.

SOC WL 589 Multivariate Data Analysis for the Social Sciences (3, max. 6) Erosheva Provides social scientists with an introduction to multivariate analysis techniques and the knowledge to carry them out. Focuses on statistical methods that explore relationships between observed variables. Topics include principal components, cluster, factor, latent class analysis. Prerequisite: SOC WL 587, 588, or equivalent. Offered: jointly with CS&SS 589; A.

SOC WL 590 Topics in Advanced Research Methods (3) Special topics in social and behavioral research design for advanced graduate students. Topics vary and focus on community-based research methods and measurement construction for culturally diverse populations. Prerequisite: doctoral student in social welfare or related discipline; advanced master’s level students by permission of instructor.

SOC WL 598 Research Problems and Priorities in Social Work and Social Welfare (3-) Provides students with foundations in the definitions of theory; the socially constructed nature of theory and definition of social "problems"; conceptual and theoretical perspectives on human society, interaction, and change; and analysis of current conceptual models in social welfare literature. Prerequisite: admission to social welfare Ph.D. program or permission of instructor. Offered: A.

SOC WL 599 Research Problems and Priorities in Social Work and Social Welfare (-3) Assists students in applying theory in building an original conceptual model. Emphasizes critical thinking, including ideological, political, methodological, and ethical contexts/implications of ideas, theories, and models that shape social welfare scholarship and its application to social practice. Prerequisite: admission to social welfare Ph.D. program or permission of instructor. Offered: W.

SOC WL 600 Independent Study or Research (*) Prerequisite: approval of a well-specified plan by the instructor and program director. Includes a written product. Offered: AW SpS.

SOC WL 800 Doctoral Dissertation (*) Offered: AW SpS.

Social Work

SOC W 500 Intellectual and Historical Foundations of Professional Social Work Practice (3) Intellectual, historical, and ethical foundations of the social work profession. Engagement with crucial aspects of the profession’s history; contemporary issues, problematic directions, and key concepts and theoretical frameworks. Students develop personal, professional, and intellectual foundations for practicing social work built on the central values of plurality and social justice.

SOC W 501 Poverty and Inequality (3) Analysis of poverty and inequality in United States. Analytic and descriptive focus on measurement, processes of production and perpetuation, and public policy responses. Examines causes of poverty, the role of policy, and socioeconomic dimensions of stratification, including race, ethnicity, class, gender, immigration status, disability, age, sexual orientation, and family structure.

SOC W 503 Social Work for Social Justice: Developing a Personal-Professional Stance I (1-3, max. 3) Focuses on personal and professional development toward social work practice for social justice. Employed critically self-reflective, experiential, and dialogic learning processes to engage students to explore personal meaning systems and narratives in the context of professional values of social justice, multiculturalism, empowerment, and globaliza-

SOC W 504 Social Work for Social Justice: Developing a Personal-Professional Stance II (1-3, max. 3) Focuses on personal and professional development toward social work practice for social justice. Employed critically self-reflective, experiential, and dialogic learning processes to engage students to explore personal meaning systems and narratives in the context of professional values of social justice, multiculturalism, empowerment, and globaliza-

SOC W 505 Foundations of Social Welfare Research (3) Almgren, Balassone, Erera, Roffman Overview of research process/methods in social work, with focus on consuming and performing practice-related research and evaluating one’s own practice. Emphasis on critical understanding of empirical literature, development of useful and appropriate questions about social work practice, and strategies and techniques for doing research and applying findings to practice. Offered: Sp.

SOC W 506 Social Welfare Research and Evaluation (3) Second of a two-quarter research sequence. Introduces a range of methods for informing evidenced-based social work practice, Emphasizes critical appraisal of the literature, development of research questions, and strategies and techniques for conducting practice-relevant research, including data collection and analysis.

SOC W 510 Practice I: Introduction to Social Work Practice (3) Kemp, Marcenko, Richey, Roffman Foundation knowledge and skills for direct practice with individuals, families, and groups. Assists students toward mastery of interviewing and relationship building skills and knowledge of cross-cultural communication and practice issues and of social work values and ethics. Provides opportunity to develop beginning level skills in assessment. Offered: A SpS.

SOC W 511 Practice II: Intermediate Direct Service Practice (3) Kemp, Marcenko, Richey, Roffman Foundation knowledge and skills for direct practice with individuals, families, and groups. Course assists students toward mastery in assessment, development of treatment plans based on theory and assessment information, goalsetting skills, and selection of appropriate interventions. Offered: AW.

SOC W 512 Practice III: Organizational Practice (3) Fredriksen, Kruzich, Uehara Focuses on ways in which management activities contribute to service effectiveness for clients and quality of conditions for staff. Various managerial roles, functions, and skills, including planning, organizing, implementing, and evaluating one’s own practice. Emphasis on ways social work managers influence change. Offered: W.
SOC W 513 Practice IV: Community Change Practice (3) Weatherley Provides frame of reference and skills for community-based social work practice. Theories of social change are examined with examples drawn from community organizing and policy advocacy. Offered: Sp.

SOC W 514 Foundation Practice Skills (3) Focus on the teaching of practice skills (micro, mezzo, and/or macro) associated with key contemporary themes in social work. Possible topics include social work with American Indian communities, adult interpersonal violence, and assessment and brief intervention in substance abuse and dependence. Offered: SpS.

SOC W 524 Foundation Practicum (1-8, max. 12) DeLong, Rivara, Roberts Agency-based practicum with emphasis on development of knowledge, perspectives, and skills needed for practice with individuals, families, groups, organizations, and communities. Credit/no credit only. Prerequisite: social work major. Offered: AWSpS.

SOC W 585 Advanced Group Work (3) Overview of group work and major theorist in the field. Examines differential applicability of methods across diverse populations. Emphasis on developing powers of observation of group process (as opposed to content) and on ability to intervene at the group level (as opposed to individual level). Prerequisite: Group work experience.

SOC W 598 Integrative Seminar (1-5, max. 12) Integrates specialized knowledge in social work settings. Offered: AWSp.

SOC W 599 Readings in Social Work (*) Independent Studies. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSp.

SOC W 600 Independent Study or Research (*)

SOC W 700 Master’s Thesis (*)
Faculty

The following are listings of all teaching faculty at the University of Washington, listed by primary appointment. Some interdisciplinary programs (such as the Program on the Environment or Comparative History of Ideas) are comprised of adjunct and affiliate appointments. For a list of faculty associated with such programs or for a complete list of all faculty associated with a department or program, please visit the online General Catalog at http://www.washington.edu/students/gencat/.

College of Architecture and Urban Planning

Architecture

Professor
BONSTEEL, DAVID; MArch, 1964, UNIVERSITY OF WASHINGTON; design process, computer applications, research.
BOSWORTH, THOMAS L; MA, 1954, OBERLIN COLLEGE; MArch, 1960, YALE UNIVERSITY; design process, history, professional practice
HILDEBRAND, GRANT; MArch, 1964, UNIVERSITY OF MICHIGAN; history, preservation design
JACOBSON, PHILLIP L; MArch, 1969, FINNISH INSTITUTE OF TECHNOLOGY; design, professional practice
JOHNSTON, NORMAN J; PhD, 1964, UNIVERSITY OF PENNSYLVANIA; urban design, history
KIYAK, HASUMAN; PhD, 1977, WAYNE STATE UNIVERSITY; geriatric dentistry, behavioral aspects of health care
KOLB, KEITH R; MArch, 1950, HARVARD UNIVERSITY; design, professional practice
LOVELAND, JOEL E.; MArch, 1980, UNIVERSITY OF CALIFORNIA (LOS ANGELES); energy conservation, design, research.
LOVETT, WENDELL H; MArch, 1948, MASSACHUSETTS INSTITUTE OF TECHNOLOGY; architecture.
MILLET, MARIETTA; MArch, 1972, MASSACHUSETTS INSTITUTE OF TECHNOLOGY; illumination, environmental controls.
SELIGMANN, CLAUS; Arch (Dipl), 1950, LONDON POLYTECHNIC (UK); design, design process, theory.
SMALL, ROBERT; MArch, 1955, UNIVERSITY OF OREGON; design, community practice, barrier-free design, housing, site planning, design process.
STREISSGUTH, DANIEL M; MArch, 1949, MASSACHUSETTS INSTITUTE OF TECHNOLOGY; design process
THIEL, PHILIP; MArch, 1948, UNIVERSITY OF MICHIGAN; visual design, design process, person-environment relations, experiential notation.
ZARINA, ASTRA; MArch, 1955, MASSACHUSETTS INSTITUTE OF TECHNOLOGY; design, foreign studies.

Associate Professor
ALBRECHT, ROBERT G; MSCE, 1960, UNIVERSITY OF MASSACHUSETTS; structures.
CURTIS, J WILLIAM; MA, 1969, UNIVERSITY OF WASHINGTON; design process, professional studies.
DONNETTE, JAMES J; MArch, 1969, UNIVERSITY OF WASHINGTON; graphics, design
JONES, SUSAN H.; MArch, 1988, HARVARD UNIVERSITY; architectural design: the conceptual and tectonic ideas of making space
LATORELLE, ELAINA DAY; MArch, 1964, YALE UNIVERSITY; Architecture, Landscape and Urban Design, Professional Practice
PRAKASH, VIKRAMADITYA; PhD, 1994, CORNELL UNIVERSITY; Non-western, Asian, Indian Architecture; cultural and postcolonial studies; LeCorbusier; modernism
SASANOFF, ROBERT; MCP, 1968, UNIVERSITY OF CALIFORNIA (BERKELEY); design process, person-environment relations.

Assistant Professor
HEERWAGEN, JUDITH; PhD, 1982, UNIVERSITY OF WASHINGTON; behavioral ecology

Lecturer
DEE, JENNIFER; MArch, 1984, UNIVERSITY OF WASHINGTON; theory, design.
NICHOLLS, JAMES KEITH; BArch, 1986, UNIVERSITY OF BRITISH COLUMBIA (CANADA); design, industrial design, construction technology

Construction Management

Associate Professor
SCHAFER, JOHN E.; PhD, 1971, UNIVERSITY OF ILLINOIS; construction project management, construction business management, contract procurement.
TORRENCE, GERARD R; MS, 1950, MASSACHUSETTS INSTITUTE OF TECHNOLOGY; structures

Assistant Professor
ABDELAZIZ, AHMED; PhD, 2000, UNIVERSITY OF BRITISH COLUMBIA (CANADA); construction & project management, project controls, methods for building & heavy construction
PACE, CLARK B.; PhD, 1999, UNIVERSITY OF CALIFORNIA (BERKELEY); real estate development, advanced cost analysis, labor projections, construction safety

Landscape Architecture

Professor
BUCHANAN, ROBERT T; MLA, 1956, HARVARD UNIVERSITY; design, graphic communications, landscape esthetics, environmental art.
HAAG, RICHARD; MLA, 1952, HARVARD UNIVERSITY; theory and perception of landscapes, master planning, urban recreation, recycling landscapes
JOHNSTON, NORMAN J; PhD, 1964, UNIVERSITY OF PENNSYLVANIA; urban design, history
SCHAUMAN, SALLY; MS, 1971, UNIVERSITY OF MICHIGAN; visual resource analysis and evaluation, resource planning and conservation of stressed landscapes

Associate Professor
CHALKER-SCOTT, LINDA; PhD, 1988, OREGON STATE UNIVERSITY; environmental stress physiology of woody plants
HILL, KRISTINA; PhD, 1997, HARVARD UNIVERSITY; human dimensions of landscape change; urban ecology; urban design related to water and biodiversity
ROBERTSON, IAIN M; MLA, 1975, UNIVERSITY OF PENNSYLVANIA; designing with plants, planning and design of botanical gardens/arboretas

Research Associate Professor
HORNER, RICHARD R.; PhD, 1978, UNIVERSITY OF WASHINGTON; Effects of human activities on water resources in urban areas.
BOOTH, DEREK B; PhD, 1984, UNIVERSITY OF WASHINGTON; Environmental geology, particularly human influences on hillslopes, runoff, and rivers.
WAGNER, FREDRICK W.; PhD, 1974, UNIVERSITY OF WASHINGTON; urban & regional planning, policies & programs that make communities more livable

**Assistant Professor**

REICHARD, SARAH E.; PhD, 1994, UNIVERSITY OF WASHINGTON; conservation biology of plants, biological invasions

---

**Urban Design and Planning**

**Professor**

AMOSS, HAROLD L; PhD, 1951, UNIVERSITY OF CALIFORNIA (BERKELEY); planned social change, community organization

BELL, EARL J; PhD, 1965, UNIVERSITY OF CALIFORNIA (BERKELEY); application of operations research methods to urban and regional planning problems, mathematical pro

BLANCO, HILDA J.; PhD, 1989, UNIVERSITY OF CALIFORNIA (BERKELEY); Factors influencing urban sprawl; the implications of cognitive science and evolutionary theory for

DUBROW, GAIL LEE; PhD, 1991, UNIVERSITY OF CALIFORNIA (LOS ANGELES); the social history of the built environment; historic preservation; issues of race, class and gender

GREY, ARTHUR L; PhD, 1954, UNIVERSITY OF CALIFORNIA (BERKELEY); scope of urban planning, land and development policy, uses of remote sensing in urban planning, econ

HANCOCK, JOHN L; PhD, 1964, UNIVERSITY OF PENNSYLVANIA; urban design, history

LUDWIG, RICHARD L; PhD, 1971, UNIVERSITY OF PITTSBURGH; housing development planning, social factors in development planning

UNTERMANN, RICHARD K; MLA, 1967, HARVARD UNIVERSITY; urban design and site planning, housing, recreation, nonmotorized circulation

VERNEZ-MOUDON, ANNE; DSc, 1987, ECOLE POLYTECHNIQUE FEDERALE DE LAUSANNE; urban design, city form and neighborhood studies, design research

**Research Professor**

BOOTH, DEREK B; PhD, 1984, UNIVERSITY OF WASHINGTON; Environmental geology, particularly human influences on hillslopes, runoff, and rivers.

WAGNER, FREDRICK W.; PhD, 1974, UNIVERSITY OF WASHINGTON; urban & regional planning, policies & programs that make communities more livable

---

**Associate Professor**

ALBERTI, MARINA; PhD, 1992, MASSACHUSETTS INSTITUTE OF TECHNOLOGY; Environmental planning, urban ecology, impact assessment, geographic information systems, conflict m

KASPRISIN, RONALD J.; MUP, 1968, UNIVERSITY OF WASHINGTON; community design studios, town planning, planning/design communications, urban design principles

PURCELL, MARK H.; PhD, 1998, UNIVERSITY OF CALIFORNIA (LOS ANGELES); Nevinsian aspatial holistic geography

RYAN, DENNIS M; PhD, 1976, UNIVERSITY OF PENNSYLVANIA; Educational democracy, theory and practice of interdisciplinary education; urban design and planning

**Assistant Professor**

BORN, BRANDEN M; PhD, 2003, UNIVERSITY OF WISCONSIN; Land use/regional planning, planning process and collaboration, social justice, and food systems

WEEKS, ROBIN J; PhD, 1988, UNIVERSITY OF CALIFORNIA (SANTA BARBARA); remote sensing, model inversions
## American Ethnic Studies

**Professor**  
Flores, Laura H.; PhD, 1980, University of California (San Diego); Chicano literature, contemporary Latin American literature (narrative)

**Associate Professor**  
Bono, Enrique C.; PhD, 1997, University of California (San Diego); Race and ethnicity; communication, education and culture; Asian American studies.

**Lecturer**  
Gambra, Erasmo; PhD, 1984, University of Washington; history, Chicano experience, Pacific Northwest.

**Professor**  
Salas, Elizabeth; PhD, 1987, University of California (Los Angeles); New Mexican history and politics, Chicana, Mexicana and Chicano history, minorities in the military

**Associate Professor**  
Adams, Loyce M.; PhD, 1983, University of California (Berkeley); American Indian literature and social studies, critical theory, race and ethnicity

## American Indian Studies

**Professor**  
Hart, Daniel; MFA, 1985, Temple University; visual anthropology

**Assistant Professor**  
Millan, Dian L.; MA, 1998, University of California (Berkeley); American Indian literature and social studies, critical theory, race and ethnicity

## Anthropology

**Professor**  
Branch, George M.; MD, 1969, Northwestern University; general adult urology, third-world medicine

Close, Angela E.; PhD, 1976, Cambridge University (UK); Archaeology; Lithic Analysis; Prehistory of North Africa; human origins

**Associate Professor**  
Eck, Gerald G.; PhD, 1977, University of California (Berkeley); primate paleontology, especially African Pliocene-Pleistocene monkeys and hominids

Fitzhugh, J. Ben; PhD, 1996, University of Michigan; Archaeology, Anthropology, evolutionary ecology, complex hunter-gatherers, social evolution, settlement

**Professor**  
Grayson, Donald K.; PhD, 1973, University of Oregon; North American prehistory, paleoecology, vertebrate faunal analysis, history of archaeology

Harrill, Stéfan; PhD, 1974, Stanford University; family systems, demography, social evolution, religion, China, Taiwan

**Assistant Professor**  
Bento, Marilyn G.; PhD, 1984, University of Washington; cognitive anthropology, social change, education, North American Indians

**Assistant Professor**  
Green, James W.; PhD, 1972, University of Washington; cross cultural, mental health, comparative aging, religion, West Indies, Pakistan, Islam

## Applied Mathematics

**Professor**  
Adams, Loyce M.; PhD, 1983, University of Virginia; numerical algorithms for parallel computers

Bretheron, Christopher S.; PhD, 1984, Massachusetts Institute of Technology; convective cloud systems, boundary layer meteorology, numerical modeling, tropical meteorology

**Lecturer**  
Kutz, Jose Nathan; PhD, 1994, Northwestern University; nonlinear waves, dynamical systems, asymptotic and perturbation methods, scientific computing

Mooyegkvar, Suresh H.; PhD, 1973, Johns Hopkins University; cancer epidemiology, development of quantitative methodology

**Professor**  
Murphy, James D.; PhD, 1956, Oxford University (UK); mathematical biology, biological pattern formation, wound healing, spread of epidemics

Nazarath, John L.; PhD, 1973, University of California (Berkeley); numerical optimization
PEARSON, CARL E; PhD, 1949, BROWN UNIVERSITY; wave propagation, fluid dynamics, numerical analysis, optimization
SARACCHI, EDWARD; PhD, 1966, BRANDEIS UNIVERSITY; atmospheric dynamics, air-sea interactions, greenhouse warming, equatorial dynamics, climate change
TUNG, KA KIT; PhD, 1977, HARVARD UNIVERSITY; atmospheric and geophysical fluid dynamics

Associate Professor
QIAN, HONG; PhD, 1989, WASHINGTON UNIVERSITY; mathematical, physical chemistry and biology, statistical physics, stochastic mathematics

Research Assistant Professor
SWANSON, KRISTIN R.; PhD, 1999, UNIVERSITY OF WASHINGTON; mathematical medicine&biology, mathematical modeling of pathological biosystems&imaging; complex sys

Art

Professor
BERGER, PAUL E; MFA, 1973, STATE UNIVERSITY OF NEW YORK (BUFFALO); photography
BRAVEMANN, RENE A.; PhD, 1971, INDIANA UNIVERSITY; African art
CELENTANO, FRANCIS; MA, 1957, NEW YORK UNIVERSITY; painting, drawing
CARTESIOIDES, C G; PhD, 1956, UNIVERSITY OF MICHIGAN; medieval, seventeenth century, Romanesque
DAHN, RICHARD F; MFA, 1959, YALE UNIVERSITY; graphic design
DAILEY, MICHAEL D; MFA, 1963, UNIVERSITY OF IOWA; painting, drawing
DU PEN, EVERETT; MFA, 1937, YALE UNIVERSITY; sculpture
HIXSON, WILLIAM J; MFA, 1950, UNIVERSITY OF OREGON; painting
HOLM, BILL; MFA, 1951, UNIVERSITY OF WASHINGTON; Northwest Coast Indians
JONES, ROBERT C; MS, 1959, RHODE ISLAND SCHOOL OF DESIGN; painting, drawing
KARTSONIS, ANNA D.; PhD, 1982, NEW YORK UNIVERSITY; Byzantine and medieval art
KEHL, RICHARD L.; MA, 1961, KANSAS CITY ART INSTITUTE; MFA, 1961, KANSAS CITY ART INSTITUTE; painting
KINGSBURY, MARTHA; PhD, 1969, HARVARD UNIVERSITY; nineteenth and twentieth century art
LUNDIN, NORMAN K; MFA, 1963, UNIVERSITY OF CINCINNATI; painting, drawing, art history, contemporary art, art theory
MARSHALL, JOHN C; MFA, 1968, SYRACUSE UNIVERSITY; metal design
MASON, ALDEN; MFA, 1947, UNIVERSITY OF WASHINGTON; painting
NASON, JAMES; PhD, 1970, UNIVERSITY OF WASHINGTON; sociocultural anthropology, museology, material culture, cultural heritage, Micronesia, North America
OPPERMAN, HALL; PhD, 1972, UNIVERSITY OF CHICAGO; seventeenth-and eighteenth-century European art
OZUBKO, CHRISTOPHER; MFA, 1981, CRANBROOK ACADEMY OF ART; visual communication design
SMITH, CHARLES W; MFA, 1956, CRANBROOK ACADEMY OF ART; sculpture
SPAFFORD, MICHAEL C; MA, 1960, HARVARD UNIVERSITY; painting, drawing
TAYLOR, NORMAN J; MA, 1967, UNIVERSITY OF IOWA; MFA, 1967, UNIVERSITY OF IOWA; sculpture
WADDEN, DOUGLAS J; MFA, 1970, YALE UNIVERSITY; graphic design, photography
WALKER, JAMIE; MFA, 1983, RHODE ISLAND SCHOOL OF DESIGN; ceramic arts
WARASHINA, M PATRICIA; MFA, 1964, UNIVERSITY OF WASHINGTON; ceramics
WHITEHILL-WARD, JOHN; MS, 1974, ILLINOIS INSTITUTE OF TECHNOLOGY; graphic design
WRIGHT, ROBIN K; PhD, 1985, UNIVERSITY OF WASHINGTON; Native American art, Native art of the Pacific Northwest Coast, Haida art

Associate Professor
GALE, ANN E; MFA, 1991, YALE UNIVERSITY; studio painting and drawing
GARVENS, ELLEN J.; MA, 1983, UNIVERSITY OF NEW MEXICO; mixed media photographic works combining flat images with sculptural materials
GARVENS, ELLEN J.; MFA, 1987, UNIVERSITY OF NEW MEXICO; mixed media photographic works combining flat images with sculptural materials
JECK, DOUGLAS A.; MFA, 1989, THE SCHOOL OF ART INSTITUTE OF CHICAGO; figurative ceramics
KOENIG, HAZEL L.; MFA, 1950, UNIVERSITY OF WASHINGTON; fiber arts
LABITZKE, CURT W; MFA, 1984, UNIVERSITY OF NOTRE DAME; printmaking: intaglio and lithography emphasizing hand-drawn techniques
PRACZUKOWSKI, EDWARD; MFA, 1965, CRANBROOK ACADEMY OF ART; painting, drawing
PROCTOR, RICHARD M; MA, 1962, MICHIGAN STATE UNIVERSITY; fiber arts
WELMAN, VALENTINE S; MFA, 1954, UNIVERSITY OF COLORADO (BOULDER); painting, drawing

Asian Languages and Literatures

Professor
COX, COLLETT D.; PhD, 1983, COLUMBIA UNIVERSITY; Buddhist studies (East and South Asian), Indian philosophy and religion, comparative religion
GETHING, THOMAS W.; PhD, 1966, UNIVERSITY OF MICHIGAN; Thai and Lao language and linguistics
NORMAN, JERRY; PhD, 0, UNIVERSITY OF CALIFORNIA (BERKELEY); Chinese language and linguistics, Altaic linguistics, Sanskrit language and literature, Buddhist studies
SALOMON, RICHARD G.; PhD, 1975, UNIVERSITY OF PENNSYLVANIA; Sanskrit language and literature, Buddhist studies

Associate Professor
BRANDAUER, FREDERICK P; PhD, 1973, STANFORD UNIVERSITY; traditional Chinese vernacular fiction and modern Chinese literature
COOKE, JOSEPH R; PhD, 1965, UNIVERSITY OF CALIFORNIA (BERKELEY); Thai language and literature
KANO, TAMAKO-NIWA; PhD, 1956, RADCCLIFE; Japanese language

Lecturer
KIM, SOOHEE; PhD, 1999, UNIVERSITY OF WASHINGTON; Korean language, morphology, phonology-phonetics interface, and historical linguistics
NGUYEN, KIM O; PhD, 1973, UNIVERSITY OF CALIFORNIA (LOS ANGELES); Vietnamese language and literature
OHTA, KARU; PhD, 1994, UNIVERSITY OF CALIFORNIA (LOS ANGELES); syntax, morphology, Japanese linguistics, language acquisition, and Japanese pedagogy
SINGH, KUNWAR P; PhD, 2000, UNIVERSITY OF WISCONSIN; Hindi language

Astronomy

Professor
ANDERSON, SCOTT; PhD, 1985, UNIVERSITY OF WASHINGTON; quasars and active galaxies, x-ray astronomy
BALICK, BRUCE; PhD, 1971, CORNELL UNIVERSITY; radio astronomy, ionized nebulae, peculiar galaxies.
BOHM, KARL-HEINZ; PhD, 1954, UNIVERSITY OF KIEL (GERMANY); stellar atmospheres, magnetic stars

BOHM-VITENSE, ERIKA H; PhD, 1951, UNIVERSITY OF KIEL (GERMANY); stellar atmospheres, magnetic stars

BROWNLEE, DONALD E; PhD, 1971, UNIVERSITY OF WASHINGTON; origin of the solar system, comets, interplanetary dust.

HAWLEY, SUZANNE; PhD, 1989, UNIVERSITY OF TEXAS (AUSTIN); Variable stars, magnetic activity, flares, galactic structure, dwarf galaxies.

HAXTON, WICK C.; PhD, 1976, STANFORD UNIVERSITY; theoretical physics, nuclear physics

HOGAN, CRAIG J.; PhD, 1980, CAMBRIDGE UNIVERSITY (UK); astrophysical cosmology, especially the origin of astronomical structures in the expanding universe

QUINN, THOMAS R.; PhD, 1986, PRINCETON UNIVERSITY; Solar System dynamics and galaxy formation

SULLIVAN, WOODRUFF T.; PhD, 1971, UNIVERSITY OF MARYLAND; radio astronomy, galactic and extragalactic structure, history of astronomy

SZKODY, PAULA; PhD, 1975, UNIVERSITY OF WASHINGTON; cataclysmic variables, photometry, spectroscopy

WALLERSTEIN, GEORGE; PhD, 1958, CALIFORNIA INSTITUTE OF TECHNOLOGY; chemical composition of stars, peculiar stars, interstellar matter

Associate Professor

DALCANTON, JULIANNE; PhD, 1995, PRINCETON UNIVERSITY; The evolution and formation of galaxies.

Assistant Professor

AGOL, ERIC; PhD, 1997, UNIVERSITY OF CALIFORNIA (SANTA BARBARA); Black holes, accretion disks, quasars, gravitational lensing, planetary transits, dark matter.

Atmospheric Sciences

Professor

BADGLEY, FRANKLIN; PhD, 1951, NEW YORK UNIVERSITY; turbulence

BAKER, MARCIA; PhD, 1971, UNIVERSITY OF WASHINGTON; cloud physics, atmospheric geophysics

BATTISTI, DAVID S; PhD, 1988, UNIVERSITY OF WASHINGTON; large-scale atmosphere-ocean dynamics, climate dynamics, tropical circulation, polar climates

BREIDENTHAL, ROBERT E; PhD, 1979, CALIFORNIA INSTITUTE OF TECHNOLOGY; turbulence, entrainment, mixing, vorticity

BREHTERON, CHRISTOPHER S.; PhD, 1984, MASSACHUSETTS INSTITUTE OF TECHNOLOGY; convective cloud systems, boundary layer meteorology, numerical modeling, tropical meteorology

BUSINGER, JOOST A; PhD, 1954, UNIVERSITY OF UTRECHT (NETHERLANDS); energy transfer.

CHARLSON, ROBERT J; PhD, 1964, UNIVERSITY OF WASHINGTON; atmospheric chemistry

DURRAN, DALE R; PhD, 1981, MASSACHUSETTS INSTITUTE OF TECHNOLOGY; atmospheric dynamics and modeling, numerical methods, mountain meteorology, mesoscale meteorology

FLEAGLE, ROBERT G; PhD, 1949, NEW YORK UNIVERSITY; physical and dynamic meteorology, weather modification and public policy, air-sea interaction processes

GAMMON, RICHARD H; PhD, 1970, HARVARD UNIVERSITY; atmospheric chemistry, chemical oceanography, environmental chemistry; biogeochemical cycles, global

HARTMANN, DENNIS L; PhD, 1975, PRINCETON UNIVERSITY; climate change, dynamic meteorology, radiation and remote sensing

HOUZE, ROBERT A.; PhD, 1972, MASSACHUSETTS INSTITUTE OF TECHNOLOGY; mesoscale meteorology, cloud physics and dynamics, tropical and mountain meteorology

JAFEE, DANIEL A; PhD, 1987, UNIVERSITY OF WASHINGTON; atmospheric chemistry, urban and global air pollution, environmental education

LACHAPELLE, EDWARD; DSc, 1967, UNIVERSITY OF PUGET SOUND; snow-ice physics

LÉOVID, CONWAY B; PhD, 1964, MASSACHUSETTS INSTITUTE OF TECHNOLOGY; climatic role of clouds, planetary atmospheres, astrobiology, atmospheric circulation and dynamics

MASS, CLIFFORD F; PhD, 1978, UNIVERSITY OF WASHINGTON; synoptic and mesoscale meteorology.

OVERLAND, JAMES E; PhD, 1973, NEW YORK UNIVERSITY; Arctic and North Pacific climate variability, sea ice

PLANT, WILLIAM J.; PhD, 1972, PURDUE UNIVERSITY; microwave remote sensing of the sea surface, atmosphere-ocean interaction

RADKE, LAWRENCE F.; PhD, 1968, UNIVERSITY OF WASHINGTON; cloud and aerosol physics, wildfire science, remote sensing, airborne instrumentation

REED, RICHARD J; DSc, 1949, MASSACHUSETTS INSTITUTE OF TECHNOLOGY; weather analysis and prediction, numerical modeling

ROE, GERARD H; PhD, 1999, MASSACHUSETTS INSTITUTE OF TECHNOLOGY; Interaction/feedback of Earth System components, Climate Dynamics, Paleoclimate, Surface Processes

SARACHIK, EDWARD; PhD, 1966, BRANDEIS UNIVERSITY; atmospheric dynamics, air-sea interactions, greenhouse warming, equatorial dynamics, climate change

TUNG, KAI KIT; PhD, 1977, HARVARD UNIVERSITY; atmospheric and geophysical fluid dynamics

UNTERSTEINER, NORBERT; PhD, 1950, UNIVERSITY OF INNSBRUCK (AUSTRIA); air-sea-ice interaction, polar climatology, sea ice physics

WALLACE, JOHN M; PhD, 1966, MASSACHUSETTS INSTITUTE OF TECHNOLOGY; atmospheric general circulation, climate variability, global warming

Research Professor

COVERT, DAVID S; PhD, 1974, UNIVERSITY OF WASHINGTON; atmospheric chemistry; aerosol physics, chemistry, optics, and instrumentation

GRENFELL, THOMAS C; PhD, 1972, UNIVERSITY OF WASHINGTON; atmospheric radiation, radiative transfer, microwave remote sensing, ice and snow optics

HEGG, DEAN A; PhD, 1979, UNIVERSITY OF WASHINGTON; atmospheric chemistry, cloud physics

Associate Professor

ALEXANDER, M. JOAN; PhD, 1992, UNIVERSITY OF COLORADO (BOULDER); stratospheric data analysis, mesoscale correction modeling, spectral analysis, gravity wave dynamics

BATES, TIMOTHY S; PhD, 1988, UNIVERSITY OF WASHINGTON; oceanic and atmospheric chemistry, atmosphere-ocean interaction, aerosols and climate

BOND, NICHOLAS A; PhD, 1986, UNIVERSITY OF WASHINGTON; air-sea interaction, boundary layers, coastal and marine meteorology

CHEN, SHUYI S; PhD, 1990, PENNSYLVANIA STATE UNIVERSITY; tropical meteorology, air-sea interactions, mesoscale dynamics, numerical modeling

FU, QIANG; PhD, 1991, UNIVERSITY OF UTAH; atmospheric radiation; cloud/aerosol/radiation/climate interactions; remote sensing

HAKIM, GREGORY J; PhD, 1997, STATE UNIVERSITY OF NEW YORK (ALBANY); synoptic and mesoscale meteorology; atmospheric dynamics; rotating, stratified turbulence

HARRISON, HALSETH; PhD, 1960, STANFORD UNIVERSITY; atmospheric chemistry, dispersion modeling, radiative transfer

ROTHROCK, DAVID A; PhD, 1969, CAMBRIDGE UNIVERSITY (UK); physical oceanography, polar oceanography, polar ice remote sensing and modeling

629
Research Associate Professor

SMULL, BRADLEY F; PhD, 1986, UNIVERSITY OF WASHINGTON; mesoscale and radar meteorology, severe storms, large-scale atmosphere-ocean interactions

DEL MORAL, ROGER; PhD, 1968, UNIVERSITY OF CALIFORNIA (BERKELEY); Atmospheric chemistry, air pollution, climate change.

YUTER, SANDRA ELLYN; PhD, 1996, UNIVERSITY OF WASHINGTON; physical meteorology, mesoscale meteorology, radar and remote sensing

Research Assistant Professor

ANDERSON, THEODORE L.; PhD, 1992, UNIVERSITY OF MANCHESTER (UK); cloud physics, boundary layer meteorology, cloud-climate interactions

Biology

Professor

AMMIRATI, JOSEPH F; PhD, 1972, UNIVERSITY OF MICHIGAN; mycology, taxonomy and ecology of fungi

BLISS, LAWRENCE C; PhD, 1956, DUKE UNIVERSITY; physiological plant ecology and ecosystem development and function, arctic, alpine environments

BOERMSA, P DEE; PhD, 1974, OHIO STATE UNIVERSITY; population, ecology

BRADSHAW, HARVEY D; PhD, 1984, LOUISIANA STATE UNIVERSITY; molecular genetics of adaptive evolution in natural populations of plants and animals

CLELAND, ROBERT E.; PhD, 1957, CALIFORNIA INSTITUTE OF TECHNOLOGY; physiology of plant growth

CLONEY, RICHARD A; PhD, 1959, UNIVERSITY OF WASHINGTON; invertebrate embryology, histology, morphogenetic movements, metamorphosis, biology of ascidians

DEL MORAL, ROGER; PhD, 1968, UNIVERSITY OF CALIFORNIA (SANTA BARBARA); ecology, primary succession, gradient analysis, community structure

EDWARDS, JOHN S; PhD, 1960, CAMBRIDGE UNIVERSITY (UK); arthropod neurobiology, insect physiology and development, tundra and alpine biology

EDWARDS, SCOTT V.; PhD, 1992, UNIVERSITY OF CALIFORNIA (BERKELEY); molecular evolution and population genetics; evolutionary history of birds

HALL, BENJAMIN D; PhD, 1959, HARVARD UNIVERSITY; the evolution of nuclear genes in plants and fungi

HALPERN, WALTER; PhD, 1965, UNIVERSITY OF CONNECTICUT; plant physiology, plant morphology

HASKINS, EDWARD F; PhD, 1965, UNIVERSITY OF MINNESOTA; cell biology and ultrastructure of microorganisms, especially slime molds

HAUSCHKA, STEPHEN D; PhD, 1966, JOHNS HOPKINS UNIVERSITY; regulation of skeletal muscle differentiation, growth factor-receptor signaling mechanisms

HERRING, SUSAN W.; PhD, 1971, UNIVERSITY OF CHICAGO; vertebrate functional morphology, relations between muscular function and skull growth

HILLE, MERRILL B; PhD, 1965, ROCKEFELLER UNIVERSITY; developmental biology, gastrulation in sea urchin embryos, translational regulation during meiosis

KENAGY, GEORGE JAMES; PhD, 1972, UNIVERSITY OF CALIFORNIA (LOS ANGELES); ecophysiology and behavior, reproduction and life history, population biology, evolution, mammalogy

KIMELMAN, DAVID; PhD, 1985, HARVARD UNIVERSITY; molecular biology of early development in the frog, Xenopus laevis, and the fish, Danio rerio

KOHN, ALAN J; PhD, 1957, YALE UNIVERSITY; invertebrate zoology, ecology and functional morphology of marine invertebrates, especially mollusks

KOZLOFF, EUGENE N; PhD, 1950, UNIVERSITY OF CALIFORNIA (BERKELEY); biology of lower invertebrates, ciliates, orthonectids, turbellarians and kinorhynches

KRUCKEBERG, ARTHUR R; PhD, 1950, UNIVERSITY OF CALIFORNIA (BERKELEY); evolution, biosystematics, edaphic ecology

LEOPOLD, ESTELLA B; PhD, 1955, YALE UNIVERSITY; paleoecology, pollen and seed analysis, late Cenozoic environments and climate history

MOODY, WILLIAM J; PhD, 1977, STANFORD UNIVERSITY; single cell electrophysiology, development of electrical properties in embryos

NESTOR, EUGENE W; PhD, 1959, CASE WESTERN RESERVE UNIVERSITY; genetics and biochemistry, of bacterial-plant cell interactions

ORIANS, GORDON H; PhD, 1960, UNIVERSITY OF CALIFORNIA (BERKELEY); ecology and ethology, vertebrate social systems, community structure, plant-herbivore interactions

PAINE, ROBERT T; PhD, 1961, UNIVERSITY OF MICHIGAN; experimental ecology, organization and structure of marine communities

PALKA, JOHN M; PhD, 1965, UNIVERSITY OF CALIFORNIA (LOS ANGELES); neurophysiology, sensory physiology, developmental neurobiology

ROHWEER, SIEVERT A; PhD, 1971, UNIVERSITY OF KANSAS; ecology and evolution of social behavior, deception and evolution of status-signaling systems, avian

STOYER, ROBERT A; PhD, 1975, UNIVERSITY OF OREGON; neuroendocrinology, neuroscience, endocrinology

TAKADA, MATSUO; PhD, 1961, OSAKA CITY UNIVERSITY (JAPAN); interpretation of Quaternary events from palynological and kindred data

VAN VOLKENBURGH, ELIZABETH; PhD, 1980, UNIVERSITY OF WASHINGTON; leaf growth and development, photobiology and electrophysiology

WAALAND, J ROBERT; PhD, 1969, UNIVERSITY OF CALIFORNIA (BERKELEY); biology of marine algae

WALKER, RICHARD B; PhD, 1948, UNIVERSITY OF CALIFORNIA (BERKELEY); plant physiology, mineral nutrition, water relations

WHISLER, HOWARD C; PhD, 1960, UNIVERSITY OF CALIFORNIA (BERKELEY); mycology, aquatic fungi, slime-molds and phycocyanetes, development

WHITELEY, ARTHUR H; PhD, 1945, PRINCETON UNIVERSITY; comparative development and physiology of invertebrates, genetic control of development, fertilization

YAO, MENG CHAO; PhD, 1975, UNIVERSITY OF ROCHESTER; regulation of gene amplification and chromosome rearrangements in Tetrahymena

Research Professor

DETHIER, MEGAN N; PhD, 1981, UNIVERSITY OF WASHINGTON; marine intertidal ecology, shoreline classification systems, plant-herbivore interactions

FOE, VICTORIA; PhD, 1975, UNIVERSITY OF OREGON (AUSTIN); cell cycle control and morphogenesis in Drosophila embryos

GRAUBARD, KATHERINE; PhD, 1973, UNIVERSITY OF WASHINGTON; cellular neurophysiology, neural basis of behavior

WASSER, SAMUEL K; PhD, 1981, UNIVERSITY OF WASHINGTON; behavioral ecology, endocrinology, conservation genetics and reproductive biology

Associate Professor

BAKKEN, AIMEE; PhD, 1970, UNIVERSITY OF IOWA; developmental and cell biology, chromosome structure and function in oogenesis and embryogenesis, de
GRIFFITHS, W MARY; PhD, 1953, UNIVERSITY OF CALIFORNIA (BERKELEY); zoology.
PARKHURST, SUSAN M.; PhD, 1995, JOHNS HOPKINS UNIVERSITY; Developmental, Genetic, and Molecular Analysis of Drosophila embryogenesis.
PRIESS, JAMES R.; PhD, 1983, UNIVERSITY OF COLORADO (BOULDER); reliability models, fault trees
RAIBLE, DAVID W.; PhD, 1989, UNIVERSITY OF PENNSYLVANIA; zebrafish neural development
RUESINK, JENNIFER; PhD, 1996, UNIVERSITY OF WASHINGTON; Marine intertidal ecology, especially community dynamics, food webs, introduced species.
SWALLA, BILLIE J.; PhD, 1988, UNIVERSITY OF IOWA; How developmental and evolutionary processes influence animal body plans.
TORII, KEIKO; PhD, 1993, UNIVERSITY OF TSUKUBA (JAPAN); Arabidopsis development; genetics; receptor-mediated signal transduction in higher plants

Research Associate Professor
MANDOLI, DINA F.; PhD, 1982, STANFORD UNIVERSITY; plant development and morphogenesis using genetics, molecular biology, physiology

Assistant Professor

Lecturer
MARTIN-MORRIS, LINDA E.; PhD, 1991, BRANDEIS UNIVERSITY; genetics, nonmajors biology
NICOTRI, MARY E; PhD, 1974, UNIVERSITY OF WASHINGTON; marine ecology, evolution and introductory biology
OCONNOR, EILEEN; MS, 1976, UNIVERSITY OF WASHINGTON; ecology and evolution
ZEMAN, LESLIE B.; DVM, 1975, MICHIGAN STATE UNIVERSITY; animal physiology

Chemistry

Professor
AEBERSOLD, RUDOLF HANS; MD, 1984, YALE UNIVERSITY; Protein biochemical investigation of signal transduction pathways.
ANDERSEN, NIELS H; PhD, 1967, NORTHWESTERN UNIVERSITY; bioorganic, biophysical, and medicinal chemistry, NMR spectroscopy
CALLIS, JAMES B; PhD, 1970, UNIVERSITY OF WASHINGTON; instrumentation development, process analytical chemistry, non-invasive clinical chemistry.
CAMPBELL, CHARLES T.; PhD, 1979, UNIVERSITY OF TEXAS (AUSTIN); chemical physics of solid surfaces, chemisorption, catalysis, and surface analysis
CHRISTIAN, GARY D; PhD, 1964, UNIVERSITY OF MARYLAND; atomic spectroscopy, clinical analysis, electroanalysis, flow injection analysis, optrodes
DALTON, LARRY R.; PhD, 1971, HARVARD UNIVERSITY; materials chemistry focused on producing next generation opto-electronic materials
DROBNY, GARY P; PhD, 1981, UNIVERSITY OF CALIFORNIA (BERKELEY); two-dimensional and multiple quantum studies in nuclear magnetic resonance
FLOSS, HEINZ G.; PhD, 1961, TECHNICAL UNIVERSITY OF MUNICH (GERMANY); bioorganic and natural products chemistry
GELB, MICHAEL H.; PhD, 1982, YALE UNIVERSITY; mechanistic enzymology, bioorganic and medicinal chemistry
GOLDBERG, KAREN; PhD, 1988, UNIVERSITY OF CALIFORNIA (BERKELEY); energetics and mechanisms of fundamental organometallic reactions
GOUTERMAN, MARTIN; PhD, 1958, UNIVERSITY OF CHICAGO; electronic structure, spectra and luminescence of porphyrins, use of porphyrins as sensors
GREGORY, NORMAN W; PhD, 1943, OHIO STATE UNIVERSITY; structure and thermodynamic properties of inorganic substances, vaporization reactions
HALSEY, GEORGE D; PhD, 1948, PRINCETON UNIVERSITY; absorption and interaction of rare gases with surfaces, solid solutions of rare gases, catalysis
HEINEKEY, DENNIS M.; PhD, 1982, UNIVERSITY OF ALBERTA (CANADA); organometallic chemistry of the transition metals
HOPKINS, PAUL B; PhD, 1982, HARVARD UNIVERSITY; organic synthesis, bioorganic and nucleic acid chemistry
JONSSON, HANNES; PhD, 1985, UNIVERSITY OF CALIFORNIA (SAN DIEGO); computer simulations and scattering calculation in materials and surface science
KLEVIT, RACHEL E; DPhil, 1981, OXFORD UNIVERSITY (UK); protein structure and function; molecular recognition; protein NMR
KOVACS, JULIA A.; PhD, 1986, HARVARD UNIVERSITY; synthesis, structure, and reactivity of biologically relevant transition-metal complexes
KOWALSKI, BRUCE; PhD, 1969, UNIVERSITY OF WASHINGTON; analytical chemometrics, computerized instrumentation for process monitoring and control
NYASULU, FRAZIER W.; PhD, 1985, UNIVERSITY OF SALFORD (UK); chemical education, electroanalytical chemistry, electro depositions

SYNOVEC, ROBERT E.; PhD, 1986, IOWA STATE UNIVERSITY; multidimensional chemical separation techniques, chemometric data analysis

VAN DEN BOSCH, ROBERT; PhD, 1957, UNIVERSITY OF CALIFORNIA (BERKELEY); nuclear studies, particularly fission and nuclear reaction mechanisms, molecular clusters

WOODMAN, DARRELL J; PhD, 1965, HARVARD UNIVERSITY; peptide synthesis, heterocyclic compounds, computers in chemical education

XIA, YOUNAN; PhD, 1996, HARVARD UNIVERSITY; materials chemistry and nanotechnology

YAGER, PAUL; PhD, 1980, UNIVERSITY OF OREGON; physical chemistry, applications of biomembranes, biosensors, microfluidics, biomedical diagnostic

Research Professor

BRODSKY, ANATOL M.; DSc, 1960, INSTITUTE OF CHEMICAL PHYSICS (RUSSIA); solid state physics, radiation chemistry and physie science

Associate Professor

CRITTENDEN, ALDEN L; PhD, 1947, UNIVERSITY OF ILLINOIS; mass spectra, solid electrode polarography

KELLER, SARAH L.; PhD, 1995, PRINCETON UNIVERSITY; biophysics; physical chemistry; soft condensed matter; surfactants; lipids; self-assembly

MACKLIN, JOHN W; PhD, 1969, CORNELL UNIVERSITY; spectroscopic studies of materials in condensed phase and in solutions

PREZHD, OLEG; PhD, 1997, UNIVERSITY OF TEXAS (AUSTIN); Excitation dynamics of condensed phase chemical systems

SASAKI, TOMIKAZU; PhD, 1985, KYOTO UNIVERSITY (JAPAN); design and synthesis of functional proteins and protein mimetics

Assistant Professor

GAMELIN, DANIEL R.; PhD, 1997, STANFORD UNIVERSITY; physical inorganic chemistry; spectros copy, bio- and materials-related inorganic chemistry

GINGER JR, DAVID S.; PhD, 2001, UNIVERSITY OF CAMBRIDGE (UK); optical and electronic properties of organic and nanoscale materials, bioinspired materials

Lecturer

NYASULU, FRAZIER W.; PhD, 1985, UNIVERSITY OF SALFORD (UK); chemical education, electroanalytical chemistry, electro depositions

WIEGAND, DEBORAH H.; PhD, 1990, NORTHERN ILLINOIS UNIVERSITY; chemical education, electrochemistry on liquid/liquid interfaces

Classics

Professor

CLAUSS, JAMES J; PhD, 1983, UNIVERSITY OF CALIFORNIA (BERKELEY); Latin poetry and prose, Hellenistic literature, Latin literature of the Empire

HALLERAN, MICHAEL R; PhD, 1981, HARVARD UNIVERSITY; Greek literature, especially tragedy; Greek intellectual history

HARMON, DANIEL P.; PhD, 1968, NORTHERN ILLINOIS UNIVERSITY; Greek and Roman religion, Latin poetry, Greek tragedy, classical linguistics

MACKAY, PIERRE A; PhD, 1964, UNIVERSITY OF CALIFORNIA (BERKELEY); Greek literature, post classical and Byzantine Greek literature, numismatics

PASCAL, PAUL; PhD, 1953, UNIVERSITY OF NORTH CAROLINA; Latin literature, Roman archaeology, medieval Latin

Communication

Professor

BALDASTY, GERALD J; PhD, 1978, UNIVERSITY OF WASHINGTON; communications history and law, government-press relations, First Amendment philosophy and theory

BOSMAJIAN, HAIG A; PhD, 1960, STANFORD UNIVERSITY; rhetoric, freedom of speech

CARTER, RICHARD FREMONT; PhD, 1957, UNIVERSITY OF WISCONSIN; communications theory, methodology, behavioral analysis

GIFFARD, CHARLES A; PhD, 1968, UNIVERSITY OF WASHINGTON; international news systems, news flow, editing and reporting

LANG, GLADYS ENGEL; PhD, 1954, UNIVERSITY OF CHICAGO; political effects of mass media, sociology of art, political movements and crowd behavior

LANG, KURT; PhD, 1953, UNIVERSITY OF CHICAGO; political and social effects of the media on mass communication; arts and society; public opinion

PEMBER, DON R; PhD, 1969, UNIVERSITY OF WISCONSIN; contemporary law and mass communication, First Amendment history, regulation of mass communication

PHILIPSEN, GERRY F; PhD, 1972, NORTHERN ILLINOIS UNIVERSITY; ethnography of communication

SCHEIDEL, THOMAS; PhD, 1958, UNIVERSITY OF WASHINGTON; communication theory and research, small group processes

STAMM, KEITH R; PhD, 1968, UNIVERSITY OF WISCONSIN; communities and newspapers, new media technology, dynamic models of communication behavior

WARNICK, BARBARA P; PhD, 1977, UNIVERSITY OF MICHIGAN; rhetorical theory and criticism

YERZA, FENDALL WINSTON; BA, 1936, HAMILTON COLLEGE; journalism

Associate Professor

BOWEN, LAWRENCE; PhD, 1974, UNIVERSITY OF WISCONSIN; advertising, media research, consumer information-seeking and -processing behaviors

BOWES, JOHN E; PhD, 1971, MICHIGAN STATE UNIVERSITY; man-machine communication, public opinion, international communication

CECCARELLI, LEAH M.; PhD, 1995, NORTHERN ILLINOIS UNIVERSITY; rhetoric of science, rhetorical criticism

CRANSTON, PATRICIA; MA, 1954, UNIVERSITY OF TEXAS (AUSTIN); broadcast journalism, history, writing and production of docudramas

FEARN-BANKS, KATHLEEN A.; MS, 1965, UNIVERSITY OF CALIFORNIA (LOS ANGELES); crisis communications, history

JACKSON, KENNETH M; PhD, 1970, UNIVERSITY OF WASHINGTON; institutional communications, media research, mass media and public policy, cultural communications

MOY, PATRICIA; PhD, 1998, UNIVERSITY OF WASHINGTON; political communication, public opinion, media effects and research methodology

PARKS, MALCOLM R; PhD, 1976, MICHIGAN STATE UNIVERSITY; communication theory, interpersonal communication, social uses of the Internet, social network and o

POST, ROBERT M; PhD, 1961, OHIO UNIVERSITY; oral interpretation of literature

SAMUELSON, MERRILL; PhD, 1960, STANFORD UNIVERSITY; research methods, processes of reading, patterns in reader selection of new stories

SIMPSON, ROGER A; PhD, 1973, UNIVERSITY OF WASHINGTON; communication history, law of communication, media economics, editorial journalism

UNDERWOOD, DOUGLAS M; MA, 1974, OHIO STATE UNIVERSITY; newspaper economics and management, press and politics, literature and journalism
Comparative Literature

**Professor**

ADAMS, HAZARD S; PhD, 1953, UNIVERSITY OF WASHINGTON; romanticism, history of literary theory, Anglo-Irish literature

CHRISTOFOIDES, C G; PhD, 1956, UNIVERSITY OF MICHIGAN; medieval, seventeenth century, Romanesque

HRUBY, ANTONIN F; PhD, 1946, CHARLES UNIVERSITY (CZECHOSLOVAKIA); medieval literature

KRAMER, KARL D; PhD, 1964, UNIVERSITY OF WASHINGTON; Russian literature

LEINER, JACQUELINE; Docteur es Lettres, 1969, UNIVERSITY OF STRASBOUR (FRANCE); modern French literature.

REINERT, OTTO; PhD, 1952, YALE UNIVERSITY; comparative literature, eighteenth-century literature

STEELE, CYNTHIA; PhD, 1980, UNIVERSITY OF CALIFORNIA (SAN DIEGO); Latin American literature and society, cinema, postcolonial and feminist theory

STEENE, IRIGITA; PhD, 1960, UNIVERSITY OF WASHINGTON; Scandinavian drama and film, children’s literature, comparative literature

VANCE, EUGENE; PhD, 1964, CORNELL UNIVERSITY; medieval literature, the history of criticism, and discourse analysis

ZIADEH, FARHAT J; LLB, 1940, UNIVERSITY OF LONDON (UK); Arabic language and literature, Islamic law, Islamic institutions

**Associate Professor**

ELLRICH, ROBERT J; PhD, 1960, HARVARD UNIVERSITY; eighteenth-century French literature

KOGOJ-KAPETANIC, BREDA; LITTD, 1966, UNIVERSITY OF ZAGREB (YUGOSLAVIA); theory of comparative literature, 19th and 20th century European literature

MC LEAN, SAMMY K; PhD, 1963, UNIVERSITY OF MICHIGAN; Western drama, 20th-c poetry, psychoanalysis and literature, literary translation

SEHMSDORF, HENNING K; PhD, 1968, UNIVERSITY OF CHICAGO; folklore and mythology. Norwegian language and literature, comparative literature.

WARME, LARS G; PhD, 1974, UNIVERSITY OF CALIFORNIA (BERKELEY); Swedish language and literature, Scandinavian novel, comparative literature.

**Drama**

**Professor**

BORS, RUTHANNA; ballet technique and dance therapy.

KNAPP, JOAN S; MA, 1964, UNIVERSITY OF ILLINOIS; dance composition, improvisation, kinesthetic training.

WILEY, HANNAH; MA, 1981, NEW YORK UNIVERSITY; ballet, scientific aspects of dance, choreography, dance in higher education

**Associate Professor**

CURTIS-NEWTON, VALERIE; MA, 1996, UNIVERSITY OF WASHINGTON; theatrical production, theatre technique, theatre history

FORRESTER, WILLIAM D; MFA, 1969, YALE UNIVERSITY; scene design

JENKINS, MARK F.; 0; the Stanislavski approach to acting; acting, directing

JOHNSON, DAVID ODAI; PhD, 1994, UNIVERSITY OF TEXAS (AUSTIN); theatre history with an area of emphasis in English Restoration and 18th century

PARKER, SHANGA KYLE GERARD; MFA, 1991, UNIVERSITY OF CALIFORNIA (SAN DIEGO); acting in Shakespearean verse

VALENTINETTI, AURORA; MA, 1949, UNIVERSITY OF WASHINGTON; puppetry

**Earth and Space Sciences**

**Professor**

ADAMS, JOHN B; PhD, 1961, UNIVERSITY OF WASHINGTON; remote sensing, planetary geology

BARBET, BRIAN F; PhD, 1980, UNIVERSITY OF DELAWARE; Quaternary geology, earthquake hazards.

Baker, Marcia; PhD, 1971, UNIVERSITY OF WASHINGTON; cloud physics, atmospheric geophysics

Bergantz, George W; PhD, 1988, JOHNS HOPKINS UNIVERSITY; volcanology, surface processes, physical petrology

Booker, John R; PhD, 1968, UNIVERSITY OF CALIFORNIA (SAN DIEGO); magnetotellurics, tectonics, inverse theory

Brown, J. Michael; PhD, 1980, UNIVERSITY OF MINNESOTA; experimental and theoretical mineral and rock physics

Brownlee, Donald E; PhD, 1971, UNIVERSITY OF WASHINGTON; origin of the solar system, comets, interplanetary dust.

Businger, Joosta; PhD, 1954, UNIVERSITY OF UTRECHT (NETHERLANDS); energy transfer.

Charlson, Robert J; PhD, 1964, UNIVERSITY OF WASHINGTON; atmospheric chemistry

Cheney, Eric S.; PhD, 1964, YALE UNIVERSITY; economic and regional geology, sequence stratigraphy

Clark, Kenneth C; PhD, 1947, HARVARD UNIVERSITY; optical spectroscopy, upper atmosphere

Cowan, Darrel S; PhD, 1972, STANFORD UNIVERSITY; structural geology, regional tectonics

Creager, Joe S; PhD, 1958, TEXAS A&M UNIVERSITY; geological oceanography, sedimentology

Creager, Kenneth C; PhD, 1984, UNIVERSITY OF CALIFORNIA (SAN DIEGO); interdisciplinary research; geological oceanography; sedimentology

**Assistant Professor**

Madden, Catherine M; MA, 1977, WASHINGTON UNIVERSITY; Alexander technique, acting

Wolcott, John R; PhD, 1967, OHIO STATE UNIVERSITY; theatre history, computing in theatre research

**Lecturer**

Collum, Jerry L; BFA, 1984, AUBURN UNIVERSITY; technical theatre

Shahn, Judith; BFA, 1977, CARNEGIE MELLON UNIVERSITY; voice production for the theatre, dialects, Shakespeare and modern text

Trott, Deborah L; MFA, 1994, YALE UNIVERSITY; design for the theatre; costume and set design

**Assistant Professor**

Maddan, Catherine M; MA, 1977, Washington University; Alexander technique, acting

Wolcott, John R; PhD, 1967, Ohio State University; theatre history, computing in theatre research

**Lecturer**

Collum, Jerry L; BFA, 1984, Auburn University; technical theatre

Shahn, Judith; BFA, 1977, Carnegie Mellon University; voice production for the theatre, dialects, Shakespeare and modern text

Trott, Deborah L; MFA, 1994, Yale University; design for the theatre; costume and set design
DIEGO); seismology, geophysical inverse theory
CROSSON, ROBERT S; PhD, 1966, STANFORD UNIVERSITY; seismology, earth structure, tectonics, earthquake hazards
DELANEY, JOHN R; PhD, 1977, UNIVERSITY OF ARIZONA; geological oceanography, origin of oceanic crust, igneous petrology
EVANS, BERNARD W; PhD, 1959, OXFORD UNIVERSITY (UK); mineralogy, metamorphic petrology
HOESE, SUBRATA; PhD, 1959, UNIVERSITY OF CHICAGO; mineral physics, crystallography, mineralogy
GILLESPIE, ALAN R.; PhD, 1982, CALIFORNIA INSTITUTE OF TECHNOLOGY; Quaternary stratigraphy, paleoenvironmental research
JOHNS, HARLAN PAUL; PhD, 1972, UNIVERSITY OF WASHINGTON; paleomagnetism and marine geophysics
MC CALLUM, IAN S; PhD, 1968, UNIVERSITY OF CALIFORNIA (BERKELEY); experimental space plasma physics, atmospheric/magnetospheric electric fields, thunderstorms
MC CALLUM, IAN S; PhD, 1968, UNIVERSITY OF CALIFORNIA (BERKELEY); experimental space plasma physics, atmospheric/magnetospheric electric fields, thunderstorms
MCGREGOR, PETER H; PhD, 1972, UNIVERSITY OF BRITISH COLUMBIA (CANADA); glacier and ice sheet dynamics, paleoclimatology
MCINTOSH, JEFFREY H.; PhD, 1983, UNIVERSITY OF CALIFORNIA (LOS ANGELES); seismology, earthquake processes
MCINTYRE, DAVID A; PhD, 1969, UNIVERSITY OF BRITISH COLUMBIA (CANADA); glacier and ice sheet dynamics, paleoclimatology
MCKINLEY, RICHARD E; PhD, 1975, UNIVERSITY OF CALIFORNIA (BERKELEY); geomorphology, remote sensing
MILLER, RICHARD H.; PhD, 1982, ADAMSTOWN UNIVERSITY; volcanic eruptions, eruption forecasting
MILLER, WILLIAM J.; PhD, 1972, UNIVERSITY OF WASHINGTON; aerospace engineering, supercomputers
MONTGOMERY, DAVID R; PhD, 1991, UNIVERSITY OF CALIFORNIA (BERKELEY); geomorphology (fluvial and hillside)
NEWHALL, CHRISTOPHER; PhD, 1980, DARTMOUTH COLLEGE; volcanic processes, eruption forecasting
PARKS, GEORGE K; PhD, 1966, UNIVERSITY OF CALIFORNIA (BERKELEY); magnetospheric and space plasma physics
PORTER, STEPHEN C; PhD, 1962, YALE UNIVERSITY; Quaternary stratigraphy, geochronology, paleoclimatology
RAYMOND, CHARLES F; PhD, 1969, CALIFORNIA INSTITUTE OF TECHNOLOGY; glaciology, ice sheet dynamics
RENSBERGER, JOHN M; PhD, 1967, UNIVERSITY OF CALIFORNIA (BERKELEY); vertebrate paleontology and evolution
SACK, RICHARD O; PhD, 1979, HARVARD UNIVERSITY; petrology, geochemistry of volcanic rocks, mantle geochemistry
SAHAI, SHASHI; PhD, 1980, UNIVERSITY OF CALIFORNIA (BERKELEY); geochemistry, geologic time scale, isotopic geochemistry
SARKAR, ANUJ; PhD, 1979, UNIVERSITY OF CALIFORNIA (BERKELEY); geochronology, neotectonics
Sargent, W. H.; PhD, 1967, UNIVERSITY OF CALIFORNIA (LOS ANGELES); seismology, earthquake processes
SHEN, XIAOJUN; PhD, 1991, UNIVERSITY OF WASHINGTON; solid state physics, magnetic properties
STEER, BRIAN; PhD, 1972, UNIVERSITY OF BRITISH COLUMBIA (CANADA); glacier and ice sheet dynamics, paleoclimatology
SWANSON, W. A.; PhD, 1981, UNIVERSITY OF WASHINGTON; geophysical fluid dynamics, atmospheric dynamics, ocean dynamics
TAYLOR, TIM; PhD, 1982, UNIVERSITY OF CALIFORNIA (BERKELEY); geomorphology, remote sensing
WENTWORTH, ROBERT; PhD, 1968, UNIVERSITY OF CALIFORNIA (BERKELEY); geomorphology, remote sensing
YEH, J. C.; PhD, 1982, UNIVERSITY OF WASHINGTON; geophysical fluid dynamics, atmospheric dynamics
ZEBROWSKI, RICHARD E; PhD, 1972, UNIVERSITY OF CALIFORNIA (BERKELEY); geomorphology, remote sensing
ZHI, YUN; PhD, 1981, UNIVERSITY OF WASHINGTON; geophysical fluid dynamics, atmospheric dynamics
Associate Professor
STEIG, ERIC J; PhD, 1996, UNIVERSITY OF WASHINGTON; stable and cosmogenic isotope geochemistry, glaciology
STONE, JOHN O.H.; PhD, 1986, CAMBRIDGE UNIVERSITY (UK); cosmogenic isotope geochemistry
WILCOCK, WILLIAM D S; PhD, 1992, MASSACHUSETTS INSTITUTE OF TECHNOLOGY; marine seismology, dynamics of mid-ocean ridges, geophysical modelling
WILLET, SEAN D; PhD, 1988, UNIVERSITY OF UTAH; geodynamics, earthquake hazards, modelling
Research Associate Professor
ABRAMSON, EVAN H.; PhD, 1985, MASSACHUSETTS INSTITUTE OF TECHNOLOGY; The thermodynamic and transport properties of materials at extreme pressures
ELY, JOHN T; PhD, 1969, UNIVERSITY OF WASHINGTON; background radiation as part of the geophysical environment
KRESS, VICTOR C; PhD, 1990, UNIVERSITY OF CALIFORNIA (BERKELEY); igneous petrology, physics/chemistry of volcanoes
MC CARThY, MICHAEL P; PhD, 1988, UNIVERSITY OF WASHINGTON; solar wind and magnetospheric physics
MERCER, JAMES A; PhD, 1983, UNIVERSITY OF WASHINGTON; ocean acoustic tomography, global climate measurements, ocean dynamic modelling
QOOOM, ROBERT I; PhD, 1980, UNIVERSITY OF WASHINGTON; Theoretical seismology; ocean acoustic tomography; wave propagation and scattering
SWANSON, BRIAN; PhD, 1992, UNIVERSITY OF WASHINGTON; atmospheric geophysics, cloud physics, physics of ice crystals
Assistant Professor
CLADOUHOS, TRENTON T; PhD, 1993, CORNELL UNIVERSITY; structural geology, hydrogeology of fractured rocks
COOPER, KARI MELISSA; PhD, 2001, CALIFORNIA INSTITUTE OF TECHNOLOGY; Isotope geochemistry of volcanic rocks, timescales of magmatic processes, mantle geochemistry
COOPER, KARI MELISSA; PhD, 2001, UNIVERSITY OF CALIFORNIA (LOS ANGELES); Isotope geochemistry of volcanic rocks, timescales of magmatic processes, mantle geochemistry
DAVIES-VOLLUM, SIAN; DPhil, 1993, OXFORD UNIVERSITY (UK); MSC, 1990, UNIVERSITY OF LONDON (UK); Sedimentological research, paleoenvironmental & paleoecological reconstructions-ancient river systems
Research Assistant Professor
PUTKONEN, JAAKKO K; PhD, 1997, UNIVERSITY OF WASHINGTON; Quaternary geology, frozen ground research, cosmogenic isotope dating

Lecturer
CHERNICOFF, STANLEY E; PhD, 1980, UNIVERSITY OF MINNESOTA; geomorphology.

Swanson, Terry W; PhD, 1994, UNIVERSITY OF WASHINGTON; Quaternary geology, geochronology

Economics

Professor
BROWN, GARDNER; PhD, 1964, UNIVERSITY OF CALIFORNIA (BERKELEY); resource economics
BRUCE, NEIL; PhD, 1975, UNIVERSITY OF CHICAGO; public finance (economics of the public sector), especially taxation
CRUTCHFIELD, JAMES A; PhD, 1954, UNIVERSITY OF CALIFORNIA (BERKELEY); natural resources economics, policy and management, especially marine and environmental resources
HALVORSEN, ROBERT F; PhD, 1973, HARVARD UNIVERSITY; natural resource economics
HARTMAN, RICHARD C; PhD, 1971, UNIVERSITY OF CALIFORNIA (BERKELEY); economic theory
LUNDBERG, SHELLY J; PhD, 1981, NORTHWESTERN UNIVERSITY; labor economics
MAH, FENG-HWA; PhD, 1959, UNIVERSITY OF MICHIGAN; Chinese economy and foreign trade
MC AFFRÈE, KENNETH M; PhD, 1950, UNIVERSITY OF CHICAGO; labor economics and the economics of medicine
MC GEE, JOHN S; PhD, 1952, VANDERBILT UNIVERSITY; industrial organization
MORRIS, MORRIS D; PhD, 1954, UNIVERSITY OF CALIFORNIA (BERKELEY); economic history and the economy of India
NELSON, CHARLES R; PhD, 1969, UNIVERSITY OF WISCONSIN; time series analysis, economic statistical analysis, advanced macroeconomic theory
NORTH, DOUGLAS C; PhD, 1952, UNIVERSITY OF CALIFORNIA (BERKELEY); economic history
PARKS, RICHARD; PhD, 1966, UNIVERSITY OF CALIFORNIA (BERKELEY); econometrics
STARTZ, RICHARD; PhD, 1978, MASSACHUSETTS INSTITUTE OF TECHNOLOGY; macroeconomics, econometrics, finance, economics of taste
TURNOVSKY, STEPHEN J; PhD, 1968, HARVARD UNIVERSITY; monetary and macroeconomics, international economics, theory of economic stabilization

Assistant Professor
PORTNER, CLAUS C; PhD, 2001, UNIVERSITY OF COPENHAGEN (DENMARK); Household and Family Economics; Economic Development; Empirical Microeconomics; Labour Economics

Lecturer
SALEHI-ESFAHANI, HAIDEH; PhD, 1985, UNIVERSITY OF PENNSYLVANIA; international economics, economic development

English

Professor
ALEXANDER, EDWARD; PhD, 1963, UNIVERSITY OF MINNESOTA; Romantic and Victorian literature
ALLEN, CAROLYN; PhD, 1972, UNIVERSITY OF MINNESOTA; twentieth-century literature, women writers, contemporary critical theory
BURNS, WAYNE; PhD, 1946, CORNELL UNIVERSITY; Victorian literature
COLDWEY, JOHN C; PhD, 1972, UNIVERSITY OF COLORADO (BOULDER); medieval and Renaissance drama and literature

Daniel, Brian T; PhD, 1969, UNIVERSITY OF CALIFORNIA (BERKELEY); rhetoric, composition
FOWLER, DAVID C; PhD, 1949, UNIVERSITY OF CHICAGO; medieval literature, comparative religion
FREY, CHARLES HUBBARD; PhD, 1971, YALE UNIVERSITY; Renaissance literature, Shakespeare
GERSTENBERGER, DONNA; PhD, 1958, UNIVERSITY OF OKLAHOMA; twentieth-century literature, Anglo-Irish literature, feminist criticism
HANDWERK, GARY J; PhD, 1984, BROWN UNIVERSITY; British, German, and French nineteenth- and twentieth-century narrative; Romantic and post-Romantic
IRMSCHER, WILLIAM F; PhD, 1950, INDIANA UNIVERSITY; rhetoric and theory of composition
JOHNSON, CHARLES R; PhD, 1988, STATE UNIV OF NEW YORK (STONY BROOK); fiction writing
KENNEY, RICHARD L; BA, 1970, DARTMOUTH COLLEGE; poetry writing
KORG, JACOB; PhD, 1952, COLUMBIA UNIVERSITY; Victorian, twentieth-century literature
MATCHETT, WILLIAM H; PhD, 1957, HARVARD UNIVERSITY; Renaissance literature, Shakespeare
MC CRACKEN, J DAVID; PhD, 1966, UNIVERSITY OF CHICAGO; eighteenth-century literature, Blake; Wordsworth; biblical literature (esp. gospels, parables)
REINERT, OTTO; PhD, 1952, YALE UNIVERSITY; comparative literature, eighteenth-century literature
RUSS, JOANNA; MFA, 1960, YALE UNIVERSITY; fiction writing
SALE, ROGER H; PhD, 1957, CORNELL UNIVERSITY; Renaissance literature
SHELD, DAVID; MFA, 1980, UNIVERSITY OF IOWA; creative nonfiction, autobiography, fiction writing, contemporary literature
SHULMAN, ROBERT; PhD, 1959, OHIO STATE UNIVERSITY; American literature
SILBERSTEIN, SANDRA V; PhD, 1982, UNIVERSITY OF MICHIGAN; TESL, critical theory, discourse analysis, sociolinguistics, language and culture
SIMONSON, HAROLD P; PhD, 1958, NORTHWESTERN UNIVERSITY; American literature
STATEN, HENRY J.; PhD, 1978, UNIVERSITY OF TEXAS (AUSTIN); 19th- and 20th-century British literature, history of literary criticism, contemporary theory
STEVICK, ROBERT D; PhD, 1956, UNIVERSITY OF WISCONSIN; medieval language and literature
WAGONER, DAVID R; MA, 1949, IOWA STATE UNIVERSITY; twenty-first-century literature, fiction and poetry writing
WONG, SHAWN H; MA, 1974, SAN FRANCISCO STATE; creative writing, Chinese-American area studies
Associate Professor

ABRAMS, ROBERT; PhD, 1973, INDIANA UNIVERSITY; American literature
BAWARSHI, ANIS; PhD, 1999, UNIVERSITY OF KANSAS; rhetoric and composition studies, with an emphasis in genre theory, invention
BRENNER, GERALD J; PhD, 1969, UNIVERSITY OF NEW MEXICO; American literature, fiction writing
BUTWIN, JOSEPH M; PhD, 1971, HARVARD UNIVERSITY; Victorian literature
CUMMINGS, KATHERINE; PhD, 1985, UNIVERSITY OF WISCONSIN; cultural studies, critical theory, queer studies, 20th c americanist
GRIFFITH, JOHN W; PhD, 1969, UNIVERSITY OF OREGON; American literature
GUERRA, JUAN C; PhD, 1992, UNIVERSITY OF ILLINOIS; Literacy, Ethnography, Composition, Pedagogy and Chicano Literature
HARVEY, LAWRENCE; PhD, 1986, UNIVERSITY OF CALIFORNIA; American literature
Hudson, LOIS PHILLIPS; LITTD, 1965; NORTH DAKOTA STATE UNIVERSITY; fiction writing
LONGYEAR, CHRISTOPHER R; PhD, 2004, UNIVERSITY OF CALIFORNIA; language linguistics, forensic linguistics
MUSSETTER, SALLY ANN; PhD, 1975, CORNELL UNIVERSITY; medieval language and literature
PALOMO, DOLORES J; PhD, 1972, STATE UNIVERSITY OF NEW YORK (BUFFALO); Renaissance literature, women writers
PATTERSON, MARK R; PhD, 1981, PRINCETON UNIVERSITY; American literature
SIMPSON, CAROLINE CHUNG; PhD, 1994, UNIVERSITY OF TEXAS (AUSTIN); Asian American studies and postwar American culture
SMITH, EUGENE H; PhD, 1963, UNIVERSITY OF WASHINGTON; rhetoric and theory of composition
STANTON, ROBERT B; PhD, 1953, INDIANA UNIVERSITY; American literature
STYGALL, GAIL; PhD, 1989, INDIANA UNIVERSITY; discourse analysis, rhetoric and composition, English language linguistics, forensic linguistics
WEBSTER, JOHN M; PhD, 1974, UNIVERSITY OF CALIFORNIA (BERKELEY); Renaissance literature

Assistant Professor

CHAUDHARY, ZAHID R; PhD, 2004, CORNELL UNIVERSITY; postcolonial theory & ii, critical theory
FEETHAM, ELIZABETH L; PhD, 1977, UNIVERSITY OF WASHINGTON; Graduate education in the United States
GRIFFITH, MALCOLM A; PhD, 1966, OHIO STATE UNIVERSITY; twentieth-century literature, modern criticism, American literature
HARKINS, GILLIAN H; PhD, 2002, UNIVERSITY OF CALIFORNIA (BERKELEY); gender and sexuality, twentieth century U.S. fiction
KANNO, YASUKO; PhD, 1996, UNIVERSITY OF TORONTO (CANADA); language and identity, bilingual education, language minority education; qualitative research

Lecturer

GEOGEB, E. LAURIE; PhD, 1984, UNIVERSITY OF OREGON; computer-integrated pedagogy (writing and literature) feminist pedagogies, rhetoric
LUSKEY, MATTHEW C; PhD, 2003, UNIVERSITY OF OREGON; Composition and Rhetoric, Interdisciplinary Writing, Modernism, Film Studies
POPOV, NIKOLAI B; PhD, 1994, UNIVERSITY OF WASHINGTON; modern irish, slavic, and german writers, literary theory and criticism; translation
SIMMONS-ONEILL, ELIZABETH F; PhD, 1988, UNIVERSITY OF WASHINGTON; expository and interdisciplinary writing, service learning
WACKER, NORMAN J.; PhD, 1986, UNIVERSITY OF WASHINGTON; expository and interdisciplinary writing

Geography

Professor

FLEMING, DOUGLAS K; PhD, 1965, UNIVERSITY OF WASHINGTON; transportation geography (especially ocean and air), regional organization of western Europe
HART, LAWRENCE G; PhD, 1985, UNIVERSITY OF OREGON; rural health policy, medical geography
JACKSON, W A DOUGLAS; PhD, 1953, UNIVERSITY OF MARYLAND; Canada
KRAMME, GUNTER; PhD, 1966, UNIVERSITY OF WASHINGTON; economic geography, regional economics, location theory, organization and decision theory
MAYER, JONATHAN D; PhD, 1977, UNIVERSITY OF MICHIGAN; medical geography, health policy, env. health, epidemiology, infl. health, infectious diseases
MORRILL, RICHARD L; PhD, 1959, UNIVERSITY OF WASHINGTON; social and economic geography, theory and quantitative methods, spatial organization, migration
NYERGES, TIMOTHY L.; PhD, 1980, OHIO STATE UNIVERSITY; GIS, spatial decision support, urban, transportation, environmental
VELIKONJA, JOSEPH; PhD, 1948, STATE UNIVERSITY (ITALY); social and political geography, international migration, immigrants in America, eastern Europe
ZUMBRUNNEN, CRAIG; PhD, 1973, UNIVERSITY OF CALIFORNIA (BERKELEY); resource analysis, Russia and NIS, environment, mathematical programming, urban ecology

Associate Professor

CHANG, KUEI-SHING; PhD, 1955, UNIVERSITY OF MICHIGAN; economic geography of China, historical geography of exploration, Third World development
JAROSZ, LUCY A.; PhD, 1990, UNIVERSITY OF CALIFORNIA (BERKELEY); critical development studies, food and agriculture, rural poverty and inequality, political ecology
KAKIUCHI, GEORGE H; PhD, 1957, UNIVERSITY OF MICHIGAN; Japan, agriculture, internal migration, regional geography
SPARKE, MATTHEW; PhD, 1996, UNIVERSITY OF BRITISH COLUMBIA (CANADA); political-geography, social theory, cultural studies, globalization

Germanics

Professor

HRUBY, ANTONIN F; PhD, 1946, CHARLES UNIVERSITY (CZECHOSLOVAKIA); medieval literature
REY, WILLIAM H; PhD, 1937, UNIVERSITY OF FRANKFURT (GERMANY); nineteenth and twentieth century German literature

Associate Professor

MCLEAN, SAMMY K; PhD, 1963, UNIVERSITY OF MICHIGAN; Western drama, 20th-c poetry, psychoanalysis and literature, literary translation

Lecturer

BRANDL, KLAUS K; PhD, 1991, UNIVERSITY OF TEXAS (AUSTIN); foreign language pedagogy, applied linguistics, foreign language teacher training

History

Professor

ALDEN, DAURIL; PhD, 1959, UNIVERSITY OF CALIFORNIA (BERKELEY); Latin American history, comparative colonial history
BACHARACH, JERE L; PhD, 1967, UNIVERSITY OF MICHIGAN; history of the Near East
BERQUIST, CHARLES W; PhD, 1973, STANFORD UNIVERSITY; modern Latin American history, comparative labor history, Third World development
BRIDGMAN, JON M; PhD, 1960, STANFORD UNIVERSITY; modern European history (especially military)

BUTOW, ROBERT J C; PhD, 1953, STANFORD UNIVERSITY; East Asian diplomatic history

CONLON, FRANK F; PhD, 1969, UNIVERSITY OF MINNESOTA; history of India

EBREY, PATRICIA B ; PhD, 1975, COLUMBIA UNIVERSITY; The social and cultural history of China, especially the Song Dynasty (960-1279)

FERRILL, ARTHUR L; PhD, 1964, UNIVERSITY OF ILLINOIS; ancient history

FOWLER, WILTON B; PhD, 1966, YALE UNIVERSITY; American history (especially diplomatic)

GIL, CARLOS; PhD, 1975, UNIVERSITY OF CALIFORNIA (LOS ANGELES); Latin America and history of the Chicano people

GREGORY, JAMES N; PhD, 1983, UNIVERSITY OF CALIFORNIA (BERKELEY); U.S. social and political history since 1865, labor, the West

HANKINS, THOMAS L; PhD, 1964, CORNELL UNIVERSITY; history of science

JONAS, RAYMOND A.; PhD, 1985, UNIVERSITY OF CALIFORNIA (BERKELEY); modern France

KIRKENDALL, RICHARD S; PhD, 1958, UNIVERSITY OF WISCONSIN; recent United States history

LEBSOCK, SUZANNE D.; PhD, 1977, UNIVERSITY OF VIRGINIA; history of women, American social history, history of the South

LEVY, FRED J; PhD, 1960, HARVARD UNIVERSITY; history of England in the sixteenth- and seventeenth- centuries, English historiography

PALAIS, JAMES B; PhD, 1968, HARVARD UNIVERSITY; modern Korean history

PEASE, OTIS A; PhD, 1954, YALE UNIVERSITY; United States in the twentieth century

PRESSLY, THOMAS J; PhD, 1949, HARVARD UNIVERSITY; history

RAFAEL, VICENTE L.; PhD, 1984, CORNELL UNIVERSITY; colonialism and nationalism, technology and translation, Filipino studies, S.E. Asia, Asian American

SAUM, LEWIS O; PhD, 1962, UNIVERSITY OF MISSOURI; American intellectual history

SEARS, LAURIE J; PhD, 1986, UNIVERSITY OF WISCONSIN; Southeast Asian social and cultural history

STACEY, ROBIN C; PhD, 1986, YALE UNIVERSITY; early and high medieval history, tribal law, Celtic/Anglo-Saxon literature, heresy

ULLMAN, JOAN CONNELLY; PhD, 1963, BRYN MAWR COLLEGE; modern Spain

Chinese history, urban history, gender studies

FELAK, JAMES R; PhD, 1989, INDIANA UNIVERSITY; modern East European history

MCKENZIE, ROBERT T; PhD, 1988, VANDERBILT UNIVERSITY; nineteenth-century U.S., U.S. economic

International Studies

Professor

BACHMAN, DAVID M; PhD, 1984, STANFORD UNIVERSITY; Chinese politics and foreign policy and China's political economy (1949-present); US-China relations

BRASS, PAUL R; PhD, 1964, UNIVERSITY OF CHICAGO; comparative government, international relations

BUTOW, ROBERT J C; PhD, 1953, STANFORD UNIVERSITY; East Asian diplomatic history

ELLISON, HERBERT J; PhD, 1955, UNIVERSITY OF LONDON (UK); modern Russian history

HANLEY, SUSAN B; PhD, 1971, YALE UNIVERSITY; premorden Japan

HELLMANN, DONALD C; PhD, 1964, UNIVERSITY OF CALIFORNIA (BERKELEY); Japanese politics and international relations

KAPETANIC, DAVOR; PhD, 1972, UNIVERSITY OF ZAGREB (YUGOSLAVIA); Yugoslav literature, Slavic literary theory

LEGTERS, LYMAN H; PhD, 1958, FREIE UNIVERSITY OF BERLIN (GERMANY); Russian and East European Studies.

MAH, FENG-HWA; PhD, 1959, UNIVERSITY OF MICHIGAN; Chinese economy and foreign trade.

MICKLESEN, LEW R; PhD, 1951, HARVARD UNIVERSITY; Slavic linguistics

MIGDAL, JOEL S; PhD, 1972, HARVARD UNIVERSITY; state and society in the Third World; Middle East politics

PALAIS, JAMES B; PhD, 1968, HARVARD UNIVERSITY; modern Korean history

POZNANSKI, KAZIMIERZ; PhD, 1974, UNIVERSITY OF WARSAW (POLAND); international trade; economics of technology; comparative economic systems

WEBB, EUGENE; PhD, 1965, COLUMBIA UNIVERSITY; modern English, French, and German literature, comparative religion

YAMAMURA, KOZO; PhD, 1964, NORTHWESTERN UNIVERSITY; economic development and economic history of Japan, comparative economic history

YANG, ANAND A; PhD, 1976, UNIVERSITY OF CHICAGO; History of labor migration and crime and punishment in colonial South and Southeast Asia

Associate Professor

DONG, YUE; PhD, 1996, UNIVERSITY OF CALIFORNIA (SAN DIEGO); modern Chinese history, urban history, gender studies

ANCHORDOGUY, MARIE C; PhD, 1986, UNIVERSITY OF CALIFORNIA (BERKELEY); Japan’s political economy; East Asian economic development

DON, YUE; PhD, 1996, UNIVERSITY OF CALIFORNIA (SAN DIEGO); modern Chinese history, urban history, gender studies

GIEBEL, CHRISTOPH; PhD, 1996, CORNELL UNIVERSITY; Viet Nam; 20th century history, communism, labor, post-independence historiography

LAVELY, WILLIAM R.; PhD, 1982, UNIVERSITY OF MICHIGAN; social demography of China

SPARKE, MATTHEW; PhD, 1996, UNIVERSITY OF BRITISH COLUMBIA (CANADA); political-geography, social theory, cultural studies, globalization

WARREN, JONATHAN W.; PhD, 1997, UNIVERSITY OF CALIFORNIA (BERKELEY); race and ethnicity, Latin American studies, cultural studies, Native American studies

YOUNG, GLENNYS J.; PhD, 1989, UNIVERSITY OF CALIFORNIA (BERKELEY); late Imperial and early Soviet Russia

Assistant Professor

TOKUNO, KYOKO; PhD, 1994, UNIVERSITY OF CALIFORNIA (BERKELEY); Chinese and Japanese Buddhism of medieval period. Buddhist polemical literature in China

WELLMAN, JAMES K.; PhD, 1995, UNIVERSITY OF CHICAGO; Western religions, contemporary American religion, liberal Protestantism, US & global evangelicalism

Linguistics

Professor

AUGEROT, JAMES E.; PhD, 1968, UNIVERSITY OF WASHINGTON; Slavic linguistics, Romanian, Bulgarian

BARRACK, CHARLES M; PhD, 1969, UNIVERSITY OF WASHINGTON; Germanic linguistics

Brame, Michael; PhD, 1970, MASSACHUSETTS INSTITUTE OF TECHNOLOGY; syntax, phonology, structure of Arabic and English, cross-linguistic comparisons, poetcs

Contreras, Heles; PhD, 1961, INDIANA UNIVERSITY; Spanish linguistics, syntax and English semantics

Huhn, Eugene S; PhD, 1973, UNIVERSITY OF CALIFORNIA (BERKELEY); cognitive anthropology, ethnobiology, cultural ecology and evolution, North American Indians

Kuhl, Patricia K; PhD, 1973, UNIVERSITY OF MINNESOTA; speech perception.
Associate Professor
DZIWIŁEK, KATARZyna A.; PhD, 1991, UNIVERSITY OF CALIFORNIA (SAN DIEGO); linguistics, syntax and typology
ETZIONI, OREN; PhD, 1990, CARNEGIE MELLON UNIVERSITY; artificial intelligence and information retrieval, natural language interfaces, software agents
KAUTZ, HENRY; PhD, 1988, UNIVERSITY OF ROCHESTER; artificial intelligence, knowledge representation, decision-theoretic control of reasoning
OHTA, AMY; PhD, 1993, UNIVERSITY OF CALIFORNIA (LOS ANGELES); applied linguistics, especially second language acquisition, discourse analysis, and Japanese
OSTERHOUT, LEE E; PhD, 1990, TUFTS UNIVERSITY; psycholinguistics, cognitive psychophysiology
STROER, JUDITH R; PhD, 1976, UNIVERSITY OF CALIFORNIA (LOS ANGELES); comparative Romance syntax, second language acquisition, foreign language teaching
WRIGHT, RICHARD A.; PhD, 1996, UNIVERSITY OF CALIFORNIA (LOS ANGELES); phonetics, production/perception, automatic speech recognition, phonology, African languages

Assistant Professor
BILAMI, LAADA M.; PhD, 1998, UNIVERSITY OF MICHIGAN; Language politics, language ideology, ethnicity, nationalism, gender, Ukraine, former USSR.
BILMES, JEFFREY A.; PhD, 1999, UNIVERSITY OF CALIFORNIA (BERKELEY); Speech & pattern recognition, learning, audio processing, high-performance computing, human-computer
HANDEL, ZEV; PhD, 1998, UNIVERSITY OF CALIFORNIA (BERKELEY); Chinese historical phonology; Sino-Tibetan linguistics.

Mathematics

Professor
ARSOVE, MAYNARD G; PhD, 1950, BROWN UNIVERSITY; potential theory, complex function theory, theory of bases
BLUMENTHAL, ROBERT M; PhD, 1956, CORNELL UNIVERSITY; probability
BROWN, FRANCIS H; PhD, 1949, YALE UNIVERSITY; differential equations, applied mathematics
BUDGE, KENNETH P.; PhD, 1976, STANFORD UNIVERSITY; numerical analysis, partial differential equations
BURDZY, KRZYSZTOF; PhD, 1984, UNIVERSITY OF CALIFORNIA (BERKELEY); probability theory
BURRE, JAMES V; PhD, 1983, UNIVERSITY OF ILLINOIS; optimization, nonsmooth analysis
CHAYES, JENNIFER T.; PhD, 1983, PRINCETON UNIVERSITY; theoretical condensed-matter physics
CHEN, ZHEN-QING; PhD, 1992, WASHINGTON UNIVERSITY; probability theory and stochastic analysis
COLLINGWOOD, DAVID; PhD, 1983, UNIVERSITY OF UTAH; computational biology, Lie theory
CURIEL, CASPAR R; DSc, 1960, EIDGENOSSE TECHNISCHE HOCHSCHULE (SWITZ); algebraic topology, algebra
LUBISCH, ROY; PhD, 1943, UNIVERSITY OF CHICAGO; teacher training, elementary and secondary curriculum
DUCHAMP, THOMAS E.; PhD, 1976, UNIVERSITY OF ILLINOIS; differential geometry
FREEDMAN, MICHAEL H.; PhD, 1973, PRINCETON UNIVERSITY; topology
GANGOLLI, RAMESH A; PhD, 1961, MASSACHUSETTS INSTITUTE OF TECHNOLOGY; probability theory, harmonic analysis on Lie groups
GOLDSMITH, ALLEN A.; PhD, 1954, GEORGETOWN UNIVERSITY; approximation theory, nonlinear programming, control theory, calculus of variations
GOODEARL, KENNETH R.; PhD, 1971, UNIVERSITY OF WASHINGTON; noncommutative algebra (noetherian rings, quantum groups, regular rings, \( C^* \)-algebras)
GRAHAM, C. ROBIN; PhD, 1981, PRINCETON UNIVERSITY; partial differential equations, differential geometry, invariant theory
GREENBAUM, ANNE O; PhD, 1981, UNIVERSITY OF CALIFORNIA (BERKELEY); applied analysis and computational mathematics
GREENBERG, RALPH; PhD, 1971, PRINCETON UNIVERSITY; number theory
GRUNBAUM, BRANKO; PhD, 1957, HEBREW UNIVERSITY (ISRAEL); geometry
KAS, ARNOLD; PhD, 1966, STANFORD UNIVERSITY; Bioinformatics, Genetics and Genome Annotation.
KIM, JEONG HAN; PhD, 1993, RUTGERS UNIVERSITY; mathematical physics (statistical mechanics), combinatorics
KLEE, VICTOR; PhD, 1949, UNIVERSITY OF VIRGINIA; convex sets, functional analysis, analysis of algorithms, optimization, combinatorics
KOBLITZ, NEAL I; PhD, 1974, PRINCETON UNIVERSITY; number theory and cryptography
LEE, JOHN M; PhD, 1982, MASSACHUSETTS INSTITUTE OF TECHNOLOGY; differential geometry and partial differential equations
LOVASK, LASZLO; PhD, 1977, HUNGARIAN ACADEMY OF SCIENCES; discrete mathematics
MARCHALL, DONALD E; PhD, 1976, UNIVERSITY OF CALIFORNIA (LOS ANGELES); complex analysis
MCDOUGAL, WILLIAM M; PhD, 1987, MASSACHUSETTS INSTITUTE OF TECHNOLOGY; representation theory
MICHAEL, ERNEST A; PhD, 1951, UNIVERSITY OF CHICAGO; topology
MITCHELL, STEPHEN A; PhD, 1981, UNIVERSITY OF WASHINGTON; algebraic topology
MORROW, JAMES ALLEN; PhD, 1967, STANFORD UNIVERSITY; complex singularities, inverse problems
NAMIOKA, ISAA; PhD, 1956, UNIVERSITY OF CALIFORNIA (BERKELEY); functional analysis
NIJENHUIS, ALBERT; PhD, 1952, UNIVERSITY OF AMSTERDAM (NETHERLANDS); geometry, combinatorics, computational complexity
NUNKE, RONALD; PhD, 1955, UNIVERSITY OF CHICAGO; category theory, Abelian groups
PHELS, ROBERT R; PhD, 1958, UNIVERSITY OF WASHINGTON; convexity, functional analysis, geometry of Banach spaces, optimization
RAGOZIN, DAVID; PhD, 1967, HARVARD UNIVERSITY; approximation theory
ROCKAFELLAR, R T; PhD, 1963, HARVARD UNIVERSITY; variational analysis and optimization
ROHDE, STEFFEN; PhD, 1989, UNIVERSITY OF BERLIN (GERMANY); complex analysis
SCHRAMM, ODED; PhD, 1990, PRINCETON UNIVERSITY; complex analysis
SEGAL, JACK; PhD, 1960, UNIVERSITY OF GEORGIA; topology, shape theory
SMITH, HART F; PhD, 1989, PRINCETON UNIVERSITY; partial differential equations, Fourier analysis

**Professor**

BOLER, JOHN F; PhD, 1960, HARVARD UNIVERSITY; medieval philosophy

DIETRICHSON, PAUL; PhD, 1955, YALE UNIVERSITY; philosophy of religion, ethics, metaphysics

JECKER, NANCY A.S.; PhD, 1986, UNIVERSITY OF WASHINGTON; philosophical and ethical aspects of health care delivery and policy

MARKS, CHARLES; PhD, 1972, CORNELL UNIVERSITY; philosophy of mind, modern philosophy

POTTER, KARL H; PhD, 1955, HARVARD UNIVERSITY; South Asia, Indian philosophy, epistemology

RICHMAN, ROBERT J; PhD, 1953, HARVARD UNIVERSITY; ethics, epistemology

TALBOTT, WILLIAM J.; PhD, 1976, HARVARD UNIVERSITY; epistemology, ethics, social and political philosophy, rational choice theory

**Associate Professor**

MISHALANI, JAMES K; PhD, 1961, BROWN UNIVERSITY; ethics, philosophical anthropology, contemporary continental philosophy

MOORE, RONALD M; PhD, 1971, COLUMBIA UNIVERSITY; philosophy of law, aesthetics

ROBERTS, JEAN VALERIE; PhD, 1982, UNIVERSITY OF PITTSBURGH; ancient Greek philosophy, ethics, philosophy of feminism

ROSENTHAL, MICHAEL; PhD, 1996, UNIVERSITY OF CHICAGO; History of Early Modern philosophy, moral and political philosophy, and Jewish thought

**Assistant Professor**

GOERING, SARA L.; PhD, 1998, UNIVERSITY OF COLORADO (DENVER); bioethics, moral philosophy

MOORE, ADAM DANIEL; PhD, 1997, O HIO STATE UNIVERSITY; Philosophy of Law, Intellectual Property, Political Philosophy, Applied Ethics, Privacy Rights

SMITH, ANGELA; PhD, 1999, HARVARD UNIVERSITY; moral and political philosophy

**Physics**

**Professor**

ADELBERGER, ERIC G; PhD, 1967, CALIFORNIA INSTITUTE OF TECHNOLOGY; experimental gravitational physics; experimental nuclear physics

ALBERG, MARY ANN; PhD, 1974, UNIVERSITY OF WASHINGTON; theoretical nuclear physics

BAKER, DAVID; PhD, 1989, UNIVERSITY OF CALIFORNIA (BERKELEY); protein folding, genomics

BAKER, MARSHALL; PhD, 1958, HARVARD UNIVERSITY; field theory, theoretical elementary-particle physics

BERTSCH, GEORGE F; PhD, 1965, PRINCETON UNIVERSITY; theoretical physics, nuclear and atomic cluster physics

BICHEL, HANS; PhD, 1951, UNIVERSITY OF BASEL (SWITZERLAND); experimental nuclear physics

BODANSKY, DAVID J; PhD, 1950, HARVARD UNIVERSITY; experimental nuclear physics

BOULWARE, DAVID G; PhD, 1962, HARVARD UNIVERSITY; field theory, theoretical elementary-particle physics, general relativity

BOWLES, THOMAS J.; PhD, 1978, PRINCETON UNIVERSITY; experimental nuclear physics

BROWN, FREDERICK C; PhD, 1950, HARVARD UNIVERSITY; use of synchrotron radiation in experimental solid state physics

BROWN, LOWELL S; PhD, 1961, HARVARD UNIVERSITY; field theory, theoretical elementary-particle physics

BUCK, WARREN W; PhD, 1976, COLLEGE OF WILLIAM AND MARY; physics and nuclear energy

BULGAC, AUREL; PhD, 1977, LENINGRAD NUCLEAR PHYSICS INST (RUSSIA); many body theory, molecular dynamics, classical and quantum chaos

BURNETT, THOMPSON H; PhD, 1968, UNIVERSITY OF CALIFORNIA (SAN DIEGO); experimental elementary-particle physics

CAHN, JOHN WERNER; PhD, 1953, UNIVERSITY OF CALIFORNIA (BERKELEY); theoretical condensed-matter physics

CAMPBELL, CHARLES T.; PhD, 1979, UNIVERSITY OF TEXAS (AUSTIN); physical chemistry of solid surfaces, chemisorption, catalysis, and surface analysis

CHALOUJPKA, VLADIMIR; PhD, 1975, UNIVERSITY OF GENEVA (SWITZERLAND); experimental elementary-particle physics

CHAYES, JENNIFER T.; PhD, 1983, PRINCETON UNIVERSITY; theoretical condensed-matter physics

CLARK, KENNETH C; PhD, 1947, HARVARD UNIVERSITY; optical spectroscopy, upper atmosphere

COOK, VICTOR; PhD, 1962, UNIVERSITY OF CALIFORNIA (BERKELEY); experimental high-energy physics.

CRAZAN, JOHN G; PhD, 1961, RICE UNIVERSITY; experimental nuclear physics

DASH, J GREGORY; PhD, 1951, COLUMBIA UNIVERSITY; cryogenics, surface physics, thermal physics, ice physics

DEHMELT, HANS; PhD, 1950, UNIVERSITY OF GOTTINGEN (GERMANY); single particle radio-frequency and laser spectroscopy of trapped electrons, positrons and ions

DROBNY, GARY P; PhD, 1981, UNIVERSITY OF CALIFORNIA (BERKELEY); two-dimensional and multiple quantum studies in nuclear magnetic resonance

DUHAMEL, SCOTT T.; PhD, 1985, STANFORD UNIVERSITY; Modeling and simulation of microfabrication processes and device behavior.

ELLIS, STEPHEN D; PhD, 1971, CALIFORNIA INSTITUTE OF TECHNOLOGY; theoretical elementary-particle physics

GERHART, JAMES B; PhD, 1954, PRINCETON UNIVERSITY; experimental nuclear physics, physics education

GUNDER, JENS; PhD, 1990, UNIVERSITY OF WASHINGTON; experimental nuclear physics

HALPERN, ISAAC; PhD, 1948, MASSACHUSETTS INSTITUTE OF TECHNOLOGY; experimental nuclear physics

HAXTON, WICK C.; PhD, 1976, STANFORD UNIVERSITY; theoretical physics, nuclear physics

HECKEL, BLAYNE; PhD, 1981, HARVARD UNIVERSITY; experimental neutron and atomic physics

HENLEY, ERNEST M; PhD, 1952, UNIVERSITY OF CALIFORNIA (BERKELEY); theoretical nuclear physics, theoretical elementary-particle physics

HOLZWORTH, ROBERT; PhD, 1977, UNIVERSITY OF CALIFORNIA (BERKELEY); experimental space plasma physics, atmospheric/magnetospheric electric fields, thunderstorms

INGALLS, ROBERT L; PhD, 1962, CARNEGIE MELLON UNIVERSITY; cryogenics, surface physics

JARBOE, THOMAS R.; PhD, 1974, SITY OF WASHINGTON; experimental neutron and atomic physics

KOCH, JOHN WERNER; PhD, 1953, UNIVERSITY OF CALIFORNIA (BERKELEY); experimental condensed-matter physics

JARBOE, THOMAS R.; PhD, 1974, SITY OF WASHINGTON; experimental condensed-matter physics

KAPLAN, DAVID B.; PhD, 1985, HARVARD UNIVERSITY; experimental condensed-matter physics

KAPLAN, DAVID B.; PhD, 1985, HARVARD UNIVERSITY; experimental condensed-matter physics

LORD, JERE J; PhD, 1950, UNIVERSITY OF CHICAGO; cosmic rays, experimental elementary-particle physics

LORD, JERE J; PhD, 1950, UNIVERSITY OF CHICAGO; cosmic rays, experimental elementary-particle physics

NOEGEL, SCOTT B.; PhD, 1994, HARVARD UNIVERSITY; moral and political philosophy

OHIO STATE UNIVERSITY; Philosophy of Law, Intellectual Property, Political Philosophy, Applied Ethics, Privacy Rights

640
LUBATTI, HENRY J.; PhD, 1966, UNIVERSITY OF CALIFORNIA (BERKELEY); experimental elementary-particle physics
MC DERMOIT, LILLIAN C.; PhD, 1959, COLUMBIA UNIVERSITY; physics education
MC DERMOIT, MARK N.; PhD, 1959, COLUMBIA UNIVERSITY; radiofrequency spectroscopy.
MILLER, GERALD; PhD, 1972, MASSACHUSETTS INSTITUTE OF TECHNOLOGY; theoretical nuclear physics
OHUCHI, FUMIO; PhD, 1981, UNIVERSITY OF FLORIDA; nucleation and growth of thin film materials, surface science, glass, device applications
OLMSTEAD, MARJORIE A.; PhD, 1985, UNIVERSITY OF WASHINGTON; fundamental and applied physics of ice and crystal growth
PRINCETON UNIVERSITY; theoretical condensed-matter physics, applied physics and astrophysics
WILKERSON, JOHN F.; PhD, 1982, UNIVERSITY OF NORTH CAROLINA; experimental nuclear and particle physics
WILSON, ROBERT W; PhD, 1948, MASSACHUSETTS INSTITUTE OF TECHNOLOGY; experimental high-energy physics, cosmic rays
WINGEE, ROBERT M.; PhD, 1984, UNIVERSITY OF SYDNEY (AUSTRALIA); space plasma physics, numerical simulation of space plasmas
YAFFE, LAURENCE G.; PhD, 1980, PRINCETON UNIVERSITY; quantum field theory, elementary particle theory

**Research Professor**

DOE, PETER J.; PhD, 1977, UNIVERSITY OF DURHAM (UK); Electro-weak interactions and solar neutrino physics
NAGOURNEY, WARREN; PhD, 1972, COLUMBIA UNIVERSITY; experimental atomic physics, high resolution laser spectroscopy of atoms
SNOVER, KURT ALBERT; PhD, 1969, STANFORD UNIVERSITY; experimental nuclear physics.
STORM, DEREK; PhD, 1970, UNIVERSITY OF WASHINGTON; nuclear physics, especially medium energy, accelerator physics.
TRAINOR, THOMAS A; PhD, 1973, UNIVERSITY OF NORTH CAROLINA; experimental nuclear physics.

**Associate Professor**

ELLIOTT, STEVEN R; PhD, 1987, UNIVERSITY OF CALIFORNIA (IRVINE); particle and nuclear physics
KELLER, SARAH L.; PhD, 1995, PRINCETON UNIVERSITY; biophysics; physical chemistry; soft condensed matter; surfactants; lipids; self-assembly
QUINN, THOMAS R.; PhD, 1986, PRINCETON UNIVERSITY; Solar System dynamics and galaxy formation
RIEKE, FREDERICK MARTIN; PhD, 1991, UNIVERSITY OF CALIFORNIA (BERKELEY); sensory signal processing and computation
SEIDLER, GERALD T.; PhD, 1985, UNIVERSITY OF CHICAGO; condensed matter experiment: microstructural kinetics and nonequilibrium statistical mechanics
SODERBERG, PETER S.; PhD, 1993, UNIVERSITY OF WASHINGTON; research on the learning and teaching of physics
WATTS, GORDON T.; PhD, 1995, UNIVERSITY OF ROCHESTER; accelerator-based elementary particle physics

**Research Associate Professor**

ZHAO, TIANCHI; PhD, 1987, COLUMBIA UNIVERSITY; experimental high energy physics instrumentation and detectors

**Assistant Professor**

AGOL, ERIC; PhD, 1997, UNIVERSITY OF CALIFORNIA (SANTA BARBARA); Black holes, accretion disks, quasars, gravitational lensing, planetary transits, dark matter.

**Lecturer**

ROBERTSON, CHARLES E.; MS, 1981, UNIVERSITY OF WASHINGTON; physics education

**Political Science**

**Professor**

BRASS, PAUL R; PhD, 1964, UNIVERSITY OF CHICAGO; comparative government, international relations
CASSINELLI, CHARLES W.; PhD, 1953, HARVARD UNIVERSITY; comparative government (Latin America)
GERBERDING, WILLIAM P; PhD, 1959, UNIVERSITY OF CHICAGO; American government and politics, public policy
GOLDBERG, ELLIS; PhD, 1983, UNIVERSITY OF CALIFORNIA (BERKELEY); political economy of the Middle East, comparative politics
GORE, WILLIAM J.; PhD, 1952, UNIVERSITY OF SOUTHERN CALIFORNIA; public policy, public administration
HANSON, STEPHEN E.; PhD, 1991, UNIVERSITY OF CALIFORNIA (BERKELEY); Soviet, post-Soviet and comparative politics
KEEULER, JOHN T; PhD, 1978, HARVARD UNIVERSITY; comparative politics (Western Europe), international relations
LANG, GLADYS ENGEL; PhD, 1954, UNIVERSITY OF CHICAGO; political effects of mass media, sociology of art, political movements and crowd behavior.
LEV, DANIEL S; PhD, 1964, CORNELL UNIVERSITY; comparative politics (Southeast Asia)
LEV, MARGARET; PhD, 1974, HARVARD UNIVERSITY; comparative politics, political economy, labor politics
MAJESKI, STEPHEN J; PhD, 1981, INDIANA UNIVERSITY; international relations, foreign policy, peace and conflict resolution
MATHews, DONALD ROWE; PhD, 1953, PRINCETON UNIVERSITY; American government and politics, comparative politics (Norway, U.K.)
MAY, PETER J.; PhD, 1979, UNIVERSITY OF CALIFORNIA (BERKELEY); policy processes; policy design and implementation; environmental regulation
MC CANN, MICHAEL W; PhD, 1983, UNIVERSITY OF CALIFORNIA (BERKELEY); American government and politics, public law, political theory
MC CRONE, DONALD J.; PhD, 1966, UNIVERSITY OF NORTH CAROLINA;
American politics, political economy, methodology
MODELSKI, GEORGE; PhD, 1954, UNIVERSITY OF LONDON (UK); international relations, international political enemy
OLSON, DAVID J; PhD, 1971, UNIVERSITY OF WISCONSIN; American government and politics (urban, state, and labor relations)
RESHETAR, JOHN S; PhD, 1950, HARVARD UNIVERSITY; comparative government (Soviet Union), international relations.
SCHIEGOLD, STUART A; PhD, 1963, UNIVERSITY OF CALIFORNIA (BERKELEY); American politics (public law)
WARD, MICHAEL D; PhD, 1977, NORTHWESTERN UNIVERSITY; international relations, political economy, political geography, statistical models

Associate Professor
ROHN, PETER H; PhD, 1958, UNIVERSITY OF WASHINGTON; international relations, international law
WHITING, SUSAN H.; PhD, 1995, UNIVERSITY OF MICHIGAN; political economy of development in post-1949 China
WILKERCSON, JOHN D; PhD, 1991, UNIVERSITY OF ROCHESTER; American government and politics, quantitative methodology

Assistant Professor
ADOLPH, CHRISTOPHER A; PhD, 2004, HARVARD UNIVERSITY; comparative political economy, political methodology
OSANLOO, ARZOO; PhD, 2002, STANFORD UNIVERSITY; everyday discourses and perceptions of rights in Iran's Islamic Republic

Psychology
Professor
BARASH, DAVID P; PhD, 1970, UNIVERSITY OF WISCONSIN; sociobiology, psychological aspects of the arms race and nuclear war, peace studies, animal behavior
BECKER, JOSEPH; PhD, 1958, DUKE UNIVERSITY; psychosocial aspects of depression
BERNSTEIN, ILENE L; PhD, 1972, UNIVERSITY OF CALIFORNIA (LOS ANGELES); neurobiology of taste aversion learning; developmental and genetic contributions to taste preference
BOOTH-LAFORCE, CATHRYN L; PhD, 1974, OHIO STATE UNIVERSITY; mother-infant interaction, observational methodology, child birth experiences and attachment

BOHEN, DEBORAH J; PhD, 1986, UNIFORMED SERVICE U OF THE HEALTH SC.; health psychology
BRENOWITZ, ELIOT A.; PhD, 1982, CORNELL UNIVERSITY; animal behavior, neuroendocrinology, animal communication
BUCK, STEVEN L.; PhD, 1976, UNIVERSITY OF CALIFORNIA (SAN DIEGO); human visual psychophysics, color vision, animal learning
CARR, JOHN E; PhD, 1963, SYRACUSE UNIVERSITY; phobic disorders, patient therapist matching & therapy outcome, cross-cultural psychopathology
CAUSE, ANA MARI; PhD, 1984, YALE UNIVERSITY; at-risk children, adolescents, and families; normative development in ethnic minority youth
COVEY, ELLEN; PhD, 1980, DUKE UNIVERSITY; Structure and function of the central auditory system.
CRAFT, SUZANNE; PhD, 1985, UNIVERSITY OF CALIFORNIA (LOS ANGELES); psychological brain development, neurophysiology, developmental psychopharmacology, effects of drugs
DOERR, HANS O; PhD, 1965, FLORIDA STATE UNIVERSITY; psychophysiology of central and autonomic nervous systems, neuropsychology
DONOVAN, DENNIS; PhD, 1980, UNIVERSITY OF WASHINGTON; cognitive-behavioral factors in substance abuse and addictive behaviors
FIEDLER, FRED E; PhD, 1949, UNIVERSITY OF CHICAGO; leadership and group effectiveness, social and organizational psychology
GEORGE, WILLIAM H; PhD, 1982, UNIVERSITY OF WASHINGTON; alcohol use and sexual behavior, addiction issues, sexual assault issues, racism issues
GOTTMAN, JOHN M; PhD, 1971, UNIVERSITY OF WISCONSIN; children's emotional and social development, meta-emotion in families, marriages
GURALNICK, MICHAEL J; PhD, 1967, LEHIGH UNIVERSITY; developmental disabilities, peer relations, social and language development, evaluation systems
HUNT, EARL B; PhD, 1960, YALE UNIVERSITY; individual differences in cognition, cognition in education and the work place
KIYAK, H ASUMAN; PhD, 1977, WAYNE STATE UNIVERSITY; geriatric dentistry, behavioral aspects of health care
KOHLENBERG, ROBERT J.; PhD, 1968, UNIVERSITY OF CALIFORNIA (LOS ANGELES); clinical behavior modification, learning, biofeedback, psychotherapy
LINEHAN, MARSHA M; PhD, 1971, LOYOLA UNIVERSITY (CHICAGO); behavioral assessment and therapy, suicide and parasuicide, borderline personality disorders
LOCKARD, JOAN S.; PhD, 1963, UNIVERSITY OF WISCONSIN; primate social behavior, animal behavior, sociobiology, human ethology, neurobehavior
LOFTUS, GEOFFREY R; PhD, 1971, STANFORD UNIVERSITY; perception, memory, cognitive processes and information processing
MARLATT, G ALAN; PhD, 1968, INDIANA UNIVERSITY; cognitive-behavior therapy and assessment, addictive behaviors, relapse prevention, harm reduction
MC CAULEY, ELIZABETH; PhD, 1973, STATE UNIVERSITY OF NEW YORK (BUFFALO); developmental psychopathology focused on affective disorders, behavioral genetics
MCMAHON, ROBERT J.; PhD, 1979, UNIVERSITY OF GEORGIA; assessment, prevention, treatment of children with conduct disorders; developmental psychopathology
MELZOFF, ANDREW N; PhD, 1976, OXFORD UNIVERSITY (UK); perceptual, cognitive and social development in infants
MIZUMORI, SHERI J; PhD, 1985, UNIVERSITY OF CALIFORNIA (BERKELEY); plasticity of neural and behavioral function during learning and memory
MORRISON, DIANE M; PhD, 1982, UNIVERSITY OF WASHINGTON; sexual decision-making, attitudes and behavior, teen pregnancy
PATTERSON, DAVID R.; PhD, 1982, FLORIDA STATE UNIVERSITY; treatment of acute pain, psychology of burn patients, psychological outcome of physical trauma
RAMSAY, DOUGLAS S; PhD, 1988, UNIVERSITY OF WASHINGTON; behavioral medicine/dentistry, physiological psychology, orthodontics, pediatric dentistry
RUBEL, EDWIN W.; PhD, 1969, MICHIGAN STATE UNIVERSITY; developmental neurobiology, with special emphasis on vertebrate auditory system development
SACKETT, GENE P; PhD, 1963, CLAREMONT GRADUATE SCHOOL; experimental psychology, primate behavior, early experience and development
SARASON, IRWIN G; PhD, 1955, INDIANA UNIVERSITY; personality, social support, stress and anxiety
SAX, GILBERT; PhD, 1958, UNIVERSITY OF SOUTHERN CALIFORNIA; measurement, statistics and research design.
SMITH, RONALD E; PhD, 1968, SOUTHERN ILLINOIS UNIVERSITY; clinical, personality, sport psychology
SMOLL, FRANK L; PhD, 1970, UNIVERSITY OF WISCONSIN; developmental kinesiology, children's sports, sport psychology, behavioral assessment of coaches.
SPELTZ, MATTHEW L.; PhD, 1980, UNIVERSITY OF MISSOURI; developmental psychotherapy, family therapy, pediatric behavioral medicine
SPIEKER, SUSAN J; PhD, 1982, CORNELL UNIVERSITY; developmental psychology, infant security, mother-infant interaction
TELLER, DAVIDA Y; PhD, 1965, UNIVERSITY OF CALIFORNIA (BERKELEY); vision, psychophysics, development of vision
VITALIANO, PETER P; PhD, 1975, SYRACUSE UNIVERSITY; psychiatric methodology (epidemiology, design, psychometrics), behavioral medicine
WEBSTER-STRATTON, CAROLYN; PhD, 1980, UNIVERSITY OF WASHINGTON; parent intervention programs for behaviorally disturbed children
WEINSTEIN, PHILIP; PhD, 1971, UNIVERSITY OF KENTUCKY; dental behavioral science, treatment and prevention of fear and pain, clinical assessment.

Research Professor
BAER, JOHN S.; PhD, 1986, UNIVERSITY OF OREGON; clinical psychology, addictive behaviors, early intervention
LATTEMAANN, DIANNE; PhD, 1981, UNIVERSITY OF CALIFORNIA (SAN FRANCISCO); Effect of Regulatory Peptides on Feeding and Behavior and Metabolism

Associate Professor
BASSOK, MIRIAM; PhD, 1984, HEBREW UNIVERSITY (ISRAEL); learning, problem solving, analogical reasoning
BEAUCHAINE, THEODORE P; PhD, 2000, STATE UNIV OF NEW YORK (STONY BROOK); autonomic nervous system functioning and psychopathology, child development, statistics
BROWN, JONATHON D; PhD, 1986, UNIVERSITY OF CALIFORNIA (LOS ANGELES); self-concept and social behavior; coping with failure and disappointment
CARLSON, STEPHANIE M.; PhD, 1997, UNIVERSITY OF OREGON; cognitive and social development in preschool children
COLDWELL, SUSAN E.; PhD, 1994, UNIVERSITY OF PENNSYLVANIA; pain, anxiety, and taste preference
COMTOIS, KATHERINE ANN; PhD, 1992, UNIVERSITY OF MARYLAND; services research, borderline personality disorder, women, dual diagnosis
CORINA, DAVID P.; PhD, 1991, UNIVERSITY OF CALIFORNIA (SAN DIEGO); cognitive neuropsychology, psycholinguistics, computational modeling
KAHN, PETER H.; PhD, 1988, UNIVERSITY OF CALIFORNIA (BERKELEY); Social and Moral Development. Information, Technology, and Nature
KIM, JEANSOK J; PhD, 1991, UNIVERSITY OF CALIFORNIA (LOS ANGELES); Neural circuits and mechanisms of learning & memory; Effects of stress on brain and behavior
KIVLAKAN, DANIEL R; PhD, 1983, UNIVERSITY OF MISSOURI; evaluating assessment, prevention, and treatment approaches for addictive behaviors
LARIMER, MARY E; PhD, 1992, UNIVERSITY OF WASHINGTON; prevention of alcohol problems among college students
LENGUA, LILIANA J; PhD, 1994, ARIZONA STATE UNIVERSITY; stress, temperamento, coping, ecological models of the development of psychological symptomatology
MIYAMOTO, JOHN M.; PhD, 1985, UNIVERSITY OF MICHIGAN; mathematical psychology, preference and utility theory, cognitive theories
O’DONNELL, SEAN; PhD, 1993, UNIVERSITY OF WISCONSIN; genotypic and endocrine effects on social organization and division of labor in insects
OLAVARRIA, JAIME F; PhD, 1984, UNIVERSITY OF CALIFORNIA (BERKELEY); neurophysiological and neuroanatomical basis of vision
OSTERHOUT, LEE E; PhD, 1990, TUFTS UNIVERSITY; psycholinguistics, cognitive psychophysiology
ROSE, RICHARD M; PhD, 1964, UNIVERSITY OF PENNSYLVANIA; stochastic models, psychophysics, sleep
SIMONI, JANE M; PhD, 1990, UNIVERSITY OF CALIFORNIA (LOS ANGELES); HIV/AIDS; influence of culture and social support on psychological well-being

Research Associate Professor
FITTS, DOUGLAS A; PhD, 1978, WASHINGTON STATE UNIVERSITY; neurobiology, salt/water regulation, thirst
HA, JAMES; PhD, 1989, COLORADO STATE UNIVERSITY; animal behavior, especially ethology, evolution, infant primate development, and statistics
KATZ, LYNN FANISILBER; PhD, 1990, UNIVERSITY OF ILLINOIS; antisocial children, social psychophysiology, family interaction, parent-child interaction
KYES, RANDALL C.; PhD, 1989, UNIVERSITY OF GEORGIA; primate behavior and ecology, neural mechanisms of behavior

Assistant Professor
SAWCHUK, CRAIG NEIL; PhD, 1999, UNIVERSITY OF ARKANSAS; Adult anxiety disorders, medical fears, & health care service utilization in underserved populations

Research Assistant Professor
CARRERE, SYBILL; PhD, 1990, UNIVERSITY OF CALIFORNIA (IRVINE); interface between family relationships, stress, and health

Lecturer
BARRETT, KIMBERLY; EdD, 1989, UNIVERSITY OF SAN FRANCISCO; substance abuse and the family and the impact of racism on children
FAGAN, COREY N.; PhD, 1988, UNIVERSITY OF MASSACHUSETTS; clinical psychology, program evaluation research, individual and family therapy
JOSLYN, SUSAN L.; PhD, 1995, UNIVERSITY OF WASHINGTON; cognition, autobiographical memory, multitasking, applied issues
LITTLE, LAURA M.; PhD, 1998, UNIVERSITY OF NEW MEXICO; quantitative methodology
MC DERMOTT, LOIS J.; PhD, 1979, UNIVERSITY OF CHICAGO; human sexuality and reproductive physiology

Romance Languages and Literatures

Professor
ANDERSON, FARRIS FURMAN; PhD, 1968, UNIVERSITY OF WISCONSIN; nineteenth- and twentieth-century Spanish literature; Spanish grammar
ANDRE, SEAN; PhD, 1995, UNIVERSITY OF MICHIGAN; medieval, seventeenth century, Romanesque
LEINER, JACQUELINE; Docteur es Lettres, 1969, UNIVERSITY OF STRASBOURG (FRANCE); modern French literature.
O’HARA, EDGAR; PhD, 1989, UNIVERSITY OF TEXAS (AUSTIN); Latin American poetry and essay, composition and creative writing
VANCE, EUGENE; PhD, 1964, CORNELL UNIVERSITY; medieval literature, the history of criticism, and discourse analysis

Associate Professor
COLLINS, DOUGLAS P; PhD, 1978, UNIVERSITY OF MISSOURI; twentieth-century French literature
DALE, ROBERT C; PhD, 1963, UNIVERSITY OF WISCONSIN; nineteenth-century French literature, cinema
ELLRICH, ROBERT J; PhD, 1960, HARVARD UNIVERSITY; eighteenth-century French literature
Scandinavian Languages and Literature

**Professor**

STEENE, BIRGITTA; PhD, 1960, UNIVERSITY OF WASHINGTON; Scandinavian drama and film, children’s literature, comparative literature

**Associate Professor**

CONROY, PATRICIA L.; PhD, 1974, UNIVERSITY OF CALIFORNIA (BERKELEY); Scandinavian philology, Icelandic language and literature, Danish, Faroese

**Assistant Professor**

ALANIZ, JOSE; PhD, 2003, UNIVERSITY OF CALIFORNIA (BERKELEY); Russian literature, death & dying

**Lecturer**

HOLDSWORTH, NORA; BA, 1965, UNIVERSITY OF WASHINGTON; Russian language

POLACK, ZOYA M; MA, 1975, UNIVERSITY OF WASHINGTON; Russian and Ukrainian languages.

Sociology

**Professor**

BORGATTA, EDGAR F.; PhD, 1952, NEW YORK UNIVERSITY; methodology, social psychology, demography-ecology, aging

BURSTEIN, PAUL; PhD, 1974, HARVARD UNIVERSITY; political sociology, social movements, stratification, public policy, law

CAMPBELL, FREDERICK L.; PhD, 1967, UNIVERSITY OF MICHIGAN; population and ecology, social organization

**Costner, Herbert L.; PhD, 1960, INDIANA UNIVERSITY; methodology, social change**

GREMBOWSKI, DAVID; PhD, 1982, UNIVERSITY OF WASHINGTON; health services research, survey research, program evaluation, performance of health care systems

HAMILTON, GARY G.; PhD, 1975, UNIVERSITY OF WASHINGTON; economic sociology, historical comparative, organizational studies, East Asia

HECHTER, MICHAEL N.; PhD, 1972, COLUMBIA UNIVERSITY; rational choice theory, nationalism, intergroup relations, norms and values

HIRSCHMAN, CHARLES; PhD, 1972, UNIVERSITY OF WISCONSIN; demography, race and ethnic relations, social stratification, Southeast Asia

KISER, EDGAR VANCE; PhD, 1987, UNIVERSITY OF ARIZONA; political sociology, theory, historical sociology

LANG, GLADYS ENGEL; PhD, 1954, UNIVERSITY OF CHICAGO; political effects of mass media, sociology of art, political movements and crowd behavior.

LANG, KURT; PhD, 1953, UNIVERSITY OF CHICAGO; political and social effects of the media on mass communication; arts and society; public opinion

LARSEN, OTTO; PhD, 1955, UNIVERSITY OF WASHINGTON; mass communications, public opinion, collective behavior

MIYAMOTO, S FRANK; PhD, 1950, UNIVERSITY OF CHICAGO; social psychology, collective behavior

MORRIS, WANDA MARTINA; PhD, 1989, UNIVERSITY OF CHICAGO; network models, population dynamics, economic inequality, AIDS

PATRICK, DONALD L.; PhD, 1972, COLUMBIA UNIVERSITY; health status and quality of life, end of life, adolescents

SCHMITT, DAVID R.; PhD, 1963, WASHINGTON UNIVERSITY; experimental social psychology, exchange relations

TOLNAY, STEWART E.; PhD, 1981, UNIVERSITY OF WASHINGTON; social demography, race and ethnicity, marriage and family

**MORRIS, WANDA MARTINA; PhD, 1989, UNIVERSITY OF CHICAGO; network models, population dynamics, economic inequality, AIDS**

**Associate Professor**

BORGATTA, EDGAR F.; PhD, 1952, NEW YORK UNIVERSITY; methodology, social psychology, demography-ecology, aging

BURSTEIN, PAUL; PhD, 1974, HARVARD UNIVERSITY; political sociology, social movements, stratification, public policy, law

CAMPBELL, FREDERICK L.; PhD, 1967, UNIVERSITY OF MICHIGAN; population and ecology, social organization

**Costner, Herbert L.; PhD, 1960, INDIANA UNIVERSITY; methodology, social change**

GREMBOWSKI, DAVID; PhD, 1982, UNIVERSITY OF WASHINGTON; health services research, survey research, program evaluation, performance of health care systems

HAMILTON, GARY G.; PhD, 1975, UNIVERSITY OF WASHINGTON; economic sociology, historical comparative, organizational studies, East Asia

HECHTER, MICHAEL N.; PhD, 1972, COLUMBIA UNIVERSITY; rational choice theory, nationalism, intergroup relations, norms and values

HIRSCHMAN, CHARLES; PhD, 1972, UNIVERSITY OF WISCONSIN; demography, race and ethnic relations, social stratification, Southeast Asia

KISER, EDGAR VANCE; PhD, 1987, UNIVERSITY OF ARIZONA; political sociology, theory, historical sociology

LANG, GLADYS ENGEL; PhD, 1954, UNIVERSITY OF CHICAGO; political effects of mass media, sociology of art, political movements and crowd behavior.

LANG, KURT; PhD, 1953, UNIVERSITY OF CHICAGO; political and social effects of the media on mass communication; arts and society; public opinion

LARSEN, OTTO; PhD, 1955, UNIVERSITY OF WASHINGTON; mass communications, public opinion, collective behavior

MIYAMOTO, S FRANK; PhD, 1950, UNIVERSITY OF CHICAGO; social psychology, collective behavior

MORRIS, WANDA MARTINA; PhD, 1989, UNIVERSITY OF CHICAGO; network models, population dynamics, economic inequality, AIDS

**Associate Professor**

BORGATTA, EDGAR F.; PhD, 1952, NEW YORK UNIVERSITY; methodology, social psychology, demography-ecology, aging

BURSTEIN, PAUL; PhD, 1974, HARVARD UNIVERSITY; political sociology, social movements, stratification, public policy, law

CAMPBELL, FREDERICK L.; PhD, 1967, UNIVERSITY OF MICHIGAN; population and ecology, social organization

**Costner, Herbert L.; PhD, 1960, INDIANA UNIVERSITY; methodology, social change**

GREMBOWSKI, DAVID; PhD, 1982, UNIVERSITY OF WASHINGTON; health services research, survey research, program evaluation, performance of health care systems

HAMILTON, GARY G.; PhD, 1975, UNIVERSITY OF WASHINGTON; economic sociology, historical comparative, organizational studies, East Asia

HECHTER, MICHAEL N.; PhD, 1972, COLUMBIA UNIVERSITY; rational choice theory, nationalism, intergroup relations, norms and values

HIRSCHMAN, CHARLES; PhD, 1972, UNIVERSITY OF WISCONSIN; demography, race and ethnic relations, social stratification, Southeast Asia

KISER, EDGAR VANCE; PhD, 1987, UNIVERSITY OF ARIZONA; political sociology, theory, historical sociology

LANG, GLADYS ENGEL; PhD, 1954, UNIVERSITY OF CHICAGO; political effects of mass media, sociology of art, political movements and crowd behavior.

LANG, KURT; PhD, 1953, UNIVERSITY OF CHICAGO; political and social effects of the media on mass communication; arts and society; public opinion

LARSEN, OTTO; PhD, 1955, UNIVERSITY OF WASHINGTON; mass communications, public opinion, collective behavior

MIYAMOTO, S FRANK; PhD, 1950, UNIVERSITY OF CHICAGO; social psychology, collective behavior

MORRIS, WANDA MARTINA; PhD, 1989, UNIVERSITY OF CHICAGO; network models, population dynamics, economic inequality, AIDS

**Assistant Professor**

ALANIZ, JOSE; PhD, 2003, UNIVERSITY OF CALIFORNIA (BERKELEY); Russian literature, death & dying

**Lecturer**

HOLDSWORTH, NORA; BA, 1965, UNIVERSITY OF WASHINGTON; Russian language

POLACK, ZOYA M; MA, 1975, UNIVERSITY OF WASHINGTON; Russian and Ukrainian languages.
Speech and Hearing Science

Professor
FOLSOM, RICHARD C; PhD, 1979, UNIVERSITY OF WASHINGTON; pediatric audiology
KUHL, PATRICIA K; PhD, 1973, UNIVERSITY OF MINNESOTA; speech perception.
MINIFIE, FRED D; PhD, 1963, UNIVERSITY OF IOWA; speech science
MOORE, CHRISTOPHER A.; PhD, 1985, PURDUE UNIVERSITY; speech production, speech development, speech physiology, acoustics, motor control, coordination
NORTON, SUSAN J.; PhD, 1982, UNIVERSITY OF WASHINGTON; normal and non-normal hearing, specifically cochlear mechanics, in humans and animals
OLSWANG, LESLEY B.; PhD, 1978, UNIVERSITY OF WASHINGTON; language development and disorders/clinical processes
PRINS, DAVID; PhD, 1961, UNIVERSITY OF MICHIGAN; stuttering
STOEL-GAMMON, CAROL; PhD, 1974, STANFORD UNIVERSITY; developmental phonology and phonetics
THOMPSON, GARY; PhD, 1967, UNIVERSITY OF MINNESOTA; pediatric audiology, clinical evaluation
WERNER, LYNE A.; PhD, 1980, LOYOLA UNIVERSITY (CHICAGO); audiology, speech, rehabilitation, infant psychoacoustics
WILSON, WESLEY; PhD, 1969, UNIVERSITY OF WASHINGTON; audiology, infant assessment and aural rehabilitation.

Assistant Professor
BURNS, EDWARD M.; PhD, 1977, UNIVERSITY OF MINNESOTA; psychoacoustics
CARPENTER, ROBERT L; PhD, 1969, NORTHWESTERN UNIVERSITY; language and language disorders.
COGGINS, TRUMAN E; PhD, 1976, UNIVERSITY OF WISCONSIN; language disorders in children.
COOKER, HARRY S; PhD, 1963, UNIVERSITY OF IOWA; speech physiology
FEENEY, M. PATRICK; PhD, 1993, UNIVERSITY OF WASHINGTON; The aging auditory system and widespread assessment of middle-ear function
MILLER, ROBERT M; PhD, 1976, UNIVERSITY OF WASHINGTON; speech, language pathology, adults, swallowing
REES, THOMAS; PhD, 1972, UNIVERSITY OF WASHINGTON; audiology
ROGERS, MARGARET A.; PhD, 1992, UNIVERSITY OF IOWA; spoken language production, aphasia and apraxia of speech
SOUZA, PAMELA E; PhD, 1996, SYRACUSE UNIVERSITY; hearing aids, effects of sensorineural hearing loss on speech perception, aging
TREMBLAY, KELLY L; PhD, 1998, NORTHWESTERN UNIVERSITY; central auditory physiology and aging

Lecturer
ALARCON, NANCY B.; MS, 1981, UNIVERSITY OF WISCONSIN; speech-language disorders/adult.

Stats
Professor
BURDZY, KRZYSZTOF; PhD, 1984, UNIVERSITY OF CALIFORNIA (BERKELEY); probability theory
BURKE, JAMES V.; PhD, 1983, UNIVERSITY OF ILLINOIS; optimization, nonsmooth analysis
FELSENSTEIN, JOSEPH; PhD, 1968, UNIVERSITY OF CHICAGO; estimation of evolutionary trees, models of long-term evolutionary processes
FLEMMING, THOMAS RICHARD; PhD, 1976, UNIVERSITY OF MARYLAND; survival analysis, cancer clinical trials, AIDS research, sequential analysis
FORD, E DAVID; PhD, 1968, UNIVERSITY COLLEGE, LONDON (UK); quantitative science, ecosystem analysis, forest productivity
GROENEBOOM, PETRUS; PhD, 1979, UNIVERSITY OF AMSTERDAM (NETHERLANDS); statistical inverse problems
GUTTORP, PETER; PhD, 1980, UNIVERSITY OF CALIFORNIA (BERKELEY); point processes, stochastic models, applications to hydrology, environmental and atmospheric science
HANDCOCK, MARK S.; PhD, 1989, UNIVERSITY OF CHICAGO; methodology for the social sciences; spatial, environmental modeling; distributional comparison
HAYNOR, DAVID R; PhD, 1971, UNIVERSITY OF CALIFORNIA (BERKELEY); medical image processing and segmentation; image deformation; functional MRI; expression arrays
KRONMAL, RICHARD A; PhD, 1964, UNIVERSITY OF CALIFORNIA (LOS ANGELES); nonparametric density estimation, computer algorithms, cardiovascular data analysis
MASON, DAVID M; PhD, 1977, UNIVERSITY OF WASHINGTON; nonparametric, order statistics; extreme value theory, limit theorems; empirical, quantile processes
NELSON, CHARLES R; PhD, 1969, UNIVERSITY OF WISCONSIN; time series analysis, economic statistical

Statistics
Professor
BURDZY, KRZYSZTOF; PhD, 1984, UNIVERSITY OF CALIFORNIA (BERKELEY); probability theory
BURKE, JAMES V.; PhD, 1983, UNIVERSITY OF ILLINOIS; optimization, nonsmooth analysis
FELSENSTEIN, JOSEPH; PhD, 1968, UNIVERSITY OF CHICAGO; estimation of evolutionary trees, models of long-term evolutionary processes

Associate Professor
STOEL-GAMMON, CAROL; PhD, 1974, UNIVERSITY OF CALIFORNIA (BERKELEY); crime, delinquency, social control, deviance.

Research Associate Professor
STOEL-GAMMON, CAROL; PhD, 1974, UNIVERSITY OF CALIFORNIA (BERKELEY); crime, delinquency, social control, deviance.

Associate Professor
STOEL-GAMMON, CAROL; PhD, 1974, UNIVERSITY OF CALIFORNIA (BERKELEY); crime, delinquency, social control, deviance.

Associate Professor
STOEL-GAMMON, CAROL; PhD, 1974, UNIVERSITY OF CALIFORNIA (BERKELEY); crime, delinquency, social control, deviance.

Assessor
STOEL-GAMMON, CAROL; PhD, 1974, UNIVERSITY OF CALIFORNIA (BERKELEY); crime, delinquency, social control, deviance.

Assistant Professor
KITS, JAMES A.; PhD, 2001, CORNELL UNIVERSITY; organizational dynamics, social networks, social exchange, collective action
LEPORE, PAUL C.; PhD, 1997, UNIVERSITY OF WISCONSIN; social psychology, social structure and personality, sociology of education, adolescence
PETIT, ELIZABETH M.; PhD, 1999, PRINCETON UNIVERSITY; sociology of the family, social demography, inequality

Speech and Hearing Science

Professor
FOLSOM, RICHARD C; PhD, 1979, UNIVERSITY OF WASHINGTON; pediatric audiology
KUHL, PATRICIA K; PhD, 1973, UNIVERSITY OF MINNESOTA; speech perception.
MINIFIE, FRED D; PhD, 1963, UNIVERSITY OF IOWA; speech science
MOORE, CHRISTOPHER A.; PhD, 1985, PURDUE UNIVERSITY; speech production, speech development, speech physiology, acoustics, motor control, coordination
NORTON, SUSAN J.; PhD, 1982, UNIVERSITY OF WASHINGTON; normal and non-normal hearing, specifically cochlear mechanics, in humans and animals
OLSWANG, LESLEY B.; PhD, 1978, UNIVERSITY OF WASHINGTON; language development and disorders/clinical processes
PRINS, DAVID; PhD, 1961, UNIVERSITY OF MICHIGAN; stuttering
STOEL-GAMMON, CAROL; PhD, 1974, STANFORD UNIVERSITY; development and disorders/clinical processes
THOMPSON, GARY; PhD, 1967, UNIVERSITY OF MINNESOTA; pediatric audiology, clinical evaluation
WERNER, LYNE A.; PhD, 1980, LOYOLA UNIVERSITY (CHICAGO); audiology, speech, rehabilitation, infant psychoacoustics
WILSON, WESLEY; PhD, 1969, UNIVERSITY OF WASHINGTON; audiology, infant assessment and aural rehabilitation.

Assistant Professor
BURNS, EDWARD M.; PhD, 1977, UNIVERSITY OF MINNESOTA; psychoacoustics
CARPENTER, ROBERT L; PhD, 1969, NORTHWESTERN UNIVERSITY; language and language disorders.
COGGINS, TRUMAN E; PhD, 1976, UNIVERSITY OF WISCONSIN; language disorders in children.
COOKER, HARRY S; PhD, 1963, UNIVERSITY OF IOWA; speech physiology
FEENEY, M. PATRICK; PhD, 1993, UNIVERSITY OF WASHINGTON; The aging auditory system and widespread assessment of middle-ear function
MILLER, ROBERT M; PhD, 1976, UNIVERSITY OF WASHINGTON; speech, language pathology, adults, swallowing
REES, THOMAS; PhD, 1972, UNIVERSITY OF WASHINGTON; audiology
ROGERS, MARGARET A.; PhD, 1992, UNIVERSITY OF IOWA; spoken language production, aphasia and apraxia of speech
SOUZA, PAMELA E; PhD, 1996, SYRACUSE UNIVERSITY; hearing aids, effects of sensorineural hearing loss on speech perception, aging
TREMBLAY, KELLY L; PhD, 1998, NORTHWESTERN UNIVERSITY; central auditory physiology and aging

Lecturer
ALARCON, NANCY B.; MS, 1981, UNIVERSITY OF WISCONSIN; speech-language disorders/adult.
analysis, advanced macroeconomic
theory
PERLMAN, MICHAEL D; PhD, 1967,
STANFORD UNIVERSITY; multivariate
analysis, graphical Markov models,
decision theory, probability inequalities,
convexity
RAFTERY, ADRIAN ELMES; Doctorat
d’Etat, 1980, UNIVERSITE DE PARIS VI
(FRANCE); time series, spatial,
Bayesian statistics, population estima-
tion, model selection, sociology
SCHOLZ, FRIEDRICH-WILHELM; PhD,
1971, UNIVERSITY OF CALIFORNIA
(BERKELEY); estimation, large sample
theories; nonparametric statistics; risk
and tolerance analysis; bootstrap
SIEGEL, ANDREW F; PhD, 1977,
STANFORD UNIVERSITY; statistics,
computing, corporate finance, investments,
data analysis
STUETZLE, WERNER; PhD, 1977, SWISS
FEDERAL INSTITUTE OF TECHNOLOG-
Y; nonparametric methods in
multivariate analysis, statistical
applications of computer graphics
THOMPSON, ELIZABETH A; PhD, 1974,
CAMBRIDGE UNIVERSITY (UK); statistical
analysis of human genetic data, conservation and
computational biology
WELLNER, JON A; PhD, 1975, UNIVERS-
ITY OF WASHINGTON; large-sample
theory, asymptotic efficiency, empirical
processes, semiparametric models

Research Professor
SAMPSON, PAUL D; PhD, 1979, UNIVER-
SITY OF MICHIGAN; spatial statistics,
environmetrics; morphometrics,
multivariate analysis; statistical
consulting
ZEH, JUDITH; PhD, 1979, UNIVERSITY
OF WASHINGTON; estimation of
population size and dynamics; robust
methods, computing in infectious
disease research

Associate Professor
ALTSCHUL, ROBERTO; PhD, 1973, CASE
WESTERN RESERVE UNIVERSITY;
reliability models, fault trees for phased
missions, stochastic models for fault
tolerant systems
GNEITING, TILMANN J.; PhD, 1997,
BAYREUTH UNIVERSITY (GERMANY);
spatial and environmental statistics, positive
definite functions
PERCIVAL, DONALD B; PhD, 1983,
UNIVERSITY OF WASHINGTON; time
series and signal analysis, computa-
tional environments, statistics of clocks
RICHARDSON, THOMAS S.; PhD, 1996,
CARNegie MELLON UNIVERSITY;
graphical models; algorithmic model
selection; Bayesian inference; causal
models; economics problems
STEPHENS, MATTHEW; PhD, 1997,
OXFORD UNIVERSITY (UK); Bayesian
inference, classification and clustering,
Markov chain Monte Carlo, statistical
genetics

Assistant Professor
EROSHEVA, ELENA A.; PhD, 2002,
CARNegie MELLON UNIVERSITY;
statistical methodology in the social
sciences
HOFF, PETER D; PhD, 2000, UNIVERSITY
OF WISCONSIN; constrained estima-
tion, nonparametric Bayesian methods,
two-sided matching models, cancer
research
MEILA-PREDOVICIU, MARINA; PhD,
1999, MASSACHUSETTS INSTITUTE
OF TECHNOLOGY; graphical probability
models, machine learning, algorithms,
data mining
REYNOLDS, JOEL HOWARD; PhD, 1989,
UNIVERSITY OF WASHINGTON; model
assessment, statistical consulting,
applications to ecology, wildlife studies

Lecturer
MORITA, JUNE G; PhD, 1984, UNIVER-
sITY OF CALIFORNIA (BERKELEY);
sample surveys, quality control, survival
analysis, statistical data analysis, statistics
education

Women Studies
Professor
JACOBS, SUE-ELLEN; PhD, 1970,
UNIVERSITY OF COLORADO (BOUL-
der); women studies, socio-cultural and
applied anthropology, anthropological
studies of women
WOODS, NANCY; PhD, 1978, UNIVERS-
ITY OF NORTH CAROLINA; women’s
health

Associate Professor
GINORIO, ANGELA B; PhD, 1979,
FORDHAM UNIVERSITY; women and
science, violence against women, sexual
harassment, racial identity among
Latino/as
RAMAMURTHY, PRITI; PhD, 1995,
SYRACUSE UNIVERSITY; political
economy of development; third world
feminism; agro-food systems; South Asia

Assistant Professor
BOYER, DEBRA; PhD, 1986, UNIVERSITY
OF WASHINGTON; feminist research
methodology, policy and evaluation
issues, urban applied anthropology
Business School

Accounting

Professor
BERG, KENNETH B; PhD, 1952, UNIVERSITY OF ILLINOIS; financial and managerial accounting
BOWEN, ROBERT M; PhD, 1978, STANFORD UNIVERSITY; financial and managerial accounting, Hubert O., Whitten Endowed Professorship in Accounting
BURGSTHALE, DAVID C; PhD, 1981, UNIVERSITY OF IOWA; financial and managerial accounting, statistical methods
DUKES, ROLAND E; PhD, 1974, STANFORD UNIVERSITY; financial and managerial accounting
HEATH, LOYD C; PhD, 1965, UNIVERSITY OF CALIFORNIA (BERKELEY); financial accounting
KENNEDY, S. JANE; PhD, 1992, DUKE UNIVERSITY; Professional judgment/ decision making in accounting, auditing, or business contexts
MUELLER, FRED J; PhD, 1956, OHIO STATE UNIVERSITY; auditing, not-for-profit, tax accounting
MUELLER, GERHARD G; PhD, 1962, UNIVERSITY OF CALIFORNIA (BERKELEY); financial accounting and reporting, International accounting
NOREEN, ERIC W; PhD, 1976, STANFORD UNIVERSITY; managerial accounting
RAMANATHAN, K V; PhD, 1970, NORTHWESTERN UNIVERSITY; managerial accounting
SEFICK, STEPHAN E; PhD, 1983, UNIVERSITY OF ILLINOIS; financial reporting and environmental accounting issues
SUNDE, GARY L; PhD, 1971, STANFORD UNIVERSITY; managerial accounting

Associate Professor
RAJGOPAL, SHIVARAM; PhD, 1998, UNIVERSITY OF IOWA; Financial accounting and capital markets, executive stock options, earnings management
SHORES, DONNA J; PhD, 1986, STANFORD UNIVERSITY; Financial accounting, corporate reporting, role of accounting choices in equity valuation and contra

Assistant Professor
CHEN, SHUPING; PhD, 2002, UNIVERSITY OF SOUTHERN CALIFORNIA; firms’ voluntary disclosure practices & the role of financial intermediaries on disclosure decisions

Lecturer
RESLER, WILLIAM M; JD, 1972, UNIVERSITY OF WASHINGTON; LLM, 1973, NEW YORK UNIVERSITY; tax accounting.
WELLS, WILLIAM L.; MPAcc, 1989, UNIVERSITY OF WASHINGTON; financial reporting, not-for-profit accounting

Finance and Business Economics

Professor
ALBERTS, WILLIAM; PhD, 1961, UNIVERSITY OF CHICAGO; capital investment planning, business strategy, economics of industrial organization
BRADFORD, WILLIAM D; PhD, 1972, OHIO STATE UNIVERSITY; corporate finance and financial institutions
CONRAD, DOUGLAS A; PhD, 1978, UNIVERSITY OF CHICAGO; alternative vertical and horizontal market structures in health care
DAMBROSIO, CHARLES A; PhD, 1962, UNIVERSITY OF ILLINOIS; finance
FROST, PETER A; PhD, 1966, UNIVERSITY OF CALIFORNIA (LOS ANGELES); finance and business economics
HALEY, CHARLES; PhD, 1968, STANFORD UNIVERSITY; financial management and banking
HANSON, KERMIT O; PhD, 1950, IOWA STATE UNIVERSITY; accounting and statistics
HESS, ALAN C.; PhD, 1969, CARNEGIE MELLON UNIVERSITY; finance and business economics
JOHNSON, DUDLEY; PhD, 1957, NORTHWESTERN UNIVERSITY; business economics
KARPOFF, JONATHAN M; PhD, 1982, UNIVERSITY OF CALIFORNIA (LOS ANGELES); corporate finance, law and economics, microeconomics, natural resources
MALATESTA, PAUL H; PhD, 1982, UNIVERSITY OF ROCHESTER; corporate finance, security and capital markets, corporate mergers, and empirical methods in finance
SCHALL, LAWRENCE D; PhD, 1969, UNIVERSITY OF CHICAGO; finance and business economics
SIEGEL, ANDREW F; PhD, 1977, STANFORD UNIVERSITY; statistics, computing, corporate finance, investments, data analysis

Associate Professor
DEWENTER, KATHRYN L; PhD, 1993, UNIVERSITY OF CHICAGO; empirical analysis of finance models in an international context
KOSKI, JENNIFER LYNCH; PhD, 1991, STANFORD UNIVERSITY; dividend policy, market microstructure, stock splits, mutual funds
RICE, EDWARD M; PhD, 1978, UNIVERSITY OF CALIFORNIA (LOS ANGELES); corporate finance, microeconomics, industrial organization

Management and Organization

Professor
BUCK, VERNON E; PhD, 1963, CORNELL UNIVERSITY; organizational behavior and administrative theory
CHEN, XIAO-PING; PhD, 1998, UNIVERSITY OF ILLINOIS; cross-cultural management, organizational behavior
FENN, MARGARET P; DBA, 1963, UNIVERSITY OF WASHINGTON; organizational behavior and administrative theory
FRENCH, WENDELL L; EdD, 1956, HARVARD UNIVERSITY; organizational behavior, human resources management, organization development
HENNING, DALE A; PhD, 1954, UNIVERSITY OF ILLINOIS; administrative theory and organizational behavior
HILL, CHARLES WILLIAM L; PhD, 1983, UNIVERSITY OF MANCHESTER (UK); business policy, corporate strategy, multinational enterprise
HUBER, VANDRA LEE; DBA, 1982, INDIANA UNIVERSITY; human resource decision making, compensation, and performance appraisal
JOHNSON, RICHARD A; DBA, 1958, UNIVERSITY OF WASHINGTON; business policy
JONES, THOMAS M; PhD, 1977, UNIVERSITY OF CALIFORNIA (BERKELEY); corporate governance, shareholder litigation, corporate social responsibility, business and society
KAST, FREMONT E; DBA, 1956, UNIVERSITY OF WASHINGTON; administrative theory and organizational behavior
KOTA, SURESH; PhD, 1988, RENSSELAER POLYTECHNIC INSTITUTE; competitive strategy, competing on the internet and ecommerce, and international management
Management Science

Professor
CHIU, JOHN S Y; PhD, 1960, UNIVERSITY OF ILLINOIS; quantitative methods
DEY, DEBabrata; PhD, 1994, UNIVERSITY OF ROCHESTER; heterogeneous and distributed systems; database theory, design and performance; knowledge-based system
FAALAND, BRUCE H; PhD, 1971, STANFORD UNIVERSITY; quantitative methods
KLASTORIN, THEODORE; PhD, 1973, UNIVERSITY OF TEXAS (AUSTIN); operations management, facility location, project management, waiting lines, logistics, inventory
MOINZADEH, KAMRAN; PhD, 1984, STANFORD UNIVERSITY; operations management, production management, inventory, quality and supply chain management
SIEGEL, ANDREW F; PhD, 1977, STANFORD UNIVERSITY; statistics, computing, corporate finance, investments, data analysis

Assistant Professor
FAN, MING; PhD, 1999, UNIVERSITY OF TEXAS (AUSTIN); The economics & use of information technology in financial services firms, telecommunications
SCHMITT, THOMAS G; DBA, 1979, INDIANA UNIVERSITY; MBA, 1974, UNIVERSITY OF CINCINNATI; management of service and manufacturing operations

Lecturer
BURYROWS, WILLIAM E; MA, 1972, UNIVERSITY OF ILLINOIS; systems analysis/design methodologies and data/file structures

Marketing and International Business

Professor
ERICSON, GARY; PhD, 1978, STANFORD UNIVERSITY; quantitative models of marketing and analysis of competitive strategies
HARDER, VIRGINI E; PhD, 1958, UNIVERSITY OF ILLINOIS; business communications
JACOBSON, ROBERT L; PhD, 1981, UNIVERSITY OF CALIFORNIA (BERKELEY); marketing strategy
LACON, DONALD; PhD, 1971, UNIVERSITY OF CALIFORNIA (BERKELEY); marketing, data analysis, and marketing research
NARVER, JOHN C; PhD, 1965, UNIVERSITY OF CALIFORNIA (BERKELEY); market strategy, market-driven organization, pricing policies, marketing management
PRATTLEY, THADDEUS H; PhD, 1962, OHIO STATE UNIVERSITY; marketing
SULLIVAN, JEREMIAH J; PhD, 1970, NEW YORK UNIVERSITY; international business, Japanese management, multinational business management
WHEATLEY, JOHN J; PhD, 1959, UNIVERSITY OF TEXAS (AUSTIN); management, health care applications

Associate Professor
FORREY, MARK ROECK; PhD, 1997, STANFORD UNIVERSITY; consumer decision making and attitude development
GRATHWOHL, HARRISON L; DBA, 1957, INDIANA UNIVERSITY; marketing

Assistant Professor
DACUNHA, MARCUS V. MORETTI; PhD, 2003, UNIVERSITY OF FLORIDA; Consumer information processing, intertemporal choice, bundling, variety seeking, signal detection
OKADA, ERICA MINA; PhD, 1999, UNIVERSITY OF PENNSYLVANIA; decision theory, entrepreneur marketing, and marketing strategy
SCHLOSSER, ANN E.; PhD, 1997, UNIVERSITY OF ILLINOIS; internet marketing

LEU, THOMAS W; PhD, 1984, UNIVERSITY OF OREGON; administrative theory and organizational behavior, human resources management
MITCHELL, TERENCE R; PhD, 1969, UNIVERSITY OF ILLINOIS; leadership, group processes, motivation, turnover
MOXON, RICHARD W; DBA, 1973, HARVARD UNIVERSITY; international business
NEWELL, WILLIAM T; PhD, 1962, UNIVERSITY OF TEXAS (AUSTIN); operations management and business policy
PETerson, RICHARD B; PhD, 1966, UNIVERSITY OF WISCONSIN; human resources management
SCOTT, WILLIAM GEORGE; DBA, 1957, INDIANA UNIVERSITY; administrative theory and organizational behavior
STONG, DENNIS FULTON; PhD, 1959, UNIVERSITY OF WASHINGTON; personnel and organizational behavior
WICKMAN, JAMES A; DBA, 1961, UNIVERSITY OF WASHINGTON; risk control and insurance

Associate Professor
BIGLEY, GREGORY; PhD, 1995, UNIVERSITY OF CALIFORNIA (IRVINE); organizational behavior
KIENAST, PHILIP K; PhD, 1972, MICHIGAN STATE UNIVERSITY; human resources management
STEENSMA, HARVEY K.; PhD, 1996, INDIANA UNIVERSITY; business policy
STRONG, DENNIS FULTON; PhD, 1959, UNIVERSITY OF WASHINGTON; business history
WICKMAN, JAMES A; DBA, 1961, UNIVERSITY OF WASHINGTON; risk control and insurance

Assistant Professor
PHELPS, COREY C; PhD, 2001, NEW YORK UNIVERSITY; competitive strategy, technological innovation, strategic alliances, social capital & social networks
REYNOLDS, SCOTT J.; PhD, 2002, UNIVERSITY OF MINNESOTA; individual ethical decision-making, stakeholder decision-making, decision-making biases

Lecturer
GEORGE-FALVY, JANE; PhD, 1995, UNIVERSITY OF WASHINGTON; organizational behavior and human resource management

Associate Professor
HILLIER, MARK S.; PhD, 1994, STANFORD UNIVERSITY; Operations Management, Inventory, Commonality, Mathematical Programming Applications
SCHMITT, THOMAS G; DBA, 1979, INDIANA UNIVERSITY; MBA, 1974, UNIVERSITY OF CINCINNATI; management of service and manufacturing operations

Assistant Professor
FAN, MING; PhD, 1999, UNIVERSITY OF TEXAS (AUSTIN); The economics & use of information technology in financial services firms, telecommunications
SCHMITT, THOMAS G; DBA, 1979, INDIANA UNIVERSITY; MBA, 1974, UNIVERSITY OF CINCINNATI; management of service and manufacturing operations

Lecturer
BURYROWS, WILLIAM E; MA, 1972, UNIVERSITY OF WASHINGTON; systems analysis/design methodologies and data/file structures
Lecturer
GIAMBATTISTA, MICHELE D.; MBA, 1969, HARVARD UNIVERSITY; marketing, international business, technology
KALITZKI, JUDITH ANN; PhD, 1979, UNIVERSITY OF WASHINGTON; business communications
ODEGAARD, MARY ANN; PhD, 1980, STANFORD UNIVERSITY; retailing and retail management
TURNER, DANIEL J.; PhD, 2001, NORTHWESTERN UNIVERSITY; quantitative methods, marketing management, retailing and pricing
WHelan, JOHN F.; MA, 1977, YALE UNIVERSITY; business communications
School of Dentistry

Professor

AMMONS, WILLIAM F; DDS, 1959, UNIVERSITY OF TEXAS (HOUSTON); MSD, 1970, UNIVERSITY OF WASHINGTON; periodontics.

BEIRNE, OWEN ROSS; PhD, 1976, UNIVERSITY OF CALIFORNIA (SAN FRANCISCO); basic and clinical biology of bone tissue reconstruction, bone alloplasts, and anesthesia.

BERG, JOEL H; MS, 1985, UNIVERSITY OF IOWA; DDS, 1983, UNIVERSITY OF IOWA; Technologies in early caries diagnosis & treatment, Risk Assessment, Pediatric restorative materials.

BOLENDER, CHARLES L; DDS, 1956, UNIVERSITY OF IOWA; MS, 1957, UNIVERSITY OF IOWA; removable prosthodontics.

BOLLEN, ANNE-MARIE; PhD, 1990, UNIVERSITY OF MICHIGAN; bone metabolism, skeletal growth and development.

BRUDVIK, JAMES S; DDS, 1957, UNIVERSITY OF MINNESOTA; removable prosthodontics.

BYERS, PETER H; MD, 1969, CASE WESTERN RESERVE UNIVERSITY; extracellular matrix synthesis, genetic disorders of collagen metabolism, secretion, human genetics.

CAMERON, CHERYL A; PhD, 1986, UNIVERSITY OF WASHINGTON; dental hygiene, educational policy, academic and health law.

CANFIELD, ROBERT C; DDS, 1951, UNIVERSITY OF WASHINGTON; restorative dentistry.

CONRAD, DOUGLAS A; PhD, 1978, UNIVERSITY OF CHICAGO; alternative vertical and horizontal market structures in health care.

DALE-CRUNK, BEVERLY A; PhD, 1968, UNIVERSITY OF MICHIGAN; keratin biochemistry, epithelial differentiation, antimicrobial peptides.

DARVEAU, RICHARD P; PhD, 1981, WASHINGTON STATE UNIVERSITY; innate host defense interactions between bacteria and their hosts.

DE ROUEN, TIMOTHY; PhD, 1971, VIRGINIA POLYTECHNIC INST & STATE UNIV; applications of biostatistics to clinical epidemiology of oral and infectious diseases.

DOMOTO, PETER K; DDS, 1964, UNIVERSITY OF CALIFORNIA (SAN FRANCISCO); MPH, 1975, UNIVERSITY OF WASHINGTON; pediatric dentistry, dental behavioral science.

DWORKIN, SAMUEL F; PhD, 1969, NEW YORK UNIVERSITY; dentistry and clinical psychology, pain, psychosomatic and illness-related behavior.

EYRE, DAVID R; PhD, 1969, UNIVERSITY OF LEEDS (UK); connective tissue biology, collagen chemistry, bone and cartilage metabolism.

FALES, MARTHA H; PhD, 1978, UNIVERSITY OF MICHIGAN; dental hygiene.

FRANK, RICHARD P; DDS, 1962, UNIVERSITY OF IOWA; MBD, 1968, UNIVERSITY OF WASHINGTON; removable prosthodontics.

GHEHRIG, JOHN D; DDS, 1946, UNIVERSITY OF MINNESOTA; MS, 1951, UNIVERSITY OF MINNESOTA; oral and maxillofacial surgery, biological structure.

GIACHELLI, CECILIA; PhD, 1987, UNIVERSITY OF WASHINGTON; cell and molecular biology and vascular biology processes.

GREMBOWSKI, DAVID; PhD, 1982, UNIVERSITY OF WASHINGTON; health services research, survey research, program evaluation, performance of health care systems.

HALL, STANTON H; PhD, 1974, UNIVERSITY OF WASHINGTON; orthodontics, cranio-facial development, biochemistry of mineralized tissues.

HAMILTON, A IAN; PhD, 1968, UNIVERSITY OF LONDON (UK); restorative dentistry.

HARRINGTON, GERALD W; DDS, 1959, ST LOUIS UNIVERSITY; MSD, 1969, UNIVERSITY OF WASHINGTON; endodontics.

HERRING, SUSAN W; PhD, 1971, UNIVERSITY OF CHICAGO; vertebrate functional morphology, relations between musculoskeletal function and skull growth.

HOLLENDER, LARS GOSTA; PhD, 1964, UNIVERSITY OF LUND (SWEDEN); oral radiology.

IZUTSU, KENNETH; PhD, 1970, UNIVERSITY OF WASHINGTON; salivary gland physiology and pathophysiology, Ca2+ signaling in cell function and differentiation.

JOHNSON, GLEN H; DDS, 1978, UNIVERSITY OF WASHINGTON; MS, 1983, UNIVERSITY OF MICHIGAN; instruction, clinical trials and laboratory research with dental bio materials.

JOHNSON, ROBERT H; DDS, 1962, McILL GILL UNIVERSITY (CANADA); MSD, 1964, INDIANA UNIVERSITY; periodontics.

KELLER, PATRICIA J; PhD, 1953, WASHINGTON UNIVERSITY; protein structure and function.

KING, GREGORY J; DMD, 1969, Tufts University; MDS, 1976, McILL GILL UNIVERSITY (CANADA); bone remodeling, bone cells, mineral metabolism, bone paracrine/endocrine mechanisms.

KIYAK, H ASUMAN; PhD, 1977, WAYNE STATE UNIVERSITY; geriatric dentistry, behavioral aspects of health care.

KOKICH, VINCENT G; DDS, 1971, UNIVERSITY OF WASHINGTON; MSD, 1974, UNIVERSITY OF WASHINGTON; orthodontics: craniofacial growth and development, sursal morphogenesis, premature sursal fusion.

LE RESCHE, LINDA; DDS, 1977, JOHNS HOPKINS UNIVERSITY; epidemiology of pain, specifically gender and pain; nonverbal behavior (facial expression).

LEGGOTT, PENELope J; MSC, 1980, UNIVERSITY OF ILLINOIS; pediatric dentistry.

LITTLE, ROBERT M; PhD, 1974, UNIVERSITY OF WASHINGTON; orthodontics.

MILGROM, PETER M; DDS, 1972, UNIVERSITY OF CALIFORNIA (SAN FRANCISCO); management of fearful and phobic dental patients, quality of dental care.

MOFFET, BENJAMIN C; PhD, 1952, NEW YORK UNIVERSITY; anatomy.

MOORE, ALTON W; DDS, 1941, UNIVERSITY OF CALIFORNIA (SAN FRANCISCO); MS, 1948, UNIVERSITY OF ILLINOIS; orthodontics.

MORRISON, KENNETH N; DDS, 1943, UNIVERSITY OF TORONTO (CANADA); MSD, 1952, UNIVERSITY OF WASHINGTON; restorative dentistry.

MORTON, THOMAS H; DDS, 1972, CREIGHTON UNIVERSITY; MSD, 1975, UNIVERSITY OF WASHINGTON; oral pathology, oral medicine.

MOURADIAN, WENDY ELYSE; MD, 1977, COLUMBIA UNIVERSITY; Ethics and quality of life in children's oral, craniofacial health.

MYALL, ROBERT W; MD, 1975, UNIVERSITY OF BRITISH COLUMBIA (CANADA); oral and maxillofacial surgery and biological structure.

NARAYANAN, A SAMPATH; PhD, 1967, UNIVERSITY OF MADRAS (INDIA); connective tissue, periodontal disease, regulation of fibroblast growth, matrix synthesis.

NATKIN, EUGENE; DDS, 1957, NEW YORK UNIVERSITY; MSD, 1962, UNIVERSITY OF WASHINGTON; endodontics.

NICHOLLS, JACK I; PhD, 1965, PURDUE UNIVERSITY; dental materials.

ODA, DOLPHINE; MSC, 1981, UNIVERSITY OF MANITOBA (CANADA); chemical and viral carcinogenesis and genetic alteration of oral cancer.

OSWALD, ROBERT J; DDS, 1969, VIRGINIA COMMONWEALTH UNIVERSITY; endodontics.

PAGE, ROY C; PhD, 1967, UNIVERSITY OF WASHINGTON; connective-tissue pathology, chronic inflammation, immunopathology, periodontal disease.

RAMSAY, DOUGLAS S; PhD, 1988, UNIVERSITY OF WASHINGTON; behavioral medicine/dentistry, physiological psychology, orthodontics, pediatric dentistry.

RIVARA, FREDERICK P; MD, 1974, UNIVERSITY OF PENNSYLVANIA;
pediatric epidemiology and injury prevention and research
ROBERTSON, PAUL B.; DDS, 1966, UNIVERSITY OF ALABAMA; MS, 1972, UNIVERSITY OF ALABAMA; host-bacterial interactions in the etiology and pathogenesis of the periodontal diseases
ROBINOVITCH, MURRAY; PhD, 1967, UNIVERSITY OF WASHINGTON; salivary biochemistry and salivary anti-HIV activity.
RUBENSTEIN, JEFFREY E.; DMD, 1975, TUFTS UNIVERSITY; MS, 1980, UNIVERSITY OF TEXAS (HOUSTON); maxillofacial and implant prosthodontics
SCHUBERT, MARK M; DDS, 1974, UNIVERSITY OF WASHINGTON; MSD, 1981, UNIVERSITY OF WASHINGTON; oral medicine/oral oncology
SELIPSKY, HERBERT; MSD, 1973, UNIVERSITY OF WASHINGTON; periodontics.
SHAPIRO, PETER A; DDS, 1970, HOWARD UNIVERSITY; MSD, 1973, UNIVERSITY OF WASHINGTON; craniofacial biology, longterm evaluation of orthodontic treatment
SMITH, DALE E; DDS, 1952, UNIVERSITY OF PITTSBURGH; MSD, 1962, UNIVERSITY OF WASHINGTON; removable prosthodontics
STAIRTON, PATRICK S; PhD, 1989, UNIVERSITY OF ILLINOIS; engineering proteins for biotechnology, biomaterials, and biomedical therapies/diagnostics
STEINER, JAMES C.; DDS, 1956, CASE WESTERN RESERVE UNIVERSITY; MSD, 1966, UNIVERSITY OF WASHINGTON; normal sensory mechanisms of human dental pulp and pathologic alterations causing pain
TRUELOVE, EDMOND L; DDS, 1967, INDIANA UNIVERSITY; MSD, 1971, INDIANA UNIVERSITY; oral medicine, orofacial pain, stomatitis, and salivary gland disorders
WARNICK, MYRON E; DDS, 1955, UNIVERSITY OF ALBERTA (CANADA); restorative dentistry
WATSON, EILEEN L; PhD, 1970, UNIVERSITY OF UTAH; salivary gland physiology and regulation
WEINSTEIN, PHILIP; PhD, 1971, UNIVERSITY OF KENTUCKY; dental behavioral science, treatment and prevention of fear and pain, clinical assessment.
WHITE, THEODORE C; PhD, 1984, UNIVERSITY OF MICHIGAN; molecular mechanisms of virulence and drug resistance in pathogenic yeasts
WILLIAMS, BRYAN J.; DDS, 1974, UNIVERSITY OF ONTARIO (CANADA); MSD, 1979, UNIVERSITY OF WASHINGTON; pediatric dentistry, orthodontics
WORTHINGTON, PHILIP; MD, 1956, UNIVERSITY OF LIVERPOOL (UK); BDS, 1962, UNIVERSITY OF LIVERPOOL (UK); oral and maxillofacial surgery.
YAGER, PAUL; PhD, 1980, UNIVERSITY OF OREGON; physical chemistry, applications of biomembranes, biosensors, microfluidics, biomedical diagnostics
YODELIS, RALPH A; DDS, 1955, UNIVERSITY OF ALBERTA (CANADA); MSD, 1964, UNIVERSITY OF WASHINGTON; restorative dentistry, periodontics
Research Professor
BORDIN, SANDRA; PhD, 1966, UNIVERSITY OF FERRARA (ITALY); regulation of connective tissue repair by immune-inflammatory complement components
BYERS, MARGARET R; PhD, 1969, HARVARD UNIVERSITY; sensory neurobiology, neurocytochemistry, and neuropathologic reactions; neuroimmune interactions
CHAPKO, MICHAEL K; PhD, 1972, CITY UNIVERSITY OF NEW YORK; ambulatory care, long-term care, cost-effectiveness in health care, international health
PERSSON, GOSTA RUTGER; PhD, 1978, UNIVERSITY OF LUND (SWEDEN); diagnosis of periodontal diseases and the consecutive process of clinical decision making
Associate Professor
AW, TAR C.; DDS, 1990, NORTHWESTERN UNIVERSITY; MS, 1965, UNIVERSITY OF MICHIGAN; restorative dentistry, operative dentistry, dental materials, computers
BALES, DAVID J; DDS, 1957, UNIVERSITY OF WASHINGTON; MSD, 1972, INDIANA UNIVERSITY; restorative dentistry.
BLOOMQUIST, DALE S; DDS, 1969, UNIVERSITY OF WASHINGTON; oral and maxillofacial surgery.
BUTSON, TIMOTHY J.; DMD, 1982, UNIVERSITY OF PENNSYLVANIA; oral and maxillofacial surgery
CHASTEEN, JOSEPH E; DDS, 1967, UNIVERSITY OF MICHIGAN; MA, 1976, UNIVERSITY OF MICHIGAN; dental informatics and multi-media instructional programs
COLDWELL, SUSAN E.; PhD, 1994, UNIVERSITY OF PENNSYLVANIA; pain, anxiety, and taste preference
Cunningham, MICHAEL L; PhD, 1996, UNIVERSITY OF WASHINGTON; molecular, development, craniofacial, malformation, human, mouse, cranio-synostosis, birth defects
DAVIES, JOHN M; DDS, 1961, UNIVERSITY OF WASHINGTON; MSD, 1967, UNIVERSITY OF WASHINGTON; pediatric dentistry
EGBERT, MARK A; DDS, 1981, UNIVERSITY OF WASHINGTON; oral and maxillofacial surgery.
EVANS, JOHN R; DDS, 1975, UNIVERSITY OF WASHINGTON; oral and maxillofacial surgery.
FAINE, MARY P; MS, 1975, UNIVERSITY OF WASHINGTON; nutrition.
Fiset, LOUIS O.; DDS, 1970, UNIVERSITY OF WASHINGTON; research and management of dental phobia.
GRAHAM, ELINOR A.; MD, 1970, UNIVERSITY OF ROCHESTER; MPH, 1993, JOHNS HOPKINS UNIVERSITY; general pediatrics
HOHL, THOMAS H; DDS, 0, LOYOLA UNIVERSITY (CHICAGO); oral and maxillofacial surgery
HUEBNER, COLLEEN ELLEN; PhD, 1991, UNIVERSITY OF WASHINGTON; the social bases of developmental problems in early childhood
JACKSON, DOUGLASS L.; PhD, 1996, UNIVERSITY OF MINNESOTA; the peripheral regulation of sensory neurons during tissue injury
JOHNSON, BARTON S.; DDS, 1985, UNIVERSITY OF CALIFORNIA (LOS ANGELES); MS, 1989, UNIVERSITY OF CALIFORNIA (LOS ANGELES); hospital dentistry, medical compromise, oncology, sedation, pharmacology, molecular biology
JOHNSON, JAMES D; DDS, 1969, NORTHWESTERN UNIVERSITY; MS, 1985, NORTHWESTERN UNIVERSITY; Surgical and nonsurgical endodontics, pulpal / periradicular biology and pathology; instrumentation
JOONDEPH, DONALD R; DDS, 1967, NORTHWESTERN UNIVERSITY; MS, 1969, NORTHWESTERN UNIVERSITY; orthodontics
KARL, HELEN W.; MD, 1976, UNIVERSITY OF VIRGINIA; pediatric anesthesiology
KIM, SARA; PhD, 1999, UNIVERSITY OF WASHINGTON; educational technology
KINNEY, LISA A; DDS, 1982, CASE WESTERN RESERVE UNIVERSITY; oral and maxillofacial surgery
LEPE, XAVIER; DDS, 1980, UNIVERSITY OF GUADALAJARA (MEXICO); MS, 1987, LOYOLA UNIVERSITY (CHICAGO); dental materials
LEROUX, BRIAN; PhD, 1989, UNIVERSITY OF BRITISH COLUMBIA (CANADA); mixed models, correlated data, statistical applications in dentistry, toxicology, and psychology
LOMBAN, WARREN J.; DDS, 1986, MCGILL UNIVERSITY (CANADA); MSD, 1990, UNIVERSITY OF WASHINGTON; restorative dentistry, fixed prosthodontics
MARTIN, MICHAEL D.; PhD, 1993, UNIVERSITY OF WASHINGTON; dental education in oral health care of persons with disability.
O'NEAL, ROBERT B.; MED, 1971, WAYNE STATE UNIVERSITY; DMD, 1971, UNIVERSITY OF SOUTH CAROLINA; periodontics
OSTLUND, LYLE E; PhD, 1993, JOHNS HOPKINS UNIVERSITY; restorative dentistry.
OVIIR, Tiina; DDS, 1986, UNIVERSITY OF TARTU (ESTONIA); biology and mechano-sensory system of pulp-dentin complex, dentinal (bone) fluid
PETERTSON, DEVEREAUX; PhD, 1980, UNIVERSITY OF PITTSBURGH; pediatric dentistry, educational administration, dental treatment for medically compromised patients
PITTS, DAVID LEROY; DDS, 1972, UNIVERSITY OF WASHINGTON; removable prosthodontics.
POPOWICS, TRACY; PhD, 1997, BROWN UNIVERSITY; dental biomechanics, craniofacial biology
RAIGRODSKI, Ariel J; DMD, 1991, HEBREW UNIVERSITY (ISRAEL); MS, 1999, LOUISIANA STATE UNIVERSITY; fixed prosthodontics
ROBINS, LYNNE S; PhD, 1990, UNIVERSITY OF MICHIGAN; cultural competence, physician-patient communication, qualitative research assessment
ROSE, TIMOTHY M; PhD, 1981, UNIVERSITY OF CALIFORNIA (LOS ANGELES); oral health promotion, dental caries, dental hygiene education
ROBERTS, FRANK A.; PhD, 1996, UNIVERSITY OF ALABAMA; immunological and biochemical regulatory mechanisms of inflammatory periodontal disease progression
ROBECK, BILL; MS, 1991, UNIVERSITY OF MISSOURI; general dentistry
SCHAAD, DOUGLAS C.; PhD, 1986, UNIVERSITY OF WASHINGTON; Medical education and evaluation; educational assessment; salmonid recovery; riparian restoration
SCHWEDHELM, ERNESTO R.; MSD, 1983, INDIANA UNIVERSITY; tooth fracture, restoration of endodontically treated teeth, laboratory procedures, treatment planning
SOMMERS, EARL E; DDS, 1971, INDIANA UNIVERSITY; diagnosis/management of orofacial pain, stomatitis, salivary gland disorders and dental management
TOOLSON, LEIGH; DDS, 1967, UNIVERSITY OF WASHINGTON; MSD, 1977, UNIVERSITY OF WASHINGTON; removable prosthodontics
VERHOF, DOUGLAS R; DDS, 1973, UNIVERSITY OF WASHINGTON; DOObst, 1973, UNIVERSITY OF WASHINGTON; fixed prosthodontics
VICINI, PAOLO; PhD, 1996, POLYTECHNIC OF MILAN (ITALY); biomathematics and modeling methodology, mathematical models of biological systems
WANG, I-Chung; DDS, 1985, CHUNG SHAN MEDICAL UNIVERSITY (TAIWAN); MPH, 1992, UNIVERSITY OF ALABAMA; MS, 1995, UNIVERSITY OF ALABAMA; periodontal regeneration, epidemiology, and dental implantology
WELLS, NORMA J.; MPH, 1966, UNIVERSITY OF CALIFORNIA (LOS ANGELES); oral health promotion, dental caries, dental hygiene education
WRIGHT, JEFFREY A.; MD, 1978, UNIVERSITY OF MISSOURI; general pediatrics

Research Associate Professor
CANGELOSI, GERARD A.; PhD, 1984, UNIVERSITY OF CALIFORNIA (DAVIS); molecular biology of tuberculosis
MANCL, LLOYD A.; PhD, 1992, UNIVERSITY OF WASHINGTON; statistical methodology in periodontal disease, TMD, and correlated data
PERSSON, RIGMOR E.; DDS, 1969, UNIVERSITY OF LUND (SWEDEN); MSD, 1989, UNIVERSITY OF WASHINGTON; oral health, geriatric and medically compromised patients, general dentistry
PRESLAND, RICHARD B; PhD, 1987, UNIVERSITY OF ADELAIDE (AUSTRALIA); epithelial/epidermal differentiation, genetic diseases, regulation of development

Assistant Professor
ALCALDE, RAFAEL; DDS, 1990, CENTRAL UNIVERSITY (VENEZUELA); Orthognathic and Reconstructive Maxillofacial Surgery
CRINZI, RICHARD A; DDS, 1972, UNIVERSITY OF WASHINGTON; oral and maxillofacial surgery
DRANGSHOLT, MARK T.; DDS, 1984, UNIVERSITY OF WASHINGTON; MPH, 1992, UNIVERSITY OF WASHINGTON; epidemiology
LEE, JESSICA J.; DDS, 1995, UNIVERSITY OF WASHINGTON; oral and maxillofacial surgery
MASSOTH, DONNA L; PhD, 1992, UNIVERSITY OF WASHINGTON; chronic pain, illness behavior, somatization
MIDDOUGH, DAN; DDS, 1961, UNIVERSITY OF MINNESOTA; MPA, 1972, UNIVERSITY OF WASHINGTON; oral medicine.

Research Assistant Professor
CHUNG, WHASUN O.; PhD, 1999, UNIVERSITY OF WASHINGTON; oral microbiology and defense antimicrobial peptides
FATHERAZI, SAHBA; PhD, 1979, UNIVERSITY OF LONDON (UK); signaling pathway in salivary gland and epithelial cell
RIEDY, CHRISTINE A; PhD, 1997, UNIVERSITY OF WASHINGTON; children's oral health - cultural diversity, dietary influences, symptom self-report in children

Lecturer
GOVIN, GLENN M.; DDS, 1985, UNIVERSITY OF TEXAS (SAN ANTONIO); MPH, 1992, UNIVERSITY OF TEXAS (HOUSTON); dental education in oral health care of persons with disabilities
STODDARD, JAMES W; DDS, 1961, UNIVERSITY OF WASHINGTON; restorative dentistry, operative dentistry
STRAND, HARVEY A; DDS, 1957, UNIVERSITY OF WASHINGTON; restorative dentistry
TOWNSEND, JOHN D; DDS, 1967, MCGILL UNIVERSITY (CANADA); MSD, 1973, UNIVERSITY OF WASHINGTON; restorative dentistry, fixed prosthodontics, periodontics, implants

Instructor
KAY, MICHAELA; DDS, 1987, NORTH-WESTERN UNIVERSITY; hospital-based dentistry
NIEMAN, ROBERT K; DDS, 1979, UNIVERSITY OF WASHINGTON; hospital-based dentistry

students with behavioral/learning disabilities
DIMMITT, NORMA M; MED, 1963, UNIVERSITY OF WASHINGTON; EdD, 1970, STANFORD UNIVERSITY; curriculum and instruction, teacher education
GRAY, CAROL A; PhD, 1971, UNIVERSITY OF WASHINGTON; school psychology/human development and cognition
HANSEN-KRENING, NANCY M; PhD, 1974, UNIVERSITY OF OREGON; reading/language arts
HERRENKOHL, LESLIE R.; PhD, 1995, CLARKSON UNIVERSITY; cognitive and social processes of students in preschool and elementary school settings
KAZEMI, ELHAM; PhD, 1999, UNIVERSITY OF CALIFORNIA (LOS ANGELES); sociocultural analyses of learning, mathematics education, teacher education, school reform
KELLY, SAMUEL E; PhD, 1971, UNIVERSITY OF WASHINGTON; educational leadership and policy study, higher education
MAZZA, JAMES J.; PhD, 1993, UNIVERSITY OF WISCONSIN; educational psychology/child and adolescent mental health
NELSON, MARY LEE; PhD, 1989, UNIVERSITY OF OREGON; counseling, interpersonal theory, process research, supervision, gender issues
NOLEN, PATRICIA A; PhD, 1970, UNIVERSITY OF WASHINGTON; school psychology/human development and cognition.
PLECKI, MARGARET L; PhD, 1991, UNIVERSITY OF CALIFORNIA (BERKELEY); school finance, economics of education, policy analysis, school choice, study of education reform
PORTIN, BRADLEY S; MED, 1987, SEATTLE PACIFIC UNIVERSITY; DPhil, 1995, OXFORD UNIVERSITY (UK); educational leadership, principalship, education policy and politics, and comparative education
SANDALL, SUSAN R.; PhD, 1986, UNIVERSITY OF WASHINGTON; effective intervention practices for very young children with disabilities
SMITH, JOHN P; EdD, 1969, STANFORD UNIVERSITY; science education
STAGE, SCOTT A.; PhD, 1991, FLORIDA STATE UNIVERSITY; educational psychology
STEVENS, REED R.; PhD, 1999, UNIVERSITY OF CALIFORNIA (BERKELEY); ethnography research on cognition, learning, social interaction, and technology use
THALBERG, STANTON P; PhD, 1964, UNIVERSITY OF IOWA; school psychology
TROIA, GARY A; PhD, 1999, UNIVERSITY OF MARYLAND; oral and written language development, disabilities, assessment, and intervention
VASQUEZ, JAMES A; PhD, 1973, UNIVERSITY OF CALIFORNIA (LOS ANGELES); learning (minority youth)/bilingual education.
WINEBURG, SAMUEL S.; PhD, 1990, STANFORD UNIVERSITY; educational psychology, cognitive psychology of school subjects, historical cognition

**Research Associate Professor**
BROWN, SHARAN E; PhD, 1991, UNIVERSITY OF WASHINGTON; childhood development, telecommunications technology and research
FREY, KARIN S.; PhD, 1978, UNIVERSITY OF WASHINGTON; social-emotional development, adult-child and peer interaction, motivation, teacher development

**Assistant Professor**
BASHEY, HUSAIN ISMAIL; PhD, 1975, UNIVERSITY OF WASHINGTON; counseling.
HORN, ILANA SEIDEL; PhD, 2002, UNIVERSITY OF CALIFORNIA (BERKELEY); Secondary mathematics education
KIMBALL, KATHLEEN L.; EdD, 1993, UNIVERSITY OF WASHINGTON; school leadership, assessment and accountability, program evaluation, education reform
STONE, JENNIFER C.; PhD, 2003, UNIVERSITY OF WISCONSIN; literacy education and new technologies
STRITIKUS, TOM; PhD, 2000, UNIVERSITY OF CALIFORNIA (BERKELEY); second language development, ESL/bilingual education, literacy, education policy
VARGHESE, MANKA M.; PhD, 2000, UNIVERSITY OF PENNSYLVANIA; ESL/bilingual education, applied linguistics, teacher education for ESL/bilingual teachers

**Lecturer**
BRANDL, KLAUS K; PhD, 1991, UNIVERSITY OF TEXAS (AUSTIN); foreign language pedagogy, applied linguistics, foreign language teacher training
College of Engineering

Aeronautics and Astronautics

Professor

BOLLARD, R JOHN; PhD, 1954, PURDUE UNIVERSITY; mechanics of materials, structural mechanics, aeroelasticity, design and crash-worthiness of aircraft.

BRUCKNER, ADAM; PhD, 1972, PRINCETON UNIVERSITY; space systems, propulsion, hypervelocity accelerators, energy conservation.

CHRISTIANSEN, WALTER H; PhD, 1961, CALIFORNIA INSTITUTE OF TECHNOLOGY; gas dynamics and gas physics, high-power gas lasers and their application, energy conversion.

CLARK, ROBERT N; PhD, 1969, STANFORD UNIVERSITY; automatic control systems, fault detection in dynamic systems.

DECHER, REINER; PhD, 1968, MASSACHUSETTS INSTITUTE OF TECHNOLOGY; aircraft propulsion, fluid mechanics, energy conversion.

EASTMAN, FRED; MS, 1929, MASSACHUSETTS INSTITUTE OF TECHNOLOGY; aeronautics and astronautics.

FYFE, IAN M; PhD, 1957, STANFORD UNIVERSITY; dynamics, wave propagation in solids and fluids.

HOFMANN, ALAN LOWELL; PhD, 1967, CALIFORNIA INSTITUTE OF TECHNOLOGY; plasma physics and magnetic confinement fusion.

HOLSAPPLE, KEITH A; PhD, 1965, UNIVERSITY OF WASHINGTON; solid mechanics, continuum mechanics, structure waves, finite element methods.

JARBOE, THOMAS R.; PhD, 1974, UNIVERSITY OF CALIFORNIA (BERKELEY); plasma physics and controlled fusion, magnetic reconnection and relaxation.

JOPPA, ROBERT G; PhD, 1972, PRINCETON UNIVERSITY; aircraft flight mechanics, stability and control, V/STOL testing, airplane design, flight testing.

LIN, KUEN-YUAN; PhD, 1977, MASSACHUSETTS INSTITUTE OF TECHNOLOGY; composite materials, structural mechanics, finite element methods.

LIVNE, ELI; PhD, 1990, UNIVERSITY OF CALIFORNIA (LOS ANGELES); multidisciplinary design, aeroelasticity, aeroservoelasticity, optimization, structural dynamics.

PARAMERTER, R REID; PhD, 1963, CALIFORNIA INSTITUTE OF TECHNOLOGY; structures, solid mechanics, fracture mechanics.

PEARSON, CARL E; PhD, 1949, BROWN UNIVERSITY; wave propagation, fluid dynamics, numerical analysis, optimization.

RUSSELL, DAVID A; PhD, 1961, CALIFORNIA INSTITUTE OF TECHNOLOGY; fluid mechanics and gas physics, aerodynamics, shock processes and laser fluid dynamics.

VAGNERS, JURIS; PhD, 1967, STANFORD UNIVERSITY; optimal control and estimation theory, applications to aircraft systems.

Associate Professor

MATTICK, ARTHUR T.; PhD, 1975, MASSACHUSETTS INSTITUTE OF TECHNOLOGY; gas physics, gas lasers, energy conversion, propulsion.

SHULMAK, URI; PhD, 1992, UNIVERSITY OF CALIFORNIA (BERKELEY); computational fluid dynamics, parallel computing, plasma physics, magnetohydrodynamics, and electric.

Assistant Professor

CAMPBELL, MARK E.; PhD, 1996, MASSACHUSETTS INSTITUTE OF TECHNOLOGY; precision controlled structures, autonomous aerospace vehicles, smart materials.

Bioengineering

Professor

AUTH, DAVID C; PhD, 1969, GEORGETOWN UNIVERSITY; lasers and electro-optical system design, electrophysics, medical instrumentation.

CASTNER, DAVID G.; PhD, 1979, UNIVERSITY OF CALIFORNIA (BERKELEY); polymer surfaces, metal organic interfaces, catalytic materials.

HOFMANN, ALLAN S; DSc, 1957, MASSACHUSETTS INSTITUTE OF TECHNOLOGY; synthesis, characterization, and biological interaction of biomaterials, mechanics of natural tissue.

HORBETT, THOMAS A; PhD, 1970, UNIVERSITY OF WASHINGTON; interfacial proteins, cell interactions, foreign body reaction, nonfouling surfaces.

HUNTSMAN, LEE L; PhD, 1968, UNIVERSITY OF PENNSYLVANIA; mechanics of heart and heart muscle, cardiovascular system assessment, new measurement techniques.

KIM, YONGMIN; PhD, 1982, UNIVERSITY OF WISCONSIN; computer architecture, imaging systems, medical imaging, computer graphics, multimedia, home healthcare.

RATNER, BUDDY D; PhD, 1972, POLYTECHNIC INSTITUTE OF BROOKLYN; synthesis and characterization of polymeric biomaterials.

SPELMAN, FRANCIS A; PhD, 1975, UNIVERSITY OF WASHINGTON; biophysics of implanted cochlea, bioinstrumentation for primate research.

VINEY, CHRISTOPHER; PhD, 0, CAMBRIDGE UNIVERSITY (UK); phase transformations and microstructure/property relationships in polymers and liquid crystals.

VOGEL, VIOLA; Doctor of Natural Philosophy, 1987, JOHANN WOLFGANG GOETHE UNIV (GERMANY); molecular assemblies and Langmuir-Blodgett films, liquid interfaces, non-linear optics, microscopy.

Research Professor

CRUM, LAWRENCE A.; PhD, 1967, OHIO UNIVERSITY; physical acoustics, underwater acoustics, medical ultrasound, acoustic cavitation, sonoluminescence.

Associate Professor

BURNS, DAVID H; PhD, 1984, UNIVERSITY OF WASHINGTON; non-invasive spectroscopic measurements of metabolism.

SANDERS, JOAN ELIZABETH; PhD, 1991, UNIVERSITY OF WASHINGTON; soft tissue biomechanics and tissue adaptation to mechanical stress.

Assistant Professor

PUN, SUZIE H; PhD, 2000, CALIFORNIA INSTITUTE OF TECHNOLOGY; Macromolecule transport; non-viral gene delivery; intracellular trafficking.

Research Assistant Professor

HARRIS, SAMANTHA PAIGE; PhD, 1994, UNIVERSITY OF MICHIGAN; Regulation of cardiac contraction, muscle mechanics, molecular basis of inherited cardiomyopathies.

Chemical Engineering

Professor

BABB, ALBERT L; PhD, 1951, UNIVERSITY OF ILLINOIS; reactor engineering, bioengineering.

BANEYX, FRANCOIS; PhD, 1991, UNIVERSITY OF TEXAS (AUSTIN); biotechnology, protein technology, biochemical engineering.

BERG, JOHN C.; PhD, 1964, UNIVERSITY OF CALIFORNIA (BERKELEY); interfacial phenomena, surface and colloid science.

BOWEN, J RAY; PhD, 1963, UNIVERSITY OF CALIFORNIA (BERKELEY); combustion.
DAVID, MORTON; Doctor of English, 1950, YALE UNIVERSITY; chemical engineering

DAVIS, E. JAMES; PhD, 1960, UNIVERSITY OF WASHINGTON; transport in porous media, microparticle physics and chemistry, surface and colloid science

FINLAYSON, BRUCE A; PhD, 1965, UNIVERSITY OF MINNESOTA; modeling of chemical engineering problems

GARLID, KERMIT L; PhD, 1961, UNIVERSITY OF MINNESOTA; nuclear fuel cycles, radioactive waste management

HEIDEGGER, WILLIAM J; PhD, 1959, PRINCETON UNIVERSITY; biomedical transport phenomena

JOHANSON, LENNART N; PhD, 1948, UNIVERSITY OF WISCONSIN; chemical engineering

LIDSTROM, MARY E.; PhD, 1977, UNIVERSITY OF WISCONSIN; biomolecular engineering, metabolic engineering, bioremediation

RIBE, FRED L; PhD, 1951, UNIVERSITY OF CHICAGO; experimental and theoretical plasma physics, fusion reactor studies

RICKER, NEIL L; PhD, 1978, UNIVERSITY OF CALIFORNIA (BERKELEY); process control and optimization

ROGERS, J. WILLIAM; PhD, 1979, UNIVERSITY OF TEXAS (AUSTIN); surface chemistry and engineering, applications to thin film deposition

SCHWARTZ, DANIEL T.; PhD, 1989, UNIVERSITY OF CALIFORNIA (DAVIS); electrochemical and environmental engineering

SLEICHER, CHARLES A; PhD, 1955, UNIVERSITY OF MICHIGAN; fluid mechanics, heat transfer

STUVE, ERIC M; PhD, 1983, STANFORD UNIVERSITY; electrochemical surface science, fuel cell engineering

WOODRUFF, GENE L; PhD, 1965, MASSACHUSETTS INSTITUTE OF TECHNOLOGY; reactor physics, fusion engineering, neutron spectroscopy, energy studies

YAGER, PAUL; PhD, 1980, UNIVERSITY OF OREGON; physical chemistry, applications of biomembranes, biosensors, microfluidics, biomedical diagnostic

Associate Professor

HOLT, BRADLEY P; PhD, 1984, UNIVERSITY OF WISCONSIN; process design and control

JIANG, SHAOYI; PhD, 1993, CORNELL UNIVERSITY; molecular simulation, statistical mechanics, and scanning probe microscopy

KRIEGER-BROKEET, BARBARA; PhD, 1976, WAYNE STATE UNIVERSITY; reaction engineering, chemical kinetics and catalysis simulation

OVERNEY, RENE M; PhD, 1992, UNIVERSITY OF BASEL (SWITZERLAND); nanoscale surface science and polymer rheology

Assistant Professor

HAYES, BRIAN; PhD, 1997, UNIVERSITY OF WASHINGTON; polymers and fiber-reinforced composites in aerospace and sporting goods industries

PUN, SUZIE H; PhD, 2000, CALIFORNIA INSTITUTE OF TECHNOLOGY; Macromolecule transport; non-viral gene delivery; intracellular trafficking

Civil and Environmental Engineering

Professor

BENJAMIN, MARK M; PhD, 1979, STANFORD UNIVERSITY; chemistry of natural waters, chemical and biological treatment of water and wastewater

BOGAN, RICHARD H; DSc, 1954, MASSACHUSETTS INSTITUTE OF TECHNOLOGY; water and air resources, environmental engineering

BROWN, COLIN B; PhD, 1962, UNIVERSITY OF MINNESOTA; structural engineering and systems

BUCKNAM, RONALD E.; PhD, 1964, UNIVERSITY OF ILLINOIS; Professional Engineering Practice Liaison (PEPL)

BURGES, STEPHEN J; PhD, 1970, STANFORD UNIVERSITY; surface and ground water hydrology, water resource systems analysis and design

CARLSON, DALE A.; PhD, 1960, UNIVERSITY OF WISCONSIN; water resources and solid-waste management

COLCDORD, J. E; MSCE, 1949, UNIVERSITY OF WISCONSIN; surveying engineering

EBERHARD, MARC O.; PhD, 1989, UNIVERSITY OF ILLINOIS; structural analysis and design, reinforced concrete, earthquake engineering, nondestructive testing

ELIAS, ZIAD; DSc, 1963, MASSACHUSETTS INSTITUTE OF TECHNOLOGY; engineering mechanics

EVANS, ROGER J; PhD, 1965, UNIVERSITY OF CALIFORNIA (BERKELEY); engineering mechanics, structural engineering

FERGUSON, JOHN F.; PhD, 1970, STANFORD UNIVERSITY; chemical and biological processes in water and waste treatment and in natural water systems

HAMMER, VERNON B; MS, 1941, HARVARD UNIVERSITY; solid-waste management

HARTZ, BILLY J; PhD, 1955, UNIVERSITY OF CALIFORNIA (BERKELEY); engineering mechanics, structural mechanics

JACOBY, JEAN M.; PhD, 1986, UNIVERSITY OF WASHINGTON; applied aquatic ecology and restoration; water quality management

LARSON, TIMOTHY; PhD, 1976, UNIVERSITY OF WASHINGTON; airborn particles, air quality modeling, and instrument development

LETTERNMAIER, DENNIS P; PhD, 1975, UNIVERSITY OF WASHINGTON; systems analysis and water resources planning

LINDELL, L. TOMMY; PhD, 1974, UNIVERSITY OF UPPSALA (SWEDEN); environmental engineering

MAHONEY, JOE PAUL; PhD, 1979, TEXAS A&M UNIVERSITY; construction materials, pavement systems, airport design

MANNERING, FRED L.; PhD, 1983, MASSACHUSETTS INSTITUTE OF TECHNOLOGY; traffic flow theory, networks, econometric methods, equilibration in transportation markets

MATTOCK, ALAN; PhD, 1955, UNIVERSITY OF LONDON (UK); structural behavior and design

MORGAN, MICHAEL S; DSc, 1972, MASSACHUSETTS INSTITUTE OF TECHNOLOGY; applied respiratory, physiology and inhalation toxicology

NECE, RONALD E; DSc, 1958, MASSACHUSETTS INSTITUTE OF TECHNOLOGY; hydraulic and coastal engineering

REED, DOROTHY; PhD, 1980, PRINCETON UNIVERSITY; structural and wind engineering

REIBER, STEVE H.; PhD, 1983, UNIVERSITY OF UTAH; environmental engineering

RICHEY, JEFFREY E; PhD, 1973, UNIVERSITY OF CALIFORNIA (DAVIS); quantitative problems of aquatic ecosystems, primary Amazon River, limnology

ROGANO, AUGUST T; MS, 1941, HARVARD UNIVERSITY; DSc, 1954, HARVARD UNIVERSITY; air resources

RUTHERFORD, G SCOTT; PhD, 1974, NORTHWESTERN UNIVERSITY; transportation planning and engineering, transit planning, demand forecasting

SCHNEIDER, JERRY; PhD, 1966, UNIVERSITY OF PENNSYLVANIA; metropolitan area and regional planning, transportation and other urban models

SEABLOOM, ROBERT; MSCE, 1956, UNIVERSITY OF WASHINGTON; water-quality and solid-waste management

STEINEMANN, ANNE; PhD, 1993, STANFORD UNIVERSITY; Water, Drought, Environment, Climate Change, Health, Chemical Exposures, Public Economics, Sustainability

STENSEL, H. DAVID; PhD, 1971, CORNELL UNIVERSITY; biological wastewater treatment, fixed film reactors, mass transfer mechanics, modeling

SYLVESTER, ROBERT O; MS, 1941, HARVARD UNIVERSITY; water resources
YEH, HARRY H; PhD, 1983, UNIVERSITY
WOOD, ERIC F.; DSc, 1974, MASSACHUSETTS INSTITUTE OF TECHNOLOGY; environmental engineering
WELCH, EUGENE B; PhD, 1967, UNIVERSITY OF WASHINGTON; water resources and aquatic biology
WOOD, ERIC F.; DSc, 1974, MASSACHUSETTS INSTITUTE OF TECHNOLOGY; environmental engineering
YEH, HARRY H; PhD, 1983, UNIVERSITY OF CALIFORNIA (BERKELEY); fluid mechanics, water wave motions, coastal and hydraulic engineering.

Research Professor

BOOTH, DEREK B.; PhD, 1984, UNIVERSITY OF WASHINGTON; Environmental geology, particularly human influences on hillslopes, runoff, and rivers.
COVERT, DAVID S; PhD, 1974, UNIVERSITY OF WASHINGTON; atmospheric chemistry; aerosol physics, chemistry, optics, and instrumentation
DALEY, DANIEL J; PhD, 1988, UNIVERSITY OF WASHINGTON; time series modeling of physical phenomena, optimization, distributed computing, networking
STRAND, STUART E; PhD, 1982, PENNSYLVANIA STATE UNIVERSITY; forest biotechnology, environmental pollution control

Associate Professor

ARDUINO, PEDRO; PhD, 1996, GEORGIA INSTITUTE OF TECHNOLOGY; Mechanics of Porous Media, Constitutive Modeling of Soils, Numerical Methods of Geomechanics.
BRETT, MICHAEL T.; PhD, 1990, UNIVERSITY OF UPPSALA (SWEDEN); Eutrophication and food web and nutrient regulation of algal biomass and secondary production in lakes
CHENOWETH, HARRY H; MSCE, 1957, UNIVERSITY OF WASHINGTON; engineering mechanics and hydraulic engineering.
JESSUP, ANDREW T.; PhD, 1990, MASSACHUSETTS INSTITUTE OF TECHNOLOGY; applications of remote sensing to air-sea interaction
KENT, JOSEPH C; PhD, 1952, UNIVERSITY OF CALIFORNIA (BERKELEY); hydraulic engineering
KORSHIN, GREGORY; PhD, 1983, CHEMICAL ENGINEERING INSTITUTE (RUSSIA); Environmental chemistry and engineering, aquatic chemistry, generation of halogenated organic compounds
MILLER, WILLIAM; MSCE, 1952, UNIVERSITY OF WASHINGTON; materials.
SNYDER, MARK B.; PhD, 1989, UNIVERSITY OF ILLINOIS; construction engineering
SPYRIDAKIS, DIMITRIS; PhD, 1965, UNIVERSITY OF WISCONSIN; soil and water chemistry
STRAUSSER, HOWARD; MEng, 1950, JOHNS HOPKINS UNIVERSITY; hydraulic engineering
TURKIIYAH, GEORGE; PhD, 1990, CARNEGIE MELLON UNIVERSITY; computer-aided engineering, finite element modeling

Research Associate Professor

HORNER, RICHARD R.; PhD, 1978, UNIVERSITY OF WASHINGTON; Effects of human activities on water resources in urban areas.

Assistant Professor

LEHMAN, DAWN E; PhD, 1998, UNIVERSITY OF CALIFORNIA (BERKELEY); Earthquake Engineering
MUENCH, STEPHEN T; PhD, 2004, UNIVERSITY OF WASHINGTON; Transportation construction, construction information, engineering training & education, pavements
PETROFF, CATHERINE; PhD, 1993, CALIFORNIA INSTITUTE OF TECHNOLOGY; sediment transport, coastal engineering, and environmental fluid mechanics
WANG, YINHAI; PhD, 1998, TSINGHUA UNIVERSITY (CHINA); Intelligent Transportation Systems, Traffic Detection Technologies, Transportation Modeling.

Research Assistant Professor

MACKENZIE-HELNWEIN, PETER; PhD, 1997, VIENNA UNIVERSITY OF TECHNOLOGY; computational mechanics, constitutive modeling, structural stability, finite elements

Computer Science and Engineering
Professor

ANDERSON, RICHARD J.; PhD, 1985, STANFORD UNIVERSITY; educational technology, algorithms
ANDERSON, THOMAS E.; PhD, 1991, UNIVERSITY OF WASHINGTON; internetworking, local and wide area distributed systems, operating systems, computer architecture
BAER, JEAN-LOUP; PhD, 1968, UNIVERSITY OF CALIFORNIA (LOS ANGELES); computer architecture and performance evaluation
BORNING, ALAN H; PhD, 1979, STANFORD UNIVERSITY; human-computer interaction; constraint-based languages and systems
BORRIELLO, GAETANO; PhD, 1988, UNIVERSITY OF CALIFORNIA (BERKELEY); invisible and ubiquitous computing, embedded and network systems

Assistant Professor

LEHMAN, DAWN E; PhD, 1998, UNIVERSITY OF CALIFORNIA (BERKELEY); Earthquake Engineering
MUENCH, STEPHEN T; PhD, 2004, UNIVERSITY OF WASHINGTON; Transportation construction, construction information, engineering training & education, pavements
PETROFF, CATHERINE; PhD, 1993, CALIFORNIA INSTITUTE OF TECHNOLOGY; sediment transport, coastal engineering, and environmental fluid mechanics
WANG, YINHAI; PhD, 1998, TSINGHUA UNIVERSITY (CHINA); Intelligent Transportation Systems, Traffic Detection Technologies, Transportation Modeling.

Research Associate Professor

MACKENZIE-HELNWEIN, PETER; PhD, 1997, VIENNA UNIVERSITY OF TECHNOLOGY; computational mechanics, constitutive modeling, structural stability, finite elements

Assistant Professor

LEHMAN, DAWN E; PhD, 1998, UNIVERSITY OF CALIFORNIA (BERKELEY); Earthquake Engineering
MUENCH, STEPHEN T; PhD, 2004, UNIVERSITY OF WASHINGTON; Transportation construction, construction information, engineering training & education, pavements
PETROFF, CATHERINE; PhD, 1993, CALIFORNIA INSTITUTE OF TECHNOLOGY; sediment transport, coastal engineering, and environmental fluid mechanics
WANG, YINHAI; PhD, 1998, TSINGHUA UNIVERSITY (CHINA); Intelligent Transportation Systems, Traffic Detection Technologies, Transportation Modeling.

Research Assistant Professor

MACKENZIE-HELNWEIN, PETER; PhD, 1997, VIENNA UNIVERSITY OF TECHNOLOGY; computational mechanics, constitutive modeling, structural stability, finite elements

Computer Science and Engineering

Professor

ANDERSON, RICHARD J.; PhD, 1985, STANFORD UNIVERSITY; educational technology, algorithms
ANDERSON, THOMAS E.; PhD, 1991, UNIVERSITY OF WASHINGTON; internetworking, local and wide area distributed systems, operating systems, computer architecture
BAER, JEAN-LOUP; PhD, 1968, UNIVERSITY OF CALIFORNIA (LOS ANGELES); computer architecture and performance evaluation
BORNING, ALAN H; PhD, 1979, STANFORD UNIVERSITY; human-computer interaction; constraint-based languages and systems
BORRIELLO, GAETANO; PhD, 1988, UNIVERSITY OF CALIFORNIA (BERKELEY); invisible and ubiquitous computing, embedded and network systems
CHAMBERS, CRAIG D.; PhD, 1992, STANFORD UNIVERSITY; programming language design, optimizing compilation, object-oriented systems
DE ROSE, ANTHONY DAVID; PhD, 1985, UNIVERSITY OF CALIFORNIA (BERKELEY); computer-aided geometric design and modeling, graphical user interfaces, high resolution graphics
EBELING, WILLIAM H.C.; PhD, 1986, CARNEGIE MELLON UNIVERSITY; VLSI architectures, configurable computing, computer-aided design
EGGERS, SUSAN JANE; PhD, 1989, UNIVERSITY OF CALIFORNIA (BERKELEY); uniprocessor and parallel architectures and program behavior, back-end compiler optimizations
ETZIONI, OREN; PhD, 1990, CARNEGIE MELLON UNIVERSITY; artificial intelligence and information retrieval, natural language interfaces, software agents
FELSENSTEIN, JOSEPH; PhD, 1968, UNIVERSITY OF CHICAGO; estimation of evolutionary trees, models of long-term evolutionary processes, and theoretical population
FRIEDMAN, BATYA; PhD, 1988, UNIVERSITY OF CALIFORNIA (BERKELEY); value-sensitive design, social-cognitive and cultural aspects of information systems
GOLDE, HELLMUT; PhD, 1959, STANFORD UNIVERSITY; programming languages, programming systems, compilers, computer networks
GREEN, PHILIP; PhD, 1976, UNIVERSITY OF CALIFORNIA (BERKELEY); Mathematical and Computer Methods for Genome Analysis
HANKS, STEVEN JOHN; PhD, 1990, YALE UNIVERSITY; Artificial intelligence; decision-theoretic reasoning; e-commerce technologies; computer security
HOOD, LEROY E.; PhD, 1968, CALIFORNIA INSTITUTE OF TECHNOLOGY; molecular immunology, large-scale DNA mapping and sequencing, molecular evolution
KALET, IRA J; PhD, 1968, PRINCETON UNIVERSITY; computer simulation of radiation therapy, artificial intelligence, computer graphics
KARLIN, ANNA R.; PhD, 1987, STANFORD UNIVERSITY; online algorithms, probabilistic algorithms and probabilistic analysis
KAUTZ, HENRY; PhD, 1988, UNIVERSITY OF ROCHESTER; artificial intelligence, knowledge representation, decision-theoretic control of reasoning
KEHL, THEODORE; PhD, 1961, UNIVERSITY OF WISCONSIN; hardware design (VLSI), telephony and API programming
KIM, YONGMIN; PhD, 1982, UNIVERSITY OF WISCONSIN; computer architecture,
imaging systems, medical imaging, computer graphics, multimedia, home health

LADNER, RICHARD E; PhD, 1971, UNIVERSITY OF CALIFORNIA (BERKELEY); design and analysis of algorithms, data compression, network algorithms, cache performance

LAZOWSKA, EDWARD D; PhD, 1977, UNIVERSITY OF TORONTO (CANADA); computer systems: modeling and analysis, design and implementation, distributed and parallel systems

LEY, HENRY M; MS, 1981, UNIVERSITY OF WASHINGTON; operating systems, distributed and parallel systems, Web systems and performance

NOTKIN, DAVID S; PhD, 1984, Carnegie Mellon University; software engineering, software evolution, software tools and environments

OLSON, MAYNARD V.; PhD, 1970, STANFORD UNIVERSITY; Methods and applications of large-scale DNA analysis

OSTENDORF, MARI; PhD, 1985, STANFORD UNIVERSITY; Speech synthesis and understanding; spoken document retrieval; statistical pattern recognition

RISKIN, EVE A; PhD, 1990, STANFORD UNIVERSITY; image compression and processing, and signal processing

RUZZO, WALTER L; PhD, 1978, UNIVERSITY OF CALIFORNIA (BERKELEY); computational biology

SHAPIRO, LINDA G.; PhD, 1974, UNIVERSITY OF IOWA; computer vision, multimedia information systems, medical informatics, pattern recognition

SHAW, ALAN CARY; PhD, 1968, STANFORD UNIVERSITY; operating systems, software specifications, real-time systems

STIBER, MICHAEL D; PhD, 1992, Stanford University; speech technologies, speech synthesis and understanding; spoken document retrieval; statistical pattern recognition

BERKSHAD, BRIAN; PhD, 1990, UNIVERSITY OF WASHINGTON; operating systems, architecture, distributed systems, parallel systems

BILMES, JEFFREY A.; PhD, 1999, UNIVERSITY OF CALIFORNIA (BERKELEY); Speech & pattern recognition, learning, audio processing, high-performance computing, human-computer

BOHRINGER, KARL F.; PhD, 1997, CORNELL UNIVERSITY; microelectromechanical systems (MEMS), applied microtechnology, micro spacecraft, distributed/ubiqui

CURLESS, BRIAN L.; PhD, 1997, STANFORD UNIVERSITY; computer graphics; active machine vision

DIORIO, CHRISTOPHER J; PhD, 1997, CALIFORNIA INSTITUTE OF TECHNOLOGY; silicon learning chips, neural networks, and learning algorithms

DOMINGOS, PEDRO MORAIS DEL; PhD, 1997, UNIVERSITY OF CALIFORNIA (IRVINE); artificial intelligence, machine learning, data mining

FOX, DIETER; PhD, 1998, UNIVERSITY OF BONN (GERMANY); artificial intelligence and mobile robotics, probabilistic state estimation, particle filters

GRIBBLE, STEVEN; PhD, 2000, UNIVERSITY OF CALIFORNIA (BERKELEY); cluster computing, operating systems, Internet infrastructure and services, distributed computing

HAUCK, SCOTT; PhD, 1995, UNIVERSITY OF WASHINGTON; FPGAs, Reconfigurable Computing, VLSI/CAD, Digital Logic, Adaptive Computing

JOHNSON, RONALD A.; MA, 1972, UNIVERSITY OF CHICAGO; MS, 1975, UNIVERSITY OF SOUTHERN CALIFORNIA; information sciences

LANDAY, JAMES A; PhD, 1996, CARNEGIE MELLON UNIVERSITY; Human-computer interaction, ubiquitous computing

NOBLE, WILLIAM S; PhD, 1998, UNIVERSITY OF CALIFORNIA (SAN DIEGO); the development of machine learning techniques for application to problems in molecular biology

PADDANABHAN, VENKATA N.Z; PhD, 1998, UNIVERSITY OF CALIFORNIA (BERKELEY); Internet performance analysis, wireless networking and mobile computing.

RAO, RAJESH P.N.; PhD, 1998, UNIVERSITY OF ROCHESTER; neural computing, machine vision and learning, robotics, computational neuroscience

MONEZ, BARBARA; MFA, 1989, RHODE ISLAND SCHOOL OF DESIGN; computer graphics, character animation

Robotics

Professor

ALBRECHT, ROBERT W; PhD, 1961, UNIVERSITY OF MICHIGAN; reactor dynamics and stochastic processes, innovative nuclear reactors, reactor instrumentation, rob

ALEXANDRO, FRANK J; MSE, 1959, NEW YORK UNIVERSITY; DSc, 1964, NEW YORK UNIVERSITY; control systems, stochastic estimation methods

ALLSTOT, DAVID JAMES; PhD, 1979, UNIVERSITY OF CALIFORNIA (BERKELEY); Design and simulation of RF and mixed-signal integrated circuits, System-on-chip Solutions

ATLAS, LES EUGENE; PhD, 1984, STANFORD UNIVERSITY; time-frequency representations, digital signal processing applied to speech, audio, manufacturing

BERNARD, GARY D; PhD, 1964, UNIVERSITY OF WASHINGTON; advanced
sensors for manufacturing, time-frequency classification, visual information processing

BJORKSTAM, JOHN L; PhD, 1958, UNIVERSITY OF WASHINGTON; materials science and engineering, fundamentals and technological applications of magnetic resonance

CHIZECK, HOWARD JAY; DSc, 1982, MASSACHUSETTS INSTITUTE OF TECHNOLOGY; Biologically inspired control systems for autonomous robotics, prosthetics, and rehabilitation.

CLARK, ROBERT N; PhD, 1969, STANFORD UNIVERSITY; automatic control systems, fault detection in dynamic systems

DALTON, LARRY R.; PhD, 1971, HARVARD UNIVERSITY; materials chemistry focused on producing next generation opto-electronic materials

DARLING, ROBERT B; PhD, 1985, GEORGIA INSTITUTE OF TECHNOLOGY; semiconductor devices, solid state, optoelectronics, microelectronics

DOE, DANIEL G; PhD, 1958, STANFORD UNIVERSITY; microwaves, physical electronics, semiconductor devices, sensors

DUNHAM, SCOTT T.; PhD, 1985, STANFORD UNIVERSITY; Modeling and simulation of microfabrication processes and device behavior.

EBELING, WILLIAM H.C.; PhD, 1986, CARNEGIE MELLON UNIVERSITY; VLSI architectures, configurable computing, computer-aided design

EL-SHARKAWI, MOHAMED A.; PhD, 1980, UNIVERSITY OF BRITISH COLUMBIA (CANADA); analysis and control of power electronics, systems, and electric drives; artificial neural networks

GARFORD, EDWARD C; PhD, 1959, UNIVERSITY OF CALIFORNIA (Berkely); electronics, computers

HANNAFORD, BLAKE; PhD, 1985, UNIVERSITY OF CALIFORNIA (Berkely); haptic interfaces, robotics, biomechanics, bioengineering, controls, human-machine interaction

HARALICK, ROBERT M; PhD, 1969, UNIVERSITY OF CALIFORNIA (BERKELEY); computer vision, artificial intelligence, pattern recognition, image processing

HSU, CHIH-CHI; PhD, 1951, OHIO STATE UNIVERSITY; control systems and cybernetics

HUANG, XUECONG D.; PhD, 1989, PURDUE UNIVERSITY; microwave and millimeter-wave remote sensing, optics, and electromagnetics

JACKSON, DAVID L; PhD, 1955, UNIVERSITY OF WASHINGTON; digital design, artificial intelligence, models of learning systems

KIM, YONGMIN; PhD, 1982, UNIVERSITY OF WISCONSIN; computer architecture, imaging systems, medical imaging, computer graphics, multimedia, home health

KUGA, YASUO; PhD, 1983, UNIVERSITY OF WASHINGTON; microwave and millimeter-wave remote sensing, optics, and electromagnetics

LAURITZEN, PETER O; PhD, 1961, STANFORD UNIVERSITY; power electronics, electronic devices, instrumentation

LAWTON, THOMAS; PhD, 1972, UNIVERSITY OF WASHINGTON; bioengineering, electrical engineering

LIU, CHEN-CHING; PhD, 1983, UNIVERSITY OF CALIFORNIA (BERKELEY); power system analysis/computing, intelligent system methodologies/applications, power electronics

MELDUM, DEIRDRE R.; PhD, 1992, STANFORD UNIVERSITY; Laboratory automation systems, genome analysis, modeling and control of dynamic systems, robots

MORITZ, WILLIAM E; PhD, 1969, STANFORD UNIVERSITY; human-powered transportation

OSTENDORF, MARI; PhD, 1985, STANFORD UNIVERSITY; Speech synthesis and understanding; spoken document retrieval; statistical pattern recognition.

PEDEN, IRENE CARSWELL; PhD, 1962, STANFORD UNIVERSITY; subsurface remote sensing and applied electromagnetics

PORTER, ROBERT P.; PhD, 1970, NORTHEASTERN UNIVERSITY; acoustics, electromagnetics, signal processing

RISKIN, EVE A; PhD, 1990, STANFORD UNIVERSITY; image compression and processing, and signal processing

RITCEY, JAMES A.; PhD, 1985, UNIVERSITY OF CALIFORNIA (SAN DIEGO); communications, signal processing, radar/sonar

ROY, SUMIT; PhD, 1988, UNIVERSITY OF CALIFORNIA (SANTA BARBARA); Performance analysis of communication networks; statistical & numerical computing

SAHR, JOHN D.; PhD, 1990, CORNELL UNIVERSITY; radar remote sensing, ionospheric physics, signal processing; wireless communications

SHI, CHUAN JIN; PhD, 1994, UNIVERSITY OF WATERLOO (CANADA); VLSI and VLSI-CAD, optimization

SIGELMANN, RUBENS A; PhD, 1963, UNIVERSITY OF WASHINGTON; bioengineering, ultrasonics, propagation, acoustics.

SPINDEL, ROBERT C.; PhD, 1971, YALE UNIVERSITY; ocean acoustics, signal processing, acoustic navigation systems, acoustic tomography

SUN, MING-TING; PhD, 1985, UNIVERSITY OF CALIFORNIA (LOS ANGELES); multimedia/video processing/networking VLSI

TSANG, LEUNG; PhD, 1976, MASSACHUSETTS INSTITUTE OF TECHNOLOGY; wave propagation and scattering, remote sensing and optics

YUAN, CHUN; PhD, 1988, UNIVERSITY OF UTAH; magnetic resonance imaging in medical application

Research Professor

BEACH, KIRK WATSON; PhD, 1971, UNIVERSITY OF CALIFORNIA (BERKELEY); arterial disease in diabetes, blood flow studies with ultrasonic Doppler

CRUM, LAWRENCE A.; PhD, 1967, OHIO UNIVERSITY; physical acoustics, underwater acoustics, medical ultrasound, acoustic cavitation, sonoluminescence

DAILEY, DANIEL J.; PhD, 1988, UNIVERSITY OF WASHINGTON; time series modeling of physical phenomena, optimization, distributed computing, networking

WINEBRENNER, DALE P.; PhD, 1985, UNIVERSITY OF WASHINGTON; optical and radiowave propagation and scattering, remote sensing of planetary surfaces and subsurfa

Associate Professor

BABBITT, WILLIAM R; PhD, 1987, HARVARD UNIVERSITY; Optical memories, processors, and optical interconnects and nonlinear optics

BERG, MARTIN C.; PhD, 1986, STANFORD UNIVERSITY; digital control system design, control of structurally flexible electromechanical systems

BILMES, JEFFREY A.; PhD, 1999, UNIVERSITY OF CALIFORNIA (BERKELEY); Speech & pattern recognition, learning, audio processing, high-performance computing, human-computer interaction

BOHRINGER, KARL; PhD, 1997, CORNELL UNIVERSITY; microelectromechanical systems (MEMS), applied microtechnology, microspacecraft, distributed/ubiqui

CHOU, PHILIP A.; PhD, 1998, STANFORD UNIVERSITY; Compression and recognition of video images, audio, speech and documents.

GIRI, JAY; PhD, 1977, CLARKSON UNIVERSITY; power system analysis, software development and user interfaces for real-time power system control

HAUCK, SCOTT; PhD, 1995, UNIVERSITY OF WASHINGTON; FPGAs, Reconfigurable Computing, VLSI/CAD, Digital Logic, Adaptive Computing.

HELMS, WARD J; PhD, 1968, UNIVER-
SITY OF WASHINGTON; VLSI analog and digital circuit design, integrated circuits, acoustics and audio, silicon compilers.

ANDHYALA, VIKRAM; PhD, 1998, UNIVERSITY OF ILLINOIS; Computational and Applied Electromagnetics, High-Speed Circuit Applications of Field Solvers.

LIN, LIH-YUAN; PhD, 1996, UNIVERSITY OF CALIFORNIA (LOS ANGELES); Photonics and MEMS, for applications in advanced communications and biotechnology.

LIU, HUI; PhD, 1995, UNIVERSITY OF TEXAS (AUSTIN); Wireless system and network design: DSP and VLSI for communications, numerical computing; statistics.

SINANAN, MIKA N.; PhD, 1986, UNIVERSITY OF BRITISH COLUMBIA (CANADA); Surgical education, biorobotic surgical instrument development, and clinical procedure development.

THORSOS, ERIC I; PhD, 1972, MASSACHUSETTS INSTITUTE OF TECHNOLOGY; rough surface scattering, numerical simulation and theory, underwater acoustics.

WILSON, DENISE M; PhD, 1995, GEORGIA INSTITUTE OF TECHNOLOGY; Distributed sensing systems design with emphasis on electronics interface.

Research Associate Professor

NELSON, BRIAN A.; PhD, 1987, UNIVERSITY OF MICHIGAN; Nanofabrication, biotechnology, MEMS, organic microsystems, organic electronics, self-assembly.

CHAO, JAI JOON; PhD, 1990, UNIVERSITY OF WASHINGTON; adaptive signal processing, neural networks, and fuzzy logic.

FOX, DIETER; PhD, 1998, UNIVERSITY OF BONN (GERMANY); artificial intelligence and mobile robotics, probabilistic state estimation, particle filters.

GOLDSCHNEIDER, JILL; PhD, 1997, UNIVERSITY OF WASHINGTON; data compression, image processing and clustering.

GUPTA, MAYA R; PhD, 2003, STANFORD UNIVERSITY; statistical classification and estimation, color image processing, information theory.

KLAVINS, ERIC; PhD, 1998, UNIVERSITY OF MICHIGAN; Robotics, distributed algorithms, decentralized control and self-assembly.

LUBY, JAMES C; PhD, 1984, UNIVERSITY OF WASHINGTON; rigid body mechanics, software design for engineering economics.

Materials Science and Engineering

Professor

ANDERSON, DONALD; BS, 1941, UNIVERSITY OF ILLINOIS; mining and exploration.

ARCHBOLD, THOMAS F; PhD, 1961, PURDUE UNIVERSITY; corrosion, thermal diffusion, substructure characterization, fatigue.

BORDIA, RAJENDRA KUMAR; PhD, 1986, CORNELL UNIVERSITY; processing and mechanical properties of ceramics, polymer and ceramic composites.

FISCHBACH, DAVID B; PhD, 1955, YALE UNIVERSITY; structure and properties of carbons graphite, other non-oxide ceramics, and composite materials.

JEN, ALEX K.-Y.; PhD, 1984, UNIVERSITY OF PENNSYLVANIA; organic materials/polymer chemistry, functional materials, optical sciences.

OHUCHI, FUMIO; PhD, 1981, UNIVERSITY OF FLORIDA; nucleation and growth of thin film materials, surface science, glass, device applications.

POLONIS, DOUGLAS H; PhD, 1955, UNIVERSITY OF BRITISH COLUMBIA (CANADA); physical metallurgy, phase transformations in solids, mechanical properties of materials, structure.

ROGERS, J. WILLIAM; PhD, 1979, UNIVERSITY OF TEXAS (AUSTIN); surface chemistry and engineering, applications to thin film deposition.

SARIKAYA, MEHMET; PhD, 1982, UNIVERSITY OF CALIFORNIA (BERKELEY); Biomimetics, nanotechnology, biomaterials, tissue engineering, dental, magnets, semiconductors, etc.

SCOTT, WILLIAM D; PhD, 1961, UNIVERSITY OF CALIFORNIA (BERKELEY); optical and transmission electron microscopy of high performance ceramics, alumina and electronic materials.

WHITTEMORE, OSGOOD J; PhD, 1950, IOWA STATE UNIVERSITY; ceramic processing, refractories, industrial minerals.
### Associate Professor

**GANTER, MARK; PhD, 1985, UNIVERSITY OF WISCONSIN;**
chemical bonding, high temperature equilibria environmental effects on mechanical properties, high

**STAND, ROBERT GEORGE; PhD, 1972, STANFORD UNIVERSITY;**
mechanical behavior, elastic and plastic deformation, and high-temperature creep in materials

**ZHANG, MIQIN; PhD, 1998, UNIVERSITY OF CALIFORNIA (BERKELEY);**
Biomaterials, tissue engineering, BioMEMS, bionanotechnology, surface modification, drug delivery.

### Research Associate Professor

**FLINN, BRIAN D.; PhD, 1991, UNIVERSITY OF CALIFORNIA (SANTA BARBARA);**
structure-processing-property relationships in structural materials

### Mechanical Engineering

**Professor**

**ALEXANDER, DANIEL; PhD, 1977, WASHINGTON STATE UNIVERSITY;**
engineering design

**BALISE, PETER; MS, 1950, MASSACHUSETTS INSTITUTE OF TECHNOLOGY;**
systems analysis and control

**CHALUPNIK, JAMES; PhD, 1964, UNIVERSITY OF TEXAS (AUSTIN);**
sound and vibration, wave propagation

**CORLETT, RICHARD; PhD, 1963, HARVARD UNIVERSITY;**
ergy systems and combustion

**DAY, EMMETT E; PhD, 1962, UNIVERSITY OF CALIFORNIA (BERKELEY);**
materials, experimental stress analysis

**DEPEW, CREIGHTON A; PhD, 1960, UNIVERSITY OF CALIFORNIA (BERKELEY);**
heat transfer, fluid mechanics

**DEVASIA, SANTOSH; PhD, 1993, UNIVERSITY OF CALIFORNIA (SANTA BARBARA);**
control theory and applications: nanotechnology, distributed systems, and biomedical systems

**EMERY, ASHLEY F; PhD, 1961, UNIVERSITY OF CALIFORNIA (BERKELEY);**
experimental design, heat transfer, HVAC, thermal stress/fracture, bioengineering

**FABIEN, BRIAN C.; PhD, 1990, COLUMBIA UNIVERSITY;**
kinematics, modeling and simulation of physical systems, optimal control

**FIREY, JOSEPH C; MME, 1941, UNIVERSITY OF WISCONSIN;**
combustion, lubrication

**GALLE, KURT R; PhD, 1951, PURDUE UNIVERSITY;**
instrumentation, controls, bioengineering

**GANTER, MARK; PhD, 1985, UNIVERSITY OF WISCONSIN;**
solid modeling, computer graphics and geometry, kinematics, rapid prototyping, manufacturing design

**GARBINI, JOSEPH; PhD, 1977, UNIVERSITY OF WISCONSIN;**
systems and controls analysis, instrumentation, manufacturing automation

**GESELLER, FREDERICK B; PhD, 1964, PURDUE UNIVERSITY;**
fluid mechanics, turbulence

**JORGENSEN, JENS E; Dsc, 1969, MASSACHUSETTS INSTITUTE OF TECHNOLOGY;**
systems analysis, manufacturing, automation and controls, forest engineering

**KIPPENHAN, CHARLES J; PhD, 1948, UNIVERSITY OF IOWA;**
energy conservation in buildings, heating ventilating and air conditioning, heat transfer

**KOBAYASHI, ALBERT S; PhD, 1958, ILLINOIS INSTITUTE OF TECHNOLOGY;**
fraction mechanics

**KRAMLICH, JOHN C.; PhD, 1980, WASHINGTON STATE UNIVERSITY;**
heterogeneous combustion, pollutant formation and control from thermal systems, waste remediation

**LOVE, WILLIAM J; PhD, 1952, UNIVERSITY OF ILLINOIS;**
design, mechanics, power systems

**MC CORMICK, NORMAN J.; PhD, 1965, UNIVERSITY OF MICHIGAN;**
radiative transfer, optical oceanography, reliability/ risk analysis, mechanichal engineering design

**MC FERON, DEAN E; PhD, 1956, UNIVERSITY OF ILLINOIS;**
heat transfer and thermal power processes

**MORRISON, JAMES B; MS, 1954, UNIVERSITY OF WASHINGTON;**
design, dynamics

**PRATT, DAVID T; PhD, 1968, UNIVERSITY OF CALIFORNIA (BERKELEY);**
turbulent combustion, computer simulation

**RAMULU, M; PhD, 1982, UNIVERSITY OF WASHINGTON;**
mansufacturing processes, production engineering, applied mechanics, fatigue and fracture mechanics

**REINHALL, PER G; PHD, 1982, CALIFORNIA INSTITUTE OF TECHNOLOGY;**
nonlinear dynamics, vibrations, vibration control, acoustics, biomedical engineering

**SHEU, I-YEU (STEVE); PhD, 1991, UNIVERSITY OF CALIFORNIA (BERKELEY);**
linear and nonlinear vibrations, disk and machine dynamics, damping and vibration control

**SIDLES, JOHN ARTHUR; PhD, 1983, UNIVERSITY OF WASHINGTON;**
seeing molecules (i.e., quantum-coherent instrumentation); regenerating cartilage

**TAGGART, RAYMOND; PhD, 1956, QUEEN'S UNIVERSITY (UK);**
mechanical metallurgy

**TAYA, MINORU; PhD, 1977, NORTH-WESTERN UNIVERSITY;**
composite materials, elasticity and plasticity, impact physics, fracture theory

**TUTTLE, MARK E; PhD, 1984, VIRGINIA POLYTECHNIC INST & STATE UNIV;**
applied solid mechanics, composite materials and structures, adhesion mechanics

**WILSON, WILLIAM R.D.; PhD, 1967, QUEEN'S UNIVERSITY OF BELFAST (IRELAND);**
mansufacturing and tribology, particularly metal forming

**WOLAK, JAN; PhD, 1965, UNIVERSITY OF CALIFORNIA (BERKELEY);**
mansufacturing processes

### Associate Professor

**ADEE, BRUCE H; PhD, 1972, UNIVERSITY OF CALIFORNIA (BERKELEY);**
vessel safety and stability, floating structures, waves, ship resistance, model testing

**BERG, MARTIN C.; PhD, 1986, STANFORD UNIVERSITY;**
digital control system design, control of structurally flexible electromechanical systems

**BODIOAS, JOHN R; PhD, 1959, CARNEGIE MELLON UNIVERSITY;**
fluid mechanics, heat transfer, solar energy

**CHALK, WILLIAM M; MME, 1961, UNIVERSITY OF WASHINGTON;**
design graphics.

**COOPER, JOYCE S.; PhD, 1996, DUKES UNIVERSITY;**
design for environment and industrial ecology methodologies and models

**FORD, PAUL W; MSEE, 1959, UNIVERSITY OF WASHINGTON;**
mansufacturing processes, metal casting

**HENRY, ANN M.; PhD, 1995, OHIO STATE UNIVERSITY;**
polymer composites and manufacturing, polymer optics, heat transfer, design

**HOLT, RICHARD; MME, 1957, UNIVERSITY OF WASHINGTON;**
mansufacturing processes, welding

**KIELING, WILLIAM C; MME, 1959, UNIVERSITY OF WASHINGTON;**
design, dynamics, adhesion mechanics

**KUMAR, VIPIN; PhD, 1988, MASSACHUSETTS INSTITUTE OF TECHNOLOGY;**
mansufacturing, polymer processing, microcellular plastics, design theory and methodology

**NELSON, ALAN C.; PhD, 1980, UNIVERSITY OF CALIFORNIA (BERKELEY);**
biochemical imaging using image analysis for tissue and tumor studies

**SHERER, ROBERT E; PhD, 1958, UNIVERSITY OF WASHINGTON;**
solid mechanics

**STORTI, DUANE W; PhD, 1983, CORNELL UNIVERSITY;**
nonlinear dynamics and vibrations, dynamical systems, perturbations and bifurcations

### Research Associate Professor

**CHING, RANDAL PRESTON; PhD, 1992, UNIVERSITY OF WASHINGTON;**
orthopaedic biomechanisms related to
injury prevention, injury mechanisms and injury repair
DAHL, PETER H.; PhD, 1989, MASSACHUSETTS INSTITUTE OF TECHNOLOGY; underwater acoustics; sound scattering from the sea surface, bubbles, marine life
SANDWITH, COLIN J; PhD, 1966, OREGON STATE UNIVERSITY; corrosion, material science, design, manufacturing.

Research Assistant Professor
WANG, WEI-CHIH; PhD, 1996, UNIVERSITY OF WASHINGTON; MEMS, fiber optic sensors, biomedical instrumentation, flexible sensors and actuators

Technical Communication

Professor
BEREANO, PHIL; JD, 1965, COLUMBIA UNIVERSITY; MRP, 1971, CORNELL UNIVERSITY; technology assessment, social values, public policy technology: social values, citizen participation
CONWAY, MARY B; PhD, 1973, UNIVERSITY OF WASHINGTON; writing style and theories of technical communication, rhetoric
HASELKORN, MARK P; PhD, 1977, UNIVERSITY OF MICHIGAN; real-time information systems, human/machine interaction, the computer in technical communication
RAMEY, JUDITH A; PhD, 1983, UNIVERSITY OF TEXAS (AUSTIN); computer documentation, online documentation, user interface design and usability testing
WHITE, MYRON; PhD, 1958, UNIVERSITY OF WASHINGTON; technical editing, publications management, bibliography for document design

Associate Professor
WILLIAMS, THOMAS R; PhD, 1988, UNIVERSITY OF WASHINGTON; text and visual information processing, document design, interactive multimedia

Lecturer
KATO, MASASHI; MA, 1980, UNIVERSITY OF WASHINGTON; technology-enhanced instruction, distance learning, research methods, international communication
College of Forest Resources

Professor

AGEE, JAMES K; PhD, 1973, UNIVERSITY OF CALIFORNIA (BERKELEY); management of natural systems, forest ecology, fire ecology

AMMIRATI, JOSEPH F; PhD, 1972, UNIVERSITY OF MICHIGAN; mycology, taxonomy and ecology of fungi

BARE, BRUCE; PhD, 1969, PURDUE UNIVERSITY; forest land management and valuation, taxation, finance, management science

BRADLEY, GORDON A; PhD, 1986, UNIVERSITY OF MICHIGAN; forest land use planning, Conservation area planning and design

BRIGGS, DAVID G; PhD, 1980, UNIVERSITY OF CALIFORNIA; operations research in forest products industries

BRUBAKER, LINDA B; PhD, 1973, UNIVERSITY OF MICHIGAN; dendrochronology, forest ecology, quaternary paleoecology

BRYANT, BENJAMIN S; Doctor of Forestry, 1966, YALE UNIVERSITY; biology and conservation of free-living birds and mammals, wildlife and human culture

BRYANT, BENJAMIN S; Doctor of Forestry, 1966, YALE UNIVERSITY; wildlife ecology, vertebrate wildlife ecology and conservation

COLE, DALE W; PhD, 1963, UNIVERSITY OF WASHINGTON; forest soils, mineral cycling in forest ecosystems

CONQUEST, LOVEDAY L; PhD, 1975, UNIVERSITY OF WASHINGTON; statistics in forestry, fisheries, and environmental pollution monitoring

CUNDY, TERRANCE W; PhD, 1983, UTAH STATE UNIVERSITY; hillslope hydrology and watershed management

DOWDLE, BARNEY; PhD, 1962, YALE UNIVERSITY; development of forest products industries, public forest land management

DRIVER, CHARLES H; PhD, 1954, LOUISIANA STATE UNIVERSITY; processes of wood decay, forest diseases, range ecology

EASTIN, IVAN; PhD, 1992, UNIVERSITY OF WASHINGTON; marketing strategies and international trade of forest products

EDMONDS, ROBERT L; PhD, 1971, UNIVERSITY OF WASHINGTON; forest soil microbiology, biology of forest diseases, aerobiology

EWING, KERN; PhD, 1982, UNIVERSITY OF WASHINGTON; wetland plant ecology, restoration ecology, ecosystem management

FRANKLIN, JERRY F; PhD, 1966, WASHINGTON STATE UNIVERSITY; forest ecosystem analysis, vegetation patterns, tree mortality in natural landscapes

FRITSCHEN, LEO J; PhD, 1960, IOWA STATE UNIVERSITY; biometeorology, micrometeorology, measurement and instrumentation of the environment

GARA, ROBERT I; PhD, 1964, OREGON STATE UNIVERSITY; bark beetle, forest insect ecology, forest insect behavior, international forestry

GUSTAFSON, RICHARD ROY; PhD, 1982, UNIVERSITY OF WASHINGTON; forest ecology, forest management, analysis of trade policy, global trade modeling, climate change, carbon cycling

HANLEY, DONALD P; PhD, 1981, UNIVERSITY OF IDAHO; extension forestry, small-forest management, forest continuing education

HARRISON, ROBERT B.; PhD, 1985, AUBURN UNIVERSITY; soil chemistry and fertility, mineral cycling, carbon sequestration, long-term forest productivity

HATHeway, WILLIAM H; PhD, 1956, HARVARD UNIVERSITY; quantitative ecology, physiological ecology, tropical forestry

HOGDSOn, KEVIN T; PhD, 1986, UNIVERSITY OF WASHINGTON; surface and colloid science, papermaking chemistry, secondary fiber recycling

HURTHFORD, BJORN F; PhD, 1959, UNIVERSITY OF NORTH CAROLINA; wood extractive chemicals, air and water quality in forest products industries

LEE, ROBERT G; PhD, 1973, UNIVERSITY OF CALIFORNIA (BERKELEY); natural resource sociology, multiresource management, development/management of forestry institutions

LIPPKE, BRUCE R; MSEE, 1959, NEW MEXICO STATE UNIVERSITY; MIE, 1966, UNIVERSITY OF CALIFORNIA (BERKELEY); international trade and environmental linkages, investment analysis, economics of forest industry

MARZLUFF, JOHN M.; PhD, 1987, NORTHERN ARIZONA UNIVERSITY; behavior, ecology, and conservation of birds and mammals

MCKEAN, WILLIAM T; PhD, 1968, UNIVERSITY OF WASHINGTON; pulp and paper science, chemical engineering

OLIVER, CHADWICK D; PhD, 1975, YALE UNIVERSITY; silviculture and forest ecology, culture of single- and mixed-species forest stands

PEREZ-GARCIA, JOHN; MS, 1982, MAYAGUEZ (PUERTO RICO); Doctor of Forestry, 1991, YALE UNIVERSITY; forest economics, analysis of trade policy, global trade modeling, climate change, carbon cycling

PETERSON, DAVID L; PhD, 1980, UNIVERSITY OF ILLINOIS; mountain ecology, subalpine forests, global climate change, forest ecology

PICKFORD, STEWART G; PhD, 1972, UNIVERSITY OF WASHINGTON; forest fire science, wildland fire management

RICHEY, JEFFREY E; PhD, 1973, UNIVERSITY OF CALIFORNIA (DAVIS); quantitative problems of aquatic ecosystems, primary Amazon River, limnology

SCHREUDER, GERARD FRITZ; PhD, 1968, YALE UNIVERSITY; statistical analysis in resource economics, international forestry, trade, aerial photos

SKALSKI, JOHN R.; PhD, 1985, CORNELL UNIVERSITY; population estimation, environmental statistics and sampling, effects assessment

SPRUEL, DOUGLAS GEORGE; PhD, 1974, YALE UNIVERSITY; forest ecology, tree ecophysiology, natural distrubance

STEIENMANN, ANNE; PhD, 1993, STANFORD UNIVERSITY; Water, Drought, Environment, Climate Change, Health, Chemical Exposures, Public Economics, Sustainability

STETTLER, REINHARD F.; PhD, 1963, UNIVERSITY OF CALIFORNIA (BERKELEY); genetics of forest tree populations, biotechnology, biomass production

TABER, RICHARD D; PhD, 1951, UNIVERSITY OF CALIFORNIA (BERKELEY); biology and conservation of free-living birds and mammals, wildlife and human culture

THOMAS, DAVID P; MA, 1948, UNIVERSITY OF WASHINGTON; economics and technology of utilizing forest crops

THORUD, DAVID B; PhD, 1964, UNIVERSITY OF MINNESOTA; watershed management, international forest policy and development

TUKEY, HAROLD B; PhD, 1958, MICHIGAN STATE UNIVERSITY; urban horticulture, horticultural physiology

VAN VOLKENBURGH, ELIZABETH; PhD, 1980, UNIVERSITY OF WASHINGTON; leaf growth and development, photosynthesis, and physiology of utilizing forest crops

WAGGENER, THOMAS R; PhD, 1966, UNIVERSITY OF WASHINGTON; policy and economics, regional impact analysis, international trade in forest products

WEST, STEPHEN D; PhD, 1979, UNIVERSITY OF CALIFORNIA (BERKELEY); vertebrate wildlife ecology and conservation

WISSMAR, ROBERT C; PhD, 1972, UNIVERSITY OF IDAHO; freshwater ecosystems, fish ecology, and trophic dynamics; river restoration

WOTT, JOHN A; PhD, 1968, CORNELL UNIVERSITY; public horticulture, horticultural education, public gardens and administration, urban horticulture

Research Professor

BOOTH, DEREK B; PhD, 1984, UNIVERSITY OF WASHINGTON; Environmental...
geology, particularly human influences on hillslopes, runoff, and rivers.
HALPERN, CHARLES; PhD, 1987, OREGON STATE UNIVERSITY; plant community ecology, plant succession, effects of forest management on plant diversity
STRAND, STUART E; PhD, 1982, PENNSYLVANIA STATE UNIVERSITY; forest biotechnology, environmental pollution control

**Associate Professor**
CHALKER-SCOTT, LINDA; PhD, 1988, OREGON STATE UNIVERSITY; environmental stress physiology of woody plants
GOLD, WARREN G.; PhD, 1988, UTAH STATE UNIVERSITY; BIOLOGY, BOTANY AND PLANT ECOLOGY
GRUE, CHRISTIAN E; PhD, 1977, TEXAS A&M UNIVERSITY; wildlife toxicology, wildlife science
PAUN, DOROTHY A; PhD, 1993, UNIVERSITY OF OREGON; financial performance analyses; international countertrade; business-to-business relationships

REICHARD, SARAH E.; PhD, 1994, UNIVERSITY OF WASHINGTON; conservation biology of plants, biological invasions
ROBERTSON, IAIN M; MLA, 1975, UNIVERSITY OF PENNSYLVANIA; designing with plants, planning and design of botanical gardens/arboreta
RUSTAGI, KRISHNA P; PhD, 1973, YALE UNIVERSITY; operations research and statistical applications in resource management, forest inventory, growth an
RYAN, CLARE; PhD, 1996, UNIVERSITY OF MICHIGAN; natural resource policy and administration, environmental conflict management, water policy
TURNBLOM, ERIC; PhD, 1994, UNIVERSITY OF MINNESOTA; forest growth modeling, quantitative stand dynamics, biometrics and natural resources inventory
VANBLARICOM, GLENN R.; PhD, 1978, UNIVERSITY OF CALIFORNIA (SAN DIEGO); marine wildlife, community ecology

**Research Associate Professor**
HORNER, RICHARD R.; PhD, 1978, UNIVERSITY OF WASHINGTON; Effects of human activities on water resources in urban areas.
RAEDEKE, KENNETH J; PhD, 1979, UNIVERSITY OF WASHINGTON; wildlife biology and conservation, population dynamics, ungulate ecology, international conservation

**Research Assistant Professor**
DOTY, SHARON L; PhD, 1995, UNIVERSITY OF WASHINGTON; Molecular biology of pollutant degradation by plants (ie. Phytoremediation)

**Lecturer**
HENRY, CHARLES L; PhD, 1989, UNIVERSITY OF WASHINGTON; ecological restoration, recycling organic wastes as soil amendments, sustainable resources and infra
The Information School

School of Law

Professor

ALLEN, CRAIG H.; JD, 1989, UNIVERSITY OF WASHINGTON; marine affairs, evidence, environmental regulation
ANDREWS, THOMAS R; MA, 1973, NORTHEASTERN UNIVERSITY; JD, 1979, UNIVERSITY OF PENNSYLVANIA; professional responsibility in legal practice, community property, decedents' estates, torts, proper
ARONSON, ROBERT H; JD, 1973, UNIVERSITY OF PENNSYLVANIA; evidence, criminal law, professional responsibility, law and literature
BODANSKY, DANIEL; JD, 1984, BOSTON UNIVERSITY; federal taxation
CALANDRILLO, STEVE P; JD, 1998, STANFORD UNIVERSITY; property law, computer-assisted legal research, law, legal bibliography, computer-assisted legal research, law, Indian law
HICKS, GREGORY A.; JD, 1978, UNIVERSITY OF TEXAS (AUSTIN); property, environmental law, water law, public lands
HJORTH, ROLAND L; LLB, 1961, NEW YORK UNIVERSITY; transnational tax, Common Market, federal taxation
HUSTON, JOHN; JD, 1952, UNIVERSITY OF WASHINGTON; LLM, 1955, NEW YORK UNIVERSITY; federal taxation
JAY, STEWART M; JD, 1976, HARVARD UNIVERSITY; constitutional law, legal history, legal philosophy, federal courts
JCKER, NANCY A.S.; PhD, 1986, UNIVERSITY OF PENNSYLVANIA; philosophical and ethical aspects of health care delivery and policy
KELLY, LISA A.; JD, 1982, UNIVERSITY OF PENNSYLVANIA; CChild Welfare, Juvenile Justice, Education, Poverty, Family, Interdisciplinary work, DV, Race
KUMMERT, RICHARD O; MBA, 1955, NORTHEASTERN UNIVERSITY; LLB, 1961, STANFORD UNIVERSITY; business planning, corporations, federal tax
KUSZLER, PATRICIA CAROL; MD, 1978, MAYO MEDICAL SCHOOL/GRADUATE SCHOOL; JD, 1991, YALE UNIVERSITY; law and medicine; health-care

Associate Professor

BOXX, KAREN E.; JD, 1983, UNIVERSITY OF WASHINGTON; decedents' estates, community property
DONALDSON, SAMUEL A; JD, 1993, UNIVERSITY OF ARIZONA; LLM, 1994, UNIVERSITY OF FLORIDA; taxation
GOMULKIEWICZ, ROBERT W.; MA, 1987, UNIVERSITY OF WASHINGTON; JD, 1987, UNIVERSITY OF WASHINGTON; intellectual property, computer law, licensing
KIRTLER, ALAN; JD, 1972, INDIANA UNIVERSITY; negotiation, mediation, alternative dispute resolution generally, and clinical legal education
RAMASATRY, ANITA G.; MA, 1989, UNIVERSITY OF SYDNEY (AUSTRALIA); JD, 1992, HARVARD UNIVERSITY; commercial law, legal history, contracts, non-profit organizations
WALSH, WALTER J.; LLM, 1989, YALE UNIVERSITY; torts, legal history, European community, constitutional law

Research Associate Professor

RIVIN, BETH E.; MD, 1982, EAST CAROLINA UNIVERSITY; MPH, 1985, HARVARD UNIVERSITY; Health and Human Rights

Assistant Professor

ANDERSON, HELEN A.; JD, 1984, UNIVERSITY OF WASHINGTON; legal research, writing, and analysis
COVINGTON, WILLIAM EDWARD; JD, 1977, UNIVERSITY OF MICHIGAN; How legislative and regulatory processes impact technology driven organizations
MASTROIANNI, ANNA C.; JD, 1986, UNIVERSITY OF PENNSYLVANIA; MPH, 1997, UNIVERSITY OF WASHINGTON; Law, ethics and policy genetics, reproduction, human subjects research
MCMURTRIE, JACQUELINE; JD, 1983, UNIVERSITY OF MICHIGAN; criminal law and practice, wrongful convictions, clinical legal education
O'CONNOR, SEAN M.; MA, 1995, ARIZONA STATE UNIVERSITY; JD, 1998, STANFORD UNIVERSITY; intellectual property; business & securities law; biotechnology law
ROBINSON-DORN, MICHAEL JAY; JD, 1991, CORNELL UNIVERSITY; Environmental/natural resource law, biodiversity, sustainability, transboundary pollution, fisheries
WRIGHT, RON; JD, 1994, UNIVERSITY OF WASHINGTON; Federal Indian Law; Indian Treaty Rights; Tribal Law and Indigenous Justice Systems
Lecturer
GOLD, JULIA ANN; JD, 1983, UNIVERSITY OF SOUTH CAROLINA; alternative dispute resolution, mediation
HOTCHKISS, MARY A; JD, 1983, GEORGE WASHINGTON UNIVERSITY; LLM, 1985, GEORGE WASHINGTON UNIVERSITY; legal research, writing, and analysis
MCGINNIS, KATHLEEN M.; JD, 1984, UNIVERSITY OF CALIFORNIA (BERKELEY); legal research, writing and analysis
School of Medicine

Anesthesiology

Professor
BASHEIN, GERARD; PhD, 1969, CARNegie MELLON UNIVERSITY; automation techniques in anesthesia, transesophageal ultrasound cardiac assessment

DOMINO, KAREN B.; MA, 1974, UNIVERSITY OF NEW MEXICO; MD, 1978, UNIVERSITY OF MICHIGAN; neuroanesthesia.

FREUND, PETER; MA, 1971, BROWN UNIVERSITY; MD, 1975, COLUMBIA UNIVERSITY; temperature regulation, vasomotor control, physiology/biophysics

HORNBEIN, THOMAS F; MD, 1956, WASHINGTON UNIVERSITY; physiology, biophysics

LOESER, JOHN D; MD, 1961, NEW YORK UNIVERSITY; pain, neurophysiology.

LYNN, ANNE; MD, 1975, STANFORD UNIVERSITY; pediatric anesthesiology

MACKIE, KENNETH P; MD, 1984, YALE UNIVERSITY; molecular and cell biological studies of cannabinoid receptor signaling

MARTIN, LYNN D; MD, 1982, UNIVERSITY OF WASHINGTON; pediatric anesthesiology

OTTO, CATHERINE M.; BA, 1975, REED COLLEGE; MD, 1979, UNIVERSITY OF WASHINGTON; cardiology

OXORN, DONALD C.; MD, 1978, MCGILL UNIVERSITY (CANADA); trauma and critical care

PEARLMAN, ALAN S; MD, 1970, HARVARD UNIVERSITY; cardiology

ROOEK, G. ALEC; MD, 1980, UNIVERSITY OF WASHINGTON; cardiac anesthesia.

SIVARAJAN, MURALI; MBBS, 1967, JAWAHARLAL INST OF POSTGR MED EDUC & RES; Transesophageal echocardiography, anesthesia education, peer evaluation of teaching

TURK, DENNIS C; PhD, 1978, UNIVERSITY OF WATERLOO (CANADA); pain control/psychology

UNADKAT, JASHVANT D; PhD, 1982, UNIVERSITY OF MANCHESTER (UK); mechanisms of transport of anti-HIV drugs across placenta, CSF-blood barrier, and intestine

Research Professor
BYERS, MARGARET R; PhD, 1969, HARVARD UNIVERSITY; sensory neurobiology, neurotoxicology, and neuropathologic reactions; neuroimmune interactions

SU, JUDY Y; PhD, 1968, UNIVERSITY OF WASHINGTON; physiological effects of anesthetic drugs

SUXTON, ANDREW M; MD, 1970, UNIVERSITY OF WASHINGTON; neuroanesthesia.

Associate Professor
DEEM, STEVEN A.; MD, 1984, SOUTHERN ILLINOIS UNIVERSITY; critical care

DUNBAR, PETER J.; MBCHB, 1978, UNIVERSITY OF ABERDEEN (UK); pain management

EDWARDS, WILLIAM T.; PhD, 1968, MASSACHUSETTS INSTITUTE OF TECHNOLOGY; pain management

EGAN, KELLY J; PhD, 1980, UNIVERSITY OF WASHINGTON; clinical psychology.

FITZGIBBON, DERMOT R.; MBChir, 1983, CORK REGIONAL HOSPITAL; pain management

JARDINE, DAVID; MD, 1980, JOHNS HOPKINS UNIVERSITY; pediatric anesthesiology

KARL, HELEN W.; MD, 1976, UNIVERSITY OF VIRGINIA; pediatric anesthesiology

ORR, ROSEMARY J; MBChir, 1967, QUEENS UNIVERSITY OF BELFAST (IRELAND); pediatric anesthesiology

SCHENKMAN, KENNETH A.; MD, 1986, INDIANA UNIVERSITY; pediatric anesthesiology

SOUTER, KAREN J.; MBBS, 1985, ST BARTHOLOMEW'S HOSP MED SCHOOL (UK); MS, 1999, UNIVERSITY OF EAST ANGLIA (UK); Education in Anesthesiology

TREGGIARI, MIRIAM; MPH, 1990, UNIVERSITY OF PENNSYLVANIA; Critical Care Medicine: Acute Lung Injury, Subarachnoid Hemorrhage, sedation, Clinical Epidemiology

VAVILALA, MONICA S.; MD, 1991, UNIVERSITY OF TEXAS (HOUSTON); pediatric pain management

Assistant Professor
AMUNDSEN, LAURIE B.; MD, 1987, UNIVERSITY OF WISCONSIN; resident education

ZIMMERMAN, JERRY J.; PhD, 1975, UNIVERSITY OF WISCONSIN; critical-care medicine

Biochemistry

Professor
BAKER, DAVID; PhD, 1989, UNIVERSITY OF CALIFORNIA (BERKELEY); protein folding, genomics

BORNSTEIN, PAUL; MD, 1958, NEW YORK UNIVERSITY; structure and function of connective tissue macromolecules, wound healing

CHAMBERLAIN, JEFFREY S; PhD, 1985, UNIVERSITY OF WASHINGTON; neurogenetics, Duchennes muscular dystrophy

COOPER, JONATHAN A.; PhD, 1976, UNIVERSITY OF WARWICK (UK); regulation of cellular metabolism and proliferation by protein phosphorylation

DAGGETT, VALERIE D.; PhD, 1990, UNIVERSITY OF CALIFORNIA (SAN FRANCISCO); molecular modelling studies of peptides and proteins

DALE-CRUNK, BEVERLY A.; PhD, 1968, UNIVERSITY OF MICHIGAN; keratin biochemistry, epithelial differentiation, antimicrobial peptides

DAVIE, EARL WARREN; PhD, 1954, UNIVERSITY OF WASHINGTON; protein synthesis, mechanism of blood clotting, cloning of plasma proteins.

DAVIS, TRISHA NELL; PhD, 1983, YALE UNIVERSITY; control of the cell cycle, chromosome segregation, proteomics
oncology, oncogenes, retrovirus multiplication
EYRE, DAVID R; PhD, 1969, UNIVERSITY OF LEEDS (UK); connective tissue biology, collagen chemistry, bone and cartilage metabolism
FISCHER, EDMOND H; PhD, 1947, UNIVERSITY OF GENEVA (SWITZERLAND); relationship of protein structure to enzyme activity, hormonal regulation of metabolic processes
GELB, MICHAEL H; PhD, 1982, YALE UNIVERSITY; mechanistic enzymology; biocrganic and medicinal chemistry
GLOMSET, JOHN A; MD, 1960, UNIVERSITY OF UPPSALA (SWEDEN); membrane structure and function
HAHN, STEVEN M; PhD, 1984, BRANDEIS UNIVERSITY; transcription initiation in yeast
HOL, WILHELMUS GJ; PhD, 1971, UNIVERSITY OF GRONINGEN (NETHERLANDS); protein crystallography, drug design, vaccine development, and protein engineering
HURLEY, JAMES BRYANT; PhD, 1979, UNIVERSITY OF ILLINOIS; molecular basis of vision
JENSEN, LYLE H; PhD, 1943, UNIVERSITY OF WASHINGTON; molecular structure, x-ray diffraction
KIMELMAN, DAVID; PhD, 1985, HARVARD UNIVERSITY; molecular biology of early development in the frog, Xenopus laevis, and the fish, Danio rerio
KLEPEIT, RACHEL E; DPhil, 1981, OXFORD UNIVERSITY (UK); protein structure and function; molecular recognition; protein NMR
KREBS, EDWIN G; MD, 1943, WASHINGTON UNIVERSITY; intracellular signaling mechanisms involving protein phosphorylation
LOEB, LAWRENCE A; PhD, 1967, UNIVERSITY OF CALIFORNIA (BERKELEY); DNA replication, cancer and AIDS
MAIEZELS, NANCY; PhD, 1974, HARVARD UNIVERSITY; recombination and repair in mammalian cells, especially activated B cells
MORRIS, DAVID R; PhD, 1964, UNIVERSITY OF ILLINOIS; egulation of growth in eukaryotes and prokaryotes, translational control
PALMITER, RICHARD D; PhD, 1968, STANFORD UNIVERSITY; regulation of gene expression in transgenic mice
PARSON, WILLIAM W; PhD, 1965, CASE WESTERN RESERVE UNIVERSITY; bioenergetics, with particular emphasis on photosynthesis, picosecond spectroscopy
PETRA, PHILIP H; PhD, 1966, TULANE UNIVERSITY; reproductive biochemistry
ROBERTS, JAMES MICHAEL; PhD, 1984, COLUMBIA UNIVERSITY; regulation of DNA replication by cyclin-kinase complexes
ROTH, MARK; PhD, 1988, UNIVERSITY OF COLORADO (BOULDER); nuclear proteins involved in the regulation of gene expression
RUOHOLA-BAKER, HANNELE; PhD, 1989, HELSINKI UNIVERSITY (FINLAND); oogenesis, developmental genetics
RUSSELL, DAVID WILLIAM; PhD, 1988, ROCKEFELLER UNIVERSITY; hematology
SAARI, JOHN C; PhD, 1970, UNIVERSITY OF WASHINGTON; retinal biochemistry
SHAPIRO, BENNET M; MD, 1964, JEFFERSON MEDICAL COLLEGE; molecular basis of reproduction
STENKAMP, RONALD E; PhD, 1975, UNIVERSITY OF WASHINGTON; crystallography, metalloproteins, protein engineering, blood clotting proteins
STODDARD, BARRY L; PhD, 1980, MASSACHUSETTS INSTITUTE OF TECHNOLOGY; physical and structural studies of biological macromolecules
STRONG, ROLAND K; PhD, 1990, HARVARD UNIVERSITY; structural immunology; analysis of the functions of proteins mediating immune responses
WALSH, KENNETH A; PhD, 1959, UNIVERSITY OF TORONTO (CANADA); structure and functions of proteins, zymogens, and proteases
YOUNG, ELTON; PhD, 1967, CALIFORNIA INSTITUTE OF TECHNOLOGY; regulation of gene activity in the yeast Saccharomyces cerevisiae

Research Professor
CHUNG, DOMINIC W; PhD, 1976, UNIVERSITY OF CALIFORNIA (LOS ANGELES); factor XI deficiency, structure and function of fibrinogen
FUJIKAWA, KAZUO; PhD, 1965, KYOTO UNIVERSITY (JAPAN); studies of blood coagulation and anionic phospholipids at thrombotic sites

Associate Professor
FERRE-D’AMARE, ADRIAN RIU; PhD, 1994, ROCKEFELLER UNIVERSITY; structural biology of RNA, X-ray crystallography, biological catalysis
VERLINDE, CHRISTOPHE; PhD, 1988, CATHOLIC UNIVERSITY OF LEUVEN (BELGIUM); structure-based drug design and protein crystallography

Research Associate Professor
DAUM, GUENTER; PhD, 1989, UNIVERSITY OF KONSTANZ (GERMANY); cellular and molecular biology, tryosine phosphatase and kinases
MERRIT, ETHAN ALLEN; PhD, 1980, UNIVERSITY OF WISCONSIN; X-ray crystallography and structure-based drug design

Bioengineering
Professor
AEBERSOLD, RUDOLF HANS; MD, 1984, YALE UNIVERSITY; Protein biochemical investigation of signal transduction pathways.
BAKER, DAVID; PhD, 1989, UNIVERSITY OF CALIFORNIA (BERKELEY); protein folding, genomics
BASHEIN, GERARD; PhD, 1969, CARNEGIE MELLON UNIVERSITY; automation techniques in anesthesia, transesophageal ultrasonic cardiac assessment
BASSINGTHWAITE, JAMES; PhD, 1964, MAYO MEDICAL SCHOOL/GRADUATE SCHOOL; computer analysis of transport mechanisms in blood and tissues.
CALDWELL, JAMES H; MD, 1970, UNIVERSITY OF MISSOURI; positron emission tomography imaging of myocardial oxygenation, metabolism and sympathetic function
CONLEY, KEVIN E; PhD, 1983, UNIVERSITY OF WISCONSIN; muscle metabolism in vivo
DAGER, STEPHEN R; MD, 1978, UNIVERSITY OF NEBRASKA; application of functional brain imaging techniques to investigate neuropsychiatric disorders
GIACCHI, CECILIA; PhD, 1987, UNIVERSITY OF WASHINGTON; adhesion molecules and vascular biology processes
GREEN, PHILIP; PhD, 1976, UNIVERSITY OF CALIFORNIA (BERKELEY); Mathematical and Computer Methods for Genome Analysis
GUY, ARTHUR W; PhD, 1966, UNIVERSITY OF WASHINGTON; biological effects and medical applications of electromagnetic fields
HAYNOR, DAVID R; PhD, 1971, UNIVERSITY OF CALIFORNIA (BERKELEY); medical image processing and segmentation; image deformation; functional MRI; expression arrays
HLASTALA, MICHAEL P; PhD, 1969, STATE UNIVERSITY OF NEW YORK (BUFFALO); respiratory physiology, inert gas analysis of respiratory function
HOOD, LEROY E; PhD, 1968, CALIFORNIA INSTITUTE OF TECHNOLOGY; molecular immunology, large-scale DNA mapping and sequencing, molecular evolution
KALET, IRA J; PhD, 1968, PRINCETON UNIVERSITY; computer simulation of radiation therapy, artificial intelligence, computer graphics
KATZE, MICHAEL GERALD; PhD, 1980, HAHNEMANN MEDICAL COLLEGE; regulation of viral gene expression at the translational level

LEWILLIAMS, THOMAS; PhD, 1972, UNIVERSITY OF WASHINGTON; bioengineering, electrical engineering

MANKOFF, DAVID A.; PhD, 1988, UNIVERSITY OF PENNSYLVANIA; HIGH COUNT RATE PET IMAGING

MATURE, FREDERICK A.; MD, 1968, BAYLOR UNIVERSITY; orthopaedics, bone and joint research, robotics

MURRY, CHARLES E.; PhD, 1989, DUKE UNIVERSITY; myocardial infarction, heart regeneration, skeletal/cardiac muscle differentiation

NICKERSON, DEBORAH A; PhD, 1978, UNIVERSITY OF TENNESSEE; automating the analysis of single nucleotide polymorphisms, human genetics, DNA diagnostics

POLLACK, GERALD H; PhD, 1968, UNIVERSITY OF PENNSYLVANIA; muscular contraction

SCHWARTZ, STEPHEN MARK; PhD, 1973, UNIVERSITY OF WASHINGTON; vascular biology, atherosclerosis, molecular basis of lineage, developmental biology, cell kinetics

STAYTON, PATRICK S; PhD, 1989, UNIVERSITY OF ILLINOIS; engineering proteins for biotechnology, biomaterials, and biomedical therapies/diagnostics

TENCER, ALLAN FRED; PhD, 1981, MCGILL UNIVERSITY (CANADA); biomechanics of joints, orthopaedic trauma implants

TRASK, BARBARA J; PhD, 1985, UNIVERSITY OF LEIDEN (NETHERLANDS); in situ hybridization, analytical cytogenetics, analysis of large-scale DNA polymorphism

VERDUGO, PEDRO; MD, 1965, STATE UNIVERSITY OF CHILE; microcirculation, biomechanics, polymer gel physics, laser spectroscopy, cell biology

YAGER, PAUL; PhD, 1980, UNIVERSITY OF OREGON; physical chemistry, applications of biomembranes, biosensors, microfluidics, biomedical diagnostic imaging

YUAN, CHUN; PhD, 1988, UNIVERSITY OF UTAH; magnetic resonance imaging in medical application

Research Professor

BEACH, KIRK WATSON; PhD, 1971, UNIVERSITY OF CALIFORNIA (BERKELEY); arterial disease in diabetes, blood flow studies with ultrasonic Doppler

LAI, HENRY C; PhD, 1978, UNIVERSITY OF WASHINGTON; cellular effects of electromagnetic fields.

Associate Professor

BARRETT, PETER HUGH RUSSEL; PhD, 1989, UNIVERSITY OF ADELAIDE (AUSTRALIA); biomathematics and modeling methodology, simulation analyses, lipid and lipoprotein metabolism

GROSS, TED S; PhD, 1993, STATE UNIVERSITY OF NEW YORK (STONY BROOK); biomechanics

LINKER, DAVID T.; MD, 1976, STANFORD UNIVERSITY; diagnostic ultrasound in cardiology and cardiovascular pathophysiology

REGNIER, MICHAEL; PhD, 1991, UNIVERSITY OF SOUTHERN CALIFORNIA; Mechanics, kinetics and computational modeling of cardiac/skeletal muscle contraction.

SCHENKMAN, KENNETH A.; MD, 1986, INDIANA UNIVERSITY; pediatric anesthesia

VESSELLE, HUBERT J.; PhD, 1990, CASE WESTERN RESERVE UNIVERSITY; nuclear medicine

VICINI, PAOLO; PhD, 1996, POLYTECHNIC UNIVERSITY (ITALY); biomathematics and modeling methodology, mathematical models of biological systems

Research Associate Professor

SINGH, NARENDRA PAL; MBBS, 1972, KING GEORGE'S MEDICAL COLLEGE (INDIA); changes in human DNA with age, adverse effects of drugs and environmental chemicals on DNA

Assistant Professor

LI, ZHENG; PhD, 1995, STATE UNIVERSITY OF NEW YORK (BUFFALO); nonlinear kinetic modeling, cardiac metabolism, PET functional imaging

Biological Structure

Professor

CLARK, JOHN I; PhD, 1974, UNIVERSITY OF WASHINGTON; biophysical and structural properties of cytoplasmic proteins, cell aging, differentiation

DACEY, DENNIS M.; PhD, 1983, UNIVERSITY OF CHICAGO; the neural basis of vision and the organization of primate retina

FARR, ANDREW G; PhD, 1975, UNIVERSITY OF CHICAGO; cell interactions governing lymphocyte production and function

GEHRIG, JOHN D; DDS, 1946, UNIVERSITY OF MINNESOTA; MSD, 1951, UNIVERSITY OF MINNESOTA; oral and maxillofacial surgery, biological structure

GRANEY, DANIEL O; PhD, 1965, UNIVERSITY OF OREGON; physical chemistry, electron microscopy, intestinal absorption

HENDRICKSON, ANITA E; PhD, 1964, UNIVERSITY OF WASHINGTON; neuroanatomy, morphology and development of primate visual system

HERRING, SUSAN W.; PhD, 1971, UNIVERSITY OF CHICAGO; vertebrate functional morphology, relations between muscular function and skull growth

HOL, WILHELMUS G.J.; PhD, 1971, UNIVERSITY OF GRONINGEN (NETHERLANDS); protein crystallography, drug design, vaccine development, and protein engineering

JENSEN, LYLE H; PhD, 1943, UNIVERSITY OF WASHINGTON; molecular structure, x-ray diffraction

KALET, IRA J; PhD, 1968, PRINCETON UNIVERSITY; computer simulation of radiation therapy, artificial intelligence, computer graphics

KOehler, James K; PhD, 1961, UNIVERSITY OF CALIFORNIA (BERKELEY); electron microscope, cryobiology, reproductive biology

PATTON, DOROTHY L; PhD, 1981, UNIVERSITY OF WASHINGTON; infectious disease

PRESS, OLIVER W.; PhD, 1977, UNIVERSITY OF WASHINGTON; treatment of hematologic malignancies with monoclonal antibody immunonconjugates

RAIBLE, DAVID W.; PhD, 1989, UNIVERSITY OF PENNSYLVANIA; zebrafish neural development

REH, THOMAS A.; PhD, 1981, UNIVERSITY OF WISCONSIN; regeneration and development of central nervous system

ROSS, CORNELIUS; MD, 1964, UNIVERSITY OF BRISTOL (UK); Dsc, 1983, UNIVERSITY OF BRISTOL (UK); knowledge representation in anatomy

SAGE, E HELENE; PhD, 1977, UNIVERSITY OF UTAH; molecular and cell biology

SHERK, HELEN; PhD, 1978, MASSACHUSETTS INSTITUTE OF TECHNOLOGY; neural mechanisms underlying vision, especially visual guidance during locomotion

STENKAMP, RONALD E; PhD, 1975, UNIVERSITY OF WASHINGTON; crystallography, metalloproteins, protein engineering, blood clotting proteins

Research Professor

BASKIN, DENIS G.; PhD, 1969, UNIVERSITY OF CALIFORNIA (BERKELEY); neuroendocrinology; obesity; CNS regulation of body weight; histochemistry, expression of receptors

BRINKLEY III, JAMES F.; PhD, 1984, STANFORD UNIVERSITY; computer applications in medicine and biology

BYERS, MARGARET R; PhD, 1969, HARVARD UNIVERSITY; sensory neurobiology, neurotoxicology, and neuropathologic reactions; neuroimmune interactions

COOK, DANIEL L; PhD, 1980, UNIVERSITY OF WASHINGTON; Functional bioinformatics; pancreatic b-cell electrical activity and insulin release

REUVENI, ZIPORA; PhD, 1979, UNIVERSITY OF WINDSOR (CANADA);
myogenesis during growth development and regeneration of skeletal muscle

**Associate Professor**

CUNNINGHAM, MICHAEL L.; PhD, 1996, UNIVERSITY OF WASHINGTON; molecular, development, craniofacial, malformation, human, mouse, cranio-synostosis, birth defects

GADDUM-ROSSE, PENELOPE; PhD, 1965, UNIVERSITY OF LIVERPOOL (UK); reproductive biology.

HARRIS, ROGER M; PhD, 1975, UNIVERSITY OF WASHINGTON; neuro-anatomical recovery from spinal cord injury

NAMEROFF, MARK A; PhD, 1966, UNIVERSITY OF PENNSYLVANIA; cell differentiation.

PROTHERO, JOHN W; PhD, 1960, WESTERN ONTARIO UNIVERSITY (CANADA); model building, morphogenesis, cell kinetics, scaling

ROBINSON, FARREL R.; PhD, 1982, BROWN UNIVERSITY; study of the cerebellum via monkey eye movements

ROELINK, HENK; PhD, 1991, UNIVERSITY OF AMSTERDAM (NETHERLANDS); role of signaling molecules in mediating neural tissue differentiation during vertebrate development

VERLINDE, CHRISTOPHE; PhD, 1988, CATHOLIC UNIVERSITY OF LEUVEN (BELGIUM); structure-based drug design and protein crystallography

XU, WENQING; PhD, 1995, MASSACHUSETTS INSTITUTE OF TECHNOLOGY; structural studies of proteins involved in cancer, immune dysfunction and neuronal diseases

**Research Associate Professor**

MERRITT, ETHAN ALLEN; PhD, 1980, UNIVERSITY OF WISCONSIN; X-ray crystallography and structure-based drug design

**Assistant Professor**

BRODERSON, STEVAN H; PhD, 1967, STATE UNIVERSITY OF NEW YORK (BUFFALO); lipid histochemistry.

**Lecturer**

MULLIGAN, KATHLEEN A.; PhD, 1985, UNIVERSITY OF NEW SOUTH WALES(AUSTRALIA); neurobiology, gross anatomy, teaching innovations, technical communication

**Comparative Medicine**

**Professor**

DENNIS, MELVIN B.; DVM, 1961, WASHINGTON STATE UNIVERSITY; comparative medicine, including animal models and experimental surgery

DI GIACOMO, RONALD F.; DVM, 1965, UNIVERSITY OF PENNSYLVANIA; MPH, 1974, UNIVERSITY OF WASHINGTON; comparative epidemiology and zoonoses

JOHNSON, DENNIS O.; DVM, 1965, UNIVERSITY OF CALIFORNIA (DAVIS); MS, 1965, OHIO STATE UNIVERSITY; comparative medicine including nonhuman primate medicine, international health

LADIGES, WARREN C.; DVM, 1971, WASHINGTON STATE UNIVERSITY; immunobiology of aging, transgenic mouse models of aging, DNA repair genes and age-associated cancer

LIGGITT, H DENNY; PhD, 1979, COLORADO STATE UNIVERSITY; using in vivo models to evaluate novel approaches for gene delivery, transgenic models

PRICE, LILLIAN M.; PhD, 1983, UNIVERSITY OF PENNSYLVANIA; t-cell development in the thymus, immunotoxicology, thymus development, retinoic acid embryopathy

RAUSCH, ROBERT L.; PhD, 1949, UNIVERSITY OF WISCONSIN; parasitology, helminthic zoonoses

VAN HOOISER, GERALD; DVM, 1957, TEXAS A&M UNIVERSITY; laboratory animal medicine with emphasis on effects of intercurrent infection on mouse phenotypes

WOLF, NORMAN S; PhD, 1960, NORTH-WESTERN UNIVERSITY; hematopoietic stem cell dynamics and transplantation in radiation biology

**Associate Professor**

BRABB, THEA L.; PhD, 1999, UNIVERSITY OF WASHINGTON; using in vivo models to understand immune tolerance and autoimmunity

GROSSMANN, ANGELIKA; PhD, 1982, FREIE UNIVERSITY OF BERLIN (GERMANY); immunosenescence in humans and mice; immunotoxicology; transmembrane signaling in T-lymphocytes

IRITANI, BRIAN M; PhD, 1997, UNIVERSITY OF WASHINGTON; developmental immunology, cell signaling, oncogene function

PEKOW, CYNTHIA A; DVM, 1984, UNIVERSITY OF ILLINOIS; comparative medicine, instruction of research staff and technicians in animal care and use

WEIGLER, BENJAMIN J; PhD, 1991, UNIVERSITY OF CALIFORNIA (DAVIS); infectious disease epidemiology in laboratory animal medicine and management

**Research Associate Professor**

WARE, CAROL B.; PhD, 1986, UNIVERSITY COLLEGE (IRELAND); Multi-systemic LIF receptor function in developing and adult mice.

---

**Family Medicine**

**Professor**

BERG, ALFRED O; MD, 1974, WASHINGTON UNIVERSITY; MPH, 1979, UNIVERSITY OF WASHINGTON; family medicine

CARLINE, JAN D.; PhD, 1979, UNIVERSITY OF WASHINGTON; assessment of physician performance, evaluation of medical education programs

CHERKIN, DANIEL C; PhD, 1978, UNIVERSITY OF WASHINGTON; outcomes of care for back pain and other common problems

COOMBS, JOHN B.; MD, 1972, CORNELL UNIVERSITY; Health care outcomes, rural health policy, healthcare workforce issues and applied nutrition.

CRITTENDEN, ROBERT A; MD, 1976, UNIVERSITY OF WASHINGTON; MPH, 1987, UNIVERSITY OF WASHINGTON; health plans/policies

ELLSWORTH, ALLAN J; PharmD, 1977, PHILADELPHIA COLL OF PHARMACY & SCIENCE; primary care, family medicine

GEYMAN, JOHN P; MD, 1960, UNIVERSITY OF CALIFORNIA (SAN FRANCISCO); family medicine.

GLOYD, STEPHEN S.; MD, 1973, UNIVERSITY OF CHICAGO; MPH, 1983, HARVARD UNIVERSITY; political economy, epidemiology, and primary health care in developing countries

GORDON, MICHAEL J; PhD, 1973, MICHIGAN STATE UNIVERSITY; family medicine

HART, LAWRENCE G; PhD, 1985, UNIVERSITY OF WASHINGTON; rural health policy, medical geography

Research Assistant Professor

GAVIN, MARC A.; PhD, 1995, UNIVERSITY OF WASHINGTON; The molecular mechanisms that govern regulatory T cell homeostasis

Laboratory Medicine

Professor

ASHLEY MORROW, RHODA; PhD, 1977, UNIVERSITY OF CALIFORNIA (DAVIS); pathogenesis of viral infections, immune response to herpes, rapid diagnosis

BAUER, LARRY; PharmD, 1980, UNIVERSITY OF KENTUCKY; clinical pharmacokinetics and drug metabolism, drug interactions

CHANDLER, WAYNE L; MD, 1982, ST LOUIS UNIVERSITY; clinical chemistry, clinical coagulation, hematology

CHATTERJEE, JAMES; PhD, 1983, UNIVERSITY OF CALIFORNIA (BERKELEY); molecular biology, molecular genetics, human embryology, mouse mutagenesis, pediatric medicine/ hematology

SCHMER, GOTTFRIED; MD, 1986, UNIVERSITY OF WASHINGTON; estimation of population size and dynamics; robust methods, computing in infectious disease research

COYLE, MARIE B; PhD, 1985, KANSAS STATE UNIVERSITY; DNA probes and GLC for rapid identification of mycobacteria and corynebacteria

DETTWEILER, JAMES C; MD, 1962, UNIVERSITY OF KANSAS; laboratory diagnosis of genetic disorders, red-cell disorders and laboratory instrumentation

FRENKEL, LISA; PhD, 1987, UNIVERSITY OF KANSAS; infectious diseases

GILLILAND, BRUCE C.; MD, 1960, NORTHWESTERN UNIVERSITY; hematology

KAPLAN, ALEX; PhD, 1936, UNIVERSITY OF CALIFORNIA (BERKELEY); clinical chemistry

KENNY, MARGARET; PhD, 1968, UNIVERSITY OF ILLINOIS; clinical chemistry, new technologies for in vivo clinical biochemical analysis

LABBE, ROBERT F; PhD, 1951, OREGON STATE UNIVERSITY; porphyrin disorders, nutritional biochemistry

MCERALT, MARGARET JULIANA; PhD, 1978, MEDICAL UNIVERSITY OF SOUTH CAROLINA; infectious diseases

MULLINS, JAMES I.; PhD, 1978, UNIVERSITY OF MINNESOTA; retroviruses and AIDS, molecular virology

ECCLES, JAMES J; MD, 1959, UNIVERSITY OF MINNESOTA; infectious diseases, antibiotic-resistant nosocomial infections

RAGHU, GANESH; MD, 1974, UNIVERSITY OF MYSORE (INDIA); respiratory disease.

RAINEY, PETRIE M.; PhD, 1973, UNIVERSITY OF CALIFORNIA (BERKELEY); clinical chemistry, medical toxicology, therapeutic drug monitoring, pharmacology of antimicrobials

RAISING, VIDMANTAS A; PhD, 1969, STATE UNIVERSITY OF NEW YORK (BUFFALO); clinical toxicology, therapeutic drug monitoring

RÜDLER, JOE C.; MD, 1976, VANDERBILT UNIVERSITY; genetic disease pathology, human embryology, mouse mutagenesis, pediatric medicine/ hematology

SCHMER, GOTTFRIED; MD, 1986, UNIVERSITY OF WASHINGTON; estimation of population size and dynamics; robust methods, computing in infectious disease research

WENER, MARK H; MD, 1974, WASHINGTON UNIVERSITY; clinical biochemistry

Research Professor

STEPHENS, KAREN G.; PhD, 1982, INDIANA UNIVERSITY; molecular genetics of human disease; human gene mapping

ZEH, JUDITH; PhD, 1979, UNIVERSITY OF WASHINGTON; estimation of population size and dynamics; robust methods, computing in infectious disease research

ASSOCIATE PROFESSOR

ASTON, MICHAEL L.; PhD, 1989, UNIVERSITY OF PENNSYLVANIA; neural networks, multi media computer-aided tutorials, immunology

BANKSON, DANIEL D; PhD, 1985, MASSACHUSETTS INSTITUTE OF TECHNOLOGY; nutritional status of antioxidants and fat-soluble vitamins.

CHOU, DAVID; MD, 1974, UNIVERSITY OF PITTSBURGH; MS, 1979, UNIVERSITY OF MINNESOTA; medical informatics, instrument automation, clinical chemistry

CLAYSON, KATHLEEN J.; MS, 1968, UNIVERSITY OF MINNESOTA; enzymology in clinical chemistry

COOKSON, BRAD T; PhD, 1991, WASHINGTON UNIVERSITY; cellular immune response to intracellular bacteria; microbial pathogenesis; clinical microbiology

DELANEY, COLLIN J.; PhD, 1972, UNIVERSITY OF ILLINOIS; clinical chemistry, the study of diabetes and alcoholism

FINE, JAMES; MD, 1972, UNIVERSITY OF MINNESOTA; MS, 1977, UNIVERSITY OF MINNESOTA; enzymology, medical informatics

FLIGNER, CORINNE L.; MD, 1976, UNIVERSITY OF NEW MEXICO; autopsy and pulmonary complications in immunocompromised patients

KOELLE, DAVID; MD, 1985, UNIVERSITY OF WASHINGTON; allergy and infectious diseases

LAMPE, MARY F; PhD, 1984, UNIVERSITY OF NORTH CAROLINA; medical technology education, molecular analysis of Chlamydia trachomatis

OPHEM, KENT E.; PhD, 1972, CORNELL UNIVERSITY; molecular cytogenetics, pediatric clinical chemistry, drug assay development

SABATH, DANIEL L.; PhD, 1989, UNIVERSITY OF PENNSYLVANIA; regulation of gene expression in hematopoietic cells

SCHILLER, HARVEY S; MD, 1966, WASHINGTON UNIVERSITY; clinical chemistry, hematology, interpretation of laboratory data

WALD, ANNA; MD, 1985, MT SINAI SCHOOL OF MEDICINE; MPH, 1994, UNIVERSITY OF WASHINGTON; the epidemiology, natural history and therapeutic of HSV and other herpesviruses infections

WOOD, BRENT L.; PhD, 1988, LOMA LINDA UNIVERSITY; Hematopathology, leukemia, lymphoma, flow cytometry, cell sorting.

Research Associate Professor

LIBBY, STEPHEN JAMES; PhD, 1987, IOWA STATE UNIVERSITY; Salmonella molecular pathogenesis and resistance to oxidative stresses
Assistant Professor
BEHRENS, JOYCE A; MS, 1971, UNIVERSITY OF MINNESOTA; clinical hematology and clinical coagulation methodologies
CONE, RICHARD W; PhD, 1980, STANFORD UNIVERSITY; viral nucleic detection for diagnosis, viral tumor genesis
LE CRONE, CAROL N; MS, 1966, COLORADO STATE UNIVERSITY; hematology, hemoglobinopathies
MC GONAGLE, LEE ANNE; MPH, 1969, UNIVERSITY OF MICHIGAN; clinical microbiology, procedures for diagnostic bacteriology
SZABO, LA VERNE; MS, 1970, UNIVERSITY OF WASHINGTON; general clinical chemistry, heavy metals in clinical chemistry

Research Assistant Professor
MORISHIMA, CHIHIRO; BA, 1984, WASHINGTON UNIVERSITY; MD, 1988, WASHINGTON UNIVERSITY; pediatric rheumatology
VIEIRA, JEFFERY; PhD, 1988, UNIVERSITY OF MINNESOTA; Biology of Kaposi’s sarcoma-associated herpesvirus, gene function and latent to lytic reactivation.

Lecturer
CHEN-LEVY, ZEHAVA; PhD, 1986, WEIZMANN INSTITUTE FOR SCIENCE (ISRAEL); Clinical chemistry, immunology research and laboratory medicine teaching and education
GOODYEAR, NANCY; PhD, 1997, CATHOLIC UNIVERSITY OF AMERICA; clinical microbiology and education
MC DONNEL, LISA M.; MS, 1998, UNIVERSITY OF WASHINGTON; clinical hematology and coagulation, molecular diagnostics, stem cell transplantation, MT education
WILCOCK, CYNTHIA J.; MS, 2001, UNIVERSITY OF WASHINGTON; clinical chemistry and education

MEDEX

Associate Professor
BALLWEG, RUTH A; BS, 1969, SOUTHERN OREGON STATE COLLEGE; MPA, 1998, UNIVERSITY OF WASHINGTON; women’s health issues, physician assistant education
EVANS, TIMOTHY C; PhD, 1976, UNIVERSITY OF MICHIGAN; diabetes management

Lecturer
GANOLA, FRED J.; PAasst, 1973, UNIVERSITY OF WASHINGTON; physician assistant education

LANDEL, GRACE P.; BA, 1978, UNIVERSITY OF CALIFORNIA (SANTA CRUZ); MED, 1999, UNIVERSITY OF WASHINGTON; physician assistant education
MORRISON, MONIQUE A; BA, 1990, EVERGREEN STATE COLLEGE; Emergency Medicine, Surgery, Family Practice, Medical Education
PLUMMER, WILLIAM T.; BS, 1974, UNIVERSITY OF NEBRASKA; physician assistant education
SCOTT, TERRY B; PAasst, 1993, UNIVERSITY OF WASHINGTON; physician assistant education, underserved and minority population health care
STOLL, HENRY; BA, 1971, BROWN UNIVERSITY; physician assistant education and professional issues, curriculum development

Medical Education and Biomedical Informatics

Professor
BERRY, DONNA L.; PhD, 1992, UNIVERSITY OF WASHINGTON; health care of persons with, and at risk for, cancer
CARLINE, JAN D.; PhD, 1979, UNIVERSITY OF WASHINGTON; assessment of physician performance, evaluation of medical education programs
DAGGETT, VALERIE D.; PhD, 1990, UNIVERSITY OF CALIFORNIA (SAN FRANCISCO); molecular modelling studies of peptides and proteins
DOHNER, CHARLES W.; PhD, 1966, OHIO STATE UNIVERSITY; program evaluation, administration, faculty development
FULLER, SHERRILYNNE S00; PhD, 1984, UNIVERSITY OF SOUTHERN CALIFORNIA; Analysis, representation and mapping of research findings (data mining)
GOLDBERG, HAROLD I.; MD, 1977, STANFORD UNIVERSITY; applying clinical informatics to health services delivery and quality improvement
GORDON, MICHAEL J; PhD, 1973, MICHIGAN STATE UNIVERSITY; family medicine
KALET, IRA J; PhD, 1968, PRINCETON UNIVERSITY; computer simulation of radiation therapy, artificial intelligence, computer graphics
KIMBALL, ANN M.; MD, 1976, UNIVERSITY OF WASHINGTON; MPH, 1981, UNIVERSITY OF WASHINGTON; emerging infections, public health response to epidemic disease
MATSEN, FREDERICK A; MD, 1968, BAYLOR UNIVERSITY; orthopaedics, bone and joint research, robotics
NORRIS, THOMAS E.; MD, 1973, UNIVERSITY OF TEXAS (GALVESTON); Clinical applications, health policy and health workforce needs

Research Professor
MYLER, PETER J.; PhD, 1982, UNIVERSITY OF QUEENSLAND (AUSTRALIA); regulation of gene expression in protozoan parasites

Associate Professor
ASTION, MICHAEL L.; PhD, 1989, UNIVERSITY OF PENNSYLVANIA; neural networks, multi media computer-aided tutorials, immunology
BALLWEG, RUTH A; MPA, 1998, UNIVERSITY OF WASHINGTON; women’s health issues, physician assistant education
BROCK, DOUGLAS MICHAEL; PhD, 1995, UNIVERSITY OF WASHINGTON; usability and human factors
CHOU, DAVID; MD, 1974, UNIVERSITY OF PITTSBURGH; MS, 1979, UNIVERSITY OF MINNESOTA; medical informatics, Instrument automation, clinical chemistry

Doctor
DOCTOR, JASON N.; PhD, 1995, UNIVERSITY OF CALIFORNIA (SANDIEGO); medical decision making, health economics, decision theory
FINE, JAMES; MD, 1972, UNIVERSITY OF MINNESOTA; MS, 1977, UNIVERSITY OF MINNESOTA; enzymology, medical informatics
KIM, SARA; PhD, 1999, UNIVERSITY OF WASHINGTON; educational technology
PINSKY, LINDA E.; MD, 1989, UNIVERSITY OF WASHINGTON; general internal medicine
ROBINS, LYNNIE S; PhD, 1990, UNIVERSITY OF MICHIGAN; cultural competence, physician-patient communication, qualitative research assessment
SCHAAD, DOUGLAS C.; PhD, 1986, UNIVERSITY OF WASHINGTON; Medical education and evaluation; educational assessment; salmonid recovery; riparian restoration
ZIERLER, BREND A; PhD, 1996, UNIVERSITY OF WASHINGTON; research in patient with venous thromboembolism; clinical outcomes, process outcomes

Research Associate Professor
JOHNSON, LEONARD CLARK; PhD, 1978, UNIVERSITY OF WASHINGTON; applied research methods including development in applied statistics, assessment, and analysis
MÄNDEL, LYNN S.; PhD, 1983, UNIVERSITY OF WASHINGTON; research of psychomotor skills, program evaluation, study and instrument design

Assistant Professor
KARRAS, BRYANT THOMAS; MD, 1995, UNIVERSITY OF WISCONSIN; public health informatics, guidelines, bioterrorism surveillance
RAKESTRAW, PHILLIP G; PhD, 1981, UNIVERSITY OF WASHINGTON; research in medical education.

Lecturer
AMBROZY, DONNA M.; PhD, 1998, UNIVERSITY OF WASHINGTON; standardized patients, teaching methodology
MACLAREN, CAROL F.; PhD, 1985, UNIVERSITY OF PENNSYLVANIA; educational research
MASUDA, DAVID; MD, 1980, UNIVERSITY OF NORTH DAKOTA; MS, 1996, UNIVERSITY OF WISCONSIN; biomedical and health informatics

Medical History and Ethics
Professor
AUSTIN, MELISSA A.; PhD, 1985, UNIVERSITY OF CALIFORNIA (BERKELEY); genetic epidemiology of chronic diseases and public health genetics
BERRYMAN, JACK W; PhD, 1976, UNIVERSITY OF MARYLAND; history of exercise, sports medicine, and health behavior/philosophy
CURTIS, JARED R.; MD, 1988, JOHNS HOPKINS UNIVERSITY; MPH, 1994, UNIVERSITY OF WASHINGTON; pulmonary diseases and critical care medicine
JECKER, NANCY A.S.; PhD, 1986, UNIVERSITY OF WASHINGTON; philosophical and ethical aspects of health care delivery and policy
JONSEN, ALBERT R.; PhD, 1967, YALE UNIVERSITY; philosophical, historical values affecting practice and delivery of health care
PEARLMAN, ROBERT A; MD, 1975, BOSTON UNIVERSITY; gerontology
SULLIVAN, MARK D.; PhD, 1982, VANDERBILT UNIVERSITY; depression and chronic medical illness, chronic pain, ethics, quality of life
WHORTON, JAMES C; PhD, 1969, UNIVERSITY OF WISCONSIN; history of American medicine, public health, alternative healing

Associate Professor
BACK, ANTHONY L.; MD, 1984, HARVARD UNIVERSITY; oncology
BRADDOCK, CLARENCE H.; MD, 1981, UNIVERSITY OF CHICAGO; doctor-patient communication, informed consent, bioethics education
FARBER, STUART J.; MD, 1974, UNIVERSITY OF WASHINGTON; patient centered communication, palliative/end-of-life care
GALLAGHER, THOMAS H; MD, 1990, HARVARD UNIVERSITY; Ethical and communication dimensions of conflicts of interest in the doctor-patient relationship.
TONELLI, MARK R.; MD, 1989, UNIVERSITY OF COLORADO (BOULDER); pulmonary and critical care medicine

Assistant Professor
FRYER-EDWARDS, KELLY; PhD, 2000, UNIVERSITY OF WASHINGTON; innovation in medical education, professional identity development, clinician-patient relationships
GOERING, SARA L.; PhD, 1998, UNIVERSITY OF COLORADO (DENVER); bioethics, moral philosophy

Lecturer
MC CORMICK, THOMAS R.; DMin, 1976, SOUTHERN METHODIST UNIVERSITY; clinical/educational research in medical education; salmonid diseases and critical care medicine

Medicine
Professor
ABKOWITZ, JANIS L; MD, 1977, HARVARD UNIVERSITY; hematology
ABRASS, CHRISTINE K.; MD, 1973, CASE WESTERN RESERVE UNIVERSITY; nephrology
ABRASS, ITAMAR B.; MD, 1966, UNIVERSITY OF CALIFORNIA (SAN FRANCISCO); gerontology
ADEREM, ALAN A.; PhD, 1979, UNIVERSITY OF CAPE TOWN (SOUTH AFRICA); signal transduction and the cytoskeleton
AITKEN, MOIRA L.; MBChB, 1978, UNIVERSITY OF EDINBURGH (UK); respiratory disease
ALTMAN, LEONARD; MD, 1969, HARVARD UNIVERSITY; mechanisms of tissue injury produced by bacteria, leukocytes, or toxins
APPELBAUM, FREDERICK R.; MD, 1972, TÜFTS UNIVERSITY; oncology
ARGENVI, ZSOLT B.; MD, 1978, SEMMELWEIS MEDICAL UNIVERSITY (HUNGARY); dermatopathology
AUSTIN, MELISSA A.; PhD, 1985, UNIVERSITY OF CALIFORNIA (BERKELEY); genetic epidemiology of chronic diseases and public health genetics
BACK, ANTHONY L.; MD, 1984, HARVARD UNIVERSITY; oncology
BARDEY, GUST H; MD, 1977, NORTH-WESTERN UNIVERSITY; cardiology
BARNHART, SCOTT; MD, 1979, GEORGE WASHINGTON UNIVERSITY; occupationally related lung disease
BENDITT, JOSHUA O.; MD, 1982, UNIVERSITY OF WASHINGTON; pulmonary and critical care medicine
BENEDETTI, JACQUELINE K.; PhD, 1974, UNIVERSITY OF WASHINGTON; statistical methodology in infectious disease research, cancer clinical trials
BENSINGER, WILLIAM I; MD, 1973, NORTHERN UNIVERSITY; oncology
BERG, DANIEL; MD, 1985, UNIVERSITY OF TORONTO (CANADA); dermatological surgery
BIRD, THOMAS D.; MD, 1968, CORNELL UNIVERSITY; neurology, neurogenetics
BLAIS, CHRISTOPHER R.; MD, 1954, UNIVERSITY OF LEEDS (UK); MBChB, 1954, UNIVERSITY OF LEEDS (UK); nephrology
BLEA, CARLA.; MD, 1986, OHIO STATE UNIVERSITY; hematology
BOMSZTYK, KAROL; MD, 1977, UNIVERSITY OF WROCŁAW (POLAND); role of cytokine-induced protein kinases in the regulation of gene expression
BORNSTEIN, PAUL; MD, 1958, NEW YORK UNIVERSITY; structure and function of connective tissue macromolecules, wound healing
BOYKO, EDWARD J.; MD, 1979, UNIVERSITY OF PITTSBURGH; epidemiology of
inflammatory bowel disease and non-insulin-dependent diabetes mellitus
BREMNER, WILLIAM J; MD, 1964, YALE UNIVERSITY; cardiology

ENDED INSICK, JOHN W; MDCM, 1956, McGill UNIVERSITY (CANADA); the role of GI hormones in fuel homeostasis
FEFETE, ALEXANDER; MD, 1964, STANFORD UNIVERSITY; oncology
FIELDS, STANLEY, PhD, 1981, CAMBRIDGE UNIVERSITY (UK); Yeast Molecular Biology and Genetics
FIGLEY, MELVIN M; MD, 1944, HARVARD UNIVERSITY; thoracic and pulmonary radiology
FIHN, STEPHAN; MD, 1977, ST LOUIS UNIVERSITY; MPH, 1981, UNIVERSITY OF WASHINGTON; internal medicine
FINCH, CLEMENT A; MD, 1941, UNIVERSITY OF ROCHESTER; hematology
FISHEIN, DANIEL P; MD, 1980, ALBERT EINSTEIN COLLEGE OF MEDICINE; cardiology
FLECKMAN, PHILIP H; MD, 1973, WASHINGTON UNIVERSITY; dermatology
FLEET, WENDELL F; MD, 1965, CREIGHTON UNIVERSITY; internal medicine
FUJIMOTO, WILFRED Y; MD, 1965, JOHNS HOPKINS UNIVERSITY; molecular, cellular, viral, and human genetics
GARDNER, GREGORY C.; MD, 1984, BAYLOR UNIVERSITY; rheumatology
GARTLER, STANLEY M; PhD, 1952, UNIVERSITY OF CALIFORNIA (BERKELEY); mammalian somatic cell genetics with emphasis on the mechanism of X-chromosome inactivation
GEBALLE, ADAM PHILIP; MD, 1978, DUKE UNIVERSITY; translational regulation of viral and cellular gene expression
GIBRAN, NICOLE; MD, 1985, BOSTON UNIVERSITY; general, burn, and trauma surgery
GILLILAND, BRUCE C.; MD, 1960, NORTHWESTERN UNIVERSITY; hematology
GLENNY, ROBB; MD, 1984, UNIVERSITY OF VIRGINIA; determinants of regional pulmonary blood flow and ventilation distribution
GLOMSET, JOHN A; MD, 1960, UNIVERSITY OF UPPSALA (SWEDEN); membrane structure and function
GOLDBERG, HAROLD I.; MD, 1977, STANFORD UNIVERSITY; applying clinical informatics to health services delivery and quality improvement
GOODNER, CHARLES J; MD, 1955, UNIVERSITY OF UTAH; metabolism and endocrinology
GREENBERG, PHILIP D; MD, 1971, ST UNIV OF NEW YORK (DOWNSTATE MED CTR); molecular, cellular, viral, and tumor immunology
GREENE, H LEON; MD, 1969, JOHNS HOPKINS UNIVERSITY; cardiology
HAMMOND, WILLIAM P; MD, 1972, TUFTS UNIVERSITY; hematology
HANDSFIELD, HUNTER; MD, 1968, COLUMBIA UNIVERSITY; infectious diseases
BASKIN, DENIS G.; PhD, 1969, UNIVERSITY OF ALABAMA; oncology.
TOROK-STORB, BEVERLY J.; PhD, 1975, UNIVERSITY OF PITTSBURGH; hematology.
TURCK, MARVIN; MD, 1959, UNIVERSITY OF ILLINOIS; infectious diseases.
VAN CITTERS, ROBERT L.; MD, 1953, UNIVERSITY OF KANSAS; cardiovascular physiology.
VAN VOORHIS, WESLEY C.; PhD, 1983, ROCKEFELLER UNIVERSITY; infectious diseases.
VESTAL, ROBERT E; MD, 1971, UNIVERSITY OF CALIFORNIA (SAN FRANCISCO); gerontology.
WALLACE, JAMES F.; MD, 1961, WASHINGTON UNIVERSITY; internal medicine.
WATERSTON, ROBERT H; PhD, 1972, UNIVERSITY OF ILLINOIS; genetic factors in coronary artery disease predisposing to hyperlipidemia and metabolic disease.
VESTAL, ROBERT E.; MD, 1971, UNIVERSITY OF CALIFORNIA (SAN FRANCISCO); gerontology.
WATKINS, SANDRA L; MD, 1981, ROCKY MOUNTAIN UNIVERSITY; nephrology, endocrinology and metabolism.
WEIGLE, DAVID S.; MD, 1978, HARVARD UNIVERSITY; endocrinology and metabolism.
WENER, MARK H; MD, 1974, WASHINGTON UNIVERSITY; diagnostic immunology, immune complex diseases.
ARTHUR, CARL; MD, 1983, UNIVERSITY OF MISSOURI; nephrology.
ZHENG, HAN; PhD, 1989, UNIVERSITY OF WASHINGTON; nephrology, endocrinology and metabolism.
ZAGER, RICHARD A.; MD, 1982, UNIVERSITY OF WASHINGTON; nephrology and geriatric medicine.
YEUNG, RAYMOND S.; MD, 1982, UNIVERSITY OF WASHINGTON; internal medicine, nephrology, and geriatric medicine.
resynchronization, Arrhythmia mechanisms, ablation-Atrial fibrillation & ventricular tachycardia

RICHARD, ROBERT E.; PhD, 1992, STATE UNIV OF NEW YORK (STONY BROOK); gene and cell therapy for blood disorders

SHADLEN, MARIE-FLORENCE; MD, 1983, BROWN UNIVERSITY; gerontology and geriatric medicine

SINGH, NALINI; MD, 1995, UNIVERSITY OF CALIFORNIA (SAN FRANCISCO); diabetes care and diabetes complications

STEMPIEN-TERO, APRIL S.; MD, 1990, UNIVERSITY OF CONNECTICUT; cardiology

WANG, CHIA C.; MD, 1990, NORTHWESTERN UNIVERSITY; MS, 1999, UNIVERSITY OF WASHINGTON; hepatitis C, hepatitis B, HIV

WARREN, EDUS HOUSTON; PhD, 1988, HARVARD UNIVERSITY; oncology

WISSE, BRENT; MD, 1995, MCGILL UNIVERSITY (CANADA); body weight regulation

ZIVIN, ADAM H.; MD, 1991, OREGON HEALTH SCIENCES UNIVERSITY; cardiology

Research Assistant Professor

WIJELATH, ERROL S.; PhD, 1989, UNIVERSITY OF STRATHCLYDE (UK); Extracellular matrix and growth factor interaction in vascular biology

Microbiology

Professor

CHAMPOUX, JAMES J; PhD, 1970, STANFORD UNIVERSITY; DNA replication, tumor virology

CLARK, EDWARD A; PhD, 1977, UNIVERSITY OF CALIFORNIA (LOS ANGELES); lymphocyte surface molecules, lymphocyte activation and cell communication

COREY, LAWRENCE; MD, 1971, UNIVERSITY OF MICHIGAN; laboratory medicine: diagnosis, therapy, and pathogenesis of viral infections, AIDS virus

COYLE, MARIE B; PhD, 1965, KANSAS UNIVERSITY; microbiology and nucleic acid chemistry

EMERMAN, MICHAEL; PhD, 1986, UNIVERSITY OF WISCONSIN; Molecular biology of the human immunodeficiency virus

EVANS, CHARLES A; PhD, 1943, UNIVERSITY OF MINNESOTA; microbial flora of human skin, medical virology

FIELDS, STANLEY; PhD, 1981, CAMBRIDGE UNIVERSITY (UK); Yeast Molecular Biology and Genetics

GEBALLE, ADAM PHILIP; MD, 1978, DUKE UNIVERSITY; translational regulation of viral and cellular gene expression

GILLILAND, BRUCE C.; MD, 1960, NORTHWESTERN UNIVERSITY; hematology

HAIGWOOD, NANCY L.; PhD, 1980, UNIVERSITY OF NORTH CAROLINA; host immunity in the control and prevention of AIDS

HELLSTROM, KARL-ERIK; DrMed, 1964, UNIVERSITY OF STOCKHOLM (SWEDEN); oncology, cancer immunology, tumor biology

HOLMES, KING K.; PhD, 1967, UNIVERSITY OF HAWAII; clinical epidemiology and pathogenesis of infectious diseases

HU, SHIU-LOK; PhD, 1978, UNIVERSITY OF WISCONSIN; virus-host interactions, AIDS vaccines and pathogenesis of primate lentivirus infection

KATZE, MICHAEL GERALD; PhD, 1980, HAHNEMANN MEDICAL COLLEGE; regulation of viral gene expression at the translational level

LIDSTROM, MARY E.; PhD, 1977, UNIVERSITY OF WISCONSIN; biomolecular engineering, metabolic engineering, bioremediation

LORY, STEPHEN; PhD, 1980, UNIVERSITY OF CALIFORNIA (LOS ANGELES); biochemistry, genetics of microbial virulence factors

LUKEHART, SHEILA A; PhD, 1978, UNIVERSITY OF CALIFORNIA (LOS ANGELES); molecular virology

MILLER, SAMUEL I; MD, 1979, BAYLOR UNIVERSITY; Salmonella pathogenesis and bacterial-eucaryotic cell interactions

MOSELEY, STEPHEN L.; PhD, 1981, UNIVERSITY OF WASHINGTON; molecular basis of pathogenesis in E. coli diarrhea

MULLINS, JAMES I.; PhD, 1978, UNIVERSITY OF MINNESOTA; retroviruses and AIDS, molecular virology

NESTER, EUGENE W; PhD, 1959, CASE WESTERN RESERVE UNIVERSITY; genetics and biochemistry, of bacterial-plant cell interactions

OVERBAUGH, JULIE MAUREEN; PhD, 1983, UNIVERSITY OF COLORADO (BOULDER); molecular mechanisms of virus-host cell interactions of retroviral pathogenesis/ AIDS

RUBENS, CRAIG E; PhD, 1978, MEDICAL UNIVERSITY OF SOUTH CAROLINA; infectious diseases/pathogenesis of gram (+) bacterial infections

SHERRIS, JOHN C; MBBS, 1948, UNIVERSITY OF LONDON (UK); MD, 1950, UNIVERSITY OF LONDON (UK); medical microbiology, antibiotic action and resistance

STALEY, JAMES T; PhD, 1967, UNIVERSITY OF CALIFORNIA (DAVIS); freshwater bacteriology, microbial ecology, general microbiology

RHIM, JONATHAN A.; MD, 1989, GEORGE WASHINGTON UNIVERSITY; molecular mechanisms of medical disease

RHO, ROBERT W; MD, 1992, LOMA LINDA UNIVERSITY; Cardiac physiology, molecular biology, cell biology

WRIGHT, JAMES A.; PhD, 1982, UNIVERSITY OF WASHINGTON; bacterial genetics and biochemistry, of bacterial-eucaryotic cell interactions.
LAW, CHE-LEUNG; PhD, 1990, UNIVERSITY OF IOWA; molecular biology of parasites
TARR, PHILLIP I; MD, 1980, YALE UNIVERSITY; gastroenterology/ infectious diseases
WHITE, THEODORE C; PhD, 1984, UNIVERSITY OF MICHIGAN; molecular mechanisms of virulence and drug resistance in pathogenic yeasts

Research Professor
DARVEAU, RICHARD P.; PhD, 1981, WASHINGTON STATE UNIVERSITY; innate host defense interactions between bacteria and their hosts
GALLOWAY, DENISE A; PhD, 1976, CITY UNIVERSITY OF NEW YORK; viral pathogenesis and neoplasia

Associate Professor
BUMGARNER, ROGER E.; PhD, 1988, UNIVERSITY OF ARIZONA; spectroscopy and instrumentation for biotechnology
COOKSON, BRAD T; PhD, 1991, WASHINGTON UNIVERSITY; cellular immune response to intracellular bacteria; microbial pathogenesis; clinical microbiology
HILL, WALTER E; PhD, 1972, UNIVERSITY OF WASHINGTON; genetic methods for detecting and characterizing foodborne microbial pathogens
LAMPE, MARY F; PhD, 1984, UNIVERSITY OF NORTH CAROLINA; medical technology education, molecular analysis of Chlamydia trachomatis
LARA, JIMMIE CANO; PhD, 1970, UNIVERSITY OF CALIFORNIA (RIVERSIDE); microbial physiology and cryotolgy, sporation and gas vesicle synthesis and regulation

Research Associate Professor
HERWIG, RUSSELL P; PhD, 1989, UNIVERSITY OF WASHINGTON; environmental and applied aquatic microbiology, bioremediation-related microbiology

Assistant Professor
LAW, CHE-LEUNG; PhD, 1990, UNIVERSITY OF MINNESOTA; immunology, B cell activation and development
MARR, KIEREN A; MD, 1993, HAHNEMANN MEDICAL COLLEGE; Fungal infections in immunocompromised hosts; Pathogenesis of aspergillosis
VAN T WOUT, ANGELIQUE B.; PhD, 1997, UNIVERSITY OF AMSTERDAM (NETHERLANDS); Interactions between HIV and its host cells
WOOD, DEREK WILLIAM; PhD, 1997, UNIVERSITY OF ARIZONA; genomic analysis and evolution of pathogenesis

Research Assistant Professor
INTERTHAL, HEIDRUN; PhD, 1996, UNIVERSITY OF BERNE (SWITZERLAND); DNA repair in eukaryotic cells

Lecturer
ANDERSON, DENISE G; MS, 1985, UNIVERSITY OF WASHINGTON; microbiology laboratory teaching
BARNES, GLOVER W; PhD, 1961, STATE UNIVERSITY OF NEW YORK (BUFFALO); tissue, organ immunology
BICKNELL, MARY; MS, 1962, UNIVERSITY OF WASHINGTON; microbiology laboratory teaching
CHANDLER, MARK S; PhD, 1998, UNIVERSITY OF ILLINOIS; microbiology laboratory teaching
MAMER, RAMONA; MS, 1957, UNIVERSITY OF ILLINOIS; microbiology laboratory teaching
PARKHURST, DALE J.; BS, 1960, UNIVERSITY OF WASHINGTON; microbiology laboratory teaching.

Neurological Surgery
Professor
ANDERSON, GAIL; PhD, 1987, UNIVERSITY OF WASHINGTON; pharmacokinetics, metabolism and interactions of drugs in epilepsy and trauma
CHAPMAN, JENS R.; MD, 1983, TECHNICAL UNIVERSITY OF MUNICH (GERMANY); orthopaedics, spine trauma/reconstruction
CHATRIAN, GIAN E.; MD, 1951, UNIVERSITY OF NAPLES (ITALY); electroencephalography and clinical neurophysiology
COHEN, WENDY; MD, 1975, HARVARD UNIVERSITY; neuroradiology
DIKKEN, SUREYYA S; PhD, 1973, UNIVERSITY OF WASHINGTON; clinical neuropsychology, traumatic brain injury
DOMINO, KAREN B.; MA, 1974, UNIVERSITY OF NEW MEXICO; MD, 1978, UNIVERSITY OF MICHIGAN; neuroanesthesia
ELLENBOGEN, RICHARD G.; BA, 1980, BROWN UNIVERSITY; MD, 1983, BROWN UNIVERSITY; pediatric neurosurgery, neuro-oncology, complex spine
FRASER, ROBERT T; PhD, 1976, UNIVERSITY OF WISCONSIN; psychology
GEYER, JEFFREY R.; MD, 1977, WAYNE STATE UNIVERSITY; hematology/ oncology
GOODKIN, ROBERT M; MD, 1964, CHICAGO MEDICAL SCHOOL; neurological surgery
GRUSS, JOSEPH S.; MBChB, 1969, UNIVERSITY OF WITWATERSRAND (S. AFRICA); craniofacial and maxillofacial surgery
HARRIS, A BASIL; MD, 1954, UNIVERSITY OF ALABAMA; neurosurgery, neuroanatomy, microvascular, arteriovenous malformations, epilepsy mechanisms
HAYNOR, DAVID R; PhD, 1971, UNIVERSITY OF CALIFORNIA (BERKELEY); medical image processing and segmentation; image deformation; functional MRI; expression arrays
JAFFE, KENNETH M; MD, 1975, HARVARD UNIVERSITY; pediatric rehabilitation, brain injury, neuromuscular diseases, congenital defects
JARVIK, JEFFREY G; MD, 1987, UNIVERSITY OF CALIFORNIA (SAN DIEGO); neuroradiology, outcomes research
KELLY, WILLIAM A; MD, 1954, UNIVERSITY OF CINCINNATI; neurosurgery, neuroendocrinology
KLIOT, MICHEL; MD, 1984, YALE UNIVERSITY; peripheral nerve injury and diseases, nerve injury/regeneration
LAM, ARTHUR M; MD, 1974, WESTERN ONTARIO UNIVERSITY (CANADA); neuroanesthesia
LARAMORE, GEORGE E; PhD, 1969, UNIVERSITY OF ILLINOIS; therapeutic radiology
LEVY, RENE H; PhD, 1970, UNIVERSITY OF CALIFORNIA (SAN FRANCISCO); metabolic interactions among antiepileptic drugs and between cytokines and drugs
LOERS, JOHN D; MD, 1961, NEW YORK UNIVERSITY; pain, neurophysiology
MARAVILLA, KENNETH R.; MD, 1970, STATE UNIVERSITY OF NEW YORK (BROOKLYN); neuroradiology and neurosurgery
MILLER, JOHN W; PhD, 1981, UNIVERSITY OF ILLINOIS; epilepsy and clinical neurophysiology
MORRISON, RICHARD S; PhD, 1982, UNIVERSITY OF CALIFORNIA (LOS ANGELES); genetic pathways regulating neuronal cell death in disease and injury
OJEMANN, GEORGE A; MD, 1959, UNIVERSITY OF IOWA; neuropsychology, organization of higher functions in brain, language, memory
PHILLIPS, MARK H; PhD, 1982, UNIVERSITY OF WISCONSIN; medical radiation physics
REH, THOMAS A.; PhD, 1981, UNIVERSITY OF WISCONSIN; regeneration and...
development of central nervous system
ROBERTS, THEODORE S.; MS, 1952, UNIVERSITY OF WISCONSIN; neurological surgery, stereotaxic surgery, pituitary and cerebrovascular disease
ROBERTS, THEODORE S.; MD, 1955, UNIVERSITY OF WISCONSIN; neurological surgery, stereotaxic surgery, pituitary and cerebrovascular disease
SILBERGELD, DANIEL L; MD, 1984, UNIVERSITY OF CINCINNATI; brain tumors, epilepsy
SPENCE, ALEXANDER M; MD, 1965, UNIVERSITY OF CHICAGO; neurology, neuro-oncology
TEMKIN, NANCY R; PhD, 1976, STATE UNIVERSITY OF NEW YORK (BUFFALO); clinical trials, recovery models, statistical modeling of epileptic phenomena, survival analysis
WEINBERGER, EDWARD; MD, 1979, HARVARD UNIVERSITY; pediatric radiology
Associate Professor
BECKER, KYRA J.; MD, 1989, DUKE UNIVERSITY; stroke, neurophysiology
Bellabarba, Carlo; MD, 1992, Medical University of South Carolina (COLUMBIA, SC); spine trauma and reconstruction, orthopaedic trauma
Dalley, Robert W.; MD, 1982, UNIVERSITY OF UTAH; neuroradiology
Janigro, Damir; PhD, 1982, UNIVERSITY OF MILAN (ITALY); glucose transporter and the lens capsule, microvascular permeability
Mirza, Sohail K.; MD, 1989, UNIVERSITY OF COLORADO (DENVER); spinal surgery/spine biomechanics
Nelson, Peter S.; MD, 1986, UNIVERSITY OF KANSAS; the study of human carcinogenesis using tools of genomics and bioinformatics
Ojemann, Jeffrey G; MA, 1992, WASHINGTON UNIVERSITY; MD, 1992, WASHINGTON UNIVERSITY; FMRI and electrical studies of cognition in neuropsychology, epilepsy imaging, brain-computer interface
Ojemann, Linda M; MD, 1960, UNIVERSITY OF ILLINOIS; neurology, treatment of epilepsy
Rostomily, Robert C.; MD, 1987, CASE WESTERN RESERVE UNIVERSITY; surgery of adult brain and cranial base tumors, molecular biology of nervous system tumors
Vavilala, Monica S.; MD, 1991, UNIVERSITY OF TEXAS (HOUSTON); pediatric pain management
Wilenksy, Alan J; PhD, 1973, UNIVERSITY OF TORONTO (CANADA); neurology, movement disorders
Research Associate Professor
Mourad, Pierre; PhD, 1987, UNIVERSITY OF WASHINGTON; translational research in diagnostic and therapeutic ultrasound
Silber, John R.; PhD, 1977, UNIVERSITY OF FLORIDA; neuro-oncology
Assistant Professor
Avellino, Anthony M.; MD, 1992, COLUMBIA UNIVERSITY; Pediatric Neurosurgery
Bransford, Richard; MD, 1996, VANDERBILT UNIVERSITY; Pediatric, Degenerative & Traumatic Spine Conditions, Pediatric Orthopaedics, 3rd World Medicine
Britz, Gavin W; MMBChir, 1987, UNIVERSITY OF WITWATERSRAND (S. AFRICA); Cerebral aneurysms and AVMs, Carotid disease, skull base tumors, cerebral vasospasm
Neurology
Professor
Bird, Thomas D.; MD, 1968, CORNELL UNIVERSITY; neurology, neurogenetics
Chamberlain, Jeffrey S; PhD, 1985, UNIVERSITY OF WASHINGTON; neurogenetics, Duchennes muscular dystrophy
Chance, Phillip F.; MD, 1978, UNIVERSITY OF TENNESSEE; pediatric neurology and genetics
Copass, Michael K; MA, 1964, NORTHWESTERN UNIVERSITY; MD, 1964, NORTHWESTERN UNIVERSITY; neurology/emergency services
Crill, Wayne E; MD, 1962, UNIVERSITY OF WASHINGTON; properties of spinal and cortical neurons, mechanisms of repetitive firing of CNS neurons
Doddrell, Carol B; PhD, 1970, PURDUE UNIVERSITY; neurophysiology of epilepsy
Farrell, Donald; MD, 1965, GEORGE WASHINGTON UNIVERSITY; neurology, clinical neurophysiology including intraoperative monitoring, evoked potential
Fraser, Robert T; PhD, 1976, UNIVERSITY OF WISCONSIN; psychology
Gospe, Sidney M; PhD, 1980, DUKE UNIVERSITY; pyridoxine-dependent seizures, developmental neurotoxicity of second-hand tobacco smoke and toluene
Kraft, George Howard; MD, 1963, OHIO STATE UNIVERSITY; physiatry
Longstreth Jr, W. T.; MD, 1975, UNIVERSITY OF PENNSYLVANIA; MPH, 1982, UNIVERSITY OF WASHINGTON; neurology
Marra, Christina M.; MS, 1979, OREGON STATE UNIVERSITY; MD, 1984, UNIVERSITY OF OREGON; neurology, infectious diseases
Miller, John W.; PhD, 1981, UNIVERSITY OF ILLINOIS; epilepsy and clinical neurophysiology
Ransom, Bruce Robert; PhD, 1972, WASHINGTON UNIVERSITY; neurology, neuroscience research
Shadlen, Michael N.; PhD, 1985, UNIVERSITY OF CALIFORNIA (BERKELEY); neurobiology of vision and cognition
Spain, William; MD, 1977, COLUMBIA UNIVERSITY; signal transduction in the central nervous system
Spence, Alexander M; MD, 1965, UNIVERSITY OF CHICAGO; neurology, neuro-oncology
Stah, William L; PhD, 1983, UNIVERSITY OF PITTSBURGH; neurochemistry of brain ATPase systems
Sumi, Shuizo; MD, 1956, UNIVERSITY OF TORONTO (CANADA); neuropathology, neuromuscular disease, neurodegenerative diseases
Swanson, Phillip D; PhD, 1964, UNIVERSITY OF LONDON (UK); movement disorders, neurology
Tapscott, Stephen J; PhD, 1982, UNIVERSITY OF PENNSYLVANIA; molecular and developmental biology
Wilenksy, Alan J; PhD, 1973, UNIVERSITY OF TORONTO (CANADA); neurology, treatment of epilepsy, testing and use of anticonvulsants
Research Professor
Franklin, Gary M.; MD, 1969, GEORGE WASHINGTON UNIVERSITY; MPH, 1982, UNIVERSITY OF CALIFORNIA (BERKELEY); occupational injury, neurological epidemiology, public health nutrition
Scheffernberg, Gerard D; PhD, 1978, UNIVERSITY OF CALIFORNIA (RIVERSIDE); mapping of familial Alzheimer disease genes and cloning of Werner’s syndrome gene
Associate Professor
Becker, Kyra J.; MD, 1989, DUKE UNIVERSITY; stroke, neurophysiology
Garden, Gwenn A.; PhD, 1994, UNIVERSITY OF WASHINGTON; Caspase enzymes and apoptosis in HIV neural injury
Holmes, Mark D.; MD, 1977, OHIO STATE UNIVERSITY; neurology/EEG
Kapur, Vishesh; MD, 1989, YALE UNIVERSITY; pulmonary and critical-care medicine
Kraus, Eric E.; MD, 1991, UNIVERSITY OF MINNESOTA; general neurology
Kurataini, John D; MD, 1990, TULANE UNIVERSITY; pediatric epilepsy, EEG
Leverenz, James B.; MD, 1985, UNIVERSITY OF WASHINGTON; neurology, psychiatry and behavioral sciences, Alzheimer’s disease
Milsent, Jerrold M.; MD, 1964, UNIVERSITY OF MINNESOTA; pediatric neurology
Sotero de Menezes, Marcio; MD, 1984, RIO DE JANEIRO ST. U. MED.
BENEDETTI, THOMAS J; MD, 1973, UNIVERSITY OF WASHINGTON; perinatal medicine.

BREMNER, WILLIAM J; PhD, 1977, MONASH UNIVERSITY (AUSTRALIA); endocrinology

BROWN, ZANE A; MD, 1966, TEMPLE UNIVERSITY; insulin requiring diabetes complicating pregnancy, genital herpes complicating pregnancy.

CLIFTON, DONALD K; PhD, 1979, UNIVERSITY OF CALIFORNIA (LOS ANGELES); reproductive physiology.

DISIS, MARY L; MS, 1986, UNIVERSITY OF NEBRASKA; MD, 1986, UNIVERSITY OF NEBRASKA; oncology

EASTERLING, THOMAS R; MD, 1981, UNIVERSITY OF NORTH CAROLINA; perinatal medicine, hypertension during pregnancy

ESCHENBACH, DAVID A; MD, 1968, UNIVERSITY OF WISCONSIN; gynecology and infectious disease.

GOFF, BARBARA A; MD, 1986, UNIVERSITY OF PENNSYLVANIA; gynecologic oncology

GREER, BENJAMIN E; MD, 1966, UNIVERSITY OF PENNSYLVANIA; gynecologic oncology

HEBERT, MARY F; PharmD, 1987, UNIVERSITY OF CALIFORNIA (SAN FRANCISCO); transplantation, immunology pharmacotherapeutics

HICKOK, DURLIN E; MD, 1973, UNIVERSITY OF MICHIGAN; perinatal epidemiology

KHO, WUI-JIN; MD, 1984, LOMA LINDA UNIVERSITY; therapeutic radiology.

LEIN, JOHN N; MD, 1955, UNIVERSITY OF WASHINGTON; government relations.

MERRIAM, GEORGE R; MD, 1976, HARVARD UNIVERSITY; metabolism and endocrinology

PATTON, DOROTHY L; PhD, 1981, UNIVERSITY OF WASHINGTON; infectious disease

SHEFFER, LAURENCE E; MD, 1987, UNIVERSITY OF TEXAS (SAN ANTONIO); perinatal medicine

SHY, KIRKWOOD K; MD, 1973, WAYNE STATE UNIVERSITY; epidemiologic applications to problems in obstetrics and gynecology

SOULES, MICHAEL R; MD, 1972, UNIVERSITY OF CALIFORNIA (LOS ANGELES); reproductive endocrinology.

SPADONI, LEON R; MD, 1957, UNIVERSITY OF WASHINGTON; reproductive endocrinology

STEINER, ROBERT A; PhD, 1975, UNIVERSITY OF OREGON; neuroendocrinology, neuroscience, endocrinology

STENCHEYER, MORTON A; MD, 1962, UNIVERSITY OF CALIFORNIA (BUFFALO); gynecology, reproductive genetics, medical education.

TAMIMI, HISHAM K; MD, 1969, CAIRO UNIVERSITY (EGYPT); gynecologic oncology.

VONTVER, LOUIS A; MD, 1960, UNIVERSITY OF MINNESOTA; MED, 1970, UNIVERSITY OF WASHINGTON; medical education, gynecology

WALKER, EDWARD A; MD, 1983, UNIVERSITY OF WASHINGTON; consultation-liaison psychiatry, medically unexplained physical symptoms

Associate Professor

CHENG, EDITH Y; MS, 1979, SARAH LAWRENCE COLLEGE; MD, 1987, UNIVERSITY OF WASHINGTON; genetics, perinatal medicine

ECKERT, LINDA O; MD, 1987, UNIVERSITY OF CALIFORNIA (SAN DIEGO); gynecology.

HITI, JANE; MD, 1989, UNIVERSITY OF VERMONT; MPH, 1995, UNIVERSITY OF WASHINGTON; perinatal medicine, HIV and pregnancy

LENTZ, GRETCHEN M; MD, 1986, UNIVERSITY OF WASHINGTON; urogynecology

MILLER WEERTMAN, LESLIE; MD, 1990, UNIVERSITY OF WASHINGTON; contraception, reproductive endocrinology, sexually transmitted disease

MOORE, DONALD E; MD, 1967, CASE WESTERN RESERVE UNIVERSITY; reproductive endocrinology

REED, SUSAN D; MS, 1979, SARAH LAWRENCE COLLEGE; MD, 1986, STANFORD UNIVERSITY; gynecology, evidence-based medicine and clinical outcomes studies, hormone replacement therapy

Assistant Professor

CARR, DARY R; MD, 1993, MEDICAL COLLEGE OF WISCONSIN; Diabetes and heart disease risk factors in women with prior preeclampsia or gestational diabetes

GARCIA, ROCHELLE; MD, 1989, UNIVERSITY OF WASHINGTON; cytology, gynecologic pathology

KLINE, CAROLYN R; MD, 1984, HARVARD UNIVERSITY; MD, 1990, STANFORD UNIVERSITY; gynecologic medicine

MAO, CONSTANCE; MD, 1988, UNIVERSITY OF SOUTHERN CALIFORNIA; Screening and prevention of cervical cancer, human papilloma virus infection

MELVILLE, JENNIFER L; MD, 1995, UNIVERSITY OF CALIFORNIA (LOS ANGELES); MPH, 2001, UNIVERSITY OF WASHINGTON; Depression in Obstetrics and Gynecology

MELVILLE, JENNIFER L; BA, 1991, UNIVERSITY OF TEXAS (AUSTIN); Depression in Obstetrics and Gynecology

PALEY, PAMELA J; MD, 1990, LOYOLA UNIVERSITY (CHICAGO); gynecologic oncology

SWENSEN, RON E; MD, 1984, LOMA LINDA UNIVERSITY; Gynecologic Oncology clinical trials

Obstetrics and Gynecology

Professor

BENEDETTI, THOMAS J; MD, 1973, UNIVERSITY OF WASHINGTON; perinatal medicine.

TIRSHWELL, DAVID L; MD, 1991, UNIVERSITY OF NORTH CAROLINA; perinatal medicine.

WATSON, NATHAEL J; MD, 1996, UNIVERSITY OF GEORGIA; neuroendocrinology.

WATSON, NATHANIEL F; MD, 1996, UNIVERSITY OF NORTH CAROLINA; Clinical sleep disorders, general neuropathy

WINTER, MELVIN R; MD, 1974, UNIVERSITY OF CALIFORNIA (LOS ANGELES); reproductive endocrinology.

WINTER, MELVIN R; MD, 1974, UNIVERSITY OF CALIFORNIA (LOS ANGELES); reproductive endocrinology.
Ophthalmology

Professor

CLARK, JOHN I; PhD, 1974, UNIVERSITY OF WASHINGTON; biophysical and structural properties of cytoplasmic proteins, cell aging, differentiation
KALINA, ROBERT E; MD, 1960, UNIVERSITY OF MINNESOTA; vitreoretinal diseases.
KINYOUN, JAMES L; MD, 1971, UNIVERSITY OF NEBRASKA; vitreoretinal diseases.
MILAM, ANN H.; PhD, 1967, UNIVERSITY OF TEXAS (SOUTHWESTERN); electron microscopy, ophthalmic pathology, retinitis pigmentosa, retinal cell biology
ORCUTT, JAMES C; PhD, 1976, UNIVERSITY OF COLORADO (DENVER); orbit, oculoplastics, neuro-ophthalmology
PAGON, ROBERTA A; PhD, 1981, UNIVERSITY OF WASHINGTON; biophysical and development of central nervous system
PALCZEWSKI, KRZYSZTOF; PhD, 1986, TECHNICAL UNIVERSITY OF WROCLAW (POLAND); visual transduction.
PATTON, DOROTHY L; PhD, 1981, UNIVERSITY OF WASHINGTON; infectious disease
REH, THOMAS A.; PhD, 1981, UNIVERSITY OF WISCONSIN; regeneration and development of central nervous system
SAARI, JOHN C; PhD, 1970, UNIVERSITY OF WASHINGTON; retinal biochemical aspects
WEISS, AVERY H; MD, 1974, MIAMI UNIVERSITY (OHIO); pediatric ophthalmology, strabismus

Associate Professor

CHEN, PHILIP P.; MD, 1991, YALE UNIVERSITY; glaucoma
CHUANG, ELAINE L.; MD, 1979, UNIVERSITY OF TEXAS (SAN ANTONIO); vitreoretinal diseases, ocular inflammation
RIEKE, FREDERICK MARTIN; PhD, 1991, UNIVERSITY OF CALIFORNIA (BERKELEY); sensory signal processing and computation
SAPERSTEIN, DAVID A.; MD, 1987, PENNSYLVANIA STATE UNIVERSITY; vitreoretinal diseases, macular degeneration
SIRES, BRYAN S; PhD, 1986, NORTHWESTERN UNIVERSITY; plastic and reconstructive surgery

Assistant Professor

SHEN, TUENG T.; PhD, 1994, MASSACHUSETTS INSTITUTE OF TECHNOLOGY; refractive & advanced eye surgery techniques, corneal tissue research, tissue donation awareness

Orthopaedics

Professor

BENIRSCHKE, STEPHEN K.; MD, 1979, CASE WESTERN RESERVE UNIVERSITY; traumatology
BERRYMAN, JACK W; PhD, 1976, UNIVERSITY OF MARYLAND; history of exercise, sports medicine, and health behavior/philosophy
BIGOS, STANLEY J; MD, 1975, UNIVERSITY OF MISSOURI; orthopaedics, spine
CHANSKY, HOWARD ALAN; MD, 1987, UNIVERSITY OF PENNSYLVANIA; orthopaedics, general
CHAPMAN, JENS R.; MD, 1983, TECHNICAL UNIVERSITY OF MUNICH (GERMANY); orthopaedics, spine trauma/reconstruction
CHESNUT, CHARLES; MD, 1966, UNIVERSITY OF FLORIDA; nuclear medicine
CONRAD, ERNEST U.; MD, 1979, UNIVERSITY OF VIRGINIA; orthopaedics, tumors and bone transplantation
DEYO, RICHARD A.; MD, 1975, PENNSYLVANIA STATE UNIVERSITY; health status measurement and evaluation of common medical practices
EARY, JANET F; MD, 1980, MICHIGAN STATE UNIVERSITY; nuclear medicine
EYRE, DAVID R.; PhD, 1969, UNIVERSITY OF LEEDS (UK); connective tissue biology, collagen chemistry, bone and cartilage metabolism
GARDNER, GREGORY C.; MD, 1984, BAYLOR UNIVERSITY; rheumatology
GRAYNEY, DANIEL O; PhD, 1965, UNIVERSITY OF CALIFORNIA (SAN FRANCISCO); gross anatomy, electron microscopy, intestinal absorption
HANEL, DOUGLAS PAUL; MD, 1977, ST LOUIS UNIVERSITY; orthopaedics, hand/microvascular surgery
HANSEN, SIGVARD T; MD, 1961, UNIVERSITY OF WASHINGTON; orthopaedics, foot, ankle and amputations
HENLEY, MICHAEL BRADFORD; MD, 1979, UNIVERSITY OF WASHINGTON; orthopaedics, trauma, post-traumatic reconstruction, spinal trauma
MANN, FREDERICK A.; MD, 1975, INDIANA UNIVERSITY; emergency and trauma radiology
MATSEN, FREDERICK A; MD, 1968, BAYLOR UNIVERSITY; orthopaedics, bone and joint research, robotics
MILLS, WILLIAM J; MD, 1950, STANFORD UNIVERSITY; traumatology, knee ligament injury
MIRZA, SOHAIL K.; MD, 1989, UNIVERSITY OF COLORADO (DENVER); spinal surgery/spine biomechanics
OLERUD, JOHN E; MD, 1971, UNIVERSITY OF WASHINGTON; dermatology

Associate Professor

ALLAN, CHRISTOPHER H; MD, 1992, NORTHWESTERN UNIVERSITY; hand and microvascular surgery
BELLABARBA, CARLO; MD, 1992, McGill UNIVERSITY (CANADA); biomechanics of joints, orthopaedic trauma implants
BRUCE, THOMAS E.; MD, 1979, UNIVERSITY OF PENNSYLVANIA; medical genetics.
CHANSKY, HOWARD ALAN; MD, 1987, UNIVERSITY OF TEXAS (GALVESTON); orthopaedics, traumatology
GILLESPIE, THURMAN; MD, 1980, THOMAS JEFFERSON UNIVERSITY; biomechanics
GRANEY, DANIEL O; PhD, 1965, UNIVERSITY OF CALIFORNIA (SAN FRANCISCO); gross anatomy, electron microscopy, intestinal absorption
HANEL, DOUGLAS PAUL; MD, 1977, ST LOUIS UNIVERSITY; orthopaedics, hand/microvascular surgery
HANSEN, SIGVARD T; MD, 1961, UNIVERSITY OF WASHINGTON; orthopaedics, foot, ankle and amputations
HENLEY, MICHAEL BRADFORD; MD, 1979, UNIVERSITY OF WASHINGTON; orthopaedics, trauma, post-traumatic reconstruction, spinal trauma
MANN, FREDERICK A.; MD, 1975, INDIANA UNIVERSITY; emergency and trauma radiology
MATSEN, FREDERICK A; MD, 1968, BAYLOR UNIVERSITY; orthopaedics, bone and joint research, robotics
MILLS, WILLIAM J; MD, 1950, STANFORD UNIVERSITY; traumatology, knee ligament injury
MIRZA, SOHAIL K.; MD, 1989, UNIVERSITY OF COLORADO (DENVER); spinal surgery/spine biomechanics
OLERUD, JOHN E; MD, 1971, UNIVERSITY OF WASHINGTON; dermatology
RASKIND, WENDY H; PhD, 1977, UNIVERSITY OF WASHINGTON; medical genetics.
RICHARDSON, MICHAEL L.; MD, 1975, BAYLOR UNIVERSITY; bone and joint orthopaedic trauma and musculoskeletal radiology
ROUSSON, STEPHEN; MD, 1981, WAYNE STATE UNIVERSITY; orthopaedics, trauma, and foot and ankle deformity
RIVERA, WALTER; PhD, 1983, UNIVERSITY OF MEXICO; orthopaedics, foot and ankle surgery
RUSH, JOHN S; MD, 1979, UNIVERSITY OF PENNSYLVANIA; orthopaedics, biomechanics
SMITH, DOUGLAS G.; MD, 1984, UNIVERSITY OF CHICAGO; orthopaedics, traumatology, foot, ankle, amputations
SMITH, NATHAN J; MD, 1945, UNIVERSITY OF WISCONSIN; sports medicine
STAEHELIN, LYNN T; MD, 1959, UNIVERSITY OF UTAH; pediatric orthopaedics
TEITZ, CAROL CLAIRE; MD, 1974, YALE UNIVERSITY; orthopaedics, arthroscopy, sports medicine
TENCER, ALLAN FRED; MD, 1981, McCULL UNIVERSITY (CANADA); biomechanics of joints, orthopaedic trauma implants
TRUMBLE, THOMAS E.; MD, 1979, YALE UNIVERSITY; orthopaedics, hand and microvascular surgery
VEDDER, NICHOLAS; MD, 1981, CASE WESTERN RESERVE UNIVERSITY; hand and microvascular surgery
WILSON, ANTHONY J.; MBCHIR, 1972, OTAGO UNIVERSITY (NEW ZEALAND); orthopaedic trauma imaging, teleradiology, digital radiography, MRI/CT

Assistant Professor

ALLAN, CHRISTOPHER H; MD, 1992, NORTHWESTERN UNIVERSITY; hand and microvascular surgery
BELLABARBA, CARLO; MD, 1992, McGill UNIVERSITY (CANADA); spine trauma and reconstruction, orthopaedic trauma
BRUCE, THOMAS E.; MD, 1979, UNIVERSITY OF PENNSYLVANIA; medical genetics.
CHANSKY, HOWARD ALAN; MD, 1987, UNIVERSITY OF TEXAS (GALVESTON); orthopaedics, traumatology
GILLESPIE, THURMAN; MD, 1980, THOMAS JEFFERSON UNIVERSITY; biomechanics
GRANEY, DANIEL O; PhD, 1965, UNIVERSITY OF CALIFORNIA (SAN FRANCISCO); gross anatomy, electron microscopy, intestinal absorption
HANEL, DOUGLAS PAUL; MD, 1977, ST LOUIS UNIVERSITY; orthopaedics, hand/microvascular surgery
HANSEN, SIGVARD T; MD, 1961, UNIVERSITY OF WASHINGTON; orthopaedics, foot, ankle and amputations
HENLEY, MICHAEL BRADFORD; MD, 1979, UNIVERSITY OF WASHINGTON; orthopaedics, trauma, post-traumatic reconstruction, spinal trauma
MANN, FREDERICK A.; MD, 1975, INDIANA UNIVERSITY; emergency and trauma radiology
MATSEN, FREDERICK A; MD, 1968, BAYLOR UNIVERSITY; orthopaedics, bone and joint research, robotics
MILLS, WILLIAM J; MD, 1950, STANFORD UNIVERSITY; traumatology, knee ligament injury
MIRZA, SOHAIL K.; MD, 1989, UNIVERSITY OF COLORADO (DENVER); spinal surgery/spine biomechanics
OLERUD, JOHN E; MD, 1971, UNIVERSITY OF WASHINGTON; dermatology

anthroscopy, sports medicine and knee ligament reconstruction
LEOPOLD, SETH S; MD, 1993, CORNELL UNIVERSITY; Treatments for hip and knee arthritis, arthritis research, and joint replacement surgery
MILLS, WILLIAM J.; MS, 1985, UNIVERSITY OF MINNESOTA; MD, 1989, UNIVERSITY OF COLORADO (DENVER); traumatology, knee ligament injury
MOSCA, VINCENT S.; MD, 1978, UNIVERSITY OF ROCHESTER; pediatric orthopaedics, the child's foot, limb length discrepancies
NORK, SEAN E.; MD, 1992, UNIVERSITY OF CALIFORNIA (SAN DIEGO); traumatology
O'KANE, JOHN; MD, 1993, UNIVERSITY OF VERMONT; family medicine, sports medicine, team care
OTT, SUSAN M; MD, 1974, UNIVERSITY OF WASHINGTON; nephrology
RUBEL, EDWIN W.; PhD, 1969, MICHIGAN STATE UNIVERSITY; development, infant psychoacoustics
SCHUBERT, MARK M; DDS, 1974, UNIVERSITY OF MICHIGAN; otology/head and neck surgery
SHI, KLAUS; MD, 1989, UNIVERSITY OF MICHIGAN; oto-neurotology, cochlear implantation
STANLEY, ROBERT B.; MD, 1976, DUKE UNIVERSITY; otolaryngology/head and neck surgery, trauma, maxillofacial surgery
TAYLOR, DAVID L.; MD, 1987, ST LOUIS UNIVERSITY; otolaryngology/head and neck surgery
THREE, THOMAS; MD, 1971, UNIVERSITY OF WASHINGTON; audiology.
THOMPSON, JAMES F.; MD, 1983, UNIVERSITY OF IOWA; oto-neurotology, cochlear implantation
THERIOT, ROBERT B.; MD, 1993, UNIVERSITY OF WASHINGTON; family medicine, sports medicine, team care
TONKIN, BLAINE; MD, 1982, UNIVERSITY OF IOWA; oto-neurotology, cochlear implantation
TONKIN, BLAINE; MD, 1982, UNIVERSITY OF IOWA; oto-neurotology, cochlear implantation
UNTERMANN, MARK; MD, 1993, UNIVERSITY OF MICHIGAN; oto-neurotology, cochlear implantation
VANDERBILT UNIVERSITY; Pediatric, reconstructive surgery
WEYMULLER, ERNEST A; MD, 1966, LOYOLA UNIVERSITY (CHICAGO); auditory development, infant psychoacoustics
WYATT, G. STEPHEN; MD, 1986, PRINCETON UNIVERSITY; molecular neurobiology/neurogenetics, especially potassium channel gene structure and function
ZAMEK, DAVID; MD, 1987, UNIVERSITY OF MINNESOTA; otolaryngology/head and neck surgery
ZHANG, MIQIN; PhD, 1998, UNIVERSITY OF ILLINOIS; orthopaedics, general, sports medicine
ZHOU, TAI; MD, 1997, UNIVERSITY OF CALIFORNIA (SAN DIEGO); orthopaedic trauma
Assistant Professor
AVELLINO, ANTHONY M.; MD, 1992, COLUMBIA UNIVERSITY; Pediatric Neurosurgery
BAREI, DAVID P; MD, 1991, UNIVERSITY OF OTTAWA (CANADA); traumatology
BRANSFORD, RICHARD; MD, 1996, VANDERBILT UNIVERSITY; Pediatric, Degenerative, & Traumatic Spine Conditions, Pediatric Orthopaedics, 3rd World Medicine
DALES, MARK C.; MD, 1982, UNIVERSITY OF NEVADA; orthopaedics.
TAITSMAN, LISA A.; MD, 1994, BROWN UNIVERSITY; MPH, 1985, HARVARD UNIVERSITY; Orthopaedic trauma

Otolaryngology—Head and Neck Surgery

Professor
COTRERA, MARC DANTE; MD, 1981, YALE UNIVERSITY; otolaryngology/head and neck surgery
DONALDSON, JAMES A; MD, 1954, UNIVERSITY OF MINNESOTA; otology
DUCkERT, LARRY GENE; PhD, 1977, UNIVERSITY OF MINNESOTA; otology/neurotology
FUCHS, ALBERT F; PhD, 1966, JOHNS HOPKINS UNIVERSITY; oculomotor physiology, vision
FUTRAN, NEAL DAVID; DMD, 1982, UNIVERSITY OF PENNSYLVANIA; MD, 1987, ST UNIV OF NEW YORK (DOWNSTATE MED CTR); oral maxillofacial surgery
GATES, GEORGE A.; MD, 1959, UNIVERSITY OF MICHIGAN; otology/neurotology, cochlear implantation
HILLEL, ALLEN D; MD, 1976, STANFORD UNIVERSITY; peripheral nerve physiology after injury, swallowing disorders in neuromuscular disease
KUHL, PATRICIA K; PhD, 1973, UNIVERSITY OF MINNESOTA; speech perception.
MANNING, SCOTT C.; MD, 1980, TULANE UNIVERSITY; pediatric otolaryngology/head and neck surgery
NORTON, SUSAN J.; MD, 1982, UNIVERSITY OF WASHINGTON; normal and non-normal hearing, specifically cochlear mechanics, in humans and animals
ORCUTT, JAMES C; PhD, 1976, UNIVERSITY OF COLORADO (DENVER); orbit, ocuoplastics, neuro-ophthalmology
ROBINSON, LAWRENCE R.; MD, 1982, BAYLOR UNIVERSITY; physical
RUBEL, EDWIN W.; PhD, 1969, MICHIGAN STATE UNIVERSITY; developmental neurobiology, with special emphasis on vertebrate auditory system development
SCHUBERT, MARK M; DDS, 1974, UNIVERSITY OF WASHINGTON; MSD, 1981, UNIVERSITY OF WASHINGTON; oral medicine/oral oncology
SNYDER, JACK; PhD, 1971, UNIVERSITY OF WASHINGTON; audiology.
STANLEY, ROBERT B.; MD, 1976, DUKE UNIVERSITY; otolaryngology/head and neck surgery, trauma, maxillofacial surgery
TEMPEL, BRUCE L.; PhD, 1983, PRINCETON UNIVERSITY; molecular neurobiology/neurogenetics, especially potassium channel gene structure and function
WERNER, LYNNIE A.; PhD, 1980, LOYOLA UNIVERSITY (CHICAGO); auditory development, infant psychoacoustics
WEYMULLER, ERNEST A; MD, 1966, HARVARD UNIVERSITY; otolaryngology/head and neck surgery

Associate Professor
CALDERON, ROSEMARY; PhD, 1988, UNIVERSITY OF WASHINGTON; mental health and deafness, childhood psychopathology, early intervention
FEENEY, M. PATRICK; PhD, 1993, UNIVERSITY OF WASHINGTON; The aging auditory system and wideband assessment of middle-ear function
GLENN, MICHAEL GERARD; MD, 1981, UNIVERSITY OF CALIFORNIA (SAN FRANCISCO); otolaryngology/head and neck surgery, microvascular surgery
INGLIS, ANDREW F; MD, 1981, MEDICAL COLLEGE OF PENNSYLVANIA; pediatric otolaryngology/head and neck surgery
LIPPE, WILLIAM R.; PhD, 1972, UNIVERSITY OF CALIFORNIA (IRVINE); neurobiology
MAKIELSKI, KATHLEEN H.; MD, 1978, UNIVERSITY OF MICHIGAN; otolaryngology/head and neck surgery
MILLER, ROBERT M; PhD, 1976, UNIVERSITY OF WASHINGTON; speech, language pathology, adults, swallowing
MURAKAMI, CRAIG S.; MD, 1983, UNIVERSITY OF WASHINGTON; facial cosmetic and reconstructive surgery
PERKINS, JONATHAN A.; DO, 0, OSTEOPATHIC MEDICINE AND SURGERY (IOWA); pediatric otolaryngology/head and neck surgery
PINCZOWER, ERIC F; MD, 1986, UNIVERSITY OF CALIFORNIA (IRVINE); otolaryngology/head and neck surgery, facial reconstructive surgery.
REES, THOMAS; PhD, 1972, UNIVERSITY OF WASHINGTON; audiology.
SIE, KATHLEEN C.Y.; MD, 1984, UNIVERSITY OF MICHIGAN; pediatric otolaryngology/head and neck surgery
YUEH, BEVAN; MD, 1989, STANFORD UNIVERSITY; clinical epidemiology of hearing loss and head and neck cancer

Research Associate Professor
OESTERLE, ELIZABETH C.; PhD, 1987, PURDUE UNIVERSITY; hair cell regeneration and supporting-cell functioning
PHILLIPS, JAMES O; PhD, 1993, UNIVERSITY OF WASHINGTON; vestibular neurobiology, neuronal control of eye and head movements during gaze shifts in primates

Assistant Professor
HUME, CLIFFORD; PhD, 1988, CORNELL UNIVERSITY; Otology, cochlear implantation, inner ear embryology and gene therapy
MOOS, SAM P.; MD, 1995, STANFORD UNIVERSITY; Facial plastic and reconstructive surgery
WHIPPLE, MARK E.; MD, 1991, UNIVERSITY OF WASHINGTON; MS, 2001, MASSACHUSETTS INSTITUTE OF TECHNOLOGY
Pathology

Professor

ARGENYI, ZSOLT B; MD, 1978, SEMMELWEIS MEDICAL UNIVERSITY (HUNGARY); dermatopathology

BOWEN-POPE, DANIEL; PhD, 1979, UNIVERSITY OF CALIFORNIA (BERKELEY); gene regulation, growth factors and receptors

BYERS, PETER H; MD, 1969, CASE WESTERN RESERVE UNIVERSITY; extracellular matrix synthesis, genetic disorders of collagen metabolism, secretion, human genetics

CLOWES, ALEXANDER W; MD, 1972, HARVARD UNIVERSITY; vascular smooth muscle cell growth control, arterial injury and repair

COLLINS, STEVEN J; MD, 1973, COLUMBIA UNIVERSITY; retinoic acid receptors and the pathogenesis of malignancy

DISTECH, CHRISTINE M; PhD, 1976, UNIVERSITY OF LIEGE (BELGIUM); molecular genetics of sex chromosomes, X inactivation, human and mouse cytogenetics

EARY, JANET F; MD, 1980, MICHIGAN STATE UNIVERSITY; nuclear medicine

EISEN, HARVEY; PhD, 1967, UNIVERSITY OF TORONTO (CANADA); host-parasite interactions, generation of genetic diversity

FAUSTO, NELSON; MD, 1960, SAO PAULO STATE UNIVERSITY (BRAZIL); liver regeneration, tumor biology, carcinogenesis, growth factors

FRIEND, STEPHEN H; PhD, 1979, INDIANA UNIVERSITY; molecular biology of embryonal tumor, molecular pharmacology, tumor suppressor genes

GIACHELLI, CECILIA; PhD, 1987, UNIVERSITY OF WASHINGTON; adhesion molecules and vascular biology processes

GROUDINE, MARK; PhD, 1976, UNIVERSITY OF PENNSYLVANIA; chromatin structure and gene activity

GUGGENHEIM, STEPHEN J; MD, 1964, HARVARD UNIVERSITY; microbiology, renal pathology

HARLAN, JOHN M.; MD, 1973, UNIVERSITY OF CHICAGO; vascular biology with emphasis on leukocyte-endothelial adhesion

HELLSTROM, KARL-ERIK; DrMed, 1964, UNIVERSITY OF STOCKHOLM (SWEDEN); DrMed, 1966, KAROLINSKA INSTITUTE (SWEDEN); tumor immunology

HORWITZ, MARSHALL S; PhD, 1988, UNIVERSITY OF WASHINGTON; inherited white blood cell disorders, including leukemia

KEMP, CHRISTOPHER JAMES; PhD, 1989, UNIVERSITY OF WISCONSIN; genetic and environmental influence on multistage cancer in the mouse

KIVIAT, NANCY C; MA, 1970, UNIVERSITY OF WASHINGTON; MD, 1975, UNIVERSITY OF WASHINGTON; epidemiologic and molecular biologic studies of the relationship between HPV, HIV, and neoplasia

LOEB, LAWRENCE A; PhD, 1967, UNIVERSITY OF CALIFORNIA (BERKELEY); DNA replication, cancer and AIDS

MARTIN, GEORGE; MD, 1953, UNIVERSITY OF CALIFORNIA (BERKELEY); somatic cell genetics, pathology of aging, neuregenerative disorders

MILLER, ARTHUR D.; PhD, 1982, STANFORD UNIVERSITY; virology, gene therapy

MONNAT, RAYMOND J; MD, 1976, UNIVERSITY OF CHICAGO; somatic cell genetics, molecular genetics, human genetic disease

MONTINE, THOMAS J; PhD, 1988, UNIVERSITY OF ROCHESTER; age-related neurodegeneration, Alzheimer’s disease, Parkinson’s disease, MOTTET, N CARLE; MD, 1952, YALE UNIVERSITY; effects of trace elements, especially methylmercury and arsenic, on growth and development

MURRY, CHARLES E.; PhD, 1989, DUKE UNIVERSITY; myocardial infarction, heart regeneration, skeletal/cardiac muscle differentiation

NARAYANAN, A SAMPATH; PhD, 1967, UNIVERSITY OF MADRAS (INDIA); connective tissue, periodontal disease, regulation of fibroblast growth, matrix synthesis

NICOSIA, ROBERTO F; PhD, 1984, MEDICAL COLLEGE OF PENNSYLVANIA; vascular and renal pathology

NORWOOD, THOMAS H; MD, 1968, UNIVERSITY OF MARYLAND; somatic cell genetics, pathobiology of aging, mitotic cell cycle regulation

PAGE, ROY C; PhD, 1967, UNIVERSITY OF WASHINGTON; connective-tissue pathology, chronic inflammation, immune pathology, periodontal disease

PIEPKORN, MICHAEL W; PhD, 1980, UNIVERSITY OF WASHINGTON; dermatology

PREHN, RICHMOND T.; MD, 1947, LONG ISLAND UNIVERSITY; cancer research

RABINOVITCH, PETER S.; PhD, 1980, UNIVERSITY OF WASHINGTON; cellular aging, preneoplastic disease, cell cycle abnormalities, DNA change

REAY, DONALD T; MD, 1963, UNIVERSITY OF UTAH; MPA, 1978, SEATTLE UNIVERSITY; forensic medicine.

REICHENBACH, DENNIS D; MD, 1958, UNIVERSITY OF WASHINGTON; cardiovascular pathology, myocardial cell injury

REIDY, MICHAEL A; PhD, 1976, CAMBRIDGE UNIVERSITY (UK); identification of migration specific genes, expression of matrix metalloproteinases

ROHRSCHNEIDER, LARRY R; PhD, 1973, UNIVERSITY OF WISCONSIN; control of growth, differentiation, transformation by the c-fms proto-oncogene

ROSENFELD, MICHAEL E.; PhD, 1981, UNIVERSITY OF WISCONSIN; mechanisms of atherogenesis and macrophage gene expression

SALE, GEORGE E; MD, 1968, STANFORD UNIVERSITY; immunopathology, bone marrow transplantation, graft-versus-host

SCHWARTZ, STEPHEN MARK; PhD, 1973, UNIVERSITY OF WASHINGTON; vascular biology, atherosclerosis, molecular basis of lineage, developmental biology, cell kinetics

SHAH, CHENG-MEI; MD, 1950, NATIONAL TAIWAN UNIVERSITY; immunopathology, immunopathology, trace metal neurotoxicology

SHULMAN, HOWARD M; MD, 1971, UNIVERSITY OF CALIFORNIA (LOS ANGELES); graft-versus-host disease; venocclusive disease of the liver

SMITH, GERALD R; PhD, 1970, MASSACHUSETTS INSTITUTE OF TECHNOLOGY; molecular biology of genetic recombination and regulation of gene expression

SPENCE, ALEXANDER M; MD, 1965, UNIVERSITY OF CHICAGO; neurology, neuro-oncology

STAMATOYANNOPoulos, G; MD, 1958, UNIVERSITY OF ATHENS (GREECE); DrMedSci, 1960, UNIVERSITY OF ATHENS (GREECE); medical genetics.

SUMI, SHUZO MARK; MD, 1956, UNIVERSITY OF TORONTO (CANADA); neuropathology, neuromuscular disease, neurodegenerative diseases

TAIT, JONATHAN F; PhD, 1983, WASHINGTON UNIVERSITY; biochemistry of blood coagulation, laboratory diagnosis of genetic disorders

TAPSCOTT, STEPHEN J.; PhD, 1982, UNIVERSITY OF PENNSYLVANIA; molecular and developmental biology

TRUE, LAWRENCE DASHIELL; MD, 1971, TULANE UNIVERSITY; urologic pathology, nuclear aspects of tumor differentiation

VESSELLA, ROBERT L; PhD, 1974, UNIVERSITY OF MISSISSIPPI; tumor markers and immunology

WIGHT, THOMAS; PhD, 1972, UNIVERSITY OF NEW HAMPSHIRE; connective
tissue biology and pathology, proteoglycans metabolism, atherosclerosis

WOLF, NORMAN S; PhD, 1960, NORTH-WESTERN UNIVERSITY; hematopoietic stem cell dynamics and transplantation in radiation biology

YEUNG, RAYMOND S; MD, 1982, UNIVERSITY OF TORONTO (CANADA); general and surgical oncology

Research Professor
ALBERS, JOHN J.; PhD, 1969, UNIVERSITY OF ILLINOIS; lipoprotein metabolism and pathophysiology

CHI, EMIL YIMOU; PhD, 1971, UNIVERSITY OF CALIFORNIA (SANTA BARBARA); lung structures and function, mast cell secretion and inflammation

GALLOWAY, DENISE A; PhD, 1976, CITY UNIVERSITY OF NEW YORK; viral pathogenesis and neoplasia

RAINES, ELAINE W; MS, 1975, UNIVERSITY OF CALIFORNIA (SAN FRANCISCO); molecular mechanisms responsible for vascular cell migration

STEPHENS, KAREN G; PhD, 1982, INDIANA UNIVERSITY; molecular genetics of human disease; human gene mapping

Associate Professor
BORNFELDT, KARIN E; PhD, 1991, LINKOPING UNIVERSITY (SWEDEN); cardiovascular disease in diabetes, focusing on vascular muscle cells

CLURMAN, BRUCE E.; PhD, 1988, CORNELL UNIVERSITY; oncology

FINN, LAURA S; MD, 1989, PENNSYLVANIA STATE UNIVERSITY; pediatric pathology

FLIGNER, CORINNE L.; MD, 1976, UNIVERSITY OF NEW MEXICO; autopsy and forensic pathology, fetal and perinatal pathology, forensic toxicology

HACKMAN, ROBERT C; MD, 1971, STANFORD UNIVERSITY; infectious and pulmonary complications in immunocompromised patients

HEVNER, ROBERT F; PhD, 1992, MEDICAL COLLEGE OF WISCONSIN; development of cerebral cortex

KAPUR, RAJ P; MD, 1988, UNIVERSITY OF SOUTHERN CALIFORNIA; normal and abnormal development of the enteric nervous system

KIEM, HANS-PETER; MD, 1987, UNIVERSITY OF ULM (GERMANY); oncology/hematology

KINSELLA, MICHAEL G; PhD, 1978, UNIVERSITY OF OREGON; endothelial cell biology

LAWTON, THOMAS J; MD, 1990, UNIVERSITY OF MICHIGAN; clinicopathologic research in breast cancer with particular interest in lobular carcinoma

MYERSON, DAVID; PhD, 1979, ALBERT EINSTEIN COLLEGE OF MEDICINE; the pathology of viral disease in humans

NELSON, PETER S.; MD, 1986, UNIVERSITY OF KANSAS; the study of human carcinogenesis using tools of genomics and bioinformatics

OLSON, JAMES M.; MD, 1991, UNIVERSITY OF MICHIGAN; hematology, oncology

OTT, SUSAN M; MD, 1974, UNIVERSITY OF WASHINGTON; nephrology

PATTERSON, KATHLEEN; MD, 1976, UNIVERSITY OF IOWA; pediatric pathology

PORTER, PEGGY L.; MD, 1987, UNIVERSITY OF NEW MEXICO; identifying/understanding the molecular events associated with the initiation/progression of cancer

QWARNSTROM, EVA E; PhD, 1984, UNIVERSITY OF LUND (SWEDEN); cell matrix interaction, cytokine signaling

RUBIN, BRIAN PAUL; PhD, 1995, CORNELL UNIVERSITY; bone and soft tissue tumors

SCHMIDT, RODNEY; PhD, 1984, UNIVERSITY OF WASHINGTON; surgical pathology, pulmonary pathology, sarcomas, image analysis, electron microscopy

SIMRELL, CHARLES R.; MD, 1978, UNIVERSITY OF FLORIDA; hematology and hematopathology

THORNING, DAVID R.; MD, 1965, UNIVERSITY OF KANSAS; anatomic pathology, pulmonary pathology, tissue biology, electron microscopy

VINCENT, INEZ J.; PhD, 1987, INDIANA UNIVERSITY; pathogenesis of Alzheimer's disease

VIRGIN, JEFFREY B.; PhD, 1986, CASE WESTERN RESERVE UNIVERSITY; surgical pathology, cytopathology, autopsy pathology

ZHANG, JING; PhD, 1995, DUKE UNIVERSITY; neuropathology and ocular pathology, Parkinson's disease

Research Associate Professor
OSHIMA, JUNKO; PhD, 1992, BOSTON UNIVERSITY; pathobiology of aging

SIEBERT, JOSEPH ROBERT; PhD, 1985, UNIVERSITY OF WASHINGTON; pediatric pathology

Assistant Professor
ADLER, DAVID A; PhD, 1996, UNIVERSITY OF WASHINGTON; mammalian x-chromosome inactivation

BORN, DONALD E.; PhD, 1986, UNIVERSITY OF VIRGINIA; family medicine, sports medicine, team care

BURMER, GLENNA C.; PhD, 1983, UNIVERSITY OF WASHINGTON; molecular events in tumor progression, molecular evolution, diagnostic molecular pathology

GARCIA, ROCHELLE; MD, 1989, UNIVERSITY OF WASHINGTON; cytology, gynecologic pathology

KUECHEL, MELANIE K.; MD, 1989, BAYLOR UNIVERSITY; dermatology

LEPPIG, KATHLEEN; MD, 1986, CASE WESTERN RESERVE UNIVERSITY; medical genetics

PARKS, WILLIAM A; MD, 1988, WASHINGTON UNIVERSITY; Transforming growth factor beta signaling, endocytosis

RHIM, JONATHAN A.; MD, 1989, GEORGE WASHINGTON UNIVERSITY; molecular mechanisms of medical disease

SMITH, KELLY D.; PhD, 1996, UNIVERSITY OF IOWA; Immunology, Molecular Biology, Host-Pathogen Interactions, Genomics, Renal and Cardiac Pathology

WILLIAMS, KENDACE J.; PhD, 1987, DARTMOUTH COLLEGE; pathology, toxicology

WRIGHT, A MORGAN; MD, 1976, PENNSYLVANIA STATE UNIVERSITY; cytology, histology

YEH, MENG-CHE; PhD, 1997, UNIVERSITY OF PENNSYLVANIA; Surgical pathology with special interest in liver and gastrointestinal pathology

Research Assistant Professor
HU, QUBAI; PhD, 1995, UNIVERSITY OF ARKANSAS; Molecular mechanisms of Alzheimer pathogenesis emphasizing on neural adaptor FE65 and APP function

MONTINE, KATHLEEN S; PhD, 1988, UNIVERSITY OF ROCHESTER; Alzheimer's disease, aging brain, and age-related neurodegenerative disease

REINECKE, HANS; PhD, 1995, UNIVERSITY OF FREIBURG (GERMANY); Myocardial infarction, strategies for repair, cell based therapy, gene therapy, stem cells.

SWANSON, KRISTIN R.; PhD, 1999, UNIVERSITY OF WASHINGTON; mathematical medicine & biology; mathematical modeling of pathological biosystems & imaging; complex systems

ZHENG, NATHALIE N; PhD, 1998, UNIVERSITY OF NEW SOUTH WALES (AUSTRALIA); T cell immunity in control of HIV infection and HIV pathogenesis

Lecturer
EK, MART; MBCHB, 1959, UNIVERSITY OF CAPE TOWN (SOUTH AFRICA); gynecological/breast pathology

PENDERGRASS, WILLIAM R; PhD, 1977, UNIVERSITY OF WASHINGTON; DNA replication, caloric restriction, gerontology, in vitro senescence

Pediatrics

Professor
BENNETT, FORREST C; MD, 1970, UNIVERSITY OF MINNESOTA; child development and handicapped children
BERGMAN, ABRAHAM; MD, 1958, CASE WESTERN RESERVE UNIVERSITY; ambulatory pediatrics
BERNSTEIN, IRWIN D; MD, 1967, NEW YORK UNIVERSITY; hematology, oncology
BURNS, JANE L.; MD, 1978, UNIVERSITY OF WASHINGTON; infectious diseases
CHANGE, PHILLIP F.; MD, 1978, UNIVERSITY OF TENNESSEE; pediatric neurology and genetics
CHRISTIE, DENNIS L.; MD, 1968, NORTHWESTERN UNIVERSITY; gastroenterology
CLARREN, STERLING K; MD, 1973, UNIVERSITY OF MINNESOTA; congenital defects
CONNELL, FREDERICK A.; MD, 1972, NEW YORK UNIVERSITY; child health, child health services research, Medicaid, community health assessment
COOMBS, JOHN B.; MD, 1972, CORNELL UNIVERSITY; Health care outcomes, rural health policy, healthcare workforce issues and applied nutrition
COREY, LAWRENCE; MD, 1971, UNIVERSITY OF MICHIGAN; laboratory medicine: diagnosis, therapy, and pathogenesis of viral infections, AIDS virus
DEISHER, ROBERT W; MD, 1944, WASHINGTON UNIVERSITY; adolescent medicine
DE KOCHE, MARK A.; MD, 1985, UNIVERSITY OF WASHINGTON; pediatric emergency medicine
DIEKEMA, DOUGLAS S.; MD, 1985, UNIVERSITY OF NORTH CAROLINA; MPH, 1993, UNIVERSITY OF WASHINGTON; pediatric emergency medicine
EDDY, ALLISON A.; MD, 1975, McMASTER UNIVERSITY (CANADA); nephrology
ENGEL, IRVIN; MA, 1956, UNIVERSITY OF ARIZONA; MD, 1960, UNIVERSITY OF ROCHESTER; MS, 1966, UNIVERSITY OF WASHINGTON; epidemiology of maternal and child health problems, growth and development
EMERY, HELEN; MD, 1971, UNIVERSITY OF ADELAIDE (AUSTRALIA); Pediatric hematology - clinical, rehabilitation and health outcomes research
FOLSON, RICHARD C; PhD, 1979, UNIVERSITY OF WASHINGTON; pediatric audiology
FRENCH, JAMES W.; MD, 1963, UNIVERSITY OF MICHIGAN; pediatric cardiology
FRENKEL, LISA M.; MD, 1987, UNIVERSITY OF KANSAS; infectious diseases
GEYER, JEFFREY R.; MD, 1977, WAYNE STATE UNIVERSITY; hematology/ oncology
GIBSON, RONALD L; PhD, 1982, WASHINGTON UNIVERSITY; pulmonology
GLEASON, CHRISTINE A.; MD, 1979, UNIVERSITY OF ROCHESTER; neonatology
GROSSMAN, DAVID C.; MD, 1982, UNIVERSITY OF CALIFORNIA (LOS ANGELES); MPH, 1990, UNIVERSITY OF WASHINGTON; injury control, Native American health, and pediatric health services
GUNTHEROTH, WARREN G; MD, 1952, HARVARD UNIVERSITY; pediatric cardiology
GURALNICK, MICHAEL J; PhD, 1967, LEHIGH UNIVERSITY; developmental disabilities, peer relations, social and language development, evaluation systems
HAYDEN, PATRICIA; MD, 1953, UNIVERSITY OF ROCHESTER; congenital defects
HAYS, ROSS M.; MD, 1978, UNIVERSITY OF WASHINGTON; pediatric rehabilitation, medical ethics, neuromuscular diseases, congenital defects
HODSON, W. ALAN; MD, 1959, UNIVERSITY OF MANITOBA (CANADA); MMSc, 1964, OHIO STATE UNIVERSITY; neonatal and respiratory diseases
JACKSON, J CRAIG; MD, 1979, VANDERBILT UNIVERSITY; neonatal and respiratory diseases
JAFFE, KENNETH M; MD, 1975, HARVARD UNIVERSITY; pediatric rehabilitation, brain injury, neuromuscular diseases, congenital defects
JONES, THOMAS K; MD, 1978, JEFFERSON MEDICAL COLLEGE; pediatric cardiology
LEMIRE, RONALD J; MD, 1962, UNIVERSITY OF WASHINGTON; teratology
LYNN, ANNE; MD, 1975, STANFORD UNIVERSITY; pediatric anesthesiology
MARCUSE, EDGAR K; MD, 1967, STANFORD UNIVERSITY; MPH, 1973, UNIVERSITY OF WASHINGTON; general pediatrics
MARTIN, LYNN D; MD, 1982, UNIVERSITY OF WASHINGTON; pediatric anesthesiology
MASSAGLI, TERESA L.; MD, 1982, YALE UNIVERSITY; pediatric psychiatry
MAYOCK, DENNIS EDWARD; MD, 1975, OHIO STATE UNIVERSITY; neonatology and respiratory diseases
MC CAULEY, ELIZABETH; PhD, 1973, STATE UNIVERSITY OF NEW YORK (BUFFALO); developmental psychopathology focused on affected disorders, behavioral genetics
MC LAUGHLIN, JOHN F; MD, 1970, NORTHWESTERN UNIVERSITY; congenital defects
MOSELEY, STEPHEN L.; PhD, 1981, UNIVERSITY OF WASHINGTON; molecular basis of pathogenesis in E. coli diarrhea
MOURADIAN, WENDY ELYLE; MD, 1977, COLUMBIA UNIVERSITY; Ethics and quality of life in children's oral, craniofacial health.
NEFF, JOHN; MD, 1960, HARVARD UNIVERSITY; children with special health care needs
NOVACK, ALVIN H; MD, 1958, TEMPLE UNIVERSITY; general pediatrics
OCHS, HANS D; MD, 1962, UNIVERSITY OF FREIBURG (GERMANY); immunology
PAGON, ROBERTA A; MD, 1972, HARVARD UNIVERSITY; medical genetics
PENDERGRASS, THOMAS W; MD, 1971, UNIVERSITY OF TENNESSEE; MPH, 1979, UNIVERSITY OF WASHINGTON; hematology, oncology
PORTMAN, MICHAEL A.; MD, 1980, UNIVERSITY OF CINCINNATI; pediatric cardiology
QUAN, LINDA; MS, 1969, DARTMOUTH COLLEGE; MD, 1971, UNIVERSITY OF WASHINGTON; pediatric emergency medicine
RAMSEY, BONNIE W; MD, 1976, HARVARD UNIVERSITY; cystic fibrosis, pulmonary
REDDING, GREGORY J; MD, 1974, STANFORD UNIVERSITY; pediatric pulmonary medicine
RIVARA, FREDERICK P.; MD, 1974, UNIVERSITY OF PENNSYLVANIA; pediatric epidemiology and injury prevention and research
ROBERTSON, WILLIAM O; MD, 1949, UNIVERSITY OF ROCHESTER; general pediatrics, toxicology
RUBENS, CRAIG E; PhD, 1978, MEDICAL UNIVERSITY OF SOUTH CAROLINA; infectious diseases/pathogenesis of gram (+) bacterial infections
RUVALCABA, ROGELIO; MD, 1957, UNIVERSITY OF GUADALAJARA (MEXICO); endocrinology
SANDERS, JEAN E; MD, 1970, UNIVERSITY OF IOWA; hematology, oncology
SCOTT, C RONALD; MD, 1959, UNIVERSITY OF WASHINGTON; diagnosis and nutritional management of genetic disorders of children
SHUGERMAN, RICHARD P; MD, 1984, UNIVERSITY OF ALABAMA; general pediatrics
SHURTLEFF, DAVID B; MD, 1955, TUFTS UNIVERSITY; congenital defects
SMITH, MARK S; MD, 1969, UNIVERSITY OF VIRGINIA; adolescent medicine
SMITH, NATHAN J; MD, 1945, UNIVERSITY OF WISCONSIN; sports medicine
STAPLETON, F. BRUDER; MD, 1972, UNIVERSITY OF KANSAS; nephrology
STEVENSON, JAMES G; MD, 1970, BAYLOR UNIVERSITY; pediatric cardiology
TARCZY-HORNOCZ, PETER; MD, 1989, STANFORD UNIVERSITY; bioinformatics and clinical informatics: clinical systems and integrating genetic databases
TARR, PHILLIP I; MD, 1980, YALE UNIVERSITY; gastroenterology/ infectious diseases
TAYLOR, JAMES A.; MD, 1980, UNIVERSITY OF NORTH CAROLINA; general pediatrics
WATKINS, SANDRA L.; MD, 1981, UNIVERSITY OF TEXAS (HOUSTON); nephrology

WEDGWOOD, RALPH J.; MD, 1947, HARVARD UNIVERSITY; rheumatology

WEINBERGER, EDWARD; MD, 1979, HARVARD UNIVERSITY; pediatric radiology

WILSON, CHRISTOPHER B.; MD, 1972, UNIVERSITY OF CALIFORNIA (LOS ANGELES); immunology, infectious diseases

WOODRUM, DAVID E.; MD, 1965, UNIVERSITY OF ILLINOIS; neonatology

WOODBINE, GEORGE A.; MD, 1983, TEMPLE UNIVERSITY; MBA, 1999, UNIVERSITY OF PENNSYLVANIA; Pediatric Emergency Medicine and Trauma, Transport Medicine, EMS, International Medicine, Business

ZIMMERMAN, JERRY J.; PhD, 1975, UNIVERSITY OF WISCONSIN; critical-care medicine

Research Professor

FANTEI, ALAN G.; PhD, 1974, UNIVERSITY OF WASHINGTON; embryology, teratology

OSBORNE, WILLIAM R; PhD, 1972, UNIVERSITY OF LONDON; KING'S COLLEGE (UK); pediatric genetics

Associate Professor

ANDREWS, ROBERT G; MD, 1976, UNIVERSITY OF MINNESOTA; hematology/oncology

ASTLEY, SUSAN J.; PhD, 1990, UNIVERSITY OF WASHINGTON; chronic childhood diseases.

BOWDEN, RALEIGH A.; MD, 1978, UNIVERSITY OF WASHINGTON; hematology/oncology

BREWER, DAVID K.; MD, 1972, HARVARD UNIVERSITY; pediatric radiology, angiography, computed tomography

BROWNSTEIN, DENA R.; MD, 1982, UNIVERSITY OF WASHINGTON; pediatric emergency medicine

CARTER, EDWARD R.; MD, 1981, VANDERBILT UNIVERSITY; Asthma, airway resistance measurements, medical adherence

CUNNINGHAM, MICHAEL L.; PhD, 1996, UNIVERSITY OF WASHINGTON; molecular, development, craniofacial, malformation, human, mouse, cranio-synostosis, birth defects

ENGLUND, JANET A.; MD, 1980, UNIVERSITY OF MICHIGAN; Viral Diagnosis & Treatment, Antiviral Drugs, Vaccines, Maternal Immunization, Immunocompromise Host

FRANCIS, JULIE S.; MD, 1984, UNIVERSITY OF WASHINGTON; dermatology

FRIEDMAN, DEBRA L.; MD, 1991, U OF MEDICINE & DENTISTRY OF NEW JERSEY; hematology/oncology

GRAHAM, ELINOR A.; MD, 1970, UNIVERSITY OF ROCHESTER; MPH, 1993, JOHNS HOPKINS UNIVERSITY; general pediatrics

GUNTHER, DANIEL F.; MD, 1992, UNIVERSITY OF CALIFORNIA (DAVIS); pediatric endocrinology

HAWKINS, DOUGLAS S.; MD, 1990, HARVARD UNIVERSITY; hematology/oncology

HEROND, S. PAUL; MD, 1970, GEORGE WASHINGTON UNIVERSITY; pediatric cardiology

HOLM, VANJA A.; MD, 1954, KAROLINSKA INSTITUTE (SWEDEN); child development

HORNUNG, ROBIN L.; MD, 1990, YALE UNIVERSITY; MPH, 1996, UNIVERSITY OF NORTH CAROLINA; dermatology

JARDINE, DAVID; MD, 1980, JOHNS HOPKINS UNIVERSITY; pediatric anesthesiology

KAHN, STUART J.; MD, 1985, U OF MEDICINE & DENTISTRY OF NEW JERSEY; rheumatology

KAPUR, RAI P.; MD, 1988, UNIVERSITY OF SOUTHERN CALIFORNIA; normal and abnormal development of the enteric nervous system

KAWABORI, ISAMU; MD, 1966, UNIVERSITY OF WASHINGTON; pediatric cardiology

KLEIN, EILEEN J.; MD, 1988, JOHNS HOPKINS UNIVERSITY; pediatric emergency medicine

KLETTER, GAD B.; MD, 1982, SACKLER SCHOOL OF MEDICINE (ISRAEL); pediatric endocrinology

LEHMAN, ROBERT M.; MD, 1978, TUFTS UNIVERSITY; adolescent medicine

LIU, LENNA L.; MD, 1992, UNIVERSITY OF PENNSYLVANIA; general pediatrics, type 2 diabetes

LOZANO, PAULA; MD, 1989, HARVARD UNIVERSITY; MPH, 1994, UNIVERSITY OF WASHINGTON; general pediatrics, asthma, evidence-based medicine

MARSHALL, SUSAN G; MD, 1980, UNIVERSITY OF CALIFORNIA (LOS ANGELES); neonatal and respiratory diseases

MATTHEWS, DANA C.; MD, 1981, UNIVERSITY OF WASHINGTON; pediatrics

MCDONALD, RUTH A.; MD, 1987, UNIVERSITY OF MINNESOTA; nephrology

MELVIN, ANN JORNS; MD, 1986, TULANE UNIVERSITY; infectious diseases

MELZER, SANFORD M.; MD, 1982, MT SINAI SCHOOL OF MEDICINE; general pediatrics

MURPHY, JANET HAWORTH; MBCHB, 1967, VICTORIA UNIVERSITY (UK); neonatal biology and respiratory disease

MURRAY, KAREN F.; MD, 1990, JOHNS HOPKINS UNIVERSITY; gastroenterology

OLSON, JAMES M.; MD, 1991, UNIVERSITY OF MICHIGAN; hematology, oncology

PARK, JULIE R.; MD, 1988, UNIVERSITY OF VERMONT; hematology, oncology

PIHOKER, CATHERINE; MD, 1987, ALBANY MEDICAL COLLEGE; pediatrics

ROSENBAM, DAVID M.; MD, 1977, ALBERT EINSTEIN COLLEGE OF MEDICINE; pediatric radiology

SCHENKMAN, KENNETH A.; MD, 1986, INDIANA UNIVERSITY; pediatric anesthesia

SMITH, SHERILYN; MD, 1989, BAYLOR UNIVERSITY; infectious diseases

SOTERO DE MENEZES, MARCIO; MD, 1984, RIO DE JANEIRO ST. U. MED. SCH. (BRAZIL); pediatric neurology, epilepsy, EEG

STOUT, JAMES W.; MAT, 1981, DUKE UNIVERSITY; MD, 1986, WAKE FOREST UNIVERSITY; childhood asthma, health services and epidemiology

STRANDJORD, THOMAS P.; MD, 1983, JOHNS HOPKINS UNIVERSITY; neonatal biology and respiratory diseases

SULZBACHER, STEPHEN; PhD, 1971, UNIVERSITY OF WASHINGTON; psychiatry and behavioral sciences

SYMONS, JORDAN; MD, 1992, COLUMBIA UNIVERSITY; nphrology

VAIVALALA, MONICA S.; MD, 1991, UNIVERSITY OF TEXAS (HOUSTON); pediatric pain management

WALLACE, CAROLA A.; MD, 1973, UNIVERSITY OF MICHIGAN; immunology/rheumatology

WEISS, AVERY H.; MD, 1974, MIAMI UNIVERSITY (OHIO); pediatric ophthalmology, strabismus

WOOLFREY, ANN E.; MD, 1984, UNIVERSITY OF MINNESOTA; pediatric nephrology/oncology

WRIGTH, JEFFREY A.; MD, 1978, UNIVERSITY OF MISSOURI; general pediatrics

ZELIKOVIC, ISRAEL; MD, 1977, TEL AVIV UNIVERSITY (ISRAEL); nephrology

Research Associate Professor

SPIERS, PHILIP S.; PhD, 1966, OXFORD UNIVERSITY (UK); SIDS

Assistant Professor

BADEN, HARRIS P.; MD, 1989, UNIVERSITY OF TEXAS (GALVESTON); Perioperative care of infants and children with congenital heart disease.

CHABRA, SHILPI; MBBS, 1986, BOMBAY UNIVERSITY (INDIA); MD, 1989, BOMBAY UNIVERSITY (INDIA); Care of normal & high risk newborns. Prevention of chronic lung disease. Epidemiology of gastroesophageal reflux disease.

EBEL, BETH E.; MS, 1989, OXFORD UNIVERSITY (UK); MD, 1996, HARVARD UNIVERSITY; MPH, 2001, UNIVERSITY OF WASHINGTON; pediatric injury prevention, community intervention programs
Pharmacology

Professor

BEAVO, JOSEPH A; PhD, 1970, VANDERBILT UNIVERSITY; roles and molecular mechanisms of cyclic nucleotide phosphodiesterase regulation of cell function

BOMSZTYK, KAROL; MD, 1977, UNIVERSITY OF ROCHESTER; role of cytokine-induced protein kinases in the regulation of gene expression

CATTERALL, WILLIAM; PhD, 1972, JOHNS HOPKINS UNIVERSITY; molecular biology of ion channels, molecular pharmacology and neurobiology

CHAVKIN, CHARLES; PhD, 1982, STANFORD UNIVERSITY; cell and molecular mechanisms of psychoactive opiate drugs to understand normal and pathophysiology

DORSA, DANIEL M; PhD, 1977, UNIVERSITY OF CALIFORNIA (DAVIS); neuropharmacology, neurochemistry

HOL, WILHELMUS G.; PhD, 1971, UNIVERSITY OF GRONINGEN (NETHERLANDS); protein crystallography, drug design, vaccine development, and protein engineering

HORITA, AKIRA; PhD, 1954, UNIVERSITY OF WASHINGTON; neuropsychopharmacology

JUCHAU, MONT RAWLINGS; PhD, 1966, UNIVERSITY OF IOWA; developmental pharmacology, drug metabolism

KREBS, EDWIN G; MD, 1943, WASHINGTON UNIVERSITY; intracellular signaling mechanisms involving protein phosphorylation

MC KNIGHT, G STANLEY; PhD, 1976, STANFORD UNIVERSITY; phosphorylation; gene expression and neuro/endocrine physiology in mice using genetic approaches

MOON, RANDALL T.; PhD, 1982, UNIVERSITY OF WASHINGTON; embryonic development; signal transduction; cancer biology

NATHANSON, NEIL; PhD, 1975, BRANDEIS UNIVERSITY; neurobiology; molecular analysis of neural signal transduction by muscarinic and neuropeptide receptors

OMIECINSKI, CURTIS J; PhD, 1980, UNIVERSITY OF WASHINGTON; molecular toxicology, genetic regulation/ expression of drug/chemical metabolizing enzymes

SLATTERY, JOHN T; PhD, 1978, STATE UNIVERSITY OF NEW YORK (BUFFALO); pharmacokinetics/pharmacodynamics of alkylating agents, oncology/bone marrow transplant

STORM, DANIEL R; PhD, 1971, UNIVERSITY OF CALIFORNIA (BERKELEY); molecular basis of neuroplasticity; cAMP and Ca2+ signal transduction systems in the CNS

Research Professor

SCHELLENBERG, GERARD D; PhD, 1978, UNIVERSITY OF CALIFORNIA (RIVERSIDE); mapping of familial Alzheimer disease genes and cloning of Werner’s syndrome gene

Associate Professor

BAJALIEH, SANDRA M.; PhD, 1989, UNIVERSITY OF WISCONSIN; molecular neurobiology

DE JONGH, KAREN S.; PhD, 1985, UNIVERSITY OF NEW SOUTH WALES(AUSTRALIA); characterization of the molecular components of excitability, mechatronics

HALPERN, LAWRENCE M; PhD, 1961, ALBERT EINSTEIN COLLEGE OF MEDICINE; pharmacology

HAMLIN, MARK W.; PhD, 1982, UNIVERSITY OF CALIFORNIA (SAN DIEGO); molecular and cell biology of serotonin receptors, geriatric psychiatry

KAHN, MICHAEL; PhD, 1983, YALE UNIVERSITY; molecular recognition, protein structure-function relationships, peptidomics

STELLA, NEPHI; PhD, 1995, ECOLE POLYTECHNIQUE FEDERALE DE LAUSANNE; microglia cells activation: involvement of endogenous cannabinoid ligands and their allied receptors

WANG, EDITH H.; PhD, 1991, COLUMBIA UNIVERSITY; Regulation of genes that control cellular proliferation and differentiation

XIA, ZHENGUI; PhD, 1991, UNIVERSITY OF WASHINGTON; neuronal apoptosis, neuronal gene regulation

Research Associate Professor

COOK, DAVID G.; PhD, 1991, YALE UNIVERSITY; molecular mechanisms of Alzheimers disease
Assistant Professor
ZHENG, NING; PhD, 1997, UNIVERSITY OF TEXAS (SOUTHWESTERN); Protein X-ray crystallography

Research Assistant Professor
AMIEUX, PAUL S.; PhD, 1997, UNIVERSITY OF WASHINGTON; properties of spinal lism and energetics in vivo

Physiology and Biophysics

Professor
ALMERS, WOLFHARD; PhD, 1971, UNIVERSITY OF ROCHESTER; skeletal muscle physiology
ANDERSON, MARIORIE E; PhD, 1969, UNIVERSITY OF WASHINGTON; physiology of basal ganglia and thalamus; neural control of movement
BERGER, ALBERT J; PhD, 1967, PRINCETON UNIVERSITY; PhD, 1976, UNIVERSITY OF CALIFORNIA (SAN FRANCISCO); neural and chemical control of respiration, neurobiology, synaptic transmission
BINDER, MARC D; PhD, 1974, UNIVERSITY OF SOUTHERN CALIFORNIA; organization of spinal reflexes
BOTHWELL, MARK ALLEN; PhD, 1975, UNIVERSITY OF CALIFORNIA (BERKELEY); molecular and cellular physiology
BRENGELMANN, GEORGE L; PhD, 1967, UNIVERSITY OF WASHINGTON; temperature regulation, cutaneous blood flow
CARLSON, STEVEN S.; PhD, 1975, UNIVERSITY OF CALIFORNIA (BERKELEY); molecular and cellular physiology of synaptic transmission
CONLEY, KEVIN E; PhD, 1983, UNIVERSITY OF WISCONSIN; muscle metabolism and energetics in vivo
CRILL, WAYNE E; MD, 1962, UNIVERSITY OF WASHINGTON; properties of spinal and cortical neurons, mechanisms of repetitive firing of CNS neurons
DETWILER, PETER B; PhD, 1970, GEORGETOWN UNIVERSITY; physiology of photoreceptors

Assistant Professor
ZHENG, NING; PhD, 1997, UNIVERSITY OF TEXAS (SOUTHWESTERN); Protein X-ray crystallography

Research Assistant Professor
AMIEUX, PAUL S.; PhD, 1997, UNIVERSITY OF WASHINGTON; properties of spinal lism and energetics in vivo

Physiology and Biophysics

Professor
ALMERS, WOLFHARD; PhD, 1971, UNIVERSITY OF ROCHESTER; skeletal muscle physiology
ANDERSON, MARIORIE E; PhD, 1969, UNIVERSITY OF WASHINGTON; physiology of basal ganglia and thalamus; neural control of movement
BERGER, ALBERT J; PhD, 1967, PRINCETON UNIVERSITY; PhD, 1976, UNIVERSITY OF CALIFORNIA (SAN FRANCISCO); neural and chemical control of respiration, neurobiology, synaptic transmission
BINDER, MARC D; PhD, 1974, UNIVERSITY OF SOUTHERN CALIFORNIA; organization of spinal reflexes
BOTHWELL, MARK ALLEN; PhD, 1975, UNIVERSITY OF CALIFORNIA (BERKELEY); molecular and cellular physiology
BRENGELMANN, GEORGE L; PhD, 1967, UNIVERSITY OF WASHINGTON; temperature regulation, cutaneous blood flow
CARLSON, STEVEN S.; PhD, 1975, UNIVERSITY OF CALIFORNIA (BERKELEY); molecular and cellular physiology of synaptic transmission
CONLEY, KEVIN E; PhD, 1983, UNIVERSITY OF WISCONSIN; muscle metabolism and energetics in vivo
CRILL, WAYNE E; MD, 1962, UNIVERSITY OF WASHINGTON; properties of spinal and cortical neurons, mechanisms of repetitive firing of CNS neurons
DETWILER, PETER B; PhD, 1970, GEORGETOWN UNIVERSITY; physiology of photoreceptors

Assistant Professor
ZHENG, NING; PhD, 1997, UNIVERSITY OF TEXAS (SOUTHWESTERN); Protein X-ray crystallography

Research Assistant Professor
AMIEUX, PAUL S.; PhD, 1997, UNIVERSITY OF WASHINGTON; properties of spinal lism and energetics in vivo

Physiology and Biophysics

Professor
ALMERS, WOLFHARD; PhD, 1971, UNIVERSITY OF ROCHESTER; skeletal muscle physiology
ANDERSON, MARIORIE E; PhD, 1969, UNIVERSITY OF WASHINGTON; physiology of basal ganglia and thalamus; neural control of movement
BERGER, ALBERT J; PhD, 1967, PRINCETON UNIVERSITY; PhD, 1976, UNIVERSITY OF CALIFORNIA (SAN FRANCISCO); neural and chemical control of respiration, neurobiology, synaptic transmission
BINDER, MARC D; PhD, 1974, UNIVERSITY OF SOUTHERN CALIFORNIA; organization of spinal reflexes
BOTHWELL, MARK ALLEN; PhD, 1975, UNIVERSITY OF CALIFORNIA (BERKELEY); molecular and cellular physiology

DETWILER, PETER B; PhD, 1970, GEORGETOWN UNIVERSITY; physiology of photoreceptors
Research Associate Professor
LOGSDON, REBECCA G.; PhD, 1986, OKLAHOMA STATE UNIVERSITY; geriatric psychology, Alzheimer’s disease, caregiving
MCCURRY, SUSAN MELANCON; PhD, 1981, UNIVERSITY OF NEVADA; dementia, aging, older adults, depression, sleep, psychotherapy intervention research
MOE, KAREN E.; PhD, 1981, UNIVERSITY OF WASHINGTON; estrogen replacement therapy in women
RUSSO, JOAN E.; PhD, 1989, UNIVERSITY OF WASHINGTON; philosophy/psychology
WILKINSON, CHARLES W.; PhD, 1977, UNIVERSITY OF CALIFORNIA (SANTA BARBARA); physiological psychology.

Assistant Professor
BENNETT, WILLIAM M.; MD, 1992, UNIVERSITY OF BRITISH COLUMBIA (CANADA); Primary Care Psychiatry, Consolation-Liaison Psychiatry, Cross Cultural Psychiatry
HARRIS, VICTORIA L.; MD, 1989, UNIVERSITY OF BRITISH COLUMBIA (CANADA); subspecialty ABPN certification in forensic psychiatry
MELVILLE, JENNIFER L.; MD, 1995, UNIVERSITY OF CALIFORNIA (LOS ANGELES); MPH, 2001, UNIVERSITY OF WASHINGTON; Depression in Obstetrics and Gynecology
PASIC, JAGODA; PhD, 1990, UNIVERSITY OF LONDON:KING’S COLLEGE (UK); mood disorders, depression in medical conditions, depression in heart disease
RIMMELE, CARL T.; PhD, 1988, UNIVERSITY OF NEW MEXICO; clinical psychology
SAWCHUK, CRAIG NEIL; PhD, 1999, UNIVERSITY OF ARKANSAS; Adult anxiety disorders, medical fears, & health care service utilization in underserved populations
STORCK, MICHAEL G.; MD, 1980, MEDICAL COLLEGE OF OHIO; early and late adolescent development, clinical ethnography, integrative medicine, psychiatry

Research Assistant Professor
CHERRIER, MONIQUE M.; PhD, 1994, WASHINGTON STATE UNIVERSITY; Neuropsychology, Aging, Neuroendocrinology, Dementias

Instructor
CHEN, JIM C.; MD, 1991, HAHNEMANN MEDICAL COLLEGE; general adult, geriatric, and cross-cultural psychiatry
Radiation Oncology

Professor

AUSTIN-SEYMOUR, MARY M.; MD, 1978, UNIVERSITY OF CHICAGO; therapeutic radiology.
BLASKO, JOHN C; MD, 0, UNIVERSITY OF MARYLAND; therapeutic radiology.
CHO, PAUL S.; PhD, 1989, UNIVERSITY OF CALIFORNIA (LOS ANGELES); medical radiation physics.
GOODKIN, ROBERT; MD, 1964, CHICAGO MEDICAL SCHOOL; neurological surgery.
GROUDINE, MARK; PhD, 1976, UNIVERSITY OF PENNSYLVANIA; chromatin structure and gene activity.
KALET, IRA J.; PhD, 1968, PRINCETON UNIVERSITY; computer simulation of radiation therapy, artificial intelligence, computer graphics.
KOH, WUI-JIN; MD, 1984, LOMA LINDA UNIVERSITY; therapeutic radiology.
KROHN, KENNETH A; PhD, 1971, UNIVERSITY OF CALIFORNIA (DAVIS); chemistry, radiation oncology.
LARAMORE, GEORGE E; PhD, 1969, UNIVERSITY OF ILLINOIS; therapeutic radiology.
PCELTON, JAMES G; MD, 1981, UNIVERSITY OF NEBRASKA; therapeutic radiology.
RUSSELL, KENNETH J.; MD, 1979, HARVARD UNIVERSITY; therapeutic radiology.
WILBUR, D. SCOTT; PhD, 1978, UNIVERSITY OF CALIFORNIA (IRVINE); radiochemistry.

Associate Professor

RAJENDRAN, JOSEPH; MBBS, 1973, MADURAI UNIVERSITY (INDIA); MD, 1980, CHRISTIAN MEDICAL COLLEGE; nuclear medicine.
SCHWARTZ, JEFFREY L.; PhD, 1979, UNIVERSITY OF TEXAS (DALLAS); radiation biology.
WALLNER, KENT E; MD, 1981, OHIO STATE UNIVERSITY; therapeutic radiology.

Radiology

Professor

AYLWARD, ELIZABETH H.; PhD, 1982, CORNELL UNIVERSITY; structural and functional neuroimaging in neuropsychiatric disorders, developmental psychology.
BASSINGTHWAITE, JAMES; PhD, 1964, MAYO MEDICAL SCHOOL/GRADUATE SCHOOL; computer analysis of transport mechanisms in blood and tissues.
BEAUCHAMP, NORMAN J.; MD, 1990, MICHIGAN STATE UNIVERSITY; Acute stroke diagnosis using advanced imaging techniques to extend the treatment window for stroke.
BUSH, WILLIAM H; MD, 1967, OREGON HEALTH SCIENCES UNIVERSITY; genitourinary radiology.
CALKIN, STEPHEN R; MD, 1978, UNIVERSITY OF ROCHESTER; positron emission tomography imaging of myocardial oxygenation, metabolism and sympathetic function.
CTHREAD, CHARLES; MD, 1966, UNIVERSITY OF FLORIDA; nuclear medicine.
COHEN, WENDY; MD, 1975, HARVARD UNIVERSITY; neuroradiology.
CONLEY, KEVIN E; PhD, 1983, UNIVERSITY OF WISCONSIN; muscle metabolism and energetics in vivo.
DAGER, STEPHEN R; MD, 1978, UNIVERSITY OF NEBRASKA; application of functional brain imaging techniques to investigate neuropsychiatric disorders.
ERLY, JANET F; MD, 1980, MICHIGAN STATE UNIVERSITY; nuclear medicine.
EFFMANN, ERIC L.; MD, 1967, INDIANA UNIVERSITY; pediatric radiology.
ELLENBOGEN, RICHARD G.; MD, 1983, BROWN UNIVERSITY; Pediatric neurosurgery, neuro- oncology, complex spine.
FIGLEY, MELVIN M; MD, 1944, HARVARD UNIVERSITY; thoracic and pulmonary radiology.
FRENEY, PATRICK C; MD, 1968, UNIVERSITY OF OKLAHOMA; abdominal radiology, computed tomography.
GODWIN, J. DAVID; MD, 1971, STANFORD UNIVERSITY; pulmonary radiology.
GRAHAM, C BENJAMIN; MD, 1958, UNIVERSITY OF WASHINGTON; pediatric, neonatal radiology.
HARLEY, JOHN D; MD, 1966, WASHINGTON UNIVERSITY; general radiology and angiography.
HAYES, CECIL E.; PhD, 1973, HARVARD UNIVERSITY; physics, MRI.
HAYNO, DAVID R.; PhD, 1971, UNIVERSITY OF CALIFORNIA (BERKELEY); medical image processing and segmentation; image deformation; functional MRI; expression arrays.
HUNTER, JOHN C.; MD, 1970, UNIVERSITY OF ILLINOIS; musculoskeletal radiology, MRI.
JARVIK, JEFFREY G; MD, 1987, UNIVERSITY OF CALIFORNIA (SAN DIEGO); neuroradiology, outcomes research.
KIM, YONGMIN; PhD, 1982, UNIVERSITY OF WISCONSIN; computer architecture, imaging systems, medical imaging, computer graphics, multimedia, home health.
KROHN, KENNETH A; PhD, 1971, UNIVERSITY OF CALIFORNIA (DAVIS); chemistry, radiation oncology.
KUSHMERICK, MARTIN J.; PhD, 1966, UNIVERSITY OF PENNSYLVANIA; muscle contraction, magnetic resonance, metabolic imaging NMR spectroscopy.
LEHMANN, CONSTANCE D.; PhD, 1990, YALE UNIVERSITY; mammography, women’s breast imaging.
LEWELLEN, THOMAS; PhD, 1972, UNIVERSITY OF WASHINGTON; bioengineering, electrical engineering.
LIGHTENSTEIN, JOEL E.; MD, 1972, OHIO STATE UNIVERSITY; gastrointestinal radiology, computed tomography.
MOSS, ALBERT A.; MD, 1967, STATE UNIVERSITY OF NEW YORK (UPSTATE MED CT); gastrointestinal radiology, computed tomography.
NELP, WIL B; MD, 1955, JOHNS HOPKINS UNIVERSITY; nuclear medicine.
NELSON, JAMES A.; MD, 1965, HARVARD UNIVERSITY; diagnostic radiology with basic research in related sciences.
O’SULLIVAN, S. FINBARR; PhD, 1983, UNIVERSITY OF WISCONSIN; nonparametric curve estimation, inverse problems, radiology.
RICHARDS, TODD L; PhD, 1984, UNIVERSITY OF CALIFORNIA (BERKELEY); nuclear magnetic resonance imaging, spectroscopy of the brain in demyelinating diseases.
RICHARDSON, MICHAEL L.; MD, 1975, BAYLOR UNIVERSITY; bone and joint radiology and musculoskeletal radiology.
ROHRMANN JR, CHARLES A.; MD, 1966, UNIVERSITY OF WASHINGTON; gastrointestinal radiology.
SHAW, DENNIS; MD, 1983, UNIVERSITY OF WASHINGTON; neuroradiology, pediatric radiology.
SHUMAN, WILLIAM P; MD, 1973, STATE UNIV OF NEW YORK (UPSTATE MED CT); Body Computed Tomography, Body Magnetic Resonance Imaging, Administration of Academic Radiology Dept.
STERN, ERIC J.; MD, 1985, U OF MEDICINE & DENTISTRY OF NEW JERSEY; chest radiology.
STEWART, BRENT K.; PhD, 1988, UNIVERSITY OF CALIFORNIA (LOS ANGELES); biomedical physics, biomedical image processing, medical imaging, medical information systems.
TALNER, LEE B.; MD, 1963, YALE UNIVERSITY; genitourinary radiology.
WEINBERGER, EDWARD; MD, 1979, HARVARD UNIVERSITY; pediatric radiology.
Associate Professor

ANDREWS, ROBERT TORRANCE; MD, 1990, UNIVERSITY OF CALIFORNIA (SAN DIEGO); Vascular and interventional radiology; endovascular therapy

BREWER, DAVID K; MD, 1972, HARVARD UNIVERSITY; pediatric radiology, angiography, computed tomography

DALLEY, ROBERT W.; MD, 1982, UNIVERSITY OF CALIFORNIA (LOS ANGELES); nuclear medicine

DUGOWSON, CARIN E.; MD, 1976, UNIVERSITY OF ILLINOIS; MPH, 1986, UNIVERSITY OF WASHINGTON; nephrology

EUBANK, WILLIAM B.; MPH, 1986, TULANE UNIVERSITY; MD, 1986, TULANE UNIVERSITY; body MR and GU imaging

GILL, EDWARD A.; MD, 1984, UNIVERSITY OF WASHINGTON; cardiology

GLICKMAN, DAVID J.; MD, 1983, ALBANY MEDICAL COLLEGE; musculoskeletal radiology, orthopaedics

HOFER, ERIC K.; MD, 1984, UNIVERSITY OF CALIFORNIA (LOS ANGELES); minimally invasive therapy, stent grafts for aneurysms, uterine artery embolization, dialysis access

LANGER, STEVE G.; PhD, 1994, OAKLAND UNIVERSITY; medical physics

LEWIS, DAVID H.; MD, 1985, VIRGINIA COMMONWEALTH UNIVERSITY; nuclear medicine

LINK, JEANNE; PhD, 1998, UNIVERSITY OF WASHINGTON; radioanalytical chemistry

MAKI, JEFFREY H.; MD, 1991, DUKE UNIVERSITY; MRI

MARGLIN, STEPHEN I.; MD, 1968, YALE UNIVERSITY; chest and oncologic radiology

OTT, SUSAN M; MD, 1974, UNIVERSITY OF WASHINGTON; nephrology

PHILLIPS, LEON A.; MD, 1952, YALE UNIVERSITY; general radiology, uroradiology

RAJENDRAN, JOSEPH; MBBS, 1973, MADURAI UNIVERSITY (INDIA); MD, 1980, CHRISTIAN MEDICAL COLLEGE; nuclear medicine

ROSENBAUM, DAVID M; MD, 1977, ALBERT EINSTEIN COLLEGE OF MEDICINE; pediatric radiology

SCHULTE, SCOTT J.; MD, 1979, UNIVERSITY OF WASHINGTON; gastrointestinal radiology

SEZ, RAYMOND W.; MD, 1990, U OF MEDICINE & DENTISTRY OF NEW JERSEY; pediatrics

TAKASUGI, JULIE E.; MD, 1982, UNIVERSITY OF CALIFORNIA (LOS ANGELES); pulmonary radiology

VESSELLE, HUBERT J.; PhD, 1990, CASE WESTERN RESERVE UNIVERSITY; nuclear medicine

WISEMAN, ROBERT W.; PhD, 1988, FLORIDA STATE UNIVERSITY; cellular energetics, mr spectroscopy, mitochondria, kinetics, gene expression, metabolism

ZHANG, MIQIN; PhD, 1998, UNIVERSITY OF CALIFORNIA (BERKELEY); Biomaterials, tissue engineering, BioMEMs, bionanotechnology, surface modification, drug delivery.

Research Associate Professor

GARDNER, JILL C.; PhD, 1981, DALHOUSSIE UNIVERSITY (CANADA); computed image processing and analysis

Assistant Professor

BRITZ, GAVIN W; MBChir, 1987, UNIVERSITY OF WITWATERSRAND (S. AFRICA); Cerebral aneurysms and AVMs, Carotid disease, skull base tumors, cerebral vasospasm, BRONSTEIN, ANDREW D.; MD, 1984, HARVARD UNIVERSITY; neuroradiology.

Daly, Charles P.; MD, 1990, UNIVERSITY OF CALIFORNIA (SAN FRANCISCO); angiography and interventional radiology

GROSS, JOEL A.; MD, 1990, UNIVERSITY OF CALIFORNIA (DAVIS); Emergency & Trauma Radiology, Body Imaging, Computers in Medicine, Medical Education & Training

JOHNSON, JANET A.; MD, 0, UNIVERSITY OF HAWAII; musculoskeletal imaging, chest, GI, CT, ultrasound.

KANAL, KALPANA M.; PhD, 1996, UNIVERSITY OF TEXAS (HOUSTON); Medical Physics, X-rays, Mammography, Radiation Dosimetry and Radiation Safety

LALANI, TASNEEM A.; MS, 1990, HARVAR UNIVERSITY; MRI

MERCKER, JANIS M; MD, 1976, UNIVERSITY OF WASHINGTON; pediatric radiology

PALADIN, ANGELISA M.; MD, 1999, CHICAGO MEDICAL SCHOOL; pediatric radiology

SIDHU, MANRITA K.; MD, 1988, MEDICAL COLLEGE OF PENNSYLVANIA; pediatrics

Research Assistant Professor

ZHANG, SHANRONG; PhD, 1995, CHINESE ACADEMY OF SCIENCES (CHINA); MagneticResonanceImaging, MolecularImaging, LanthanideChemistry, ResponsiveContrastAgent, ShiftReagent
effects and medical applications of electromagnetic fields
HALAR, EUGEN M; MD, 1959, UNIVERSITY OF ZAGREB (YUGOSLAVIA); physiology
HAMMOND, MARGARET C; MD, 1979, MEDICAL COLLEGE OF WISCONSIN; medical consequences of longstanding spinal cord injury
HAYS, ROSS M; MD, 1978, UNIVERSITY OF WASHINGTON; pediatric rehabilitation, medical ethics, neuromuscular diseases, congenital defects
HILLEL, ALLEN D; MD, 1976, STANFORD UNIVERSITY; peripheral nerve physiology after injury, swallowing disorders in neuromuscular disease
JAFFE, KENNETH M; MD, 1975, HARVARD UNIVERSITY; pediatric rehabilitation, brain injury, neuromuscular diseases, congenital defects
JENSEN, MARK; PhD, 1989, ARIZONA STATE UNIVERSITY; assessment and treatment of chronic pain, coping with medical illness, treatment outcome
JOHNSON, KURT LEWIS; PhD, 1984, UNIVERSITY OF WISCONSIN; counseling psychology, psychological, social vocational aspects of disability and chronic illness
KRAFT, GEORGE HOWARD; MD, 1963, OHIO STATE UNIVERSITY; psychiatry
LEHMANN, JUSTUS F; DrMed, 1945, JOHANN WOLFGANG GOETHE UNIVERSITAT (GERMANY); psychiatry
LITTLE, JAMES WENDELL; PhD, 1976, UNIVERSITY OF CHICAGO; rehabilitation medicine, clinical neurophysiology, spinal cord injury
MASSAGLI, TERESA L.; MD, 1982, YALE UNIVERSITY; pediatric psychiatry
PATRICK, DONALD L.; PhD, 1972, COLUMBIA UNIVERSITY; health status and quality of life, end of life, adolescents
PATTERSON, DAVID R.; PhD, 1982, FLORIDA STATE UNIVERSITY; treatment of acute pain, psychology of burn patients, psychological outcome of physical trauma
ROBINSON, LAWRENCE R.; MD, 1982, BAYLOR UNIVERSITY; psychiatry
SHUMWAY-COOK, ANNE; PhD, 1983, UNIVERSITY OF OREGON; physiologic basis for balance problems following neurological injury
SLIMP, JEFFERSON C; PhD, 1976, UNIVERSITY OF WISCONSIN; clinical neurophysiology, intraoperative neuromonitoring, evoked potentials, deep-brain stimulation
STOLOV, WALTER C; MA, 1951, UNIVERSITY OF MINNESOTA; MD, 1956, UNIVERSITY OF MINNESOTA; psychiatry, electrodiagnostic medicine
TEMKIN, NANCY R; PhD, 1976, STATE UNIVERSITY OF NEW YORK (BUFFALO); clinical trials, recovery models, statistical modeling of epileptic phenomena, survival analysis.

Associate Professor
BERNI, ROSEMARIA; MN, 1973, UNIVERSITY OF WASHINGTON; rehabilitation nursing
BRITELL, CATHERINE WOLLEAT; MD, 1973, UNIVERSITY OF SOUTHERN CALIFORNIA; chronic pain in spinal cord injury and development of new assistive technology for the work place
BROCKWAY, JO A; PhD, 1975, UNIVERSITY OF IOWA; behavioral medicine, clinical psychology, psychological disability
BURNS, STEPHEN P.; MD, 1992, BROWN UNIVERSITY; medical complications and neurologic recovery in spinal cord injury, whiplash, sleep apnea
CHAN, LEIGHTON; MD, 1990, UNIVERSITY OF CALIFORNIA (LOS ANGELES); health service delivery related to Medicare patients
CHANG, MICHAEL WEI; PhD, 1982, UNIVERSITY OF WASHINGTON; biomedical simulation, ultrasonography, electrophysiology, biomechanics
DOCTOR, JASON N.; PhD, 1995, UNIVERSITY OF CALIFORNIA (SAN DIEGO); medical decision making, health economics, decision theory
DUDGEON, BRIAN J; PhD, 2000, UNIVERSITY OF WASHINGTON; occupational therapy, assistive technology, disability studies
EDIE, DAWN; PhD, 1992, UNIVERSITY OF NORTH DAKOTA; chronic pain secondary to disability, psychological distress following disability
FANN, JESSE R.; MD, 1989, NORTHWESTERN UNIVERSITY; MPH, 1995, UNIVERSITY OF WASHINGTON; neuropsychiatry, psycho-oncology, epidemiology, health services research, depression, delirium
GOLDBERG, MYRON; PhD, 1980, UNIVERSITY OF MICHIGAN (FLORIDA); neuropsychology, rehabilitation psychology, and neurologic rehabilitation
GUTHRIE, MARK R.; PhD, 1990, UNIVERSITY OF WASHINGTON; functional assessment, physical therapy efficacy
HASELKORN, JODIE K.; MD, 1985, LOUISIANA STATE UNIVERSITY; health services for the disabled; diagnostic accuracy of tests, effectiveness of interventions
JAMES, JENNIFER J.; MD, 1994, UNIVERSITY OF VERMONT; spine, sports, and musculoskeletal medicine and rehabilitation
KANNY, ELIZABETH M; PhD, 1996, UNIVERSITY OF WASHINGTON; education of allied health practitioners; ethical reasoning and ethics education
KARTIN, DEBORAH; PhD, 1996, UNIVERSITY OF WASHINGTON; developmental disabilities, prenatal drug exposure, high-risk infancy, postural development
MC MILLAN, JO ANN; MSEd, 1968, UNIVERSITY OF SOUTHERN CALIFORNIA; physical therapy.
MILLER, ROBERT M; PhD, 1976, UNIVERSITY OF WASHINGTON; speech, language pathology, adults, swallowing
ODDERSON, IB R.; PhD, 1978, INDIANA UNIVERSITY; physiatry, stroke, multiple sclerosis, spasticity, botulinum toxin
PEPPING, MARY; PhD, 1981, WASHINGTON STATE UNIVERSITY; psychosocial outcome after TBI and mild TBI; neuropsychological features of dementia and mild TBI
RODRIQUEZ, ARTHUR A.; MD, 1972, UNIVERSITY OF WISCONSIN; musculoskeletal pain disorders and clinical neurophysiology
STIENS, STEVE A.; MD, 1986, UNIVERSITY OF CINCINNATI, MS, 1991, UNIVERSITY OF WASHINGTON; Spinal cord injury medicine, rehabilitation, neurogenic bowel care, spinal cord neuroplasticity

Assistant Professor
DOWDEN, PATRICIA; PhD, 1993, UNIVERSITY OF WASHINGTON; augmentative communication, cleft palate
GREENBERG, SHARON L; MOT, 1978, UNIVERSITY OF WASHINGTON; occupational therapy
HARNISS, MARK; PhD, 1996, UNIVERSITY OF OREGON; Using technology to improve the education of diverse learners.
HOFFMAN, JEANNE MARIE; PhD, 2000, ARIZONA STATE UNIVERSITY; Rehabilitation Psychology
POWELL, JANET M.; PhD, 2001, UNIVERSITY OF WASHINGTON; vision, perception, and cognition following brain injury; rehabilitation outcomes
QUESTAD, KENT A; PhD, 1982, UNIVERSITY OF WISCONSIN; rehabilitation counseling, psychology.
SHERMAN, JEFFREY J.; PhD, 1998, UNIVERSITY OF KENTUCKY; Etiology, maintenance and treatment of chronic pain Posttraumatic stress disorder
WEISS, MICHAEL D.; MD, 1991, ALBERT EINSTEIN COLLEGE OF MEDICINE; EMG, EEG neuropathology and neuromuscular disorders
WILLIAMS, RHONDA M.; PhD, 1992, ARIZONA STATE UNIVERSITY; multiple sclerosis, amputation, brain injury, social support, adjustment, group-based interventions

Lecturer
ABRAMHAMSON, DANIEL C.; BS, 1998, UNIVERSITY OF WASHINGTON;
Prosthetics design for transfemoral amputees
DRALE, ALAN J; BS, 1968, UNIVERSITY OF WASHINGTON; prosthetics and orthotics

HERTLING, DARLENE; BS, 1956, UNIVERSITY OF CALIFORNIA (BERKELEY); physical therapy and manual therapy techniques

OKUMURA, RAMONA M.; BS, 1981, UNIVERSITY OF WASHINGTON; pediatric limb deficiency, upper extremity prosthetics, prosthetic biomechanics

WILLIAMS, MARCIA FRANCES; PhD, 2000, UNIVERSITY OF WASHINGTON; physical therapy

YAMANE, ANN; BS, 1976, UNIVERSITY OF ARIZONA; orthotics and prosthetics

HEIMBACH, DAVID M; MD, 1964, CORNELL UNIVERSITY; burn and general surgery

HERMAN, CLIFFORD M; MD, 1959, UNIVERSITY OF VERMONT; general surgery

ISIK, F. FRANK; MD, 1985, MT SINAI SCHOOL OF MEDICINE; plastic surgery/control of angiogenesis

JOHANSEN, KAJ H; PhD, 1977, UNIVERSITY OF CALIFORNIA (SAN DIEGO); general and vascular surgery

JONES, ROBERT F; MD, 1952, UNIVERSITY OF TEXAS (SOUTHWESTERN); oncology and general surgery

JURKOVICH, GREGORY J.; MD, 1978, UNIVERSITY OF MINNESOTA; general surgery

KOHLER, TED R; MD, 1976, HARVARD UNIVERSITY; general and vascular surgery

MAIER, RONALD V; MD, 1973, DUKE UNIVERSITY; general surgery, trauma-critical care surgery

MERENDINO, K ALVIN; PhD, 1946, UNIVERSITY OF MINNESOTA; general surgery and oncology

MOE, ROGER E; MD, 1959, UNIVERSITY OF WASHINGTON; oncology and general surgery

PATTERSON, DAVID R.; PhD, 1982, FLORIDA STATE UNIVERSITY; treatment of acute pain, psychology of burn patients, psychological outcome of physical trauma

PELLERGRINI, CARLOS A.; MD, 1971, UNIV OF ROSARIO MED SCHOOL (ARGENTINA); general and laparoscopic surgery

PERKINS, JAMES D.; MD, 1979, UNIVERSITY OF ARKANSAS; transplant surgery

SAYAVA, RICHARD M.; MD, 1968, HAHNEMANN MEDICAL COLLEGE; MS, 1972, MAYO MEDICAL SCHOOL/GRADUATE SCHOOL; Gastrointestinal surgery, robotics, surgical education, training and simulation, virtual reality

SINANAN, MIKA N.; PhD, 1986, UNIVERSITY OF BRITISH COLUMBIA (CANADA); Surgical education, biorobotic surgical instrument development, and clinical procedure development

TRUMBLE, THOMAS E.; MD, 1979, YALE UNIVERSITY; orthopaedics, hand and microsurgery

VEDDER, NICHOLAS; MD, 1981, CASE WESTERN RESERVE UNIVERSITY; case history, plastic and reconstructive surgery

WALDHAUSEN, JOHN H.; MD, 1986, PENNSYLVANIA STATE UNIVERSITY; pediatric surgery

WINN, ROBERT K.; PhD, 1974, UNIVERSITY OF WASHINGTON; prosthetics and reconstructive surgery

YAMANE, ANN; BS, 1976, UNIVERSITY OF ARIZONA; orthotics and prosthetics

School of Nursing

Professor

BARNARD, KATHRYN E; PhD, 1972, UNIVERSITY OF WASHINGTON; ecological factors of child development

BATEY, MARJORIE V; PhD, 1968, UNIVERSITY OF COLORADO (BOULDER); sociological factors in health-care systems

BERKOWITZ, BOBBIE; PhD, 1990, CASE WESTERN RESERVE UNIVERSITY; administration, leadership and policy development within public health and nursing

BERRY, DONNA L.; PhD, 1992, UNIVERSITY OF WASHINGTON; health care of persons with, and at risk for, cancer

BLACKBURN, SUSAN T; PhD, 1979, UNIVERSITY OF WASHINGTON; high-risk infants and their families, infant care-giving interactions and environments

BOND, ELEANOR; PhD, 1985, UNIVERSITY OF WASHINGTON; acute care and critical care nursing, gut motility, effect of ovarian hormones on GI tract, stress

BOOTH-LAFORCE, CATHRYN L; PhD, 1974, OHIO STATE UNIVERSITY; mother-infant interaction, observational methodology, child birth experiences and attachment

BRANDT, PATRICIA; PhD, 1981, UNIVERSITY OF WASHINGTON; influence of family functioning on early child development

BROWN, MARIE ANNETTE; PhD, 1983, UNIVERSITY OF WASHINGTON; women's health, depression, mood disorders, lifestyle changes, exercise, and loss/grief/dying

BUDZYNSKI, HELEN KOGAN; PhD, 1968, UNIVERSITY OF CALIFORNIA (LOS ANGELES); stress response: cognitive/physiologic interface in chronic dysfunction, self-management teaching

BUTTERFIELD, PATRICIA G.; PhD, 1992, OREGON HEALTH SCIENCES UNIVERSITY; occupational & environmental health, public health nursing leadership

CHRISMAN, NOEL J; PhD, 1966, UNIVERSITY OF CALIFORNIA (BERKELEY); health beliefs and practices, social networks and social support; clinically applied anthropology

COWAN, MARIE J; PhD, 1979, UNIVERSITY OF WASHINGTON; estimation of infant size by electrocardiography, sudden cardiac death, physiological nursing

CRAVEN, RUTH F; MN, 1968, UNIVERSITY OF WASHINGTON; Edd, 1984, SEATTLE UNIVERSITY; gerontological nursing

CUNNINGHAM, SUSANNA L; PhD, 1978, UNIVERSITY OF WASHINGTON; risk factors for atherosclerotic cardiovascular disease

CURTIS, JARED R.; MD, 1988, JOHNS HOPKINS UNIVERSITY; MPH, 1994, UNIVERSITY OF WASHINGTON; pulmonary diseases and critical care medicine

DE TORNAY, RHEBA; EdD, 1967, STANFORD UNIVERSITY; health services, nursing education

DIMOND, MARGARET; PhD, 1978, UNIVERSITY OF WISCONSIN; aging, bereavement, family caregiving, Alzheimer's disease, chronic illness, long-term care

EGGERT, LEONA; PhD, 1984, UNIVERSITY OF WASHINGTON; adolescents, drug use, suicide, communication, personal relationships

EYRES, SANDRA J; PhD, 1972, UNIVERSITY OF NORTH CAROLINA; environmental resources promoting adaptation and health

GALLucci, BETTY J; PhD, 1973, NORTH CAROLINA STATE UNIVERSITY; oncology, nutritional assessment, pathophysiology of stomatitis, and graft versus host disease

GRAHAM, KATHERINE YOUNG; PhD, 1978, UNIVERSITY OF WASHINGTON; family adaptation; quality of life in wellness and illness; professional commitment

HABERMAN, MEL R; PhD, 1987, UNIVERSITY OF WASHINGTON; quality of life of cancer survivors, impact of breast cancer on family

HEGYVARY, SUE T.; PhD, 1974, VANDERBILT UNIVERSITY; administration and productivity of health care and nursing services

HEITKEMPER, MARGARET M; PhD, 1981, UNIVERSITY OF ILLINOIS; gastroenterology, enteral nutrition, gerontology

HORN, BARBARA J; PhD, 1971, UNIVERSITY OF MICHIGAN; effective organization of nursing resources

KIECKHEFER, GAIL M.; PhD, 1985, UNIVERSITY OF WASHINGTON; motivation for health promotional and illness management behavior in children

KILLIEN, MARCIA G; PhD, 1982, UNIVERSITY OF WASHINGTON; women's health, reproductive decision making, work and family

KODAdek, SHEILA M.; PhD, 1985, UNIVERSITY OF ILLINOIS; population-based nursing

LANDIS, CAROL A.; MS, 1973, UNIVERSITY OF CALIFORNIA (SAN FRANCISCO); DNS, 1988, UNIVERSITY OF CALIFORNIA (SAN FRANCISCO); health consequences of sleep loss, neuroendocrinimmune interactions, methods of inquiry

LEWIS, FRANCES M; PhD, 1977, STANFORD UNIVERSITY; complex organizational analysis, evaluation research, psychosocial factors in chronic illness

MAGYARY, DIANE L; PhD, 1981, UNIVERSITY OF WASHINGTON; family centered health care of children at risk, disabled or handicapped

MITCHELL, PAMELA H; PhD, 1991, UNIVERSITY OF WASHINGTON; neuroscience nursing, diagnostic strategies

MURPHY, SHIRLEY ANN; PhD, 1981, PORTLAND STATE UNIVERSITY; addictive processes in women, coping with undesirable life events

OSBORNE, OLIVER H; PhD, 1968, MICHIGAN STATE UNIVERSITY; ideology, policy and health-care systems, cross-cultural health, mental health, nursing

PATRICK, MAXINE L; DPH, 1970, UNIVERSITY OF CALIFORNIA (LOS ANGELES); gerontology, geriatrics

PRICE SPRATLEN, LOIS; PhD, 1976, UNIVERSITY OF WASHINGTON; sexual harassment and perceived workplace mistreatment in higher education

SALAZAR, MARY K; PhD, 1991, SEATTLE UNIVERSITY; behavioral theory applied to health education, occupational health, program evaluation

SIANTIz, MARY LOU; PhD, 1984, UNIVERSITY OF MARYLAND; child/adolescent psychiatric nursing, risk and adaptation among migrant children and families

SPIEKER, SUSAN J; PhD, 1982, CORNELL UNIVERSITY; developmental psychology, infant security, mother-infant interaction

SWANSON, KRISTEN M.; PhD, 1983, UNIVERSITY OF COLORADO (BOULDER); caring therapeutics, responses to miscarriage, women’s health, loss, bereavement.

TERI, LINDA; PhD, 1980, UNIVERSITY OF VERMONT; controlled clinical trials of caregiving training for patients with Alzheimer's disease

THOMAS, KAREN A; PhD, 1986, UNIVERSITY OF WASHINGTON; preterm infant development, care unit environments, acute care pediatrics, thermoregulation

THOMPSON, FRANCES ELAINE A; PhD, 1990, UNIVERSITY OF WASHINGTON; attribution theory, adolescent drug use, suicide

VITIELLO, MICHAEL V; PhD, 1980, UNIVERSITY OF WASHINGTON; Sleep, sleep disorders, circadian rhythms, aging, behavioral medicine

WHITNEY, JOANNE D.; PhD, 1991, UNIVERSITY OF CALIFORNIA (SAN FRANCISCO); wound healing

WILKIE, DIANA J.; PhD, 1990, UNIVERSITY OF CALIFORNIA (SAN FRANCISCO); cancer pain assessment and management, pain research
WOLF-WILETS, VIVIAN; PhD, 1969, UNIVERSITY OF CHICAGO; curriculum development, instruction, stress management
WOOODS, NANCY; PhD, 1978, UNIVERSITY OF NORTH CAROLINA; women's health
WOODS, SUSAN L; PhD, 1991, OREGON HEALTH SCIENCES UNIVERSITY; cardiovascular clinical specialist, pulmonary artery catheter measurement

Research Professor
BEATON, RANDAL D; PhD, 1972, UNIVERSITY OF WASHINGTON; assessment and treatment of temporomandibular joint pain and dysfunction
KELLY, JEAN F.; PhD, 1979, UNIVERSITY OF WASHINGTON; family factors that affect at-risk children
LENTZ, MARTHA J; PhD, 1984, UNIVERSITY OF WASHINGTON; physiological adaption: the influence of sleep and other biological rhythms

Associate Professor
ALTMAN, GAYLENE M; PhD, 1992, UNIVERSITY OF WASHINGTON; women's health and inflammation; pain and endometriosis
BELZA, BASIA; PhD, 1991, UNIVERSITY OF CALIFORNIA (SAN FRANCISCO); chronic illness, gerontology, fatigue prevention and management in rheumatic diseases
BETRUS, PATRICIA; PhD, 1985, UNIVERSITY OF WASHINGTON; women and depression, epigenesis of emotions, mental health, stress, violence quantitative analysis
BEVENS, STELLA H.; MA, 1951, UNIVERSITY OF MINNESOTA; physiological nursing
BlaINEY, CAROL; MN, 1967, UNIVERSITY OF WASHINGTON; clinical teaching and problems of patients with diabetes mellitus
BRANDT, EDNA M; MN, 1953, UNIVERSITY OF WASHINGTON; physiological nursing
CARR, CATHERINE A.; PhD, 1993, UNIVERSITY OF MICHIGAN; factors the affect provider practice and clinical outcomes of midwifery care
COCHRANE, BARBARA B.; PhD, 1992, UNIVERSITY OF WASHINGTON; women's health; individual adaptations to health and illness, clinical therapeutics
ENSIGN, B. JOSEPHINE; MS, 1986, VIRGINIA COLLEGE OF MEDICINE; MPH, 1992, JOHNS HOPKINS UNIVERSITY; DPH, 1994, JOHNS HOPKINS UNIVERSITY; health care program planning and evaluation for marginalized populations and high-risk youth
ESTES, NADA; MS, 1958, UNIVERSITY OF COLORADO (BOULDER); counseling people with substance-use disorder, depression
FLAGLER, SUSAN B; DNS, 1981, UNIVERSITY OF CALIFORNIA (SAN FRANCISCO); maternal role adjustment and early parent-infant interaction
HOFFMAN, AGNES; PhD, 1977, UNIVERSITY OF KANSAS; substance use disorders, mental health care of the elderly
HORN, BEVERLY M; PhD, 1975, UNIVERSITY OF WASHINGTON; cross-cultural research in maternal-child nursing
HUEBNER, COLLEEN ELLEN; PhD, 1991, UNIVERSITY OF WASHINGTON; the social bases of developmental problems in early childhood
JARRETT, MONICA E; PhD, 1988, UNIVERSITY OF WASHINGTON; psychobiology of women
JORDAN, PAMELA L.; PhD, 1984, UNIVERSITY OF MICHIGAN; expectant/ new fatherhood, transition to parenthood
KANG, REBECCA R.; PhD, 1985, UNIVERSITY OF WASHINGTON; environment of at-risk infants and families, Asian and Pacific Islander health
LEPPA, CAROL J.; PhD, 1990, UNIVERSITY OF ILLINOIS; Ethics and comparative health care systems, palliative care approaches to end of life care, chronic LEWIS, LINDA L.; PhD, 1987, UNIVERSITY OF ILLINOIS; reproductive neuroendocrinology mood changes related to the human menstrual cycle
LINDENBERG, CATHERINE S; DPH, 1985, JOHNS HOPKINS UNIVERSITY; public health management and policy
LYDON-ROCHELLE, MONA; PhD, 1999, UNIVERSITY OF WASHINGTON; applied epidemiology in maternal health
MEYER, KERRY E.; PhD, 1990, UNIVERSITY OF MARYLAND; Health informatics, expert systems in support of clinical decision making, and geriatrics
MITCHELL, ELLEN S.; PhD, 1986, UNIVERSITY OF WASHINGTON; women's health; menstrual cycle symptom experience, food cravings and eating control
MOTZER, SANDRA ADAMS; PhD, 1992, OREGON HEALTH SCIENCES UNIVERSITY; NK cell function in women with chronic health disturbance (i.e., irritable bowel syndrom)
MUNET-VILARO, FRANCES; PhD, 1984, UNIVERSITY OF WASHINGTON; Coping of Latinos with a family member with cancer and/or AIDS.
O'CONNOR, FREDERICA W.; PhD, 1986, NORTHWESTERN UNIVERSITY; public sector mental health treatment provision, interventions promoting desired life quality
OLI SHANSKY, ELLEN F.; DNS, 1985, UNIVERSITY OF CALIFORNIA (SAN FRANCISCO); psychosocial implications of infertility related to the family, qualitative research, depression
SCHANNON, SARAH E; PhD, 1992, UNIVERSITY OF WASHINGTON; clinical ethics; decision-making surrounding use of life-sustaining therapies
SIMPSON, TERRI A.; PhD, 1988, UNIVERSITY OF WASHINGTON; critical care patients' physiological and psychological responses to environmental stressors
SPIZTER, ADA; PhD, 1990, UNIVERSITY OF WASHINGTON; migration, cross-cultural nursing, stress and coping of children with illness, nursing scholarship
WHITE-TRAUT, ROSEMARY; DSc, 1983, RUSH UNIVERSITY; preterm infant physiological and behavioral responsiveness to multimodal stimulation by caregivers
YOUNG, HEATHER M.; PhD, 1991, UNIVERSITY OF WASHINGTON; community based health care service for older adults
ZIERLER, BRENDA; PhD, 1996, UNIVERSITY OF WASHINGTON; research in patient with venous thromboembolism; clinical outcomes, process outcomes

Research Associate Professor
BURR, ROBERT L; PhD, 1986, UNIVERSITY OF WASHINGTON; cardiovascular/psychophysiology, autonomic nervous system
DOUGHERTY, CYNTHIA M.; PhD, 1990, UNIVERSITY OF WASHINGTON; cardiovascular disease, sudden cardiac death, nursing interventions, cardiovascular risk modification
HERTING, JERALD R.; PhD, 1987, UNIVERSITY OF WASHINGTON; research methodology and at-risk youth
JOHNSON, LEONARD CLARK; PhD, 1978, UNIVERSITY OF WASHINGTON; applied research methods including development in applied statistics, assessment, and analysis
LOGSDON, REBECCA G.; PhD, 1986, OKLAHOMA STATE UNIVERSITY;
geriatric psychology, Alzheimer’s disease, caregiving
LOVELL, DAVID GILBERT; MSW, 1993, UNIVERSITY OF WASHINGTON; criminal justice policy and treatment of mentally ill offenders.
MCCURRY, SUSAN MELANCON; PhD, 1991, UNIVERSITY OF NEVADA; dementia, aging, older adults, depression, sleep, psychotherapy intervention research
MCGRATH, BARBARA B.; PhD, 1993, UNIVERSITY OF WASHINGTON; ethnographic studies with U.S. Pacific Islanders on health issues, specifically, HIV/AIDS prevention
RANDELL, BROOKE P.; MN, 1969, UNIVERSITY OF CALIFORNIA (LOS ANGELES); DNursSci, 1987, UNIVERSITY OF CALIFORNIA (SAN FRANCISCO); preventive community-based interventions with high-risk adolescents and their families.

Assistant Professor
BAKER, MARGARET W; PhD, 2000, UNIVERSITY OF WASHINGTON; Independence and older Americans; elder mistreatment
DRAYE, MARY A.; MPH, 1968, UNIVERSITY OF MICHIGAN; primary health care, health promotion, risk appraisal, coping with infertility
KENNEDY, MICHAEL; PhD, 1994, UNIVERSITY OF WASHINGTON; symptom self-management, clinical nursing research
KOZUKI, YORIKO; PhD, 1999, UNIVERSITY OF CALIFORNIA (SAN FRANCISCO); adherence to psychotropic medications in populations with schizophrenia spectrum disorders
KURTH, ANN E.; PhD, 2003, UNIVERSITY OF WASHINGTON; sexually transmitted infection screening & prevention; clinical epidemiology; applied informatics
LARSON, MARGARET L; MN, 1967, UNIVERSITY OF WASHINGTON; cross-cultural variables in mental illness, nursing interventions in disturbed behaviors
MACLAREN LORANGER, AILEEN; PhD, 1998, JOHNS HOPKINS UNIVERSITY; nurse midwifery
NGUYEN, HUONG Q; PhD, 2003, UNIVERSITY OF CALIFORNIA (SAN FRANCISCO); Self-management, chronic illness, Internet, interactive technology
OSHIO, SACHIKO; PhD, 1992, UNIVERSITY OF WASHINGTON; Nurse-Midwifery, Mother-Infant Relationship Development, Mental Representation of Relationship
OYLER, MEL R.; PhD, 1997, UNIVERSITY OF WASHINGTON; database systems, technology strategy, commercial applications of information science
PRICE, MARTHA J.; DNS, 1988, UNIVERSITY OF CALIFORNIA (SAN FRANCISCO); self-management in chronic illness, diabetes mellitus, qualitative research methodologies
RICE, STEPHEN G; PhD, 1974, NEW YORK UNIVERSITY; sports medicine
SALES, ANNE; PhD, 1998, UNIVERSITY OF MINNESOTA; patient and organizational outcomes, health care work force, health economics
SOLCHAN, JOANNE E.; PhD, 2000, UNIVERSITY OF WASHINGTON; relationships between children and their primary caregivers
TYSON, SHERYL; PhD, 2002, UNIVERSITY OF CALIFORNIA (LOS ANGELES); Intimate Partner Violence Against Women
WALSH, ELAINE M.; PhD, 1999, UNIVERSITY OF WASHINGTON; Prevention of suicide and drug abuse among adolescents and young adults
WILD, LORIE M; PhD, 1996, UNIVERSITY OF WASHINGTON; clinical pain management

Research Assistant Professor
ARCHBOLD, KRISTEN H; PhD, 2001, UNIVERSITY OF MICHIGAN; Sleep and cognitive executive dysfunction
BOND, GAIL E; PhD, 1995, UNIVERSITY OF WASHINGTON; aging, memory, substance-use disorders, long-term care
CARRERE, SYBIL; PhD, 1990, UNIVERSITY OF CALIFORNIA (IRVINE); interface between family relationships, stress, and health

Lecturer
ACKER, MICHELE; MN, 1995, ARIZONA STATE UNIVERSITY; promoting good health for children, educating teens about healthy lifestyles-making positive choices
CHRISTIANSON, PHYLLIS L.; MN, 1990, UNIVERSITY OF WASHINGTON; gerontology
CORNMAN, BARBARA J; PhD, 1988, UNIVERSITY OF WASHINGTON; sexual assault victims, kinetic family drawings, family having child with cancer
HOYLE, CHRISTINE A; MN, 1979, UNIVERSITY OF WASHINGTON; primary health care
PIPES, PEGGY L; MA, 1952, COLUMBIA UNIVERSITY; MPH, 1966, UNIVERSITY OF MICHIGAN; maternal and child nutrition
WELTON, WILLIAM E.; MHA, 1972, UNIVERSITY OF MICHIGAN; DPH, 1999, UNIVERSITY OF MICHIGAN; strategic and organizational effectiveness of health systems

Instructor
AKER, SAUNDRA; BS, 1961, UNIVERSITY OF UTAH; medically optimal nutrition support for immunocompromised patients
TYLER, MARTHA L; MN, 1977, UNIVERSITY OF WASHINGTON; oxygenation during chest physiotherapy, suctioning, dyspnea, breathing patterns in disease
WILKINSON, KAREN; MN, 1990, UNIVERSITY OF WASHINGTON; pediatric nursing
Aquatic and Fishery Sciences

Professor
ARMSTRONG, DAVID A.; PhD, 1978, UNIVERSITY OF CALIFORNIA (DAVIS); crustean ecology and fisheries, estuarine habitat protection, impacts on dredging, pesticides
BOLTON, SUSAN M; PhD, 1991, NEW MEXICO STATE UNIVERSITY; hydrology, watershed management, stream restoration, ecological engineering
BURGNER, ROBERT L; PhD, 1958, UNIVERSITY OF WASHINGTON; salmon ecology and salmon biology.
CHEW, KENNETH K; PhD, 1962, UNIVERSITY OF CALIFORNIA (BERKELEY); fish physiology, endocrinology, aquaculture
ERICKSON, ALBERT; PhD, 1964, MICHIGAN STATE UNIVERSITY; wildlife biology and marine mammals
FRANCIS, ROBERT C; PhD, 1970, UNIVERSITY OF WASHINGTON; fisheries management, marine ecosystem dynamics, fisheries oceanography and global climate change
GALLUCCI, VINCENT; PhD, 1971, NORTH CAROLINA STATE UNIVERSITY; stock assessment, fisheries management
GUNDERSON, DONALD R; PhD, 1975, UNIVERSITY OF WASHINGTON; marine fisheries, stock assessment and recruitment processes
HALVER, JOHN E; PhD, 1953, UNIVERSITY OF WASHINGTON; fundamental fish nutrition, physiology and metabolism, nutrients balance in field formulations
HILBORN, RAY; PhD, 1974, UNIVERSITY OF BRITISH COLUMBIA (CANADA); stock assessment, population dynamics, fisheries policy
HUPPERT, DANIEL D.; PhD, 1975, UNIVERSITY OF WASHINGTON; economics and management of natural resources, especially marine fisheries
KARR, JAMES; PhD, 1970, UNIVERSITY OF ILLINOIS; stream and watershed ecology, tropical forest ecology, conservation biology, environmental policy
KOCAN, RICHARD M; PhD, 1967, MICHIGAN STATE UNIVERSITY; aquatic toxicology, fish toxicology, fish and wildlife diseases
LESCHINE, THOMAS M; PhD, 1975, UNIVERSITY OF PITTSBURGH; marine pollution management, ocean policy studies
LISTON, JOHN; PhD, 1955, UNIVERSITY OF ABERDEEN (UK); food science, marine microbiology
MATHews, STEPHEN B; PhD, 1967, UNIVERSITY OF WASHINGTON; quantitative fishery management
MILES, EDWARD L; PhD, 1965, UNIVERSITY OF DENVER; international law and organization; science, technology, and international relations; marine policy
MILLER, BRUCE S; PhD, 1969, UNIVERSITY OF WASHINGTON; life history and ecology of marine fishes, especially early life history
MILLER, MARC; PhD, 1974, UNIVERSITY OF CALIFORNIA (IRVINE); maritime anthropology, cognitive anthropology and social/cultural change
NAUMAN, ROBERT J; PhD, 1974, ARIZONA STATE UNIVERSITY; forest stream ecosystems, aquatic landscape dynamics
PIETSch, THEOdORE W; PhD, 1973, UNIVERSITY OF SOUTHERN CALIFORNIA; systematic ichthyology, zoogeography, behavior, functional morphology, biotic survey
PIGOTT, GEORGE M; PhD, 1963, UNIVERSITY OF WASHINGTON; food engineering
QUINN, THOMAS P; PhD, 1981, UNIVERSITY OF WASHINGTON; fish behavior, ecology and evolution
SKALSKI, JOHN R.; PhD, 1985, CORNELL UNIVERSITY; population estimation, environmental statistics and sampling, effects assessment
SMITH, LYNWOOD S; PhD, 1962, UNIVERSITY OF WASHINGTON; fish physiology
TAUB, FRIEDA B; PhD, 1959, RUTGERS UNIVERSITY; ecology
UTTER, FRED M; PhD, 1969, UNIVERSITY OF CALIFORNIA (DAVIS); Applied population genetics using molecular markers.
WISSMAR, ROBERT C; PhD, 1972, UNIVERSITY OF IDAHO; freshwater ecosystems, fish ecology, and trophic dynamics; river restoration
WOOSTER, WARREN S; PhD, 1953, UNIVERSITY OF CALIFORNIA (SAN DIEGO); effects of climate change on marine ecosystems, use of scientific information in marine management

Research Professor
ANDERSON, JAMES J; PhD, 1977, UNIVERSITY OF WASHINGTON; biomathematics, ecology, fisheries, oceanography, toxicology, fish protection at power plants

Associate Professor
BEAUCHAMP, DAVID A.; PhD, 1987, UNIVERSITY OF WASHINGTON; aquatic community ecology, bioenergetics, food web modeling, predator-prey interactions, behavior
GRUE, CHRISTIAN E; PhD, 1977, TEXAS A&M UNIVERSITY; wildlife toxicology, wildlife science
PARRISH, JULIA; PhD, 1988, DUKE UNIVERSITY; animal aggregation, fish schooling, seabirds, marine conservation, by catch
SCHINDLER, DANIEL E.; PhD, 1995, UNIVERSITY OF WISCONSIN; ecosystem and community ecology - especially of aquatic systems.
VANBLARICOM, GLENN R.; PhD, 1978, UNIVERSITY OF CALIFORNIA (SAN DIEGO); marine wildlife, community ecology

Research Associate Professor
HERWIG, RUSSELL P; PhD, 1989, UNIVERSITY OF WASHINGTON; environmental and applied aquatic microbiology, bioremediation-related microbiology

Assistant Professor
ESSINGTON, TIMOTHY E.; PhD, 1999, UNIVERSITY OF WISCONSIN; Fish and fisheries in marine food webs

Marine Affairs

Professor
ALVERSON, DAYTON L; PhD, 1967, UNIVERSITY OF WASHINGTON; marine affairs
ARON, WILLIAM I; PhD, 1960, UNIVERSITY OF WASHINGTON; management of living marine resources
CRUTCHFIELD, JAMES A; PhD, 1954, UNIVERSITY OF CALIFORNIA (BERKELEY); natural resources economics, policy and management, especially marine and environmental resources
HERSHMAN, MARC; JD, 1967, TEMPLE UNIVERSITY; LL.M. 1970, UNIVERSITY OF MIAMI (FLORIDA); coastal zone management law
LESCHINE, THOMAS M; PhD, 1975, UNIVERSITY OF PITTSBURGH; marine pollution management, ocean policy studies
MILES, EDWARD L; PhD, 1965, UNIVERSITY OF DENVER; international law and organization; science, technology, and international relations; marine policy
WOOSTER, WARREN S; PhD, 1953, UNIVERSITY OF CALIFORNIA (SAN DIEGO); effects of climate change on
marine ecosystems, use of scientific information in marine management

**Associate Professor**

CANNING, DOUGLAS J; MS, 1987, EVERGREEN STATE COLLEGE; coastal zone management, public trust doctrine, global climate change and sea level rise

COPPING, ANDREA; PhD, 1982, UNIVERSITY OF WASHINGTON; marine environment and water quality, marine science/marine policy

DE MASTER, DOUGLAS PAUL; PhD, 1978, UNIVERSITY OF MINNESOTA; marine mammals, population dynamics, conservation biology

DUXBURY, ALYN C; PhD, 1963, TEXAS A&M UNIVERSITY; estuarine processes and the management of human uses of these marine systems

FLUHARTY, DAVID L; PhD, 1977, UNIVERSITY OF MICHIGAN; natural resource and environmental policy

KACZYNSKI, WLODZIMIERZ M; PhD, 1973, UNIVERSITY OF GDANSK (POLAND); fishery economics, international joint ventures in marine fisheries, international fisheries policy

---

**Oceanography**

**Professor**

AAGAARD, KNUT; PhD, 1966, UNIVERSITY OF WASHINGTON; physical oceanography, ocean circulation, arctic oceanography

ANDERSON, GEORGE C; PhD, 1954, UNIVERSITY OF WASHINGTON; plankton ecology, biological oceanography

BAKER, EDWARD T; PhD, 1973, UNIVERSITY OF WASHINGTON; distribution, characterization, and impacts of hydrothermal emissions, linkage to tectonic processes

BANSE, KARL; Doctorat d'Etat, 1955, UNIVERSITY OF KIEL (GERMANY); biological oceanography, plankton production and methodology, polychaete systematics

BARROSS, JOHN A; PhD, 1973, UNIVERSITY OF WASHINGTON; microbial oceanography, bacterial ecology

CANNON, GLENN A; PhD, 1969, JOHNS HOPKINS UNIVERSITY; physical oceanography of coastal waters and deep-sea hydrothermal venting

CREAGER, JOE S; PhD, 1958, TEXAS A&M UNIVERSITY; geological oceanography, sedimentsology

DELANEY, JOHN R.; PhD, 1977, UNIVERSITY OF ARIZONA; geological oceanography, origin of oceanic crust, igneous petrology

DEMING, JODY W; PhD, 1981, UNIVERSITY OF MARYLAND; evolution and ecology of marine bacteria in the pressurized ocean

DEVOL, ALLAN H; PhD, 1975, UNIVERSITY OF WASHINGTON; biogeochemistry, sediment diagenesis, anoxic systems, carbon fluxes

EMERSON, STEVEN R.; PhD, 1974, COLUMBIA UNIVERSITY; marine geochemistry, chemical oceanography, sediment diagenesis

ERIKSEN, CHARLES C; PhD, 1977, MASSACHUSETTS INSTITUTE OF TECHNOLOGY; experimental physical oceanography; equatorial and upper ocean dynamics, internal waves

EWART, TERRY E; PhD, 1965, UNIVERSITY OF WASHINGTON; physics, ocean microstructure, diffusion, acoustic transmission

FEELY, RICHARD A; PhD, 1974, TEXAS A&M UNIVERSITY; chemical oceanography, oceanic sources and sinks for carbon dioxide

GREGG, MICHAEL C; PhD, 1971, UNIVERSITY OF CALIFORNIA (SAN DIEGO); physical oceanography, ocean microstructure, coastal and estuarine processes, hydraulics, internal waves

HARRISON, DON EDMUNDS; PhD, 1977, HARVARD UNIVERSITY; ocean circulation modeling, air-sea interaction, ocean and climate dynamics

HEATH, G ROSS; PhD, 1968, UNIVERSITY OF CALIFORNIA (SAN DIEGO); geochemistry and mineralogy of deep-sea sediments

HICKEY, BARBARA M; PhD, 1975, UNIVERSITY OF CALIFORNIA (SAN DIEGO); physical oceanography, dynamics of equatorial and shelf circulation

JOHNSON, GREGORY C; PhD, 1991, MASSACHUSETTS INSTITUTE OF TECHNOLOGY; large-scale ocean circulation, dynamics and variability

JOHNSON, HARLAN PAUL; PhD, 1972, UNIVERSITY OF WASHINGTON; paleomagnetism and marine geophysics

KELLY, KATHRYN A.; PhD, 1983, UNIVERSITY OF CALIFORNIA (SAN DIEGO); physical oceanography, specializing in combining models with satellite observations

KESHLER, WILLIAM S; PhD, 1989, UNIVERSITY OF WASHINGTON; equatorial ocean circulation and waves; interannual climate variability

KUNZE, ERIC L; PhD, 1985, UNIVERSITY OF WASHINGTON; mesoscale phenomena, wave/mesoscale interaction, double diffusion and mixing

LEWIS, BRIAN T; PhD, 1970, UNIVERSITY OF WISCONSIN; marine geophysics, marine seismology, gravity, magnetics, and computer modeling of those processes

LILLEY, MARVIN D.; PhD, 1983, OREGON STATE UNIVERSITY; chemical oceanography

MARTIN, SEELEYE; PhD, 1967, JOHNS HOPKINS UNIVERSITY; geophysical fluid dynamics, properties of sea ice

MC DUFF, RUSSELL E; PhD, 1978, UNIVERSITY OF CALIFORNIA (SAN DIEGO); marine geochemistry

MC MANUS, DEAN A; PhD, 1959, UNIVERSITY OF KANSAS; geological oceanography, continental shelf sediments, geoscience education

MC PHADEN, MICHAEL J; PhD, 1980, SCRIPPS OCEANOGRAPHIC INSTITUTION; equatorial ocean dynamics, climate scale air-sea interaction

MOBLEY, CURTIS D; PhD, 1977, UNIVERSITY OF MARYLAND; optical oceanography, and radiative transfer, especially numerical modeling

MOFJELD, HAROLD; PhD, 1970, UNIVERSITY OF WASHINGTON; tsunami dynamics, long waves and currents in the ocean, storm surge inundation

MOORE, DENNIS W.; PhD, 1968, HARVARD UNIVERSITY; equatorial oceanography, geophysical fluid dynamics, and inertial boundary currents

MORISON, JAMES H; PhD, 1980, UNIVERSITY OF WASHINGTON; upper ocean physical processes in the polar regions

MURRAY, JAMES W; PhD, 1973, MASSACHUSETTS INSTITUTE OF TECHNOLOGY; marine geochemistry, aquatic chemistry

NITTROUER, CHARLES; PhD, 1978, UNIVERSITY OF WASHINGTON; geological oceanography, continental-margin sedimentation

PERRY, MARY J.; PhD, 1974, UNIVERSITY OF CALIFORNIA (SAN DIEGO); physical oceanography, phytoplankton physiology, nutrient cycling

QUAY, PAUL D; PhD, 1977, COLUMBIA UNIVERSITY; chemical oceanography, stable isotopes, geochemistry, ocean tracers and mixing

RATTRAY, MAURICE; PhD, 1951, CALIFORNIA INSTITUTE OF TECHNOLOGY; physical oceanography, hydrodynamics, ocean circulation modeling

RHINES, PETER B.; PhD, 1967, CAMBRIDGE UNIVERSITY (UK); the circulation of the oceans and evolution of climate

RICHEY, JEFFREY E; PhD, 1973, UNIVERSITY OF CALIFORNIA (DAVIS); quantitative problems of aquatic ecosystems, primary Amazon River, limnology

SANFORD, THOMAS B; PhD, 1967, MASSACHUSETTS INSTITUTE OF TECHNOLOGY; physical oceanography, dynamics of ocean currents, mojational induction, instrumentation

SARACHIK, EDWARD; PhD, 1966, BRANDEIS UNIVERSITY; atmospheric dynamics, air-sea interactions, greenhouse warming, equatorial dynamics, climate change

SPINDEL, ROBERT C.; PhD, 1971, YALE UNIVERSITY; ocean acoustics, signal
processing, acoustic navigation systems, acoustic tomography
STERNBERG, RICHARD; PhD, 1965, UNIVERSITY OF WASHINGTON; geological oceanography, marine sedimentation processes
WILCOCK, WILLIAM S D; PhD, 1992, MASSACHUSETTS INSTITUTE OF TECHNOLOGY; marine seismology, dynamics of mid-ocean ridges, geological fluid dynamics

Research Professor
HOLMES, MARK L.; PhD, 1975, UNIVERSITY OF WASHINGTON; estuarine geologic processes, natural hazards in Puget Sound, crustal evolution at mid-ocean ridges

Associate Professor
ARMBRUST, E. VIRGINIA; PhD, 1990, MASSACHUSETTS INSTITUTE OF TECHNOLOGY; molecular ecology, genetic diversity of microbial populations, diatom sexual reproduction
BALISTRIERI, LAURIE S; MS, 1977, UNIVERSITY OF WASHINGTON; aqueous and environmental geochemistry, processes controlling trace elements in aquatic systems
BULLISTER, JOHN L; PhD, 1984, UNIVERSITY OF CALIFORNIA (SAN DIEGO); chemical tracers of large-scale ocean circulation and mixing, gases in the ocean and atmosphere
BUTTERFIELD, DAVID A.; PhD, 1990, UNIVERSITY OF WASHINGTON; geochemical systematics of hydrothermal fluids, relation to seafloor volcanism, microbial activity
CRONIN, MEGHAN; PhD, 1993, UNIVERSITY OF RHODE ISLAND; upper-ocean heat, salt, and momentum balances, western boundary currents, eddy-mean flow interaction
DUXBURY, ALYN C; PhD, 1963, TEXAS A&M UNIVERSITY; estuarine processes and the management of human uses of these marine systems
GRUNBAUM, DANIEL; PhD, 1991, CORNELL UNIVERSITY; zooplankton ecology, population biology, behavioral ecology, mathematical biology, and biomechanics
HOLCOMB, ROBIN T.; PhD, 1981, STANFORD UNIVERSITY; volcanology
KAWASE, MITSUHIRO; PhD, 1986, PRINCETON UNIVERSITY; geophysical fluid dynamics; oceanic general circulation; tracer oceanography
KEIL, RICHARD G; PhD, 1991, UNIVERSITY OF DELAWARE; microbial degradation of organic compounds in aquatic and soil environments
KELLEY, DEBORAH S.; PhD, 1990, DALHOUSSIE UNIVERSITY (CANADA); marine geology, volcanic-hosted submarine hydrothermal systems, sulfide-microbial habitats
LEE, CRAIG M; PhD, 1995, UNIVERSITY OF WASHINGTON; upper-ocean processes, internal waves, fronts, interactions between dynamics and biology
LESSARD, EVELYN J.; PhD, 1984, UNIVERSITY OF RHODE ISLAND; microzooplankton ecology and physiology; physical/biological interactions at oceanic fronts
MACREADY, PARKER; PhD, 1991, UNIVERSITY OF WASHINGTON; ocean circulation in estuaries and the southern ocean
NAPP, JEFFREY M; PhD, 1986, UNIVERSITY OF CALIFORNIA (SAN DIEGO); biological-physical interactions in the epipelagic zone, zooplankton ecology, fisheries oceanography
NYSTUEN, JEFFREY A.; PhD, 1985, UNIVERSITY OF CALIFORNIA (SAN DIEGO); acoustical oceanography, applied to oceanic rainfall and physics of the air-sea interface
OLTMAN-SHAY, JOAN M; PhD, 1986, SCRIPPS OCEANOGRAPHIC INSTITUTION; nearshore waves and currents: wave climatology, generation and dissipation, sediment dynamics
RISER, STEPHEN C; PhD, 1981, UNIVERSITY OF RHODE ISLAND; physical oceanography, mesoscale mixing, physics of mesoscale eddies, numerical modeling
ROTHROCK, DAVID A; PhD, 1969, CAMBRIDGE UNIVERSITY (UK); physical oceanography, polar oceanography, polar ice remote sensing and modeling
SHUMAN, FRANK R; PhD, 1978, UNIVERSITY OF WASHINGTON; monitoring activities in marine waters: sediment, water, plants and animals, toxic substances
THOMPSON, LUANNE; PhD, 1990, MASSACHUSETTS INSTITUTE OF TECHNOLOGY; numerical modeling of mesoscale and general circulation of the oceans
WARNER, MARK J; PhD, 1988, UNIVERSITY OF CALIFORNIA (SAN DIEGO); physical oceanography, ocean ventilation and mixing processes

Research Associate Professor
HOWE, BRUCE M.; PhD, 1986, UNIVERSITY OF CALIFORNIA (SAN DIEGO); physical oceanography, acoustic tomography

Assistant Professor
DUSHAW, BRIAN D.; PhD, 1992, UNIVERSITY OF CALIFORNIA (SAN DIEGO); acoustic tomography, applications to ocean temperature, tidal dissipation, ocean mixing
NEWTON, JAN A.; PhD, 1989, UNIVERSITY OF WASHINGTON; production and export of organic material, estuarine/coastal dynamics and marine water quality
SABINE, CHRISTOPHER L.; PhD, 1992, UNIVERSITY OF HAWAII; carbon cycling in the global oceans including air-sea fluxes and estimates of anthropogenic carbon
TYNAN, CYNTHIA T; PhD, 1993, UNIVERSITY OF CALIFORNIA (SAN DIEGO); biological-physical processes, distribution and abundances of plankton and marine mammals.
School of Pharmacy

Medicinal Chemistry

Professor

ATKINS, WILLIAM M.; PhD, 1988, UNIVERSITY OF ILLINOIS; protein engineering
BAILLIE, THOMAS A; PhD, 1973, UNIVERSITY OF GLASGOW (UK); medicinal chemistry.
DAUGGETT, VALERIE D.; PhD, 1990, UNIVERSITY OF CALIFORNIA (SAN FRANCISCO); molecular modelling studies of peptides and proteins
ELMER, GARY W; PhD, 1970, RUTGERS UNIVERSITY; pharmacognosy
HUITRIC, ALAIN C; PhD, 1954, UNIVERSITY OF CALIFORNIA (SAN FRANCISCO); medicinal chemistry.
KRUPISKI, EDWARD; PhD, 1949, UNIVERSITY OF WISCONSIN; pharmacology.
MC CARTHY, WALTER; PhD, 1949, INDIANA UNIVERSITY; medicinal chemistry.
NELSON, SIDNEY D; PhD, 1974, UNIVERSITY OF CALIFORNIA (SAN FRANCISCO); medicinal chemistry, chemical toxicology.
NELSON, WENDEL; PhD, 1965, UNIVERSITY OF KANSAS; medicinal chemistry.
RETTIE, ALLAN E.; PhD, 1983, UNIVERSITY OF MINNESOTA; pharmacology.
THUMMEL, KENNETH E.; PhD, 1987, UNIVERSITY OF CALIFORNIA (SAN FRANCISCO); drug interaction.
UNADKAT, JASHVANT D; PhD, 1982, UNIVERSITY OF ILLINOIS (URBANA-CHAMPAIGN); biochemistry.

Associate Professor

KUNZE, KENT; PhD, 1981, UNIVERSITY OF CALIFORNIA (SAN FRANCISCO); medicinal chemistry and drug metabolism.
VICINI, PAOLO; PhD, 1996, POLYTECHNIC UNIVERSITY OF MONTREAL (ITALY); biopharmaceutical science, biometrics and modeling methodology, mathematical models of biological systems.

Pharmacy

Professor

ANDERSON, GAIL; PhD, 1987, UNIVERSITY OF WASHINGTON; pharmacokinetics, metabolism and interactions of drugs in epilepsy and trauma.
BAUER, LARRY; PharmD, 1980, UNIVERSITY OF KENTUCKY; clinical pharmacokinetics and drug metabolism, drug interactions.
BURKHART, VINCENT D; MS, 1972, UNIVERSITY OF MARYLAND; institutional pharmacy practice and fiscal and personnel management.
EDWARDS, WILLIAM A; MS, 1971, UNIVERSITY OF WISCONSIN; gastrointestinal diseases, nutrition.
ELLSWORTH, ALLAN J; PharmD, 1977, PHILADELPHIA COLLEGE OF PHARMACY & SCIENCE; primary care, family medicine.
FASSETT, WILLIAM E; PhD, 1992, UNIVERSITY OF WASHINGTON; pharmacy administration, professional ethics.
GARDNER, JACQUELINE S.; PhD, 1980, UNIVERSITY OF WISCONSIN; pharmacoepidemiology, drug therapy use and effects, pharmacist practice patterns.
GRAY, SHELLY L.; PharmD, 1989, UNIVERSITY OF MICHIGAN; geriatric pharmacy.
HALL, NATHAN A; PhD, 1948, UNIVERSITY OF WASHINGTON; pharmacy practice.

Associate Professor

BLACK, DOUGLAS J; PharmD, 1983, UNIVERSITY OF WASHINGTON; infectious diseases.
BOMGAARS, DONALD L.; MBA, 1985, UNIVERSITY OF IOWA; hospital pharmacy.
HAZLET, THOMAS K.; DPH, 1991, UNIVERSITY OF CALIFORNIA (BERKELEY); public health, health policy.
OWEN, THOMAS J.; PharmD, 1992, UNIVERSITY OF IOWA; hospital pharmacy.
Stergachis, Andreas S.; PhD, 1979, UNIVERSITY OF MINNESOTA; pharmaceutical economics.
STORR, JAMES; PhD, 1987, UNIVERSITY OF WASHINGTON; hospital pharmacy.
THORNE, EDWARD R.; PhD, 1990, UNIVERSITY OF WASHINGTON; hospital pharmacy.
WILLIAMS, DONALD H; PharmB, 1958, MASSACHUSETTS COLLEGE OF PHARMACY; pharmacy law.

Pharmaceutics

Professor

ATKINS, WILLIAM M.; PhD, 1987, UNIVERSITY OF WASHINGTON; pharmacokinetics, metabolism and interactions of drugs in epilepsy and trauma.
CASE, REBECCA S.; PhD, 1980, UNIVERSITY OF MARYLAND; maternal fetal transmission of HIV.
HORN, JOHN; PharmD, 1988, UNIVERSITY OF MARYLAND; drug metabolism.
KEDZIERSKI, MICHAEL; BS, 1970, UNIVERSITY OF WISCONSIN; substance abuse, community health care.
ORR, JACOB; PhD, 1943, UNIVERSITY OF WISCONSIN; pharmacology.
PATRICK, DONALD L.; PhD, 1972, COLUMBIA UNIVERSITY; health outcomes and quality of life, end of life, quality of life.
RAMSEY, SCOTT D.; PhD, 1994, UNIVERSITY OF CALIFORNIA (SAN FRANCISCO); economic modeling and cost-effectiveness analysis.
THORNE, EDWARD R.; PhD, 1990, UNIVERSITY OF WASHINGTON; hospital pharmacy.
WILLIAMS, DONALD H; PharmD, 1958, MASSACHUSETTS COLLEGE OF PHARMACY; pharmacy law.

Associate Professor

ATKINS, WILLIAM M.; PhD, 1987, UNIVERSITY OF WASHINGTON; infectious diseases.
BOMGAARS, DONALD L.; MBA, 1985, UNIVERSITY OF IOWA; hospital pharmacy.
HAZLET, THOMAS K.; DPH, 1991, UNIVERSITY OF CALIFORNIA (BERKELEY); public health, health policy.
OWEN, THOMAS J.; PharmD, 1992, UNIVERSITY OF IOWA; hospital pharmacy.
Stergachis, Andreas S.; PhD, 1979, UNIVERSITY OF MINNESOTA; pharmaceutical economics.
STORR, JAMES; PhD, 1987, UNIVERSITY OF WASHINGTON; hospital pharmacy.
THORNE, EDWARD R.; PhD, 1990, UNIVERSITY OF WASHINGTON; hospital pharmacy.
WILLIAMS, DONALD H; PharmB, 1958, MASSACHUSETTS COLLEGE OF PHARMACY; pharmacy law.

Pharmaceutics

Professor

ATKINS, WILLIAM M.; PhD, 1987, UNIVERSITY OF WASHINGTON; pharmacokinetics, metabolism and interactions of drugs in epilepsy and trauma.
CASE, REBECCA S.; PhD, 1980, UNIVERSITY OF MARYLAND; maternal-fetal transmission of HIV.
HORN, JOHN; PharmD, 1988, UNIVERSITY OF MARYLAND; drug metabolism.
KEDZIERSKI, MICHAEL; BS, 1970, UNIVERSITY OF WISCONSIN; substance abuse, community health care.
ORR, JACOB; PhD, 1943, UNIVERSITY OF WISCONSIN; pharmacology.
PATRICK, DONALD L.; PhD, 1972, COLUMBIA UNIVERSITY; health outcomes and quality of life, end of life, quality of life.
RAMSEY, SCOTT D.; PhD, 1994, UNIVERSITY OF CALIFORNIA (SAN FRANCISCO); economic modeling and cost-effectiveness analysis.
THORNE, EDWARD R.; PhD, 1990, UNIVERSITY OF WASHINGTON; hospital pharmacy.
WILLIAMS, DONALD H; PharmD, 1958, MASSACHUSETTS COLLEGE OF PHARMACY; pharmacy law.
Research Associate Professor
BLOUGH, DAVID K; PhD, 1982, IOWA STATE UNIVERSITY; Biostatistics applications; generalized linear models; time series analysis.

Assistant Professor
AU, DAVID H.; MD, 1993, UNIVERSITY OF CHICAGO; Chronic Lung Disease, Pharmacoepidemiology, Health services research, Communication
JOHNSON, ERIC S.; PhD, 1999, UNIVERSITY OF WASHINGTON; evaluate drug safety; describe burden of disease/clinical outcomes
POLIFKA, JANINE E.; PhD, 1985, UNIVERSITY OF LOUISVILLE; teratology
RITCHIE, CRAIG A.; JD, 1972, UNIVERSITY OF IDAHO; pharmacy law
WITEK, DONALD J.; BS, 1987, UNIVERSITY OF WASHINGTON; pharmacy

Lecturer
DAWSON, KARAN N; MS, 1978, UNIVERSITY OF WASHINGTON; psychotropics, geriatrics, teaching methods
LAM, ANNIE Y.; PharmD, 1997, UNIVERSITY OF WASHINGTON; drug disposition and age, long-term-care pharmacy
MURPHY, NANCY L; PharmB, 1977, WASHINGTON STATE UNIVERSITY; pharmacy education, geriatric practice and community pharmacy practice
ODEGAARD, MARY ANN; PhD, 1980, STANFORD UNIVERSITY; retailing and retail management
O’SULLIVAN, TERESA; PharmD, 1990, UNIVERSITY OF MINNESOTA; cystic fibrosis, general medicine, practice-related education, medical literature evaluation
Evans School of Public Affairs

Professor
ARCHIBALD, SANDRA O; PhD, 1984, UNIVERSITY OF CALIFORNIA (DAVIS); economics of public policy focusing on water resources, environmental policy & sustainable development
CRUTCHFIELD, JAMES A; PhD, 1954, UNIVERSITY OF CALIFORNIA (BERKELEY); natural resources economics, policy and management, especially marine and environmental resources
DENNY, BREWSTER C; PhD, 1959, FLETCHER SCHOOL OF LAW AND DIPLOMACY; American foreign and defense policy, science and public policy
DOBEL, J PATRICK; PhD, 1976, PRINCETON UNIVERSITY; political theory, ethics and public policy, organizational theory
FAUSTMAN, ELAINE M.; PhD, 1980, MICHIGAN STATE UNIVERSITY; developmental toxicology, risk assessment methodologies, toxicology of N-nitroso compounds
GLOYD, STEPHEN S.; MD, 1973, UNIVERSITY OF CHICAGO; MPH, 1983, HARVARD UNIVERSITY; political economy, epidemiology, and primary health care in developing countries
GORDON, MARGARET T; PhD, 1972, NORTHWESTERN UNIVERSITY; news media and public policy; violence against women
HYMAN, BARRY; PhD, 1965, VIRGINIA POLYTECHNIC INST & STATE UNIV; engineering design, energy systems and policy, technology and public policy
LOCKE, HUBERT G; MA, 1962, UNIVERSITY OF MICHIGAN; criminal justice, urban policy, race and ethnic relations
PLOTNICK, ROBERT D.; PhD, 1976, UNIVERSITY OF CALIFORNIA (BERKELEY); economics of poverty, labor and social welfare policy
SMITH, STEVEN RATHGEB; PhD, 1988, MASSACHUSETTS INSTITUTE OF TECHNOLOGY; the changing relationship between government and nonprofit organizations
WADDELL, PAULA; PhD, 1989, UNIVERSITY OF TEXAS (DALLAS); urban policy, regional planning, growth management, land use, transportation, GIS
WATTS, CAROLYN A.; PhD, 1976, JOHNS HOPKINS UNIVERSITY; health economics and policy
WILLIAMS, WALTER; PhD, 1960, INDIANA UNIVERSITY; high-level decision making, policy implementation
ZERBE, RICHARD O.; PhD, 1969, DUKE UNIVERSITY; law and economics, cost-benefit analysis, economic history, environmental regulation
ZUMETA, WILLIAM M.; PhD, 1978, UNIVERSITY OF CALIFORNIA (BERKELEY); public policy analysis, higher education policy and finance, workforce policy

Research Professor
HILL, PAUL T.; PhD, 1972, OHIO STATE UNIVERSITY; political science, public policy, effects of regulation, especially on schools

Assistant Professor
FLETSCHNER, DIANA; PhD, 2002, UNIVERSITY OF WISCONSIN; Development Economics, Intrahousehold Decision-Making, Group Effects, Microfinance
KLEIT, RACHEL G.; PhD, 1999, UNIVERSITY OF NORTH CAROLINA; urban politics, public housing, urban planning
PAGE, STEPHEN B.; PhD, 1999, MASSACHUSETTS INSTITUTE OF TECHNOLOGY; public management, interagency collaboration, U.S. social policy

Research Associate Professor
ROZA, MARGUERITE Y.M.; PhD, 1995, UNIVERSITY OF WASHINGTON; Education Policy and School Finance

Lecturer
CARLSON, DANIEL L.; MCP, 1972, UNIVERSITY OF CALIFORNIA (BERKELEY); urban policy, clinics
CORMICK, GERALD W; PhD, 1971, UNIVERSITY OF MICHIGAN; mediation and negotiation
MCINTIRE, JAMES L.; PhD, 1993, UNIVERSITY OF WASHINGTON; housing policy, state tax policy, labor market policy.
School of Public Health and Community Medicine

Biostatistics

Professor
ANDERSON, GARNET L; PhD, 1989, UNIVERSITY OF WASHINGTON; clinical trial methodology, survival analysis, women's health, ovarian cancer screening
BENEDETTE, JACQUELINE K; PhD, 1974, UNIVERSITY OF WASHINGTON; statistical methodology in infectious disease research, cancer clinical trials
BRESLOW, NORMAN; PhD, 1967, STANFORD UNIVERSITY; clinical trials, epidemiology, survival and categorical data.
DE ROUEN, TIMOTHY; PhD, 1971, VIRGINIA POLYTECHNIC INST & STATE UNIV; applications of biostatistics to clinical epidemiology of oral and infectious diseases
DIEHR, PAULA K.; PhD, 1970, UNIVERSITY OF CALIFORNIA (LOS ANGELES); health services, small-area analysis, health status
EMERSON, SCOTT S.; PhD, 1988, UNIVERSITY OF WASHINGTON; clinical trials, sequential testing, survival analysis, categorical data
ETZIONI, RUTH B.; PhD, 1990, CARNEGIE MELLON UNIVERSITY; statistical methods in cancer screening, Bayesian methods in biostatistics
FENG, ZIDING; PhD, 1990, CORNELL UNIVERSITY; correlated data methods, mixture models, cancer prevention
FISHER, LLOYD D; PhD, 1966, DARTMOUTH COLLEGE; cardiovascular data analysis, clinical trials, multivariate statistics, longitudinal data analysis
FLEMMING, THOMAS RICHARD; PhD, 1976, UNIVERSITY OF MARYLAND; survival analysis, cancer clinical trials, AIDS research, sequential analysis
GOOLEY, THEODORE A.; PhD, 1990, UNIVERSITY OF ARIZONA; design and analysis of clinical trials in bone marrow transplantation
HALLSTROM, ALFRED; PhD, 1968, BROWN UNIVERSITY; clinical trial methodologies in cardiovascular research and emergency medical services applications
HEAGERTY, PATRICK J.; PhD, 1995, JOHNS HOPKINS UNIVERSITY; longitudinal and dependent data analysis
HUGHES, JAMES P; PhD, 1993, UNIVERSITY OF WASHINGTON; statistical methods in STD/AIDS research, longitudinal methods, Markov models
KENNEDY, KATHRYN D.; PhD, 1974, UNIVERSITY OF WASHINGTON; density estimation, cardiovascular data analysis, clinical trials
KOOPERBERG, CHARLES L; PhD, 1991, UNIVERSITY OF CALIFORNIA (BERKELEY); splines, density estimation, image reconstruction, spatial statistics, function estimation
KOPECKY, KENNETH J; PhD, 1977, OREGON STATE UNIVERSITY; clinical trials design and survival data analysis, epidemiologic methodology, goodness of fit
KRONMAL, RICHARD A; PhD, 1964, UNIVERSITY OF CALIFORNIA (LOS ANGELES); nonparametric density estimation, computer algorithms, cardiovascular data analysis
LIN, DANYU; PhD, 1989, UNIVERSITY OF MICHIGAN; analysis of failure time data, designs and analysis of clinical and epidemiologic studies
MOOLGAVKAR, SURESH H.; PhD, 1973, JOHNS HOPKINS UNIVERSITY; cancer epidemiology, development of quantitative methodology
PEPE, MARGARET; PhD, 1986, UNIVERSITY OF WASHINGTON; survival analysis, decision making, correlated data methods, child health issues
PETERSON, ARTHUR V; PhD, 1975, STANFORD UNIVERSITY; survival data methodology, competing risks, design of disease prevention trials
PRENTICE, ROSS L; PhD, 1970, UNIVERSITY OF TORONTO (CANADA); failure time analysis, disease prevention trials, epidemiologic methods, dietary factors and disease
SELF, STEVEN G; PhD, 1981, UNIVERSITY OF WASHINGTON; longitudinal data analysis, survival time models, cancer prevention, HIV vaccine evaluation
STORER, BARRY E.; PhD, 1984, UNIVERSITY OF WASHINGTON; statistical methods in clinical trials and epidemiology
TEMKIN, NANCY R; PhD, 1976, STATE UNIVERSITY OF NEW YORK (BUFFALO); clinical trials, recovery models, statistical modeling of epileptic phenomena, survival analysis
THOMPSON, ELIZABETH A; PhD, 1974, CAMBRIDGE UNIVERSITY (UK); statistical analysis of human genetic data, conservation and computational biology
VAN BELLE, GERALD; PhD, 1967, UNIVERSITY OF TORONTO (CANADA); biostatistics, environmental risk factors for neurodegenerative diseases, risk communication
WALH, PATRICIA W; PhD, 1971, UNIVERSITY OF WASHINGTON; multivariate statistical techniques, especially regression analysis applied to cardiovascular data
WAKEFIELD, JONATHAN C; PhD, 1992, UNIVERSITY OF NOTTINGHAM (UK); Bayesian data analysis, statistics in epidemiology, spatial epidemiology/pharmacodynamic models
WANG, CHING-YUN; PhD, 1993, TEXAS A&M UNIVERSITY; case-control study, missing data, measurement error, kernel smoothing
WELLNER, JON A; PhD, 1975, UNIVERSITY OF WASHINGTON; large-sample theory, asymptotic efficiency, empirical processes, semiparametric models
ZHOU, XIAO-HUA ANDREW; PhD, 1991, OHIO STATE UNIVERSITY; Biostatistics, health services research, mental health research

Research Professor
BARLOW, WILLIAM E.; PhD, 1986, UNIVERSITY OF WASHINGTON; survival analysis, residuals, and evaluation of screening programs
LE BLANC, MICHAEL; PhD, 1989, UNIVERSITY OF WASHINGTON; tree-based models, survival analysis, clinical trials, adaptive statistical methods
SHEPPARD, ELIZABETH A; PhD, 1992, UNIVERSITY OF WASHINGTON; aggregate data, survival analysis, biostatistical methods in environmental health
THOMPSON, MARY LOU; PhD, 1979, GEORG-AUGUST UNIVERSITAT (GERMANY); filtered point processes, diagonal methods, longitudinal reference ranges, maternal/child health
WIJSMAN, ELLEN M; PhD, 1981, UNIVERSITY OF WISCONSIN; human quantitative and population genetics

Associate Professor
HUANG, YIJIAN; PhD, 1997, UNIVERSITY OF MINNESOTA; survival analysis, HIV/AIDS clinical trials and epidemiological studies
LEROUX, BRIAN; PhD, 1989, UNIVERSITY OF BRITISH COLUMBIA (CANADA); mixed models, correlated data, statistical applications in dentistry, toxicology, and psychology
LUMLEY, THOMAS S.; PhD, 1998, UNIVERSITY OF WASHINGTON; statistical methods applied to public health, medicine and environmental science.
POLISSAR, NAYAK LINCOLN; PhD, 1974, PRINCETON UNIVERSITY; statistical consulting, community surveys, clinical trials, demography, epidemiology, environment
RUTTER, CAROLYN; PhD, 1991, UNIVERSITY OF CALIFORNIA (LOS ANGELES); evaluation of diagnostic tests, ROC curve analysis and correlated data problems
STOREY, JOHN D; PhD, 2002, STANFORD UNIVERSITY; statistical genomics, computational biology, applied statistics
THORQUINST, MARK DANIEL; PhD, 1985, UNIVERSITY OF WISCONSIN;
ordinal/categorical response, repeated measures data, chemoprevention, group-randomized trials
XU, LI; PhD, 1994, UNIVERSITY OF WASHINGTON; genetic epidemiology and biostatistics
YANEZ III, NORBERT DAVID; PhD, 1993, ARIZONA STATE UNIVERSITY; generalized linear models, overdispersion, measurement error models

**Research Associate Professor**

MANCL, LLOYD A.; PhD, 1992, UNIVERSITY OF WASHINGTON; statistical methodology in periodontal disease, TMD, and correlated data
RICHARDSON, BARBARA ANN, PhD, 1993, UNIVERSITY OF CALIFORNIA (LOS ANGELES); statistical methods for data from AIDS/STD clinical trials
ROSSINI, ANTHONY J; DSc, 1994, UNIVERSITY OF MILAN (ITALY); occupational and environmental hazards in genetic predisposition to environmental toxicology; developmental and occupational and environmental toxicology, aflatoxin carcinogenesis, metabolism of toxic chemicals
OMIECINSKI, CURTIS J; PhD, 1980, UNIVERSITY OF WASHINGTON; molecular toxicology, genetic regulation/ expression of drug/chemical metabolizing enzymes

**Assistant Professor**

HOFF, PETER D; PhD, 2000, UNIVERSITY OF WISCONSIN; two-sided matching models, cancer research
INOUYE, LURDES; PhD, 1999, DUKE UNIVERSITY; Bayesian methods in Biostat; Statistical Computing; Clinical Trials; Decision Theory & Cancer Rsrch
MONKS, STEPHANIE; PhD, 1999, NORTH CAROLINA STATE UNIVERSITY; statistical genetics, permutation tests, sampling design of genetic studies

**Research Assistant Professor**

BRUMBACK, LYNDIA C.; PhD, 2001, UNIVERSITY OF WISCONSIN; functional data analysis; statistical applications in cystic fibrosis, cardiovascular, AIDS research

**Environmental and Occupational Health**

**Professor**

ALTMAN, LEONARD; MD, 1969, HARVARD UNIVERSITY; mechanisms of tissue injury produced by bacteria, leukocytes, or toxins
BARNHART, SCOTT; MD, 1979, GEORGE WASHINGTON UNIVERSITY; occupationally related lung disease
CHECKOWAY, HARVEY; PhD, 1978, UNIVERSITY OF NORTH CAROLINA; occupational and environmental epidemiology
COSTA, LUCIO GUIDO; PharmD, 1977, UNIVERSITY OF MILAN (ITALY); neurotoxicology; developmental and molecular mechanisms/biological markers of neurotoxicity
DE WALLE, FOPPE B.; PhD, 2000, UNIVERSITY OF WASHINGTON; environmental health technology, hazardous waste, drinking water treatment, toxins reduction
EATON, DAVID L; PhD, 1978, UNIVERSITY OF KANSAS; biochemical and environmental toxicology, aflatoxin carcinogenesis, metabolism of toxic chemicals
FAUSTMAN, ELAINE M.; PhD, 1980, MICHIGAN STATE UNIVERSITY; developmental toxicology, risk assessment methodologies, toxicology of N-nitroso compounds
FENSKE, RICHARD A.; PhD, 1984, UNIVERSITY OF CALIFORNIA (BERKELEY); human exposure and health risk assessment, pesticide exposure
KALMAN, DAVID A; PhD, 1978, UNIVERSITY OF WASHINGTON; environmental chemistry, detection and fate of chemical hazards in natural and manmade environments
KAUFMAN, JOEL D.; MD, 1986, UNIVERSITY OF MICHIGAN; MPH, 1990, UNIVERSITY OF WASHINGTON; occupational and environmental epidemiology: etiologic research and public health surveillance
KAVANAGH, TERRANCE J; PhD, 1985, MICHIGAN STATE UNIVERSITY; free radical toxicology, glutathione metabolism, toxicology and aging
KEMP, CHRISTOPHER JAMES; PhD, 1989, UNIVERSITY OF WISCONSIN; genetic and environmental influence on multitissue cancer in the mouse
KISSEL, JOHN C.; PhD, 1985, STANFORD UNIVERSITY; solid and hazardous waste management practice, human exposure assessment
KOENIG, JANE Q; PhD, 1963, UNIVERSITY OF WASHINGTON; respiratory physiology, health effects of air pollutants, lung response of susceptible groups
LARSON, TIMOTHY; PhD, 1976, UNIVERSITY OF WASHINGTON; airborne particles, air quality modeling, and instrument development
LUCHTEL, DANIEL L; PhD, 1969, UNIVERSITY OF WASHINGTON; electron microscopy and cell biology, lung anatomy/pathophysiology, fiber toxicity
MORGAN, MICHAEL S; DSc, 1972, MASSACHUSETTS INSTITUTE OF TECHNOLOGY; applied respiratory, physiology and inhalation toxicology
MOTTET, N KARLE; MD, 1952, YALE UNIVERSITY; effects of trace elements, especially mercury and arsenic, on growth and development
OMENN, GILBERT S; PhD, 1972, UNIVERSITY OF WASHINGTON; genetic predisposition to environmental and occupational hazards
ROBkin, maurice a; PhD, 1961, massachusetts institute of technology; radiation dosimetry, environmental radioactivity, radioactive waste management, health physics
SEIXAS, NOAH S.; PhD, 1990, UNIVERSITY OF MICHIGAN; exposure assessment methods for occupational/epidemiologic studies; small industrial plants
VAN BELLE, GERALD; PhD, 1967, UNIVERSITY OF TORONTO (CANADA); biostatistics, environmental risk factors for neurodegenerative diseases, risk communication
WILSON, JOHN T; MD, 1950, COLUMBIA UNIVERSITY; DSc, 1956, UNIVERSITY OF CINCINNATI; environmental and occupational medicine, industrial toxicology
YOST, MICHAEL G.; PhD, 1989, UNIVERSITY OF CALIFORNIA (BERKELEY); worker exposures to physical agents, electromagnetic fields, noise and vibration

**Research Professor**

FANTEL, ALAN G; PhD, 1974, UNIVERSITY OF WASHINGTON; embryology, teratology
FRANKLIN, GARY M.; MD, 1969, GEORGE WASHINGTON UNIVERSITY; MPH, 1982, UNIVERSITY OF CALIFORNIA (BERKELEY); occupational injury, neurological epidemiology, public health nutrition
SHEPPARD, ELIZABETH A.; PhD, 1992, UNIVERSITY OF WASHINGTON; aggregate data, survival analysis, biostatistical methods in environmental health
WOODS, JAMES S; PhD, 1970, UNIVERSITY OF WASHINGTON; biochemical toxicology of trace metals; biological markers of metal exposure

**Associate Professor**

BREYSSE, PETER; MS, 1954, WASHINGTON STATE UNIVERSITY; MPH, 1957, UNIVERSITY OF PITTSBURGH; exposure of population to contaminants
BURBACHER, THOMAS M; PhD, 1983, UNIVERSITY OF WASHINGTON; neurotoxicology, specializing in the behavioral effects of agents on the central nervous system
DANIELL, WILLIAM E; MD, 1979, TUFTS UNIVERSITY; MPH, 1986, UNIVERSITY OF WASHINGTON; noise-induced hearing loss; long-term disability associated with carpal tunnel syndrome
DOOLITTLE, THEUS LEE; PhD, 1963, UNIVERSITY OF SOUTHERN CALIFORNIA; physiology of exercise, physiological mechanical efficiency
GILBERT, STEVEN G.; PhD, 1986, UNIVERSITY OF ROCHESTER; primate neurobehavioral toxicology and teratology, developmental effects of heavy metals

GROSSMANN, ANGELIKA; PhD, 1982, FREIE UNIVERSITY OF BERLIN (GERMANY); immunosenescence in humans and mice; immunotoxicology; transmembrane signaling in T-lymphocytes

HATLEN, JACK B; MS, 1958, UNIVERSITY OF WASHINGTON; environmental health program planning and management, environmental health manpower training

KEIFER, MATTHEW C.; MD, 1982, UNIVERSITY OF ILLINOIS; the human health effects of pesticide exposure

KISSEL, JOHN C.; PhD, 1985, STANFORD UNIVERSITY; solid and hazardous waste management practice, human exposure assessment

LEROUX, BRIAN; PhD, 1989, UNIVERSITY OF BRITISH COLUMBIA (CANADA); mixed models, correlated data, statistical applications in dentistry, toxicology, and psychology

LIU, LEE-JANE S.; Dsc, 1994, HARVARD UNIVERSITY; air pollution, exposure assessment, environmental epidemiology

LIU, LEE-JANE S.; MS, 1991, HARVARD UNIVERSITY; air pollution, exposure assessment, environmental epidemiology

MARTIN, THOMAS G.; MD, 1977, PENNSYLVANIA STATE UNIVERSITY; general internal medicine

XIA, ZHENGUI; PhD, 1991, UNIVERSITY OF WASHINGTON; neuronal apoptosis, neuronal gene regulation

Assistant Professor

DE ROOS, ANNECLAIRE JENICE; PhD, 2000, UNIVERSITY OF NORTH CAROLINA; Occupational & environmental chronic disease epidemiology, biomarkers of early effect

FIRESTONE, JORDAN A.; PhD, 1993, UNIVERSITY OF COLORADO (BOULDER); neurotoxicology

SHIN, GWY-AM; PhD, 1998, UNIVERSITY OF NORTH CAROLINA; Water and wastewater microbiology

SIMPSON, CHRISTOPHER DAVID; PhD, 1997, UNIVERSITY OF BRITISH COLUMBIA (CANADA); Exposure assessment, biomarker development, environmental analytical chemistry, industrial hygiene

Lecturer

CAMP, JANICE E; MN, 1984, UNIVERSITY OF WASHINGTON; MS, 1984, UNIVERSITY OF WASHINGTON; workplace exposure assessment, evaluation of exposure, controls, program evaluation

FREEMAN, STANLEY H; MA, 1959, STATE UNIVERSITY OF NEW YORK (BUFFALO); industrial safety, program organization and administration

MONTIEITH, LEE E; MS, 1956, UNIVERSITY OF WASHINGTON; industrial hygiene, analytical and environmental chemistry

MORRIS, SHARON L; BA, 1965, REED COLLEGE; occupational safety and health policy, continuing education

TRESER, CHARLES D; MPH, 1976, UNIVERSITY OF MICHIGAN; administrative law and process in environmental health; housing; vector control

Epidemiology

Professor

ASTLEY, SUSAN J.; PhD, 1990, UNIVERSITY OF WASHINGTON; chronic childhood diseases.

AUSTIN, MELISSA A.; PhD, 1985, UNIVERSITY OF CALIFORNIA (BERKELEY); genetic epidemiology of chronic diseases and public health genetics

BECKER, THOMAS; PhD, 1986, UNIVERSITY OF NEW MEXICO; diagnosis and prevention of Native American cancer

BERESFORD, SHIRLEY A.; PhD, 1981, UNIVERSITY OF LONDON (UK); nutritional epidemiology, folic acid, fruit and vegetables

BOYKO, EDWARD J.; MD, 1979, UNIVERSITY OF PITTSBURGH; epidemiology of inflammatory bowel disease and non-insulin-dependent diabetes mellitus

BURKE, WYLIE; PhD, 1974, UNIVERSITY OF WASHINGTON; ethical and policy implications of genetic information

CELM, CONNIE L.; MD, 1964, UNIVERSITY OF CALIFORNIA (SAN FRANCISCO); infectious diseases

CHECKOWAY, HARVEY; PhD, 1978, UNIVERSITY OF NORTH CAROLINA; occupational and environmental epidemiology

CONNELL, FREDERICK A; MD, 1972, NEW YORK UNIVERSITY; child health, child health services research, Medicaid, community health assessment

CRITCHLOW, CATHY W; PhD, 1993, UNIVERSITY OF WASHINGTON; epidemiology of sexually transmitted diseases; HIV prevention, diseases of oral cavity

CUMMINGS, PETER; MD, 1970, CASE WESTERN RESERVE UNIVERSITY; MPH, 1993, UNIVERSITY OF WASHINGTON; injury epidemiology, emergency medicine, epidemiologic methods

DALING, JANET R; PhD, 1977, UNIVERSITY OF WASHINGTON; maternal and child health and cancer research.

DAVIS, ROBERT L.; MD, 1983, UNIVERSITY OF CALIFORNIA (SAN DIEGO); MPH, 1993, UNIVERSITY OF WASHINGTON; childhood immunization, including adverse events perinatal and pediatric epidemiology

Davis, Scott; PhD, 1980, UNIVERSITY OF WASHINGTON; radiation and cancer, circadian disruption and cancer, hematopoietic cancers, epidemiologic methods

DREWNOWSKI, ADAM; PhD, 1977, ROCKEFELLER UNIVERSITY; taste and psychology of food choice in disease prevention

ELMORE, JOANN G.; MD, 1987, STANFORD UNIVERSITY; MPH, 1992, YALE UNIVERSITY; clinical epidemiology, breast cancer screening, diagnostic accuracy

EMMANUEL, IRVIN; MA, 1956, UNIVERSITY OF ARIZONA; MD, 1960, UNIVERSITY OF ROCHESTER; MS, 1966, UNIVERSITY OF WASHINGTON; epidemiology of maternal and child health problems, growth and development

FOY, HJORDIS; PhD, 1968, UNIVERSITY OF WASHINGTON; epidemiology and control of infectious disease

GALE, JAMES L.; MD, 1961, COLUMBIA UNIVERSITY; MS, 1969, UNIVERSITY OF WASHINGTON; epidemiology and control of infectious disease, international health

GLOYD, STEPHEN S.; MD, 1973, UNIVERSITY OF CHICAGO; MPH, 1983, HARVARD UNIVERSITY; political economy, epidemiology, and primary health care in developing countries

GRAYSTON, J THOMAS; MD, 1948, UNIVERSITY OF CHICAGO; MS, 1952, UNIVERSITY OF CHICAGO; infectious causes (Chlamydia pneumoniae) of atherosclerotic cardiovascular disease

HANDSFIELD, HUNTER; MD, 1968, COLUMBIA UNIVERSITY; infectious diseases

HECKERT, SUSAN R.; PhD, 1990, UNIVERSITY OF WASHINGTON; clinical and cardiovascular epidemiology, pharmacoepidemiology, pharmacogenetics

HENDERSON, MAUREEN M; MBBS, 1949, UNIVERSITY OF DURHAM (UK); DPH, 1956, UNIVERSITY OF DURHAM (UK); epidemiology of chronic diseases, dietary prevention of disease

HOLMES, KING K.; PhD, 1967, UNIVERSITY OF HAWAII; clinical epidemiology and pathogenesis of infectious diseases pediatric epidemiology

HOLT, VICTORIA L.; PhD, 1990, UNIVERSITY OF WASHINGTON; womens reproductive health, intimate partner violence

JARVIK, GAIL P.; PhD, 1986, UNIVERSITY OF MICHIGAN; quantitative genetics and genetic epidemiology, focusing on common diseases

KIMBALL, ANN M.; MD, 1976, UNIVERSITY OF WASHINGTON; MPH, 1981, UNIVERSITY OF WASHINGTON;
emerging infections, public health response to epidemic disease
KING, MARY-CLAIRE; PhD, 1973, UNIVERSITY OF CALIFORNIA (BERKELEY); genetic analysis of complex human phenotypes, human diversity and evolution
KOEPSELL, THOMAS D; MD, 1972, HARVARD UNIVERSITY; MPH, 1979, UNIVERSITY OF WASHINGTON; injuries, neuroepidemiology, veterans health, epidemiologic methods, program and policy evaluation
KOUTSKY, LAURA A; PhD, 1987, UNIVERSITY OF WASHINGTON; sexually transmitted diseases, HIV, etiology and natural history of cervical neoplasia
KRISTAL, ALAN R.; MD, 1967, UNIVERSITY OF WASHINGTON; neurology
LACROIX, ANDREA Z.; PhD, 1984, UNIVERSITY OF NORTH CAROLINA; older womens health, osteoporosis, cardiovascular disease, cancer prevention
LEE, JOHN A. H.; DPH, 1982, UNIVERSITY OF WASHINGTON; administration
MAYER, JONATHAN D; PhD, 1977, UNIVERSITY OF MICHIGAN; MPH, 1982, UNIVERSITY OF WASHINGTON; nutrition, dietary behavior, nutrition intervention, and cancer control
MARCUSE, EDGAR K; MD, 1967, UNIVERSITY OF PENNSYLVANIA; general pediatrics
MARTIN, DIANE P.; PhD, 1979, UNIVERSITY OF WASHINGTON; research methods; health services quality, use, and outcomes
MAYOR, JONATHAN D; PhD, 1977, UNIVERSITY OF MICHIGAN; medical geography, health policy, env. health, epidemiology, inf. health, infectious diseases
MOOLGAVKAR, SURESH H.; PhD, 1973, JOHNS HOPKINS UNIVERSITY; cancer epidemiology, development of quantitative methodology
MUELLER, BETH A.; DPH, 1984, TULANE UNIVERSITY; epidemiology of perinatal and reproductive diseases, cancer, and injury research
NOLAN, CHARLES M; MD, 1969, UNIVERSITY OF ARKANSAS; infectious diseases.
OBERLE, MARK W.; MD, 1974, JOHNS HOPKINS UNIVERSITY; Public Health; Native American Health.
PATRICK, DONALD L.; PhD, 1972, COLUMBIA UNIVERSITY; health status and quality of life, end of life, adolescents
PENDERGRASS, THOMAS W; MD, 1971, UNIVERSITY OF TENNESSEE; MPH, 1979, UNIVERSITY OF WASHINGTON; hematology, oncology
POTTER, JOHN D; PhD, 1984, UNIVERSITY OF QUEENSLAND (AUSTRALIA); colorectal cancer etiology, gene-environment interaction, early detection, molecular epidemiology
PROBSTFIELD, JEFFREY L.; MD, 1967, UNIVERSITY OF WASHINGTON; cardiology
PSATY, BRUCE M.; PhD, 1979, INDIANA UNIVERSITY; cardiovascular disease, coronary heart disease, hypertension, pharmacoepidemiology
REIBER, GAYLE; PhD, 1989, UNIVERSITY OF WASHINGTON; epidemiology and health services research on preventing complications of diabetes
RIVARA, FREDERICK P.; MD, 1974, UNIVERSITY OF PENNSYLVANIA; pediatric epidemiology and injury prevention and research
SCHWARTZ, STEPHEN MARC; PhD, 1990, UNIVERSITY OF WASHINGTON; cancer, cardiovascular disease, reproductive conditions; molecular/genetic epidemiology; methods
SHY, KIRKWOOD K; MD, 1973, WAYNE STATE UNIVERSITY; epidemiologic applications to problems in obstetrics and gynecology
SISCOVICK, DAVID S.; MD, 1976, UNIVERSITY OF MARYLAND; epidemiology
STAMM, WALTER E; MD, 1971, HARVARD UNIVERSITY; infectious disease
STERGACHIS, ANDREA S; PhD, 1979, UNIVERSITY OF MINNESOTA; pharmacoepidemiology, pharmacy administration
STEVENS, NANCY G; MD, 1979, UNIVERSITY OF WASHINGTON; family medicine
SUGARMAN, JONATHAN R.; MD, 1981, ALBERT EINSTEIN COLLEGE OF MEDICINE; MPH, 1990, UNIVERSITY OF WASHINGTON; American Indian and Alaska Native health; Health Care Quality Assessment and Improvement
THOMAS, DAVID B; MD, 1963, UNIVERSITY OF WASHINGTON; DPH, 1972, JOHNS HOPKINS UNIVERSITY; cervix and breast carcinoma epidemiology.
VERNEZ-MOUEDON, ANNE; DSc, 1987, ECOLE POLYTECHNIQUE FEDERALE DE LAUSANNE; urban design, city form and neighborhood studies, design research
WEISS, NOEL S; MD, 1967, STANFORD UNIVERSITY; DPH, 1971, HARVARD UNIVERSITY; chronic disease epidemiology
WHITE, J EMILY; PhD, 1982, UNIVERSITY OF WASHINGTON; cancer epidemiology and prevention
WILLIAMS, MICHELLE A.; DSc, 1991, HARVARD UNIVERSITY; reproductive and perinatal epidemiology, cancer epidemiology

Research Professor

JACKSON, LISA A.; MD, 1988, UNIVERSITY OF VIRGINIA; MPH, 1996, UNIVERSITY OF WASHINGTON; infectious disease epidemiology, assessments of vaccine safety and effectiveness
MCTIERNAN, ANNE; PhD, 1982, UNIVERSITY OF WASHINGTON; breast and colon cancer, womens health, exercise and obesity
PATTERSON, RUTH E.; PhD, 1992, UNIVERSITY OF NORTH CAROLINA; dietary assessment in adult populations, dietary change, vitamin supplements in cancer prevention
STANFORD, JANET L.; PhD, 1985, JOHNS HOPKINS UNIVERSITY; cancer epidemiology and genetic susceptibility

Associate Professor

CHU, JOSEPH; MD, 1975, GEORGETOWN UNIVERSITY; gynecologic cancer epidemiology, perinatal epidemiology, health services research
DUCHIN, JEFFREY S.; MD, 1985, RUTGERS UNIVERSITY; infectious diseases and epidemiology
EDWARDS, KAREN L.; PhD, 1996, UNIVERSITY OF WASHINGTON; genetic epidemiology, public health genetics, diabetes, cardiovascular disease
FAHN, JESSE R.; MD, 1989, NORTH-WESTERN UNIVERSITY; MPH, 1995, UNIVERSITY OF WASHINGTON; neuropathiatry, psycho-oncology, epidemiology, health services research, depression, delirium
GOLDBAUM, GARY M.; MD, 1978, UNIVERSITY OF COLORADO (DENVER); MPH, 1989, UNIVERSITY OF WASHINGTON; preventive medicine, chronic diseases prevention, injury prevention
HASELKORN, JODIE K.; MD, 1985, LOUISIANA STATE UNIVERSITY; health services for the disabled: diagnostic accuracy of tests, effectiveness of interventions
HELGERSON, STEVEN D.; MD, 1973, UNIVERSITY OF WASHINGTON; MPH, 1976, UNIVERSITY OF WASHINGTON; Public health practice and epidemiologic field investigation
HITI, JANE; MD, 1989, UNIVERSITY OF VERMONT; MPH, 1995, UNIVERSITY OF WASHINGTON; perinatal medicine, HIV and pregnancy
JOHN STEWART, GRACE C.; MD, 1987, UNIVERSITY OF MICHIGAN; MPH,
1995, UNIVERSITY OF WASHINGTON; mother-to-child HIV-1 transmission (specifically, Africa, cofactors, breastmilk)

KAUFMAN, JOEL D.; MD, 1986, UNIVERSITY OF MICHIGAN; MPH, 1990, UNIVERSITY OF WASHINGTON; cardiovascular epidemiology; occupational and environmental epidemiology; etiologic research and public health surveillance

KESTIN, MARK; PhD, 1989, FLINDERS UNIVERSITY (AUSTRALIA); relationship between nutrition, cancer and cardiovascular disease

MARTIN, MICHAEL D.; PhD, 1993, UNIVERSITY OF WASHINGTON; dental education in oral health care of persons with disability

MOCK, CHARLES N.; MD, 1980, BROWN UNIVERSITY; injury: epidemiology, prevention, treatment; especially in less-developed countries

OLSON, CARIN M.; MD, 1978, OHIO STATE UNIVERSITY; general internal medicine

REED, SUSAN D.; MS, 1979, SARAH LAWRENCE COLLEGE; MD, 1986, STANFORD UNIVERSITY; gynecology, evidence-based medicine and clinical outcomes studies, hormone replacement therapy

STEHMAN-BREEN, CATHERINE O; MD, 1990, UNIVERSITY OF CHICAGO; MS, 1996, UNIVERSITY OF WASHINGTON; cardiovascular epidemiology among patients with end-stage renal disease

STEHR-GREEN, PAUL; DPH, 1982, UNIVERSITY OF PITTSBURGH; chronic, infectious, vaccine-preventable diseases, environmental health, health-care delivery

TSU, VIVIEN D.; PhD, 1991, UNIVERSITY OF WASHINGTON; maternal and child health in developing countries

TSUANG, DEBBY W.; MD, 1988, UNIVERSITY OF IOWA; genetics of schizophrenia and late-life dementia

WALD, ANNA; MD, 1985, MT SINAI SCHOOL OF MEDICINE; MPH, 1994, UNIVERSITY OF WASHINGTON; the epidemiology, natural history and therapeutics of HSV and other herpesviruses infections

WEIGLER, BENJAMIN J; PhD, 1991, UNIVERSITY OF CALIFORNIA (DAVIS); infectious disease epidemiology in laboratory animal medicine and management

Research Associate Professor

CANGELOSI, GERARD A.; PhD, 1984, UNIVERSITY OF CALIFORNIA (DAVIS); molecular biology of tuberculosis

HOOVER, J JOANNE; MD, 1960, UNIVERSITY OF ILLINOIS; MPH, 1972, UNIVERSITY OF WASHINGTON; cardiovascular epidemiology, public health practice

LAMPE, JOHANNA W; PhD, 1990, UNIVERSITY OF MINNESOTA; gene-diet interactions and cancer susceptability: phytochemicals, biotransformation enzymes, colon

MCGRATH, BARBARA B.; PhD, 1993, UNIVERSITY OF WASHINGTON; ethnographic studies with U.S. Pacific Islanders on health issues, specifically, HIV/AIDS prevention

REINER, ALEXANDER P.; MD, 1984, JOHNS HOPKINS UNIVERSITY; hematology

ROSSING, MARY ANNE; PhD, 1993, UNIVERSITY OF WASHINGTON; cancer epidemiology, particularly cancers of the reproductive system

Assistant Professor

DE ROOS, ANNECLAIREE JENICE; PhD, 2000, UNIVERSITY OF NORTH CAROLINA; Occupational & environmental & chronic disease epidemiology, biomarkers of early effect

DUNCAN, GLEN E; PhD, 1997, UNIVERSITY OF TENNESSEE; Prevention and treatment of type 2 diabetes, obesity, metabolism, exercise

FARQUHAR, CAREY; MD, 1994, HARVARD UNIVERSITY; MPH, 2001, UNIVERSITY OF WASHINGTON; HIV in Kenya: mother-to-child HIV transmission, correlates of immunity to HIV, couple counseling

GOLDEN, MATTHEW R; MPH, 1993, JOHNS HOPKINS UNIVERSITY; MD, 1994, JOHNS HOPKINS UNIVERSITY; allergy and infectious diseases

HAWES, STEPHEN E.; PhD, 2001, UNIVERSITY OF WASHINGTON; Epidemiology of HIV/AIDS, Human Papillomavirus (HPV), and other Sexually Transmitted Diseases

KURTH, ANN E.; PhD, 2003, UNIVERSITY OF WASHINGTON; sexually transmitted infection screening & prevention; clinical epidemiology; applied informatics

MANHART, LISA E.; PhD, 2002, UNIVERSITY OF WASHINGTON; Epidemiology of sexually transmitted diseases

MCCELLAND, RAYMOND SCOTT; MD, 1996, UNIVERSITY OF WASHINGTON; MPH, 2001, UNIVERSITY OF WASHINGTON; International HIV-1 and sexually transmitted disease epidemiology and clinical research

SHERMAN, KAREN J; PhD, 1983, CORNELL UNIVERSITY; Epidemiologic methods for complementary and alternative medicine

Lecturer

BRUEMMER, BARBARA; PhD, 1993, UNIVERSITY OF WASHINGTON; Antioxidant supplementation; body weight and mortality following cancer therapy.

WILLIAMS, MARCIA FRANCES; PhD, 2000, UNIVERSITY OF WASHINGTON; physical therapy

Health Services

Professor

ALTAMORE, RITA A.; MD, 1977, BOSTON UNIVERSITY; information systems in health services, quality of health care

BERKOWITZ, BOBBIE; PhD, 1990, CASE WESTERN RESERVE UNIVERSITY; administration, leadership and policy development within public health and nursing

BLACKMORE, CHRISTOPHER C.; MD, 1990, UNIVERSITY OF ROCHESTER; MPH, 1997, UNIVERSITY OF WASHINGTON; body imaging, teleradiology, digital radiology, MRI/CT

BOWEN, DEBORAH J; PhD, 1986, UNIFORMED SERVICE U OF THE HEALTH SC.; health psychology

CHERKIN, DANIEL C; PhD, 1978, UNIVERSITY OF WASHINGTON; outcomes of care for back pain and other common problems

CHRISMAN, NOEL J; PhD, 1966, UNIVERSITY OF CALIFORNIA (BERKELEY); health beliefs and practices, social networks and social support; clinically applied anthropology

CONNELL, FREDERICK A; MD, 1972, NEW YORK UNIVERSITY; child health, child health services research, Medicaid, community health assessment

CONRAD, DOUGLAS A; PhD, 1978, UNIVERSITY OF CHICAGO; alternative vertical and horizontal market structures in health care

COOMBS, JOHN B.; MD, 1972, CORNELL UNIVERSITY; Health care outcomes, rural health policy, healthcare workforce issues and applied nutrition

CRITTENDEN, ROBERT A; MD, 1976, UNIVERSITY OF WASHINGTON; MPH, 1987, UNIVERSITY OF WASHINGTON; health plans/policies

CURTIS, JARED R.; MD, 1988, JOHNS HOPKINS UNIVERSITY; MPH, 1994, UNIVERSITY OF WASHINGTON; pulmonary diseases and critical care medicine

DAY, ROBERT W; PhD, 1962, UNIVERSITY OF CALIFORNIA (BERKELEY); translational research

DEYO, RICHARD A.; MD, 1975, PENNSYLVANIA STATE UNIVERSITY; health
status measurement and evaluation of common medical practices
DIEHR, PAULA K.; PhD, 1970, UNIVERSITY OF CALIFORNIA (LOS ANGELES); health services, small-area analysis, health status
DOWLING, WILLIAM L.; PhD, 1971, UNIVERSITY OF MICHIGAN; strategic management of health-care organizations, managed care
ETZIONI, RUTH B.; PhD, 1990, CARNegie MELLON UNIVERSITY; statistical methods in cancer screening, Bayesian methods in biostatistics
FHN, STEPHAN; MD, 1977, ST LOUIS UNIVERSITY, MPH, 1981, UNIVERSITY OF WASHINGTON; internal medicine
FULLER, SHERRILYNNE S00; PhD, 1984, UNIVERSITY OF SOUTHERN CALIFORNIA; Analysis, representation and mapping of research findings (data mining.)
GILSON, BETTY S.; MD, 1943, UNIVERSITY OF MINNESOTA; health-status measurement
GLOYD, STEPHEN S.; MD, 1973, UNIVERSITY OF CHICAGO; MPH, 1983, HARVARD UNIVERSITY; political economy, epidemiology, and primary health care in developing countries
GOLDBERG, HAROLD I.; MD, 1977, STANFORD UNIVERSITY; applying clinical informatics to health services delivery and quality improvement
GREMBOWSKI, DAVID C.; MD, 1982, UNIVERSITY OF WASHINGTON; health services research, survey research, program evaluation, performance of health care systems
GROSSMAN, DAVID C.; MD, 1982, UNIVERSITY OF CALIFORNIA (LOS ANGELES); injury control, Native American health, and pediatric health services research
GROSSMAN, DAVID C.; MPH, 1990, UNIVERSITY OF WASHINGTON; injury control, Native American health, and pediatric health services research
HALE, CHRISTIANE B.; PhD, 1978, UNIVERSITY OF CINCINNATI; quantitative analyses of small area health outcomes
HART, LAWRENCE G; PhD, 1985, UNIVERSITY OF WASHINGTON; rural health policy, medical geography
HEDRICK, SUSAN; PhD, 1982, MICHIGAN STATE UNIVERSITY; long-term care
HEGYVARY, SUE T.; PhD, 1974, VANDERBILT UNIVERSITY; administration and productivity of health care and nursing services
JARVIK, JEFFREY G; MD, 1987, UNIVERSITY OF CALIFORNIA (SAN DIEGO); neuroradiology, outcomes research
KATON, WAYNE J; MD, 1976, UNIVERSITY OF OREGON; depression, panic disorder, somatization, adherence
KOEPSELL, THOMAS D; MD, 1972, HARVARD UNIVERSITY; MPH, 1979, UNIVERSITY OF WASHINGTON; injuries, neuroepidemiology, veterans health, epidemiologic methods, program and policy evaluation
LARSON, ERIC B; MD, 1973, HARVARD UNIVERSITY; internal medicine
LOGEROF SR., JAMES P; MD, 1968, UNIVERSITY OF ROCHESTER; MPH, 1974, UNIVERSITY OF WASHINGTON; quality-of-care assessment
MARLATT, G ALAN; PhD, 1968, INDIANA UNIVERSITY; cognitive-behavior therapy and assessment, addictive behaviors, relapse prevention, harm reduction
MARTIN, DIANE P; PhD, 1979, UNIVERSITY OF WASHINGTON; research methods; health services quality, use, and outcomes
MAYER, JONATHAN D; PhD, 1977, UNIVERSITY OF MICHIGAN; medical geography, health policy, env. health, epidemiology, Intl. health, infectious diseases
MEISCHKE, HENDRIKA W.; PhD, 1992, UNIVERSITY OF MICHIGAN; health communication, with an emphasis on mass media and health
MILGROM, PETER M; DDS, 1972, UNIVERSITY OF CALIFORNIA (SAN FRANCISCO); management of fearful and phobic dental patients, quality of dental care.
MITCHELL, PAMELA H; PhD, 1991, UNIVERSITY OF WASHINGTON; neuroscience nursing, diagnostic strategies
MOCK, CHARLES N.; MD, 1980, BROWN UNIVERSITY; injury: epidemiology, prevention, treatment; especially in less-developed countries
MONSEN, ELAINE R; PhD, 1961, UNIVERSITY OF CALIFORNIA (BERKELEY); nutrition, dietetics
MOURADIAN, WENDY ELYSE; MD, 1977, COLUMBIA UNIVERSITY; Ethics and quality of life in children's oral, craniofacial health.
MUECKE, MARJORIE A; PhD, 1976, UNIVERSITY OF WASHINGTON; community health, medical anthropology, reproductive health, Southeast Asia (Thailand)
MURPHY, WENDY ELYSE; MD, 1977, COLUMBIA UNIVERSITY; Ethics and quality of life in children's oral, craniofacial health.
MUECKE, MARJORIE A; PhD, 1976, UNIVERSITY OF WASHINGTON; community health, medical anthropology, reproductive health, Southeast Asia (Thailand)
MURPHY, WENDY ELYSE; MD, 1977, COLUMBIA UNIVERSITY; Ethics and quality of life in children's oral, craniofacial health.
MUECKE, MARJORIE A; PhD, 1976, UNIVERSITY OF WASHINGTON; community health, medical anthropology, reproductive health, Southeast Asia (Thailand)
NORRIS, THOMAS E.; MD, 1973, UNIVERSITY OF TEXAS (AUSTIN); neurosurgery, quality-of-care assessment
OBERLE, MARK W.; MD, 1974, JOHNS HOPKINS UNIVERSITY; Public Health; Native American Health.
PATRICK, DONALD L.; PhD, 1972, COLUMBIA UNIVERSITY; health status and quality of life, end of life, adolescents
PEARLMAN, ROBERT A; MD, 1975, BOSTON UNIVERSITY; gerontology
PERRIN, EDWARD; PhD, 1961, STANFORD UNIVERSITY; biostatistics, health information, health services research methodology
PLOUGH, ALONZO L.; PhD, 1978, CORNELL UNIVERSITY; anthropology, sociology or social welfare and public affairs/policy, epidemiology
PSATY, BRUCE M.; PhD, 1979, INDIANA UNIVERSITY; cardiovascular disease, coronary heart disease, hypertension, pharmacoepidemiology
RAMSEY, SCOTT D.; PhD, 1994, UNIVERSITY OF PENNSYLVANIA; economics in medicine
REIBER, GAYLE; PhD, 1989, UNIVERSITY OF WASHINGTON; epidemiology and health services research on preventing complications of diabetes
ROSENBLATT, ROGER A; MPH, 1971, HARVARD UNIVERSITY; MD, 1971, HARVARD UNIVERSITY; research into the organization and delivery of health services, rural health policy
ROSS, AUSTIN; MPH, 1955, UNIVERSITY OF CALIFORNIA (BERKELEY); ambulatory care, health care delivery systems
SULLIVAN, SEAN; PhD, 1992, UNIVERSITY OF CALIFORNIA (BERKELEY); health economics, pharmaceutical outcomes research and health policy
THOMPSON, ENGELBERTA; PhD, 1981, WESTERN MICHIGAN UNIVERSITY; community studies, cancer prevention, smoking cessation, childrens pesticide exposure
THOMPSON, FRANCES ELAINE A; PhD, 1990, UNIVERSITY OF WASHINGTON; attribution theory, adolescent drug use, suicide
UNUTZER, JURGEN; MA, 1988, UNIVERSITY OF CHICAGO; MD, 1990, VANDERBILT UNIVERSITY; MPH, 1996, UNIVERSITY OF WASHINGTON; Mental health services in primary care. Depression & comorbid medical illness.
VITALIANO, PETER P; PhD, 1975, SYRACUSE UNIVERSITY; psychiatric methodology (epidemiology, design, psychometrics), behavioral medicine
WAGNER, EDWARD H; MD, 1965, STATE UNIVERSITY OF NEW YORK (BUFFALO); MPH, 1972, UNIVERSITY OF NORTH CAROLINA; clinical epidemiology and health services research, health promotion and disease prevention
WATTS, CAROLYN A.; PhD, 1976, JOHNS HOPKINS UNIVERSITY; health economics and policy
WICKIZER, THOMAS M.; PhD, 1989, UNIVERSITY OF MICHIGAN; health economics, health policy, program evaluation, quality improvement, occupational health
WILLIAMS, MICHELLE A.; DSc, 1991, HARVARD UNIVERSITY; reproductive and perinatal epidemiology, cancer epidemiology
WOLF, FREDRIC M; PhD, 1980, KENT STATE UNIVERSITY; clinical decision making, evaluation of new technology, evidence-based health care
YUEH, BEVAN; MD, 1989, STANFORD UNIVERSITY; clinical epidemiology of hearing loss and head and neck cancer

Research Professor
BEATON, RANDAL D; PhD, 1972, UNIVERSITY OF WASHINGTON; assessment and treatment of temporomandibular joint pain and dysfunction
CHAPKO, MICHAEL K; PhD, 1972, CITY UNIVERSITY OF NEW YORK; ambulatory care, long-term care, cost-effectiveness in health care, international health
CHEADELE, ALLEN D; PhD, 1987, UNIVERSITY OF CALIFORNIA (BERKELEY); community based research and program evaluation
MAYNARD, CHARLES C; PhD, 1986, UNIVERSITY OF WASHINGTON; cardiovascular health services research
TAYLOR, VICTORIA M.; MD, 1978, UNIVERSITY OF NOTTINGHAM (UK); MPH, 1989, UNIVERSITY OF WASHINGTON; cancer control in minority populations
URBAN, NICOLE D.; MS, 1973, HARVARD UNIVERSITY; DSc, 1978, HARVARD UNIVERSITY; analysis of the cost-effectiveness of disease prevention trials and interventions

Associate Professor
BELL, MICHELLE; PhD, 1984, UNIVERSITY OF WASHINGTON; maternal/child health, adolescent health, access to health services for disadvantaged populations
BRADLEY, KATHARINE A; MD, 1987, STANFORD UNIVERSITY; MPH, 1993, UNIVERSITY OF WASHINGTON; general internal medicine
CHRISTAKIS, DIMITRI A; MD, 1993, UNIVERSITY OF PENNSYLVANIA; MPH, 1998, UNIVERSITY OF WASHINGTON; general pediatrics
DOCTOR, JASON N.; PhD, 1995, UNIVERSITY OF CALIFORNIA (SAN DIEGO); medical decision making, health economics, decision theory
DOESCHER, MARK; MD, 1989, UNIVERSITY OF CALIFORNIA (SAN FRANCISCO); family medicine, medically vulnerable populations, primary care research
ENSIGN, B. JOSEPHINE; MS, 1986, VIRGINIA COLLEGE OF MEDICINE; MPH, 1992, JOHNS HOPKINS UNIVERSITY; DPH, 1994, JOHNS HOPKINS UNIVERSITY; health care program planning and evaluation for marginalized populations and high-risk youth
FLUIM, DAVID R; MD, 1991, UNIVERSITY OF MIAMI (FLORIDA); improving surgical care quality in the community at large, identifying & promoting “best” practices
GOLDBAUM, GARY M.; MD, 1978, UNIVERSITY OF COLORADO (DENVER); MPH, 1989, UNIVERSITY OF WASHINGTON; preventive medicine, chronic diseases prevention, injury prevention
HAZLET, THOMAS K.; DPH, 1991, UNIVERSITY OF CALIFORNIA (BERKELEY); pharmaceuticals policy, outcomes and bioethics
HELGERSON, STEVEN D.; MD, 1973, UNIVERSITY OF WASHINGTON; MPH, 1976, UNIVERSITY OF WASHINGTON; Public health practice and epidemiologic field investigation
HUEBNER, COLLEEN ELLEN; PhD, 1991, UNIVERSITY OF WASHINGTON; the social bases of developmental problems in early childhood
JOHNSON, DONNA; PhD, 1995, UNIVERSITY OF WASHINGTON; public health nutrition practice: obesity, maternal and child nutrition
KIENAST, PHILIP K; PhD, 1972, MICHIGAN STATE UNIVERSITY; human resources management
KINNE, SUSAN; PhD, 1986, UNIVERSITY OF WASHINGTON; disability statistics/prevention, measurement of community needs, worksite health promotion
KOJPAR, BRANKO; PhD, 1996, UNIVERSITY OF OSLO (NORWAY); statistics and epidemiological studies
LAFFERTY, WILLIAM E.; MD, 1978, UNIVERSITY OF KANSAS; STDs, HIV/AIDS, surveillance and epidemiology of STD, managed care
LESSLER, DANIEL; MD, 1986, STANFORD UNIVERSITY; MHA, 1992, UNIVERSITY OF WASHINGTON; health services research pertaining to cost-effectiveness, quality of care, medical management
LOZANO, PAULA; MD, 1989, HARVARD UNIVERSITY; MPH, 1994, UNIVERSITY OF WASHINGTON; general pediatrics, asthma, evidence-based medicine
LYDON-ROCHELLE, MONA; PhD, 1999, UNIVERSITY OF WASHINGTON; epidemiology in maternal health
MACIEJEWSKI, MATTHEW L.; PhD, 1998, UNIVERSITY OF MINNESOTA; managed care, outcomes research, research methods, health economics, diabetes
MELZER, SANFORD M.; MD, 1982, MT SINAI SCHOOL OF MEDICINE; general pediatrics
ROBINS, LYNNE S; PhD, 1990, UNIVERSITY OF MICHIGAN; cultural competence, physician-patient communication, qualitative research assessment
RUTTER, CAROLYN; PhD, 1991, UNIVERSITY OF CALIFORNIA (LOS ANGELES); evaluation of diagnostic tests, ROC curve analysis and correlated data problems
SALES, ANNE; PhD, 1998, UNIVERSITY OF MINNESOTA; patient and organizational outcomes, health care work force, health economics
SHELL-DUNCAN, BETTINA; PhD, 1994, PENNSYLVANIA STATE UNIVERSITY; health assessment in traditional societies, including immunity, nutrition, and anthropological demog
SPIGNER, CLARENCE; DPH, 1987, UNIVERSITY OF CALIFORNIA (BERKELEY); health of the disadvantaged; race/ethnic relations; societal behavior, popular culture
SPIGNER, CLARENCE; MPH, 1982, UNIVERSITY OF CALIFORNIA (BERKELEY); health of the disadvantaged; race/ethnic relations; societal behavior, popular culture
STOUT, JAMES W.; MAT, 1981, DUKE UNIVERSITY; MD, 1986, WAKE FOREST UNIVERSITY; childhood asthma, health services and epidemiology
ZIERLER, BRENDA; PhD, 1996, UNIVERSITY OF WASHINGTON; research in patient with venous thromboembolism; clinical outcomes, process outcomes

Research Associate Professor
JOHNSON, LEONARD CLARK; PhD, 1978, UNIVERSITY OF WASHINGTON; applied research methods including development in applied statistics, assessment, and analysis
LALONDE, BERNADETTE; PhD, 1979, UNIVERSITY OF TORONTO (CANADA); public health program development, process and outcome program evaluation, evaluation research
RIVIN, BETH E.; MD, 1982, EAST CAROLINA UNIVERSITY; MPH, 1985, HARVARD UNIVERSITY; Health and Human Rights
WEAVER, MARCIA A; PhD, 1986, UNIVERSITY OF CHICAGO; HIV/AIDS, cost-effectiveness of community-based care, contingent valuation, health care reform

Assistant Professor
KARRAS, BRYANT THOMAS; MD, 1995, UNIVERSITY OF WISCONSIN; public health informatics, guidelines, bioterrorism surveillance
MASTROIANNI, ANNA C.; JD, 1986, UNIVERSITY OF PENNSYLVANIA; MPH, 1997, UNIVERSITY OF WASHINGTON; Law, ethics and policy, genetics, reproduction, human subjects research
PHELAN, ELIZABETH A.; MD, 1992, TUFTS UNIVERSITY; MS, 1998, UNIVERSITY OF WASHINGTON; prevention of functional decline in older adults, how systems can support preservation of function

Research Assistant Professor
LIU, CHUAN-FEN; PhD, 1994, UNIVERSITY OF MINNESOTA; health economics, health services research, mental health
RIDGE, CHRISTINE A; PhD, 1997, UNIVERSITY OF WASHINGTON; children's oral health - cultural diversity.
dietary influences; symptom self-report in children

Lecturer
DOWNER, ANN E.; MS, 1984, UNIVERSITY OF WASHINGTON; EdD, 1996, SEATTLE UNIVERSITY; education and training, educational program design and development, health communication

GONZALES, VIRGINIA; MSW, 1971, UNIVERSITY OF CALIFORNIA (BERKELEY); MPH, 1974, UNIVERSITY OF CALIFORNIA (BERKELEY); EdD, 1988, HARVARD UNIVERSITY; women’s health, STI/HIV/AIDS prevention in United States and developing countries

HANKEN, MARY A.; PhD, 1989, UNIVERSITY OF WASHINGTON; health information systems

KATZ, AARON; Public Health Cert, 1975, UNIVERSITY OF TORONTO (CANADA); health policy, public health, determinants of health

MASUDA, DAVID; MD, 1980, UNIVERSITY OF NORTH DAKOTA; biomedical and health informatics

MASUDA, DAVID; MS, 1996, UNIVERSITY OF WISCONSIN; biomedical and health informatics

MURPHY, GRETCHEN C.; MED, 1973, UNIVERSITY OF WASHINGTON; health information systems, health informatics, electronic health records

PILCHER, MARTHA G; PhD, 1985, GEORGIA INSTITUTE OF TECHNOLOGY; operations research/operations management, health care applications and logistics

REES, JANE; MS, 1972, UNIVERSITY OF WASHINGTON; nutritional support of adolescent health, especially during pregnancy; eating disorders

SAPPPINGTON, JEREMY L.; MPH, 1964, UNIVERSITY OF NORTH CAROLINA; systems theory, human resources management, undergraduate studies in public health

STILLMAN, DENNIS; MHA, 1979, UNIVERSITY OF WASHINGTON; health care financial management, management development

THOMPSON, JOHN R.; MSW, 1976, UNIVERSITY OF WASHINGTON; public health practice, health policy analysis, workforce development

WELTON, WILLIAM E.; MHA, 1972, UNIVERSITY OF MICHIGAN; DPH, 1999, UNIVERSITY OF MICHIGAN; strategic and organizational effectiveness of health systems

Pathobiology

Professor
CAMPBELL, LEE ANN; PhD, 1982, PENNSYLVANIA STATE UNIVERSITY; molecular biology and pathogenic mechanisms of chlamydiae

CARTER, WILLIAM G; PhD, 1974, UNIVERSITY OF CALIFORNIA (DAVIS); elucidation of components in cell attachment and cell spreading in normal cells

EMERMAN, MICHAEL; PhD, 1986, UNIVERSITY OF WISCONSIN; Molecular biology of the human immunodeficiency virus

HAIGWOOD, NANCY L.; PhD, 1980, UNIVERSITY OF NORTH CAROLINA; host immunity in the control and prevention of AIDS

HAKOMORI, SEN-ITIROH; MD, 1951, TOHOKU IMPERIAL UNIVERSITY (JAPAN); DrMedSci, 1956, TOHOKU IMPERIAL UNIVERSITY (JAPAN); membrane biochemistry and glycoproteins

KENNY, GEORGE E; PhD, 1961, UNIVERSITY OF MINNESOTA; antigenic structure

KUO, CHO-CHOU; PhD, 1970, UNIVERSITY OF WASHINGTON; chlamydiae

LUKEHART, SHEILA A; PhD, 1978, UNIVERSITY OF CALIFORNIA (LOS ANGELES); immunology of infectious diseases, microbiology, sexually transmitted diseases

MCELRAH, MARGARET JULIANA; PhD, 1978, MEDICAL UNIVERSITY OF SOUTH CAROLINA; infectious diseases

OVERBAUGH, JULIE MAUREEN; PhD, 1983, UNIVERSITY OF COLORADO (BOULDER); molecular mechanisms of virus-host cell interactions/retroviral pathogenesis/aids

PARSONS, MARILYN; PhD, 1979, STANFORD UNIVERSITY; parasite cell biology

RAUSCH, ROBERT L.; PhD, 1949, UNIVERSITY OF WISCONSIN; parasitology, helminthic zooneses

ROBERTS, MARILYN C; PhD, 1978, UNIVERSITY OF WASHINGTON; antibiotic resistance genes, plasmids, sexually transmitted diseases, oral microbiology

ROSENFELD, MICHAEL E.; PhD, 1981, UNIVERSITY OF WISCONSIN; mechanisms of atherogenesis and macrophage gene expression

SMITH, ARNOLD L; MS, 1964, UNIVERSITY OF MISSOURI; MD, 1964, UNIVERSITY OF MISSOURI; Investigating the biology of the human-restricted bacterium Haemophilius

STUART, KENNETH DANIEL; PhD, 1969, UNIVERSITY OF IOWA; molecular biology of parasites

VAN VOORHIS, WESLEY C; PhD, 1983, ROCHEFELLER UNIVERSITY; infectious diseases

WHITE, THEODORE C; PhD, 1984, UNIVERSITY OF CALIFORNIA (DAVIS); molecular mechanisms of virulence and drug resistance in pathogenic yeasts

Research Professor
LAMPE, PAUL D; PhD, 1984, UNIVERSITY OF MINNESOTA; regulation of intercellular communication via gap junctions

LINIAL, MAXINE L; PhD, 1970, TUFTS UNIVERSITY; retroviral replication and genetics, retroviral transformation

MYLER, PETER J.; PhD, 1982, UNIVERSITY OF QUEENSLAND (AUSTRALIA); regulation of gene expression in protozoan parasites

REED, STEPHEN G; PhD, 1979, UNIVERSITY OF MONTANA; immune response to human pathogens

Associate Professor
FEAGIN, JEAN E.; PhD, 1982, STANFORD UNIVERSITY; molecular parasitology, emphasizing gene organization and expression in protozoans

KOELLE, DAVID; MD, 1985, UNIVERSITY OF WASHINGTON; allergy and infectious diseases

KURATH, GAEL; PhD, 1984, OREGON STATE UNIVERSITY; molecular biology and evolution of RNA viruses that infect fish

LINGAPPA, JAISRI; PhD, 1985, HARVARD UNIVERSITY; cell biology of virus assembly; host proteins involved in assembly of HIV and other viruses

ROSE, TIMOTHY M; PhD, 1981, UNIVERSITY OF GENEVA (SWITZERLAND); molecular biology of tumor viruses, cell growth, differentiation, and transformation

SHERMAN, DAVID R.; PhD, 1987, VANDERBILT UNIVERSITY; molecular genetics, microbiology and biochemistry of pathogenic mycobacteria

Research Associate Professor
CANGELOSI, GERARD A.; PhD, 1984, UNIVERSITY OF CALIFORNIA (DAVIS); molecular biology of tuberculosis

Assistant Professor
FRIED, MICHAL; PhD, 1991, HEBREW UNIVERSITY (ISRAEL); Malaria pathogenesis, pregnancy malaria, Parasite adhesion in the placenta, immune responses to malaria

KIRK, ELIZABETH; PhD, 1995, UNIVERSITY OF WASHINGTON; nutrition, atherosclerosis, and diabetes

Research Assistant Professor
SMITH, JOSEPH; PhD, 1994, WASHINGTON UNIVERSITY; Plasmodium falciparum, malaria
Professor

CATALANO, RICHARD F; PhD, 1982, UNIVERSITY OF WASHINGTON; criminology, violence and drug abuse prevention, promotion of positive youth development

GILCHRIST, LEWYNE D; PhD, 1981, UNIVERSITY OF WASHINGTON; health promotion and disease prevention in community settings, women's health, research methods

HAWKINS, JOHN D; PhD, 1975, NORTH-WESTERN UNIVERSITY; crime and delinquency, substance abuse, social development, research, prevention

HOOYMAN, NANCY; PhD, 1974, UNIVERSITY OF MICHIGAN; aging, caregivers of dependents, feminist practice, community organization development

LEVY, RONA L; PhD, 1974, UNIVERSITY OF MICHIGAN; research methodology, single-case evaluation, health care, behavioral medicine, biofeedback

LONGRES, JOHN F; PhD, 1970, UNIVERSITY OF MICHIGAN; race and ethnicity, children, youth, and families

MORRISON, DIANE M; PhD, 1982, UNIVERSITY OF WASHINGTON; sexual decision-making, attitudes and behavior, teen pregnancy

PECORA, PETER; PhD, 1982, UNIVERSITY OF WASHINGTON; child welfare practice, foster care, family preservation services, personnel management

RESNICK, HERMAN; PhD, 1970, BRYN MAWR COLLEGE; organizational development, group dynamics, planned change, environmental psychology, social welfare

RICHY, CHERYL A; DSW, 1974, UNIVERSITY OF CALIFORNIA (BERKELEY); cultural and gender issues, intervention design and research

ROFFMAN, ROGER ALAN; DSW, 1983, UNIVERSITY OF CALIFORNIA (BERKELEY); alcoholism and drug abuse, research methodology, program evaluation

SPIEKER, SUSAN J; PhD, 1982, CORNELL UNIVERSITY; developmental psychology, infant security, mother-infant interaction

STIER, FLORENCE E; MS, 1941, UNIVERSITY OF PITTSBURGH; social welfare planning and program development

WEATHERLEY, RICHARD A; PhD, 1975, MASSACHUSETTS INSTITUTE OF TECHNOLOGY; social welfare policy and administration, poverty and inequality

WHITTAKER, JAMES; PhD, 1970, UNIVERSITY OF MINNESOTA; interpersonal practice with individuals, families, and small groups; child and family policy

Associate Professor

AI, AMY; PhD, 1996, UNIVERSITY OF MICHIGAN; social work and health care,interdisciplinary teams in health care, growth and development

BERLEMAN, WILLIAM C; MSW, 1960, UNIVERSITY OF WASHINGTON; undergraduate social welfare, social welfare policy

DEAR, RONALD BRUCE; DSW, 1972, COLUMBIA UNIVERSITY; welfare and income maintenance policy and programs, fiscal impact of social programs

DUPLICA, MOYA M; MSW, 1956, ST LOUIS UNIVERSITY; social welfare policy and history, women and social policy, values and ethics

ELLIS, JACK A N; MSW, 1955, UNIVERSITY OF BRITISH COLUMBIA (CANADA); social welfare administration and planning, social work and the justice system

FREDRIKSEN GOLDSSEN, KAREN; PhD, 1993, UNIVERSITY OF CALIFORNIA (BERKELEY); gerontology, work and family dependent care, non-traditional families, social policy

HERRELL, JAMES E; DSW, 1966, UNIVERSITY OF SOUTHERN CALIFORNIA; social policy, social work and the justice system, research methodology, social and cultural change

ISHISAKA, ANTHONY H; MSW, 1968, UNIVERSITY OF CALIFORNIA (BERKELEY); DSW, 1978, UNIVERSITY OF CALIFORNIA (BERKELEY); social work practice, mental health services, services to minority communities, human development

KELLEY, JERRY LEE; MA, 1949, UNIVERSITY OF CHICAGO; social workers in schools, interviewing and counseling in human services

KEMP, SUSAN; PhD, 1994, COLUMBIA UNIVERSITY; supports to low-income families; public child welfare; social welfare history; social work theory

KRUZICH, JEAN; PhD, 1982, UNIVERSITY OF WASHINGTON; child maltreatment and substance abuse, influence of organizational characteristics on human service

Research Professor

WELLS, ELIZABETH A; PhD, 1984, UNIVERSITY OF WASHINGTON; Understanding, assessing, and intervening with issues related to psychoactive substance use.

Associate Professor

AL, AMY; PhD, 1996, UNIVERSITY OF MICHIGAN; social work and health care, interdisciplinary teams in health care, growth and development

BERLEMAN, WILLIAM C; MSW, 1960, UNIVERSITY OF WASHINGTON; undergraduate social welfare, social welfare policy

DEAR, RONALD BRUCE; DSW, 1972, COLUMBIA UNIVERSITY; welfare and income maintenance policy and programs, fiscal impact of social programs

DUPLICA, MOYA M; MSW, 1956, ST LOUIS UNIVERSITY; social welfare policy and history, women and social policy, values and ethics

ELLIS, JACK A N; MSW, 1955, UNIVERSITY OF BRITISH COLUMBIA (CANADA); social welfare administration and planning, social work and the justice system

FREDRIKSEN GOLDSSEN, KAREN; PhD, 1993, UNIVERSITY OF CALIFORNIA (BERKELEY); gerontology, work and family dependent care, non-traditional families, social policy

HERRELL, JAMES E; DSW, 1966, UNIVERSITY OF SOUTHERN CALIFORNIA; social policy, social work and the justice system, research methodology, social and cultural change

ISHISAKA, ANTHONY H; MSW, 1968, UNIVERSITY OF CALIFORNIA (BERKELEY); DSW, 1978, UNIVERSITY OF CALIFORNIA (BERKELEY); social work practice, mental health services, services to minority communities, human development

KELLEY, JERRY LEE; MA, 1949, UNIVERSITY OF CHICAGO; social workers in schools, interviewing and counseling in human services

KEMP, SUSAN; PhD, 1994, COLUMBIA UNIVERSITY; supports to low-income families; public child welfare; social welfare history; social work theory

KRUZICH, JEAN; PhD, 1982, UNIVERSITY OF WASHINGTON; child maltreatment and substance abuse, influence of organizational characteristics on human service

Research Associate Professor

ARTHUR, MICHAEL; PhD, 1990, UNIVERSITY OF VIRGINIA; Project Director—Community Youth Activity, Six State Prevention Needs and Assessment

HILL, KARL GORDON; PhD, 1991, BRANDEIS UNIVERSITY; Life-span human development, intergenerational mechanisms, parenting, substance use, crime

RYAN, ROSEMARY; PhD, 1987, UNIVERSITY OF WASHINGTON; behavioral HIV prevention research; AIDS services policy, planning and evaluation

Assistant Professor

ALLEN, ALLETHIA LEE; PhD, 1986, WALDEN UNIVERSITY; social work practice, social policy, interviewing, minority women, minority families, adolescents

BOYER, DEBRA; PhD, 1986, UNIVERSITY OF WASHINGTON; feminist research methodology, policy and evaluation issues, urban applied anthropology

EROSHEVA, ELENA A ; PhD, 2002, CARNEGIE MELLON UNIVERSITY;
statistical methodology in the social sciences

HALEY-LOCK, ANNA; MA, 1995, UNIVERSITY OF MICHIGAN; organizational theory & behavior, program & human resource management, nonprofit human services

LINCOLN, KAREN; PhD, 2001, UNIVERSITY OF MICHIGAN; Informal networks, the stress process, aging, SES, race, sociocultural factors and mental health

ROMICH, JENNIFER; PhD, 2002, NORTHWESTERN UNIVERSITY; Social policy, family and child well-being

WEST, MARGARET A; PhD, 1984, UNIVERSITY OF WASHINGTON; children and youth with developmental disabilities and their families

Research Assistant Professor

WALKER, DENISE D; PhD, 2001, UNIVERSITY OF NEW MEXICO; addictive behaviors, substance abuse treatment outcome, and motivational interviewing

Lecturer

AMIDEI, NANCY; MSW, 1968, UNIVERSITY OF MICHIGAN; poverty, public policy, advocacy

AVERILL, LLOYD J.; MA, 1952, UNIVERSITY OF ROCHESTER, MTh, 1966, COLGATE ROCHESTER DIVINITY SCHOOL; development and continuing education director

DE MELLO, STAN; MSW, 1982, DALHOUSIE UNIVERSITY (CANADA); MPA, 1983, DALHOUSIE UNIVERSITY (CANADA); cross-cultural social work practice

DELONG, JAMES B.; MSW, 1979, UNIVERSITY OF WASHINGTON; aging, men and gender issues, group work, human diversity and social justice, distance learning

HAGGERTY, KEVIN P.; MSW, 1989, UNIVERSITY OF WASHINGTON; Project Director—Focus on Families, Raising Healthy Children

ROBERTS, ELIZABETH A; MSW, 1975, UNIVERSITY OF WASHINGTON; aging, social policy and aging, social work administration and field education
