JAPAN 322 Japanese Literature II (5) VLPA Introduction to the major works of 19th-early 20th century Japan in English translation, with readings of representative fiction, poetry, and criticism, plus films of selected works. In English. Offered: W.

JAPAN 323 Japanese Literature III (5) VLPA Introduction to the major works of contemporary Japan in English translation, with readings that focus on the clash of cultures, generational struggles, and war, plus films that portray these themes and reflect modern Japanese life. In English. Offered: Sp.

JAPAN 342 The Japanese Language (5) VLPA K. Ohta Survey of the nature and structure of the Japanese language, covering genetic and typological affiliations, writing systems, lexicon, and features of Japanese sentence structures. Prerequisite: JAPAN 311 which may be taken concurrently.

JAPAN 343 Japanese Language in Society (5) JS&VLPA K. Ohta Survey of issues in Japanese language use. Areas covered include dialectical variation, language attitudes, gender differences, and pragmatics. Prerequisite: JAPAN 311 which may be taken concurrently.

JAPAN 345 Foreign Study: Advanced Japanese (1-15, max. 20) VLPA For participants in study abroad programs in Japan who complete
300-level language courses in approved programs in Japan. Evaluation by department/ faculty required.

JAPAN 360 Topics in Japanese Culture (5, max.15) VLPA Focuses on literature from a limited time period or particular aspects of pre-modern or modern Japanese culture.

JAPAN 395 Foreign Study: Japanese Linguistics or Literature (1-20, max. 20) VLPA For participation in study abroad programs in Japan who complete coursework in Japanese literature or linguistics.

JAPAN 405 History of the Japanese Language (5) VLPA Introduction to the history of the Japanese language, including phonology, morphology, syntax, and the writing system. Prerequisite: JAPAN 313. Recommended: JAPAN 440, JAPAN 471.

JAPAN 421 Fourth-Year Japanese I (5) I&S/ VLPA Reading, class discussion, oral presentations, and composition on topics related to the Japanese language and present-day Japan. Conducted in Japanese. Prerequisite: 2.5 in JAPAN 313, may not be repeated.

JAPAN 422 Fourth-Year Japanese II (5) I&S/ VLPA Reading, class discussion, oral presentations, and composition on topics related to the Japanese language and present-day Japan. Conducted in Japanese. Prerequisite: minimum grade of 2.5 in JAPAN 313, may not be repeated.

JAPAN 423 Fourth-Year Japanese II (5) I&S/ VLPA Reading, class discussion, oral presentations, and composition on topics related to the Japanese language and present-day Japan. Conducted in Japanese. Prerequisite: minimum grade of 2.5 in JAPAN 313, may not be repeated.

JAPAN 428 Advanced Oral Communication (3) VLPA Iwata Fourth-Year Japanese oral communication skills. Instruction in Japanese. Activities include task-based role-plays, speeches, discussions, conversations with native speakers, and study of societal aspects of speech. Prerequisite: JAPAN 313 with a grade of 2.5 or higher. Offered: AWSp.

JAPAN 431 Readings in Modern Japanese Literature (5) VLPA Reading and discussion of selected modern literary texts in the original language, concentrating on the short story. Close attention to grammar and syntax. Prerequisite: 2.5 in JAPAN 313; may not be repeated.

JAPAN 432 Readings in Modern Japanese Literature (5) VLPA Reading and discussion of selected modern literary texts in the original language, concentrating on the short story. Close attention to grammar and syntax.

JAPAN 433 Readings in Modern Japanese Literature (5) VLPA Reading and discussion of selected modern literary texts in the original language, concentrating on the short story. Close attention to grammar and syntax.

JAPAN 440 Introduction to Japanese Linguistics (5) VLPA A. Ohta, K. Ohta Overview of major topics in the linguistic description of Japanese: phonology, morphology, syntax, history, dialects, sociolinguistics, and the writing system. Elementary training in phonological, morphological, and syntactic analysis of Japanese. Prerequisite: JAPAN 313 which may be taken concurrently; JAPAN 342; recommended: introductory linguistics course.

JAPAN 443 Topics in Japanese Sociology (5) I&S/ VLPA A. Ohta Methodology and theory of sociolinguistic analysis. Reading of research literature and training in analysis of Japanese language data. Prerequisite: JAPAN 313 which may be taken concurrently; JAPAN 343.

JAPAN 445 Foreign Study: Fourth-Year Japanese (1-15, max. 20) VLPA For participants in study abroad programs in Japan who complete 400-level language courses in approved programs in Japan. Evaluation by department/ faculty required.

JAPAN 451 Readings in Japanese for China and Korea Specialists (5) VLPA

JAPAN 460 Readings in Japanese Culture (5, max. 15) VLPA Reading and discussion of texts in Japanese on various aspects of Japanese culture, such as film, anime, art, and other socio-cultural phenomena. Close attention to grammar and syntax. Prerequisite: minimum grade of 2.5 in JAPAN 313.

JAPAN 471 Introduction to Classical Japanese (5) VLPA Atkins Introduction to classical Japanese writing system, grammar, and vocabulary. Prerequisite: 2.5 in JAPAN 313; may not be repeated. Offered: A.

JAPAN 472 Readings in Classical Japanese Literature I (5) VLPA Atkins Continued study of the classical language with a transition to reading literary works and understanding their cultural contexts. Prerequisite: JAPAN 471. Offered: W.

JAPAN 481 Advanced Japanese Through Content (5) VLPA Ohta Instruction in Japanese. Dictionary skills in Japanese and Kanji required. Prerequisite: JAPAN 423; recommended: at least one semester of study abroad in Japan (one year desired), or advanced Japanese skills through heritage. Offered: Sp.

JAPAN 499 Undergraduate Research (3-5, max. 15) For Japanese language and literature majors. Offered: AWSpS.

JAPAN 505 Kambun (5) Atkinson Introduction to Kambun, a method of reading texts written in Chinese as Classical Japanese. Prerequisite: JAPAN 472; or JAPAN 471 and graduate standing.

JAPAN 531 Advanced Readings in Modern Japanese Literature (5, max. 15) Rapid reading of modern literary and critical texts. Prerequisite: JAPAN 433 or equivalent.

JAPAN 532 Advanced Readings in Modern Japanese Literature (5, max. 15) Rapid reading of modern literary and critical texts. Prerequisite: JAPAN 433 or equivalent.

JAPAN 533 Advanced Readings in Modern Japanese Literature (5, max. 15) Rapid reading of modern literary and critical texts. Prerequisite: JAPAN 433 or equivalent.

JAPAN 540 Seminar on Japanese Linguistics (3, max. 15) A. Ohta Problems in the history and structure of the Japanese language. Topics vary each quarter, according to the needs and interests of the students. Prerequisite: JAPAN 440 or permission of instructor.

JAPAN 561 No and Kyogen (5, max. 15) Close reading and analysis of No texts in Japanese, with some attention to Kyogen. Discussion of categorization, structure, imagery, style, mode, theme, authorship, source material, theory, and problems of translation. Prerequisite: JAPAN 472 or equivalent and permission of instructor.

JAPAN 571 Advanced Readings in Classical Japanese Literature (5) Continued readings in classical literary texts. Prerequisite: JAPAN 473 or permission of instructor.

JAPAN 572 Advanced Readings in Classical Japanese Literature (5) Continued readings in classical literary texts. Prerequisite: JAPAN 473 or permission of instructor.

JAPAN 573 Advanced Readings in Classical Japanese Literature (5) Continued readings in classical literary texts. Prerequisite: JAPAN 473 or permission of instructor.

JAPAN 580 Development of Modern Japanese Fiction (5, max. 15) Reading and translation of major works of modern fiction in the original, with emphasis on the chronological development of modern prose style. Offered: A.

JAPAN 590 Seminar in Japanese Literature (5, max. 15) Close examination of selected periods, writers, or genres, including problems of literary criticism in Japanese literature. Prerequisite: permission of instructor. Offered: Sp.

Korean

KOREAN 145 Foreign Study: Elementary Korean (1-15, max. 20) For participants in study abroad programs who complete elementary language courses in approved programs in Korea. Evaluation by department/faculty required.

KOREAN 245 Foreign Study: Intermediate Korean (1-15, max. 20) VLPA For participants in study abroad programs who complete intermediate language courses in approved programs in Korea. Evaluation by department/faculty required.

KOREAN 301 First-Year Korean for Novice Learners (5) Elementary speaking, listening, reading, and writing skills in modern Korean. Open only to students with no formal or informal background in the language. Offered: A.

KOREAN 302 First-Year Korean for Novice Learners (5) Elementary speaking, listening, reading, and writing skills in modern Korean. Open only to students with no formal or informal background in the language. Prerequisite: KOREAN 301. Offered: W.

KOREAN 303 First-Year Korean for Novice Learners (5) Elementary speaking, listening, reading, and writing skills in modern Korean. Open only to students with no formal or informal background in the language.
background in the language. Prerequisite: KOREAN 302. Offered: Sp.

KOREAN 304 Spoken Korean (10) VLPA The Korean language as spoken in ordinary conversational situations. Phonetic accuracy and appropriateness of idiom. May be taken any summer after completion of first-year Korean. Prerequisite: KOREAN 303. Offered: irregularly.

KOREAN 305 First-Year Korean for Heritage Learners (5) Elementary speaking, listening, reading, and writing skills in modern Korean. Open only to students with formal or informal background in the language or to students with Korean heritage. Prerequisite: score of 30-50 on KR100A placement test. Offered: A.

KOREAN 306 First-Year Korean for Heritage Learners (5) Elementary speaking, listening, reading, and writing skills in modern Korean. Open only to students with formal or informal background in the language or to students with Korean heritage. Prerequisite: KOREAN 305. Offered: W.

KOREAN 307 First-Year Korean for Heritage Learners (5) Elementary speaking, listening, reading, and writing skills in modern Korean. Open only to students with formal or informal background in the language or to students with Korean heritage. Prerequisite: KOREAN 305. Offered: Sp.

KOREAN 311 Second-Year Korean for Novice Learners (5) VLPA Development of further skills in the spoken and written languages. Open only to students with no formal or informal background in the language prior to first-year Korean at UW. Prerequisite: KOREAN 303 or placement test. Offered: A.

KOREAN 312 Second-Year Korean for Novice Learners (5) VLPA Development of further skills in the spoken and written languages. Open only to students with no formal or informal background in the language prior to first-year Korean at UW. Prerequisite: KOREAN 311 or placement test. Offered: W.

KOREAN 313 Second-Year Korean for Novice Learners (5) VLPA Development of further skills in the spoken and written languages. Open only to students with no formal or informal background in the language prior to first-year Korean at UW. Prerequisite: KOREAN 312 or placement test. Offered: Sp.

KOREAN 315 Second-Year Korean for Heritage Learners (5) VLPA Development of further skills in the spoken and written languages. Open only to students with formal or informal background in the language prior to first-year Korean at the UW. Prerequisite: either score of 0-41 on KR200A placement test or KOREAN 315. Offered: A.

KOREAN 316 Second-Year Korean for Heritage Learners (5) VLPA Development of further skills in the spoken and written languages. Open only to students with formal or informal background in the language prior to first-year Korean at the UW. Prerequisite: KOREAN 315. Offered: W.

KOREAN 317 Second-Year Korean for Heritage Learners (5) VLPA Development of further skills in the spoken and written languages. Open only to students with formal or informal background in the language prior to first-year Korean at the UW. Prerequisite: KOREAN 316. Offered: Sp.

KOREAN 345 Foreign Study: Advanced Korean (1-15, max. 20) VLPA For participants in study abroad programs who complete advanced language courses in approved programs in Korea. Evaluation by department/faculty required.

KOREAN 411 Readings in Contemporary Korean (5) VLPA Completes the introduction to Korean writing in mixed script of 311, 312, 313. Prerequisite: either minimum score of 42 on KR200A placement test or KOREAN 313. Offered: A.

KOREAN 412 Readings in Contemporary Korean (5) VLPA Provide experience in reading a variety of contemporary styles. Materials from published works include informal essays, short stories, one-act plays, academic essays, and newspaper editorials. Offered: W.

KOREAN 413 Readings in Contemporary Korean (5) VLPA Provide experience in reading a variety of contemporary styles. Materials from published works include informal essays, short stories, one-act plays, academic essays, and newspaper editorials. Offered: Sp.

KOREAN 415 Social Science Literature in Korean (3) VLPA Readings in selections from contemporary Korean publications in social science topics. Prerequisite: KOREAN 413. Offered: A.

KOREAN 416 Readings in Korean Literature (3) VLPA Reading of various literary texts which may include pre-modern Korean narrative and poetry as well as modern literature and drama. Prerequisite: KOREAN 413. Offered: W.

KOREAN 417 Readings in Korean Journals (3) VLPA Selections from Korean newspapers, news magazines, and other journals. Prerequisite: KOREAN 413. Offered: Sp.

KOREAN 445 Foreign Study: Korean Literature (1-15, max. 20) VLPA For participants in study abroad programs who complete course work in Korean literature.

KOREAN 499 Undergraduate Independent Study (3-5, max. 15) For students who have completed 417 or equivalent. Offered: AWSp.

KOREAN 501 Seminar in Korean Linguistics (3-5) Topics in Korean linguistics. Prerequisite: background in linguistics and permission of instructor.

KOREAN 502 Seminar in Korean Linguistics (3-5) Topics in Korean linguistics. Prerequisite: background in linguistics and permission of instructor.

KOREAN 503 Seminar in Korean Linguistics (3-5) Topics in Korean linguistics. Prerequisite: background in linguistics and permission of instructor.

KOREAN 531 Advanced Readings in Modern Korean Literature (5) Literature and literary criticism in Korean. Prerequisite: fourth-year Korean or equivalent. Offered: alternate years.

KOREAN 532 Advanced Readings in Traditional Vernacular Korean Literature (5) Readings in traditional Korean vernacular literature, including poetry, sung narrative, and fiction. Prerequisite: fourth-year Korean or equivalent. Offered: alternate years.

### Sanskrit

SNKRT 301 Introduction to Sanskrit (5) Cox, Salomon Basic grammar and vocabulary of the classical language. Reading of elementary texts from the epic or Puranic literature. Offered: A.

SNKRT 302 Introduction to Sanskrit (5) Cox, Salomon Basic grammar and vocabulary of the classical language. Reading of elementary texts from the epic or Puranic literature. Prerequisite: SNKRT 301. Offered: W.

SNKRT 303 Introduction to Sanskrit (5) Cox, Salomon Basic grammar and vocabulary of the classical language. Reading of elementary texts from the epic or Puranic literature. Prerequisite: SNKRT 302. Offered: Sp.

SNKRT 401 Intermediate Sanskrit (5) VLPA Cox, Salomon Further study of classical grammar; introduction to classical literature and Vedic language and texts. Prerequisite: SNKRT 303. Offered: A.

SNKRT 402 Intermediate Sanskrit (5) VLPA Cox, Salomon Further study of classical grammar; introduction to classical literature and Vedic language and texts. Offered: W.

SNKRT 403 Intermediate Sanskrit (5) VLPA Cox, Salomon Further study of classical grammar; introduction to classical literature and Vedic language and texts. Offered: W.

SNKRT 411 Advanced Sanskrit (3, max. 9) VLPA Cox, Salomon Reading and analysis of classical texts, chosen according to students' interests. Prerequisite: SNKRT 403. Offered: A.

SNKRT 412 Advanced Sanskrit (3, max. 9) VLPA Cox, Salomon Reading and analysis of classical texts, chosen according to students' interests. Offered: W.

SNKRT 413 Advanced Sanskrit (3, max. 9) VLPA Cox, Salomon Reading and analysis of classical texts, chosen according to students' interests. Offered: Sp.

SNKRT 491 Vedic Studies (3) VLPA Salomon Readings of selected Vedic texts, with linguistic, religious, and historical analyses. Includes background material on Vedic religion, literature, and culture. Prerequisite: SNKRT 303.

SNKRT 492 Vedic Studies (3) VLPA Salomon Readings of selected Vedic texts, with linguistic, religious, and historical analyses. Includes background material on Vedic religion, literature, and culture.

SNKRT 493 Vedic Studies (3) VLPA Salomon Readings of selected Vedic texts, with linguistic, religious, and historical analyses. Includes background material on Vedic religion, literature, and culture.

SNKRT 494 Readings in Religious Classics of India (5) VLPA Reading and analysis of the older religious brahmanical texts. Prerequisite: SNKRT 402.

SNKRT 495 Studies in Indian Thought (3, max. 9) VLPA Cox Religious and philosophical traditions in South Asia. The original documents studied vary from year to year. Prerequisite: SNKRT 402.

SNKRT 499 Undergraduate Research (3-5, max. 15) Primarily for Sanskrit language and literature majors. Offered: AWSp.

---

313
SNKRT 550 Seminar on Sanskrit Literature (3, max. 9) Salomon Detailed study of selected authors, periods, or traditions, within the context of Indian literary history. Prerequisite: SNKRT 403 or permission of instructor.

SNKRT 555 Seminar on Sanskrit Grammar (3, max. 6) Salomon Reading and critical study of traditional literature on grammar and language, including texts of Paninian and other schools. Offered: A.

SNKRT 560 Readings in Philosophical Sanskrit (3, max. 9) Cox, Potter, Salomon Intensive reading and analysis of Hindu or Buddhist philosophical texts. Prerequisite: SNKRT 494 or permission of instructor. Offered: AWSp.

SNKRT 570 Seminar in Indian Epigraphy and Paleography (3, max. 6) Salomon Introduction to the study of inscriptions and other original documents in Sanskrit and Prakrit languages and in Kharosthi, Brahmi, and derived scripts. History of writing in India and development of Indic scripts. Methods of critical evaluation of inscriptions as sources of political and cultural history. Prerequisite: SNKRT 403.

SNKRT 581 Readings in Buddhist Texts (3, max. 9) Cox Interpretation of original sources. Texts vary from year to year. Prerequisite: ability to study sources in the original languages, an introduction to Buddhist thought, and permission of instructor.

SNKRT 582 Readings in Buddhist Texts (3, max. 9) Cox Interpretation of original sources. Texts vary from year to year. Prerequisite: ability to study sources in the original languages, an introduction to Buddhist thought, and permission of instructor.

Thai

THAI 145 Foreign Study: Elementary Thai (1-15, max. 20) For participants in study abroad programs who complete elementary language courses in approved programs in Thailand. Evaluation by department faculty required.

THAI 245 Foreign Study: Intermediate Thai (1-15, max. 20) VLP A For participants in study abroad programs who complete intermediate language courses in approved programs in Thailand. Evaluation by department faculty required.

THAI 301 Beginning Thai (5) Kesavatana-Dohrs Introduction to modern spoken and written Thai. Emphasis on spoken language competency with additional skills in elementary reading and writing. Designed for students with no prior knowledge of Thai. Offered: A.

THAI 302 Beginning Thai (5) Kesavatana-Dohrs Introduction to modern spoken and written Thai. Emphasis on spoken language competency with additional skills in elementary reading and writing. Designed for students with no prior knowledge of Thai. Prerequisite: THAI 301. Offered: W.

THAI 303 Beginning Thai (5) Kesavatana-Dohrs Introduction to modern spoken and written Thai. Emphasis on spoken language competency with additional skills in elementary reading and writing. Designed for students with no prior knowledge of Thai. Prerequisite: THAI 302. Offered: Sp.

THAI 345 Foreign Study: Advanced Thai (1-15, max. 20) VLP A For participants in study abroad programs who complete 300-level language courses in approved programs in Thailand. Evaluation by department faculty required.

THAI 401 Intermediate Thai (5) VLP A Kesavatana-Dohrs Continuation of 303. Expands students' abilities in the four language skills of listening, speaking, reading, and writing. Prerequisite: THAI 303. Offered: A.

THAI 402 Intermediate Thai (5) VLP A Kesavatana-Dohrs Expands students' abilities in the four language skills of listening, speaking, reading, and writing. Prerequisite: THAI 401. Offered: W.

THAI 403 Intermediate Thai (5) VLP A Kesavatana-Dohrs Expands students' abilities in the four language skills of listening, speaking, reading, and writing. Prerequisite: THAI 402. Offered: Sp.

THAI 410 Accelerated Reading and Writing (5) VLP A Kesavatana-Dohrs Advanced reading and translation of selections from various Thai authors, with occasional practice in conversation and composition. Prerequisite: THAI 403. Offered: A.

THAI 411 Readings in Thai (3-5, max. 15) VLP A Kesavatana-Dohrs Advanced reading and translation of selections from various Thai authors, with occasional practice in conversation and composition. Prerequisite: THAI 410. Offered: W.

THAI 412 Readings in Thai (3-5, max. 15) VLP A Kesavatana-Dohrs Advanced reading and translation of selections from various Thai authors, with occasional practice in conversation and composition. Prerequisite: THAI 411. Offered: W.

THAI 413 Readings in Thai (3-5, max. 15) VLP A Kesavatana-Dohrs Advanced reading and translation of selections from various Thai authors, with occasional practice in conversation and composition. Prerequisite: THAI 412. Offered: Sp.

THAI 499 Undergraduate Research (3-5, max. 25) For Thai language and literature majors. Offered: AWSpS.

Urdu

URDU 311 Elementary Urdu (5) Modern literary Urdu. Reading, writing, conversation, and listening comprehension. Introduction to Perso-Arabic script.

URDU 312 Elementary Urdu (5) Modern literary Urdu. Reading, writing, conversation, and listening comprehension. Introduction to Perso-Arabic script. Prerequisite: URDU 311.

URDU 313 Elementary Urdu (5) Modern literary Urdu. Reading, writing, conversation, and listening comprehension. Introduction to Perso-Arabic script. Prerequisite: URDU 312.

URDU 323 Intermediate Urdu (5) Systematic expansion of vocabulary and grammar. Intermediate level prose and poetry readings. Expansion of skills in reading, writing, speaking, and listening comprehension. Prerequisite: URDU 322.

URDU 401 Advanced Urdu (5) Rapid reading of contemporary Urdu prose and poetry. Advanced conversation and composition. Prerequisite: URDU 323.

URDU 402 Advanced Urdu (5) Rapid reading of contemporary Urdu prose and poetry. Advanced conversation and composition. Prerequisite: URDU 401.

URDU 403 Advanced Urdu (5) Rapid reading of contemporary Urdu prose and poetry. Advanced conversation and composition. Prerequisite: URDU 452.

URDU 499 Independent Study (3-5, max. 15) For Urdu language and literature majors. Offered: AWSpS.

Vietnamese

VIET 111 First-Year Vietnamese (5) Nguyen Introduction to modern Vietnamese conversation. Emphasis on correct pronunciation, spelling, and sentence structure. Designed for students with no previous exposure to Vietnamese. Offered: A.

VIET 112 First-Year Vietnamese (5) Nguyen Introduction to modern Vietnamese conversation. Emphasis on correct pronunciation, spelling, and sentence structure. Designed for students with no previous exposure to Vietnamese. Prerequisite: VIET 111. Offered: W.

VIET 113 First-Year Vietnamese (5) Nguyen Introduction to modern Vietnamese conversation. Emphasis on correct pronunciation, spelling, and sentence structure. Designed for students with no previous exposure to Vietnamese. Prerequisite: VIET 112. Offered: Sp.

VIET 145 Foreign Study: Elementary Vietnamese (1-15, max. 20) For participants in study abroad programs who complete elementary language courses in approved programs in Vietnam. Evaluation by department faculty required.

VIET 211 Second-Year Vietnamese (5) VLP A Nguyen Continuation of 113. Development of conversation skills, reading for comprehension, and writing short compositions. Prerequisite: VIET 113. Offered: A.

VIET 212 Second-Year Vietnamese (5) VLP A Nguyen Development of conversation skills, reading for comprehension, and writing short compositions. Prerequisite: VIET 211. Offered: W.

VIET 214 Accelerated Vietnamese Reading and Writing (5) VLP A Nguyen Accelerated
course for fluent speakers who do not read or write Vietnamese. Emphasis on reading and writing through second-year level. Cannot be taken for credit in combination with any formal Vietnamese course. Credit/no credit only. Offered: AWSp.

VIET 245 Foreign Study: Intermediate Vietnamese (1-15, max. 20) VLPA For participants in study abroad programs who complete intermediate level language courses in approved programs in Vietnam. Evaluation by department faculty required.

VIET 345 Foreign Study: Advanced Vietnamese (1-15, max. 20) VLPA For participants in study abroad programs who complete intermediate level language courses in approved programs in Vietnam. Evaluation by department faculty required.

### Astrobiology

ASTR 150 The Planets (5) NW, QSR For liberal arts and beginning science students. Survey of the planets of the solar system, with emphases on recent space exploration of the planets and on the comparative evolution of the Earth and the other planets.

ASTR 190 Modern Topics in Astronomy for Non-Science Majors (1-15, max. 10) NW Topics of current interest, such as origin of chemical elements, novae and supernovae, white dwarfs, neutron stars, black holes, active galaxies, quasars, or interstellar medium and astrochemistry. Choice of topics depends on instructor and class interest. Prerequisite: either one 100- or one 200-level ASTR course.

ASTR 192 Pre-Major in Astronomy Research Seminar (3) NW Introduction to astronomical computing and research methods for students interested in Astronomy and in the Pre-Major in Astronomy Program. Co-requisite: ASTR 102. Offered: A.

ASTR 201 The Universe and the Origin of Life (5) NW, QSR Sequel to 101 or 102, emphasizing modern views of the atomic and molecular evolution of the universe from the initial "big bang" through the formation of the solar system and the emergence of biological forms on the earth. The latter part of the course considers questions about the existence of, and communication with, extraterrestrial intelligent life, and finally the ultimate fate of the cosmos.

ASTR 210 Distance and Time: Size and Age in the Universe (5) NW, QSR Space and time as basic concepts in physical science. How we define and measure them, how the concepts have developed over the centuries, and how modern measurements allow us to determine the size and age of the universe.

ASTR 211 The Universe and Change (5) NW, QSR Gravity as central to the form and evolution of the universe. Conceptual formulation of gravity from the Renaissance to Einstein. Its consequences from the falling of an apple to the slowing of the expansion of the universe.

ASTR 212 Life in the Universe (5) NW, QSR Nature and origin of cosmic large numbers. Steps to the formation of life, formation of planets (stars, galaxies, a long-lived universe), the anthropic principle. Searches for other planetary systems and extraterrestrial life.

ASTR 270 Public Outreach in Astronomy (3) NW/LIPA Emphasis on giving effective presentations, developing and giving educational programs to school-age groups, and communicating your knowledge of astronomy to others. Give talks at the Jacobsen Observatory on campus and presentations in the Astronomy Department’s planetarium. Learn to operate a telescope and the planetarium equipment. Prerequisite: one astronomy course at either the 100-, 200-, or 300-level.

ASTR 300 Introduction to Programming for Astronomical Applications (2) QSR Smith Introduction to programming needed for astronomical applications. Linus operating systems. PERL, IDL. Recommended for astronomy majors planning to take 400-level astronomy courses, to pursue individual research projects, or to apply for research experience for undergraduate appointments. Prerequisite: PHYS 121 which may be taken concurrently. Offered: W.

ASTR 301 Astronomy for Scientists and Engineers (3) NW Introduction to astronomy for students in the physical sciences or engineering. Topics similar to 101, but the approach uses more mathematics and physics. Prerequisite: PHYS 123.

ASTR 313 Science in Civilization: Physics and Astrophysics Since 1850 (5) I&S/NW Organization and pursuit of the physical and astrophysical sciences, focusing on the major unifying principles of physics and astronomy and the social and cultural settings in which they were created. Offered: jointly with HIST 313.

ASTR 321 The Solar System (3) NW Solar system; planetary atmospheres, surfaces and interiors, the moon, comets. The solar wind and interplanetary medium. Formation of the solar system. Prerequisite: PHYS 224 which may be taken concurrently. Offered: A.

ASTR 322 The Contents of Our Galaxy (3) NW Introduction to astronomy. Basic properties of stars, stellar systems, interstellar dust and gas, and the structure of our galaxy. Prerequisite: PHYS 224 which may be taken concurrently: PHYS 225 which may be taken concurrently. Offered: W.

ASTR 323 Extragalactic Astronomy and Cosmology (3) NW Galaxies, optical and radio morphology and properties. Clusters of galaxies, radio sources, and quasars. Observational cosmology. Prerequisite: ASTR 322 which may be taken concurrently. Offered: Sp.

ASTR 421 Stellar Observations and Theory (3) NW Observations and theory of the atmospheres, chemical composition, internal structure, energy sources, and evolutionary history of stars. Prerequisite: ASTR 322.

ASTR 423 High-Energy Astrophysics (3) NW High-energy phenomena in the universe. Includes supernova, pulsars, neutron stars, x-ray and gamma-ray sources, black holes, cosmic rays, quasi stellar objects, active galactic nuclei, diffuse background radiations, Radiative emission, absorption processes, and models derived from observational data. Prerequisite: PHYS 224; PHYS 225.

ASTR 425 Cosmology (3) NW QSR Agol, Quinn Studies the universe as a whole. Overview of fundamental observations of cosmology and an introduction to general relativity. Examines theories of the past and future history of the universe, the nature of dark matter and dark energy, and the origin of ordinary matter on the large-scale structure. Prerequisite: PHYS 224; PHYS 225. Offered: W.

ASTR 480 Introduction to Astronomical Data Analysis (5) NW Hands-on experience with electronic imaging devices (CCDs) and software for image reduction and analysis. Introduction to operating systems, reduction software, and statistical analysis with applications to CCD photometry. Prerequisite: ASTR 323, which may be taken concurrently; recommended: ASTR 300 if student does not have a strong UNIX background. Offered: Sp.

ASTR 481 Introduction to Astronomical Observation (5) NW Theory and practice of obtaining optical data at a telescope. Prepara-
ion, obtaining data with a CCD on a telescope, and subsequent data analysis for completion of a research project. Prerequisite: ASTR 480. Offered: S.

ASTR 482 Writing Scientific Papers (2) Szkody Principles of organizing, developing, and writing resumes, scientific research papers for journals and astronomy articles for general public interest. Prerequisite: ASTR 481, ASTR 499, PHYS 491, PHYS 492, or PHYS 493, any of which may be taken concurrently. Offered: A.

ASTR 497 Topics in Current Astronomy (1-3, max. 9) Recent developments in one field of astronomy or astrophysics.

ASTR 499 Undergraduate Research (*, max. 15) Special astronomical problems and observational projects, by arrangement with instructor.

ASTR 500 Practical Methods for Teaching Astronomy (1-3) Seminar in the preparation of lecture and workshop materials with emphasis on demonstration, visual aids, and the evaluation of students’ progress. Credit/no credit only.

ASTR 507 Physical Foundations of Astrophysics I (3) Thermodynamics from an astronomer’s point of view: black body radiation, basic radiative transfer, equation of state, degenerate gases, crystalization at high density.

ASTR 508 Physical Foundations of Astrophysics II (3) Introduction to astronomical hydrodynamics and magnetohydrodynamics, basic theorems and application to stellar and interstellar magnetic fields. Introduction to plasma physics and waves in a plasma.

ASTR 510 Nuclear Astrophysics (3) Big bang nucleosynthesis; nuclear reactions in stars; solar neutrinos and neutrino oscillations; core-collapse supernovae; nucleosynthesis in stars, novae, and supernovae; neutron stars; composition and sources of cosmic rays; gamma ray bursts; atmospheric neutrinos. Offered: jointly with PHYS 554; A.

ASTR 512 Extragalactic Astronomy (3) Types of galaxies. Integrated properties, content, and dynamics. Extragalactic distance scale, groups and clusters. Radio sources. Observational cosmology.

ASTR 513 Cosmology and Particle Astrophysics (3) Big bang cosmology; relativistic world models and classical tests; background radiation; cosmological implications of nucleosynthesis; baryogenesis; inflation; galaxy and large-scale structure formation; quasars; intergalactic medium; dark matter.

ASTR 519 Radiative Processes in Astrophysics (3) Theory and applications of astrophysical radiation processes: transfer theory; thermal radiation; theory of radiation fields and radiation from moving charges; bremsstrahlung; synchrotron; Compton scattering; plasma effects.

ASTR 521 Stellar Atmospheres (3) Theory of continuous radiation and spectral line formation. Applications to the sun and stars. Prerequisite: PHYS 421 or equivalent.

ASTR 521 Stellar Interniors I (4) Physical laws governing the temperature, pressure, and mass distribution in stars. Equation of state, opacity, nuclear energy generation, computational methods. Models of main sequence stars and star formation. Prerequisite: PHYS 421 or equivalent.

ASTR 523 Stellar Evolution (3) Theoretical and observational approaches to stellar evolution. Structure of red giants, supernovae, and white dwarfs. Observations of star clusters and the chemical composition of stars as they relate to the theory of stellar structure. Prerequisite: ASTR 551.

ASTR 541 Interstellar Matter (3) Physical conditions and motions of neutral and ionized gas in interstellar space. Interstellar dust, magnetic fields, formation of grains, clouds, and stars. Prerequisite: modern physics or permission of instructor.

ASTR 555 Planetary Atmospheres (3) Problems of origin, evolution, and structure of planetary atmospheres, emphasizing elements common to all; roles of radiation, chemistry, and dynamical processes; new results on the atmospheres of Venus, Mars, Jupiter, and other solar system objects in the context of comparative planetology. Offered: jointly with ATM S 555/ESS 581.

ASTR 556 Planetary Surfaces (3) Comparison of surfac processes and conditions on Mercury, Venus, Earth, moon, Mars, asteroids, and satellites of the great planets. Emphasis on understanding how and why planetary surfaces differ from one another and the implied course of solar-system evolution. Analysis of data from Earth-based telescopes and manned and unmanned space missions.

ASTR 557 Origin of the Solar System (3) Nebular and nonnebular theories of the solar system origin; collapse from the interstellar medium, grain growth in the solar nebula, formation of planetesimals and planets, early evolution of the planets and other possible planetary systems; physical and chemical evidence upon which the ideas concerning the origin of the solar system are based. Offered: jointly with ESS 583.

ASTR 575 Seminar in Astronomy (1-2, max. 20) Discussion of recent research in astronomy and astrophysics. Credit/no credit only. Prerequisite: permission of department.

ASTR 576 Astronomy Colloquium (1, max. 20) Current research topics in astronomy and astrophysics. Credit/no credit only. Prerequisite: permission of department.

ASTR 597 Topics in Observational Astrophysics (1-5, max. 20)

ASTR 598 Topics in Theoretical Astrophysics (1-5, max. 20)

ASTR 599 Advanced Astronomy Seminar (1-3, max. 6) Practical exercises in astrophysics. Emphasis on methods and techniques of simulation, acquisition, evaluation, and analysis of observational data and its interpretation using models of astrophysical systems. Prerequisite: permission of instructor.

ASTR 600 Independent Study or Research (*)

ASTR 700 Master’s Thesis (*)

ASTR 800 Doctoral Dissertation (*)

Atmospheric Sciences

ATM S 101 Weather (5) NW The earth’s atmosphere, with emphasis on weather observations and forecasting. Daily weather map discussions. Highs, lows, fronts, clouds, storms, jet streams, air pollution, and other features of the atmosphere. Physical processes involved in weather phenomena. Intended for nonmajors. Offered: AWSpS.

ATM S 111 Global Warming: Understanding the Issues (5) NW Ackerman, Anderson, Bitz, Fu, Jaegle, Thornton Includes a broad overview of the science of global warming. Discusses the causes, evidence, future projections, societal and environmental impacts, and potential solutions. Introduces the debate on global warming with a focus on scientific issues. Offered: AWSp.

ATM S 212 Air Pollution: From Urban Smog to the Ozone Hole (5) NW Alexander, Jaegle, Thornton Introduction to air pollution on local, regional, and global scales, with focus on the sources, transformation, and dispersion of pollutants responsible for urban smog, acid rain, climate change, and the ozone hole. Health and environmental effects of air pollutants, technological solutions, and international policy regulations. Offered: varies.

ATM S 301 Introduction to Atmospheric Sciences (5) NW Composition and structure of the atmosphere. Clouds and weather phenomena. Thermodynamic processes. Solar and terrestrial radiation. Air motions. Daily weather discussions and forecasts. For majors and nonmajors. Prerequisite: 2.0 in each of MATH 124; MATH 125; MATH 126; PHYS 121; PHYS 122; and PHYS 123. Offered: A.

ATM S 321 The Science of Climate (3) NW Evolution and present state of earth’s climate.
Emphasis on physical processes determining the climate of the earth’s atmosphere and surface: radiative transfer, energy balance, hydrologic cycle, and atmospheric and oceanic energy transport. Factors controlling climate change. Prerequisite: minimum of grade of 2.0 each of MATH 124; MATH 125; MATH 126; PHYS 121; PHYS 122; PHYS 123. Offered: Sp.

ATM S 340 Introduction to Thermodynamics and Cloud Processes (5) NW Thermodynamics and hydrosystems. Cloud and precipitation processes with emphasis on the microphysics. Prerequisite: either MATH 126, MATH 129, or MATH 136. Offered: W.

ATM S 358 Fundamentals of Atmospheric Chemistry (3) NW Review of basic principles of physical chemistry; evolution and chemical composition of earth’s atmosphere; half-life, residence and renewal time; sources, transformation, transport and sinks of gases in the troposphere; atmospheric aerosols; chemical cycles; air pollution; stratospheric chemistry. Recommended: CHEM 142; MATH 126; PHYS 123. Offered: Sp.

ATM S 370 Atmospheric Structure and Analysis (5) NW Structure and evolution of extratropical cyclones, fronts and convective systems. Surface and upper air analysis techniques. Radar and satellite data. Real-world applications of basic dynamical principles. Introduction to operational products and forecasting. Prerequisite: ATM S 301. Offered: W.

ATM S 390 Honors Tutorial in Atmospheric Sciences (*, max. 6) Review and discussion of selected problems in atmospheric sciences. Introduction to research methods. Presentation of a research paper. Offered: AWSpS.

ATM S 393 Atmospheric Physics (5) NW Energy transfer processes: solar and atmospheric radiation, turbulence, and boundary layer structure. Applications. Prerequisite: either ATM S 340 or PHYS 224. Offered: A.

ATM S 441 Atmospheric Motions I (3) NW Basic equations governing atmospheric motions and their elementary applications; circulation and vorticity; dynamics of midlatitude disturbances. Prerequisite: either AMATH 353 or MATH 309; MATH 324. Offered: A.

ATM S 442 Atmospheric Motions II (5) NW Wave dynamics, numerical prediction, development of midlatitude synoptic systems, and general circulation. Includes laboratory exercises. Prerequisite: ATM S 441. Offered: W.

ATM S 451 Instruments and Observations (5) NW Principles of operating instruments for measuring important atmospheric parameters (e.g., temperature, humidity, aerosol concentration). Concepts of sensitivity, accuracy, representativeness, time response. Manipulation of output data including signal processing and statistical analysis. Experimental design and implementation of the design in actual field experiments is included. Prerequisite: ATM S 370; ATM S 442; STAT 311. Offered: Sp.

ATM S 458 Global Atmospheric Chemistry (4) NW Global atmosphere as a chemical system. Physical factors and chemical processes. Natural variability and anthropogenic change. Cycling of trace substances. Global issues such as climate change, acid deposition, influences on biosphere. Prerequisite: either ATM S 358 or CHEM 458. Offered: jointly with CHEM 458; A.

ATM S 460 Water in the Environment (3) NW Baker, Raymond, Waddington, Warren Discusses the unique physical and chemical properties of the water molecule in relation to the atmospheric greenhouse effect, precipitation formation, oceanic circulations, infiltration of water through soils, geyser eruptions, and glacier and sea ice thickness. Prerequisite: either MATH 124, MATH 126, MATH 129, or MATH 136; PHYS 123. Offered: jointly with ESS 424/PHYS 460. Offered: A.

ATM S 480 Air-Quality Modeling (3) NW Evaluation of air-quality models relating air pollution emissions to environmental concentrations. Topics include meteorological dispersion models and various “receptor” models based on chemical “fingerprinting” of sources. Emphasizes current problems. Offered: jointly with CEE 480; W.

ATM S 490 Current Weather Analysis (1, max. 6) NW Reviews and analyzes current weather situations and forecasts. Promotes active discussion between the leader and attendees, and provides exposure to practical aspects of the forecasting, the structure of synoptic and local weather phenomena, and applications of basic meteorological concepts. Offered: AWSp.

ATM S 492 Readings in Meteorology or Climatology (*) Credit/no credit only. Offered: AWSpS.

ATM S 503 Atmospheric Motions I (3) Basic equations governing atmospheric motions and their elementary applications; circulation and vorticity; dynamics of midlatitude disturbances. Offered: A.

ATM S 504 Atmospheric Motions II (5) Wave dynamics, numerical prediction, development of midlatitude synoptic systems, and general circulation. Prerequisite: either ATM S 441 or ATM S 503. Offered: W.

ATM S 505 Introduction to Fluid Dynamics (4) Eulerian equations for mass, motion; Navier-Stokes equation for viscous fluids, Cartesian tensors, stress, strain relations; Kelvin’s theorem, vortex dynamics; potential flows, flows with high, low Reynolds numbers; boundary layers, introduction to singular perturbation techniques; water waves; linear instability theory. Prerequisite: AMATH 403 or permission of instructor. Offered: jointly with AMATH 505/ OCEAN 511; A.

ATM S 508 Geophysical Cycles (4) Descriptive, quantitative aspects of earth as biogeochemical system. Study of equilibria, transport processes, chemical kinetics, biogeochemical processes; their application to carbon, sulfur, nitrogen, phosphorus, other elemental cycles. Stability of biogeochemical systems; nature of human perturbations of their dynamics. Prerequisite: permission of instructor. Offered: jointly with OCEAN 523/CEM 523; Sp.

ATM S 510 Physics of Ice (3) Structure of the water molecule. Crystallographic structures of ice. Electrical, optical, thermal, and mechanical properties of ice; Growth of ice from vapor and liquid phases. Offered: jointly with ESS 531; alternate years; W.

ATM S 511 Formation of Snow and Ice Masses (3) Snow and ice climatology. Forcing of the ice crystals in clouds. Snow metamorphism. Transfer of radiative, sensible, and latent heat at snow and ice surfaces. Remote sensing of snow and ice. Growth and melt of sea ice. Climatic records from ice. Prerequisite: permission of instructor. Offered: jointly with ESS 532; alternate years; A.

ATM S 512 Dynamics of Snow and Ice Masses (3) Rheology of snow and ice. Sliding and processes at glacier beds. Thermal regime and motion of seasonal snow, glaciers, and ice sheets. Avalanches and glacier surges. Deformation and drift of sea ice. Response of natural ice masses to change in climate. Prerequisite: permission of instructor. Offered: jointly with ESS 533; alternate years; Sp.

ATM S 513 Structural Glaciology (3) Physical and chemical processes in snow, stratigraphy, and metamorphism. Interpretation of ice sheet stratigraphy in terms of paleoenvironment. Dynamic metamorphism of ice from flow. Structures formed at freezing interfaces. Structure of river, lake, and sea ice. Relationship between structures and bulk physical properties. Prerequisite: permission of instructor. Offered: jointly with ESS 534; alternate years; W.

ATM S 514 Ice and Climate (3) Examines the role of ice and snow in climate. Polar climate dynamics. Polar-global interactions. Modeling snow cover, sea ice, and ice-sheet balance, and flow in the climate system. Prerequisite: permission of instructor. Offered: jointly with ESS 535; alternate years.

ATM S 520 Atmospheric Sciences Colloquium (1, max. 15) Seminars on current research in advanced topics related to atmospheric
ATM S 521 Seminar in Atmospheric Dynamics (*) Directed at current research in the subject. For advanced students. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSp.

ATM S 522 Seminar in Clouds and Precipitation (*) Directed at current research in the subject. For advanced students. Credit/no credit only. Prerequisite: permission of instructor. Offered: AW.

ATM S 524 Seminar in Climate Dynamics and Energy Transfer (*) Directed at current research in the subject. For advanced students. Credit/no credit only. Prerequisite: permission of instructor. Offered: AW.

ATM S 525 Seminar Topics in Atmospheric Chemistry (1-3, max. 6) Seminar for atmospheric scientists, chemists, and engineers in problems associated with the chemical composition of the atmosphere. Topics range from the natural system to urban pollution and global atmospheric change. Faculty lectures and student participation. Prerequisite: CEE 301 or permission of instructor. Offered: jointly with CEE 553; W.

ATM S 532 Atmospheric Radiation: Introductory (3) Fundamentals of radiative transfer; absorption and scattering by atmospheric gases; elementary applications to constraints on the thermal structure, photochemistry, and remote sensing. Prerequisite: PHYS 225 or permission of instructor. Offered: jointly with ESS 571; Sp.

ATM S 533 Atmospheric Radiation: Advanced (3) Optical properties and particle absorption and scattering; solutions of radiative transfer equation in multiple scattering atmospheres; applications to atmospheric and surface energy balance and remote sensing. Prerequisite: ATM S 532/ESS 571 or permission of instructor. Offered: jointly with ESS 572; A.

ATM S 534 Remote Sensing of the Atmosphere and Climate System (3) Satellite systems for sensing the atmosphere and climate system. Recovery of atmospheric and surface information from satellite radiance measurements. Applications to research. Prerequisite: ATM S 532 or ATM S 553. Offered: jointly with ESS 521; alternate years.

ATM S 535 Cloud Microphysics and Dynamics (3) Basic concepts of cloud microphysics, water continuity in clouds, cloud dynamics, and cloud models. Prerequisite: ATM S 501 or permission of instructor. Offered: jointly with ESS 573; Sp.

ATM S 536 Mesoscale Storm Structure and Dynamics (3) Techniques of observing storm structure and dynamics by radar and aircraft, observed structures of precipitating cloud systems, comparison of observed structures with cloud models. Prerequisite: either ATM S 535 or ESS 573. Offered: alternate years; Sp.

ATM S 542 Synoptic and Mesoscale Dynamics (3) Quasi-geostrophic theory, baroclinic instability, symmetric instability, tropical disturbances, frontogenesis, orographic disturbances, convective storms. Prerequisite: ATM S 509/OCEAN S 512 and AMATH 402 or equivalents. Offered: Sp.

ATM S 545 General Circulation of Atmosphere (3) Requirements of the global angular momentum, heat, mass, and energy budgets upon atmospheric motions as deduced from observations. Study of the physical processes through which these budgets are satisfied. Prerequisite: ATM S 509/OCEAN S 512 or permission of instructor. Offered: A.

ATM S 552 Objective Analysis (3) Review of objective analysis techniques commonly applied to atmospheric problems; examples from the meteorological literature and class projects. Superposed epoch analysis, cross-spectrum analysis, filtering, eigenvector analysis, and optimum interpolation techniques. Offered: W.

ATM S 555 Planetary Atmospheres (3) Problems of origin, evolution, and structure of planetary atmospheres, emphasizing elements common to all; roles of radiation, chemistry, and dynamical processes; new results on the atmospheres of Venus, Mars, Jupiter, and other solar system objects in the context of comparative planetology. Offered: jointly with ASTR 555/ESS 581; alternate years.

ATM S 556 Planetary-Scale Dynamics (3) Zonally symmetric circulations, planetary waves, equatorial waves, dynamics of the middle atmosphere, trace constituent transport, nonlinear aspects of atmospheric flows. Prerequisite: ATM S 542 or permission of instructor. Offered: alternate years; Sp.

ATM S 558 Atmospheric Chemistry (3) Photochemistry of urban, rural, and marine tropospheric air, and of the natural and perturbed ozone in the middle atmosphere. Unity of the chemistries in these apparently different regimes. Prerequisite: ATM S 548 or ATM S 501 or CHEM 457 or permission of instructor. Offered: Sp.

ATM S 559 Climate Modeling (3) Itz, Thompson Principles of Earth system modeling. Emphasis on atmosphere, ocean sea ice, and land-surface components. Climate forcing. Appropriate use of models. Topics of current interest including carbon cycle, atmosphere chemistry, and biogeochemistry. Prerequisite: either ATM S/ OCEAN S/ESS 587, ATM S 504 or ATM S 505. Offered: jointly with ESS 559/OCEAN S 558; Sp.; alternate years.

ATM S 560 Atmosphere/Ocean Interactions (3) Observations and theory of phenomena of the coupled atmosphere-ocean system. El Nino/Southern Oscillation; decadal tropical variability; atmospheric teleconnections; midlatitude atmosphere-ocean variability. Overview of essential ocean and atmospheric dynamics, where appropriate. Credit/no credit only. Prerequisite: ATM S 509/OCEAN S 512. Offered: jointly with OCEAN S 560; alternate years; Sp.

ATM S 564 Atmospheric Aerosol and Multiphase Atmospheric Chemistry (3) Physics and chemistry of particles and droplets in the atmosphere. Statistics of size distributions, mechanisms, optics, and physical chemistry of atmospheric aerosols. Brownian motion, sedimentation, impaction, condensation, and hydrosopic growth. Prerequisite: permission of instructor. Offered: alternate years; W.

ATM S 575 Large Scale Dynamics of the Tropical Atmosphere (3) Observations and underlying dynamics of large-scale tropical circulations. Factors that determine regions of large-scale persistent precipitation in the tropics, thermal forcing of atmospheric circulations by these regions, and temporal variability of the forcing and response. Credit/no credit only. Prerequisite: ATM S 509/OCEAN S 512, ATM S 542. Offered: alternate years; W.

ATM S 585 Climate Impacts on the Pacific Northwest (4) Martinez, Snover Knowledge of past/future patterns of climate to improve Pacific Northwest resource management. Topics include the predictability of natural/human-caused climate changes; past societal reactions to climate impacts on water, fish, forest, and coastal resources; how climate and public policies interact to affect ecosystems and society. Offered: jointly with ESS/ENVIR/EMA 585, Sp.

ATM S 586 Current Research in Climate Change (2, max. 20) Weekly lectures focusing on a particular aspect of climate (topic to change each year) from invited speakers (both UW and outside), plus one or two keynote speakers followed by class discussion. Offered: jointly with ESS 586/OCEAN S 586.
ATM S 587 Climate Dynamics (3) Hartman, Thompson. Examines Earth’s climate system; distribution of temperature, precipitation, wind ice, salinity, and ocean currents; fundamental processes determining Earth’s climate; energy and constituent transport mechanisms; climate sensitivity; natural climate variability on interannual to decadal time scales; global climate models; predicting future climate. Offered: jointly with ESS 587/OCEAN 587; A

ATM S 588 The Global Carbon Cycle and Climate (3) Quay Oceanic and terrestrial biogeochemical processes controlling atmospheric CO2 and other greenhouse gases. Records of past changes in the earth’s carbon cycle from geological, oceanographic and terrestrial archives. Anthropogenic perturbations to cycles. Develop simple box models, discuss results of complex models. Offered: jointly with OCEAN 588/ESS 588; W.

ATM S 591 Special Topics (1-4, max. 9) Lecture series on topics of major importance in the atmospheric sciences. Prerequisite: permission of instructor.

ATM S 600 Independent Study or Research (*) Credit/no credit only. Offered: AWSpS.

ATM S 700 Master’s Thesis (*) Offered: AWSpS.

ATM S 800 Doctoral Dissertation (*) Offered: AWSpS.

Biology

The courses in biology listed below are administered by several departments. Other courses in biology are listed under such headings as Biochemistry, Biological Structure, and Microbiology.

BIOL 100 Introductory Biology (5) NW Develops an awareness of science by studying basic biological principles and their application to problems of humans and society in the contexts of special topics or themes, which vary quarter to quarter. For non-science majors only. Offered: AW.

BIOL 103 Plants in the Human Environment (5) NW del Moral Plant biology in human affairs: biodiversity, evolution, agricultural and conservation ecology, and climate change. Life cycles, plant growth and function, how plants interact with their environment and with other organisms, and how ecosystems recover from disturbance. Offered: W.

BIOL 104 Biology for Elementary School Teachers (5) NW Buttermore Basic concepts of biology, with emphasis on background needed for confident use of the new science curriculum materials in the elementary school. Offered: AW.

BIOL 106 Introductory Biology Seminar (1,3) max 6) NW Focuses on current topics in biology. Topics vary from quarter to quarter. Designed to enhance learning skills of students who intend to take BIOL 161-162 or BIOL 180/200/220 and major in one of the biological sciences. Intended for HHMI Fellows. Recommended: high school chemistry and biology, or one quarter of college chemistry.

BIOL 108 Evolution and Human Behavior (3) NW Introduction to evolution by natural selection, examining the light it can throw on human biology and behavior in such areas as the nature of sex differences, sexual conflict, and conflict between parents and children. Does not fulfill major requirements. Offered: jointly with BIO A 100.

BIOL 110 Freshman Discovery Seminar in Biology (5) NW Introduces incoming freshman to research basics and scholarly inquiry skills used in the study of biology.

BIOL 113 Introduction to Biosciences (1-3, max. 6) NW Independent study/topics related to material taken in BIOL 180, BIOL 200, and BIOL 220. Credit/no credit only. Offered: AWSpS.

BIOL 114 Astrobiology: Life in the Universe (5) NW Introduces students to the new science of astrobiology, study of the origin and evolution of life on Earth, and the search for microbial and intelligent life elsewhere in the Universe. Designed for non-science, liberal arts majors. Offered: jointly with ASTR/ASTBIO/ESS/OCEAN 115.

BIOL 115 Evolution (2) NW Evolutionary biology for nonmajors. Evolutionary history of the earth and various theories of evolution.

BIOL 117 Plant Identification and Classification (5) NW Osmundt Plant classification and diversity of seed plants; field study and laboratory identification of the common plant families and the conspicuous flora of western and central Washington. One full-day weekend field trip (optional). For non-majors. Offered: Sp.

BIOL 118 Survey of Physiology (5) NW Human physiology, for nonmajors and health sciences students. Offered: AWSpS.

BIOL 119 Elementary Physiology Laboratory (1) NW Prerequisite: BIOL 118 which may be taken concurrently. Offered: Asp.

BIOL 120 Current Controversies in Biology (2-5, max. 6) NW Explores a current controversial topic in biology, stressing information needed by the general public to make informed personal, political, and ethical decisions relating to this topic.

BIOL 161 General Biology (5) NW Living systems viewed from the subcellular to the community level, emphasizing the diversity, functioning, and interaction of whole organisms. Topics covered include cell structure and function, energy, genetics, animal physiology and development. Emphasizes the position of humans in the biological world. For nonmajors and majors in biology-related fields who need a thorough two-quarter introduction to biology. Recommended: high school chemistry; high school biology. Offered: A.

BIOL 162 General Biology (5) NW Living systems viewed from the subcellular to the community level, emphasizing the diversity, functioning, and interaction of whole organisms. Topics covered include cell structure and function, energy, genetics, animal physiology and development. Emphasizes the position of humans in the biological world. For nonmajors and majors in biology-related fields who need a thorough two-quarter introduction to biology. Prerequisite: either BIOL 101 or BIOL 161. Offered: W.

BIOL 179 Learning to Learn in the Sciences (2) Explores how to learn in the sciences. Develops various learning strategies, study skills, and personalized study plans to meet the new challenges of the BIOL 180 series through weekly in-class workshops and organized study sessions. Credit/no credit only. Corequisite: BIOL 180.

BIOL 180 Introductory Biology (5) NW For students intending to take advanced courses in the biological sciences or enroll in preprofessional programs. Mendelian genetics, evolution, biodiversity of life forms, ecology, conservation biology. First two-quarter series (BIOL 180, BIOL 200, BIOL 220). Cannot be taken for credit if BIOL 203 has already been taken. Prerequisite: either CHEM 150, CHEM 152, CHEM 155, CHEM 220, CHEM 222, or CHEM 237. Offered: AWSpS.

BIOL 200 Introductory Biology (5) NW For students intending to take advanced courses in the biological sciences or enroll in preprofessional programs. Metabolism and energetics, structure and function of biomolecules, cell structure and function, animal development. Second course in a three-quarter series (BIOL 180, BIOL 200, BIOL 220). Cannot be taken for credit if BIOL 201 has already been taken. Prerequisite: 1.5 in BIOL 180; either CHEM 150, CHEM 152, CHEM 155, CHEM 220, CHEM 223, or CHEM 237. Offered: AWSpS.

BIOL 220 Introductory Biology (5) NW For students intending to take advanced courses in the biological sciences or enroll in preprofessional programs. Animal physiology, plant development and physiology. Final course in a three-quarter series (BIOL 180, BIOL 200, BIOL 220). Cannot be taken for credit if BIOL 202 has already been taken. Prerequisite: 1.5 in BIOL 200; either CHEM 150, CHEM 152, CHEM 155, CHEM 220, CHEM 223, or CHEM 237. Offered: AWSpS.

BIOL 250 Marine Biology (3,5, max. 5) I&S, NW Lecture-laboratory course in Marine Biology focusing on physical, biological, and social aspects of the marine environment. Topics include oceanography, ecology, physiology, behavior, conservation, fisheries, exploration, and activism. Evening marine biology movies and weekend field trip. Honors section research project. Offered: jointly with FISH/OCEAN 250.

BIOL 293 Study Abroad — Biology (1-10, max. 10) NW For participants in UW study abroad program. Specific content varies and must be individually evaluated. Credit does not apply to major requirements without approval.

BIOL 302 Laboratory Techniques in Cell and Molecular Biology (4) NW Martin-Morris Explores the use of various cell and molecular laboratory techniques, such as PCR, cloning, gel electrophoresis, and bacterial transformation through hands-on experiments. Students produce a portfolio of techniques they have learned. Writing credit. Prerequisite: BIOL 355. Offered: Sp.

BIOL 319
BIOL 311 Biology of Fishes (3/5) NW Lecture and laboratory, of the morphological, physiologi-
ical, behavioral, and ecological diversity of fishes of the world; designed to provide a basic
foundation for advanced courses in all areas of
fishes. 3-credit option does not include
laboratory. Recommended: 10 credits biological
science. Offered: with FISH 311; W.

BIOL 317 Plant Classification and Identifica-
tion (5) NW Olmstead Classification and
diversity of seed plants; concepts and principles
of classification, lab and field study of common
plant families in Washington, and skill
development for identification of species.
Cannot be taken for credit if BIOL 117 or
BOTANY 113 taken. One weekend field trip.
Offered: concurrently with BIOL 117; SpS.

BIOL 330 Natural History of Marine
Invertebrates (5) NW Field and laboratory
course emphasizing the habits, habitats,
adaptations, and interrelationships of marine
animals. Weekend field trips required. Offered: S.

BIOL 331 Landscape Plant Recognition (3)
NW Field recognition of important groups of
woody landscape plants, emphasizing diversity
at the genus and family levels. Cultivated plant
nomenclature. Plant descriptive characters
evident in the field with eye and hand lens.
Hardiness and landscape applications.
Recommended: either BIOL 117 or BOTANY 113.
Offered: jointly with ESRM 331; Sp.

BIOL 340 Genetics and Molecular Ecology (5)
NW Application of molecular markers to ecology,
evolution, and the management of living resources.
Analysis of basic principles of animal and
plant physiology, with emphasis on cellular
proportioning and metabolic organization.
Serves as gateway to upper-division courses in
biology. Prerequisite: either BIOL 202 or
BIOL 220; recommended: either PHYS 115 or
PHYS 112. Offered: AWSpS.

BIOL 350 Foundations in Physiology (3)
NW Physiology core course for biological sciences
majors. Analysis of basic principles of animal and
plant physiology, with emphasis on cellular
function and metabolic processes. Prerequisite: either
BIOL 102, BIOL 162, or BIOL 200.

BIOL 354 Foundations in Evolution and
Systematics (3) NW Evolution and systematics
course core for biological sciences majors.
Emphasizes patterns, processes, and conse-
quences of evolutionary change. Serves as gateway
to 400-level courses and seminars in
evolution, population genetics, sociobiology,
conservation biology, phylogenetics, and
ecology. Prerequisite: either BIOL 102, BIOL
162, BIOL 180, or BIOL 203. Offered: WSp.

BIOL 355 Foundations in Molecular Cell
Biology (3) NW Cell biology core course for
biological sciences majors. Emphasis on
molecular approaches to understand cell
structure, function, and regulation, and the
analysis of experimental design and data
interpretation. Serves as a prerequisite to
advanced 400-level cell, molecular,
and developmental biology courses and seminars.
Prerequisite: either BIOL 200 or BIOL 201.
Offered: AWSpS.

BIOL 356 Foundations in Ecology (3) NW
Ecology core course for biological sciences
majors. Emphasizes understanding species
interactions in biological communities and
relationships of communities to environment.
Serves as a prerequisite to 400-level courses
and senior seminars in ecology, population
and conservation biology. Prerequisite: either BIOL
102, BIOL 162, BIOL 180, or BIOL 203. Offered: AW.

BIOL 390 Undergraduate Internship Seminar
(1) NW Crowe Weekly workshop to prepare
students for off-campus research internships.
Required for students planning to take BIOL 399.
Prerequisite: BIOL 220. Offered: AWSpS.

BIOL 396 Peer Facilitation ? Teaching in
Biology (1-2, max. 4) NW Martin-Morris For
students concurrently serving as peer
facilitators in biology courses. Students received
instruction in teaching as well as supplemental
information on material they teach others. Credit
no credit only. Prerequisite: either BIOL 100 or
BIOL 180. Offered: AWSpS.

BIOL 399 Biology Internship Program (3-5,
max. 15) NW Crowe Coordinated internship in a
biology-related field. Registration restricted to
students already matched with an internship
opportunity in BIOL 390 or by instructor
approval. Students must complete at least a
combined 10 credits in BIOL 399 over
cumulative quarters. Credit/no credit only.
Prerequisite: BIOL 390. Offered: AWSpS.

BIOL 401 Advanced Cell Biology (3)
NW Selected topics in molecular cell biology. Strong
emphasis on reading and interpreting primary
research literature. Writing intensive course.
Prerequisite: either BIOL 355 or BIOC 442.

BIOL 402 Cell Biology Laboratory (4)
NW Investigative projects using modern molecular
methods (restriction enzyme digestion, blotting,
hybridization, immunochemistry, density gradient
centrifugation, electrophoresis) and other
methods currently used to study plant and
animal cells, nucleic acids, and proteins.
Includes practice in scientific writing.
Prerequisite: BIOL 401, which may be taken
concurrently. Offered: AWSpS.

BIOL 404 Animal Physiology: Cellular
Aspects (3) NW de la Ingslesia Examines the
physiology of membrane transport, nervous
signaling, sensory systems, behavioral
modulation, muscle, neuronal and endocrine
integration, and circadian rhythms. Emphasis on
the cellular and tissue level. Prerequisite: BIOL
220; either CHEM 224 or CHEM 239; either
PHYS 115 or PHYS 112. Offered: AW.

BIOL 405 Cellular and Molecular Biology of
Human Disease (3) NW Conelius Concepts of cellular
and molecular biology as applied to human
disease. Emphasis on current experimental
approaches to investigate disease mechanisms
and the contributions of model systems.
Selected topics in cancer biology, viral
induced disease, gene therapy. Prerequisite: either BIOL
202 or BIOL 220; either BIOC 405, BIOC 440,
BIOL 355, BIOL 401, GENET 371, or GENET
372.

BIOL 406 Insect Behavior (4) NW O'Donnell
Examines complexity and diversity of behavior in
insects and related invertebrate animals.
Overview of important lineages of insects and
major behavioral types. Examines how insect
behavioral development and foraging
behaviors. Prerequisite: either 2.0 in BIOL 180, 3.5 in
PSYCH 200, or 2.0 in PSYCH 300. Offered: jointly with PSYCH 406.

BIOL 408 Mechanisms of Animal Behavior (4)
NW Beecher, Brounitzw Comparative exploration of
physiological and perceptual systems that
control behaviors necessary for survival and
reproduction in animals. Model systems
discussed include animal communication, mate
choice, escape behavior, learning and memory,
orientation, biological rhythms, foraging
behavior. Prerequisite: either 2.0 in BIOL 180,
3.5 in PSYCH 200, or 2.0 in PSYCH 300.
Offered: jointly with PSYCH 408.

BIOL 409 Sociobiology (5) NW Biological
bases of social behavior, emphasizing evolution
as a paradigm. Emphasizes how to think like
an evolutionary biologist, especially with regard
to interest conflict. Topics are individual versus
group selection, kin selection, altruism,
muting systems, sexual conflict, alternative reproductive
strategies, and parent/offspring conflict.
Prerequisite: either 3.5 in PSYCH 200, 2.0 in
PSYCH 300, 2.0 in BIOL 162, or 2.0 in
BIOL 180. Offered: jointly with PSYCH 409.

BIOL 411 Developmental Biology (4) NW
Embryology and subsequent development of
vertebrate and invertebrate animals, including
Xenopus, mammals, chicks, Drosophila,
echirnomorphs. Morphological changes in
developing animals; experimental analysis of
developmental systems; underlying genetic
and biochemical regulation of development.
Prerequisite: either BIOL 355, BIOL 401, or BIOC
442. Offered: AW.

BIOL 413 Methods and Problems in
Development (3) NW Schubiger Special topics
in development. Integrating classical and current
approaches. Developmental genetics,
experimental embryology, molecular mecha-
nisms of developmental regulation, and
function in cell determination and cell differen-
tiation in animal systems. Prerequisite: BIOL
411. Offered: irregularly.

BIOL 414 Molecular Evolution (5) NW Survey
of empirical approaches to the study of
molecular evolution and ecology, drawing on
examples from a variety of taxa and the recent
literature. Topics include DNA sequencing and
systematics, fingerprinting approaches in
behavioral ecology, and adaptive evolution
at the molecular level. Prerequisite: BIOL
354. Offered: jointly with GENOME 414, alternate
years.

BIOL 415 Evolution and Development (3)
NW Parichy, Swalla Analysis of intertwined
developmental and evolutionary processes
studied through evolution of developmental
genes, proteins, and expression patterns in
different organisms. Includes reading and
analyzing implications for ecology evolution,
and human disease. Prerequisite: either BIOL
354, BIOL 355, or BIOC 442.

BIOL 416 Molecular Genetics of Plant
Development (3) NW Torii Plant growth and
development examined in molecular-genetic
terms. Covers mutation, dominance, reduct-
dance, epistasis, and key technologies for
discovery of gene function as well as
embryogenesis, meristem formation, flower
development, and other problems in plant
development. Prerequisite: BIOL 220, GENOME
371.

BIOL 418 Biological Clocks and Rhythms (3)
NW de la Iglesia Examines circadian rhythms
and other forms of biological rhythmicity,
including annual and tidal rhythms. Includes
theoretical background as well as aspects that range from the molecular and cellular basis to the ecological and evolutionary implications of biological rhythms. Prerequisite: BIOL 350 or BIOL 355.

BIOL 423 Marine Physiological Ecology (3) NW Carrington Explores how physiology and local environment interact to influence distribution and abundance of marine organisms in a variety of habitats (rocky shore, salt marsh, coral reef), and how physiological adaptations develop. Emphasized benthic organisms that structure coastal communities (bivalves, corals,宏观algae, etc.). Prerequisite: BIOL 220; BIOL 356. Offered: alternate years.

BIOL 424 Plant Eco-Physiology (5) NW Ford Explores physiological mechanisms that underlie ecological observations, including how above- and below-ground microclimates develop and affect plant physiological processes. Discusses acclimation to environmental change along with species differences in physiological processes and plant's occupation of heterogeneous environments. Laboratories emphasize field measurement techniques. Prerequisite: either BIOL 102, BIOL 162, or BIOL 220. Offered: jointly with ESRM 478; W.

BIOL 425 Advanced Plant Physiology and Development (3) NW Expanded coverage of plant growth, nutrition, metabolism, and development. Cannot be taken for credit if BIOL 325 already taken. Prerequisite: either BIOL 102, BIOL 162, BIOL 203, or BIOL 220. Offered: W.

BIOL 426 Advanced Plant Physiology Laboratory (3) NW Expanded laboratory experiences on the growth, nutrition, metabolism, and development of plants. Cannot be taken for credit if BIOL 326 already taken. Prerequisite: BIOL 325 or BIOL 425, which may be taken concurrently. Offered: Sp.

BIOL 427 Biomechanics (4) NW Daniel Physical biology emphasizing a mechanical approach to ecological, evolutionary, and physiological questions. Basic principles underlying fluid and solid mechanics to explore responses of animals to flows, loads, and motions. Recommended: either BIOL 102, BIOL 162, BIOL 202, or BIOL 220; either MATH 125 or Q SCI 292; either PHYS 114 or PHYS 121.

BIOL 429 Models in Biology (4) NW Explores use of models in biology in a wide range of topics, including morphogenesis, nerve signals, ecological interactions, population biology, and evolutionary theory. Emphasis on the biological insights models can provide rather than mathematical techniques. Prerequisite: either MATH 146, MATH 390, MATH 395, STAT 342, or STAT 391.

BIOL 432 Marine Invertebrate Zoology (9) NW Comparative morphology and biology of marine invertebrates with emphasis on field and laboratory studies. Representatives of all major and most minor phyla are collected, observed alive, and studied in detail. Not open for credit to students who have taken 433 or 434. Recommended: 20 credits in biological sciences. Offered: at Friday Harbor Laboratories; S.

BIOL 433 Marine Ecology (5) NW Ruesink Study of marine ecological processes such as recruitment, disturbance, competition, and predation, and their effects on the structure and diversity of marine communities. Weekend field trips to local intertidal habitats required. Prerequisite: either BIOL 220, BIOL 472, or a minimum grade of 3.4 in BIOL 180. Offered: Sp; odd years.

BIOL 434 Invertebrate Zoology (5) NW Comparative biology and morphology of invertebrates. Laboratory work emphasizes structures and functions. Emphasizes annelids and related worms, mollusks, and arthropods. Not open to students who have taken 430 or 432. Prerequisite: either BIOL 102, BIOL 202, or BIOL 220.

BIOL 440 General Mycology (5) NW Ammirati General survey of the fungi with emphasis on life cycles, structure, physiology, economic importance. Prerequisite: either BIOL 102, BIOL 162, BIOL 180, or BIOL 203. Offered: W.

BIOL 441 Morphology and Anatomy of Land Plants (5) NW Comparative morphology and anatomy of land plants. Derivation of morphological structures and basis for current classification schemes examined using living and fossil organisms. Laboratories emphasize live plants native to the Pacific Northwest. Prerequisite: either BIOL 102, BIOL 162, BIOL 203, or BIOL 220; recommended BIOL 317. Offered: A.

BIOL 442 Mushrooms and Related Fungi (5) NW Ammirati General biology, ecology, and classification of mushrooms, poly pores, puffballs, and other related basidiomycetes. Emphasis on Pacific Northwest species. Prerequisite: either BIOL 102, BIOL 162, BIOL 203, or BIOL 220; recommended BIOL 440. Offered: S.

BIOL 443 Evolution of Mammals and their Ancestors (5) NW Highlights the evolutionary history and systematics of mammals and their ancestors. Examines fossil and modern mammalian specimens from the Burke Museum collections. Required field trip. Prerequisite: either BIOL 354, BIOL 453, or ESS 100. Offered: A.

BIOL 444 Natural History of Birds (5) NW Field, lecture, and laboratory study of birds framed in biological theory rather than taxonomy. Breeding systems, brood parasitism, appearance, molt, migration, orientation, social behavior, song, and flight are emphasized. Includes Saturday and weekend field trips for which students are required to share a portion of transportation costs. Prerequisite: BIOL 220; recommend BIOL 350 or BIOL 356. Offered: irregularly.

BIOL 445 Marine Botany (5) NW Survey of plants represented in marine environments; natural history; ecology, distribution, habitat, adaptation, and trophic interrelationships. Prerequisite: either BIOL 102, BIOL 162, BIOL 203, or BIOL 220; BIOL 430/ZOOL 430, which may be taken concurrently. Offered: at Friday Harbor Laboratories; Sp.

BIOL 446 Biology of Algae (5) NW Cathollo, Waaland Study of major algal groups emphasizing form, function, reproduction, distribution, biodiversity, and ecological roles in coastal, oceanic, and global ecosystems. Topics include classification, cellular and organisinal features, phylogeny, and evolution of major algal groups. Emphasizes economically useful and ecologically important algae. Prerequisite: either BIOL 102, BIOL 162, BIOL 180, or BIOL 203. Offered: Sp.

BIOL 450 Vertebrate Paleontology (4) NW Sidor Examines vertebrate life as seen in the fossil record, focusing first on fish lineages, and then on amniote (reptile, bird, and early mammal relatives) systematics and morphology. Examines fossil and modern vertebrates from the Burke Museum collection in the lab. Required weekend field trip. Prerequisite: either BIOL 453 or ESS 100. Offered: jointly with ESS 452; alternate years.

BIOL 451 Invertebrate Paleontology (5) NW Ward Important larger invertebrate groups; morphology, classification, stratigraphic distribution, evolution, paleoecology. Offered: jointly with ESS 451; W.

BIOL 452 Vertebrate Biology (5) NW The biology of vertebrate animals, emphasizing their diversity, adaptations, and evolutionary history. Introduces aspects of behavior, physiology, morphology, and ecology that emerge from the comparative study of vertebrates. Laboratory includes local field trips, films, and introduction to regional vertebrate fauna. Prerequisite: either BIOL 102, BIOL 162, BIOL 180, or both BIOL 202 and BIOL 203. Offered: SpS.

BIOL 453 Comparative Anatomy of Vertebrates (5) NW Comparison of the structure of vertebrate organ systems: integument, skeletal, muscle, digestive, respiratory, cardiovascular, urinary, and reproductive, with an emphasis on evolutionary trends. Prerequisite: BIOL 350. Offered: W.

BIOL 454 Entomology (3) NW Biology of terrestrial arthropods, with emphasis on insects. Structure, classification, physiology, and ecology of insects. Interrelationships of insects and man. Prerequisite: either BIOL 102, BIOL 162, BIOL 180, or both BIOL 202 and BIOL 203.

BIOL 455 Entomology Laboratory (3) NW Structure and function of arthropods, with emphasis on insects. Field studies and taxonomy of important insect groups. Students may be required to share a portion of the transportation costs of field trips. Prerequisite: BIOL 454 which may be taken concurrently. Offered: Sp.

BIOL 456 Vegetation of Western Washington (5) NW del Moral Vegetation of western Washington, including natural, seral, and weedy vegetation. Recognition of landscape patterns, sight identification of common and indicator species, classification of major community types, and uses of native species in landscape design. Four weekend field trips required. Prerequisite: either BIOL 117 or BIOL 317.
BIOL 458 Behavioral Genetics (4) NW O’Donnell Role of genetics in determining variation in human and animal behavior and in regulating behavioral development. Techniques for quantifying genetic variation, behavioral effects, and gene expression. Prerequisite: either 3.5 in PSYCH 200, 2.0 in PSYCH 300, or 2.0 in BIOL 161, or 2.0 in BIOL 180. Offered: jointly with PSYCH 458.

BIOL 459 Developmental Neurobiology (3) NW Bosma, Perkel Broad examination of integrative mechanisms in central nervous system function, with emphasis on sensory processing, plasticity, and control of behavior. Examples are taken from a variety of animal groups. Prerequisite: BIOL 220; either PHYS 115 or PHYS 122. Offered: W.

BIOL 460 Mammalian Physiology (3) NW Principles of mammalian physiology with special emphasis on the cardiac, respiratory, renal systems taught at the organ and organ systems level. Prerequisite: BIOL 350.

BIOL 461 Neurobiology (3) NW Bosma, Perkel, Boersma, Tewksbury Examination of biota of fresh waters, survey of limnological methods, analysis of data, and writing of scientific papers. Prerequisite: BIOL 473/473C/CEE 462, which may be taken concurrently. Offered: jointly with FISH 473; A.

BIOL 462 Advanced Animal Physiology (3) NW Huey; Wenderoth Physiology at levels of organisms and behavior, organ systems, and cells — an evolutionary and integrative perspective. Organismal physiology: metabolism, temperature, locomotion, osmoregulation, respiration, circulation, digestion. Prerequisite: either BIOL 202 or BIOL 220; either BIOL 350 or BIOL 460; either CHEM 152, CHEM 155, CHEM 160, CHEM 162, CHEM 164, CHEM 165, or CHEM 220; either PHYS 114 or PHYS 121. Offered: A.

BIOL 463 Advanced Animal Physiology Lab (3) NW Huey; Wenderoth Experimental design and techniques, data analysis, written reports. Original project labs and experiments in physiology. Prerequisite: BIOL 462, which may be taken concurrently. Offered: A.

BIOL 470 Biogeography (4) NW Analysis of historical and ecological determinants of current and past distributions of organisms. Integrates techniques developed by taxonomists, paleontologists, geologists, evolutionists, ecologists, and biogeographers to elucidate relationships between geographical distributions and continental drift, ecological interactions, climate, and dispersal abilities of organisms. Not available for credit if credit has been previously given for ZOOL 475. Recommended: one year college biology; background in ecology and evolution. Offered: irregularly.

BIOL 471 Plant Ecology (5) NW del Moral Basic concepts of plant ecology, including studies of the environment, plant-environment interactions, populations, communities, and ecosystems. Laboratory includes one week field trip, laboratory and greenhouse experiments, and an introduction to ecological problem solving. Prerequisite: either BIOL 102, BIOL 162, BIOL 180, or BIOL 203. Offered: alternative years; Sp.

BIOL 472 Community Ecology (4) NW Explores the complexity of biological communities and interactions of plant, animal, and microbes in marine, freshwater, and terrestrial ecosystems. Promotes synthetic and integrative thinking in the environmental sciences through the study of theoretical and empirical issues and original research data. Prerequisite: BIOL 356; recommended: solid foundation in math and physics.

BIOL 473 Limnology (3) NW Schindler Ecology, conservation and management of inland aquatic ecosystems. Explores interactions among biological, chemical and physical features of lakes and other aquatic habitats. Prerequisite: either BIOL 102, BIOL 162, BIOL 180, or BIOL 203. Offered: jointly with FISH 473; A.

BIOL 474 Limnology Laboratory (2) NW Schindler Examination of biota of fresh waters, survey of limnological methods, analysis of data, and writing of scientific papers. Prerequisite: BIOL 473/473C/CEE 462, which may be taken concurrently. Offered: jointly with FISH 474/CEE 463; A.

BIOL 476 Conservation Biology (5) NW Boersma, Tewksbury Explores biological, managerial, economic, and ethical concepts affecting survival of species. Applications of ecology, biogeography, population genetics, and social sciences for the preservation of species in the face of widespread global habitat modification, destruction, and other human activities. Prerequisite: either BIOL 102, BIOL 162, BIOL 180, or BIOL 203.

BIOL 477 Topics in Sustainable Fisheries (3, max. 9) I&S/NSW Parrish Seminar series featuring local, national and internationally known speakers in fisheries management and conservation. Case studies. Conservation/ restoration in practice. Pre-seminar discussion section focusing on select readings. Final paper. Topics may include harvest management, whaling, by-catch, salmon, marine protected areas, introduced species, citizen action, co-management, and marine ethics. Offered: jointly with ENVIR/FISH 478; odd years; W.

BIOL 480 Field Ecology (4) NW Boersma Field projects examining ecological and behavioral topics such as foraging and social behavior, species interactions, and structure of terrestrial and aquatic communities. Two weekend field trips required. Prerequisite: either BIOL 356 or BIOL 472. Offered: Sp.

BIOL 481 Experimental Evolutionary Ecology (5) NW Bradshaw, Kerr, Tewksbury Explores experimentally approachable questions in ecology and evolution through lectures, lab, and field experiments. Topics may include evolution of bacterial antibiotic resistance, the evolution of virulence, seed predation, plant biodiversity, and others. Prerequisite: BIOL 180. Offered: A.

BIOL 482 Advanced Experimental Evolutionary Ecology (2-4, max. 15) NW Bradshaw, Kerr, Tewksbury Working in pairs or independently, students pursue supervised original field or lab research projects. Projects span three academic quarters, with project development beginning in autumn, research continuing in winter, and culminating in spring with production of a scientific paper. Prerequisite: BIOL 481, which may be taken concurrently. Offered: AWSp.

BIOL 484 Senior Seminar in Evolution and Systematics (1-3, max. 9) NW Supervised readings and group discussion. Prerequisite: BIOL 354.

BIOL 485 Senior Seminar in Cellular, Molecular and Developmental Biology (1-3, max. 9) NW Supervised readings and group discussion. Prerequisite: BIOL 356.

BIOL 487 Senior Seminar in Conservation Biology (1-3, max. 9) NW Supervised readings and group discussion. Recommended: one upper division course in ecology or conservation biology.

BIOL 488 Senior Seminar in Physiology (1-3, max. 9) NW Supervised readings and group discussion. Recommended: one upper division course emphasizing plant biology.

BIOL 490 Undergraduate Seminar (1-3, max. 6) NW Supervised readings and group discussion of selected topics of broad biological significance. Prerequisite: BIOL 102, BIOL 162, BIOL 203, or BIOL 220.

BIOL 491 Special Topics in Biological Science for Teachers (1-9, max. 9) NW Study of selected areas of biology. Designed to enhance the skills and background of K-12 teachers. Credit/no credit only. Recommended: teaching experience.

BIOL 492 The Teaching of Biology (2) Basic course in the teaching of biology in the secondary school. Designed to help preservice teachers identify useful laboratory techniques, materials, and content for the teaching of pre-college biology. Special attention to current issues in biology education. Required for biology students in Teacher Certification Program.

BIOL 493 Study Abroad — Advanced Biology (1-15, max. 15) NW For participants in UW study abroad program. Specific content varies and must be individually evaluated. Credit does not apply to major requirements without approval.

BIOL 496 Peer Teaching Assistants in Biology (1-5, max. 10) Direct experience in the classroom, typically teaching a lab section of BIOL 100. Peer Teaching Assistants attend lectures and weekly preparation meetings and gain in-depth background on the subject material as well as training in teaching techniques and approaches. Credit/no credit only. Prerequisite: either BIOL 102, BIOL 162, BIOL 220, or both BIOL 202 and BIOL 203. Offered: AWSp.

BIOL 497 Special Topics in Biology (1-5, max. 10) NW

BIOL 498 Library Research (1-5, max. 10)

BIOL 499 Undergraduate Research (1-20, max. 20)

BIOL 500 Topics in Biology (1-3, max. 16) Offered: Sp.

BIOL 505 Problems in Biological Instruction (1-3, max. 3)

BIOL 510 Seminar in Mathematical Biology (1-3, max. 15) Bergstrom, Daniel, Grunbaum, Kot, Odell, Thompson Seminar on a topic of current
interest in mathematical biology. Graduate status required, or permission of instructor for undergraduates.

BIOL 511 Topics in Mathematical Biology (1-3, max. 15) Discussion of current topics in mathematical biology. Graduate status required, or permission of instructor for undergraduates.

BIOL 520 Departmental Seminar (1, max. 18) Credit/no credit only. Offered: AWSp.

BIOL 533 Advanced Invertebrate Zoology (9) Invertebrate fauna of the San Juan Archipelago. Topic changes from year to year. Individual research projects are emphasized. Prerequisite: course in invertebrate zoology and permission of Director of Friday Harbor Laboratories. Offered: at Friday Harbor Laboratories; SpS.

BIOL 536 Comparative Invertebrate Embryology (9) Diversity in developmental patterns in major marine taxa. Analysis of evolutionary changes in development. Emphasis on observation of live embryos and larveae. Prerequisite: permission of Director of Friday Harbor Laboratories; recommended: courses in invertebrate zoology and developmental biology. Offered: at Friday Harbor Laboratories; SpS.

BIOL 539 Marine Phycology (9) Field and laboratory studies of marine algae of the San Juan Archipelago with emphasis on seaweed diversity, identification, and the role of algae in marine ecosystems. Offered at Friday Harbor Laboratories.

BIOL 540 Seminar in Molecular, Cellular, and Developmental Biology (1-3, max. 15) Weekly discussions of past and current scientific literature in cell, molecular, and/or developmental biology, review of the state of the field, and presentation of research results. Discussions may cover the full breadth of the discipline or focus on selected topics. Graduate status required, or permission of instructor for undergraduates.

BIOL 541 Topics in Molecular, Cellular, and Developmental Biology (1-3, max. 15) Focused discussion of on-going cell, molecular, or developmental biology research occurring in the instructor’s laboratory. Graduate status required, or permission of instructor for undergraduates.

BIOL 542 Analysis of Development (1-3, max. 15) Analysis of structural, physiological, and molecular levels of developmental processes, including gametogenesis, fertilization, cell and tissue movements, induction, and cytodifferentiation. Graduate standing or permission of instructor.

BIOL 546 Experimental Design in Cell Biology (1.5) Focuses on experimental design in cell biology. A topic of current research interest is covered in depth in order to follow a line of investigation and critically evaluate the strengths and limitations of various experimental strategies. Offered: jointly with CONJ 536.

BIOL 550 Seminar in Evolution and Systematics (1-3, max. 15) Weekly discussions of past and current scientific literature in evolution and/or systematics, reviews of the state of the field, and presentation of research results. Discussions may cover the full breadth of the discipline or focus on selected topics. Graduate status required, or permission of instructor for undergraduates.

BIOL 551 Topics in Evolution and Systematics (1-3, max. 15) Focused discussion of on-going research in evolution and/or systematics occurring in the instructor’s laboratory. Graduate status required, or permission of instructor for undergraduates.

BIOL 552 Advanced Evolution (3) Successful analytical approaches to understanding evolutionary patterns and the processes that generate them, examined by using a wide array of empirical and theoretical tools. Survey of how theory, modeling, and statistics can be applied to observations and experiments in evolutionary biology. Graduate standing required.

BIOL 556 Seminar in Ecology (1-3, max. 15) Weekly discussions of past and current scientific literature in ecology, reviews of the state of the field, and presentation of research results. Discussions may cover the full breadth of the discipline or focus on selected topics. Graduate status required, or permission of instructor for undergraduates.

BIOL 561 Topics in Ecology (1-3, max. 15) Focused discussion of on-going research in ecology occurring in the instructor’s laboratory. Graduate status required, or permission of instructor for undergraduates.

BIOL 562 Advanced Ecology (3) Successful analytical approaches to understanding ecological patterns and the mechanisms that generate them, examined by using a wide array of empirical and theoretical tools. Applying theory, modeling, and statistics to empirically derived data to providing insight and solutions to key environmental problems. Graduate standing required.

BIOL 563 Experimental Evolutionary Ecology (5) NW Bradshaw, Kerr, Tewksbury Explores experimentally approachable questions in ecology and evolution through lectures, lab, and field experiments. Topics may include evolution of bacterial antibiotic resistance, the evolution of virulence, seed predation, plant biodiversity, and others. Offered: A concurrent with BIOL 481.

BIOL 564 Advanced Experimental Evolutionary Ecology (2-5, max. 15) NW Bradshaw, Kerr, Tewksbury Working independently or paired with an undergraduate in BIOL 482, students pursue supervised original field or lab research projects. Projects span three academic quarters, with project development beginning in autumn, research continuing in winter, and culminating in spring with production of a scientific paper. Prerequisite: BIOL 563, which may be taken concurrently. Offered: AWSp.

BIOL 570 Seminar in Conservation Biology (1-3, max. 15) Weekly discussions of past and current scientific literature in conservation biology, reviews of the state of the field, and presentation of research results. Discussions may cover the full breadth of the discipline or focus on selected topics. Graduate status required, or permission of instructor for undergraduates.

BIOL 571 Topics in Conservation Biology (1-3, max. 15) Focused discussion of on-going research in conservation biology occurring in the instructor’s laboratory. Graduate status required, or permission on the instructor for undergraduates.

BIOL 572 Science and Environmental Policy (3-5, max. 5) Boersma

BIOL 580 Seminar in Physiology (1-3, max. 15) Weekly discussions of past and current scientific literature in physiology, reviews of the state of the field, and presentation of research results. Discussions may cover the full breadth of the discipline or focus on selected topics. Graduate status required, or permission of instructor for undergraduates.

BIOL 581 Topics in Physiology (1-3, max. 15) Focused discussion of on-going research in physiology occurring in the instructor’s laboratory. Graduate status required, or permission of instructor for undergraduates.

BIOL 590 Seminar in Organismal Biology (1-3, max. 15) Weekly discussions of past and current scientific literature in organismal biology, reviews of the state of the field, and presentation of research results. Discussions may cover the full breadth of the discipline or focus on selected topics. Prerequisite: graduate standing, or permission of instructor for undergraduates.

BIOL 591 Topics in Organismal Biology (1-3, max. 15) Focused discussion of on-going research in organismal biology occurring the the instructor’s laboratory. Prerequisite: graduate standing, or permission of instructor for undergraduates.

BIOL 600 Independent Study or Research (1-10) Credit/no credit only.

BIOL 700 Master’s Thesis (*) Credit/no credit only. Offered: AWSpS.

BIOL 800 Doctoral Dissertation (*) Credit/no credit only. Offered: AWSpS.

Center for Statistics and Social Sciences

CS&SS 320 Evaluating Social Science Evidence (5) I&S, QSR A critical introduction to the methods used to collect data in social science: surveys, archival research, experiments, and participant observation. Evaluates “facts and findings” by understanding the strengths and weaknesses of the methods that produce them. Case based. Offered: jointly with SOC 320/STAT 320; A.

CS&SS 322 Case-Based Social Statistics II (5) I&S, QSR Handook Continuation of CS&SS/
SOC/STAT 321. Progresses to questions of assessing the weight of evidence and more sophisticated models including regression-based methods. Built around cases investigating the nature and content of statistical principles and practice. Hands-on approach: weekly data analysis laboratory. Prerequisite: CS&SS/SOC/ STAT 321, or permission of instructor. Offered: jointly with SOC/STAT 322; Sp.

CS&SS 481 Introduction to Mathematical Statistics (5) An introduction to probability, generating functions; the d-method, Jacobians, Bayes theorem; maximum likelihood, Neyman-Pearson, efficiency, decision theory, regression, correlation, bivariate normal. (Credit allowed for only one of 390, 481, and ECON 580.) Prerequisite: STAT/CON 311; either MATH 136 or MATH 126 with either MATH 308 or MATH 309. Recommended: MATH 324. Offered: jointly with ECON/STAT 481; A.

CS&SS 501 Advanced Political Research Design and Analysis (5) I&S Third methods course in political research. Testing theories with empirical evidence. Examines current topics in research methods and statistical analysis in political science. Content varies according to recent developments in the field and with interests of instructor. Offered: jointly with POL S 501.

CS&SS 505 Review of Mathematics for Social Scientists (1) Reviews basic mathematical skills needed for a meaningful understanding of elementary statistics, data analysis, and social science methodology. Overview of core knowledge required for graduate courses in quantitative methods in social sciences. Topics include discrete mathematics, differential and integral calculus, review of matrix algebra, and basic probabilistic and statistical concepts. Offered: Sp.

CS&SS 506 Computer Environments for the Social Sciences (1) Familiarizes graduate students in the social sciences with modern environments for statistical computing. Provides an overview of available resources and a description of fundamental tools used in quantitative courses and doctoral research. Topics include interfaces to Web-based resources, UNIX-based computing, and major statistical packages (R, SPLUS, SAS, and SPLUS). Offered: W.

CS&SS 507 Methodology: Quantitative Techniques in Sociology (3) I&S Applied regression analysis with emphasis on interactive computer graphics techniques and interpretation. Application to typical sociological problems. Offered: jointly with SOC 506; A.

CS&SS 508 Introduction to R for Social Scientists (1) Handcock Familiarizes students with the R environment for statistical computing (http://www.r-project.org). R is a freely available, multi-platform, and powerful program for analysis and graphics similar to S-PLUS. Covers the basics of organizing, managing, and manipulating social science data; basic applications; introduction to programming; links to other major statistical packages. Offered: A.

CS&SS 510 Maximum Likelihood Methods for the Social Sciences (5) Adolph, Wardy Introduces maximum likelihood, a more general method for modeling social phenomena than linear regression. Topics include discrete, time series, and spatial data, model interpretation, and fitting. Prerequisite: POL S/CS&SS 501; POL S/CS&SS 503. Offered: jointly with POL S 510; W.

CS&SS 526 Structural Equation Models for the Social Sciences (3) Clogg Introduces maximum likelihood structural equation models for the social sciences, including specification, estimation, and testing. Topics include path analysis, confirmatory factor analysis, linear models with latent variables, MIMIC models, recursive models, and models for nested data. Emphasizes applications to substantive problems in the social sciences. Prerequisite: SOC 504, SOC 505, SOC 506 or equivalent; recommended: CS&SS 505 and CS&SS 506, or equivalent. Offered: jointly with SOC 529.

CS&SS 527 Survey Research Methods (4) Provides students with skills in questionnaire development and survey methods. Develops a questionnaire and design a survey research proposal on a health-related or social topic. Prerequisite: either HSERV 511-513, BIOSTAT 517-518, EPI 512-513, which may be taken concurrently or permission of the instructor is required, and students should have a survey project in mind. Offered: jointly with HSERV 527.

CS&SS 529 Sample Survey Techniques (3) Design and implementation of selection and estimation procedures. Emphasis on human populations. Simple random, stratified, and cluster sampling; multistage and two-phase procedures; optional allocation of resources; estimation theory; replicated designs; variance estimation; national samples and census materials. Prerequisite: either STAT 421, STAT 423, STAT 504, QMETH 500, BIOSTAT 511, or BIOSTAT 517, or permission of instructor. Offered: jointly with BIOSTAT 529/STAT 529.

CS&SS 536 Analysis of Categorical and Count Data (3) Raftery Analysis of categorical data in the social sciences. Binary, ordered, and multinomial outcomes, event counts, and contingency tables. Focuses on maximum likelihood estimations and interpretations of results. Prerequisite: SOC 424, SOC 425, SOC 426, or equivalent; recommended: CS&SS 505 and CS&SS 506, or equivalent. Offered: jointly with SOC 536/STAT 536; annually.

CS&SS 544 Event History Analysis for the Social Sciences (5) Holman Examines life course research using event-history analysis with applications to the substantive areas of household dynamics, family formation and dissolution, marriage, cohabitation, and divorce, migration histories, residential mobility, and housing careers. Examines continuous- and discrete-time longitudinal models during practical laboratory sessions.

CS&SS 560 Hierarchical Modeling for the Social Sciences (4) Explores ways in which data are hierarchically organized, such as voters nested within electoral districts that are in turn nested within states. Provides a basic theoretical understanding and practical knowledge of models for clustered data and a set of tools to help make accurate inferences. Prerequisite: SOC 504-505-506 or equivalent; recommended: CS&SS 505-506 or equivalent. Offered: jointly with STAT 560.

CS&SS 564 Bayesian Statistics for the Social Sciences (4) Statistical methods based on the idea of probability as a measure of uncertainty. Topics covered include subjective notion of probability, Bayes' Theorem, prior and posterior distributions, and data analysis techniques for statistical models. Prerequisite: SOC 504-505-506 or equivalent; recommended: CS&SS 505; CS&SS 506. Offered: jointly with STAT 564.

CS&SS 565 Inequality: Current Trends and Explanations (3) Morris Discussion of recent growth in economic inequality in the U.S. and competing explanations for these new trends through examination of labor market demographics, industrial composition and restructuring, and the broader political context that impacts policies like minimum wage, strength of unions, and foreign trade. Prerequisite: SOC 504-505-506 or equivalent; recommended: CS&SS 505 and CS&SS 506, or equivalent. Offered: jointly with SOC 565.

CS&SS 566 Causal Modeling (4) Richardson Construction of causal hypotheses. Theories of causation, counterfactuals, intervention vs. passive observation. Contexts for causal inference: randomized experiments; sequential randomization; partial compliance; natural experiments, passive observation. Path diagrams, conditional independence and separation. Model equivalence and causal under-determination. Prerequisite: course in statistics, SOC 504-505-506 or equivalent; recommended: CS&SS 505-506 or equivalent. Offered: jointly with STAT 566.

CS&SS 567 Statistical Analysis of Social Networks (4) Handcock Statistical and mathematical descriptions of social networks. Topics include graphical and matrix representations of social networks, sampling methods, statistical analysis of network data, and applications. Prerequisite: SOC 504-505-506 or equivalent; recommended: CS&SS 505; CS&SS 506. Offered: jointly with STAT 567.

CS&SS 586 Game Theory for Social Scientists (5) Sirakaya Studies non-cooperative game-theory and provides tools to derive appropriate statistical models from game-theoretic models of behavior. Equilibrium concepts, learning, repeated games and experimental game theory. Prerequisite: MATH 112, MATH 124, or MATH 134; STAT/CON 311 or equivalent. Offered: jointly with ECON 568; W.

CS&SS 589 Visualizing Data (4) Adolph Explores techniques for visualizing social science data to complement graduate training methods. Emphasis on principles and perception of visualization, novel exploration and presentation of data and statistical models, and implementation of recommended techniques in statistics packages. Prerequisite: SOC 504,
HUM 204 Special Topics: Interdisciplinary Studies in the Humanities (5, max. 25) VLP/ I&S Focuses on interdisciplinary study in the humanities through the study of human thought, values, beliefs, creativity, and culture. Team-taught; credit does not count for degree. Offered: jointly with SOC W 589; AWSp.

HUM 205 Religion, Violence, and Peace: Patterns Across Time and Tradition (5) I&S Investigates the complex relationships between violence and peace in a variety of religious traditions. Examines cases studies from the ancient Near East, medieval East Asia, and the contemporary West from the standpoint of lived experiences and contemporary theories derived from several academic disciplines. Offered: jointly with RELIG/NEAR E 205; W.

HUM 206 American Sabor/American Flavor: Latinos Shaping U.S. Popular Music (5) VLP/A&S Addresses problems of cultural representation that concern an increasingly visible and influential community in the United States. Highlights the roles of U.S. Latino musicians as interpreters of Latin American genres and their roles as innovators within genres normally considered indigenous to the United States.

HUM 208 Violence, Myth, and Memory: Southeast Asia at the Crossroads of Modernity (5) VLP/A&S Built around films and readings. Explores ideas of violence, narrative, and global modernity in U.S. relations with Vietnam, the Philippines, and Indonesia. Examines the ways these films evoke founding myths of Southeast Asian societies.

HUM 210 Texts in Context (5, max. 15) I&S/ VLP Links a single, major work from any medium, or a narrowly bounded group of closely related, smaller works, to the cultural, intellectual, and historical circumstances of its creation and interpretation. Emphasizes close-reading and careful writing.

HUM 220 Themes in Time and Culture (5, max. 15) I&S/VLP Traces the articulation and development of a single overarching idea in different idioms, cultures and eras. Asks how, and if, notions that are fundamental to one era or culture find expression in other times and places. Emphasizes comparative analysis and careful writing.

HUM 411 Applications of Digital Technologies to Humanities Research (5) VLP/A&S Hands-on project-based approach to studying primary sources and digital libraries. Includes digital tools and techniques from Demography, Epidemiology, and related disciplines are presented together in this broader context. Offered: Sp.

HUM 521 Seminar in Scribal Texts (5) Relationship between oral and written texts and of the social and cultural systems which enable their production, transmission, and preservation. Included in curriculum of Textual Studies Program.

HUM 523 Seminar in Hypertext and Textual Studies (5) Several views of hypertext conceptually explored as a basis for research and evaluation of selected hypertext works. Includes initiating the construction of a World Wide Web hypertext of resources for the study of oral, graphical, hand-written, and printed texts. Included in curriculum of Textual Studies Program.

Chemistry

CHEM 101 Introduction to General Chemistry (3) NW Introduction to general chemistry with an emphasis on understanding and practical skills. Covers basic concepts of chemistry along with the mathematics required for quantitative problem solving. For students without high school chemistry or with limited mathematics background. Successful completion of CHEM 110 prepares students to enroll in CHEM 142. Credit/no credit only. Offered: A.

CHEM 120 Principles of Chemistry I (5) NW, QSR First course in a three-quarter overview of chemistry. Not for students majoring in biochemistry, chemistry, or engineering. Includes matter and energy, chemical nomenclature, chemical reactions, stoichiometry, modern atomic theory, chemical bonding. Laboratory. Only 5 credits can be counted toward graduation from the following: CHEM 120, 142, 145. Offered: AS.
CHEM 142 General Chemistry (5) NW, QSR
For science and engineering majors. Atomic nature of matter, stoichiometry, acids and bases, chemical equilibrium, and gas laws. Includes laboratory. Recommended: high school chemistry and placement into MATH 120 or higher. No more than the number of credits indicated can be counted toward graduation from the following course groups: 142, 145 (5 credits). Cannot be taken for credit if CHEM 120 already taken. Offered: A/WSpS.

CHEM 145 Honors General Chemistry (5) NW, QSR 145 and 155 cover material in 142, 152, and 162. Includes laboratory. Prerequisite: either MATH 124 or MATH 134, either of which may be taken concurrently; score of 86% on HCHEMC placement test, score of 4 or 5 on AP Chemistry exam, or IB score of 5, 6, or 7 on high level chemistry exam. No more than the number of credits indicated can be counted toward graduation from the following course groups: 142, 145 (5 credits); 145, 155, 162 (10 credits). Offered: A.

CHEM 152 General Chemistry (5) NW
Energy, enthalpy and thermochemistry, spontaneity, entropy and free energy, electrochemistry, quantum mechanics and atomic theory, general concepts of bonding. Includes laboratory. Prerequisite: either CHEM 142 or 1.7 in CHEM 145. No more than the number of credits indicated can be counted toward graduation from the following course groups: 152, 155 (5 credits). Offered: A/WSpS.

CHEM 155 Honors General Chemistry (5) NW
Continuation of 145. Includes laboratory. Together 145 and 155 cover material in 142, 152, and 162. No more than the number of credits indicated can be counted toward graduation from the following course groups: 152, 155 (5 credits); 145, 155, 162 (10 credits). Prerequisite: 2.2 in CHEM 145. Offered: W.

CHEM 162 General Chemistry (5) NW
Covalent bonding, chemical kinetics, liquids and solids, properties of solutions, the elements in groups 1A-4A, the elements in groups 5A-8A, solids, properties of solutions, the elements in 1A-4A, and 5A-8A. Includes coordination complexes, geochemistry, representative elements, metals, and nonmetals. Includes laboratory. Prerequisite: 1.7 in CHEM 152. Offered: A/WSpS.

CHEM 165 Honors General Chemistry (5) NW
Introduction to systematic inorganic chemistry: representative elements, metals, and nonmetals. Includes coordination complexes, geochemistry, and metallurgy. Additional material on environmental applications of basic chemistry presented. Includes laboratory. No more than the number of credits indicated can be counted toward graduation from the following course groups: 162, 165 (5 credits); 165, 312 (5 credits). Prerequisite: 2.2 in CHEM 155. Offered: Sp.

CHEM 197 Science Outreach Training (1-2, max. 2) Training for participation in science-related outreach activities to the community. Emphasis on support for K-12 education and environmental community efforts. Not applicable toward chemistry degree requirements. Credit/no credit only. Offered: A/WSpS.

CHEM 198 Tutorial Study (2, max. 6) NW Credit/no credit only. Offered: A/WSpS.

CHEM 199 Special Problems (1-6, max. 6) Research in chemistry. Credit/no credit only. Offered: A/WSpS.

CHEM 220 Principles of Chemistry II (5) NW, QSR
Second course in a three-quarter overview of chemistry. Not for students majoring in biochemistry, chemistry, or engineering. Includes gases/liquids/solids, solutions, acids and bases, equilibrium, oxidation-reduction, electrochemistry, organic compounds, hydrocarbons, aromativity, stereochemistry. Prerequisite: either 1.7 in CHEM 120 or 1.7 in CHEM 142. Offered: W.

CHEM 221 Principles of Chemistry III (5) NW, QSR
Third course in a three-quarter overview of chemistry. Not for students majoring in biochemistry, chemistry, or engineering. Includes acids, phenols, ethers, aldehydes, ketones, carboxylic acids, and structural determination. Only 5 credits can be counted toward graduation from the following: CHEM 221, CHEM 223, CHEM 237, CHEM 335. Prerequisite: 1.7 in CHEM 220. Offered: Sp.

CHEM 223 Organic Chemistry — Short Program (4) NW First of a two-quarter lecture series in organic chemistry, for those who elect not to complete the CHEM 237, CHEM 239 sequence. Introduction to structure, nomenclature, properties, and reactions of the main functional families of organic compounds. Stereochemistry and spectroscopy. No more than 5 credits can be counted toward graduation from the following course group: CHEM 221, CHEM 223, CHEM 237, CHEM 335. Prerequisite: either 1.7 in CHEM 155 or 1.7 in CHEM 152; recommended: CHEM 162. Offered: A.

CHEM 224 Organic Chemistry — Short Program (4) NW Continuation of CHEM 223. Structure, nomenclature, properties, and reactions of aldehydes, ketones, carboxylic acid derivatives, amines, carbohydrates, lipids, amino acids, peptides, proteins, and nucleic acids. No laboratory accompanies this course, but CHEM 241 laboratory may be taken concurrently. No more than 4 credits can be counted toward graduation from the following course group: CHEM 224, CHEM 239, CHEM 337. Prerequisite: 1.7 in CHEM 223. Offered: WSp.

CHEM 237 Organic Chemistry (4) NW First course for students planning to take three quarters of organic chemistry. Structure, nomenclature, reactions, and synthesis of the main types of organic compounds. No organic laboratory accompanies this course. No more than 5 credits can be counted toward graduation from the following course groups: CHEM 221, CHEM 223, CHEM 237, CHEM 335. Prerequisite: either 1.7 in CHEM 155 or 1.7 in CHEM 162. Offered: W.

CHEM 238 Organic Chemistry (4) NW Second course for students planning to take three quarters of organic chemistry. Further discussion of physical properties and transformations of organic molecules, especially aromatic and carbonyl compounds. No more than the number of credits indicated can be counted toward graduation from the following course groups: 238, 338 (4 credits). Prerequisite: either 1.7 in CHEM 237 or 1.7 in CHEM 335. Offered: WSp.

CHEM 239 Organic Chemistry (3) NW Third course for students planning to take three quarters of organic chemistry. Polyfunctional compounds and natural products, lipids, carbohydrates, amino acids, proteins, and nucleic acids. Includes introduction to membranes, enzyme mechanisms, prosthetic groups, macromolecular conformations and supramolecular architecture. No more than 4 credits can be counted toward graduation from the following course groups: CHEM 224, CHEM 239, CHEM 337. Prerequisite: either 1.7 in CHEM 238 or 1.7 in CHEM 336. Offered: A/WSpS.

CHEM 241 Organic Chemistry Laboratory (3) NW Introduction to organic laboratory techniques. Preparation of representative compounds. Designed to be taken with 224 or 238. No more than the number of credits indicated can be counted toward graduation from the following course groups: 241, 346 (3 credits). Prerequisite: either 1.7 in CHEM 223, 1.7 in CHEM 237, or 1.7 in CHEM 335; either CHEM 224, CHEM 238 or CHEM 336, any of which may be taken concurrently. Offered: WSp.

CHEM 242 Organic Chemistry Laboratory (3) NW Preparations and qualitative organic analysis. Designed to be taken with 239. No more than the number of credits indicated can be counted toward graduation from the following course groups: 242, 347 (3 credits). Prerequisite: either 1.7 in CHEM 224 or CHEM 238 which may be taken concurrently or CHEM 337 which may be taken concurrently; either 1.7 in CHEM 241 or 1.7 in CHEM 346. Offered: A/WSpS.

CHEM 291 Study Abroad - Chemistry (1-15, max. 15) NW For student in the UW study abroad program. Content varies and is individually evaluated. Credit does not apply to major degree requirements without departmental approval.

CHEM 297 Science Outreach Participation (1-2, max. 6) Continuation of 197. Work with K-12 schools or community organizations. May include scientific presentations, K-12 curriculum support, or involvement in a community project. Not applicable toward chemistry degree requirements. Credit/no credit only. Offered: A/WSp.

CHEM 299 Special Problems and Report Writing (1-6, max. 6) Research in chemistry and/or study in the chemical literature. Requires writing a scientific report. Credit/no credit only. Offered: A/WSpS.

CHEM 312 Inorganic Chemistry (3) NW The periodic table; chemistry of representative and transition elements. Aqueous chemistry, solid state chemistry, and everyday aspects of inorganic chemistry emphasized. Not intended for students who have completed 165. No more than the number of credits indicated can be counted toward graduation from the following course groups: 165, 312 (5 credits). Prerequisite: either CHEM 155 or CHEM 162; either CHEM 224, CHEM 236, or CHEM 336. Offered: A/WSp.

CHEM 317 Inorganic Chemistry Laboratory (4) NW Experimental exploration of the periodic table. Techniques of preparation and characterization of inorganic compounds. Handling of air-sensitive materials and gases. Prerequisite: either CHEM 165 or CHEM 312; either CHEM 224 or CHEM 347. Offered: WSp.

CHEM 321 Quantitative Analysis (5) NW Introduction to chemical analysis, including gravimetric, volumetric, spectrophotometric, and potentiometric analyses. Laboratory computer use included. Prerequisite: either CHEM 155 or CHEM 162. Offered: A/WSp.

CHEM 335 Honors Organic Chemistry (4) NW For chemistry majors and otherwise qualified
students planning three or more quarters of organic chemistry. Structure, nomenclature, reactions, and mechanism of organic compounds. Theory and mechanism of organic reactions. Studies of biomolecules. No organic laboratory accompanies this course. No more than 5 credits can be counted toward graduation from the following course groups: 221, 222, 327, 335. Prerequisite: either CHEM 155 or CHEM 162. Offered: A.

CHEM 336 Honors Organic Chemistry (4) NW For chemistry majors and otherwise qualified students planning three or more quarters of organic chemistry. Structure, nomenclature, reactions, and synthesis of organic compounds. Theory and mechanism of organic reactions. Studies of biomolecules. No more than 4 credits can be counted toward graduation from the following course groups: CHEM 238, CHEM 336. Prerequisite: 2.2 in CHEM 335. Offered: W.

CHEM 337 Honors Organic Chemistry (4) NW For chemistry majors and otherwise qualified students planning three or more quarters of organic chemistry. Structure, nomenclature, reactions, and synthesis of organic compounds. Theory and mechanism of organic reactions. Studies of biomolecules. Includes introduction to membranes, enzyme mechanisms, prosthetic groups, macromolecular conformations, and supramolecular architecture. No more than 4 credits can be counted toward graduation from the following course groups: CHEM 239, CHEM 337. Prerequisite: 2.2 in CHEM 336. Offered: Sp.

CHEM 346 Organic Chemistry Honors Laboratory (3) NW To accompany 336. No more than the number of credits indicated can be counted toward graduation from the following course groups: 241, 346 (3 credits). Prerequisite: 1.7 in CHEM 335; CHEM 336 which may be taken concurrently. Offered: W.

CHEM 347 Organic and Qualitative Organic Honors Laboratory (3) NW Continuation of 346. To accompany 337. No more than the number of credits indicated can be counted toward graduation from the following course groups: 242, 347 (3 credits). Prerequisite: CHEM 337 which may be taken concurrently; 2.2 in CHEM 346. Offered: Sp.

CHEM 396 Science Outreach Mentors (1-2, max. 6) Mentoring of beginning outreach participants. Includes presentations for 197, training of outreach students, and evaluation of outreach activities. Not applicable toward chemistry degree requirements. Credit/no credit only. Prerequisite: CHEM 197. Offered: AWSp.

CHEM 399 Undergraduate Research (*, max. 12) Research in chemistry. Credit/no credit only. Offered: AWSp.

CHEM 400 Radiochemistry Laboratory (2) NW Introductory general service course for students planning further work in nuclear or tracer applications. Safety procedures, detection and measurement of nuclear radiation, radiochemical and tracer techniques. Prerequisite: either 1.7 in CHEM 155 or 1.7 in CHEM 162; recommended: CHEM 418. Offered: alternate years.

CHEM 410 Introduction to Modern Separation Techniques (3) NW Introduction to modern separation techniques such as gas chromatography, high-performance liquid chromatography, electrophoresis, and field flow fractionation. Prerequisite: either CHEM 224, CHEM 239, or CHEM 337; either CHEM 241, CHEM 321, or CHEM 346. Offered: Sp.

CHEM 420 Bioinstrumental Analysis (3) NW Introduction to modern instrumental methods of chemical analysis, including chromatography, optical and mass spectrometry, electrochemistry, and liquid injection analysis. Basic concepts of mass spectrometry, spectrometers, mass analysis, separation sciences, and computerized data acquisition and reduction. Includes laboratory. Prerequisite: CHEM 321. Offered: W.

CHEM 426 Instrumental Analysis (3) NW Introduction to modern instrumental methods of chemical analysis, including chromatography, optical and mass spectrometry, electrochemistry, and liquid injection analysis. Basic concepts of mass spectrometry, spectrometers, mass analysis, separation sciences, and computerized data acquisition and reduction. Includes laboratory. Prerequisite: CHEM 321. Offered: W.

CHEM 433 Theoretical Organic Chemistry — Predictions and Experimental Tests (3) NW Molecular orbital theory in organic chemistry. Woodward-Hoffmann rules, aromaticity, concerted reactions, electrochemical transformations, and reactions of electron-deficient species. Prerequisite: either CHEM 239 or CHEM 337. Offered: alternate years.

CHEM 456 Molecular Enzymology (3) NW Enzyme structure, function, chemistry and inhibition, including principles of biological catalysis, stereochemistry, enzyme characterization and kinetics, and design and principles of enzyme inhibitors. Also major classes of natural products, their chemistry, biological activity, biosynthesis, physiological role, and ecological significance. Prerequisite: either CHEM 224, CHEM 239, or CHEM 337; recommended: either BIOL 405 or BIOL 440. Offered: alternate years; Sp.

CHEM 457 Physical Chemistry (3) NW Chemical thermodynamics. Laws of thermodynamics presented with applications to phase equilibria, chemical equilibria, and solutions. No more than the number of credits indicated can be counted toward graduation from the following course groups: 452, 456 (3 credits). Prerequisite: either CHEM 155 or CHEM 162; either MATH 126 or MATH 136; either PHYS 116 or PHYS 123; recommended: MATH 307; MATH 308. Offered: ASp.

CHEM 458 Global Atmospheric Chemistry (4) NW Global atmospheric as chemical system. Physical factors and chemical processes. Natural variabilities and anthropogenic change. Cycling of trace substances. Global issues such as climate change, acidic deposition, influences on biosphere. Prerequisite: either ATM S 358 or CHEM 456. Offered: jointly with ATM S 458.

CHEM 460 Spectroscopic Molecular Identification (3) NW Basic theory of spectral techniques-infrared and ultraviolet/visible spectroscopy, NMR, and mass spectrometry—with emphasis on spectral interpretation skills needed for the elucidation of structure, conformation, and dynamics in organic and biological chemistry. Prerequisite: either CHEM 224, CHEM 239, or CHEM 337; recommended: either CHEM 456 or CHEM 475. Offered: A.

CHEM 461 Physical Chemistry Laboratory (3) NW Physical measurements in chemistry.
Vacuum techniques, calorimetry, spectroscopic methods, electrical measurements. Prerequisite: either CHEM 453, or both CHEM 456 and CHEM 456, or both CHEM 456 and CHEM 475; recommended CHEM 457. Offered: A:Sp.

CHEM 462 Techniques of Synthetic Organic Chemistry (2-3) NW Laboratory techniques of synthetic organic chemistry. Vacuum distillation, multistep synthesis, air sensitive reagents, photochemistry, chromatography, and separation techniques. Prerequisite: either CHEM 242 or CHEM 347; CHEM 460 which may be taken concurrently. Offered: A.

CHEM 463 Spectroscopic Techniques for Structured Identification (2) NW Laboratory techniques of spectroscopic analysis for structural determination using UV, IR, NMR, mass spectroscopy. Prerequisite: CHEM 460. Offered: W.

CHEM 464 Computers in Data Acquisition and Analysis (3) NW Introduction to use of the computer in the chemistry laboratory. Principles of microcomputers and their use for such problems as data acquisition, noise reduction, and instrument control. Prerequisite: either CHEM 453, CHEM 455, or CHEM 475; MATH 136, or both MATH 307 and MATH 308. Offered: Sp.

CHEM 465 Computations in Chemistry (3) NW Computer calculations on color graphics workstations applied to problems in chemistry. Numerical methods and algorithms for calculating classical dynamics, quantum wavefunctions, wavepacket propagation, chemical kinetics. Use of computer programs for calculating electronic wavefunctions, molecular conformations, simulations of liquids and solids. Prerequisite: either CHEM 455 or CHEM 475, either of which may be taken concurrently. Offered: W.

CHEM 475 Honors Physical Chemistry (3) NW Introduction to quantum chemistry, spectroscopy. Theory of quantum mechanics applied more rigorously than in CHEM 455. Application of quantum mechanics to electronic structure of atoms and molecules. Computer software used to solve problems. Prerequisite: either CHEM 155 or CHEM 162; either MATH 126 or MATH 136; either PHYS 116 or PHYS 123; recommended: MATH 307; MATH 308. Offered: A.

CHEM 484 Materials Chemistry (3) NW Overview of basic principles, techniques, and applications associated with solid materials. Topics include description of crystals, examples of crystal structures, structural analysis, band structures of solid materials, preparation of materials, materials for microelectronics, and materials for information technology. Prerequisite: CHEM 453 or CHEM 455. Offered: jointly with MSE 484; A.

CHEM 491 Study Abroad ? Advanced Chemistry (1-15, max. 15) NW For students in the UW study abroad program. Content varies and is individually evaluated. Credit does not apply to major degree requirements without departmental approval.

CHEM 498 Teaching Chemistry (3) NW Training in teaching chemistry laboratory and quiz sections. For chemistry and biochemistry majors, especially those planning graduate work or secondary education. Covers teaching strategies, student diversity, learning styles, grading, and interaction with students and faculty. Credit/no credit only. Offered: A.

CHEM 499 Undergraduate Research and Report Writing (*, max. 12) Research in chemistry and/or study in the chemical literature. Credit/no credit only. Offered: AW:Sp.

CHEM 501 Readings in Chemistry (1, max. 9) Individual meetings with faculty to discuss readings (journal articles, book chapters, proceedings) in the chemical sciences. Credit/no credit only. Offered: A:W:Sp.

CHEM 502 Practical NMR Methods for Biological and Organic Structure Elucidation (4) Theory of NMR (rotating frame formalism, multi-pulse experiments, relaxation phenomena, 2D experiments) as applied to structural and dynamic problems in organic and biological chemistry. Provides basis for experiment selection and spectrum interpretation. A more advanced treatment of NMR than 460. Prerequisite: CHEM 224, CHEM 239, or CHEM 337; recommended: CHEM 460 or equivalent. CHEM 435 or CHEM 455. Offered: W.

CHEM 508 Advanced Inorganic Chemistry (3, max. 9) Discussion of selected applications of physical techniques to the study of inorganic molecules. Topics include group theory, magnetic resonance spectroscopy (NMR and ESR), vibrational spectroscopy (IR and Raman), electronic spectroscopy, magnetism, and electrochemistry. Offered: A.

CHEM 510 Current Problems in Inorganic Chemistry (3, max. 9) Primarily for doctoral candidates in inorganic chemistry. Current topics (e.g., bioinorganic, advanced organometallic, materials and solid state, advanced inorganic spectroscopy). See department for instructor and topics during any particular quarter. Offered: Sp.

CHEM 520 Current Problems in Analytical Chemistry (3, max. 9) Primarily for doctoral candidates in analytical chemistry. Current topics (e.g., flow injection analysis, mass spectrometry, and advanced radiochemistry). See department for instructor and topics during any particular quarter. Offered: AW:Sp.

CHEM 522 Atomic and Molecular Analytical Spectroscopy (3) Quantitative analysis of atomic and molecular species, using all forms of electromagnetic radiation, electrons, and gaseous ions. Offered: alternate years.

CHEM 530 Advanced Organic Chemistry (3) Fundamental aspects of organic structures and transformations. Structure and basicity of carbocations, substitution reactions, elimination reactions, nucleophilic addition and addition/elimination reactions, condensation reactions, structure and rearrangements of carboxcations, electrophilic addition, electrophilic substitutions, neighboring group effects. Prerequisite: CHEM 337. Offered: A.

CHEM 531 Advanced Organic Chemistry (3) Synthetic organic chemistry. Discussion of practical methods for the synthesis of complex organic molecules with an emphasis on strategy and the control of stereochemistry. Prerequisite: CHEM 530. Offered: W.

CHEM 532 Advanced Organic Chemistry (3) Chemical Biology. Application of chemical methods to the study of biological processes that occur in cells. Prerequisite: CHEM 530 and CHEM 531. Offered: Sp.

CHEM 549 Undergraduate Research and Report Writing (*, max. 12) Research in chemistry and/or study in the chemical literature. Credit/no credit only. Offered: AW:Sp.

CHEM 550 Current Problems in Organic Chemistry (1-3, max. 12) Primarily for doctoral candidates in organic chemistry. Topics of current interest and importance. See department for instructor and topic during any particular quarter.

CHEM 551 Introduction to Quantum Chemistry (3) Origins and basic postulates of quantum mechanics, solutions to single-particle problems, angular momentum and hydrogenic wave functions, matrix methods, perturbation theory, variational methods. Prerequisite: CHEM 455. Offered: A.

CHEM 552 Statistical Mechanics (3) General theorems of statistical mechanics, relation of the equilibrium theory to classical thermodynam- ics, quantum statistics, theory of imperfect gases, lattice statistics and simple cooperative phenomena, lattice dynamics and theory of solids, liquids, solutions, and polymers, time- dependent phenomena and mechanisms of interaction. Prerequisite: CHEM 455 and CHEM 456 (concurrent registration permitted) or equivalent. Offered: W.

CHEM 575 Molecular Modeling Methods (4) Introduction to theory and practice of computer simulation studies of molecules with emphasis on applications to biological molecules and complexes. Discussion of background theory, implementation details, capabilities and practical limitations of these methods. Prerequisite: previous coursework in biochemistry and physical chemistry and/or permission of instructor. Offered: jointly with BIOEN 575; A.

CHEM 581 Preparation for Second-Year Exam (3, max. 9) Preparation for examination. Open only to students accepted for doctoral work in chemistry, in their second year of study. Credit/ no credit only. Offered: AW:Sp.
CHEM 590 Seminar in General Chemistry (1, max. 18) For chemistry graduate students only. Credit/no credit only. Offered: AWSp.

CHEM 591 Seminar in Inorganic Chemistry (1, max. 18) For chemistry graduate students only. Credit/no credit only. Offered: AWSp.

CHEM 592 Seminar in Analytical Chemistry (1, max. 18) For chemistry graduate students only. Credit/no credit only. Offered: AWSp.

CHEM 593 Seminar in Organic Chemistry (1, max. 18) For chemistry graduate students only. Credit/no credit only. Offered: AWSp.

CHEM 594 Seminar in Physical Chemistry (1, max. 18) For chemistry graduate students only. Credit/no credit only. Offered: AWSp.

CHEM 595 Seminar in Nanotechnology Seminar (1, max. 18) Emphasizes frontier research in nanoscience and nanotechnology and on intellectual interactions within the nanotechnology community. Presented by experts in the field, with most being from other institutions. Prerequisite: graduate standing and permission of instructor. Credit/No Credit only. Offered: jointly with BIOEN 518; AWSp.

CHEM 600 Independent Study or Research (*) Prerequisite: permission of coordinator. Offered: AWSp.

CHEM 700 Master’s Thesis (*) Prerequisite: permission of coordinator. Offered: AWSpS.

CHEM 800 Doctoral Dissertation (*) Prerequisite: permission of coordinator. Offered: AWSpS.

Classics

Classical Archaeology

CL AR 340 Pre-Classical Art and Archaeology (3) VLPA Survey of the art and the other material remains of the civilizations in the Aegean from the Neolithic Age to the end of the Bronze Age, with special emphasis on Minoan Crete and the Mycenaean kingdoms of mainland Greece, illustrated by slides. The history, techniques, and results of significant excavations are examined. Offered: jointly with ART H 340.

CL AR 341 Greek Art and Archaeology (3) VLPA Bliquez Survey of the material remains and the developing styles in sculpture, vase painting, architecture, and the minor arts from the geometric to the Hellenistic periods, illustrated by slides. Principal sites and monuments, as well as techniques and methods of excavation, are examined in an attempt to reconstruct the material culture of antiquity. Offered: jointly with ART H 341.

CL AR 342 Roman Art and Archaeology (3) VLPA Harman Roman architecture and art, with emphasis on the innovations of the Romans; illustrated by slides. Offered: jointly with ART H 342.

CL AR 343 Hellenistic Art and Archaeology (3) VLPA Survey of the art of Greece and the eastern Mediterranean from the time of Alexander the Great to the Roman conquest. Principal sites with their sculpture, painting, mosaics, and minor arts examined in lectures illustrated with slides. Offered: jointly with ART H 343.

CL AR 442 Greek Painting (3) VLPA Study of painted decoration on Greek vases, with emphasis on stylistic developments and cultural and historical influences. Painting on other media also examined as evidence allows. Offered: jointly with ART H 442.

CL AR 443 Roman Painting (3) VLPA Study of surviving painting from the Roman World, with emphasis on wall paintings from Pompeii and Herculanum. Principal topics for discussion: the four styles of Pompeian painting the dependence of Roman painters on Greek prototypes, and the significance of various kinds of painting as domestic decoration. Offered: jointly with ART H 443.

CL AR 444 Greek and Roman Sculpture (3) VLPA History and development of Greek sculpture and sculptors, their Roman copyists, and Roman portraits and sarcophagi. Emphasis on Greek sculpture of the fifth century BC. Offered: jointly with ART H 444.

CL AR 446 Greek Architecture (3) VLPA Detailed study of Greek architecture from its beginnings, with special emphasis on the Periclean building program in fifth-century Athens. Offered: jointly with ARCH 454/ART H 446.

CL AR 447 The Archaeology of Early Italy (3) VLPA Harmon Study of the principal archaeological sites of early Italy, including Etruria, Sicily, southern Italy, and archaic Rome up to the Republican period. Attention given to the relationship between material remains and their relationship to the Etruscan, ancient Sicilian, and early Roman civilizations. Offered: jointly with ART H 447.

CL AR 448 The Archaeology of Italy (3) VLPA Harmon Study of the principal archaeological sites in Italy with special emphasis on ancient Rome. Sites include the Alban hills, Ostia, Pompeii, Herculanum, Tarquinia, Paestum, Tivoli, and Praeneste. Attention given to the relationship between material remains and their purpose in ancient life. Illustrated by slides. Offered: jointly with ART H 448.

CL AR 513 Athenian Topography (5) Detailed consideration of the topography and monuments of ancient Athens from the beginning through the Roman period. Offered: jointly with ART H 541.

CL AR 541 Seminar in Greek and Roman Art (3) In-depth study of selected topics and problems of the art of ancient Greece and Rome. Offered: jointly with ART H 541.

Classical Linguistics

CL LI 501 Comparative Phonology of Greek and Latin (5) Harmon, Levaniovik Phonological developments of Greek and Latin from Indo-European to the classical periods of both languages.

CL LI 503 History of the Greek Language (5) Levaniovik Morphological and syntactical development of the Greek language from Homer through the New Testament; the development of prose and poetic style.

CL LI 505 History of the Latin Language (5) Harmon, Levaniovik Morphological and syntactical development of the Latin language; the development of Latin as a literary language.

CL LI 506 Italic Dialects (5) Harmon, Levaniovik Principal remains of the non-Latin languages and dialects of ancient Italy.

CL LI 508 Greek Dialects (5) Levaniovik The non-Attic dialects of ancient Greek, based on a study of inscriptions and the literary remains.

Classics

Upper-division classics courses in English (300 and 400 level) in the Department of Classics do not generally have prerequisites. Most 400-level courses deal with a single genre of literature or with a limited area of classical studies. The 300-level courses deal with broader subjects at a relatively advanced level. Both are primarily for juniors and seniors, but they are open to freshmen and sophomores with an interest or background in the subject of the course.

CLAS 101 Latin and Greek in Current Use (2) VLPA Designed to improve and increase English vocabulary through a study of the Latin and Greek elements in English, with emphasis on words in current literary and scientific use. No auditors. Knowledge of Latin or Greek is not required. Offered: AWSpS.

CLAS 102 Grammar and Syntax through Latin (3) VLPA Improve familiarity with basic grammar, syntax, logic through study of mechanics of the Latin language. For Educational Opportunity Program students only. No auditors. Knowledge of Latin or Greek not required.

CLAS 122 Gateway to the Ancient Greek-Roman World (5) VLPA Introduces students to aspects of Ancient Greece and/or Roman literature and culture. Develop understanding of the nature and process of critical thinking and basic research techniques.

CLAS 205 Bioscientific Vocabulary Building From Latin and Greek (3) VLPA Designed to help the student master the scientific vocabulary of his or her particular field by a study of the Latin and Greek roots that are used to create the majority of scientific terms. No auditors. Knowledge of Latin or Greek is not required. Offered: AWSpS.

CLAS 210 Greek and Roman Classics in English (5) VLPA Bliquez, Blondell, Claus, Connors, Gowing, Harmon, Hinds, Kamen, Levaniouk, Power, Stroup Introduction to classical literature through a study of the major Greek and Latin authors in modern translation. Offered: AWSp.

CLAS 320 Greek and Roman Private and Public Life (5) I&S/VLPA Bliquez Study of the civic and social practices and institutions of everyday Greek and Roman private and public life, including the family, social classes, the courts and legal systems, military service and war, technology and the trades, money and banking, agriculture and rural life. Many lectures illustrated by slides. Offered: A-

CLAS 322 Intellectual History of Classical Greece (5) I&S/VLPA Blondell Uses Plato’s Republic as a core text to explore a range of issues of ancient and contemporary interest, such as justice, political theory, male attitudes toward women, and the nature of the soul. Besides the Republic and other works of Plato,
readings are taken from Homer, tragedy, comedy, Aristotle, and others. Offered: Sp.

CLAS 324 Greek and Roman Athletics (3) I&S Greek and Roman athletic festivals and events, and the place of athletes and sport in ancient society.

CLAS 326 Women in Antiquity (3) I&S/VLPA Connors, Levanouk A broad survey of primary sources in medicine, law, philosophy, religious rituals, and mythology, informed by perspectives from literature, art, and archaeology. Provides students the tools to analyze the social roles of women in ancient Greece and Rome.

CLAS 328 Sex, Gender, and Representation in Greek and Roman Literature (3) I&S/VLPA Hind, Stroup Affirmation and inversion of gender roles in Greek and Roman literature, myths of male and female heroism; marginalization of female consciousness; interaction of gender, status, and sexual preference in love poetry. Readings from epic, drama, historiography, romance, and lyric.

CLAS 330 The Age of Augustus (5) I&S/VLPA Gowing Detailed study of the history and culture of the reign of Augustus, the first Roman emperor (31 BC-AD 14). Includes readings in Augustan authors such as Vergil, Ovid, and Horace as well as the study of Augustan art and architecture. Offered: jointly with HSTM 330.

CLAS 399 Study Abroad: Classics (3-15, max. 20) VLPA For participants in Classics overseas study programs. Specific course content determined by assigned faculty member. Credit not applicable to majors in the Classics Department without approval.

CLAS 401 Undergraduate Seminar in Classics (3-5) VLPA Seminar on a broadly defined topic in classics. Includes reading in Latin or Greek as appropriate for individual students. Additional readings of works in English translation and works of scholarship chosen to give undergraduate majors familiarity with research methods and perspective on the discipline.

CLAS 424 The Epic Tradition (5) VLPA Claus, Levanouk Ancient and medieval epic and heroic poetry of Europe in English: the Iliad, Odyssey, and Aeneid; the Roland or a comparable work from the medieval oral tradition; pre-Greek forerunners, other Greco-Roman literary epics, and later medieval and Renaissance developments and adaptations of the genre. Choice of reading material varies according to instructor’s preference. Offered: jointly with C LIT 424.

CLAS 427 Greek and Roman Tragedy in English (5) VLPA Stroup Study of the development of Greek and Roman tragedy, with extensive readings in representative plays of Aeschylus, Sophocles, Euripides, and Seneca.

CLAS 428 Greek and Roman Comedy in English (3) VLPA Stroup Readings from the comedies of Aristophanes, Plautus, and Terence.

CLAS 430 Greek and Roman Mythology (3/5) VLPA Principal myths found in classical and later literature. Offered: AWSp.

CLAS 432 Classical Mythology in Film (3/5) VLPA Claus Comparison and discussion of classical myths and modern films inspired by them. Promotes access to the reading of classical mythology. Analyzes significant differences between ancient literary and modern cinematic representations of the myth.

CLAS 435 The Ancient Novel (3) VLPA Connors Reading and discussion of the principal Greek and Roman novels, the earliest European prose fiction, with attention to earlier literature and to imperial culture.

CLAS 445 Greek and Roman Religion (3) I&S/ VLPA Hamon, Hollmann, Levanouk Religion in the social life of the Greeks and Romans, with emphasis placed on their public rituals and festivals. Attention is given to the priesthoods, personal piety, rituals of purification and healing, and the conflict of religions in the early Roman Empire. Many lectures illustrated by slides. Recommended: RELIG 201. Offered: jointly with RELIG 445.

CLAS 496 Special Topics (2, max. 15) VLPA Offered occasionally by visitors or resident faculty.

CLAS 520 Seminar (5, max. 45) Advanced comparative work on Greek and Latin materials studied in both original languages.

CLAS 525 Proseminar (5) introduces graduate students to the chief subfields, together with their various methodologies and resources, of the broad discipline of classical studies.

CLAS 540 Topics in Greek and Latin Literary History (5, max. 25) Reading of a range of Greek and Latin texts by various authors.

CLAS 700 Master’s Thesis (*)

CLAS 800 Doctoral Dissertation (*)

Greek

GREEK 101 Elementary Greek (5) An intensive study of grammar, with reading and writing of simple Attic prose. Offered: A.

GREEK 102 Elementary Greek (5) An intensive study of grammar, with reading and writing of simple Attic prose. Prerequisite: GREEK 101. Offered: W.

GREEK 103 Elementary Greek (5) Reading of selections from classical Greek literature. Prerequisite: GREEK 102. Offered: Sp.

GREEK 300 Greek Language, Accelerated (5) Intensive introduction to Attic Greek. Not accepted as upper-division credit toward a major in Greek or classics. Does not satisfy foreign language proficiency requirement. Cannot be taken for credit if GREEK 101 already taken. Offered: W.

GREEK 301 Greek Language, Accelerated (5) Intensive introduction to Attic Greek. Not accepted as upper-division credit toward a major in Greek or classics. Does not satisfy foreign language proficiency requirement. Cannot be taken for credit if GREEK 101 already taken. Prerequisite: GREEK 300. Offered: Sp.

GREEK 305 Attic Prose (5) VLPA Translation of selections from Attic prose; elementary exercises in Attic prose composition. Recommended: GREEK 103, GREEK 301, or equivalent.

GREEK 306 Attic Prose (5) VLPA Translation of selections from Attic prose; elementary exercises in Attic prose composition. Prerequisite: GREEK 305.

GREEK 307 Homer (5) VLPA Translation of selections from the Iliad or the Odyssey; Attic prose composition, metrics. Prerequisite: GREEK 306. Offered: Sp.

GREEK 308 Introduction to Koine Greek Texts (3) VLPA Williams Reading and discussion of selected religious and philosophical texts from Koine Greek.

GREEK 413 The Pre-Socratic Philosophers (3) VLPA Blondell Recommended: minimum of two years of ancient Greek language study at college level (or equivalent).

GREEK 414 Plato (3) VLPA Blondell Recommended: minimum of two years of ancient Greek language study at college level (or equivalent).

GREEK 415 Aristotle (3) VLPA Blondell Recommended: minimum of two years of ancient Greek language study at college level (or equivalent).

GREEK 422 Herodotus and the Persian Wars (3) VLPA Bliquez, Hollmann, Kamen, Levanouk Recommended: minimum of two years of ancient Greek language study at college level (or equivalent).

GREEK 424 Thucydides and the Peloponnesian War (3) VLPA Bliquez, Kamen Recommended: minimum of two years of ancient Greek language study at college level (or equivalent).

GREEK 426 Attic Orators (3) VLPA Bliquez, Kamen Recommended: minimum of two years of ancient Greek language study at college level (or equivalent).

GREEK 428 Imperial Greek Literature (3-5, max. 15) VLPA Claus, Gowing, Hollmann Readings in imperial Greek prose and poetry from the first century CE onward, including Dio Chrysostom, Appian, Plutarch, Aelius Aristides, Lucian, Athenaeus, and New Testament Koine. Recommended: minimum of two years of ancient Greek language study at college level (or equivalent).

GREEK 442 Greek Drama (3) VLPA Blondell, Levanouk Recommended: minimum of two years of ancient Greek language study at college level (or equivalent).

GREEK 443 Greek Drama (3) VLPA Blondell, Levanouk Recommended: minimum of two years of ancient Greek language study at college level (or equivalent).

GREEK 444 Greek Drama (3) VLPA Blondell, Levanouk Recommended: minimum of two years of ancient Greek language study at college level (or equivalent).

GREEK 449 Greek Epic (3) VLPA Levanouk Recommended: minimum of two years of ancient Greek language study at college level (or equivalent).

GREEK 451 Lyric Poetry (3) VLPA Blondell, Levanouk Recommended: minimum of two years of ancient Greek language study at college level (or equivalent).
GREEK 453 Pindar: The Epinician Odes (3) VLPA Levaniouk Recommended: minimum of two years of ancient Greek language study at college level (or equivalent).

GREEK 461 Early Greek Literature (3-5, max. 15) VLPA Readings and discussion of selected authors of the early Greek period. Recommended: minimum of two years of ancient Greek language study at college level (or equivalent).

GREEK 462 Literature of Classical Athens (3-5, max. 15) VLPA Readings and discussion of selected authors of classical Athens. Recommended: minimum of two years of ancient Greek language study at college level (or equivalent).

GREEK 463 Hellenistic Greek Literature (3-5, max. 15) VLPACLAUS Recommended: minimum of two years of ancient Greek language study at college level (or equivalent).

GREEK 490 Supervised Study (*, max. 18) Special work in literary and philosophical texts for graduates and undergraduates. Recommended: minimum of two years of ancient Greek language study at college level (or equivalent).

GREEK 500 Grammar and Composition (5) Bliquèz, Blondell Translation of passages from English to Greek for the purpose of acquiring advanced knowledge of the grammar and the style of the classical tongue.

GREEK 501 Homer (5) LEVANIIOUK Readings from the Iliad or the Odyssey.

GREEK 503 Aristophanes (5) Bliquèz Select comedies.

GREEK 504 Plato (5) BLONDELL The Republic or other dialogues.

GREEK 506 Aristotle (5) BLONDELL .

GREEK 508 Lysias and Demosthenes (5) Bliquèz, Kamen Select speeches, oratorical theory, historical questions.

GREEK 510 Greek Historians (5, max. 10) Bliquèz, HALLMANN .

GREEK 512 Greek Tragedy (5, max. 10) AESCHYLUS, SOPHOCLES, and/or EURIPIDES.

GREEK 515 Greek Epigraphy (5) KAMEN Selected inscriptions from various Greek states and sanctuaries and evidence they provide for religious and social practices, literature, and political history. Classification and editing of inscriptions, and epigraphical techniques.

GREEK 520 Seminar (5, max. 45)

GREEK 540 Topics in Greek Literary History (5, max. 25) Reading of a range of Greek texts by various authors.

GREEK 590 Supervised Study (*, max. 18) Prerequisite: permission of graduate program coordinator.

GREEK 600 Independent Study or Research (*)

Latin

LATIN 101 Elementary Latin (5) An intensive study of grammar, with reading and writing of simple Latin prose. Offered: A.

LATIN 102 Elementary Latin (5) An intensive study of grammar, with reading and writing of simple Latin prose. Prerequisite: LATIN 101. Offered: W.

LATIN 103 Elementary Latin (5) Reading of selections from classical Latin literature. Prerequisite: LATIN 102. Offered: Sp.

LATIN 300 Latin Language, Accelerated (5) Intensive introduction to classical Latin. Not accepted as upper-division credit toward a major in Latin or classics. Does not satisfy foreign language proficiency requirement. Cannot be taken for credit if LATIN 101 already taken. Offered: W.

LATIN 305 Introduction to Latin Literature (5) VLPA Readings in prose and poetry from various Latin authors; elementary exercises in Latin prose composition. Recommended: LATIN 103, LATIN 301, or equivalent. Offered: A.

LATIN 306 Cicero and Ovid (5) VLPA Readings from the orations of Cicero and the poetry of Ovid; elementary exercises in Latin prose composition. Prerequisite: LATIN 305. Offered: W.

LATIN 307 Vergil (5) VLPA Selections from the first six books of the Aeneid; elementary exercises in Latin prose composition or metrics. Prerequisite: LATIN 306. Offered: Sp.

LATIN 401 Medieval Latin Literature to 1200 (3) VLPAHINDE Texts read in Latin; cultural and historical contexts discussed. Presupposes year and a half of Latin or equivalent. Informal individual guidance available to members of class handling medieval or renaissance Latin texts in their research. Recommended: LATIN 306.

LATIN 402 Later Medieval and Renaissance Latin Literature (3) VLPA HINDS Texts read in Latin; cultural and historical contexts discussed. Presupposes year and a half of Latin or equivalent. Informal individual guidance available to members of class handling medieval or renaissance Latin texts in their research. Recommended: LATIN 306. Offered: Sp.

LATIN 412 Lucretius (3) VLPA BLONDELL, CLAUS Recommended: minimum of two years of Latin language study at college level (or equivalent).

LATIN 414 Seneca (3) VLPA BLONDELL, STRoup Recommended: minimum of two years of Latin language study at college level (or equivalent).

LATIN 422 Livy (3) VLPA CLAUS, GOWING Recommended: minimum of two years of Latin language study at college level (or equivalent).

LATIN 423 Cicero and Sallust (3) VLPA CLAUS, GOWING, STRoup Recommended: minimum of two years of Latin language study at college level (or equivalent).

LATIN 424 Tacitus (3) VLPA CLAUS, GOWING Recommended: minimum of two years of Latin language study at college level (or equivalent).

LATIN 447 Roman Lyric (3) VLPA CLAUS, HARMON Recommended: minimum of two years of Latin language study at college level (or equivalent).

LATIN 449 Roman Elegy (3) VLPA HARMON, HINDS Recommended: minimum of two years of Latin language study at college level (or equivalent).

LATIN 451 Roman Satire (3) VLPA CLAUS, GOWING, STRoup Recommended: minimum of two years of Latin language study at college level (or equivalent).

LATIN 457 Roman Drama (3) VLPA CLAUS, GOWING, HARMON, STRoup Recommended: minimum of two years of Latin language study at college level (or equivalent).

LATIN 458 Roman Epic (3) VLPA CLAUS, GOWING, HARMON, STRoup Recommended: minimum of two years of Latin language study at college level (or equivalent).

LATIN 461 Latin Literature of the Republic (3-5, max. 15) VLPA Readings and discussion of selected authors from the era of the Roman Republic. Recommended: minimum of two years of Latin language study at college level (or equivalent).

LATIN 462 Latin Literature of the Augustan Age (3-5, max. 15) VLPA Readings and discussion of selected authors from the Augustan era. Recommended: minimum of two years of Latin language study at college level (or equivalent).

LATIN 463 Latin Literature of the Empire (3-5, max. 15) VLPA Readings and discussion of selected authors from the era of the Roman Empire. Recommended: minimum of two years of Latin language study at college level (or equivalent).

LATIN 465 Roman Topography and Monuments (5, max. 10) VLPA CLAUS, GOWING, HARMON, STRoup Study of the material remains of ancient Rome from the archaic period through the imperial age. Reading of source materials and inscriptions in Latin. Conducted in Rome. Recommended: minimum of two years of Latin language study at college level (or equivalent). Offered: Sp.

LATIN 490 Supervised Study (*, max. 18) Special work in literary and philosophical texts for graduates and undergraduates. Recommended: minimum of two years of Latin language study at college level (or equivalent).

LATIN 500 Grammar and Composition (5) CLAUS, GOWING, HINDS, STRoup Translation of passages from English to Latin for the purpose of acquiring advanced knowledge of the grammar and style of the classical tongue.

LATIN 501 Vergil (5) CLAUS, GOWING, HINDS

LATIN 502 Horace (5) CLAUS, HARMON

LATIN 503 Plautus and Terence: Early Republican Literature (5) BLONDELL, CLAUS, HARMON, STRoup
LATIN 504 Philosophy at Rome (5) Blondell, Stroup Selected philosophical works of Cicero and other sources for Hellenistic and Roman philosophy.

LATIN 506 Cicero (5) Gowing, Stroup Select speeches, with attention to rhetorical theory and/or letters.

LATIN 508 Silver Latin Literature (5) Connors, Hinds.

LATIN 510 Roman Historians (5, max. 10) Claus, Gowing.

LATIN 512 Augustan Poetry (5, max. 15).

LATIN 520 Seminar (5, max. 45).

LATIN 540 Topics in Latin Literary History (5, max. 25) Reading of a range of Latin texts by various authors. Offered: AWSpS.

LATIN 555 Seminar in Rome (5, max. 10) Claus, Gowing, Hammon, Stroup Study of selected topics and authors in Latin literature. Conducted in Rome.

LATIN 590 Supervised Study (*, max. 18) Prerequisite: permission of graduate program coordinator.

LATIN 600 Independent Study or Research (*)

**Communication**

COM 201 Introduction to Communication I (5) I&S Introduces students to four core principles that undergird the study and practice of communication — communication literacy, research inquiry, theories and concepts, and community engagement. Principles discussed and developed in the context of international communication, political communication, and communication technology and society.

COM 202 Introduction to Communication II (5) I&S/VLPA Introduces students to four core principles that undergird the study and practice of communication — communication literacy, research inquiry, theories and concepts, and community engagement. Principles discussed and developed in the context of social interaction, rhetoric and critical studies, and communication and culture.

COM 210 Introductory Communication Topics (5, max. 10) Introduction to a specified area of communication scholarship.

COM 220 Introduction to Public Speaking (5) I&S/VLPA Designed to increase competence in public speaking and the critique of public speaking. Emphasizes choice and organization of material, sound reasoning, audience analysis, and delivery.

COM 222 Speech Communication in a Free Society (3) I&S/VLPA Problems and arguments related to freedom of speech; early English writers on freedom of expression; background of freedom of speech in the United States; contemporary freedom of speech issues.

COM 234 Public Debate (5) I&S/VLPA Examines public debate in a democracy by developing a rhetorical perspective of public argument and skills to evaluate debates critically. Develops an understanding of rhetoric, values, audiences, tests of reasoning, and sources of information. Sharpens critical skills and applies them to contemporary controversies in the public sphere.

COM 270 Interpersonal Communication (5) I&S/VLPA Emphasizes analyzing and understanding communication variables affecting human relationships, such as person perception, feedback, idea development, nonverbal cues. Focus on informal communication settings.

COM 273 Parliamentary Procedure (3) I&S/VLPA Principles and practice: a study of the historical bases and contemporary uses of parliamentary procedure; methods and practice in organizing and conducting public meetings.

COM 300 Basic Concepts of New Media (5) I&S/VLPA Provides a comprehensive examination of the effects of new, digital media on interpersonal communication, media industries, and media culture. Emphasis on economic, social, political, and aesthetic implications. Provides limited experience with computer-based media. No prior technical computer experience assumed.

COM 301 Navigating Information Networks for Mass Media (5) I&S/VLPA Builds familiarity with computer-mediated information networks. Introduces and compares network search engines, agents, browsing/viewing tools and retrieval/transfer software for use by reporters and other media workers. Instruction and practice with searching/acquiring information, its analysis and interpretation, illustration, and write-up. No prior computer or network experience assumed.

COM 302 The Cultural Impact of Information Technology (5) I&S/VLPA Utilizing approaches from the history of technology, cultural studies, and literary theory, seeks to analyze the cultural and social impact of information technology. Considers how information technologies impact our relationships with others, our concept(s) of self, and the structure of the communities to which we belong. Offered: jointly with CHID 370.

COM 304 The Press and Politics in the United States (5) I&S Journalist’s role in elections and public policy. Relationship between news coverage and political campaigns. Study and analysis of local political newswriting, reporting, and response by local and state political figures. Offered: jointly with POL S 304.

COM 305 The Politics of Mass Communication in America (5) I&S Role of mass audiences in politics from the standpoint of the communication strategies used to shape their political involvement. Topics include: social structure and political participation, political propaganda and persuasion, the political uses of public opinion, and the mass media and politics. Offered: jointly with POL S 305.

COM 306 Media, Society and Political Identity (5) I&S Explores how society and culture are both represented in and shaped by communication technologies and media content. Media include film, advertising, news, entertainment television, talk shows, and the Internet. Explores how media represent and affect individual identity, values, and political engagement. Offered: jointly with POL S 306.

COM 320 Public Speaking (5) I&S/VLPA Practice in preparation and presentation of a variety of types of public speeches based on study of their structure and form; emphasis on organization and delivery. Prerequisite: COM 220.

COM 321 Communications in International Relations (5) I&S Looks at communications in relations between international groups and states. Examines the range of functions and roles communication media play in international affairs, global issues, and intergroup relations. Also examines the strategic use of communications by various groups. Offered: jointly with POL S 330.

COM 322 Global Communication (5) I&S Introduction to the history, purpose, channels, content, technologies, policy, and regulation of international communications systems. Issues covered include disparities in media development between post-industrial and developing nations, imbalances in international news and information flow, and the emergence of global communications. Offered: jointly with POL S 329.

COM 329 Rhetoric of Social and Political Movements (5) I&S/VLPA Inquiry into the rhetoric of social and political movements; emphasis on investigation of persuasive discourse: examination of the nonverbal symbols of persuasion.

COM 331 The Rhetorical Tradition in Western Thought (5) I&S/VLPA Analysis of the major theories that prescribe and describe the use of symbols to change attitudes and behavior. Principal emphasis is placed upon defining the nature and scope of rhetoric and upon analyzing the art’s underlying assumptions about human beings as symbol users. Some background in history, philosophy, and literature is desirable.

COM 334 Essentials of Argument (5) I&S/VLPA Argument as a technique in the investigation of social problems; evidence, proof, refutation, persuasion; training in argumentative speaking.

COM 340 History of Mass Communication (5) I&S History and development of communication from prehistoric times; rise of mass media; political and economic context of newspapers, radio, film, and television.

COM 342 Media Structure (5) I&S Industrial organization and culture; consumer and producer decisions; public policy toward media; workforce and unions. Media role in culture and political economy.

COM 343 Effects of Mass Communication (5) I&S Effects of mass communication on individuals and society. Relevant theories applied to research evidence, addressing such topics as effects of stereotypes, violent and sexual imagery, and persuasive messages on our knowledge, attitudes, and behaviors.

COM 351 Interviewing Principles and Practices (5) I&S/VLPA Interviewing principles and practices, with emphasis on information gathering, selection, and persuasive interviews. Topics and types of interviews, structure of interviews, and influence of communication patterns on interview outcomes.

COM 359 Writing for Mass Media (5) I&S Training in gathering information through interviews and observation and from written record and other public sources. Practice in organizing and writing this information for
presentation in a mass medium such as a newspaper, newsletter, or magazine. Offered: AWSpS.

COM 360 Beginning Newswriting and Reporting (4) I&S Introduction to newswriting and reporting for print media. Focus on defining newswriting, writing skills, constructing leads, preparing a variety of basic journalism news stories, interviewing techniques, covering beats, and journalistic style.

COM 361 Advanced Reporting and Newswriting (4) I&S In-depth training in the development of advanced-level reporting and newswriting skills. Practice in information gathering, interviewing, use of sources, database analysis, and investigative reporting techniques. Recommended: COM 360.

COM 362 Community Journalism: News Lab (5) I&S Newswriting-skills course. Students gain real-world experience by producing news and feature stories for client papers in the Puget Sound Region. Involves considerable one-on-one work with the lecturer/editor. Requires writing and reporting skills. Recommended: COM 361.

COM 373 Communication In Small Groups (5) I&S/LVPA Discussion as an everyday community behavior, with emphasis on the informal cooperative decision-making methods of committee, conference, and roundtable groups.

COM 374 Perspectives on Language (5) I&S/LVPA Study of language and meaning, and survey of several influential modern approaches, including the semantic, general semiotic, behavioral, and analytic philosophical. Relates theories of language and meaning to the study of speech communication.

COM 375 Communication Ethics (5) I&S/LVPA Ethical problems in interpersonal and public speech communication. Alternative ways of evaluating and responding to moral problems in a variety of communication situations.

COM 376 Nonverbal Communication (5) I&S/LVPA Reviews the nature of nonverbal communication as part of the human message system. Discusses research on the types of cues that are part of the nonverbal system, reviews some communicative functions allowed by nonverbal cues (e.g., emotional expressions, relational messages, deception, coordination, or interaction), and ties nonverbal communication to language.

COM 378 Social Approaches to Interpersonal Communication (5) I&S/LVPA Exploration of several social approaches to interpersonal communication, emphasizing the theorists’ philosophical orientations and practical applications.

COM 382 Social Scientific Approaches to Communication Research (5) I&S Comprehensive introduction to research methods employed in basic and applied communication research, including sample surveys, content analysis, experimentation, and elementary statistics.

COM 389 Race, Gender, and Sexuality in the Media (5) I&S Introduction to media representations of gender, race, and sexuality. Offered: jointly with AES 389/WOMEN 389.

COM 395 Communication Internship (2-5, max. 5) Faculty-supervised study of communication principles in internship contexts. Readings to aid students in observations of communication concepts. Recommended reading structured around topics of interest for each student.

COM 402 New Media as Virtual Communities (5) I&S Technologically-mediated virtual communities considered through analysis of historical precedents and influences and through an exploration of the concept of community. Issues include a focus on social interactions; the social, political, economic, and technological contexts of virtual communities and the limits for their sustenance.

COM 405 New Media Criticism (5) I&S/LVPA Examines critically the content of new media forms, contrasting them with traditional media. Stresses influences of social, economic, political, and technological forces on content and developing strategies for critical analysis.

COM 407 Communication Technology and Politics (5) I&S Employs some core concepts of political communication and theories of democracy to examine the emerging role of information and communication technologies in candidate and issue campaigning; online voting; protest and advocacy movements; law-making and electronic governance in the United States and internationally. Offered: jointly with POL S 451.

COM 414 Mass Media and Public Opinion (5) I&S Examines the foundations of the idea of public opinion in a democratic environment and the role of mass communication in the organization, implementation, and control of that opinion. Considers these relationships from the perspectives of societal elites, media, and citizens. Offered: jointly with POL S 452.

COM 417 Political Deliberation (5) I&S Exploration of philosophical and empirical writings on political deliberation in small groups, campaigns, and other public settings. Contempo-rary deliberative theory. Participation in face-to-face discussions on current issues. Recommended: either COM 273 or COM 373. Offered jointly with POL S 455.

COM 418 Communications and the Environment (5) I&S Examines the role of mass media in the resolution of environmental problems. Topics include strengths and weaknesses of media coverage, use of media by environmental groups and government agencies, media effects on public opinion, and mass communication and social movements. Offered: jointly with ENVIR 418.

COM 420 Comparative Media Systems (5) I&S Provides students an understanding of policies that shape national communication processes and systems. Uses comparative analysis to identify both similarities and differences among media structures of nations at different levels of development. Primary emphasis on broadcast media. Offered: jointly with SIS 419/POL S 468.

COM 423 Communication and Social Change (5) I&S Examines both theory and application involved in using communications media as a tool for addressing political, social, and economic development issues. Utilizes a case study approach to look at localized applications of traditional and new communications tools in the pursuit of sustainable development.

COM 425 European Media Systems (5) I&S Examines media systems in selected countries in Europe and policy issues that link (or divide) members of the European Union and other major media producers. Media studied in context of the contemporary economic, social, political, and cultural milieu in which they operate. Offered: jointly with EURO 425.

COM 426 International Media Images (5) I&S Ways in which media construct images of international peoples and events. Develops a set of critical tools for assessing media portrayals of international affairs and cultures.

COM 427 International Communications Law and Policy (5) I&S Examines the international and comparative aspects of traditional press law, broadcast regulation, and telecommunication policies. Also examines freedom of the press in international reporting and the efforts of countries to limit foreign media influences within their borders.

COM 428 Asian Media Systems (5) I&S Examines the media systems and communication policies in selected Asian countries. Identifies and analyzes the cultural, economic, historical, and political influences that shape these media.

COM 429 Chinese Communications Systems (5) I&S Analyzes the economic, historical, intellectual, social, and political foundations of communications systems in the region of Chinese Asia: China, Hong Kong, Singapore, and Taiwan. Focus primarily on print and broadcast journalism.

COM 430 Canadian Documentary Film Traditions (5) I&S/LVPA History and development of non-fiction film documentary traditions, especially in Canada, the first institutionally defined area in which documentaries became prominent through the National Film Board and the Canadian Broadcasting Corporation. Discussion of Flaherty, Greerison, and independent network producers who developed present-day style of documentaries. Offered: jointly with SISCA 430.

COM 431 Rhetorical Criticism (5) I&S/LVPA Study of approaches to rhetorical inquiry that aid in the description, analysis, interpretation, and evaluation of discourse. Applies various critical models to a chosen artifact.
COM 433 Speech Composition (5) I&S/VLPA
Preparation and delivery of public speeches with emphasis on style, thought organization, and proof. Analysis of model speeches. Recommended: SP COM 220.

COM 434 Argumentation Theory (5) I&S/VLPA
Theory and research on the structure and properties of argument, argument fields, argument modeling, the influence of audience, argument criticism, and related topics. Prerequisite: either COM 220 or COM 334.

COM 435 Historic American Public Discourse (5) I&S/VLPA
Rhetorical criticism of historical public speeches, essays, and declarations. Includes readings of public texts in their historical and political context to increase understanding of those texts, their rhetorical construction, and the culture from which they arose. Covers the beginnings of the nation to the middle of the 20th century.

COM 436 Contemporary American Public Discourse (5) I&S/VLPA
Rhetorical criticism of contemporary public messages. Includes reading of public texts in their context to increase understanding of those texts, their rhetorical construction, and the culture from which they arose. Covers mid-20th century to the present.

COM 437 Rhetorical Perspectives in Intellectual Revolutions (5) I&S/VLPA
Rhetorical examination of selected major writings. Examines the rhetorical dimension in the progress of ideas through analysis of documents of major intellectual revolutions as persuasive works. Relates principal revolutions in Western thought to contemporary controversy. Examines Rights of Man, Communist Manifesto, The Origin of Species.

COM 440 Mass Media Law (5) I&S
Survey of laws and regulations that affect the print and broadcast media. Includes material on First Amendment, libel, invasion of privacy, freedom of information, copyright, obscenity, advertising and broadcast regulation, and matters relating to press coverage of the judicial system. Offered: jointly with POL S 461.

COM 441 United States Media History (5) I&S
Development of mass communication in the United States with emphasis on role of mass media in politics, economics, gender, and race.

COM 442 History of Media Technology and Regulation (5) I&S
Impact of pre-1980s media technologies — printing, telecommunications, broadcasting, photography, and more — on individuals and institutions, especially government, business, and the mass media. How laws and policies have changed to govern new media forms.

COM 443 Indigenous Film, Sovereign Visions (5) VLPA/I&S Cotler, Hart, Ross Explores fiction, documentary, experimental film, and digital media from indigenous artists from around the world. Focuses on personal, political, and cultural expression. Issues include media and sovereignty movements, political economy, language revitalization, the politics of decolonization, and indigenous aesthetics. Offered jointly with AIS 443.

COM 444 Public Relations and Society (5) I&S
Overview of issues, strategies, and role of public relations professionals in various areas of American society, including media relations, government relations, community affairs, and consumer relations.

COM 445 Journalism and Literature (5) I&S/VLPA
Explores the relationship between journalism and fiction writing in the United States. Examines writers who began their careers as journalists and forged a fiction-writing philosophy related to what they learned in journalism. Readings in fiction and journalism.

COM 451 Mass Media and Culture (5) I&S/VLPA
Empirical and theoretical framework for analyzing role of mass media in cultural change. Historical and contemporary cases consider ethnic, gender, class, and urban-rural conflicts and cultural roles of sports, elections, and national rituals. Focus on visual electronic media.

COM 452 Crisis Communications (5) I&S
Study of the functions of communications professionals during crises. Covers public relations professionals as advocates for organizations and companies in crisis and the news media as advocates of the mass public. Discussion of cases.

COM 459 Narrative Journalism (5) VLPA/I&S
Kaplan Introduces the rigorous reporting and literary writing techniques involved in narrative journalism. Concentrates on producing three narrative articles for publication in the online, reader-interactive magazine, Narrative Journalist. Offered: jointly with CHID 459.

COM 460 Special Reporting Topics (4, max. 8) I&S
Topics vary. x

COM 461 Computer-Assisted Journalism (5) I&S
Introduction to computer-assisted journalism and other advanced reporting techniques. Includes hands-on electronic data analysis, exploration of on-line investigative tools, and the fashioning of electronically-retrieved information into news stories. Students examine ethical and technical challenges these tools present to media and society.

COM 463 Copy Editing and Design (5) I&S
Focus on editing copy for publications, covering grammar and style, production methods, news criteria, use of wire services, headlines, make-up and design, pagination, and online publication.

COM 464 Opinion Writing (5) VLPA Combines the teaching expertise of a Department of Communication faculty member with the professional expertise of an opinion-writing journalist. Students learn about and practice writing newspaper editorials, columns, and various forms of criticism in order to gain an understanding of the differences between news and opinion content in print journalism. Prerequisite: com 361.

COM 465 Legislative Reporting (12) I&S
Coverage of Washington legislature for a daily newspaper. Selected students live in Olympia, interview legislative delegations, report on committee and floor sessions, and attend and report on gubernatorial and other press conferences.

COM 466 Digital Journalism (5) I&S/A. Chan Introduction to digital journalism. Integrates Web design, video, still, and sound to develop an Internet Webcast called DIA (Digital Interactive) News. Students serve as sole initiators of DIA news, utilizing journalistic standard storytelling, video production, and editing and design. Prerequisite: COM 300.

COM 467 Feature Writing (5) VLPA
Focuses on the many types of newspaper and magazine articles that do not fall into the category of hard news, including histories and backgrounders, how-to and explanatory, consumer information, statistical pieces, first-person, and participatory. Includes practice in writing these forms. How to market freelance manuscripts.

COM 468 Journalism Ethics (5) I&S Simpson Provides a method and substantive context based on ethical theory, media history, and value systems analysis for analyzing and resolving dilemmas raised by journalistic practices.

COM 469 Intellectual Foundations of American Journalism (5) I&S
Examines the thinkers and philosophers who have influenced modern journalism. Studies the main ideas in the development of word thought and their impact on today’s journalists. Explores the role communications systems have played in the creation of the world’s cultures.

COM 470 Discourse: Analyzing Talk and Texts (5) I&S/VLPA
Critical analysis of contemporary theories/methods in discourse analysis: how verbal communication (together with visual communication) is used in conversational talk and mediated texts to construct identities and relationships; and how power and ideology are reproduced through these everyday social interactions. Offered: jointly with LING 470.

COM 471 Persuasion (5) I&S/VLPA
Analysis of the ways in which beliefs, values, attitudes, and behavior are deliberately influenced through communication.

COM 472 Empirical Approaches to Interpersonal Communication (5) I&S
Examination of theories and research on the development and deterioration of interpersonal relationships. Emphasis on the nature of interpersonal interaction, the role of language and nonverbal communication in relationships, functional and dysfunctional interaction patterns, and the dynamics of interpersonal networks.

COM 473 Problems of Discussion Leadership (3) I&S/VLPA
Critical analysis of leadership in committee and conference, with an emphasis on the development of speech effectiveness in the cooperative achievement of goals. Prerequisite: COM 373.

COM 474 Communication, Conflict, and Cooperation (5) I&S/VLPA
Role of communication in resolving informal conflicts and in facilitating interpersonal and intergroup cooperation. Review of empirical literature. In-class simulations and exercises.

COM 475 Organizational Communication (5) I&S/VLPA
Role of communication in organizational processes, the types of problems arising, and approaches to their resolution. Communication in the human relations and productivity of organizations. Applying communication skills in various organization roles.

COM 476 Models and Theories in Communication (5) I&S
Examination of selected theories and models of speech communication as well as of criteria applicable to them. Emphasis on the nature and function of theories and models, especially as these relate to basic principles underlying the scientific, interpretive, and critical study of speech communication phenomena.
I&S/VLPA

COM 478 Intercultural Communication (5) I&S Investigates intercultural communication theory and its application for varying levels of human interaction: interpersonal, intergroup, and international.

COM 479 Communication in Children’s Environments (5) I&S/VLPA Study of the communication capacity of children with emphasis on the analysis of the communication process in formal and informal learning environments. Includes examination of communication-based educational approaches and instructional strategies.

COM 480 Communication in Adolescent Environments (5) I&S/VLPA Study of the communication process in youth environments with a primary focus on formal and informal learning. Includes critical analysis of communication in contemporary instructional settings and the development of communication strategies for teaching and learning.

COM 482 Computer-Mediated Interpersonal Communication (5) I&S Exams the relationships and groups formed through computer-mediated interpersonal communication. Focuses on how people manage interactions and identities, develop interpersonal relationships, engage in collaboration and conflict, and develop communities in virtual environments. Involves both the study and use of network-based computer-mediated systems.

COM 484 Cultural Codes in Communication (5) I&S/VLPA Social and cultural codes in interpersonal communication, with special reference to contemporary American subcultural groups and their communication patterns.

COM 488 Race, Gender, and Power in Asian American Media (5) I&S Examines the cultural, political, and social facets of Asian American media since 1915 within such key issues as racial and sexist stereotypes, white privilege and hegemony, identity, and agency and empowerment. Informed by critical theories of race and ethnicity.

COM 490 Representing Beyond the Binaries: Mixing Race, Gender, and Sexuality in the Media (5) I&S Joseph Cultural studies approach to examining the mixed formations that race, sexuality, and gender take in the contemporary United States media. Draws upon multi-disciplinary scholarship in examination of the media. Offered: jointly with AES 490/WOMEN 486.

COM 495 Special Topics in Communication (2-5, max. 15) Lecture, seminar, and/or team study. Topics vary.

COM 496 Honors Seminar (5) I&S/VLPA Preparation for researching and writing senior honors thesis.

COM 498 Independent Research (1-5, max. 10) Work on research projects designed and conducted by undergraduate students.

COM 499 Directed Research (1-5, max. 10) Work on research projects designed by faculty members.

COM 500 Communication Theory Development (5) Covers the philosophy behind theory development, discusses the basic components of theories, and reviews significant theoretical contributions in communication from social and humanistic traditions. Introduces students to the process of conceptualization and theory design through reading and discussion of relevant bodies of communication scholarship.

COM 501 Methods of Inquiry (5) Overviews some of the most important methods of inquiry used to investigate communication phenomena. Includes textual criticism, content analysis, ethnography, experimentation, survey research, and historical approaches. Explores the utility of different methods for investigating research topics, defining and measuring concepts, reading texts, and investigating theories.

COM 502 Communication Scholarship and Public Life (5) Explores potential connections between communication scholarship and government, markets, civil society, and the general public.

COM 507 Interdisciplinary Communication Theory (5) Introduces students to challenges, benefits, and processes of interdisciplinary research. Explores formation of disciplinary boundaries. Considers significant theories that have influenced communication research. Considers how synthetic theoretical arguments are made and how to integrate work from fields with different epistemologies.

COM 509 Collaboration and Scholarship (5) Examines the collaborative research process. Students identify and conceptualize a group project, carry it out, and present findings. Topic varies. Prerequisite: COM 501 or equivalent.

COM 511 Content Analysis (5) Content analysis as a technique for making inferences from texts. Includes quantitative, qualitative, and computer-assisted approaches to analysis.

COM 512 Critical, Social, and Practice-Based Approaches (5) Explores approaches to communication research developed from understandings of human communication as inherently social, grounded in tool-mediated action, and interwoven with power relations. Covers a range of theories that are associated with these approaches, and the implications of these theories for methods of data collection and analysis.

COM 513 Fieldwork Research Methods (5-, max. 10) Methods of fieldwork research in communication studies, with emphasis on participant observation, ethnography, and discourse analysis.

COM 514 Critical Discourse Analysis (5) Introduction to systematic analysis of linguistic and visual discourse in face-to-face and mediated talk and texts; critical examination of the reproduction of power, control, and ideology through linguistic and related semiotic practices of everyday life.

COM 515 Rhetorical Criticism (5) History and method of rhetorical criticism. Application of critical standards to various rhetorical artifacts.

COM 516 Descriptive and Analytic Communication Research Methods (5) Development of the historical approach to communication research. Study of historical methods, bibliography, and criticism.

COM 517 Survey Research (5) Faculty-directed project in survey research in which basic principles of survey design, including sampling, observation, measurement, data analysis, and data interpretation, are all applied. Prerequisite: elementary statistics or permission of instructor.

COM 520 Statistical Methods in Communication (5) Reviews the steps taken in social scientific research on communication, with emphasis on the conceptualization, operationalization, and analysis of quantifiable variables. Highlights understanding of computer application of univariate and bivariate statistics, focusing on both parametric and nonparametric tests.

COM 521 Advanced Statistical Methods in Communication (4) Discusses complexities in quantitative research on communication, including multiple and logistic regression, ANOVA and MANOVA, and factor analysis. Prerequisite: COM 520.

COM 527 International Communication Research Methods (5) Methodological issues particular to the design or analysis of research that deals with data from different countries, cultures, or sub-cultures. Prerequisite: COM 501 or equivalent.

COM 528 Designing Internet Research (5) Focuses on designing Internet research, assessing the adaptation of proven methods to Internet tools and environments, and developing new methods in view of particular capacities and characteristics of Internet applications. Legal and ethical aspects of Internet research receive ongoing consideration.

COM 529 Research Strategies and Methodologies in Digital Media (5) Introduces and compares methods of inquiry into digital media industries, practitioners, and consumers. Develops theories and skills applicable in business decision-making processes, as well as in scholarly research.

COM 530 Philosophical Issues in Rhetorical and Communication Theory (5) Survey of selected philosophical controversies among speech communication theorists, and analysis of one philosopher’s approach to communication. Topics include paradigm descriptions of communication, rhetoric and knowledge, linguistic analysis and communication, hermeneutics and dialogue.

COM 531 Rhetoric in Society (5) Selected works of major rhetorical theorists such as Aristotle, Cicero, Augustine, Campbell, Whately, Perelman, and Burke. Examines how rhetorical themes are responsive to and symptomatic of societal conditions and values.

COM 532 Classical Rhetoric (5) Development of the classical tradition in rhetorical theory, criticism, and pedagogy from the sophists to Augustine; analysis of the contributions of major figures and works to that tradition.

COM 535 Critical Theory Applications in Communication (5) Major approaches in critical theory: Marxism, psychoanalysis, structuralism, and semiotics. Synthesizes these approaches by viewing the “cultural studies” tradition. Assesses critical theory through empirical study of network television in the United States and the United Kingdom.

COM 538 Theories and Criticism of Communication Technologies (5) Potential of the computer for use in behavioral science. Prerequisite: elementary programming, elementary statistics.

COM 540 The Rhetoric of Science (5) Examines selected topics in the rhetoric of science, underscoring the interplay of language, situation, culture, and prior tradition in the quest for exact knowledge of the natural world. Scrutinizes scientific communication in interdisciplinary, interdisciplinary, and extradisciplinary contexts.

COM 542 Readings in Communication History (5) Selected readings on the history of communication.

COM 543 Research Seminar in Historic and Contemporary Communication (5) Topical research seminar in historic and contemporary communication.

COM 545 Development of Mass Communication (5) Institutions of mass communication. Political and social roles.

COM 546 Evolution and Trends in Digital Media (5) Examines the past, present, and future of digital communication, from diverse disciplinary and theoretical perspectives. Offered: A.

COM 547 Telecommunications Policy and Convergent Media (5) Structures and policies governing the functioning of communication technologies and data flow: United States and international perspectives. Interdisciplinary approach.

COM 549 Mass Communication Process and Effects (5) Analytic approach to conceptualization and research in the field since 1900.

COM 550 European Union Information Society Policy (5) Giffard Analysis of European Union policy and regulatory documents relating to cultural, economic, political, social, and technological aspects of the new information society, including efforts to promote transborder flows of television programs in Europe.

COM 551 Political Communication (5) Surveys classic works and new directions in political communication, including functionalist, structuralist, constructivist, network, and comparative approaches, reflecting a range of methods. Examines political organizing, electoral and legislative processes, civic (dis)engagement, media and politics, public deliberation and opinion formation, political identity and discourse. Offered: jointly with POL S 551.

COM 553 Public Opinion and Communication (5) Conceptual and methodological approaches to public opinion and communication as historical and behavioral phenomena. United States and international perspectives.

COM 554 Discourse and the Politics of Resistance (5) Examines how disciplines theorize and empirically study discourse in the politics of resistance. Examines the discursive turn in U.S. and European “new” social movement theory. Ranges across disciplines, such as political sociology, cultural anthropology and human geography, to discover ways in which discourse is conceptualized and studied for its role in seeding social change. Offered: jointly with POL S 567.

COM 555 Political Deliberation (5) Exploration of deliberative theories of democracy and research on political discussion in campaigns, face-to-face meetings, on-line forums, and informal conversations. Presents different uses and understandings of deliberation and its role in democratic governance. Recommended: COM 577, POL S 551/COM 551. Offered jointly with POL S 558.

COM 556 Political Communication Research Practicum: Community, Communication, and Civic Engagement (5) Overview of the research process, including literature review, hypothesis generation, data gathering, empirical analysis, and writing for publication Topics vary with instructor, but generally address questions of how communication affects democracy and citizen engagement in national or international contexts. Offered: jointly with POL S 594.

COM 557 Government and Mass Communication (5) Legal problems of mass communication, institutions, and media operations.

COM 558 U. S. Digital Media Law and Policy (5) Examines the conceptual framework and social application of existing regulations and policies on digital media, with the aim of helping professionals address the changing legal and policy environments.

COM 559 Media and Foreign Policy (5) The role of communications media in how nations interact. The media as source, actor, and catalyst in international affairs. Interdisciplinary focus.

COM 560 Media, Myth, and Ritual (5) Examines the role of mass media in the development of myth and ritual in societies around the world. Focus varies with specialization of instructor. Consult graduate secretary for details. Interdisciplinary focus.

COM 562 International Communication Systems (5) International communications and contemporary issues that affect the functioning of global communication systems. Interdisciplinary focus.

COM 563 Media Analysis (5) Reviews primary theories and research on nonverbal communication. Focus on developmental and sociocultural aspects of nonverbal cues, including review of communicative functions served by nonverbal channels. Topics include paralinguistic systems, relational messages, deception, acquisition of cue use, and emotional expression. Emphasizes research methods and influences of culture and context.

COM 564 Media, Myth, and Ritual (5) Examines the role of mass media in the development of myth and ritual in societies around the world. Focus varies with specialization of instructor. Consult graduate secretary for details. Interdisciplinary focus.

COM 565 Mass Media Structure (5) Research on the structural aspects of mass communication.

COM 566 Discourse and Sexuality (5) Seminar-based analysis of discourse and social construction of eroticism/desire in face-to-face/mediated talk and texts; examination of the reproduction of power, control and ideology through the linguistic and semiotic realization of sexuality. Offered: jointly with WOMEN 566.

COM 567 Gender, Race, and Communication (5) Analysis of the role of media in the construction of reality, production processes, and their influence on media representation of women and people of color. Offered: jointly with WOMEN 589.

COM 570 Organizational Communication (5) Examination of social scientific theory and research on communication in organizations. Topics include quantitative and qualitative approaches to process of organizational communication, function and structure of macro networks, superior-subordinate relationships, and the role of communication in organizational change, development, and effectiveness.

COM 574 Interpersonal Communication (5) Social scientific research and theory on the role of communication in developing and maintaining interpersonal relationships. Nature of interpersonal communication, relationships, change processes, interpersonal control through communication, and personal communication networks.

COM 577 Communication in Small Groups (5) Reviews major small group communication theories and the history of research on small groups. Topics include structuration, democratic decision making, symbolic convergence, and the influence of personality, gender, and ethnicity on group communication. Involves students in original research projects on communication in small group settings.

COM 578 Intercultural Communications (5) Examines the past, present, and future of digital communication, from diverse disciplinary and theoretical perspectives. Offered: A.

COM 580 Nonverbal Communication (5) Reviews primary theories and research on nonverbal communication. Focus on developmental and sociocultural aspects of nonverbal cues, including review of communicative functions served by nonverbal channels. Topics include paralinguistic systems, relational messages, deception, acquisition of cue use, and emotional expression. Emphasizes research methods and influences of culture and context.

COM 581 Social Production and Distribution of Digital Content (5) Explores the theoretical and applied analysis of “user-generated” digital and distribution, as well as their economic cultural impact. Examines specific issues related to monetization and messaging, particularly in story telling, advertising, campaigning, advocacy, and entertainment.

COM 582 Communication Education Research (5) Communication in instructional environments. Nature of instructional communication, paradigms for instructional communication research, quantitative and qualitative approaches to instructional communication, verbal and nonverbal classroom interaction.

COM 584 Ways of Speaking (5) Theory and literature of the ethnography of communication, with special emphasis on the descriptive-
comparative approach to culturally patterned styles of communicative conduct. Offered: jointly with ANTH 584.

**COM 585 Digital Media Message Design and Content Creation (5)** Applies communication theory to the identification, creation, and evaluation of digital media message design to meet needs of the target audience. Introduces the theory and practice of hyperText and project management techniques needed to organize digital assets, allocate resources, and meet deadlines.

**COM 586 Writing and Presentation for Digital Media (5)** Applies communication theory and research tools to rhetorical and design choices in web page creation. Examines the emergence of digital media story-telling techniques, as well as ethical and technical challenges these tools present to media and society.

**COM 587 Digital Media Economics and Management (5)** Emphasizes communication theory to analyze effective management of digital media enterprises, with practical application of economic theory to entrepreneurial strategies. Topics include analysis of the total business process, patterns of ownership, merger and acquisitions, finance and accounting, human resources development, sales and marketing, and ethics.

**COM 588 Digital Media Branding and Marketing (5)** Critically examines the role of advertising, marketing, and other promotional efforts in establishing the branding of digital media companies. By using communication theory to analyze successful cases of established and start-up digital media companies, participants identify practicable and effective strategies for brand building and enhancement.

**COM 589 Global Digital Media Law, Policy, and Ethics (5)** Examines the legal, social, political, and policy environments of digital media laws, policies and ethics around the world. Offers a comparative perspective, which prepares digital media managers to expand into other markets outside their home bases.

**COM 590 Selected Readings (1-5, max. 10)** Selected readings assigned by faculty.

**COM 591 Independent Research (1-5, max. 10)** Research projects designed and led by students with faculty supervision.

**COM 592 Directed Research (1-5, max. 10)** Student participation in faculty-directed research projects.

**COM 593 Communication Internship (1-5, max 15)** Provides students an opportunity to connect their scholarship with communities outside academia by engaging in a project that uses communication theory to inform practical work.

**COM 594 Professional Seminar (1, max. 6)** Helps students develop a range of professional competencies. Focuses on a particular topic such as computer-assisted research, technology in the classroom, obtaining funding for research, writing for academic publication, career choices after graduate school, and ethics in research and teaching.

**COM 595 Public Speaking Pedagogy (1, max. 5)** Content and effective teaching skills for public speaking course. Emphasizes the rhetorical tradition, grading speeches, and facilitating oral critiques. Required for all COM 220 TAs; recommended for those who want to teach COM 220. Only 3 credits count toward degree. Credit/no credit only.

**COM 596 Communication Pedagogy (1, max. 3)** Development of effective teaching and professional skills. Emphasizes interactive teaching, leading discussions, lecturing, planning courses, evaluating resource materials, grading and evaluation, teaching philosophies, and effective classroom management and communications. Required of all graduate students who accept teaching assistantships. Credit/no credit only.

**COM 597 Special Topics in Communication (5, max. 10)**

**COM 600 Independent Study or Research Project (*)** Prerequisite: permission of supervisory committee chairperson. Credit/no credit only.

**COM 700 Master’s Thesis (*)**

**COM 800 Doctoral Dissertation (*)**

---

**Comparative History of Ideas**

**CHID 110 The Question of Human Nature (5)** I&S/VLPA Merrill Considers the relationship between the individual and his/her culture. Traces the evolution of the notion of human nature in Europe and the United States and compares this tradition with representations of the human being from other cultural traditions.

**CHID 205 Method, Imagination, and Inquiry (5)** VLPA Sarre Examines ideas of method and imagination in a variety of texts, in literature, philosophy, and science. Particularly concerned with intellectual backgrounds and methods of inquiry that have shaped modern Western literature. Offered: jointly with ENGL 205.

**CHID 207 Introduction to Intellectual History (5)** I&S Toews Ideas in historical context. Comparative and developmental analysis of Western conceptions of “community” from Plato to Freud. Offered: jointly with HIST 207.

**CHID 210 The Idea of the University: Ways of Learning, Exploring, and Knowing (5)** I&S Considers different ways of learning, exploring, and knowing in the context of the historical development, social context, and impact of universities in general and of the University of Washington in particular. Includes reflective workshops on choosing areas of study (majors) in collaboration with Undergraduate Advising.

**CHID 250 Special Topics: Introduction to the History of Ideas (5, max. 15)** I&S Thurtle Examines a different subject or problem from a comparative framework. Satisfies the Group A major/minor requirement. Offered: AWSp.

**CHID 260 Re-Thinking Diversity (5)** I&S Bushnell Considers the notion of diversity from many scholarly perspectives and from personal engagements. Critically visits historical thinking about diversity and examines contemporary issues such as racism and other oppressions.

**CHID 270 Special Topics (5, max. 15)** I&S Each special topics course examines a different subject or problem from a comparative framework.

**CHID 298 Pre-Departure Seminars (2)** I&S Barrett, Pitchford, Warren Prepares students to participate in CHID International Programs. Prerequisite: students must be accepted to an International Program prior to registration. Offered: AWSpS.

**CHID 300 Ideas in Art (5)** VLPA Opperman Selected monuments of art and architecture in the Western tradition, from the Greeks to the twentieth century, studied in relation to the intellectual background of the ages and civilizations that produced them. Slide lectures accompanied by discussion of assigned readings in philosophical, religious, scientific, political, literary, and artistic texts. Offered: jointly with ART H 300.

**CHID 332 Disability and Society: Introduction to Disability Studies (5)** I&S Introduces the field of disability studies. Focuses on theoretical questions of how society predomi-
nantly understands disability and the social justice consequences. Examines biological, social, cultural, political, and economic determinants in social construction (framing) of disability and effects on those claiming and/or labeled as disabled. Offered: jointly with JSU 332.

**CHID 350 Women in Law and Literature (5)** I&S/VLPA Representations of women in American law and literature. Considers how women’s political status and social roles have influenced legal and literary accounts of their behavior. Examines how legal cases and issues involving women are represented in literary texts and also how law can influence literary expression. Offered: jointly with WOMEN 350.

**CHID 370 The Cultural Impact of Information Technology (5)** I&S/VLPA Thrutte Utilizes approaches from the history of technology, cultural studies, and literary theory, seeks to analyze the cultural and social impact of information technology. Considers how information technologies impact our relationships with others, our concepts of self and the structure of the communities to which we belong. Offered: jointly with COM 302.

**CHID 380 The Nature of Religion and Its Study (5)** I&S Jaffee, Webb Study of religion as a general human phenomenon. Manner in which different methods of inquiry (phenomenology, anthropology, sociology, psychology, literary
criticism, archaeology, philosophy, theology) illuminate different aspects of religion and shape our conceptions of its nature. Recommended: RELIG 201 or RELIG 202. Offered: jointly with RELIG 380.

CHID 390 Colloquium in the History of Ideas (5) I&S, Thurtle Basic theoretical issues in the comparative history of ideas as a disciplined mode of inquiry; examination of representative historical figures and problems. Primarily for majors.

CHID 432 Disability Law, Policy, and the Community (5) I&S Seminar addressing legal rights of disabled people, history of disability policy in the United States, and the role of community activism and other forces in policy development and systems change. Introduction to the existing social service systems that affect disabled people. Recommended: LSJ 332. Offered: jointly with LSJ 433.

CHID 434 Civil and Human Rights Law for Disabled People (5) I&S Designed for students interested in expanding their knowledge of civil and human rights for disabled people. Examines the American perspective (ADA) as well as various international models including the United Nations' International Human Rights treaties as they relate to disabled people. Recommended: LSJ 332. Offered: jointly with LSJ 434; A.

CHID 444 Eye and Mind (5) VLPA&S/NW Thurtle Investigates life as an emergent phenomenon across the disciplines of biophysics, art, art history, literary criticism, and information studies with an emphasis on interdisciplinary methods. Addresses key issues in phenomenology, social theory, contemporary bioart, and complexity studies.

CHID 459 Narrative Journalism (5) VLPA&S Kaplan Introduces the rigorous reporting and literary writing techniques involved in narrative journalism. Concentrates on producing three narrative articles for publication in the online, reader-interactive magazine, Narrative Journalist. Offered: jointly with COM 459.

CHID 470 CHID Study Abroad (5, max. 15) I&S For participants in study-abroad program. Specific course content varies.

CHID 471 Europe Study Abroad (5, max. 15) I&S For participants in study-abroad program. Specific course content varies.

CHID 472 Latin America Study Abroad (5, max. 15) I&S For participants in study-abroad program. Specific course content varies.

CHID 473 Africa Study Abroad (5, max. 15) I&S For participants in study-abroad program. Specific course content varies.

CHID 474 Asia Study Abroad (5, max. 15) I&S For participants in study-abroad program. Specific course content varies.

CHID 475 South Pacific Study Abroad (5, max. 15) I&S For participants in study-abroad program. Specific course content varies.

CHID 477 Middle East Study Abroad (5, max. 15) I&S For participants in study-abroad program. Specific course content varies.

CHID 480 Special Topics: Advanced Study of the History of Ideas (5, max. 15) I&S Thurtle Examines a different subject or problem from a comparative framework with an interdisciplinary perspective. Offered: AWSp.

CHID 484 Colonial Encounters (5) I&S History of European colonialism, focusing on British, French, and Dutch colonial encounters from 1750s to 1950s. Units on colonial law, medicine, religion, sexuality, and commodity culture. Offered: jointly with HSTEU 448.

CHID 490 Research Seminar (5) VLPA&S Thurtle, Toews Intensive readings in specific topic. Students complete individual research projects. Satisfies the CHID senior thesis requirement. Prerequisite: CHID 390.

CHID 491 Senior Thesis (5-) I&S Critical and methodological issues. Required of candidates for an honors degree.

CHID 492 Senior Thesis (-5-) I&S Critical and methodological issues. Required of candidates for an honors degree.

CHID 493 Senior Thesis (-5) I&S Research and writing of thesis under supervision of a faculty member. Required of candidates for an honors degree.

CHID 495 Close Readings in Theory (5) I&S Close readings of a specific work, author, artist, or body of work.

CHID 496 Focus Groups (1-2, max. 4) Credit/no credit only.

CHID 497 Peer Facilitators (5)

CHID 498 Special Colloquium (1-5, max. 20) I&S Each colloquium examines a different subject or problem from a comparative framework. A list of topics is available from the CHID office.

CHID 499 Undergraduate Independent Study or Research (1-5, max. 10) Supervised independent study for students who wish to pursue topics not available in regular course offerings.

Comparative Literature

C LIT 200 Introduction to Literature (3/5) VLPA Reading, understanding, and enjoying literature from various countries, in different forms of expression (e.g., dramatic, lyric, narrative, rhetorical) and of representative periods. Emphasis on the comparative study of themes and motifs common to many literatures of the world.

C LIT 210 Literature and Science (5, max. 15) VLPA Introduces the rich and complex relationship between science and literature from the seventeenth century to the present day. Students examine selected literary, scientific, and philosophical texts, considering ways in which literature and science can be viewed as forms of imaginative activity.

C LIT 211 Literature and Culture (5, max. 15) I&SVLPA Study of literature in its relation to culture. Focuses on literature as a cultural institution, directs attention to the construction of individual identity and the dissemination and critique of values.

C LIT 230 Introduction to Folklitest Studies (5) I&SVLPA Comprehensive overview of the field of folkloristics, focusing on verbal genres, customs, belief, and material culture. Particular attention to the issues of community, identity, and ethnicity. Offered: jointly with SCAND 230.

C LIT 240 Writing in Comparative Literature (5, max. 15) C Comparative approach to literature and a workshop in writing comparative papers in English. Emphasis on cross-cultural comparison of literary works. Readings in English with an option to read selected texts in the original languages Offered: AWSp.

C LIT 270 Perspectives on Film: Introduction (5) VLPA Introduction to film form, style, and techniques. Examples from silent film and from contemporary film. 270, 271, 272 are designed to be taken as a sequence, but may be taken individually.

C LIT 271 Perspectives on Film: Great Directors (5) VLPA Introduction to authorship in the cinema. The work of a major director or directors. 270, 271, 272 are designed to be taken as a sequence, but may be taken individually.

C LIT 272 Perspectives on Film: Genre (5) VLPA Introduction to study of film genre. Literary, mythic, and historic aspects of film genre. 270, 271, 272 are designed to be taken as a sequence, but may be taken individually.

C LIT 300 Introduction to Comparative Literature: Forms, Genres, History (5) VLPA An introduction to comparative literary study designed for departmental majors. Examines how literary forms and genres shape our reading of texts; how these forms and genres change over time; and how literary forms and genres manifest themselves in different cultural traditions. Includes theoretical readings and substantial writing.

C LIT 301 Theory of Film: Analysis (5) VLPA Introduction to the analysis of film. Covers major aspects of cinematic form: mise en scène, framing and camera movement, editing, and sound and color. Considers how these elements are organized in traditional cinematic narrative and in alternative approaches.

C LIT 302 Theory of Film: Critical Concepts (5) VLPA Overview of the main conceptual problems in film criticism such as: “what is a film?”, “what is the relationship between film and reality?”, “does a film have a language?”, “what is the connection between image and sound?” Follows a historical timeline within five individual sections.

C LIT 303 Theory of Film: Genre (5) VLPA Introduction to the history and significance of film genres from the early days of film to the present. Examines a selection of several genres, drawn from a list including western, melodrama, musical, thriller, road odyssey, film noir, and documentary. Topics include form, ideology, authority, history, innovation, and parody.

C LIT 310 History of Film: 1895-1929 (5) VLPA Film history from its beginnings in the 1890s through the golden era of silent film in the 1920s. Topics include the invention of major film techniques, the creation of Hollywood and the studios, and movements such as expressionism, constructivism, and surrealism.

C LIT 311 History of Film: 1930-1959 (5) VLPA Film history from the introduction of sound
through the late 1950s. Focuses mostly on the golden age of the Hollywood studios and on alternative developments after World War II in Italy (Neo-Realism), France (the New Wave), and Japan.

C LIT 312 History of Film: 1960 - 1988 (5) VLPA Covers the vast changes in filmmaking since 1960. Topics include the continuing influence of the French New Wave, the New German Cinema of the 70s and the "New Hollywood" of the 70s, American independent film of the 80s, and the resurgence of Chinese filmmaking since 1980.

C LIT 313 History of Film: 1989-Present (5) VLPA Addresses the latest trends in international filmmaking typically with an emphasis on world cinema and issues of globalization and diaspora. Sometimes taught in conjunction with the Seattle International Film Festival.

C LIT 315 National Cinemas (3-5, max. 15) VLPA Examines the cinema of a particular national, ethnic or cultural group, with films typically shown in the original language with subtitles. Topics reflect themes and trends in the national cinema being studied.

C LIT 330 Studies in European Literature (5, max. 15) VLPA Examination of the development of European literature in a variety of genres and periods. Possible areas of study include literature from romantic fiction of early nineteenth century through great realist classics of second half of the century or from symbolism to expressionism and existentialism.

C LIT 331 Studies in Literature of the Americas (4-5, max. 15) VLPA Emphasizes connections between twentieth century literature of the United States and Canada and current literature of Latin America. Emphasizes that, despite obvious differences, much is shared in terms of culture and national sensibility across the two continents.

C LIT 332 Studies in Asian and Western Literatures (5, max. 15) VLPA Topics designated by individual instructors.

C LIT 333 Studies in the Literature of Emerging Nations (5, max. 15) VLPA Novels and short stories, from Africa, the Middle East, and South Asia. Discusses relationship of Western literary genres to an oral literary tradition, as well as issues like colonialism, gender relations, narrative technique, native and non-native languages.

C LIT 330 The European Fairy Tale (5) VLPA An introduction to folktales and literary tales from various traditions and periods. A discussion of their origin, special characteristics, dissemination, and relevance to the contemporary reader.

C LIT 331 Folk Narrative (5) VLPA Survey of various genres of folk narratives studied in performance contexts to reveal their socio-cultural functions in a variety of milieus. Theory and history of folk narrative study, taxonomy, genre classification, and interpretive approaches. Recommended: SCAND 230 or C LIT 230. Offered: jointly with SCAND 331.

C LIT 334 Immigrant and Ethnic Folklore (5) I&S/VLPA Survey of verbal, customary, and material folk traditions in ethnic context. Theories of ethnic folklore research applied to the traditions of American communities of Scandinavian, Baltic, or other European ancestry. Recommended: SCAND 230 or C LIT 230. Offered: jointly with SCAND 334.

C LIT 350 Themes in World Literature: Parents and Children (5) VLPA World literature, from the Renaissance to modern times, based upon the theme of "parents and children." Selections drawn from European, English, and American literature, not limited to period and genre. Focus upon the motive of generational conflict.

C LIT 351 Themes in World Literature: Love, Sex, and Murder (5) VLPA World literature, from the Renaissance to modern times, based upon the theme of "love, sex, and murder." Selections drawn from European, English, and American literature, not limited to period and genre. Focus upon the human potential for both great violence and extraordinary compassion.

C LIT 352 Themes in World Literature: Death and Transfiguration (5) VLPA Theme of death, transfiguration, and new life in world literature. Selections from Tolstoy, D. H. Lawrence, Celine, E. M. Forster, and other major writers.

C LIT 357 Literature and Film (3-5, max. 10) VLPA The film as an art form, with particular reference to the literary dimension of film and to the interaction of literature with the other artistic media employed in the form. Films are shown as an integral part of the course. Content varies.

C LIT 371 Literature and the Visual Arts (5) VLPA Focuses on specific theoretical problems. Examines the relationship between text and image in a variety of art forms including poetry, novels, paintings, photography, essays, comic strips, film, and advertisement. Readings, in English, from a wide variety of national literatures.

C LIT 375 Images of Women in Literature (5, max. 15) VLPA Comparative study of the ways women’s image, social role, and psychology have been portrayed by writers of various nationalities and literary periods. Selection of theme varies from quarter to quarter. Works are read in English translation.

C LIT 376 Violence, Myth, and Memory (5) VLPA A special emphasis on the interaction of violence with myth and the processes of memory and memorialization. Readings in English and other languages. Topics include foundational myths, colonial and post-colonial encounters, historiography and narrative, and nationalist and ethnic identity formations. Offered: jointly with SISSE 376.

C LIT 396 Special Studies in Comparative Literature (3-5, max. 10) VLPA Offered by visitors or resident faculty. Content varies.

C LIT 397 Special Topics in Cinema Studies (3-5, max. 10) I&S/VLPA Varying topics relating to film in social contexts. Offered by resident or visiting faculty.

C LIT 400 Introduction to Theory and Criticism (5) VLPA A selection of major theoretical statements in the history of literary theory and criticism, with texts drawn from such fields as literary studies, aesthetic theory, film studies, philosophy, and cultural studies.

C LIT 410 Studies in Literary History (5, max. 15) VLPA Introduction to a major figure or movement associated with the development of literary history. Through the study of one aspect of literary history students gain a thorough understanding of a particular point of view, while exploring the breadth of contemporary approaches to literature.

C LIT 421 Studies in Connections: Literature and Other Disciplines (5, max. 15) VLPA Examines the links between literature and other disciplines or art forms. Literature and history, literature and philosophy, literature and music, literature and the visual arts are all appropriate topics. Selection of focus depends on instructor.

C LIT 422 Studies in Genre (5, max. 15) VLPA Major genres of world literature: poetry, fiction, drama. Readings, in English from a wide selection of national literatures.

C LIT 424 The Epic Tradition (5) VLPA Ancient and medieval epic and heroic poetry of Europe in English: the Iliad, Odyssey, and Aeneid; the Roland or a comparable work from the medieval oral tradition; pre-Greek forerunners, other Greco-Roman epic epics, and later medieval and Renaissance developments and adaptations of the genre. Choice of reading material varies. Literary background recommended. Offered: jointly with CLAS 424.

C LIT 430 Readings in Folklore (5) VLPA Exploration of theoretical and methodological issues in folklore studies through independent reading of journal articles published during the last five years. Recommended: SCAND 230 or C LIT 230. Offered: jointly with SCAND 430.

C LIT 431 The Northern European Ballad (5) VLPA Integrative study of the Northern European Ballad, with an emphasis on texts, performance, context, history, theory, genre classification, and interpretive approaches. Offered: jointly with SCAND 431.

C LIT 432 Technology and Culture in the Making of Contemporary Empires (5) I&S Benitez, Rodriguez-Silva Explores the struggles that shaped organization of the U.S. empire at the turn of the 20th century, focusing on how empire’s materials, cultural, and ideological boundaries were drawn. Topics include race, gender, and class as colonial formations; technologies of imperial governance such as public health, citizenship, and territory; and political culture. Offered: jointly with SISSE 432.

C LIT 490 Directed Study or Research (1-5, max. 10) Individual study of topics in comparative literature by arrangement with the instructor and the Comparative Literature office.

C LIT 491 Internship (1-5, max. 5) Supervised experience in local businesses and other agencies. Open to upper-division Comparative Literature and Cinema Studies majors. Recommended: 25 credits of C LIT courses.

C LIT 493 Comparative Literature Honors Seminar (5, max. 15) VLPA Special topics in comparative literature. Required of honors students in comparative literature.

C LIT 495 Honors Thesis (5) VLPA Preparation of an honors thesis under the direction and supervision of a faculty member.

C LIT 496 Special Studies in Comparative Literature (3-5, max. 15) VLPA Offered occasionally by visitors or resident faculty. Content varies.
C LIT 501 The Theory of Literature I: The Literary Text (5, max. 15) An investigation into the nature of literature in contrast to other forms of writing and into essential features of literature such as genres, imagery, modes of communication, and structure.

C LIT 501 The Theory of Literature II: History of Literature (5, max. 15) An exploration of topics of literary history such as periods, traditions, the writing of literary history, and literary history in contrast to other histories.

C LIT 502 The Theory of Literature III: Special Topics (5, max. 15) Offerings vary to cover topics such as individual theorists, theoretical movements, or the intersection of literary theory with other disciplines or arts (psychoanalysis, structuralism, ethics, aesthetics).

C LIT 507 History of Literary Criticism and Theory (5, max. 15) A general introduction to the major issues in the history of criticism followed by the study of the classical theorists, including Plato, Aristotle, Longinus, and the major medieval critics. Offered: jointly with ENGL 507.

C LIT 508 History of Literary Criticism and Theory II (5, max. 15) Critical literary theory from the Middle Ages and the Renaissance through the eighteenth century to, but not including, Kant. Offered: jointly with ENGL 508.

C LIT 509 History of Literary Criticism and Theory III (5, max. 15) Critical literary theory from Kant’s Critique of Judgment to the mid-twentieth century and the work of Northrop Frey. Offered: jointly with ENGL 509.

C LIT 510 History of Literary Criticism and Theory IV (5, max. 15) A study of the major issues in literary criticism and theory since about 1965. Offered: jointly with ENGL 510.

C LIT 511 Literary Translation (5, max. 15) Lectures on principles of translating literary works into readable English. Students present and comment on translations made by them and write seminar papers on problems of translation in theory and practice.

C LIT 516 Colloquium in Criticism (5, max. 15) Recent trends in literary criticism, taught by representatives from various literature departments, covering critical trends such as structuralism, poststructuralism, hermeneutics, reception theory, and sociological approaches to literature.

C LIT 517 Colloquium in Folklore (5) Recent trends in folklore studies, taught by representatives from various literature departments and disciplines in the social sciences.

C LIT 518 Colloquium in Medieval Studies (5) Salient literary aspects of the European Middle Ages, taught by representatives from various literature departments as well as from related disciplines, such as philosophy, art history, history, and comparative religion.

C LIT 530 Cultural Criticism and Ideology Critique I (5, max. 15) A study of the main attempts to come to an understanding of the humanities and the nature of historical interpretation in a cultural context.

C LIT 531 Cultural Criticism and Ideology Critique II (5, max. 15) Offerings vary to cover individual theorists and particular manifestations of cultural criticism and ideology critique.

C LIT 545 Medieval Studies (3/5, max. 15) Literature, intellectual history, and sociology of the Middle Ages, 500-1200. Topics may include "renaissance" of the twelfth century; the educational ideal; rise of universities; philosophi- cal concepts.

C LIT 546 Studies in Renaissance and Baroque (3-5, max. 10) Aspects of Western European literature during the Renaissance and Baroque period. Course content varies.

C LIT 547 Studies in Eighteenth-Century Literature (3-5, max. 10) Examination of various trends in eighteenth-century literature including the Enlightenment, Rationalism, Pre-Romanticism, and Neo-Classicism. Course content varies with instructor.

C LIT 548 Studies in Nineteenth-Century Literature (3-5, max. 10) Examination of various trends in nineteenth century literature including Romanticism, Realism, Naturalism, and Symbolism.

C LIT 549 Twentieth-Century Literature (3-5, max. 10) Selected movements, schools, and trends of significance in twentieth-century literature of Europe and Americas. Symbolism, surrealism, dada, expressionism, neorealism, existentialism, nouveau roman, and absurd may be considered. Texts in English, French, and German figure most prominently, but Spanish, Italian, Russian, and other materials may be examined. Content and emphasis vary.

C LIT 570 The Novel: Theory and Practice (3-5, max. 15) Study of the novel as a genre, examining two or more novels of varying national literatures. Course content varies.

C LIT 571 The Lyric: Theory and Practice (3-5, max. 15) Examination of central questions in the study of the lyric genre as approached from an international point of view. Course content varies.

C LIT 572 The Epic: Theory and Practice (3-5, max. 15) Examination of epic literature as exemplified by selected works chosen from various cultures and periods (e.g., French and German medieval courtly epic, the epic in Renaissance and baroque Europe, traditions of the mock epic). Course content varies.

C LIT 573 The Drama: Theory and Practice (3-5, max. 15) Examination of various aspects of the drama as a major genre, as approached from international and multilingual points of view. Course content varies.

C LIT 576 Seminar in East-West Literary Relations (3-5, max. 15) Comparative investigation of literary topics requiring the study of both Eastern and Western documents. Explores parallels and contradictions between the two, in concepts, ideas, and specific topics. A comparative paper on a chosen topic with qualified conclusions is required. Emphasis varies. Prerequisite: at least one East Asian language.

C LIT 590 Master of Arts Essay (5/10, max. 10) Research and writing project under the supervision of a faculty member.

C LIT 596 Special Studies in Comparative Literature (3-5, max. 15) Offered occasionally by visiting or resident faculty. Course content varies.

C LIT 599 Special Seminar or Conference (1-9, max. 30) Group seminars or individual conferences scheduled to meet special needs. Prerequisite: permission of graduate program adviser.

C LIT 600 Independent Study or Research (*)

C LIT 700 Master’s Thesis (*)

C LIT 800 Doctoral Dissertation (*)

Dance

DANCE 101 Introduction to Dance (5) VLPA Introduction to dance as an art form. Lectures in dance appreciation. Studio experience in ballet and modern dance techniques and composition. Attendance required at outside events.

DANCE 102 Introduction to Dance (5, max. 10) VLPA Introduction to dance as an art form. Lectures in dance appreciation. Studio experience in ballet or modern dance techniques, may include experience in both techniques. Attendance required at outside events. Prerequisite: DANCE 101.

DANCE 103 Introduction to Dance (5, max. 10) VLPA Introduction to dance as an art form. Lectures in dance appreciation. Studio experience in ballet or modern dance techniques, may include experience in both techniques. Attendance required at outside events. Prerequisite: DANCE 102.

DANCE 104 Modern Technique (1-8, max. 8) VLPA Beginning-level technique. Development of basic modern dance movement and terminology. Prerequisite: either DANCE 101 or DANCE 102.

DANCE 105 Modern Technique (1-8, max. 8) VLPA Beginning-level technique. Development of basic modern dance movement and terminology. Prerequisite: DANCE 104.

DANCE 106 Modern Technique (1-8, max. 8) VLPA Beginning-level technique. Development of basic modern dance movement and terminology. Prerequisite: DANCE 105.

DANCE 107 Ballet Technique (1-8, max. 8) VLPA Beginning-level technique. Development of basic ballet technique and terminology. Prerequisite: DANCE 101 or DANCE 102.

DANCE 108 Modern Technique (1-8, max. 8) VLPA Beginning-level technique. Development of basic ballet technique and terminology. Prerequisite: DANCE 107.

DANCE 109 Ballet Technique I (1-8, max. 8) VLPA Beginning-level technique. Development of basic ballet technique and terminology. Prerequisite: DANCE 108.

DANCE 110 Jazz Technique I (1-4, max. 4) VLPA Introduction to jazz technique. Dance performance attendance required.

DANCE 111 Jazz Technique I (1-4, max. 4) VLPA Introduction to jazz technique. Dance performance attendance required.

340
DANCE 112 Jazz Technique I (1-4, max. 4) VLPA Introduction to jazz technique. Dance performance attendance required.

DANCE 166 Dance Composition I (5) VLPA Introduction to the principles of dance composition through improvisation.

DANCE 201 Ballet Technique II (1-8, max. 8) VLPA Advanced-beginning level. Continued development of all beginning areas. Expansion of ballet vocabulary. Prerequisite: DANCE 109.

DANCE 202 Ballet Technique II (1-8, max. 8) VLPA Advanced-beginning level. Continued development of all beginning areas. Expansion of ballet vocabulary. Prerequisite: DANCE 201.

DANCE 203 Ballet Technique II (1-8, max. 8) VLPA Advanced-beginning level. Continued development of all beginning areas. Expansion of ballet vocabulary. Prerequisite: DANCE 202.

DANCE 204 Modern Dance Technique II (1-8, max. 8) VLPA Advanced-beginning level technique. Continued development of all beginning areas and expansion of movement vocabulary. Prerequisite: DANCE 106.

DANCE 205 Modern Dance Technique II (1-8, max. 8) VLPA Advanced-beginning level technique. Continued development of all beginning areas and expansion of movement vocabulary. Prerequisite: DANCE 204.

DANCE 211 Jazz Technique II (1-4, max. 4) VLPA Intermediate-level jazz technique. Continued development of beginning areas. Expansion of movement vocabulary. Dance performance attendance required.

DANCE 212 Jazz Technique II (1-4, max. 4) VLPA Intermediate-level jazz technique. Continued development of beginning areas. Expansion of movement vocabulary. Dance performance attendance required.

DANCE 230 Alternative Movement Studies (1-3, max. 9) VLPA Introduction to an alternative approach to movement study. Topics vary.

DANCE 231 Folk-Social Dance Forms (1-2, max. 6) VLPA Studio course in folk dance and social dance forms. Topics vary, and may include salsa or swing. Prerequisite: one year of previous dance experience.

DANCE 232 Intermediate Alternative Movement Studies (1-3, max. 9) VLPA Study of an alternative approach to movement at the intermediate level. Topics vary.

DANCE 233 Advanced Alternative Movement Studies (3) VLPA Study of an alternative approach to movement at the advanced level. Topics vary. Prerequisite: DANCE 232.

DANCE 324 Partnering Techniques (1-2, max. 6) VLPA Studio course in partnering techniques used in social dance and contemporary dance practices, or classical dance. Prerequisite: intermediate level technique.

DANCE 235 Integrated Dance: Training and Composition (3, max. 9) VLPA/I&S Koch Investigates and explores ways of teaching and creating dance suitable for diverse participants with a broad range of physical and conceptual abilities. Addresses composition and movement technique utilized by integrated dance. Culminates in performance in Faculty Dance Concert. Offered: W.

DANCE 242 Music in Relation to Dance (3) VLPA Moore Provides students with music skills necessary to the areas of dance pedagogy, performance, choreography, dance analysis/ criticism, and production. Includes an introduction to music theory, compositional and rhythmic analysis, music for dance class, and training on music/sound editing equipment. Offered: W.

DANCE 250 Cross-Cultural Dance Studies (1-5, max. 8) I&S/VLPA Cooper Gateway course for dance majors. Examines dance as a universal activity and expression of cultural identity. Offers a cross-cultural and historical view of a variety of theatrical, vernacular, and sacred dance forms, and investigates the myriad ways that dance functions across societies. Offered: A.

DANCE 266 Dance Composition II (3-5, max. 10) VLPA Dance composition in relation to music. Emphasis on solos and small groups. Prerequisite: DANCE 166. Offered: W.

DANCE 270 Dance Performance Activities (1-3, max. 9) VLPA/Bracilano May include performance, choreography, production crew, or stage management in Dance program produced concerts under faculty supervision. Credit/no credit only.

DANCE 301 Ballet Technique III (1-8, max. 8) VLPA Intermediate level. Expansion of ballet vocabulary. Prerequisites: DANCE 203.

DANCE 302 Ballet Technique III (1-8, max. 8) VLPA Intermediate level. Expansion of ballet vocabulary. Prerequisites: DANCE 301.

DANCE 303 Ballet Technique III (1-8, max. 8) VLPA Intermediate-level. Expansion of ballet vocabulary. Prerequisite: DANCE 302.

DANCE 304 Modern Dance Technique III (1-8, max. 8) VLPA Intermediate-level technique. Expansion of movement vocabulary. Prerequisite: DANCE 206.

DANCE 305 Modern Dance Technique III (1-8, max. 8) VLPA Intermediate-level technique. Expansion of movement vocabulary. Prerequisite: DANCE 304.

DANCE 306 Modern Dance Technique III (1-8, max. 8) VLPA Intermediate-level technique. Expansion of movement vocabulary. Prerequisite: DANCE 305.

DANCE 336 Integrated Dance: History, Methodology, and Praxis (3, max. 9) VLPA/I&S Koch Investigates and practices ways of teaching and creating dance suitable for diverse participants with a broad range of physical and conceptual abilities. Addresses the history, background and varying practices of integrated dance. Offered: WSp.

DANCE 344 Early Dance History (3-5, max. 5) I&S/VLPA Cooper Examines Western theatre dance history from Renaissance court dance to development in ballet history through the mid-20th century. Examines dance practices in cultural/historical context. Assigned readings, in-depth analyses of dances on video guide a discussion of form, content, interpretation, and critical reception. Offered: A; alternative years.

DANCE 345 Late Dance History (3-5, max. 5) I&S/VLPA Salk Examines the development of social and performance-based dance from the beginning of the 20th century to the present with particular emphasis on major international stylistic trends, cultural influences, and principal artists and their work. Offered: A; alternative years.

DANCE 350 Dance/Performance Ethnography (5) VLPA/I&S Explores theoretical and practical experience in dance and performance ethnography, ethnicity, and oral history. Introduces theories and methods of ethnographic fieldwork, ethnocriticism, writing, and ethnocritical analysis. Focuses primarily on dance. Also discusses methods and theories applicable to other physical practices such as music, theatre, sports, and performance arts.

DANCE 366 Dance Composition III (3-5, max. 10) VLPA Dance composition in relation to production, including elements of technology. Emphasis on larger group works. Prerequisite: DANCE 166. Offered: Sp.

DANCE 371 Choreographic Workshop (2-5, max. 12) VLPA Performing experience for students in pieces choreographed by faculty members and guest choreographers.

DANCE 420 Dance Aesthetics (3) I&S/VLPA Woody/Philosophical investigation of the expressive elements of dance. Reading and discussion of the concepts of beauty, style, and aesthetic theory.

DANCE 480 Senior Seminar (3) VLPA Culminating project emphasizing a synthesis of experiences in the Dance Program with a focus on individual interests.

DANCE 490 Special Studies in Dance (1-3, max. 10) VLPA Special studies designed to address contemporary and historical concerns in the field of dance.

DANCE 493 Anatomy for Dance (3-5) NW/VLPA Wiley Anatomy of the musculoskeletal system and its applications in dance movement.

DANCE 494 Dance Teaching Methodologies (3-5) VLPA Salk/Introduction to dance pedagogy, including educational theory, motor learning, and biomechanical principles and music as it relates to the teaching of dance. Prerequisite: DANCE 242, DANCE 493, and a minimum of one quarter of ballet and/or modern technique at the 300 level or above.

DANCE 499 Undergraduate Independent Study (*, max. 10)

DANCE 510 Chamber Dance Production (3, max. 12) Wiley/Rehearsal and performance of significant choreography from the modern dance canon. Credit/no credit only.

<td>DANCE 531</td>
<td>MFA Concert Production (3, max. 9)</td>
<td>Public performance of MFA choreography. On alternate years this is a collaborative concert between MFA choreographers and artists working in experimental media and digital arts. Offered: Sp.</td>
</tr>
<tr>
<td>DANCE 536</td>
<td>Integrated Dance: History, Methodology, and Praxis (3, max. 9)</td>
<td>Koch Investigates and practices ways of teaching and creating dance suitable for diverse participants with a broad range of physical and conceptual abilities. Addresses the history, background and varying practices of integrated dance. Offered: Sp.</td>
</tr>
<tr>
<td>DANCE 544</td>
<td>Early Dance History (3-5, max. 5)</td>
<td>Cooper Explores Western theatre dance history from Renaissance court dance to development in ballet history through the mid-20th century. Examines dance practices in cultural/historical context. Assigned readings, in-depth analyses of dances on video guide a discussion of form, content, interpretation, and critical reception. Offered: A; alternative years.</td>
</tr>
<tr>
<td>DANCE 545</td>
<td>Late Dance History (3-5, max. 5)</td>
<td>Saik Examines the development of social and performance-based dance from the beginning of the 20th century to the present with particular emphasis on major international stylistic trends, cultural influences, and principal artists and their work. Offered: A; alternative years.</td>
</tr>
<tr>
<td>DANCE 550</td>
<td>Dance Performance Ethnography (3)</td>
<td>VLPA/AS McManis Theoretical and practical experience in dance and performance ethnography, ethnology, and oral history. Introduces theories and methods of ethno graphic fieldwork, ethnographic writing, and ethnological analysis. Focuses on dance-methods and theories discussed also applicable to other physical practices such as music, theatre, sports and performance art. Offered: W.</td>
</tr>
<tr>
<td>DANCE 570</td>
<td>Dance Production Seminar (3)</td>
<td>Bracilano Surveys the process of dance production from audition to performance. Managing design, technology, and personnel to support the creative process from conceptual stages to production. Offered: S.</td>
</tr>
<tr>
<td>DANCE 590</td>
<td>Dance Teaching Methodologies (3-5)</td>
<td>Saik Introduction to dance pedagogy with an emphasis on motor learning skills and biomechanics. Practical teaching experience. Offered: W.</td>
</tr>
<tr>
<td>DANCE 595</td>
<td>Master’s Project (3)</td>
<td>Project in area of interest developed in consultation with faculty advisor and supported by elective courses. Full faculty approval of proposed project by end of first year. Formal presentation, appropriate to project’s content, presented to full faculty during second year. Project culminates in the teaching of an undergraduate dance course.</td>
</tr>
<tr>
<td>DANCE 600</td>
<td>Independent Study or Research (*</td>
<td>Offered: W.</td>
</tr>

**Digital Arts and Experimental Media**

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>DXARTS 198</td>
<td>Digital Arts Seminar (5, max. 10)</td>
<td>VLPA Topics vary and are announced during the preceding quarter. Taught by UW faculty and visiting artists, engineers, scientists, and humanities scholars.</td>
</tr>
<tr>
<td>DXARTS 200</td>
<td>Digital Art and New Media: History, Theory, and Practice (3)</td>
<td>Provides a historical and critical overview of artists and scientists pioneering the digital arts. Discusses important digital media issues from aesthetics, creative strategies, emerging trends, and socio-cultural aspirations.</td>
</tr>
<tr>
<td>DXARTS 201</td>
<td>Fundamentals of Digital and Experimental Art I (5)</td>
<td>VLPA Principles of digital media creation through a combination of lectures, practical assignments, and studio seminars. All resources, assignments, and reviews are web-based. Requires access to a fast, networked computer outside of class. Prerequisite: DXARTS 200.</td>
</tr>
<tr>
<td>DXARTS 202</td>
<td>Fundamentals of Digital and Experimental Art II (5)</td>
<td>VLPA Server-based art course. Introduces principles of digital media creation. All resources, assignments, and reviews are web-based. Requires access to a fast, networked computer outside of class. Prerequisite: DXARTS 201.</td>
</tr>
<tr>
<td>DXARTS 400</td>
<td>Undergraduate Research Studio (2, max. 6)</td>
<td>VLPA Covers recent advances and current trends in digital arts and experimental media research. Topics may include in-depth examination of new artwork and research by pioneers figures in the field.</td>
</tr>
<tr>
<td>DXARTS 411</td>
<td>Applications of Digital Technologies to Humanities Research (5)</td>
<td>VLPA Hands-on project-based approach to imaging, new media, text, databases, metadata and accessibility, rights management, and other issues central to contemporary humanities research. Offered: jointly with HUM 411.</td>
</tr>
<tr>
<td>DXARTS 430</td>
<td>Algorithmic Processes in the Arts (5)</td>
<td>VLPA Basics of computer programming and algorithmic thinking in digital arts. Emphasis on experimental art forms where building of custom software is integral to realizing an artistic vision.</td>
</tr>
<tr>
<td>DXARTS 440</td>
<td>Fundamentals of Interactive 3D Art (5)</td>
<td>VLPA Andrews Introduction to fundamental techniques for the creation of interactive graphics-based three-dimensional digital art. Concepts and techniques include the use of scripting and modeling as methods for designing spaces. Strong emphasis on interactivity, aesthetics, and the exploration of time-based art. Contextualizes navigable digital environments within the history of the visual arts.</td>
</tr>
<tr>
<td>DXARTS 441</td>
<td>3D Space I: Computer Modeling and Environments (5)</td>
<td>VLPA Andrews Introduction to 3D graphics for experimental artists. Utilizes sophisticated software tools to explore object modeling, environment construction, surface texturing, and image rendering. Through lectures, views, tutorials, and projects, students develop a multi-purpose skill set that can be used for innovative content creation, visualization, project planning, documentation, and cross-media integration. Offered: A.</td>
</tr>
<tr>
<td>DXARTS 442</td>
<td>3D Space II: Computer Motion and Advanced Techniques (5)</td>
<td>VLPA Andrews Further investigation into 3D visualization for experimental artists. Building on foundations established DXARTS 441, introduces methods for orchestrating movement, including deformation, dynamics, and rigging. Also covers techniques such as particle systems, simulations, and scripting, giving students experience using advanced tools for envisioning and creating original artwork. Prerequisite: DXARTS 441. Offered: W.</td>
</tr>
<tr>
<td>DXARTS 443</td>
<td>3D Space III: Special Topics in 3D Computer Arts (5)</td>
<td>VLPA Andrews In-depth exploration of topics in advanced 3D arts research, specific subjects vary. Students integrate skill developed in DXARTS 441 and DXARTS 442 to realize ambitious art projects related to particular class focus. Sample topics include virtual reality, interactive 3D, networked environments, and rapid prototyping. Prerequisite: DXARTS 442. Offered: Sp.</td>
</tr>
<tr>
<td>DXARTS 450</td>
<td>Digital Video Foundations (5)</td>
<td>VLPA Bixey Digital video studio designed towards the individual creation of experimental short films and video art. Emphasis on art-making, conceptual thinking, and experimentation. Focuses on core generative processes of digital film, including preproduction, production, and postproduction. Students work individually and in small teams.</td>
</tr>
<tr>
<td>DXARTS 451</td>
<td>Introduction to Experiments in Digital Video: The Architecture of Time I (5)</td>
<td>VLPA Introduction to the skills and concepts used in digital video production. Includes exposure to industry standard equipment, terminology, and digital video production skills in experimental arts context. Basic research areas include field production and electronic image gathering, field and studio lighting, basic nonlinear editing.Offered: A.</td>
</tr>
<tr>
<td>DXARTS 452</td>
<td>Experiments in Digital Video: The Architecture of Time II (5)</td>
<td>VLPA Nonlinear and nondestructive editing methods used in digital video are defining new architectures of time for cinematic creation. Continues previous digital video research with intermediate nonlinear editing, digital audio, compositing, and digital effects. Focuses specifically on student research with alternative cinematic strategies in experimental arts context. Prerequisite: DXARTS 451. Offered: W.</td>
</tr>
<tr>
<td>DXARTS 453</td>
<td>Experiments in Digital Video: The Architecture of Time III (5)</td>
<td>VLPA Further explores the design of non-linear editing and the exploration of time-based art. Utilizes advanced software tools to explore object modeling, environment construction, surface texturing, and image rendering. Through lectures, tutorials, and projects, students develop a multi-purpose skill set that can be used for innovative content creation, visualization, project planning, documentation, and cross-media integration. Offered: A.</td>
</tr>
</tbody>
</table>
cinema projects, anamorphic image research, video and electronics as support systems for installations, critical research, basic D D authoring, and live keying techniques. Prerequisite: DXARTS 452. Offered: Sp.

DXARTS 460 Digital Sound (5) VLPA Foundations of digital sound for digital arts applications. Digital sound theory; transducers; audio signals; mixer architectures; field recording strategies. Multi-track editing for recording, analysis, editing, montage, mixing, synchronization, and mastering. Problem-solving for innovative applications in video, multi-media, and installation art.

DXARTS 461 Digital Sound Synthesis (5) VLPA Introduction to software sound synthesis techniques. Includes acoustics and psychoacoustics; virtual synthesizers and unit generators; table-lookup oscillators and wavetable synthesis; additive synthesis; modulation synthesis; ring amplitude, phase and frequency; granular synthesis; noise; subtractive synthesis and filters. Offered: jointly with MUSIC 401; A.

DXARTS 462 Digital Sound Processing (5) VLPA Introduction to digital sound processing techniques. Includes sampling techniques and time-domain transformation of samples sound; sample-rate conversion; sound granulation and time stretching; delay lines; introduction to digital filtering; FIR and IIR filters; digital effects; reverberation; virtual-room acoustics and dynamic sound location. Prerequisite: DXARTS 461/MUSIC 401. Offered: jointly with MUSIC 402; W.

DXARTS 463 Advanced Digital Sound Synthesis and Processing (5) VLPA Advanced sound processing and synthesis techniques. Includes sound time warping; analysis-synthesis techniques; linear predictive coding; the phase vocoder; frequency-domain sound transformations; introduction to physical modeling. Prerequisite: DXARTS 462/MUSIC 402. Offered: jointly with MUSIC 403; Sp.

DXARTS 470 Sensing and Control Systems for Digital Arts (5) VLPA Software- and hardware-based tools and approaches to real-time I/O and electromechanical control in performance, installation, and other digital arts applications. Focus on prepackaged but flexible tools. Real-time systems programming and design.

DXARTS 471 Mechatronic Art, Design, and Fabrication I (5) VLPA A systems based approach to design and fabrication of functional experimental art devices. Combines principles of mechanical, electronic, electrical, software engineering, robotics, motion control, sensors, actuators, and other control devices. Integrated review of new hardware and software components. Offered: A.

DXARTS 472 Mechatronic Art, Design, and Fabrication II (5) VLPA Continues the systems based approach to the design and fabrication of functional experimental art devices. Combines principles of mechanical, electronic, electrical engineering, software engineering, robotics and motion control, application of sensors, actuators, and other control devices. Prerequisite: DXARTS 471. Offered: W.

DXARTS 490 Special Topics in Digital Arts and Experimental Media (3-5, max. 15) Taught by UW faculty and visiting artists, engineers, scientists, and humanities scholars.

DXARTS 491 Senior Thesis I (5) VLPA Introductory course of the senior thesis sequence. Includes weekly seminars, selection of a thesis topic, and contract with an appropriate faculty advisor. Majors and senior standing only. Offered: A.

DXARTS 492 Senior Thesis II (5) VLPA Second course of the senior thesis sequence. Majors and senior standing only. Prerequisite: DXARTS 491. Offered: W.

DXARTS 493 Senior Thesis III (5) VLPA Third course of the senior thesis sequence. Completion and presentation of final project. Majors and senior standing only. Prerequisite: DXARTS 492. Offered: Sp.

DXARTS 495 DXARTS Production Studio (3-15, max 30) VLPA Intensive, large-scale, collaborative, experimental media-based art projects. Examples include major interactive art installations, cinematic works, live computer music performances, and mechatronic or telematic collaborations. Topic vary. Offered: A.

DXARTS 499 Undergraduate Research (1-5, max. 12) Supervised independent work on projects and research. Offered: AWSp.

DXARTS 500 Research Studio (3, max. 30) Covers recent advances and current trends in digital arts and experimental media research. Students discuss and demonstrate their own ongoing research and creative projects. In-depth examination of new artwork and research by pioneering figures in the field. Prerequisite: DXARTS graduate student.

DXARTS 505 Research Techniques in Digital Arts (3) Digital arts research resources; structuring and strategizing research as part of artistic development; standards for writing and publishing; ethics and approach to technology transfer, and issues such as patenting. Prerequisite: DXARTS doctoral student.

DXARTS 511 Applications of Digital Technologies to Humanities Research (5) Hand-on project based approach to imaging, new media, electronic text, metadata and accessibility, rights management, and other issues central to contemporary humanities research.

DXARTS 517 Psychology of Audio and Visual Perception in the Arts (5) Processes behind sound and image perception, with emphasis on cognition and practical applications for artists. Includes cross-modal theory and synaesthesia. Prerequisite: DXARTS graduate student.

DXARTS 545 Digital Stereoscopic Cinema (5) Andrews Exploration of stereoscopic cinema focusing on depth perception as an element in artistic practice. Introduces history, theory, and methods of production for 3D time-based imagery. Students have access to equipment and opportunities to produce work in this format. Prerequisite: DXARTS 442, DXARTS 452, or permission of instructor.

DXARTS 552 Advanced Topics in Digital Video (5) Covers recent advances and current trends in digital video research. May include in-depth examination of new artwork and research by faculty, students, and visiting professionals. Prerequisite: DXARTS 450; and either DXARTS 451 or 452.

DXARTS 567 Sound in Space (5) Theory and practice of spatial sound. Custom-designed software for spatial location of sound. Soundfield microphones used for team-based location recording sessions. Prerequisite: DXARTS 463.

DXARTS 569 Real-time Digital Sound Processing (5) Introduction to real-time digital sound processing techniques. Includes foundation of real-time systems; integration; reactive environments in performance and installation work; interfaces; communication protocols (MIDI, TCP); feature detection; pitch tracking; transient detection; time-domain processing techniques; frequency-domain processing techniques; algorithmic processes. Prerequisite: DXARTS 463.

DXARTS 598 Advanced Topics in Digital Arts and Experimental Media (3-5, max 21) Covers recent advances and current trends in digital arts and experimental media research. Various topics may include in-depth examination of new artwork and research by faculty, students, and visiting professionals.

DXARTS 600 Independent Study or Research (1-9) 

DXARTS 800 Doctoral Dissertation (*) At least 27 hours of dissertation credit is required for the award of a Ph.D. in Digital Arts and Experimental Media. No more than 10 credits may be taken in any quarter, except summer. Credit/no credit only.

Drama

DRAMA 101 Introduction to the Theatre (5) VLPA The theatre as an art form with emphasis on the play in production. The role of the various theatre artists: actors, directors, designers, and playwrights. Required attendance at one or more performances. Lecture and discussion groups. For nonmajors. Offered: AWSp.

DRAMA 201 Plays and Styles (5) VLPA Introduces theatre practitioners to the principles of play construction, to the process of reading and conceiving plays for production, and to the basic vocabulary of artistic styles through which plays are produced.
DRAMA 210 Theatre Technical Practice (4) VLPA Intensive lecture-laboratory in basic theories, techniques, and equipment of the stage. Technical procedures.

DRAMA 211 Theatre Technical Practice (4) VLPA Intensive lecture-laboratory in basic theories, techniques, and equipment of the stage. Costumes.

DRAMA 212 Theatre Technical Practice (4) VLPA Intensive lecture-laboratory in basic theories, techniques, and equipment of the stage. Stage lighting.

DRAMA 213 Introduction to Sound Design for Theatre (4) VLPA Explores the how and why of sound and music for theatre. Includes different uses for audio in plays; choosing sounds and pieces of music; basic editing of music, environments, and effects; designing a cohesive world of sound.

DRAMA 214 Design for Performance (5, max. 10) VLPA Introduction to basic concepts of designing for the performing arts. Emphasis on text analysis, collaboration, and on how the visual and aural development of character and environment relate to a written or musical source. Requires tools and materials used in the creation of collages, models, and mini-performances.

DRAMA 251 Acting (5) VLPA Explores theory and practice of fundamentals of American "method," based on principles of Stanislavsky and their American evolution. Development of basic acting skills through monologue work. Offered: A.

DRAMA 252 Acting (4) VLPA Explores theory and practice of fundamentals of American "method," based on principles of Stanislavsky and their American evolution. Preparation of audition material and scene work within the context of entire play. Recommended: DRAMA 251. Offered: W.

DRAMA 259 Performance Practicum (2-6, max. 12) VLPA Special work in various aspects of performance technique.

DRAMA 290 Theatre Technical Practices Laboratory (1-3, max. 3) VLPA Laboratory course involving specific production assignment, either in-shop or in-theatre or both. Offered: AWSp.

DRAMA 291 Theatre Technical Practices Laboratory (1-3, max. 3) VLPA Laboratory course involving specific production assignment, either in-shop or in-theatre or both. Offered: AWSp.

DRAMA 292 Theatre Technical Practices Laboratory (1-3, max. 3) VLPA Laboratory course involving specific production assignment, either in-shop or in-theatre or both. Offered: AWSp.

DRAMA 298 Theatre Production (1-2, max. 9) VLPA Laboratory course for students participating in School of Drama minor productions and projects. Credit/no credit only. Offered: AWSp.

DRAMA 302 Critical Analysis of Theatre (5) VLPA Bryant-Bertail, Analyses of plays, based on leading critical traditions. Illustrates various approaches to a play, criteria for choosing best approach for a given play, and ways in which criticism aids in understanding dramatic effect, for both reader and practitioner. Prerequisite: DRAMA 201. Offered: AWSp.

DRAMA 305 Computers in the Theatre (5) VLPA Computing and information systems as problem solving tools for the theatre. Analysis of problems in theatre production and scholarship, with approaches to solutions through computing. Database, spreadsheet, and CAD system applications in the practice and study of lighting and scenic design, theatre management, and research in theatre history and criticism.

DRAMA 313 Scenery Construction (3) VLPA Survey of materials, processes, and equipment in the fabrication, assembly, painting, rigging, and installation of stage scenery and properties. Recommended: DRAMA 210.

DRAMA 314 Introduction to Design for the Performing Arts (3) VLPA Forrester Survey of the role of design (scenery, costume, lighting, and sound) in the contemporary performing arts. Consideration of communicative mission and limitations of each of the design areas. Recommended: DRAMA 210; DRAMA 211; DRAMA 212.

DRAMA 316 Theatrical Makeup (2) VLPA Basic principles, with intensive practice in application of makeup for use on proscenium and arena stages. Open to nonmajors.

DRAMA 350 Introduction to Acting Methods (4) VLPA Advanced scene study from three actor-training viewpoints. Approach based in the American "method" through such proponents as Adler, Strasberg, Hagen, Meisner. Exposure to more physically-based systems such as Alexander and Suzuki included. Recommended: DRAMA 252 or equivalent.

DRAMA 351 Intermediate Acting-Scene Study (4) VLPA Actor-training methodologies of Stanislavsky, Meyerhold, Michael Chekov, and other physically-based approaches. Increases understanding of psychological motivation, concentration, focus of attention, clarity of physical expressiveness. Perform three scenes. Recommended: one of DRAMA 210, DRAMA 211, DRAMA 212; two of DRAMA 290, DRAMA 291, DRAMA 292; DRAMA 253; audition; and 2 credits of DRAMA 466 within two quarters. Offered: A.

DRAMA 352 Intermediate Acting-Verse (4) VLPA Parker Addresses character motivation within classical verse of Shakespeare, Moliere, Racine, etc. Sonnets, monologues, scenes in iambic pentameter and rhyming couplet, exploring rhythm, music, and how these relate to character psychology, motivation. Recommended: one of DRAMA 210, DRAMA 211, DRAMA 212; two of DRAMA 290, DRAMA 291, DRAMA 292; DRAMA 253; audition; and 2 credits of 466 within two quarters. Offered: A.

DRAMA 353 Intermediate Acting — Production (4) VLPA Explores the ten-minute play. Focus shifts to full-length play script, developing ensemble playing, sustained concentration, focus of attention, character motivation, and extended through-line. Culminates in public performance. Recommended: one of DRAMA 210, DRAMA 211, DRAMA 212; two of DRAMA 290, DRAMA 291, DRAMA 292; audition; and 2 credits of 466 within two quarters. Offered: Sp.

DRAMA 365 Ethnic Studies in Drama (3-5, max. 15) I&S/VLPA Curtis-Newton Theatre and plays, post-World War II to the present. Style, content, and context explored. Emphasis on social, political, and economic milieu from which theatre arose. Playwrights studied may include Alice Childress, August Wilson, Lynn Nottage, Percy Mtwa, Luis Valdez, and Maria Fornes.

DRAMA 371 Theatre and Society (5) I&S/VLPA Introduction to the history of the theatre from the Greeks to the present day. Development of the theatre as a social institution. Reading of major texts from each period.

DRAMA 373 Women in Theatre (5) VLPA Examines both the inclusion and exclusion of women by the cultural practice of theatre. Has two primary aims: to provide an historical overview of women in playwriting, acting, directing and criticism, and to apply contemporary social issues to the practice, texts, and criticism of the stage. Prerequisite: DRAMA 302.

DRAMA 374 History of Greek and Roman Theatre (5) VLPA Johnson Survey of Classical and Hellenistic Greek and Roman theatre culture, including texts, architecture, iconography, scenic practices, and conventions of performance from the Festival of Dionysus to the bloodsports of the Roman arenas. Prerequisite: DRAMA 302.

DRAMA 377 History of Medieval and Renaissance Theatre (5) VLPA Johnson Survey of the rise of theatre from the early liturgical drama through the High Middle Ages to the Reformation and the great flowering of secular drama in Elizabethan England and the Golden Age of Spain. Prerequisite: DRAMA 302.

DRAMA 378 History of European Theatre, Renaissance to Revolution (5) VLPA Johnson Survey of the drama, theatre, and theatre culture from the Italian Renaissance through the French Revolution. Examines the rise of court culture, opera, French neo-classicism, as well as the popular commedia dell Arte. Prerequisite: DRAMA 302.

DRAMA 391 Beginning Technical Practices (1-3, max. 9) VLPA Laboratory course involving specific production assignments, either in-shop or in-theatre, or both. Recommended: DRAMA 290; DRAMA 291; DRAMA 292.

DRAMA 401 Senior Seminar (1, max. 2) VLPA Gates A professional seminar featuring guest artists and career development specialists. Credit/no credit only. Offered: A.

DRAMA 405 Computer Graphics Systems (3) VLPA Introduction to CAD applications in theatre design and technology. Focus on learning to use general purpose graphics software for CAD. Discussion of available hardware and software. Recommended: DRAMA 420.

DRAMA 410 Advanced Theatre Technical Practices (2-4, max. 20) VLPA Production-related apprenticeship, in the areas of scene construction, scene painting, costume, or lighting. Recommended: DRAMA 210; DRAMA 211; DRAMA 212; DRAMA 418. Offered: AWSp.

DRAMA 413 Advanced Scene Construction (3) VLPA Special problems in scene construction materials and rigging. Recommended: DRAMA 302.
DRAMA 414 Scene Design (3, max. 6) VLPA  
Theory, practice, and rendering of scene  
designs. Repeat of course involves intermediate  
designs and models. Recommended: ART H  
203; DRAMA 210.

DRAMA 415 Stage Costume Design (3, max. 6) VLPA  
Tact: Theory, practice, and rendering of  
costume designs for the theatre. Repeat of  
course involves intermediate designs.  
Recommended: ART H 203; DRAMA 211;  
DRAMA 416 if repeating.

DRAMA 416 History of Western Dress (5) VLPA  
Gates Survey history of Western dress.  
Emphasis on use of this information by  
theatrical costume designers. Includes  
development of costume for drama, ballet, and  
orpa. Prerequisite: DRAMA 302.

DRAMA 417 Stage Costume Patterning and  
Construction (3, max. 6) VLPA  
Techniques of costume construction,  
including study of fabrics; emphasis on creating patterns by  
draping. Recommended: DRAMA 211; DRAMA  
416.

DRAMA 418 Scene Painting (3, max. 6) VLPA  
Lecture-laboratory with focus on techniques and  
principles of scene painting. Uses of various  
media and types of equipment as applicable to  
varied scenic pieces. Recommended: DRAMA  
210.

DRAMA 419 Advanced Stage Lighting Design  
(3, max. 9) VLPA  Development of a working  
process consistent with current professional  
practice. Includes drafting, worksheets, study of  
color. Students read plays and develop  
analytical skills. Recommended: DRAMA 212.

DRAMA 420 Design and Technical Drafting (2,  
max. 4) VLPA  
Forrester Laboratory and project  
critique covering stage design graphics and  
technical drawing; specifically: designer’s  
elevations, ground plans, sections, detail  
drawing, transposition of design drawing  
information to technical drawings. Recomen-  

DRAMA 421 Drawing and Rendering  
Techniques for the Theatre (2, max. 10) VLPA  
Weekly figure-drawing laboratories with live  
model and weekly field trips for laboratories in  
drawing natural phenomena and architectural  
Practice in use of several media and techniques  
of expression. Recommended: DRAMA 210;  
DRAMA 211.

DRAMA 441 Beginning Playwriting (1-6, max.  
12) VLPA  
Writing exercises and drafts of a one-  
act play provide first experience in writing for  
performance. Readings of representative one-  
act plays introduce genres and writing styles.  
Recommended: DRAMA 253 or DRAMA 353;  
DRAMA 210; DRAMA 211; DRAMA 212.

DRAMA 450 Rehearsal Laboratory (2, max. 6) VLPA  
Acting in projects directed by graduate  
directing students. Recommended: DRAMA 253.

DRAMA 451 Advanced Acting — Production  
Workshop (4) VLPA  
Improvisation skills. Methodology employed  
develops one five-minute solo work, using either original or  
adaptations of non-dramatic texts. Culminates in two public showings of the five-minute one- 
person works. Offered: A.

DRAMA 452 Advanced Acting — Scene Study  
(4) VLPA  
Invites actor to create a role. Script  
reading for action and consequence. Use and  
employment of five senses to express a  
character’s life, presenting a coherent and alive  
person to the stage. Culminates in public  
performance. Offered: W.

DRAMA 453 Advanced Acting — Physical  
Training (4) VLPA  
Introduction to physical training methods of Tadasu  
Suzuki, Kenji Suzuki, and the relationship of their methodologies to  
Constantin Stanislavsky. Contemporary  
monologues analyzed for psychological  
motivation, while exploring the physical analog of “action” as expressed and accessed by the new  
physical training. Offered: Sp.

DRAMA 454 Projects in Acting (3, max. 9)  
VLPA  
Rehearsal and classroom performance of  
dramatic literature of various periods and styles.

DRAMA 455 Alexander Technique (3) VLPA  
Madden A practical and theoretical introduction to the  
Alexander Technique, a psychophysical  
re-education process developed by F. M.  
Alexander (1869-1955). Studio application of this  
work improves physical/vocal coordination,  
enhances creativity, and clarifies thinking.

DRAMA 456 Topics in Theatre for Youth (3-5,  
max. 10) VLPA  
Topics in rehearsal and performance of theatre for young audiences;  
basic principles and techniques for using drama in the classroom; and creating original work for  
young audiences.

DRAMA 460 Introduction to Directing (4) VLPA  
Curtis-Newton   
Student is introduced to the art of directing. Recommended: DRAMA 210;  
DRAMA 211; DRAMA 212; DRAMA 253 or  
DRAMA 353; DRAMA 302. Offered: A.

DRAMA 461 Elementary Directing (4) VLPA  
Elementary study of the art of the stage  
director. Recommended: DRAMA 460.

DRAMA 462 Elementary Directing (4) VLPA  
Elementary study of the art of the stage  
director. Recommended: DRAMA 461.

DRAMA 466 Stage Management (2-5, max. 15) VLPA  
Stewart Study and practice of stage  
management. Recommended: DRAMA 210;  
DRAMA 211; DRAMA 212; DRAMA 290; DRAMA 291;  
DRAMA 292.

DRAMA 471 History of the English Restora- 
tion and 18th Century Theatre (5) VLPA  
Johnson Examination of the relationship of the  
theatrical and the productions that took  
place within that theatre. Particular emphasis  
on the text performed, styles of acting, scenic  
elements, and the critical theories that  
influenced the theatre of the period. Prerequisite:  
DRAMA 302.

DRAMA 472 European and American Theatre,  
Revolution to Modernism (1780-1920) (5)  
VLPA  
Witham Survey of the drama, theatre,  
and theatre culture from the French Revolution  
into the beginnings of Modernism; social and  
political aspects of theatre, rise of Romanticism,  
medlormala, and variety entertainment through  
the 19th century to the artstic revolution that  
paved the way for modern theatre. Prerequisite:  
DRAMA 302.

DRAMA 473 Modern European Theatre and  
Drama (5) VLPA  
Witham Major movements and figures in contemporary European theatre from  
French absurdism to the present. Prerequisite:  
DRAMA 302.

DRAMA 475 Modern English Theatre and  
Drama (5) VLPA  
Witham Major trends in contemporary English theatre, post-World War II  
to the present. Performers, dramatists, and  
designers who shaped the course of the theatre  
following the “angry young rebellion” of the  
1950s. Prerequisite: DRAMA 302.

DRAMA 476 Modern American Theatre and  
Drama (5) VLPA  
Witham Major forces shaping modern American theatre, Eugene O’Neill to the  
present. Leading dramatists, directors, and  
designers of the post-World War II era.  
Experiments such as the Federal Theatre  
Project, Group Theatre, and Living Theatre.  
Prerequisite: DRAMA 302.

DRAMA 490 Special Studies in Acting- 
Directing (1-6, max. 12) VLPA.

DRAMA 491 Special Studies in Design- 
Technical (1-6, max. 6) VLPA.

DRAMA 493 Drama Internship (1-6, max. 6)  
Supervised experiences in an off campus  
venue.

DRAMA 494 Special Studies in Theatre and  
Drama (5, max. 20) VLPA  
Bryant-Bertail, Johnson, Witham Topics in drama, history, and  
criticism. See Time Schedule for specific topic.  
Prerequisite: DRAMA 302.

DRAMA 495 Practicum in Design and  
Technical Theatre (2-6, max. 15) VLPA  
Emphasis on developing design and technology  
problem-solving skills through laboratory and  
project evaluation. Recommended: DRAMA 211,  
DRAMA 212, DRAMA 313.

DRAMA 496 Stage Costume Problems (2, max.  
8) VLPA  
Specific research problems of stage  
costume design and execution: accessories;  
masks, wigs, fabric modification, millinery or  
construction analysis for specialized costumes.  
Topics vary. Recommended: DRAMA 211;  
DRAMA 416.

DRAMA 498 Theatre Production (1-2, max. 9)  
VLPA  
Laboratory course for students participat- 
ing in School of Drama productions.  
Credit/no credit only. Offered: AWSp.

DRAMA 499 Undergraduate Research (1-5,  
max. 15) 

DRAMA 502 Designer-Director Analysis (4)  
Methods of examining plays to make the  
collaboration of director and designer productive.  
Attempts to create a structural whole from visual and  
verbal approaches to analysis. Prerequisite:  
graduate standing in drama.

DRAMA 510 Design Studio (3, max. 18)  
Korf, Lynch, Trout Investigation of space, form, light,  
texture, and color in total theatre design,  
stressing mastery of the media, methods of  
presentation and execution, and intelligent and  
appropriate visual reaction to a dramatic text.  
Prerequisite: graduate standing in drama.

DRAMA 512 Lighting Design Seminar (1/4,  
max. 18) Forum for graduate lighting students to  
Make your own personal lighting design  
assignments include paper projects, School of  
Drama production, and field trips to local  
theatres. Prerequisite: graduate standing.
DRAMA 514 Design and Technical Theatre Colloquium (2, max. 18) Korf, Lynch, Trout Discussion of work in progress or completed in production, centering on the conceptual work of the designer/director on the production and the methods of execution in the shops and on stage. Offered: AWSp.

DRAMA 518 Studies in Historic Design (3) Dahlistrom Investigation of artistic principles and modes that influenced the art, architecture, furniture, and decor of selected historic periods.

DRAMA 519 Studies in Historic Design (3) Dahlistrom Investigation of artistic principles and modes that influenced the art, architecture, furniture, and decor of selected historic periods. Prerequisite: DRAMA 518, or permission of instructor.

DRAMA 520 Advanced Theatre Practicum (1-5, max. 15) Professional student internship with professional theatres: scenery, lighting, scene painting, costume, acting, directing, stage management, theatre management. Prerequisite: permission of instructor.

DRAMA 521 Teaching of Acting (1-3, max. 3) Seminar discussion on problems in teaching acting to undergraduate students in 251, 252, and 253. Prerequisite: permission of instructor and being a teaching assistant in acting.

DRAMA 522 Teaching of Acting (1-3, max. 3) Seminar discussion on problems in teaching acting to undergraduate students in 251, 252, and 253. Prerequisite: permission of instructor and being a teaching assistant in acting.

DRAMA 523 Teaching of Acting (1-3, max. 3) Seminar discussion on problems in teaching acting to undergraduate students in 251, 252, and 253. Prerequisite: permission of instructor and being a teaching assistant in acting.

DRAMA 555 Studies in Acting (2-6, max. 18) Individual or group work on special skills for the actor. Topics vary. Prerequisite: admission to the Professional Actor Training Program. Offered: AWSp.

DRAMA 557 Studio I (12, max. 36) Jenkins, Jory, Madden, Shahn Skill development in acting, voice, speech, and movement necessary for professional training in acting. Prerequisite: admission to the Professional Actor Training Program. Offered: AWSp.

DRAMA 558 Studio II (12, max. 36) Jenkins, Jory, Madden, Shahn Continuation of 557. Prerequisite: DRAMA 557 and completion of the first year of the Professional Actor Training program. Offered: AWSp.

DRAMA 559 Studio III (6, max. 18) Jenkins, Jory, Madden, Shahn Specialized and individualized work relating to the main curriculum of the third year of the Professional Actor Training Program. Prerequisite: DRAMA 558 and completion of the second year of the Professional Actor Training Program. Offered: AWSp.

DRAMA 560 Managing the Rehearsal and Production Process (2) Introduction to graduate-level directing. Play analysis, research, performance theory, and concept development as it relates to process acting and rehearsal, design, staging techniques, and production management. Reading and writing assignments augmented by faculty and professional guests in performance, design, production, and dramaturgy.

DRAMA 561 Directing Projects (2-3, max. 12) Rehearsal techniques and staging skills in a variety of spatial configurations. One-act and full-length plays which follow a prescribed sequence. Prerequisite: graduate standing in the directing program.

DRAMA 562 Performance Studio (1-3, max. 12) Performance techniques in specialized areas of importance to the professional director, including stage combat, speech and dialect, mask, physical comedy, improvisation, and puppetry.

DRAMA 563 Seminar in Directing (2, max. 18) Seminar discussion of current productions; focused readings and discussion in specific areas of dramatic literature and problems related to stage direction. Prerequisite: graduate standing in drama and permission of instructor.

DRAMA 564 Theatre Studies: History, Theory, Criticism (3, max. 15) Special topics in history, theory, and criticism.

DRAMA 565 Verse Workshop (4) Techniques necessary to direct and perform plays of Shakespeare, Moliere, and other verse playwrights: scansion and imagery; period and style using verse text; crowd scenes, transformations of time and space, and other stage exercises; direction of scenes or acts from verse plays.

DRAMA 566 Directing for the Camera (3) Story-boarding, setting up camera shots, improvisation, and rehearsal techniques for directing actors on camera (both in studio and on location). Students direct one- and two-camera scenes; and write, direct, and edit a short screenplay.

DRAMA 567 Acting Process (1-3, max. 12) Development of acting skills necessary for the professional director. Emphasis on physical training, playing action, strong internal technique, imagination and clarity of expression.

DRAMA 568 Writing for the Stage (3, max. 6) Focus on adaptation for the stage of non-dramatic sources, such as literature, poetry, history, and contemporary events. Emphasis on structure, dialogue, dramatic action, rhythm, characterization. Writing exercises using fictive and non-fictive sources, biographical sources and found objects. For MFA Directing students only.

DRAMA 569 Directing/Teaching Apprenticeship (1) Assisting faculty or professional guest director in production for the entire rehearsal period, or assisting faculty in performance training.

DRAMA 571 Problems in Theatre History Research (5) Johnson, Postlewait, Witham Methods and techniques of research, interpretation, and writing in theatre history. Relationship of theatre arts to culture in diverse periods and places.

DRAMA 572 Problems in Theatre History Research (5) Johnson, Postlewait, Witham Methods and techniques of research, interpretation, and writing in theatre history. Relationship of theatre arts to culture in diverse periods and places.

DRAMA 573 Problems in Theatre History Research (5) Johnson, Postlewait, Witham Methods and techniques of research, interpretation, and writing in theatre history. Relationship of theatre arts to culture in diverse periods and places.

DRAMA 574 Seminar in Theatre History (5) Johnson, Witham Specific topics in theatre history, examining the drama of various national, linguistic, and/or religious culture in detail.

DRAMA 575 Seminar in Theatre History (5) Johnson, Witham Specific topics in theatre history, examining the drama of various national, linguistic, and/or religious culture in detail.

DRAMA 576 Seminar in Theatre History (5) Johnson, Witham Specific topics in theatre history, examining the drama of various national, linguistic, and/or religious culture in detail.

DRAMA 577 Seminar in Theatre History (5) Johnson, Witham Specific topics in theatre history, examining the drama of various national, linguistic, and/or religious culture in detail.

DRAMA 581 Analysis of Dramatic Texts (5) Bryant-Bertail, Mezur Analytic approaches to dramatic materials, concentrating on semiotics, Marxism, feminism, or a related critical theory.

DRAMA 582 Analysis of Dramatic Texts (5) Bryant-Bertail, Mezur Analytic approaches to dramatic materials, concentrating on semiotics, Marxism, feminism, or a related critical theory.

DRAMA 583 Analysis of Dramatic Texts (5) Bryant-Bertail, Mezur Analytic approaches to dramatic materials, concentrating on semiotics, Marxism, feminism, or a related critical theory.

DRAMA 584 Seminar in Theatre History (5) Bryant-Bertail Major problems in dramatic theory, such as aesthetics, mimesis, and the nature of theatre.

DRAMA 585 Seminar in Theatre History (5) Bryant-Bertail Major problems in dramatic theory, such as aesthetics, mimesis, and the nature of theatre.

DRAMA 587 Seminar in Theatre History (5) Bryant-Bertail Major problems in dramatic theory, such as aesthetics, mimesis, and the nature of theatre.

DRAMA 599 Advanced Studies in Theatre Arts (1-5, max. 10) Independent projects or group study of specialized aspects of theatre arts. Prerequisite: permission of instructor.

DRAMA 600 Independent Study or Research (*)

DRAMA 700 Master’s Thesis (*)

DRAMA 800 Doctoral Dissertation (*)

Earth and Space Sciences

ESS 100 Dinosaurs (2) NW Biology, behavior, ecology, evolution, and extinction of dinosaurs, and a history of their exploration. With dinosaurs as focal point, course also introduces the student to how hypotheses in geological and paleobiological science are formulated and tested.

ESS 101 Introduction to Geological Sciences (5) NW Survey of the physical systems that give the earth its form. Emphasizes the dynamic nature of interior and surface processes and their relevance to mankind and stresses the value of rocks and earth forms in the understanding of past events. A course with laboratory for non-science majors. Not open for
credit to students who have taken ESS 105, or ESS 210. Field trips. Offered: AWSp.

ESS 102 Space and Space Travel (5) NW Explores powering the sun, making of space weather conditions, observations from space and from Earth, Earth’s space environment, radiation belts and hazards, plasma storm and auroras, electron beams, spacecraft requirements, tooling up for manned exploration. Open to non-science majors.

ESS 103 Minerals and Gems (3) NW Introduction to the nature of minerals: composition, structure, physical properties, and origins, with emphasis on gem minerals. Focuses on topics of particular interest in gemology, such as mechanisms of color, history and lore of gems, and uses of gems. Hands-on laboratories using about one hundred representative gems and minerals.

ESS 104 Prehistoric Life (3) NW Fossils and how they are preserved. What fossils tell us about past life and environments. How the history of life is understood and what caused the great events in biological evolution. Open to non-science majors, but also lays a foundation for higher-level geology courses.

ESS 105 The Earth: Its Processes and Hazards (5) NW Introduction to physical and environmental geology. Focuses on both large-scale tectonic forces that create Earth’s continents and oceans, and surficial forces that shape Earth’s landscapes. Emphasizes processes that endanger human populations (such as earthquakes, volcanic eruptions, and floods), Not open for credit to students who have taken ESS 101.

ESS 106 Living with Volcanoes (3) I&S/NW Explores volcanoes and volcanic eruptions on Earth and in the solar system. Examines how volcanoes work and how they affect the environment, life, and human societies. Illustrates principles using local examples of recent volcanism and ancient examples of mega-eruptions. Evaluates the possibility of predicting future eruptions.

ESS 107 Environments of Washington Through Geologic Time (5) NW Introduces students to the geologic and paleontologic history of our region. Students collect data from field studies and museum collections of fossils and rock to reconstruct ancient environments, creating paleogeographic and paleoclimatic maps through geologic sequences of time. Includes three, one-day field trips on weekdays.

ESS 201 The Earth System and Climate (5) NW Earth’s systemic dynamic environment, global climate change, interplay of chemical, physical, and biological processes shaping the Earth’s surface and climate. Emphasis on quantitative methods for measuring, evaluating, and understanding contemporary changes relative to the last several thousand years. Prerequisite: either MATH 124, MATH 144, or Q SCI 291.

ESS 202 Earthquakes (5) NW Earthquakes of the Pacific Northwest and around the world — their cause and relationship to plate tectonics; why, where, and when they occur. How earthquakes affect human life: shaping landscape, hazards. Laboratory explores physical processes associated with earthquakes. One field trip. Open to non-science majors.

ESS 204 Geology of the National Parks (5) NW Review of fundamental geological processes, using North American parks and monuments as examples of natural laboratories. Includes volcanism, glaciation, water and wind erosion, plate-tectonic forces as preserved in geologic exposures of National Parks. Specific topics explored in laboratory sessions and field trips. Prerequisite: either ESS 101, ESS 105, ESS 210, or ESS 211.

ESS 205 Access to Space (5) NW Group development of student experiments to the outer rim of our atmosphere and the beginning of space; investigation of stratosphere, mesosphere, thermosphere, magnetosphere, development of space shuttle and launch vehicles, basic electronic fabrication, global positioning, radio tracking, expectations at high altitudes. Open to all disciplines. No previous experience of electronics required.

ESS 209 Interdisciplinary Earth Sciences Field Seminar (3-12, max. 12) NW Miscellaneous field-based and experiential learning activities in Earth and Space Sciences.

ESS 210 Physical Geology (5) NW Introduction to the physical and chemical processes of the earth’s surface and interior. Plate tectonics, earthquakes, volcanism, glaciation. Optional field trips to Cascades and Olympics. Background in geology not required but science background desirable. Not open for credit to students who have taken ESS 101.

ESS 211 Physical Processes of the Earth (5) NW Overview of Earth. Deformation of soil, sediment, and rock. Erosional and depositional processes and landforms. Isotopic and plate tectonics. Structural, geomorphic, and climatic interactions in major tectonic regimes. Use of stereonets, air photos, geologic maps, and cross sections. Two one-day field excursions. Prerequisite: either MATH 124 or Q SCI 291, or both PHYS 114 and PHYS 117 or PHYS 121.

ESS 212 Earth Materials and Processes (5) NW Crystallography, crystal chemistry, and characteristics of rock-forming and ore minerals. Description, phase equilibria, origin, and associations of igneous, sedimentary, and metamorphic rocks. Laboratory study of hand specimens. Two one-day field excursions. Prerequisite: CHEM 142. Offered: W.

ESS 213 Evolution of the Earth (5) NW Introduction to paleontology, types of stratigraphy, and radiometric dating. The physical, chemical, biological, and plate tectonic evolution of the earth’s crust, seawater, and atmosphere. Comparison with other planets. Climate changes and man as a geologic agent. Two one-day field excursions. Prerequisite: ESS 211. Offered: W.

ESS 220 Rivers and Beaches (3/5) NW Introduction to Earth surface environments, the processes that shape them, how humans affect them and are affected by them. Weekend field trips examine mountains, rivers, deltas, estuaries, beaches, and environments beyond. Focus on linkages between these environments to illustrate coupling between landscapes and seascapes. Offered: jointly with OCEAN 230.

ESS 230 Great Ice Age (5) NW Growth of mile-thick ice sheets, worldwide lowering of sea level, and other geological and paleoclimatological changes that accompany the harsh environments of a global glaciation. Geology of the last three million years, focusing on the causes and effects of global glaciation and future climate change. Prerequisite: either ESS 101, ESS 105, ESS 210, ESS 211.

ESS 231 Geomicrobiology (5) NW Geological forces dramatically alter the earth’s surface, devastating communities, taking human lives. Uses lectures and field work to examine geological hazards affecting civilizations around the world. Northwest examples illustrate causes and effects of many catastrophic geological processes, including: earthquakes, volcanoes, floods, glaciers, landslides. Prerequisite: either ESS 101, ESS 105, ESS 210, ESS 211.

ESS 233 Geomorphology (5) NW Introduction to the study of the dynamics of geochemical processes, emphasizing examples in the Pacific Northwest. Volcanic products, landforms, hazards, prediction, and history. Relationship to tectonics. Not open for credit to non-science majors.

ESS 240 Geology of the Northwest (5) NW Geologic history of Washington, Oregon, and Idaho. Emphasis on use of geologic principles in interpreting evidence found in landscapes and rocks. Weekend field trips optional. Prerequisite: either ESS 101, ESS 105, ESS 210, ESS 211.

ESS 241 Geologic History of the Pacific Northwest (5) NW Geologic history of Washington, Oregon, and Idaho. Emphasis on use of geologic principles in interpreting evidence found in landscapes and rocks. Weekend field trips optional. Prerequisite: either ESS 101, ESS 105, ESS 210, ESS 211.

ESS 242 Earthquakes of the Pacific Northwest (5) NW Explores volcanoes and volcanic eruptions on Earth and in the solar system. Examines how volcanoes work and how they affect the environment, life, and human societies. Illustrates principles using local examples of recent volcanism and ancient examples of mega-eruptions. Evaluates the possibility of predicting future eruptions.
ESS 314 Geophysics: Expedition to Planet Earth (5) NW Survey of fundamental geophysical principles and an integrative approach. Examines how a future expedition of extraterrestrial humanoids could use geophysical data, physical principles, and mathematical techniques to decide whether they should colonize Earth and understand how the indigenous civilization became extinct. Prerequisite: MATH 126; either PHYS 115/118 or PHYS 122. Offered: A.

ESS 315 Environmental Earth Science (5) NW Analysis of geologic constraints upon human activity and the environmental consequences of such activity. Topics include hillside processes, fluvial and groundwater processes, earthquake and volcanic hazards, and environmental aspects of deforestation and atmospheric pollution. Prerequisite: either ESS 101, ESS 105, ESS 210, ESS 211. Offered: jointly with ENVIR 313.

ESS 326 Geomorphology (5) NW Introduction to landforms and surficial deposits. Emphasis on landscape-forming processes. Intended for students who wish to take additional courses in geomorphology. Prerequisite: either PHYS 114 or PHYS 121. Offered: W.

ESS 345 The Environment of Fuel and Mineral Deposits (5) NW Fuels and nonmetallic ores as the substrate of industrial civilization. Provides non-majors with sufficient information about these resources to allow for informed decisions of related geological, environmental, and societal issues. Prerequisite: either ESS 101, ESS 105, ESS 210, ESS 211.

ESS 400 Field Geology (12) NW Six weeks of geological mapping in a variety of rock types in the western United States. Enhances students' knowledge of geologic phenomena and processes. Development of skills in mapping, field interpretation, and report writing. Students responsible for own living expenses while in the field. Prerequisite: ESS 211; ESS 212; ESS 213; one course selected from ESS 311, ESS 312, ESS 313, or 314.

ESS 401 Regional Geology of the Pacific Northwest (3) NW Explores the geological diversity of the Pacific Northwest temporally (Archean to Pleistocene), tectonically (craton, terranes, and collision sequences), and stratigraphically (ophiolites to coal). Three weekend field trips required.

ESS 402 International Field Geology (3-12, max. 12) NW Supervised geological field work in classic, instructive international sites. Venue varies from year to year. Work may include geologic mapping, construction of cross sections, measurement and analysis of stratigraphic sections, field excursion, and supervised individual research projects.

ESS 403 Plate Tectonics (4) NW Introduction to the principles and methods of plate tectonics, including motions on a sphere, polar-wander paths, plate-boundary seismicity, and focal mechanisms. Also includes modern observations and theories of plate deformation and continental dynamics. Prerequisite: PHYS 121.

ESS 406 Earth Sciences for Middle and High School Science Teachers: Solid Earth (3) NW Topics of contemporary interest selected to meet state academic standards. Topics include Pacific Northwest earthquakes and volcanoes, global and regional plate tectonics, history of the Earth, the Earth’s interior, planetary geology, and surface processes on the Earth. Does not count toward the ESS degree. Prerequisite: ESS 101.

ESS 408 Great Geological Issues (3) NW History and development of geological and paleontological theories and controversies; philosophy and methodology that have driven scientific inquiry into Earth processes. Recommended: HIST 311; HIST 312. Offered: alternate years.

ESS 410 Marine Geology and Geophysics (4) NW Sedimentological and petrologic processes that determine the geologic record. Prerequisite: either ESS 101 or ESS 210. Offered: jointly listed with OCEAN 410.

ESS 411 Geophysical Continuum Mechanics (3) NW Analysis of stress and strain. Measurement and interpretation of strain in geological materials. Elasticity applied to determine stress in the Earth’s lithosphere. Creep of solids and flow of geological materials. Prerequisite: either MATH 136 or both MATH 307 and MATH 308.

ESS 412 Seismology (3) NW Introduction to theoretical and observational seismology. Elastic plane wave propagation through stratified media. Surface waves, eigen vibrations, ray theory. Structure of the Earth’s mantle and core. Seismicity distributions, earthquake focal mechanisms and relationship to tectonics. Prerequisite: either ESS 411; recommended: concurrent registration in ESS 466.

ESS 413 Geophysics: The Earth (3) NW The earth and its interior; gravity, magnetism, heat flow, seismology. Earth’s outer structure, studied through the unifying concepts of plate tectonic theory. Quantitative approaches to problems, using techniques of classical physics. Prerequisite: either ESS 412; PHYS 322.

ESS 414 Geophysics: Fluids (3) NW Introduction to geophysical fluid dynamics. An overview of fluids in geophysics with emphasis on the oceans. A nonrigorous development of the equations of motion with examples drawn from oceanography and solid earth geophysics. Prerequisite: either MATH 136 or both MATH 307 and MATH 308; PHYS 322.

ESS 415 Space and Plasmas (3) NW Survey of various phenomena occurring in outer regions of Earth’s atmosphere, ionosphere, magnetosphere, and Van Allen radiation belts. Laboratory applications include plasma thrusters and fusion. Concepts include charged particles in magnetic fields, drift motion, plasma, magnetohydrodynamic waves. Prerequisite: PHYS 321.

ESS 416 Geophysics: The Atmosphere (3) NW Phenomena of the lower atmosphere: some simple applications of the principles of classical thermodynamics, fluid dynamics, and radiative transfer to the atmospheric hydrological cycle, global energy balance, and atmospheric dynamics and climate. Prerequisite: ESS 414.

ESS 422 Intermediate Spectral Remote Sensing (4) NW Explores spectral image processing with ENVI software, used in individualized projects involving satellite or aircraft images. Emphasis on integration of remote sensing and field measurement using process models and Geographic Information Systems (GIS). Recommended: introductory courses in physics, chemistry, calculus, geology, and field geology. Prerequisite: ESS 421.

ESS 424 Water in the Environment (3) NW Discusses the unique physical and chemical properties of the water molecule in relation to the atmospheric greenhouse effect, precipitation formation, oceanic circulations, infiltration of water through soils, geyser eruptions, and glacier and sea ice thickness. Prerequisite: either MATH 124, MATH 126, MATH 129, or MATH 136; PHYS 123. Offered: jointly with ATM S 460/PHYS 460.

ESS 426 Fluvial Geomorphology (5) NW Hydraulic and morphological characteristics of streams and valley floors. Landscape evolution by stream erosion and deposition. Field exercises emphasize quantitative analysis of fluvial processes, channel forms, acquisition of various skills, such as mapping, topographic surveying, report writing. Prerequisite: either ESS 311, or ESS 326.

ESS 427 Hillslope Geomorphology (5) NW Theoretical, laboratory, and field study of hillslope evolution by mass wasting and water erosion. Prerequisite: either ESS 311, or ESS 326.

ESS 431 Principles of Glaciology (4) NW Snow deposition and metamorphism, avalanches, heat and mass balance at snow and ice surfaces, glacier flow, ice sheets, sea ice, permafrost, methods of paleoclimate reconstruction, ice Age theories. Prerequisite: PHYS 121.

ESS 432 Glacial Geology (5) NW Interpretation of glacial environments and history through study of sediments and landforms. The laboratory component is largely field based and visits some spectacular glaciated landscapes. Provides students an experiential learning approach to the field as well as an opportunity to conduct independent research.

ESS 433 Environmental Change in the Glacial Ages (3) NW Physical, biological evidence of climatic change during Quaternary Period; emphasizing stratigraphy, chronology. Impact of alternating glacial/interglacial cycles on earth’s terrestrial, marine environments. Theories on causes of climatic variation. Offered: jointly with QUAT 417.

ESS 439 Petrology of Igneous Rocks (5) NW Systematic study of the major families of volcanic and plutonic igneous rocks with emphasis on tectonic setting, phase relations, geochemistry, and models of their origin and evolution throughout geologic time. Laboratory emphasizes thin-section study of rocks used in reflected and transmitted light. Prerequisite: ESS 312.

ESS 440 Petrography and Petrology of Metamorphic Rocks (5) NW Mineralogy,
include the theory of isotopic fractionation, application of isotopes in earth surface processes, climate, and biogeochemical cycles. Includes extensive laboratory experience. Prerequisite: ESS 312.

ESS 460 Cosmogenic Nuclides in Geomorphology (3) NW Use of cosmic-ray-produced nuclides to date rock surfaces and analyze geomorphologic processes. Nuclide production by cosmic radiation above and below ground; tracer method applications. Explores dating of cosmogenic nuclide data to geomorphic models. Open to undergraduate students only. Prerequisite: either ESS 311 or ESS 312.

ESS 461 Geological Time (3) NW Principles of radiometric dating. Methods applicable to Earth history from planetary formation to the recent past. Radiocarbon dating; geological dating with long-lived isotopes; uranium series, trapped charge and cosmogenic isotope techniques. Applications in archaeology, climate change, geomorphology, tectonics, and Earth evolution.

ESS 462 Volcanic Processes (4) NW Pre-eruption, eruption, and post-eruption processes. Examines triggers of magma ascent, controls on volatile build-up and loss, magma fragmentation, magma-groundwater interaction, eruption column dynamics, gravity-controlled eruptive phenomena, syn- and post-eruption lahars and other reworking of deposits. Prerequisite: either ESS 311 or ESS 312.

ESS 463 Structure and Tectonics (5) NW Geometry, kinematics, and tectonic setting of major types of structures, including those in contractual fold-and-thrust belts; extended crust; strike-slip-dominated regimes; and shear zones. Laboratory exercises develop basic tools of structural geology. Prerequisite: ESS 213.

ESS 465 Seismology and Earthquake Engineering (3) NW Overview of earthquake processes and details of the characteristics of destructive ground motion; effects of such motion on engineering structures; current practice in estimating earthquake hazards for important structures such as nuclear power plants. Prerequisite: either MATH 126 or both MATH 307 and MATH 308. Offered: jointly with CEE 431.

ESS 467 Seismic Exploration (5) NW Introduction to theory and practice of seismic exploration. Application of refraction and reflection techniques to problems in engineering geology and mineral exploration. Constraints in the interpretation of subsurface structure. Prerequisite: ESS 311; either MATH 126, MATH 129, or MATH 136; PHYS 123.

ESS 471 Introduction to Space Physics (3) NW Introduces several areas of space physics, the physical principles that apply therein, and the methods by which significant observations are made. Covers electromagnetic and plasma processes from the center of the sun to the surface of the earth. Prerequisite: PHYS 123.

ESS 472 High Altitude Research Projects (5) McCarthy Students launches of science payloads to high altitude, providing design, fabrication, test, integration, and management experience; covers science motivation, instrumentation, payloads, and delivery systems. One project recirculation required for launch. Project may vary from year to year. Prerequisite: PHYS 122; either PHYS 334 or ESS 205. Offered: S.

ESS 489 Honors Seminar (3) Bourgeois Covers current scientific topics in Earth and Space Sciences; philosophy and methodology of science strategies for developing research projects; scientific education and career planning. May require colloquium or local conference attendance. Offered: A.

ESS 490 Special Topics (2-10, max. 20) NW

ESS 492 Undergraduate Teaching Experience and Outreach (1-2, max. 2) NW Designed to help undergraduate majors acquire effective teaching skills at the college and public school level. Teaching experience gained through assisting graduate student teaching assistant or K-12 public school outreach. Involves classroom teaching experience and improving communications and presentation skills.

ESS 495 NASA Science and Engineering Research Seminar (1, max. 4) NW Review of current space science-related research. Emphasis varies, but topics may include planetary geology, astronomy, global change, aeronautical engineering, and remote sensing. Credit/no credit only.

ESS 498 Undergraduate Thesis (5) NW The thesis must be submitted at least one month before graduation.

ESS 499 Undergraduate Research (* max. 15)

ESS 501 Geochemical Systems (3) Nelson Geochemical systems through time, from solar system origin to present. Explores fundamental geochemical concepts using current research issues and discussion. Concepts include radiogenic and stable isotope systematic, thermodynamics, high and low temperature chemistry of rocks and water, geochemical cycles through Earth’s history. Prerequisite: graduate student standing or instructor permission. Offered: W.

ESS 502 The Solid Earth (3) Concepts of internal earth processes: Earth as heat engine and chemical processor, style of mantle convection, origin and evolution of the Earth’s magnetic field, Cascadia subduction and hazards. Introduces seismology, fluid dynamics, heat flow, gravity, and geomagnetism. Focuses on the analysis, critique, and communication of ideas from scientific literature.

ESS 503 Introduction to Solar Terrestrial Physics (3) Introduces several areas of space physics, the physical principles that apply therein, and the methods by which significant observations are made. Covers electromagnetic and plasma processes from the center of the sun to the surface of the Earth. Prerequisite: PHYS 123.

ESS 504 The Earth Surface (3) Investigates the coupled tectonic and geomorphic processes that shape the surface of the Earth, creates the surface environment that sustains humanity and other life systems, and produces natural hazards. Introduces modern tools, techniques, and theories applicable to analysis of this coupled dynamic system. Offered: A.

ESS 508 Great Geological Issues (3) History and development of geological and paleontological theories and controversies; philosophy and methodology that have driven scientific inquiry in the earth sciences. Requires a term paper analyzing primary material. Prerequisite:
graduate standing in earth sciences, or in history of science, or permission of instructor.

ESS 513 Geophysics: The Earth (3) Study of gravity, magnetism, heat flow, seismology. Earth's outer structure studied through unifying concepts of plate tectonic theory. Quantitative approaches to problems, using techniques of classical physics. Includes advanced, research-oriented problems. Prerequisite: ESS 512; PHYS 322.

ESS 514 Geophysics: Fluids (3) Geophysical fluid dynamics. Fluids in geophysics with emphasis on the oceans. Development of the equations of motion with examples drawn from oceanography and solid Earth geophysics. Includes advanced, research-oriented problems. Prerequisite: PHYS 322, MATH 307 and MATH 308 or equivalent.

ESS 515 Geophysics: Space (3) Various phenomena occurring in outer regions of Earth's atmosphere, ionosphere, magnetosphere, and Van Allen radiation belts. Laboratory applications include plasma thrusters and fusion. Concepts include charged particles in magnetic fields, drift motion, plasma, magnetohydrodynamic waves. Includes advanced, research-oriented problems. Prerequisite: PHYS 321 or equivalent.

ESS 516 Geophysics: The Atmosphere (3) Phenomena of the lower atmosphere: some simple applications of the principles of classical thermodynamics, fluid dynamics, and radiative transfer to the atmospheric hydrological cycle, global energy balance, and atmospheric dynamics and climate. Includes advanced, research-oriented problems. Prerequisite: ESS 514.

ESS 517 Early Earth Evolution (3) Geological, biological, and environmental evolution of the Earth over the first 4 billion years of its history, as an analogue for the development of other habitable planets.

ESS 521 Remote Sensing of the Atmosphere and Climate System (3) Satellite systems for sensing the atmosphere and climate system. Recovery of atmospheric and surface information from satellite radiation measurements. Applications for research. Prerequisite: ESS 571; ESS 572. Offered: jointly with ATM S 534.

ESS 522 Geophysical Data Collection and Analysis (3) Theory and practical application of data collection and analysis applied to geophysical problems. Digital processing of signals; filtering and spectral analysis. Laboratory sessions include problem solving on computer-based processing system.

ESS 523 Geophysical Inverse Theory (3) Introduction to the mathematical techniques for estimating properties of dynamical systems, such as the earth or atmosphere, from data that is insufficient for a precise specification of the system. Emphasis is on the concept of the resolving power of data sets. The ideas developed are designed to provide a wide range of applicability in the field of data interpretation. Prerequisite: ESS 522, or permission of instructor.

ESS 526 Sediment Dynamics and Boundary-Layer Physics (4) Theoretical descriptions of sediment transport processes constrained by laboratory demonstrations. The physics of boundary layers, initiation of motion, suspended load, bedload, bedforms, and continua transport (turbidity currents, debris flows, and suspensions) and its application to the geological record. Offered: jointly with OCEAN 542.

ESS 527 Continental-Margin Sedimentation (3) Detailed evaluation of recent studies into processes forming strata on continental margins, including the diverse time scales ranging from sediment transport to sequence stratigraphy. Highlights the linkages with physical oceanographic processes, the fates of geochemical components, and the relationship to biological communities. Offered: jointly with OCEAN 546.

ESS 528 Interpretation of Sedimentary Structures (2-4, max. 4) Physical and environmental analysis of sedimentary structures, including biogenic sedimentary structures. Clastic sediments and rocks. Field trips required.

ESS 529 Principles of Fluid Dynamics, Heat, and Mass Transfer in Earth Sciences (3) Introduction to the quantitative treatment of transport phenomena with applications to mantle and magma convection, volcanic eruptions, landslides, porous flow, and reaction. Emphasis on the governing equations of fluid dynamics including porous and multiple flow, chaotic convection, mixing, heat transfer, rheology, analytical, numerical, and scaling solutions.

ESS 531 Physics of Ice (3) Structure of the water molecule. Crystallographic structures of ice. Electrical, optical, thermal, and mechanical properties of ice. Growth of ice from vapor and liquid phases. Prerequisite: permission of instructor. Offered: jointly with ATM S 510.

ESS 533 Dynamics of Snow and Ice Masses (3) Rheology of snow and ice. Sliding and processes at glacier beds. Thermal regime and motion of seasonal snow, glaciers, and ice sheets. Avalanches and glacier surges. Deformation and drift of sea ice. Response of natural ice masses to changing sea climate. Prerequisite: permission of instructor. Offered: jointly with ATM S 512.

ESS 535 Ice and Climate (3) Examines the role of ice and snow in climate. Polar climate dynamics. Polar-global interactions. Modeling snow cover, sea ice, and ice-sheet balance, and flow in the climate system. Prerequisite: permission of instructor. Offered: jointly with ATM S 514; alternate years.

ESS 537 Advanced Mineralogy (3) Crystal symmetry: point groups, space groups. Mathematical description of crystal structures; group theory, irreducible representations; tensor description of physical properties: stress, strain, piezoelectricity, elasticity; structural and magnetic phase transitions, Landau theory, deformation and creep crystals; elasto-viscous properties of earth's mantle, crystal chemistry, solid state reactions. Offered: jointly with MSE 518.

ESS 538 Petrogenesis of Igneous Rocks (3) Origin of one or more of the major groups of igneous rocks. Selected petrogenetic problems in light of tectonic setting, petrography, geochemistry, and experimental studies. Prerequisite: ESS 439 or equivalent.

ESS 545 Economic Geology of Sedimentary Rocks (5) Description and origin of metallic and nonmetallic ore deposits indigenous to regoliths, sediments, and sedimentary rocks. Prerequisite: ESS 445, or equivalent or permission of instructor.

ESS 550 Electromagnetic and Potential Field Methods (3) Development of equations of electromagnetic fields in conducting media. Solution of forward and inverse problems with natural and controlled sources; magnetotelluric and related methods. Includes the special case of static fields: DC resistivity, gravity, and magnetic interpretation. Prerequisite: either ESS 413, or ESS 513, ESS 522, PHYS 323; or permission of instructor.

ESS 551 Mineral Physics (3) Applications of condensed matter physics to various geophysical problems. Topics vary, but usually include the thermal properties of relevant geophysical materials, the equation of state for the earth's mantle and core, defects in solids and their roles in tectonophysics. Prerequisite: permission of instructor. Offered: alternate years.

ESS 552 Solution Geochemistry (4) Solution chemistry and thermodynamics as applied to solid and liquid silicates and aqueous fluids. Modeling configurational entropies in solids, activity coefficients and complexes in aqueous solution, and modeling chemical mass transfer in geologic systems. Prerequisite: ESS 312, or equivalent.

ESS 553 Electron Beam Microanalysis (4) Materials analysis using electron beams, including electron-target interactions, wave and energy dispersive x-ray analysis, scanning electron microscopy, and applications of these and related techniques to geological problems.

ESS 555 Physics and Chemistry of the Earth's Interior (3) Emphasizes current issues in global tectonics and mantle dynamics. Examples include global seismic tomography and its bearing on geodynamics, the fate of...
subducted lithosphere and geochemical constraints on mantle convection. Prerequisite: permission of instructor.

ESS 559 Climate Modeling (3) Bitz, Thompson Principles of Earth system modeling. Emphasis on atmosphere, ocean sea ice, and land-surface components. Climate forcing. Appropriate use of models. Topics of current interest including carbon cycle, atmosphere chemistry, and biogeochemistry. Prerequisite: either ATM S/ OCEAN/ESS 587, ATM S 504 or ATM S 505. Offered: jointly with ATM S 559/OCEAN 558; Sp; alternate years.

ESS 560 Cosmogenic Nuclides in Geomorphology (3) NW Use of cosmogenic nuclides to date rock surfaces and analyze geomorphic processes. Nuclide production by cosmic radiation above and below ground; tracer methods; exposure dating; coupling of cosmogenic nuclides to geomorphic models. Prerequisite: either AMATH 301, AMATH 351, or permission of instructor.

ESS 562 Observational Seismology (1, max. 18) Quarterly research themes introduce students to a variety of digital and analog seismograms and techniques for their interpretation. Students present results of short investigations in an informal seminar setting. Credit/no credit only. Prerequisite: either ESS 412, ESS 512, or permission of instructor.

ESS 568 Physics of the Oceanic Lithosphere (3) Basic principles of elasticity, fluid flow, and heat transport with specific applications to the formation and evolution of the oceanic lithosphere. Includes deformation of the earth, flow in porous media, heat transport, and marine seismological and potential field techniques. Prerequisite: OCEAN 540. Offered: jointly with OCEAN 545.

ESS 571 Atmospheric Radiation: Introductory (3) Fundamentals of radiative transfer; absorption and scattering by atmospheric gases; elementary applications to constraints on the thermal structure, photochemistry, and remote sensing. Prerequisite: PHYS 225 or permission of instructor. Offered: jointly with ATM S 532.

ESS 572 Atmospheric Radiation: Advanced (3) Optical properties and particle absorption and scattering; solutions of radiative transfer equation in multiple scattering atmosphere; applications to atmospheric and surface energy balance and remote sensing. Prerequisite: ATM S 532/ESS 571 or permission of instructor. Offered: jointly with ATM S 533.

ESS 573 Cloud Microphysics and Dynamics (3) Basic concepts of cloud microphysics, water continuity in clouds, cloud dynamics, and cloud models. Prerequisite: ATM S 501 or permission of instructor. Offered: jointly with ATM S 535.

ESS 576 Space and Laboratory Plasma Physics (3) Discussion of waves, equilibrium and stability, diffusion and resistivity, basic plasma kinetic theory, and wave-particle interactions. Prerequisite: ESS 415, or equivalent or permission of instructor. Offered: jointly with ATM S 556.

ESS 577 Advanced Space Plasma Physics (3) Formation by the interaction of solar wind with geomagnetic field. Trapped particles. Electromagnetic waves in anisotropic plasma. Dynamic disturbances and plasma instabilities. Prerequisite: ESS 415, or permission of instructor.

ESS 579 Computational Methods and Modeling in Geophysics I (3) Solution of complex dispersion equations including multiple root finding. Data analysis, fitting, smoothing, fast integration. Ray tracing and particle tracking in 2-D and 3-D. Computer simulation of fluid interactions, unmagnetized and magnetized, compressible and incompressible, and flow around objects.

ESS 583 Origin of the Solar System (3) Nebular and nonnebular theories of the origin of the solar system; collapse from the interstellar medium, grain growth in the solar nebula, formation of planetesimals and planets, early evolution of the planets and other possible planetary systems; examination of the physical and chemical evidence upon which the ideas concerning the origin of the solar system are based. Offered: jointly with ASTR 557.

ESS 585 Climate Impacts on the Pacific Northwest (4) Knowledge of past/future patterns of climate to improve Pacific Northwest resource management. Topics include the predictability of natural/human-caused climate changes; past societal reactions to climate impacts on water, fish, forest, and coastal resources; how climate and public policies interact to affect ecosystems and society. Offered: jointly with ATM S/ENVIR/SMA 585.

ESS 586 Current Research in Climate Change (2, max. 20) Weekly lectures focusing on a particular aspect of climate (topic to change each year) from invited speakers (both UW and outside), plus one or two keynote speakers, followed by class discussion. Offered: jointly with ATM S 586/OCEAN 586.

ESS 587 Climate Dynamics (3) Examines Earth's climate system: distribution of temperature, precipitation, wind, ice, salinity, and ocean currents; fundamental processes determining Earth's climate; energy and constituent transport mechanisms; climate sensitivity; natural climate variability on interannual to decadal time scales; global climate models; predicting future climate. Offered: jointly with ATM S 587/OCEAN 587.

ESS 590 Special Topics (2-10, max. 20)

ESS 594 Introduction to Earth and Space Sciences Research (1-2) Advances research of faculty and advanced graduate students to first-year graduate students and provides experience for the formulation, oral presentation, and defense of research proposals and results.

ESS 595 Earth and Space Sciences Research Methods (2, max. 12) Current research methodology and results based on recent literature and on faculty and student research. Designed to develop student perspective on observational and theoretical methods and on relation of specific research to broader developments in geophysics and interdisciplinary aspects of geophysics through faculty-guided presentations and discussion by students.

ESS 599 Seminar (1, max. 15) Review of current literature in geophysics and graduate student research with faculty participation. Credit/no credit only.

ESS 600 Independent Study or Research (*) Credit/no credit only.

ESS 700 Master's Thesis (*)

ESS 800 Doctoral Dissertation (*)

Economics

ECON 200 Introduction to Microeconomics (5) I&S, QSR Analysis of markets: consumer demand, production, exchange, the price system, resource allocation, government intervention. Recommended: MATH 111. Offered: AWSpS.

ECON 201 Introduction to Macroeconomics (5) I&S, QSR Analysis of the aggregate economy: national income, inflation, business fluctuations, unemployment, monetary system, federal budget, international trade and finance. Prerequisite: ECON 200; recommended: MATH 111. Offered: AWSpS.

ECON 235 Introduction to Environmental Economics (5) I&S/NW Introduces non-economic concepts to environmental and natural resource economics. Discussion of fundamental economic concepts, including markets and
private property. Students learn basic tools used in the economic assessment of environmental problems and apply these methods to key environmental issues. Offered: jointly with ENVIR 235

ECON 299 Study Abroad: Economics (5, max. 10) I&S For participants in the Study Abroad program. Specific course content determined by assigned faculty member and announced in Study Abroad bulletins.

ECON 300 Intermediate Microeconomics (5) I&S Analysis of decisions by individuals and by firms and of outcomes in factor and product markets. Policy issues and applications. Prerequisite: ECON 200; either MATH 112, MATH 124, MATH 127, MATH 134, or MATH 145. Offered: AWSpS.

ECON 301 Intermediate Macroeconomics (5) I&S Analysis of the determinants of the aggregate level of employment, output, prices, and income of an economy. Policy issues and applications with special reference to current monetary and fiscal policy. Prerequisite: 2.0 in ECON 201; 2.0 in ECON 40. Offered: AWSpS.

ECON 302 Study Abroad: Economies of the Developing World (5, max. 10) I&S For participants in the Study Abroad program. Specific course content determined by assigned faculty member and announced in Study Abroad bulletins.

ECON 303 Intermediate Microeconomics (5) I&S Analysis of the determinants of the aggregate level of employment, output, prices, and income of an economy. Policy issues and applications with special reference to current monetary and fiscal policy. Prerequisite: ECON 200; either MATH 112, MATH 124, MATH 127, MATH 134, or MATH 145. Offered: AWSpS.

ECON 304 Intermediate Microeconomics (5) I&S Analysis of the determinants of the aggregate level of employment, output, prices, and income of an economy. Policy issues and applications with special reference to current monetary and fiscal policy. Prerequisite: ECON 200; either MATH 112, MATH 124, MATH 127, MATH 134, or MATH 145. Offered: AWSpS.

ECON 305 Intermediate Macroeconomics (5) I&S Analysis of the determinants of the aggregate level of employment, output, prices, and income of an economy. Policy issues and applications with special reference to current monetary and fiscal policy. Prerequisite: ECON 200; either MATH 112, MATH 124, MATH 127, MATH 134, or MATH 145. Offered: AWSpS.

ECON 306 Undergraduate Seminar in Economics (5, max. 10) I&S Provides undergraduate student an opportunity to apply the tools of economic analysis in a critical examination of theoretical and empirical work. A list of topics is available in the departmental office. Prerequisite: ECON 200.

ECON 307 Undergraduate Seminar in Political Economy (5, max. 10) I&S Marxian and public choice approaches to political economy. Explores the questions raised by each approach, the assumption(s) and testability of hypotheses, and applies these approaches to a number of problems in political economy. Recommended: ECON 300; POL S 270. Offered: jointly with POL S 409.

ECON 308 Money, Credit, and the Economy (5) I&S Role of money in the banking system in the United States economy. Relation of money to inflation, interest rates, and market fluctuations. Monetary policy and Federal Reserve System. Prerequisite: 2.0 in ECON 301.

ECON 309 Investment, Capital, and Finance (5) I&S Intertemporal optimization: consumption and portfolio allocation decisions of households, investment and financial decisions of firms. Introduction to financial decisions under uncertainty. Portfolio theory, asset pricing, options, and futures. Financial market institutions and regulatory issues. Prerequisite: 2.0 in ECON 300; either ECON 311, STAT 311, MATH 390, STAT 390, or QMETH 201.

ECON 310 Topics in Financial Economics (5) I&S Topics of current interest such as regulation of securities markets and valuation of stocks. Allows students to apply tools of economics to real world problems in finance. Prerequisite: 2.0 in ECON 301; ACCTG 215. Offered: AWSpS.

ECON 311 Computational Finance and Financial Econometrics (5) Covers probability models, data analysis, quantitative, and statistical methods using applications in finance. Prerequisite: 2.0 in ECON 300; either ECON/STAT 311, STAT 341, MATH/STAT 390, or QMETH 300; either MATH 112, MATH 124, MATH 127, MATH 134, or MATH 145. Offered: AWSpS.

ECON 312 Topics in Monetary Economics (5) I&S Topics include monetary policy and financial markets, two transmission mechanisms, dynamics of monetary policy, targeting interest rates versus targeting the quantity of money, monetary policy under fixed versus flexible exchange rates, inflation targeting, and practices of central banks, i.e., Fed, ECB, BOJ and PBOC. Prerequisite: 2.0 in ECON 301.

ECON 313 Government and Business (5) I&S Economic effects of various governmental regulatory agencies and policies. Antitrust legislation as a means of promoting desired market performance. Observed economic effects of policies intended to regulate business practices, control prices, conserve resources, or promote competition. Prerequisite: 2.0 in ECON 300.

ECON 314 Natural Resource Economics (5) I&S Survey of the economics of renewable and nonrenewable resources including fisheries, forest, minerals, and fuels. Optimal trade-offs between benefits and costs of resource use, including trade-offs between current and future use. Effects of property rights on resource use. Prerequisite: ECON 300.

ECON 315 Economics of the Environment (5) I&S Microeconomic analysis of environmental regulation. The problem of social cost, policy instrument choice, enforcement of regulations, methods for damage assessment, and estimating benefits of environmental improve-ment. Prerequisite: 2.0 in ECON 300.

ECON 316 Economics of Biological Resources (5) I&S Application of economic concepts to biology and biological concepts to economics. Examination of theory of species maximization, parallels in behavior between humans and other biota, animal choices among alternative food sources, games animals play, evidence of risk aversion in animals. Prerequisite: 2.0 in ECON 300.

ECON 317 Economics of Human Resource Management (5) I&S Examines the relationship between personnel practices and organizational performance. Economic analysis of compensa-tion policy emphasized. Topics include hiring and retention strategies; incentive pay; relative performance evaluation; teams; promotions; seniority; and organization design. Examines human capital accumulation and labor legislation. Prerequisite: minimum grade of 2.0 in ECON 300.

ECON 318 Labor Market Analysis (5) I&S Determinants of employment and incomes in the United States: analysis of individual and firm decisions and of equilibrium in the labor market. Topics include decisions to work and retire, education and occupation choices, compensa-tion, discrimination, poverty, unemployment and unions. Examination of policy issues affecting the labor market. Prerequisite: 2.0 in ECON 300.

ECON 319 Topics in Labor Market Analysis (5) I&S In-depth analysis of special topics in the operation of labor markets and public policies affecting incomes and employment. Course content varies by instructor. Prerequisite: 2.0 in ECON 300.

ECON 320 Economics of Education (5) I&S Examines formal education as an investment industry, the economics of human capital investment, and competition among government owned schools and the non-profit sector. Prerequisite: 2.0 in ECON 300. Offered: AWSpS.

ECON 321 Economics of Gender (5) I&S Microeconomic analysis of the sources of gender differences in earnings, labor force participation, occupational choice, education, and consumption. Economic theories of discrimina-tion, human capital, fertility and intrahousehold resource allocation. Economics of the family in developed and developing countries. Prerequisite: 2.0 in ECON 300. Offered: jointly with WOMEN 447.

ECON 322 Population and Development (5) I&S Survey of topics in population economics, including history of thought, demographic experience of currently developing countries, household production models, fertility demand, quantity-quality models of fertility, mortality, health and nutrition, migration, macroeconomic-demographic linkages. Prerequisite: 2.0 in ECON 300.
ECON 450 Public Finance: Expenditure Policy (5) I&S Application of normative microeconomic theory to analysis of government expenditures. Rationale for government economic activity, collective choice, public goods, and externalities, income redistribution, public sector pricing, and specific expenditure programs. Prerequisite: 2.0 in ECON 300.

ECON 451 Public Finance: Tax Policy (5) I&S Microeconomics of taxation: efficiency, incidence, effect on distribution of income, personal and corporate income taxes, sales and consumption taxes, taxation of property and estates. Prerequisite: 2.0 in ECON 300.

ECON 454 Cost-Benefit Analysis (5) I&S Theory and practice of cost-benefit analysis of public sector projects and policies. Welfare criteria, investment criteria, shadow prices, social discount rate, marginal-willingness-to-pay for non-market goods, social risk, and special topics. Prerequisite: 2.0 in ECON 300.

ECON 455 Microeconomics of Public Policy (5) I&S Topics include general equilibrium analysis of efficiency and equity, income and substitution effects, analysis of alternative welfare programs, intergovernmental grants, price discrimination, price controls, rationing, industry regulation, and public goods. Prerequisite: 2.0 in ECON 300.

ECON 464 Financial Crisis (5) I&S Causes, effects, and cures for financial crisis traced through history from the Tulip Bubble, to the Great Depression, to the East Asian Crisis of 1997, and beyond. Explores the original work of Fisher, Keynes, Friedman, and Krugman, among others. Prerequisite: 2.0 in ECON 301. Offered: AWSpS.

ECON 473 Topics in International Trade (5) I&S Advanced theory of trade and analysis of government trade policies. International trade and factor mobility. Theory of commercial policy. Prerequisite: 2.0 in ECON 301; ECON 471.

ECON 475 Economics of the European Union (5) I&S Analysis of economic issues relating to the European Union. Explores the institutional aspects, the attempt to coordinate social and economic policies-welfare, employment, commercial, fiscal, and monetary—and the economic linkages between the European Union and the rest of the world. Prerequisite: 2.0 in ECON 301.

ECON 481 Introduction to Mathematical Statistics (5) NW Probability; generating functions; the d-method, Jacobians, Bayes theorem; maximum likelihoods, Neyman-Pearson, efficiency, decision theory, regression, correlation, bivariate normal. (Credit allowed for only one of 390, 481, and ECON 580.) Prerequisite: STAT/ECON 311; either MATH 136 or MATH 136W with either MATH 308 or MATH 309. Recommended: MATH 324. Offered: jointly with CS&SS/STAT 481; A.

ECON 482 Economic Theory and Practice (5) NW Ells, StartzApplications statistical modeling to empirical work in economics. Focuses on regression analysis; derivations of regression estimators and their properties; and applied computer work in estimating multiple regression models. Prerequisite: 2.0 in ECON 300; either ECON 311/STAT 311 or MATH 390/STAT 390; recommended: MATH 124

ECON 483 Econometric Applications (5) NW Kim Provides opportunity to learn econometric model building for a particular problem while applying the theory learned in various courses to specific economic cases. Estimate, test, and forecast economic models. Extensive use of the computer and econometric programs. Prerequisite: 2.0 in ECON 301; either ECON/STAT 311, STAT 341, MATH/STAT 390, or QMETH 300.

ECON 485 Game Theory with Applications to Economics (5) NW Introduction to the main concepts of game theory: strategy, solution concepts for games, strategic behavior, commitment, cooperation, and incentives. Application to economics oligopoly theory, bargaining theory, and contract theory. Prerequisite: either MATH 112, MATH 124, MATH 127, MATH 134, or MATH 145; 2.0 in ECON 300.

ECON 486 Economics of Information (5) I&S, QSR Khalil, Lawarree Basic models of decision making and strategic interaction in the presence of imperfect and asymmetric information. Information issues in market exchange and in hierarchical settings. Includes adverse selection, moral hazard, signaling, and screening. Recommended: ECON 404 or ECON 485. Prerequisite: 2.0 in ECON 300.

ECON 490 Comparative Economic Systems (5) I&S Study of resource allocation, growth, and income distribution in capitalist, market socialist, and centrally planned economies. Prerequisite: 2.0 in ECON 301.

ECON 491 Issues in Economic Development (5) I&S Examines factors contributing to the economic problems of developing countries and possible solutions. Theory and applications in economic development and international trade. Prerequisite: 2.0 in ECON 301.

ECON 492 Economic Issues of Contemporary Latin America (5) I&S Covers economic issues of current interest to policymakers in Latin America. Topic areas include trade policy, external capital flows to the region, macroeconomic stability, fiscal and monetary institutions, income inequality, and globalization. Prerequisite: minimum grade of 2.0 in ECON 301.

ECON 495 Economic Transformation of Russia and Eastern Europe (5) I&S Analytical survey of the economic institutions and economic structures of the transforming socialist economies. Socialist resource allocation. Market institutions. Structural change and the sequencing of economic reform. Primary focus on Russia and Eastern Europe. Prerequisite: 2.0 in ECON 301.

ECON 496 Honors Seminar (5) I&S Honors and other students in high standing have the opportunity to develop research techniques, to pursue topics in breadth and depth, and to apply tools of economic analysis to selected topics in economic theory and current issues of national and international economic policy. For seniors only.

ECON 497 Honors Directed Study (5) Students write their honors thesis on the topic chosen in the Honors Seminar working under the previously arranged supervision of an economics faculty adviser. Prerequisite: ECON 496

ECON 498 Senior Seminar (5) I&S Advanced undergraduate research in economics. Students formulate some underlying economic issues, organize its study, gather necessary information, and analyze results. Does not satisfy graduation requirement for the major. Prerequisite: ECON 301; one 400-level ECON course; recommended: two 400-level ECON courses.

ECON 499 Undergraduate Research (1-5, max. 10) MAY not be applied toward an advanced degree.

ECON 500 Microeconomic Analysis I (4) Duality and comparative statics analysis. Consumer and firm behavior. Uncertainty. Prerequisite: permission of instructor.

ECON 501 Microeconomic Analysis II (4) General equilibrium and welfare economics. Introduction to game theory. Prerequisite: ECON 500.

ECON 502 Macroeconomic Analysis I (4) Topics include theories of business cycles, dynamics of price adjustments, consumption, information theory, dynamic programming, introduction to numerical techniques, and open economy macroeconomics. Prerequisite: permission of instructor.

ECON 508 Microeconomic Analysis III (4) Information economics. Prerequisite: ECON 500; ECON 501.

ECON 509 Macroeconomic Analysis III (4) Modern macroeconomic dynamics, presenting a range of approaches based on intertemporal optimization. Representative agent models with special emphasis on the analysis of government policy. More advanced discussion of economic growth. Prerequisite: ECON 502; ECON 503, or equivalent.

ECON 511 Advanced Microeconomic Theory: Selected Topics (3, max. 12) Seminar in advanced microtheory. Selected topics of special interest and significance. Prerequisite: ECON 500; ECON 501.

ECON 512 Advanced Macroeconomic Theory: Selected Topics (3, max. 12) Seminar in advanced macrotheory. Selected topics of special interest and significance.

ECON 515 Special Topics in Mathematical Economics (5, max. 12)
theory and its applications to such problems as oligopoly pricing, non-cooperative bargaining, entry deterrence, reputation phenomena. Focus on game theory as a modeling tool as opposed to a body of known results. Prerequisite: ECON 508.

ECON 518 Contract Theory (3) Basic contract theory models, including hidden action and hidden information models. Current developments in contract theory. Prerequisite: ECON 508; ECON 516 or permission of instructor.

ECON 519 Economics of Contracts and Organizations: Empirics (3) Shi Critically reviews empirical literature on contracts and organization. Topics include multi-tasking, incentives and risk sharing; relative and absolute performance evaluation; team production; tournament and promotion; efficiency wage; career concern; relational contracts; asset specificity and asset ownership; complexity, uncertainty, asset ownership; adverse selection. Prerequisite: ECON 518; ECON 582, or permission of the instructor.

ECON 520 The Economics of Property Rights (3) Application of standard economic theory to analyze various forms of property rights as constraints: the costs associated with delineation and enforcement of rights; the costs of negotiating and enforcing contracts for right transfers; resource allocation and income distribution implied by different property right and transaction cost constraints. Prerequisite: ECON 500; ECON 501, or permission of instructor.

ECON 523 Emergence of the State (3) Using tools of property rights, industrial organization, and game theory, explores the emergence of the state. Specifies conditions conducive to constitutional rule. Analyzes circumstances amenable to state-promoted exchange as opposed to self-enforced agreements. Prerequisite: ECON 500; ECON 501, or permission of instructor.

ECON 525 Computational Economics (3) Sirakaya Develops a basic understanding of computational techniques used in the economic literature. Demonstrates, with economic examples, when and how these techniques are used and why and how they work. Prerequisite: ECON 580; ECON 581; ECON 582.

ECON 527 Empirical and Theory in Macroeconomics (3) Starlz Explores the integration of empirical and theoretical methods central to macroeconomic research. Exposes students to frontier areas of research to help them learn substantive material and transition to conducting their own independent research. Prerequisite: ECON 502; ECON 503; ECON 509; ECON 581; ECON 582; recommended: ECON 584.

ECON 535 Natural Resource Economics (3) Half of integrated two-course sequence in environmental and natural resource economics. Dynamic optimization. Nonrenewable resource extraction and exploration, including effects of market structure, uncertainty, and taxation. Renewable resources, including fisheries and forests. Prerequisite: ECON 500; ECON 501, or permission of instructor.

ECON 536 Environmental Economics (3) Half of integrated two-course sequence in environmental and natural resource economics. Theory of externalities. Normative and positive analysis of policy instruments for environmental management. Theory and methods of measuring environment impacts and valuing environmental amenities. Prerequisites: ECON 500; ECON 501, or permission of instructor.

ECON 537 Economic Aspects of Marine Policy (3) Huppert Develops pertinent economic concepts and their application to selected topics in marine policy decision making, including maritime policy, OCS oil and gas development, and wetlands management. Prerequisite: SMA 500 or permission of instructor. Offered: jointly with SMA 537; W.

ECON 538 Economics of Living Marine Resources (3) Huppert Develops pertinent economic concepts and applications for conservation, regulation, and restoration of fisheries and other living resources. Gives special attention to fishery management, including harvest regulation and enforcement, recreational fisheries evaluation, property rights regimes, contemporary issues, and marine protected area management. Offered: jointly with SMA 538; Sp.

ECON 539 Economics of Natural Resources Seminar III (3) Selected advanced topics in the economics of natural resources and environmental regulation. Topics include environmental regulation as a problem in optimal mechanism design, enforcement of regulations, regulatory regimes for common property resources, and the measurement of market power in nonrenewable resource industries. Prerequisite: ECON 536.

ECON 541 Labor Economics (3) Theoretical and empirical analysis of the labor market, focusing on the time allocation and labor supply decisions of individuals and households and the determinants of wages and wage differentials.

ECON 542 Labor Economics (3) Theoretical and empirical analysis of the labor market. The determinants of labor supply and demand, human capital investment, the pattern of compensation, employment contracts and incentives, unemployment and labor market dynamics.

ECON 543 Population Economics (3) Analysis of population issues from an economic perspective. Focuses on the study of household behavior in both developed and developing countries. Studies areas including fertility decisions, health and mortality, investment in education, the intra-household allocation of resources, and household structure and marriage. Prerequisite: ECON 501.

ECON 550 Public Finance: Expenditure Policy (3) Theory of public finance with emphasis on public expenditures. Social welfare maximization, public goods and externalities, decreasing cost industries, theory of collective choice, second-best analysis. Prerequisites: ECON 500; ECON 501, or permission of instructor.

ECON 551 Public Finance: Tax Policy (3) Theory of public finance with emphasis on taxation. Second-best analysis, optimal taxation, general equilibrium incidence analysis, issues in personal income taxation and corporate income taxation. Prerequisites: ECON 500; ECON 501, or permission of instructor.

ECON 554 Cost-Benefit Analysis (3) Covers the theoretical foundations of cost-benefit analysis using graduate microeconomics. Stresses both the conceptual and practical problems encountered in the subject. Emphasis on problem solving and term project. Prerequisites: ECON 500; ECON 501.

ECON 555 Game Theory for Social Scientists (5) Quinn Studies non-cooperative game-theory and provides tools to derive appropriate statistical models from game-theoretic models of behavior. Equilibrium concepts, learning, repeated games and experimental game theory. Prerequisites: MATH 112, MATH 124, or MATH 134; STAT/ECON 311 or equivalent. Offered: jointly with CS&S 568; W.

ECON 571 International Trade Theory (3) Comparative advantage, resource allocation, income distribution, and foreign trade. Different theories of trade, with or without perfect competition and constant returns. International factor mobility. Prerequisite: ECON 500; ECON 501.

ECON 572 International Financial and Monetary Economics (3) Analysis of open economy macro models with emphasis on exchange rates and balance of payments determination. Prerequisite: ECON 502; ECON 503.

ECON 573 International Commercial Policy (3) Analysis of welfare aspects of international trade and factor mobility. Costs and benefits of protection; implications of different government policies. Import competition and response. Prerequisite: ECON 500; ECON 502.

ECON 574 International Macroeconomics (3) Surveys recent developments in international macroeconomics, placing particular emphasis on the dynamic aspects. One sector, multisector, and two-country international models discussed. Fiscal issues treated in depth. Stochastic aspects introduced and related to the literature on international real business cycles. Prerequisite: ECON 509 or equivalent.

ECON 580 Econometrics I (4) Methods, tools, and theory of econometrics as the basis for empirical investigation in economics. Specification, testing, and use of econometric models with reference to examples in the literature. Students may receive credit for only one of MATH/STAT 390, ECON/STAT 481, and ECON 580.

ECON 581 Econometrics II (4) Methods, tools, and theory of econometrics as the basis for empirical investigation in economics. Specification, testing, and use of econometric models with reference to examples in the literature. Prerequisite: ECON 580.

ECON 582 Econometrics III (4) Methods, tools, and theory of econometrics as the basis for empirical investigation in economics. Specification, testing, and use of econometric models with reference to examples in the literature. Prerequisite: ECON 581.

ECON 583 Econometric Theory I (3) Estimation and testing in linear and nonlinear regression models. Asymptotic theory, bootstrapping. Theoretical developments are reinforced with a variety of empirical examples and applications. Prerequisite: ECON 580, ECON 581, ECON 582 or equivalent.

ECON 584 Econometric Theory II (3) Continuation of 583. Analysis of stationary and
nonstationary, univariate, and multivariate time series models. Emphasis on empirical applications. Prerequisite: ECON 583.

ECON 585 Applied Microeconometrics (3) Econometric issues that arise in applied microeconomic research. Topics range from standard methods to recent developments. Focus varies yearly to reflect interests of instructors and students. Prerequisite: ECON 582 or equivalent.

ECON 586 Advanced Applied Time Series Analysis (3) Time series and empirical macroeconomics with focus on applications of time series analysis to various topics in macroeconomics and finance. Topics include: state-space models and Kalman filter; Markov-switching models and their extensions; Bayesian Gibbs sampling; randomization; and measurement of volatility.

ECON 591 Microeconomics of Development (3) Porter Theoretical and empirical analysis of the microeconomics of development. Focuses on the study of household behavior in developing countries and how households respond to missing/imperfect markets. Topics include land access, nutrition and productivity, responses to risks and shocks, credit markets, micro-finance, and program evaluation. Prerequisite: ECON 501.

ECON 592 Development Policy (3) Theoretical and empirical analysis of macroeconomic policies pursued by developing countries. Topics include the determination of exchange rates and relative prices in small economies; the examination of government spending, taxation, banking, trade, and labor market policies; and the evaluation of market-oriented economic reform programs. Prerequisite: ECON 503; recommended: ECON 591.

ECON 594 Economic Growth (3) Studies various theoretical approaches to the question of why some countries are richer than others using generalizations and extensions of contemporary macroeconomic theory. Discusses the implications of various macroeconomic policies for economic growth. Prerequisite: ECON 502; ECON 503; ECON 509.

ECON 595 Analysis of the Transforming Socialist Economies (3) Applications of economic analysis to the economic problems of transforming socialist economies. Economic institutions. The role of the state. Privatization and the behavior of decentralized organizations. Integration into the world market. Prerequisite: micro- and macroeconomic theory and permission of instructor.

ECON 599 Research Issues in Demography and Population Studies (1-2, max. 7) Interdisciplinary seminar on current research issues in demography and population studies. Critical analysis and discussion of readings drawn from anthropological, economic, geographic, and sociological approaches. Credit/no credit only. Offered: AWSpS.

ECON 600 Independent Study or Research (*) Credit/no credit only.

ECON 601 Internship (1-9, max. 9) Credit/no credit only.

ECON 602 Teaching Introductory Economics (1) Examines problems encountered in preparing and presenting courses in introductory economics. Credit/no credit only.

ECON 800 Doctoral Dissertation (*) Credit/no credit only.

English

ENGL 100 Language Structure I (5) The first course in an academic writing sequence for non-native speakers of English, focusing on improving accuracy at the word, phrase and clause levels. Instruction provides repeated exposure to and engagement with practical formal vocabulary in academic contexts. ENGL 100, 101, and 102 must be taken consecutively. Offered: AWSpS.

ENGL 101 Language Structure II (5) The second course in an academic writing sequence for non-native speakers of English, focusing on improving accuracy at the word, phrase, and sentence level, and across phrase and clause boundaries. Instruction provides repeated exposure to and engagement with practical formal vocabulary in academic contexts. ENGL 100, 101, and 102 must be taken consecutively. Offered: AWSpS.

ENGL 102 Language Structure III (5) The third course in an academic writing sequence for non-native speakers of English, focusing on improving accuracy and style in complex sentences and paragraphs. Students continue to expand their ability to effectively express, combine and link ideas using sentence structure and vocabulary appropriate to different academic writing tasks. Course must be taken consecutively. Offered: AWSpS.

ENGL 103 Writing About Sources (5) Students learn to comprehend, analyze, synthesize, and evaluate authentic academic readings, and to use the basic rhetorical structures commonly found in academic writing: summary, definition, comparison/contrast, cause/effect, and problem solution. Emphasis placed on producing well-formed, accurate, and comprehensible written responses that meet the standards and conventions of academic style. Offered: AWSpS.

ENGL 104 Listening to Academic Lectures (5) Students learn to actively listen to and comprehend academic lectures and to take, use and access notes on those lectures. This entails the ability to recognize spoken rhetorical cues and organizational patterns, and to analyze and synthesize content, viewpoint and inferences critically. Offered: AWSpS.

ENGL 105 English for International Teaching Assistants (5) Develops language production skills, lesson planning and presentation skills, and TA-student interaction skills related to classroom teaching for international teaching assistants. Requires speak exam.

ENGL 106 Practical Forms of Writing (5) C Instruction in writing essay examinations, reports, reviews, and research papers. For Educational Opportunity Program students only, upon recommendation by the Office of Minority Affairs.

ENGL 109 Introductory Composition (5) C Development of writing skills: sentence strategies and paragraph structures. Expository, critical, and persuasive essay techniques based on analysis of selected readings. For Educational Opportunity Program students only, upon recommendation by the Office of Minority Affairs.

ENGL 110 Introductory Composition (5) C Development of writing skills: sentence strategies and paragraph structures. Expository, critical, and persuasive essay techniques based on analysis of selected readings. For Educational Opportunity Program students only, upon recommendation by the Office of Minority Affairs.

ENGL 111 Composition: Literature (5) C Study and practice of good writing: topics derived from reading and discussing stories, poems, essays, and plays.

ENGL 121 Composition: Social Issues (5) C Study and practice of good writing: topics derived from reading and discussing essays and fiction about current social and moral issues.

ENGL 131 Composition: Exposition (5) C Study and practice of good writing: topics derived from a variety of personal, academic, and public subjects.

ENGL 182 The Research Paper (5) C Includes study of library resources, the analysis of reading materials, and writing preparatory papers as basic to writing a reference or research paper. Open to all undergraduates. Prerequisite: either ENGL 111, ENGL 121, or ENGL 131.

ENGL 197 Interdisciplinary Writing/Humanities (5, max. 15) C Expository writing based on material presented in a specified humanities lecture course. Assignments include drafts of papers to be submitted in the specified course, and other pieces of analytical prose. Concurrent registration in the specified course required.

ENGL 198 Interdisciplinary Writing/Social Science (5, max. 15) C Expository writing based on material presented in a specified social science lecture course. Assignments include drafts of papers to be submitted in the specified course, and other pieces of analytic prose. Concurrent registration in specified course required.

ENGL 199 Interdisciplinary Writing/Natural Science (5, max. 15) C Expository writing based on material presented in a specific natural science lecture course. Assignments include drafts of papers to be submitted in the specified course, and other pieces of analytical prose. Concurrent registration in the specified course required.

ENGL 200 Reading Literature (5) VLPA Techniques and practice in reading and enjoying literature. Examines some of the best works in English and American literature and considers such features of literary meaning as imagery, characterization, narration, and patterning in sound and sense. Emphasis on literature as a source of pleasure and knowledge about human experience.

ENGL 202 Introduction to the Study of English Language and Literature (5) Gateway course designed for English pre-majors and majors. Introduces critical, historical, and theoretical frameworks important to studying the literature, language, and cultures of English. Concurrent registration with ENGL 197 required.

ENGL 205 Method, Imagination, and Inquiry (5) VLPA Examines ideas of method and
imagination in a variety of texts, in literature, philosophy, and science. Particularly concerned with intellectual backgrounds and methods of inquiry that have shaped modern Western literature. Offered: jointly with CHID 205.

ENGL 207 Introduction to Cultural Studies (5) VLPA Asks three questions: What is Cultural Studies? How does one read from a Cultural Studies perspective? What is the value of reading this way? Provides historical understanding of Cultural Studies, its terms and its specific way of interpreting a variety of texts, i.e. literature, visual images, music, video, and performance.

ENGL 210 Literature and the Ancient World (5) VLPA Introduction to literature from a broadly cultural point of view, focusing on major works that have shaped the development of literary and intellectual traditions to the Middle Ages.

ENGL 211 Medieval and Renaissance Literature (5) VLPA Introduction to literature from a broadly cultural point of view, focusing on major works that have shaped the development of literary and intellectual traditions from the Middle Ages to the eighteenth century.

ENGL 212 Literature of Enlightenment and Revolution (5) VLPA Introduction to eighteenth- and nineteenth-century literature from a broadly cultural point of view, focusing on representative works that illustrate literary and intellectual developments of the period.

ENGL 213 Modern and Postmodern Literature (5) VLPA Introduction to twentieth-century literature from a broadly cultural point of view, focusing on representative works that illustrate literary and intellectual developments since 1900.

ENGL 225 Shakespeare (5) VLPA Survey of Shakespeare’s career as dramatist. Study of representative comedies, tragedies, romances, and history plays.

ENGL 228 English Literary Culture: To 1600 (5) VLPA British literature from Middle Ages to end of sixteenth century. Study of literature in its cultural context, with attention to changes in language, form, content, and style.

ENGL 229 English Literary Culture: 1600-1800 (5) VLPA British literature in the seventeenth and eighteenth centuries. Study of literature in its cultural context, with attention to changes in form, content, and style.

ENGL 230 English Literary Culture: After 1800 (5) VLPA British literature in the nineteenth and twentieth centuries. Study of literature in its cultural context, with attention to changes in form, content, and style.

ENGL 242 Reading Fiction (5) VLPA Critical interpretation and meaning in fiction. Different examples of fiction representing a variety of types from the medieval to modern periods.

ENGL 243 Reading Poetry (5) VLPA Critical interpretation and meaning in poems. Different examples of poetry representing a variety of types from the medieval to modern periods.

ENGL 244 Reading Drama (5) VLPA Critical interpretation and meaning in plays. Different examples of drama representing a variety of types from the medieval to modern periods.

ENGL 250 Introduction to American Literature (5) VLPA Survey of the major writers, modes, and periods in American literature, from the beginnings to the present. Specific readings vary, but often included are: Taylor, Edwards, Franklin, Poe, Hawthorne, Melville, Emerson, Thoreau, Whitman, Dickinson, Twain, James, Eliot, Stevens, Nellig, Faulkner, Hemingway, Ellison, and Bellow.

ENGL 251 Introduction to American Political Culture (5) I&S/VLPA Introduction to the methods and theories used in the analysis of American culture. Emphasizes an interdisciplinary approach to American literature, including history, politics, anthropology, and mass media. Offered: jointly with POL S 281.

ENGL 257 Introduction to Asian-American Literature (5) VLPA Introductory survey of Asian-American literature provides introduction to Chinese, Japanese, Filipino, Korean, Hawaiian, South-Asian, and Southeast-Asian American literatures and a comparative study of the basic cultural histories of those Asian-American communities from the 1800s to the present.

ENGL 258 African-American Literature: 1745 to Present (5) VLPA A chronological survey of Afro-American literature in all genres from its beginnings to the present. Emphasizes Afro-American writing as a literary art; the cultural and historical context of Afro-American literary expression and the aesthetic criteria of Afro-American literature. Offered: jointly with AfrAAM 214.

ENGL 264 Literature and Science (5) VLPA Explores the relationships between literature and science as ways of comprehending humanity’s interaction with the world we inhabit. As a course in criticism, explores how literature and science structure and are structured by social, religious, political, and economic factors in culture.

ENGL 270 Cultural Issues in English (5) VLPA Survey of the assumptions, methodologies, and major issues of English in its cultural settings. Designed to connect English Language study with the study of literature, culture, and social history.

ENGL 281 Intermediate Expository Writing (5) C Writing paper to communicate ideas and opinion to develop accurate, competent, and effective expression.

ENGL 282 Composing for the Web (5) Introduces the writing of nonfiction narrative and expository pieces for publication on the Web. Analysis and criticism of on-line work.

ENGL 283 Beginning Verse Writing (5) VLPA Intensive study of the ways and means of making a poem.

ENGL 284 Beginning Short Story Writing (5) VLPA Introduction to the theory and practice of writing the short story.

ENGL 285 Writers on Writing (5) Bosworth, Kenney, Shields, Sonenberg Experiencing literature from the inside. Members of the creative writing faculty and other practicing writers discuss their poetry, fiction, and literary nonfiction, literary inspiration, artistic practice, and the writer’s life.

ENGL 300 Reading Major Texts (5) VLPA Intensive examination of one or a few major works of literature. Classroom work to develop skills of careful and critical reading. Book selection varies, but reading consists of major works by important authors and of selected supplementary materials.

ENGL 302 Critical Practice (5) VLPA Intensive study of, and exercise in, applying important or influential interpretive practices for studying a variety of texts, including history, literature, and culture, along with consideration of their powers/limits. Focuses on developing critical writing abilities. Topics vary and may include critical and interpretive practice from scripture and myth to more contemporary approaches, including newer interdisciplinary practices.

ENGL 303 History of Literary Criticism and Theory I (5) VLPA Survey of literary criticism and theory from its beginnings in Plato through the early twentieth century. Philosophical and theoretical grounds for critical practice put forward by philosophers and critics.

ENGL 304 History of Literary Criticism and Theory II (5) VLPA Survey of literary criticism and theory and its background in the New Criticism, structuralism, and phenomenology.

ENGL 305 Theories of Imagination (5) I&S/ VLPA Survey of theories of imagination since pre-Socratic times. Emphasis on the role of the imagination in the uses of the concept in literature, criticism, science, and society.

ENGL 306 Jewish Literature: Jewish and the Age (5) VLPA Reading major works of Jewish literature. Works by major and minor authors in the context of cultural history; critical and theoretical approaches that have led to the idea of modernization. Emphasis varies. Recommended: one 300-level ENGL course in the literary period being studied.

ENGL 310 The Bible as Literature (5) VLPA Introduction to the development of the religious ideas and institutions of ancient Israel, with selected readings from the Old Testament and New Testament. Emphasis on reading The Bible with literary and historical understanding.

ENGL 311 Modern Jewish Literature in Translation (5) VLPA Survey of Jewish literature and its literary experience since 1880. Includes such such Yiddish writers as Sholom Aleichem, Perezt, and I. B. Singer; such Israeli writers as Agnon, Hazaz, and Appelfeld; and such writers in non-Jewish languages as Primo Levi and Kafka.

ENGL 312 Jewish Literature: Biblical to Modern (5) I&S/VLPA A study of Jewish literature from Biblical narrative and rabbinic commentary to modern prose and poetry with intervening texts primarily organized around major themes: martyrdom and suffering, destruction and exile, messianism, Hasidism and Enlightenment, Yiddishism and Zionism. Various critical approaches; geographic and historic contexts. Offered: jointly with SISJE 312.

ENGL 313 Modern European Literature in Translation (5) VLPA Fiction, poetry, and drama from the development of modernism to the present. Works by such writers as Mann, Proust, Kafka, Gide, Hesse, Rilke, Brecht, Sartre, and Camus.

ENGL 315 Literary Modernism (5) VLPA Various modern authors, from Wordsworth to the present, in relation to such major thinkers as Kant, Hegel, Darwin, Marx, Nietzsche, Bergson,
and Wittgenstein, who have helped create the context and the content of modern literature. Recommended: ENGL 230 or one 300-level course in 19th or 20th century literature.

ENGL 316 Postcolonial Literature and Culture (5, max. 10) VLPA Readings of major texts and postcolonial literature and culture. Surveys some of the most important questions and debates in postcolonial literature, including issues of identity, globalization, language, and nationalism. The cultural focus may vary, so students should check with the professor for specific details.

ENGL 317 Literature of the Americas (5) VLPA Examines writings by and about people of the Americas, with a focus on intersections of gender, colonialism, race, sexuality, and ethnicity.

ENGL 320 English Literature: The Middle Ages (5) VLPA Literary culture of Middle Ages in England, as seen in selected works from earlier and later periods, ages of Beowulf and of Geoffrey Chaucer. Read in translation, except for a few later works, which are read in Middle English.

ENGL 321 Chaucer (5) VLPA Chaucer’s Canterbury Tales and other poetry, with attention to Chaucer’s social, historical, and intellectual milieu.

ENGL 322 English Literature: The Age of Queen Elizabeth (5) VLPA The golden age of English poetry, with poems by Shakespeare, Spenser, Sidney, and others; drama by Marlowe and other early rivals to Shakespeare; prose by Sir Thomas More and the great Elizabethan translators.

ENGL 323 Shakespeare to 1603 (5) VLPA Shakespeare’s career as dramatist before 1603 (including Hamlet). Study of history plays, comedies, and tragedies.

ENGL 324 Shakespeare After 1603 (5) VLPA Shakespeare’s career as dramatist after 1603. Study of comedies, tragedies, and romances.

ENGL 325 English Literature: The Late Renaissance (5) VLPA A period of skepticism for some, faith for others, but intellectual upheaval generally. Poems by John Donne and the “metaphysical” school; poems and plays by Ben Jonson and other late rivals to Shakespeare; prose by Sir Francis Bacon and other writers.

ENGL 326 Milton (5) VLPA Milton’s early poems and the prose; Paradise Lost, Paradise Regained, and Samson Agonistes, with attention to the religious, intellectual, and literary contexts.

ENGL 327 English Literature: Restoration and Early Eighteenth Century (5) VLPA Selections from wits and satirists; poems by John Dryden and Alexander Pope; plays by Dryden, William Congreve, and other wits; the great satires of Jonathan Swift, and the first stirring of the novel.

ENGL 328 English Literature: Later Eighteenth Century (5) VLPA Classic age of English prose: Essays, biography, and criticism by Samuel Johnson, Oliver Goldsmith, and others; comedies by Goldsmith and Richard Brinsley Sheridan; fiction by Henry Fielding and others; poetry by a variety of writers.

ENGL 330 English Literature: The Romantic Age (5) VLPA Literary, intellectual, and historical ferment of the period from the French Revolution to the 1830s. Readings from major authors in different literary forms; discussions of critical and philosophical issues in a time of change.

ENGL 331 Romantic Poetry I (5) VLPA Blake, Wordsworth, Coleridge, and their contemporaries.

ENGL 332 Romantic Poetry II (5) VLPA Byron, Shelley, Keats, and their contemporaries.

ENGL 333 English Novel: Early and Middle Nineteenth Century (5) VLPA Studies in the novel in one of its classic phases. Authors include Austen, the Brontës, Dickens, Thackeray.

ENGL 334 English Novel: Later Nineteenth Century (5) VLPA Studies in the novel as it passes from a classic format to formats more experimental. Authors include George Eliot, Thomas Hardy, Joseph Conrad, and others.

ENGL 335 English Literature: The Age of Victoria (5) VLPA Literature in an era of revolution that also sought continuity, when culture faced redefinition as mass culture and found in the process new demands and creative energies, new material and forms, and transformations of old ones. Readings range from works of Tennyson, Browning, Arnold, Shaw, to Dickens, Eliot, Hardy.

ENGL 336 English Literature: The Early Modern Period (5) VLPA Experiments in fiction and poetry. Novels by Joyce, Woolf, Lawrence, and others; poetry by Eliot and Yeats and others.

ENGL 337 The Modern Novel (5) VLPA The novel on both sides of the Atlantic in the first half of the twentieth century. Includes such writers as Joyce, Woolf, Lawrence, Stein, Hemingway, Faulkner, and others.

ENGL 338 Modern Poetry (5) VLPA Poetry in the modernist mode, including such poets as Yeats, Eliot, Pound, Auden, and Moore.

ENGL 339 English Literature: Contemporary England (5) VLPA Return to more traditional forms in such writers as Bowen, Orwell, Waugh, Cary, Lessing, Drabble.

ENGL 340 Modern Anglo-Irish Literature (5) VLPA Principal writers in English of the modern Irish literary movement — Yeats, Joyce, Synge, Gregory, and O’Casey among them — with attention to traditions of Irish culture and history.

ENGL 342 Contemporary Novel (5) VLPA Recent efforts to change the shape and direction of the novel by such writers as Murdoch, Barth, Hawkes, Fowles, and Atwood.

ENGL 343 Contemporary Poetry (5) VLPA Recent developments by such poets as Hughes, Heaney, Rich, Kinnell, and Hugo.

ENGL 344 Twentieth-Century Dramatic Literature (5) VLPA Modern and contemporary plays by such writers as Shaw, Synge, O’Casey, O’Neill, Yeats, Eliot, Beckett, Pinter, and Albee.

ENGL 345 Studies in Film (5) VLPA Types, techniques, and issues explored by filmmakers. Emphasis on narrative, image, and point of view.

ENGL 346 Studies in Short Fiction (5) VLPA The American and English short story, with attention to the influence of writers of other cultures. Aspects of the short story that distinguish it, in style and purpose, from longer fiction.

ENGL 347 The Art of Prose (5) VLPA Techniques and varieties of prose — autobiography, biography, personal essay, reflective and meditative writing, social and scientific inquiry, and persuasive writing. Special attention to use of poetic, fictional, and dramatic devices. Recommended: one introductory literature course.

ENGL 348 Studies in Drama (5) VLPA Investigation of one of the major types of drama: tragedy or comedy. Emphasis on drama prior to the twentieth century.

ENGL 349 Science Fiction and Fantasy (5) VLPA The study of the development of and specific debates in the related genres of fantasy and science fiction literatures.

ENGL 350 Traditions in American Fiction (5) VLPA A literary form in which America has found its distinctively American expression. Selected readings among important novelists from the beginnings until 1900, including Cooper, Hawthorne, Melville, Twain, Chopin, James, and Wharton.

ENGL 351 American Literature: The Colonial Period (5) VLPA Responses to the New World and literary strategies in the literature of the colonies and the early republic. Works by Taylor, Edwards, Franklin, and others.

ENGL 352 American Literature: The Early Nation (5) VLPA Conflicting visions of the national destiny and the individual identity in the early years of America’s nationhood. Works by Emerson, Thoreau, Hawthorne, Melville, and such other writers as Poe, Cooper, Irving, Whitman, Dickinson, and Douglass.

ENGL 353 American Literature: Later Nineteenth Century (5) VLPA Literary responses to an America propelled forward by accelerating and complex forces. Works by Twain, James, and such other writers as Whitman, Dickinson, Adams, Wharton, Howells, Crane, Dreiser, Dubois, and Chopin.

ENGL 355 American Literature: Contemporary America (5) VLPA Works by such writers as Ellison, Williams, O’Connor, Lowell, Barth, Rich, and Hawkes.
ENGL 356 Classic American Poetry (5) VLPA
Poetry by Taylor, Whitman, Dickinson, and such

ENGL 358 Literature of Black Americans (5) VLPA
Selected writings, novels, short stories, plays, poems by Afro-American writers. Study of the historical and cultural context within which they evolved. Differences between Afro-
American writers and writers of the European-

ENGL 359 Contemporary American Indian Literature (5) VLPA
Creative writings — novels, short stories, poems — of contemporary Indian authors; traditions out of which they evolved. Differences between Indian writers and writers of the dominant European/American mainstream. Offered: jointly with AIS 377.

ENGL 360 American Political Culture: To 1865 (5) I&S/VLPA
American literature in its political and cultural context from the Puritan origins to the Civil War. Emphasizes an interdisciplinary approach to American literature, including history, politics, anthropology, and mass media.

ENGL 361 American Political Culture: After 1865 (5) I&S/VLPA
American literature in its political and cultural context from the Civil War to the present. Emphasizes an interdisciplinary approach to American literature, including history, politics, anthropology, and mass media.

ENGL 363 Literature and the Other Arts and Disciplines (5, max. 10) VLPA
Relationships between literature and other arts, such as painting, photography, architecture, and music, or between literature and other disciplines, such as science. Content varies.

ENGL 364 Literature and Medicine (5) I&S/ VLPA
How changing concepts of doctor-patient relationship and of body depicted in literary texts affect decisions throughout the human life cycle. Medicine and disease as metaphors for personal experience and social analysis.

ENGL 367 Gender Studies in Literature (5, max. 15) VLPA
The study of contemporary approaches to analyzing the gender politics of literature and culture. Examines special topics in the history and development of the major theoretical trends, including the relationship of certain theories of gender to relevant works of literature.

ENGL 368 Women Writers (5, max. 15) VLPA
Study of the work of women writers in English and American literature.

ENGL 370 English Language Study (5) VLPA
Wide-range introduction to the study of written and spoken English. The nature of language; ways of describing language; the use of language study as an approach to English literature and the teaching of English.

ENGL 371 English Syntax (5) VLPA
Description of sentence, phrase, and word structures in present-day English. Prerequisite: ENGL 370, LING 200 or LING 400.

ENGL 372 Language Variation in Current English (5) VLPA
Examination of geographical, social, and occupational varieties of American English. Relationship between societal attitudes and language use.

ENGL 373 History of the English Language (5) VLPA
Evolution of English sounds, forms, structures, and word meanings from Anglo-Saxon times to the present. Prerequisite: either ENGL 370 or LING 200.

ENGL 374 The Language of Literature (5) VLPA
Roles of explicitly describable language features in the understanding and appreciation of various verbal forms. Emphasis on literature, but attention also may be given to nonliterary prose and oral forms.

ENGL 381 Advanced Expository Writing (5) VLPA
Concentration on the development of prose style for experienced writers.

ENGL 382 Writing for the Web (5) C Writing substantial Web essays on topics of current concern, Extensive analysis and criticism of online essays. Prerequisite: ENGL 282.

ENGL 383 The Craft of Verse (5) VLPA
Intensive study of various aspects of the craft verse. Readings in contemporary verse and writing using emulation and imitation. Prerequisite: ENGL 283; ENGL 284.

ENGL 384 The Craft of Prose (5) VLPA
Intensive study of various aspects of the craft of fiction or creative nonfiction. Readings in contemporary prose and writing using emulation and imitation. Prerequisite: ENGL 283; ENGL 284.

ENGL 407 Special Topics in Cultural Studies (5) VLPA
Advanced work in cultural studies.

ENGL 411 Introduction to the Folktale Among Literate Peoples (3) VLPA
Techniques of classification, geographic-historical distribution, theories of origin and interpretations, and related areas of investigation of the oral prose folktale of literate peoples.

ENGL 422 Arthurian Legends (5) VLPA
Medieval romance in its cultural and historical setting, with concentration on the evolution of Arthurian romance.

ENGL 430 British Writers: Studies in Major Authors (5, max. 15) VLPA
Concentration on one writer or a special group of British writers.

ENGL 431 Topics in British Literature (5, max. 15) VLPA
Themes and topics of special meaning to British literature.

ENGL 440 Special Studies in Literature (3/5, max. 10) VLPA
Themes and topics offering special approaches to literature.

ENGL 442 The Novel: Special Studies (5, max. 10) VLPA
Readings may be English or American and drawn from different periods, or they may concentrate on different types — gothic, experimental, novel of consciousness, realistic novel. Special attention to the novel as a distinct literary form. Specific topic varies from quarter to quarter.

ENGL 443 Poetry: Special Studies (5, max. 10) VLPA
A poetic tradition or group of poems connected by subject matter or poetic technique. Specific topics vary, but might include poetry as a geography of mind, the development of the love lyric, the comic poem.

ENGL 444 Dramatic Literature: Special Studies (5, max. 10) VLPA
Study of a particular dramatic tradition (such as expressionism or the absurd theatre) or character (the clown) or technique (play-within-a-play, the neoclassical three unities). Topics vary.

ENGL 451 American Writers: Studies in Major Authors (5, max. 15) VLPA
Concentration on one writer or a special group of American writers.

ENGL 452 Topics in American Literature (5, max. 15) VLPA
Exploration of a theme or special topic in American literary expression.

ENGL 453 Introduction to American Folklore (5) VLPA
Study of different kinds of folklore inherited from America's past and to be found in America today.

ENGL 457 Pacific Northwest Literature (5) VLPA
Concentrates in alternate years on either prose or poetry of the Pacific Northwest. Prose works examine early exploration, conflicts of native and settlement cultures, various social and economic conflicts. Pacific Northwest poetry includes consideration of its sources, formative influences, and emergence into national prominence.

ENGL 466 Gay and Lesbian Studies (5) I&S/ VLPA
Examination of ways gays and lesbians are represented in literature, film, performance, and popular culture and how these representations are interpreted in mainstream, gay/lesbian, and academic writing.

ENGL 470 Literature, Literary Study, and Society (5) I&S/ VLPA
Relationship of literature to society with particular emphasis on literary education. What social values determine the educational importance of literature, what segments of society are trained to read and to write literature, and how literature is institutionalized as part of pedagogical methodology. Emphasis varies.

ENGL 471 The Composition Process (5) VLPA
Consideration of psychological and formal elements basic to writing and related forms of nonverbal expression and the critical principles that apply to evaluation.

ENGL 472 Language Learning (5) VLPA
Consideration of how an individual achieves psychological and esthetic grasp of reality through language; relates language development to reading skills, literary interpretation, grammar acquisition, oral fluency, discursive and imaginative writing.

ENGL 473 Current Developments in English Studies: Conference (5) VLPA

ENGL 474 Special Topics in English for Teachers (1-10, max. 10) VLPA

ENGL 475 Colloquium in English for Teachers (1-5, max. 10) VLPA

ENGL 476 Puget Sound Writing Program Institute (10) VLPA
Focus on the writing process and the teaching of writing, accomplished through research, writing, reflection, and demonstration of writing instruction. Affiliated with the National Writing Project.

ENGL 477 Children's Literature (5) VLPA
An examination of books that form a part of the imaginative experience of children, as well as a part of a larger literary heritage, viewed in the light of their social, psychological, political, and moral implications.
ENGL 478 Language and Social Policy (5) I&S/VLPA Examines the relationship between language policy and social organization; the impact of language policy on immigration, education, and access to resources and political institutions; language policy and revolutionary change; language rights.

ENGL 479 Language Variation and Language Policy in North America (5) I&S/VLPA Surveys basic issues of language variation: phonological, syntactic, semantic, and narrative/discourse differences among speech communities of North American English; examines how language policy can affect access to education, the labor force, and political institutions.

ENGL 481 Special Studies in Expository Writing (5) VLPA Individual projects in various types of nonfictional prose, such as biographical sketches, informational reports, literary reviews, and essays.

ENGL 483 Advanced Verse Workshop (5, max. 15) VLPA Intensive verse workshop. Emphasis on the production and discussion of student poetry. Prerequisite: ENGL 383; ENGL 384.

ENGL 484 Advanced Prose Workshop (5, max. 10) VLPA Intensive prose workshop. Emphasis on the production and discussion of student fiction and/or creative nonfiction. Prerequisite: ENGL 383; ENGL 384.

ENGL 485 Novel Writing (5, max. 15) VLPA Experience in planning, writing, and revising a work of long fiction, whether from the outset, in progress, or in already completed draft. Prerequisite: ENGL 384.

ENGL 486 Playwriting (5, max. 10) VLPA Experience in planning, writing, and revising a play, whether from the outset, in progress, or in already completed draft.

ENGL 487 Screenwriting (5) VLPA Students read screenwriting manuals and screenplays, analyze exemplary films, and write synopses, treatments, and first acts of their own screenplays.

ENGL 490 Study Abroad Program (5, max. 15) VLPA This course, for students in the Study Abroad program, relates major works of literature to the landscape and activities of their settings.

ENGL 491 Internship (1-6, max. 12) Supervised experience in local businesses and other agencies. Open only to upper-division English majors. Credit/no credit only.

ENGL 492 Advanced Expository Writing Conference (1-5, max. 10) Tutorial arranged by prior mutual agreement between individual student and instructor. Revision of manuscripts is emphasized, but new work may also be undertaken.

ENGL 493 Advanced Creative Writing Conference (1-5, max. 10) Tutorial arranged by prior mutual agreement between individual student and instructor. Revision of manuscripts is emphasized, but new work may also be undertaken.

ENGL 494 Honors Seminar (5, max. 10) VLPA Survey of current issues confronting literary critics today, based on revolving themes and topics. Focuses on debates and developments affecting English language and literatures, including questions about: the relationship of culture and history; the effect of emergent technologies on literary study; the rise of interdisciplinary approaches in the humanities.

ENGL 495 Major Conference for Honors in Creative Writing (5) Special projects available to honors students in creative writing. Required of, and limited to, honors students in creative writing.

ENGL 496 Major Conference for Honors (5) Individual study (reading, papers) by arrangement with the instructor. Required of, and limited to, honors seniors in English.

ENGL 497 Honors Senior Seminar (5) VLPA Seminar study of special topics in language and literary study. Limited to honors students majoring in English.

ENGL 498 Senior Seminar (5) VLPA Seminar study of special topics in language and literary study. Limited to seniors majoring in English.

ENGL 499 Independent Study (1-5, max. 10) Individual study by arrangement with instructor.

ENGL 500 Reading Medieval Literature (5) Special problems involved in the study and interpretation of medieval texts, selected examples drawn from the beginnings of English literature to 1500.

ENGL 501 The Renaissance and Literary Tradition (5) Examination of selected texts from 1500 to 1660, concentrating on specific problems of interpretation and scholarship characteristic of the study of works written during the Renaissance.

ENGL 502 English Literary Culture: 1600-1800 (5) Examination of selected texts of the Restoration and eighteenth century, concentrating on specific problems of interpretation and scholarship characteristic of the study of works written during the period.

ENGL 503 English Literary Culture: 1800-1900 (5) Examination of selected texts from the nineteenth century, concentrating on specific problems of interpretation and scholarship characteristic of the study of works written during the period.

ENGL 504 Backgrounds of Modern Literature (5) Examination of selected texts from the twentieth century, concentrating on specific problems of interpretation and scholarship characteristic of the study of works written during the period.

ENGL 505 Theories of American Literature (5) Examination of selected texts in American Literature, concentrating on the specific problems of interpretation and scholarship characteristic of the study of works in this field.

ENGL 506 Modern and Contemporary Critical Theory (5) Engages ongoing critical conversations that inform English studies, including: language, textual production, disciplinarity, the university, capital, nation formation, postcolonialism, the environment, race, gender, class, and sexuality. The historical focus is contemporary, with attention to foundational modern theorists.

ENGL 507 History of Literary Criticism and Theory I (5, max. 15) A general introduction to the major issues in the history of criticism followed by the study of the classical theorists, including Plato, Aristotle, Longinus, and the major medieval critics. Offered: jointly with C LIT 507.

ENGL 508 History of Literary Criticism and Theory II (5, max. 15) Literary criticism and theory from the Middle Ages and the Renaissance through the eighteenth century to, but not including, Kant. Offered: jointly with C LIT 508.

ENGL 509 History of Literary Criticism and Theory III (5, max. 15) Literary criticism and theory from Kant's Critique of Judgment to the mid-twentieth century and the work of Northrop Frye. Offered: jointly with C LIT 509.

ENGL 510 History of Literary Criticism and Theory IV (5, max. 15) A study of the major issues in literary criticism and theory since about 1965. Offered: jointly with C LIT 510.

ENGL 512 Introductory Reading in Old English (5)

ENGL 513 Old English Language and Literature (5, max. 15)

ENGL 514 Middle English (5, max. 15)

ENGL 515 Chaucer (5, max. 15)

ENGL 516 Topics in Medieval English Literature (5, max. 15)

ENGL 517 Sixteenth-Century Literature (5, max. 15)

ENGL 518 Shakespeare (5, max. 15)

ENGL 520 Seventeenth-Century Literature (5, max. 15)

ENGL 521 Milton (5, max. 15)

ENGL 522 Topics in the English Renaissance, 1485-1660 (5, max. 15)

ENGL 524 Restoration and Eighteenth-Century Literature (5, max. 15)

ENGL 525 Topics in Restoration and Eighteenth-Century Studies (5, max. 15)

ENGL 527 Romanticism (5, max. 15)

ENGL 528 Victorian Literature (5, max. 15)

ENGL 529 Topics in Nineteenth-Century Studies (5, max. 15)

ENGL 531 Early American Literature (5, max. 15)

ENGL 532 Nineteenth-Century American Literature (5, max. 15)

ENGL 533 Modern American Literature (5, max. 15)

ENGL 535 American Culture and Criticism (5, max. 15)

ENGL 537 Topics in American Studies (5, max. 15)

ENGL 540 Modern Literature (5, max. 15)

ENGL 541 Contemporary Literature (5, max. 15)
ENGL 543 Anglo-Irish Literature (5, max. 15)

ENGL 544 World Literature in English (5, max. 15)

ENGL 546 Topics in Twentieth-Century Literature (5, max. 15)

ENGL 550 Studies in Narrative (5, max. 15)

ENGL 551 Studies in Poetry (5, max. 15)

ENGL 552 Studies in Drama (5, max. 15)

ENGL 554 Theories of Structure, Genre, Form, and Function (5, max. 15)

ENGL 555 Feminist Theories (5, max. 15)

ENGL 556 Cultural Studies (5, max. 15)

ENGL 559 Literature and Other Disciplines (5, max. 15)

ENGL 560 The Nature of Language: History and Theory (5)

ENGL 561 Stylistics (5)

ENGL 562 Discourse Analysis (5)

ENGL 563 Comparative Grammars (5)

ENGL 564 Current Rhetorical Theory (5)

ENGL 567 Approaches to Teaching Composition (1-5, max. 10)

ENGL 568 Advanced Fiction Workshop (5, max. 20)

ENGL 569 Topics in the Teaching of English (5, max. 15)

ENGL 570 Practicum in Teaching English as a Second Language (3, max. 6)

ENGL 571 Theory and Practice on Teaching English to Speakers of Other Languages (5)

ENGL 572 Methods and Materials for Teaching English as a Second Language (5)

ENGL 574 Research Methods in Second-Language Acquisition (5)

ENGL 575 Pedagogy and Grammar in Teaching English as a Second Language (5)

ENGL 576 Testing and Evaluation in English as a Second Language (5)

ENGL 578 Colloquium in Teaching English to Speakers of Other Languages (5, max. 10)

ENGL 581 The Creative Writer as Critical Reader (5)

ENGL 584 Advanced Fiction Workshop (5, max. 20)

ENGL 588 Graduate Writing Conference (5)

ENGL 589 Master of Arts Essay (5/10, max. 10)

ENGL 590 Master of Arts for Teachers Essay (5/10, max. 10)

GEN ST 101 University Learning Skills (1-3)

General Studies

GEN ST 105 Introduction to Liberal Studies (1-10, max. 10)

GEN ST 197 Freshman Seminar (1-3, max. 3)

GEN ST 300 Colloquium on Education, Learning, and Society (1, max. 3)

GEN ST 340 Community Fieldwork: Law (1-5, max. 5)

GEN ST 341 Community Fieldwork: Law (1-5, max. 5)

GEN ST 342 Community Fieldwork: Health (1-5, max. 5)

GEN ST 343 Community Fieldwork: Health (1-5, max. 5)

GEN ST 344 Community Fieldwork: Social Services (1-5, max. 5)

GEN ST 345 Community Fieldwork: Social Services (1-5, max. 5)

GEN ST 346 Community Fieldwork: Education (1-5, max. 5)

GEN ST 347 Community Fieldwork: Special Topics (1-5, max. 5)

GEN ST 350 Independent Fieldwork (1-6, max. 18)

GEN ST 391 Supervised Study in Selected Fields (1-10, max. 15)
a field represented in the College of Arts and Sciences. Faculty supervisor required. Credit/no credit only. Offered: AWSpS.

GEN ST 470 Undergraduate Peer Instructor Practicum (1-3, max. 12) Provides instruction in group leadership and promotion of values and methods of learning within a university setting. For Peer Instructors in the FIG and TRIG programs. Credit/no credit only. Offered: AWSpS.

GEN ST 493 Senior Study (5) For General Studies majors only. Faculty supervisor required. Offered: AWSpS.

Geography

GEOG 100 Introduction to Geography (5) I&S Introduction to the study of human geography and the major themes of the discipline. Topics include: human-environment interactions, migration and human mobility, patterns of health and nutrition, industrialization and urbanization, and the geography of culture and politics. Offered: AWSpS.

GEOG 102 World Regions (5) I&S Spatial study of world regions, based on historical, cultural, political, economic, and other factors. An attempt to understand the underlying forces that have led to the formation of regions and regional patterns.

GEOG 123 Introduction to Globalization (5) I&S Sparkes Provides an introduction to the debates over globalization. Focuses on the growth and intensification of global ties. Addresses the resulting inequalities and tensions, as well as the new opportunities for cultural and political exchange. Topics include the impacts on government, finance, labor, culture, the environment, health, and activism. Offered: jointly with SIS 123.

GEOG 195 Special Topics in Geography (1-5, max. 10) I&S

GEOG 205 Introduction to Physical Sciences and the Environment (5) NW ZumBrunnen Major atmospheric, hydrologic, and geomorphic processes used to interpret the character, distribution, and human significance of different natural and human-altered environments. Includes laboratory exercises for science and non-science majors, geography majors and nonmajors.

GEOG 207 Economic Geography (5) I&S Beyers, Harrington The changing locations and spatial patterns of economic activity, including: production in agriculture, manufacturing, and services; spatial economic principles of trade, transportation, communications, and corporate organization; regional economic development, and the diffusion of technological innovation. Offered: AWS.

GEOG 208 Geography of the World Economy: Regional Fortunes and the Rise of Global Markets (5) I&S Ellis Examines the relationship between the globalization of economic activity and regional development. Topics include international trade, colonialism, industrial capitalism, advanced capitalism, and the globalization of labor markets.

GEOG 230 Urbanization and Development: Geographies of Global Inequality (5) I&S Lawson Examines global to local interactions of economic, political, and social forces shaping urbanization and development processes across the globe. Provides an introduction to critical development studies, focusing on Latin America, Africa, and Asia. Also examines debates over the causes and geographic patterns of social inequality worldwide.

GEOG 236 Development and Challenge in Greater China (5) I&S Chan Studies the geography of development processes, patterns, and problems in "Greater China": mainland China, Taiwan, and Hong Kong. Covers physical geography, history, and economic and political systems, with major focus on geographical issues in China's development: agriculture, population, industry and trade, and relations with Hong Kong and Taiwan. Offered: jointly with SISEA 236.

GEOG 245 Geographic Perspectives on U.S. Population Diversity (5) I&S Withers Introduction to physical demography. Offers a practical understanding of population processes (fertility, mortality, and migration); knowledge of geographic variation in population structures and characteristics; knowledge of data sources and demographic research experience using formal demographic methods for geographic research; and an appreciation for the demographic underpinnings of contemporary social issues. Offered: W.

GEOG 258 Maps and GIS (5) I&S Explores how people represent the world with maps and geographic information systems (GIS). Trains students in map use for basic navigation, urban management, and environmental analysis. Considers role of spatial databases in commerce, decision-making, and analysis. Helps map readers better determine quality, usefulness, and representation of information.

GEOG 270 Geographies of International Development and Environmental Change (5) I&S Jeffrey Considers the meanings of development and how debates over international development link to environmental concerns. Examines how the globalization of agricultural production and debates over genetically modified food alter ideas about development, nature, and the environment. Addresses fair trade policies and practices and the obligations of multinational corporations. Offered: A.

GEOG 271 Geography of Food and Eating (5) I&S Jarosz Examines food production, distribution, and consumption issues across geographic scales. Focuses on changes in the modernization of the individual body to food and eating at the national and global scales. Explores the political, social, cultural, and economic dimensions of food and eating in particular spaces, places, environments, contexts, and regions. Offered: W.

GEOG 276 Introduction to Political Geography (5) I&S Brown Examines both the geography of political and non-political processes of geography at a variety of spatial scales and in different global locations. Typical topics include: geographies of the state and state power; geopolitics and globalization; national and local politics, and other politics of culture, health, nature, and the body.

GEOG 277 Geography of Cities (5) I&S England, Withers Study of (1) systems of cities—their location, distribution, functions, and competition; and (2) their internal structure—the location of activities within urban areas. Particular emphasis on current urban problems sprawl, housing, segregation, economic growth, and metropolitan transportation.

GEOG 280 Introduction to the Geography of Health and Health Care (5) I&S Mayer Concepts of health from a geographical viewpoint, including human-environment relations, development, geographical patterns of disease, and health systems in developed and developing countries.

GEOG 295 Special Topics in Geography (1-5, max. 10) I&S

GEOG 301 Cultural Geography (5) I&S Analysis of the role of culture in the formation of landscape patterns; components of culture that contribute not only to a "sense of place," but also to the mosaic of settlement patterns and occupancy that can be traced to culture.

GEOG 302 The Pacific Northwest (3) I&S Bayers Settlement pattern in the Pacific Northwest, emphasizing economic and historical factors, including the location of resource-oriented industries, policies regarding the use of public lands, and bases of the development of major urban areas in the region. Offered: W.

GEOG 308 Canada: A Geographic Interpretation (5) I&S Sparkes Examines the overlapping economic, cultural, and political geographies shaping life in contemporary Canada. Topics include: free trade, constitutional crisis, feminism in Canada, aboriginal politics, and border region phenomena. Attention paid to how specific geographic interpretations of Canada by Canadians actually play a part in national life. Offered: jointly with SISCA 308; Sp.

GEOG 310 Immigrant America: Trends and Policies from a Geographic Perspective (5) I&S Ellis Examines U.S. immigration trends and policies from a geographic perspective. Topics include: where immigrants arrive, how they settle in the United States, immigrant employment enclaves, the effects of U.S. immigration policy on immigrant settlement and employment patterns, illegal immigration, citizenship, and barriers to immigrant success in the United States.

GEOG 313 East Asia (5) I&S Chan Introduction to the contemporary geography of East Asia, including China, Hong Kong, Taiwan, Japan, and Korea. Topics include: physical geography, historical settings, general development patterns, agriculture, population, industry, and trade. Focuses on major geographic issues in development. Case studies from different countries used to illustrate various themes.

GEOG 315 Explanation and Understanding in Geography (5) I&S Brown Covers the beginning steps in the research process. Introduces the discipline of geography, the department, and current faculty through the research aims of explanation and understanding that frame social scientific inquiry. Students develop basic library and writing skills as preparation for future research methods classes and independent research.
GEOG 316 Urban Economics (5) I&S
Application of economic analysis to urban trends, problems, and prescriptions, such as changing urban form and function, urban public finance, housing and renewal, poverty and race, transportation, and environmental problems. Prerequisite: ECON 200. Offered: jointly with ECON 316.

GEOG 326 Quantitative Methods in Geography (5) I&S
Chan Introduction to quantitative methods in geography; emphasis on statistical techniques. Examines the basic concepts, reasoning, and procedures geographers use in developing, analyzing, applying, and presenting quantitative methods. Topics include: generating and describing data; elementary probability, hypothesis testing, comparative tests; finding relationships; and using and misusing statistics. Offered: A.

GEOG 330 Latin America: Landscapes of Change (5) I&S Lawson Examines operation of economic, social, and political processes across countries of Latin America-on international, national, and local scales-to understand common issues facing the region and different impacts in particular countries. Topics include internationalization of Latin American economies; agrarian and urban change; popular movements. Offered: W.

GEOG 333 Russia's Changing Landscape (5) I&S ZimmBrunnen The Russian landscape as it has been affected by Soviet planning, migration and settlement, urbanization, industrialization, the results of collectivization in agriculture, and the growth of a transport network.

GEOG 335 Geography of the Developing World (5) I&S Characteristics and causes, external and internal, of Third World development and obstacles to that development. Special attention to demographic and agricultural patterns, resource development, industrialization and urbanization, drawing on specific case studies from Asia, Africa, and Latin America. Recommended: GEOG 100 or GEOG 230. Offered: jointly with SIS 335.

GEOG 336 Development and Challenge in China (5) I&S Chan Examines the geography of China's development since 1949. Introduces China's past, its current geography, history, and economic and political system. Emphasizes China's uneven development in agriculture, population, industry, and trade. Also examines problems China faces in meeting its internal food demand, as well as the external processes of globalization. Offered: W.

GEOG 342 Geography of Inequality (5) I&S England Geographies of social, political, and economic inequality. Focus is usually on North American cities. Examines the theoretical underpinning of inequality. Explores topics such as the spatial distribution of wealth and poverty, the geographies of exclusion, and discrimination in paid employment and housing.

GEOG 343 Comparative Geographies of Youth (5) I&S Jeffery Examines how three key global processes - rising levels of formal education, changing health regimes, and environmental transformation - are shaping youth in the US and South Asia. Examines ways young people rework broader structures, paying particular attention to their economic livelihoods, cultural practices, and political engagements. Offered: jointly with SSISA 343: A.

GEOG 344 Migration in the Global Economy (5) I&S Mitchell Analyzes the relationship between human mobility in the late 20th century and changes in the global economy. Allows the students to gain familiarity with scholarly research on international migration from a diversity of approaches and methods. Offered: jointly with SIS 344; W.

GEOG 349 Geography of International Trade (5) I&S Harrington Introduces the theories and practice of international trade and foreign direct investment. Topics include: trade theory and policy; economic integration; currency markets and foreign exchange; trade operations and logistics; the international regulatory environment; and marketing, location and entry, and finance, accounting, and taxation. Offered: W.

GEOG 366 Introduction to Regional Economic Development (3/5) I&S Harrington The process of regional economic development. Theories and conceptualizations of economic growth and structural change, technological change and industrial development, spatial variation in economic activities and government policies. Recommended: GEOG 207; ECON 201.

GEOG 367 Economic Uses of Geographic Information (5) I&S Harrington Uses of data and the geographic information systems (GISs) that handle them in routing, marketing, service-area assessment and site location. Considers key economic-geography concepts, marketing approaches, questions of data availability and suitability, and GIS. Prerequisite: GEOG 360.

GEOG 371 World Hunger and Resource Development (5) I&S Jarosz Addresses issues of hunger and poverty in their relationship to resource development at the local, national, and global levels. Examines various approaches to the problem of world hunger rooted in critical development studies. Recommended: GEOG 230, GEOG 330, or GEOG 335.

GEOG 372 Asian Sustainable Development (5) I&S Examines the contemporary relationship between environmental protection and development paths in Asia. Explores the forces driving both environmental change and societal responses (state and local regulations, social movements, etc.) to that change, at many geographical scales. Asian concepts of nature-society relations also explored. Offered: jointly with SISA 372; W.

GEOG 375 Geopolitics (5) I&S Sparke An introduction to both political geography and geopolitics, addressing the fundamental links between power and space. Topics covered include: theories of power, space, and modernity; the formation of modern states; international geopolitics in the aftermath of the Cold War; the post-colonial nation-state; and the geopolitics of resistance. Offered: jointly with SIS 375.

GEOG 377 Urban Political Geography (5) I&S Brown Examines how the spatial structure of cities and towns affects and is affected by political processes. Considers both traditional and newer forms of politics, as global and local issues. Special attention paid to where politics take place within local contexts across state, civil society, home, and the body. Offered: Sp.

GEOG 378 Policing the City (5) I&S Herbert Investigates how and why formal and informal order is established in urban areas, how this order produces advantages and disadvantages, and possibilities of alternative visions of order. Topics include formal means of control (zoning, laws, policing, building codes) and informal means of control (gossip, ostracism, peer pressure, local politics). Offered: jointly with LSJ 378; A.

GEOG 380 Geographical Patterns of Health and Disease (4) I&S Meyer Geography of infectious and chronic diseases at local, national, and international scales; environmental, cultural, and social explanations of those variations; comparative aspects of health systems. Offered: W.

GEOG 385 Special Topics in Geography (1-5, max. 10) I&S

GEOG 401 Culture, Capital, and the City (5) I&S Examines current themes in social theory as they apply to the urban landscape. Includes the interconnections of cultural and economic processes and the spatial pattemnings of race, class, and gender in the modern urban context. Offered: A.

GEOG 403 Modern European-Islamic Migration, Integration, and Citizenship (5) I&S Mitchell Offers a theoretical and empirical understanding of migration processes and patterns in Europe, with a focus on Muslim immigration in the post-WWII period. Analyzes the impact of European Union mandates, globalization processes, and international, national, and urban policies on Muslim immigrant rights and identity formation. Offered: A; jointly with EURO 403.

GEOG 425 Qualitative Methodology in Geography (5) I&S Jarosz Historical and philosophical overview of qualitative methodol

GEOG 426 Advanced Quantitative Methods (5) I&S, QSR Witthers Quantitative methods for empirical research in geography. Empphasis on
statistical analysis; use of geographic data bases like the United States Census; understanding special issues and problems associated with geographically ordered data; verbal and graphic presentation in a computer environment. Recommended: GEOG 326. Offered: A.

GEOG 430 Contemporary Development Issues in Latin America (5) & S. Lawson Contemporary development issues in Latin America, seen from a spatial perspective. Concept of development; competing theories as related to various Latin American states. Economic structural transformation, migration, urbanization, regional inequality, and related policies. Offered: A.

GEOG 431 Geography and Gender (5) & S. Brown, J. Jarosz Examines theories and case studies across international, national, and regional scales in order to illustrate the impacts of social and economic processes upon the construction of gender in particular places. Offered: Sp.

GEOG 432 Population and Urbanization Problems of Russia and the Newly Independent States (5) & S. Zumbrunnen Historical background and evolution of Soviet/Russian population and urbanization processes and patterns, focusing on ethnic characteristics and recent trends in the growth and migration of rural and urban populations. Analysis of problems associated with ethnicity and nationality, regional-temporal labor demand and supply issues, and spatial-temporal well-being. Offered: odd years; W.

GEOG 433 Resource Use and Management in Russia: the Newly Independent States (5) & S. Zumbrunnen Geographic and historical background of the natural resource base of Russia and the Newly Independent States. Geographic and historical perspectives on Soviet natural resource use and management in theory and practice. Implications of the breakup of the USSR for natural resource use and management. Offered: odd years; W.

GEOG 435 Industrialization and Urbanization in China (5) & S. Chan Examines the impacts of industrialization strategies adopted by the Peoples Republic of China on urbanization and rural-urban relations. Topics include: economic development strategies, industrial geography, rural industrialization, urban development patterns, migration, and urbanization policies. Recommended: GEOG 336. Offered: Sp.

GEOG 436 Social and Political Geographies of South Asia (5) & S. Jeffrey Introduces the social and political geographies of South Asia through reference to agrarian change in India. Outlines key concepts related to the reproduction of inequality in the region, particularly theories of caste, class, gender, and religious communalism, and examines the mechanisms through which these inequalities are reproduced in South Asia. Offered: jointly with SISSA 436, Sp.

GEOG 438 Cities of East Asia: Geography and Development (5) & S. Chan Examines urban development in East Asia from a geographic and comparative perspective focusing on issues in development, and the interaction of geography, history, politics, and economics. Major topics include economic development and urbanization; regions and urban systems; migration; urban social and spatial structures; globalization and governance. Offered: Sp.

GEOG 439 Gender, Race, and the Geography of Employment (5) & S. Ellis Focuses on the geography of employment for men and women of different racial and ethnic backgrounds in American cities. Presents evidence on labor market inequality for different groups and explanations of these differences. Emphasizes the importance of a spatial perspective in understanding employment outcomes for women and minorities.

GEOG 443 Location and Movement Models (5) & S. Morrill Application of models of optimum location and allocation; assignment, transportation, and spatial equilibrium; spatial interaction; geographic simulation; and spatial diffusion.

GEOG 444 Geography of Housing (5) & S. Withers Focuses on the geography of housing, especially in the United States. Topics include: the American dream of homeownership; housing affordability and differential access to homeownership; homelessness; the history of public housing; housing demography; residential mobility and neighborhood change, and discrimination in the housing market. Offered: Sp.

GEOG 445 Geography of Air Transportation (5) & S. Nyerges Geographic analysis of world air routes, passenger and cargo flows, and airport activities; consideration of physical, economic, political, and institutional determinants of routes and flows.

GEOG 448 Geography of Transportation (5) & S. Morrill Circulation geography, principles of spatial interaction emphasizing commodity flow, the nature and distribution of rail and water transport, the role of transport in area development.

GEOG 449 Geography of Ocean Transportation (5) & S. Nyerges Geographic analysis of ocean trade routes, cargo and passenger flows, and port activities. Emphasis on the role of the transportation carrier in international trade.

GEOG 451 Cultural Geography of Latin America (5) & S. Interdisciplinary senior seminar examining how physical and social geography are culturally constructed and interconnected with subjectivities and power in Latin America. Topics include identity formation grounded in particular territories and the social constitution of space via an interplay of material and cultural forces. Offered: jointly with SISLA 451.

GEOG 458 Map Sources and Errors (5) & S. Analysis and appraisal of source materials for maps, production constraints of mapping agencies, coverage and quality. Focus on errors inherent in maps and geographic information; metadata resources; judgment of fitness for specific applications. Prerequisite: 2.0 in GEOG 360. Offered: odd years; W.

GEOG 460 Geographic Information Systems Analysis (5) & S. Nyerges Methods of Analysis provided by geographic information systems (GIS). Operations on map information including map overlay, aggregation/disaggregation, and other spatial and attribute procedures. Exposure to raster and vector software. Review of capabilities of current available GIS software. Prerequisite: 2.0 in GEOG 360. Offered: A.

GEOG 461 Urban Geographic Information Systems (5) & S. Nyerges Use of geographic information systems to investigate urban spatial issues; focus on applications of land-use and environmental issues; all urban change problems considered. GIS data processing strategies. Problem definition for GIS processing. Data collection, geocoding issues. Data structuring strategies. Prerequisite: 2.0 in GEOG 360; recommended: GEOG 277. Offered: W.

GEOG 462 Coastal Geographic Information Systems (5) & S. Nyerges Combines lectures about fundamental concepts in geographic information systems with hands-on computer lab assignments about coastal environment-society issues. Coastal feature data measurement, characterization, and movement related to the land-water and environment society dynamic. Prerequisite: GEOG 360; may not be taken if credit received in GEOG 460. Offered: A.

GEOG 463 Geographic Information Systems Workshop (5) & S. Nyerges Practical experience applying geographic information system (GIS) tools to analyze spatial data. Workshop format requires student-motivated projects; diverse backgrounds encouraged. Prerequisite: either 2.0 in GEOG 460 or 2.0 in GEOG 461. Offered: Sp.

GEOG 465 GIS Database and Programming (5) & S. Explores GIS database models, database development, and database management systems used in GIS. Uses programming languages most applicable to GIS database work, particularly related to effectiveness of commercial GIS such as ArcGIS. Prerequisite: GEOG 360; recommended: either GEOG 461, GEOG 462, or GEOG 464. Offered: odd years; W.

GEOG 466 Regional Economic Development (5) & S. Harrington Provides a theoretical overview of sub-national, regional economic growth and structural change, including the roles of interregional interaction and international trade, technological change, social, and legal institutions. Emphasizes inter-regional disparities in the context of relatively wealthy countries. Explores the constraints and opportunities of government (and other organisations’) policy. Offered: W.

GEOG 471 Methods of Resource Analysis (5) & S. Combines lectures about fundamental concepts in geographic information systems with hands-on computer lab assignments about coastal environment-society issues. Coastal feature data measurement, characterization, and movement related to the land-water and environment society dynamic. Prerequisite: GEOG 360; may not be taken if credit received in GEOG 460. Offered: A.

GEOG 472 Ecocapes: Nature, Culture, and Place (5) & S. Relationship between nature, culture, and place as the heart of geographic inquiry. Examines how processes of nature are influenced by changing political-economic, cultural, and scientific practices. Uses cultural studies of ecological science as a primary method of analysis. Offered: Sp.

GEOG 474 Geography and the Law (5) & S. Herbert Examines the relationship between geography, law, and socio-legal analysis;
reviews significant instances where law and geography intersec, such as the regulation of public space, the regulation of borders and mobility, and disputes over property and land use. Offered: jointly with LSJ 474.

**GEOG 476 Women and the City (5) I&S England**
Explores the reciprocal relations between gender relations, the layout of cities, and the activities of urban residents. Topics include: feminist theory and geography (women, gender, and the organization of space); women and urban poverty, housing and homelessness; gender roles and labor patterns; geographies of childcare; and women and urban politics. Offered: jointly with WOMEN 476.

**GEOG 477 Advanced Urban Geography (5) Brown**

**GEOG 478 Intraurban Spatial Patterns (5) I&S Mitchell**
Geographic patterns and processes within metropolitan areas. Economic land-use patterns (commercial and industrial location), social land-use patterns (segregation, housing, and neighborhood change), urban political geography, analysis of urban infrastructure, and assessment of contemporary and future trends in urban development. Recommended: GEOG 277. Offered: Sp.

**GEOG 479 Race, Ethnicity, and the American City (5) I&S Ellis**
Explores America's cities as sites where ethnic and racial interaction have generated specific patterns of opportunity and disadvantage in housing and labor markets; how ethnic identities and racial formations are changing by living and working in cities, and questions of assimilation, multiculturalism, and America's ethno-racial future.

**GEOG 480 Environmental Geography, Climate, and Health (5) I&S Mayer**
Demonstrates and investigates how human-environment relations are expressed in the context of health and disease. Local and global examples emphasize the ways medical geography is situated at the intersection of the social, physical, and biological sciences. Examines interactions between individual health, public health, and social, biological, and physical phenomena. Offered: W.

**GEOG 486 Problem Analysis in Urban Ecology (5) I&S/NW Alberti, Bradley, Hill, Marzloff, Ryan, ZumBrunnen**
Investigates pressing local and regional issues in urban ecology and develops each into a researchable project proposal. Examines and evaluates how different disciplines study environmental issues, explores criteria for conducting and evaluating quality research, develops skills in problem formulation, and sharpens proposal writing skills. Offered: jointly with ENVIR 474/ESRM 486/URBDP 443; A.

Discusses broad perspectives in urban ecology and how to analyze data relevant to urban ecology problems. Students write objectives and methods for a selected urban ecology problem that critiques different methodological approaches and reviews/synthesizes literature. Prerequisite: either GEOG 486, CFR 474, or ENVIR 486. Offered: jointly with CFR 475/ENVIR 476; W.

**GEOG 488 Research in Urban Ecology (5) I&S/NW Alberti, Bradley, Hill, Marzloff, Ryan, ZumBrunnen**
Teams analyze, present, and begin to interpret data that is relevant to addressing issues in urban ecology. Write and orally present revised objectives and methods sections of interdisciplinary project and present results section. Prerequisites: either GEOG 487, CFR 474, or ENVIR 487. Offered jointly with CFR 476/ENVIR 488; Sp.

**GEOG 490 Field Research: The Seattle Region (6) I&S Merrif Field methods for contemporary urban research. Survey designs used in the analysis of transportation, land use, location of employment, shopping and housing, political fragmentation, and environmental degradation. Field report required, based on field work in the Seattle region.

**GEOG 492 Library Research in Geography (3) I&S**
Introduction to library research methods in geography. Review and assessment of geographical bibliographies and abstract services for monographs, periodicals, gazetteers, dictionaries, encyclopedias, government publications, and statistical sources. Credit/no credit only.

**GEOG 493 Assessing Geographic Learning (2) Withers**
Enables graduating geography majors to articulate and assess their academic development and professional readiness by examining ways of representing geographic skills and capabilities. Offered: Sp.

**GEOG 494 Senior Essay (3) I&S Supervised**
individual research and writing of major paper during senior year. Offered: A/WSp.

**GEOG 495 Special Topics (*, max. 15) I&S Topics**
Vary and are announced in the preceding quarter. Offered: A/WSp.

**GEOG 496 Internship in Geography (3/5, max. 12) Internship in the public or private sector, supervised by a faculty member. Credit/no credit only. Offered: A/WSp.

**GEOG 497 Tutorial in Geographic Education (1-5, max. 15) I&S Withers**

**GEOG 498 Seminar in Economic Geography (5) I&S Harrington**
Themes and debates within and between economic geography and regional science. Offered: Sp.

**GEOG 499 Special Studies (*, max. 15)**
Supervised reading programs, undergraduate and graduate library and field research; special projects for undergraduate honors students. Offered: A/WSp.

**GEOG 500 Contemporary Geographic Thought (4, max. 8)**

**GEOG 502 Professional Writing in Geography (*, max. 6)**

**GEOG 505 Research Seminar: China (5, max. 10) Chan**
Offered: A.

**GEOG 507 Research Seminar: Canadian Problems (5, max. 10)**
Consideration of the spatial dimensions of Canadian economic, cultural, and political development, with emphasis on resource potentials and relations with the United States, Japan, and other important trading partners. Prerequisite: GEOG 486 or permission of instructor. Offered: jointly with SISCA 507.

**GEOG 512 History of Geographic Thought (5)**
Historical development of modern geography. Emphasis on various philosophical and methodological debates in geography and the contexts from which they emerged. Investigates geography's foundational concepts and institutions; how they have responded to — and influenced — the world around them. Offered: A.

**GEOG 513 Research Grant Workshop (5, max. 10)**
Writing research proposals. Participants learn to identify and approach sponsors; practice the peer-review process; develop a competitive research proposal. Prerequisite: GEOG 512 or GEOG 515 or equivalent; training and experience with quantitative, qualitative, or cartographic analysis; an already-formulated research project.

**GEOG 519 Evidence and Explanation in Geography (5) Sparke**
Introduces the main strands of philosophical debate shaping the discipline of human geography, including description, prediction, explanation, abstraction, structuration, representation, and institutionalization. Focuses on ways "theories" from outside the discipline have shaped the questions and concerns of geographers, and the ways geography reworks such theories. Offered: Sp.

**GEOG 520 Research Seminar: Geographic Information Representation (5) Nyerges**
Current issues in geographic information representation for geographic information systems (GIS). Includes representation for visualization, databases, and analyses. Prerequisite: one course in GIS.

**GEOG 526 Advanced Quantitative Methods in Geography (5) Morrill, Withers**

**GEOG 531 Latin American Development Seminar (5, max. 10) Lawson**
Evolution of development theory in Latin America from a spatial perspective. Theories and development issues, using case studies from Latin America. How geographers have conceptualized development problems and solutions. Prerequisite: GEOG 430.

**GEOG 532 Rural Development Seminar (5, max. 10) Jarosz**
Contemporary issues in international development theory related to regional and agrarian change, with emphasis on Africa.

**GEOG 533 Research Seminar: Russia and the Newly Independent States (5, max. 10) ZumBrunnen**

**GEOG 536 Advanced Research Seminar on South Asian Geographies (5) Jeffrey**
Examines geographies of social inequality in South Asia through reference to how space, place, and the environment are shaping practices of political struggle in the region. Considers how liberalization, democratization and religious communalization are changing the political geography of South Asia. Offered jointly with SISSA 536, Sp.

**GEOG 540 Research Seminar: Industrial Geography (5, max. 10) Seyers**
Offered: W.
GEOG 541 Research Seminar: Feminist Geographies (5) England Explores major research in feminist geographies. Particular attention to the concept that gendered identities and spaces are discursively (re)produced. Emphasizes recent feminist scholarship that emphasizes difference, as well as the intersections between gender, race, ethnicity, sexuality, age, nationality, class, and other social identities and divisions. Offered: jointly with WOMEN 541; W.

GEOG 542 Research Seminar: Social and Population Geography (5, max. 10) Withers Examines life course research using event-history analysis with applications to the substantive areas of household dynamics, family formation and dissolution, marriage, cohabitation, and divorce, migration histories, residential mobility, and housing careers. Examines continuous- and discrete-time longitudinal models during practical laboratory sessions.

GEOG 543 Research Seminar: Topics in Immigration, Ethnicity, and Race (5) Ellisi Employment patterns and outcomes for immigrants and ethnic minorities. Emphasis is on the U.S. experience and topics covered include labor market segmentation, theories of discrimination, job/labor queues, networks, ethnic niches and enclaves, skills and spatial mismatches. Specific focus changes annually.

GEOG 544 Event History Analysis of Social and Spatial Change (5) Withers Examines life course research using event-history analysis with applications to the substantive areas of household dynamics, family formation and dissolution, marriage, cohabitation, and divorce, migration histories, residential mobility, and housing careers. Examines continuous- and discrete-time longitudinal models during practical laboratory sessions.

GEOG 553 Advanced Topics in Cultural Geography (5, max. 10) Mitchell Focuses on important contemporary topics in cultural geography. Examines current theoretical debates in anthropology, sociology, geography, feminist criticism, and cultural studies as they relate to the landscape. Include critical questions surrounding issues of representation and ethnography. Designed to help student prepare for advanced fieldwork. Offered: Sp.

GEOG 566 Research Seminar on Regional Economic Geography (5) Harrington Provides the opportunity to read and discuss key articles on the theory and study of subregional, national economic development in industrial and "post-industrial" settings, to develop a research program, and to get feedback on research and writing.

GEOG 567 Research Seminar: Geography and Economic Development (5, max. 10) Harrington Explores ways in which economic and social changes affect the well-being and development of subnational, regional economies. Explanatory roles of such factors as labor and labor institutions, governments, technical change, corporations, capital markets, international costs, and international trade in the process of global restructuring. Specific focus changes annually.

GEOG 570 Research Seminar: Natural Resources Analysis (3, max. 6) ZumBrunnen
gocritique of mainstream managerial environmentalisms by unearthing their ideological bases, and delves into the ethical underpinnings of ecological resistance struggles or green utopias such as ecofeminist, deep and social ecology, and environmental justice movements.

GEOG 573 Urban Political Geography: Research Seminar (5) Brown Covers both classic and contemporary theoretical debates and research on the relation between power, place, and the local scale. Considers both conventional sites (e.g., the local state) as well as new forms and locations of cities politics (e.g., sexuality and the body).

GEOG 574 Research Seminar: Geography, Law, and Social Control (5) Herbert Explores relationship between the construction and enforcement of law and the landscape of lived experience; reviews major approaches in socio-legal analysis and seeks to augment these with insights from contemporary human geography research; explores various ways in which geographical variance shapes legal behavior.

GEOG 575 Advanced Political Geography (5) Sparke Provides resources for theorizing how politics shapes and is shaped by geographical relationships. Examines how politics are situated in complex material and discursive geographies that are partly reproduced through political negotiations. Examines interrelationships of contemporary capitalism with other complex systems of social and political power relations. Offered: jointly with SIS 575s.

GEOG 577 Research Seminar: Internal Spatial Structure of Cities (4, max. 8) Brown Offered: A.

GEOG 578 Research Seminar: Theorizing the City (5) Ellisi Considers classic and contemporary writings in urban theory in the twentieth century, including social ecology (Chicago School), political economy, and contemporary theoretical debates in poststructuralism, deconstructionism, and culture as they relate to cities and space. Offered: W.

GEOG 580 Medical Geography (3) Mayer Geography of disease, consideration in health systems planning, analysis of distributions, diffusion models, migration studies. Application of distance, optimal location models to health systems planning; emergency medical services; distribution of health professionals; cultural variations in health behavior. Prerequisite: familiarity with social science research; health-related issues. Offered: jointly with HSERV 586; W.

GEOG 581 Seminar in Medical Geography (5, max. 10) Mayer Intensive research seminar dealing with new and promising research themes in medical geography and public health. Offered: jointly with HSERV 585; A.

GEOG 588 Advanced Urban Ecology (5) Alberti, Bradley, Hill, Marzloff, Ryan, ZumBrunnen Discussion of current and important theoretical and empirical papers in urban ecology. Students continue to research interdisciplinary urban ecology projects while developing publishable manuscripts and oral presentations. Offered: jointly with CFR 588; AWSp.

GEOG 597 Tutorial for Graduate Students (2) Introduces beginning geography students to the main research agendas of the faculty; identifies the range of current discourse communities formed by current faculty and graduate students; establishes a process of mentoring and long-term planning for each new graduate student. Credit/no credit only. Offered: A.

GEOG 598 Geography Colloquium (1, max. 3) Participation in, and critique of, student thesis and dissertation research, faculty research, and visitor contributions. Offered: AWSp.

GEOG 599 Effective Teaching of Geography (1) Designed for the ongoing development of effective teaching and professional skills. Topics/activities include micro-teaching, communications and presentation skills; course organization, time management, personal and small group dynamics; design of geography curricula using simulations and computer-assisted instruction in the classroom, and fostering of creative thinking. Credit/no credit only. Offered: A.

GEOG 600 Independent Study or Research (*) Offered: AWSpS.

GEOG 700 Master's Thesis (*) Offered: AWSpS.

GEOG 800 Doctoral Dissertation (*) Offered: AWSpS.

Germanics

Detailed descriptions of courses are published by the Department of Germanics prior to registration each quarter.

Credit Restrictions: Students may receive credit for only one course in each of the following: 101, 111, and the first 5 credits of 104; 102, 111, and the second 5 credits of 104; 103 and the last 5 credits of 104. They may, however, receive credit for courses in different first-year sequences if the courses are taken in progressively more advanced order (e.g., the first 5 credits of 104 followed by 102 and 103). 100 is the equivalent of 101, 102, 103, or 15 credits of 104.

GERMAN 100 Intensive First-Year German (15) Accelerated first-year German. Speaking and listening. Secondary objectives are reading and writing. Offered: S.

GERMAN 101 First-Year German (5) The methods and objectives are primarily communicative, with emphasis on speaking and listening. Secondary objectives are reading and writing. (Can not be taken for credit if German is language of admission) Prerequisite: score of 0-11 on GER TL placement test if German is language of admission. Offered: AWS.

GERMAN 102 First-Year German (5) The methods and objectives are primarily communicative, with emphasis on speaking and listening. Secondary objectives are reading and writing. Prerequisite: either GERMAN 101 or score of 12-35 on German placement test. Offered: AWSp.

GERMAN 103 First-Year German (5) The methods and objectives are primarily communicative, with emphasis on speaking and listening. Secondary objectives are reading and writing. Prerequisite: either GERMAN 102, GERMAN 111, or score of 36-56 on German placement test. Offered: AWSpS.
GERMAN 111 Basic German Review (5) Includes the curriculum of GERMAN 102, preceded by a review of GERMAN 101. Designed for students with a background in German. Awards credits for GERMAN 102. Cannot be taken for credit if student has already taken GERMAN 102, 103, or more advanced courses. Offered: A.

GERMAN 121 First-Year Reading German (5) Special beginning course devoted exclusively to the reading objective. Offered: AS.

GERMAN 122 First-Year Reading German (5) Special beginning course devoted exclusively to the reading objective; 122 continuation of 121. Offered: WSP.

GERMAN 150 Conversational German Through Films (2, max. 6) Conversational practice in small groups based on films. Because series progresses through the year, beginners may enroll only Autumn Quarter. May be taken concurrently with other Germanic courses. Cannot be taken for credit if 250 previously taken. Offered: AWPsp.

GERMAN 190 Crime Scenes: Investigating the Cinema and Its Cultures (5) VLPA Arnes, Nestingen Teaches how to analyze film by closely studying crime scenes from historical and contemporary German and Scandinavian cinema. Directors studied include Fritz Lang, Carl Th. Dreyer, Billy Wilder, and Lars von Trier. Offered jointly with SCAND 190.

GERMAN 199 Supervised Study (1-10, max. 10) Study in German language and culture.

GERMAN 210 Classics of German Literature and Thought (5) VLPA Introduction to major figures of German culture from the Reformation to the present, their contribution to the intellectual life of the Western world. Luther, Kant, Goethe, Schopenhauer, Marx, Freud, Nietzsche, Kafka, Brecht, and Mann. In English.

GERMAN 220 Origins of the Germanic Languages (5) VLPA Introduction to basic grammatical concepts, terminology, and linguistics with emphasis on German-English relationship. Overview of phonology, morphology, syntax, and history of Germanic languages and people, both ancient and modern. Languages covered include Old, Middle, and New High German, English, Frisian, Dutch, Old Saxon, and Gothic. Taught in English. Offered: jointly with LING 220; AWSp.

GERMAN 221 The German Express: Second Year (10) VLPA Combines in one quarter the contents of 201 and 202, with special emphasis on reading and speaking skills. Limited to students who have demonstrated exceptional skills in first-year German. Recommended: GERMAN 103. Offered: A.

GERMAN 230 Conversational German (5) VLPA Recommended: GERMAN 103. Offered: S.

GERMAN 243 Fairy Tale and Fantasy (5) VLPA Studies of the Grimm brother's fairy tales, their reception in different cultural frameworks, and their influence on fantasy literature from the nineteenth century to the present, including discussions of their sociological, psychological, and psychoanalytical implications and gender issues. In English.

GERMAN 250 Advanced Conversational German Through Films (2, max. 6) VLPA Conversational practice in small groups based on films. May be taken concurrently with other Germanics courses. Recommended: GERMAN 103 and GERMAN 150. Offered: WSP.

GERMAN 293 Introduction to Contemporary German Culture (5) I&S/VLPA Introduction to culture of today's German-speaking world through readings from various media and discussion of diverse manifestations of both high and popular culture, its underlying beliefs and values, and its institutions and historical background. Readings and discussions in English.

GERMAN 295 The Contributions of German Jews to German Culture (5) I&S/VLPA Contribution, assimilation and alienation of German-speaking Jews — such as Karl Marx, Sigmund Freud and Franz Kafka — emphasizing the multi-cultural nature of that which is understood as "German culture."

GERMAN 299 Supervised Study (1-5, max. 10) .

GERMAN 300 Studies in Germanics (5, max. 15) VLPA Topics or figures of German literature or language.

GERMAN 301 Conversation and Writing Skills (3-5) VLPA Language skill development (speaking, writing) using materials selected to broaden understanding of German-speaking countries. Recommended: GERMAN 203. Offered: AW.

GERMAN 302 Conversation and Writing Skills (3-5) VLPA Language skill development (speaking, writing) using materials selected to broaden understanding of German-speaking countries. Recommended: GERMAN 301. Offered: WSP.

GERMAN 303 Conversation and Writing Skills (3-5) VLPA Language skill development (speaking, writing) using materials selected to broaden understanding of German-speaking countries. Recommended: GERMAN 302. Offered: Sp.

GERMAN 304 Contemporary German Play (5, max. 15) VLPA Reading, analysis, and performance of one play by a contemporary German author. Taught in German. Performance scheduled for last week of quarter. Prerequisite: GERMAN 203.

GERMAN 311 Critical Approaches to German Literature (5) VLPA Introduction to literary terminology. Diverse interpretive strategies, ranging from close reading to biographical and sociological approaches. Characteristics of different genres (poetry, prose, drama). Readings from eighteenth- to twentieth-century literature. Recommended: GERMAN 203. Offered: A.

GERMAN 312 Historical Approaches to German Literature (5) VLPA German literature from the Middle Ages to the present: Medieval Courtly period, Baroque, Enlightenment, Sturm und Drang, Classicism, Romanticism, Realism, Neoromanticism, Expressionism. Recommended: GERMAN 311. Offered: W.

GERMAN 313 Major Figures of German Literature (5) VLPA Focus on major figure such as Goethe, Schiller, Kleist, Fontane, Thomas Mann, Kafka. Emphasis on his/her cultural and sociopolitical contexts. Literary and nonliterary texts, including film, art, political, historical, and philosophical texts. Recommended: GERMAN 203; either GERMAN 311 or GERMAN 312. Offered: Sp.

GERMAN 322 Introduction to German Studies (5) VLPA What is "German culture"? How has it been defined and contested? How and why do we study it? Interdisciplinary methods and readings. Recommended: GERMAN 203; either GERMAN 311 or GERMAN 312. Offered: W.

GERMAN 323 Institutions and Their Ideas (5) I&S/VLPA Analysis of central institutions of contemporary Germany in their historical development. Recommended: GERMAN 203; either GERMAN 311 or GERMAN 312; GERMAN 322. Offered: Sp.

GERMAN 330 Conversational German (3-5) VLPA For participants in special summer programs only.

GERMAN 333 Business German (1) VLPA Introduction to the language and practices of German business. Recommended: GERMAN 203. Offered: A.

GERMAN 334 Business German (2) VLPA Introduction to the language and practices of German business. Recommended: GERMAN 203. Offered: W.

GERMAN 340 Friedrich Nietzsche in English (5) I&S/VLPA Analysis of Friedrich Nietzsche's chief works and the discussion of his position within modern German literature and thought.

GERMAN 341 Franz Kafka in English (5) VLPA Short stories and novels of Franz Kafka; emphasis on philosophical relevance and esthetic significance.

GERMAN 342 Thomas Mann in English (5) VLPA

GERMAN 345 Bertolt Brecht in English (5) VLPA

GERMAN 346 The Contemporary German Novel in English (5) VLPA Major novels of the postwar period (1945 to present) discussed in their historical context.

GERMAN 349 Goethe in English (5) VLPA Selected major works (especially Faust) of
Goethe, whose literary, philosophical, and scientific achievements are examined as integral parts of his quest for meaning, wholeness, and universality, and whose impact on Western thinking is traced up to Thomas Mann and C. G. Jung.

**GERMAN 350 The German Drama in English** (5) VLPA German drama from the eighteenth to the twentieth centuries. German history and culture as reflected in the plays. Discussion of major themes.

**GERMAN 351 Vienna 1900 in English** (5) I&S/VLPA Interdisciplinary study of Vienna at the turn of the century. Discussion of literary texts with emphasis on other intellectual and cultural trends of this very rich and complex period.

**GERMAN 352 Literature and Society in Weimar and National Socialist Germany in English** (5) I&S/VLPA Literature, theater, and film, with adjunct consideration of art and architecture, in relation to the German social and cultural situation circa 1918 to circa 1947.

**GERMAN 353 Postwar Germany** (5) I&S/VLPA Study of culture, society, and politics in Germany since 1945. Readings include literary and nonliterary texts devoted to culture and everyday life. In English.

**GERMAN 355 German Literature and Film in English** (5) VLPA Relationship between literature and film in the German tradition. Content varies; focus may be on a particular time period, director, or theme. Special attention paid to developing critical and analytical skills.

**GERMAN 356 Pagan Germany: Myth, Religion, Folklore in English** (5) I&S/VLPA History and culture of the German peoples before and during the conversion to Christianity. Readings include Tacitus's *Germania* and other historical sources, Beowulf, *Nibelungenlied*, *Grimm's Fairy Tales*, and German legends. Treatment of archaeological finds and a variety of materials that bear on religion, prophecy, magic, folk customs, and festivals.

**GERMAN 360 Women in German Literature in English** (5) I&S/VLPA Investigates the changing social roles of women in German society on the example of various literary texts from different periods.

**GERMAN 370 History of German Cinema** (5) I&S/VLPA History of German cinema emphasizing the cultural and political contexts. Films by Lang, Murnau, Riefenstahl, and Fassbound, among others. Readings and discussions in English.

**GERMAN 371 Special Topics: German Cinema** (5, max. 10) VLPA Covers one or more German film directors, a specific genre, or a chosen theme. Topics vary. Readings and discussions in English.

**GERMAN 390 Germanic Studies in English** (5, max. 15) VLPA Topics or figures of German literature or language.

**GERMAN 395 Proctoring of First-Year German Film Course** (2, max. 6) VLPA Restricted to upper-division students of German who have demonstrated sufficient proficiency in speaking German to lead discussion groups in 150. Leaders may participate one or two hours per week and receive 1 credit for each hour in class with 6 credits allowed in 3 quarters. Credit/no credit only. Recommended: GERMAN 203. Offered: AWSp.

**GERMAN 396 Proctoring of Second-Year German Film Course** (2, max. 6) VLPA Restricted to upper-division students of German who have demonstrated sufficient proficiency in speaking German to lead discussion groups in 250. Leaders may participate one or two hours per week and receive 1 credit for each hour in class with 6 credits allowed in three quarters. Credit/no credit only. Recommended: GERMAN 303; either GERMAN 322 or GERMAN 323. Offered: WSp.

**GERMAN 397 Foreign Studies in German Literature** (1-6, max. 15) VLPA

**GERMAN 398 Foreign Studies in German Language** (1-6, max. 15) VLPA

**GERMAN 399 Foreign Studies in German Culture** (1-6, max. 15) I&S/VLPA

**GERMAN 401 Advanced Writing and Conversation (3-5)** VLPA Texts and exercises, both grammatical and stylistic, to develop vocabulary, stylistic awareness, and the practical application of grammatical rules in written German. Recommended: GERMAN 303. Offered: AWSp.

**GERMAN 402 Advanced Writing and Conversation (3-5)** VLPA Texts and exercises, both grammatical and stylistic, to develop vocabulary, stylistic awareness, and the practical application of grammatical rules in written German. Recommended: GERMAN 303. Offered: AWSp.

**GERMAN 403 Advanced Writing and Conversation (3-5)** VLPA Texts and exercises, both grammatical and stylistic, to develop vocabulary, stylistic awareness, and the practical application of grammatical rules in written German. Recommended: GERMAN 303. Offered: AWSp.

**GERMAN 406 Intensive Elementary Yiddish** (5-15, max. 15) Intensive study of Yiddish grammar, with oral and written drills and reading of selected texts. Offered: S.

**GERMAN 411 Studies in Medieval Literature and Culture** (5) VLPA Rotating special topics in literature and culture of the Middle Ages, such as particular movements, authors, genres, themes, or problems. Recommended: GERMAN 303; either GERMAN 311, GERMAN 312, GERMAN 322, or GERMAN 323.

**GERMAN 412 Studies in Renaissance and Baroque Literature and Culture** (5) VLPA Rotating special topics in literature and culture of the Renaissance and Baroque, such as particular movements, authors, genres, themes, or problems. Recommended: GERMAN 303; either GERMAN 311, GERMAN 312, GERMAN 322, or GERMAN 323.

**GERMAN 421 Studies in Eighteenth-Century Literature and Culture** (5) VLPA Rotating special topics in literature and culture of the eighteenth century, such as particular movements, authors, genres, themes, or problems. Recommended: GERMAN 303; either GERMAN 311, GERMAN 312, GERMAN 322, or GERMAN 323.

**GERMAN 422 Studies in Nineteenth-Century Literature and Culture** (5) VLPA Rotating special topics in literature and culture of the nineteenth century, such as particular movements, authors, genres, themes, or problems. Recommended: GERMAN 303; either GERMAN 311, GERMAN 312, GERMAN 322, or GERMAN 323.

**GERMAN 423 Studies in Twentieth-Century Literature and Culture** (5) VLPA Rotating special topics in literature and culture of the twentieth century, such as particular movements, authors, genres, themes, or problems. Recommended: GERMAN 303; either GERMAN 311, GERMAN 312, GERMAN 322, or GERMAN 323.

**GERMAN 430 Advanced Conversational German** (3-5, max. 10) VLPA For participants in special summer programs only. Cannot be taken for credit to those who have already taken 401, 402, or 403.

**GERMAN 444 Undergraduate Thesis in Germanicances** (5) VLPA Supervised research leading to the writing of a research thesis.

**GERMAN 446 Internship in German** (2-5, max. 10) Prerequisite: 6 credits of upper-level German language courses. Credit/no credit only.

**GERMAN 447 Undergraduate Research** (1-5, max. 15) Supervised research with faculty member. Offered: AWSpS.

**GERMAN 451 Linguistic Analysis of German** (5) VLPA Recommended: GERMAN 203 Offered: A.

**GERMAN 452 History of the German Language** (5) VLPA Traces the history of the German language from early Germanic to the present. Recommended: LING 200 and GERMAN 203 Offered: jointly with LING 415.

**GERMAN 479 Special Topics in the Teaching of Foreign Languages** (3, max. 9) VLPA Intensive workshop for in-service and pre-service teachers of all foreign languages on some aspect of foreign-language teaching methodology.

**GERMAN 490 Contemporary German Literature** (5) VLPA Interpretation of selected works by contemporary German authors. Recommended: GERMAN 303; either GERMAN 311 or GERMAN 312.

**GERMAN 493 Special Topics in German Culture** (5) I&S/VLPA Recommended: GERMAN 303; either GERMAN 322 or GERMAN 323.

**GERMAN 494 Studies in German Poetry** (5) VLPA Introduction to various methods of analysis and interpretation. Recommended: GERMAN 303; either GERMAN 311 or GERMAN 312.

**GERMAN 495 Proseminar in German Literature** (5, max. 15) VLPA Special topics, the subject matter and depth of which are not included in other literature courses, arranged through consultation among students and faculty members.

**GERMAN 496 History of Germanic Philology** (5) VLPA Introduction to the works of outstanding scholars in the field of Germanics.

**GERMAN 497 Studies in German Literature** (1-6, max. 15)
GERMAN 498 Studies in the German Language (1-6, max. 15)

GERMAN 499 Studies in German Culture (1-6, max. 15)

GERMAN 500 Literary Theory, Methodology, and Bibliography (5) Historical survey and analysis of criticism (Methodengeschichte) and modern trends in contemporary theory. Methods of research and bibliography, as well as theoretical aspects of practical interpretation.

GERMAN 501 Proseminar in Methods and Writing (5) Introduction to research methods, presentation of research, scholarly writing, and general methodological issues. Each year a different special topic is chosen as a focus for students' research in the course.

GERMAN 503 Contemporary German Literature (5, max. 15) Seminar analyzing the esthetic movements and thought of contemporary German literature, the social and political problems dealt with in the works of representative authors, and major experimental concepts. Some previous exposure to the German literature and civilization after 1945 is expected.

GERMAN 504 Special Studies in Literary Criticism and Theory (5, max. 15) Literary criticism and theory, focusing on special topics proposed by the instructor. Taught in English. Prerequisite: GERMAN 500 or equivalent.

GERMAN 510 Studies in Medieval Literature and Culture (5, max. 15) Seminar on rotating special topics in literature and culture of the Middle Ages, such as particular movements, authors, genres, themes, or problems.

GERMAN 511 Studies in Renaissance and Baroque Literature and Culture (5, max. 15) Seminar on rotating special topics in literature and culture of the Renaissance and Baroque, such as particular movements, authors, genres, themes, or problems.

GERMAN 512 Studies in Eighteenth-Century Literature and Culture (5, max. 15) Seminar on rotating special topics in literature and culture of the eighteenth century, such as particular movements, authors, genres, themes, or problems.

GERMAN 514 Studies in Nineteenth-Century Literature and Culture (5, max. 15) Seminar on rotating special topics in literature and culture of the nineteenth century, such as particular movements, authors, genres, themes, or problems.

GERMAN 516 Studies in Twentieth-Century Literature and Culture (5, max. 15) Seminar on rotating special topics in literature and culture of the twentieth century, such as particular movements, authors, genres, themes, or problems.

GERMAN 518 Foreign Language Teaching Methodology (2) Brandt Current foreign language teaching methods and approaches. Learning and teaching strategies and techniques for the four skills (reading, writing, speaking, listening) including cultural notions. Current and future trends in pedagogy and technology. Offered jointly with NEAR E 518/SCAND 518/SLAV 518.

GERMAN 525 Seminar in Romanticism (5, max. 15)

GERMAN 526 Seminar in Nineteenth-Century Drama (5, max. 15)

GERMAN 527 Seminar in Nineteenth-Century Prose (5, max. 15)

GERMAN 528 Nineteenth-Century Poetry (5, max. 15) Representative selections from Holderlin, the late Goethe, and from prevalent trends in nineteenth-century poetry, such as romanticism, “Young Germany,” poetic realism, and the experimental poetry of naturalism.

GERMAN 529 Studies in Literature 1870-1920 (5, max. 15) Seminar on rotating special topics drawn from the period 1870-1920, such as particular movements, authors, genres, themes, or problems.

GERMAN 532 Seminar in Eighteenth-Century Literature (5, max. 15) Study of one or more of the literary movements: Enlightenment, sentimentalism, anaerocents, stress, and storm, classicism, early romanticism, and works by principal authors such as Gottsched, Bodmer, Gellert, Lessing, Wieland, Klopstock, Herder, Lenz, Goethe, Schiller, Jean Paul.

GERMAN 533 Seminar in Eighteenth-Century Literature (5, max. 15) Study of one or more of the literary movements: Enlightenment, sentimentalism, anaerocents, stress, and storm, classicism, early romanticism, and works by principal authors such as Gottsched, Bodmer, Gellert, Lessing, Wieland, Klopstock, Herder, Lenz, Goethe, Schiller, Jean Paul.

GERMAN 534 Storm and Stress (5, max. 15) Extensive investigation of poietological and esthetic concepts advanced by initiators and exponents of German storm and stress. Analyses of narrative and dramatic works of storm and stress reveal reflections and implementations of the new theoretical concepts.

GERMAN 535 Classicism: Goethe, Schiller (5, max. 15)

GERMAN 537 Studies in Literature 1770-1830 (5, max. 15) Seminar on rotating special topics drawn from the period 1770-1830, such as particular movements, authors, genres, themes, or problems.

GERMAN 540 Twentieth-Century Poetry (5, max. 15) Development of German poetry from Rilke, Hofmannsthal, and George through Trakl, Benn, the Expressionists and the Dadaists, Brecht, and Enzensberger, to such contemporaries as Eich, Heissenbuttel, the concrete poets, Celan, and Bachmann.

GERMAN 541 Twentieth-Century German Drama (5, max. 15) Selection from modern German drama representative of the concern with the human condition, of social criticism, and of experimentation with the new dramatic forms.

GERMAN 542 Twentieth-Century Prose (5, max. 15) Selected modern German novels, short novels, and short stories by representative authors dealing with the social and political problems of Germany as well as with individual problems of existence and identity.

GERMAN 550 Gothic (5)

GERMAN 551 Seminar in Germanic Philology and Linguistics (5, max. 15) Topics vary. Prerequisite: basic knowledge of German and at least one elementary linguistics course.

GERMAN 552 Old High German (5)

GERMAN 555 Old Saxon (5)

GERMAN 556 Middle High German (5)

GERMAN 560 Modern Dialects (5)

GERMAN 565 Seminar in Courtly Epic (5) Aspects and methods of literary analysis pertaining to the study of medieval courtly epics.

GERMAN 566 Late Middle High German Narrative (3)

GERMAN 567 Minnesang (3) In-depth study of medieval German lyrics in the context of German and European literary and intellectual development. Poems of the period from Kurenberger through Walther are analyzed with stress on grammatical, formal, stylistic, and ideological interpretation. Prerequisite: adequate knowledge of Middle High German.

GERMAN 568 Seminar in Heroic Epic (5) Literary and historic problems of the German heroic epic, with special emphasis on the Nibelungenlied and the Dietrichspiek.

GERMAN 575 Teaching of German Literature and Civilization (5) Teaching of German language and literature on the advanced level in secondary schools and colleges. Credit/no credit only.

GERMAN 576 Modern Methods and Materials in Teaching German (3) Theory and practice of communicative language teaching; current developments in foreign-language teaching; evaluation of teaching materials. Credit/no credit only.

GERMAN 577 Principles of Second Language Learning (2)

GERMAN 580 Seminar in German Literature (5, max. 15) Open topics seminar with varying content.

GERMAN 581 Seminar in Poetry (5, max. 15) Open topics seminar with varying content.

GERMAN 582 Seminar in Drama (5, max. 15) Open topics seminar with varying content.

GERMAN 583 Seminar in Prose (5, max. 15) Open topics seminar with varying content.

GERMAN 590 Philosophical Issues in German Culture (5, max. 15) Seminar on rotating special topics dealing with the impact of particular thinkers, movements, or philosophical problems in German culture.

GERMAN 591 Studies in German Intellectual History (5, max. 15) Seminar on rotating special topics dealing with interactions of history, literature, and culture in the German tradition.

GERMAN 592 Cultural Studies (5, max. 15) Seminar on rotating special topics dealing with periods, themes, or particular problems in German life and culture.

GERMAN 600 Independent Study or Research (*)

GERMAN 700 Master's Thesis (*)

GERMAN 800 Doctoral Dissertation (*)
History

HIST 111 The Ancient World (5) I&S Origins of Western civilization to the fall of Rome.

HIST 112 The Medieval World (5) I&S Political, economic, social, and intellectual history of the Middle Ages. Cannot be taken for credit toward a history major if HSTAM 331 or 332 or 333 previously taken.

HIST 113 Europe and the Modern World (5) I&S Political, economic, social, and intellectual history of modern Europe. Cannot be taken for credit toward a history major if HSTEU 302 or 303 previously taken.

HIST 120 Russia from the Tenth Century to the Present (5) I&S Russian political, social, and economic history from the tenth century to the present. Offered: jointly with EURO 140.

HIST 140 Russia from the Tenth Century to 1880 (5) I&S I & S. Russian political, social, and economic history from the tenth century to 1880. Offered: jointly with HSTEU 302 or 303 previously taken.

HIST 151 Introduction to African History, c. 1000-1880 (5) I&S Examines Africa's past from approximately 1000 to 1880. Through the theme of the politics of wealth, explores the history of precolonial states and societies, religious movements that combined local beliefs with Islam and Christianity, the Atlantic and Indian Ocean slave trades, and the origins of American and European colonialism.

HIST 152 Introduction to African History, c. 1880 - Present (5) I&S Examines Africa's past from approximately 1880 to the present. Through the theme of the politics of wealth, explores the history of European colonization, African social and cultural life under colonial rule, anti-colonial movements and decolonization, and the changes and challenges of the postcolonial present.

HIST 161 Survey of the Muslim Near East (5) I&S The Middle East (the Arab countries, Israel, Turkey, Iran, and Afghanistan) from the emergence of Islam in AD 622 to the present: culture, economics, politics.

HIST 199 Foreign Study (3-5, max. 10) I&S Lower-division history courses, for which there are no direct University of Washington equivalents, taken through the University of Washington Foreign Study Program.

HIST 200 Ten Events that shook the World (5) I&S Offers introduction to history by examining ten events of great importance for both past and present. The ten events, which vary from quarter to quarter, come from diverse times and places, thereby encouraging a sweeping view of world history. (See department advisor for the current quarterly list of the ten events.)

HIST 204 Europe and America in the Era of the World Wars (5) I&S Declining role of Europe in the world and rise of the United States from 1914 to 1945.

HIST 205 Filipino Histories (5) I&S Explores the histories, cultures, and politics of Filipinos in the Philippines and in the Diaspora, including Filipino Americans. Examines pre-colonial societies, Spanish and American colonial rule, nationalism, decolonization, and post-war political movements. Includes the histories of Filipino peoples in Europe and the United States. Offered: jointly with SISSE 205.

HIST 207 Introduction to Intellectual History (5) I&S Ideas in historical context. Comparative and developmental analysis of Western conceptions of “community,” from Plato to Freud. Offered: jointly with CHID 207.

HIST 209 History of Christianity (5) I&S Twenty centuries of the history, thought, and culture of Christianity.

HIST 211 Introduction to the History of Science (5) I&S Introduction to major themes in the history of science. Investigation of historical and scientific methods through the study of particular historical cases.

HIST 215 The History of the Atomic Bomb (5) I&S History of the atomic bomb from the beginning of nuclear physics to the security hearing of J. Robert Oppenheimer. Includes a study of the scientific achievements that made the bomb possible, the decision to deploy the bomb, the moral misgivings of the scientists involved.

HIST 217 The Space Age (5) I&S Explores the history of ideas, events, and practices associated with the Space Age from the late nineteenth century through the twentieth. Emphasizes intellectual, cultural, and political/military history in the development of rockets and space technology in the United States, Germany, and the Soviet Union.

HIST 219 Science and the Arts in Early Modern Europe (5) I&S Explores the role of artisanal craft practice and knowledge in the Scientific Revolution. Examines the artisanal world and its traditions of craft knowledge and follows the transmission of artisanal practice into the scholarly world of natural philosophy in the seventeenth century. Assesses the consequences for scientists and artisans.

HIST 221 Information Research Strategies in History (3) I&S Information research and problem solving in the context of history. Focuses on identifying information, need, information seeking, evaluation and presentation, and selection of the appropriate sources. Offered: jointly with INFO 221.

HIST 222 Understanding Photographs as Historic Documents (3) I&S Introduction to understanding how to view and interpret information contained in photographs. Examines the photograph as artifact, intent of the photographer, photographic codes and meanings; how such information is used, misused, and manipulated for various purposes and how to navigate archival institutions in search of photographs. Offered: jointly with INFO 222.

HIST 225 The Silk Road (5) I&S Waugh History of cultural and economic exchange across Eurasia from the early Common Era to modern times. Spread of religions such as Islam and Buddhism, overland trade in rare commodities, interaction between nomadic and sedentary cultures, role of empires, culture of daily life, and the arts. Offered: jointly with HIS 225.

HIST 245 Exploration and Empire: Science, Art, and Power, 1300-1800 (5) I&S Explores key moments in the history of exploration and empire, 1300-1800. Taking an interdisciplinary approach, focuses on scientific and artistic aspects of exploration, their implications for imperialism, and legacies in the postcolonial world.

HIST 249 Introduction to Labor Studies (5) I&S Conceptual and theoretical issues in the study of labor and work life of labor, national and international politics. Formation of labor movements. Historical and contemporary role of labor in the modern world. Offered: jointly with POL S 249/SOC 266.

HIST 250 Introduction to Jewish Cultural History (5) I&S Introductory orientation to the settings in which Jews have marked out for themselves distinctive identities as a people, a culture, and as a religious community. Examines Jewish cultural history as a production of Jewish identity that is always produced in conversation with others in the non-Jewish world. Offered: jointly with SISJE 250.

HIST 258 Slavery and Slave Trading in the 21st Century (5) I&S Examines the forms that slavery and slave trading have taken in contemporary times.

HIST 260 Slavery in History: A Comparative Study (5) I&S Slavery as a universal historical phenomenon lending itself to a comparative analysis is studied in terms of its philosophical justifications, economic importance, and local practices. The following historical periods are surveyed: the ancient Near East, Greece, Rome, Islam, Africa, Latin America, and North America.

HIST 261 The Crusades: Middle Eastern Perspectives (5) I&S Examines the impact of European Christians on the Middle East, from the establishment of the County of Edessa (1097) to the fall of Acre (1291). Explores how Muslims understood, reacted, and adapted to the crusades and how the close encounter with the "Franks" transformed medieval Middle Eastern societies.

HIST 263 The Modern Middle East (5) I&S Lopez Explores the social, political, and cultural changes that have occurred in the Middle East during the past two centuries. Covers the main social, economic, and intellectual currents that have transformed this region, starting with Napoleon's conquest of Egypt in 1798 and ending with the present moment in history. Offered: Sp.

HIST 265 Modern Revolutions Around the World (5) I&S Introduces the causes, processes, and legacies of modern revolutions. Cases included the American, French, Mexican, Russian, and Chinese Revolutions. Special attention given to how these and other revolutions have shaped the modern world.

HIST 269 The Holocaust: History and Memory (5) I&S Explores the Holocaust as crucial event of the twentieth century. Examines the origins of the Holocaust, perpetrators and victims, and efforts to come to terms with this genocide in Europe, Israel, and the United States. Offered: jointly with SISJE 269.

HIST 283 Introduction to Women's History (5) I&S Includes units on American, European, and Third World women that examine centers of women's activities (converts, women's clubs), women's place in male-dominated spheres (politics), women's impact on culture (health, arts), and the effect of larger changes on women's lives (technology, colonization). Offered: jointly with WOMEN 283.

HIST 290 Topics in History (5, max. 10) I&S Examines special topics in history.

HIST 310 Science and Religion in Historical Perspective (5) I&S Scientific and religious ideas have been two of the major forces shaping our modern view of the world. Often regarded as being in conflict, they can equally well be seen as complementary and interdependent. Study of the relationship between scientific and religious ideas with focus on particular episodes of history from ancient to modern times.

HIST 311 Science in Civilization: Antiquity to 1600 (5) I&S From preclassical antiquity to the end of the Middle Ages, stressing the growth of scientific ideas, the cultural context in which they take shape, and their relationship to other movements of thought in the history of civilization.

HIST 312 Science in Civilization: Science in Modern Society (5) I&S Growth of modern science since the Renaissance, emphasizing the scientific revolution of the seventeenth century, the development of methodology, and the emergence of new fields of interest and new modes of thought.

HIST 313 Science in Civilization: Physics and Astrophysics Since 1850 (5) I&S/NW Organization and pursuit of the physical and astrophysical sciences, focusing on the major unifying principles of physics and astronomy and the social and cultural settings in which they were created. Offered: jointly with ASTR 313.

HIST 315 History of Technology to 1940 (5) I&S Technology since the Middle Ages, in its social and historical contexts. From the medieval foundations of metalworking, its social consequences and the establishment of a class of engineering practitioners, to the transformation of American rural life, domestic technology, and industry before World War II.

HIST 320 Greek History: 7000 BC to Present (5) I&S History of Greece from its Neolithic village origins to the present. Examines the different forms of one of the most resilient cultures in the human story. Offered: jointly with EURO 320.

HIST 345 War and Society (5) I&S Analysis of the techniques of war from the Renaissance to the present with consideration of the social, political, and economic consequences of war in the Western world.

HIST 346 Images of War in History, Literature, and Media (5) I&S/LVPA Explores images of war generated by historians, writers, artists, filmmakers, television producers, and journalists, analyzing the perspectives on war adopted by various observers to see what motivates their representations. Focuses on ways in which various media shape images of war and the effect of this shaping on human consciousness.

HIST 358 Slavery in the Atlantic World (5) I&S Comparative examination of slavery in North and South America, the Caribbean, and Africa from 1450-1800. Central concerns include: development of the Atlantic slave trade; diverse uses of slave labor in the Atlantic world; slave cultures that developed in the Americas; and ways Africans and African-Americans resisted their bondage.

HIST 361 Middle Eastern History, 1453-1800 (5) I&S Schwarz Introduction to the early modern period in the Middle East, including an exploration of the political, economic, and cultural dominance of the Ottoman Empire and Safavid Iran. Explores the political and social dynamics and economic transformations of the two empires. Offered: A.

HIST 367 Southeast Asian Activity and Social Engagement (5) I&S Ra敷es Investigates how Southeast Asian activism is tied to the histories of political struggle within Southeast Asia and to questions of diasporic Asian American identity. Engages in group research projects exploring the meaning of Southeast Asian communities. Offered: jointly with SISSE 367; Sp.

HIST 369 The Jewish Twentieth Century in Film (5) I&S Stein Surveys twentieth-century Jewish history in its European, American, and Middle Eastern contexts by examining films produced in these settings. Considers central events that shaped modern Jewish culture: the changing geography of Europe and the Middle East, mass migrations, the Holocaust, shifting meanings of race, culture, and religion. Offered: jointly with SISJE 369.

HIST 388 Colloquium: Introduction to History (5, max. 10) I&S Introduction to the discipline of history for new or prospective majors. Emphasizes the basic skills of reading, analysis, and communication (both verbal and written) that are central to the historian's craft. Each seminar discusses a different subject or problem.

HIST 390 Colloquium in History and Science (5) I&S Study in the history of science to bridge the gap between the natural sciences and the humanities. Students should have a strong background both in history and in a natural science.

HIST 395 Modern Historical Writing, Honors Seminar (5) I&S New types of problems examined by historians and new techniques that have evolved for solution. Brief historiographical introduction, reaching back to the "scientific" historians of the mid-nineteenth century, then continues by examining the impact on historians of new disciplines such as psychology, sociology, and economics, and of new techniques such as statistics and prosopography. Readings are in the theorists and in those who followed as cited. Admission by departmental invitation only.

HIST 399 Advanced Foreign Study (3-5, max. 15) I&S Upper-division history courses, for which there are no direct University of Washington equivalents, taken through the University of Washington Foreign Study Program.

HIST 403 Scandinavian Immigration in History and Literature (5) VLP/I&S History and literature of Scandinavian immigration to North America, including immigrant life and culture, community structures and traditions, and the literature about and by immigrants from Denmark, Finland, Iceland, Norway, and Sweden. Offered: jointly with SCAND 403.

HIST 406 Issues in World History to 1500 (5) I&S Explores important questions about development of civilizations. Topics include the spread of peoples and languages; the significance of technologies such as agriculture, writing, and the stirrup; links between trade and the spread of religions and diseases; and primary and secondary state formation.

HIST 412 Science and the Enlightenment (5) I&S The role of science in relation to intellectual, social, economic, and religious forces in the eighteenth century, and growth of the international community in science during the same period.

HIST 425 History of the British Empire and Commonwealth Since 1783 (5) I&S Britain in the Caribbean, Africa, India, Southeast Asia, and the Pacific; and the settlement, economic development, and political evolution of Canada, Australia, New Zealand, and South Africa.

HIST 449 Issues in Comparative Labor History (5) I&S Role of labor in the modern world. Emphasis on the centrality of workers' struggles in the evolution of national societies on the conceptual, research, and expository strategies of contemporary students of the labor movement and on differences and relationships between labor in developed and underdeveloped countries.

HIST 451 Eastern and Central Europe Since 1500 (5) I&S Explores the history of Eastern and Central Europe from the period prior to the slave trade through European colonialism to the post-colonial present. Focuses on political, economic, and social change and continuity. Emphasis on understanding how various historical actors and historians have interpreted these processes.

HIST 452 Southern Africa Since 1500 (5) I&S Explores the history of Southern Africa from pre-colonial social institutions through European colonialism and industrialization to the post-apartheid present. Focuses on the interplay between race, class, ethnicity, and gender in the structuring of political relations. Emphasis on understanding how various historical actors and historians have interpreted these processes.

HIST 457 Topics in Labor Research (5, max. 10) I&S Analysis of the post-World War II decline of national labor movements and strategies employed to reverse this trend. Requires a major research project on organizing, bargaining, or another question in labor studies. Prerequisite: either POL S 249, HIST 249, or SOC 266. Offered: jointly with POL S 457.

HIST 461 History of the Middle East: 622-1300 (5) I&S Political and economic analysis of the period circa AD 600, preliminary to rise of Islam, to arrival of the Turks. Muhammad's teaching and impact; Islamization and Arabization.

HIST 462 History of the Middle East: 1258-1798 (5) I&S Conquests by successors of Ghengis Khan; creation in Egypt, Syria, and Iran of cavalry-based states; domination of political, social, and economic history by Ottomans and Safavid empires. The Napoleonic invasion.
HIST 463 History of the Middle East Since 1789 (5) I&S Critical issues and themes in the changing Middle East, including Westernization, growth of nationalism, Arab-Israeli dispute, Iranian revolution, and the role of Islam.

HIST 465 Iran, Afghanistan and Central Asia, 1750-2001 (5) I&S Introduction to the modern history of the Islamic republics of Iran and Afghanistan and the secular republics of Central Asia from 1750 to 2001. Includes discussion of colonialism, the role of the U.S., and diaspora and exile in these predominantly Muslim societies.

HIST 466 Sport and the British Empire in Asia, Africa, and the Middle East (5) I&S Examines British imperialism in Asia, Africa, and the Middle East through the prism of sport. Explores the rise of sport in Victorian England, its use to discipline and control colonized peoples, and its role in the rise of nationalism throughout the British Empire.

HIST 467 Nations and States in the Modern World (6) I&S Development of national consciousness in the "old nations" of Europe before the French Revolution. Replacement by new nationalism, spreading into East Central Europe, Russia, Ibero-America, Asia, and Africa. Offered: jointly with SIS 467.

HIST 468 Theatre as a Site of History and Memory (5) VLP A/I&S Sears Explores Asian theatre traditions as sites of memory, testimony, and archive using ethnographic and historical-archival approaches. Includes service-learning components and collaborative performance projects. Offered: jointly with SISSE 468; Sp.

HIST 481 Economic History of Europe (5) I&S Origins of the modern European economy; historical analysis of economic change and growth from medieval times that stresses the preconditions and consequences of industrialization. Recommended: ECON 201. Offered: jointly with ECON 460.

HIST 483 Technology and Culture in the Making of Contemporary Empires (5) I&S Benitez, Rodriguez-Silva Explores struggles shaping organization of US empire in the early twentieth century, focusing on sites where empire is material, cultural, and ideological boundaries were drawn and contested. Includes race, gender and class as colonial formation; technologies of imperial governance such as public health, citizenship, and territory. Offered: jointly with SISLA 483; W.

HIST 485 Comparative Colonialism (5) I&S Rafael Explores the historic roots and practices of colonialism throughout the world, focusing on the roles of nationalism, cosmopolitanism, and imperial domination. Treats colonialism as a world event whose effects continue to be felt and whose power needs to be addressed. Offered: S.

HIST 490 Topics in History (5, max. 10) I&S Examines special topics in history.

HIST 491 Honors Historical Method (5) I&S The purposes, materials, and techniques of historical scholarship. Theory, practice, and criticism. For honors students.

HIST 492 Honors Historical Method (5) I&S The purposes, materials, and techniques of historical scholarship. Theory, practice, and criticism. For honors students.

HIST 493 Senior Thesis in the History of Science (5, max. 10) I&S Preparation of the senior thesis for the History and Science emphasis.

HIST 494 Colloquium in Historiography (5, max. 15) I&S Advanced seminar examining central issues in historiography. Emphasizes reading, discussion, and writing.

HIST 495 History Internship (1-5, max. 10) Off-campus independent fieldwork with community agency in an apprenticeship or internship situation. Work to be jointly supervised by a member of the History Department and an on-site field supervisor.

HIST 498 Colloquium in History (5, max. 15) I&S Each seminar examines a different subject or problem. A quarterly list of the seminars and their instructors is available in the Department of History undergraduate advising office.

HIST 499 Undergraduate Research (1-5, max. 15) Offered: jointly with Research 499.

HIST 501 Ancient Greece and Rome: Writings and Interpretations (3-6, max. 6) Study of historians, development of historical study as a distinct pursuit, focus of attention in historical scholarship in the ancient world and comparison with modern interpretation of antiquity.

HIST 502 Medieval Europe: Writings and Interpretations (3-6, max. 6) Study of historians, schools of history, and interpretations of medieval European history.

HIST 503 Modern Europe: Writings and Interpretations (3-6, max. 6) Study of historians, schools of history, and interpretations of modern European history.

HIST 504 Comparative Ethnicity and Nationalism (5) I&S Theoretical approaches to, and historical case studies of, the phenomena of ethnicity, nationalism, and ethnic conflict in the modern world. Emphasis on Europe and Asia.

HIST 506 Issues in World History to 1500 (5) Explores important questions about development of civilizations. Topics include the spread of peoples and languages; the significance of technologies such as agriculture, writing, and the stirrup; links between trade and the spread of religions and diseases; and primary and secondary state formation.

HIST 511 History of Science (3-6, max. 6) Offered: S.

HIST 512 Seminar in the History of Science (3-6, max. 12)-

HIST 513 Seminar in the History of Science (-3-6, max. 12)-

HIST 514 Seminar in the History of Science (-3-6, max. 12)

HIST 515 Field Course in the History of Technology (5) Introduces students to the literature, methodology, and problems of the history of technology, and prepares them for independent study in the field.

HIST 530 Comparative Colonialisms: Methodological and Conceptual Approaches (5) Introduces students to the historiography of modern European/American colonialisms, focusing on Africa, Asia, and/or the Americas. Addresses methodological and conceptual issues by examining relationship between capitalism and colonialism; violence and routinization of colonial power; colonial categories of race, ethnicity, class, and gender; and resistance movements and nationalist politics.

HIST 552 Field Course in African History (5) Methodological and conceptual issues in African historiography, focusing on 1500 to the present. Examines topics including pre-colonial politics and economics, slavery and the slave trades, European conquest and colonization, resistance movements and nationalist politics, and post-colonial debates and dilemmas. Special attention to issues of gender, race, ethnicity, and class.

HIST 569 Islamic History (3-6, max. 6) Field course. Introduction to advanced study in the major periods and problems of Islam. Bibliographical guidance is stressed.

HIST 570 Topics in Teaching History (3) Topics include active learning, teaching writing, assessment, and course design. Offered for history graduate students working on plans to teach some use of Ottoman materials. A minor problem is investigated in detail by each student. Prerequisite: knowledge of at least one major language besides English (French, German, Russian, or other).

HIST 573 Ottoman History (3-6, max. 6) Field course introducing the student to the major periods and problems of Ottoman history, 1300-1914, by acquainting the student with the major works in at least two languages. Assumes prior courses to at least one language. Offered: jointly with SISSE 573.

HIST 575 Topics in Teaching History (3) Topics include active learning, teaching writing, assessment, and course design. Offered for history graduate students working on plans to teach some use of Ottoman materials. A minor problem is investigated in detail by each student. Prerequisite: knowledge of at least one major language besides English (French, German, Russian, or other).

HIST 579 Orientation to an Academic Career in History (3) Course for prospective college and university history instructors, preparing them for the nonacademic aspects of their duties. Prerequisite: Master of Arts degree in history or permission of instructor.

HIST 580 Gender and History (5) Introduction to gender as category of historical analysis, examining the impact of feminist theory within the discipline of history. Course traces historiographical debates in women's history and explores, through cross-cultural comparisons, how scholars have conceived the relationship between gender and categories such as class, race, ethnicity, and sexuality.

HIST 590 Topics in History (5, max. 15) Seminar on selected topics in general history, with special emphasis on preparation for field examinations. Topics vary according to interests of students and instructor.

HIST 595 Historical Practices (5) Emphasizes the interrelatedness of theoretical issues and historical research. Students read works that
HSTAM 276 Celtic Civilizations of the Hellenistic Age (5) I&S/HL: Exploration of the development of the Celtic civilization from the end of the Roman Empire to the rise of Islamic civilization. This course focuses on the political, social, and cultural development of the Celtic world, with an emphasis on the interactions between the Celts and the Roman Empire. Students will study the Celts' role in the formation of national states, development of urban society, and the impact of the Roman Empire on Celtic culture.

HSTAM 300 The Age of Augustus (5) I&S/VLPA: Detailed study of the history and culture of the reign of Augustus, the first Roman emperor (31 BC-AD 14). Includes readings in Augustan authors such as Virgil, Ovid, and Horace as well as the study of Augustan art and architecture. Offered: jointly with CLAS 330.

HSTAM 331 Early Middle Ages (5) I&S: The Dark Ages, feudalism, emergence of the medieval order of civilization, and the development of Romanesque culture. This course explores the political, social, and cultural developments of the Early Middle Ages, from the fall of the Roman Empire to the rise of Islamic civilization. Students will study the impact of the fall of the Roman Empire on European society and the emergence of a new civilization.

HSTAM 332 Central Middle Ages (5) I&S Europe in the central Middle Ages: culture of cathedrals and universities, formation of national states, development of urban society. This course focuses on the political, social, and cultural development of the Central Middle Ages, from the fall of the Roman Empire to the rise of Islamic civilization. Students will study the emergence of national states and the development of urban society.

HSTAM 333 Late Middle Ages (5) I&S: Disintegration of the medieval order under the impact of the national state, the secularization of society, and the decline of the church. Offered: jointly with CLAS 330.

HSTAM 334 Medieval Women (5) I&S: The experiences of women in medieval society: public and private power, changing concepts of family and the domestic sphere, ideal and reality in courtly love, women in religious life, women in the workplace, the querelle des femmes and the beginnings of "feminist" thought. Offered: jointly with CLAS 330.

HSTAM 335 Medieval Christianity (5) I&S: Development of Christianity in the medieval west circa 400 to 1500. Emphasis on the forms of religious life: monasticism, the papacy, friars, hermits, mystics, and reformers; and the emergence of new modes of piety, both lay and clerical. Offered: jointly with CLAS 330.

HSTAM 336 Medieval England, 1042-1485 (5) I&S: Upper level survey of English history from the Norman conquest until 1485. Emphasis on political, social, and economic history, with special attention to the peculiarities of English development as these had emerged by 1485.

HSTAM 337 Medieval Jewish History (5) I&S: Social and intellectual history of the Jews in western Europe to the sixteenth century. Under Islam and Christianity; the church and the Jews; the Crusades and their legacy; intellectual achievements; conflict and cooperation. Offered: jointly with SISJE 367.

HSTAM 338 Medieval Middle East (5) I&S: Political, social, economic, and cultural history of the Middle East from the sixteenth century BC to the beginning of the Middle Ages. Offered: jointly with SISJE 367.

HSTAM 339 Medieval Russia (5) I&S: Political, social, economic, and cultural history of Russia from the sixteenth century to the reign of Peter the Great. Offered: jointly with SISJE 367.

HSTAM 401 Classical Greece (5) I&S: The classical civilization of ancient Greece, with special emphasis on the legacy of Greece to Western civilization. Offered: jointly with SISJE 367.

HSTAM 402 The Hellenistic Age (5) I&S: Rise of Macedonia, conquest of Near East by Alexander, and division into lesser kingdoms after Alexander's death. Special emphasis on fusion of cultures and change from city-state to world-state. Offered: jointly with SISJE 367.

HSTAM 403 Alexander the Great and the Hellenistic Age (5) I&S: Rise of Macedonia, conquest of Near East by Alexander, and division into lesser kingdoms after Alexander's death. Special emphasis on fusion of cultures and change from city-state to world-state. Offered: jointly with SISJE 367.

HSTAM 443 Medieval England, 1042-1485 (5) I&S: Upper level survey of English history from the Norman conquest until 1485. Emphasis on political, social, and economic history, with special attention to the peculiarities of English development as these had emerged by 1485.

HSTAM 530 Medieval Europe (3-6, max. 6): Field course. Survey of early European history through the times of tribal migrations and invasions from Asia. Problems and methods of research.

HSTAM 531 Medieval European History (3-6, max. 6): Field course. Survey of early European history through the times of tribal migrations and invasions from Asia. Problems and methods of research.

HSTAM 532 Medieval European Seminar (3-6, max. 12): Prerequisite: reading knowledge of Latin.

HSTAM 533 Medieval European Seminar (3-6, max. 12): Prerequisite: reading knowledge of Latin.

HSTAM 534 Medieval European Seminar (3-6, max. 12): Prerequisite: reading knowledge of Latin.

HSTAM 535 Later Medieval Europe (3-6, max. 6): Graduate level study of specific topics in medieval history. Topics vary from quarter to quarter; for information, please see instructor.

HSTAM 536 Topics in Early Medieval History (3-6, max. 12): Graduate level study of specific topics in early medieval history. Topics vary according to interests of students and instructor.

HSTAM 590 Topics in Ancient and Medieval History (5) Seminar on selected topics in ancient and medieval history, with special emphasis on preparation for field examinations. Topics vary according to interests of students and instructor.

HSTAM 591 Advanced Medieval and Renaissance Seminar (3-6, max. 12)

HSTAM 592 Advanced Medieval and Renaissance Seminar (3-6, max. 12)

HSTAM 593 Advanced Medieval and Renaissance Seminar (3-6, max. 12)
History of Asia

HSTAS 201 Introduction to South Asian History, pre-history to 1500 (5) I&S Religions, literature, philosophy, politics, arts, and history of India from earliest times to the Mughal empire.

HSTAS 202 Introduction to South Asian History, 1500 - present (5) I&S The Islamic impact, British conquest, and contemporary Indian state. Emphasis on the rise of nationalism, social organization, and contemporary life and history. Offered: jointly with SIS 202.

HSTAS 211 History of Chinese Civilization (5) I&S Intensive survey of Chinese civilization from earliest times to today. Introduces all students, including East Asian history majors, to the general sweep of Chinese history. Social, cultural, and intellectual developments.

HSTAS 212 History of Korean Civilization (5) I&S From earliest times to the present. Development of Korean society and culture in terms of government organization, social and economic change, literature, and art. Offered: jointly with SISEA 212.

HSTAS 221 History of Southeast Asia (5) I&S Surveys Southeast Asian civilizations at the outset of Western colonial rule; the colonial impact on the traditional societies of Burma, Thailand, Cambodia, Laos, Vietnam, Malaysia, Indonesia, and the Philippines; nineteenth- and twentieth-century nationalist and revolutionary movements; emergence of Southeast Asia as a region in the modern world. Offered: jointly with SIS 221.

HSTAS 241 Japanese Civilization (5) I&S Japan's civilization, including its origins, government, literature, economic institutions, material culture, social organization, and religions, in relation to the development of Japan as a society and nation. Cannot be taken for credit if SISEA 341 previously taken. Offered: jointly with SISEA 241.

HSTAS 244 Imperialism and Anti-Colonialism in Asia (5) I&S Introduction to Western imperialism expansion, conquest, and colonial rule in Asia; the anti-colonial, nationalist resistances they engendered; and the resultant cultural, political, economic, and intellectual transformations in Asian societies. Covers post-1800 violence, racial hierarchies, human rights abuses, post-colonial memories, persistent strategies of domination, and structural inequities. Offered: jointly with SIS 244.

HSTAS 245 Human Rights in Asia (5) I&S Callahan, Giebel Introduction to recent and ongoing human rights issues in South, Southeast, and East Asia. Focuses on how human rights politics have played out in domestic political arenas. Provides exposure to views/insights into the historical context in which human rights claims, abuses, and debates arise. Offered: jointly with SIS 245.

HSTAS 265 The Viet Nam Wars (5) I&S Giebel Recent Vietnamese history and struggles for independence and national unification vis-a-vis French colonialism, Japanese occupation, American intervention, and internal divisions. Covers historical roots and contemporary contexts of revolution and war, objectives and motivations of participants, and the enormous human costs. Emphasizes socio-cultural changes and wars' legacies. Offered: jointly with SISEA 265.

HSTAS 290 Topics in Asian History (5, max. 10) I&S Examines special topics in Asian history.

HSTAS 303 Divided Lands/Divided Lives: An Environmental History of South Asia (5) I&S Focuses on the mobilization of South Asian tribal, peasant, and ethnic communities around ecological issues to secure social equity in the colonial and post-colonial period. Examines how the complex interactions of states and peoples have changed the ways in which nature itself is conceptualized. Offered: jointly with SIS 303.

HSTAS 348 Alternative Routes to Modernity (5) I&S Routes to modernity followed by non-Western societies between 1600 and 1900. Historical experiences of non-Western societies seen in the contexts of European history and of development theory. Primary sources and techniques for posing theoretical questions of historical data. Offered: jointly with SIS 348.

HSTAS 364 Violence, Myth, and Memory (5) VLP/AN/S Explores how images and ideas of power, violence, and global modernity circulate in memories and discourses about US relations with Vietnam, the Philippines, and Indonesia. Focuses on nations myths, colonial and postcolonial encounters, historiography and narrative, and nationalist and ethnic identity formations. Offered: jointly with SIS 346; Sp.

HSTAS 401 History of Ancient India (5) I&S India in ancient times: emphasis on forms of political organizations and economic life, social organizations, and cultural developments.

HSTAS 402 History of Medieval and Mughal India (5) I&S Medieval India; emphasis on forms of political organizations and economic life, social organizations, and cultural developments.

HSTAS 403 History of Modern India to 1900 (5) I&S Modern India; emphasis on forms of political organizations and economic life, social organizations, and cultural developments.

HSTAS 404 History of Twentieth-Century India (5) I&S Analysis of the problems in the fields of social life, industrialization, and domestic politics, education, economics, and other areas that confront India today.

HSTAS 422 History of Modern Japan (5) I&S Political, social, economic, and cultural development of Japan from the late Tokugawa period to the present with special emphasis on the cultural impact of the West. Offered: jointly with SIS 423.

HSTAS 424 The Emergence of Postwar Japan (5) I&S The making of modern Japan; World War II and surrender; American occupation; postoccupation rebuilding; emergence as an industrial power. Recommended: HSTAS 423 or SISEA 440. Offered: jointly with SIS 423.

HSTAS 441 Economic and Social History of Japan to 1900 (5) I&S Lecture-seminar on Japanese economic and social history from 700 to 1900. Analyses of the rise and decline of the shoen system, the rise of commerce, social change, changes in the living standard, demographic changes, and the early phases of industrialization. Political and cultural developments as related to economic and social change. Prerequisite: either SISEA 241/HSTAS 241 or SISEA 341/HSTAS 341. Offered: jointly with SISEA 441.

HSTAS 451 Chinese History: Earliest Times to 221 BC (5) I&S Pre-imperial China.

HSTAS 452 Chinese History from Earliest Times to 1276(5) I&S Traces the development of Chinese civilization from earliest times through the Song dynasty. Examines social, cultural, political, and economic history.

HSTAS 453 Chinese History: AD 906 to 1840 (5) I&S Political, social, economic, and intellectual history form the time of the Mongol conquest of China to the Sino-Japanese war. Focus on the evolution of the late imperial Chinese state and the "early modern" era in China.

HSTAS 454 History of Modern China (5) I&S Social, cultural, political, economic, and intellectual transformations and continuities in China from the end of the imperial period to the present. Offered: jointly with SIS 454.

HSTAS 457 Women in China to 1800 (5) I&S Gender in Chinese culture, women's situations in the patrilineal family system, and the ways women's situations changed as other dimensions of China's political system, economy, and culture changed from early times through the nineteenth century. Offered: jointly with WOMEN 457.

HSTAS 459 Gender Histories of Modern China, 18th to 20th Centuries (5) I&S Emergence of modernist social, political, intellectual gender formations in social activism, revolutionary writing, scientific ideologies, economic globalization. Stressess gender difference in colonial modernity, revolutionary movement, communism, post-socialist market society. Relates modern Chinese women to global flows, new division of labor, local and regional experience. Offered: jointly with WOMEN 459.

HSTAS 460 Cities in China: Past and Present (5) I&S Economic, political, social, and cultural functions of the city in modern Chinese history. Changes in China's urban system. The city as cultural center and focus of literary and cinematic representation. Attention to architecture, commerce, urbanization, the role of capital cities in the power of the state. Offered: jointly with SIS 460.

HSTAS 462 Southeast Asian History to 1800 (5) I&S Absorption and modification of cultures (Indian and Chinese), religions (Islam, Buddhism, Catholicism), and peoples (northern European) by island- and mainland-Southeast Asians. Main themes are cultural contact and the growth of states and peoples.

HSTAS 463 Southeast Asian History from 1800 to the Present (5) I&S Post-eighteenth-century history of the present countries of Burma, Thailand, Cambodia, Laos, Vietnam, Malaysia, Singapore, Brunei, Indonesia, and the Philippines. Deals with colonial rule, emerging nationalism, and political independence. Investigates broad themes of social, economic, and cultural history.
I&S 466 Islam, Mysticism, Politics and Performance in Indonesian Culture (5) VLPA/ I&S Examine how Indonesia, the world’s fourth most-populous country, with the largest Islamic population, weaves together local practices and influences from India and Persia. Offers ways of understanding modern Indonesian performing arts, religion, and politics. Offered: jointly with SISEA 446.

HSTAS 481 History of Traditional Korea: Earliest Times to the Nineteenth Century (5) I&S Korean history from earliest times to the modern period. Offered: jointly with SISEA 490.

HSTAS 482 History of Modern Korea: 1860 to the Present (5) I&S Traditional institutions and society, Japanese colonial rule, liberation and the Korean War, early Korean communist movement, and North Korea and South Korea since 1945. Offered: jointly with SISEA 490.

HSTAS 490 Topics in Asian History (5, max. 10) I&S Prerequisite: permission of instructor.

HSTAS 502 Seminar: History of India (3-6, max. 12) Seminar on selected topics and problems in the history of medieval and modern India. Prerequisite: HSTAS 501 and permission of instructor.

HSTAS 503 Seminar: History of India (3-6, max. 12) Seminar on selected topics and problems in the history of medieval and modern India. Prerequisite: HSTAS 501 and permission of instructor.

HSTAS 520 Premodern Japanese History (5) Field course; Japanese history prior to 1868. Prerequisite: HSTAS 421 and HSTAS 422, or SISEA 441 and SISEA 541, or permission of instructor.

HSTAS 521 Modern Japanese History (3-6, max. 6) Field course. Prerequisite: HSTAS 422, HSTAS 423, or permission of instructor.

HSTAS 523 Seminar in Modern Japanese History (3-6, max. 12) HSTAS 524 Seminar in Modern Japanese History (3-6, max. 12) Offered: jointly with SISEA 524.

HSTAS 530 Field Course in Southeast Asian History (5) Introduction to major English-language works on Southeast Asian history and to the major historiographical issues of the era. Offered: jointly with SISEA 530.

HSTAS 532 Seminar in Southeast Asian History (5) Selected topics in Southeast Asian history and historiography. Preparation for theses and doctoral dissertations on Southeast Asian History.

HSTAS 534 Indonesian Histories, Oral Traditions, and Archives (5) Explores the inscription of Indonesian histories and stories. Focuses on oral traditions, oral testimonies, and archives. Investigates how oral and written testimonies enter historical archives. Explores the theoretical work on literature and performance traditions as they relate to nationalism and Islam in Indonesia. Offered: jointly with SISEA 534.

HSTAS 541 Economic and Social History of Japan to 1800 (5) Analyses of landholding systems, the rise of commerce, demographic changes, urbanization, early industrialization, and social change. Prerequisite: previous course work in Japanese history or economic history, or permission of instructor. Not open to students who have taken HSTAS 441. Offered: jointly with SISEA 541.

HSTAS 546 Gender and Colonialism in Eastern Asia (5) Economic-political colonialization, post-colonialism, and statist-gendered citizenship; intra-Asian subperimperialism structuring domestic production, family, and gendered subjectivities; humanism and the New Woman; modern contests over new masculinity and new femininities; and the effect of war, imperialist occupation and colonial modernity on interregional flows of ideas, labor, capital, and jurisprudence. Offered: jointly with WOMEN 546; AWS/P.

HSTAS 547 Gender and the New International Division of Labor in Asia Pacific (5) Shift of the dynamic relation of gender, state, and citizens from modernization (national development) to globalization (intra-regional development) strategies in Pacific Asia, 1945 to present. Consumption, service provision, migratory labor, intra-Asian investment, localization. Offered: jointly with WOMEN 547.

HSTAS 551 Field Course in Chinese History: Pre-Sung Period (3-6, max. 6) Ebrey Introduction to the English-language literature on Chinese history through the Song dynasty. Recommended: HSTAS 452 or equivalent.

HSTAS 552 Seminar in Chinese History: Earliest Times to 1276 (3-6, max. 12) Ebrey Methods and materials for research in early imperial Chinese history. Prerequisite: reading knowledge of classical Chinese. Recommended: HSTAS 452, HSTAS 550, or HSTAS 551, or equivalent.

HSTAS 553 Seminar in Chinese History: Earliest Times to 1276 (3-6, max. 12) Ebrey Methods and materials for research in early imperial Chinese history. Prerequisite: reading knowledge of classical Chinese. Recommended: HSTAS 452, HSTAS 550, or HSTAS 551, or equivalent.

HSTAS 555 Seminar in Chinese History: Modern Period (-5) Dong Materials and methods for research in modern Chinese history. Prerequisite: knowledge of Chinese and permission of instructor.

HSTAS 557 Seminar in Chinese History: Modern Period (-3-6, max. 12) Research seminar in modern Chinese history. Training in the materials and methods of research, and preparation of extended research papers. Prerequisite: HSTAS 571-572 or permission of instructor and reading knowledge of Chinese.

HSTAS 559 Modern Chinese History (5) Introduction to the major English-language literature on modern Chinese history and to the major historiographical issues of the period. Prerequisite: HSTAS 454 or equivalent, and permission of instructor. Offered: jointly with SISEA 559.

HSTAS 564 Seminar in Chinese History: 1268-1895 (-3-6, max. 12) Guy Materials and methods for research in imperial Chinese history. Prerequisite: reading knowledge of Chinese. Recommended: HSTAS 453, HSTAS 560, HSTAS 561, or equivalent.

HSTAS 566 Seminar in Chinese History: 1268-1895 (-3-6, max. 12) Guy Materials and methods for research in imperial Chinese history. Prerequisite: reading knowledge of Chinese. Recommended: HSTAS 453, HSTAS 560, HSTAS 561, or equivalent.

HSTAS 568 Seminar in Twentieth Century Chinese History (3-6, max. 12) Dong Materials and methods for research in twentieth-century Chinese history. Prerequisite: knowledge of Chinese and permission of instructor.

HSTAS 574 Seminar in Twentieth Century Chinese History (3-6, max. 12) Dong Materials and methods for research in twentieth-century Chinese history. Prerequisite: knowledge of Chinese and permission of instructor.

HSTAS 575 Seminar in Chinese History: Modern Period (-3-6, max. 12) Research seminar in modern Chinese history. Training in the materials and methods of research, and preparation of extended research papers. Prerequisite: HSTAS 571-572 or permission of instructor and reading knowledge of Chinese.

HSTAS 579 Modern Chinese History (5) Introduction to the major English-language literature on modern Chinese history and to the major historiographical issues of the period. Prerequisite: HSTAS 454 or equivalent, and permission of instructor. Offered: jointly with SISEA 579.

HSTAS 581 Modern Korean History (3-6, max. 6) Field course. Prerequisite: permission of instructor.

HSTAS 582 Seminar in Korean History (3-6, max. 12) Selected topics in Korean history and historiography.

HSTAS 583 Seminar in Korean History (3-6, max. 12) Selected topics in Korean history and historiography.

HSTAS 584 Seminar in Korean History (3-6, max. 12) Selected topics in Korean history and historiography.

HSTAS 590 Topics in History (5, max. 15) Seminar on selected topics in general history, with special emphasis on preparation for field examinations. Topics vary according to interests of students and instructor.

History of the Americas

HSTAA 101 Survey of the History of the United States (5) I&S Supplies the knowledge of American history that any intelligent and
educated American citizen should have. Objective is to make the student aware of his or her heritage of the past and more intelligently conscious of the present.

HSTAA 105 The Peoples of the United States (5) I&S Surveys American diversity since 1500. Reviews American history through conquest and immigration by Native Americans, Europeans, Africans, Asians, and Latin Americans. Contributions of various peoples and the conflicts between them, with special attention to changing constructions of race and ethnicity and evolving understandings of what it means to be American.

HSTAA 150 Introduction to African-American History (5) I&S Introductory survey of topics and problems in African-American history with some attention to Africa as well as to America. Provides some general knowledge and serves as a basic introductory course for a sequence of lecture courses and seminars in Afro-American history. Offered: jointly with AFRAM 150.

HSTAA 185 Introduction to Latin American History: From Columbus to Castro (5) I&S Survey of political, economic, and social history of Latin America from the Iberian conquest to the present. Lectures, discussions, and films focus on changing understanding of Latin America's current problems through study of their historical roots. Designed for the beginning student and the nonspecialist.

HSTAA 202 Makers of American Foreign Policy, 1776 to the Present (5) I&S Survey of the history of American foreign relations. Focus on the individuals responsible for initiating new foreign policies or for realligning old ones.

HSTAA 205 Asian American History (5) I&S Introductory history of Asian Indians, Chinese, Filipinos, Japanese and Koreans in the United States from the 1840s to the 1960s. Major themes include imperialism, labor migration, racism, community formation, and resistance.

HSTAA 212 The Military History of the United States From Colonial Times to the Present (5) I&S Development of American military policies, organizational patterns, tactics, and weaponry, from beginnings as a seventeenth-century frontier defense force to the global conflicts and military commitments of the twentieth century. Interaction and tension between need for an effective military force and concept of civilian control of that force.

HSTAA 215 American South from the Revolution through the Civil War (5) I&S Kleit Explores the history of the American South from the American Revolution through the Civil War, from a successful revolution to one that met defeat. Attention given to the diversity of people and changes over space and time. Offered: Sp.

HSTAA 221 Environmental History of the U.S. (5) I&S Survey of the relationship between nature and human history, including the impact of the non-human environment on American history and the environmental effects of colonization, urbanization, and consumerism; the cultural construction of nature in different eras and its social implications; the sources and limits of modern environmental politics.

HSTAA 225 African-American Slavery (5) I&S Explores the making of African slavery from beginnings on the African coast to the plantations of the southern United States. Includes slave life, proslavery thought, slave management, representa-
sixties. Includes politics of confrontation and civil disobedience, economics of “guns and butter,” literature of conflict and angst, polarization of arts, transformation of race relations, role of Rock, and influence of domestic politics on foreign relations. Recommended: AFRAM 270. Offered: jointly with AFRAM 334.

HSTAA 336 American Jewish History Since 1885 (5) I&S Political, social, economic, religious history of American Jewish community from great eastern European migration to present. Integration of immigrant community into general American community; rise of nativism; development of American socialism; World War I and II; and American Jewish response to these events. Offered: jointly with SISJE 336.

HSTAA 338 The United States and Vietnam (5) I&S American involvement in Vietnam, including: the complex of negotiations; strategies and objectives of both sides; military, political, and economic operations of the United States; efforts at pacification; impact of Vietnam on American affairs.

HSTAA 353 Class and Labor in American History (5) I&S The history of workers and class formation form early industrialization to the present. Emphasizes the interaction of class with race, ethnicity, gender, and political culture within the context of American economic development. Explores the role of unions, labor politics, and radical movements.

HSTAA 365 The History of the American Film (5) I&S VLPA Examines relationship between film and American social and cultural history. Considers films as products of specific periods, individual filmmakers, and developments within film industry. Examines representations of political and social issues on the screen, impact of movies on our understanding of the past, and significance of genres and visual styles.

HSTAA 370 Consumer Culture in Twentieth Century America (5) I&S Studies the American attempt to create, sustain, and organize the world’s first consumer-oriented industrial society. Topics to be considered include: the economy of mass consumption, how a culture of consumption was created, and the ideas of social critics who have rejected consumerism.

HSTAA 371 Consumption and Consumerism in the Modern U.S. (5) I&S Surveys the rise of consumer society in the late-nineteenth and twentieth-century United States including theories of consumption, the experience of consumer culture by different social groups, the role of the state in fostering consumption, the material impacts of consumer society in the U.S. and beyond, and critiques of consumerism.

HSTAA 373 Social History of American Women to 1890 (5) I&S A multi-racial, multicultural study of women in the United States from the 17th century to 1890 emphasizing women’s unpaid work, participation in the paid labor force, charitable and reform activities, and 19th century social movements. Uses primary materials such as diaries, letters, speeches, and artifacts. Offered: jointly with WOMEN 383.

HSTAA 374 Social History of American Women in the 20th Century (5) I&S Analyzes major themes in the history of women in North America from 1890 through the 1990s. Themes include family and community formation, social activism, education, paid and unpaid labor patterns, war, migration, and changing conceptions of womanhood and femininity in the 20th century. Offered: jointly with WOMEN 384.

HSTAA 377 History of Canada (5) I&S General survey and analysis of political, economic, social, and cultural aspects of Canadian history from the foundation of New France to present; Canadian-American relations, the rise of Quebec nationalism, and the development of the Canadian West. Offered: jointly with SISCA 377.

HSTAA 384 Latin America: Inter-American and Intra-Continental Relations (5) I&S Inter-American relations, focusing on the United States’ diplomatic and military responses to the problems of Latin America since 1776. Intra-Latin American relations and regional organizations (e.g., the Organization of American States).

HSTAA 385 Colonial Society and the Negotiation of Rule in Latin America and the Caribbean (5) I&S Examines the transition to Spanish and Portuguese rule in Latin America and the establishment, and eventual demise, of colonial systems within Latin America to Europe and Africa. Asks how “colonized” groups mediated forms of colonial oppression and contributed to the development of colonial political culture.

HSTAA 386 The Challenges of Post-Coloniality in Latin America and the Caribbean (5) I&S Explores the legacies of, and ruptures from, colonialism and the new challenges Latin American and Caribbean peoples faced throughout the years after their struggles for independence from direct European rule. Emphasis on analysis of the negotiations and challenges entailed in the dynamic processes of national state formation in comparative perspective.

HSTAA 401 American Revolution and Confederation (5) I&S Causes of separation of the United States from the British empire; political theory of the Revolution; its military history; diplomacy of the Revolution; the Revolution as a social movement; intellectual aspects; readjustment after independence; the formation of the American union; the Constitution.

HSTAA 404 New England: From the Foundings to the Civil War (5) I&S New England from colonial beginnings to the region’s emergence to national leadership in the mid-nineteenth century. Emphasis on Puritanism, the New England town, adjustment to empire, revolution and constitution making, the growth of party, abolitionism, the flowering of a regional culture, and the personalities who embodied these key themes and periods.

HSTAA 406 Asian American Activism (5) I&S Explores the multiple political traditions forged by Asian Americans, from the earliest challenges to racist laws and unequal wages to the latest debates over affirmative action and racial profiling. Examines Asian American communities organized to oppose and to perpetuate social inequalities. Offered: jointly with AAS 406.

HSTAA 407 Andrew Jackson’s United States (5) I&S In-depth examination of the U.S. from 1820 to 1850, including changes which affected American politics, society, and culture.

HSTAA 409 American Social History: The Early Years (5) I&S Survey of American society and institutions from the colonial era through the Civil War, with special attention to reform, labor, immigration, education, law enforcement and the city.

HSTAA 410 American Social History: The Modern Era (5) I&S Survey of American society and institutions from Reconstruction to the present with special attention to reform, poverty, social mobility, immigrant and ethnic groups, the city and law enforcement.

HSTAA 411 The United States During the Era of Civil War and Reconstruction (5) I&S Conflicting interests, ideologies, and ways of life in the United States from the 1840s to the 1870s.

HSTAA 412 The Westward Movement, 1700-1850 (5) I&S Anglo-American advance into interior of continental United States culminating in occupation of Far West. Rivalry with New France and New Spain in colonial period; role of federal government in westward expansion; land policy and land distribution; migration, settlement, and the pioneer experience; federal Indian policies and implementation; political evolution, urbanization, and economic development of trans-Appalachian West; shaping of national character and institutions.

HSTAA 413 History of the Trans-Mississippi West (5) I&S Anglo-American exploration, conquest, occupation, and exploitation of the trans-Mississippi West, with emphasis on economic development into the twentieth century. Considers wide range of developmental themes (social, political, cultural) in historiography of American West.

HSTAA 414 The Canadian West, 1670-1990 (5) I&S Examines the history of colonization and settlement of Canada’s four westernmost provinces with emphasis on their economic, social, and Native history.

HSTAA 415 History of Indian-White Relations in Anglo-America (5) I&S Explores the wide variety of interactions in North America, ranging from close alliances to outright warfare, between Native Americans and Europeans and their descendants from contact through the removal of most of the remaining eastern Indians to land west of the Mississippi River during the 1830s.

HSTAA 417 Indians in Western Washington History (5) I&S Relations of Indians and non-Indians in the Puget Sound region, from the 1790s to the present, with emphasis on evolving ideas about Indian identity. Offered: jointly with AIS 425.

HSTAA 426 American Urban History Since 1870 (3/5) I&S Development of American cities for the past century. Topics include physical development, immigration, politics, and changes in society and culture.

HSTAA 431 American Politics and Society Since 1920 (5) I&S Political, social, economic, and intellectual developments in the United States from 1920 to the present.

HSTAA 432 History of Washington and the Pacific Northwest (5) I&S Exploration and settlement, economic development, growth of government and social institutions; statehood.

HSTAA 433 A Documentary History of Pacific Northwest Identity (5) I&S Findlay Considers cultural construction of Pacific Northwest region
through more than two centuries of narratives, including Native American stories; travel literature from early explorers to modern tourists; accounts by newcomers from pioneer to modern era; aggressive regionalism of 1890-1945; Northwest literature of the post-war period. Offered: S.

HSTAA 446 American Indian Economic History (5) I&S Surveys and analyzes the history of American Indians’ economic challenges and strategies. Topics include the economic cultures of Indigenous North American societies, the impacts of European colonization and U.S. government policies, and tribal strategies aimed at improving Indians’ economic circumstances. Offered: jointly with AIS 446.

HSTAA 454 The Intellectual History of the United States (5) I&S/VLPA Lectures and discussions devoted to the development of the American mind, from historical beginnings to the present.

HSTAA 462 Diplomatic History of the United States, 1901-Present (5) I&S Foreign policy of the United States government during the twentieth century. International wars and the other major episodes in diplomacy are emphasized.

HSTAA 473 Homefront: American Cultures and Society in the 1940s (5) I&S An exploration of the impact of WWII on American culture and social thought. Topics include the effects of war on civil liberties and civil rights, the uses of nationalism, patriotism, and racial ideology, the interment of Japanese-Americans, responses to the Holocaust, and the effects of war on social life.

HSTAA 480 Labor and Popular Movements in Latin America (5) I&S Interdisciplinary approach to origins and trajectory of labor movement from late nineteenth century to present. Emphasis in contemporary period on popular movements, including neighborhood associations, religious base communities, women’s movement, and ethnic mobilization for democratic social and political reform. Recommended: two non-English-language Latin American studies courses. Offered: jointly with SISLA 480.

Analyzes historically why modern forms of peasant and indigenous political power differs radically between Peru, Bolivia, and Ecuador.

HSTAA 482 The History of Brazil: Colonial Period to the Present (5) I&S Colonial foundations; the first and second empires; the old and new republics; current problems; prospects for the future.

HSTAA 487 History of Mexico: 1822 to the Present (5) I&S Political, social, and economic history of Mexico from its independence from Spain to the present.
HSTAA 581 Latin American History: Colonial Period (3-6, max. 6)
HSTAA 582 Latin American History: National Period (3-6, max. 6)
HSTAA 583 Seminar in Latin American History (3-6, max. 12) - Problems of historical research in the history of Latin America from colonial beginnings to the present.
HSTAA 584 Seminar in Latin American History (3-6, max. 12) - Problems of historical research in the history of Latin America from colonial beginnings to the present.
HSTAA 585 Seminar in Latin American History (3-6, max. 12) - Problems of historical research in the history of Latin America from colonial beginnings to the present.
HSTAA 586 Seminar in Comparative Colonial History (3-6, max. 12)
HSTAA 587 Seminar in Comparative Colonial History (3-6, max. 12)
HSTAA 590 Topics in American History (5, max. 15) - Seminar on selected topics in American history, with special emphasis on preparation for field examinations. Topics vary according to interests of students and instructor.

Modern European History

HSTEU 210 Paris (5) VLPA/I&S - Provides an introduction to the history, art, architecture, politics, and literature of the City of Light.
HSTEU 211 France: A Portrait (5) I&S - Thematic approach to the history of France. Abandons the conventional chronological format in favor of a constellation of topics and themes — architecture, science, sex, cities, barricades, etc. — that, taken together and in historical perspective, make up a portrait of France.
HSTEU 220 Introduction to East European Studies (5) I&S - Introduction to the history of post-1945 Eastern Europe focusing on political, economic, social, cultural, and diplomatic issues. Countries surveyed include Albania, Bulgaria, Czechoslovakia, Hungary, Poland, Romania, and Yugoslavia. Offered: jointly with EURO 220.
HSTEU 250 Rome (5) I&S/VLPA - Focuses on Rome as an historical, intellectual, and artistic world center. Literary and historic documents, visual arts, architecture, film, and opera used to explore the changing paradigms of the Eternal City. In English. Offered: jointly with ART H 250/ITAL 250.
HSTEU 273 Women and Gender in Modern Europe (5) I&S - Examines European women's changing social role and competing views of femininity from the Enlightenment to the end of the cold war. Special focus on the relationship of gender and politics and on the female body in bourgeois society, industrialization, imperialism, the welfare state, fascism, and the cold war.
HSTEU 274 Twentieth Century Europe (5) I&S - Introduction to themes in 20th-century European history (1890s-1990s), including the histories of fascism, war, communism, decolonization, and the fate of Europe under the European Union.
HSTEU 275 Life in England (5) I&S - Social history of England from the Norman conquest to the present, seen through letters, autobiographies, novels, and plays of the time. Life of the ordinary inhabitant-in the village and the manor house.
HSTEU 290 Topics in European History (5, max. 10) I&S - Examines special topics in European history.
HSTEU 301 Early Modern European History: 1450-1648 (5) I&S - Political, social, economic, and cultural history from the late Renaissance to the Peace of Westphalia.
HSTEU 302 Modern European History: 1648-1815 (5) I&S - Political, social, economic, and cultural history from the Peace of Westphalia to the fall of Napoleon.
HSTEU 303 Contemporary European History Since 1815 (5) I&S - Political, social, economic, and cultural history from the fall of Napoleon to the present.
HSTEU 304 Cultural History of Renaissance Europe (5) I&S/VLPA - Examination of Medicean Florence, late sixteenth-century France, Elizabethan England, and the baroque courts of the early seventeenth century as cultural centers. Includes analysis of painters such as Botticelli and Rubens; poets such as Ronsard and Donne; philosophers such as Pico and Montaigne; and playwrights such as Marlowe, Shakespeare and Lope de Vega.
HSTEU 305 European Witch Trials (5) I&S - Witchcraft and magical beliefs in Europe considered as a problem in intellectual, social, and legal history. Medieval background, systematicatization of witchcraft theory in fifteenth century; comparison of learned and popular beliefs; mechanisms of witch trials and inquisitorial procedure; the Faust legend; growth of skepticism and decline of witchcraft in seventeenth century.
HSTEU 323 France Since 1814 (5) I&S - Political, economic, and social history since the Congress of Vienna. Special emphasis upon the continuity of the revolutionary tradition.
HSTEU 334 Germany 1871-1989 (5) I&S - Society and politics from Germany's first unification to its reunification; domestic and foreign policy; political, economic, social, and cultural developments; high emphasis on German society's self-perception and on the variety of interpretations of this period's history. Offered: by different "schools" of historians.
HSTEU 361 Spain and Its Golden Age, 1469-1700 (5) I&S - History and culture of Spain and its empire from the late Middle Ages through the seventeenth century.
HSTEU 364 Modern Greece: 1821 to the Present (5) I&S - Politics and society of Greece from War of Independence to the present: Emergence and development of the Greek state; Greece in the world wars; civil war and post-war politics; military dictatorship; transition to democracy; recent developments. No prior study of Greece assumed. Offered: jointly with EURO 364.
HSTEU 368 Modern European Jewish History (5) I&S - Surveys European Jewish history from the Spanish expulsions (1492) to World War I (1914). Considers diversity of European Jewries and the factors that cohered them. Examines how European Jewries ordered their lives, shaped gender and class norms, and interacted with the societies in which they lived. Offered: jointly with SISJE 368.
HSTEU 376 Modern Irish History (5) I&S - Political and social history from 1800 to the present; the Irish Question after the Act of Union; development of Irish nationalism in the Home Rule and Sinn Fein periods; the Irish Free State and Northern Ireland since 1921; current problems in Northern Ireland.
HSTEU 378 The Making of Contemporary France (5) I&S - Historical origins and subsequent development of nine contemporary problems and characteristics of French government and politics, economy, and society.
HSTEU 380 History of Scandinavia to 1720 (5) I&S - Scandinavian history from the Viking Age to 1720, with an emphasis on the political, social, and economic development of Denmark, Norway, Sweden, Finland, and Iceland from the Middle Ages to the Enlightenment. Offered: jointly with SCAND 380.
HSTEU 381 History of Scandinavia Since 1720 (5) I&S - Scandinavian history from the Enlightenment to the Welfare State with emphasis on the political, social, and economic development of the modern Scandinavian nations of Denmark, Norway, Sweden, Finland, and Iceland. Offered: jointly with SCAND 381.
HSTEU 401 The Italian Renaissance: (5) I&S - Conditions of Renaissance culture: Italian republics and despots, humanism, the classical ideal of the arts, Machiavelli and the foundations of modern political thought; the end of an era.
HSTEU 402 The Reformation (5) I&S - Origins of the disunity of Europe in the crisis of the sixteenth century with emphasis on the relations between religion and politics.
HSTEU 406 European Intellectual History: Nineteenth Century (5) I&S/VLPA - Selected topics in intellectual history up to 1890. The philosophical consequences of the French Revolution, the development of idealism, conservatism, romanticism, and early socialist theory; positivism, the problems of historicism, new forms of Christian apologetics, utilitarianism in decline, liberalism as philosophy, the early Marx.
HSTEU 407 European Intellectual History: Twentieth Century (5) I&S/VLPA - Selected topics in the intellectual history of the late nineteenth and early twentieth centuries. The aftermath of Darwinism, the problems of motion in modern social science, historicism and moral relativism, irrationalism in philosophy and social theory, revisionism in secular and orthodox religions.
HSTEU 411 Europe: 1814-70 (5) I&S Development of Europe during the age of Metternich, the revolutions of 1848, and the emergence of new national states.

HSTEU 412 Europe in the Age of the Masses: 1870-1914 (5) I&S Impact of population increase and technological change on European society; stresses and strains in European life and outlook.

HSTEU 413 Europe: 1914-45 (5) I&S Politics and society of Europe in the age of the concentration camp.

HSTEU 414 Europe Since 1945 (5) I&S Political, economic, and military developments in Europe under the impact of the Cold War.

HSTEU 415 Europe in the Second World War (5) I&S Inquiry to discover what the war of 1939-45 was about and what it did to more than five hundred million Europeans.

HSTEU 422 The French Revolution and Napoleon: 1789-1815 (5) I&S Transformation of France under the Revolution of 1789; the Reign of Terror and Napoleon; the impact of the revolution and Napoleon upon Europe.

HSTEU 432 Germany: 1914-1945 (5) I&S Politics and society from the collapse of the Bismarckian empire to the collapse of Hitler's empire.

HSTEU 435 World War I (5) I&S European society on the eve of the war. War experience of the Europeans. Long term consequences of the war on European social, political, and economic institutions. Impact of the war on non-European world. The war in European literature.

HSTEU 440 History of Communism (5) I&S Communism from its origins in the Bolshevik faction of Russian social democracy to the present, treating the development of the ideology, the various communist parties, and the communist states. Recommended: two history or politics of Europe courses. Offered: jointly with SIS 440.

HSTEU 444 Imperial Russia: 1700-1900 (5) I&S Development of Russia from Peter the Great to Nicholas II. Offered: jointly with SISRE 444.

HSTEU 445 Twentieth-Century Russia (5) I&S Russia and the USSR from Nicholas II to the present. Offered: jointly with SISRE 448.

HSTEU 451 East-Central Europe Since 1342 (5) I&S Explores the history of the lands and peoples of East Central Europe (Poles, Czechs, Slovaks, and Hungarians).

HSTEU 452 Eastern Europe Since 1918 (5) I&S Poland, Czechoslovakia, Hungary, Romania, Yugoslavia, Bulgaria, and Albania, from the end of World War I to the present.

HSTEU 453 History of the Balkans, 1400 to the Present (5) I&S Centuries of Ottoman rule that produced a new basis for the reemergence of independent states in the nineteenth and twentieth centuries; history of these new states until the present.

HSTEU 454 Baltic History (5) I&S Overview of the history of the area occupied by the Baltic countries of Latvia, Lithuania, and Estonia. Emphasizes their emergence as modern European nation-states. Era from World War I to present treated in depth, including the historical role and present situation of non-Baltic peoples, particularly Russians. Offered: jointly with SCAND 454.

HSTEU 465 The Jews of Eastern Europe (5) I&S Jewish society in Poland, Russia, the Hapsburg Lands, and Romania from the late Middle Ages to the Holocaust. Offered: jointly with SISJE 465.

HSTEU 466 The Sephardic Diaspora: 1492-Present (5) I&S Examines the history and culture of Sephardic Jewry from the expulsion from the Iberian Peninsula in 1492 to the present. Explores the creation of Sephardic communities in the Dutch and Ottoman Empires, Western Europe, the Americas, and Africa, and the history of the conversos and "hidden Jews." Offered: jointly with SISJE 466.

HSTEU 470 The Jacobethan Age: England 1580-1630 (5) I&S Emphasis on arts and society instead of the traditional kings, battles, and politics; the way people at all levels of society lived, in towns and in the countryside, within the bounds of the royal court or outside in the political wilderness. Classes on poetry, drama, music, architecture, painting, interior decoration, and some of the minor arts, as well as on demography and some of the traditional historical subjects. Not open for credit to students who have taken 471 or 472.

HSTEU 471 England in the Sixteenth Century (5) I&S Political, administrative, and social history from Henry VII to Elizabeth I, with emphasis on the Reformation and its effects and on conditions of life in Elizabethan England. Not open to students who have taken 470.

HSTEU 472 England in the Seventeenth Century (5) I&S Political, administrative, and social history from the accession of James I to the Glorious Revolution. Not open to students who have taken 470.

HSTEU 474 England in the Nineteenth Century (5) I&S Political, social, and cultural development; the agrarian, industrial, and French revolutions; the rise of parliamentary democracy; the Victorian age; political thought from utilitarianism to Fabianism; Irish home rule.

HSTEU 475 England in the Twentieth Century (5) I&S From the Boer War to the present; conservatism, liberalism, and socialism; England in two world wars; the decline of British imperialism.

HSTEU 482 Fascism in Europe (5) I&S History of the fascist era in modern Europe from 1919 to 1945. A study of the principal examples of national fascism and fascist-like movements coupled with a general theoretical consideration of the phenomenon.

HSTEU 484 Colonial Encounters (5) I&S History of European colonialism from the 1750s to the present, with an emphasis on British and French colonial encounters. Offered jointly with CHID 484.

HSTEU 490 Topics in European History (5, max. 10) I&S Examines special topics in European history.

HSTEU 501 Renaissance Field Course (3-6, max. 6) Topics in the cultural, political, and social history of the Renaissance era.

HSTEU 502 Reformation Field Course (3-6, max. 6) Topics in the religious, political, and social history of the Reformation era.

HSTEU 505 Early Modern European History (3-6, max. 18) Select topics in early modern European history. Topics vary from quarter to quarter. Prerequisite: permission of instructor.

HSTEU 510 Core Seminar in the History of Modern Europe (5) An introduction to historiographical classics and exemplary new works in the various fields of modern European history. Members of the seminar choose research topics and present the results of their research to the seminar.

HSTEU 511 Core Seminar in the History of Modern Europe (5) An introduction to historiographical classics and exemplary new works in the various fields of modern European history. Members of the seminar choose research topics and present the results of their research to the seminar.

HSTEU 512 Core Seminar in the History of Modern Europe (5) An introduction to historiographical classics and exemplary new works in the various fields of modern European history. Members of the seminar choose research topics and present the results of their research to the seminar.

HSTEU 513 Europe and the Modern World (5) Provides an acquaintance with some of the themes, problems, and events in the history of modern Europe, including Europe's larger global engagements. Offers foundation for advanced thematic or regional study, a basis for comparative historical study within Europe and beyond, and preparation for teaching entry-level and advanced undergraduate surveys.

HSTEU 515 Modern European Intellectual History (3-6, max. 6)

HSTEU 516 Seminar: European Intellectual History (3-6, max. 6)

HSTEU 517 Seminar: European Intellectual History (3-6, max. 6)

HSTEU 521 Modern European History: France (3-6, max. 6)

HSTEU 522 Seminar in French History (3-6, max. 12)

HSTEU 523 Seminar in French History (3-6, max. 12)

HSTEU 524 Seminar in French History (3-6, max. 12)

HSTEU 531 Modern European History: Germany (3-6, max. 6)

HSTEU 532 Seminar in Modern European History: Germany (3-6, max. 12)

HSTEU 533 Seminar in Modern European History: Germany (3-6, max. 12)

HSTEU 534 Seminar in Modern European History: Germany (3-6, max. 12)

HSTEU 544 Modern Russian History (3-6, max. 6)
HSTEU 545 Seminar in Modern Russian History ([3-6, max. 12]) Prerequisite: reading knowledge of Russian and either French or German.

HSTEU 546 Seminar in Modern Russian History ([3-6, max. 12]) Prerequisite: reading knowledge of Russian and either French or German.

HSTEU 547 Seminar in Modern Russian History ([3-6, max. 12]) Prerequisite: reading knowledge of Russian and either French or German.

HSTEU 548 Field Course in Soviet History (3-6, max. 6) Specialized course for graduate history students in the scholarly literature of Russian history since 1917. Intended for graduate students preparing for MA or Ph.D. field examination in Russian history of the Soviet period.

HSTEU 551 History of Eastern Europe: 1772-1939 (5) Study of the east-central European region: Poland, Czechoslovakia, Hungary, Romania, and the Balkan countries, from their rebirth to World War II. Prerequisite: reading knowledge of German, French, Russian, or one East European language.

HSTEU 552 History of Eastern Europe: 1939 to the Present (5) Prerequisite: reading knowledge of one major European or one East European language.

HSTEU 553 Seminar in Modern East European History ([3-6, max. 6]) Study and research involving special methods dealing with the histories of the East European countries in the modern period.

HSTEU 554 Seminar in Modern East European History ([3-6, max. 6]) Study and research involving special methods dealing with the histories of the East European countries in the modern period.

HSTEU 555 Seminar in Modern East European History ([3-6, max. 6]) Study and research involving special methods dealing with the histories of the East European countries in the modern period.

HSTEU 571 English History: Tudor and Stuart (3-6, max. 6)

HSTEU 572 English History (3-6, max. 6)

HSTEU 573 Seminar in Modern English History ([3-6, max. 6])

HSTEU 574 Seminar in Modern English History ([3-6, max. 6])

HSTEU 575 Seminar in Tudor-Stuart History ([3-6, max. 12]) History of England under the Tudors and the Stuarts. Prerequisite: HSTEU 571 or permission of instructor.

HSTEU 576 Seminar in Tudor-Stuart History ([3-6, max. 12]) History of England under the Tudors and the Stuarts. Prerequisite: HSTEU 571 or permission of instructor.

HSTEU 580 Topics in History (5, max. 15) Seminar on selected topics in general history, with special emphasis on preparation for field examinations. Topics vary according to interests of students and instructor.

History and Philosophy of Science

HPS 210 Issues in the History and Philosophy of Science (5) I&S Examination of selected topics in the history and philosophy of science at the introductory level. Taught by UW faculty and visiting scholars.

HPS 400 Colloquium in the History and Philosophy of Science (5) I&S/NW Examines issues from the perspectives of both history and philosophy. Prerequisite: either HIST 311, HIST 312, HIST 313, HIST 314, HIST 315, HIST 317, HIST 318, or HIST 412; either PHIL 350, PHIL 360, PHIL 420, PHIL 460, PHIL 464, PHIL 466, PHIL 473, PHIL 481, PHIL 482, or PHIL 483.

Honors — Arts and Sciences

H & S 100 Honors at the UW? Knowledge Across the Disciplines (1) Showcases a wide range of interdisciplinary disciplines, research, faculty, and experimental opportunities at the UW. Topics and approaches vary.

H & S 220 Science for Honors Students I (5, max. 10) Evolution of an idea or concept central to the natural sciences. Intended for non-science majors. Content varies from year to year. For university honors students only. Offered: A.

H & S 221 Science for Honors Students II (5, max. 10) Evolution of an idea or concept central to the natural sciences. Intended for non-science majors. Content varies from year to year. For university honors students only. Offered: W.

H & S 222 Science for Honors Students III (5, max. 10) Evolution of an idea or concept central to the natural sciences. Intended for non-science majors. Content varies from year to year. For university honors students only. Offered: W.

H & S 251 Western Civilization I (5, max. 10) I&S/VPRA Introduction to ideas and society in Western Civilization. For university honors students only. Offered: A.

H & S 252 Western Civilization II (5, max. 10) I&S/VPRA Introduction to ideas and society in Western Civilization. For university honors students only. Offered: W.

H & S 253 Western Civilization III (5, max. 10) I&S/VPRA Introduction to ideas and society in Western Civilization. For university honors students only. Offered: W.

H & S 261 World Civilization I (5, max. 10) I&S/VPRA Introduction to ideas and society of civilization other than the Western. Specific civilization (Chinese, Japanese, Middle Eastern, South Asian) differs from year to year and section to section. For university honors students only. Offered: A.

H & S 262 World Civilization II (5, max. 10) I&S/VPRA Introduction to ideas and society of civilization other than the Western. Specific civilization (Chinese, Japanese, Middle Eastern, South Asian) differs from year to year and section to section. For university honors students only. Offered: W.

H & S 263 World Civilization III (5, max. 10) I&S/VPRA Introduction to ideas and society of civilization other than the Western. Specific civilization (Chinese, Japanese, Middle Eastern, South Asian) differs from year to year and section to section. For university honors students only. Offered: Sp.

H & S 300 Introduction to the Professions (2-5, max. 15) Studies oriented toward professional work (law, medicine, public affairs). For university honors students only.

H & S 350 Honors Seminar (2, max. 20) Discussion of selected topics in a variety of subject-matter fields. Topics and reading material vary from year to year. For university honors students only. Credit/no credit only.

H & S 396 Interdisciplinary Special Topics—Natural Science (1-5, max. 10) NW Special courses drawn from interdisciplinary groups in the natural sciences. Content varies.

H & S 397 Interdisciplinary Special Topics—Social Science (1-5, max. 10) I&S Special courses drawn from interdisciplinary groups in the social sciences. Content varies.

H & S 398 Interdisciplinary Special Topics—Humanities (1-5, max. 10) NW Special courses drawn from interdisciplinary groups in the humanities. Content varies.

H & S 499 Honors Independent Study or Research (1-5, max. 10) Faculty supervised Honors independent study or research for students in areas extending beyond their major departments or along lines not otherwise accommodated by existing Honors courses. Honors students only.

International Studies

International Studies

SIS 103 Society and the Oceans (5) I&S/NW Explores the social and policy dimensions of the ocean environment and ocean management policy. Attention to how human values, institutions, culture, and history shape environmental issues and policy responses. Examines case studies and influential frameworks, such as the ocean as “tragedy of the commons”. Offered: jointly with SMA 103

SIS 123 Introduction to Globalization (5) I&S Sparke Provides an introduction to the debates over globalization. Focuses on the growth and intensification of global ties. Addresses the resulting inequalities and tensions, as well as the new opportunities for cultural and political exchange. Topics include government, finance, labor, culture, the environment, health, and activism. Offered: jointly with GEOG 123.

SIS 150 Israel: Dynamic Society and Global Flashpoint (5) I&S Barzilai, Migdal, Pianko, Sokoloff Introduces the people, institutions, and culture of Israel is the context of larger global forces. Examines domestic, regional, and international elements, both historically and in the contemporary period, that have shaped Israel’s culture, politics, and special role in world affairs. Topics include nationalism, ethnicity, politics, religion, film, literature, and culture. Offered: jointly with NEAR E 150.
SIS 200 States and Capitalism: The Origins of the Modern Global System (5) I&S Kasaba, Migdal, Ramamurthy. An introduction to the origins, development, and process of capitalism from the sixteenth century to the present. Prerequisite: either ECON 201, GEOG 123, or SIS 120 any of which may be taken concurrently. Offered: jointly with ENVR 360/SCAND 350.

SIS 202 Cultural Interactions in an Interdependent World (5) I&S Robinson, Sorensen, Warren, Wellman Cultural interaction among societies and civilizations, particularly Western and non-Western. Intellelctual, cultural, social, and artistic aspects; historical factors. Offered: Sp.

SIS 301 War (5) I&S Origins and conduct of war; readings from anthropology, political science, economics, and history, as well as novels and some recent works on the arms-control controversy. Modern forms of war, including guerrilla war, world war, and nuclear war. Offered: jointly with SOC 301.

SIS 302 Intercultural Relations (5) I&S/W Warren Perspectives on foreign cultures through literary example. Interdisciplinary approaches to the study of culture as such and problems of intercultural relations. Prerequisite: either one 200-level ANTH course, LNG 203 or SIS 202.

SIS 325 Immigration (5) I&S Friedman Introduces key theoretical debates in international migration. Examines immigrants' political, economic, religious, and social integration into host societies, and continued ties to homelands. Experiences of voluntary and involuntary immigrants, of the second generation, and of incorporation into America and Europe. Designed around interdisciplinary texts and fieldwork in Seattle.

SIS 330 Political Economy of Development (5) I&S Latsch, Poznanski Growth, income distribution, and economic development in less-developed countries today. Policies concerning trade, industrialization, the agricultural sector, human resources, and financing of development. Prerequisite: either ECON 201, GEOG 123 or SIS 120 any of which may be taken concurrently.

SIS 332 Political Economy of International Trade and Finance (5) I&S Poznanski Theoretical and historical analysis to explore the causes and effects of the rise and decline of four major international trade and monetary regimes. Foundations and emerging features of the new international trade and monetary regime and its implications for the world economy.

SIS 333 Gender and Globalization: Theory and Process (5) I&S Ramamurthy Theoretical, historical, and empirical analysis of how current processes of globalization are transforming the actual conditions of women's lives, labor, gender ideologies, and politics in complex and contradictory ways. Topics include feminist exploration of colonialism, capitalism, economic restructuring, domestic violence in consumer and environmental movements. Offered: jointly with WOMEN 333.

SIS 335 Geography of the Developing World (5) I&S Characteristics and causes, external and internal, of Third World development and obstacles to that development. Special attention to demographic and agricultural patterns, resource development, industrialization, and urbanization, drawing on specific case studies from Asia, Africa, and Latin America. Offered: jointly with GEOG 335.

SIS 337 Collective Violence and the State (5) I&S Comparative study of collective violence in modern states with emphasis on riots and pogroms. Readings include case materials drawn from Russian pogroms of the nineteenth and twentieth centuries, Hindu-Muslim riots in modern India, and race riots in the United States and Great Britain. Offered: jointly with POL S 337.

SIS 342 Social Theory in International Context (5) I&S Comparative, historical introduction to the foundations of modern social theory in the work of Max Weber, Sigmund Freud, and Claude Levi-Strauss. Focus on tensions between universalist claims, European origins, and non-European applications of models of cultural formation and development.

SIS 344 Migration in the Global Economy (5) I&S Mitchell Analyzes the relationship between human mobility in the late 20th century and changes in the global economy. Allows the student to gain familiarity with scholarly research on international migration from a diversity of approaches and methods. Offered: jointly with GEOG 344; W.

SIS 348 Alternative Routes to Modernity (5) I&S Routes to modernity followed by non-Western societies between 1600 and 1900. Historical experiences of non-Western societies seen in the context of European history and of development theory. Emphasizes primary sources and techniques for posing theoretical questions of historical data. Offered: jointly with HSTAS 348.

SIS 350 Environmental Norms in International Politics (5) I&S Ingelbritsen Surveys development of international environmental consciousness from 1960s to present. Models of "green development"; ways in which norms for resource use have entered global politics. Patterns of state compliance with international environmental agreements, and why states fall short of meeting their international obligations. Offered: jointly with ENVR 360/SCAND 350.

SIS 362 Law and Justice: An Introduction to Social Theory (5) I&S Godoy Provides conceptual tools for understanding law and its role in society by acquainting students with major currents of social theory. Topics include liberalism, Marxism, critical feminist theory, and critical race theory. Offered: jointly with LJS 362.

SIS 365 World Cities (5) I&S Kasaba, Sparke Factors that have propelled New York, London, and Tokyo into key positions in the organization of the late twentieth century international system. Asks historical and comparative questions and discusses the reasons behind the diminished position of cities such as Venice, Vienna, and Istanbul in that system.

SIS 375 Geopolitics (5) I&S An introduction to both political geography and geopolitics, addressing the fundamental links between power and space. Topics covered include: theories of power, space, and modernity; the formation of modern states; international geopolitics in the aftermath of the Cold War; the post-colonial nation-state; and the geopolitics of resistance. Offered: jointly with GEOG 375.

SIS 377 Turkic Peoples of Central Asia (5) I&S Cirtautas History of the Turkic peoples, AD 552 to present. Emphasis on the status of students from Central Asia. Geographical distribution, demographic data, reactions and adaptations to changes resulting from the 1917 revolution. Turkic viewpoint on past and present developments. Offered: jointly with NEAR E 375.

SIS 390 Political Economy of Industrialized Nations (5) I&S Ingebritsen Theoretical bases of various political economic systems of industrialized nations. Several major issues these political economies currently face; usefulness and limits of economic analyses within broader perspective of political economy. Prerequisite: either ECON 201, GEOG 123 or SIS 120 any of which may be taken concurrently.

SIS 397 Junior Honors Seminar (5) I&S Designed to facilitate writing of honors thesis through methodological and bibliographical research. Required of honors candidates.

SIS 399 Study Abroad — International Studies (1-5, max. 15) I&S For participants in study abroad program. Specific course content varies. Courses do not automatically apply to major/minor requirements.

SIS 401 International Political Economy (5) I&S Ingelbritsen, Latsch Establishment, maintenance, and decay of the post-1945 international economic order. Political economy of international trade, monetary relations, inflation, and North-South relations. Prerequisite: SIS 201 which may be taken concurrently, either ECON 201, GEOG 123 or SIS 120 any of which may be taken concurrently.

SIS 405 Political Economy of Religious Institutions (5) I&S Comparative study of Buddhist, Taoist, Christian, and Islamic religious institutions as political and economic phenomena. Impact of wealth and power on religious institutions or religious ideas. Temporal coverage from the formative period to the present. Recommended: one China, Japan, Middle East, or Europe course.

SIS 406 Political Islam and Islamic Fundamentalism (5) I&S Robinson Study of
I&S 410 Introduction to Global Internet Political Economy (5) I&S Hellmann Impact of the Internet revolution on structure and operating procedures of the international system. Effects of Internet-driven forces on aspects of the global political economy; cultural and political identities; interactions between states and markets; meaning of the boundaries of sovereignty and civil society.

SIS 419 Comparative Media Systems (5) I&S Provides students an understanding of policies that shape national communication processes and systems. Uses comparative analysis to identify both similarities and differences among media structures of nations at different levels of development. Primary emphasis on broadcast media. Offered: jointly with COM 420/POL S 468.

SIS 421 National Security and International Affairs Major military aspects of contemporary international politics. Uses and limitations of military capabilities for sustaining a stable international order and national security. Processes by which states detect and assess threats to their security; practice of deterrence; transfer of arms among states; pursuit of arms control. Recommended: one SIS or international relations course.

SIS 422 The United States in the Contemporary International System (5) I&S United States in the world: ways in which international circumstances shape the political-strategic, economic, and cultural dimensions of America’s policy. Case studies from post-1945 period. Recommended: one international relations or foreign policy course.

SIS 423 Practicing American Foreign Policy (5) I&S Develops familiarity with tools available to promote international objectives of the United States. International case studies selected to illustrate the various considerations inherent in the policy process and evaluate the strengths and weaknesses of the national institutions involved. Prerequisite: SIS 201.

SIS 425 International Law and Arms Control (5) I&S Surveys the political, legal, and technological history of 20th-century arms control agreements with emphasis on the treaties which ended the Cold War. Examines current issues of law, politics, military strategy, and technology in regard to weapons of mass destruction and related topics in international security. Offered: Sp.

SIS 426 World Politics (5) I&S Caporaso, Modelski Nation-state system and its alternatives; world distributions of preferences and power; structures of international authority; historical world societies and their politics. Offered: jointly with POL S 426.

SIS 430 International Population (5) I&S Lovely Demographic situation of the world and of major world regions. The demographic transition. Topics include public health, policies of fertility and mortality control, international migration, relation of population growth to economic development, social change, and resource constraints. Exploration and manipulation of international demographic data.

SIS 432 Population and Modernization (3) I&S Hirschman, Lovely Examines role of demographic factors in process of social modernization and economic growth. Approach is historical, focusing on populations of developed countries since 1700, and analytic, stressing attempts made by different disciplines to model demographic relationships, with attention to less developed regions. Offered: jointly with SOC 432.

SIS 436 Ethnic Politics and Nationalism in Multi-Ethnic Societies (5) I&S Provides a broad theoretical base, both descriptive and analytical, for the comparative study of ethnicity and nationalism. Examples drawn from ethnic movements in different societies. Some previous exposure either to introductory courses in political science or to courses in ethnicity in other departments is desirable. Offered: jointly with POL S 436.

SIS 438 Forced Migrations (5) I&S Friedman Provides an interdisciplinary understanding of the causes, characteristics, and consequences of forced migration experiences across the global system. Explores how international policy makers, humanitarian workers, and scholars have constructed forced migration as a problem for analysis and action, including some of the ethical dilemmas involved. Recommended: SIS 326 or SIS 344.

SIS 440 History of Communism (5) I&S Ellison Communism from its origins in Bolshevik faction of Russian social democracy to the present, treating the development of the ideology, the various communist parties, and the communist states. Recommended: two history or politics of Europe courses. Offered: jointly with HSTEU 440.

SIS 444 Peasants in Politics (5) I&S Young Interdisciplinary study of peasants, with special attention to questions of rural transformation. Peasant involvement in an increasingly independent world. Rebellion and revolution, impact of the international market, agricultural development. Offered: jointly with POL S 446.

SIS 446 History, Memory, and Justice (5) I&S Giebel Focuses on the complex interactions between history and historical representation, remembrance and commemoration, memory and identity, and notions of justicce and reconcilia- tion. Addresses these issues on methodological, theoretical, and practical grounds, drawing on examples from various genres, periods, and world regions. Offered.

SIS 449 Social Transformation of Modern East Asia (5) I&S Sorensen Comparative study of social change in China, Japan, Korea, and Vietnam since 1945. Concentration on small-scale social units in rural and urban areas under both communist and capitalist political systems. Recommended: two history or anthropology of East Asia courses. Offered: jointly with ANTH 449.

SIS 450 Political Economy of Women and Family in the Third World (5) I&S Theoretical and empirical aspects of the political economy of women and the family in the Third World during the process of development, with a focus on labor. Main theoretical approaches examined and applied to case studies from Asia and Latin America. Offered: jointly with SOC 450.

SIS 452 Law and Politics of International Trade (5) I&S Pekkanen Survey of global trade politics in the context of the World trade Organization (WTO), with attention to positive and negative aspects of its governance. Examines the impact of the WTO legal framework on trade relations among developed and developing countries. Covers topics such as dispute settlement, development, safeguards, antidumping, intellectual property, and regionalism.

SIS 455 Industry and the State (5) I&S Hamilton, Whiting Builds on states and markets approach of 200 and 201 through specific examination of effects of industry and industrial structure on political outcomes and roles of state. Emphasis on late-developing and newly developing economies. Prerequisite: SIS 200; SIS 201.

SIS 460 Law, State, and Society (5) I&S Migdal Examination of the present state law and non-state law (rules and ways of ordering behavior such as customary law, religious law, and social conventions). Focuses on the ways non-state law interacts with and affects state law and is affected by state law.

SIS 465 Deeply Divided Societies (5) I&S Migdal Ethnic conflict seen from two perspectives: 1. the study of theoretical approaches as a means of understanding deeply divided societies; 2. a focus on one or more specific conflicts. Recommended: SIS 201 or POL S 204.

SIS 467 Nations and States in the Modern World (5) I&S Development of national consciousness in the “old nations” of Europe before the French Revolution. Replacement by the new nationalism and its spread into East Central Europe, Russia, Ibero-America, Asia, and Africa. Offered: jointly with HIST 467.

SIS 470 Human Rights in Latin America (5) I&S Godoy Human rights in Latin America, focusing on twentieth century dictatorships and current regional events and the implications for human rights. Cannot be taken for credit if GIS 174 or SISLA 120 previously taken. Offered: jointly with LJS 410. Prerequisite: either ANTH 323, LJS 320, LJS 321, POL S 368, PHIL 338, SIS 200, or SIS 210.
SIS 476 Comparative International Political Economy (5) I&S Ingebretsen, Poznanski Comparative analysis of four major approaches to international political economy: mercantilism, Marxism, liberalism, and evolutionary approach. Focus on international cooperation, social change, and economic institutions. Theoretical analysis of the four paradigms and applications to historic and current issues in international political economy: hegemonic cycle, post-communist transition, and cross-national income inequality.

SIS 490 Special Topics (1-5, max. 15) I&S Content varies from quarter to quarter.

SIS 491 Senior Honors Seminar (5-) I&S Study of issues related to students’ thesis topics. Develops thesis-writing skills. Open only to Jackson School honors students.

SIS 492 Senior Honors Seminar (-5) I&S Students write a senior thesis working with their individual writing advisers.

SIS 494 Senior Research (2) Independent research and writing under supervision of a faculty member. Open only to International Studies majors.

SIS 495 Task Force (5) I&S Small-group seminars address current problems in international affairs, each focusing on one specific policy question and producing a joint task force report. Restricted to senior majors in International Studies. Prerequisite: SIS 200; SIS 201; SIS 202; SIS 401.

SIS 497 Internship (1-5, max. 15) Credit for the completion of an approved internship in international studies. Credit/no credit only.

SIS 498 Readings in International Studies (5) I&S Reading and discussion of selected works from the Jackson School’s interdisciplinary international studies. Restricted to majors in International Studies.

SIS 499 Undergraduate Research (1-5, max. 15).

SIS 501 Seminar: Comparative International Studies (3) Bachman, Kasaba, Poznanski Focuses on comparison across geographical areas including comparative political economy, comparative cultures, and comparative institutions. Provides familiarity with the comparative method of inquiry, an understanding of the interplay between area studies and cross-regional theories, and skills in conducting comparative research and writing. Prerequisite: ECON 200; ECON 201.

SIS 502 Seminar: Globalization and International Relations (3) Jones Focuses on globalization, including international relations and transnational studies. Provides an understanding of the interplay of area studies with processes that transcend geographical areas and intersect political boundaries, an overview of transnationalism or international relations, and skills in undertaking a major research and writing project.

SIS 510 Practicum: Methods in International Studies (3) Chirot, Curran Assumptions underlying the methodology for comparative study of societies and other large-scale social entities. Quantitative and nonquantitative methods illustrated by recent research. Prerequisite: SIS 502.

SIS 512 Task Force in International Affairs (3) Chirot, Curran Seminar addressing a current problem in international affairs and resulting in a joint task-force report. Results presented to, and critiqued by, a distinguished outside evaluator at end of term. Prerequisite: SIS 511.

SIS 520 Introduction to Theories and Quantitative Methods for Social Science Research (5) Selected social scientific theories and quantitative methods for students in international and area-studies programs. Introduction to methodological neoclassicism, neo-institutional analysis, “developmentalism,” rational choice and dynamic institutionalist approaches, and selected theories from political science. Essentials of statistical analysis.

SIS 522 Special Topics in Ethnicity and Nationalism (3, max. 6) Topics vary, but always focus on ethnic group relations and nationalism viewed from a broad, comparative, interdisciplinary perspective. Emphasis is heavily cross-cultural, and the geographical coverage worldwide.

SIS 523 Seminar on Religious and Political Violence (5) Robinson Employs ethnographic studies and anthropological theory to examine the relationships between culture and power in the analysis of religious and political violence. Topics include modernity; secularisms and fundamentalisms; ritual, sacrifice, and martyrdom; law, rights, and subject-making. Offered: jointly with ANTH 523.

SIS 524 International Security (5) Kier, Mercer Introduces some of the major debates concerning the use of force in international politics. Covers traditional issues in international security such as alliances and the causes of war, as well as some of the new and important questions, such as explaining war outcomes and war termination. Offered jointly with POL S 524.

SIS 534 International Affairs (3) Provides a broad understanding of international issues and United States policy. Students explore U.S. foreign policy and theories of major international actors in international trade, security, and strategic concerns, refugee policy, conflict resolution, development assistance, and the environment. Offered: jointly with PB AF 530/ POL S 534.

SIS 542 Seminar: State and Society (5) Migdal Examines the mutually conditioning relationship between states and the societies they seek to govern. Studies states at large, complex organizations and their interactions with society on different levels. Shows that interactions on any level affect the nature of the state on other levels as well. Offered: jointly with POL S 542.

SIS 552 Law and Politics of International Trade (5) I&S S. Pekkanen Survey of global trade politics in the context of the World Trade Organization (WTO), with attention to positive and negative aspects of its governance. Examines the impact of the WTO legal framework on trade relations among developed and developing countries. Covers topics such as dispute settlement, development, safeguards, antidumping, intellectual property, and regionalism.

SIS 553 Environment and Health in the World Trade Organization (5) S. Pekkanen Conflicts between global environmental and public health on the one hand and international trade expansion on the other in the World Trade Organization (WTO). Focuses on the state of GATT/WTO jurisprudence and its interaction with sovereign laws and regulations. Cases include asbestos, reformed gasoline, beef hormones, shrimp-turtle, and genetically modified organisms.

SIS 562 Law, Globalization, and Multinational Corporations (3) Interdisciplinary workshop that examines the role of multinational corporations in a global society. Topics include the legal construct of the multinational corporation, the multinational and the state, the multinational and human rights, and the multinational in the international arena. Offered: jointly with LAW E 512.

SIS 575 Advanced Political Geography (5) Sparke Provides resources for theorizing how politics shapes and is shaped by geographical relationships. Examines how politics are situated in complex material and discursive geographies that are partly reproduced through political negotiations. Examines interrelationships of contemporary capitalism with other complex systems of social and political power relations. Offered: jointly with GEOG 575.

SIS 580 Teaching International Studies (2, max. 4) Migdal For current and prospective teaching assistants. Includes teaching writing, leading effective discussions, the art of evaluation, and teaching critical reading skills; videotaping of actual teaching sessions of participants in class. Credit/no credit only.

SIS 590 Special Topics (2-5, max. 10) Seminar. Course content varies. Offered occasionally by visiting or resident faculty.

SIS 600 Independent Study or Research (*)

European Studies

EURO 110 Introduction to Russian Culture and Civilization (5) I&S/VLPA Introduction to Russian culture and history from pre-Christian times to the present, as seen through literary texts, music, film, visual art, and historical works. All lectures and written materials in English. No prior knowledge of Russian necessary. Offered: jointly with RUSS 110.

EURO 111 Elementary Modern Greek (5) Fundamentals of oral and written modern Greek. Offered: A.

EURO 112 Elementary Modern Greek (5) Fundamentals of oral and written modern Greek. Recommended: EURO 111 or GREEK 401. Offered: W.

EURO 113 Elementary Modern Greek (5) Fundamentals of oral and written modern Greek.
Recommended: EURO 112 or GREEK 402.
Offered: Sp.

EURO 140 Russia From the Tenth Century to the Present (5) I&S Russian political, social, and economic history from the tenth century to the present. Offered: jointly with HIST 140.

EURO 211 Second-Year Modern Greek (5) VLPA Continuation of EURO 111, 112, 113. Intensive practice in speaking, reading, and writing. Recommended: EURO 113 or GREEK 403. Offered: A.

EURO 212 Second-Year Modern Greek (5) VLPA Continuation of EURO 111, 112, 113. Intensive practice in speaking, reading, and writing. Recommended: EURO 211. Offered: W.

EURO 220 Introduction to East European Studies (5) I&S Feliksi Introduction to the history of post-1945 Eastern Europe focusing on political, economic, social, cultural, and diplomatic issues. Countries surveyed include Albania, Bulgaria, Czechoslovakia, Hungary, Poland, Romania, and Yugoslavia. Offered: jointly with HSTEU 220.

EURO 243 Russian Civilization (5) I&S Russia's civilization, including fine arts, literature, religion, and history; political, social, and legal institutions and thought in relation to the general development of Russian society from early times to 1917.

Offered: A.

EURO 302 The Politics and Cultures of Europe (5) I&S Lang Builds upon themes and topics introduced in EURO 301. Provides rigorous and specialized investigation of European political institutions, societies, and cultures in the modern era. Prerequisite: EURO 301.

EURO 320 Greek History: 7000 BC to Present (5) I&S Thomas History of Greece from its Neolithic village origins to the present. Examines the different forms of one of the most resilient cultures in the human story. Offered: jointly with HIST 320, A.

EURO 344 The Baltic States and Scandinavia (5) I&S Smichkens Survey of the cultures and history of Estonia, Latvia, and Lithuania from the Viking Age to the present, with particular attention to Baltic-Scandinavian contacts. Offered: jointly with SCAND 344.

EURO 351 Scandinavia, the European Union, and Global Climate Change (5) I&S Reviews the history of climate change, the role of Scandinavian and central and Eastern Europe. Offered: jointly with SCAND 351; WSp.

EURO 360 Contemporary Spain (5) I&S/VLPA Social, political, and cultural developments in Spain since the end of the Franco dictatorship in 1975. Extensive use of Spanish Web sites. Prerequisite: SPAN 302 which may be taken concurrently. Offered: jointly with SPAN 360.

EURO 364 Modern Greece: 1821 to the Present (5) I&S Politics and society of Greece from War of Independence to the present. Emergence and development of the Greek state; Greece in the world wars; civil war and post-war politics; military dictatorship; transition to democracy; recent developments. No prior study of Greece assumed. Offered: jointly with HSTEU 364.

EURO 378 Russia and Asia (3) I&S Russian expansion into Central Asia. Russian and Soviet policies toward nationalities and relations with adjacent Asian countries.

EURO 395 Supervised Internship (1-5, max. 5) Offered: A.

EURO 399 Study Abroad (1-5, max. 15) I&S For participants in Study Abroad program. Specific course content varies. Courses do not automatically apply to major/minor requirements.

EURO 403 Modern European Migration, Integration, and Citizenship (5) I&S Mitchell Offers a theoretical and empirical understanding of migration processes and patterns in Europe, with a focus on Muslim immigration in the post-WWII period. Analyzes the impact of European Union mandates, globalization processes, and international, national, and urban policies on Muslim immigrant rights and identity formation. Offered: A; jointly with GEOG 403.

EURO 420 The Olympics: The Merging of Old and New in Modern Greece (5) I&S Explores the role of the Olympic games in the history and culture of Greece, from Bronze Age pre-Olympiads to the 2004 Athens Games. Topics include mythical and historical origins of the Olympics, moral principles and practices in Greek sports, and modern Olympics, 1896 to 2004. Offered: jointly with HIST 420.

EURO 445 War and Occupation in Northern Europe: History, Fiction, and Memoir (5) The study of literary representations (fiction, memoirs, and personal narratives) dealing with World War II and the occupation of the Nordic and Baltic countries. Offered: jointly with SCAND 445.

EURO 480 Kierkegaard and Decadence in European Literature (5) VLPA Reading and discussion of core texts by Soren Kierkegaard, as well as a consideration of the relationship between Kierkegaardian thought and the literary practice of various writers of Scandinavian and European decadence. Offered: jointly with SCAND 480.

EURO 481 August Strindberg and European Cultural History (5) I&S/VLPA Examines the work of Swedish dramatist, novelist, and painter August Strindberg, in the context of European literary movements and history of ideas from 1880 to 1912, and Strindberg's influence on 20th-century drama and film. Offered: jointly with SCAND 481.

EURO 482 Knut Hamsun and Early European Modernism (5) VLPA Reading and discussion of significant novels by Knut Hamsun, whose oeuvre is considered in the context of works by other European modernist writers. Offered: jointly with SCAND 482.

EURO 490 Special Topics (1-5, max. 15) I&S Offered: A.

EURO 494 Senior Seminar I (5) I&S Introduction to research into European topics and to the analysis of problems.

EURO 495 Senior Seminar II (5) I&S Writing and discussion of senior thesis. Prerequisite: EURO 494. Offered: Sp.

EURO 496 Paris: Architecture and Urbanism (3-5, max. 5) I&S/VLPA Spans the architectural history of Paris, from its Gallic, pre-roman origins in the 2nd century BCE through the work of 21st century architects. Focuses on changing patterns of the physical fabric of the city and its buildings, as seen within the context of the broader political, social, economic, and cultural history. Offered: jointly with ART H 494.

EURO 499 Undergraduate Research (1-5, max. 15) Offered: A.

African Studies

SISAF 399 Study Abroad: African Studies (1-5, max. 15) I&S For participants in study abroad program. Specific course content varies. Courses do not automatically apply to major/minor requirements.

SISAF 444 African Studies Seminar (5, max. 15) I&S Interdisciplinary seminar focusing upon one particular aspect of the African continent. Emphasis may be humanistic, social scientific, or historical. African Studies faculty and visiting scholars lecture on areas of their own expertise.

SISAF 490 Special Topics (1-5, max. 15) I&S Offered: A.

SISAF 499 Undergraduate Research (1-5, max. 15) I&S Offered: A.

Asian Studies

SISA 209 Asian Civilizations: Traditions (5) VLPA Porter Interdisciplinary introduction to the civilizations of Asia, particularly those of India, China, Japan, and Korea. Explores the religion, philosophy, literature, art, and social and political thought of these civilizations from ancient times to the 17th century.

SISA 210 Rise of Asia (5) I&S Anchordoguy, Bachman, Giebel, Sorensen Key themes in the study of Asia, with focus on the present. Topics include: the notion of “Asia”; cultural and religious similarities and differences; comparison of colonial experiences under Western and Asian powers; World War II and liberation; postwar patterns of economic and political development; social patterns and issues. Offered: A.

SISA 244 Imperialism and Anti-Colonialism in Asia (5) I&S Giebel Introduction to Western
imperialism expansion, conquest, and colonial rule in Asia; the anti-colonial, nationalist resistances they engendered; and the resultant cultural, political, economic, and intellectual transformations in Asian societies. Covers post-1800 violence, racial hierarchies, human rights abuses, post-colonial memories, persistent strategies of domination, and structural inequities. Offered: jointly with HSTAS 244.

SISA 245 Human Rights in Asia (5) I&S Calihan, Glenda Introduction to recent and ongoing human rights issues in South, Southeast, and East Asia. Focuses on how human rights politics have played out in domestic political arenas. Provides exposure to views/insights into the historical context in which human rights claims, abuses, and debates arise. Offered: jointly with HSTAS 245.

SISA 265 Globalization and the Transformation Economy and Society in Asia (5) I&S Hamilton Examines the rapid and extensive social and economic development throughout Asia since the mid-20th century; the corresponding retail revolution in the American economy; the evolution of characteristic Asian product categories; and the impact of these developments on the social and economic organization of Asian economies. Offered: jointly with SOC 265.

SISA 372 Asian Sustainable Development (5) I&S Examines the contemporary relationship between environmental protection and development paths in Asia. Inquires into the forces driving both environmental change and societal responses (state and local regulations, social movements, etc.) to that change, at many geographical scales. Asian concepts of nature-society relations also explored. Offered: jointly with GEOG 372.

SISA 399 Study Abroad: Asian Studies (1-5, max. 15) I&S For participants in study abroad program. Specific course content varies. Courses do not automatically apply to major/minor requirements.

SISA 401 Asia and the World (5) I&S Bachman Overview of major issues and developments in the interactions of Northeast and Southeast Asia and the world. Topics include economic development and integration, sources of instability, and historical patterns of relations. Particular focus on major current issues related to the region. : SIS 201, SISA 210.

SISA 442 GLOBAL ASIA (5) I&S Welland Explores how Asia has been constructed through transnational interactions such as imperialism, anti-colonialism, tourism, diaspora, and global capitalism. Topics include the cultural construction of similarity and difference, politics of representation, and political economy of global circulations of people and things. Prerequisite: one 200-level ANTH course. Offered: jointly with ANTH 442/WOMEN 446; W.

SISA 490 Special Topics (1-5, max. 15) I&S Content varies.

SISA 499 Undergraduate Research (1-5, max. 15)

SISA 590 Special Topics (1-5, max. 10) I&S Special topics in Asian Studies. Course content varies by instructor.

Canadian Studies

SISA 308 Canada: A Geographic Interpretation (5) I&S Examines the overlapping economic, cultural, and political geographies shaping life in contemporary Canada. Topics include: free trade, constitutional crisis, feminism in Canada, aboriginal politics, and border region phenomena. Attention paid to how specific geographic interpretations of Canada by Canadians actually play a part in national life. Offered: jointly with GEOG 308.

SISA 341 Government and Politics of Canada (5) I&S Critical analysis of parliamen-
tary institutions, political parties, and the federal system in Canada. Offered: jointly with POL S 341.

SISA 356 Canadian Society (5) I&S Origins to the present in its North American setting; political development, cultural evolution, and emergence of multinationalism; economic base; arts and literature; problems of the environment; Canadian foreign relations.

SISA 377 History of Canada (5) I&S General survey and analysis of political, economic, social, and cultural aspects of Canadian history from the foundation of New France to present; Canadian-American relations, the rise of Quebec nationalism, and the development of the Canadian West. Offered: jointly with HSTAA 377.

SISA 399 Study Abroad: Canadian Studies (1-5, max. 15) I&S For participants in study abroad program. Specific course content varies. Courses do not automatically apply to major/minor requirements.

SISA 400 Canadian Values and Symbols (5) I&S Overview of the ideas, events, and activities which help define Canadians as a people. Examines the “national” expression of these values and symbols, as evidenced in historical experience, a physical environment often harsh and unforgiving, a diverse people and cultures, and a pride in achievement that is frequently slow to surface.

SISA 430 Canadian Documentary Film Traditions (5) I&S/VLPA History and development of non-fiction film documentary traditions, especially in Canada, the first institutionally defined area in which documentaries became prominent through the National Film Board and the Canadian Broadcasting Corporation. Discussion of Flaherty, Greinon, and independent network producers who developed present-day style of documentaries. Offered: jointly with COM 430.

SISA 441 Quebecois Literature (5) VLPA Delcourt Readings of novels, plays, and occasionally, poetry. Special attention paid to how Quebecois authors represent in their works the complex socio-political reality of their culture. Conducted in French. French majors required to read and write in French; all others may read and write in English. Prerequisite: FRENCH 303; either FRENCH 304, FRENCH 305, FRENCH 306, or FRENCH 307. Offered: jointly with FRENCH 441.

SISA 490 Special Topics (1-5, max. 15) Content varies.

SISA 498 Seminar: Canadian Problems (5) I&S Major issues pertaining to Canadian society, government, and economic development.

SISA 499 Undergraduate Research (1-5, max. 15)

SISA 507 Research Seminar: Canadian Problems (5, max. 10) Consideration of the spatial dimensions of Canadian socioeconomic, cultural, and political development, with emphasis on resource politics and relations with the United States, Japan, and other important trading partners. Prerequisite: GEOG 308 or permission of instructor. Offered: jointly with GEOG 507.

SISA 590 Special Topics (2-5, max. 10) Offered occasionally by visitors or resident faculty. Course content varies.

SISA 600 Independent Study (*)

Comparative Religion

RELIG 201 Introduction to World Religions: Western Traditions (5) I&S Wellman History of religions, concentrating on religious traditions that have developed west of the Indus. Primary attention to the Semitic religions (Judaism, Christianity, Islam) and to their ancient world background with emphasis on basic conceptual and symbolic structures.

RELIG 202 Introduction to World Religions: Eastern Traditions (5) I&S Tokuno History of religions, concentrating on religions that have developed in South Asia and East Asia. Primary attention to Hinduism and Buddhism; other important Asian religions are discussed in relation to them, with emphasis on basic conceptual and symbolic structures.

RELIG 205 Religion, Violence, and Peace: Patterns Across Time and Tradition (5) I&S Noegel Wellman Investigates the complex relationship between violence and peace in a variety of religious traditions. Examines case studies from the ancient Near East, medieval East Asia, and the contemporary West from the standpoint of lived experiences and contemporary theories derived from several academic disciplines. Offered: jointly with HUM/NEAR E 205; W.

RELIG 210 Introduction to Judaism (5) I&S Jaffee, Pianko Basic ideas and motifs of Judaism: God, Covenant, Law, Life Cycle (birth, marriage, family life, sexual laws, role of women, death); Cycle of the Year (Sabbath, holidays, festivals); Holy Land, prayer, Messianism.

RELIG 211 Islam (5) I&S/VLPA Introduction to important cultural and historical aspects of Islam, focusing on basic concepts and developments such as prophethood, Quran and Hadith, canon and law, ritual, social theory, Sufism, theology, and sectarianism. Special attention to comparison of varied Muslim practices and beliefs, and their relation to textual and personal authority. Offered: jointly with NEAR E 211.

RELIG 212 Introduction to the Quran (5) I&S/ VLPA Emphasis on the historical context of the
Quran, the history of the text, its collection, organization, and interpretation. In English. Offered: jointly with NEAR E 212.

RELIG 220 Introduction to the New Testament (5) I&S/VLPA Williams Modern scholarly methods of research and analysis in dealing with New Testament books and their interpretation. Genres of various books (gospel, epistle, sacred history, apocalypse); problems of the relationships among author, material, and intended audience; relationships between theme and image.

RELIG 254 American Religious Traditions (5) I&S Wellman Seeks to understand religious diversity in the American context and the varieties of religious traditions in the American historical horizon including religious minorities, American Protestants, public religious expressions, and new American religions.

RELIG 264 Sacred Music in the European Tradition (5) VLPA Surveys European and American sacred music from the 12th to 20th centuries, examining the important role of music in religious worship. Considers the ways composers used to make musical works sound the way they do to convey the messages of the texts through music. Offered: jointly with MUSIC 264.

RELIG 301 Religious Thought Since the Middle Ages (5) I&S Development of religious thought in the West from the Middle Ages to the twentieth century. History of focal ideas: God, man, knowledge, and authority during this period and the relation of changes in these ideas to the ways in which basic issues in religious thought have been conceived. Recommended: RELIG 201.

RELIG 307 Religion and World Politics (5) Gill Explores the interaction of religion and politics in various regions of the world, including the U.S., Europe, Middle East, Latin America, and other regions. Presents a historical perspective on religion alongside contemporary issues in religion, politics, and church-state relations. Offered: jointly with POL S 307.

RELIG 320 Comparative Study of Death (5) I&S Death analyzed from a cross-cultural perspective. Topics include funerary practices, the concept of the soul and afterlife, cultural variations in grief, cemeteries as folk art, and the relation of changes in these ideas to the ways in which basic issues in religious thought have been conceived. Recommended: RELIG 201.

RELIG 321 Comparative Religion (3) I&S Anthropological approaches to religious experience and belief with emphasis on conceptual issues such as ritual, symbolism, identity, ecstatic experience, and revitalization movements in the context of globalization. Also addresses the diversity of religious expression in American culture and how that compares with other societies. Offered: jointly with ANTH 321.

RELIG 322 The Gospels and Jesus of Nazareth (5) I&S Williams Gospel material from early Christianity, including both canonical and noncanonical gospels. Relation of gospels to analogous literature from the Hellenistic-Roman period. Recommended: ENGL 310 or RELIG 220.

RELIG 324 The Emergence of Christianity (5) I&S Williams Studies stages in the development of Christianity as a new religion, during the first five centuries CE, as the classical forms and institutions of Christian "orthodoxy" gradually achieved definition, and as this emerging Christian tradition became a dominant cultural and socio-political force. Recommended: HIST 307, RELIG 201, or RELIG 220.

RELIG 327 Eastern Christian Traditions (5) I&S Eastern Christian traditions, with principal focus on Eastern Orthodox tradition in Byzantium and Russia from time of the Council of Nicea to the twentieth century. Considers significant differences between eastern and western Christianity and their doctrinal and cultural origins; explores distinctive features of eastern tradition. Recommended: HIST 307 or RELIG 201.

RELIG 350 Buddhism and Society: The Theravada Buddhist Tradition in South and Southeast Asia (5) I&S Religious tradition of Theravada Buddhism (as practiced in Sri Lanka, Burma, Thailand, Laos, and Cambodia). Variations in ethical orientations developed through Theravada Buddhist ideas. Recommended: RELIG 202 or one eastern religions course. Offered: jointly with ANTH 352.

RELIG 352 Hinduism (5) I&S Novetzke, Pauwels Varieties of Hindu religious practice; the diverse patterns of religious thought and action among contemporary Hindus. Includes ritual behavior, village Hinduism, tantrism, sadhus, yoga, sects, the major gods and their mythologies, religious art, and the adjustments of Hinduism to modernity. Recommended: RELIG 202 or one South Asian culture course.

RELIG 354 Buddhism (5) I&S Cox, Tokunoo Buddhism as a religious way and as a way of thinking; the forms of Buddhism known in South Asia (India, Sri Lanka) and those introduced from there to Tibet and other parts of Central Asia. Includes the "Three Jewels" (i.e., the Buddha or Awakened Person, the Teaching [Dharma], and Community [Sangha]) around which Buddhism is traditionally articulated. Recommended: RELIG 202 or one Asian cultures course.

RELIG 380 The Nature of Religion and Its Study (5) I&S Jaffe, Wellman Study of religion as a general human phenomenon. Manner in which different methods of inquiry (phenomenology, anthropology, sociology, psychology, literary criticism, archaeology, philosophy, theology) illuminate different aspects of religion and help to shape conceptions of its nature. Recommended: RELIG 201 or RELIG 202. Offered: jointly with CHID 380.

RELIG 399 Study Abroad — Comparative Religion (1-5, max. 15) I&S For participants in study abroad program. Specific course content varies. Courses do not automatically apply to major/minor requirements.

RELIG 400 The Jewish Mystical Tradition (5) I&S Jaffe Jewish esoteric thought from antiquity to early modern times. Emergence of Spanish Kabbalah. The thought of Isaac Luria and its immense influence in Jewish history through other movements—specifically the mystical messiah. Sabbatian Sevi, and the rise of Hasidism. Recommended: RELIG 201 or RELIG 210.

RELIG 405 Scripture in Judaism (5) I&S Jaffe Explores the phenomenon of religious interpretation of sacred books by attending to the destiny of the Bible as read within Judaism. Begins with the canonization of the biblical text itself and continues into the rationalist and mystical interpretive innovations of the Middle Ages. Recommended: HIST/SISJE 250, RELIG 201, or RELIG 210.

RELIG 410 Law in Judaic Experience (5) I&S Jaffe Place and function of law in Jewish social and personal experience. Discusses the various ideological justifications of the law in biblical and rabbinic literature, examines representative legal texts, and explores theological reflection on law by medieval and modern thinkers. Recommended: RELIG 201; RELIG 210; RELIG 400 or RELIG 405.

RELIG 415 Modern Jewish Thought (5) I&S Jaffe, Pianko Major trends in Jewish religious thought since the European Enlightenment, focusing on encounters between Judaism and the modern world. Includes Haskalah; varieties of religious reform and accommodation; Zionism; socialism; the philosophy of Rosenzweig, Buber, and Kaplan; and theological responses to the Holocaust. Recommended: HIST/SISJE 250, HSTEU/SISJE 469, RELIG 201, or RELIG 210.

RELIG 420 The World of the Early Church (5) I&S Williams Early Christian church within the context of the Greco-Roman sociopolitical, philosophical, and religious environment. Covers the period from about AD 100 to 300. Christian thinkers and documents studied include both the classical "orthodox" and the "heretical." Recommended: HIST 307, RELIG 220, or RELIG 324.

RELIG 421 The Age of St. Augustine (5) I&S Christian church in the fourth and fifth centuries as a major institution in the Roman Empire. Great figures of patristic theology, such as Athanasius, Gregory Nazianzus, Gregory of Nyssa, and Augustine. Recommended: HIST 307, RELIG 320, or RELIG 324.

RELIG 426 Gnosticism and Early Christianity (5) I&S Williams Impact of Gnosticism on the development of Christianity and several other religious groups of that period. Readings dating from the first through the third centuries AD.

RELIG 428 Modern Christian Theology (5) I&S Modern Protestant and Catholic thought since the nineteenth century: Kierkegaard, Barth, Bultmann, Rahner, Lonergan, and other major figures. Recommended: RELIG 301.

RELIG 430 Scripture and Law in Islam (5) I&S/VLPA Examines concept and use of scripture in Islam, with special attention to
SISEA 406 China’s Environment (5) I&S Harrell Analysis of contemporary environmental problems in China, including population, food, water supply, pollution, biodiversity, and environmental activism. Combines natural science and social science perspectives. Prerequisite: either ANTH 210, ENVIR 201, SIS 200, SIS 201, or SIS 202. Offered: jointly with ANTH 406.

SISEA 407 Global Futures in East Asia (5) I&S Analysis of the interconnected and emerging modernity projects in China, Japan, Korea, and Taiwan and how the education of youth figures in projects of national development and international economic competition. Recommended: prior courses in socio-cultural anthropology and East Asian studies. Offered: jointly with ANTH 407; AWP 5S.

SISEA 423 History of Modern Japan (5) I&S Pyle Political, social, economic, and cultural development of Japan from the late Tokugawa period to the present with special emphasis on the cultural impact of the West. Offered: jointly with HSTAS 423.

SISEA 424 Perspectives on East Asia for Teachers (3, max. 6) I&S Substantive concepts, resources, and materials employed in teaching about East Asia. Requirements may vary in relation to the background of participants.

SISEA 432 History of Modern Japan (5) I&S Hirschman, Larry. Contemporary Asian countries face a number of issues with demographic components, including environmental and resource issues, ethnic rivalries, international migration, and public health. Addresses a set of these issues by focusing on the demography of one or more countries in Asia. Offered: jointly with SOC 434.

SISEA 437 International Relations of Japan (5) I&S & S. Pekkanen Comprehensive examination of Japan’s international relations. Covers issues such as trade, security, environment, aid, and human rights. Investigates Japan’s participation in international organizations, including the UN, World Bank, IMF, and WTO. Examines Japan’s relations with the United States, the European Union, Asia, Latin America, Africa, and other regions. Offered: jointly with POL S 424.

SISEA 439 Politics of Divided Korea (5) I&S Governments, politics, and economy of South and North Korea, the inter-Korean relations, and the two Koreas’ relationship with the major powers — especially the United States — with emphasis on the post-cold war period. Offered: jointly with POL S 439.

SISEA 440 The Emergence of Postwar Japan (5) I&S Pyle The making of modern Japan; World War II and surrender; American occupation; postoccupation rebuilding; emergence as an industrial power. Recommended: HSTAS 423 or SISEA 423. Offered: jointly with HSTAS 424.

SISEA 441 Economic and Social History of Japan to 1900 (5) I&S Lecture-seminar on Japanese economic and social history from 700 to 1900. Analyses of the rise and decline of the shoen system, the rise of commerce, social change, changes in the living standard, demographic changes, and the early phases of industrialization. Political and cultural developments as related to economic and social change. Prerequisite: either SISEA 241/HSTAS 241 or SISEA 341/HSTAS 341. Offered: jointly with HSTAS 441.

SISEA 443 Class and Culture in East Asia (5) I&S Examines the nexus between culture and systems of social stratification/class in East Asia, with an emphasis on Taiwan, Korea, Japan, and China. Topics include class formation, mechanisms of social mobility and reproduction, markers of status and hierarchy, resistance, and the formation of class identity. Offered: jointly with ANTH 446.

SISEA 444 Politics of Representation in Modern China (5) I&S Ancohodoaguy Anagnost focused on representation and power in twentieth century China. Combines substantive information on modern Chinese society and culture with recent debates in social theory and the politics of representation. Major themes include Chinese nationalism, body politics, popular culture, and everyday practice. Offered: jointly with ANTH 444.

SISEA 445 Religion in China (5) I&S Tokuno Religion in Chinese society, doctrines, practices, and social consequences of the ecletic folk religion, the elite Confucian, Taoist, and Buddhist traditions, syncretic sects, and imported Christianity. Prerequisite: either one 200-level ANTH course, ANTH 370, ANTH 403, LING 203, HSTAS 211, HSTAS 454, RELIG 202, SISEA 370, or SISEA 443.

SISEA 454 History of Modern China (5) I&S Dong Social, cultural, political, economic, and intellectual transformations and continuities in China from the end of the imperial period to the present. Offered: jointly with HSTAS 454

SISEA 459 United States-China Relations (5) I&S Bachman Surveys the history of United States-China relations and examines the evolution of bilateral relations, particularly since 1972. Emphasis on the period since 1972 and the major issues as they have evolved since that time, including trade, human rights, security, and Taiwan. Offered: jointly with POL S 419.

SISEA 460 Cities in China: Past and Present (5) I&S Dong Economic, political, social, and cultural functions of the city in modern Chinese history. Changes in China’s urban system. The city as cultural center and focus of literary and cinematic representation. Attention to architecture, commerce, urbanization, the role of capital cities in the power of the state. Offered: jointly with HSTAS 460.

SISEA 462 China and Globalization (5) I&S Bachman Examines the dynamics of the rise of China, its growing interactions with the international system and how it is turning affected by the processes associated with globalization. Specific areas of examination include flows of resources, people, and information, and conceptions of Chinese identity. Prerequisite: SISA 210.

SISEA 468 China’s Economic Reforms: Integration Into World Economy (5) I&S A systematic survey of China’s economic reforms since 1978, including China’s increasing integration into world economy. Prerequisite: ECON 201. Offered: jointly with ECON 468.

SISEA 469 Law, Development, and Transition in East Asia (5) I&S Whiting Examines the role of law and the courts in economic and political change in the developing world. Topics include variations in legal traditions and institutions, economic development, property rights, dispute resolution, democratization, and human rights. Empirical materials focus on East Asia. Offered: jointly with LJS 469/POL S 469.

SISEA 470 Minority Peoples of China (5) I&S & Harrell Interaction between China and the peoples of its periphery, including Inner Asia, Tibet, Northern Mainland, Southeast Asia, and aboriginal peoples of Taiwan. Emphasis on ethnicity, ethnic group consciousness, and role of the Chinese state. Prerequisite: either ANTH' SISEA 370, HSTAS 454, LING 203, or one 200-level ANTH course. Offered: jointly with ANTH 470.

SISEA 474 Civil Society in Japan and East Asia (5) I&S & R. Pekkanen Examines a wide range of nongovernmental organizations (NGOs) nonprofits, and voluntary groups under the unifying rubric of civil society. Theoretical introduction to civil society and ideas of social capital. Investigates general aspects of civil society, focusing on its specific characteristics in Japan and other parts of Asia.

SISEA 478 Readings in the Social Sciences in Japanese (3-5) I&S Introduction to articles and discussions in Japanese, focusing on topics of interest to students.
short works in economics, history, political science, and other social sciences. Assignments chosen from major Japanese monthlies and academic works. All readings in Japanese. Prerequisite: JAPAN 313.

SISEA 479 Readings in the Social Sciences in Japanese (3-5) I&S Introduction to articles and short works in economics, history, political science, and other social sciences. Assignments chosen from major Japanese monthlies and academic works. All readings in Japanese. Prerequisite: JAPAN 313.

SISEA 480 New Orders in East Asia (5) I&S Pyle Rise and fall of successive international systems in East Asia over the past 150 years: Sino-centric, imperialist, Washington Treaty system, Japan’s East Asian order, Yalta system, cold-war system. Post-cold-war search for a new order. Special attention to triangular relations among the United States, China, and Japan.

SISEA 481 Science, Technology, and International Politics in East Asia (5) I&S Anchordoguy Role of state and technological change in economic development. Analyzes state and corporate technology policies historically. Basic technology concepts, institutions, and policies in Japan, South Korea, Taiwan, and China. Examines sources of Asia’s rise in world of technology and explores whether conditions for its success will continue. Recommended: SISEA or SISA course. Offered: jointly with I BUS 461.

SISEA 482 Japanese Business and Technology (5) I&S Anchordoguy Examination of Japan’s postwar enterprise system in its historical context. Topics include corporate and financial structure, production and distribution, trade and investment policies, government-business relations, system of innovation, technological developments, prospects for the future. Offered: jointly with I BUS 462.

SISEA 486 Japanese Trade Politics (5) I&S R. Pekkanen Survey of Japan’s foreign trade diplomacy. Examines evolution of Japan’s trade patterns in exports and foreign direct investment with key partners. Covers institutional and legal frameworks of Japan’s trade relations, such as bilateral fora, regional options including free trade agreements, and multilateral venues such as the WTO. Offered: jointly with POL S 418.

SISEA 490 Special Topics (1-5, max. 15) I&S Course content varies.

SISEA 492 International Relations in East Asia (5) R. Pekkanen Focus on political parties in Japanese foreign policy. Examines the role of political parties in shaping Japan’s foreign policy. Offered: jointly with POL S 535.

SISEA 493 Japanese Business and Technology (5) I&S Anchordoguy Special Topics (1-5) I&S Taylor R. Pekkanen Asian business and technology. Examines the role of business and technology in Japan’s economic decision-making process. Recommended: SISEA or SISA course. Offered: jointly with I BUS 462.

SISEA 499 Undergraduate Research (1-5, max. 15) I&S

SISEA 517 Foreign Trade and Investment Law of the People’s Republic of China (1-4, max. 4) Introduction to the regulatory regime governing foreign trade and investment in China and in-depth coverage of key aspects of the regime, with focus on issues faced by U.S. businesses. Covers specific regulations, their implementation in practice, as well as the political and economic background. Offered: jointly with LAW E 517.

SISEA 521 Seminar: Introduction to the Interdisciplinary Study of China (5) Bachman, Dong, Guy

SISEA 522 Seminar: Introduction to the Interdisciplinary Study of China (5) Bachman, Dong, Guy

SISEA 526 The Security of China (5) Bachman Examines how the Chinese state conceptualizes its national security interests and how it pursues strategies designed to achieve those interests. Topics include use of force, military modernization, civil-military relations, and defense industrialization. Offered: jointly with POL S 526.

SISEA 531 Chinese History: Research Methods and Bibliographic Guides (3, max. 6) Guy Introductory research seminar dealing with the methodological and bibliographical problems concerning all periods and aspects of Chinese history from the earliest times to the nineteenth century. Prerequisite: two years of classical or modern Chinese.

SISEA 532 The Chinese Political System (5) Bachman, Whiting Examination of key approaches, interpretations, and secondary literature in the study of contemporary Chinese politics. Prerequisite: permission of instructor. Offered: jointly with POL S 532.

SISEA 533 Seminar on Contemporary Chinese Politics (5) Bachman Research on selected problems in contemporary Chinese politics. Prerequisite: SISEA 532 or permission of instructor. Offered: jointly with POL S 533.

SISEA 535 International Relations of Modern China (5) Anchordoguy Examination of the People’s Republic of China: historical antecedents; domestic and international systemic determinants; and Chinese policies toward major states, regions, and issues. Prerequisite: a course on contemporary Chinese politics or history, or permission of instructor. Offered: jointly with POL S 535.

SISEA 536 Political Parties in Japan and East Asia (5) R. Pekkanen Focus on political parties in Japan. Combines theoretical readings on political parties with intensive study of Japanese political parties. Recommended: either SISEA 242, SISEA 423, SISEA 440, or SISEA 442. Offered: jointly with POL S 535.

SISEA 537 International Relations in Japan (5) R. Pekkanen Comprehensive examination of Japan’s international relations. Covers issues such as trade, security, environment, aid, and human rights. Investigates Japan’s participation in international organizations, including the UN, World Bank, IMF, and WTO. Examines Japan’s relations with the United States, the European Union, Asia, Latin America, Africa, and other regions. Not open to students who have taken SISEA 437.

SISEA 538 Selected Topics on the Chinese Economy (5) Introduction to key issues of China’s growth; the transition from planned economy; the changing role of the state; central-local relations; macro-management of the economy; income distribution; resources and agriculture; the external sector and the WTO.

SISEA 540 Japanese Law (4) Taylor Basic institutions and procedures of the Japanese legal system. Historical development and traditional role of law, reception of Western law, and cultural and structural factors that influence the function of law and legal institutions. Offered: jointly with LAW B 540.

SISEA 541 Economic and Social History of Japan to 1900 (5) Analyses of landholding systems, the rise of commerce, demographic changes, urbanization, early industrialization, and social change. Prerequisite: previous course work in Japanese history or economic history, or permission of instructor. Not open to students who have taken 441. Offered: jointly with HSTAS 541.

SISEA 543 Law in East Asia: China (4) Introduction to the institutions and processes of the Chinese legal system. Focuses on the contemporary system and its role in relation to political, economic and social developments. Examines legal aspects governing foreign trade and investment in China. Offered: jointly with LAW B 541.

SISEA 548 National Security of Japan (5) S. Pekkanen Focuses on the changing landscape of Japan’s national security concerns—the actors, institutions, and circumstances that have brought issues of defense and rivalry to the center stage of Japanese politics. Topics include nationalism, militarization, pacificism, United States-Japan security alliance, Sino-Japanese competition, constitutional revision, collective defense, and spy satellites.

SISEA 549 Government Regulation of Business in Japan (3) Offered: jointly with LAW B 549.

SISEA 550 Japan, the United States, and New Orders in Asia (5) Pyle Seeks historical understanding of establishment of new order in contemporary East Asia. Analyzes the imperialist, Washington conference, and cold war systems and explores the present post-cold war search for a new order. Prerequisite: one course in modern Japanese history, political economy, or political science.

SISEA 551 International Relations of Northeast Asia (5) Hellmann Comprehensive survey of contemporary international relations of Northeast Asia with emphasis on Russia, Japan, China, and the United States. Multidisciplinary approach placing contemporary problems in historical context, drawing on modern social science theories. Connections between defense and economics are examined. Prerequisite: permission of instructor. Offered: jointly with POL S 539.

SISEA 552 Chinese Legal Tradition (3) Concepts and principles of the legal tradition in China. Draws on primary and secondary sources in English and, for students with Chinese language competence, traces the concept and development of Chinese law as well as legal institutions in Chinese society. Offered: jointly with LAW B 553.

SISEA 555 Introduction to Japanese Studies (3-6, max. 6) Anchordoguy Interdisciplinary introduction to the study of Japan, with emphasis on historical development. Required seminar for first-year graduate students.
SISEA 558 Readings on Japan in the Social Sciences (5) Seminar discussing articles in Japanese on economics, history, political science, and other social sciences. Assignments from major Japanese monthlies and academic works. Prerequisite: JAPAN 313 or equivalent and permission of instructor.

SISEA 559 Interdisciplinary Seminar on Japan (5) Advanced readings in history and the social sciences. Prerequisite: permission of instructor.

SISEA 574 Civil Society in Japan and East Asia (5) R. Pekkanen Examines a wide range of nongovernmental organizations (NGOs), nonprofits, and voluntary groups under the unifying rubric of civil society. Theoretical introduction to civil society and ideas of social capital. Investigates general aspects of civil society, focusing on its specific characteristics in Japan and other parts of Asia. Not open to students who have taken SISEA 474.

SISEA 575 Seminar on Japanese Society (5) Interdisciplinary seminar with class-led discussions on readings from anthropology, history, sociology, and non-discipline-specific articles on Japanese society. Prerequisite: background on Japan. Not open to students who have taken SISEA 475.

SISEA 577 Readings on Political Economy of Japan and Northeast Asia (5) Anchordoguy Analysis of major issues in Japan and also in Korea and China, such as the state's role in industrial development, trade and investment in Asia, trade and security relations with the U.S., and Asian models of capitalism.

SISEA 579 Modern Chinese History (5) Dong Introduction to the major English-language literature on modern Chinese history and to the major historiographical issues of the period. Prerequisite: HSTAS 454 or equivalent, and permission of instructor. Offered: jointly with HSTAS 579.

SISEA 582 Japanese Business and Technology (5) Anchordoguy Examination of Japan's postwar enterprise system in its historical context. Topics include corporate and financial structure, production and distribution, trade and investment policies, government-business relations, system of innovation, technological developments, prospects for the future. Offered: jointly with I BUS 562.

SISEA 584 Survey of Korean Society (5) Sorensen Introduction to the social and political institutions of North and South Korea with an opportunity to master the most important literature on modern Korea. Focuses on the twentieth century with the major emphasis on the post-1945 period. Offered: A.

SISEA 585 Research Seminar: Modern Korea (6) Nam, Sorensen Advanced instruction in problems and methods of research in Korean history. Foreign language not required. Prerequisite: permission of instructor.

SISEA 586 Japanese Trade Politics (5) S. Pekkanen Survey of Japan's foreign trade diplomacy. Examines evolution of Japan's trade patterns in exports and foreign direct investment with key partners. Covers institutional and legal frameworks of Japan's trade relations, such as bilateral fora, regional options including free trade agreements, and multilateral venues such as the WTO. Not open to students who have taken SISEA 486.

SISEA 590 Special Topics (2-5, max. 10) Seminar. Offered occasionally by visiting or resident faculty. Offered: 600 Independent Study or Research (*)

SISEA 700 Master's Thesis (*)

Jewish Studies

SISJE 177 The Jewish Community in the United States: Success, Influence, and Prospects (5) & S Burstein Examines relationship between American society and its ethnic/religious groups through study of the American Jewish community. Focuses on economic success; challenges to religious traditions; relationships between American and Jewish cultures; and impact of Jewish ideas and organizations on American politics. Offered: jointly with SOC 177; S.

SISJE 250 Introduction to Jewish Cultural History (5) & S Jaffe Introductory orientation to the settings in which Jews have marked out for themselves distinctive identities as a people, a culture, and as a religious community. Examines Jewish cultural history as a production of Jewish identity that is always produced in conversation with others in the non-Jewish world. Offered: jointly with HIST 250.

SISJE 269 The Holocaust: History and Memory (5) & S Ploeger, Stein Explores the Holocaust as crucial event of the twentieth century. Examines origins of the Holocaust, perpetrators and victims, and efforts to come to terms with this genocide in Europe, Israel, and the United States. Offered: jointly with HIST 269.

SISJE 312 Jewish Literature: Biblical to Modern (5) & VLA A study of Jewish literature from Biblical narrative and rabbinic commentary to modern prose and poetry with intervening texts primarily organized around major themes: martyrdom and suffering, destruction and exile, messianism, Hasidism and Enlightenment, Yiddishism and Zionism. Various critical approaches to major themes of Jewish philosophy. Focuses either on Jewish thought in its European, American, and Middle Eastern contexts by examining films produced in these settings. Considers central events that shaped modern Jewish culture: the changing geography of Europe and the Middle East, mass migrations, the Holocaust, shifting meanings of race, culture, and religion. Offered: jointly with HIST 369.

SISJE 377 The American Jewish Community (5) & S Burstein Development and current status of American Jewish community; immigration; changes in religious practice, institutions in response to circumstances in American Society; creation of new types of secular communal organizations; assimilation; confrontation with antisemitism; family life; social, economic mobility; religious, secular education; intermarriage, and future of community. Offered: jointly with SOC 377.

SISJE 378 Contemporary Jewish American Identities (5) & S Friedman Introduction to the debates about post-Holocaust Jewish identities in multicultural America. Explores whether a distinctive Jewish community is headed toward assimilation, experiencing revival, or merely transforming the multiple ways Jewish experience is lived. Topics include new Jewish immigrants, the new Orthodox, Black Jews, Jewish feminism, children of Holocaust survivors. Offered: jointly with SOC 378.

SISJE 399 Study Abroad — Jewish Studies (1-5, max. 15) & S For participants in study abroad program. Specific course content varies. Courses do not automatically apply to major/minor requirements.

SISJE 418 Jewish Philosophy (5) & S Rosenthal Introduces the central concepts and themes of Jewish philosophy. Focuses either on debates within a particular historical period, such as: e.g., modern or medieval-on or on a topic like: e.g., reactions to the Enlightenment or to the Holocaust. Prerequisite: at least one previous course in philosophy. Offered: jointly with PHIL 418.

SISJE 438 Jewish Women in Contemporary America (5) & S Friedman Examines how Jewish women's identities are socially constructed and transformed in contemporary America, using social histories, memoirs, and ethnographies to analyze scholars' approaches to Jewish women's lives. Topics include the role of social class, religion, migration, the Holocaust, and race relations in Jewish women's lives. Offered: jointly with WOMEN 438.

SISJE 452 The Biblical Song of Songs (3) VLA Noe! Examines the erotic and beautiful Song of Songs within the context of ancient (and medieval) Near Eastern love poetry and correlates close readings of the book with...
Latin American Studies

SISLA 120 Introduction to Human Rights in Latin America (5) & S Geoory Overview of human rights issues and how they have evolved in recent Latin American history, from the military dictatorships of the authoritarian period to contemporary challenges faced in the region’s democracies. Credit not allowed if LSI 470/SIB 410 already taken.

SISLA 322 International Political Economy of Latin America (5) & S Exploration of politics underlying Latin America’s economic development. Topics covered include import-substituting industrialization, mercantilism, the debt crisis, neoliberalism, market integration, and poverty. Review of major theoretical perspectives such as modernization theory, dependency, and the new political economy. Offered: jointly with POL S 322.

SISLA 342 Government and Politics of Latin America (5) & S Analysis of the political dynamics of change in Latin America comparing various national approaches to the political problems of modernization, economic development, and social change. Offered: jointly with POL S 342.

SISLA 355 Social Change in Latin America (5) & S Warren Explores cultures, identities, political economy, and popular mobilization in Latin America. Examines relations of power and production between social classes and ethnic groups, as well as ideologies and intellectual movements. Offered: jointly with SOC 355.

SISLA 399 Study Abroad: Latin American Studies (1-5, max. 15) & S For participants in study abroad program. Specific course content varies. Courses do not automatically apply to major/minor requirements.

SISLA 451 Cultural Geography of Latin America (5) & S Interdisciplinary senior seminar examining how physical and social geographies are culturally constructed and interconnected with subjectivities and power in Latin America. Topics include identity formation grounded in particular territories and the social constitution of space via an interplay of material and cultural forces. Offered: jointly with GEOG 451.

SISLA 470 Latin American Studies Internship (1-5, max. 10) Off-campus fieldwork with a community national, or international organization, in an apprenticeship or internship situation. Supervised by on-site field supervisor and Latin American Studies faculty member.

SISLA 480 Labor and Popular Movements in Latin America (5) & S Bergquist Interdisciplinary approach to origins and trajectory of labor movement from late nineteenth century to present. Emphasis in contemporary period on popular movements, including neighborhood associations, religious base communities, women’s movement, and ethnic mobilization for democratic social and political reform. Recommended: two non-language Latin American studies courses. Offered: jointly with HSTAA 480.

SISLA 483 Technology and Culture in the Making of Contemporary Empires (5) & S Benitez, Rodriguez-Silva Explores struggles shaping organization of US empire in the early twentieth century, focusing on sites where empire’s material, cultural, and ideological boundaries were drawn and contested. Includes race, gender and class as colonial formation; technologies of imperial governance such as public health, citizenship, and territory. Offered: jointly with HIST 483.

SISLA 486 Photography and Cultural Studies in Latin America (5) & S/LCPA Doremous, Steele Interdisciplinary exploration of the connections between visual anthropology (ethnography through photography and film), documentary and art photography, and colonial and post-colonial discourse in Latin America during the twentieth century. Prerequisite: either SPAN 303 or SPAN 316; SPAN 322; one additional 300-level course beyond 303. Offered: jointly with SPAN 486.

SISLA 489 The Mexico-U.S. Border in Literature and Film (5) & S/LCPA Steele Analysis of the Mexico-U.S. Border region in literature and film of the 1990s and early 2000s. Includes migration, tourism, NGOs, globalization, transnational commerce, multiculuralism, and politics of gender, sexuality and race. Prerequisite: either SPAN 303 or SPAN 316; either SPAN 321 or SPAN 322; one additional 300-level course above SPAN 303. Offered: jointly with SPAN 489.

SISLA 490 Special Topics (1-5, max. 15) & S Content varies.

SISLA 492 Latin American Studies Seminar (5, max. 15) & S

SISLA 499 Undergraduate Research (1-5, max. 15)

International Studies (Middle Eastern Studies)

SISME 210 Introduction to Islamic Civilizations (5) & S/LCPA DeYoung Major developments in Islamic civilization from advent of Islam in seventh century to present. Islamic history, law, theology, and mysticism, as well as the politics, cultures, and literatures of the various Islamic societies. Offered: jointly with NEAR E 210.

SISME 213 Introduction to the Modern Middle East (5) & S Major social and political trends in the Middle East during the 18th, 19th, and 20th centuries. Basic principles of Islam and its diversity, changing balance of power during the early modern period; European colonialism and withdrawal; pan-Arabism, nationalism, feminism and religious resurgence. Offered: jointly with NEAR E 213.

SISME 399 Study Abroad: Middle Eastern Studies (1-5, max. 15) & S For participants in study abroad program. Specific course content varies. Courses do not automatically apply to major/minor requirements.

SISME 400 The Middle East in the Modern World (5) & S Kasaba Economic, political, and cultural ties between the Middle East and the modern world between the eighteenth century and the present. Particular attention to the transformation of societies, formation of modern states, the relationship between Islam and democracy, and gender and society in the Middle East.

SISME 420 International Humanitarian Law (5) & S Lorenz Investigates International Humanitarian Law (sometimes called the Law of Armed Conflict), the field concerned with rules developed by civilized nations to protect the victims of armed conflict, including the Geneva Conventions. Case studies include the conflict
Russian, East European, and Central Asian Studies

SISRE 405 Peoples of Russia (5) I&S
Traditional cultural and social organizations of the various nationalities in Russia. Particular emphasis on peoples of Siberia. Role of traditional culture in shaping contemporary lifestyles in a multietnic, diversified setting. Prerequisite: one 200-level ANTH course or LING 203. Offered: jointly with ANTH 405.

SISRE 410 Writers and Intellectuals of Central Asia (3) I&S/VLPA Covers modern native writers and intellectuals of Central Asia and compares them with writers educated before the revolution of 1917. Prerequisite: NEAR E/ SISRE 375.

SISRE 418 Eastern Europe: the Political Economy of the Region (5) I&S Poznanski Focus on the classical command-type economy and the most recent economic and political transition in Eastern Europe. Analysis of current institutional reform, privatization, and trade relations.

SISRE 425 Anthropology of the Post-Soviet States (5) I&S Bilanik Analysis of Soviet and post-Soviet culture and identity. Historical transformations in Soviet approaches to ethnicity and nationality; contemporary processes of nationbuilding and interethnic conflict. Examination of culture through the intersection of social ritual, government policies, language, economic practices, and daily life. Regional focus will vary. Offered: jointly with ANTH 425.

SISRE 443 Kievan and Muscovite Russia: 850-1700 (5) I&S Development of Russia from earliest times to the reign of Peter the Great. Offered: jointly with HSTAM 443.

SISRE 444 Imperial Russia: 1700-1900 (5) I&S Young Development of Russia from Peter the Great to Nicholas II. Offered: jointly with HSTEU 444.

SISRE 448 Twentieth-Century Russia (5) I&S Young Russia and the USSR from Nicholas II to the present. Offered: jointly with HSTEU 445.

SISRE 450 Survey of the Cultures of the Turkic Peoples of Central Asia (3) I&S/VLPA Nomadic and sedentary cultures of the Turkic peoples of Central Asia. Emphasis on languages, literature, and adherence to traditional modes of life. Offered: jointly with NEAR E 450.

SISRE 455 Marine Business Environment in Russia and Eastern Europe (3) I&S Kaczynski International marine business environment of Russia and the maritime nations of East Europe; their transition process from communist to free market economic systems. Covers aspects of doing business in marine-related fields such as shipping, fisheries, shipbuilding, ports, and land infrastructures, marine tourism, and water sports. Offered: jointly with SMA 455.

SISRE 479 Contemporary Central Asian Politics (5) I&S Radtitz Examines the politics of contemporary post-Soviet Central Asia. Analyzes issues relevant to the region in comparative perspective, including democratization, religion, terrorism, civil society, economic reform, ethnic identity, and international influences. Uses theory to shed light on current policy debates. Offered: jointly with POL S 479.

SISRE 490 Special Topics (1-5, max. 15) I&S Topics vary.

SISRE 501 Bibliography and Research Methods (5) I&S Introduction to bibliographic and other scholarly resources in field; development of research techniques. Some use of relevant language required. Required of all first-year MAIS students.

SISRE 502 Thesis Seminar I (2-) Mikkelsen Review of research techniques: preparation for drafting master’s thesis. Required of all second-year MAIS students. Credit/no credit only. Offered: A.

SISRE 503 Thesis Seminar II-4L-2 Mikkelsen Seminar to complete draft of master’s thesis. Some use of relevant language required. Required of all second-year MAIS students. Offered: W.

SISRE 504 Approaches to East European Politics (3-5) Selected concepts and methodologies useful for the analysis of politics and social structure in the socialist countries of east-central and southeastern Europe. Prerequisite: permission of instructor. Offered: jointly with POL S 537.

SISRE 505 Seminar: Problems of Social and Political Development in Eastern Europe (3-6, max. 6) Research seminar dealing with selected problems of continuity and change in eastern Europe. Prerequisite: some previous coursework on eastern Europe.

SISRE 555 Comparative Marine Business in the North Pacific (3) Kaczynski Strategies of Russian, Canadian, Japanese, and American enterprises and governments in promotion of marine business in the North Pacific. Socio-economic characteristics of the four powers; role of public and private sectors in foreign trade and investment; Russia’s transition to free-market economic system; and business practices in the region. Offered: jointly with SMA 555.

SISRE 579 Contemporary Central Asian Politics (5) I&S Radtitz Examines the politics of contemporary post-Soviet Central Asia. Analyzes issues relevant to the region in comparative perspective, including democratization, religion, terrorism, civil society, economic reform, ethnic identity, and international influences. Uses theory to shed light on current policy debates. Offered: jointly with POL S 579.
SISSA 590 Special Topics (2-5, max. 10) Course content varies. Offered occasionally by visitors or resident faculty.

SISSRE 600 Independent Study or Research (*)

SISSRE 700 Master’s Thesis (*)

South Asian Studies

SISSA 200 South Asia Today (5) I&S Dhavan Interdisciplinary introduction to the field of South Asian Studies. Overview of the topographic, social, and linguistic geography and history of India, Pakistan, Bangladesh, Sri Lanka, and Nepal. Examines politics, economy, social structure, religion, cultural production and the arts, popular culture, and transnationalism.

SISSA 202 Introduction to South Asian History, 1500 - present (5) I&S The Islamic impact, British conquest, and contemporary India. Emphasis on the rise of nationalism, social organization, and contemporary life and history. Offered: jointly with HSTAS 202.

SISSA 303 Divided Lands/Divided Lives: An Environmental History of South Asia (5) I&S Focuses on the mobilization of South Asian tribal, peasant, and ethnic communities around ecological issues to secure social equity in the colonial and post-colonial period. Examines how the complex interactions of states and peoples have changed the ways in which nature itself is conceptualized. Offered: jointly with HSTAS 303.

SISSA 316 Modern South Asia (5) I&S Twentieth-century history and society of Indian subcontinent. Topics include nationalism, rural and urban life, popular culture gender and environmental politics. Offered: jointly with ANTH 316.

SISSA 339 Social Movements in Contemporary India (5) Ramamurthy Covers issues of social change, economic development, and identity politics in contemporary India studied through environmental and women’s movements. Includes critiques of development and conflicts over forests, dams, women’s rights, religious community, ethnicity, and citizenship. Offered: jointly with WOMEN 339/ANTH 339.

SISSA 341 Political Violence and the Post-Colonial State in South Asia (5) I&S Examines theoretical approaches to the analysis of collective, state, and anti-state violence in post-colonial South Asia through the study of specific cases of political violence in modern India, Pakistan, Sri Lanka, and Nepal. Offered: jointly with ANTH 341.

SISSA 343 Comparative Geographies of Youth (5) I&S Jeffrey Examines how three key global processes - rising levels of formal education, changing health regimes, and environmental transformation - are shaping youth in the US and South Asia. Examines ways in which young people rework broader structures, paying particular attention to their economic livelihoods, cultural practices, and political engagements. Offered: jointly with GEOG 343; A.

SISSA 399 Study Abroad: South Asian Studies (1-5, max. 15) I&S For participants in study abroad programs. Course content varies. Courses do not automatically apply to major/minor requirements.

SISSA 417 Political Economy of India (5) I&S Analysis of relationships among processes of economic change, political institutions, and structures of political power in contemporary India. Includes contrasting approaches to Indian economic development, land reform, radical and agrarian political movements, and role of foreign aid. Offered: jointly with POL S 417.

SISSA 434 International Relations of South Asia (5) I&S Interrelationships of domestic, interstate, and extraregional forces and their effects upon the resolution or expansion of interstate conflicts in South Asia. Offered: jointly with POL S 434.

SISSA 436 Social and Political Geographies of South Asia (5) I&S Jeffrey Introduces the social and political geographies of South Asia through reference to agrarian change in India. Outlines key concepts related to the reproduction of inequality in the region, particularly theories of caste, class, gender, and religious communalism, and examines the mechanisms through which these inequalities are reproduced in South Asia. Offered: jointly with GEOG 436, Sp.

SISSA 490 Special Topics (1-5, max. 15) I&S Topics vary.

SISSA 494 Ramayana in Comparative Perspective (5) VLP A. Pawel Examinations and compares different versions (mainly South Asian) of the Ramayana, including the widely popular television version. Focuses on some famous and controversial passages, with special attention to gender issues. Incorporates background readings from the most recent research. Offered: jointly with ASIAN 494.

SISSA 498 Undergraduate Colloquium on South Asia (5) I&S Interrelationship of the various sociocultural disciplines in the study of South Asian history and culture.

SISSA 499 Undergraduate Research (1-5, max. 15)

SISSA 510 Interdisciplinary Study of South Asia I (5) Examines key themes and debates about the development of South Asian cultural and political formations. Examines how different scholarly disciplines, particularly those in the humanities, have approved and analyzed the past in South Asia.

SISSA 511 Interdisciplinary Study of South Asia II (5) Jeffrey, Kale Examination of key themes and debates about the development of South Asian cultural and political formations. Examines how different scholarly disciplines, particularly those in the social sciences, analyze political transitions, social change, and cultural transformations in South Asia through the twentieth century. Offered: W.

SISSA 512 South Asian Studies Research Design Seminar (5) Robinson Interdisciplinary seminar for graduate students in which research and writing on individual research topics are critically developed. Designed to provide each student with an opportunity to synthesize his or her studies on South Asia. Prerequisite: SISSA 510; SISSA 511 or permission of graduate program coordinator.

SISSA 536 Advanced Research Seminar on South Asian Geographies (5) Jeffrey Examines geographies of social inequality in South Asia through reference to how space, place, and the environment are shaping practices of political struggle in the region. Considers how liberalization, democratization and religious communalization are changing the political geography of South Asia. Offered jointly with GEOG 536, Sp.

SISSA 539 Social Movements in Contemporary India (5) Ramamurthy Covers issues of social change, economic development, and identity politics in contemporary India studied through environmental and women’s movements. Includes critiques of development and conflicts over forests, dams, women’s rights, religious community, ethnicity, and citizenship. Offered: jointly with WOMEN 539/ANTH 539.

SISSA 590 Special Topics (2-5, max. 10) Seminar. Course content varies. Offered occasionally by visitors or resident faculty.

SISSA 600 Independent Study or Research (*)

SISSA 700 Master’s Thesis (*)

Southeast Asian Studies

SISSA 221 History of Southeast Asia (5) I&S Giebel, Sears Surveys Southeast Asian civilizations at the outset of Western colonial rule; the colonial impact on the traditional societies of Burma, Thailand, Cambodia, Laos, Vietnam, Malaysia, Indonesia, and the Philippines; nineteenth- and twentieth-century nationalist and revolutionary movements; emergence of Southeast Asia as a region in the modern world. Offered: jointly with HSTAS 221.

SISSA 265 The Viet Nam Wars (5) I&S Giebel Recent Vietnamese history and struggles for independence and national unification vis-a-vis French colonialism, Japanese occupation, American intervention, and internal divisions. Covers historical roots and contemporary contexts of revolution and war, objectives and motivations of participants, and the enormous human costs. Emphasizes socio-cultural changes and wars’ legacies. Offered: jointly with HSTAS 265.

SISSA 314 Culture, Environment, and Identity in Island Southeast Asia (5) I&S Lowe Anthropological study of colonial and post-colonial contexts of Island Southeast Asia. Emphasis on historical legacies, influence of world religions, formation of national and collective identities, revolution and national politics, and modernities. Prerequisite: either one 200-level ANTH course, LING 203, or one SIS course. Offered: jointly with ANTH 314.

SISSA 315 Southeast Asian Civilization: Buddhist and Vietnamese (5) I&S Civilizations of Theravada Buddhist societies in Burma, Thailand, Cambodia, and Laos and in Vietnamese societies of Southeast Asia. Culture of tribal peoples who live on peripheries of these societies. Cultural transformations consequent upon the war in Indochina and resettlement of Indochinese refugees in United States. Offered: jointly with ANTH 315.

SISSA 343 Politics and Change in Southeast Asia (5) I&S Callahan Government and politics in the countries of Southeast Asia, with attention
given to the nature of the social and economic environments that condition them. Offered: jointly with POL S 343.

SISSE 364 Violence, Myth, and Memory (5) VLPA/I&S Sears Explores how images and ideas of power, violence, and cultural memory circulate in and about US relations with Vietnam, the Philippines, and Indonesia. Topics include the politics of illusion, colonial and post-colonial encounters, historiography, and nationalism. Offered: jointly with HSTAS 346; Sp.

SISSE 387 Southeast Asian Activism and Social Engagement (5) I&S Rafeal Investigates how Southeast Asian activism is tied to the histories of political struggle within Southeast Asia and to questions of diasporic American identity. Engages in group research projects exploring the meaning of social activism within local communities. Offered: jointly with HIST 367; Sp.

SISSE 376 Violence, Myth, and Memory (5) VLPA/I&S Benitez, Rodriguez-Silva Explores how images and ideas of power, violence, and cultural memory circulate in and about Southeast Asia. Includes a laboratory for students planning to take a foreign language or linguistics. Offered: jointly with HIST 367; Sp.

SISSE 399 Study Abroad: Southeast Asian Studies (1-5, max. 15) I&S For participants in study abroad program. Specific course content varies. Courses do not automatically apply to major/minor requirements.

SISSE 420 Southeast Asian Knowledge and the Politics of Information (5) I&S Henchy Overview of information resources in and about Southeast Asia, including evaluation of those sources within various theoretical articulations (scholastic, cultural, and political). Pedagogical implications of the life cycle of information; critique of these implications from various theoretical and cultural viewpoints.

SISSE 432 Technology and Culture in the Making of Contemporary Empires (5) I&S Benitez, Rodriguez-Silva Explores the struggles that shaped organization of the U.S. empire at the turn of the 20th century, focusing on how empire-formation, materials, cultural, and ideological boundaries were drawn. Topics include race, gender, and class as colonial formations; technologies of imperial governance such as public health, citizenship and territory; and popular culture. Offered: jointly with C LIT 432.

SISSE 445 Literature and Society in Southeast Asia (5, max. 10) I&S/VLPA Focus on either Vietnam or Thailand. Provides students with opportunity to explore how those living in Southeast Asia have reflected on the radical social changes their societies have undergone through novels, short stories, and poetry. Prerequisite: one 200-level ANTH course or LING 203. Offered: jointly with ANTH 445.

SISSE 465 The Viet Nam Wars (5) I&S Siegel Recent Vietnamese history and struggles for independence and national unification vis-a-vis French colonialism, Japanese occupation, American intervention, and internal divisions. Covers historical roots and contemporary contexts of revolution and war, objectives and motivations of participants, and the enormous human costs. Emphasizes socio-cultural changes and wars' legacies. Offered: jointly with HSTAS 465.

SISSE 466 Islam, Mysticism, Politics and Performance in Indonesian Culture (5) I&S/ VLPA Sears Shows how Indonesia, the world's fourth-most-populous country, with the largest Islamic population, weaves together local practices and influences from India and Persia. Offers ways of understanding modern Indonesian performing arts, religion, and politics. Offered: jointly with HSTAS 446.

SISSE 486 Theatre as a Site of History and Memory (6) GE Students Explores Asian theatre traditions as sites of memory, testimony, and archive using ethnographic and historiographical approaches. Includes service-learning components and collaborative performance projects. Offered: jointly with HIST 468; Sp.

SISSE 469 Topics in Southeast Asian History and Society (5) I&S Introduces major issues within the history and culture of one country of Southeast Asia. Content varies. Topics may include religion, economics, colonialism, perspectives on gender, labor history, literatures, popular culture, and performing arts. Focuses on a different Southeast Asian country each time offered.

SISSE 490 Special Topics in Southeast Asian Studies (1-5, max. 15) I&S Content varies.

SISSE 499 Undergraduate Research (1-5, max. 15) I&S Focuses on foundational myths, colonial and post-colonial encounters, historiography and narrative, and nationalist and ethnic identity formations. Offered: jointly with C LIT 376.

LING 100 Fundamentals of Grammar (5) VLPA Introduction to basic grammatical concepts and terminology. Specifically intended for students planning to take a foreign language or linguistics. Does not count toward the linguistics major or minor.

LING 101 Fundamentals of Pronunciation for Language Learners (5) VLPA Kaise Fundamentals of pronunciation for language learners. Introduces students to systematic characteristics of language sounds through examination of specific languages and their differences from English. Includes a laboratory component developing perceptual and productive skills of non-English sounds.

LING 200 Introduction to Linguistic Thought (5) I&S/ VLPA, QSR Language as the fundamental characteristic of the human species; diversity and complexity of human languages; phonological and grammatical analysis; dimensions of language use; language and writing; impact of historical linguistics on contemporary theory. Not open for credit to students who have completed LING 201.

LING 201 Introduction to Linguistic Theory and Analysis (5) I&S/VLPA, QSR Background and scope of modern linguistics; behaviorist versus rationalist theories of language; universal and cognitive aspects of language structure; interplay of genetic and social factors in language formation; linguistic analysis. Not open for credit to students who have completed LING 200.

LING 203 Introduction to Anthropological Linguistics (5) I&S/ VLPA Hargus, Hurrn, Palmer Linguistic methods, theories used within anthropology. Basic structural features of language; human language and animal communication compared; evidence for the innate nature of language. Language and culture: linguistic relativism, ethnography of communication, sociolinguistics. Language and nationalism, language politics in the U.S. and elsewhere. Offered: jointly with ANTH 203.

LING 220 Origins of the Germantian Languages (5) VLPA Barrack, Voyles Introduction to basic grammatical concepts, terminology, and linguistics with emphasis on German-English relationship. Overview of phonology, morphology, syntax, and history of Germanic languages and people, both ancient and modern. Languages covered include Old, Middle, and New High German; English, Frisian, Dutch, Old Saxon, and Gothic. Taught in English. Offered: jointly with GERMAN 220; AWS&P.

LING 242 Introduction to Meaning (5) VLPA Ogihara Non-technical introduction to meaning in language and how it functions in communication and thinking. Discussion of how and why meanings of words change through time. Prerequisite: either LING 200, LING 201, ANTH LING 203, or LING 400.

LING 270 Introduction to Perl Programming for Linguists (5) Bender Fundamental programming techniques, including data types, control flow, regular expressions, file handling, GUI design, and CGI interaction. Content relates to a variety of linguistic concepts including syntax, morphology, phonology, lexicon building and foreign language corpora. No previous programming necessary; however, a background in general linguistic theory is assumed. Offered: W.

LING 333 Linguistics and Society (3) I&S/ VLPA Interaction of language, culture, and society, and the relationship of linguistic theory to societal problems. Ethical and political considerations involved in the application of linguistic theory.

LING 347 Psycholinguistics (5) I&S/ VLPA Corina, Osterhout Introduction to the study of language, including language structure, speech perception, language acquisition, psychological processes underlying comprehension and production of language, the relation between brain and language, and the question of the species-specificity of human language. Prerequisite: 2.0 in either PSYC 209 or either LING 200 or LING 201. Offered: jointly with PSYCH 347.
LING 372 Language and Translation (5) VLPA Tarlinskaja Role of linguistic concepts in the process of translation from one language to another. Attention to both language universals and language particulars.

LING 390 Foreign Studies in Linguistics (3-5, max. 10) I&S For students who take linguistics courses while participating in a University of Washington study abroad program and for which there is no direct University of Washington equivalent.

LING 400 Survey of Linguistic Method and Theory (5) I&S/VLPA, QSR Examines major linguistic theories in phonology, syntax and semantics; linguistic analysis and argumentation. Not available for credit to students who have completed LING 200.

LING 401 The Linguistic, Philosophical, and Political Thought of Noam Chomsky (3) I&S/VLPA Relation of current work in Chomskyan linguistics to philosophical, psychological, political, and educational thought.

LING 403 Structure of American Sign Language (5) VLPA Hargus Introduction to the phonological, morphological, and syntactic structure of American Sign Language. Topics include acquisition, sociolinguistics, neurolinguistics, lexicography, history, and culture. Knowledge of American Sign Language is not required. Prerequisite: LING 200, 201, 203, or 400.

LING 404 Indo-European (3) VLPA Voyles Overview of the Indo-European languages, of comparative method, and of the phonology, morphology, and syntax of reconstructed Indo-European. Grammatical analyses and texts from various attested ancient and modern Indo-European languages, selected according to the interests of the students.

LING 405 Indo-European (3) VLPA Voyles Overview of the Indo-European languages, of comparative method, and of the phonology, morphology, and syntax of reconstructed Indo-European. Grammatical analyses and texts from various attested ancient and modern Indo-European languages, selected according to the interests of the students.

LING 406 Indo-European (3) VLPA Voyles Overview of the Indo-European languages, of comparative method, and of the phonology, morphology, and syntax of reconstructed Indo-European. Grammatical analyses and texts from various attested ancient and modern Indo-European languages, selected according to the interests of the students.

LING 407 Languages of the World (5) VLPA Braine, Klausenburger A survey of the world’s languages, focusing on their syntactic, phonological, and morphological properties. Prerequisite: either LING 200, LING 201, ANTH/LING 203, or LING 400.

LING 411 Native Languages and Language Families of Washington State (3) VLPA Hargus Survey of linguistic structures of Washington native languages. Language families consist of Salish, Wakashan, Chemakuan, Athabaskan, Chinookan, Sahaptian, Cayuse. Structure and origin of Chinook jargon. Prerequisite: LING 450; either LING 461 or LING 481.

LING 415 History of the German Language (5) VLPA Traces the history of the German language from early Germanic to the present. Recommended: LING 200 and GERMAN 203 Offered: jointly with GERMAN 452.

LING 419 The Development of the Italian Language (5) VLPA Historical survey of Italian phonology, morphology, and syntax. Evolution of the language is illustrated with study of pertinent documents from various periods. Prerequisite: ITAL 303; either LING 400 or ROLING 401. Offered: jointly with ITAL 400.

LING 432 Sociolinguistics I (5) I&S/VLPA Wassink Social variation in the phonology, morphology, syntax of languages and dialects. Nonstandard language, diglossia, pidgins and creoles, gender differences, bi- and multilingualism, ethnography of speaking, pragmatics, and language attitudes. Prerequisite: either LING 200 or LING 400; recommended: prior or concurrent registration in LING 450. Offered: jointly with ANTH 432.

LING 433 Sociolinguistics II (5) I&S/VLPA Wassink Examines field methods linguists use in socially oriented studies of language variation and change. Includes language attitudes, study of urban dialects, syntactic variation, sampling and interview design. Discussion of issues related to recording, ethics, and analysis of large bodies of data. Prerequisite: LING 432. Offered: jointly with ANTH 433.

LING 430 Pidgin and Creole Languages (5) VLPA/I&S Wassink Explores aspects of the linguistic structure, history, and social context of pidgin and creole languages. Creolization as one possible outcome of language contact. Examines theories of creologenesis, similarities and differences between creole and non-creole languages. Prerequisite: either ANTH 203, LING 200, LING 201, LING 203, or LING 400. Offered: jointly with ANTH 439.

LING 441 Linguistics and Poetic Language (3) VLPA Introduction to the relationship between linguistic structures, linguistic universals, and the poetic uses of language; linguistic description in the analysis of literature. Prerequisite: either LING 200, LING 201, ANTH/LING 203, or LING 400.

LING 442 Semantics I (5) NW/VLPA Ogihara Introduction to the study of meaning as part of linguistic theory. Relation of semantics to syntax. Emphasis on formal semantics and pragmatics. Discussion of various semantic phenomena in natural language that are theoretically relevant. Prerequisite: LING 461, Syntax 1.

LING 443 Philosophy and Linguistics (3) I&S/VLPA Philosophical problems that arise in the attempt to understand current linguistic theories and the implications of linguistics for philosophy. Offered: jointly with PHIL 443.

LING 445 Descriptive Aspects of English as a Foreign Language (3) VLPA Linguistic analysis as a basis for the teaching of English as a foreign language; language as rule-governed behavior. Prerequisite: either LING 200, LING 201, ANTH/LING 203, or LING 400.

LING 446 English Phonology (3) VLPA Hargus, Kaisse Descriptively oriented approach to English phonology and morphology; dialectal differences. Prerequisite: LING 450.

LING 447 Psychology of Language II (4) I&S/VLPA Conia, Osterhout Psychological principles applied to linguistic development and organization: language in both its stimulus and response aspects. Prerequisite: 2.0 in either PSYCH 347, PSYCH 355, or LING 400. Offered: jointly with PSYCH 447.

LING 449 Second-Language Learning (5) VLPA, Herschensohn, Tarlinskaja Issues related to the linguistic aspects of second-language learning. Prerequisite: either LING 200, LING 201, ANTH/LING 203, or LING 400.

LING 450 Introduction to Linguistic Phonetics (5) NW/VLPA Wright Introduction to the articulatory and acoustic correlates of phonological features. Issues covered include the mapping of dynamic events to static representations, phonetic evidence for phonological description, universal constraints on phonological structure, and implications of psychological speech-sound categorization for phonological theory. Prerequisite: either LING 200 or LING 400.

LING 451 Phonology I (5) I&S/VLPA Hargus, Kaisse Speech sounds, mechanism of their production, and structuring of sounds in languages; generative view of phonology; autosegmental and metrical phonology. Prerequisite: LING 450.

LING 452 Phonology II (5) I&S/VLPA Hargus, Kaisse Speech sounds, mechanism of their production, and structuring of sounds in languages; generative view of phonology; autosegmental and metrical phonology. Prerequisite: LING 451.

LING 454 Methods in Comparative Linguistics (3) VLPA, Shapiro, Voyles Method and theory of historical and comparative linguistics. Problems of phonological, morphological, syntactic, and semantic change and reconstruction. Prerequisite: either LING 200, LING 201, ANTH/LING 203, or LING 400.

LING 455 Areal Linguistics (3, max. 6) I&S/VLPA Issues involved in classification of languages. Systems of classification based on structure, word order, areal features. Ways in which languages may be classified for different purposes. Processes such as borrowing, vocabulary specialization, lexical change, and language death and revival. Prerequisite: either LING 200, LING 201, ANTH/LING 203, or LING 400. Offered: jointly with ANTH 455.

LING 457 Language Development (5) I&S/VLPA First-language acquisition and use by children. Emphasis on theoretical issues and research techniques. Prerequisite: 2.0 in either
PSYCH 206, PSYCH 306, LING 200, or LING 400. Offered: jointly with PSYCH 457.

LING 458 Language and Gender (5) I&S, VLPA
Bilaniuk Survey of the theoretical trends, methods, and research findings on the relationship between language and gender. Focus on power relations in gendered language use. Extensive study of research based on conversational analysis. Prerequisite: LING 200; either LING 201, LING 203, or ANTH 203. Offered: jointly with ANTH 450/WMEN 450.

LING 461 Syntax I (5) I&S/VLPA Brame, Contreras, Kim, Newmeyer, Zagora Study of the structural properties of language; introduction to generative transformational syntax. Prerequisite: either LING 200 or LING 400.

LING 462 Syntax II (5) I&S/VLPA Brame, Contreras, Kim, Newmeyer, Zagora Study of the structural properties of language; introduction to generative transformational syntax. Prerequisite: LING 461.

LING 463 Syntax III (4) I&S/VLPA Brame, Contreras, Kim, Newmeyer, Zagora Study of the structural properties of language; introduction to generative transformational syntax. Prerequisite: LING 462.

LING 464 Language Politics and Cultural Identity (3) I&S/VLPA Bilaniuk Theories and case studies of the power of language and how it is manipulated. Multilingualism, diglossia. Role of language and linguistics in nationalism, Standardization, educational policy, language and ethnicity. World languages, language death and revival. Prerequisite: either LING 200, LING 201, ANTH/LING 203, or LING 400. Offered: jointly with ANTH 464.

LING 470 Discourse: Analyzing Talk and Texts (5) I&S/VLPA A critical and practical introduction to contemporary theories/methods in discourse analysis: how verbal communication (together with visual communication) is used in conversational talk and meditized texts to construct identities and relationships; and how power and ideology are reproduced through these everyday social interactions. Offered: jointly with COM 470.

LING 471 Computational Methods for Linguists (5) QSR Overview of methods for working with linguistic data in electronic form: electronic corpora, linguistic software tools, textual data formats, operating system fundamentals, and basic programming. Prerequisite: either LING 450 or LING 461.

LING 472 Introduction to Computational Linguistics (5) NW/L/CA Hoard/Introduction to computer applications of linguistic theory, including syntactic processing, semantic and pragmatic interpretation, and natural language generation. Prerequisite: either LING 200 or LING 400; either LING 461 or CSE 321. Offered: jointly with CSE 472.

LING 473 Basics for Computational Linguistics (3) Examines computer applications involving automatic processing of natural language speech or text by machines. Intended as preparation for CLMA core courses. Includes concepts form probability and statistics; formal grammars and languages; finite-state automata and transducers; review of algorithms and data structures; and software for using parallel server cluster. Prerequisite: CSE 326; STAT 391; programming in Perl, C, C++, Java, or Python. Offered: S.

LING 479 Semantics II (3) I&S/ NW/LPA Ogihara Formal characterization of linguistic meaning. Emphasis on nature and purpose of formal semantics and on its relation to formal syntax. Prerequisite: LING 442. Offered: jointly with PHIL 479.

LING 480 Topics in Linguistics (3, max. 12) VLPA Introduction to an area of linguistic study not covered by the regular departmental course offerings.

LING 481 Introduction to Morphology (5) VLPA Brame, Hargus, Kaisse, Newmeyer Structure of words and the processes by which they are formed. Morphological processes in a wide variety of languages. Prerequisite: either LING 200 or LING 400.

LING 484 Lexical Semantics and the Lexicon (3) I&S/VLPA Kim A study of the lexicon in syntactic semantics. Topics include the syntax-lexicon mapping; theories of argument structure; complex predicate formation and lexical subordination; the lexicon and language acquisition; the relation between the lexicon and linguistic theory; and the lexicon and sentence processing. Prerequisite: LING 461.

LING 490 Undergraduate Fieldwork (1-3, max. 6) Individual consultation with faculty member and supervised practical experience in a broad range of industry, community, clinical settings dealing with linguistic issues. Credit/no credit only. Offered: AWSpS.

LING 499 Undergraduate Research (1-5, max. 10) Credit/no credit only.

LING 501 Field Methods (3) Guided analysis of a language unfamiliar to all students of the class; construction of a grammar based on material elicited from native informant. Prerequisite: LING 452, LING 462, or LING 508.

LING 502 Field Methods (3) Guided analysis of a language unfamiliar to all students of the class; construction of a grammar based on material elicited from native informant. Prerequisite: LING 452, LING 462, or LING 508.

LING 503 Field Methods (3) Guided analysis of a language unfamiliar to all students of the class; construction of a grammar based on material elicited from native informant. Prerequisite: LING 453, LING 462, or permission of instructor.

LING 507 Syntactic Theory I (4) Introduction to the principles and parameters model of syntactic theory. The lexicon and its relation to syntactic representations. Syntactic modules and principles. Problem solving.

LING 508 Syntactic Theory II (4) Further explorations in principles and parameters syntax. Topics include logical form, island phenomena, locality restrictions, and licensing. Prerequisite: LING 507 or permission of instructor. Offered: W.

LING 509 Syntactic Theory III (4) Focus on primary readings in syntactic theory, from classic papers on constraints and the architecture of grammar to recently published articles. Prerequisite: LING 508 or permission of instructor. Offered: Sp.

LING 514 Seminar in Comparative Linguistics (3) Kaise Nineteenth- and twentieth-century theories of phonological change. Prerequisite: LING 404 or permission of instructor.

LING 515 Topics in the History of German Languages (5) Barrack, Voyles Topics in diachronic studies of Germanic languages such as Gothic, Old High German, Old Saxon.

LING 519 Mathematical Models of Grammar (3) Brame, Ogihara Study of some mathematical models of language recognition, emphasizing context-free and context-sensitive grammars. Prerequisite: graduate standing in mathematics, linguistics, or psychology, or permission of instructor.

LING 522 Topics in the History of Linguistics (3) Newmeyer Intensive investigation of the main trends in the history of linguistics, concentrating on the development of nineteenth-century historical linguistics, the various schools of structural linguistics, and transformational generative grammar. Prerequisite: LING 451.

LING 524 Seminar in Theoretical Linguistics (4, max. 12) Individual and joint research on selected topics in theoretical linguistics. Topics change each quarter. Typical topics are semantics, generative grammar, phonological theories. Prerequisite: LING 453, LING 463.

LING 525 Seminar in Theoretical Phonology (4, max. 12) Individual and joint research on selected topics in theoretical phonology. Topics vary. Typical offerings include phonology and the lexicon, syntax and phonology, phonological representations. Prerequisite: LING 452.

LING 530 Dialectology (3) The principles of dialect deviation as related to linguistic structure and usage. Prerequisite: LING 452, LING 462, LING 508, or permission of instructor. Offered: jointly with ANTH 530.

LING 531 Problems in Romance Linguistics (2-5, max. 15) Group seminar, or individual conferences are scheduled under this number to meet special needs. Prerequisite: permission of graduate program coordinator. Offered: jointly with ROLING 531.

LING 533 Topics and Methods in Sociolinguistic Theory (5) Wassink Study of urban dialects and contact-induced change. Language attitudes and syntactic variation. Field methods used in socially oriented studies of language variation and change. Sampling and interview design. Discussion of issues related to recording, ethics, and analysis of large bodies of data. Prerequisite: LING 432.

LING 534 Sociolinguistic Applications of Social Network Theory (5) Wassink Examines structure and content of social networks from a linguistic perspective. Reviews applications of graph theory and sociometry in sociolinguistics. Examines how language is embedded in personal networks and how the study of linkages between individuals can elucidate the regularity and direction of language change. Prerequisite: LING 400 and LING 432.

LING 535 Advanced Sociolinguistics (5, max. 10) Wassink Explores perspective on language change and its mechanisms, understood in relation to the social context of language use in the speech community. Examines language-
LING 451, LING 452, or permission of instructor.

LING 550 Advanced Phonology (2-3) Hargus, Kaisse Problems in phonological theory, generative phonology, phonological change. Theories of prosody. Prerequisite: LING 452.

LING 551 Phonology I: Introduction to Phonological Analysis (5) Hargus Patterns of sounds and signs in human languages; morpheme alterations in generative phonology; autosegmental approach to tone; syllable structure. Prerequisite: LING 550. Offered: WSpS.

LING 552 Phonology II: Advanced Phonology (5) Hargus Optimality theory; phonetics-phonology interface. Prerequisite: LING 551.

LING 553 Analysis of Linguistic Structures (3, max. 6) Syntactic, semantic, and/or phonological analysis. Languages to be analyzed vary. Prerequisite: permission of instructor. Offered: jointly with ANTH 553.

LING 554 Advanced Linguistic Phonetics (3, max. 9) Wright, Wassink Individual and joint projects on selected topics in theoretical and experimental phonetics. Topics may include articulatory timing, the phonetics phonology interface, and constraints and constraint interaction. Prerequisite: LING 450 or LING 452. Offered: Sp.

LING 561 Advanced Syntax (2-3, max. 9) Advanced study in modern syntactic theory. Topics change each quarter. Typical topics are history of transformational grammar, anaphora, logical form. Prerequisite: LING 461, LING 462.

LING 562 Advanced Syntax (2-3, max. 9) Advanced study in modern syntactic theory. Topics change each quarter. Typical topics are history of transformational grammar, anaphora, logical form. Prerequisite: LING 461, LING 462.

LING 563 Advanced Syntax (2-3, max. 9) Advanced study in modern syntactic theory. Topics change each quarter. Typical topics are history of transformational grammar, anaphora, logical form. Prerequisite: LING 461, LING 462.

LING 565 Contrastive Linguistics (3) The attempt to look across linguistic systems for comparable and contrastive classes and subclasses. Problems of subcategorization and universal grammar. Three conceptually distinct models: structural, transfer grammar, generative. Prerequisite: LING 452, LING 463.

LING 566 Introduction to Syntax for Computational Linguistics (3) Bender Introduction to syntactic analysis and concepts with emphasis on the formally precise encoding in linguistic hypotheses and the design of grammars that can be scaled to practical applications. Coursework progressively builds up a consistent grammar for a fragment of English, while also considering data and phenomena from other languages. Offered: A.

LING 567 Knowledge Engineering for Deep Natural Language Processing (3) Bender Techniques and theoretical issues relating to the development of knowledge engineering resources required for deep processing (symbolic or hybrid), focusing on grammar engineering and semantic representations.

LING 568 Problems in Linguistics (2-4) Advanced study in current theories of syntax, semantics, phonology, or morphology. Can be repeated for credit.

LING 590 Graduate Fieldwork (1-10, max. 10) Individual consultation with faculty member and supervised practical experience in a broad range of industry, community, clinical settings dealing with linguistic issues. Offered: A/WSpS.

LING 599 Linguistics Colloquium (1, max. 6) Seminar attended by faculty and graduate students to discuss research in progress and topics of general interest. Presentation of two seminars required for doctoral students. Prerequisite: permission of instructor.

LING 600 Independent Study or Research (*)

LING 700 Master's Thesis (*)

LING 800 Doctoral Dissertation (*)

American Sign Language

ASL 101 American Sign Language I (5) Introduction to American Sign Language using conversational methods. Covers vocabulary, grammatical usage, and culturally appropriate behavior within the deaf community. Offered: A.

ASL 102 American Sign Language II (5) Focuses on building mastery of American Sign Language grammar skills, increasing vocabulary, and gaining a deeper knowledge and appreciation of deaf culture. Prerequisite: ASL 101. Offered: W.

ASL 103 American Sign Language III (5) Focuses on grammatical features such as spatialization, directionality, and non-manual components. Intensive work in vocabulary development and continued study of deaf culture. Prerequisite: AL 102. Offered: Sp.

ASL 134 Intensive First Year ASL (15) Forshaw Intensive introduction to American Sign Language using conversational methods and covering vocabulary, grammatical usage, and culturally appropriate behavior. Also focused on grammatical features such as spatialization, directionality, and non-manual components. Offered: S.

ASL 305 Deaf Studies (3) I&S Introduces the language, culture, and community of Deaf people. Covers topics in Deaf history, education, sociology, language, legal issues, art and literature, organizations and services for the Deaf, technological devices, and the nature of Deafhood. Analyzes issues such as methods of Deaf education, biomedical ethics, and the social movements in Deaf community.

French Linguistics

FRLING 400 The Syntactic Structure of French (5) VLPA Scientific study of the syntax of French: phrase structure and movement, with emphasis on passives, relatives, and interrogative and relative clauses. Prerequisite: either FRENCH 203, FRENCH 223, or FRENCH 234; either LING 200 or LING 400.

FRLING 401 The Morphological Structure of French (5) VLPA Klausenbürger Lexical study of French morphology. Prerequisite: either FRENCH 203, FRENCH 223, or FRENCH 234; either LING 200 or LING 400.

FRLING 402 The Phonological Structure of French (5) VLPA Klausenbürger The phonological component of the generative grammar of French: representations of syllabic and segmental units, phonological rules, distinctive features and their articulatory correlates. Prerequisite: either FRENCH 203, FRENCH 223, or FRENCH 234; either LING 200 or LING 400.

FRLING 403 Background of Modern French (5) VLPA Klausenbürger Linguistic analysis of the important developments in the history of the French language from its Latin origin to contemporary speech. Prerequisite: either FRENCH 203, FRENCH 223, or FRENCH 234; either LING 200 or LING 400.

LING 540 Phonological Development (3) Stoeß-Gammon Selected topics in the development of phonological systems in normal-speaking children. Relationships between possible phonological inventories and rule systems in different languages. Prerequisite: LING 451, LING 452, or permission of instructor.

LING 550 Advanced Phonology (2-3) Hargus Problems in phonological theory, generative phonology, phonological change. Theories of prosody. Prerequisite: LING 452.

LING 551 Phonology I: Introduction to Phonological Analysis (5) Hargus Patterns of sounds and signs in human languages; morpheme alterations in generative phonology; autosegmental approach to tone; syllable structure. Prerequisite: LING 550. Offered: WSpS.

LING 552 Phonology II: Advanced Phonology (5) Hargus Optimality theory; phonetics-phonology interface. Prerequisite: LING 551.

LING 553 Analysis of Linguistic Structures (3, max. 6) Syntactic, semantic, and/or phonological analysis. Languages to be analyzed vary. Prerequisite: permission of instructor. Offered: jointly with ANTH 553.

LING 554 Advanced Linguistic Phonetics (3, max. 9) Wright, Wassink Individual and joint projects on selected topics in theoretical and experimental phonetics. Topics may include articulatory timing, the phonetics phonology interface, and constraints and constraint interaction. Prerequisite: LING 450 or LING 452. Offered: Sp.

LING 561 Advanced Syntax (2-3, max. 9) Advanced study in modern syntactic theory. Topics change each quarter. Typical topics are history of transformational grammar, anaphora, logical form. Prerequisite: LING 461, LING 462.

LING 562 Advanced Syntax (2-3, max. 9) Advanced study in modern syntactic theory. Topics change each quarter. Typical topics are history of transformational grammar, anaphora, logical form. Prerequisite: LING 461, LING 462.

LING 563 Advanced Syntax (2-3, max. 9) Advanced study in modern syntactic theory. Topics change each quarter. Typical topics are history of transformational grammar, anaphora, logical form. Prerequisite: LING 461, LING 462.

LING 565 Contrastive Linguistics (3) The attempt to look across linguistic systems for comparable and contrastive classes and subclasses. Problems of subcategorization and universal grammar. Three conceptually distinct models: structural, transfer grammar, generative. Prerequisite: LING 452, LING 463.

LING 566 Introduction to Syntax for Computational Linguistics (3) Bender Introduction to syntactic analysis and concepts with emphasis on the formally precise encoding in linguistic hypotheses and the design of grammars that can be scaled to practical applications. Coursework progressively builds up a consistent grammar for a fragment of English, while also considering data and phenomena from other languages. Offered: A.

LING 567 Knowledge Engineering for Deep Natural Language Processing (3) Bender Techniques and theoretical issues relating to the development of knowledge engineering resources required for deep processing (symbolic or hybrid), focusing on grammar engineering and semantic representations.

LING 568 Problems in Linguistics (2-4) Advanced study in current theories of syntax, semantics, phonology, or morphology. Can be repeated for credit.

LING 590 Graduate Fieldwork (1-10, max. 10) Individual consultation with faculty member and supervised practical experience in a broad range of industry, community, clinical settings dealing with linguistic issues. Offered: A/WSpS.

LING 599 Linguistics Colloquium (1, max. 6) Seminar attended by faculty and graduate students to discuss research in progress and topics of general interest. Presentation of two seminars required for doctoral students. Prerequisite: permission of instructor.
FRLING 405 Linguistics and the Teaching of French (5) VLPA Herschensohn Areas of linguistics that can be particularly helpful to the French teacher. Prerequisite: either FRENCH 203, FRENCH 223, or FRENCH 234; either LING 200 or LING 400.

FRLING 409 The Phonetics of French (5) VLPA Klausenburger Scientific study of the French sound system with special emphasis on "lower level" phonetic rules. Focus on data from standard French as well as socioeconomic and geographic variations. Prerequisite: either FRENCH 203, FRENCH 223, or FRENCH 234; either LING 200 or LING 400.

Romance Linguistics

ROLING 402 Historical Romance Linguistics (5) VLPA Klausenburger Comparative historical survey of the development of the principal Romance tongues. Prerequisite: LING 400.

ROLING 490 Senior Essay (2) VLPA Essay on linguistic problem of student’s choice written with faculty consultant.

ROLING 505 Advanced Romance Linguistics (5) Klausenburger, Zagana Advanced problems in the phonological, morphological, and syntactical analysis of the Romance languages. Descriptive, comparative, and historical considerations. Prerequisite: permission of instructor.

ROLING 506 Advanced Romance Linguistics (5) Klausenburger, Zagana Advanced problems in the phonological, morphological, and syntactical analysis of the Romance languages. Descriptive, comparative, and historical considerations. Prerequisite: permission of instructor.

ROLING 518 Foreign Language Teaching Methodology (2) Brandt Current foreign language teaching methods and approaches. Learning and teaching strategies and techniques for the four skills (reading, writing, speaking, listening) including cultural notions. Current and future trends in pedagogy and technology.

ROLING 521 Seminar in Romance Linguistics (5) Contreras, Klausenburger, Zagana Specific problems in linguistic analysis of the Romance languages. Prerequisite: permission of instructor.

ROLING 522 Seminar in Romance Linguistics (5) Contreras, Klausenburger, Zagana Specific problems in linguistic analysis of the Romance languages. Prerequisite: permission of instructor.

ROLING 531 Problems in Romance Linguistics (2-5, max. 15) Group seminar, or individual conferences are scheduled under this number to meet special needs. Prerequisite: permission of graduate program coordinator. Offered: jointly with LING 531.

ROLING 551 Romance Linguistics: History, Methodology, and Bibliography (5) For new graduate students in the Romance linguistics program. History of Romance linguistics and linguistic science in the nineteenth and twentieth centuries as it relates to Romance studies. Comparative and descriptive methods used in contemporary scholarship. Prerequisite: LING 200, LING 400, or equivalent.

ROLING 600 Independent Study or Research (1-5)

Spanish Linguistics

SPLING 400 The Syntactic Structure of Spanish (5) VLPA Strozer, Zagona Scientific study of the syntax of Spanish: structure of phrases, transformationally derived structures, grammatical relations, principles of interpretation. Prerequisite: either SPAN 301 or SPAN 314; either ANTH 203, LING 200, LING 201, LING 203, LING 400, or SPAN 323. Offered: jointly with SPAN 400.

SPLING 401 The Morphological Structure of Spanish (5) VLPA Strozer, Zagona Principles of word formation, including derivational and inflectional morphology. Relationship between inflectional morphology and other components of grammar. Prerequisite: either SPAN 301 or SPAN 314; either ANTH 203, LING 200, LING 201, LING 203, LING 400, or SPAN 323. Offered: jointly with SPAN 401.

SPLING 402 The Phonological Structure of Spanish (5) VLPA Strozer, Zagona Phonological component of the generative grammar of Spanish; representations of syllabic and segmental units, phonological rules, distinctive features and their articulatory correlates. Prerequisite: either SPAN 301 or SPAN 314; either ANTH 203, LING 200, LING 201, LING 203, LING 400, or SPAN 323. Offered: jointly with SPAN 402.

SPLING 403 The Evolution of the Spanish Language (5) VLPA Zagona Historical survey of Spanish phonology, morphology, and syntax, from Latin origins to the modern language. Prerequisite: either SPAN 301 or SPAN 314; either ANTH 203, LING 200, LING 201, LING 203, LING 400, or SPAN 323. Offered: jointly with SPAN 403.

SPLING 404 Dialects of World Spanish (5) VLPA Strozer, Zagona Introduction to dialectal variants of Spanish. Considers standardization and the real academization, variation and change; pragmatics and politeness; Spanish in contact; sound, word formation, and grammar variation. Taught in Spanish. Prerequisite: either SPAN 301 or SPAN 314; either SPAN 323, LING 200, or LING 400. Offered: jointly with SPAN 404.

SPLING 405 Spanish Phonetics (5) VLPA Analysis of sounds: training in pronunciation, intonation, and close transcription of Spanish language in its modalities. Prerequisite: either SPAN 301 or SPAN 314; either ANTH 203, LING 200, LING 201, LING 203, LING 400, or SPAN 323. Offered: jointly with SPAN 405.

SPLING 406 Advanced Spanish Grammar (5) VLPA Basdeo, Diaz Problems of Spanish grammar. Differences from English grammar. Techniques for the effective teaching of Spanish. Prerequisite: either SPAN 303, SPAN 316 or 330; SPAN 323. Offered: jointly with SPAN 406; AWSp.

Mathematics

MATH 098 Intermediate Algebra (0) Intermediate algebra equivalent to third semester of high school algebra. Includes linear equations and models, linear systems in two variables, quadratic equations, completing the square, graphing parabolas, inequalities, working with roots and radicals, distance formula, functions and graphs, exponential and logarithmic functions. Instruction provided by community colleges on UW campus. Extra fee required. Offered: AWSp.

MATH 103 Introduction to Elementary Functions (5) Continues the study of algebra begun in 100 and 102 with emphasis on functions (polynomial, rational, logarithmic, exponential, and trigonometric). Open only to students who have completed 102. Prerequisite: either score of 26-56% on MATHEA placement test or MATH 102. Offered: AWSp.

MATH 107 Mathematics: A Practical Art (5) NW, QSR For students who have at least 1.5 years of high school algebra and do not plan to take additional mathematics. The exponential function; how it applies to a wide variety of phenomena. Elementary probability and statistics; their use in a variety of applications. Offered: WSp.

MATH 111 Algebra with Applications (5) NW, QSR Use of graphs and algebraic functions as found in business and economics. Algebraic and graphical manipulations to solve problems. Exponential and logarithmic functions; various applications to growth of money. Prerequisite: either 2.0 in MATH 098, 2.0 in MATH 102, 2.0 in MATH 103, score of 49% on MATHIA placement test, score of 35% on MATHPC placement test, or score of 56% on MATHEA placement test. Offered: WSp.

MATH 112 Application of Calculus to Business and Economics (5) NW, QSR Rates of change, tangent, derivative, accumulation, area, integrals in specific contexts, particularly economics. Techniques of differentiation and integration. Application to problem solving. Optimization. Credit does not apply toward a mathematics major. Prerequisite: 2.0 in MATH 111. Offered: WSp.

MATH 120 Precalculus (5) NW Basic properties of functions, graphs; with emphasis on linear, quadratic, trigonometric, exponential functions and their inverses. Emphasis on multi-step problem solving. Prerequisite: either 2.5 in MATH 098, 3.0 in MATH 103, score of 60% on MATHIA test, score of 40% on MATHPC test, or score of 77% on MATHEA placement test. Offered: AWSp.

MATH 124 Calculus with Analytic Geometry I (5) NW, QSR First quarter in calculus of
functions of a single variable. Emphasizes differential calculus. Emphasizes applications and problem solving using the tools of calculus. Prerequisite: 2.5 in MATH 120, score of 68% on MATHPIC placement test, score of 75% on MATHEC placement test, or score of 2 on AP test. Offered: AWSpS.

MATH 125 Calculus with Analytic Geometry II (5) NW Second quarter in the calculus of functions of a single variable. Emphasizes integration. Emphasizes applications and problem solving using the tools of calculus. Prerequisite: either 2.0 in MATH 124, score of 3 on AB advanced placement test, or score of 3 on BC advanced placement test. Offered: AWSpS.

MATH 126 Calculus with Analytic Geometry III (5) NW Third quarter in calculus sequence. Introduction to Taylor polynomials and Taylor series, vector geometry in three dimensions, introduction to multivariable differential calculus, double integrals in Cartesian and polar coordinates. Prerequisite: either 2.0 in MATH 125, 2.0 in MATH 145, 2.0 in MATH 146, score of 5 on AB advanced placement test, or score of 4 on BC advanced placement test. Offered: AWSpS.

MATH 134 Accelerated [Honors] Calculus (5) NW, QSR Covers the material of 124, 125, 126; 307, 308, 318. First year of a two-year accelerated sequence. May receive advanced placement (AP) credit for 124 after taking 134. For students with above average preparation, interest, and ability in mathematics. Offered: A.

MATH 135 Accelerated [Honors] Calculus (5) NW Covers the material of 124, 125, 126; 307, 308, 318. First year of a two-year accelerated sequence. May receive advanced placement (AP) credit for 125 after taking 135. For students with above average preparation, interest, and ability in mathematics. Offered: W.

MATH 136 Accelerated [Honors] Calculus (5) NW Covers the material of 124, 125, 126; 307, 308, 318. First year of a two-year accelerated sequence. May not receive credit for both 126 and 136. For students with above average preparation, interest, and ability in mathematics. Offered: Sp.

MATH 144 Calculus for Life Sciences (5) NW, QSR Curtis, Smith, Tuncel Introduction discrete probability, with examples from the life sciences. Exponential and logarithmic functions: exponential growth and decay. Prerequisite: either 2.5 in MATH 120, score of 68% on MATHPIC placement test, score of 75% on MATHEC placement test, or score of 2 on advanced placement test.

MATH 145 Calculus for Life Sciences (5) NW, QSR Curtis, Smith, Tuncel Differential and integral calculus, with examples from the life sciences. Applications of the derivative to curve sketching: min/max problems. Antidervatives and the fundamental theorem of calculus with applications. Continuous probability distributions; Normal and Poisson distribution Prerequisite: either 2.0 in MATH 124, 2.0 in MATH 144; 3.2 in MATH 120, score of 75% on MATHEC placement test, or score of 3 on advanced placement test.

MATH 146 Calculus for Life Sciences (5) NW Curtis, Smith, Tuncel Further applications of integration; elementary differential equations, with examples from the life sciences. Growth models; Leslie matrices; compartment models. Prerequisite: either 2.0 in MATH 125 or 2.0 in MATH 145.

MATH 170 Mathematics for Elementary School Teachers (3) NW Basic concepts of numbers and operations. Emphasizes problem solving, communication of mathematical ideas, and analysis of sources of difficulty in learning/teaching these concepts. Credit may not apply toward a mathematics major. Required for elementary education students. Credit/no credit only. Offered: AWS.

MATH 171 Mathematics for Elementary School Teachers (3) NW Basic concepts of geometry. Emphasizes problem solving, communication of mathematical ideas, and analysis of sources of difficulty in learning/teaching these concepts. Credit may not apply toward a mathematics major. Credit/no credit only. Offered: Sp.

MATH 187 Elementary Mathematics Computer Laboratory (1, max. 3) NW Laboratory activities designed to introduce computing as a tool for doing mathematics. To be taken jointly with a designated section of a 100-level mathematics course. Credit/no credit only. Offered: AWSp.

MATH 197 Problem Solving in Mathematics (2, max. 4) NW Lectures and problem sessions in mathematics with applications. Enrollment restricted to EOP students only. Credit/no credit only. Offered: AWSp.

MATH 198 Special Topics in Mathematics (1-5, max. 15) Independent reading in math. Does not count as credit toward a math major. Credit/no credit only. Offered: AWSpS.

MATH 301 Elementary Number Theory (3) NW Brief introduction to some of the fundamental ideas of elementary number theory. Prerequisite: either 2.0 in MATH 126 or 2.0 in MATH 136.

MATH 307 Introduction to Differential Equations (3) NW Introductory course in ordinary differential equations. Includes first- and second-order equations and Laplace transform. Prerequisite: either 2.0 in MATH 125 or 2.0 in MATH145. Offered: AWSpS.

MATH 308 Matrix Algebra with Applications (3) NW Systems of linear equations, vector spaces, matrices, subspaces, orthogonality, least squares, eigenvalues, eigenvectors, applications. For students in engineering, mathematics, and the sciences. Credit allowed for only one of MATH 308 or MATH 318. Prerequisite: either 2.0 in MATH 126 or 2.0 in MATH 146. Offered: AWSpS.

MATH 309 Linear Algebra (3) NW First order systems of linear differential equations, Fourier series and partial differential equations, and the phase plane. Prerequisite: either 2.0 in MATH 307 and 2.0 in MATH 308, or 2.0 in MATH 307 and MATH 318, or 2.0 in MATH 136. Offered: AWSpS.

MATH 314 Linear Algebra (3) NW Introduction to the mathematical concepts, arguments, and proofs that occur in linear algebra. Vectors and matrices, systems of linear equations, determinants, subspaces, dimension, bases, linear transformations, eigenvalues and eigenvectors. Credit allowed for only one of MATH 308 or MATH 318. Prerequisite: either 2.0 in MATH 126 or 2.0 in MATH 146; 2.0 in MATH 310.

MATH 315 Introduction to Real Analysis I (3) NW Limits and continuity of functions, sequences, limits, uniform convergence, improper integrals, uniform continuity, fundamental theorems on continuous functions, theory of the Riemann integral. Prerequisite: either both 2.0 in MATH 126 and 2.0 in MATH 300, or 2.0 in MATH 136. Offered: AWSpS.

MATH 316 Introduction to Real Analysis II (3) NW Limits and continuity of functions, sequences, series tests, uniform convergence, uniform convergence, Power series, improper integrals, uniform continuity, fundamental theorems on continuous functions, theory of the Riemann integral. Prerequisite: 2.0 in MATH 327. Offered: AWSp.

MATH 334 Accelerated [Honors] Advanced Calculus (5) NW Introduction to proofs and rigor; uniform convergence, Fourier series and partial differential equations, vector calculus, complex variables. Students who complete this sequence are not required to take MATH 309, 310, 324, 326, 327, 328, and 427. Second year of an accelerated two-year sequence; prepares students for senior-level mathematics courses. Prerequisite: either 2.0 in MATH 136, or 2.0 in MATH 126; 2.0 in MATH 307; either 2.0 in MATH 205; 2.0 in MATH 308, or 2.0 in MATH 316. Offered: A.

MATH 335 Accelerated [Honors] Advanced Calculus (5) NW Introduction to proofs and rigor; uniform convergence, Fourier series and partial differential equations, vector calculus, complex variables. Students who complete this sequence are not required to take MATH 309, 324, 326, 327, 328, and 427. Second year of an accelerated two-year sequence; prepares students for senior-level mathematics courses. Prerequisite: 2.0 in MATH 334. Offered: AWSp.

MATH 336 Accelerated [Honors] Advanced Calculus (5) NW Introduction to proofs and rigor; uniform convergence, Fourier series and partial differential equations, vector calculus, complex variables. Students who complete this sequence are not required to take MATH 309, 324, 326, 327, 328, and 427. Second year of an accelerated two-year sequence; prepares students for senior-level mathematics courses. Prerequisite: 2.0 in MATH 334. Offered: A.

MATH 336 Accelerated [Honors] Advanced Calculus (5) NW Introduction to proofs and rigor; uniform convergence, Fourier series and partial differential equations, vector calculus, complex variables. Students who complete this sequence are not required to take MATH 309, 324, 326, 327, 328, and 427. Second year of an accelerated two-year sequence; prepares students for senior-level mathematics courses. Prerequisite: 2.0 in MATH 334. Offered: A.

MATH 336 Accelerated [Honors] Advanced Calculus (5) NW Introduction to proofs and rigor; uniform convergence, Fourier series and partial differential equations, vector calculus, complex variables. Students who complete this sequence are not required to take MATH 309, 324, 326, 327, 328, and 427. Second year of an accelerated two-year sequence; prepares students for senior-level mathematics courses. Prerequisite: 2.0 in MATH 334. Offered: A.
MATH 355 Math Enrichment for the Schools (5) NW Map and graph coloring, spanning trees, domination and cryptography, interpretation of graphs, circular motion, statistics that mislead, other topics. Focus on middle school level, with sixth or seventh grade classroom visits lasting all Tuesday morning in alternate weeks. Discussion of issues in math education reform. Prerequisite: MATH 354. Offered: W.

MATH 381 Discrete Mathematical Modeling (3) NW Introductions to methods of discrete mathematics, including topics from graph theory, network flows, and combinatorics. Emphasis on these tools to formulate models and solve problems arising in variety of applications, such as computer science, biology, and management science. Prerequisite: either 2.0 in MATH 136, 2.0 in MATH 308, or 2.0 in MATH 318.

MATH 387 Intermediate Mathematics Computer Laboratory (1-2, max. 6) NW Laboratory activities in the use of computing as tool for doing mathematics, to be taken jointly with a designated section of a 300-level mathematics course. Credit/no credit only.

MATH 390 Probability and Statistics in Engineering and Science (4) NW Concepts of probability and statistics. Conditional probability, independence, random variables, distribution functions. Descriptive statistics, transformations, sampling errors, confidence intervals, least squares and maximum likelihood. Exploratory data analysis and interactive computing. Students may receive credit for only one of 390, STAT/ECON 481, and ECON 580. Prerequisite: either MATH 126 or MATH 136. Offered: jointly with STAT 390; AW/SpS.

MATH 394 Probability I (3) NW Sample spaces; basic axioms of probability; combinatorial probability; conditional probability and independence; binomial, Poisson, and normal distributions. Prerequisite: either 2.0 in MATH 126 or 2.0 in MATH 136; recommended: MATH 324 or MATH 327. Offered: jointly with STAT 394; AWS.

MATH 395 Probability II (3) NW Random variables; expectation and variance; laws of large numbers; normal approximation and other limit theorems; multidimensional distributions and transformations. Prerequisite: 2.0 in STAT/MATH 394. Offered: jointly with STAT 395; W/SpS.

MATH 396 Probability III (3) NW Characteristic functions and generating functions; recurrent events and renewal theory; random walk. Prerequisite: 2.0 in MATH 395 or 2.0 in STAT 511. Offered: jointly with STAT 396; Sp.

MATH 398 Special Topics in Mathematics (1-5, max. 15) Independent reading in math. Does not count as credit toward a math major. Credit/no credit only. Offered: AW/SpS.

MATH 402 Introduction to Modern Algebra (3) NW Elementary theory of groups: Cosets and Lagrange's theorem. Homomorphisms, normal subgroups, quotient groups, and the fundamental isomorphism theorems. Cyclic and symmetric groups. Orders and Cauchy's theorem. Direct products. Automorphisms. Prerequisite: either 2.0 in MATH 136, 2.0 in MATH 327, 2.0 in MATH 336, or 2.0 in MATH 340. Offered: AS.

MATH 404 Introduction to Modern Algebra (3) NW Topics in algebra chosen from Galois theory, theory of modules, geometric group actions, and the theory of rings and fields. Specific content determined by instructor. Prerequisite: 2.0 in MATH 403. Offered: Sp.

MATH 407 Linear Optimization (3) NW Maximization and minimization of linear functions subject to constraints consisting of linear equations and inequalities; linear programming and mathematical modeling. Simplex method, elementary games and duality. Prerequisite: either 2.0 in MATH 136, 2.0 in MATH 308, 2.0 in MATH 318, or 2.0 in AMATH 352. Offered: AWS.

MATH 408 Nonlinear Optimization (3) NW Maximization and minimization of nonlinear functions, constrained and unconstrained; nonlinear programming and methods. Lagrange multipliers; Kuhn-Tucker conditions, convexity. Quadratic programming. Prerequisite: either 2.0 in MATH 308 or 2.0 in MATH 318; either 2.0 in MATH 327 or 2.0 in MATH 334. Offered: W.

MATH 409 Discrete Optimization (3) NW Maximization and minimization problems in graphs and networks (shortest paths, minimum spanning trees, maximum flows, minimum cost flows); transportation and transshipment problems, NP-completeness. Prerequisite: 2.0 in MATH 407. Offered: Sp.

MATH 411 Introduction to Modern Algebra for Teachers (3) NW Basic concepts of abstract algebra with an emphasis on problem solving, constructing proofs, and communication of mathematical ideas. Designed for teaching majors; not open for credit to students who have taken 402, 403. Cannot be used as elective credit for either BS program in mathematics. Prerequisite: either 2.0 in MATH 205, 2.0 in MATH 308, 2.0 in MATH 318, or 2.0 in MATH 136. Offered: AS.

MATH 412 Introduction to Modern Algebra for Teachers (3) NW Basic concepts of abstract algebra with an emphasis on problem solving, constructing proofs, and communication of mathematical ideas. Designed for teaching majors; not open for credit to students who have taken 402, 403. Cannot be used as elective credit for either BS program in mathematics. Prerequisite: 2.0 in MATH 411. Offered: WS.

MATH 414 Number Theory (3) NW Congruences, arithmetic of quadratic fields, binary quadratic forms, Dirichlet's theorem on primes in an arithmetic progression, Chebyshev's theorem on distribution of primes, the partition function, equations over finite fields. Prerequisite: either 2.0 in MATH 301 or 2.0 in MATH 402.

MATH 415 Number Theory (3) NW Congruences, arithmetic of quadratic fields, binary quadratic forms, Dirichlet’s theorem on primes in an arithmetic progression, Chebyshev's theorem on distribution of primes, the partition function, equations over finite fields. Prerequisite: 2.0 in MATH 414.

MATH 420 History of Mathematics (3) NW Survey of the development of mathematics from its earliest beginnings through the first half of the twentieth century. Prerequisite: 2.0 in MATH 126. Offered: S.

MATH 421 Conceptual Calculus for Teachers (4) NW In-depth conceptual study of calculus, approached from many points of view, including the study of patterns of physical change, discrete approximation to continuous phenomena, and the historical development of calculus, intended for future teachers. Cannot be used as elective credit for either BS program in mathematics.

MATH 422 Conceptual Calculus for Teachers (3) NW In-depth conceptual study of calculus, approached from many points of view, including the study of patterns of physical change, discrete approximation to continuous phenomena, and the historical development of calculus, intended for future teachers. Cannot be used as elective credit for either BS program in mathematics.

MATH 424 Fundamental Concepts of Analysis (3) NW One-variable differential calculus: chain rule, inverse function theorem, Rolle's theorem, intermediate value theorem, Taylor's theorem, and intermediate value theorem for derivatives. Multivariable differential calculus: mean value theorem, inverse and implicit function theorems, and Lagrange multipliers. Prerequisite: either 2.0 in MATH 328 or 2.0 in MATH 335; 2.0 in MATH 424. Offered: W.

MATH 427 Complex Analysis (3) NW Complex numbers; analytic functions; sequences and series; complex integration; Cauchy integral formula; Taylor and Laurent series; uniform convergence; residue theory; conformal mapping. Topics chosen from: Fourier series and integrals, Laplace transforms, infinite products, complex dynamics; additional topics chosen by instructor. Prerequisite: either 2.0 in MATH 327 or 2.0 in MATH 335; recommended: MATH 328. Offered: AS.

MATH 428 Complex Analysis (3) NW Continuation of MATH 427. Prerequisite: 2.0 in MATH 427. Offered: W.

MATH 435 Introduction to Dynamical Systems (3) NW Examples of dynamical systems in mathematics and in natural phenomena. Iterated functions, phase portraits, fixed and periodic points. Hyperbolicity, bifurcations. Chaos. Interval maps; quadratic families; Fractals; iterated function systems. Elements of higher dimensional dynamics. Julia sets, the Mandelbrot set. Prerequisite: 2.0 in MATH 335 or
MATH 436 Introduction to Dynamical Systems (3) NW Examples of dynamical systems in mathematics and in natural phenomena. Iterated functions, phase portraits, fixed and periodic points. Hyperbolicity, bifurcations. Chaos, interval maps; quadratic families. Fractals; iterated function systems. Elements of higher dimensional dynamics. Julia sets, the Mandelbrot set. Prerequisite: 2.0 in MATH 435.

MATH 441 Topology (3) NW Metric and topological spaces, convergence, continuity, finite products, connectedness, and compactness. Prerequisite: either 2.0 in MATH 326 or 2.0 in MATH 335. Offered: A.

MATH 442 Differential Geometry (3) NW Curves in 3-space, continuity and differentiability in 3-space, surfaces, tangent planes, first fundamental form, area, orientation, the Gauss Map. Prerequisite: either 2.0 in MATH 335 or 2.0 in both MATH 326 and 2.0 in MATH 328; 2.0 in either MATH 308 or 2.0 in MATH 318. Offered: W.

MATH 443 Topics in Topology and Geometry (3) NW Content selected from such topics as homotopy and topological surfaces; advanced differential geometry, projective geometry, hyperbolic geometry, spherical geometry, and combinatorial geometry. Offered: Sp.

MATH 444 Geometry for Teachers (3) NW Concepts of geometry from multiple approaches; discovery, formal and informal reasoning, transformations, coordinates; exploration using computers and models. Topics selected from Euclidean plane and space geometry, spherical geometry, non-Euclidean geometries, fractal geometry. Designed for teaching majors. Cannot be used as elective credit for either BS program in mathematics. Prerequisite: 2.0 in MATH 126; either 2.0 in MATH 136, 2.0 in MATH 205, 2.0 in MATH 308, or 2.0 in MATH 316; 2.0 in MATH 300. Offered: Ws.

MATH 445 Geometry for Teachers (3) NW Concepts of geometry from multiple approaches; discovery, formal and informal reasoning, transformations, coordinates; exploration using computers and models. Topics selected from Euclidean plane and space geometry, spherical geometry, non-Euclidean geometries, fractal geometry. Designed for teaching majors. Cannot be used as elective credit for either BS program in mathematics. Prerequisite: 2.0 in MATH 444. Offered: Sp.

MATH 461 Combinatorial Theory (3) NW Selected topics from among: block designs and finite geometries, coding theory, generating functions and other enumeration methods, graph theory, matroid theory, combinatorial algorithms, applications of combinatorics. Prerequisite: either 2.0 in MATH 308 or 2.0 in MATH 318.

MATH 462 Combinatorial Theory (3) NW Selected topics from among: block designs and finite geometries, coding theory, generating functions and other enumeration methods, graph theory, matroid theory, combinatorial algorithms, applications of combinatorics. Prerequisite: 2.0 in MATH 461.

MATH 464 Numerical Analysis I (3) NW Basic principles of numerical analysis, classical interpolation and approximation formulas, finite differences and difference equations. Numerical methods in algebra, systems of linear equations, matrix inversion, successive approximations, iterative and relaxation methods. Numerical differentiation and integration. Solution of differential equations and systems of such equations. Prerequisite: either 2.0 in MATH 136, 2.0 in MATH 308, or 2.0 in MATH 335. Offered: A.

MATH 465 Numerical Analysis II (3) NW Basic principles of numerical analysis, classical interpolation and approximation formulas, finite differences and difference equations. Numerical methods in algebra, systems of linear equations, matrix inversion, successive approximations, iterative and relaxation methods. Numerical differentiation and integration. Solution of differential equations and systems of such equations. Prerequisite: either 2.0 in MATH 136, 2.0 in MATH 308, or 2.0 in MATH 335. Offered: W.

MATH 466 Numerical Analysis III (3) NW Basic principles of numerical analysis, classical interpolation and approximation formulas, finite differences and difference equations. Numerical methods in algebra, systems of linear equations, matrix inversion, successive approximations, iterative and relaxation methods. Numerical differentiation and integration. Solution of differential equations and systems of such equations. Prerequisite: either 2.0 in MATH 136, 2.0 in both MATH 307 and MATH 308, or 2.0 in MATH 335.

MATH 480 Special Topics in Undergraduate Mathematics (3, max. 12) Advanced topics in various areas of undergraduate mathematics. Offered: jointly with STAT 491; A.

MATH 487 Advanced Mathematics Computer Laboratory (1-2, max. 6) NW Laboratory activities in the use of computing as a tool for doing mathematics, to be taken jointly with a designated section of a 400-level mathematics course. Credit/no credit only.

MATH 491 Introduction to Stochastic Processes (3) NW Random walks, Markov chains, branching processes, Poisson process, point processes, birth and death processes, queuing theory, stationary processes. Prerequisite: either 2.0 in MATH 395 or STAT 395. Offered: jointly with STAT 491; A.

MATH 492 Stochastic Calculus for Option Pricing (3) NW Introductory stochastic calculus mathematical foundation for pricing options and derivatives. Basic stochastic analysis tools, including stochastic integrals, stochastic differential equations, Ito’s formula, theorems of Girsanov and Feyman-Kac, Black-Scholes option pricing, American and exotic options, bond options. Prerequisite: MATH STAT 394-5. Offered: jointly with STAT 492; W.

MATH 496 Honors Senior Thesis (1-5) NW Problem seminar for honors students. Cannot be repeated for credit. Offered: AWSp.

MATH 497 Special Topics in Mathematics for Teachers (2-9, max. 9) NW Study of selected areas of mathematics. Designed for the improvement of teachers of mathematics. Offered: jointly with EDC&I 478.

MATH 498 Advanced Mathematics Computer Laboratory (1-2, max. 6) NW Laboratory activities in the use of computing as a tool for doing mathematics, to be taken jointly with a designated section of a 400-level mathematics course. Credit/no credit only.

MATH 499 Undergraduate Research (8) Summer research opportunity for undergraduates. Credit/no credit only. Offered: S.

MATH 501 Special Topics in Teaching and Learning Mathematics (2-3, max. 15) Selected Topics dealing with issues in the teaching and learning of mathematics.

MATH 502 Special Topics in Teaching and Learning Mathematics (2-3, max. 15) Selected Topics dealing with issues in the teaching and learning of mathematics.

MATH 503 Special Topics in Teaching and Learning Mathematics (2-3, max. 15) Selected Topics dealing with issues in the teaching and learning of mathematics.

MATH 504 Modern Algebra (5) First quarter of a three-quarter sequence covering group theory, field theory and Galois theory, commutative rings and modules, linear algebra, theory of forms; representation theory, associative rings and modules; commutative algebra and elementary algebraic geometry. Prerequisite: MATH 404 or equivalent.

MATH 505 Modern Algebra (5) Continuation of MATH 504. Prerequisite: MATH 504.

MATH 506 Modern Algebra (5) Continuation of MATH 505. Prerequisite: MATH 505.

MATH 507 Algebraic Geometry (3) First quarter of a two-quarter sequence covering the basic theory of affine and projective varieties, rings of functions, the Hilbert Nullstellensatz, localization, and dimension; the theory of algebraic curves, divisors, cohomology, genus, and the Riemann-Roch theorem; and related topics. Prerequisite: MATH 506.

MATH 508 Algebraic Geometry (3) Continuation of MATH 507. Prerequisite: MATH 507.

MATH 509 Theory of Optimal Control (3) Trajectories from ordinary differential equations with control variables. Controllability, optimality, maximum principle, Relaxation and existence of solutions. Techniques of nonsmooth analysis. Prerequisite: real analysis on the level of MATH 426; background in optimization corresponding to MATH 515. Offered: jointly with AMATH 509; even years.

MATH 510 Seminar in Algebra (2-5, max. 5) Credit/no credit only. Prerequisite: permission of graduate program coordinator.

MATH 514 Networks and Combinatorial Optimization (3) Networks and directed graphs. Paths and trees. Feasible and optimal flows and potentials. Transportation problems, matching and assignment problems. Algorithms and applications. Prerequisite: MATH 308 or AMATH 352 and MATH 324. Offered: jointly with AMATH 514.

MATH 517 Optimization Under Uncertainty (3) Sequential optimization problems involving random variables. Dynamic programming, stochastic programming. Control of uncertain dynamic systems in finite, discrete time. Risk, feedback, adaptivity. Problems with imperfect state information. Applications such as to optimal stopping, inventory control, resource management. Prerequisite: MATH 308, MATH 324 and an introduction to basic concepts of probability, such as MATH 390 or MATH 394, MATH 395. Offered: jointly with AMATH 517.

MATH 521 Advanced Probability (3) Measure theory and integration, independence, laws of large numbers, Fourier analysis of distributions, central limit problem and infinitely divisible laws, conditional expectations, martingales. Prerequisite: either MATH 426 or MATH 576. Offered: jointly with STAT 521.

MATH 522 Advanced Probability (3) Measure theory and integration, independence, laws of large numbers, Fourier analysis of distributions, central limit problem and infinitely divisible laws, conditional expectations, martingales. Prerequisite: either MATH 426 or MATH 576. Offered: jointly with STAT 522.

MATH 523 Advanced Probability (3) Measure theory and integration, independence, laws of large numbers, Fourier analysis of distributions, central limit problem and infinitely divisible laws, conditional expectations, martingales. Prerequisite: either MATH 426 or MATH 576. Offered: jointly with STAT 523.

MATH 524 Real Analysis (5) First quarter of a three-quarter sequence covering the theory of measure and integration, point set topology, Banach spaces, $L_p$ spaces, applications to the theory of functions of one and several real variables. Additional topics to be chosen by instructor. Prerequisite: MATH 426 or equivalent.

MATH 525 Real Analysis (5) Continuation of MATH 524. Prerequisite: MATH 524.

MATH 526 Real Analysis (5) Continuation of MATH 525. Prerequisite: MATH 525.

MATH 527 Functional Analysis (3) First quarter of a three-quarter sequence. Review of Banach, Hilbert, and $L_p$ spaces; locally convex spaces (duality and separation theory, distributions, and function spaces); operators on locally convex spaces (adjoints, closed graph/open mapping and Banach-Steinhaus theorems); Banach algebras (spectral theory, elementary applications); spectral theorem for Hilbert space operators. Additional topics chosen by instructor. A working knowledge of real variables, general topology, and complex variables is assumed.

MATH 528 Functional Analysis (3) Continuation of MATH 527. Prerequisite: MATH 527.

MATH 529 Functional Analysis (3) Continuation of MATH 528. Prerequisite: MATH 528.

MATH 530 Seminar in Analysis (2-5, max. 5) Credit/no credit only. Prerequisite: permission of graduate program coordinator.

MATH 534 Complex Analysis (5) First quarter of a three-quarter sequence covering complex numbers, analytic functions, contour integration, power series, analytic continuation, sequences of analytic functions, conformal mapping of simply connected regions, and related topics. Prerequisite: MATH 426.

MATH 535 Complex Analysis (5) Continuation of MATH 534. Prerequisite: MATH 534.

MATH 536 Complex Analysis (5) Continuation of MATH 535. Prerequisite: MATH 535.

MATH 537 Several Complex Variables (3) First quarter of a three-quarter sequence covering Weierstrass preparation theorem and its immediate consequences, analytic continuation, domains of holomorphy, pseudoconvexity, Cartan-Oka theory of coherence, embedding theorems; the CR equations, CR manifolds, connections with algebraic geometry. Prerequisite: MATH 536.

MATH 538 Several Complex Variables (3) Continuation of MATH 537. Prerequisite: MATH 537.

MATH 539 Several Complex Variables (3) Continuation of MATH 538. Prerequisite: MATH 538.

MATH 541 Special Topics in Applied Mathematics (2-3, max. 15) Such topics as mathematical quantum theory, fluid mechanics, optimization and operations research, and control theory.

MATH 542 Special Topics in Applied Mathematics (2-3, max. 15) Such topics as mathematical quantum theory, fluid mechanics, optimization and operations research, and control theory.

MATH 543 Special Topics in Applied Mathematics (2-3, max. 15) Such topics as mathematical quantum theory, fluid mechanics, optimization and operations research, and control theory.

MATH 544 Topology and Geometry of Manifolds (5) First quarter of a three-quarter sequence covering general topology, the fundamental group, covering spaces, topological and differentiable manifolds, vector fields, flows, the Frobenius theorem, Lie groups, homogeneous spaces, tensor fields, differential forms, Stokes's theorem, deRham cohomology. Prerequisite: MATH 404 and MATH 426 or equivalent.

MATH 545 Topology and Geometry of Manifolds (5) Continuation of MATH 544. Prerequisite: MATH 544.

MATH 546 Topology and Geometry of Manifolds (5) Continuation of MATH 545. Prerequisite: MATH 545.

MATH 547 Geometric Structures (3, max. 9) First quarter of a three-quarter sequence covering differential-geometric structures on manifolds, Riemannian metrics, geodesics, covariant differentiation, curvature, Jacobi fields, Gauss-Bonnet theorem. Additional topics to be chosen by the instructor, such as connections in vector bundles and principal bundles, symplectic geometry, Riemannian comparison theorems, symmetric spaces, symplectic geometry, complex manifolds, Hodge theory. Prerequisite: MATH 546.

MATH 548 Geometric Structures (3, max. 9) Continuation of MATH 547. Prerequisite: MATH 547.

MATH 549 Geometric Structures (3, max. 9) Continuation of MATH 548. Prerequisite: MATH 548.

MATH 550 Seminar in Geometry (2-5, max. 5) Credit/no credit only. Prerequisite: permission of graduate program coordinator.

MATH 554. Prerequisite: MATH 554.

MATH 555 Linear Analysis (5) Continuation of MATH 554. Prerequisite: MATH 554.

MATH 556 Linear Analysis (5) Continuation of MATH 555. Prerequisite: MATH 555.

MATH 558 Introduction to Partial Differential Equations (3) Continuation of MATH 557. Prerequisite: MATH 557.

MATH 559 Introduction to Partial Differential Equations (3) Continuation of MATH 558. Prerequisite: MATH 558.

MATH 560 Introduction to Partial Differential Equations (3) Continuation of MATH 559. Prerequisite: MATH 559.

MATH 564 Algebraic Topology (3) First quarter of a three-quarter sequence covering classical and modern approaches; complexes and their homology theory; applications; fixed points, products and Poincare duality; axiomatic approach. Prerequisite: MATH 506 and MATH 544, or equivalent.

MATH 565 Algebraic Topology (3) Continuation of MATH 564. Prerequisite: MATH 564.

MATH 566 Algebraic Topology (3) Continuation of MATH 565. Prerequisite: MATH 565.

MATH 570 Seminar in Topology (2-5, max. 5) Credit/no credit only. Prerequisite: permission of graduate program coordinator.

MATH 574 Fundamental Concepts of Analysis (3) Hoffman, Toro Sets, real numbers, topology of metric spaces, normed linear spaces, multivariable calculus from an advanced viewpoint. Introduction to Lebesque measure and integration. Intended for students in Biostatistics and related fields; does not fulfill requirements for degrees in mathematics.
MATH 575 Fundamental Concepts of Analysis (3) Hoffman, Toro Sets, real numbers, topology of metric spaces, normed linear spaces, multivariable calculus from an advanced viewpoint. Introduction to Lebesque measure and integration. Intended for students in Biostatistics and related fields; does not fulfill requirements for degrees in mathematics.

MATH 576 Fundamental Concepts of Analysis (3) Hoffman, Toro Sets, real numbers, topology of metric spaces, normed linear spaces, multivariable calculus from an advanced viewpoint. Introduction to Lebesque measure and integration. Intended for students in Biostatistics and related fields; does not fulfill requirements for degrees in mathematics.

MATH 577 Lie Groups and Lie Algebras (3, max. 9) Topics chosen from: root systems and reflection groups; the structure, classification, and representation theory of complex semisimple Lie algebras, compact Lie groups, or semisimple Lie groups; algebraic groups; enveloping algebras; infinite-dimensional representation theory of Lie groups and Lie algebras; harmonic analysis on Lie groups. Prerequisite: MATH 508; MATH 526 or MATH 546.

MATH 578 Lie Groups and Lie Algebras (3, max. 9) Topics chosen from: root systems and reflection groups; the structure, classification, and representation theory of complex semisimple Lie algebras, compact Lie groups, or semisimple Lie groups; algebraic groups; enveloping algebras; infinite-dimensional representation theory of Lie groups and Lie algebras; harmonic analysis on Lie groups. Prerequisite: MATH 506; MATH 526 or MATH 546.

MATH 579 Lie Groups and Lie Algebras (3, max. 9) Topics chosen from: root systems and reflection groups; the structure, classification, and representation theory of complex semisimple Lie algebras, compact Lie groups, or semisimple Lie groups; algebraic groups; enveloping algebras; infinite-dimensional representation theory of Lie groups and Lie algebras; harmonic analysis on Lie groups. Prerequisite: MATH 506; MATH 526 or MATH 546.

MATH 580 Current Topics in Mathematics (2, max. 12) Discussion of current research topics in mathematics, with emphasis on current departmental research projects and interests. Offered: AWSp.

MATH 581 Special Topics in Mathematics (*, max. 36) Advanced topics in various areas of mathematics. Offered: AWSpS.

MATH 582 Special Topics in Mathematics (*, max. 36) Advanced topics in various areas of mathematics. Offered: AWSpS.

MATH 583 Special Topics in Mathematics (*, max. 36) Advanced topics in various areas of mathematics. Offered: AWSpS.

MATH 590 Seminar in Probability (2-5, max. 5) Credit/no credit only. Prerequisite: permission of instructor.

MATH 594 Special Topics in Numerical Analysis (2-3, max. 15) Various advanced topics in numerical analysis and scientific computing, such as iterative methods, eigenvalue computations, approximation theory, finite element methods, inverse problems, nonlinear conservation laws, computational fluid dynamics. Prerequisite: MATH 584, AMATH 585, AMATH 586, or equivalent. Offered: jointly with AMATH 594.

MATH 595 Special Topics in Numerical Analysis (2-3, max. 15) Various advanced topics in numerical analysis and scientific computing. See the description for 594 for sample topics. Prerequisite: AMATH 584, AMATH 585, AMATH 586, or equivalent. Offered: jointly with AMATH 595.

MATH 596 Special Topics in Numerical Analysis (2-3, max. 15) Various advanced topics in numerical analysis and scientific computing. See the description for 594 for sample topics. Prerequisite: AMATH 584, AMATH 585, AMATH 586, or equivalent. Offered: jointly with AMATH 596.

MATH 597 Seminar on Teaching Math (1, max. 3) Issues in the teaching and learning of college mathematics, such as discovering and working with student background and expectations, increasing student engagement with course material, and evaluating student achievement. For graduate students who are, or soon will be, teaching mathematics courses on their own. Credit/no credit only.

MATH 598 Seminar on Technology (1, max. 3) Explores the use of computer technology in teaching and research in mathematics. Develops the basic skills required for using computer mathematics software.

MATH 600 Independent Study or Research (*)

MATH 700 Master’s Thesis (*)

MATH 800 Doctoral Dissertation (*)

Music

Music

MUSIC 113 Pre-Core Ear Training (0/1, max. 1) VLPA Pre-core course in musicianship. Offered: ASp.

MUSIC 116 Elementary Music Theory (2) VLPA For nonmusic majors. For people with no hands-on music experience. Rudiments of music; notation of time, small pitch structures (e.g., some scales, chords, rhythmic patterns), some analysis. Recommended: some music training including ability to read music.

MUSIC 117 Elementary Music Theory (2) VLPA For nonmusic majors. For students who can read music, having some performance experience. Prerequisite: MUSIC 116.

MUSIC 118 Elementary Music Theory (2) VLPA For nonmusic majors. For students who read music, have some performance experience, are familiar with scales, chords, intervals. Includes analysis composition in various styles. Prerequisite: MUSIC 117.

MUSIC 119 Introduction to Music Theory and Musicianship (3) VLPA Basic elements of music theory: introduction to acoustics, major and minor scales, triads and seventh chords, keys, four-part writing, functional harmony, modes, simple forms, and jazz notation. Offered: A.

MUSIC 120 Survey of Music (5) VLPA Studies in listening, with emphasis on the changing components of Western art music. Illustrated lectures, laboratory section meetings, and presentations by guest artists.

MUSIC 121 The Orchestra (2) VLPA Development of the orchestra and its literature.

MUSIC 122 The Opera (2) VLPA An introduction to opera through selected masterworks, from Monteverdi to the present. Primarily for nonmajors.

MUSIC 160 Anglo-American Folk Music (5) VLPA Genres and styles from earliest roots to the present; Anglo-American ballads, dance music, French and other European immigrant groups.

MUSIC 161 American Musical Theater (5) VLPA Historical and stylistic study of the development of the American musical theater. European roots in opera and operetta. Contributions from jazz and popular music. Selected musicals studied.

MUSIC 162 American Popular Song (5) VLPA Historical, social, and stylistic study of popular idioms from the late nineteenth century to the present. Most attention to contemporary idioms (rock, country-western, soul, hip-hop). Various facets of the industry examined to learn how they influence taste and musical style.

MUSIC 185 The Concert Season (2) VLPA Performances from the School of Music concert season, supplemented by lecture topics related to concert repertoire. Analysis of applicable musical topics appropriate for enhanced appreciation of historical and cultural contexts of works performed. Attendance at ten concerts required.

MUSIC 191 Composition (3, max. 9) VLPA One-hour private instruction and one-hour laboratory session each week. Intended to develop skill in creative musical expression. For composition majors only.

MUSIC 200 Music, Child, and Family (3) VLPA Campbell Study of music in childhood as part of socialization and enculturation of the child within family and community. Emphasis given to
songs and music listening experiences provided by parents to nurture the child’s musical, social, and intellectual development from infancy through middle childhood. For nonmajors.

MUSIC 201 First-Year Theory I (3) VLPA
Introduction to tonal harmony and counterpoint; triadic progressions in root position; first and second species counterpoint; analysis of simple works. Prerequisite: 2.0 in MUSIC 119; recommended: concurrent registration in MUSIC 204. Offered: W.

MUSIC 202 First-Year Theory II (3) VLPA
Continued instruction in tonal harmony and counterpoint; triadic progressions with inversions; third and fourth species counterpoint; further analysis of basic forms. Prerequisite: 2.0 in MUSIC 201; recommended: concurrent registration in MUSIC 205. Offered: F.

MUSIC 203 First-Year Theory III (3) VLPA
Further introduction in tonal harmony and counterpoint; seventh chords; modulations to closely related keys; secondary dominants; introduction to chromaticism; emphasis on analysis and writing of four-part chorales in early 18th century style. Prerequisite: 2.0 in MUSIC 202; recommended: concurrent registration in MUSIC 206. Offered: A.

MUSIC 204 First-Year Ear Training I (0/1, max. 1) VLPA
Core ear-training sequence for majors. Prerequisite: 2.0 in MUSIC 113; corequisite: MUSIC 201. Offered: W.

MUSIC 205 First-Year Ear Training II (0/1, max. 1) VLPA
Core ear-training sequence for majors. Prerequisite: 2.0 in MUSIC 204; corequisite: MUSIC 202. Offered: Sp.

MUSIC 206 First-Year Ear Training III (0/1, max. 1) VLPA
Core ear-training sequence for majors. Prerequisite: 2.0 in MUSIC 205; corequisite: MUSIC 203. Offered: A.

MUSIC 216 Introductory Composition (2) VLPA
For students not majoring in composition. Prerequisite: MUSIC 202.

MUSIC 217 Introductory Composition (2) VLPA
For students not majoring in composition. Prerequisite: MUSIC 216.

MUSIC 240 Reed-Making Techniques (1, max. 6) VLPA
Applies basic reed-making principles and techniques. Individualized instruction allows students of all levels to take the course simultaneously.

MUSIC 250 World Music (3) I&S/ VLPA
Introduction to world musical traditions, including both sound and socio-cultural dimensions of music. Topics include instruments, rhythm, melody, form, composition, improvisation, music in the family and community, politics, economy, religion, and case studies of major world musical traditions. Prerequisite: MUSIC 201; MUSIC 204.

MUSIC 270 World Popular Music (5) I&S/ VLPA
A global survey of popular music, including Latin America, Africa, Eastern Europe, the Middle East, Asia, and the Pacific. Emphasis on students' ability to recognize styles and to analyze the social and historical processes that have shaped them.

MUSIC 291 Composition (3, max. 9) VLPA
One-hour private instruction and one-hour laboratory session per week. Prerequisite: MUSIC 191.

MUSIC 300 Fundamentals of Music Technology (3) VLPA
Introduction to the principles of music technology. Exploration of different categories of music software, in terms of their functionality as well as the fundamental basis of these theories. Prerequisite: MUSIC 203; MUSIC 206.

MUSIC 301 Second-Year Theory (3) VLPA
Further study of modulation and chromatic harmony; analysis of 18th- and 19th-century short forms; technical exercises; model composition. Prerequisite: 2.0 in MUSIC 203; 2.0 in MUSIC 206; corequisite: MUSIC 304; recommended: concurrent registration in MUSIC 304. Offered: W.

MUSIC 302 Second-Year Theory (3) VLPA
More advanced study in mid- to late 19th-century chromaticism and compositional style; analysis of representative works; technical exercises; model composition. Prerequisite: 2.0 in MUSIC 301; 2.0 in MUSIC 304; corequisite: MUSIC 305. Offered: Sp.

MUSIC 303 Second-Year Theory (3) VLPA
Core theory sequence for majors. Introduction to the theory and analysis of 20th-century music. Prerequisite: 2.0 in MUSIC 302; 2.0 in MUSIC 305; corequisite: MUSIC 306. Offered: A.

MUSIC 304 Second-Year Ear-Training I (0/1, max. 1) VLPA
Core ear-training sequence for majors. Prerequisite: 2.0 in MUSIC 203; 2.0 in MUSIC 206; corequisite: MUSIC 301. Offered: W.

MUSIC 305 Second-Year Ear-Training II (0/1, max. 1) VLPA
Core ear-training sequence for majors. Prerequisite: 2.0 in MUSIC 301; 2.0 in MUSIC 304; corequisite: MUSIC 302. Offered: Sp.

MUSIC 306 Second-Year Ear-Training III (0/1, max. 1) VLPA
Core ear-training sequence for majors. Prerequisite: 2.0 in MUSIC 302; 2.0 in MUSIC 305; corequisite: MUSIC 303. Offered: A.

MUSIC 307 Diction for Singers (2) VLPA
Application of basic rules of diction, enunciation, and articulation in Italian. Materials include texts from the basic vocal repertoire. Primarily for the voice majors at freshman and sophomore levels; nonmajors on a space-available basis.

MUSIC 308 Diction for Singers (2) VLPA
Application of basic rules of diction, enunciation, and articulation in French. Materials include texts from the basic vocal repertoire. Primarily for the voice majors at freshman and sophomore levels; nonmajors on a space-available basis.

MUSIC 309 Diction for Singers (2) VLPA
Application of basic rules of diction, enunciation, and articulation in German. Materials include texts from the basic vocal repertoire. Primarily for the voice majors at freshman and sophomore levels; nonmajors on a space-available basis.

MUSIC 316 Music Cultures of the World (5) I&S/ VLPA
Near East, Central Asia, Far East, South and southeast Asia, Indonesia, and the Philippines. Content varies.

MUSIC 317 Music Cultures of the World (5) I&S/ VLPA
Music of Africa, Americas, and Oceania. Content varies.

MUSIC 318 Music Cultures of the World (5) I&S/ VLPA
Folk and popular music in western and eastern Europe and the Americas. Content varies.

MUSIC 319 Afro-American Music (5) I&S/ VLPA
Centers on Black music in the United States, but also clarifies the relationship of this music to the musics of other Afro-American cultures as well as to their African roots.

MUSIC 326 Repertoire (2) VLPA
For music majors.

MUSIC 327 Repertoire (2) VLPA
For music majors.

MUSIC 328 Repertoire (2) VLPA
For music majors.

MUSIC 331 History of Jazz (5) VLPA
Extensive overview of important musicians, composers, arrangers, and stylistic periods of jazz history from emergence of the first jazz bands at the turn of the 20th century through post-modern bebop era of the 1990s.

MUSIC 332 Music in European Society: Antiquity to 1700 (5) I&S/ VLPA
Music and its relationship to aspects of European culture and society-philosophy, politics, social conditions, and the visual arts from antiquity to 1700.

MUSIC 333 Music in Western Culture (5) I&S/ VLPA
Music in Europe and North America, drawn from classical, popular, jazz, opera, and musical theatre traditions. Emphasis on the relationship between musical works and their social, philosophical, political, and other contexts.

MUSIC 334 Band Arranging (2) VLPA
Prerequisite: MUSIC 303.

MUSIC 336 Jazz Arranging (2) VLPA
Writing in jazz style for various instrumental combinations. To be able to arrange for modern jazz orchestra. Prerequisite: MUSIC 303.

MUSIC 344 Psychology of Music: Cognition (5) I&S/ VLPA
Critical examination of questions, designs, and conclusions of previous research in a variety of areas related to music cognition including music perception, music performance, musical development, musical affect, musical preference, social psychology, and neuro-science.

MUSIC 350 Choral Conducting (1) VLPA
Overview of choral conducting patterns. Score, voice warm-up, and intonation, Tempo fluctuation, left hand, diction, discipline. Designed for music and music education majors. Prerequisite: MUSIC 302; corequisite: MUSEN 307, 350 or 351.

MUSIC 351 Choral Conducting (1) VLPA
Overview of choral conducting patterns. Score, voice warm-up, and intonation. Tempo fluctuation, left hand, diction, discipline. Designed for music and music education majors. Prerequisite: MUSIC 350; corequisite: MUSEN 307, 350 or 351.

MUSIC 352 Choral Conducting (1) VLPA
Overview of choral conducting patterns. Score, voice warm-up, and intonation. Tempo fluctuation, left hand, diction, discipline.
MUSIC 366 Cylinders to Platters—A Survey of Recorded Music Since 1888 (3) VLPA Music as reflected through the influences of the recording industry and the development of related technologies. Examines social and artistic impacts that the recording age has brought to American and European musical cultures. Recommended: MUSIC 120; MUSIC 162.

MUSIC 367 Beginning Jazz Improvisation I (1) VLPA Beginning jazz improvisation techniques used in the performance of basic jazz styles such as the blues. Primarily for music majors. Prerequisite: MUSIC 302.

MUSIC 368 Beginning Jazz Improvisation II (1) VLPA Beginning jazz improvisation techniques used in the performance of basic jazz styles such as the blues. Primarily for music majors. Prerequisite: MUSIC 367.

MUSIC 369 Beginning Jazz Improvisation III (1) VLPA Beginning jazz improvisation techniques used in the performance of basic jazz styles such as the blues. Primarily for music majors. Prerequisite: MUSIC 368.

MUSIC 379 Junior Recital (1) VLPA For participants in the Bachelor of Music degree program only.

MUSIC 380 Instrumental Conducting (1) VLPA Salzman Acquaints the beginning conductor with beat patterns and their expressive modifications, basic rehearsal techniques and score study. Prerequisite: either MUSIC 212 or MUSIC 302.

MUSIC 381 Instrumental Conducting (1) VLPA Salzman Acquaints the beginning conductor with beat patterns and their expressive modifications, basic rehearsal techniques and score study. Prerequisite: MUSIC 380.

MUSIC 382 Instrumental Conducting (1) VLPA Salzman Acquaints the beginning conductor with beat patterns and their expressive modifications, basic rehearsal techniques and score study. Prerequisite: MUSIC 381.

MUSIC 384 Ideas In Music (5) I&S/VLPA Taricani Examines selected sources and compositions of music from the Western tradition (from the tenth through the twentieth centuries), in relation to the intellectual background of the periods and countries that produced them. Musical studies accompanied by assigned readings in philosophical, religious, literary, and artistic texts in addition to the primary readings in musical history.

MUSIC 388 Jazz Pedagogy (2) VLPA Stylistic and aesthetic developments in the performance of jazz. Key musical ingredients in the evolution of jazz as an art form and the skills commensurate with teaching these. Designed for music majors

MUSIC 390 Special Topics in Music (3, max. 9) VLPA Starr Topics vary.

MUSIC 391 Composition (3, max. 9) VLPA One-hour private instruction and one-hour laboratory session each week. Prerequisite: MUSIC 291.

MUSIC 400 Computer Applications to Music (3, max. 9) VLPA Music workstation applications using microcomputers, music synthesizers, and analog-to-digital converters: music editing and score production, transcription, waveform and spectral analysis, and introduction to programming.

MUSIC 401 Digital Sound Synthesis (5) VLPA Introduction to software sound synthesis techniques, in-acoustic composers and psychoacoustics; virtual synthesizers and unit generators; table-lookup oscillators and wavetable synthesis; additive synthesis; modulation synthesis; ring amplitude, phase and frequency; granular synthesis; noise; subtractive synthesis and filters. Offered: jointly with DXARTS 461; A.

MUSIC 402 Digital Sound Processing (5) VLPA Introduction to digital sound processing techniques. Includes sampling techniques and time-domain transformation of samples sound; sample-rate conversion; sound granulation and time stretching; delay lines; introduction to digital filtering; FIR and IIR filters; digital effects; reverberation; virtual-room acoustics and dynamic sound location. Prerequisite: DXARTS 461/MUSIC 401. Offered: jointly with DXARTS 462; W.

MUSIC 403 Advanced Digital Sound Synthesis and Processing (5) VLPA Advanced sound processing and synthesis techniques. Includes sound time warping; analysis-synthesis techniques; linear predictive coding; the phase vocoder; frequency-domain sound transformations; introduction to physical modeling. Prerequisite: DXARTS 462/MUSIC 402. Offered: jointly with DXARTS 463; S.

MUSIC 405 Liturgics and Hymnology: Practical Applications I (2) VLPA Butler Prepares organ majors and other advanced organ students to play hymns in a manner that inspires congregational singing. Includes a study of hymnology as well as instruction on the realization of anthem accompaniments and piano scores at the organ. Prerequisite: MUSIC 302; MUSIC 305; MUHST 212. Offered: A.

MUSIC 406 Liturgics and Hymnology: Practical Applications II (2) VLPA Butler Survey of church choir repertoire with emphasis on the smaller choir, choir organization and rehearsal techniques, choral conductor’s preparation, a brief study of choral styles and editions, and choral arranging for the church choir. Prerequisite: either MUSIC 303, MUSIC 306, MUHST 210, or MUSIC 405. Offered: W.

MUSIC 407 Liturgics and Hymnology: Practical Applications III (2) VLPA Butler History of Psalm singing, traditional and contemporary liturgics, plainchant, liturgical use of handbells, “contemporary” repertoire for the church, orchestral instruments and their use in worship (arranging for amateur players, basics of string bowing and editing, organizing instrumental ensembles), youth choir organization. Prerequisite: either MUSIC 303, MUSIC 306, MUHST 210, or MUSIC 406. Offered: Sp.

MUSIC 410 ElectroAcoustic Music: History and Analysis (3) VLPA Examines the music of major electroacoustic composers. Emphasis on the relationship between technological resources and compositional advances. Addresses issues raised by the diversity of approaches to musical composition; relates particular creative contributions to the historical, cultural, and technological contexts in which they originated. Prerequisite: MUSIC 303; MUSIC 306; MUHST 210. Offered: Sp.

MUSIC 418 Baroque Ornamentation and Improvisation (3) VLPA Terry The study of ornamentation and improvisation for keyboard, woodwinds, voice, and strings of selected German, Italian, French, and English repertoire from 1600 to 1800.

MUSIC 420 Organ Improvisation and Service Playing I (2) VLPA Prepares students to improvise, especially for the church/synagogue service. Includes a brief study of hymnology, hymn elaboration, altered harmonizations, improvisation based on existing hymn tunes, interludes, chorale preludes, ornamented chorales. Prerequisite: MUSIC 303; MUSIC 306. Offered: A.

MUSIC 421 Organ Improvisation and Service Playing II (2) VLPA Continuation of MUSIC 420. Includes brief review of figured bass and functional harmony, free improvisation in simple antecedent/consequent ABA forms and more complex forms (rondo, theme, and variation), improvising partitas, interludes, improvisations based on plainchant. A survey of important improvisation texts. Prerequisite: MUSIC 420. Offered: W.

MUSIC 422 Organ Improvisation and Service Playing III (2) VLPA Continuation of MUSIC 421. Advanced improvisation in the singing of all types, French, and English repertoire. Prepares organ majors and other advanced organ students to improvise effectively for all types of church services. Prerequisite: MUSIC 420. Offered: W.

MUSIC 426 Advanced Jazz Arranging (2) VLPA Brockman Advanced arranging techniques for jazz ensembles of various sizes, exploring methods employed by Duke Ellington, Gil Evans, and others. Assignments include one original arrangement each for small-combo and full-jazz ensemble. Prerequisite: MUSIC 336. Offered: W.

MUSIC 427 Music of Africa (3) I&S/VLPA Music cultures of Africa. Traditional styles and more recent developments. Open to all students with an interest in the area. Prerequisite: MUSIC 317.

MUSIC 428 Music of North India (3) I&S/VLPA Classical music of North India, the Hindustani tradition with emphasis on the Dhrupad and Khayal styles. Recommended: ethnomusicology or South Asian studies background.

MUSIC 429 String Orchestral Repertoire (2, max. 18) VLPA Lieberman Patterson, Saks. Wedras Intended for undergraduate BM/BM and BM music majors. Offered: biannually; AWSp.

MUSIC 430 Organology (3) VLPA Systematic study of musical instruments, including the history, acoustical phenomena, and physical topologies of instruments from around the world, with emphasis on non-Western music.

MUSIC 433 Music of Latin America (3) I&S/VLPA The music of the Spanish-, French-, and Portuguese-speaking New World countries.

MUSIC 434 Pedagogy (2) VLPA Principles of effective studio teaching; survey and evaluation of teaching materials.

MUSIC 435 Pedagogy (2) VLPA Principles of effective studio teaching; survey and evaluation of teaching materials.

MUSIC 436 Pedagogy (2) VLPA Principles of effective studio teaching; survey and evaluation of teaching materials.
MUSIC 438 Problems in Contemporary Music Performance (3, max. 9) VLPA Kapp An active course examining and solving problems relevant to the successful performance of twentieth-century music. Preparation for complex rhythms, odd groupings, new notation, and extended performing techniques.

MUSIC 439 Music of Indonesia and the Philippines (3) I&S/VLPA Includes the traditions of Sumatra, Sunda, Java, Bali, Sunda Islands, and the Philippines. Open to students in music and to students with an interest in the area.

MUSIC 444 Music of the Near East (3) I&S/VLPA Classical and folk musical traditions of Iran, Turkey, and the Arab world. Prerequisite: MUSIC 316.

MUSIC 445 Selected Topics in Ethnomusicology (3/5, max. 15) I&S/VLPA Deals with areas not covered by other courses in ethnomusicology. Content varies with different instructors.

MUSIC 446 Music in American Cultures (3) I&S/VLPA Compares musical history and experience of selected American cultures that have fed into the American mainstream or had significant popularity on its periphery. Case studies may include African Americans, Latina/o Americans, Jewish Americans, Asian Americans, or European Americans. Considerations of social identity as well as musical styles. Offered: jointly with AES 446.

MUSIC 447 Music of Southern India (3) I&S/VLPA Classical music of South India, the Karnatic tradition, with emphasis on the concert repertoire. Recommended: ethnomusicology or South Asian studies background.

MUSIC 448 Music of China (3) I&S/VLPA Confucian philosophies that relate to music, theory, scale systems, cosmology. Development of instrumental styles, vocal and dramatic regional forms from early historical periods to the present; recommended: background in either ethnomusicology or East Asian Studies. Recommended: ethnomusicology or East Asian studies background.

MUSIC 449 Advanced Piano Repertoire (2, max. 6) VLPA Collier, McCabé, Michaelian, Sheppard Piano for majors who wish an in-depth survey of major areas of the piano repertoire. Prerequisite: MUSIC 328. Offered: AWRsp.

MUSIC 450 Percussion Education Institute (2) VLPA Collier, Cruse Intensive four-week institute focusing on techniques in percussion, timpani, and mallet performance. Intended for music educators with little or no percussion experience desiring additional training to enhance their careers as music teachers. Includes private instruction, master classes, and percussion ensemble participation. Prerequisite: MUSAP 217.

MUSIC 451 Summer Jazz Institute (1) VLPA Brockman, Collier, Seales Intensive one-week institute designed for the serious jazz student as well as for music educators. Six hours of daily instruction in jazz theory, ear-training, improvisation, arranging, as well as emphasis on rehearsal and performance techniques through sectional workshops and small group “jam sessions.”

MUSIC 454 Organ Pedagogy (3) VLPA Terry Pedagogical approaches to organ techniques and performance practice, provides opportunity for practical application by means of student teaching.

MUSIC 455 Choral Arranging (3) VLPA Primarily for choral conductors who need to modify, arrange or compose material to suit the capabilities of specific choral groups and performance situations.

MUSIC 458 Organ Repertoire: Middles Ages through Baroque (3) VLPA Terry Analysis and performance practices of organ literature. Middles Ages through baroque period. Development of the organ as musical instrument. Prerequisite: either MUHST 400, MUHST 401, MUHST 402, MUHST 403, MUHST 406, or MUHST 407.

MUSIC 459 Organ Repertoire: Bach to Present (3) VLPA Terry Analysis and performance practices of organ literature, classical period through the twentieth century. Development of the organ as a musical instrument. Prerequisite: either MUHST 408, MUHST 409, MUHST 410, MUHST 411, MUHST 412, MUHST 413, MUHST 414, MUHST 415, MUHST 417, MUHST 418, MUHST 419, MUHST 423, MUHST 424, or MUHST 426.

MUSIC 460 Advanced Vocal Repertoire: Pre-Nineteenth-Century Art Songs (2, max. 6) VLPA Professional preparation of pre-nineteenth-century songs with a view to total artistic-musical realization in performance. Appropriate style, character, balance, phrasing, diction, and projection for vocalists and pianists. Prerequisite: MUSIC 328.

MUSIC 461 Advanced Vocal Repertoire: Nineteenth-Century Songs (2, max. 6) VLPA Professional preparation of works from the literature of nineteenth-century German lieders, with a view to total artistic-musical realization in performance. Appropriate style, character, balance, phrasing, diction, and projection for vocalists and pianists. Prerequisite: MUSIC 460.

MUSIC 462 Advanced Vocal Repertoire: Twentieth-Century Art Songs (2, max. 6) VLPA Preparation of works from the twentieth-century repertoire of French, German, Italian, Spanish, and English songs, with a view to total artistic-musical realization in performance. Appropriate style, character, balance, phrasing, diction, and projection for vocalists and pianists. Prerequisite: MUSIC 461.

MUSIC 464 Jazz Laboratory (1, max. 9) VLPA Seales Forum for testing new technical skills, improvisational techniques, and jazz compositions and/or arrangements in a formal laboratory setting.

MUSIC 465 Acting for Singers (2, max. 6) VLPA Workshop designed specifically for the singing actor, focusing on character analysis, movement, and audition deportment skills.

MUSIC 467 Advanced Jazz Improvisation I (1) VLPA Collier, Seales Performance techniques in jazz improvisation for the advanced student. Prerequisite: MUSIC 369.

MUSIC 468 Advanced Jazz Improvisation II (1) VLPA Collier, Seales Performance techniques in jazz improvisation for the advanced student. Prerequisite: MUSIC 467.

MUSIC 469 Advanced Jazz Improvisation III (1) VLPA Collier, Seales Performance techniques in jazz improvisation for the advanced student. Prerequisite: MUSIC 468.

MUSIC 470 Analysis of Tonal Music: Introduction to Schenker (3) VLPA Bernard, Kopp, Rahn Introduction to the theories of Heinrich Schenker and their subsequent development; analysis of music from the common-practice period (1700-1900), with possible excursions into the twentieth century. Prerequisite: either both MUSIC 303 and MUHST 212 or both MUSIC 312 and MUHST 215.

MUSIC 471 Introduction to Atonal Theory and Analysis (3) VLPA Bernard, Rahn Theory of atonal music, including the “classical” twelve-tone repertoire. Analysis of works by Schoenberg, Berg, Webern, and others. Prerequisite: either both MUSIC 303 and MUHST 212 or both MUSIC 312 and MUHST 215.

MUSIC 472 Analysis of Twentieth Century Music, 1900-1950 (3, max. 6) VLPA Bernard, Durand, Karpen, Rahn, Thome Analytical examination of musical works of the first half of the twentieth century in Europe and the United States, with emphasis on music other than that of the second Viennese school. Prerequisite: either both MUSIC 303 and MUHST 212 or both MUSIC 312 and MUHST 215.

MUSIC 473 Keyboard Harmony and Transposition (3) VLPA Terry Keyboard harmonization from the baroque period to present; transposition of vocal and instrumental pieces for different pitch levels. Prerequisite: either both MUSIC 303 and MUHST 212 or both MUSIC 312 and MUHST 215. Offered: alternate years.

MUSIC 474 Keyboard Harmony and Transposition (3) VLPA Terry Keyboard harmonization from the baroque period to present; transposition of vocal and instrumental pieces to different pitch levels. Prerequisite: MUSIC 473. Offered: alternate years.

MUSIC 475 Figured Bass Realization (3) VLPA Terry Various styles of continuo realization for keyboardists, emphasizing Bach compositions, Haydn symphonies, and Mozart operas. Prerequisite: MUSIC 474. Offered: alternate years.

MUSIC 476 Advanced Vocal Repertoire: Seventeenth and Eighteenth Centuries (2) VLPA Opera repertoire, 1600 to the Bel Canto era. (Bellini, Rossini, Donizetti); style, traditions, embellishments in Italian, French, and German arias. Prerequisite: MUSIC 328.

MUSIC 477 Advanced Vocal Repertoire: Nineteenth Century (2) VLPA Opera repertoire, the last Bel Canto era through Verdi, Puccini and verismo, and significant German, French, and Slavic repertoire. Prerequisite: MUSIC 476.

MUSIC 478 Advanced Vocal Repertoire: Twentieth Century (2) VLPA Opera repertoire, twentieth-century opera literature (Barber, Menotti, Bartok, Dvorak); understanding of style, character and overall artistic and musical needs of the present. Prerequisite: MUSIC 477.

MUSIC 479 Senior Recital (1) VLPA .

MUSIC 480 The Anthropology of Music (3) I&S/VLPA Analysis of aspects of anthropological thought influential in ethnomusicology. Critical evaluation of dominant theoretical schools and modes of explanation. e.g., evolutionist,
diffusionist, historical particularist, structuralist, functionalist, symbolist, and semiotic, through detailed examination of seminal texts. Offered: jointly with ANTH 430.

MUSIC 481 Choral Repertoire: Sixteenth and Seventeenth Centuries (3) VLPA Sacred and secular choral literature from the Renaissance through the early baroque, covering Europe and England. Various genres and styles of major composers, including performance practice, rehearsals, and conducting.

MUSIC 483 Choral Repertoire: Nineteenth Century (3) VLPA Sacred and secular choral literature of the nineteenth century, covering mainland Europe and England. Analysis of accompanied and a cappella choral works by major composers with implications for conducting and programming of literature.

MUSIC 484 Choral Repertoire: Twentieth Century (3) VLPA Choral literature of the twentieth century, covering America, England, and mainland Europe. Various genres and styles, including score study and teaching strategies.

MUSIC 487 Tonal Counterpoint (3) VLPA Bernard, Durand, Rahn Introduction to tonal counterpoint through exercises in analysis and composition, focusing on 18th-century styles. Study of melody principles of counterpoint in two- and three-voice, dance forms, inventions, fugue. Prerequisite: either MUSIC 311 or MUSIC 202.

MUSIC 489 Special Topics in Music Theory (3/5, max. 15) VLPA Prerequisite: either both MUSIC 303 and MUHST 210 or both MUSIC 312 and MUHST 314.

MUSIC 490 Orchestration (3) VLPA Study of the instruments of the orchestra and practical experience in combining them; to enable the student to score for various instrumental combinations. Ideally to be taken before band arranging or jazz arranging, but is not a prerequisite.

MUSIC 491 Composition (3, max. 18) VLPA One-hour private instruction and one-hour laboratory session each week. Prerequisite: MUSIC 391.

MUSIC 492 Opera Direction and Production (4) VLPA Practical experience with problems of the theater.

MUSIC 493 Opera Direction and Production (4) VLPA Practical experience with problems of the theater. Prerequisite: MUSIC 492.

MUSIC 495 Music of Japan (3) I&S/VLPA Survey of major Japanese musical traditions. Open to students in music and East Asian area studies. Prerequisite: MUSIC 316.

MUSIC 498 Senior Thesis (3-, max. 9) VLPA Design and completion of an individual research project and writing of a thesis under supervision of a faculty member.

MUSIC 499 Undergraduate Research (*, max. 6)

MUSIC 511 Seminar in Field and Laboratory Methods (3) Methodology of field research in ethnomusicology along with practical experience. Prerequisite: graduate student standing in ethnomusicology or permission of instructor.

MUSIC 512 Seminar in Ethnomusicology (3/5, max. 35) Deals with advanced theoretical and methodological problems in ethnomusicology, and with the relationship of ethnomusicology to allied disciplines. Prerequisite: graduate Music 510.

MUSIC 520 Music in Higher Education (3) Morrison Philosophical and practical issues surrounding music within the context of higher education. Topics include mission and structure of music programs, development of teaching expertise, teacher/student evaluation, academic freedom, and job opportunities. Appropriate for all graduate music students and does not require background in teaching or education.

MUSIC 523 Seminar in Music and Socialization (3, max. 9) Lundquist The socialization process and music, including the interaction whereby music culture is learned. Prerequisite: MUSIC 345 or MUSIC 543 or permission of instructor.

MUSIC 526 History of Theory (3) Ancient, medieval, early Renaissance.

MUSIC 527 History of Theory (3) Renaissance, baroque, early classic.

MUSIC 528 History of Theory (3) Classic, romantic, twentieth century.

MUSIC 530 Seminar in Music Cognition (3, max. 9) Study of research literature in cognition and music cognition, particularly as it relates to nonverbal musical experience. Prerequisite: MUSIC 344 or MUSIC 544 or permission of instructor.

MUSIC 531 Preceptorial Readings in Ethnomusicology (3) Theoretical and methodological issues in ethnomusicology based on historical and contemporary major writings. Critical evaluations of works with a broad view toward developing ethnomusicological research. Prerequisite: permission of instructor.

MUSIC 532 Opera Direction and Production (4/6, max. 12) Practical experience with problems of the opera theatre.

MUSIC 533 Preceptorial Readings in Ethnomusicology (5) Significant ethnomusicological literature on the music cultures of Asia. Meets with MUSIC 316. Prerequisite: graduate student standing in ethnomusicology and permission of instructor.

MUSIC 534 Preceptorial Readings in Ethnomusicology (5) Significant ethnomusicological literature on the music cultures of Africa, the Americas, and Oceania. Meets with MUSIC 317. Prerequisite: graduate student standing in ethnomusicology and permission of instructor.

MUSIC 535 Preceptorial Readings in Ethnomusicology (5) Significant ethnomusicological literature on the music cultures of Europe and North America. Meets with MUSIC 318. Prerequisite: graduate student standing in ethnomusicology and permission of instructor.

MUSIC 536 Transcription and Analysis (3) Study of the methodological principles of transcription and analysis, together with practical exercises in developing transcription skills. Prerequisite: graduate student standing in ethnomusicology and permission of instructor.

MUSIC 544 Psychology of Music: Music Cognition (5) Critical examination of questions, designs, and conclusions of previous research in a variety of areas related to music cognition including music performance, musical creativity, musical affect, musical preference, social psychology, and neuroscience. Discusses the role of theory, method, and typical procedures for psychological research.

MUSIC 551 Practicum in Music Instruction (3, max. 9) Practical application and validation of results of investigation in curriculum, music teaching and learning, performance and theoretical studies. Prerequisite: teaching experience or permission of instructor.

MUSIC 553 Advanced Choral Techniques (2, max. 18) Practical application of technique and pedagogy related to choral music. Surveys major choral repertoire. Concurrent enrollment in MUSIC 583 required.

MUSIC 559 Master's Recital (3, max. 6) Public performance for students in the Master of Music degree program. Prerequisite: permission of instructor and Master of Music program standing.

MUSIC 570 Seminar in Schenkerian Analysis (3, max. 9) Bernard, Rahn Advanced work in Schenkerian analysis. Prerequisite: MUSIC 470.

MUSIC 571 Seminar in Serialism (3, max. 9) Bernard, Kopp, Rahn Advanced theoretical and analytical work in serialism and other nontonal systems. Prerequisite: MUSIC 471 or equivalent.

MUSIC 572 Advanced Topics in Computer Music (3) Karpen, Rahn Topics vary. Offered: AWSpS.

MUSIC 573 Seminar in Tonal Analysis (3, max. 9) Modern theoretical and analytical methods appropriate to study of western music of the eighteenth and nineteenth centuries, conceived independently of or in response to the work of Heinrich Schenker. Prerequisite: MUSIC 470 or permission of instructor.

MUSIC 574 Analysis of Twentieth-Century Music: 1950 — Present (3) Bernard, Durand, Karpen, Rahn Analytical examination of major works of second half of twentieth century. Prerequisite: MUSIC 471; MUSIC 472, or permission of instructor.

MUSIC 575 Seminar in Theory (3, max. 18) Bernard, Rahn Development and discussion of current student and faculty research in compositional/analytical theory and metatheory.

MUSIC 576 Critical Theory of Music (3, max. 18) Philosophical foundations of the criticism of music, including relevant contemporary thought in the criticism of literature and the other arts.

MUSIC 577 Composers of the Twentieth Century (3, max. 9) Bernard, Durand, Karpen, Rahn, Thome Analytical examination of the work of a major composer of the twentieth century. Prerequisite: MUSIC 574 or permission of instructor.
MUSIC 580 Advanced Conducting (3, max. 9)  
Eros, Salzman  
MUSIC 581 Advanced Conducting (3, max. 9)  
Eros, Salzman  
MUSIC 582 Advanced Conducting (3, max. 9)  
Eros, Salzman  
MUSIC 583 Advanced Choral Conducting (2, max. 18) Boers  
MUSIC 590 Keyboard and Doctoral Lecture Recital or Concerto Recital (6, max. 18)  
Lecture recital or Concerto recital for students in the Doctor of Musical Arts in Piano Performance, in Harpsichord Performance, and in Organ Performance degree programs.  
MUSIC 591 Graduate Composition (*, max. 30) Bernard, Durand, Karpen, Rahn  
MUSIC 599 Advanced Selected Topics (1-3, max. 27)  
Selected readings on current issues and problems in music. Prerequisite: permission of a supervising music faculty member.  
MUSIC 600 Independent Study or Research (*)  
MUSIC 700 Master’s Thesis (*)  
MUSIC 800 Doctoral Dissertation (*)  

Music Applied  
MUSIC 133 Basic Keyboard (2) VLPA  
Keyboard harmony and simple keyboard pieces. Class instruction. Audition required. Prerequisite: MUSIC 116.  
MUSIC 134 Basic Keyboard (2) VLPA  
Keyboard harmony and simple keyboard pieces. Class instruction. Audition required. Prerequisite: MUSIC 133.  
MUSIC 135 Basic Keyboard (2) VLPA  
Keyboard harmony and simple keyboard pieces. Class instruction. Audition required. Prerequisite: MUSIC 134.  
MUSIC 136 Basic Jazz Keyboard (2, max. 6) VLPA  
Seales Basics of jazz and pop chord voicings, reading lead sheets, basic accompanying in various jazz and pop styles. Audition required.  
MUSIC 137 Class Instruction: Voice (1) VLPA  
Basic fundamentals of good singing: breathing, diction, voice focus. Materials include mainly early Italian art songs, some English and French songs. Audition required.  
MUSIC 138 Class Instruction: Voice (1) VLPA  
Basic fundamentals of good singing: breathing, diction, voice focus. Materials include mainly early Italian art songs, some English and French songs. Audition required. Prerequisite: MUSAP 137.  
MUSIC 139 Class Instruction: Voice (1) VLPA  
Basic fundamentals of good singing: breathing, diction, voice focus. Materials include mainly early Italian art songs, some English and French songs. Audition required. Prerequisite: MUSAP 139.  
MUSIC 205 String Techniques (2, max. 12) VLPA  
Designed to prepare music education students to teach beginning and intermediate strings in the public schools.  
MUSIC 210 Wind Techniques (2, max. 12) VLPA  
Designed to prepare music education students to teach beginning and intermediate woodwinds and brass in the public schools.  
MUSIC 217 Percussion Techniques (2, max. 4) VLPA  
Collier The study of basic percussion techniques as they apply to music in the public schools. Acquaints the prospective music education major with percussion performance and teaching techniques.  
MUSIC 218 Guitar Techniques (2, max. 4) VLPA  
Partington Includes exercises to develop a good basic technique emphasizing correct position and movement of both hands, basic folk song accompaniments including a variety of strums, finger picking patterns, hammering on and bass runs, reading guitar music, classical pieces, special effects, and access to other styles. Offered: W.  
MUSIC 233 Secondary Piano (2) VLPA  
Focus is on advanced keyboard skills and piano repertoire. Audition required. Prerequisite: MUSAP 135.  
MUSIC 234 Secondary Piano (2) VLPA  
Focus is on advanced keyboard skills and piano repertoire. Audition required. Prerequisite: MUSAP 233.  
MUSIC 235 Secondary Piano (2) VLPA  
Focus is on advanced keyboard skills and piano repertoire. Audition required. Prerequisite: MUSAP 234.  
MUSIC 237 Secondary Class Instruction: Voice (2, max. 6) VLPA  
Continuation of basic fundamentals of good singing: breathing, diction, voice focus and repertoire. Designed for students not yet prepared for private instruction. Audition required. Prerequisite: MUSAP 139.  
MUSIC 239 Secondary Piano (2, max. 8) VLPA  
MUSIC 300 Private instruction: Voice (2-3, max. 45) VLPA  
MUSIC 301 Private Instruction: Piano (2-3, max. 45) VLPA  
McCabe, Michaelian, Seales, Sheppard Intended for undergraduate non-majors. Audition required.  
MUSIC 302 Private Instruction: Organ (2-3, max. 45) VLPA  
Terry Intended for undergraduate non-majors. Audition required.  
MUSIC 303 Private Instruction: Harpsichord (2-3, max. 45) VLPA  
Terry Intended for undergraduate non-majors. Audition required.  
MUSIC 304 Private Instruction: Violin (2-3, max. 45) VLPA  
Lieberman Intended for undergraduate non-majors. Audition required.  
MUSIC 305 Private Instruction: Violoncello (2-3, max. 45) VLPA  
Saks Intended for undergraduate non-majors. Audition required.  
MUSIC 306 Private Instruction: Double Bass (2-3, max. 45) VLPA  
Lieberman Intended for undergraduate non-majors. Audition required.  
MUSIC 307 Private Instruction: Flute (2-3, max. 45) VLPA  
Shin Intended for undergraduate non-majors. Audition required.  
MUSIC 308 Private Instruction: Oboe (2-3, max. 45) VLPA  
Intended for undergraduate non-majors. Audition required.  
MUSIC 309 Private Instruction: Clarinet (2-3, max. 45) VLPA  
Intended for undergraduate non-majors. Audition required.  
MUSIC 310 Private Instruction: Bassoon (2-3, max. 45) VLPA  
Intended for undergraduate non-majors. Audition required.  
MUSIC 311 Private Instruction: Saxophone (2-3, max. 45) VLPA  
Brockman Intended for undergraduate non-majors. Audition required.  
MUSIC 312 Private Instruction: Horn (2-3, max. 45) VLPA  
Kappy Intended for undergraduate non-majors. Audition required.  
MUSIC 313 Private Instruction: Trumpet (2-3, max. 45) VLPA  
Vizzutti Intended for undergraduate non-majors. Audition required.  
MUSIC 314 Private Instruction: Trombone (2-3, max. 45) VLPA  
Intended for undergraduate non-majors. Audition required.  
MUSIC 315 Private Instruction: Tuba (2-3, max. 45) VLPA  
Intended for undergraduate non-majors. Audition required.  
MUSIC 316 Private Instruction: Harp (2-3, max. 45) VLPA  
Lehwalder Intended for undergraduate non-majors. Audition required.  
MUSIC 317 Private Instruction: Percussion (2-3, max. 45) VLPA  
Collier, Crusoe Intended for undergraduate non-majors. Audition required.  
MUSIC 318 Private Instruction: Guitar (2-3, max. 45) VLPA  
Partington Intended for undergraduate non-majors. Audition required.  
MUSIC 319 Private Instruction: Viola da Gamba (2-3, max. 45) VLPA  
Intended for undergraduate non-majors. Audition required.  
MUSIC 320 Private Instruction: Voice (2-3, max. 27) VLPA  
Eaglen, Guyer, Harper Intended for undergraduate majors. Audition required.  
MUSIC 321 Private Instruction: Piano (2-3, max. 27) VLPA  
McCabe, Michaelian, Seales, Sheppard Intended for undergraduate majors. Audition required.  
MUSIC 322 Private Instruction: Organ (2-3, max. 27) VLPA  
Terry Intended for undergraduate majors. Audition required.  
MUSIC 323 Private Instruction: Harpsichord (2-3, max. 27) VLPA  
Terry Intended for undergraduate majors. Audition required.  
MUSIC 324 Private Instruction: Violin (2-3, max. 27) VLPA  
Patterson Intended for undergraduate majors. Audition required.  
MUSIC 325 Private Instruction: Double Bass (2-3, max. 27) VLPA  
Lieberman Intended for undergraduate majors. Audition required.  
MUSIC 327 Private Instruction: Flute (2-3, max. 27) VLPA  
Shin Intended for undergraduate majors. Audition required.
MUSAP 328 Private Instruction: Oboe (2-3, max. 27) VLPA Intended for undergraduate majors. Audition required.

MUSAP 329 Private Instruction: Clarinet (2-3, max. 27) VLPA Intended for undergraduate majors. Audition required.

MUSAP 330 Private Instruction: Bassoon (2-3, max. 27) VLPA Intended for undergraduate majors. Audition required.

MUSAP 331 Private Instruction: Saxophone (2-3, max. 27) VLPA Brockman Intended for undergraduate majors. Audition required.

MUSAP 332 Private Instruction: Horn (2-3, max. 27) VLPA Kappy Intended for undergraduate majors. Audition required.

MUSAP 333 Private Instruction: Trumpet (2-3, max. 27) VLPA Vizzutti Intended for undergraduate majors. Audition required.

MUSAP 334 Private Instruction: Trombone (2-3, max. 27) VLPA Intended for undergraduate majors. Audition required.

MUSAP 335 Private Instruction: Tuba (2-3, max. 27) VLPA Vokolek Intended for undergraduate majors. Audition required.

MUSAP 336 Private Instruction: Bassoon (2-3, max. 27) VLPA Vizzutti Intended for undergraduate majors. Audition required.

MUSAP 337 Private Instruction: Percussion (2-3, max. 27) VLPA Lehwalder Intended for undergraduate majors. Audition required.

MUSAP 338 Private Instruction: Guitar (2-3, max. 27) VLPA Partington Intended for undergraduate majors. Audition required.

MUSAP 339 Private Instruction: Viola da Gamba (2-3, max. 27) VLPA Intended for undergraduate majors. Audition required.

MUSAP 340 Timpani (2-3, max. 27) VLPA Cruso Intended for undergraduate majors. Audition required.

MUSAP 341 Mallet Percussion (2-3, max. 27) VLPA Collier Intended for undergraduate majors. Audition required.

MUSAP 342 Jazz Drum Set (2-3) Primarily for jazz studies and percussion majors. Audition required for non-majors.

MUSAP 343 Private Instruction: Viola (2-3, max. 45) VLPA Watras Intended for undergraduate non-majors. Audition required.

MUSAP 363 Private Instruction: Violin (2-3, max. 27) VLPA Watras Intended for undergraduate majors. Audition required.

MUSAP 421 Private Instruction: Piano (2-3, max. 27) VLPA McCabe, Michaelian, Seales, Sheppard Intended for undergraduate majors. Audition required.
MUSAP 517 Private Instruction: Percussion (2-3, max. 45) Collier, Crusoe Intended for graduate non-majors. Audition required.

MUSAP 518 Private Instruction: Guitar (2-3, max. 45) Partington Intended for graduate non-majors. Audition required.

MUSAP 519 Private Instruction: Viola da Gamba (2-3, max. 45) Audition required.

MUSAP 521 Private Instruction: Piano (3, max. 18) McCabe, Michaelian, Sheppard Intended for graduate majors. Audition required.

MUSAP 522 Private Instruction: Organ (3, max. 18) Terry Intended for graduate majors. Audition required.

MUSAP 523 Private Instruction: Harpsichord (3, max. 18) Terry Intended for graduate majors. Audition required.

MUSAP 524 Private Instruction: Violin (3, max. 18) Patterson Intended for graduate majors. Audition required.

MUSAP 525 Private Instruction: Violoncello (3, max. 18) Saks Intended for graduate majors. Audition required.

MUSAP 526 Private Instruction: Double Bass (3, max. 18) Lieberman Intended for graduate majors. Audition required.

MUSAP 527 Private Instruction: Flute (3, max. 18) Shin Intended for graduate majors. Audition required.

MUSAP 528 Private Instruction: Oboe (3, max. 18) Intended for graduate majors. Audition required.

MUSAP 529 Private Instruction: Clarinet (3, max. 18) Intended for graduate majors. Audition required.

MUSAP 530 Private Instruction: Bassoon (3, max. 18) Intended for graduate majors. Audition required.

MUSAP 531 Private Instruction: Saxophone (3, max. 18) Brockman Intended for graduate majors. Audition required.

MUSAP 532 Private Instruction: Horn (3, max. 18) Kappy Intended for graduate majors. Audition required.

MUSAP 533 Private Instruction: Trumpet (3, max. 18) Vizzutti Intended for graduate majors. Audition required.

MUSAP 534 Private Instruction: Trombone (3, max. 18) Intended for graduate majors. Audition required.

MUSAP 535 Private Instruction: Tuba (3, max. 18) Intended for graduate majors. Audition required.

MUSAP 536 Private Instruction: Harp (3, max. 18) Lehwalder Intended for graduate majors. Audition required.

MUSAP 537 Private Instruction: Percussion (3, max. 18) Collier, Crusoe Intended for graduate majors. Audition required.

MUSAP 538 Private Instruction: Guitar (3, max. 18) Partington Intended for graduate majors. Audition required.

MUSAP 539 Private Instruction: Violin (3, max. 18) Patterson Intended for graduate majors. Audition required.

MUSAP 540 Timpani (3, max. 18) Crusoe Intended for graduate majors. Audition required.

MUSAP 541 Mallet Percussion (3, max. 18) Collier Intended for graduate majors. Audition required.

MUSAP 542 Private Instruction: Viola da Gamba (3, max. 18) Intended for graduate majors. Audition required.

MUSAP 543 Private Instruction: Viola (2-3, max. 45) Watras Intended for graduate non-majors. Audition required. Offered: AWSpS.

MUSAP 544 Private Instruction: Violoncello (2-3, max. 45) Watras Intended for Master's degree candidates. Audition required. Offered: AWSpS.

MUSAP 545 Private Instruction: Guitar (3, max. 27) Collier Intended for graduate majors. Audition required.

MUSAP 546 Private Instruction: Harpsichord (3, max. 27) Lieberman Intended for graduate majors. Audition required.

MUSAP 547 Private Instruction: Double Bass (3, max. 27) Lieberman Intended for graduate majors. Audition required.

MUSAP 548 Private Instruction: Double Bass (3, max. 27) Lieberman Intended for graduate majors. Audition required.

MUSAP 549 Private Instruction: Flute (3, max. 27) Shin Intended for graduate majors. Audition required.

MUSAP 550 Private Instruction: Violin (3, max. 27) Patterson Intended for graduate majors. Audition required.

MUSAP 551 Private Instruction: Piano (3, max. 27) McCabe, Michaelian, Sheppard Intended for graduate majors. Audition required.

MUSAP 552 Private Instruction: Organ (3, max. 27) Terry Intended for graduate majors. Audition required.

MUSAP 553 Private Instruction: Harpsichord (3, max. 27) Terry Intended for graduate majors. Audition required.

MUSAP 554 Private Instruction: Violoncello (3, max. 27) Saks Intended for graduate majors. Audition required.

MUSAP 555 Private Instruction: Double Bass (3, max. 27) Lieberman Intended for graduate majors. Audition required.

MUSAP 556 Private Instruction: Flute (3, max. 27) Shin Intended for graduate majors. Audition required.

MUSAP 557 Private Instruction: Violoncello (3, max. 27) Saks Intended for graduate majors. Audition required.

MUSAP 558 Private Instruction: Organ (3, max. 27) Terry Intended for graduate majors. Audition required.

MUSAP 559 World Music Laboratory (2-3, max. 18) World music traditions taught by visiting artists with emphasis on cultural pedagogy and traditional theory. The particular culture studied changes from year to year. Required of all graduate students in ethnomusicology. Credit/no credit only. Audition required.

MUSAP 560 Private Instruction: World Music Laboratory (2-3, max. 18) World music traditions taught by visiting artists with emphasis on cultural pedagogy and traditional theory. The particular culture studied changes from year to year. Required of all graduate students in ethnomusicology. Credit/no credit only. Audition required.

MUSAP 561 Private Instruction: Mallet Percussion (3, max. 27) Collier Intended for graduate majors. Audition required.

MUSAP 562 Private Instruction: World Music Laboratory (2-3, max. 18) World music traditions taught by visiting artists with emphasis on cultural pedagogy and traditional theory. The particular culture studied changes from year to year. Required of all graduate students in ethnomusicology. Credit/no credit only. Audition required.

MUSAP 563 Private Instruction: Violin (3, max. 27) Watras Intended for Doctoral degree candidates. Audition required. Offered: AWSpS.

Music Education

MUSED 301 Techniques for Teaching Music to Children (2) VLPA Campbell Exercises and applied experiences in sight-singing and error detection, keyboard skills, record and instruments of the Orff ensemble relevant to the teaching of music to children. Prerequisite: either MUSIC 212 or MUSIC 302; MUSAP 135.

MUSED 304 Introductory Music Methods (2, max. 4) VLPA Demorest, Morrison Comprehensive examination of materials for training beginning vocal and instrumental students. Topics include recruiting, motivation, and problems associated with evaluation. Methods of starting beginners and rehearsing ensembles are demonstrated with techniques addressing problems unique to public school ensemble instruction. Must be taken concurrently with MUSED 301; MUSED 340. Offered: A.

MUSED 305 Introductory Music Methods II (2, max. 4) VLPA Demorest, Morrison Comprehensive examination of materials for training beginning vocal and instrumental students. Topics include recruiting, motivation, and problems associated with evaluation. Methods of starting beginners and rehearsing ensembles are demonstrated with techniques addressing problems unique to public school ensemble instruction. Offered: W.

MUSED 306 Introductory Music Methods III (2, max. 4) VLPA Demorest, Morrison Comprehensive examination of materials for training beginning vocal and instrumental students. Topics include recruiting, motivation, and problems associated with evaluation. Methods of starting beginners and rehearsing ensembles are demonstrated with techniques addressing
problems unique to public school ensemble instruction. Offered: Sp.

MUSED 340 Music in Education (3) VLPA Delcroze, demorest, Morrison
An orientation to the broad scope of issues regarding music in the schools (K-12), including curriculum, the development of instructional strategies, and evaluation techniques.

MUSED 401 Tin Pan Alley: Concepts and Teaching Strategies for Music Educators (1) VLPA Overview of Tin Pan Alley phenomenon that dominated the American popular music industry for nearly 70 years. For music educators. Focuses on cooperative learning strategies and performance considerations in the school environment. Recommended: MUSIC 162.

MUSED 402 Rock and Roll Roots for Music Educators (1) VLPA Overview of the musical and cultural roots of American Rock and Roll for music educators. Explores teaching strategies and performance possibilities in the school environment. Recommended: MUSIC 162.

MUSED 403 Part-Time Student Teaching in Music (6) VLPA Campbell, Demorest, Morrison Supervised teaching internship. Directed observations of distinguished teachers in an elementary or secondary music setting. Weekly seminars. Credit/no credit only. Offered: AWSp.

MUSED 404 Full-Time Student Teaching in Music (15) VLPA Campbell, Demorest, Morrison Supervised teaching internship. Directed observations of distinguished teachers in an elementary or secondary music setting. Weekly seminars. Credit/no credit only. Prerequisite: MUSED 403. Offered: AWSp.

MUSED 405 Marching Band Technique (2) VLPA McDaid, Morrison, Satzman Basics of marching and maneuvering discussed and used to write drill. Covers selection of music, use of marching procession, and show design. Students complete a drill for their own band or for an instrumentation determined by the instructor.

MUSED 410 Instrumental Rehearsal Techniques (3) VLPA Salzman Includes score preparation, rehearsal formats, and error detection.

MUSED 431 Curriculum in Music Education (3) VLPA Campbell, Demorest, Morrison Principles and practices of curriculum design applied to the development of the music curriculum. Individual or group work on elementary and secondary school music curriculum projects.

MUSED 432 Comprehensive Music in the Secondary School (3) VLPA Demorest The teaching of music and its literature in music classes other than traditional ensembles from grade six through adults. Prerequisite: MUSED 340.

MUSED 440 Music for Children (3) VLPA Campbell Identification and selection of appropriate objectives, materials, teaching strategies and evaluation techniques used in teaching music from birth through grade five, with consideration of various approaches (e.g., Delcroze, Kodaly, Orff) for the musical development of children. Prerequisite: MUSED 302; MUSED 340

MUSED 442 Instrumental Curriculum: Methods and Materials (3) VLPA Morrison Study of the organization and administration of school instrumental music; the selection and use of materials and teaching strategies from beginning to advanced levels of instrumental instruction. Prerequisite: MUSED 340.

MUSED 443 Choral Curriculum: Methods and Materials (3) VLPA Delcroze, Morrison Study of the organization and administration of school choral music; the selection and use of materials and teaching strategies from beginning to advanced levels of choral instruction. Prerequisite: MUSED 340.

MUSED 452 Ethnomusicology in the Schools (3) VLPA Campbell Issues, teaching materials, and techniques involved in incorporating music cultures of United States and related world music repertoires in K-12 classroom instruction. Prerequisite: MUSED 340.

MUSED 453 Approaches to Classroom Instruction: K-12 (3) VLPA Campbell Examines such major instructional approaches as MMCP, Orff, Kodaly, and Dalcroze. Included are the philosophy of each, the methods, materials, and instructional skills needed for classroom application. Prerequisite: MUSED 403.

MUSED 465 Classroom Management and Evaluation in Music Education (3) VLPA Morrison Provides future teachers with strategies and techniques for classroom management, motivation, assessment, and evaluation for applications to K-12 school music programs. Prerequisite: MUSED 340.

MUSED 475 Teaching the Music of Selected Cultures (1, 6) VLPA Campbell Music and culture of a specific world region with particular attention to songs, stories, and instrumental pieces applicable to the teaching of music and the arts in elementary and secondary schools.

MUSED 480 Music Methods for Classroom Teachers (3) VLPA Campbell Addresses the basic fundamentals of music and methods for teaching K-6 school children. Topics include repertoire appropriate for different age levels, methods and materials for integrating music into the K-6 curriculum.

MUSED 496 Special Topics in Music Education (1-3, max. 10) VLPA Special studies designed to reflect contemporary emphases and concerns in the music education profession.

MUSED 501 Introduction to Research in Music Education (3) Campbell, Demorest, Morrison Seminar in research design and method with emphasis on identification of problems in music instruction, interpretation of data, and application of findings to classroom settings.

MUSED 502 Quantitative Research in Music Education (3) Campbell, Demorest, Morrison Seminar in quantitative research utilizing experimental, quasi-experimental, and descriptive design, with emphasis on the pursuit of solutions to pedagogical problems through appropriate research procedures, analysis, and interpretation of findings. Prerequisite: MUSED 501.

MUSED 503 Qualitative Research in Music Education (3) Campbell, Demorest, Morrison Examination of qualitative modes of inquiry (including ethnographic, case study, phenomenological, and historical) to music instruction in classroom, studio, and community settings. Prerequisite: MUSED 502.

MUSED 522 Psychology of Music Learning and Teaching (3) Campbell, Demorest, Morrison Examines previous research related to music cognition, including music perception, music performance, musical creativity, musical affect, musical preference, and social psychology. Examines the role of theory, method, and procedure for psychological research in music education.

MUSED 523 Tests and Measurement (3) Campbell, Demorest, Morrison Examination of currently published aptitude and achievement tests in music and their uses in music education. Examines the basic methods for constructing classroom tests and their use in evaluation. Selected readings include research testing construction and application of tests and measurement to program evaluation.

MUSED 524 Seminar in Music Education (3) Campbell, Demorest, Morrison Special problems in the teaching and supervision of music in the elementary grades. Prerequisite: one year of teaching experience.

MUSED 525 Seminar in Music Education (3) Campbell, Demorest, Morrison Critical review of theories, methods of inquiry, designs, and conclusions of research in musical development from early childhood through adolescence. Emphasis on evaluating theories and methods of studying musical development and exploring their relationship to theories of general intellectual development; adult music cognition research; and curriculum and practice in music education.

MUSED 530 Administration and Supervision in Music Education (3) Campbell, Demorest, Morrison Survey of issues in policy and systems for facilities, student/personnel, technology, school/community relations, and special programs in music education. Focuses on evaluating and improving existing programs. Includes supervision of student teachers.

MUSED 535 Seminar in Musical Development (3) Campbell, Demorest, Morrison A chronological examination of individual, social, and political events, and educational philosophies, that characterized the development of music instruction in American schools from colonial times to the present.

MUSED 542 Comparative Music Education (3) Campbell, Demorest, Morrison A transcultural examination of philosophy and practice of music instruction.

MUSED 550 Proseminar in Music Education (3) Campbell, Demorest, Morrison Examination of the major literature in the philosophy, history, psychology, and sociology of formal school music instruction.

MUSED 552 World Music Education (3) Campbell Seminar on issues of multiculturalism and the world music "movement" as they affect school music curriculum and instruction. Curricular content and cultural context examined in relation to teaching K-12 students, teachers, and undergraduate students in music education programs. Offered: AWSp.
MUSEN 307 Recital Choir (1, max. 15) VLPA

MUSEN 506 Woodwind Ensemble (1, max. 9) VLPA

MUSEN 346 Studio Jazz Ensemble (1, max. 6) VLPA

MUSEN 347 Opera Chorus (1, max. 12) VLPA

MUSEN 350 University Chorale (1, max. 12) VLPA Credit/no credit only.

MUSEN 351 Chamber Singers (1, max. 15) VLPA Boers

MUSEN 361 Piano Ensemble (1, max. 3) VLPA Study and performance of works for four hands at one or two pianos. Designed for upper-level piano majors or students with equivalent ability.

MUSEN 368 Harp Ensemble (1, max. 12) VLPA Lehwald

MUSEN 369 Baroque Chamber Ensemble (1, max. 18) VLPA Terry

MUSEN 375 Opera Workshop (1, max. 6) VLPA Zahn Preparation of music theatre repertoire. Intended for the mature voice student.

MUSEN 381 Chamber Music (1, max. 18) VLPA

MUSEN 382 Opera Theatre (2, max. 6) VLPA Zahn Public performance of roles in opera.

MUSEN 383 Collegium Musicum (1, max. 6) VLPA

MUSEN 384 Contemporary Group (1, max. 6) VLPA Durand Exploration of notation and performance problems in today’s music; preparation for public performance. Credit/no credit only.

MUSEN 410 Steelband (1, max. 6) VLPA Performing and arranging techniques for the steelband, and percussion, in a variety of Caribbean and Latin American music styles, including calypso, soca, reggae, and salsa.

MUSEN 446 Advanced Studio Jazz Ensemble (1, max. 9) VLPA Preparation and performance of material appropriate to large jazz ensemble concerts, clinics, and radio and television broadcasts. Recommended: three quarters of MUSEN 346.

MUSEN 500 University Symphony Orchestra (1, max. 9)

MUSEN 501 Wind Ensemble (1, max. 9) VLPA Saltman

MUSEN 502 Marching Band (2, max. 6) VLPA McDavide

MUSEN 503 Percussion Ensemble (1, max. 9) VLPA Collier

MUSEN 306 Woodwind Ensemble (1, max. 12) VLPA Shin

MUSEN 504 Percussion Ensemble (1, max. 9) VLPA Collier

MUSEN 505 Brass Ensemble (1, max. 9) Kappy

MUSEN 506 Woodwind Ensemble (1, max. 9) Shin

MUSEN 507 Recital Choir (1, max. 9) VLPA Choir presents two recital programs per quarter, surveying a wide variety of repertoire of all styles and periods. Credit/no credit only.

MUSEN 508 Guitar Ensemble (1, max. 9) VLPA Partington Study and performance works for two, three, and four guitars and one guitar with various solo instruments or voice. Designed for guitar performance majors. Other instrumentalists may register with instructor’s permission. Offered: AWSp.

MUSEN 525 Accompanying (2, max. 18)

MUHST 406 Baroque Choral Music (3) VLPA Bozarth Monteverdi through Handel. Prerequisite: 2.0 in MUHST 210; 2.0 in MUSIC 303; 2.0 in MUSIC 306.

MUHST 407 Baroque Opera (3) VLPA Monteverdi through Handel.

MUHST 408 Keyboard Music: 1760-1830 (3) VLPA Bozarth Haydn through Schubert. Prerequisite: 2.0 in MUHST 210; 2.0 in MUSIC 303; 2.0 in MUSIC 306.

MUHST 409 Chamber Music: 1760-1830 (3) VLPA Haydn through Schubert. Prerequisite: 2.0 in MUHST 210; 2.0 in MUSIC 303; 2.0 in MUSIC 306.

MUHST 410 Orchestral Music: 1760-1830 (3) VLPA Haydn through Berlioz.

MUHST 411 Art Song, 1760-1830 (3) VLPA The art song in European culture during the Classical and early Romantic periods. Prerequisite: 2.0 in MUHST 210; 2.0 in MUSIC 303; 2.0 in MUSIC 306.

MUHST 412 Choral Music: 1750-1830 (3) VLPA Large works for chorus and orchestra, Haydn through Beethoven.

MUHST 413 Opera: 1750-1830 (3) VLPA Rumph Gluck through Bellini.

MUHST 414 Keyboard Music: 1830-1915 (3) VLPA Bozarth Schumann through Debussy. Prerequisite: 2.0 in MUHST 210; 2.0 in MUSIC 303; 2.0 in MUSIC 306.

MUHST 415 Chamber Music: 1830-1915 (3) VLPA Schumann through Ravel. Prerequisite: 2.0 in MUHST 210; 2.0 in MUSIC 303; 2.0 in MUSIC 306.

MUHST 416 Orchestral Music: 1830-1915 (3) VLPA Schumann and Mendelssohn through early Schoenberg and Stravinsky. Prerequisite: 2.0 in MUHST 210; 2.0 in MUSIC 303; 2.0 in MUSIC 306.

MUHST 417 Art Song: 1830-1915 (3) VLPA Bozarth The Lieder of Schumann, Brahms, Wolf, Strauss, Mahler, and Schoenberg. Prerequisite: 2.0 in MUHST 210; 2.0 in MUSIC 303; 2.0 in MUSIC 306.

MUHST 418 Choral Music: 1830-1915 (3) VLPA Bozarth Selected choral masterpieces. Mendelssohn through Schoenberg.

MUHST 419 Opera: 1830-1915 (3) VLPA Rumph German, French, and Italian operatic traditions. Prerequisite: 2.0 in MUHST 210; 2.0 in MUSIC 303; 2.0 in MUSIC 306.

MUHST 420 Authenticity and Performance (3) VLPA The practical and philosophical issues raised by historically informed performance of early music on period instruments. Prerequisite: 2.0 in MUHST 210; 2.0 in MUSIC 303; 2.0 in MUSIC 306.

MUHST 421 Music Criticism (3) VLPA Starr Study of the various forms of music criticism, with an emphasis on the writing of valid examples and evaluation of one’s own work along with that of others — classmates, journalists, and academic critics. Prerequisite: 2.0 in MUHST 210; 2.0 in MUSIC 303; 2.0 in MUSIC 306.

MUHST 422 Gender and Music (3) VLPA Tsou Investigates how gender issues have shaped the creation and perception of music; introduces women composers and their music. Topics include: women’s biography; creation of the music canon; gender issues in opera; intertwining issues of race, class, and gender; blues women; and popular music. Offered: W. Prerequisite: 2.0 in MUHST 210; 2.0 in MUSIC 303; 2.0 in MUSIC 306.

MUHST 423 Twentieth-Century Music to 1945 (3) VLPA Starr Intensive study of selected composers and works exemplifying the new vocabularies, grammars, and styles of the early part of the twentieth century. Prerequisite: 2.0 in MUHST 210; 2.0 in MUSIC 303; 2.0 in MUSIC 306.

MUHST 424 Music Since 1945 (3) VLPA Starr Diversity of the contemporary musical scene. Vocabulary appropriate for the description and understanding of the new music, developed through study of representative composers and works, and appropriate readings. Prerequisite: 2.0 in MUHST 210; 2.0 in MUSIC 303; 2.0 in MUSIC 306.

MUHST 425 Jazz History and Analysis (3) VLPA Collier Major eras and styles of jazz with emphasis on technical aspects of jazz music: composition, arranging, improvisation practices. Prerequisite: 2.0 in MUHST 210; 2.0 in MUSIC 303; 2.0 in MUSIC 306.

MUHST 426 American Popular Music (3) VLPA Starr An in-depth consideration of American popular music styles and repertory from about 1920 to the present day. Analysis of representative pieces; consideration of critical and aesthetic issues relating to popular music; relationship of popular music to “art” music and to American culture and society. Prerequisite: 2.0 in MUHST 210; 2.0 in MUSIC 303; 2.0 in MUSIC 306.

MUHST 429 Music, Literature, and the Arts (3) VLPA Literary and visual art works that include musical subject matter and forms; musical genres that incorporate other arts such as opera and ballet. Related philosophical writings. Includes works of a particular time period or investigation of a specific problem in comparative arts. Prerequisite: 2.0 in MUHST 210; 2.0 in MUSIC 303; 2.0 in MUSIC 306.

MUHST 497 Special Topics in Music History (1-3, max. 6) VLPA Bozarth, Rumph, Taricani, Tsou Topics vary each quarter. Prerequisite: 2.0 in MUHST 210; 2.0 in MUSIC 303; 2.0 in MUSIC 306.

MUHST 500 Seminar in Methods of Music Research (3) Rumph, Taricani Explores various critical approaches to research in music at the
graduate level, examining specialized bibliographical resources, controversial arguments about musical issues, and other matters of musical criticism required to begin advanced study of music. Prerequisite for all graduate music history courses except MUHST 515.

MUHST 503 Readings in Medieval and Renaissance Music (5) Tarcani Musical styles, genres, and forms of the Middle Ages and Renaissance. Focuses upon musico-lological problems and controversy related to music composed between ca. 1000 and 1600. Prerequisite: permission of instructor.

MUHST 504 Seminar in Medieval Music (3, max. 6) Tarcani Prerequisite: MUHST 500.

MUHST 505 Seminar in Renaissance Music (3, max. 6) Tarcani Prerequisite: MUHST 500.

MUHST 506 Seminar in Baroque Music (3, max. 6) Bozarth Prerequisite: MUHST 500.

MUHST 508 Seminar in the Viennese Classical Period: 1760-1830 (3, max. 6) Bazarth Prerequisite: MUHST 500.

MUHST 509 Seminar in Nineteenth-Century Music: 1830-1890 (3, max. 6) Bazarth, Rumph Prerequisite: MUHST 500.

MUHST 510 Seminar in Music Since 1890 (3, max. 6) Starr Prerequisite: MUHST 500.

MUHST 515 Seminar in Medieval and Renaissance Notation (5) Tarcani Gregorian chant through sixteenth-century prints.

MUHST 519 Seminar in Modern Editorial Procedures (5) Bazarth Study of modern procedures for preparing critical editions. Related areas of study may include analysis of musical style and historical and performance problems inherent in works being edited.

MUHST 520 Seminar in American Music (3, max. 6) Starr Research in the life, works, and times of composers in the United States from colonial days to the present. Prerequisite: MUHST 500.

MUHST 537 Seminar on Opera (3, max. 6) Prerequisite: MUHST 500.

Near Eastern Languages and Civilization

Near Eastern Languages and Civilization

NEAR E 150 Israel: Dynamic Society and Global Flashpoint (5) Bartzilai, Migdal, Planko, Sokoloff Introduces the people, institutions, and culture of Israel is the context of larger global forces. Examines domestic, regional, and international elements, both historically and in the contemporary period, that have shaped Israeli culture, politics, and special role in world affairs. Topics include nationalism, ethnicity, politics, religion, film, literature, and culture. Offered: jointly with SIS 150.

NEAR E 199 Study Abroad (1-12, max. 15) Credit for 200-level NEAR E courses in an approved study abroad program. Requires credit evaluation by department or faculty. Does not automatically apply to major or minor requirements. Offered: AWSyp.

NEAR E 205 Religion, Violence, and Peace: Patterns Across Time and Tradition (5) I&S Noegel, Wessman Examines the relationship between violence and peace in a variety of religious traditions. Examines case studies from the ancient Near East, medieval East Asia, and the contemporary West from the standpoint of lived experiences and contempo- rary theories derived from several academic disciplines. Offered: jointly with HUM/RELG 205; W.

NEAR E 210 Introduction to Islamic Civilization (5) I&S/VLPA Major developments in Islamic civilization from advent of Islam in seventh century to present. Islamic history, law, theology, and mysticism, as well as the politics, cultures, and literatures of the various Islamic societies. Offered: jointly with SISME 210.

NEAR E 211 Islam (5) I&S/VLPA Introduction to important cultural and historical aspects of Islam, focusing on basic concepts and developments such as prophethood, Quran and Hadith, canon and law, social theory, Sufism, theology, and sectarianism. Special attention to cultural practices and beliefs, and their relation to textual and personal authority. Offered: jointly with RELIG 211.

NEAR E 212 Introduction to the Quran (5) I&S/VLPA Emphasis on the historical context of the Quran, the history of the text, its collection, organization, and interpretation. In English. Offered: jointly with RELIG 212.

NEAR E 213 Introduction to the Modern Middle East (5) I&S Major social and political trends in the Middle East during the 18th, 19th, and 20th centuries. Basic principles of Islam and its diversity, changing balance of power during the early modern period; European colonialism and withdrawal; pan-Arabism, nationalism, feminism and religious resurgence. Offered: jointly with SISME 213.

NEAR E 220 Introduction to the Ancient Near East (5) I&S/VLPA Noegel Surveys the peoples, places and events of the ancient Near East. Examines the cultures of Mesopotamia, Egypt, Canaan, and Israel with an eye to each culture's distinctive Egyptian styles of Islamic art. Representative heroic poems of Manas. Emphasis on Manas, the monumental epos of Kirghiz.

NEAR E 230 Themes in Near Eastern Literature (5) VLPA, I&S Significant and interesting aspects of Near Eastern culture and society as represented by literary themes. Aspects of Near Eastern life and art such as women, minority groups, mysticism, and modern literature. Content varies.

NEAR E 242 Cultural History of Turkey: From Empire to Nation (5) I&S/VLPA Topics include: social, economic, and political structures of Ottoman and Turkish Anatolia; Ottoman literature, and artistic tradition; social status of women, literacy and illiteracy, the secular enterprise of Kemal Ataturk; Islamic fundamentalism, educational institutions, Kurdish nationalism. Offered: W.

NEAR E 250 Iranian Culture and Civilization (5) I&S/VLPA Explores the culture and civilization of this Middle Eastern society through a multi-disciplinary approach that includes such manifestations as architecture, carpet-weaving, story-telling, and the composition of poetry.

NEAR E 251 Jewish Life in Literature and Film (3) I&S/VLPA Major themes of Jewish life treated in modern narrative and cinema. Topics include religious tradition and modernity. Jewish immigration to America, responses to the Holocaust and Zionism.

NEAR E 310 Modern Near Eastern Literatures in English Translation (3) VLPA Contemporary cultures of the Middle East studied through exposure to a representative sample of their literary work. Texts selected address major issues in Middle Eastern societies, e.g. tradition versus modernity, national identity and the challenge of the West, Arab-Israeli conflict.

NEAR E 325 Modern Hebrew Literature in English (3) VLPA Sokoloff Major developments in Hebrew literature from the Enlightenment to the current Israeli literature.

NEAR E 326 Israeli Identities (5) VLPA Sokoloff Examines fiction and film, as well as selected poetry, popular songs, and essays, to explore diverse groups within contemporary Israeli society. Topics include the sabra ideal, holocaust survivors, Sephardic/Mizrahi communities, religious and secular Jews, Israel’s Arab minority, and questions of gender.

NEAR E 350 The City of Cairo (3) I&S/VLPA Development of Fustat and Cairo, 600-1800, with special emphasis on art and architecture. Consideration of the economic, social, and geographical influences on the creation of the distinctive Egyptian styles of Islamic art. Offered: jointly with ART H 350.

NEAR E 363 Oral Literature of the Turkic Peoples of Central Asia I: the Heroic Epos (3) VLPA Cirtautas Representative heroic poems of Central Asian Turkic peoples now living in the Central Asian Republics and China. Origin of the heroic epos, its relation to the romantic epos and other oral literary genres. Art of the singer and his role in nomadic Turkic society. Emphasis on Manas, the monumental epos of Kirghiz.

NEAR E 375 Turkic Peoples of Central Asia (3) I&S Cirtautas History of the Turkic peoples, AD 552 to present. Emphasis on current status of Turkic peoples in Central Asia: Geographical distribution, demographic data, reactions and adaptations to changes resulting from the 1917 revolution. Turkic viewpoint on past and present developments. Offered: jointly with SIS 377.

NEAR E 399 Study Abroad (1-12, max. 15) Credit for NEAR E 200-400 level courses in an approved study abroad program. Requires credit
NEAR E 402 Classical Arabic Literature in Translation (3) VLPA DeYoung Examines development of Arabic literature from its beginnings through the fall of the Abbasid dynasty to the Mongols. Coincides with period when Arabic language and literature were dominant forces in Islamic civilization. Topics include: impact of Islam on the literature, courtly love, mystical poetry, the Thousand-and-One Nights, and Hispano-Arabic literature. Prerequisite: either NEAR E 211 or NEAR E 212.

NEAR E 403 Colonialism, Nationalism, and the Modern Arabic Novel (3) I&S/VLPA DeYoung Examines how representative novels from the modern canon in Arabic have both endorsed and critiqued aspects of nationalism and colonolialist ideology. Prerequisite: either NEAR E 211 or NEAR E 212.

NEAR E 411 Digital Media: The Middle East and Central Asia (5) VLPA Waters Hands-on, project-based approach to imaging, new media, electronic text, databases, metadata and accessibility, rights management, and other issues central to contemporary humanities research on the Middle East and Central Asia.

NEAR E 420 Islamic Theological Literature in English (3) VLPA Readings from Mu'tazilite and Ash'arite works and from traditionalist works opposed to theology.

NEAR E 421 Islamic Mystical Literature in English (3) VLPA Readings from the works of principal Sufi writers and poets.

NEAR E 422 Islamic Philosophical and Scientific Literature in English (3) VLPA Readings in philosophy, the physical sciences, and medicine.

NEAR E 423 Persian Literature in Translation (3) VLPA Designed to familiarize students with an expanding collection of works translated from Persian literature, both classical and modern, into English. Focuses on a few representative texts and offers interpretations of the culture through close readings. Prior acquaintance with Iranian culture not required.

NEAR E 425 Current Trends in Modern Near Eastern Literature and Criticism (3) VLPA Modern literary tradition of the Near East with emphasis on major literary movements and/or genres and literary criticism in the modern period. The literatures of the Arab world, Persia, Turkey, and Israel are considered in alternate quarters.

NEAR E 430 Scripture and Law in Islam (5) I&S/VLPA Examines concept and use of scripture in Islam, with special attention to issues of canon and commentary, heavenonly books, talismanic uses, and the place of scripture in ritual. In English. Offered: jointly with RELIG 430.

NEAR E 432 Ritual and Territory in Islam (5) I&S/VLPA Comparative study of Islamic ritual practices and related development of jurisprudence and law. Focus on sacrifice, political and social legal theory, pilgrimage, regulation of the body, and the diversity of contemporary practices. In English. Offered: jointly with RELIG 432.

NEAR E 433 Life of Prophet Muhammad (5) I&S/VLPA Examines historical and religious traditions associated with the life of the Prophet Muhammad with particular attention to the biography in classical Islam. Focuses on Muhammad as prophet, holy man, law-giver, mystic, and statesman. Compare with other religious figures such as Jesus and the Buddha. In English. Offered: jointly with RELIG 433.

NEAR E 435 Major Trends in Modern Arabic Fiction (3) VLPA DeYoung Development of Arabic prose fiction from the end of the nineteenth century to the present. Prerequisite: either NEAR E 211 or NEAR E 212.

NEAR E 436 Arab American Writers (3) I&S/ VLPA DeYoung Explores the influence of Arab American writing both in the United States and the Arab world during the nineteenth and twentieth centuries. Discusses issues of emigration to the United States from the Arab world and its impact on the formation of a distinctive Arab American identity. Prerequisite: either NEAR E 211 or NEAR E 212.

NEAR E 437 Thousand and One Nights (3) VLPA DeYoung An examination of the major story cycles of the Thousand and One Nights collection, in its social and historical context. Prerequisite: either NEAR E 211 or NEAR E 212.

NEAR E 440 Calligraphy in Islamic Culture (3) VLPA Survey of the esthetics, uses, interpretations of artistic writing in Islamic culture with a "hands-on" approach to recognizing, appreciating, and creating Arabic script calligraphy. Students need not know Arabic script nor have calligraphic talents, although some familiarity with Islamic civilization is helpful.

NEAR E 442 Turkish Literature in Translation (3) VLPA Covers major theoretical issues concerning Ottoman court literature and Turkish epic and troubadour poetry. Major writers and works of modern Turkish literature read and analyzed in their social, political, and theoretical contexts. Previous study of Turkish literature not required.

NEAR E 443 The Word and the Empire: Reading Ottoman Literature (3-5) I&S/VLPA Kuru Approaches Ottoman literature through translations and scholarly articles in English. Evaluates this particular literary tradition as an imperial production, through an analysis and critical reading of course materials.

NEAR E 450 Survey of the Cultures of the Turkic Peoples of Central Asia (3) I&S/VLPA Cirtaunas Nomadic and sedentary cultures of the Turkic peoples of Central Asia. Emphasis on language, literature, and adherence to traditional modes of life. Offered: jointly with SISJE 450.

NEAR E 451 Pharaonic Egypt in the Context of the Ancient Near East (3) I&S/VLPA Noegel Surveys the history, literature, and archaeology of ancient Egypt from the first pharaohs to the conquest of Alexander the Great. Introduces the field of Egyptology, and focuses on the continuity of Egyptian history and culture in context. Slide presentations supplement the readings and in-class lectures.

NEAR E 452 The Biblical Song of Songs (3) VLPA Noegel Examines the erotic and beautiful Song of Songs within the context of ancient (and medieval) Near Eastern love poetry and correlates close readings of the book with various interpretations it has received from antiquity until today. No knowledge of Hebrew or the Bible is required. Offered: jointly with SISJE 452.

NEAR E 453 The Biblical Prophets (3) I&S/ VLPA Noegel Explores the biblical prophets (in translation) within their Near Eastern contexts. Studies them for their historicity, literary and rhetorical sophistication, and ideological agendas. This course seeks to uncover the meaning and distinctiveness of Israelite prophecy within the context of the larger Near East. No knowledge of the Bible is required. Offered: jointly with SISJE 453.

NEAR E 454 Israel: The First Six Centuries BCE (3) I&S/VLPA Noegel Traces the Israelites, from the Babylonian destruction of the Jerusalemite Temple (586 BCE) to events following the destruction of the second Temple (1st century CE). Focuses on primary historical and literary sources as well as archaeological and artistic evidence. No knowledge of Hebrew or the Bible is required. Offered: jointly with SISJE 454.

NEAR E 455 Religions of the World: A History of Religious Change (3) I&S/VLPA Noegel Explores the biblical accounts (in translation) concerning the formation and collapse of the united Israelite monarchy. Investigates the archaeological and textual evidence for their historicity, the literary sophistication of these accounts, and Israelite kingship within the wider context of the ancient Near East. No knowledge of the Bible is required. Offered: jointly with SISJE 455.

NEAR E 457 The History of Biblical Interpretation (3) I&S/VLPA Noegel Traces biblical interpretation and translation techniques from the earliest translations of the Hebrew Bible (Old Testament) to the various historical literary, deconstructionist, and holistic strategies of more recent times. Adopts a "hands-on" approach to the material and explores various hermeneutics by applying them in class. Offered: jointly with RELIG 457.

NEAR E 490 Supervised Study (1-6, max. 18) Special work in Near Eastern studies for graduates and undergraduates.

NEAR E 495 Trends in the Contemporary Middle East (3) I&S/ Bacharach, De YoungPerspectives on cultural, political, and other aspects of Middle Eastern societies. Focuses on background complexities rather than immediate political-military confrontations. Topics vary. Offered: jointly with SISJE 495.

NEAR E 496 Special Studies in Near Eastern Languages and Civilization (3-5, max. 15) VLPA Offered occasionally by visitors or resident faculty. Content varies.

NEAR E 498 Senior Essay (5) I&S/VLPA Supervised individual research and writing of a major paper during the senior year. Offered: AWSp.

NEAR E 499 Undergraduate Research (1-6, max. 18)

NEAR E 511 Digital Media: The Middle East and Central Asia (5) Waters Hands-on, project-based approach to imaging, new media, electronic text, databases, metadata and accessibility, rights management, and other issues central to contemporary humanities research on the Middle East and Central Asia.

NEAR E 520 Seminar on Near Eastern Civilization and Thought (3, max. 27) Content varies.

NEAR E 521 Research Methods (3) Introduction to research in Islamic civilization. Research methods, primary sources, evidence and documentation, reference works, translation systems, scholarly writing style.

NEAR E 522 Islamic Theology (3) Various schools of Islamic theology.

NEAR E 523 Islamic Philosophy (3) Various topics and problems dealt with by the Islamic philosophers.

NEAR E 524 Islamic Law (3) Selected topics in Islamic law that highlight major aspects of Islamic civilization. Offered: jointly with LAW B 556.

NEAR E 525 Islamic Institutions (3) Islamic institutions of the caliphate, the sultanate, the bureaucracy, taxation, mosques, and madrasas, as well as theories of government.

NEAR E 530 Seminar on Near Eastern Literature (3, max. 27) Prerequisite: reading knowledge of at least one Near Eastern language. Content varies.

NEAR E 531 Proseminar in Literary Analysis (3, max. 9) Introduction to the theory and techniques of the study of literature in general and Near Eastern literatures in particular. Content varies. Prerequisite: reading knowledge of at least one Near Eastern language.

NEAR E 532 Theory and Practice in Modern Near Eastern Literature (3) Application of literary theory to works of modern Near Eastern literature. Concentrates on one major theory each year. Content varies.

NEAR E 533 Islamic Poetry and Poetics (3) Detailed introduction to prosody and rhyme in classical Arabic and Persian, followed by critical analysis of selected texts. Prerequisite: advanced level of Arabic or Persian; some knowledge of the other recommended.

NEAR E 595 Modern Methods and Materials in Teaching Near Eastern Languages (3) Elkafafieli Theory and practice of communicative language teaching; current developments in foreign-language teaching; evaluation of teaching materials; includes participation at the departmental and university-wide fall orientation; required for beginning teaching assistants of Near Eastern languages; requires enrollment in NE 518. Credit/no credit only. Offered: A.

NEAR E 596 Special Studies in Near Eastern Languages and Civilization (3-5, max. 15) Offered occasionally by visitors or resident faculty. Content varies.

NEAR E 600 Independent Study or Research (*)

Arabic

ARAB 199 Study Abroad (1-12. max. 15) Credit for elementary or intermediate Arabic in an approved study abroad program. Requires credit evaluation by department or faculty. Does not automatically apply to major or minor requirements. Offered: A/WSpS.

ARAB 399 Study Abroad (1-12. max. 15) Credit for elementary or intermediate Arabic in an approved study abroad program. Requires credit evaluation by department or faculty. Does not automatically apply to major or minor requirements. Offered: A/WSpS.

ARAB 401 Intensive Elementary Arabic (15) Study of grammar, with oral and written drill and reading of simple texts. (Cannot be taken for credit if 411, 412, 413 taken.) If Arabic is the student’s language of admission, only 10 credits count toward graduation. Offered: S.

ARAB 411 Elementary Arabic (5) Study of grammar, with oral and written drill and reading of simple texts. (Cannot be taken for credit if 401 taken.).

ARAB 412 Elementary Arabic (5) Study of grammar, with oral and written drill and reading of simple texts. (Cannot be taken for credit if 401 taken.) Prerequisite: ARAB 411.

ARAB 413 Elementary Arabic (5) Study of grammar, with oral and written drill and reading of simple texts. (Cannot be taken for credit if 401 taken.) Prerequisite: ARAB 412.

ARAB 414 Spoken Arabic (3) Study of grammar with emphasis on oral drill in modern spoken Arabic (Western or Eastern).

ARAB 415 Spoken Arabic (3) Study of grammar with emphasis on oral drill in modern spoken Arabic (Western or Eastern).

ARAB 416 Spoken Arabic (3) Study of grammar with emphasis on oral drill in modern spoken Arabic (Western or Eastern).

ARAB 421 Intermediate Arabic (5) VLPA Reading of selected texts in standard Arabic, with continuing emphasis on grammar and syntax. Prerequisite: either ARAB 401 or ARAB 413.

ARAB 422 Intermediate Arabic (5) VLPA Reading of selected texts in standard Arabic, with continuing emphasis on grammar and syntax. Prerequisite: ARAB 421.

ARAB 423 Intermediate Arabic (5) VLPA Reading of selected texts in standard Arabic, with continuing emphasis on grammar and syntax. Prerequisite: ARAB 422.

ARAB 424 Intensive Intermediate Arabic (15) VLPA Equivalent to one year of study of standard Arabic at intermediate level. Extension of knowledge in grammar, syntax and vocabulary, and skills in reading, writing, and conversation. May not be taken for credit if ARAB 421, 422, 423 previously taken for credit. Prerequisite: either ARAB 401 or ARAB 413. Offered: S.

ARAB 431 Advanced Arabic (5) VLPA Focus on Arabic at the advanced level through in-depth examination of grammar, reading of selected texts, and brief surveys of some major reference materials. Prerequisite: either ARAB 423 or ARAB 424.

ARAB 432 Advanced Arabic (5) VLPA Focus on Arabic at the advanced level through in-depth examination of grammar, reading of selected texts, and brief surveys of some major reference materials. Prerequisite: ARAB 431.

ARAB 433 Advanced Arabic (5) VLPA Focus on Arabic at the advanced level through in-depth examination of grammar, reading of selected texts, and brief surveys of some major reference materials. Prerequisite: ARAB 432.

ARAB 451 Abad Prose: Jahiz (3) VLPA Readings in early Arabic prose. Prerequisite: ARAB 433.

ARAB 452 Maqamah: Hamadhan, Hariri (3) VLPA MacKay Reading of several maqamat (essays in rhymed prose) of al-Hamadhan and al-Hariri. Examination of the maqamat genre as a whole. Prerequisite: ARAB 433.

ARAB 453 Historical Texts (3) I&S/ VLPA Readings in Arab historians with particular reference to scholars such as Tabari, Ibn al-Jawzi, and Ibn al-Athir. Prerequisite: ARAB 433.

ARAB 454 Quran and Its Interpretation (3) VLPA Reading of selected passages from the Quran in relation to their interpretation in classical commentaries (tafsir) and in legal texts (ahkam al-Quran). Focus on the various types of classical scholarship applied to the text of the Quran (ulum al-Quran). Prerequisite: ARAB 433.

ARAB 455 Ritual and Legal Texts (3) VLPA Selected readings from well-known Islamic legal texts (furu al-fiqh) with attention to the sources of the law and methods of exegesis (usul al-fiqh). Prerequisite: ARAB 433.

ARAB 456 Islamic Political Theorists (3) I&S/ VLPA Readings from the main political theorists: al-Baghdadi, al-Mawardi, and Ibn Khaldun. Prerequisite: ARAB 433.

ARAB 457 Grammatical and Lexical Texts (3) VLPA Introduction to concepts and terminology of Arabic grammar and lexicography through readings from scholars such as Sibawayh, Ibn Asqil, and Ibn Manzur. Prerequisite: ARAB 433.

ARAB 458 Modern Poetry (3) VLPA DeYoung Neoclassical poetry of the nineteenth and twentieth centuries, and the development of modern verse. Prerequisite: ARAB 433.

ARAB 459 Islamic Philosophical Literature (3) I&S/ VLPA Reading of selected texts by representative Islamic philosophers. Prerequisite: ARAB 433.

ARAB 460 Islamic Theological and Mystical Literature (3) VLPA Reading of selected texts representative of Islamic theological and mystical schools. Prerequisite: ARAB 433.

ARAB 461 Modern Prose (3) VLPA DeYoung Modern essays, fiction, and ideological writings. Prerequisite: ARAB 433.

ARAB 462 Sirah and Maghazi Texts (3) I&S/ VLPA Reading and discussion of selected historical texts devoted to the life of the Prophet Muhammad, such as Ibn Ishaq, Ibn Hashim, al-Waqidi, Ibn Sa’d, and al-Bayhaqi. Some attention to related genres and contemporary scholarship. Prerequisite: ARAB 433.
ARAB 470 Stories of the Prophets (3) I&S/ VLPA Reading and discussion of Jewish and Islamic exegesis of selected Biblical and Quranic narratives dealing with such figures as Moses, Abraham, Jacob, or Adam and Eve. Prerequisite: either ARAB 432 or HEBR 423. Offered: jointly with HEBR 470.

ARAB 490 Supervised Study (1-6, max. 18) Special work in literary texts for graduates and undergraduates. Prerequisite: ARAB 423.

ARAB 496 Special Studies in Arabic (3-5, max. 15) VLPA Topics vary. Offered occasionally by visiting or resident faculty.

ARAB 499 Undergraduate Research (1-6, max. 18).

ARAB 596 Special Studies in Arabic (3-5, max. 15) Topics vary. Offered occasionally by visiting or resident faculty.

ARAB 600 Independent Study or Research (*).

Aramaic

ARAMIC 411 Syriac (3) Walker Beginning Syriac including basic grammar and vocabulary with selected readings from simple prose passages and poetry selected from early Christian and other late antique writings. No previous study of Aramaic required. Offered: A.

ARAMIC 412 Syriac (3) Walker Beginning Syriac including basic grammar and vocabulary with selected readings from simple prose passages and poetry selected from early Christian and other late antique writings. No previous study of Aramaic required. Offered: W.

ARAMIC 421 Biblical Aramaic (5) VLPA Noegel Fundamentals of Aramaic grammar and the differences that distinguish Aramaic from Hebrew, includes select Aramaic portions of the Bible. Emphasis on grammar and comprehension. Designed for students with some knowledge of Hebrew. Prerequisite: HEBR 333 or HEBR 426.

ARAMIC 423 Readings in Syriac (3) VLPA Walker Readings from selected passages in Biblical and Christian literature with emphasis on writings of late antique and medieval Christian communities of Syria, Iraq, and Iran until the Mongol invasions. Prerequisite: ARAM 412. Offered: Sp.

Egyptian

EGYPT 411 Introduction to Coptic (5) Williams Elements of grammar of the Sahidic dialect of the Coptic language.

EGYPT 422 Readings in Coptic (3) VLPA Williams Readings from ancient Coptic Christian literature, with emphasis on the Nag Hammadi texts. Prerequisite: COPTC 411 or EGYPT 411.

EGYPT 423 Readings in Coptic (3) VLPA Williams Readings from ancient Coptic Christian literature, with emphasis on the Nag Hammadi texts. Prerequisite: COPTC 411 or EGYPT 411.

Hebrew

HEBR 199 Study Abroad (1-12, max. 15) Credit for elementary Hebrew in an approved study abroad program. Requires credit evaluation by department or faculty. Does not automatically apply to major or minor requirements. Offered: AWSpS.

HEBR 399 Study Abroad (1-12, max. 15) Credit for intermediate Hebrew in an approved study abroad program. Requires credit evaluation by department or faculty. Does not automatically apply to major or minor requirements. Offered: AWSpS.

HEBR 401 Intensive Elementary Modern Hebrew (15) Intensive study of grammar, with oral and written drill and reading of simple texts. (Cannot be taken for credit if 411, 412, 413 taken.) Offered: S.

HEBR 402 Intensive Elementary Biblical Hebrew (15) VLPA Intensive study of grammar with oral and written drills and reading of simple texts. Cannot be taken for credit if HEBR 414, HEBR 415, HEBR 426 has been taken previously. Offered: S.

HEBR 411 Elementary Modern Hebrew (5) Sokoloff Modern Israel Hebrew. Core vocabulary, grammar, conversational text, and oral and written communication. Excerpts from modern Hebrew prose and poetry. (Cannot be taken for credit if 401 taken.)

HEBR 412 Elementary Modern Hebrew (5) Sokoloff Modern Israel Hebrew. Core vocabulary, grammar, conversational text, and oral and written communication. Excerpts from modern Hebrew prose and poetry. (Cannot be taken for credit if 401 taken.) Prerequisite: HEBR 411.

HEBR 413 Elementary Modern Hebrew (5) Sokoloff Modern Israel Hebrew. Core vocabulary, grammar, conversational text, and oral and written communication. Excerpts from modern Hebrew prose and poetry. (Cannot be taken for credit if 401 taken.) Prerequisite: HEBR 412.

HEBR 415 Elementary Biblical Hebrew (5) Noegel Continues the inductive introduction to the biblical Hebrew language begun in HEBR 414. Moves beyond the textbook and into select portions of the Hebrew Bible. Prerequisite: HEBR 414.

HEBR 421 Intermediate Modern Hebrew (5) VLPA Sokoloff Readings of selected texts in modern Hebrew with continuing emphasis on grammar, syntax, composition, and conversation. Prerequisite: either HEBR 401 or HEBR 413.

HEBR 422 Intermediate Modern Hebrew (5) VLPA Sokoloff Readings of selected texts in modern Hebrew with continuing emphasis on grammar, syntax, composition, and conversation. Prerequisite: HEBR 421.

HEBR 423 Intermediate Modern Hebrew (5) VLPA Sokoloff Readings of selected texts in modern Hebrew with continuing emphasis on grammar, syntax, composition, and conversation. Prerequisite: HEBR 422.

HEBR 426 Biblical Hebrew Prose (5) VLPA Noegel Explores selected prose sections of the Hebrew Bible (Old Testament) in conjunction with English translations and commentaries. Emphasis on close readings, the grammatical insights of textual criticism, and the interpretive strategies and agendas of the English translations. Prerequisite: HEBR 415.

HEBR 427 Biblical Hebrew Poetry (5) VLPA Noegel Explores select poetic sections of the Hebrew Bible (Old Testament) in conjunction with English translations and commentaries. Emphasis on close readings, the grammatical insights of textual criticism, and the interpretive strategies and agendas of the English translations. Prerequisite: either HEBR 402 or HEBR 426.

HEBR 428 Inscriptions from Biblical Times (5) VLPA Noegel Surveys Northwest Semitic inscriptions that bear significantly on our understanding of Biblical history and ancient Hebrew including the Moabite stone, Israelite ostraca, Siloam engraving, Gezer calendar, Deir Alla (Gilead) Inscriptions, the Asherah texts, Ammonite fragments, and Phoenician monuments. Prerequisite: HEBR 402 or HEBR 426.

HEBR 451 Introduction to Hebrew Literature (3) VLPA Sokoloff Literary texts and analysis. Grammar, composition, and dictionary skills. Primarily modern texts-short poetry, fiction, and essays-with some selections as well from biblical passages, the liturgy, midrash, and medieval poetry. Prerequisite: HEBR 423.

HEBR 452 Introduction to Hebrew Literature (3) VLPA Sokoloff Literary texts and analysis. Grammar, composition, and dictionary skills. Primarily modern texts-short poetry, fiction, and essays-with some selections as well from biblical passages, the liturgy, midrash, and medieval poetry. Prerequisite: HEBR 423.

HEBR 453 Introduction to Hebrew Literature (3) VLPA Sokoloff Literary texts and analysis. Grammar, composition, and dictionary skills. Primarily modern texts-short poetry, fiction, and essays-with some selections as well from biblical passages, the liturgy, midrash, and medieval poetry. Prerequisite: HEBR 423.

HEBR 454 Hebrew Poetry (3) VLPA Sokoloff Selections of poetry by prominent twentieth-century Hebrew poets whose work comments or elaborates on biblical texts. Original source considered side-by-side with modern poetry, to examine ways recent literature models itself on, draws upon, and revises traditional sources. Prerequisite: HEBR 423.

HEBR 455 Hebrew Fiction (3) VLPA Sokoloff Selections of fiction by prominent modern Hebrew writers, including S.Y. Agnon, Aharon Appelfeld, David Shahrar, Aharon Megged, and others. Prerequisite: HEBR 423.

HEBR 456 Hebrew Poems and Prayers (3) VLPA Sokoloff Examines modern Hebrew poems side by side with texts from the traditional Jewish liturgy, analyzing how contemporary writers have drawn on classical sources to reflect on matters of faith and the language of prayer. Prerequisite: HEBR 423.

HEBR 457 Hebrew in Song (3) VLPA Sokoloff Selections of Israeli folk songs, pop, rock, children's songs, and musika mizrahit. While building vocabulary and improving dictionary and composition skills, students examine the role of popular song in the construction of modern Hebrew culture and Israeli identity.
HEBR 470 Stories of the Prophets (3) I&S/ VLPA Reading and discussion of Jewish and Islamic exegesis of selected Biblical and Quranic narratives dealing with such figures as Moses, Abraham, Jacob, or Adam and Eve. Prerequisite: either ARAB 432 or HEBR 423. Offered: jointly with ARAB 470.

HEBR 490 Supervised Study (1-6, max. 18) Special work in literary texts for undergraduates and undergraduates. Prerequisite: HEBR 423.

HEBR 496 Special Studies in Hebrew (3-5, max. 15) Topics vary.

HEBR 499 Undergraduate Research (1-6, max. 18).

HEBR 596 Special Studies in Hebrew (3-5, max. 15) Topics vary.

HEBR 600 Independent Study or Research (*)

Persian

PRSAN 199 Study Abroad (1-12, max. 15) Credit for elementary Persian in an approved study abroad program. Requires credit evaluation by department or faculty. Does not automatically apply to major or minor requirements. Offered: AWSpS.

PRSAN 399 Study Abroad (1-12, max. 15) Credit for elementary or intermediate Persian in an approved study abroad program. Requires credit evaluation by department or faculty. Does not automatically apply to major or minor requirements. Offered: AWSpS.

PRSAN 401 Intensive Elementary Persian (15) VLPA Papam-Matin Intensive study of grammar with oral and written drills and reading of simple texts. Cannot be taken for credit if PRSAN 411-413 has been taken previously. Offered: S.

PRSAN 402 Intensive Elementary Tajik (15) Intensive study of grammar with oral and written drill and reading of selected texts in Tajik, the literary language spoken and written in the Central Asian Republic of Tajikistan. Offered: S.

PRSAN 404 Intensive Persian for Native Speakers (15) VLPA Enables students with a degree of proficiency in spoken Persian to read and write, to translate rudimentary texts, and to converse utilizing the use of the formal style of composition. Reading, writing, and comprehension, particularly of handwritten manuscripts of the scribal tradition. Also covers calligraphy, translation, journalistic prose, and other facets of the language and the script. Offered: S.

PRSAN 411 Elementary Persian (5) Conversa- tion, pronunciation, and graded reading. Persian alphabet and basic sentence constructions. Offers rudimentary conversational and reading ability with a vocabulary of about two thousand words. Prerequisite: PRSAN 411.

PRSAN 412 Intermediate Persian (5) VLPA Reading of simple texts with emphasis on reading and writing, conversation skills, grammar, and syntax. Builds a vocabulary of standard Persian in preparation for advanced reading and comprehension of literary texts. Prerequisite: PRSAN 421.

PRSAN 422 Intermediate Persian (5) VLPA Reading of simple texts with emphasis on reading and writing, conversation skills, grammar, and syntax. Builds a vocabulary of standard Persian in preparation for advanced reading and comprehension of literary texts. Prerequisite: PRSAN 421.

PRSAN 423 Intermediate Persian (5) VLPA Reading of simple texts with emphasis on reading and writing, conversation skills, grammar, and syntax. Builds a vocabulary of standard Persian in preparation for advanced reading and comprehension of literary texts. Prerequisite: PRSAN 422.

PRSAN 433 Advanced Persian (3) VLPA Designed to improve reading and writing skills. Graded reading and writing and exposure to the writing system, textual history, newspaper reading, and translation. Cultural materials presented as appropriate. The art of calligraphy introduced. For students with a degree of proficiency in spoken Persian. Prerequisite: PRSAN 431.

PRSAN 433 Advanced Persian (3) VLPA Designed to improve reading and writing skills. Graded reading and writing and exposure to the writing system, textual history, newspaper reading, and translation. Cultural materials presented as appropriate. The art of calligraphy introduced. For students with a degree of proficiency in spoken Persian. Prerequisite: PRSAN 432.

PRSAN 451 Introduction to Persian Literature (3) VLPA Selected texts from modern and classical Persian poetry and prose. Provides insights into Iranian culture and its past and present achievements in literature. Prepares the student for a more comprehensive and critical study of Persian literature. Prerequisite: PRSAN 423.

PRSAN 452 Modern Persian Literature: A Survey (3) VLPA Development of poetry and prose after Iran fell and absorbed the impact of Western cultures. Periods and genres. Works of such authors as Jamalzadeh, Hedayat, Dehkoda, Al-e Ahmad, Nima, Sepehri, and Forugh. Prerequisite: PRSAN 423.

PRSAN 453 Classical Persian Literature: A Survey (3) VLPA History of Persian literature from Rudaki to Hafiz. Studies epic, lyric, and mystic traditions placed in historical settings. Covers the most important genres such as the Qasida, the Ghazal, the Ruba’i and the Masnavi. Prerequisite: PRSAN 423.

PRSAN 454 The Epic Tradition in Iran (3) VLPA Focuses on the Shahnameh of Firdawsi: explores the ancient legends that gave rise to it and follows the fortunes of epic poetry after Firdawsi, touching on the rise, development, and decline of romance in classical Persian literature. Prerequisite: PRSAN 433.

PRSAN 455 The Persian Ghazal (3) VLPA The Ghazal as the leading medium for lyrical expression in classical Persian tradition. Follows this genre from conception to culmination in the poetry of Hafiz. Conventions and devices of the Ghazal. Development placed in historical and social context. Prerequisite: PRSAN 433.

PRSAN 456 Sufism: Thought and Expression (3) I&S/VLPA Dynamics of mystical thought and expression as evolved in the writings of the great Sufi masters and reflected in the poetry of Sana’i, Atar, Rumi, and others. The fundamental unity of the mystical vision, with special attention to the peculiarities of individual style and expression. Prerequisite: PRSAN 433.

PRSAN 490 Supervised Study (1-6, max. 18) Special work in literary texts for undergraduates and undergraduates. Prerequisite: PRSAN 423.

PRSAN 496 Special Studies in Persian (3-5, max. 15) Topics vary.

PRSAN 499 Undergraduate Research (1-6, max. 18).

PRSAN 596 Special Studies in Persian (3-5, max. 15) Topics vary.

Turkic

TKIC 199 Study Abroad (1-12, max. 15) Credit for elementary Turkic in an approved study abroad program. Requires credit evaluation by department or faculty. Does not automatically apply to major or minor requirements. Offered: AWSpS.

TKIC 399 Study Abroad (1-12, max. 15) Credit for elementary or intermediate Turkic in an approved study abroad program. Requires credit evaluation by department or faculty. Does not automatically apply to major or minor requirements. Offered: AWSpS.

TKIC 401 Intensive Elementary Uzbek (15) VLPA Development of poetry and prose after Iran felt and absorbed the impact of Western cultures. Periods and genres. Works of such authors as Jamalzadeh, Hedayat, Dehkoda, Al-e Ahmad, Nima, Sepehri, and Forugh. Prerequisite: PRSAN 423.

TKIC 402 Intensive Elementary Kazakh (15) VLPA Development of poetry and prose after Iran felt and absorbed the impact of Western cultures. Periods and genres. Works of such authors as Jamalzadeh, Hedayat, Dehkoda, Al-e Ahmad, Nima, Sepehri, and Forugh. Prerequisite: PRSAN 423.

TKIC 403 Intensive Elementary Kirghiz (15) VLPA Development of poetry and prose after Iran felt and absorbed the impact of Western cultures. Periods and genres. Works of such authors as Jamalzadeh, Hedayat, Dehkoda, Al-e Ahmad, Nima, Sepehri, and Forugh. Prerequisite: PRSAN 423.

TKIC 404 Intensive Intermediate Uzbek (15) VLPA Allows students to complete second-year Uzbek in one quarter. Reading of selected texts in Uzbek, with continuing emphasis on oral and written practice, grammar, and advanced readings. Cannot be taken for credit if 421, 422,
TKIC 405 Intensive Intermediate Kazakh (15) VLPA
Allows students to complete second-year Kazakh in one quarter. Reading of selected texts in modern literary Kazakh, with emphasis on grammar, syntax, and oral practice. Prerequisite: either TKIC 402 or TKIC 416. Offered: S.

TKIC 406 Intensive Advanced Uzbek (15) VLPA
Advanced-level instruction in speaking, writing, reading, and listening skills. Students work independently on translation projects. Emphasis on extensive writing practices in Uzbek and student participation in an Uzbek email conversation circle. Prerequisite: TKIC 423. Offered: S.

TKIC 407 Intensive Elementary Uighur (15) VLPA
Covers all four linguistic skills: reading, writing, speaking, and listening. Offered: S.

TKIC 411 Elementary Uzbek (5) Cirtautas
Introduction to the modern written and spoken language. Cannot be taken for credit if 401 taken.

TKIC 412 Elementary Uzbek (5) Cirtautas
Introduction to the modern written and spoken language. Cannot be taken for credit if 401 taken.

TKIC 413 Elementary Uzbek (5) Cirtautas
Introduction to the modern written and spoken language. Cannot be taken for credit if 401 taken.

TKIC 414 Introduction to Kazakh (3) Cirtautas
Prerequisites: Knowledge of Kazakh within the community of other Turkic languages; alphabets used for Kazakh; reading of texts from Kazakhstan and China (Xinjiang); oral and written exercises. Cannot be taken for credit if 401 taken.

TKIC 415 Introduction to Kazakh (3) Cirtautas
Position of Kazakh within the community of other Turkic languages; alphabets used for Kazakh; reading of texts from Kazakhstan and China (Xinjiang); oral and written exercises. Cannot be taken for credit if 401 taken.

TKIC 416 Introduction to Kazakh (3) Cirtautas
Position of Kazakh within the community of other Turkic languages; alphabets used for Kazakh; reading of texts from Kazakhstan and China (Xinjiang); oral and written exercises. Cannot be taken for credit if 401 taken.

TKIC 417 Introduction to Uighur (5) Cirtautas
Designed for students with no prior knowledge of Uighur. Includes acquisition of Uighur Arabic alphabet, general phonological rules, and basic grammar. Basic reading, listening, and oral comprehension practice all offered throughout the course. Offered: A.

TKIC 418 Introduction to Uighur (5) Cirtautas
Continuation of basic modern Uighur: phonological rules, grammar, and vocabulary. Practice in reading, listening, and oral comprehension. Prerequisite: TKIC 417. Offered: W.

TKIC 419 Introduction to Uighur (5) Cirtautas
Continuation of basic modern Uighur: phonological rules, grammar, and vocabulary. Practice in reading, listening, and oral comprehension. Prerequisite: TKIC 418. Offered: Sp.

TKIC 421 Intermediate Uzbek (3) VLPA
Cirtautas Continuation of elementary Uzbek. Oral work, grammar, and readings in Uzbek literature. Prerequisite: either TKIC 401 or TKIC 413.

TKIC 422 Intermediate Uzbek (3) VLPA
Cirtautas Continuation of elementary Uzbek. Oral work, grammar, and readings in Uzbek literature. Prerequisite: TKIC 421.

TKIC 423 Intermediate Uzbek (3) VLPA
Cirtautas Continuation of elementary Uzbek. Oral work, grammar, and readings in Uzbek literature. Prerequisite: TKIC 422.

TKIC 427 Intermediate Uighur (5) VLPA
Second-year Uighur. Includes reading, translation, oral comprehension, and composition. Prerequisite: TKIC 419. Offered: A.

TKIC 428 Intermediate Uighur (5) VLPA
Second-year Uighur. Includes reading, translation, oral comprehension, and composition. Prerequisite: TKIC 427. Offered: W.

TKIC 429 Intermediate Uighur (5) VLPA

TKIC 432 Advanced Uighur (5) VLPA
Focuses on reading, writing, translation, and oral comprehension at an advanced level. Students gain fluency in order to work in social and scientific environments where only the Uighur language is used. Prerequisite: TKIC 445. Offered: A.

TKIC 439 Advanced Uighur (5) VLPA
Focuses on reading, writing, translation, and oral comprehension at an advanced level. Students gain fluency in order to work in social and scientific environments where only the Uighur language is used. Prerequisite: TKIC 438. Offered: Sp.

TKIC 451 Introduction to Turkic Studies (3) VLPA
Cirtautas Bibliography, problems, and methods of research in the field of Turkic studies for advanced students of Turkish/Turkic languages, including readings in those languages on the languages, literatures, and ethnography of past and present Turkic peoples.

TKIC 454 Introduction to Uzbek Literature (3) VLPA
Cirtautas Readings from selected Uzbek writers. Content varies.

TKIC 455 Introduction to Uzbek Literature (3) VLPA
Cirtautas Readings from selected Uzbek writers. Content varies.

TKIC 456 Introduction to Uzbek Literature (3) VLPA
Cirtautas Readings from selected Uzbek writers. Content varies.

TKIC 490 Supervised Study (1-6, max. 18)
Special work in literary texts for graduates and undergraduates. Prerequisite: either TKIC 404, TKIC 405, or TKIC 423.

TKIC 496 Special Studies in Turkic Languages (3-5, max. 15) Topics vary.

TKIC 499 Undergraduate Research (3-5, max. 15) For Turkic language and literature majors.

TKIC 542 Comparative and Historical Grammar of Turkic Languages (3) Cirtautas
Classification of the Turkic languages; alphabets used; phonology, morphology, and syntax; lexical composition; structure changing developments. Prerequisite: TKIC 404.

TKIC 543 Comparative and Historical Grammar of Turkic Languages (3) Cirtautas
Classification of the Turkic languages; alphabets used; phonology, morphology, and syntax; lexical composition; structure changing developments. Prerequisite: TKIC 404.

TKIC 546 Old Turkic (3) Cirtautas
Introduction to Runic script; phonology, morphology, and syntax of the oldest form of Turkic; reading and translation of eighth-century inscriptions of historical and literary importance. Prerequisite: permission of instructor.

TKIC 547 Old Uighur (3) Cirtautas
Introduction to script systems; phonology, morphology, and syntax. Reading and translation of mainly Buddhist texts in Uighur script, eighth through eleventh centuries. Prerequisite: background in a Turkic language or permission of instructor.

TKIC 561 Middle Turkic (3) Cirtautas
Introduction to the phonology, morphology, and syntax of the Middle Turkic languages; reading and translation of texts in Karakhanid, Khazar, Turkic, Kipchak, and Chagatai. Prerequisite: permission of instructor.

TKIC 562 Middle Turkic (3) Cirtautas
Introduction to the phonology, morphology, and syntax of the Middle Turkic languages; reading and translation of texts in Karakhanid, Khazar Turkic, Kipchak, and Chagatai. Prerequisite: permission of instructor.

TKIC 563 Seminar on Turkic Literature (5)
Cirtautas Topics in oral and written literature. Prerequisite: permission of instructor.

TKIC 596 Special Studies in Turkic Languages (3-5, max. 15) Topics vary.

TKIC 600 Independent Study or Research (*)

Turkish

TKISH 199 Study Abroad (1-12, max. 15) Credit
for elementary Turkish in an approved study abroad program. Requires credit evaluation by department or faculty. Does not automatically apply to major or minor requirements. Offered: AWSpS.

TKISH 399 Study Abroad (1-12, max. 15) Credit
for elementary or intermediate Turkish in an approved study abroad program. Requires credit evaluation by department or faculty. Does not automatically apply to major or minor requirements. Offered: AWSpS.

TKISH 411 Elementary Turkish (5) Introduction to modern Turkish. Pronunciation and conversation, grammar and composition, graded reading. Latin characters used throughout. (Cannot be taken for credit if TKISH 401 is taken.)

TKISH 412 Elementary Turkish (5) Introduction to modern Turkish. Pronunciation and conversation, grammar and composition, graded reading. Latin characters used throughout. (Cannot be
Neurobiology

NBI 301 Introduction to Cellular and Molecular Neurobiology (3) NW Moody
Introduces students to the physiological and molecular properties of individual nerve cells and the synaptic connections between them, and to principles of nervous system development. Includes weekly laboratory sessions. Prerequisite: either BIOL 202 or BIOL 220. Offered: W.

NBI 302 Introduction to Systems and Behavioral Neurobiology (5) NW Kennedy, Perkel, Solis Introduces neuroethology, i.e., the mechanisms by which neurons and the synaptic connections among them produce sensory perceptions and complex behavioral outputs. Includes weekly laboratory sessions. Prerequisite: NBI 301. Offered: Sp.

NBI 401 Systems Neurobiology (3) NW Robinson Introduces students to the anatomical and physiological organization of the major sensory, motor, and associative systems of the mammalian brain. Behavioral data used to stress functional integration of systems. Includes gross brain anatomy demonstration and computer tutorials. Prerequisite: NBI 302. Offered: A.

NBI 402 Neuropathophysiology (3) NW Call Studies the molecular mechanisms of disease affecting excitable cells, focusing on mechanisms that alter electrical properties. Emphasizes skills in reading current literature. Prerequisite: NBI 401. Offered: W.

NBI 403 Systems and Behavioral Neurobiology (3) NW Smith Topics include information processing in sensory and motor systems, sensory-motor integration, learning, and memory. Using examples from the field of neuroethology, encourages students to independently work on problems taken from the recent neurobiological research literature. Prerequisite: NBI 401. Offered: W.

NBI 404 Neuropharmacology (3) NW Stella Actions of drugs on the brain at clinical, cellular, and molecular levels. Therapeutic use of drugs in treatment of neurological and psychiatric diseases. Abuse of drugs and the mechanisms of addiction, tolerance, and withdrawal. Prerequisite: NBI 401. Offered: Sp.

NBI 440 Topics in Current Neurobiology Research (2, max. 6) NW Credit/no credit only. Prerequisite: NBI 302.

NBI 450 Current Research Literature in Neurobiology (2, max. 6) NWWeekly journal club in neurobiology. Students read and discuss original research articles in neurobiology, centered around a specific topic each quarter. Credit/no credit only. Prerequisite: either BIOL 202 or BIOL 220.

NBI 496 Peer Teaching Assistant in Neurobiology (5) NW Direct classroom experience teaching in NBI 301 or 302. Credit/no credit only. Prerequisite: NBI 302. Offered: WSp.

NBI 499 Individual Research in Neurobiology (3-6, max. 18) Students carry out projects in laboratories of program faculty. Prerequisite: NBI 302.

Philosophy

PHI 100 Introduction to Philosophy (5) I&S Baker, Rosenthal Major philosophical questions relating to such matters as the existence of God, the foundations of knowledge, the nature of reality, and the nature of morality. Approach may be either historical or topical. Offered: AWSpS.

PHI 102 Contemporary Moral Problems (5) I&S/VLPA Blake, A. Moore Philosophical consideration of some of the main moral problems of modern society and civilization, such as abortion, euthanasia, war, and capital punishment. Topics vary.

PHI 110 Introduction to Social and Political Philosophy (5) I&S Clatterbaugh An introduction to political theories such as conservatism, liberalism, and socialism and their treatment of select social issues.

PHI 114 Philosophical Issues in the Law (5) I&S R. Moore Analysis and critical assessment of various philosophical issues in law and legal reasoning. Material drawn from actual law cases, as well as writings by contemporary philosophers of law and lawyers. Topics include criminal responsibility, civil disobedience, abortion, enforcement of morals. Special legal or philosophical training not required.

PHI 115 Practical Reasoning (5) I&S, QSR Introduction to logic emphasizing concepts and methods useful for practical analysis of arguments in everyday contexts; meaning, syllogisms, logical diagrams, inductive and statistical inference, informal fallacies, argument structure, perhaps some beginning symbolic logic. Offered: AWSpS.

PHI 120 Introduction to Logic (5) I&S/NW, QSR Cohen, Fine, Weller Elementary symbolic logic. The development, application, and theoretical properties of an artificial symbolic language designed to provide a clear representation of the logical structure of deductive arguments.

PHI 165 Why Do We Believe in Quarks, Evolution, and Other Crazy Things? Perspectives on Science, Reason, and Reality (5) I&S Hankinson Nelson Study of how scientific theories are justified and why they are accepted, using selected examples from the history of science.

PHI 199 New Majors Seminar (2) I&S/VLPA Introduces undergraduates to the field and to the interests of various faculty. Credit/no credit only. Prerequisite: one previous PHI course.

PHI 200 Topics in Philosophy (3-5, max. 10) I&S A study of philosophical topics at the introductory level. The content of the course is entirely at the discretion of the instructor.

PHI 205 Philosophy for Children (5) I&S Introduction to the methods of “doing” philosophy with young people. Stresses the development of a community of inquiry in which budding philosophers are encouraged to ask their own relevant questions, develop views and articulate reasons for them, and to listen and learn from one another. Credit/no credit only.

PHI 206 Philosophy of Feminism (5) I&S Wylie Philosophical analysis of the concepts and assumptions central to feminism. Theoretical
positions within the feminist movement; view of the ideal society; goals and strategies of the movement, intersections of the sex-gender system with other systems of oppression. Offered: jointly with POL S 212/WOMEN 206.

PHIL 230 Philosphic Issues in World Affairs (3) I&S Moral problems that arise in connection with such topics as affluence, hunger, and overpopulation; global environmental degradation; war and weaponry; restructuring the international order.

PHIL 240 Introduction to Ethics (5) I&S/LPVA Gardiner, Roberts, Smith, Talbott Critical introduction to various philosophical views of the basis and presuppositions of morality and moral knowledge. Critical introduction to various types of normative ethical theory, including utilitarian, deontological, and virtue theories.

PHIL 241 Topics in Ethics (5, max. 10) I&S/LPVA Introduction to ethics through in-depth study of one or more selected topics (e.g., limits of moral community, animal rights, moral education, and autonomy). Topics vary.

PHIL 242 Introduction to Medical Ethics (5) I&S/LPVA Goering, Schellenberg Introduction to ethics, primarily for first- and second-year students. Emphasizes philosophical thinking and writing through an in-depth study of philosophical issues arising in the practice of medicine. Examines the issues of medical ethics from a patient's point of view.

PHIL 243 Environmental Ethics (5) I&S Light Focuses on some of the philosophical questions that arise in connection with environmental studies. Topics to be considered include: the ideological roots of current issues, values and the natural world, public policy and risk assessment, intergenerational justice, and social change. Offered: jointly with ENVIR 243.

PHIL 267 Introduction to Philosophy of Religion (5) I&S Clatterbaugh Consideration of the sources of religious ideas and practices, the moral kinds and religious views and the problems they raise, and the different forms that spirituality can take. Issues concerning the relations of religion to science and morality also treated.

PHIL 301 Intermediate Topics in Philosophy (3-5, max. 10) I&S/LPVA Philosophical topics at the intermediate level. Content varies each quarter, depending on instructor.

PHIL 314 Philosophy of Crime and Punishment (5) I&S/R Moore Examination of philosophical theories regarding criminal habits and punishment and the philosophical problems connected with specific topics in criminal law. Examines proper subject matter of criminal law (drug use, pornography, euthanasia); limits of criminal sanctions; crime and privilege (corporate crime, white-collar crime, blackmail); justifications for punishment; mercy and execution.

PHIL 320 Ancient Philosophy (5) I&S Cohen, Roberts, Welliver Survey of ancient Greek philosophy, beginning with the pre-Socratics and proceeding on through Plato to Aristotle.

PHIL 325 Nineteenth-Century Philosophy (5) I&S Examination of post-Kantian thinkers through the end of the nineteenth century considering such major themes as idealism, romanticism, positivism, historicism, naturalism, existentialism, and pragmatism.

PHIL 327 American Philosophy (5) I&S Study of some of the major American philosophers such as Peirce, Royce, Dewey, William James, C. I. Lewis, Goodman, Quine.

PHIL 330 History of Ancient Political Philosophy (5) I&S Roberts Political philosophy of fourth- and fifth-century Greece, especially the Sophists, Plato, and Aristotle, stressing the connection between the political philosophy and the underlying philosophical system of each philosopher.

PHIL 332 History of Modern Political Philosophy (5) I&S Blake, BonJour, Clatterbaugh, Talbott Examination of major political philosophies from the sixteenth century to the nineteenth century, with attention to the underlying philosophical methods and foundations.

PHIL 334 Philosophy of Marxism (3) I&S Clatterbaugh Philosophy of Marx and the Marxist tradition with attention to key Marxist concepts such as exploitation, alienation, and historical materialism.

PHIL 335 Plato's Republic (5) I&S/LPVA Keyt Designed especially for philosophy majors, but open to non-majors. Intensive study of Plato's masterpiece. Prerequisite: one PHIL course.

PHIL 338 Philosophy of Human Rights (5) I&S Talbott Theories of human rights and the bearing of these theories on issues of public policy such as legitimacy of war and terrorism, economic justice, and whether future generations have rights.

PHIL 342 History of Modern Ethics (5) I&S/LPVA Smith, Welliver Development of moral thought from Hobbes through Nietzsche, with particular emphasis on the ethical writings of Hume, Kant, and John Stuart Mill.

PHIL 344 History of Recent Ethics (5) I&S/LPVA Study of major ethical writings in the twentieth century, with principal emphasis on the Anglo-American tradition.

PHIL 345 Moral Issues of Life and Death (5) I&S/LPVA Goering Examination of such topics as war and murder, famine relief, capital punishment, high-risk technologies, abortion, suicide, and the rights of future generations.

PHIL 346 Personal Values and Human Good (3) I&S Baker, Goering. Smith Examination of the idea of a good human life. Emphasizes differ from year to year. Typical topics include happiness and prudence, rationality and life plans, personal values and the meaning of life, autonomy and false consciousness, self-respect and self-esteem, honesty and self-deception, faith and “vital lies.”

PHIL 347 Philosophy in Literature (5) I&S/LPVA Study of philosophical ideas expressed in works of literature.

PHIL 350 Introduction to Epistemology (5) I&S Baker, BonJour, Talbott Truth, nature, definition, and possibility of knowledge.

PHIL 353 Introduction to the Philosophy of Language (5) I&S Philosophical theories about the nature of language. Topics include meaning, reference, truth, propositions, relations between language and thought.

PHIL 356 Introduction to Metaphysics (5) I&S Baker Introductory examination of some of the main problems in metaphysics, such as the nature of truth and reality, the metaphysical status of properties, the existence of free will.

PHIL 360 Introductory Topics in Philosophy of Science (5, max. 10) I&S Fine, Hankinson Nelson, Woody Study of one or more current topics in philosophy of science such as scientific realism, explanation, confirmation, causation. Prerequisite: one PHIL course; recommended: PHIL 120, PHIL 160.

PHIL 363 Introduction to the Philosophy of Mind (5) I&S Various theories of the nature of mind, the relationship between mind and body, the self, introspection, and knowledge of other minds.

PHIL 399 Foreign Study (2-5, max. 10) Upper division philosophy studies with no direct UW equivalents, taken through UW foreign study programs.

PHIL 401 Advanced Topics in Philosophy (3-5, max. 10) I&S Baker A study of philosophical topics at the advanced level. Topics vary.

PHIL 406 Philosophical Topics in Feminism (5) I&S Roberts, Hankinson Nelson, Woody Detailed examination of questions raised by recent feminist scholarship in particular areas of philosophy, such as political theory, ethics, epistemology, or philosophy of science. Emphasis varies.

PHIL 407 International Justice (5) I&S Blake, Gardiner Examines issues through investigation of the moral foundations of international politics. Issues include: What moral duties constrain the relationships between states? Is international poverty a matter of moral concern? Are we justified in preferring the interest of our fellow nations? Prerequisite: one course in philosophy.

PHIL 408 Philosophy of Diversity (5) I&S Blake Must a liberal political community respect all claims made on behalf of minority cultural groups? Are there moral limits to the forms of diversity compatible with just governance? Examines modern philosophical writings on these topics. Prerequisite: One philosophy course.

PHIL 409 Philosophy of Disability (3) I&S Goering Rethinks the non-disabled assumption at the heart of much of western moral and political philosophy. Explores concepts of autonomy, opportunity, personhood, and dependence in regard to disability. Issues may include prenatal testing and reproduction, special education, requirements of accommodation, and social and legal interpretations of disability. Prerequisite: one philosophy course or LSJ/CHID 332, LSJ/CHID 433, or LSJ/CHID 434.

PHIL 410 Social Philosophy (5) I&S Clatterbaugh, Talbott, An examination of topics pertaining to social structures and institutions such as liberty, distributive justice, and human rights.
PHIL 411 Justice in Health Care (5) I&S/VLPA
Jecker Examination of the ethical problem of allocating scarce medical resources. Emphasis on fundamental principles of justice that support alternative health policies. Recommended: prior courses in philosophy or medical ethics. Offered: jointly with MHE 474.

PHIL 412 Ethical Theory (5) I&S
Jecker Reviews the principal theories for normative ethical discourse, such as utilitarianism and deontology, and major metaethical commentary on those theories. Illustrated by classical and modern authors. Recommended: one basic course in ethics. Offered: jointly with MHE 402.

PHIL 413 Metaethical Theory (5) I&S
Jecker Study of major ethical writings in the twentieth century, with principal emphasis on the Anglo-American tradition. Recommended: one introductory philosophy course. Offered: jointly with MHE 404.

PHIL 414 Philosophy of Law (3) I&S

PHIL 415 Advanced Topics in Animal Welfare (5) I&S
Light Critical examination of issues in the philosophy of animal welfare and animal rights. Prerequisite: One philosophy course.

PHIL 416 Ethics and Climate Change (5) I&S
Gardiner Critical examination of the ethical issues surrounding climate change. Prerequisite: either one philosophy or one environmental studies course. Offered: jointly with ENVIR 416.

PHIL 417 Advanced Topics in Environmental Philosophy (5) I&S
Gardiner, Light Critical examination of issues in environmental philosophy. Topics vary. Prerequisite: one philosophy course. Offered: jointly with ENVIR 417.

PHIL 418 Jewish Philosophy (5) I&S
Rosenthal Introduces the central concepts and themes of Jewish philosophy. Focuses either on debates within a specific historical period (e.g., medieval or modern) or on a topic (e.g., reactions to the Enlightenment or to the Holocaust. Prerequisite: at least one previous course in philosophy. Offered: jointly with SJSJE 418.

PHIL 422 Studies in Continental Rationalism (3, max. 9) I&S
Clatterbaugh Study of one or more of the major continental Rationalists: Descartes, Spinoza, Leibniz.

PHIL 425 Studies in Nineteenth-Century Philosophy (3) I&S
Baker Study of post-Kantian metaphysical theories, with special emphasis on idealism, realism, and/or pragmatism. Typical authors include F. H. Bradley, J. McTaggart, Royce, and Green.

PHIL 426 Twentieth-Century Philosophy (5) I&S
Baker, Weller A study of development of contemporary analytic philosophy, the revolt against idealism, and the linguistic turn in philosophy.

PHIL 430 Hellenistic Philosophy (3) I&S

PHIL 431 Philosophy of Plato (3, max. 6) I&S
Cohen, Keyt, Roberts, Weller Study of selected middle and late dialogues.

PHIL 432 Philosophy of Aristotle (3, max. 6) I&S
Cohen, Keyt, Roberts, Weller Study of several major Aristotelian treatises.

PHIL 433 Philosophy of Thomas Aquinas (3) I&S
Examination of the major philosophical positions of Thomas Aquinas in the theory of knowledge, metaphysics, and ethics.

PHIL 434 British Empiricism (3) I&S
Baker, BonJour Examination of the metaphysical and epistemological views of Locke and Berkeley, with perhaps some attention also to Hume. Prerequisite: either PHIL 322 or PHIL 350.

PHIL 437 Philosophy of Hume (3) I&S
Weller Study Hume’s analyses of knowledge, the passions, and morals.

PHIL 438 Philosophy of Kant (5) I&S
BonJour, Weller Systematic study of The Critique of Pure Reason.

PHIL 439 The Later Philosophy of Wittgenstein (3) I&S
Detailed study of topics in the later philosophy of Wittgenstein, with particular attention to the Philosophical Investigations.

PHIL 440 Ethics (5) I&S
Roberts, Smith, Talbott Critical examination of the concepts and judgments of value, including an analytical treatment of the notions of good and bad, right and wrong, and obligation. Emphasis varies from quarter to quarter.

PHIL 441 Philosophy and Linguistics (3) I&S/VLPA
Study of philosophical problems that arise in the attempt to understand current linguistic theories and of the implications for linguistics for philosophy. Offered: jointly with LING 443.

PHIL 442 Philosophy of Art (5) I&S/VLPA
R. Moore Critical examination of various accounts of the nature of art, artistic activity, the aesthetic experience. Problems in interpretation and evaluation of works of art.

PHIL 446 Development of Aesthetic Theory (5) I&S/VLPA

PHIL 447 Philosophy of Literature (3) I&S/VLPA
Investigation of philosophical questions about literature: What is literature? Must literature be interpreted? What is interpretation? Literature and ideology.

PHIL 448 Philosophy of Film (5) VLPA/I&S
Light Critical examination of topics in the philosophy of film including the nature of film, the distinction between fiction and non-fiction films, whether films have “authors,” how films engage our emotions, and whether and how films can present effective arguments on important moral, political, or social questions. Prerequisite: one philosophy course.

PHIL 450 Epistemology (5) I&S
Baker, BonJour, Talbott Systematic study of some of the main problems of the theory of knowledge, such as: the definition of “knowledge;” a priori knowledge; perception and knowledge of the external world; and whether knowledge has or requires a foundation. Emphasis varies from quarter to quarter.

PHIL 453 Philosophy of Language (5) I&S/VLPA
Current theories of meaning, reference, predication, and related concepts. Offered: jointly with LING 476.

PHIL 456 Metaphysics (5) I&S
Baker Examination of such topics as freedom of the will, the nature of persons and personal identity, the existence of God, time, necessary truth, and universals. The emphases vary from year to year.

PHIL 459 Philosophy of Medicine (5) I&S
Jecker Familiarizes students with central issues in the philosophy of medicine. Focuses on the nature of medical knowledge, the connection between theory and observation, the meaning of medical concepts, and the relationship between theories and the world. Recommended: prior courses in philosophy, history of science, or history of medicine. Offered: jointly with MHE 440.

PHIL 460 Philosophy of Science (5) I&S/NW
Hankinson Nelson, Woody Critical study of the nature of scientific knowledge. Topics include the relation of theory to observation, the use of mathematics, how theories change, the requirements for the meaningfulness of a theory, and nature of confirmation. Recommended: PHIL 120 or PHIL 160; prerequisite: one PHIL course.

PHIL 461 Philosophical Anthropology (5) I&S

PHIL 463 Philosophy of Mind (5) I&S
BonJour Examination of current theories of the nature of the mind and mental processes.

PHIL 464 Philosophical Issues in the Cognitive Sciences (5) I&S/NW
Philosophical problems connected with research in psychology, artificial intelligence, and other cognitive sciences. Topics vary. Readings from both philosophical and scientific literature. Accessible to nonphilosophers with suitable interests and backgrounds.

PHIL 465 Philosophy of History (3) I&S
Baker Analyses of basic concepts employed in historical interpretation, and study of some of the principal philosophers of history, such as Plato, Saint Augustine, Hegel, Marx, Spengler, Toynbee.

PHIL 466 Philosophy of the Social Sciences (5) I&S
Hankinson Nelson, Talbott Examination of fundamental issues in the foundations, methodology, and interpretation of the social sciences. Topics include value orientation and objectivity, methodological individualism, functionalism, reductionism, and the status of idealized models, including models involving idealized conceptions of individual rationality. Emphasis varies from quarter to quarter.

PHIL 467 Philosophy of Religion (5) I&S
Clatterbaugh, Rosenthal Study of selected topics and problems in the philosophy of religion, such as: arguments for the existence of God; the problem of evil; atheism; faith; religious experience and revelation; the attributes of God; miracles; immortality; and the relation between religion and morality. Readings from historical and contemporary authors.

PHIL 470 Intermediate Logic (5) I&S/NW, QSR
Fine, Keyt An introduction to the concepts and
methods of metatheory and their application to the sentential calculus.

PHIL 472 Axiomatic Set Theory (5) I&S/NW Keyt. Townsend Development of axiomatic set theory up to and including the consistency of the Axiom of Choice and Continuum Hypothesis with the Zermelo-Fraenkel Axioms.

PHIL 473 Philosophy of Mathematics (5) I&S/NW Fine Study of the traditional accounts of the nature of mathematical entities and mathematical truth given by logicism, intuitionism, and formalism, and the impact of Godel's incompleteness theorems on these accounts.

PHIL 474 Modal Logic (5) I&S/NW Notions of necessity and possibility, using the classical systems T, S4, and S5, and the syntax and the semantics (Kripke models) of these systems.

PHIL 479 Semantics II (3) I&S/NW/LPA Ogihara Formal characterization of linguistic meaning. Emphasis on nature and purpose of formal semantics and on its relation to formal syntax. Prerequisite: LING 442. Offered: jointly with LING 479.

PHIL 481 Philosophy of Biology (5) I&S/NW Hankinson Nelson Study of several current issues in philosophy of biology, which may include the logical structure of evolutionary theory, fitness, taxonomy, the concept of a living thing, reductionism, the concept of a biological species, evolutionary explanations, and philosophical consequences of sociology. Recommended: college-level course in biological science; prerequisite: one PHIL course.

PHIL 482 Philosophy of Physical Science (5, max. 10) I&S/NW Fine, Woody Study of philosophical issues raised by theories in physics or chemistry, such as whether space (time) is a substance, how causation and locality are treated in quantum mechanics, temporal anastropy and time travel, the nature of a field of force, the reduction of chemistry to physics. Prerequisite: one PHIL course.

PHIL 483 Induction and Probability (5) I&S/NW Introduction to current accounts of evidence and observation, the confirmation of scientific theories, the logic of inductive reasoning, and the metaphysics and epistemology of chance. High school-level math used. Specific topics vary from year to year. Prerequisite: PHIL 120.

PHIL 484 Reading in Philosophy (1-5, max. 15) Individual study of selected philosophical works.

PHIL 490 Advanced Topics in Epistemology (5, max. 15) I&S BonJour, Talbott Intensive study of a particular topic or area in epistemology. Prerequisite: either PHIL 350 or PHIL 450.

PHIL 498 Undergraduate Internship (1-5, max. 10) Baker, Clatterbaugh Independent fieldwork under the supervision of a faculty member. Individual experiences vary but could include an off-campus practicum or being trained as study group leader or tutor. Offered: AWSp.

PHIL 500 Proseminar in Philosophy (5) Introduces incoming graduate students to topics representative of the field and the faculty's interest. Each class session is devoted to a separate topic taught by a different member of the faculty. In addition to reading and short written assignments. Students prepare a term paper on a topic presented. Offered: A.

PHIL 505 Seminar in Teaching Philosophy (1, max. 10) Baker First quarter: seminar on topics of importance to a graduate student teaching two quiz sections of a large lecture course. Second quarter: focus on helping student prepare to teach own course. Prerequisite: graduate standing in philosophy. Offered: AW.

PHIL 510 Seminar in Social Philosophy (5, max. 20) Talbott

PHIL 514 Seminar in Legal Philosophy (5, max. 20) R. Moore

PHIL 520 Seminar in Ancient Philosophy (5, max. 20) Cohen, Keyt, Roberts, Weiler

PHIL 522 Seminar in Modern Philosophy (5, max. 20) Clatterbaugh, Weiler

PHIL 525 Seminar in Nineteenth-Century Philosophy (5, max. 20) Baker

PHIL 526 Seminar in Recent Philosophy (5, max. 20) Keyt

PHIL 538 Philosophy of Human Rights (5, max. 20) Talbott

PHIL 540 Seminar in Ethics (5, max. 20) Roberts, Smith, Talbott

PHIL 545 Seminar in the Philosophy of Art (5, max. 20) Moore

PHIL 550 Seminar in Epistemology (5, max. 20) BonJour, Talbott

PHIL 553 Seminar in Philosophy of Language (5, max. 20)

PHIL 556 Seminar in Metaphysics (5, max. 20) Baker, BonJour

PHIL 560 Seminar in the Philosophy of Science (5, max. 20) Fine, Woody

PHIL 563 Seminar in the Philosophy of Mind (5, max. 20) BonJour

PHIL 565 Seminar in the Philosophy of History (5, max. 20)

PHIL 566 Seminar in Philosophy of the Social Sciences (5, max. 20)

PHIL 567 Seminar in the Philosophy of Religion (5, max. 20)

PHIL 570 Seminar in Logic (5, max. 20) Keyt Prerequisite: PHIL 470.

PHIL 574 Meta-archaeology: Philosophy and Archaeology (4) Wylie Examines philosophical issues raised in and by archaeology, including theories of explanation and model building, analyses of evidential reasoning and hermeneutic interpretation, debates about ideals of objectivity and about science and values. Recommended: ARCHY 570 Text Offered: jointly with ARCHY 574.

PHIL 584 Reading in Philosophy (1-5, max. 12) Intensive reading in philosophical literature. Prerequisite: permission of graduate program coordinator.

PHIL 587 Contemporary Analytic Philosophy (5, max. 20) Baker

PHIL 600 Independent Study or Research (*) Prerequisite: permission of graduate program coordinator.

PHIL 800 Doctoral Dissertation (*)

Values

VALUES 495 Ethics in Practice (2) Blake, Gardiner, Goering, Light, Roberts Culmination of the Values in Society minor. Synthesizes training in the ethics with primary discipline. Includes a project of positive social engagement (service learning or research project with fieldwork). Limited to undergraduates completing the minor in Values and Society.

VALUES 511 Ethics Matters: An Exploration of Some Moral Qualities (5) Goering, Roberts Asks what we fundamentally require of ourselves and others if we are to live together in morally acceptable ways by discussing moral qualities as they appear in various arenas. Topics include: autonomy, respect, integrity, and trust.

VALUES 512 Justice Matters: An Exploration of Justice as a Social Ideal (5) Gardiner, Roberts Asks what makes social policies and institutions morally acceptable, primarily through a discussion about justice and injustice. Topics include: relativism, the sources of competing conceptions of justice and equality, cost-benefit analysis, distributive justice and beneficence.

VALUES 513 Capstone Workshop (2) Gardiner, Goering, Roberts Collaborative research workshop. Capstone course for the Values in Society graduate certificate program. Prerequisite: VALUES 511 and VALUES 512. Offered: Sp.

Physics

PHYS 101 Physical Science by Inquiry I (5) NW, QSR Laboratory-based development of concepts and reasoning skills. Helps prepare preservice teachers to teach science by inquiry. Liberal arts students gain experience in the scientific process. Useful for students with weak science preparation before taking standard science courses. Forms foundation for scientific literacy. Offered: AW.

PHYS 102 Physical Science by Inquiry I (5) NW, QSR Laboratory-based development of concepts and reasoning skills. Helps prepare preservice teachers to teach science by inquiry. Liberal arts students gain experience in the scientific process. Useful for students with weak science preparation before taking standard science courses. Forms foundation for scientific literacy. Prerequisite: PHYS 101. Offered: Sp.

PHYS 103 Physical Science by Inquiry I (5) NW, QSR See PHYS 101-102. Prerequisite: PHYS 102.

PHYS 110 Liberal Arts Physics (5) NW, QSR Basic concepts of physics presented with emphasis on their origin and their impact on society and the Western intellectual tradition.
Primarily for students in the arts, humanities, and social sciences. Offered: A5.

Credit is not given for both 114 and 121.

PHYS 114 General Physics (4) NW, QSR Basic principles of physics presented without use of calculus. Suitable for students majoring in technically oriented fields other than engineering or the physical sciences. Mechanics. Credit is not given for both 114 and 121. Recommended: working knowledge of algebra and trigonometry; one year high school physics; concurrent registration in PHYS 117. Offered: AWSpS.

Credit is not given for both 115 and 122.

PHYS 115 General Physics (4) NW, QSR Basic principles of physics presented without use of calculus. Suitable for students majoring in technically oriented fields other than engineering or the physical sciences. Heat and electromagnetism. Credit is not given for both 115 and 122. Prerequisite: PHYS 114 or 121; recommended: concurrent registration in PHYS 118. Offered: AWSpS.

PHYS 116 General Physics (4) NW, QSR Basic principles of physics presented without use of calculus. Suitable for students majoring in technically oriented fields other than engineering or the physical sciences. Sound, light, and modern physics. Credit is not given for both 116 and 123. Prerequisite: PHYS 115 or 122; recommended: concurrent registration in PHYS 119. Offered: AWSpS.

PHYS 117 General Physics Laboratory (1) NW Mechanics laboratory. Credit/no credit only. Credit is not given for both 117 and the 121 lab. Prerequisite: PHYS 114 which may be taken concurrently. Offered: AWSpS.

PHYS 118 General Physics Laboratory (1) NW Heat and electromagnetism laboratory. Credit/no credit only. Credit is not given for both 118 and the 122 lab. Prerequisite: PHYS 115 which may be taken concurrently. Offered: AWSpS.

PHYS 119 General Physics Laboratory (1) NW Sound, light, and modern physics laboratory. Credit/no credit only. Credit is not given for both 119 and the 123 lab. Prerequisite: PHYS 116 which may be taken concurrently. Offered: AWSpS.

The courses 121, 122, 123, 224, 225 plus appropriate laboratory together make up the general physics sequence for science and engineering students.

PHYS 121 Mechanics (5) NW, QSR Basic principles of mechanics and experiments in mechanics for physical science and engineering majors. Lecture tutorial and lab components must all be taken to receive credit. Credit is not given for both PHYS 114 and PHYS 121. Prerequisite: MATH 124, MATH 127, MATH 134, or MATH 145, any of which may be taken concurrently; recommended: one year high school physics. Offered: AWSpS.

PHYS 122 Electromagnetism and Oscillatory Motion (5) NW Basic principles of electromagnetism; the mechanics of oscillatory motion, and experiments in these topics for physical science and engineering majors. Lecture tutorial and lab components must all be taken to receive credit. Credit is not given for both PHYS 115 and PHYS 122. Prerequisite: MATH 125, MATH 128, MATH 134, or MATH 146, any of which may be taken concurrently; PHYS 121. Offered: AWSpS.

PHYS 123 Waves (5) NW Electromagnetic waves, optics, waves in matter, and experiments in these topics for physical science and engineering majors. Lecture tutorial and lab components must all be taken to receive credit. Credit is not given for both PHYS 116 and PHYS 123. Prerequisite: MATH 126, MATH 129, or MATH 134, any of which may be taken concurrently; PHYS 122. Offered: AWSpS.

PHYS 207 The Physics of Music (3) NW The nature of sound; vibrations; traveling and standing waves; response of the ear to sound; production of musical sounds.

PHYS 210 Physics by Inquiry I (5) NW Selected topics in physics with emphasis on depth of understanding and development of skills essential to the scientific process. Prerequisite: MATH 126, MATH 129, or MATH 134. Offered: A.

PHYS 211 Physics by Inquiry I (5) NW Selected topics in physics with emphasis on depth of understanding and development of skills essential to the scientific process. Prerequisite: MATH 126, MATH 129, or MATH 134. Offered: A.

PHYS 212 Physics by Inquiry I (5) NW Selected topics in physics with emphasis on depth of understanding and development of skills essential to the scientific process. Prerequisite: MATH 126, MATH 129, or MATH 134. Offered: A.

PHYS 214 Light and Color (5) NW, QSR Compares past explanation of certain familiar natural phenomena with present understandings. Lamps and lighting, outdoor light, optical devices, color vision, perspective, paints, and pigments. Quantitative comparison critical to the course, but college-level mathematics background not required. Intended for non-science students.

PHYS 215 A Way of Knowing (5) NW, QSR Bayes' insight to the character and culture of scientific inquiry through a historical examination of how we have interpreted our experience of the phenomena of gravitation. Specifically for non-science majors. Quantitative reasoning and critical thinking required, but no college-level mathematics.

PHYS 216 Science and Society (5) NW, QSR Chaloupka of relationships between science, technology and society. Nuclear physics and molecular biology serve as concrete examples of fields with significant impact on society. Offered jointly with SIS 216, Sp.

PHYS 224 Thermal Physics (3) NW Introduction to heat, thermodynamics, elementary kinetic theory, and the behavior of continuous media. Prerequisite: MATH 126, MATH 129, or MATH 136, any of which may be taken concurrently; PHYS 122 which may be taken concurrently. Offered: AWSpS.

PHYS 225 Modern Physics (3) NW Special theory of relativity; phenomena of modern physics with emphasis on photons, electrons, and atoms; introduction to quantum physics. Prerequisite: 2.0 in PHYS 123 which may be taken concurrently. Offered: WSpS.

PHYS 227 Elementary Mathematical Physics (4) NW Applications of mathematics in physics with emphasis on the mechanics of particles and continuous systems. Develops and applies computational methods, both analytic and numerical. Prerequisite: either MATH 134, MATH 135, MATH 136, MATH 308, or MATH 318; 2.0 in PHYS 123. Offered: A5.

PHYS 228 Elementary Mathematical Physics (3) NW Applications of mathematics in physics with emphasis on the mechanics of particles and continuous systems. Develops and applies computational methods, both analytic and numerical. Prerequisite: PHYS 227. Offered: AW.

PHYS 229 Mathematical Methods and Classical Mechanics (3) NW Mathematical methods applied to classical mechanics, including Lagrangian mechanics. Prerequisite: 2.0 in PHYS 228. Offered: Sp.

PHYS 231 Introductory Experimental Physics (3) NW Introduction to data acquisition and analysis using experiments which measure fundamental constants or properties of nature. Planck's constant, Boltzmann's constant, speed of light, charge of electron. Prerequisite: 2.0 in PHYS 123. Offered: A.

PHYS 232 Introduction to Computational Physics (3) Computational techniques applied to physics and data analysis in laboratory setting. Emphasis on numerical solutions of differential equations, least square data fitting, Monte Carlo methods, and Fourier Analysis. A high-level language taught and used; no previous computing experience required. Prerequisite: PHYS 227.

PHYS 248 Introductory Selected Topics (1-5, max. 15) NW.

PHYS 311 Relativity and Gravitation (3) NW Special theory of relativity, Newtonian gravity, and relativistic effects of gravitation, including black holes, gravitational waves, and applications to cosmology. Prerequisite: 2.0 in PHYS 123.

PHYS 315 Applications of Modern Physics (3) Foundations of quantum physics, including Schroedinger equation, tunneling, atoms, spin, and applications. These include semiconductor devices, lasers, magnetic resonance imaging (MRI), quantum cryptography, atomic microscopes. Prerequisite: minimum grade of 2.0 in PHYS 224, minimum grade of 2.0 in PHYS 225, minimum grade of 2.0 in PHYS 227 which may be taken concurrently.

PHYS 321 Electromagnetism (4) NW First of a three-quarter sequence. Charges at rest and in motion; dielectric and magnetic media; electromagnetic waves; relativity and electro-
magnetism; physical optics. Prerequisite: either MATH 324 which may be taken concurrently; MATH 334, MATH 335, or MATH 336. Minimum grade of 2.0 in PHYS 228. Offered: AW.

PHYS 322 Electromagnetism (4) NW
Continuation of PHYS 321. Charges at rest and in motion; dielectric and magnetic media; electromagnetic waves; relativity and electromagnetism; physical optics. Prerequisite: PHYS 321. Offered: WSp.

PHYS 323 Electromagnetism (4) NW
Continuation of PHYS 322. Charges at rest and in motion; dielectric and magnetic media; electromagnetic waves; relativity and electromagnetism; physical optics. Prerequisite: PHYS 322.

PHYS 324 Quantum Mechanics (4) NW
First part of a two-semester sequence. Introduction to nonrelativistic quantum mechanics: need for quantum theory, Schrodinger equation, operators, angular momentum, the hydrogen atom, identical particles, and the periodic table. Prerequisite: either MATH 324, MATH 334, MATH 335, or MATH 336. Minimum grade of 2.0 in PHYS 225; minimum grade of 2.0 in PHYS 228. Offered: AW.

PHYS 325 Quantum Mechanics (4) NW
Continuation of PHYS 324. Introduction to nonrelativistic quantum mechanics: perturbation theory, the variational principle, radiation; application of quantum mechanics to atomic physics, magnetic resonance, scattering, and various special topics. Prerequisite: PHYS 324. Offered: W.

PHYS 328 Statistical Physics (3) NW
Elements of statistical mechanics and their applications. Prerequisite: PHYS 224; PHYS 324. Offered: Sp.

PHYS 331 Optics Laboratory (3) NW
Measurements of interference and diffraction, optical properties of matter, image processing, interferometry, holography. Prerequisite: PHYS 229. Offered: Sp.

PHYS 334 Electric Circuits Laboratory (3) NW
Basic elements of DC, AC, and transient circuits; electronic devices; electrical measurements. Prerequisite: either MATH 126, MATH 129, or MATH 136; 2.0 in PHYS 123. Offered: WSp.

PHYS 335 Circuits Laboratory (3) NW

PHYS 401 Special Problems (*, max. 30)

PHYS 402 Special Problems (*, max. 30)

PHYS 403 Special Problems (*, max. 30)

PHYS 405 Physical Science by Inquiry II (5-)
NW Emphasis on depth of understanding and development of reasoning and representational skills essential to the scientific process. Provides background for teaching physical science as a process of inquiry and develops scientific literacy. Offered: A.

PHYS 406 Physical Science by Inquiry II (-5)
NW Emphasis on depth of understanding and development of reasoning and representational skills essential to the scientific process. Provides background for teaching physical science as a process of inquiry and develops scientific literacy. Offered: W.

PHYS 407 Physics by Inquiry II (5) NW
Selected topics in physics, with emphasis on depth of understanding and development of skills essential to the scientific process. Background for teaching physics at secondary school and introductory college levels. Some mathematical proficiency required. Prerequisite: PHYS 123. Offered: A.

PHYS 408 Physics by Inquiry II (5) NW
Selected topics in physics, with emphasis on depth of understanding and development of skills essential to the scientific process. Background for teaching physics at secondary school and introductory college levels. Some mathematical proficiency required. Prerequisite: PHYS 407. Offered: W.

PHYS 409 Physics by Inquiry II (5) NW
Selected topics in physics, with emphasis on depth of understanding and development of skills essential to the scientific process. Background for teaching physics at secondary school and introductory college levels. Some mathematical proficiency required. Prerequisite: PHYS 408. Offered: Sp.

PHYS 410 Physics by Inquiry for In-Service Teachers (1-2, max. 30) NW A "hands-on" inquiry-oriented approach designed to train in-service teachers in the use of the physical science content for any of several science programs selected by a school or school district. Credit/no credit only.

PHYS 411 Physics by Inquiry for Lead Teachers (1-4, max. 4) NW Extends the content covered in previous courses and helps prepare lead teachers to train colleagues to use any of several science programs selected by schools or districts. Credit/no credit only. Prerequisite: two courses selected from PHYS 405, PHYS 406, PHYS 407, PHYS 408, or PHYS 409. Offered: A.

PHYS 412 Physics by Inquiry for Lead Teachers (1-4, max. 4) NW Extends the content covered in previous courses and helps prepare lead teachers to train colleagues to use any of several science programs selected by schools or districts. Credit/no credit only. Prerequisite: two courses selected from PHYS 405, PHYS 406, PHYS 407, PHYS 408, or PHYS 409. Offered: A.

PHYS 413 Physics by Inquiry for Lead Teachers (1-4, max. 4) NW Extends the content covered in previous courses and helps prepare lead teachers to train colleagues to use any of several science programs selected by schools or districts. Credit/no credit only. Prerequisite: two courses selected from PHYS 405, PHYS 406, PHYS 407, PHYS 408, or PHYS 409. Offered: A.

PHYS 421 Atomic and Molecular Physics (3) NW Survey of the principal phenomena of atomic and molecular physics. Prerequisite: PHYS 323; PHYS 325. Offered: W.

PHYS 422 Nuclear and Elementary-Particle Physics (3) NW Survey of the principal phenomena of nuclear and elementary-particle physics. Prerequisite: PHYS 323; PHYS 325. Offered: Sp.

PHYS 423 Solid-State Physics (3) NW Survey of the principal phenomena of solid-state physics. Prerequisite: a minimum grade of 2.0 in PHYS 315 or PHYS 324. Offered: A.

PHYS 424 Mathematical Physics (3) NW Advanced classical mechanics. Prerequisite: PHYS 323; PHYS 325. Offered: A.

PHYS 427 Applications of Physics (1-3, max. 12) NW Current applications of physics to problems in the sciences and technology.

PHYS 428 Selected Topics in Physics (1-5, max. 12) NW

PHYS 429 Biophysics (3) Application of the concepts and methods of physics to biological systems. Prerequisite: PHYS 123; PHYS 224; PHYS 227.

PHYS 431 Modern Physics Laboratory (3) NW
Measurement in modern atomic, molecular, and solid-state physics. Recommended: 30 credits in physics. Offered: A.

PHYS 432 Modern Physics Laboratory (3) NW
Measurement in modern atomic, molecular, and solid-state physics. Recommended: 30 credits in physics. Offered: W.

PHYS 433 Modern Physics Laboratory (3) NW
Techniques in nuclear and elementary-particle research. Offered: Sp.

PHYS 434 Application of Computers to Physical Measurement (3) NW Laboratory giving specific instruction and experience in interfacing laboratory equipment to computers. Prerequisite: PHYS 334. Offered: A.

PHYS 436 Nonlinear Dynamics and Chaos (4) NW
Variational Principle, Lagrangian and Hamiltonian Mechanics, phase space, nonlinear dynamics, approach to chaos, Lyapunov exponents, applications to physical systems. Numerical exercises to illustrate phenomena. Prerequisite: MATH 300.

PHYS 441 Quantum Physics (4) NW
Introduction to concepts and methods of quantum physics: wave mechanics (de Broglie wave-length, uncertainty principle, Schrodinger equation), one-dimensional examples (tunneling, harmonic oscillator), formalism of quantum physics, angular momentum and the hydrogen atom. Recommended: 30 credits in PHYS 400, PHYS 401, or PHYS 405. Offered: W.

PHYS 442 Issues for Ethnic Minorities and Women In Science and Engineering (3/5) I&S
Addresses issues faced by women and ethnic minorities in physical sciences and engineering. Focuses on participation, barriers to participation, and solutions to those issues for women and ethnic minorities in physical sciences and engineering. Offered: jointly with WOMEN 485.

PHYS 460 Water in the Environment (3) NW
Study of the role of water in the environment, from the point of view of physical science. Baking, Waddington, Warren Discusses the unique physical and chemical properties of the water molecule in relation to the atmospheric greenhouse effect, precipitation formation, oceanic circulations, infiltration of water through soils, geyser eruptions, and glacier and sea ice thickness. Prerequisite: either MATH 124, MATH 126, MATH 129, or MATH 136; PHYS 123. Offered: jointly with ATM S 460/ESS 424. Offered: A.
PHYS 485 Senior Honors Seminar (1, max. 3) NW Offered: A.
PHYS 486 Senior Honors Seminar (1, max. 3) NW Offered: W.
PHYS 487 Senior Honors Seminar (1, max. 3) NW Offered: Sp.
PHYS 491 Independent Research (1-3, max. 3) Supervised, independent study requiring written and oral presentations summarizing work accomplished. Recommended: 12 credits in physics above 200 level. Offered: A.
PHYS 492 Independent Research (1-3, max. 3) Supervised, independent study requiring written and oral presentations summarizing work accomplished. Recommended: 12 credits in physics above 200 level. Offered: W.
PHYS 493 Independent Research (1-3, max. 3) Supervised, independent study requiring written and oral presentations summarizing work accomplished. Recommended: 12 credits in physics above 200 level. Offered: A.
PHYS 494 Seminar on Current Problems in Physics (1, max. 3) NW Supervised, independent study of topics (chosen by faculty in charge of physics) in physics. Written and oral presentation summarizing work accomplished are required. Recommended: 12 credits in physics above 200 level. Offered: A.
PHYS 495 Seminar on Current Problems in Physics (1, max. 3) NW Supervised, independent study of topics (chosen by faculty in charge) of current interest in physics. Written and oral presentation summarizing work accomplished are required. Recommended: 12 credits in physics above 200 level. Offered: W.
PHYS 496 Seminar on Current Problems in Physics (1, max. 3) NW Supervised, independent study of topics (chosen by faculty in charge) of current interest in physics. Written and oral presentation summarizing work accomplished are required. Recommended: 12 credits in physics above 200 level. Offered: Sp.
PHYS 501 Tutorials in Teaching Physics (1, max. 2) Preparation for teaching introductory physics; use and critical analysis of instructional materials in a collaborative learning environment; supervised teaching practicum in which instructional materials are used with undergraduates. Credit/no credit only. Offered: A.
PHYS 502 Tutorials in Teaching Physics (1, max. 2) Preparation for teaching introductory physics; use and critical analysis of instructional materials in a collaborative learning environment; supervised teaching practicum in which instructional materials are used with undergraduates. Credit/no credit only. Offered: W.
PHYS 503 Tutorials in Teaching Physics (1, max. 2) Preparation for teaching introductory physics; use and critical analysis of instructional materials in a collaborative learning environment; supervised teaching practicum in which instructional materials are used with undergraduates. Credit/no credit only. Offered: Sp.
PHYS 505 Mechanics (3) Lagrangian and Hamiltonian dynamics, with applications to various topics such as coupled oscillators, parametric resonance, anharmonic oscillations, chaos. Offered: A.
PHYS 507 Physical Applications of Group Theory (3) Applications of finite and continuous groups, representation theory, symmetry, and conservation laws to physical systems. Offered: Sp.
PHYS 511 Topics in Contemporary Physics (3, max. 9) Topics of current experimental, theoretical, or technological interest in modern physics. Offered: Sp.
PHYS 513 Electromagnetism and Relativity (4) First of a three-part sequence. Principles of electrostatics, complex variable techniques, boundary value problems and their associated mathematical techniques, Green’s functions. Offered: A.
PHYS 514 Electromagnetism and Relativity (3) Continuation of PHYS 513. Electric and magnetic fields in free space and material media, wave guides and cavity resonators. Offered: W.
PHYS 517 Quantum Mechanics (4) First of a three-part sequence. Modern non-relativistic quantum mechanics developed, beginning with its basic principles. Dirac and abstract operator notation introduced, starting with simple examples. Offered: A.
PHYS 518 Quantum Mechanics (4) Continuation of PHYS 517. Modern non-relativistic quantum mechanics. The character of the theory illustrated both with physical examples and with conceptual problems. Topics include: atomic structure, scattering processes, density operator description of mixed states, and measurement theory. Abstract operator methods emphasized in the exposition of angular momentum, scattering, and perturbation theory. Offered: W.
PHYS 520 Advanced Quantum Mechanics — Introduction to Quantum Field Theory (4) Multi-particle systems, second quantization, diagrammatic perturbation theory, radiation, correlation functions and multi-particle scattering, relativistic theories, renormalizability, basic quantum electrodynamics, and other applications. Offered: A.
PHYS 521 Advanced Quantum Mechanics — Introduction to Quantum Field Theory (3) Multi-particle systems, second quantization, diagrammatic perturbation theory, radiation, correlation functions and multi-particle scattering, relativistic theories, renormalizability, basic quantum electrodynamics, and other applications. Offered: W.
PHYS 524 Thermodynamics and Statistical Mechanics (4) Statistical mechanical basis of the fundamental thermodynamical laws and concepts; classical and quantum statistical distribution functions; applications to selected thermodynamic processes and examples of Bose and Fermi statistics. Offered: W.
PHYS 525 Statistical Mechanics (3) Introduction to equilibrium and non-equilibrium aspects of many-body systems; scale invariance and universality at phase transitions and critical phenomena; exactly solvable models; Markov processes, master equations and Langevin equation in non-equilibrium stochastic processes. Prerequisite: PHYS 524. Offered: A.
PHYS 527 Current Problems in Physics (1) Introduction to current research topics for beginning graduate students. Credit/no credit only. Offered: A.
PHYS 528 Current Problems in Physics (1) Introduction to current research topics for beginning graduate students. Credit/no credit only. Offered: W.
PHYS 530 Laser Physics (4) Physics underlying laser design and operation in the context of common laboratory systems. Topics may include continuous and pulsed lasers; solid, liquid, and gas gain media; Q-switching, mode-locking, resonator theory, nonlinear optics, and others. Prerequisite: basic quantum mechanics, electromagnetism, and optics; recommended: PHYS 541.
PHYS 531 Liquid Crystal Devices (4) Physics of liquid crystals and applications to practical display devices. Phases, phase transitions, optical and dielectric properties, molecular and device “engineering,” future prospects.
PHYS 536 Introduction to Acoustics and Digital Signal Processing (4) Chaloupka Introduces mathematical and physics principles of acoustics in digital signal processing applications. Complex analysis and Fourier methods, physics of vibrations and waves, solutions of the wave equation, digital convolution and correlation methods, and Maximum Length Sequence method in signal analysis and spread-spectrum applications. Prerequisite: PHYS 123; MATH 120.
PHYS 541 Applications of Quantum Physics (4) Techniques of quantum mechanics applied to lasers, quantum electronics, solids, and surfaces. Emphasis on approximation methods and interaction of electromagnetic radiation with matter. Prerequisite: PHYS 421 or PHYS 441 or equivalent. Offered: Sp.
PHYS 542 Numerical Methods in Physics (4) Numerical methods for analysis and computation in physics. Topics may include integration, differential equations, partial differential equations, optimization, data handling, and Monte Carlo techniques. Emphasis is applications in physics. Prerequisite: 30 credits in physical sciences, computer science, or engineering.
PHYS 543 Electromagnetic Theory (4) Principal concepts of electromagnetism. Static electric...
PHYS 544 Applications of Electromagnetic Theory (4) Emphasis may vary from year to year. Topics may include electromagnetic waves, radiation, scattering, wave guides, plasma physics, quantum electronics, and accelerator physics. Prerequisite: PHYS 543 or equivalent.

PHYS 546 Condensed-Matter Physics (4) Introduction to the theory of solids: crystal structure in real space and reciprocal space, structure and spectra; atomic and molecular beams; resonance techniques; atomic collisions; topics of current interest. Prerequisite: PHYS 519.

PHYS 547 Electronics for Physics Research (4) Electronic techniques as applied in physics research. Topics include noise, control-system analysis, operational amplifiers, lock-in amplifiers, precision power supplies and metering, data transmission, microprocessors. Several integrated measurement systems are examined in the context of specific research problems. Prerequisite: elementary electronics.

PHYS 550 Atomic Physics (3) Theory of atomic structure and spectra; atomic and molecular beams; resonance techniques; atomic collisions; topics of current interest. Prerequisite: PHYS 519.

PHYS 551 Atomic Physics (3) Theory of atomic structure and spectra; atomic and molecular beams; resonance techniques; atomic collisions; topics of current interest. Prerequisite: PHYS 519.

PHYS 552 Introduction to Cosmic Ray Physics (3) The nature and cosmological significance of cosmic ray photons and particles. The motion and confinement of particles in the geophysical, interplanetary, and interstellar medium. Theories of the processes involved in the high-energy interaction of cosmic rays, including shower theory. Methods of measurement and current problems. Credit/no credit only. Prerequisite: introductory quantum mechanics.

PHYS 554 Nuclear Astrophysics (3) Big bang nucleosynthesis; nuclear reactions in stars; solar neutrinos and neutrino oscillations; core-collapse supernovae: nucleosynthesis in stars, novae, and supernovae; neutron stars; composition and sources of cosmic rays; gamma ray bursts; atmospheric neutrinos. Offered: jointly with ASTR 510; A.

PHYS 555 Cosmology and Particle Astrophysics (3) Big bang cosmology; relativistic world models and classical tests; background radiation; cosmological implications of nucleosynthesis; baryogenesis; inflation; galaxy and large-scale structure formation; quasars; intergalactic medium; dark matter.

PHYS 557 High Energy Physics (3) First quarter of a three-quarter series. Emphasis on the experimental foundations of particle physics. Prerequisite: PHYS 519; recommended: PHYS 520, which may be taken concurrently. Offered: A.

PHYS 558 High Energy Physics (3) Second quarter of a three-quarter series. Phenomenology of the standard model of strong and electroweak interactions, including an introduction to Feynman diagrams. Prerequisite: PHYS 519; recommended: PHYS 520 and PHYS 521, which may be taken concurrently. Offered: W.

PHYS 559 High Energy Physics (3) Third quarter of a three-quarter series. Topics of current interest in high-energy particle physics. Prerequisite: PHYS 519; recommended: PHYS 520 and 521, which may be taken concurrently. Offered: Sp.

PHYS 560 Theoretical Nuclear Physics (3) First of a two-part sequence. Nuclear structure, scattering, reactions, and decays in terms of elementary properties of nucleons and current theoretical models. Prerequisite: PHYS 519. Offered: A.

PHYS 561 Theoretical Nuclear Physics (3) Continuation of PHYS 560. Nuclear structure, scattering, reactions, and decays in terms of elementary properties of nucleons and current theoretical models. Prerequisite: PHYS 519. Offered: W.

PHYS 564 General Relativity (3) First of a two-part sequence. General covariance and tensor analysis, the relativistic theory of gravitation as given by Einstein's field equations, experimental tests and their significance, and applications of general relativity, particularly in the areas of astrophysics and cosmology. Prerequisite: PHYS 515.

PHYS 565 General Relativity (3) Continuation of PHYS 564. General covariance and tensor analysis, the relativistic theory of gravitation as given by Einstein's field equations, experimental tests and their significance, and applications of general relativity, particularly in the areas of astrophysics and cosmology. Prerequisite: PHYS 515.

PHYS 567 Theory of Solids (3) First quarter of a course on modern solid state and condensed matter physics, aimed at bringing student's knowledge up to the level of current literature. Topics include structural, electronic, and vibrational properties; optical response functions and dynamics; transport theory; and cooperative phenomena. Prerequisite: PHYS 519, PHYS 524. Offered: AW.

PHYS 568 Theory of Solids (3) Second quarter of a course on modern solid state and condensed matter physics, aimed at bringing the student's knowledge up to the level of current literature. Additional topics (see PHYS 567) include magnetism, quantum Hall effect, superconductivity. Offered: WSp.
Political Science

POL S 101 Introduction to Politics (5) I&S
Political problems that affect our lives and shape the world around us. Offered: AWSpS.

POL S 201 Introduction to Political Theory (5) I&S
Philosophical bases of politics and political activity. Provides an introduction to the study of politics by the reading of a few books in political philosophy. Organized around several key political concepts, such as liberty, equality, justice, authority, rights, and citizenship. Offered: AWSpS.

POL S 202 Introduction to American Politics (5) I&S
Institutions and politics in the American political system. Ways of thinking about how significant problems, crises, and conflicts of American society are resolved politically. Offered: AWSpS.

POL S 203 Introduction to International Relations (5) I&S
The world community, its politics, and government. Offered: AWSpS.

POL S 204 Introduction to Comparative Politics (5) I&S
Political systems in a comparative framework. Traditional and contemporary approaches to the study of governments and societies in different countries. Offered: WSp.

POL S 205 Political Science as a Social Science (5) I&S, QSR
Methodological perspectives of the various social science disciplines: commonalities and differences in assumptions, values, and paradigms. Current issues from the multiple perspective of social sciences; limits of the social sciences in resolving key social issues. Offered: W.

POL S 212 Philosophy of Feminism (5) I&S
Philosophical analysis of the concepts and assumptions central to feminism. Theoretical positions within the feminist movement; view of the ideal society, goals and strategies of the movement, intersections of the sex-gender system with other systems of oppression. Offered: jointly with PHIL 206/WOMEN 206.

POL S 213 The Korean Peninsula and World Politics (5) I&S
Introduces Korean politics, economics, society, and international relations. Overviews the development in politics, economy, and society since the late nineteenth century. Addresses the evolution of Korea in the international society by comparing Korea, Japan, and China. Offered: jointly with SISEA 213.

POL S 246 African American Politics (5) I&S
P. Rivers Survey of African Americans within the U.S. socio-political processes. Studies African Americans within a post-civil rights context where there is debate about race’s centrality to an African American politics. Recommended: either AES 150, AFRAM 201, or POL S 202. Offered: jointly with AFRAM 246.

POL S 249 Introduction to Labor Studies (5) I&S
Conceptual and theoretical issues in the study of labor and work. Role of labor in national and international politics. Formation of labor movements, historical and contemporary role of labor in the modern world. Offered: jointly with HIST 249/SOC 266.

POL S 270 Introduction to Political Economy (5) I&S
Political economy as a tool for understanding and evaluating the political world. Combines theory, methods, and insights derived from economics and political science and applies them to a range of substantive issues.

POL S 273 The Concept of Political Power (5) I&S
How to understand and explain relationships of power. Readings from Marxism, Weberian sociology, anarchism, classical political philosophy, and contemporary political science. May also include works of fiction.

POL S 281 Introduction to American Political Culture (5) I&S
Introduction to the methods and theories used in the analysis of American culture. Emphasizes an interdisciplinary approach to American literature, including history, politics, anthropology, and mass media. Offered: jointly with ENGL 251.

POL S 299 Special Topics in Political Science (2-5, max. 10) I&S
Examines a different subject or problem of current interest with the discipline.

POL S 301 Special Topics in Political Theory (5, max. 10) I&S
Selected contemporary political issues. Political principles as reflected in concrete political problems. Topics might include: women’s rights, market exchange, national health care, affirmative action, environmental protection, privacy, human rights, and redistribution of property. Recommended: POL S 101, POL S 201, POL S 202, POL S 203, POL S 204, or POL S 205.

POL S 303 Public Policy Formation in the United States (5) I&S
Policy decision making with emphasis on how issues arise, the way they become part of the policy agenda of the executive and the legislature, how these institutions organize to handle policy issues, and the roles of the legislature, the executive, and the bureaucracy. Public policy literature and familiarization with key aspects of policy decision making at the national, state, and local levels.

POL S 304 The Press and Politics in the United States (5) I&S
Journalists’ role in elections and public policy. Relationship between news coverage and political campaigns. Study and analysis of local political newswriting, reporting, and response by local and state political figures. Extensive off-campus experience included. Offered: jointly with COM 304.

POL S 305 The Politics of Mass Communication in America (5) I&S
Role of mass audiences in politics from the standpoint of the communication strategies used to shape their political involvement. Topics include: social structure and political participation, political propaganda and persuasion, the political uses of public opinion, and the mass media and politics. Offered: jointly with COM 305.

POL S 306 Media, Society and Political Identity I&S (5)
Explores how society and culture are both represented in and shaped by communication technologies and media content. Media include film, advertising, news, entertainment media, telephone, talk shows, and the Internet. Explores how media represent and affect individual identity, values, and political engagement. Offered: jointly with COM 306.

POL S 307 Religion and World Politics (5) I&S
Gill Explores the intersection of religion and politics in various regions of the world, including the U.S., Europe, Middle East, Latin America, and other regions. Presents a historical perspective on religion alongside contemporary issues in religion, politics, and church-state relations. Offered: jointly with RELIG 307.

POL S 308 The Western Tradition of Political Thought, Ancient and Medieval (5) I&S
Origin and evolution of major political concepts from ancient Greece to the medieval period, from Thales through Aquinas.

POL S 309 The Western Tradition of Political Thought, Pre-Modern (5) I&S
Continuation of 308, treating materials from the fifteenth through eighteenth centuries. Machiavelli through Rousseau.

POL S 310 The Western Tradition of Political Thought, Modern (5) I&S
Continuation of 308 and 309, focusing on material from the eighteenth through twentieth centuries, from Rousseau through Lenin.

POL S 311 Individual and the State (5) I&S
Individualism and communitarian critiques. Political and ethical implications of both. Nature of the state, liberty, responsibility, cooperation. Important individualist and collectivist literature, dealing with market institutions and citizen politics, critically assessed.

POL S 313 Women in Politics (5) I&S
Theoretical, historical, and empirical studies of women’s participation in political and social movements. Women’s diverse efforts to improve their political, social, and economic status. Policy issues of particular concern to women. Women’s political experiences in household, local, regional, national, and international arenas Offered: jointly with WOMEN 313.

POL S 315 Black Identities and Political Power (5) I&S
P. Rivers Related the deployment of political power within institutions to shifting racial identities. Shows how racial identities both reflect and inflect relations of domination and resistance within and between cultures in the black diaspora. Prerequisite: either AES 150, AFRAM 150, AFRAM 201, or POL S 201. Offered: jointly with AFRAM 315.

POL S 316 African-American Political and Social Thought (5) I&S
Race relations in U.S. politics as defined by the struggle of African Americans for economic, political, and social equality. Studies of African-American political and social thought; expands and clarifies our understanding of the strengths and weaknesses of American democratic ideals.

POL S 317 The Politics of Race and Ethnicity in the United States (5) I&S
Introduction to the history and development of racial hierarchy, focusing on how race and ethnicity shape political institutions (e.g., the Constitution, political parties, voting systems). Examination of political relationships between Whites, African Americans, Latinos, and Asian Americans. Case studies of minority representation and other regions. Presents a historical perspective on religion alongside contemporary issues in religion, politics, and church-state relations. Offered: jointly with LSJ 331.

POL S 318 American Political Thought I (5) I&S
Major thinkers and themes in American political and cultural development from Puritan origins to the Civil War.
POL S 319 American Political Thought II (5) I&S Major thinkers and themes in American political and cultural development from the Civil War to the present.

POL S 321 American Foreign Policy (5) I&S Constitutional framework; major factors in formulation and execution of policy; policies as modified by recent developments; the principal policymakers-President, Congress, political parties, pressure groups, and public opinion.

POL S 322 International Political Economy of Latin America (5) I&S Exploration of politics underlying Latin America's economic development. Topics covered include import-substituting industrialization, mercantilism, the debt crisis, neoliberalism, market integration, and poverty. Review of major theoretical perspectives such as modernization theory, dependency, and the new political economy. Offered: jointly with SISLA 322.

POL S 324 Europe in World Politics (5) I&S Independent and coordinated efforts of Britain, France, and West Germany to adapt to the post-World War II global system. Creation and development of the Atlantic Alliance. Relations with postcommunist states. Decolonization and the evolution of relations with the Third World. The movement for European integration. Recommended: POL S 203.

POL S 325 The Arab-Israeli Conflict (5) I&S The politics of conflicting ideologies: Zionism and Arab nationalism; formation of the state of Israel; development of Palestinian nationalism; Arab-Israeli wars. Re-emergence of Palestinian activism; domestic sources of foreign policy; the role of the superpowers.

POL S 326 Scandinavia in World Affairs (5) I&S Introduction to the foreign relations of Scandinavia with a focus on Nordic security, international economic pressures, and global conflict resolution. Survey of the national settings for international involvements and highlights the dilemmas for industrial societies exposed to the pressure of interdependence. Offered: jointly with SCAND 326.

POL S 327 Women's Rights as Human Rights (5) I&S Women's rights in comparative perspective, focusing on varying settings that alter the meaning and practical application. Domestic level: areas including abortion politics to trafficking in women. International level: areas including equality claims before European supranational judicial bodies, rape as war crime in international law. Offered: jointly with LSJ 327.

POL S 328 International Organizations (5) I&S Explores historical, theoretical, and empirical aspects of the United Nations, its specialized agencies, and other international organizations, both governmental and nongovernmental. Recommended: POL S 203.

POL S 329 Global Communication (5) I&S Introduction to the history, purpose, channels, content, technologies, policy, and regulation of international communications systems. Issues covered include disparities in media development between post-industrial and developing nations, imbalances in international news and information flow, and the emergence of global communications. Offered: jointly with COM 322.

POL S 330 Communications in International Relations (5) I&S Looks at communications in relations between international groups and states. Examines the range of functions and roles communication media play in international affairs, global issues, and intergroup relations. Also examines the strategic use of communications by various groups. Offered: jointly with COM 321.

POL S 331 Government and Politics in the Middle East and North Africa (5) I&S Breakdown of traditional society and the problems of building modern political systems.

POL S 337 Collective Violence and the State (5) I&S Comparative study of collective violence in modern states with emphasis on riots and pogroms. Readings include case materials drawn from Russian pogroms of the nineteenth and twentieth centuries, Hindu-Muslim riots in modern India, and race riots in the United States and Great Britain. Offered: jointly with SIS 337.

POL S 340 Government and Politics of South Asia (5) I&S Comparison of problems of national integration and political development in India, Pakistan, and Ceylon. Offered: jointly with SISSE 340.

POL S 342 Government and Politics of Latin America (5) I&S Analysis of the political dynamics of change in Latin America comparing various national approaches to the political problems of modernization, economic development, and social change. Offered: jointly with SISLA 342.

POL S 343 Politics and Change in Southeast Asia (5) I&S Government and politics in the countries of Southeast Asia, with attention given to the nature of the social and economic environments that condition them. Offered: jointly with SISSE 343.

POL S 346 Governments of Western Europe (5) I&S Modern government and politics of Great Britain, France, Germany, and Italy.

POL S 350 Government and Interest Groups in the United States (5) I&S Agrarian, labor, professional, business, and ethnic interest in politics; impact on representative institutions and governmental processes.

POL S 351 The American Democracy (5) I&S Democratic theory; constitutional theory; the Presidency; Congress; the Supreme Court; civil rights and civil liberties. Designed for nonmajors.

POL S 352 American Political Parties (5) I&S Theories of American parties, campaigns and voting behavior; party leadership; political socialization and participation.

POL S 354 Elections and Voting in the United States (5) I&S Electoral institutions and processes of the United States: the idea and practice of elections, the electoral system, individual voting behavior, collective voting behavior, and the impact of elections on policy.

POL S 355 The American Presidency (5) I&S The American presidency; its evolution, its occupants, and its place within the American system. Topics include presidential character, war, elections, Watergate, the economy, and the Constitution.

POL S 356 Society and Politics (5) I&S Focus on the causes of political change in democratic countries, including public opinion, social movements, interest group activity, and party organization. Offered: jointly with SOC 356.

POL S 357 Minority Representation and the Voting Rights Act (5) I&S Explores whether and how African-Americans and Latinos are able to organize effectively and press their demands on the political system. Focuses on minority political behavior, the effect of these groups at the polls, the responsiveness of elected officials, and legal or constitutional obstacles affecting these phenomena.

POL S 360 Introduction to United States Constitutional Law (5) I&S Growth and development of the United States Constitution as reflected in decisions of the Supreme Court; political, social, and economic effects. Offered: jointly with LSJ 360.

POL S 361 United States Courts and Civil Liberty (5) I&S Cases and literature bearing on protection of constitutionally guaranteed private rights, with particular reference to the period since 1937. Offered: jointly with LSJ 361.

POL S 363 Law in Society (5) I&S Inquiry into how law matters in social practice. Examines general theories of law, the workings of legal institutions, and the character of legally constituted practices and relationships in diverse terrains of social life. Offered: jointly with LSJ 363.

POL S 365 Lawyers in American Politics (5) I&S Influence of lawyers on American politics. Official and unofficial political roles, lawyers as lobbyists, as legislators, in the bureaucracy, politics of the American Bar Association. Includes study of legal education, professional values, and avenues of political access.

POL S 367 Comparative Law and Courts (5) I&S Introduction to comparative judicial politics, focusing on the relationship between law and politics in cross-national perspective, as well as on the functioning of supranational and international legal entities in the international system. Offered: jointly with LSJ 367.

POL S 382 State Government (5) I&S Focus on the structures, processes, and policy outputs of state governments in the United States.

POL S 383 Environmental Politics and Policy in the United States (5) I&S Interrelation between technological and environmental change and policy formation. Consideration of political behavior related to these phenomena and the capacity of urban public organizations to predict change and to formulate policies that can take future states into account.
POL S 384 Global Environmental Politics (5) I&S Examines the globalization of environmental problems, including climate change, ozone depletion, and loss of biodiversity, as well as the globalization of political responses to these problems within the framework of globalization as set of interlinked economic, technological, cultural and political processes. Offered: jointly with ENVIR 384.

POL S 396 Honors Seminar (5, max. 15) I&S Intensive studies in various aspects of political science. Open only to participants in the departmental honors program.

POL S 401 Advanced Special Topics in Political Theory (5, max. 15) I&S Topics can include, but are not limited to, analytical theory pertaining to justice, exploitation, and freedom; revolution and social changes; collective choice and action; sexuality and politics; critical theory; Marxist theory; post-structuralism. Content varies. Recommended: POL S 201.

POL S 403 Advanced Special Topics in International Relations (5, max. 10) I&S Examination of contemporary developments in the field of international relations. Content varies according to the nature of developments and research interests of the instructor.

POL S 404 Topics in Public Policy (3-5, max. 6) I&S Examines selected issues of importance in all areas of public policy. Focus on in-depth analysis of vital public policy issues and the integration of economic, political, and administrative perspectives on them. Offered: jointly with PB AF 499.

POL S 405 American Politics Seminar (5, max. 10) I&S Intensive reading and research in selected problems or fields of political analysis.

POL S 406 Marxian Political Economy (5) I&S Explores the relationship between social classes, the state, and political power in advanced capitalist societies. Investigates this relationship primarily by means of the tools of Marxian political economy and, in the process, evaluates these tools. Emphasis on theoretical perspectives, although the reading list has a few empirical applications as well. Recommended: POL S 201.

POL S 407 International Conflict (5) I&S Examines different theoretical explanations for the causes of war, including the role of international, state, organizational, and individual factors; additional topics vary with instructor. May include the development of warfare, deterring weapons of mass destruction, terrorism, intelligence, and the ethics of warfare.

POL S 409 Undergraduate Seminar in Political Economy (5, max. 10) I&S Seminar in political economy with focus on Marxian and public choice approaches to political economy. Explores the questions raised by each approach, the assumption(s) and testability of hypotheses, and applies these approaches to a number of problems in political economy. Recommended: ECON 300; POL S 270. Offered: jointly with ECON 409.

POL S 410 Technology, Politics, and the State (5) I&S Relationships between politics, technological change, and development of multinational corporations. Considers whether the relations between political and economic systems of industrial societies have been fundamentally altered by the increased importance and interdependence of government, experts, and new technological possibilities for intervention in social life.

POL S 411 Theories of the State (5) I&S Topics may include origins and development of the state; arguments about the necessity, desirability, and proper role of the state; the nature and operation of modern states and the international state system; the legitimacy of modern state power.

POL S 412 Democratic Theory (5) I&S Explores the concept of democracy and theoretical models purporting to describe its central features: majority rule, participation, and deliberation. Themes also include: representative vs. direct democracy; the rights of minorities; the relationship between democracy and other political theories such as liberalism, socialism, and conservatism. Prerequisite: POL S 201.

POL S 413 Contemporary Political Theory (5) I&S Analysis of political theorists, exploring contemporary theories of humanity and society that form the basis for differing political ideas.

POL S 414 Politics and Culture (5) I&S How people interpret and shape the political world around them through the use of such cultural resources as language, symbol, myth, and ritual. The various uses of these cultural elements establish the place of the individual in society, influence the perception of political events, and create opportunities for individual and mass political responses.

POL S 415 Women’s Rights in an Integrated Europe (5) I&S Examines the transformation in women’s rights politics within the European community from the late 1950s through the present. Focuses on the legal rules and bodies that govern not only these policy domains, but also their evolution and impacts. Offered: jointly with LSJ 428.

POL S 416 Economic Theory as Applied to the Political System (5) I&S Explanation and evaluation of the political system, using elementary economics theory. Topics include alternative voting rules, the political effectiveness of various types of groups, causes and consequences of logging, and bureaucratic organizations. Prerequisite: ECON 300. Offered: jointly with ECON 452.

POL S 418 Japanese Trade Politics (5) I&S Survey of Japan’s foreign trade diplomacy. Examines evolution of Japan’s trade patterns in exports and foreign direct investment with key partners. Covers institutional and legal frameworks of Japan’s trade relations, such as bilateral fora, regional options including free trade agreements, and multilateral venues such as the WTO. Offered: jointly with SISEA 486.

POL S 419 United States-China Relations (5) I&S Surveys the history of United States-China relations and examines the evolution of bilateral relations, particularly since 1949. Focus on the period since 1972 and the major issues as they have evolved since that time, including trade, human rights, security, and Taiwan. Offered: jointly with SISEA 459.

POL S 420 Soviet and Russian Foreign Policy (5) I&S Historiographical, historical, and strategic components of Soviet foreign policy; Gorbachev’s “new thinking” and the collapse of the USSR; redefining post-Soviet “Russia”; Russian military and security policy; Russia and the West; Russian relations with the Newly-Independent States.

POL S 421 Relations Among Communist and Post-Communist States (5) I&S Major disputes and types of relationships among different communist states; international effects of the communist collapse; comparative dynamics of state-building, market reform, and democratic transition; international integration and domestic politics in the former Soviet bloc; ethnic conflict and the problem of state boundaries; redefining security in the post-communist milieu.

POL S 422 International Environmental Politics Seminar (5) I&S Study of the practical and theoretical challenges associated with global ecological interdependence. Examination of international treaties and institutions, state, and nonstate actors with an emphasis on the emerging concept of sustainability.

POL S 423 International Law (5) I&S Origin and present status of efforts to make rules of conduct for sovereign states; simulation of a treaty-drafting conference, with students playing roles of legal advisers to foreign governments.

POL S 424 International Relations of Japan (5) I&S Comprehensive examination of Japan’s international relations. Covers issues such as trade, security, environment, aid, and human rights. Investigates Japan’s participation in international organizations, including the UN, World Bank, IMF, and WTO. Examines Japan’s relations with the United States, the European Union, Asia, Latin America, Africa, and other regions. Offered: jointly with SISEA 437.

POL S 425 War and Deterrence (5) I&S Seminar addresses the strengths and weaknesses of deterrence theory and then applies it to a variety of international security issues. Topics may include deterring the use of nuclear, chemical, and biological weapons, the use of brute force when deterrence fails, and the role for humanitarian intervention.

POL S 426 World Politics (5) I&S The nation-state system and its alternatives, world distributions of preferences and power, structure of international authority, historical world societies and their politics. Offered: jointly with SIS 426.

POL S 427 International Political Economy (5) I&S Examines major theoretical problems, substantive issues, and school of thought in international political economy (IPE), including issues of trade, production, and finance. Preparation for critical analysis of dilemmas entailed in establishing and maintaining an instrumentally effective and ethically acceptable IPE system.

POL S 429 Political Parties in Japan and East Asia (5) I&S Focus on political parties in Japan. Combines theoretical readings on political parties with intensive study of Japanese political parties. Recommended: either SISEA 242, SISEA 423, SISEA 440, or SISEA 442. Offered: jointly with SISEA 436.

POL S 430 Civil-Military Relations in Democracies (5) I&S E. Kier Explores issues of
civil-military relations in the United States including debates about the garrison state hypothesis; military advice on the use of force; the civil-military “gap”; and issues of race, gender, and sexual orientation in the military.

POL S 431 International Relations in the Middle East (5) I&S Study of domestic sources of foreign policy in the Middle East; politics of oil; the East-West rivalry in the arena; and conflict and collaboration among the local powers.

POL S 432 Political Islam and Islamic Fundamentalism (5) I&S Study of resurgence, since mid-1970s of political Islam and what has come to be called Islamic fundamentalism, especially in the Middle East. Topics include the nature and variety of political Islam today, causes and implications of the current resurgence, and comparison with previous resurgences. Offered: jointly with SIS 406.

POL S 433 International Relations in Southeast Asia (5) I&S Analysis of the problems affecting relations among the countries of Southeast Asia.

POL S 434 International Relations of South Asia (5) I&S Interrelationships of domestic, interstate, and extraregional forces and their effects upon the resolution or expansion of interstate conflicts in South Asia. Offered: jointly with SIS 434.

POL S 436 Ethnic Politics and Nationalism in Multi-Ethnic Societies (5) I&S Provides a broad theoretical base, both descriptive and analytical, for the comparative study of ethnicity and nationalism. Examples drawn from ethnic movements in different societies. Some previous exposure either to introductory courses in political science or to courses in ethnicity in other departments is desirable. Offered: jointly with SIS 436.

POL S 438 Politics in France (5) I&S Study of contemporary France. Structures of government in the Fifth Republic; nature of French voting behavior and evolution of the bipolarized political party system; behavior of political interest groups; training of France’s administrative elite and functioning of the state bureaucracy; dynamics of policy-making.

POL S 439 Politics of Divided Korea (5) I&S Governments, politics, and economy of South and North Korea, the inter-Korea relations, and the two Koreas’ relationship with the major powers — especially the United States — with emphasis on the post-cold war period. Offered: jointly with SISEA 439.

POL S 440 European Fascism (5) I&S Analysis of fascism as revolutionary movement and type of political system in post-World War I Europe; Hitler’s Third Reich, Mussolini’s Italy, and Vichy France. Consideration of dynamics of resistance, policies that produced Holocaust, and questions raised at trials of fascist leaders in Nuremberg and elsewhere.

POL S 441 Government and Politics of Russia (5) I&S Ideological and historical bases of Soviet politics; Leninism; Stalinism; Gorbachev’s perestroika and the collapse of the USSR; the role of Yeltsin; problems of Russian state-building, market reform, and democratic transition; political parties and civil society; the relationship between the center and the regions; the problem of Russian national identity.

POL S 442 Government and Politics of China (5) I&S Post-1949 government and politics, with emphasis on problems of political change in modern China. Offered: jointly with SISEA 449.

POL S 443 Comparative Political Societies (5) I&S Analyses of modern and premodern types of stable political society; special attention to contemporary representative democracy.

POL S 444 Revolutionary Regimes (5) I&S Analysis of the several types of political regimes concerned with effecting fundamental social change; emphasis on the twentieth century.

POL S 446 Peasants in Politics (5) I&S Interdisciplinary study of peasants, with special attention to questions of rural transformation. Peasant involvement in an increasingly interdependent world. Rebellion and revolution, impact of the international market, agricultural development. Offered: jointly with SIS 444.

POL S 447 Comparative Politics Seminar (5, max. 10) I&S Selected comparative political problems, political institutions, processes, and issues in comparative perspective. Strongly recommended: POL S 204.

POL S 448 Politics of the European Union (5) I&S Examines the origins, structures, and political dynamics of the European Union. Attention given to theories of integration, to relations between the European Union and member states, and to the role of the European Union in world politics.

POL S 449 Politics of Developing Areas (5) I&S Comparative study of problems of national integration and political development in the new states of Asia and Africa.

POL S 451 Communication Technology and Politics (5) I&S Employs some core concepts of political communication and theories of democracy to examine the emerging role of information and communication technologies in candidate and issue campaigning; online voting; protest and advocacy movements; law-making and electronic governance in the United States and internationally. Offered: jointly with COM 407.

POL S 452 Mass Media and Public Opinion (5) I&S Examines the foundations of the idea of public opinion in a democratic environment and the role of mass communication in the organization, implementation, and control of that opinion. Considers these relationships from the perspectives of societal elites, media, and citizens. Offered: jointly with COM 414.

POL S 453 The State Legislature (5) I&S Study of American state legislatures, with special reference to Washington State Legislature. Student must spend several Fridays in Olympia when the legislature is in session. Those desiring a more extensive involvement with the legislature should enroll in the public internship.

POL S 455 Political Deliberation (5) I&S Exploration of philosophical and empirical writings on political deliberation in small groups, campaigns, and other public settings. Contemporary deliberative theory. Participation in face-to-face discussions on current issues. Recommended: either COM 273 or COM 373. Offered jointly with COM 417.

POL S 457 Topics in Labor Research (5, max. 10) I&S Analysis of the post-World War II decline of national labor movements and strategies employed to reverse this trend. Requires a major research project on organizing, bargaining, or another question in labor studies. Prerequisite: either POL S 249, HIS 249, or SOC 266. Offered: jointly with HIST 457.

POL S 460 Political Economy of the European Union (5) I&S Historical foundation of the European Economic Community; major phases of its development; theoretical explanations for European integration.

POL S 461 Mass Media Law (5) I&S Survey of laws and regulations that affect the print and broadcast media. Includes material on First Amendment, libel, invasion of privacy, freedom of information, copyright, obscenity, advertising and broadcast regulation, and matters relating to press coverage of the judicial system. Offered: jointly with COM 440.

POL S 462 The Supreme Court in American Politics (5) I&S Introductory public law course that examines the interplay of constitutional law and American politics with particular attention to the role of the Supreme Court in the formulation and implementation of public policy in such matters as criminal-law enforcement, civil rights, political expression, and economic regulation.

POL S 463 Political Analysis of United States Social Programs (5) I&S Social problems in the United States and policy responses. National policies concerning poverty, health, welfare, manpower, and the Social Security system. Examination of subgovernments that cluster around each policy area.

POL S 464 The Politics of American Criminal Justice (5) I&S Political forces and value choices associated with the enforcement of
criminal law. Distribution of resources among participants in the criminal justice system (e.g., police, attorneys, defendants, and judges). Understanding and evaluation of the interaction of criminal justice processes with the political system.

POL S 465 Law and Public Policy in the United States (5) I&S Relationship between law and public policy, with particular attention to problems of social, economic, and political change. Considers legal and constitutional processes as they relate to such problems of public policy as race relations, the environment, and the economy.

POL S 467 Comparative Law in Society (5) I&S Legal systems around the world as they actually work in their respective political, social, and economic contexts. Emergence and development of European legal systems, legal customs at variance with those of Europe, problems of legal processes in the modern state.

POL S 468 Comparative Media Systems (5) I&S Provides students an understanding of policies that shape national communication processes and systems. Uses comparative analysis to identify both similarities and differences among media structures of nations at different levels of development. Primary emphasis on broadcast media. Offered: jointly with COM 420/SIS 419.

POL S 469 Law, Development, and Transition in East Asia (5) I&S Examines the role of law and the courts in economic and political change in the developing world. Topics include variations in legal traditions and institutions, economic development, property rights, dispute resolution, democratization, and human rights. Empirical materials focus on East Asia. Offered: jointly with LSI 469/SIS 469.

POL S 470 Public Bureaucracies in the American Political Order (5) I&S Growth, power, and roles of governmental bureaucracies in America: conflict and conformity with American political thought, other political institutions, and the public.

POL S 473 Decision-Making in Politics (5) I&S Process of decision-making in politics at elite and mass levels, comparison of approaches based on the comprehensive rationality of decision makers with approaches based on limitations on the cognitive capacities of decision makers. Applications to real decision-making situations.

POL S 476 Strategy in Politics (5) I&S Explores the problem of finding fair methods for making social decisions, and examines alternative methods of social choice. Emphasis on the importance of agenda control for outcomes, and the implications of theories of social choice for common interpretations of concepts such as democracy and the general will. Recommended: POL S 101 or POL S 202; POL S 481.

POL S 479 Contemporary Central Asian Politics (5) I&S Radnitz examines the politics of contemporary post-Soviet Central Asia. Analyzes issues relevant to the region in comparative perspective, including democratization, religion, terrorism, civil society, economic reform, ethnic identity, and international influences. Uses theory to shed light on current policy debates. Offered: jointly with SISRE 479.

POL S 481 Big City Politics (5) I&S Contempora- rary big city politics, focusing on Seattle and the largest twenty-five cities. Social, economic, and political trends that have shaped characteristics of large American cities. Distribution and use of economic and political power among parties and groups. Future of large cities and politics of change.

POL S 488 Honors Senior Thesis (5-) I&S Students individually arrange for independent study of selected topics under the direction of a faculty member. Research paper is student’s senior thesis. Students meet periodically as a group to discuss research in progress. Recommended: 15 credits POL S 398.

POL S 489 Honors Senior Thesis (-5) I&S Students individually arrange for independent study of selected topics under the direction of a faculty member. Research paper is student’s senior thesis. Students meet periodically as a group to discuss research in progress. Recommended: 15 credits POL S 398.

POL S 490 Foundations of Political Analysis (5) I&S Fundamental issues pertaining to research in political science: “logics of inquiry,” problems of concept formation, and development of research methods. Positivist, postpositivist, and other arguments about the nature of scientific knowledge.

POL S 495 Study Abroad-Political Science (3-5, max. 15) I&S For participants in the study abroad program. Specific course content determined by assigned faculty member and announced in study abroad bulletin. Politics, political culture, and institutions related to their national setting.

POL S 496 Undergraduate Internship (5, max. 15) Students serving in approved internships.

POL S 497 Political Internship in State Government (5, max. 20) Students serving in approved internship program with state government agencies.

POL S 498 The Washington Center Internship (15) Full-time academic internship with the Washington Center in Washington, DC includes internship activities, academic seminar, assemblies, and related activities. Credits/no credit only. Recommended: POL S 202; 45 UW credits.

POL S 499 Individual Conference and Research (2-5, max. 20) Intensive study with faculty supervision. No more than one registration in 499 under same instructor.

POL S 500 Political Research Design and Analysis (5) I&S Major quantitative methods of empirical research in political science. Primary emphasis on research design, data collection, data analysis, and use of computers.

POL S 501 Advanced Political Research Design and Analysis (5) I&S Third methods course in political research. Testing theories with empirical evidence. Examines current topics in research methods and statistical analysis in political science. Content varies according to recent developments in the field and with interests of instructor. Offered: jointly with CS/SS 501.

POL S 502 Qualitative Research Methods (5) I&S Introduction to qualitative methods in political science, emphasizing practical experience with techniques. Readings and exercises cover research design, multiple methods, varieties of qualitative data measurement and validation, participant observation, interviewing, and content analysis. Research decision-making issues include analytical strategies, presentation of data, ethics, epistemology, and theory-building.

POL S 505 Comparative Politics (5) Core course. Modern theories, approaches, and methods in the study of comparative politics.

POL S 509 Political Theory—Core (5, max. 10) Introduction to central themes in political theory and the works of major political theorists, past and present.

POL S 510 Maximum Likelihood Methods for the Social Sciences (5) Adolph, Wardy: Introduces maximum likelihood, a more general method for modeling social phenomena than linear regression. Topics include discrete, time series, and spatial data, model interpretation, and fitting. Prerequisite: POL S/C/SS 501; POL S/CSS/SS 503. Offered: jointly with CS/SS 510; W.

POL S 511 Seminar in Ethical and Political Theory (5) Ethical writings of major political philosophers. Coherent themes arising from these works and assessment of their impact on concepts of politics.

POL S 513 Issues in Feminist Theory (5, max. 10) Contemporary issues in feminist theory as they affect studies of women, politics, and society. Content varies according to recent developments in the field and the research interests of the instructor.

POL S 514 Selected Topics in Political Theory (5, max. 15) Selected topics, historical and conceptual, national, regional, and universal. Prerequisite: permission of instructor.

POL S 515 Political Theory Research Seminar (5) Survey of paradigmatic research approaches in political theory through the exploration of a
POL S 516 Special Topics in American Political Thought (3/5) Special topics or themes in the development of American political culture.

POL S 517 Marxism and Critical Theory (5) Works of Marx and Engels as well as selected works of twentieth-century Marxist and critical theorists. Themes such as Marx's method, twentieth-century interpretations of Marx, and relationship of twentieth-century theorists to their eighteenth- and nineteenth-century forebears.

POL S 519 Modern Scandinavian Politics (5) Analyzes the political, economic, and historical development of Sweden, Norway, Denmark, Iceland, and Finland from World War II to the present. Readings focus on domestic and foreign policies that distinguish these countries from other advanced industrial societies. Offered: jointly with SCAND 519.

POL S 520 Seminar on Russian Foreign Policy (3) Selected topics in the development and objectives of the foreign policy of the Russian Federation. Prerequisite: permission of instructor.

POL S 521 International Relations I: Theory and Method (5) Part one of the core course in the field of international relations. Reviews contemporary theory, research, and methodology in the study of world politics.

POL S 522 International Political Economy (5) Theories of international political economy. Focuses on the emergence and development of the modern world system, the transition from feudalism to capitalism, and the institution of the nation-state system. Examines the political economy of trade, investment, and the international division of labor from a variety of theoretical perspectives. Prerequisite: POL S 521.

POL S 523 World System Analysis (4) Evolution of the world system. Historical-structural approaches to world politics: neo-realism; long cycles; world economy. Prerequisite: POL S 521.

POL S 524 International Security (5) Kier, Mercer Introduces some of the major debates concerning the use of force in international politics. Covers traditional issues in international security such as alliances and the causes of war, as well as some of the new and important questions, such as explaining war outcomes and war termination.

POL S 525 International Law — Policy (5) Inputs of international law into the decisional process in foreign policy. Effect of policy on law. Relevant roles of individuals and institutions in routine and crisis situations.

POL S 526 The Security of China (1) Bachman Examines how the Chinese state conceptualizes its national security interests and how it pursues strategies designed to achieve those interests. Topics include use of force, military modernization, civil-military relations, and defense industrialization. Offered: jointly with SISEA 526.

POL S 527 Special Topics in International Relations Research (5, max. 15) Examination of current topics in the theory and practice of world politics. Content varies according to recent developments in the field and research interests of the instructor.

POL S 528 Advanced International Relations Theory (5) Covers advanced works in international relations theory, e.g., realism, neorealism, game theory, and theories of cooperation and conflict. Includes some classic works (Thucydides, Hobbes, H. E. Carr) to show continuity of debates in the present. Modern theories of war, conflict, cooperation, and international institutions also explored. Prerequisite: POL S 521.

POL S 529 Problems of American Foreign Policy (3) Critical analysis of the historical foundations and contemporary problems of foreign-policy making, with attention given to selected foreign-policy decisions. Prerequisite: POL S 321 or permission of instructor.

POL S 530 Transatlantic Relations: The United States and Europe in World Politics (5) Fulfills required component of “American Module” of Transatlantic Studies program. Addresses political dynamics of relations between United States and Europe from American republic’s founding to post-Cold War era. Limited to students in Transatlantic Studies program.

POL S 532 The Chinese Political System (5) Examination of key approaches, interpretations, and secondary literature in the study of contemporary Chinese politics. Prerequisite: permission of instructor. Offered: jointly with SISEA 532.

POL S 533 Seminar on Contemporary Chinese Politics (5) Research on selected problems in contemporary Chinese politics. Prerequisite: POL S 532 or permission of instructor. Offered: jointly with SISEA 533.

POL S 534 International Affairs (3) Provides a broad understanding of international issues and United States policy. Students explore US foreign policy and theories of major international actors in international trade, security, and strategic cooperation, refugee policy, conflict resolution, development assistance, and the environment. Offered: jointly with PB AF 530/ SIS 534.

POL S 535 International Relations of Modern China (5) Foreign policy of the People’s Republic of China: historical antecedents; domestic and international systemic determinants; and Chinese policies toward major states, regions, and issues. Prerequisite: a course on contemporary Chinese politics or history, or permission of instructor. Offered: jointly with SISEA 535.

POL S 536 Ethnic Politics and Nationality Formation (3) Seminar on analysis and theoretical understanding of two interrelated processes: ethnic group persistence and change over time; and the transformation of ethnic groups into politically self-conscious and influential nationalities. The readings and discussions deal with these two processes in the contexts of both developing societies and advanced industrial societies.

POL S 537 Approaches to East European Politics (3-5) Selected concepts and methodolo-
gies useful for the analysis of politics and social structure in the socialist countries of east-central and southeastern Europe. Prerequisite: permission of instructor. Offered: jointly with SISRE 504; alternate years.

POL S 538 Government and Politics in the Middle East and North Africa (5) Political change in the area within the context of comparative politics; breakdown of traditional political systems; new range of choice expressed in competitive governmental and nongovernmental institutionalization of change; and problems of international relations and regional conflict and integration.

POL S 539 International Relations of Northeast Asia (5) Comprehensive survey of contemporary international relations of Northeast Asia with emphasis on Russia, Japan, China, and the United States. Multidisciplinary approach placing contemporary problems in historical context, drawing on modern social science theories. Connections between defense and economics are examined. Prerequisite: permission of instructor. Offered: jointly with SIS 551.

POL S 540 Problems in South Asian Politics (3) Research problems in contemporary Indian politics.

POL S 541 Institutions and Institutional Change in the Soviet Union, Russia, and the Newly Independent States (5) Critical appraisal of the principal theories and research methods dealing with the development of the Soviet state from 1917-1991 and the formation of the newly-independent states after the Soviet collapse. Prerequisite: permission of instructor.

POL S 542 Seminar: State and Society (5) Examines the mutually conditioning relationship between states and the societies they seek to govern. Studies states as large, complex organizations and their interactions with society on different levels. Shows that interactions on any level affect the nature of the state on other levels as well. Offered: jointly with SIS 542.

POL S 543 Latin American Politics (5) Theories of authoritarianism, corporatism, democratization, and revolution in Latin America. Explores role of international and domestic economic factors shaping politics and the affect of politics on economic development. Examines elite behavior and grassroots social movements.

POL S 544 Problems in Comparative Government (5, max. 15) Selected problems in the comparative analysis of political institutions, organizations, and systems.

POL S 547 Politics of Reform (5) Examines cases of reform in democratic political systems, e.g., Roosevelt’s New Deal, Allende’s Chilean “revolution,” Mitterand’s socialist experiment in France, and the Thatcher government in Britain.

POL S 548 Comparative Political Parties (5) Role of political parties in the modern state. Similarities and differences in origins and development of political parties and functions they perform, both in established democracies and in developing countries.

POL S 549 Problems of Political Development (5) Concepts of development and modernization, with particular attention to their political dimensions and their application to various historical and contemporary cases.
POL S 550 American Politics — Core (5) Core course in American government and politics. Systematic survey of the literature; focuses on national politics. Prerequisite: undergraduate courses in American government and politics.

POL S 551 Political Communication (5) Surveys classic works and new directions in political communication, including functionalist, structuralist, constructivist, network, and comparative approaches, reflecting a range of theoretical and methodological perspectives. Prerequisite: undergraduate courses in political communication. Prerequisite: COM 551.

POL S 552 Special Topics in Political Communication (5, max. 10) Examination of current topics in the theory and practice of political communication. Prerequisite: POL S 551.

POL S 553 Public Opinion (5) Selected problems in opinion formation, characteristics, and role of public opinion in policy-making process. Prerequisite: POL S 551.

POL S 554 Legislative Politics (5) Selected problems in legislative processes and leadership, state and national. Prerequisite: POL S 551.

POL S 555 American Politics Topics (5, max. 10) Examination of current topics in the theory and practice of American politics. Content varies according to recent developments in the field and research interests of the instructor. Prerequisite: POL S 551.

POL S 556 American Political Development (5) Examines the historical and theoretical development of American political development. Topics include: the American Founding; the Constitutional Convention; the early and mid-nineteenth century; the Progressive Era; the New Deal and Deal Era; the Cold War; the political economy and the New Right. Prerequisite: POL S 551.

POL S 557 United States Party System (5) Studies the institutional and behavioral foundations of political parties in the United States, emphasizing key historical patterns of party system development and the major theoretical approaches to the study of the American parties and party politics. Prerequisite: POL S 551.

POL S 558 Political Deliberation (5) VLPA I&S Gastil Exploration of deliberative theories of democracy and research on political discussion in campaigns, face-to-face meetings, on-line forums, and informal conversations. Presents different uses and understandings of deliberation and its role in democratic governance. Recommended: COM 577, POL S 551/COM 551. Offered jointly with COM 555.

POL S 559 Special Topics in Political Methodology (5, max. 10) Examination of current topics on the theory and practice of political methodology. Course content varies according to recent developments in the field and the research interests of the instructor. Prerequisite: POL S 551.

POL S 561 Law and Politics (5) Points and levels at which law and politics intersect. What is distinctive about legal forms; how these legal forms influence, and are influenced by, politics. Conceptions of law, courts and public policy, law and bureaucracy, civil and criminal justice, and the legal profession. Prerequisite: POL S 551.

POL S 562 Law, Politics, and Social Control (5) Explores works of social scientists and lawyers regarding these competing conceptions of social control: as the seamy side of law — reinforcing equitable patterns of domination and disciplining deviants; as law embodying society’s basic values, articulating minimum rules for harmonious social interaction. Prerequisite: POL S 551.

POL S 563 American Politics Forum (5) Explores the major issues in American politics. Focuses on the legitimacy and capacity of the Supreme Court to intervene in American politics and public policy. Prerequisite: POL S 551.

POL S 564 Law and the Politics of Social Change (5) Explores the ways that law figures into the politics of social struggle and reform activity. Focuses on political actors and institutions involved in the development of social change. Prerequisite: POL S 551.

POL S 565 Special Topics in Public Law (5, max. 10) Examination of current topics on the theory and practice of public law. Content varies according to recent developments in the field and the research interests of the instructor. Prerequisite: POL S 551.

POL S 566 Comparative Law and Politics (5) Study of the interaction between law and politics at the macro and micro levels. Topics include: macro-level topics such as citizenship, law, and social movements; micro-level issues such as the role of the judiciary in the political process. Prerequisite: POL S 551.

POL S 567 Discourse and the Politics of Resistance (5) Examines the role of language and discourse in politics. Focuses on the ways that political discourse is created, used, and perceived. Prerequisite: POL S 551.

POL S 568 Political Culture (5) Examines the political culture of the United States. The course focuses on the political culture of the United States, including its historical development, current state, and future prospects. Prerequisite: POL S 551.

POL S 569 Public Policy Processes (5) Examines the processes by which public policies are developed and implemented. Focuses on the role of political actors and institutions in shaping public policy. Prerequisite: POL S 551.

POL S 570 The American Racial State (5) Explores the mutually constitutive relationship between race and American political institutions, including the role of race in shaping race relations, race-making and nation-making, and the political consequences of race. Prerequisite: POL S 551.

POL S 571 American National Institutions (5) Answers the question, “Do institutions matter?” by focusing on the political consequences of institutional structures. Prerequisite: POL S 551.

POL S 572 Administrative and Executive Leadership (5) Nature of executive leadership in the public sector, the function of leadership in implementing, making, and changing policy. Leadership styles, the relation of leadership to its constituencies and communities. Prerequisite: POL S 551.

POL S 573 Topics in Public Policy (5, max. 10) Specialized research topics with a policy process or related theoretical content. Prerequisite: POL S 551.

POL S 574 Environmental Regulation Policy (5) Theoretical inquiry directed to questions of collective action and political dynamics of, and social movement groups. Case studies include labor, civil rights, women’s, environmental, and other movements in the twentieth century. Prerequisite: POL S 551.

POL S 575 Public Policy Processes (5) Examines the processes by which public policies are developed and implemented. Focuses on the role of political actors and institutions in shaping public policy. Prerequisite: POL S 551.

POL S 576 Political Culture (5) Examines the political culture of the United States. The course focuses on the political culture of the United States, including its historical development, current state, and future prospects. Prerequisite: POL S 551.

POL S 577 The Politics of Social Movements (5) Theoretical inquiry directed to questions of collective action and political dynamics of social movement groups. Case studies include labor, civil rights, women’s, environmental, and other movements in the twentieth century. Prerequisite: POL S 551.

POL S 578 Health Politics and Policy (5) Examines the political economy of health care and the role of the state in the provision of health care. Prerequisite: POL S 551.

POL S 579 Contemporary Central Asian Politics (5) Examines the political economy of contemporary post-Soviet Central Asia. Prerequisite: POL S 551.

POL S 580 Institutional Analysis (5) Studies the political economy of contemporary post-Soviet Central Asia. Prerequisite: POL S 551.

POL S 581 Economic Theories of Politics (5) Explores the political economy of contemporary post-Soviet Central Asia. Prerequisite: POL S 551.

POL S 582 Comparative Political Economy (5) Examines the political economy of contemporary post-Soviet Central Asia. Prerequisite: POL S 551.

POL S 583 Economic Theories of Politics (5) Explores the political economy of contemporary post-Soviet Central Asia. Prerequisite: POL S 551.

POL S 584 Comparative Political Economy (5) Explores the political economy of contemporary post-Soviet Central Asia. Prerequisite: POL S 551.
**POL S 588 Special Topics in Comparative Political Economy (5, max. 10)** Examination of current topics in the theory and practice of comparative political economy. Content varies according to recent developments in the field and current interests of the instructor.

**POL S 589 Special Topics in Political Economy (3-5, max. 10)** Evaluating research in political economy as well as developing research problems. Topics vary with instructor and with current problems in the literature. Prerequisite: POL S 406, POL S 416, ECON 400, and permission of instructor.

**POL S 590 Seminar in Political Behavior (5, max. 10)** Analysis of behavioral research in selected fields of political science.

**POL S 591 Supervised Research and Writing for Graduate Students (5)** Supervised research and writing for graduate students. Credit/no credit only.

**POL S 592 Independent Writing I (1-5, max. 5)** Supervised research and writing for graduate students. Credit/no credit only.

**POL S 593 Theories of Decision Making (5)** Examines the process of making political decisions using models of such theoretical processes as preference formation, learning, heuristics, noncooperative games, collective action, agenda manipulation, and coalition formation. Examination of competing notions of political rationality and irrationality and criteria for their evaluation. Strategies for design of decision research.

**POL S 594 Political Communication Research Practicum: Community, Communication, and Civic Engagement (5)** Overview of the research process, including literature review, hypothesis generation, data gathering, empirical analysis, and writing for publication. Topics vary with instructor, but generally address questions of how communication affects democracy and citizen engagement in national or international contexts. Offered: jointly with COM 556.

**POL S 595 College Teaching of Political Science (1)**

**POL S 597 Directed Readings (1-10, max. 10)** Intensive reading in the literatures of political science, directed by the chair of the doctoral supervisory committee. Credit/no credit only.

**POL S 598 Independent Writing I (1-5, max. 5)** Supervised research and writing for graduate students completing the MA essay of distinction.

**POL S 599 Independent Writing II (3-5)** Supervised research and writing for graduate students completing the Ph.D. essay of distinction.

**POL S 600 Independent Study or Research (1)**

**POL S 800 Doctoral Dissertation (1)**

---

**Law, Societies, and Justice**

**LSJ 299 Special Topics in Law, Societies, and Justice (2-5, max. 10)** Examines a different subject or problem of current interest within the discipline.

**LSJ 301 Internship (1-5, max. 5)** Participation in an approved internship. Credit/no credit only.

**LSJ 310 Research in Law, Societies, and Justice (1-5, max. 15)** Supervised introductory individual and/or seminar based research on some aspect of society and justice.
LSJ 400 Senior Seminar (5, max. 10) For students in their final year as Law, Societies, and Justice majors. Incorporates material learned in student’s primary field of specialization. Includes independent research, oral presentations, and the completion of a substantial paper.

LSJ 401 Field Experience in Law, Societies, and Justice (5) Participant observation in a public or private agency relevant to the study of law, justice, human rights, or court systems.

LSJ 410 Human Rights in Latin America (5) I&S Human rights in Latin America, focusing on twentieth century dictatorships and current regional events and their implications for human rights. Cannot be taken for credit if GIS 174 or SISLA 120 previously taken. Offered: jointly with SIS 470. Prerequisite: either ANTH 323, LSJ 320, LSJ 321, POL S 366, PHIL 338, SIS 200, or SIS 201.

LSJ 420 The Politics of Rights (5) M. McCann Examines rights in practical and social interaction, rights in conflict, relations of rights practices to official state policies, disputing practices, interest formation, and identifies construction at individual and group levels. Explores how rights practices figure into the constellation of contested power relations within modern societies.

LSJ 428 Women’s Rights in an Integrated Europe (5) I&S Examines the transformation in women’s rights policy within the European community from the late 1950s through the present. Focuses on the legal rules and bodies that govern not only these policy domains, but also their evolution and impacts. Offered: jointly with POL S 415.

LSJ 433 Disability Law, Policy, and the Community (5) Seminar addressing legal rights of disabled people, history of disability policy in the United States, and the role of community activism and other forces in policy development and systems change. Introduction to the existing social service systems that affect disabled people. Recommended: LSJ 332. Offered: jointly with CHID 433.

LSJ 434 Civil and Human Rights Law for Disabled People (5) I&S Designed for students interested in expanding their knowledge of civil and human rights for disabled people. Examines the American perspective (ADA) as well as various international models including the United Nations’ International Human Rights treaties as they relate to disabled people. Recommended: LSJ 332. Offered: jointly with CHID 434.

LSJ 440 Criminal Law and Procedure (5) I&S Substantive and procedural criminal law for lay persons; analysis of the philosophy behind the law, with an emphasis on due process in adult and juvenile courts; case-analysis teaching technique.

LSJ 444 Ethics in Law and Justice (5) I&S Applies ethical theories, research, and practice to the law and justice system, with the goals of: (1) analyzing the moral dimensions of criminal law, (2) studying ethical issues in law enforcement, adjudications, and corrections, and (3) examining a variety of controversial ethical issues associated with the justice system.

LSJ 469 Law, Development, and Transition in East Asia (5) I&S Examines the role of law and the courts in economic and political change in the developing world. Topics include variations in legal traditions and institutions, economic development, property rights, dispute resolution, democratization, and human rights. Empirical materials focus on East Asia. Offered: jointly with POL S 469/SISEA 469.

LSJ 470 Evaluation Research in Criminal Justice (5) I&S Social science research methods relevant to criminal justice evaluation and operations research. Ethical considerations, formulation of goals and objectives, problem definition and research design, sources and methods of data collection, descriptive statistics, data interpretation, and utilities of research results.

LSJ 474 Geography and the Law (5) I&S Herbert Examines the relationship between geography, law, and socio-legal analysis; reviews significant instances where law and geography intersect, such as the regulation of public space, the regulation of borders and mobility, and disputes over property and land use. Offered: jointly with GEOG 470.

LSJ 476 Miscarriages of Justice (5) I&S Examines legal and social factors that shape criminal case outcomes, analyzing how one type of miscarriage of justice — wrongful conviction — occurs. How can cases of wrongful conviction be explained? Why are some people, against whom there is only weak evidence, convicted—and sometimes even executed? Offered: jointly with SOC 476.

LSJ 480 The Police (5) I&S Conceptual and empirical issues concerning multifaceted and changing roles of the American police.

LSJ 485 Introduction to Organized and White Collar Crime (3) I&S Overview of organized and white collar crime. Exposure to definitional problems, distinctive characteristics, potential areas of overlap, and barriers to more effective social control. Addresses impediments resulting from inadequate conceptualizations, legal and operational difficulties in pursuing offenders, and effects of corruption and discretion in the justice system.

LSJ 488 Honors Thesis (5) I&S First of a two-course hyphenated sequence. To be completed with LSJ 489.

LSJ 489 Honors Thesis (-1,5, max. 5) I&S Thesis research honors option. Second of a two-course hyphenated sequence. To be completed with LSJ 488.

LSJ 490 Special Topics in Law, Societies, and Justice (1-5, max. 15) I&S Examination of areas within core law, ethics, and socio-legal topics. Content varies.

LSJ 495 Study Abroad-Law, Societies, and Justice (1-5, max. 15) I&S Comparative studies abroad of legal institutions, rights, and justice as related to national settings. Specific course content determined by faculty member.

LSJ 499 Readings in Law, Societies, and Justice (1-5, max. 10) Individual readings in law, societies, and justice.

LSJ 501 Law and Society Studies (5) Beckett, Herbert, McCann Provides a broad overview of, and introduction to, the interdisciplinary field of Law and Society Studies, including the historical development of law and society studies and an overview of its main concerns and questions.

Psychology

PSYCH 101 Introduction to Psychology (5) I&S King, McDermott, Osterhout, Passer Surveys major areas of psychological science. Core topics include human social behavior, personality, psychological disorders and treatment, learning, memory, human development, biological influences, and research methods. Related topics may include sensation, perception, states of consciousness, thinking, intelligence, language, motivation, emotion, stress and health, cross-cultural psychology, and applied psychology. Offered: AW/SP/S.

PSYCH 200 Comparative Animal Behavior (5) NW Barash, Beecher, O'Donnell Research methods and findings of comparative animal behavior, their importance to an understanding of human behavior; rationale for study of behavioral differences/similarities between animal species, behavior viewed as part of adaptation of each species to its natural habitat. Not open for credit to students who have taken PSYCH 300.

PSYCH 201 Human Performance Enhancement (4) I&S Smith, Small Applications of psychological theories, research, and intervention strategies to performance enhancement in variety of life settings. Self-regulation models and techniques; stress and emotional control; attention control and concentration; mental
PSYCH 202 Biopsychology (5) KW Kim, Mizumori, Olavarria Examines the biological basis of behavior, the nervous system, how it works to control behavior and sense the world, and what happens when it malfunctions. Topics include learning and memory, development, sex, drugs, sleep, the senses, emotions, and mental disorders. Prerequisite: PSYCH 101. Offered: AWSpS.

PSYCH 203 Introduction to Personality and Individual Differences (4) IS Maratt, Smith Overview of the major theories, research findings, and applications in the scientific study of personality. Covers research methods and approaches to measuring personality variables. Not open for credit to students who have taken PSYCH 303. Prerequisite: PSYCH 101.

PSYCH 206 Human Development (5) IS Theoretical perspectives and research methods in child development with an overview of historical and current works. Includes prenatal and biological development, the development of cognitive, linguistic, and social and emotional abilities. Not open for credit to students who have taken PSYCH 306. Prerequisite: PSYCH 101.

PSYCH 207 Psychology of Peace (5) IS Barash Examination of the psychological aspects of peace in the modern world. Topics include theories of individual aggressiveness and violence, leadership personalities, conflict resolution, decision making, nuclear psychology, images of the enemy, and psychological opportunities and obstacles to the establishment of a peaceful society.

PSYCH 209 Fundamentals of Psychological Research (5) IS Kerr, Leu, Little, Passer Psychological research methodology and techniques. Topics include the logic of hypothesis testing, experimental design, research strategies and techniques, fundamentals of scientific writing, search and evaluation of research literature in psychology, and ethical issues in psychological research. Required for all psychology majors. Prerequisite: 2.0 in PSYCH 101. Offered: AWSpS.

PSYCH 210 Human Sexuality (5) IS McDermott Broad survey of biological, psychological, and social determinants of human sexuality and sexual behavior. Topics include cultural diversity, sexual development (physical and psychological), sexual health, reproduction (pregnancy, contraception, abortion), development of sex, gender and orientation, adult sexual bonding, sexual abuse and assault.

PSYCH 245 Introduction to Social Psychology (5) IS Brown Overview of major findings of social psychology, emphasizing the relevance for understanding the social behaviors of individuals and groups of individuals and their relationship to social context. Not open for credit to students who have taken PSYCH 345. Prerequisite: PSYCH 101.

PSYCH 250 Racism and Minority Groups (5) IS Barrett Overview of the causes, contexts, and consequences of racism and its effects upon minority groups and society. Emphasis on cultural history, political and socioeconomic structures that contribute to racism. Examination of current issues in race relations and cultural pluralism in U. S. and selected international topics.

PSYCH 257 Psychology of Gender (5) IS Kenney Major psychological theories of gender role development; biological and environmental influences that determine and maintain gender differences in behavior; roles in children and adults; topics include aggression, cognitive abilities, achievement motivation, affiliation. Recommended: either PSYCH 101 or WOMEN 200. Offered: jointly with WOMEN 257.

PSYCH 260 Psychosocial Aspects of Nuclear War (3) IS Barash Introduction to basic issues of nuclear war, including its effects, weaponry, and history of the arms race. Primary focus on the psychologic underpinnings of deterrence, relations between nations, and the personal and social forces operative in the arms race and peace movements.

PSYCH 300 Animal Personality (5) IS Brown Overview of major perspectives, scientific issues, applications, and research findings in the area of personality. Direct exposure to scientific literature, writing assignments, and research-based class experiences prepare students for advanced work in personality, social, abnormal, and developmental psychology. Prerequisite: PSYCH 101; PSYCH 202; PSYCH 209; either PSYCH 315 or PSYCH 317.

PSYCH 303 Psychology (5) IS & Brown Introduction to basic issues in psychological research. Topics include learning and memory, development, sex, drugs, sleep, the senses, emotions, and mental disorders. Prerequisite: PSYCH 101.

PSYCH 305 Abnormal Psychology (5) IS & Brown An overview of major categories of psychopathology, including description and classification, theoretical models, and recent research on etiology and treatment. Prerequisite: 2.0 in PSYCH 202; 2.0 in PSYCH 209.

PSYCH 306 Developmental Psychology (5) IS & Beren, Repacholi, Sommerville Overview of past and present theoretical and research-based approaches to biological, cognitive, and social development from the prenatal period to early adolescence. Prerequisite: 2.0 in PSYCH 202; 2.0 in PSYCH 209.

PSYCH 315 Understanding Statistics in Psychology (5) IS & Flaherty, Little, Statistics for psychological research. Elementary probability theory, hypothesis testing, and estimation. Satisfies the statistics requirement for majors registered in the Psychology Bachelor of Arts degree program. Prerequisite: 2.0 in PSYCH 209; 2.0 in either MATH 111, MATH 112, MATH 120, MATH 124, or MATH 144. Offered: AWSpS.

PSYCH 317 Introduction to Probability and Statistics for Psychology (5) IS & Little, G. Loftus Probability theory as a model of scientific inference. Probabilistic variables and experimental outcomes, conditional probability, binomial and related distributions, experiments as samples, statistics and sampling distributions, the normal distribution, confidence intervals, problems of estimation from experiments. Prerequisite: 2.5 in PSYCH 209; 2.0 in either MATH 124, MATH 134, or MATH 144. Offered: AW.

PSYCH 322 Introduction to Drugs and Behavior (3) IS Diaz Basic concepts of drug action emphasizing the behavioral consequences of the intake of a variety of drugs. Prerequisite: either PSYCH 202 or PSYCH 222.

PSYCH 330 Laboratory in Animal Behavior (5) IS & Breznitz Experience with a variety of animal species and experimental procedures and instrumentation. Prerequisite: either 2.0 in PSYCH 213, 2.0 in PSYCH 217, 2.0 in PSYCH 315, or 2.0 in PSYCH 209.

PSYCH 331 Laboratory in Human Performance (5) IS & Joslyn Selected aspects of human cognition, perception, and performance. Prerequisite: 2.0 in PSYCH 209; either 2.0 in PSYCH 213, 2.0 in PSYCH 217, 2.0 in PSYCH 315, or 2.0 in PSYCH 317.

PSYCH 332 Laboratory in Animal Learning (5) IS & Buck Selected aspects of animal learning emphasizing behavioral experiments with the rat. Prerequisite: either 2.0 in PSYCH 213, 2.0 in PSYCH 217, 2.0 in PSYCH 315, or 2.0 in PSYCH 317.

PSYCH 333 Sensory and Perceptual Processes (5) IS & Boynton, Covey, Fine An overview of each of the major senses with emphasis on the structure and function of sensory systems and the relation of the underlying biology to perceptual processes and behavior. Prerequisite: 2.0 in PSYCH 202; 2.0 in PSYCH 209.

PSYCH 335 Human Factors Psychology (4) IS & Kerr Consideration of human performance factors in the design of tools/equipment, tasks/jobs, and work and living environments. Emphasis on the importance of human perception, memory, attention, and motor control for understanding ways to optimize the relationship between people and technology. Prerequisite: 2.0 in PSYCH 202; 2.0 in PSYCH 209.

PSYCH 345 Social Psychology (5) IS & Brown, Kaiser The scientific study of how people’s thought, feeling, and action influence, and are influenced by, other people. Prerequisite: 2.0 in either PSYCH 202 or PSYCH 209.

PSYCH 347 Psychology of Language I (5) IS &LVA Osterhout Introduction to the study of language, including language structure, speech perception, language acquisition, psychological processes underlying comprehension and production of language, the relation between brain and language, and the question of the species-specificity of human language. Prerequisite: either 2.0 in PSYCH 209, 2.0 in LING 200, or LING 201. Offered: jointly with LING 347.
PSYCH 350 Honors Research Seminar in Psychology (2-, max. 4) Basok Presentations by professors and advanced students concerning the rationale, methodology, and progress of their research projects; assistance with research projects; preparation of junior paper. Four credits of 350 required for all junior honors and senior graduate candidates in conjunction with 498 and 499. Offered: AWSp.

PSYCH 355 Cognitive Psychology (5) I&S Joslyn, Miyamoto Current theory and research in perception, attention, memory and learning, attitudes, thinking and decision making, and language. For the student who wishes a survey or who intends additional work in any of the above courses. Recommended: 2.0 in PSYCH 202; 2.0 in PSYCH 209.

PSYCH 357 Psychobiology of Women (5) NW Kenney Physiological and psychological aspects of women's lives; determinants of biological sex; physiological and psychological events of puberty; menopause; sexuality; contraception, pregnancy, childbirth, and lactation; role of culture in determining psychological response to physiological events. Recommended: PSYCH/ WOMEN 257. Offered: jointly with WOMEN 357.

PSYCH 361 Laboratory in Social Psychology (3) I&S Cheryan Methodology of laboratory and field research on social behavior; data analysis and report writing; group research projects. Prerequisite: 2.0 in PSYCH 209; a 2.0 in either PSYCH 315, or PSYCH 317; 2.0 in either PSYCH 245 or PSYCH 345.

PSYCH 361 Laboratory in Social Psychology (5) I&S Cheryan Methodology of laboratory and field research on social behavior; data analysis and report writing; research projects. Prerequisite: 2.0 in PSYCH 209; a 2.0 in either PSYCH 315, or PSYCH 317; 2.0 in either PSYCH 245 or PSYCH 345.

PSYCH 380 Cross-Cultural Competence (4) I&S Barrett Facilitates development of multicultural competence; focuses on mental health/social service needs of ethnic and linguistic minorities, and developing personal/ interpersonal skills to reduce barriers, enhance effective service provision to cross cultural groups, sexual minorities and disabled people. Prerequisite: PSYCH 250; either PSYCH 305 or PSYCH 306.

PSYCH 399 Foreign Study (3-5, max. 10) Upper division psychology courses for which there are no direct University of Washington equivalents taken through the University of Washington Foreign Study Program.

PSYCH 400 Learning (5) I&S/NW Experimental research and basic theories primarily in animal learning. Prerequisite: 2.0 in PSYCH 202.

PSYCH 402 Infant Behavior and Development (3/5) I&S Metzloff Psychological development in the first two years of life. Basic and advanced techniques for assessing psychological development in infancy. Classic theories of human infancy and examination of a wide range of research experiments about infant behavior and development. Prerequisite: 2.0 in either PSYCH 206, PSYCH 306 or PSYCH 414.

PSYCH 403 Motivation (5) I&S/NW Theory and research on reinforcement, punishment, frustration, preference, instinctual mechanisms, and other factors controlling animal behavior. Prerequisite: 2.0 in PSYCH 202.

PSYCH 406 Insect Behavior (4) NW O'Donnell Explores complexity and diversity of behavior in insects and related invertebrate animals. Overview of important lineages of insects and major behavioral syndromes. Examines how insect behavior both constrains behavior and provides evolutionary opportunities. Prerequisite: either 2.0 in BIOL 180, 3.5 in PSYCH 200, or 2.0 in PSYCH 300. Offered: jointly with BIOL 406.

PSYCH 407 History of Psychology (5) I&S Historical and theoretical background of the basic assumptions of modern psychology, including such doctrines as behaviorism, determinism, and associationism and the scientists who developed them. Prerequisite: 2.0 in PSYCH 209.

PSYCH 408 Mechanisms of Animal Behavior (4) NW Beecher, Brenowitz, Sisneros Comparative exploration of physiological and perceptual mechanisms that control behaviors necessary for survival and reproduction in animals. Model systems discussed. Emphasis in communication, mate choice, escape behavior, learning and memory, orientation, biological rhythms, foraging behavior. Prerequisite: either 2.0 in BIOL 180, or 3.5 in PSYCH 200, or 2.0 in PSYCH 300. Offered: jointly with BIOL 408.

PSYCH 409 Sociobiology (5) NW Rohwer Biological bases of social behavior, emphasizing evolution as a paradigm. Emphasizes how to think like evolutionary biologist, especially with regard to interest conflict. Topics are individual versus group selection, kin selection, altruism, mating systems, sexual conflict, alternate reproductive strategies, and parent/offspring conflict. Prerequisite: either 3.5 in PSYCH 200, 2.0 in PSYCH 300, 2.0 in BIOL 162 or 2.0 in BIOL 180. Offered: jointly with BIOL 409.

PSYCH 410 Child and Adolescent Behavior Disorders (5) I&S Barrett Introduction to psychopathology in children and adolescents, and an overview of principal modes of intervention. Particular focus for students interested in advanced work in clinical psychology, social work, or special education. Prerequisite: 2.0 in PSYCH 305; either 2.0 in PSYCH 306 or 2.0 in PSYCH 202, 2.0 in both PSYCH 206 and 2.0 in PSYCH 209.

PSYCH 411 Perceptual Development (5) I&S/ NW Metzloff Origins and development of perception in human infancy. Object, face, and speech perception; cross-modal relations between touch, vision, audition. Prerequisite: 2.0 in either PSYCH 206, PSYCH 306, or PSYCH 414. Offered: jointly with PHSC 411.

PSYCH 413 Adolescent Development (5) I&S Provides an overview of physical, cognitive, psychosocial, and emotional development of adolescents with an emphasis on understanding the context in which young people grow up. Explores cultural, environmental, and social influences on development. Prerequisite: 2.0 in PSYCH 209; 2.0 in either PSYCH 315 or PSYCH 317.

PSYCH 414 Cognitive Development (5) I&S Sommerville Key theoretical and research approaches to cognitive development from infancy through adolescence. Sensorimotor development, language development, imitation, number concepts, logical reasoning, memory, cognition in adolescents, intelligence, and the role of biology, environment, and experience. Prerequisite: either 2.0 in PSYCH 306, or 2.0 in both PSYCH 206 and PSYCH 209.

PSYCH 415 Personality Development of the Child (5) I&S Repacholi Socialization theory and research, infant attachment and social relationships, development of aggressive and altruistic behaviors, sex-role development, moral development, parent and adult influences. Applied issues in social development and policy. Prerequisite: 2.0 in either PSYCH 206 or PSYCH 306; 2.0 in either PSYCH 315 or PSYCH 317.

PSYCH 416 Animal Communication (5) NW Beecher, Brenowitz, O'Donnell, Sisneros Evolution and mechanisms of animal communication and related processes of perception, thinking, and social behavior. Prerequisite: either 2.0 in BIOL 180, 3.5 in PSYCH 200, or 2.0 in PSYCH 300.

PSYCH 417 Human Behavior as a Natural Science (5) I&S/NW Lockard Evolution of human social behavior and the adaptive significance of communication systems from a sociobiological and anthropological perspective. Prerequisite: either PSYCH 200, PSYCH 300, BIO A 201, or BIOL 180.

PSYCH 418 Primates Social Behavior (5) NW Lockard Social behavior, ecology, and group structure of monkeys and apes from an evolutionary, sociobiological, and anthropological perspective. Prerequisite: either 3.5 in PSYCH 200, 2.0 in PSYCH 300, 2.0 in BIO A 201, 2.0 in BIOL 180, or 2.0 in both BIOL 202 and BIOL 203.

PSYCH 419 Behavioral Studies of Zoo Animals (5, max. 10) NW Observational studies of behavior of zoo animals to expand basic knowledge of animal behavior, conservation of endangered species, and research methodology with discussions and tours focusing on zoo philosophy and operations. Offered in cooperation with Woodland Park Zoo. Prerequisite: either 2.0 in BIOL 180, 3.5 in PSYCH 200, or 2.0 in PSYCH 300.

PSYCH 420 Drugs and Behavior (3) NW Diaz Animal and clinical research on the behavioral consequences of drug intake. Prerequisite: PSYCH 322.

PSYCH 421 Neural Basis of Behavior (5) NW Diaz Anatomical and physiological principles and resultant behavior involved in the integrative action of the nervous system. 431 recommended but not required to follow 421. Prerequisite: 2.0 in PSYCH 202.

PSYCH 423 Sensory Basis of Behavior (5) NW Olavarria Study of sensory mechanisms as a way to understand behavior. Basic properties of neurons, anatomy, and physiology of sensory systems, with some emphasis on the visual system. Prerequisite: 2.0 in either PSYCH 202 or PSYCH 333.

PSYCH 424 Vision and Its Physiological Basis (5) NW Behavioral neurobiology of human vision; color vision, acuity and spatial vision, light and dark adaptation, visual development. Correlation of visual functioning with known optical, biochemical, physiological, and anatomical substrates. Prerequisite: 2.0 in either PSYCH 333, NBIO 302, or PHIL 160. Offered: jointly with PBIO 424.
PSYCH 425 Surgical and Histological Techniques (5) NW Prerequisite in basic and advanced surgical and histological techniques used in psychophysiological experimentation. Prerequisite: PSYCH 421.

PSYCH 426 Neurobiology of Learning and Memory (4) NW Mizumori Theory and research on how animals learn and remember, including basic concepts of brain plasticity, how brain areas and neurons adapt to changes in experiences throughout the lifespan, and cellular and structural substrates of a "memory." Prerequisite: 2.0 in either PSYCH 222, PSYCH 322, PSYCH 333, PSYCH 421, PSYCH 422, or PSYCH 423.

PSYCH 427 Behavioral Endocrinology (5) NW The endocrine system and how its secretions influence and are influenced by behavior; relationships between the nervous and endocrine systems. Prerequisite: PSYCH 421.

PSYCH 428 Human Motor Control and Learning (3) NW Kerr Current theories and research in human motor performance and skill acquisition. Prerequisite: 2.0 in PSYCH 209; 2.0 in PSYCH 202.

PSYCH 429 Brain Anatomy for the Behavioral Scientist (1) NW Dzial Detailed review of the neuroanatomical features of the sheep brain with laboratory demonstrations. Prerequisite: PSYCH 421 which may be taken concurrently.

PSYCH 430 Development of Brain Connections (4) NW Olavarria Analysis of innate and environmental factors that play a role in the development of brain connections. Critical review of current literature on the various strategies used by neurons to find their appropriate targets. Prerequisite: 2.0 in either PSYCH 202, PSYCH 333, PSYCH 421, PSYCH 422, or PSYCH 423.

PSYCH 432 Visual Perception (4) I&S/NW Surveys current facts/theories about how our brains interpret the images formed by our eyes to create a presentation of the visual environment. Topics include 3-D vision; color, form, motion, and object perception; and visual illusions. Prerequisite: 2.0 in either PSYCH 202, PSYCH 333, or PSYCH 355.

PSYCH 433 Regulatory Behavior (4) NW Kenney Neural and endocrine mechanisms in the control of food and water intake and the regulation of body weight and fluid balance. Prerequisite: either PSYCH 421 or PSYCH 427.

PSYCH 435 Human Color Vision (5) I&S/NW Buck Discusses how color does not exist in the physical environment but is instead a creation of our brains. Explores perceptual, physiological, developmental, evolutionary, genetic, and cultural aspects of human color vision, including its role in language, culture, and art. Prerequisite: PSYCH 202; PSYCH 209.

PSYCH 436 Developmental Aspects of Sport Competition (4) I&S Smoll Biophysical and psychosocial influences of sport participation on growth and development of children and youth. Competition readiness, injuries, stress, aggression, roles and responsibilities of parents and coaches. Prerequisite: 2.0 in PSYCH 209.

PSYCH 437 Motor Development (4) NW Smoll Analysis of motor development from prenatal origins through adolescence with emphasis on relations between biophysical and psychosocial development of children and youth. Prerequisite: 2.0 in PSYCH 209.

PSYCH 438 Social Psychology of Sport (4) I&S Smith, Smoll Reciprocal effects of interpersonal and group influence processes, e.g., social facilitation, behavior modification, observational learning, individual versus group performance, group cohesion, leadership, aggression. Prerequisite: 2.0 in PSYCH 101; 2.0 in PSYCH 202; 2.0 in PSYCH 209.

PSYCH 441 Perceptual Processes (5) I&S/NW Theory and findings in perception with a focus on visual perception in humans. Discrimination and constancy for simple judgments, segregation and identification of visual objects, and specific areas of investigation such as reading and computer vision. Prerequisite: 2.0 in PSYCH 333.

PSYCH 443 Motivational Theories in Social Psychology (5) I&S Theories of motivation in social psychology. Emphasis on how motivation and cognition mutually influence each other to produce behavior. Explores such topics as persuasion, goal pursuit, self-regulation, achievement, and social comparison. Prerequisite: 2.0 in PSYCH 345.

PSYCH 445 Theories of Social Psychology (5) I&S J.D. Brown Evaluation of the major theories of human social behavior supported by the empirical literature; theories of social cognition and thought; major theories of social interaction, group processes, and social learning. Prerequisite: PSYCH 345.

PSYCH 446 Personality Assessment (3) I&S R. Smith Measurement of personality variables in personality research, social psychology, and clinical psychology. Theoretical conceptions underlying various clinical and experimental scales and an assessment of their construct validity and behavioral correlates. Prerequisite: 2.0 in PSYCH 303; 2.0 in PSYCH 315; 2.0 in PSYCH 317.

PSYCH 447 Psychology of Language II (4) I&S/LVPA Osterhold Psycholinguistic principles applied to linguistic development and organization; language in both its stimulus and response aspects. Prerequisite: 2.0 in either PSYCH 347, PSYCH 355, or LING 400. Offered: jointly with LING 447.

PSYCH 448 Seminar in Psychology (1-15, max. 15) Selected research topics of contemporary interest. Quarterly listings of specific offerings are available at departmental advisory office.

PSYCH 450 Honors Research Seminar in Psychology (2-, max. 4) Bassok Senior thesis research; preparation of senior thesis; oral presentation of research. Four credits of 450 required for all senior honors and distinction candidates in conjunction with 498 and 499. Offered: AWSp.

PSYCH 451 Health Psychology (5) I&S/NW Overview of the psychological and behavioral factors in health and disease. Includes research on both psychological causes and treatments. Topics include stress, risky behaviors, patient-provider interactions, pain, behavioral-medical treatments, and lifestyle interventions. Prerequisite: 2.0 in PSYCH 202; 2.0 in PSYCH 209; 2.0 in either PSYCH 303, or PSYCH 345.

PSYCH 452 Psychology of the Self-Concept (4) I&S J.D. Brown Examines psychological development and research on the role of the self-concept in regulating behavior. Topics include the development of the self-concept; self-awareness; and self-esteem maintenance. Prerequisite: 2.0 in either PSYCH 245 or PSYCH 345.

PSYCH 454 Personality and Social Influence (4) I&S Shoda Survey of various theories and research for analyzing person-situation interactions — how the qualities of persons and situations combine to generate thoughts, feelings, and behaviors of a person in a given social situation. Prerequisite: PSYCH 209; either PSYCH 203, PSYCH 245, PSYCH 303, or PSYCH 345.

PSYCH 456 Social and Moral Development (5) I&S/Kahn Theoretical approaches toward explaining children's social and moral development, including those that are nativist, sociobiological, behavioristic, psychoanalytic, and constructivist. Use of theory to investigate applied problems related to parenting, education, peer relationships, authoritative and household, culture, ecology, and technology. Prerequisite: either PSYCH 206 or PSYCH 306.

PSYCH 457 Language Development (5) I&S/ VLPA First-language acquisition and use by children. Emphasis on theoretical issues and research techniques. Prerequisite: 2.0 in either PSYCH 206, PSYCH 306, LING 200, or LING 400. Offered: jointly with BIOL 458.

PSYCH 458 Behavioral Genetics (4) NW O'Donnell Role of genetics in determining variation in human and animal behavior and in regulating behavioral development. Techniques for quantifying genetic variation, behavioral effects, and gene expression. Prerequisite: either 3.5 in PSYCH 200, 2.0 in PSYCH 300, or 2.0 in BIOL 161, or 2.0 in BIOL 180. Offered: jointly with BIOL 458.

PSYCH 460 Cognitive Neuroscience (4) NW Murray, Osterhout Discussion of neural systems underlying cognitive behavior with particular focus on breakdown of cognition following brain damage. Topics include object and space perception, language, voluntary movement, attention, and memory. Examination of contributions from related areas of neuroimaging, visual perception, linguistics, physiology, and neuroscience. Prerequisite: 2.0 in either PSYCH 333, PSYCH 355, OR PSYCH 421.

PSYCH 462 Human Memory (5) I&S Joslyn Research and theory in key areas of memory. Issues covered include information processing theory, the link between memory processes and their biological underpinnings, autobiographical memory, implicit memory, and the effect of emotion on memory. Prerequisite: 2.0 in PSYCH 209; recommended: PSYCH 355.

PSYCH 465 Intelligence (5) I&S Analysis of individual differences in cognition. Includes description/use of psychometric ("intelligence test") models, test scores/ relationship to academic and non-academic performance, information processing and biological models of intelligence (including genetic models). Discussion of male-female and demographic group differences in cognition. Prerequisite: either PSYCH 316 or PSYCH 317; PSYCH 355.

PSYCH 466 Psychology of Judgment and Decision Making (5) I&S Miyamoto Human information processing in judgment and decision
making, especially the interface between cognitive theories and normative and prescriptive theories of decision making. Prerequisite: 2.0 in either PSYCH 315 or PSYCH 317; either PSYCH 331, PSYCH 355, or PSYCH 361.

PSYCH 469 Psychology of Reasoning (4) I&S Bassok Cognitive processes in human learning, problem solving, deductive and inductive reasoning. Prerequisite: 2.0 in PSYCH 209; 2.0 in PSYCH 355.

PSYCH 470 Psychology and Music (5) I&S/ VLPA Covey Introduction to the scientific study of musical behavior. An overview of current topics in the psychology of music from the areas of musical perception and cognition, musical development, music therapy, musical performance, and composition. Includes psychoacoustical and neuropsychological foundations, research methods, and some basic material in music theory. Prerequisite: 2.0 in either PSYCH 202 or NBIO 302.

PSYCH 471 Applied Issues in Cognition (4-5, max. 10) I&S Joslyn Examines cognitive issues in applied settings, such as the workplace and education. Topics include such issues as attention, expertise, problem solving, decision-making, human error, automation, navigation, and individual differences. Prerequisite: 2.0 in PSYCH 209.

PSYCH 480 Ideas of Human Nature (5) I&S Barash Reviews various approaches to the nature of human nature, including ideas from ancient philosophy, theories of the soul, empiricism, idealism, conditioning, social construction, concepts of Freud, Marx, the existentialists, and neo-Darwinism. Prerequisite: PSYCH 101.

PSYCH 481 Seminar in Advanced Quantitative Methods (3) Little Examines the role of statistical methods in psychological research. Issues and controversies surrounding null hypothesis significance testing. Review of selected alternative statistical methods in psychology. Prerequisite: 2.0 in either PSYCH 315 or PSYCH 318.

PSYCH 482 Advanced Research Methods for Behavioral Psychology (4) QSR Greenwald, Shoda Develops skills of collecting and analyzing behavioral research data, communicating the results orally and in writing, and expressing perspectives on issues of scientific method and practice. Prerequisite: either PSYCH 315 or PSYCH 317; either PSYCH 330, PSYCH 331, PSYCH 332, or PSYCH 350. Offered: Sp.

PSYCH 485 Primate Conservation Biology and Behavior (5) NW Kyes Examines the principles and concepts of conservation biology as they apply to the nonhuman primates with special attention to theoretical advancements, conservation strategies, and management practices central to primate conservation. Prerequisite: either 3.5 in PSYCH 200 or 2.0 in PSYCH 300 or 2.0 in BIO A 201. .

PSYCH 488 Stress and Coping (4) I&S/NW Reviews research and theories concerning stress and its roles in behavior, personality, development, health, and interpersonal relationships, focusing on coping as a factor in the way people respond to stressful circumstances. Prerequisite: 2.0 in PSYCH 202; 2.0 in PSYCH 209.

PSYCH 489 Clinical Psychology (3) I&S Basic issues, methods, and research: professional issues, psychological assessment, and approaches to psychotherapy and behavioral change. Prerequisite: 2.0 in PSYCH 305.

PSYCH 490 Stress Management (3) I&S/NW Nature of stress. Physiological responses to stress and relaxation. Techniques of stress management with training in relaxation, biofeedback, meditation, cognitive restructuring, exercise, nutrition, interpersonal communication skills, and time management. Prerequisite: PSYCH 101.

PSYCH 494 Field Study in Animal Behavior (2-3, max. 9) Kyes Field experience in areas relating to animal behavior through participation in seminar discussion and field exercises and training at foreign and domestic field study sites.

PSYCH 496 Undergraduate Teaching Experience in Psychology (2-3, max. 6) Students are trained as assistants in quiz sections or as supplemental tutors for undergraduate psychology courses. Designed especially for those students planning graduate work or education certification. An overall maximum of 18 credits in 496, 497, 498, and 499 may apply toward a baccalaureate degree.

PSYCH 497 Undergraduate Fieldwork (2-5, max. 10) Individual consultation with faculty member and supervised practicum experience in a broad range of community settings and agencies dealing with psychological problems. An overall maximum of 18 credits in 496, 497, 498, and 499 may apply toward a baccalaureate degree.

PSYCH 498 Directed Reading in Psychology (1-3, max. 18) Readings in special interest areas under supervision of departmental faculty. Discussion of reading in conference with the instructor. An overall maximum of 18 credits in 496, 497, 498, and 499 may apply toward a baccalaureate degree.

PSYCH 499 Undergraduate Research (1-3, max. 18) Design and completion of individual research projects. An overall maximum of 18 credits in 496, 497, 498, and 499 may apply toward a baccalaureate degree.

PSYCH 500 Proseminar in Psychology (1, max. 10) Greenwald Presentations on professionally and practically useful topics by guest faculty presenters designed for first-year and second-year graduate students. Credit/no credit only. Prerequisite: graduate standing in Psychology, or permission of instructor.

PSYCH 502 Core Concepts in Animal Behavior (3) Barash, Beecher, O’Donnell, Sisneros Reading, reports, and discussion on animal behavior, with a focus on topics that lie at the interface of animal behavior, evolutionary science, neurobiology, and psychology. Include social organization, mating systems, foraging, learning, communication, and agonistic behavior. Prerequisite: Graduate standing in Psychology, or permission of instructor.

PSYCH 503 Core Concepts in Behavior Genetics (4) O’Donnell, Shoda Overview of current approaches to genetic analysis in Psychology. Role of genetics in behavioral variation, and in regulating behavioral development. Techniques for quantifying genetic variation, behavioral effects of genes, and patterns of gene expression. Genetic effects on major behavioral differences. Prerequisite: graduate standing in Psychology, or permission of instructor.

PSYCH 504 Core Concepts in Behavioral Neuroscience (3) Bernstein, Buck, Covey, Diaz, Kenney, Kim, Mizumori, Olavarria Historical and contemporary perspectives in behavioral neuroscience. Current methodologies and research strategies. May include sensory processing, genetics, behavioral neuroendocrinology, developmental neural plasticity, neurobiology of learning and memory, lifespan perspectives on behavioral neurobiology, and psychopharmacology. Prerequisite: graduate standing in Psychology, or permission of instructor.

PSYCH 506 Core Concepts in Cognitive Neuroscience (3) Murray, Osterhout Combines psychological models of information processing with research techniques in the biomedical sciences. Topics in vision, attention, memory, motor behavior, and language illustrate this integrative approach. Research methods include behavioral, single unit, lesion, and neuro-imaging techniques. Prerequisite: graduate standing in Psychology, or permission instructor.

PSYCH 507 Core Concepts in Cognitive Psychology (5) Bassok, Miyamoto Survey of the major topics in human cognition. Discussion of memory, concepts and categories, language, decision-making, and problem solving. Prerequisite: graduate standing in Psychology, or permission of instructor.

PSYCH 508 Core Concepts in Perception (3) G. Loftus Current topics in perception, psychophysics, sensory memory, pattern recognition, letter and word perception, and visual masking. Prerequisite: graduate standing in Psychology, or permission of instructor. Offered: Sp.

PSYCH 510 Core Concepts in Social Psychology (4) Shoda An overview of contemporary theories and research in social psychology, focusing on introducing graduate students to the field as practitioners of social psychological research. Prerequisite: graduate standing in Psychology, or permission of instructor.

PSYCH 511 Core Concepts in Personality (3) Shoda, R. Smith Review of personality research. Roles of cognitive, affective, motivational, and psychodynamic processes. Critical evaluation of current personality, its antecedents, and its influences over behavior. Attention to role of personality variables in social relationships. Prerequisite: graduate standing in Psychology, or permission of instructor.

PSYCH 513 Core Concepts in Biological Basis of Development (4) Bernstein Embryological, genetic, physiological, and evolutionary perspectives of human development; biological development in infancy; sensory development and its influence on the development of perception; primate models for human development. Prerequisite: graduate standing in Psychology, or permission of instructor.

PSYCH 514 Core Concepts in Early Cognitive and Linguistic Development (4) Melzoff, Sonneveld Origins and early development of thought and language. Piagetian theory and modern-day revisions. In depth examination of historical and philosophical bases for current empirical research. Prerequisite: graduate standing in Psychology or permission of instructor.
PSYCH 515 Core Concepts in Personality and Social Development (4) Theories and empirical literature in personality and social development throughout infancy, childhood. Prerequisite: graduate standing in Psychology, or permission of instructor.

PSYCH 517 Core Concepts in Systems of Psychotherapy (3) George Theory and research of major systems of psychotherapy, including the psychodynamic, behavioral, cognitive, and family systems approaches as an introduction to subsequent practice in clinical psychology. Required for all graduate students majoring in clinical psychology. Prerequisite: graduate standing in psychology, or permission of instructor. Offered: A.

PSYCH 518 Core Concepts in Behavior Disorders (5) Zoellner Major types of behavior disorders, with emphasis on clinical manifestations, relevant research, and theoretical perspectives. Required for all graduate students majoring in clinical psychology. Prerequisite: graduate standing in Psychology or permission of instructor. Offered: W.

PSYCH 522 Laboratory in Statistical Computation I (2) Miyamoto Techniques of computation using statistical software on personal computers. Organization of data files, transformations of variables, graphical representations of data, descriptive statistics, elementary inferential statistical analyses. Prerequisite: concurrent enrollment in PSYCH 524 or permission of instructor. Offered: A.

PSYCH 523 Laboratory in Statistical Computation II (2) Miyamoto Techniques of statistical computation using statistical software on personal computers and mainframe computers. Multiple regression, analysis of variance and covariance. Planned and post hoc comparisons and confidence intervals. Data analytic diagnostics for violations of regression assumptions. Prerequisite: PSYCH 522 and PSYCH 524, concurrent enrollment in PSYCH 525, or permission of instructor. Offered: W.

PSYCH 524 Introduction to Statistics and Data Analysis (4) Miyamoto Basic concepts of statistical theory and methods of data analysis. Emphasis on the integration of statistical theory, statistical computation, and psychological research methods. Required of all first-year graduate students in psychology. Prerequisite: concurrent enrollment in PSYCH 522 or permission of instructor. Offered: A.

PSYCH 525 Linear Models and Data Analysis (4) Analysis of data in the behavioral sciences. Required of all first-year graduate majors. Prerequisite: PSYCH 522, PSYCH 524; concurrent registration in PSYCH 523, or permission of instructor. Offered: W.

PSYCH 526 Multivariate Statistics (4) An introduction to statistical modeling; interactive data analyses; use of regression, ANOVA, logistic regression, and log-linear models in exploratory studies. Prerequisite: PSYCH 525.

PSYCH 527 Mathematical Modeling for Psychology and the Neurosciences (3) Introduces a collection of mathematical models increasingly important to research in psychology and neuroscience, including random walks, differential equations, linear systems theory, Fourier analysis, nonlinear systems, and neural modeling. Topics illustrated by examples from recent literature. Prerequisite: undergraduate statistics.

PSYCH 528 Practical Methods for Behavioral Research (4, max. 8) Greenwald, Shoda Examination of methodological, practical, and communication problems associated with research on human behavior. Topics include: selecting research problems, use of theory, types of validity, common sense about statistics, when to replicate, dealing with unpredicted results, strategies for presentation and publication. Offered: Sp.

PSYCH 529 Advanced Research Methods (5) Beauchaine Surveys advanced clinical research methods not covered in the required statistics sequence. Examples include structural equation modeling, hierarchical linear modeling, growth curve modeling, and taxometric analyses. Hands-on experience gained through weekly assignments using each method. Prerequisite: PSYCH 525.

PSYCH 530 Introduction to Latent Variables (4) Greenwald Techniques to assess effects of latent variables in presence of error in observed data. Provides experience with statistical tools for confirmatory structural equation modeling and testing of hypotheses concerning causal and other relations among latent variable. Prerequisite: PSYCH 515 or permission of instructor.

PSYCH 531 Research Methods in Clinical and Community Psychology (4) Lengua Addresses issues concerning the design and implementation of research in clinical and community psychology. Topics include validity; reliability; experimental, quasi-; and non-experimental designs; causal inference; interpretation of data; and research ethics. Provides students with tools to evaluate research, develop hypotheses, and design rigorous empirical studies. Offered: A.

PSYCH 532 Single Subject Design and Research (3) Kohlenberg Single subject designs (reversal, multiple baseline, changing criterion) and their application to clinical cases. Prerequisite: graduate major standing in clinical psychology or permission of instructor. Offered: W.

PSYCH 533 Scientific Writing in Psychology (5, max. 10) Addresses issues in scientific writing and publishing; laboratories assist with writing, and provide feedback on drafts of articles throughout the writing process. Students write a journal article to submit for publication. Other writing projects are also possible with instructor’s permission. Credited/no credit only.

PSYCH 536 Grant Preparation in Psychology (3,max. 6) Mizumori Prepare and submit an application for a major national fellowship. Joint registration in PSYCH 598 with faculty advisor is required. Credited/no credit only. Prerequisite: graduate standing in Psychology, and permission of instructor.

PSYCH 537 Teaching of Psychology (3) Passer Examines issues concerning the teaching of psychology, including educational goals, course development, instructional methods, T.A. - student and T.A.-faculty relations, grading, student diversity, and problem situations. Assignments are designed to enhance teachers' organizational, presentational, and problem-solving skills. Credited/no credit only. Prerequisite: graduate standing in the Department of Psychology.

PSYCH 538 Interactive Software for Psychological Research (4) Loftus Introduction to computing concepts and basic programming skills. Includes principles of programming, the MATLAB programming environment, and the psychophysics toolbox. Data collection and management. Design and program experiments. No prior programming experience needed. Prerequisite: graduate standing in Psychology, or permission of instructor.

PSYCH 540 Advances in Psychology (3-5, max. 30) Intensive readings from the current literature on an emerging topic or theoretical perspective in psychology. Student presentations and discussion. Prerequisite: graduate standing in Psychology, or permission of instructor.

PSYCH 541 Advances in Animal Behavior (3-5, max. 30) Barash, Beecher, Brunowitz, Kyes, OrDonnell, Sisensros Intensive readings from the current literature on an emerging topic or theoretical perspective in animal behavior. Student presentations and discussion. Prerequisite: graduate standing in Psychology or permission of instructor.

PSYCH 542 Advances in Behavioral Neuroscience (3-5, max. 30) Buck, Covey, Kim Intensive readings from the current literature on an emerging topic or theoretical perspective in behavioral science. Student presentations and discussion. Prerequisite: graduate standing in Psychology or permission of instructor.

PSYCH 543 Advances in Child Clinical Psychology (3-5, max. 30) Beauchaine, Lengua, McMahon Intensive readings from the current literature on an emerging topic or theoretical perspective in child clinical psychology. Prerequisite: graduate student in Psychology, or permission of instructor.

PSYCH 544 Advances in Clinical Psychology (3-5, max. 30) Baer, George, Kohlenberg, Linehan, Marlatt, McMahon, Smith, Zoellner Intensive readings from the current literature on an emerging topic or theoretical perspective in clinical psychology. Student presentations and discussion. Prerequisite: graduate standing in Psychology or permission of instructor.

PSYCH 545 Advances in Cognition/Perception (3-5, max. 30) Loftus Intensive readings from the current literature on an emerging topic or theoretical perspective in cognition/perception. Prerequisite: graduate standing in Psychology or permission of instructor.

PSYCH 546 Advances in Developmental Psychology (1-5, max. 30) Kahn, Meltzoff, Repacholi, Smoll, Sommerville Intensive readings from the current literature on an emerging topic or theoretical perspective in Developmental Psychology. Student presentations and discussion. Prerequisite: Graduate standing in Psychology or permission of instructor.

PSYCH 547 Advances in Social/Personality (3-5, max. 30) Intensive readings from the current literature on an emerging topic or theoretical perspective in social psychology/personality.
PSYCH 548 Advances in Quantitative Psychology (3-5, max. 30) Flaherty Intensive readings from the current literature on an emerging topic or theoretical perspective in quantitative psychology. Student presentations and discussion. Prerequisite: graduate standing in Psychology or permission of instructor.

PSYCH 549 Seminar in Physiological Psychology (2) Bernstein, Diaz, Kenney Prerequisite: permission of instructor.

PSYCH 550 Seminar in Psychology (1-2, max. 30) Weekly meetings for discussion of current topics. Prerequisite: graduate standing in Psychology, or permission of instructor. Offered: W.

PSYCH 551 Seminar in Animal Behavior (1-2, max. 30) Barash, Beecher, Brenowitz, O'Donnell, Sisneros Weekly meetings for discussion of current topics. Prerequisite: graduate standing in Psychology, or permission of instructor.

PSYCH 552 Seminar in Behavioral Neuroscience (1-2, max. 30) Bernstein, Buck, Covey, Diaz, Kenney, Mizumori, Olavarria Weekly meetings for discussion of current topics. Prerequisite: graduate standing in Psychology, or permission of instructor.

PSYCH 553 Seminar in Child Clinical Psychology (1-2, max. 30) Beauchaine, King, Lengua, McMahon Weekly meetings for discussion of current topics. Prerequisite: graduate standing in Psychology, or permission of instructor.

PSYCH 554 Seminar in Clinical Psychology (1-2, max. 30) George, Kohlenberg, Linehan, Mariatt, Simoni, Smith, Zoellner Weekly meetings for discussion of current topics. Prerequisite: graduate standing in Psychology, or permission of instructor.

PSYCH 555 Seminar in Cognition/Perception (1-2, max. 30) Bassok, Boynton, Buck, Fire, Kerr, Loftus, Murray, Palmer Weekly meetings for discussion of current topics. Prerequisite: graduate standing in Psychology, or permission of instructor.

PSYCH 556 Seminar in Developmental Psychology (1-2, max. 30) Bernstein, Metzloff, Repacholi, Small Weekly meetings for discussion of current topics. Prerequisite: graduate standing in Psychology, or permission of instructor.

PSYCH 557 Seminar in Social/Personality (1-2, max. 30) Brown, Cheryan, Greenwald, Kaiser, Leu, Shoda Weekly meetings for discussion of current topics. Prerequisite: graduate standing in Psychology, or permission of instructor.

PSYCH 558 Seminar in Quantitative Psychology (1-2, max. 30) Little, Miyamoto Weekly meetings for discussion of current topics. Prerequisite: graduate standing in Psychology, or permission of instructor.

PSYCH 560 Research Strategies (2, max. 30) Group discussions of problems and continuing strategies for ongoing and future research projects. Prerequisite: graduate standing in Psychology, others by permission.

PSYCH 561 Current Trends in Psychology (*) (1-2, max. 30) Prerequisite: permission of instructor. Offered: AWSpS.

PSYCH 562 Evolutionary Psychology of Gender, Mating and Reproduction (3) Barash, Beecher, O'Donnell, Sisneros Reviews evidence for biological factors influencing human mating and reproductive behavior, through application of concepts and theory from animal behavior, behavioral genetics, and evolutionary biology. Offered: W.

PSYCH 563 Developmental Psychology and the Human Relationship with Nature (4) Kahn Theories of development used to investigate the ontogenesis of the human relationship with nature. An emphasis on social cognition, children's environmental moral reasoning, the effects of technology in children's lies, and evolutionary theory. Offered: W.

PSYCH 564 Advanced Attitude Theory (5) Greenwald Theoretical, methodological, and empirical work on the concept of attitude and its practical applications. Topics include: definition of attitude, measurement of attitudes, information processing theories, functional theories, cognitive structure theories, the self as attitude object, and conscious and implicit processes. Prerequisite: PSYCH 445; PSYCH 525 or equivalent; or permission of instructor.

PSYCH 565 Quantifying Brain Analysis (3) Covers concepts and applications of statistically unbiased methods for quantifying brain structure. Hands-on learning and application of concepts, sampling strategies and calculations for unbiased stereological measure of the size and number of various brain components.

PSYCH 566 Neural Correlates of Perceptual Cognition (3) Olavarrija Contribution of sensory systems to perceptual capabilities. Critical review of literature on the neural correlates of abilities such as sensory discrimination, subjective perception, attention, imagery, object and face recognition, and spatial behavior. Some sensory disabilities reviewed. Offered: W.

PSYCH 567 Higher Order Cognition (3) Bassok Survey of research on higher-order cognition with an emphasis on theoretical accounts of knowledge representation. Topics include problem solving, inductive and deductive reasoning, hypothesis testing, causal inferences, similarity judgments, and categorization.

PSYCH 568 Cognitive Approaches to Human Memory (3) Examination of current topics in human memory from the perspective of cognitive psychology. Prerequisite: PSYCH 355 or permission of instructor. Offered: Sp.

PSYCH 570 Child Clinical Psychology (4) Issues and content of child clinical psychology, promotion of student's beginning work in research. Prerequisite: graduate major or minor standing in child-clinical psychology.

PSYCH 571 Child Psychology (5) McMahon Broad survey of major categories of child and adolescent disorders. Emphasis on scientific, empirical approach to description, classification, and research literature on these disorders. Required for all graduate students majoring in child-clinical psychology. Prerequisite: graduate standing in psychology or permission of instructor.

PSYCH 572 Approaches to Child Treatment (4) Barrett, Beauchaine Major approaches to child psychotherapy, including specific applications, issues in treatment, and research. Prerequisite: graduate major standing in child-clinical psychology or permission of instructor. Offered: Sp.

PSYCH 573 Psychological Assessment of Children (5) Assessment techniques appropriate to children, including those for infants, special problems of preschool and school-age children: projective tests, family assessment, and target observational assessment; training in administration of selected techniques. Prerequisite: PSYCH 576 and permission of instructor.

PSYCH 574 Community Psychology (4) Overview of key issues and concepts in the field of community psychology. History of field and overview of different models used to conceptualize system-level mental health issues and delivery systems. Emphasizes theory and research rather than intervention. Prerequisite: psychology graduate student or permission of instructor.

PSYCH 575 Anxiety Disorders (3) Zoellner General topics related to primary anxiety disorders (panic, OCD, GAD, posttraumatic stress disorder, and specific phobias), including diagnosis, theory, and treatment.

PSYCH 576 Assessment of Intelligence (5) Lengua Current theory and research on intelligence and intelligence testing; training in administration, scoring, and interpretation of major intelligence tests; ethical issues in assessment. Prerequisite: graduate major standing in child clinical or clinical psychology, or graduate minor standing in child clinical psychology. Offered: Sp.

PSYCH 577 Psychological Assessment of Adults (3) Training in adult assessment and development of skills in administration, scoring, and interpretation of the Rorschach with some attention to other projective techniques. Prerequisite: PSYCH 576 and permission of instructor.

PSYCH 578 Approaches to Psychological Assessment (4) Problem-solving approach to psychological assessment; review of psychological tests and procedures and presentation of approaches to their clinical interpretation and use. Required for all graduate students majoring in clinical and child-clinical psychology. Prerequisite: graduate major standing in clinical psychology. Offered: Sp.

PSYCH 579 Behavioral Assessment (4) Linehan Research, theory, and technique in behavioral assessment. Emphasis on assessing for change and relationship between assessment and therapy. Interviewing, observational techniques, self-monitoring, simulated environments, and physiological, self-report, and imaging procedures. Prerequisite: clinical psychology graduate standing and permission of instructor.

PSYCH 580 Minority Mental Health (3) Barrett, George, Simoni Surveys topics on mental health and treatment of racial and ethnic minorities. Theory emphases include: models addressing ethnic identity, cross-cultural differences, models of culturally sensitive intervention. Practice emphases include unique psychotherapy strategies for: African-, Asian-, and Latino-Americans, and American Indians. Prerequisite: graduate clinical major standing in psychology or permission of instructor.

PSYCH 581 Cross-Cultural Competency I (2) Barrett, George Focuses on development of
multicultural competence in the provision of psychological services to meet APA guidelines for culturally competence. Students address personal development, increase their knowledge of diverse groups, and study effective models of intervention with clients of diverse backgrounds. Prerequisite: PSYCH 575.

PSYCH 582 Cross-Cultural Competency II (2) Barrett, George Third in the graduate multicultural sequence. Focuses on American ethnic minorities, multicultural children and families, social action, and organizational development. Prerequisite: PSYCH 581.

PSYCH 584 Behavioral Methods: Clinical Interventions (3) Linehan Provides students with basic skills required for competent practice of cognitive and behavioral therapies. Topics include behavioral skills training, cognitive restructuring, contingency management, and exposure-based procedures. Prerequisite: second year of graduate clinical psychology, social work, psychosocial nursing, or psychiatric residency.

PSYCH 586 Clinical Personality Assessment (3) R. Smith Use of objective personality inventories in the description of normal and abnormal personality and use of such information in case conceptualization and treatment planning. Minnesota Multiphasic Personality Inventory, Millon Clinical Multiaxial Inventory. Credit/no credit only. Prerequisite: clinical psychology graduate standing.

PSYCH 587 Clinical Methods: Interviewing (2) Fagan Provides the foundation for developing good clinical skills. Enables students to conduct an initial clinical interview and generate a diagnostic formulation, problem list, and treatment plan after taking a complete history. Limited to and required of all second-year clinical psychology graduate students. Credit/no credit only. Offered: A.

PSYCH 588 Clinical Methods: Ethics (3) Fagan Enables students to acquire a thorough working knowledge of the American Psychological Association’s Ethical Standards for Psychologists; an awareness of Washington state law as it affects psychologists and a knowledge of how to identify and solve ethical dilemmas. Limited to and required of all second-year clinical psychology graduate students. Credit/no credit only. Offered: W.

PSYCH 589 Clinical Supervision (4) Beauchaine, George, King, Kohlenberg, Lengua, Linehan, Marlatt, McMahon, Simoni, Smith, Zeebovsky Supervised psychotherapy involving several individual clients. Separate consultations with instructor for intensive supervision of each case. Occasional meetings in small groups of instructors and students to discuss case material. Assigned readings appropriate to each case with opportunities to discuss these with instructor. Credit/no credit only. Prerequisite: clinical psychology graduate standing and permission of instructor. Offered: AWSPS.

PSYCH 590 Practicum in Psychological Assessment (2) Demonstration and practice of selected psychological test procedures and interviewing skills. Concurrent registration in PSYCH 591 required. Prerequisite: all first-year graduate students majoring in clinical and child-clinical psychology. Prerequisite: graduate major standing in clinical and child-clinical psychology. Credit/no credit only. Prerequisite: graduate major standing in clinical psychology. Offered: AW.

PSYCH 591 Issues in Clinical Psychology (1, max. 3) Smith Personal and professional issues in clinical psychology. Required for all first-year graduate students majoring in clinical and child-clinical psychology. Credit/no credit only. Prerequisite: graduate major standing in clinical psychology. Offered: AW.

PSYCH 593 Clinical Pracica and Colloquium (1-6, max. 24) Fagan Required of all clinical psychology graduate students seeing clients in the clinic. Clinical colloquium required of all second-year students, optional for others. Credit/no credit only. Offered: AWS.

PSYCH 594 Advanced Personality Theory (5) Linehan Conceptual models of behavioral functioning, cognition, emotion, and environment as organizers of behavior and other critical issues in personality theory. Opportunity to integrate previous courses, research, and practice, and arrive at coherent theoretical framework. Required for graduate majors in clinical psychology.

PSYCH 596 Advanced Teaching Practicum (2, max. 6) Supervised participation in graduate teaching. Prerequisite: graduate student in Psychology and permission of instructor. Offered: AWSPS.

PSYCH 597 Fieldwork in Clinical Psychology (1-5, max. 36) Baer, Beauchaine, George, King, Kohlenberg, Lengua, Linehan, Marlatt, Simoni, R. Smith, Zoellner Prerequisite: second-year graduate major standing and permission of departmental faculty.

PSYCH 598 Directed Reading in Psychology (1, max. 30) Selected topics. Prerequisite: permission of a supervising psychology faculty member.

PSYCH 599 Directed Research in Psychology (1-3, max. 24) Supervised participation in research. Prerequisite: permission of a supervising psychology faculty member.

PSYCH 600 Independent Study or Research (*) Offered: AWSPS.

PSYCH 700 Master’s Thesis (*) Offered: AWSPS.

PSYCH 800 Doctoral Dissertation (*) Offered: AWSPS.

**Romance Languages and Literature**

**Romance Languages and Literature**

ROMAN 411 Critical Approaches to Romance Literature (5) VLPA Explores theoretical as well as fictional texts in a least two Romance languages.

ROMAN 593 Literary Problems: Early Modern Period (5)

ROMAN 596 Problems in Comparative Contemporary Literary Studies (5) Seminar exploring contemporary literary thought through theoretical and/or creative literature. A selection of texts from at least two Romance languages and literary traditions. Prerequisite: competence in at least two Romance languages; completion of several upper division literature courses; some familiarity with critical methodologies.

ROMAN 600 Independent Study or Research (*) Credit/no credit only.

ROMAN 700 Master’s Thesis (*) Credit/no credit only.

ROMAN 800 Doctoral Dissertation (*) Credit/no credit only.

**French**

Credit: The sequence 121, 122, 123 is parallel to 101, 102, 103; students can receive credit for 101 and 121, but not for 122 and 123. 101 or 121 cannot be taken for credit after 102, 103, 122, or 123. 134 is a 15-credit intensive course exactly equivalent to 121, 122, 123; a maximum of 15 credits are allowed for 134 and any of 102, 103, 121, 122, and 123. A student who completes 134 cannot later take 101 for credit, but a student who earns credit for 101 can take 134 for 15 additional credits.

**FRENCH 101 Elementary (5)** Development of speaking, listening, reading, and writing skills to a basic level of proficiency. Teaches students to communicate in French and understand the cultural context of the language. Methods and objectives are primarily oral-aural. Oral practice in the language laboratory is required. Prerequisite: score of 0-14 on FR TL placement test if French is language of admission.

**FRENCH 102 Elementary (5)** Development of speaking, listening, reading, and writing skills to a basic level of proficiency. Teaches students to communicate in French and understand the cultural context of the language. Methods and objectives are primarily oral-aural. Oral practice in the language laboratory is required. Prerequisite: either FRENCH 101 or score of 15-30 on FR TL placement test.

**FRENCH 103 Elementary (5)** Development of speaking, listening, reading, and writing skills to a basic level of proficiency. Teaches students to communicate in French and understand the cultural context of the language. Methods and objectives are primarily oral-aural. Oral practice in the language laboratory is required. Prerequisite: either FRENCH 102, FRENCH 110, or score of 31-56 on FR TL placement test.

**FRENCH 110 Basic French Review (5)** Combines in one quarter the contents of 101 and 102. Designed for students who have studied French in high school but who are not ready for 102. Prerequisite: score of 10-30 on FR TL placement test.

**FRENCH 199 Foreign Study — Elementary (4-16, max. 16)** Elementary instruction in approved foreign study program. Students who wish to satisfy foreign language proficiency requirement must see the departmental adviser and be required to take additional courses through 103.

**FRENCH 201 Intermediate (5) VLPA** Designed to bring students to an intermediate level of proficiency. Emphasis on experiencing the language in context through a multi-media approach. Prerequisite: either FRENCH 103, FRENCH 134, or score of 57-100 on FR TL placement test.

**FRENCH 202 Intermediate (5) VLPA** Designed to bring students to an intermediate level of...
proficiency. Emphasis on experiencing the language in context through a multi-media approach. Prerequisite: FRENCH 201.

FRENCH 203 Intermediate (5) VLPA Designed to bring students to an intermediate level of proficiency. Emphasis on experiencing the language in context through a multi-media approach. Prerequisite: FRENCH 202.

FRENCH 207 Second-Year Reading (5) VLPA Intermediate vocabulary building and reading of literary texts. Students receiving credit for 207 may subsequently earn credit for lower-division French courses involving other skills.

FRENCH 210 Paris (5) I&S/ VLPA Taught in English. Provides an introduction to the art, architecture, politics, and literature of the City of Light.

FRENCH 211 Renaissance, Enlightenment, Revolution: Major Works in English (5) VLPA Collins Introduction to major figures of French culture from the Middle Ages to the eighteenth century, their contributions to the intellectual life of the Western world. Readings include Montaigne, Descartes, Rousseau, Voltaire, and Molière. In English.

FRENCH 212 French Masterworks: Modern in English (5) VLPA Collins Introduction to major figures of French culture from the nineteenth and twentieth centuries. Readings include Balzac, Flaubert, Proust, Sartre, and Celine. In English.

FRENCH 214 The French Fairy Tale Tradition (5) I&S/ VLPA A survey of French fairy tales covering the period from their ancient origins to the present. Prerequisite: FRENCH 201.

FRENCH 215 First-Year Reading (4-5) VLPA Designed to bring students to an elementary level of proficiency. A lab course required to establish departmental evaluation. Prerequisite: FRENCH 201.

FRENCH 221 Advanced Reading (5) VLPA Designed to bring students to an advanced level of proficiency. Emphasis on reading and understanding major works of French literature. Prerequisite: FRENCH 207.

FRENCH 227 Intermediate Conversational French (2, max. 8) VLPA Practice of intermediate-level French conversational skills through class discussion and oral presentations. Topics oriented toward French culture and current events. Prerequisite: either FRENCH 103, FRENCH 134, or score of 57-100 on FR TL placement test.

FRENCH 234 Intermediate French Immersion (15) VLPA Covers the equivalent of second-year French (FRENCH 201, 202, 203) through an alternative “planned immersion” method with video as the central medium of presentation. Prerequisite: either FRENCH 103, FRENCH 134, or score of 57-100 on FR TL placement test.

FRENCH 237 Foreign Study Conversational French (2-8, max. 8) VLPA For participants in the Foreign Study Program.

FRENCH 250 History of French Cinema in English (5) VLPA V. Collins History of cinema in France from the birth of film, the seventh art, to the present. Socio-historical context of French cinema explored. In English.

FRENCH 297 Foreign Study French Civilization (3/6) VLPA For participants in the Foreign Study Program. Literary tradition, social and cultural values as reflected in literature. Paper (in English) and higher degree of participation for 6 credits. In English.

FRENCH 299 Foreign Study — Intermediate (4-16, max. 16) VLPA Intermediate instruction in approved foreign study program. Evaluation by departmental adviser required to establish proficiency. Further study at 200-level subject to departmental evaluation.

FRENCH 301 Advanced French (5) VLPA Designed to bring students to an advanced level of proficiency in grammar and composition. Emphasis on experiencing the language in context through a multi-media approach. 303 prepares students for literature classes. Prerequisite: either FRENCH 203 or FRENCH 234.

FRENCH 302 Advanced French (5) VLPA Designed to bring students to an advanced level of proficiency in grammar and composition. Emphasis on experiencing the language in context through a multi-media approach. 303 prepares students for literature classes. Prerequisite: FRENCH 301.

FRENCH 303 Advanced French (5) VLPA Designed to bring students to an advanced level of proficiency in grammar and composition. Emphasis on experiencing the language in context through a multi-media approach. 303 prepares students for literature classes. Prerequisite: FRENCH 301.

FRENCH 304 Survey of French Literature: Origins to 1600 (5) VLPA Thematic and formal developments in literature of the period with emphasis on movements and texts in relation to cultural background. Prerequisite: FRENCH 303, which may be taken concurrently.

FRENCH 305 Survey of French Literature: 1600-1789 (5) VLPA Emphasis on literary movements and texts in relation to cultural background. Prerequisite: FRENCH 303, which may be taken concurrently.

FRENCH 306 Survey of French Literature: 1789 to the Present (5) VLPA Development of modern literature through its most important writers and movements. Prerequisite: FRENCH 303, which may be taken concurrently.

FRENCH 307 Survey of Francophone Literatures and Cultures (5) VLPA Survey of contemporary Francophone (post) colonial literatures and cultures. Prerequisite: FRENCH 303, which may be taken concurrently.

FRENCH 308 Foreign Study Composition (3-5, max. 10) VLPA For participants in the Foreign Study Program. Compositions on topical subjects of intermediate difficulty relating to the civilization of the French-speaking countries of Europe. Grammar review as needed. Prerequisite: FRENCH 203.

FRENCH 313 Business Communication in French (5) VLPA Offers students the opportunity to develop French language skills (reading, writing, speaking, and listening) within the context of the French-speaking business world. Business-specific culture emphasized. May be taken in lieu of, or in addition to, 303. Prerequisite: FRENCH 302.

FRENCH 327 Advanced Conversation (2, max. 8) VLPA Not open to students whose native language is French. Prerequisite: FRENCH 203.

FRENCH 337 Foreign Study Conversational French (2-8, max. 8) VLPA For participants in the Foreign Study Program. Prerequisite: FRENCH 203.

FRENCH 376 Culture, Politics, and Society in France from the Religious Wars to Revolutions (5) VLPA/I&S Studies the development of intellectual, literary, and artistic cultures in the context of the profound political and social evolutions of the Renaissance through the early 19th century in France. Taught in English. Prerequisite: FRENCH 203.

FRENCH 378 The Making of Contemporary France (5) I&S/ VLPA Study of the historical origins and subsequent development of contemporary problems and characteristics of French government and politics, economy, and society. Prerequisite: FRENCH 203.

FRENCH 390 Supervised Study (2-6, max. 20) .

FRENCH 397 Foreign Study French Civilization (3/6) VLPA For participants in the Foreign Study Program. Literary tradition, social and cultural values as reflected in literature. Paper (in French) and higher degree of participation for 6 credits. In French. Prerequisite: FRENCH 203.

FRENCH 404 Old French (5) VLPA - Designed for acquisition of reading facility in Old French through intensive study of selected texts. Prerequisite: FRENCH 303; either FRENCH 304, FRENCH 305, FRENCH 306, or FRENCH 307.

FRENCH 406 Advanced French Composition (5) VLPA Extensive guidance in advanced French composition, emphasizing stylistics and grammar. Prerequisite: FRENCH 303.

FRENCH 411 Topics in the Middle Ages (5) VLPA Sixteenth-century literature with emphasis on poetry and the general artistic ambiance. Prerequisite: FRENCH 303; either FRENCH 304, FRENCH 305, FRENCH 306, or FRENCH 307..

FRENCH 412 Topics in Sixteenth Century French Literature (5) VLPA An introduction to major French literature and culture of the Sixteenth Century, usually with a guiding theme such as travel and the court. Prerequisite: FRENCH 303; either FRENCH 304, FRENCH 305, FRENCH 306, or FRENCH 307.

FRENCH 413 Topics in Seventeenth Century French Literature (5) VLPA Seventeenth-century literature, with emphasis on the development of classicism. Prerequisite: FRENCH 303; either FRENCH 304, FRENCH 305, FRENCH 306, or FRENCH 307.

FRENCH 415 French Literature of the Eighteenth Century: Post-Enlightenment (5) VLPA Eighteenth-century literature, with emphasis on the “dark side of the Enlighten-ment” and nascent romanticism. Prerequisite: FRENCH 303; either FRENCH 304, FRENCH 305, FRENCH 306, or FRENCH 307.

FRENCH 416 French Literature of the Nineteenth Century: Romanticism (5) VLPA Nineteenth-century literature, with emphasis on romanticism and the early manifestations of
realism. Prerequisite: FRENCH 303; either FRENCH 304, FRENCH 305, FRENCH 306 or FRENCH 307.

FRENCH 418 French Literature of the Early Twentieth Century (5) VLPA Twentieth-century literature, with emphasis on the period 1900-1939. Prerequisite: FRENCH 303; either FRENCH 304, FRENCH 305, FRENCH 306, or FRENCH 307.

FRENCH 419 French Literature Since World War II (5) VLPA Twentieth-century literature, with emphasis on the period 1939 to the present. Prerequisite: FRENCH 303; either FRENCH 304, FRENCH 305, FRENCH 306, or FRENCH 307.

FRENCH 420 Interdisciplinary Approaches to Literature (5) VLPA Interdisciplinary studies in French literature and culture, focusing on the complex interactions of literature and other disciplines, i.e. philosophy, psychoanalysis, anthropology, architecture. Prerequisite: FRENCH 303; either FRENCH 304, FRENCH 305, FRENCH 306, or FRENCH 307.

FRENCH 421 Psychoanalysis and Literature (5) VLPA Borch-Jacobsen Readings from Freud and French critical writers regarding the relationship between psychoanalysis and literature. Prerequisite: FRENCH 303; either FRENCH 304, FRENCH 305, FRENCH 306, or FRENCH 307.

FRENCH 422 Literature and the Other Arts (5) VLPA Examines the relationship between text and image in a variety of art forms. Prerequisite: FRENCH 303; either FRENCH 304, FRENCH 305, FRENCH 306, or FRENCH 307.

FRENCH 424 Fiction: 1850-1900 (5) VLPA Prerequisite: FRENCH 303; either FRENCH 304, FRENCH 305, FRENCH 306, or FRENCH 307.

FRENCH 425 Fiction: 1850-1900 (5) VLPA Prerequisite: FRENCH 303; either FRENCH 304, FRENCH 305, FRENCH 306, or FRENCH 307.

FRENCH 427 Fiction: Twentieth Century (5) VLPA Prerequisite: FRENCH 303; either FRENCH 304, FRENCH 305, FRENCH 306, or FRENCH 307.

FRENCH 431 Critical Approaches to French Poetry (5) VLPA Interdisciplinary approaches to French poetry focusing on the intersection of fine art, cultural movements, and the production of literature in the Second Empire and the Third Republic. Prerequisite: FRENCH 303; either FRENCH 304, FRENCH 305, FRENCH 306, or FRENCH 307.

FRENCH 432 Critical Approaches to French Fiction (5) VLPA Addresses theory and practice of fiction within the context of a given century or movement. Content varies. Prerequisite: FRENCH 303; either FRENCH 304, FRENCH 305, FRENCH 306, or FRENCH 307.

FRENCH 435 Topics in Non-Fiction (5) VLPA Content varies. Prerequisite: FRENCH 303; either FRENCH 304, FRENCH 305, FRENCH 306, or FRENCH 307.

FRENCH 441 Quebecois Literature (5) VLPA Readings of novels, plays, and occasionally, poetry. Special attention paid to how Quebecois authors represent in their works the complex socio-political reality of their culture. Conducted in French. French majors required to read and write in French; all others may read and write in English. Prerequisite: FRENCH 303; either FRENCH 304, FRENCH 305, FRENCH 306, or FRENCH 307. Offered: jointly with SISCA 441.

FRENCH 444 Poetry: Romantic (5) VLPA Prerequisite: FRENCH 303; either FRENCH 304, FRENCH 305, FRENCH 306, or FRENCH 307.

FRENCH 445 Women Writers (5) VLPA Focuses on French women writers and writing about women. Chronological and geographic ranges varies. Gender issues addressed in critical fashion, considering the different historical and ideological contexts in which each of the works were produced. Prerequisite: FRENCH 303; either FRENCH 304, FRENCH 305, FRENCH 306, or FRENCH 307.

FRENCH 446 Poetry: Twentieth Century (5) VLPA Prerequisite: FRENCH 303; either FRENCH 304, FRENCH 305, FRENCH 306, or FRENCH 307.

FRENCH 450 Themes in French Literature and Culture (5) VLPA Interdisciplinary studies in French literature and culture, focusing on the construction and representation of gender roles in the French novel from the early eighteenth century. Prerequisite: FRENCH 303; either FRENCH 304, FRENCH 305, FRENCH 306, or FRENCH 307.

ITAL 504 Modern Italian Readings I (5) Readings in Italian Ottocento, covering the period of Romanticism.

ITAL 505 Modern Italian Readings II (5) Readings in Italian Novecento, covering the work of the major Italian twentieth-century authors.

ITAL 514 Dante (5, max. 10)

ITAL 531 Italian Theater (5) The development of Italian theater from the Renaissance to the Twentieth Century. Individual conferences with lecturing professor. Prerequisite: graduate students only.

ITAL 570 Seminar in Cinema (5) Studies in various areas of Italian cinema, concentrating on major directors, critics, and movements. Prerequisite: permission of instructor.

ITAL 590 Special Seminar and Conference (1-10, max. 30) Group seminars, or individual conferences, are scheduled under this number to meet special needs. Prerequisite: permission of instructor.

ITAL 591 Literary Problems: Middle Ages and Fourteenth Century (5, max. 10)

ITAL 592 Literary Problems: Renaissance (5, max. 10)

ITAL 593 Literary Problems: Early Modern (5, max. 10)

ITAL 594 Literary Problems: Eighteenth Century (5, max. 10)
ITAL 595 Literary Problems: Nineteenth Century (5, max. 10)

ITAL 596 Literary Problems: Twentieth Century (5, max. 10)

ITAL 600 Independent Study or Research (*)

Portuguese

PORT 101 Elementary (5) Methods and objectives are primarily oral-aural. Covers all major elements of Portuguese grammar.

PORT 102 Elementary (5) Methods and objectives are primarily oral-aural. Covers all major elements of Portuguese grammar. Prerequisite: PORT 101.

PORT 103 Elementary (5) Methods and objectives are primarily oral-aural. Covers all major elements of Portuguese grammar. Prerequisite: PORT 102.

PORT 105 Intensive Portuguese for Spanish Speakers (6) Covers the verbal system and major grammatical points. Does not satisfy Foreign Language Requirement. Prerequisite: SPAN 203.

PORT 199 Foreign Study: Elementary (2-16, max. 16) Elementary instruction in approved foreign study program. Students who wish to satisfy foreign language proficiency requirement must see the departmental adviser and may be required to take additional courses through PORT 201 or PORT 105.

PORT 201 Intermediate (5) VLPA Modern texts, compositions, conversation, and a systematic review of grammar. Prerequisite: either PORT 103 or PORT 105.

PORT 202 Intermediate (5) VLPA Modern texts, compositions, conversation, and a systematic review of grammar. Prerequisite: PORT 201.

PORT 299 Foreign Study: Intermediate (2-16, max. 16) VLPA Intermediate instruction in approved foreign study program. Further study at 200-level subject to department evaluation.

PORT 301 Grammar and Lexicon (3) VLPA Prerequisite: PORT 203.

PORT 302 Grammar and Lexicon (3) VLPA Prerequisite: PORT 301.

PORT 310 Introduction to Lusophone Literature (3) VLPA Introduction to the studies of Lusophone literature and culture.

PORT 335 Twentieth Century Brazilian Fiction in English (5, max. 10) VLPA Reading texts in connection with cultural and theoretical issues.

Spanish

SPAN 101 Elementary (5) Methods and objectives are primarily oral-aural. Language laboratory is required. Prerequisite: score of 0-15 on SP100A placement test if Spanish is language of admission. No credit if Spanish is the language of admission.

SPAN 102 Elementary (5) Methods and objectives are primarily oral-aural. Prerequisite: either SPAN 101, or score of 16-44 on SP100A placement test.

SPAN 103 Elementary (5) Methods and objectives are primarily oral-aural. Prerequisite: either SPAN 102, SPAN 110 or score of 45-69 on SP100A placement test.

SPAN 110 Basic Spanish Review (5) Covers the equivalent of SPAN 101 and SPAN 102 to prepare for SPAN 103. May not be taken in addition to 101 or 102. Prerequisite: score of 10-44 on SP100A placement test. Offered: AWSp.

SPAN 121 Spanish Immersion (5) Covers the equivalent of elementary Spanish (SPAN 101). Uses an alternative "planned immersion" method with video as the central medium of presentation. Prerequisite: no previous Spanish study, or score of 0-15 on SP100A placement test if Spanish is language of admission.

SPAN 122 Spanish Immersion (5) Covers the equivalent of elementary Spanish (SPAN 102). Uses an alternative "planned immersion" method with video as the central medium of presentation. Prerequisite: SPAN 121.

SPAN 123 Spanish Immersion (5) Covers the equivalent of elementary Spanish (SPAN 103). Uses an alternative "planned immersion" method with video as the central medium of presentation. Prerequisite: SPAN 122.

SPAN 134 Intensive First-Year Spanish (15) Equivalent of 121, 122, 123. Employs "planned immersion" method with video as the central medium of presentation. Not open for credit to students who have taken 121, 122, 123 or 102, 103. Offered: S.

SPAN 199 Foreign Study — Elementary (2-16, max. 16) Elementary instruction in approved foreign study program. Students who wish to satisfy foreign language proficiency requirement must see the departmental adviser and may be required to take additional courses through 103.

SPAN 201 Intermediate (5) VLPA Intensive practice in speaking, reading, and writing. Review of Spanish grammar. Oral practice based on literary and cultural readings. Prerequisite: either SPAN 103, SPAN 123, SPAN 134, score of 70-100 on SP100A placement test, minimum score of 51 on SP TL placement test, or score of 0-75 on SP200A placement test.

SPAN 202 Intermediate (5) VLPA Intensive practice in speaking, reading, and writing. Review of Spanish grammar. Oral practice based on literary and cultural readings. Prerequisite: either SPAN 201 or score of 76-145 on SP200A placement test.

SPAN 203 Intermediate (5) VLPA Intensive practice in speaking, reading, and writing. Review of Spanish grammar. Oral practice based on literary and cultural readings. Prerequisite: either SPAN 202, SPAN 210, or score of 146-165 on SP200A placement test.

SPAN 205 Culture of Andalusia (3) I&S/ VLPA Introduction to the culture and society of Andalusia, Southern Spain, regional vs. national identity, syncretism of Arab, Jewish, and Christian cultures, and a variety of contemporary cultural manifestations, among them Carnival, flamenco, the Alhambra, and contemporary literature and cinema. Of particular interest to students considering study abroad in Cadiz.

SPAN 206 Arts and Culture of Oaxaca (3) I&S/ VLPA Gonzalez Introduction to the contemporary culture of Oaxaca, Mexico, particularly painting, folk arts, and Days of the Dead, in the context of recent Mexican politics and society. Prerequisite: PORT 103, which may be taken concurrently.

SPAN 210 Accelerated Intermediate Spanish (10) VLPA Merges SPAN 201 and SPAN 202. Designed to build listening, speaking, reading, and writing skills and to expand knowledge of culture and literature of the Spanish-speaking world. Combines classroom experience with accelerated Web-enhanced activities provided through Spain’s Instituto Cervantes. Prerequisite: either SPAN 103, SPAN 123, or SPAN 134.

SPAN 227 Intermediate Conversation (2, max. 6) VLPA Focuses on developing intermediate conversation skills?listening and speaking and increasing vocabulary in varying situations. Discussions are based on contemporary Spanish films, current articles, fiction, and essays. Not open to students whose native language is Spanish. Prerequisite: either SPAN 103, SPAN 123, or SPAN 134.

SPAN 237 Foreign Study Intermediate Conversation (2, max. 6) For participants in approved foreign study programs. Prerequisite: either SPAN 103, SPAN 123, or SPAN 134.

SPAN 299 Foreign Study — Intermediate (2-16, max. 16) VLPA Intermediate instruction in approved foreign study program. Further study at 200-level subject to placement test score.

SPAN 301 Grammar and Lexicon (5) VLPA Prerequisite: either SPAN 203 or score of 166-175 on SP200A placement test.

SPAN 302 Grammar and Lexicon (5) VLPA Prerequisite: SPAN 301 or 310.

SPAN 303 Introduction to Stylistics Through Composition (5) VLPA Prerequisite: either SPAN 302 or SPAN 310.

SPAN 304 Survey of Spanish Literature: 1440-1498 (3) VLPA Masterpieces of Spanish literature from origins to 1498. Prerequisite: either SPAN 301, 310 or SPAN 314.

SPAN 305 Survey of Spanish Literature: 1498-1681 (3) VLPA Gilbert Prerequisite: either SPAN 301, 310 or SPAN 314.

SPAN 306 Survey of Spanish Literature: 1681 to the Present (3) VLPA Boehm, Mercier Prerequisite: either SPAN 301, 310 or SPAN 314.

SPAN 307 Introduction to Latin American Literature: Colonial Era through Early Independence (3) VLPA Donnelly Study of selected works from the sixteenth through the nineteenth century, with special emphasis on their historical and cultural relevance. Development of reading and writing skills. Prerequisite: either SPAN 301, SPAN 310, or SPAN 314.

SPAN 308 Introduction to Latin American Literature: Independence to the Present (3) VLPA Study of selected works of twentieth-century Latin American literature and their sociohistorical context. Development of reading and writing skills. Prerequisite: either SPAN 301, SPAN 310, or SPAN 314.

448
SPAN 310 Accelerated Intermediate-Advanced Grammar and Lexicon (10) VLPA
Gonzalez
Intensive grammar and writing, combining SPAN 301 and SPAN 302. Designed to develop skills at the intermediate-advanced level in areas of listening, speaking, reading, and writing. Prerequisite: SPAN 203.

SPAN 311 Spanish for Reading Knowledge I (5) Bensadon
Intended primarily for graduate students. Emphasis on developing reading comprehension of Spanish texts which are pertinent to graduate student’s field of research. Credit may not be applied toward Spanish major.

SPAN 312 Spanish for Reading Knowledge II (5) VLPA
Bensadon Intended primarily for graduate students. Emphasizes developing reading comprehension of Spanish texts which are pertinent to graduate student’s field of research. Credit may not be applied toward Spanish major. Prerequisite: SPAN 311.

SPAN 313 Business Communication in Spanish (5) VLPA
Bensadon This intermediate level course offers student the opportunity to develop their Spanish language skills (reading, writing, speaking, and listening) within the context of the Spanish-speaking business world. Business-specific culture emphasized. Prerequisite: Either SPAN 301, SPAN 310 or SPAN 314, any of which may be taken concurrently.

SPAN 314 Spanish for Bilingual/Heritage Students (5) VLPA
Gillman Provides bilingual students whose formal education has primarily been in English with the skills necessary to succeed in upper-division Spanish classes. Intensive review of grammar, readings of literary and journalistic texts, Web-based exercises, writing review, and a play to enhance their verbal skills. Offered: AW.

SPAN 315 Spanish for Bilingual/Heritage Students (5) VLPA
Gillman Emphasizes reading, with attention to problems particular to Spanish-heritage students. Emphasis on critical reading, vocabulary expansion, and grammar review. Prerequisite: SPAN 314. Offered: WSp.

SPAN 316 Stylistics and Composition for Heritage Students (5) VLPA
Bensadon Emphasizes the process of writing essays to help students develop a notion of style in Spanish, with attention to problems particular to Spanish heritage students. Prerequisite: SPAN 315 Offered: ASp.

SPAN 317 Spanish and Latin American Literature in English Translation (5, max. 10) VLPA
Spanish and Latin American literature in English translation, with consideration of their background and influence. Does not fulfill any major or minor requirement.

SPAN 318 Cervantes’ Don Quixote in English (5) VLPA
Gilbert Cervantes’ Don Quixote de la Mancha: close study of this comic masterpiece, and the life, times, and works of its author. Consideration of the work’s enduring influence and vitality. Does not fulfill any major or minor requirement.

SPAN 319 Mexican Literature (3) VLPA
Analysis of selected works of Mexican literature from the second half of the twentieth century: short stories, poetry, essay, and theatre. Focus on issues such as nationalism and national identity, gender, ethnicity, dependent development, and globalization. Prerequisite: either SPAN 301, SPAN 310 or SPAN 314.

SPAN 321 Introduction to Hispanic Literary Studies (5) VLPA
Gerst Acquaints the third-year student with elementary techniques of literary analysis, as applied to examples of narrative, poetry and theater, within the context of the Spanish and Latin American literary traditions. Prerequisite: SPAN 301, SPAN 310, or SPAN 314, any of which may be taken concurrently. Offered: A.

SPAN 322 Introduction to Hispanic Cultural Studies (5) I&S/VLPA
Mercer Introduces students to elite, mass, and folk cultures of Latin America, Spain, and Latinos in the United States. Sample topics include transculturation, globalization, border culture, and relations between culture, democratization, and human rights. Prerequisite: SPAN 301, SPAN 310, or SPAN 314, any of which may be taken concurrently. Offered: W.

SPAN 323 Introduction to Spanish Linguistics (5) VLPA
Synchronic and diachronic linguistic analysis of Spanish, including Spanish phonetics and phonology, morphology, syntax, and evolution of the language. Prerequisite: either SPAN 301, SPAN 310, or SPAN 314, any of which may be taken concurrently. Offered: SpS.

SPAN 327 Advanced Conversation (2-6, max. 6) VLPA
Focuses on developing advanced conversational skills: listening and speaking; to fluency and increasing vocabulary in varying situations. Discussions are based on contemporary Spanish films, current articles, fiction, and essays. Does not fulfill any major or minor requirement. Not open to students whose native language is Spanish. Prerequisite: either SPAN 301, SPAN 310, or SPAN 314, any of which may be taken concurrently.

SPAN 328 Spanish Cultural Studies (5) I&S/ VLPA
Study aboard courses focussing on modern Spanish culture. Lectures, readings, discussions, and written work in Spanish. For pre-approved study abroad courses only. Prerequisite: either SPAN 301, SPAN 310 or SPAN 314.

SPAN 329 Latin American Cultural Studies (5) I&S/ VLPA
Study aboard courses focussing on historical, social, and ideological aspects of modern Latin American culture. Lectures, readings, discussions, and written work in Spanish. For pre-approved study abroad courses only. Prerequisite: either SPAN 301, SPAN 310 or SPAN 314.

SPAN 330 Composition and Literary/ Cultural Analysis (5) VLPA
Includes writing of critical essays, practicing critical reading, developing promising thesis statements, and training in research methods. Emphasizes critiquing fellow students’ work as collaborative activities. Prerequisite: either SPAN 302, SPAN 310 or SPAN 315.

SPAN 331 Themes in Mexican-American Studies (5) I&S/ VLPA
Examination of significant historical and cultural themes of the Mexican-American experience. Prerequisite: SPAN 301, SPAN 310, or SPAN 314, any of which may be taken concurrently.

SPAN 332 Chicano Film and Narrative (5) I&S/ VLPA
Flores Historical overview of the evolution of Chicano culture through film. Critical examination of the portrayal and self-portrayal of Chicanos in film and selected works of narrative. Prerequisite: either SPAN 301, SPAN 310 or SPAN 314, any of which may be taken concurrently.

SPAN 333 Hispanic Film Studies (5) I&S/ VLPA
Mercer Introduction to major issues in the study of Hispanic cinema from various national contexts. The relationship of film to other types of narrative, and of film to society, specifically relations between class, gender, ethnicity, and artistic production, as well as between cinema and social change. Prerequisite: either SPAN 301, SPAN 310, or SPAN 314, any of which may be taken concurrently.

SPAN 334 Latin American Film (5) I&S/ VLPA
Overview of the history of Latin American cinema, including the new Latin American cinema of the 1960s; the development of strong film industries in Mexico, Cuba, and Brazil; and recent developments in the context of globalization and democratization. Prerequisite: either SPAN 301, SPAN 310 or SPAN 314, any of which may be taken concurrently.

SPAN 337 Foreign Study Advanced Conversation (2-6, max. 6) VLPA
For participants in foreign study programs. Does not fulfill any major or minor requirement. Prerequisite: either SPAN 301, SPAN 310 or SPAN 314, any of which may be taken concurrently.

SPAN 339 Women Writers (3) VLPA
Boehm Critical analysis of Chicanas/Latina writers in the United States; or by Spanish-American, Luso-Brazilian, and Spanish women writers in their specific socio-historical context. Prerequisite: either SPAN 301, SPAN 310, or SPAN 314.

SPAN 340 Introduction to Latin American Poetry (3) VLPA
Traces the oral, musical, and written traditions of Latin American poetry. Prerequisite: either SPAN 301, SPAN 310, or SPAN 314.

SPAN 350 Drama (3) VLPA
Gilbert
Generic study of Spanish drama. Prerequisite: either SPAN 301, SPAN 310 or SPAN 314.

SPAN 351 Poetry (3) VLPA
Or Hara
Generic study of Spanish poetry. Prerequisite: either SPAN 301, SPAN 310, or SPAN 314.

SPAN 352 Fiction (3) VLPA
Petersen
Generic study of Spanish fiction. Prerequisite: SPAN 301, SPAN 310, or SPAN 314.

SPAN 360 Contemporary Spain (5) I&S/ VLPA
Raneda
Raneda Social, political, and cultural developments in Spain since the end of the Franco dictatorship in 1975. Extensive use of Spanish Web sites. Prerequisite: either SPAN 302, SPAN 310 or SPAN 315, any of which may be taken concurrently. Offered: jointly with EURO 360.

SPAN 390 Supervised Study (2-6, max. 20).

SPAN 392 Experiential Learning in Spanish (1, max. 3) I&S Experiential learning project in the local Spanish-speaking community. Engages students in ways that supplement/enhance formal in-class language training. Prerequisite: SPAN 203.

SPAN 393 Foreign Study (2-10, max. 20) VLPA
Study in Spanish speaking country outside the standard Spanish curriculum of the University of Washington. Prerequisite: either SPAN 301, SPAN 310 or SPAN 314, any of which may be taken concurrently.
SPAN 400 The Syntactic Structure of Spanish (5) VLPA Zagona Scientific study of the syntax of Spanish; structure of phrases, transformationally derived structures, grammatical relations, principles of interpretation. Prerequisite: either SPAN 301 or SPAN 314; either ANTH 203, LING 200, 201, 203, LING 400, or SPAN 323. Offered: jointly with SPLING 400.

SPAN 401 The Morphological Structure of Spanish (5) VLPA Zagona Principles of word formation, including derivational and inflectional morphology. Relationship between inflectional morphology and other components of grammar. Prerequisite: either SPAN 301 or SPAN 314; either ANTH 203, LING 200, 201, 203, LING 400, or SPAN 323. Offered: jointly with SPLING 401.

SPAN 402 The Phonological Structure of Spanish (5) VLPA Zagona Phonological component of the generative grammar of Spanish; representations of syllabic and segmental units, phonological rules, distinctive features and their articulatory correlates. Prerequisite: either SPAN 301 or SPAN 314; either ANTH 203, LING 200, 201, 203, LING 400, or SPAN 323. Offered: jointly with SPLING 402.

SPAN 403 The Evolution of the Spanish Language (5) VLPA Basdeo, Zagona Historical survey of Spanish phonology, morphology, and syntax, from Latin origins to the modern language. Prerequisite: either SPAN 301 or SPAN 314; either ANTH 203, LING 200, 201, 203, LING 400, or SPAN 323. Offered: jointly with SPLING 403.

SPAN 404 Dialects of World Spanish (5) VLPA Fernandez Introduction to dialectal variants of Spanish. Considers standardization and the real academia; variation and change; pragmatics and politeness; Spanish in contact; sound, word formation, and grammar variation. Taught in Spanish. Prerequisite: either SPAN 301 or SPAN 314; either SPAN 323, LING 200, or LING 400. Offered: jointly with SPLING 404.

SPAN 405 Spanish Phonetics (5) VLPA Analysis of sounds: training in pronunciation, intonation, and close transcription of Spanish. Training in pronunciation, intonation, and close transcription of Spanish. Prerequisite: either SPAN 301 or SPAN 314; either ANTH 203, LING 200, 201, 203, LING 400, or SPAN 323. Offered: jointly with SPLING 405.

SPAN 408 Spanish Translation Workshop (5) VLPA Intensive practice in translation into and from Spanish. Texts include literary prose, poetry, expository writing, newspaper and magazine articles. Problems of standard versus colloquial language, transposition of cultural references, concept of fidelity in translation. Prerequisite: either SPAN 303, SPAN 316, or SPAN 330; SPAN 323; recommended: SPAN 406.

SPAN 410 Creative Writing in Spanish (5) I&S O'Hara Creative writing in poetry for students undertaking fourth year advanced coursework in Spanish literature. Prerequisite: either SPAN 303, SPAN 316, or SPAN 330; SPAN 321; SPAN 322; one additional literature course above SPAN 303.

SPAN 414 Spanish Literature: Eighteenth Century (5) VLPA Gilbert Prerequisite: either SPAN 303, SPAN 316, or SPAN 330; SPAN 321; SPAN 322; one additional 300-level course above SPAN 303.

SPAN 415 Spanish Literature: Nineteenth Century (5) VLPA Gilbert Prerequisite: either SPAN 303, SPAN 316, or SPAN 330; SPAN 321; SPAN 322; one additional 300-level course above SPAN 303.

SPAN 416 Spanish Literature: 1900 to the Present (5) VLPA Geist, Mercer Spanish literature of the twentieth century prior to the Civil War to the present. Prerequisite: either SPAN 303, SPAN 316, or SPAN 330; SPAN 321; SPAN 322; one additional 300-level literature course.

SPAN 420 Spanish Poetry: Origins Through the Fifteenth Century (5) VLPA Petersen Prerequisite: either SPAN 303, SPAN 316, or SPAN 330; SPAN 321; SPAN 322; one additional 300-level course above SPAN 303.

SPAN 423 Spanish Poetry: The Golden Age, Sixteenth Through Seventeenth Centuries (5) VLPA Gilbert Prerequisite: either SPAN 303, SPAN 316, or SPAN 330; SPAN 321; SPAN 322; one additional 300-level course above SPAN 303.

SPAN 424 Hispanic Poetry: 1870 - 1936 (5) VLPA Geist Modern lyric poetry of the Hispanic world. The period studied extends from 1870 to 1936 and deals with thirteen major poets, from Becquer to Hernandez. Prerequisite: either SPAN 303, or SPAN 316, or SPAN 330; SPAN 321; SPAN 322; one additional 300-level literature course.

SPAN 431 Golden Age Prose (5) VLPA Gilbert Representative, and outstanding, prose works of sixteenth- and seventeenth-century Spain. Prerequisite: either SPAN 303, SPAN 316, or SPAN 330; SPAN 321; SPAN 322; one additional 300-level literature course.

SPAN 435 Spanish Novel of the Nineteenth Century (5) VLPA Mercer Representative works of Galdos, Clarin, Pereda, Valera, and Blasco Ibanez. Prerequisite: either SPAN 303, SPAN 316, or SPAN 330; SPAN 321; SPAN 322; one additional 300-level course above SPAN 303.

SPAN 436 Spanish Novel of the Nineteenth Century (5) VLPA Geist Modern lyric poetry of the Hispanic world. The period studied extends from 1870 to 1936 and deals with thirteen major poets, from Becquer to Hernandez. Prerequisite: either SPAN 303, SPAN 316, or SPAN 330; SPAN 321; SPAN 322; one additional 300-level course above SPAN 303.

SPAN 441 Spanish Drama: 1600-1635 (5) VLPA Gilbert Spanish theatre of the seventeenth century, with emphasis on Lope de Vega. Prerequisite: either SPAN 303, SPAN 316, or SPAN 330; SPAN 321; SPAN 322; one additional 300-level course above SPAN 303.

SPAN 468 Latin American Women (5) I&S/ VLPA Donnelly The elaboration of discourses of identity in relation to gender, ethnicity, social class, and nationality, by women writers from Spain, Latin America, Mexico, Central America, and the Caribbean. Testimonial literature, literature and resistance, women's experimental fiction. Prerequisite: either SPAN 303 or SPAN 316; SPAN 321; one additional 300-level course above SPAN 303. Offered: jointly with WOMEN 468.

SPAN 472 Colonial Prose (5) VLPA Donnelly Study of major genres of prose writing in Spanish America during the 16th-18th centuries, including history writing, travel writing, historiography, and nascent forms of fictional writing. Prerequisite: either SPAN 303 or SPAN 316; SPAN 321; or SPAN 330 or SPAN 331; or SPAN 322; one additional 300-level literature course.

SPAN 473 Latin American Fiction: Nineteenth Century (5, max. 15) VLPA Donnelly Study of prose fiction in Latin America in the nineteenth century. Prerequisite: either SPAN 303 or SPAN 316; SPAN 321; SPAN 322; either SPAN 304, SPAN 305, SPAN 306, SPAN 307, SPAN 308, SPAN 319, SPAN 339, SPAN 340, SPAN 350, SPAN 351, SPAN 352, or SPAN 376.

SPAN 474 Latin American Fiction: Twentieth Century (5) VLPA O'Hara Study of prose fiction in Latin America in the twentieth century. Prerequisite: either SPAN 303 or SPAN 316; SPAN 321; SPAN 322; either SPAN 304, SPAN 305, SPAN 306, SPAN 307, SPAN 308, SPAN 319, SPAN 339, SPAN 340, SPAN 350, SPAN 351, SPAN 352, or SPAN 376.

SPAN 475 Latin American Poetry: Colonial Through Nineteenth Century (5) VLPA Flores Poetic movements of the seventeenth, eighteenth, and nineteenth centuries in Spanish America, Renaissance, baroque, neoclassicism, romanticism, and modernism. Prerequisite: either SPAN 303 or SPAN 316; SPAN 321; SPAN 322; either SPAN 304, SPAN 305, SPAN 306, SPAN 307, SPAN 308, SPAN 319, SPAN 339, SPAN 340, SPAN 350, SPAN 351, SPAN 352, or SPAN 376.

SPAN 476 Spanish Medieval Literature (5) VLPA Petersen Principal literary works of the Spanish Middle Ages in the context of evolving intellectual, spiritual, and artistic climates of the period. Covers the evolution of narrative and lyric prose and verse in both their traditional and learned manifestations. Prerequisite: either SPAN 303 or SPAN 316; SPAN 321; either SPAN 304, SPAN 305, SPAN 306, SPAN 307, SPAN 308, SPAN 319, SPAN 339, SPAN 340, SPAN 350, SPAN 351, SPAN 352, or SPAN 376.

SPAN 480 Spanish Medieval Literature (5) VLPA Petersen Principal literary works of the Spanish Middle Ages in the context of evolving intellectual, spiritual, and artistic climates of the period. Covers the evolution of narrative and lyric prose and verse in both their traditional and learned manifestations. Prerequisite: either SPAN 303 or SPAN 316; SPAN 321; either SPAN 304, SPAN 305, SPAN 306, SPAN 307, SPAN 308, SPAN 319, SPAN 339, SPAN 340, SPAN 350, SPAN 351, SPAN 352, or SPAN 376.

SPAN 481 Sixteenth- and Seventeenth-Century Spanish Literature (5) VLPA Gilbert Spanish literature of the sixteenth and seventeenth centuries. Close study of key texts from all genres as well as their socio-historical contexts. Prerequisite: either SPAN 303 or SPAN 316; SPAN 321; SPAN 322; either SPAN 304, SPAN 305, SPAN 306, SPAN 307, SPAN 308, SPAN 319, SPAN 339, SPAN 340, SPAN 350, SPAN 351, SPAN 352, or SPAN 376.

SPAN 482 Eighteenth- through Twentieth-Century Spanish Literature (5) VLPA Mercer Survey of Spanish literature since 1700, and its historical context. Prerequisite: either SPAN 303 or SPAN 316; SPAN 321; either SPAN 304, SPAN 305, SPAN 306, SPAN 307, SPAN 308, SPAN 319, SPAN 339, SPAN 340, SPAN 350, SPAN 351, SPAN 352, or SPAN 376.

SPAN 483 Latin American Literature: Origins to Independence (5) VLPA Donnelly The elaboration of discourses of legitimation by the Spanish conquistadores, and of resistance and accommodation by native and mestizo peoples; the development of a New World Baroque aesthetic; literatures of independence from Spain and of nation-building. Prerequisite: either SPAN 303 or SPAN 316; SPAN 321; SPAN 322; either SPAN 304, SPAN 305, SPAN 306, SPAN 307, SPAN 308, SPAN 319, SPAN 339, SPAN 340, SPAN 350, SPAN 351, SPAN 352, or SPAN 376.

SPAN 484 Latin American Literature: Modernismo to the Present (5) VLPA O'Hara Principal literary movements of Latin America, late nineteenth century to the present, with particular emphasis on poetry and narrative: modernismo, postmodernismo, the vanguard, nueva and novisima narrativa. Includes essays and autobiographical writings to help place the literary works in socio-historical perspective. Prerequisite: either SPAN 303 or SPAN 316; SPAN 321; SPAN 322; either SPAN 304, SPAN 305, SPAN 306, SPAN 307, SPAN 308, SPAN 319, SPAN 339, SPAN 340, SPAN 350, SPAN 351, SPAN 352, or SPAN 376.

SPAN 486 Photography and Cultural Studies in Latin America (5) I&S/ VLPA Steele Analytic and discursive exploration of the connections between visual anthropology (ethnography through photography and film), documentary and art photography, and colonial and post-colonial discourse in Latin America during the twentieth century. Prerequisite: either SPAN 303 or SPAN 316; one additional 300-level course beyond 303. Offered: jointly with SISLA 486.

SPAN 487 Mexican Cinema (5) I&S/ VLPA Steele Analysis of representative films about post-revolutionary Mexico by directors from both the Golden Age of Mexican Cinema (1940-1960) and the Mexican New Film movement (1975-the present). Revolutionary nationalism, modernization and its discontents; construction of gender, class and ethnicity; migration and globalisation. Prerequisite: either SPAN 303, SPAN 316; or SPAN 330; SPAN 321; SPAN 322; one additional 300-level course beyond SPAN 303.

SPAN 488 The Fantastic in Latin American Literature (5) VLPA O'Hara The Fantastic in literature, in contrast to realism, and how the concept has been adapted by Latin American authors. May focus on a particular writer: Augusto Monterroso (Guatemala) or Julio Cortazar (Argentina), or survey various authors. Prerequisite: either SPAN 303 or SPAN 316; SPAN 321; SPAN 322; either SPAN 304, SPAN 305, SPAN 306, SPAN 307, SPAN 308, SPAN 319, SPAN 339, SPAN 340, SPAN 350, SPAN 351, SPAN 352, or SPAN 376.

SPAN 489 The Mexico-U.S. Border in Literature and Film (5) I&S/ VLPA Petersen The Mexico-U.S. Border region in literature and film of the 1990s and early 2000s. Includes migration, tourism, NGOs, globalization, transnational commerce, multiculturalism, and politics of gender, sexuality and race. Prerequisite: either SPAN 303 or SPAN 316; either SPAN 321 or SPAN 322; one additional 300-level course above SPAN 303. Offered: jointly with SISLA 489.

SPAN 490 Honors Seminar (2-5, max. 10) VLPA Special studies in Spanish literature. Required of candidates for Honors and Distinction in Spanish.
SPAN 491 Individual Authors and Special Topics in Spanish Literature (5, max. 10)  
VLPA Focuses on an individual Spanish author or a special problem in Spanish literature. Prerequisite: either SPAN 303 or SPAN 316; SPAN 321; SPAN 322; SPAN 328, SPAN 330, SPAN 338, SPAN 340, SPAN 350, SPAN 351, SPAN 352, or SPAN 376.

SPAN 492 Individual Authors and Special Topics in Latin American Literature (5, max. 10)  
VLPA Focuses on an individual Latin American author or a special problem in Latin American literature. Prerequisite: either SPAN 303, SPAN 316, or SPAN 330; SPAN 321; one additional 300-level literature course.

SPAN 493 Foreign Study (2-10, max. 20)  
VLPA Advanced study in Spanish speaking country outside the standard Spanish curriculum of the University of Washington. Prerequisite: either SPAN 303, SPAN 316, or SPAN 330; one additional 300-level course above SPAN 303.

SPAN 495 Study in Spain (2-10, max. 20)  
VLPA Advanced study in Spain in approved foreign study programs. Prerequisite: either SPAN 303, SPAN 316, SPAN 330; one additional course above SPAN 303.

SPAN 499 Special Topics (1-5, max. 10)  
Topics to meet special needs.

SPAN 510 Methodology of Spanish Language Teaching (5) Fernandez Theoretical and practical foundations of current trends in second/foreign language teaching. Emphasis on communicative and task-based approaches to Spanish language teaching. Required for beginning Spanish Teaching Assistants. Credit/no credit only.

Scandinavian Studies

Scandinavian

SCAND 100 Introduction to Scandinavian Culture (5) &SVLPA The Scandinavian experience from the Viking Age to the present day; the background for contemporary Scandinavian democracy, with major emphasis on the cultural, political, and religious development of the Scandinavian countries.

SCAND 150 Norwegian Literary and Cultural History (5) VLPA A survey of Norwegian literary and cultural history from the Vikings to the present. Authors read include Bjornson, Ibsen, Hamsun, and Ro??lvaag.

SCAND 151 Finnish Literary and Cultural History (5) VLPA A survey of Finnish literature and cultural history during the 19th and 20th centuries. Authors studied include Lonanot, Snellmann, Kivi, Sodergran, Linna, Haavikko, and Kaurismaki.

SCAND 152 Latvian Literary and Cultural History (5) VLPA Grinberga Survey of Latvian literary and cultural history from the nineteenth-century to the present. Authors include Pumpurs, Rainis, Aspazija, Blaumanis, Nesaulie, Bels, and Zalite.

SCAND 190 Crime Scenes: Investigating the Cinema and Its Cultures (5) VLPA Ames, Nestingen Teaches students how to analyze film by closely studying crime scenes from historical and contemporary German and Scandinavian cinema. Directors studied include Fritz Lang, Carl Th. Dreyer, Billy Wilder, and Lars von Trier. Offered jointly with GERMAN 190.

SCAND 200 Contemporary Scandinavian Society (5) &S Examines the distinctive policies, institutions, and social norms of contemporary Scandinavian societies. Topics include: Nordic geography, the development of a “middle way” between capitalism and socialism, universal social policies, Scandinavia in the international system, and contemporary challenges to Scandinavian societies. Recommended: SCAND 100.

SCAND 230 Introduction to Folklore Studies (5) &SLVLA Comprehensive overview of the field of folkloristics, focusing on verbal genres, customs, belief, and material culture. Particular attention to the issues of community, identity, and ethnicity. Offered: jointly with C LIT 230.

SCAND 232 Hans Christian Andersen and the Fairy Tale Tradition (5) VLPA Influence of Hans Christian Andersen and the fairy tale on modern Scandinavian tales and stories. Investigates the significance of the fairy tale in modern world, with attentions to writers such as Isak Dinesen, Knut Hamsun, Vilky Sorensen, William Heinens.

SCAND 251 Holberg and His Comedies in English (2) VLPA Holberg and his major dramas, with attention to the comic tradition in the Scandinavian theatre.

SCAND 270 Sagas of the Vikings (5) VLPA Icelandic sagas and poetry about Vikings in the context of thirteenth-century society.

SCAND 280 Ibsen and His Major Plays in English (5) VLPA Reading and discussion of Ibsen’s major plays.

SCAND 312 Masterpieces of Scandinavian Literature (5) VLPA Major works of Scandinavian literature by selected authors.

SCAND 326 Scandinavia in World Affairs (5) &S Introduction to the foreign relations of Scandinavia with a focus on Nordic security, international economic pressures, and global conflict resolution. Includes a survey of the national settings for international involvements and highlights the dilemmas for industrial societies exposed to the pressures of interdependence. Offered: jointly with POL S 326.

SCAND 327 Women in Scandinavian Society (5) &SLVLA Examines the changing position of women in Norway, Denmark, Finland, and Sweden from the 1880s to the contemporary period. Readings in literature and political science.

SCAND 331 Folk Narrative (5) VLPA Survey of various genres of folk narratives studied in performance contexts to reveal their socio-cultural functions in a variety of milieux. Theory and history of folk narrative study, taxonomy, genre classification, and interpretative approaches. Recommended: SCAND 230 or C LIT 230. Offered: jointly with C LIT 331.

SCAND 334 Immigrant and Ethnic Folklore (5) I&S/VLPA Survey of verbal, customary, and material folk traditions in ethnic context. Theories of ethnic folklore research applied to the traditions of American communities of Scandinavian, Baltic, or other European ancestry. Recommended: SCAND 230 or C LIT 230. Offered: jointly with C LIT 334.

SCAND 335 Scandinavian Children’s Literature (5) VLPA The history, forms, and themes of Scandinavian children’s literature from H. C. Andersen to the present. Exploration of the dominant concerns of authors, adult and non-adult audiences, and the uses to which juvenile and adolescent literature are put. Film adaptations and Scandinavian-American materials included.

SCAND 341 Sami Culture and History (5) I&S/ VLPA An interdisciplinary look at the culture of Scandinavia’s indigenous peoples. Emphasis on the earliest archeological and textual evidence to the present day. Focus on indigenous modes of expression and worldview, as well as contemporary political and cultural activism.

SCAND 344 The Baltic States and Scandinavia (5) I&S Survey of the cultures and history of Estonia, Latvia, and Lithuania from the Viking Age to the present, with particular attention to Baltic-Slavic contacts. Offered: jointly with EURO 344.

SCAND 350 Environmental Norms in International Politics (5) I&S Surveys development of international environmental consciousness from 1960s to present. Models of “green development”; ways in which norms for resource use have entered global politics. Patterns of state compliance with international environmental agreements, and why states fall short of meeting their international obligations. Offered: jointly with ENVIR 360/SIS 350.

SCAND 351 Scandinavia, the European Union, and Global Climate Change (5) VLPA/ I&S Reviews the history of climate change, the role of Swedish scientist Svante Arrhenius in defining greenhouse effects, Scandinavian policy response, and the role of the European Union in global climate change. Offered: jointly, with EURO 351; WSp.

SCAND 360 Scandinavian Cinema (3/5) VLPA Major Scandinavian films and film directors from the 1920s to the present.

SCAND 367 Sexuality in Scandinavia: Myth and Reality (5) I&S/VLPA Examines selected Scandinavian literary and socio-political texts, films, and art to manifest the reality behind the myths of sexual freedom in Scandinavia.

SCAND 370 The Vikings (5) I&S/VLPA Vikings at home in Scandinavia and abroad, with particular emphasis on their activities as revealed in archaeological finds and in historical and literary sources. Offered: jointly with HSTEM 370.

SCAND 380 History of Scandinavia to 1720 (5) I&S Scandinavian history from the Viking Age to 1720, with an emphasis on the political, social, and economic development of Denmark, Norway, Sweden, Finland, and Iceland from the Middle Ages to the Enlightenment. Offered: jointly with HSTEM 380.

SCAND 381 History of Scandinavia Since 1720 (5) I&S Scandinavian history from the Enlightenment to the Welfare State with emphasis on the political, social, and economic development of modern Scandinavian nations of Denmark, Norway, Sweden, Finland, and Iceland. Offered: jointly with HSTEM 381.

SCAND 399 Foreign Study in Scandinavia (1-5, max. 20) Pre-Semester coursework in Scandinavia, including courses in English.

SCAND 402 International Political Economy and Scandinavia (5) I&S Overview of the most prominent theoretical approaches to the study of international political economy. Evaluates competing theories and applies these to explain contemporary problems in International Political Economy. Readings include examples from Scandanavia’s experience.

SCAND 403 Scandinavian Immigration in History and Literature (5) VLPA/IS History and literature of Scandinavian immigration to North America, including immigrant life and culture, community structures and traditions, and the literature about and by immigrants from Denmark, Finland, Iceland, Norway, and Sweden. Offered: jointly with HIST 403.

SCAND 427 Scandinavian Women Writers in English Translation (5) VLPA Selected works by major Scandinavian women writers from mid-nineteenth-century bourgeois realism to the present with focus on feminist issues in literary criticism. Offered: jointly with WOMEN 429.

SCAND 430 Readings in Folklore (5) VLPA Exploration of theoretical and methodological issues in folklore studies through independent reading of journal articles published during the last five years. Recommended: SCAND 230 or C LIT 230. Offered: jointly with C LIT 430.

SCAND 431 The Northern European Ballad (5) VLPA Integrative study of the Northern European Ballad, with an emphasis on texts, performance, context, history, theory, genre classification, and interpretive approaches. Offered: jointly with C LIT 431.

SCAND 445 War and Occupation in Northern Europe: History, Fiction, and Memoir (5) The study of literary representations (fiction, memoirs, and personal narratives) dealing with World War II and the occupation of the Nordic and Baltic countries. Offered: jointly with EURO 445.

SCAND 450 Scandinavian Literary History (3) VLPA Survey of Scandinavian literary history. Recommended: DANISH 203, FINN 203, NORW 203, or SWED 203.

SCAND 454 Baltic History (5) I&S Overview of the history of the area occupied by the Baltic countries of Latvia, Lithuania, and Estonia. Emphasizes their emergence as modern European nation-states. Era from World War I to present treated in depth, including the historical role and present situation of non-Baltic peoples, particularly Russians. Offered: jointly with HSTEM 454.

SCAND 460 History of the Scandinavian Languages (5) VLPA Development of languages from common Scandinavian to contemporary Danish, Norwegian, Swedish, Faroese, and Icelandic. Recommended: DANISH 203, FINN 203, NORW 203, or SWED 203.

SCAND 462 Isak Dinesen and Karen Blixen (5) VLPA The fiction of Isak Dinesen (pseudonym for Karen Blixen) reevaluated in light of current issues in literary criticism, particularly feminist criticism. Close readings of selected tales, essays, and criticism. Offered: jointly with WOMEN 462.

SCAND 480 Kierkegaard and Decadence in European Literature (5) VLPA Reading and discussion of core texts by Soren Kierkegaard, as well as a consideration of the relationship between Kierkegaardian thought and the literary practice of various writers of Scandinavian and European decadence. Offered: jointly with EURO 480.

SCAND 481 August Strindberg and European Cultural History (5) I&S/VLPA Examines the work of Swedish dramatist, novelist, and painter August Strindberg, in the context of European literary movements and history of ideas from 1880 to 1912, and Strindberg’s influence on 20th-century drama and film. Offered: jointly with EURO 481.

SCAND 482 Knut Hamsun and Early European Modernism (5) VLPA Reading and discussion of significant novels by Knut Hamsun, whose oeuvre is considered in the context of works by other European modernist writers. Offered: jointly with EURO 482.

SCAND 490 Special Topics (1-5, max. 15) Special topics in Scandinavian art, literature, culture, and history. Course offerings based on instructor’s specialty and student demand.

SCAND 495 Foreign Study: Research Project (1-5, max. 10) Research on approved topic.

SCAND 498 Senior Essay (5) VLPA Undergraduate research and the writing of a senior essay in Scandinavian area studies.

Intensive practice in conversation, reading, and writing. Recommended: ESTO 103 or ESTO 150. Offered: S.

ESTO 490 Supervised Reading (1-5, max. 10) Readings in a selected area of Estonian language, culture, or society.

Finnish

FINN 301 Topics in Finnish Language and Culture (5, max. 15) VLP A Topics in Finnish literature, life, and civilization. Recommended: FINN 203.

FINN 395 Foreign Study: Finnish Area Studies (1-5, max. 10) I&S Courses in Finnish history, society, and/or politics.

FINN 399 Foreign Study: Topics in Finnish Literature and Culture (1-5, max. 15) VLP A Topics in Finnish literature, life, and civilization.

LATV 490 Supervised Reading (1-5, max. 10) Readings in a selected area of Latvian language, culture, or society.

Lithuanian

LITH 102 Elementary Lithuanian (5) Fundamentals of oral and written Lithuanian.

LITH 150 Intensive Lithuanian (15) Fundamentals of oral and written Lithuanian. Intensive practice in speaking, reading, and writing. Interactive classroom, computer-assisted learning, language and reading laboratories. Emphasis on contemporary Lithuanian culture and society. If Lithuanian is the student's language of admission, only 10 credits count towards graduation.

LITH 490 Supervised Reading (1-5, max. 10) Readings in a selected area of Lithuanian language, culture, or society.

Norwegian

NORW 150 Intensive First-Year Norwegian (15) Fundamentals of oral and written Norwegian. Intensive practice in speaking, reading, and writing. Interactive classroom, computer-assisted learning, language and reading laboratories. Emphasis on contemporary Norwegian culture and society. If Norwegian is the student's language of admission, only 10 credits count towards graduation.

NORW 311 Drama After Ibsen (5) VLP A Recommended: NORW 203.

NORW 312 Topics in Norwegian Literature and Culture (5, max. 15) VLP A Topics related to Norwegian literature, life, and civilization. Recommended: NORW 203.

NORW 321 The Plays of Henrik Ibsen (5) VLP A Study of selected plays by Ibsen. Recommended: NORW 203.

NORW 395 Foreign Study: Norwegian Area Studies (1-5, max. 10) I&S Courses in Norwegian history, society, and/or politics.

NORW 399 Foreign Study: Topics in Norwegian Literature and Culture (1-5, max. 15) VLP A Topics in Norwegian literature, life, and civilization. Recommended: NORW 203.
Swedish

SWED 103 Elementary Swedish (5) Fundamentals of oral and written Swedish.

SWED 150 Intensive First-year Swedish (15) Fundamentals of oral and written Swedish. Intensive practice in speaking, reading, and writing. Interactive classroom, computer-assisted learning, language and reading laboratories. Emphasis on contemporary Swedish culture and society. If Swedish is the student’s language of admission, only 10 credits count towards graduation.

SWED 300 Swedish Women Writers (5) VLPA Readings from works by Swedish women writers. Recommended: SWED 203.

SWED 301 Topics in Swedish Literature and Culture (5, max. 15) VLPA Topics in Swedish literature, life, and civilization. Recommended: SWED 203.

SWED 302 The Swedish Novel (5) VLPA Selected works by novelists of the twentieth centuries. Recommended: SWED 203.

SWED 352 Strindberg and His Works (5) VLPA Representative short stories, dramas, autobiographical works, poems, and one novel. Recommended: SWED 203.

SWED 395 Foreign Study: Swedish Area Studies (1-5, max. 10) I&S Courses in Swedish history, society, and/or politics.

SWED 399 Foreign Study: Topics in Swedish Literature and Culture (1-5, max. 15) VLPA Topics in Swedish literature, life, and civilization.

SWED 490 Supervised Reading (1-5, max. 10) Readings in a selected area of Swedish language, literature, or related fields.

Slavic Languages and Literatures

Slavic Languages and Literatures

SLAVIC 408 Senior Honors Thesis ([3-9, max. 9]) VLPA Directed research on a topic approved by department for a thesis presented in partial fulfillment of requirement for degrees “with honors” or “with distinction.” Offered: AWSpS.

SLAVIC 600 Independent Study or Research (*)

SLAVIC 800 Doctoral Dissertation (*)

Bosnian, Croatian, Serbian

BCS 401 First Year Bosnian/Croatian/Serbian (5) Comprehensive introduction to spoken and written literary Bosnian, Croatian, and Serbian. Offered: A.

BCS 402 First Year Bosnian/Croatian/Serbian (5) Comprehensive introduction to spoken and written literary Bosnian, Croatian, and Serbian. Prerequisite: BCS 401, which may be taken concurrently. Offered: W.

BCS 403 First Year Bosnian/Croatian/Serbian (5) Comprehensive introduction to spoken and written literary Bosnian, Croatian, and Serbian. Prerequisite: BCS 402, which may be taken concurrently. Offered: Sp.

BCS 404 Second-Year Bosnian/Croatian/Serbian (5) VLPA Continuation of BCS 401, BCS 402, BCS 403; reinforces basic grasp of language and enlarges both vocabulary and command of grammatical patterns through the reading of contemporary short stories in Bosnian, Croatian, and Serbian. Prerequisite: 2.0 in BCS 403. Offered: A.

BCS 405 Second-Year Bosnian/Croatian/Serbian (5) VLPA Continuation of BCS 401, BCS 402, BCS 403; reinforces basic grasp of language and enlarges both vocabulary and command of grammatical patterns through the reading of contemporary short stories in Bosnian, Croatian, and Serbian. Prerequisite: 2.0 in BCS 404. Offered: W.

BCS 406 Second-Year Bosnian/Croatian/Serbian (5) VLPA Continuation of BCS 401, BCS 402, BCS 403; reinforces basic grasp of language and enlarges both vocabulary and command of grammatical patterns through the reading of contemporary short stories in Bosnian, Croatian, and Serbian. Prerequisite: 2.0 in BCS 405. Offered: Sp.

Bulgarian

BULGR 401 First-Year Bulgarian (5) Introduction to Bulgarian phonology and grammar in terms of the modern spoken language. Writing conventions of literary Bulgarian. Offered: A.

BULGR 402 First-Year Bulgarian (5) Introduction to Bulgarian phonology and grammar in terms of the modern spoken language. Writing conventions of literary Bulgarian. Prerequisite: BULGR 401. Offered: W.

BULGR 403 First-Year Bulgarian (5) Reading of modern texts to increase command of grammar and vocabulary. Prerequisite: BULGR 402. Offered: Sp.

BULGR 404 Second-Year Bulgarian (5) VLPA Continuation of 401, 402, 403. Selected readings in Bulgarian literature, history, and culture. Reinforces and extends basic knowledge of Bulgarian grammar and vocabulary. Prerequisite: 2.0 in BULGR 403. Offered: A.

BULGR 405 Second-Year Bulgarian (5) VLPA Continuation of 401, 402, 403. Selected readings in Bulgarian literature, history, and culture. Reinforces and extends basic knowledge of Bulgarian grammar and vocabulary. Prerequisite: BULGR 404. Offered: W.

BULGR 406 Second-Year Bulgarian (5) VLPA Continuation of 401, 402, 403. Selected readings in Bulgarian literature, history, and culture. Reinforces and extends basic knowledge of Bulgarian grammar and vocabulary. Prerequisite: BULGR 405. Offered: Sp.

Czech

CZEC 401 First-Year Czech (5) Introduction to spoken and written Czech. Offered: A.

CZEC 402 First-Year Czech (5) Introduction to spoken and written Czech. Prerequisite: CZEC 401. Offered: W.

CZEC 403 First-Year Czech (5) Modern Czech prose, leading to a command of the language as a research tool and providing an adequate basis for further study. Prerequisite: CZEC 402. Offered: Sp.

CZEC 404 Second-Year Czech (5) VLPA Continuation of 401, 402, 403. Selected readings from the main works of Czech authors of the nineteenth and twentieth centuries. Reinforces and extends basic knowledge of Czech grammar and vocabulary. Prerequisite: 2.0 in CZEC 403. Offered: A.

CZEC 405 Second-Year Czech (5) VLPA Continuation of 401, 402, 403. Selected readings from the main works of Czech authors of the nineteenth and twentieth centuries. Reinforces and extends basic knowledge of Czech grammar and vocabulary. Prerequisite: CZEC 404. Offered: W.

CZEC 406 Second-Year Czech (5) VLPA Continuation of 401, 402, 403. Selected readings from the main works of Czech authors of the nineteenth and twentieth centuries. Reinforces and extends basic knowledge of Czech grammar
Polish

POLSH 320 Introduction to Contemporary Polish Culture (5) VLPA Overview of contemporary Polish culture: literature (prose, poetry, and drama), film (feature, documentary, and video art), music (classical, jazz, and rock), theatre, art, and architecture, as well as an introduction to the cultural life in Poland in the 21st century. Offered: AW.

POLSH 401 First-Year Polish (5) Principal morphological and syntactic features of the Polish language through the medium of a basic vocabulary. Cannot be taken for credit if Polish is the student’s language of admission. Offered: A.

POLSH 402 First-Year Polish (5) Designed to enlarge general vocabulary by the reading of short texts selected from Polish authors of the nineteenth and twentieth centuries. Prerequisite: POLSH 402. Offered: Sp.

POLSH 403 Second-Year Polish (5) VLPA Continuation of 401, 402, 403. Selected readings of the main works from the nineteenth and twentieth centuries. Reinforces basic knowledge of vocabulary, grammatical patterns, and conversation. Prerequisite: 2.0 in POLSH 403. Offered: W.

POLSH 404 Second-Year Polish (5) VLPA Continuation of 401, 402, 403. Selected readings of the main works from the nineteenth and twentieth centuries. Reinforces basic knowledge of vocabulary, grammatical patterns, and conversation. Prerequisite: POLSH 404. Offered: Sp.

POLSH 405 Second-Year Polish (5) VLPA Continuation of 401, 402, 403. Selected readings of the main works from the nineteenth and twentieth centuries. Reinforces basic knowledge of vocabulary, grammatical patterns, and conversation. Prerequisite: POLSH 405. Offered: Sp.

Polish

RUSS 101 First-Year Russian (5) Introduction to Russian. Emphasis on oral communication with limited vocabulary. Short readings and writing exercises. Basic grammar. Conducted mostly in Russian. See credit note above. Offered: A.

RUSS 102 First-Year Russian (5) Introduction to Russian. Emphasis on oral communication with limited vocabulary. Short readings and writing exercises. Basic grammar. Conducted mostly in Russian. See credit note above. Prerequisite: RUSS 101. Offered: W.

RUSS 103 First-Year Russian (5) Continuation of RUSS 103. Emphasis on oral communication with limited vocabulary. Short readings and writing exercises. Basic grammar. Conducted mostly in Russian. See credit note above. Prerequisite: RUSS 102. Offered: W.

Not open for credit to students who have taken SOC 112.

SOC 220 Introduction to Sociological Methods (5) I&S, QSR Familiarizes students with the logic of analysis in social sciences. Students learn to recognize good research design, understand and interpret main arguments employing different methods, and evaluate whether research findings support stated conclusions.

SOC 222 Sociology of Sport (5) I&S Weis Introduction to the sociological analysis of sport. Issues discussed include the history, definition, and functions of sport; role of sport in the socialization of children; the relationship between sport and values; athletics within the social organization of education; deviance, crime, and violence in sport; the business and economics of sport.

SOC 240 Introduction to Social Psychology (5) I&S Introduction to social psychology with an emphasis on sociological perspectives and problems.

SOC 247 Contemporary Social Movements (5) I&S Introduction to contemporary social movements and national-level collective mobilizations organized for political change. Examination on how political, organizational, and cultural factors shape social movement emergence and development, and individual participation.

SOC 260 African American Family (5) I&S Scott Explores the structures and functioning of various types of black families. Single-parent families, two-parent families, extended families, and consensual families are explored. Their consequences for male/female relationships are linked and critiqued. Offered: jointly with AFRAM 260.

SOC 261 The African-American Experience Through Literature (5) I&S/VLPA Scott Explores the structures and functioning of various types of black families. Single-parent families, two-parent families, extended families, and consensual families are explored. Their consequences for male/female relationships are linked and critiqued. Offered: jointly with AFRAM 260.

SOC 265 Globalization and the Transformation Economy and Society in Asia (5) I&S Hamilton Examines the rapid and extensive social and economic development throughout Asia since the mid-20th century; the corresponding retail revolution in the American economy; the evolution of characteristic Asian product categories; and the impact of these developments on the social and economic organization of Asian economies. Offered: jointly with SISA 265.

SOC 270 Social Problems (5) I&S Processes of social and personal disorganization and reorganization in relation to poverty, crime, suicide, family disorganization, mental disorders, and similar social problems.

SOC 271 Introduction to the Sociology of Deviance and Social Control (5) I&S Examination of deviance, deviant behavior, and social control. Deviance as a social process; types of deviant behavior (e.g., suicide, mental illness, drug use, crime, "sexual deviance," delinquency); theories of deviance and deviant behavior; nature and social organization of societal reactions; and social and legal policy issues.

SOC 275 Murder (5) I&S Weis Introduces topics related to the crime of murder, including: laws of homicide; research on the characteristics of victims, killers, and murderers; theories of murder and related violence; investigation strategies; and crime and control policies.

SOC 287 Introduction of the Sociology of Sexuality (5) I&S Examines sexuality on the basis of social construction of norms and values, within the context of gender, race, class, and sub-cultures and in the social control of sexuality and why it is so highly regulated. Looks for social, rather than biological or personal explanations for why human sexuality is conceptualized or practiced in a certain way.

SOC 292 Who Gets Ahead? Public Schooling in America (5) I&S LePore Addresses fundamental questions about the relationship between education and society. Examines why some students learn more and advance further than others; what factors shape how schools are run/organized and which materials are taught; how race/class/gender affect students within schools; how schools maintain our economic system and can become more effective.

SOC 299 Sociology Interest Group (2) I&S Provides opportunity for students new to the major, or contemplating the major, to meet twice weekly in a small group to discuss issues relating to two designated five-credit sociology courses. Concurrent enrollment in the two five-credit designated courses required. See department adviser.

SOC 301 War (5) I&S Origins and conduct of war, readings from anthropology, political science, economics, and history, as well as two novels and some recent articles on the arms-control controversy. Modern forms of warfare, including guerrilla war, world war, and nuclear war. Offered: jointly with SIS 301.

SOC 316 Introduction to Sociological Theory (5) I&S Introduction to sociological theory. Includes classical theorists Adam Smith, Karl Marx, Emile Durkheim, and Max Weber and their influence on contemporary theoretical debate.

SOC 320 Evaluating Social Science Evidence (5) I&S, QSR Morris A critical introduction to the methods used to collect data in social science: surveys, archival research, experiments, and participant observation. Evaluates "facts and findings" by understanding the strengths and weaknesses of the methods that produce them. Case based. Offered: jointly with CS&SS 320/STAT 320.

SOC 322 Case-Based Statistics II (5) I&S, QSR Hancock Continuation of CS&SS/
and sometimes even executed? Offered: jointly with LSJ 476.

SOC 481 Issues in Analytic Sociology (5, max. 15) I&S Examination of current issues in sociological analysis. Specific content of the course varies according to recent developments in sociology and the interests of the instructor.

SOC 482 Issues in Analytic Sociology (3, max. 9) I&S Examination of current issues in sociological analysis. Specific content of the course varies according to recent developments in sociology and the interests of the instructor.

SOC 483 Issues in Analytic Sociology (1-3, max. 9) I&S Examination of current issues in sociological analysis. Specific content of the course varies according to recent developments in sociology and the interests of the instructor.

SOC 487 Sociology of Gender and Sexuality (5) I&S Addresses the intersection of gender and sexuality in U.S. society, social institutions and movements, families, and the individual. Topics include the history of sexuality as practiced and politicized since colonial times, major theoretical approaches to sexuality, and how gender and other social status characteristics influence the meanings of sexuality.

SOC 490 The Urban Underclass (5) I&S Examines underlying issues which have led to the emergence and perpetuation of an underclass within an affluent society. Explores some of the consequences for these people and for this society. Considers policies that might be used to address problems of the urban underclass.

SOC 492 Sociology of Education (5) I&S Emphasizes the ways in which schools and colleges reproduce, reinforce, and challenge prevailing social, economic, and political relationships. Examines the structures, practices, content, and outcomes of schooling and its relationship to the wider society as well as the rise and dynamics of the modern education system.

SOC 494 Practicum in Sociology (5, max. 15) Exploration of selected sociological concepts or problems through advanced practical experience in research, internships, or other applications. Topics vary.

SOC 495 Honors Senior Thesis (1-5, max. 5) I&S Preparation of senior honors thesis. Sociology majors only.

SOC 496 Honors Senior Seminar (3/5) I&S Exploration of selected sociological problems with emphasis on research experience and the interpretation of data. For sociology majors only, primarily for honors students. Offered: A.

SOC 497 Honors Senior Seminar (3/5) I&S Exploration of selected sociological problems with emphasis on research experience and the interpretation of data. For sociology majors only, primarily for honors students. Offered: W.

SOC 498 Undergraduate Independent Study or Research (2-5, max. 10) Credit/no credit only.

SOC 500 Teaching Sociology as a Teaching Assistant (1) Techniques of quiz section administration, advising of students, and student evaluation important to successful teaching as a Teaching Assistant. Students develop presentations and classroom materials and develop and grade student examinations. Credit/no credit only. Prerequisite: admission to graduate program in sociology.

SOC 501 Proseminar (1-3, max. 3) Introduction for first-year graduate students to substantive areas of sociology, research and information resources, data sources, graduate education and professional socialization. Credit/no credit only. Offered: AWSp.

SOC 502 Seminar on Teaching Sociology (3) Techniques of lecturing, leading discussion, evaluating student performance, and other pedagogical skills ancillary to successful teaching. Students develop a course and obtain videotaped feedback of presentations. Prerequisite: completion of MA.

SOC 503 Seminar on Writing Social Science (3) Techniques, skills, and strategies helpful for publishing in the social sciences. Includes writing and revision of own work and evaluation of the writing of other students. Also includes social scientific analysis of writing and other forms of academic communication. Prerequisite: completion of MA.

SOC 507 Statistical Classification and Measurement (3) Application of statistical principles and methods to problems of classification and measurement in social research.

SOC 508 Logic of Social Inquiry (3) Study design from problem formulation to the analysis and interpretation of data.

SOC 509 Practicum in Data Analysis (3) Introduction to selected programs for data analysis and practice in their application. Practice in coordination research problem, data, and mode of analysis into a coherent, interrelated set. Interpretation of results. Offered: A.

SOC 510 Seminar in Sociological Theory (3) Macrosociological theories; functionalism and neoevolutionism; conflict and consensus approach; comparative strategies; models and long-range theories; ideology and sociology. From Marx and de Tocqueville to contemporary literature.

SOC 511 Classical Social Theory (3) Study of classical masters of social theory: Marx, Durkheim, and Weber, their precursors, and their immediate successors.

SOC 514 Current Theories in Social Psychology (3) Broad graduate-level introduction to the theories in the field of social psychology.

SOC 515 Current Research in Social Psychology (3) Howard Broad graduate-level introduction to the research in the field of social psychology.

SOC 516 Organizations (3) Broad graduate-level introduction to the theory and research on complex organizations.

SOC 517 Deviance and Social Control (3) Survey of current research on deviant behavior and mechanisms of social control; definitions and forms of deviant behavior, causal analysis, and legal or other methods of social control.

SOC 518 Social Stratification (3) Intensive preparation in theoretical, methodological, and substantive topics in social stratification.

SOC 519 Fieldwork: Observation and Interviewing (3) I&S Perspective, logic, and techniques of qualitative social research and analysis. Nature and uses of intensive interviewing, participant observation, and analytic ethnography. Application of field research principles. Research project required in addition to reading and analysis of classic studies.

SOC 520 Fieldwork: Observation and Interviewing (-3) Logic and techniques of qualitative social research and analysis. Intensive interviewing, participant observation, qualitative data analysis (including applications of data base technology, problem reformulation, and techniques of visual documentation). Results of student work reported and discussed in class.

SOC 526 Causal Approach to Theory Building and Data Analysis (3) Theory construction and testing from a causal models perspective. Path analysis, standardized versus unstandardized measures, feedback models, identification problems, estimation in overidentified models, difference equations, differential equations, stability conditions. Multiplicative models as alternatives to additive ones. Causal approach to measurement error.

SOC 527 Measurement of Basic Sociological Concepts (3) Conceptualization and measurement problems in sociology, using major concepts as illustrations of basic issues. Causal approach to measurement to deal with problems of indirect measurement, cross-level measurement problems, aggregation and disaggregation. Consequences of crude measurement for data analyses. Prerequisite: SOC 504; recommended: SOC 506.

SOC 528 Seminar on Selected Statistical Problems in Social Research (3) Raftery Prerequisite: SOC 506.
SOC 529 Structural Equation Models for the Social Sciences (3) Structural equation models for the social sciences, including specification, estimation, and testing. Topics include path analysis, confirmatory factor analysis, linear models with latent variables, MIMIC models, non-recursive models, models for nested data. Emphasizes discussion of substantive issues in problems in the social sciences. Prerequisite: SOC 504, SOC 505, SOC 506 or equivalent; recommended: CS&SS 505 and CS&SS 506, or equivalent. Offered: jointly with CS&SS 526.

SOC 535 Research Issues in Demography and Population Studies (1-2, max. 7) Interdisciplinary seminar on current research issues in demography and population studies. Critical analysis and discussion of readings drawn from anthropological, economic, geographic, and sociological approaches.

SOC 536 Analysis of Categorical and Count Data (3) Raftery Analysis of categorical data in the social sciences. Binary, ordered, and multinomial outcomes, event counts, and contingency tables on maximum likelihood estimations and interpretations of results. Prerequisite: SOC 504, SOC 505, SOC 506, or equivalent; recommended: CS&SS 505 and CS&SS 506, or equivalent. Offered: jointly with STAT 536/CS&SS 536.

SOC 537 Modeling Emergence: Social Simulation (3) Seminar and practicum in computational modeling of social processes with emphasis on using agent-based simulation models to investigate and refine theory.

SOC 539 Selected Topics in Demography and Ecology (3, max. 9) Specialized problems in demography or ecology are covered; for example, migration, fertility, mortality, language, race and ethnic relations, metropolitan community. See quarterly announcement for specific problem to be covered.

SOC 542 Selected Topics in Group Processes (3) Theories, methodology, and studies in the area of small-group research. Prerequisite: permission of instructor for nonmajors.

SOC 543 Seminar on Group Solidarity (3) Interdisciplinary perspectives on solidarity, focusing on membership commitment, group structure, and contributions to collective goals.

SOC 547 Social Cognition and Attribution (3) Theories and research on social cognition and attribution. Theoretical and methodological debates on cognition. Sociological aspects of attribution. Prerequisite: SOC 514 or equivalent.

SOC 550 Changing Patterns of Family Organization (3) History of the family with emphasis on changes in European and American families since 1600. Concomitant changes in other institutions and their relation to changes in the family.

SOC 551 Family and Gender Relations (3) Overview of major research findings on marriage, the family, and gender, including demographic trends, the place of children in society, courtship, the internal management of intimate relationships, divorce, and social policy.

SOC 553 Seminar on Gender and Sexuality (3) Research seminar considering theoretical and empirical approaches to sexuality, with particular attention to the importance of gender. Examines the social control of sexuality by the state and by families, as well as social meanings of sexuality within social movements related to various aspects of sexuality.

SOC 554 Seminar in the Sociology of Religion (3) Survey of significant and active areas of theory and research in contemporary social scientific studies of religion.

SOC 555 Methods in Macro, Comparative, and Historical Sociology (3) Systems of conducting research with qualitative methods brought to bear on broad questions.

SOC 559 Seminar on Gender Roles (3) Broad graduate-level introduction to theoretical issues concerning gender and society. Current state of empirical knowledge on the sociology of gender and strategies for research. Cross-cultural variations in conception of gender roles and how gender interacts with social institutions and social interactions.

SOC 562 Seminar in Comparative Race Relations (3) Cross-cultural approach to race and ethnicity, with special case studies from Africa and Latin America. Prerequisite: graduate standing in social sciences.

SOC 565 Inequality: Current Trends and Explanations (3) Discussion of recent growth in economic inequality in the U.S. and competing explanations for these new trends through examination of labor market demographics, industrial composition and restructuring, and the broader political context that impacts policies like minimum wage, strength of unions, and foreign trade. Prerequisite: SOC 504, SOC 505, SOC 506, or equivalent; recommended: CS&SS 505 and CS&SS 506, or equivalent. Offered: jointly with CS&SS 565.

SOC 566 Seminar in Complex Organizations (3) Special topic seminars in the field of complex organizations or industrial sociology.

SOC 567 Seminar in Complex Organizations (3) Special topic seminars in the field of complex organizations or industrial sociology.

SOC 568 Social Mobility (3) Description and measurement of social mobility. Determinants of mobility and cross-national comparisons. Consequences of mobility for social behaviors. Emphasizes movement from the socioeconomic position of family of origin to adult position. Prerequisite: SOC 518.

SOC 569 Demographic Studies of Stratification (3) Overview of development of models of socioeconomic achievement ("status attainment" paradigm) in the field of stratification. Begins with work of Blau and Duncan. Covers elaboration of basic models to include race and ethnicity, social psychological variables, class, school and labor market effects, and other structural variables. Prerequisite: SOC 513, SOC 518.

SOC 570 Seminar on Environmental Sociology (3) Perspectives on environmental sociology, with emphasis on the social construction of environmental problems in European and American schools of thought and their implications for environmental policy. Examination of global and regional issues in the context of risk society. Offered: jointly with CPR 570; A.

SOC 574 Seminar in Methods of Criminological Research (3) Provides training in the technical analysis of published research in criminology; designs and processes studies in patrol prediction, prediction of prison adjustment, and prediction of treatment effect.

SOC 575 Social Movements: Politics and Organization (3) Theoretical perspectives and research on the dynamics of national social movements from a macrosociological perspective. Introduces dominant models that stress organizational and political processes, with some examination of approaches that consider the intersection of politics, organization, and culture. Emphasis on the United States.

SOC 581 Special Topics in Theory and the History of Sociological Thought (3, max. 9) Examination of current topics in theory and the history of sociological thought. Content varies according to recent developments in the field and the interests of the instructor.

SOC 582 Special Topics in Research Methods and Statistical Analysis in Sociology (3, max. 9) Examination of current topics in research methods and statistical analysis in sociology. Content varies according to recent developments in the field and the interests of the instructor.

SOC 584 Special Topics in Social Psychology (3, max. 9) Examination of current substantive topics in social psychology. Content varies according to recent developments in the field and the interests of the instructor.

SOC 585 Special Topics in Marriage and Family (3, max. 9) Examination of current substantive topics in marriage and the family. Content varies according to recent developments in the field and the interests of the instructor.

SOC 586 Special Topics in Organization and Industrial Sociology (3, max. 9) Examination of current substantive topics in organizational and industrial sociology. Content varies according to recent developments in the field and the interests of the instructor.

SOC 587 Special Topics in Deviance and Social Control (1-3, max. 9) Examination of current substantive topics in deviance and social control. Content varies according to recent developments in the field and the interests of the instructor.

SOC 588 Special Topics in Stratification and Race Relations (3, max. 9) Examination of current substantive topics in stratification and race relations. Content varies according to recent developments in the field and the interests of the instructor.

SOC 589 Special Topics in Macrosociology (3, max. 9) Examination of current substantive topics in macrosociology. Content varies according to recent developments in the field and the interests of the instructor.

SOC 590 Special Topics in Sociology (1-3, max. 9) Examination of current substantive topics in sociology. Content varies according to recent developments in the field and the interests of the instructor. Topics covered in
Speech and Hearing Sciences

SPHSC 100 Voice and Articulation Improvement (3) VLPA For native speakers of English only. Voice production and the sound system of standard American speech. Speech standards, regional and social dialects, voice quality and basic language-oriented characteristics. Practice for improving speech style. May not be repeated. Offered: AWSpS.

SPHSC 111 The American English Sound System (2, max. 4) For non-native speakers of English only. Speech sounds of American English. Practice in listening and using American speech sounds and intonation patterns. Credit/no credit only. Offered: AWSpS.

SPHSC 161 The Science of Auditory Space (5) NW Stecker A hands-on introduction to the scientific method exploring the abilities of human listeners to localize sounds in space. Students will develop questions and hypotheses, design and run experiments, and evaluate evidence for and against candidate explanations of human auditory performance. Activities include classroom experiments and computer exercises. Offered: A.

SPHSC 250 Human Communication and Its Disorders (5) I&S/NW Overview of normal and impaired human communication, including speech, language, and hearing disorders. Required for majors, open to nonmajors. Offered: AS.

SPHSC 261 The Nature of Sound (4) NW Fundamental principles of sound and vibration with emphasis on examples relevant to the speech and hearing systems. Required for majors; open to nonmajors. Recommended: MATH 101. Offered: W.

SPHSC 300 Introduction to the Science of Learning: From Biology to Behavior (5) NW Kuhl Introduction to research on human learning, taking advantage of new findings in neuro-science and behavior to examine learning from early infancy to advanced adulthood. Follows historical descriptions and studies of learning to modern formulations that include how the brain unconsciously reacts to and stores information. Offered: Sp.

SPHSC 302 Phonetics (3) VLPA Introduction to the description and classification of speech sounds with a focus on American English. Phonetic analysis of segmental and suprasegmental properties of speech. Practice using the International Phonetic Alphabet to transcribe normal and disordered speech patterns. Required for majors; open to nonmajors. Prerequisite: either SPHSC 303, LING 200, or LING 400. Offered: W.

SPHSC 303 Language Science (3) VLPA Introduction to techniques of linguistic analysis used in the study of phonology, morphology, syntax, and semantics. Required for majors; open to nonmajors. Offered: A.

SPHSC 304 Developmental Aspects of Communication (5) I&S Patterns of communicative development in English speaking children and adolescents. Introduction to the study of language and communication from a development-mental perspective. Application to children with various types of communication impairments. Required for majors; open to nonmajors. Prerequisite: either SPHSC 303, ANTH 203, LING 200, or LING 400; may not be repeated. Offered: Sp.

SPHSC 305 Speech and Language Disorders (5) NW Elision and repair of developmental and acquired communication disorders across the lifespan. Behavioral characteristics of language delay and disorders, developmental apraxia of speech, phonological disorders, stuttering, acquired aphasia, apraxia of speech and dysarthria, craniofacial anomalies, and voice disorders. Required for majors; open to nonmajors. Prerequisite: SPHSC 302; SPHSC 304; SPHSC 320. Offered: A.

SPHSC 308 Social-Cultural Aspects of Communication (3) I&S Introduction to human communication in context. Exploration of ways communication is influenced by context, including situational, social/interpersonal, and cultural variables. Studies systems and cultural practices as they influence communication. Required for majors; open to nonmajors. Offered: WSUs.

SPHSC 320 Anatomy and Physiology of Speech (5) NW Anatomy and physiology of the respiratory, laryngeal, and articulatory systems. Examples and laboratory work are directed toward clinical issues in Speech-Language Pathology. Required for majors; open to nonmajors. Offered: Sp.

SPHSC 391 Practicum in Audiology (1-4, max. 10) Guided experiences in audiological assessment and aural rehabilitation of children and adults. Credit/no credit only. Offered: AWSpS.

SPHSC 405 Diagnosis of Speech and Language Disorders (3) NW Principles and procedures for the diagnosis of speech and language disorders. Required for majors. Prerequisite: SPHSC 305. Offered: W.

SPHSC 406 Treatment of Speech and Language Disorders (4) NW Principles and procedures for planning, implementing, and evaluating treatment for speech and language disorders. Required for majors. Prerequisite: SPHSC 405; may not be repeated. Offered: SpS.

SPHSC 411 Perceptual Development (5) I&S/ NW Metzoff Origins and development of perception in human infancy. Object, face, and speech perception; cross-modal relations between touch, vision, audition. Prerequisite: 2.0 in either PSYCH 206, PSYCH 306, or PSYCH 414. Offered: jointly with PSYCH 411.

SPHSC 425 Speech, Language, and the Brain (5) NW Historical perspectives and current research on speech acoustics, speech perception, and brain processing of speech information; speech development; techniques used in speech analysis; machine recognition of speech; brain imaging techniques, animal communication systems; speech evolution; implications for impaired populations. May not be repeated. Offered: A.

SPHSC 445 Models of Speech Processing (3) NW Examines models and basic issues concerning how spoken language is processed. Presents current issues, theories, and research relative to the levels of processing entailed in producing and comprehending speech. Required for majors; open to nonmajors. Recommended: SPHSC 302; SPHSC 303; SPHSC 320; SPHSC 425. Offered: SpS.

SPHSC 449 Special Studies in Speech Pathology and Audiology (*) (max. 30) Selected special problems in speech pathology and audiology. Offered: S.

SPHSC 461 Introduction to Hearing Science (5) NW Basic aspects of hearing and the ear and auditory nervous system. How the auditory system constructs an image of the acoustic environment. How attention and memory influence hearing. Effects of damage to the auditory system. Prerequisite: either SPHSC 261 or PSYCH 333. Offered: Sp.

SPHSC 462 Hearing Development (3) NW Description of the changes that occur in human hearing during development. Consideration of the possible explanations for early immaturity. Prerequisite: SPHSC 461; may not be repeated. Offered: even years; A.

SPHSC 471 Basic Audiometry (5) NW Theory and practice of the assessment of hearing function, including standard pure-tone audiom-etry, speech audiometry, and basic imperative audiometry. Required for majors. Prerequisite: SPHSC 371; SPHSC 461; may not be repeated. Offered: AWS.

SPHSC 481 Management of Hearing Loss (4) NW Introduction to methods of communicative rehabilitation of person with hearing loss. Remediation principles of auditory and visual perception, amplification, communication strategies, and information counseling. Required for majors. Prerequisite: SPHSC 471; may not be repeated. Offered: WSp.

SPHSC 491 Audiology Practicum in Schools (2) Special projects in clinical audiology practicum, offered only in the school setting. Provides an opportunity for students to extend audiology practicum experiences into the school environment. Prerequisite: SPHSC 471. Offered: AS.

SPHSC 499 Undergraduate Research (1-5, max. 15) Offered: AWSpS.

SPHSC 500 Clinical Methodology for Documenting Change (4) Introduction to clinical methodology for examining efficacy of
treatments for individuals with communication problems. Students consider nature of intervention designed to alter communication disorders and types of accountability questions that need to be raised. They learn methodology for collecting and analyzing data to document effectiveness, effects, and efficiency of treatments.

SPHSC 501 Neural Bases of Speech, Language, and Hearing (4) Neuroanatomical and neurophysiological bases of language, hearing, sensory, and motor function. Special emphasis given to brain behavior correlates and behavioral consequences to speech, language, and hearing as a result of neurologic injury or disease.

SPHSC 502 Advanced Anatomy of Speech and Hearing Structures (2) Directed independent dissection and study of selected anatomical structures of the speech and hearing mechanisms.

SPHSC 503 Current Issues in Speech and Hearing Sciences (3) Application of experimental methods to research in speech and hearing sciences.

SPHSC 504 Research Methods in Speech and Hearing Sciences (3) Introduction to empirical methods in the speech and hearing sciences.

SPHSC 505 Clinical Research in Communication Disorders (3) Introduction to clinical research. Methodological issues concerning the evaluation of treatment for speech, hearing, and language disorders. Primary emphasis on time series designs. Prerequisite: SPHSC 504 or permission of instructor.

SPHSC 506 Evidence-based Practice in Speech-Language Pathology I (3) Eadie Examines empirical methods in speech-language pathology research. Included an introduction to principles of evidence-based practice. Includes evaluation and design of different types of research such as descriptive (e.g., case study, developmental, qualitative, surveys), exploratory (e.g., correlational, differential), and experimental (e.g., single-subject designs, randomized control trials, treatment efficacy studies). Offered: A.

SPHSC 507 Evidence Based Practice II (2) Dowden Examines use of “internal” evidence collected by clinicians for decision-making in Speech-Language Pathology, according to Evidence Based Practice principles. Builds upon SPHSC 500 and 506, preparing student to apply EBMP model to treatment of speech/language disorders. Prerequisite: SPHSC status, or permission of instructor. Offered: W.

SPHSC 508 Evidence Based Practice III (2) Dowden Develops Critically Appraised Topics (CATs) to examine evidence for clinically relevant questions, issues, and topics. Builds upon SPHSC 500, SPHSC 506, and SPHSC 507, preparing students to apply Evidence Based Practice principles to decision-making in Speech-Language Pathology. Prerequisite: graduate status in SPHSC or permission of instructor. Offered: Sp.

SPHSC 509 Advanced Hearing Science (3) Souza Consideration of physiological acoustics and psychoacoustics, the pertinent literature, and the experimental techniques related to study in these areas. Offered: A.

SPHSC 510 Physiological Acoustics (3) Study of pertinent literature and experimental techniques incident to the physiology of the normal and abnormal auditory system. Prerequisite: SPHSC 461.

SPHSC 511 Psychoacoustics (3) Review of significant literature and theory pertinent to normal auditory sensitivity, pitch, loudness, and other attributes of auditory sensation. Prerequisite: SPHSC 461, SPHSC 510.

SPHSC 514 Speech Physiology (3) Study of the physiological parameters of acoustic speech production. Prerequisite: SPHSC 320, SPHSC 461.

SPHSC 515 Speech Acoustics (3) Study of the acoustical correlates of the distinctive parameters of speech. Prerequisite: SPHSC 320, SPHSC 461, SPHSC 514.

SPHSC 516 Speech Perception (3) Study of the perceptual and linguistic parameters of speech perception. Prerequisite: SPHSC 320, SPHSC 461, SPHSC 515.

SPHSC 519 Seminar in Speech Science (2, max. 6)

SPHSC 520 Advanced Instrumentation for Speech and Hearing Sciences (3) Design and use of electronic and electroacoustic devices in the speech and hearing sciences. Four hours of laboratory required each week.

SPHSC 521 Instrumentation for Audiology (4) Introduction to basic instrumentation used in audiology and hearing science; detailed instruction in audiometer calibration including a review of current national and international standards pertinent to audiology; emphasis on use rather than theory. Prerequisite: permission of instructor.

SPHSC 522 Hearing Instrument Modification/Repair (1) Minor repair of hearing aids or associated accessories. Includes operation of hand tools and small power tools used in repair. Familiarity with different materials used to make or repair hearing aids/accessories. Troubleshoot damaged, malfunctioning, or inoperative instruments. Interpreting acoustic and electroacoustic test results to aid in troubleshooting or repair.

SPHSC 523 Special Topics (3) Applied and theoretical issues related to audiology. Weekly seminar includes guest speakers discussing current and future trends in science that relate to hearing and the practice of audiology.

SPHSC 525 Speech Signal Processing (3) Theory, evaluation, and use of speech signal processing algorithms such as sampling, filtering, spectral analysis, autocorrelation, and speech synthesis. Laboratory assignments develop skills in using signal analysis and synthesis software applied to normal and pathological speech.

SPHSC 526 Assessment and Treatment of Lipic Disorders (4) Betz Examines the principles and procedures used in the assessment and treatment of literacy disorders with an emphasis on childhood literacy disorders as well as the relationship between verbal language impairment and literacy skills. Prerequisite: SPHSC 536. Offered: W.

SPHSC 529 Assessment and Treatment of Birth-to-4 Communication Disorders (4) Cogswell Examination of measurement concepts, standardized reference measures, and non-standardized assessment tools for communication and related skills in young children. Presents theoretical and empirical bases of prelinguistics and early language interventions. Offered: A.

SPHSC 530 Assessment and Treatment of Adolescent Communication Disorders (3) Examines the principles and procedures used in the assessment and treatment of adolescent school-aged speech and language disorders. Prerequisite: SPHSC 303 and SPHSC 304, or equivalent.

SPHSC 532 Assessment and Treatment of Adult Neurogenic Communication Disorders (4) Examines the principles and procedures used in the assessment and treatment of adult neurogenic communication disorders. Prerequisite: SPHSC 501 or permission of instructor.

SPHSC 533 Medical Speech Pathology (3) Nature of speech pathology practiced in medical settings. Prerequisite: SPHSC 501, SPHSC 531, and SPHSC 532, or permission of instructor.

SPHSC 534 Assessment and Treatment of Dysphagia (4) Artelan Anatophysiologic bases of function and dysfunction associated with speech-language disorders. Mastication and swallowing problems, their causes, assessments, and management. Prerequisite: SPHSC 501 or permission of instructor.

SPHSC 535 Assessment and Treatment of Voice Disorders (4) Physiology, acoustics, and perception of voice quality and speech resonance. Etiology, evaluation, and treatment of voice and resonance disorders.

SPHSC 536 Assessment and Treatment of Elementary School-Age Communication Disorders (4) Examines the principles and procedures used in the assessment and treatment of elementary school-aged speech- and language disorders.

SPHSC 537 Fluency Disorders (4) Characteristics of fluent speech and the nature and treatment of stuttering in children and adults are studied in relation to normal speech production processes, human learning, principal explanations of stuttering, and treatment systems.

SPHSC 539 Childhood Speech and Phonological Disorders (4) Examines patterns of normal speech and phonological development and the nature, assessment, and treatment of speech and phonological disorders of childhood.

SPHSC 540 Augmentative and Alternative Communication - Development (4) Dowden Evaluation and intervention for children and adults with severe congenital speech and language impairments. Examines decision-making and treatment, using multi-modal communication strategies, from low-tech books, and picture exchange to complex voice output systems. Prerequisite: graduate SPHSC, REHAB, or EDSPED students, or permission of instructor. Offered: W.

SPHSC 541 Augmentative and Alternative Communication: Acquired (4) Dowden Evaluation and intervention for severe acquired speech/language impairments. Covers decision-
making and treatment for individuals who sustained a stroke, traumatic brain injury, or degenerative disease. Solutions include multi-modal strategies, from books to voice output systems. Prerequisite: SPHSC 540 or permission of instructor. Offered: Sp.

SPHSC 542 Counseling and Interactive Skills for Speech-Language Pathologists and Audiologists (3) Introduction to counseling theory and practice in speech-language pathology, and related fields. Provides opportunities for learning and practicing counseling skills. Addresses key counseling issues, including professional boundaries, intense emotions, and counselor’s feelings and reactions. Prerequisite: graduate standing or permission of instructor.

SPHSC 543 Assessment and Treatment of Pediatric Dysphasia (3) Faherty, Pinder
Examine principles and procedure used in the assessment and treatment of pediatric swallowing and feeding disorders. Covers clinical and instrumental assessment techniques and evidence-based intervention strategies applicable to the infant/child across different pediatric practice settings. Prerequisite: SPHSC 501; SPHSC 530; SPHSC 534; or permission of instructor. Offered: S.

SPHSC 545 Assessment and Treatment of Voice Disorders in Medical Settings (4) Eadie, Nevadahl
Examines the principles and procedures used in assessment and treatment of voice disorders typically seen in medical settings, with a focus on instrumentation such as use of interpretation of laryngeal imaging, acoustics, and perceptual measures. Prerequisite: SPHSC 535. Offered: A.

SPHSC 546 Advanced Neurological Language Disorders (4) Nature, assessment, and treatment of acquired language disorders, including aphasia, alexia, and agraphia. Prerequisite: SPHSC 501; SPHSC 502; or permission of instructor. Offered: Sp.

SPHSC 549 Clinical Forum (1-3) Culminating presentation for faculty and staff. Participation in the following activities: review of literature pertinent to patient population, data collection for treatment, data analyses, efficacy analyses. Offered: A/WSpS.

SPHSC 550 Public School Speech-Language Pathology and Audiology (3) Sargent, Siva
Explores administrative, legal, ethical, and clinical issues encountered in implementing programs to remediate communication disorders in the school-aged population in the public school setting. Open to non-matriculated students with permission of instructor. Prerequisite: graduate student status in speech and hearing sciences or permission of instructor. Offered: A.

SPHSC 551 Advanced Practicum in Speech Pathology Evaluation (1-10, max. 10) Laboratory experience in the evaluation of speech and language disorders. Credit/no credit only. Prerequisite: SPHSC 536 and permission of instructor.

SPHSC 552 Advanced Practicum in Speech Pathology Management (1-10, max. 10) Laboratory experience in the management of speech and language disorders. Credit/no credit only. Prerequisite: permission of instructor.

SPHSC 553 Advanced Practicum in Speech-Language Pathology (2-4) Clinical practicum experience, completed under the supervision of UW Speech and Hearing Clinic professionals, focused on the evaluation and treatment of speech, language, cognitive-communication and swallowing disorders. Offered: A/WSpS.

SPHSC 554 Advanced Offsite Practicum in Speech-Language Pathology (2-10) Offsite clinical practicum experience, completed under the supervision of community-based clinical professionals, focused on the evaluation and treatment of speech, language, cognitive-communication and swallowing disorders. Offered: A/WSpS.

SPHSC 555 Preinternship in Speech and Hearing Sciences (1-10, max. 10) Practicum in speech pathology or audiology designed to teach the clinical regimen of a participating professional center prior to assuming a full internship assignment. Credit/no credit only.

SPHSC 556 Studies in Speech Science and Disorders (3) Examines contemporary models and research paradigms in speech science and disorders. Topics include respiratory physiology, laryngeal physiology, aerodynamics of speech production, articulatory dynamics, speech acoustics, and speech perception.

SPHSC 557 Studies in Hearing Sciences and Disorders (3) Examines contemporary models and research paradigms in the area of hearing science and disorders. Topics include psychoacoustics; amplification; electrophysiological evaluation; physiological acoustics; and perceptual consequences of hearing loss.

SPHSC 558 Grant Writing in Hearing, Language, and Speech Science (3) Design and writing of grant proposals in speech, language, and hearing sciences and disorders. Explanation of the funding process at various agencies, particularly the National Institutes of Health. Students prepare a proposal and review the proposals of their peers. Prerequisite: upper-level doctoral standing and permission of instructor.

SPHSC 559 Seminar in Speech-Language Pathology (2, max. 6)

SPHSC 560 Assessment of Auditory Dysfunction I (4) Strategies and procedures in the auditory evaluation of young children. Prerequisite: SPHSC 471.

SPHSC 561 Seminar in Speech-Language Pathology (2, max. 6)

SPHSC 562 Teaching Practicum (1-5, max. 5) Provides experience in preparing and giving lectures, leading discussions, preparing and grading assignments and tests, and working directly with undergraduate and graduate students. Prerequisite: doctoral student standing and permission of instructor. Credit/no credit only. Offered: A/WSpS.

SPHSC 563 Proseminar: Instructional Development Forum (1, max. 3) Ciswong Emphasizes instructional techniques and issues as they relate to teaching in the discipline of communication sciences and its disorders. Topics include course development, grading, student-faculty relations, teaching methods, and diversity. Credit/no credit only. Prerequisite: graduate standing in Speech and Hearing Sciences.

SPHSC 564 Teaching Practicum (1-5, max. 5) Provides experience in preparing and giving lectures, leading discussions, preparing and grading assignments and tests, and working directly with undergraduate and graduate students. Prerequisite: doctoral student standing and permission of instructor. Credit/no credit only. Offered: A/WSpS.

SPHSC 565 Speech and Language Pathology Proseminar (1, max. 6) Consideration of professional issues and student and faculty research. Credit/no credit only.

SPHSC 566 Seminar in Speech-Language Development (2, max. 6) Prerequisite: permission of instructor.

SPHSC 567 Research Seminar in Speech and Hearing Sciences (1) A platform for the presentation and exchange of scientific information (research data, new hardware and software development, scientific papers) resulting from ongoing research projects by graduate students and faculty within the Speech and Hearing Sciences department. Credit/no credit only.

SPHSC 568 Grant Writing in Hearing, Language, and Speech Science (3) Design and writing of grant proposals in speech, language, and hearing sciences and disorders. Explanation of the funding process at various agencies, particularly the National Institutes of Health. Students prepare a proposal and review the proposals of their peers. Prerequisite: upper-level doctoral standing and permission of instructor.

SPHSC 569 Seminar in Speech-Language Pathology (2, max. 6)

SPHSC 570 Assessment of Auditory Dysfunction II (4) Strategies and procedures in the auditory evaluation of young impaired adults. Use of diagnostic tests in the evaluation of auditory pathologies. Laboratory required. Prerequisite: SPHSC 471.

SPHSC 571 Assessment of Auditory Dysfunction II (4) Strategies and procedures in the auditory evaluation of hearing-impaired adults. Use of diagnostic tests in the evaluation of auditory pathologies. Laboratory required. Prerequisite: SPHSC 471.

SPHSC 572 Pediatric Audiology (3) Assessment of auditory disorders in infants and young children. Emphasis on behavioral and electrophysiologic techniques and on the role of the audiologist in the clinical management of the young hearing-impaired child. Prerequisite: SPHSC 471 or equivalent.

SPHSC 573 Assessment of Balance Function (4) Examines normal anatomy and physiology of the peripheral and central vestibular system. Reviews peripheral and central vestibular disorders and treatment protocols. Major focus of assessment on electronystagmography with associated lab. Provides overview of rotational and posturography measures of balance function. Prerequisite: permission of instructor.

SPHSC 574 Assessment of Balance Function (4) Examines normal anatomy and physiology of the peripheral and central vestibular system. Reviews peripheral and central vestibular disorders and treatment protocols. Major focus of assessment on electronystagmography with associated lab. Provides overview of rotational and posturography measures of balance function. Prerequisite: permission of instructor.

SPHSC 575 Medical Backgrounds in Audiology (3) Diseases and injuries of the ear resulting in reduced audition. Prerequisite: SPHSC 571 or permission of instructor.

SPHSC 576 Otoacoustic Emissions (2) Consideration of otoacoustic emissions and the physiologic techniques used to record them. Includes interpretation of responses in both the normal and disordered auditory system as well as clinical application of emissions in both adult and infant populations. Laboratory required. Prerequisite: SPHSC 571, SPHSC 572, and SPHSC 573, or permission of instructor.

SPHSC 577 Industrial and Community Hearing Conservation (2) Psychophysiological effects of environmental noise on man. Techniques of noise measurement and attenuation, including the planning of hearing conservation programs in industry and in the
community. Prerequisite: SPHSC 471 or permission of instructor.

SPHSC 578 Hearing Screening (2) Consideration of hearing screening programs and the statistical techniques used to evaluate them. Includes history, rationale, and technical aspects of hearing screening as well as current models for developing neonatal, school-age, and adult hearing screening programs. Prerequisite: SPHSC 572, SPHSC 573, and SPHSC 576, or permission of instructor.

SPHSC 579 Geriatric Audiology (2) Examines the biological, psychological, and social aspects which re normal correlates of the aging process, and those changes which are disorders. Emphasizes the identification and diagnosis of hearing problems associated with the aging process and its rehabilitation. Prerequisite: SPHSC 571.

SPHSC 580 Rehabilitative Audiology (3) Explores technology to enhance communication effectiveness of hearing impaired persons. Includes discussion of the use of assistive systems and cochlear implants. Advanced perception assessment and training methodology. Discussion and application of aural rehabilitation in different settings. Explores the Americans with Disabilities Act and assistive listening devices. Prerequisite: SPHSC 571 and SPHSC 583.

SPHSC 581 Management of Hearing-Impaired Children (2) Management of hearing-impaired children, including identification of target behaviors and methods for modification such as individualized therapy programs and parent and teacher involvement.

SPHSC 582 Hearing Aid Amplification (4) Acoustic amplification and methods of determining electroacoustic characteristics. Includes earmold technology. Prerequisite: SPHSC 471 and SPHSC 570 or permission of instructor.

SPHSC 583 Hearing Aid Selection (4) Consideration of strategies utilized in selecting acoustic amplification for the hearing impaired, including review of pertinent research literature. Prerequisite: SPHSC 582 or permission of instructor.

SPHSC 584 Advanced Amplification (3) Current topics in hearing aids and amplification technology; review of pertinent research articles. Prerequisite: SPHSC 582, 563.

SPHSC 585 Pediatric Amplification (2) Consideration of strategies utilized in selecting and verifying acoustic amplification for infants and children, including review of pertinent research literature. Prerequisite: SPHSC 582 or permission of instructor.

SPHSC 587 Ethics (1) Analysis and discussion of ethical considerations in the clinical practice of audiology, codes of professional organizations, and additional consideration of research ethics and ethics in neonatal hearing screening.

SPHSC 588 Audiology Proseminar (1, max. 3) Consideration of professional issues and student/faculty research in specific areas of interest. Credit/no credit only.

SPHSC 589 Seminar in Audiology (2, max. 6) Prerequisite: permission of instructor.

SPHSC 590 Cerumen Management for Audiologists (1) Review of anatomy and physiology of the external auditory canal. Examination of the physiology and pathophysiology of cerumen. Instrumentation of examining and cleaning the ear canal. Cerumen management procedures including otoscopy with normal and abnormal findings. Contraindications for cerumen management. Discussion of scope of practice, medical/legal issues, and reimbursement.

SPHSC 591 Advanced Practicum in Audiology (1-10, max. 10) Credit/no credit only. Prerequisite: permission of instructor.

SPHSC 592 Electrophysiological Assessment I (4) Consideration of physiologic techniques that may be used to evaluate the normal and disordered auditory system. Outside laboratory required. Prerequisite: SPHSC 461, SPHSC 571.

SPHSC 593 Electrophysiological Assessment II (3) Tremblay Examinations evoked and event-related potentials including recording techniques, neurophysiological mechanisms, and applications to clinical populations. Offered: Sp.

SPHSC 595 Cochlear Implants II (2) Bierer Examinations cochlear implant fitting procedures, outcomes, and rehabilitation for children and adults. Offered: Sp.

SPHSC 599 Research Practicum (*, max. 12) Supervised laboratory experience in experimental approach to problems in speech and hearing sciences. Prerequisite: permission of instructor.

SPHSC 600 Independent Study or Research (*) Prerequisite: permission of instructor.

SPHSC 601 Internship (1-10, max. 10) Supervised field experiences in settings other than public schools. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSpS.

SPHSC 602 Internship in the Schools (3-10, max. 10) Supervised field experience in a public school setting. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSpS.

SPHSC 603 Clinical Fellowship (8-12) Supervised, professional clinical experience. Offered: AWSpS.

SPHSC 700 Master's Thesis (*)

SPHSC 800 Doctoral Dissertation (*)

Structure of data sets, histograms, means, and standard deviations. Correlation and regression. Probability, binomial and normal distributions. Interpretation of estimates, confidence intervals, and significance tests. (Students may receive credit for only one of 220, 311, and ECON 311.) Offered: AWSpS.

STAT 311 Elements of Statistical Methods (5) NW, QSR Elementary concepts of probability and sampling; binomial and normal distributions. Basic concepts of hypothesis testing, estimation, and confidence intervals; t-tests and chi-square tests. Linear regression theory and the analysis of variance. (Students may receive credit for only one of 220, 311, and ECON 311.) Prerequisite: either MATH 111, MATH 120, MATH 124, MATH 127, or MATH 144. Offered: AWSpS.

STAT 316 Design of Experiments and Regression Analysis (4) NW Introduction to the analysis of data from planned experiments. Analysis of variance for multiple factors and applications of orthogonal arrays and linear graphs for fractional factorial designs to product and process design optimization. Regression analysis with applications in engineering. Prerequisite: IND E 315. Offered: jointly with IND E 316.

STAT 320 Evaluating Social Science Evidence (5) I&S, QSR A critical introduction to the methods used to collect data in social science: surveys, archival research, experiments, and participant observation. Evaluates "facts and findings" by understanding the strengths and weaknesses of the methods that produce them. Case based. Offered: jointly with CS&SS 320/ SOC 320; A.

STAT 322 Case-Based Social Statistics II (5) I&S, QSR Continuation of CS&SS/SOC/STAT 321. Progresses to questions of assessing the weight of evidence and more sophisticated models including regression-based methods. Built around cases investigating the nature and content of statistical principles and practice. Hands-on approach: weekly data analysis laboratory. Prerequisite: CS&SS/SOC/STAT 321, or permission of instructor. Offered: jointly with CS&SS/SOC 322; Sp.

STAT 341 Introduction to Probability and Statistical Inference I (4) NW Brief review of: sample spaces, random variables, probability. Distribution: binomial, normal, Poisson, geometric. Followed by: expectation, variance, central limit theorem. Basic concepts of estimation, testing, and confidence intervals. Maximum likelihood estimators and likelihood ratio tests, efficiency. Introduction to regression. Prerequisite: STAT/ECON 311; either MATH 126, MATH 129, or MATH 136; STAT/MATH 394. Offered: W.

STAT 342 Introduction to Probability and Statistical Inference II (4) NW Brief review of: sample spaces, random variables, probability. Distribution: binomial, normal, Poisson,

Statistics

STAT 111 Lectures in Applied Statistics (1) NW Weekly lectures illustrating the importance of statisticians in a variety of fields, including medicine and the biological, physical, and social sciences. Contact instructor for information on emphasized fields of applications. Credit/no credit only. Offered: jointly with BIOST 111; Sp.

STAT 220 Basic Statistics (5) NW, QSR Objectives and pitfalls of statistical studies.

STAT 390 Probability and Statistics in Engineering and Science (4) NW Concepts of probability and statistics. Conditional probability, independence, random variables, distribution functions, cumulative distribution, moment generating functions, sampling errors, confidence intervals, least squares and maximum likelihood. Exploratory data analysis and interactive computing. Students may receive credit for only one of 390, STAT/ECON 481, and ECON 580. Prerequisite: either MATH 126 or MATH 136. Offered: jointly with MATH 390; AWS/Sp.

STAT 391 Probability and Statistics for Computer Science (4) NW Fundamentals of probability and statistics from the perspective of the computer scientist. Random variables, distributions and densities, conditional probability, independence. Maximum likelihood, density estimation, Markov chains, classification. Applications in computer science. Prerequisite: 2.5 in MATH 126; 2.5 in MATH 308; either CSE 326, CSE 373, CSE 417, or CSE 421.

STAT 394 Probability I (3) NW Sample spaces; basic axioms of probability; combinatorial probability; conditional probability and independence; binomial, Poisson and normal distributions, central limit theorem. Prerequisite: either 2.0 in MATH 126, or 2.0 in MATH 136; recommended: MATH 324 or MATH 327. Offered: jointly with MATH 394; AWS.

STAT 395 Probability II (3) NW Random variables; expectation and variance; laws of large numbers; normal approximation and other limit theorems; multidimensional distributions and transformations. Prerequisite: 2.0 in MATH/MATH 394. Offered: jointly with MATH 395; WSp.

STAT 396 Probability III (3) NW Characteristic functions and generating functions; recurrent events and renewal theory; random walk. Prerequisite: either 2.0 in MATH 395 or 2.0 in STAT 395. Offered: jointly with MATH 396; Sp.

STAT 403 Introduction to Resampling Inference (4) NW Introduction to computer-intensive data analysis for experimental and observational studies in empirical sciences. Students design, program, carry out, and report applications of bootstrap resampling, rerandomization, and subsampling of cases. Credit allowed for 403 or 503 but not both. Prerequisite: either STAT 220, STAT 301, STAT/ECON 311, STAT 341, STAT 361, STAT/MATH 390, or STAT/ECON 481. Offered: Sp.

STAT 425 Introduction to Nonparametric Statistics (3) NW Overview of nonparametric methods, such as rank tests, goodness of fit tests, 2 x 2 tables, nonparametric estimation. Useful for students with only a statistical methods course background. Prerequisite: STAT/MATH 390. Offered: jointly with BIOST 425; when demand is sufficient.

STAT 427 Introduction to Analysis of Categorical Data (4) NW Techniques for analysis of count data. Log-linear models, logistic regression, and analysis of ordered response categories. Illustrations from the behavioral and biological sciences. Computational procedures. Prerequisite: either STAT 342, STAT 362, or STAT 421.

STAT 428 Multivariate Analysis for the Social Sciences (4) NW Multivariate techniques commonly used in the social and behavioral sciences. Linear models for dependence analysis (multivariate regression, MANOVA, and discriminant analysis) and for inferences (principal components and factor analysis). Techniques applied to social science data using computer statistical packages. Prerequisite: either STAT 342, STAT 362, or STAT 421.

STAT 480 Sampling Theory for Biologists (3) NW Theory and applications of sampling finite populations including: simple random sampling, stratified random sampling, ratio estimates, regression estimates, systematic sampling, cluster sampling, sample size determinations, applications in fisheries and forestry. Other topics include sampling plant and animal populations, sampling distributions, estimation of parameters and statistical treatment of data. Prerequisite: Q SCI 482; recommended: Q SCI 483. Offered: jointly with Q SCI 480; even years.

STAT 481 Introduction to Mathematical Statistics (5) NW Probability, generating functions; the central limit theorem; independence and conditional probability, central limit theorem, elementary statistical estimation and inference, linear regression. Emphasis on physical applications. Prerequisite: some advanced calculus and linear algebra. Offered: jointly with AMATH 506.

STAT 486 Experimental Design (3) NW Topics in analysis of variance and experimental designs: choice of designs, comparison of efficiency, power, sample size, pseudo-replication, factor structure. Prerequisite: Q SCI 482; recommended: Q SCI 483. Offered: jointly with Q SCI 486.

STAT 491 Introduction to Stochastic Processes (3) NW Random walks, Markov chains, branching processes, Poisson process, point processes, birth and death processes, queuing theory, stationary processes. Prerequisite: either 2.0 in MATH 395 or STAT 395. Offered: jointly with MATH 491; A.

STAT 492 Stochastic Calculus for Option Pricing (3) NW Introductory stochastic calculus mathematical foundation for pricing options and derivatives. Basic stochastic analysis tools, including stochastic integrals, stochastic differential equations, Ito’s formula, theorems of Girsanov and Feynman-Kac, Black-Scholes option pricing, American and exotic options, bond options. Prerequisite: MATH 394-5. Offered: jointly with MATH 492; W.

STAT 498 Special Topics (1-5, max. 15) NW Reading and lecture course intended for special needs of students.

STAT 499 Undergraduate Research (1-5, max. 15) Offered: AWS/Sp.

STAT 502 Design and Analysis of Experiments (4) Design of experiments covering concepts such as randomization, blocking, and confounding. Analysis of experiments using randomization tests, analysis of variance, and analysis of covariance. Prerequisite: either STAT 342, MATH/STAT 390, ECON/STAT 481, ECON 580 or equivalent; MATH 308 or equivalent. Offered: A.

STAT 506 Applied Probability and Statistics (4) Discrete and continuous random variables, independence and conditional probability, central limit theorem, elementary statistical estimation and inference, linear regression. Emphasis on physical applications. Prerequisite: some advanced calculus and linear algebra. Offered: jointly with AMATH 506.

STAT 512 Statistical Inference (4) Review of random variables; transformations, conditional expectation, moment generating functions, convergence, limit theorems, estimation; Cramer-Rao lower bound, maximum likelihood estimation, sufficiency, ancillarity, completeness. Rao-Blackwell theorem. Hypothesis testing: Neyman-Pearson lemma, monotone likelihood ratio, likelihood-ratio tests, large-sample theory. Contingency tables, confidence intervals, invariance. Introduction to decision theory. Prerequisite: STAT 395 and STAT 421, STAT 423, STAT 504, or BIOST 512 (concurrent registration permitted for these three). Offered: A.

STAT 516 Stochastic Modeling of Scientific Data (4) Markovian and semi-Markovian models, point processes, cluster models, queuing models, likelihood methods, estimating equations. Prerequisite: STAT 511 or STAT 396. Offered: A.
STAT 517 Stochastic Modeling of Scientific Data (4) Markovian and semi-Markovian models, point process models, rapid mixing models, likelihood methods, estimating equations. Prerequisite: STAT 516. Offered: W.

STAT 518 Stochastic Modeling Project (4) Supervised, applied project based on stochastic modeling of scientific data. Prerequisite: STAT 517. Offered: Sp.

STAT 521 Advanced Probability (3) Measure theory and integration, independence, laws of large numbers. Fourier analysis of distributions, central limit problem and infinitely divisible laws, conditional expectations, martingales. Prerequisite: either MATH 426 or MATH 576. Offered: jointly with MATH 521; A.

STAT 522 Advanced Probability (3) Measure theory and integration, independence, laws of large numbers. Fourier analysis of distributions, central limit problem and infinitely divisible laws, conditional expectations, martingales. Prerequisite: either MATH 426 or MATH 576. Offered: jointly with MATH 522; W.

STAT 523 Advanced Probability (3) Measure theory and integration, independence, laws of large numbers. Fourier analysis of distributions, central limit problem and infinitely divisible laws, conditional expectations, martingales. Prerequisite: either MATH 426 or MATH 576. Offered: jointly with MATH 523; Sp.

STAT 524 Design of Medical Studies (3) Emphasis on randomized controlled clinical trials. Bias elimination, controls, treatment assignment and randomization, precision, replication, power and sample size calculations, stratification, and ethics. Suitable for students in biostatistics and other scientific fields. Prerequisite: BIOST 511 or equivalent, and one of STAT 421, STAT 423, BIOST 513, BIOST 518, or EPI 512; or permission of instructor. Offered: jointly with BIOST 524; even years.

STAT 529 Sample Survey Techniques (3) Design and implementation of selection and estimation procedures. Emphasis on human populations. Simple, stratified, and cluster sampling; multistage and two-phase procedures; optimal allocation of resources; estimation theory; replicated designs; variance estimation; national samples and census materials. Prerequisite: either STAT 421, STAT 423, STAT 504, QMETH 500, BIOST 511, or BIOST 517, or equivalent; or permission of instructor. Offered: jointly with BIOST 529/C&SS 529.

STAT 530 Wavelets: Data Analysis, Algorithms, and Theory (3) Review of spectral analysis. Wavelet packets. Statistical properties of wavelet signal extraction and smoothers. Estimation of wavelet variance. Prerequisite: some Fourier theory and linear algebra; Math or STAT 390, ECON or STAT 481, or STAT 513; or IND E 315. Offered: jointly with STAT 533; Sp.

STAT 534 Statistical Computing (3) Introduction to scientific computing. Includes programming tools, modern programming methodologies, (modularization, object oriented design), design of data structures and algorithms, numerical computing and graphics. Uses C++ for several substantial scientific programming projects. Prerequisite: experience with programming in a high level language. Offered: jointly with BIOST 534; Sp.

STAT 535 Statistical Computing (3) Introduction to scientific computing. Includes programming tools, modern programming methodologies, (modularization, object oriented design), design of data structures and algorithms, numerical computing and graphics. Uses C++ for several substantial scientific programming projects. Prerequisite: experience with programming in a high level language. Offered: jointly with BIOST 535; A.

STAT 536 Analysis of Categorical and Count Data (3) Analysis of categorical data in the social sciences. Binary, ordered, and multinomial outcomes, event counts, and contingency tables. Focuses on maximum likelihood estimations and interpretations of results. Prerequisite: SOC 424, SOC 425, SOC 426, or equivalent; recommended: C&S&SS 505 and C&S&SS 506, or equivalent. Offered: jointly with SOC 536/C&S&SS 536; annually.

STAT 537 Statistical Computing (3) Introduction to scientific computing. Includes programming tools, modern programming methodologies, (modularization, object oriented design), design of data structures and algorithms, numerical computing and graphics. Uses C++ for several substantial scientific programming projects. Prerequisite: experience with programming in a high level language. Offered: jointly with BIOST 538; W.

STAT 542 Multivariate Analysis (3) Multivariate normal distribution; partial and multiple correlation; Hotelling’s $T^2$; Bartlett’s decomposition; various likelihood ratio tests; discriminant analysis; principal components; graphical Markov models. Prerequisite: STAT 582 or permission of instructor. Offered: alternate years.

STAT 547 Derivatives: Theory, Statistics, and Computing (4) Covers theory, computation, and statistics of options and derivatives pricing, including options on stocks, stock indices, futures, currencies, and interest rate derivatives. Prerequisite: STAT 506 or equivalent, or permission of instructor. Recommended: ECON 424.

STAT 549 Statistical Methods for Portfolios (4) Covers the fundamentals of modern statistical portfolio construction and risk measurement, including theoretical foundations, statistical methodology, and computational methods using modern object-oriented software for analysis, statistical modeling, and numerical portfolio optimization. Prerequisite: ECON 424 or equivalent, or permission of instructor.

STAT 551 Statistical Genetics II: Quantitative Traits (3) Statistical basis for describing variation in quantitative traits. Decomposition of trait variation into components representing genes, environment and gene-environment interaction. Methods of mapping and characterizing quantitative trait loci. Prerequisite: STAT/ BIOST 550; STAT 423 or BIOST 515; or permission of instructor. Offered: jointly with BIOST 551; W.

STAT 552 Statistical Genetics III: Design and Analysis (3) Overview of probability models, inheritance models, penetration. Association and linkage. The lod score method. Affected sib method. Fitting complex inheritance models. Design mapping studies; multipoint, disequilibrium, and fine-scale mapping. Ascertainment. Prerequisite: STAT/BIOST 551; GENET 371; or permission of instructor. Offered: jointly with BIOST 552; Sp.

STAT 560 Hierarchical Modeling for the Social Sciences (4) Explores ways in which data are hierarchically organized, such as voters nested within electoral districts that are in turn nested within states. Provides a basic theoretical understanding and practical knowledge of models for clustered data and a set of tools to help make accurate inferences. Prerequisite: SOC 504-505-506 or equivalent; recommended: C&S&SS 505-506 or equivalent. Offered: jointly with C&S&SS 560.

STAT 561 Special Topics in Applied Statistics (1-5, max. 15) Data analysis, spectral analysis
or robust estimation. Prerequisite: permission of instructor.

STAT 562 Special Topics in Applied Statistics (1-5, max. 15) Data analysis, spectral analysis or robust estimation. Prerequisite: permission of instructor.

STAT 564 Bayesian Statistics for the Social Sciences (4) Statistical methods based on the idea of probability as a measure of uncertainty. Topics covered include subjective notions of probability, Bayes' Theorem, prior and posterior distributions, and data analysis techniques for statistical models. SOC 504-505-506 or equivalent; recommended: CS&SS 505; CS&SS 506. Offered: jointly with CS&SS 564.

STAT 567 Statistical Analysis of Social Networks (4) Statistical and mathematical descriptions of social networks. Topics include graphical and matrix representations of social networks, sampling methods, statistical analysis of network data, and applications. Prerequisite: SOC 504-505-506 or equivalent; recommended: CS&SS 505; CS&SS 506. Offered: jointly with CS&SS 567.

STAT 570 Advanced Applied Statistics and Linear Models (3) Generalized linear models, REML in mixed models for randomized blocks, split plots, longitudinal data. Generalized estimating equations, empirical model building, cross validation, recursive partitioning, generalized additive models, projection pursuit. Prerequisite: STAT 513; STAT 533 or STAT 421 and STAT 423, and a course in matrix algebra for STAT 570. Offered: jointly with BIOST 570; A.

STAT 573 Statistical Methods for Categorical Data (3) Advanced topics in generalized linear models and the analysis of categorical data: overdispersion, quasilikelihood, parameters in linear and variance functions, exact conditional inference, random effects, saddlepoint approximations. Credit/no credit only. Prerequisite: STAT 571 and STAT 562. Offered: jointly with BIOST 573; alternate years.

STAT 574 Multivariate Statistical Methods (3) Use of multivariate normal sampling theory, near-transformation of random variables, one- and two-sample tests, profile analysis, partial and multiple correlation, multivariate ANOVA and least squares, discriminant analysis, principal components, factor analysis, robustness, and some special topics. Some computer use included. Prerequisite: STAT 570 or permission of instructor. Offered: jointly with BIOST 574; alternate years.

STAT 576 Statistical Methods for Survival Data (3) Statistical methods for censored survival data. Covers parametric and nonparametric methods, Kaplan-Meier survival curve estimator, comparison of survival curves, log-rank test, regression models including the Cox proportional hazards model, competing risks. Prerequisite: STAT 581 and either STAT 423, BIOST 515, or Q SCI 483, or equivalent. Offered: jointly with BIOST 576; alternate years.

STAT 577 Advanced Design and Analysis of Experiments (3) Concepts important in experimental design and analyzing data from planned experiments. Multi-way layouts, randomized block designs, incomplete block designs, Latin and Graeco-Latin squares, factorial and fractional designs, split-plot designs, optimal design theory, response surface experiments. Prerequisite: either BIOST 515, BIOSTAT 533, STAT 502, STAT 504, STAT 533, or permission of instructor. Offered: jointly with BIOST 577.

STAT 578 Special Topics in Advanced Biostatistics (*, max. 30) Advanced-level topics in biostatistics offered by regular and visiting collaborators, consulting clients. Graduate reports for scientific journals, research and tabular presentation of results. Writing and consulting experience in data analysis, applied statistics. Prerequisite: entry code. Offered: jointly with BIOST 578; AWSpS.

STAT 579 Data Analysis and Reporting (2) Analysis of real data to answer scientific questions. Common data-analytic problems. Sensible approaches to complex data. Graphical and tabular presentation of results. Writing reports for scientific journals, research collaborators, consulting clients. Graduate standing in statistics or biostatistics or permission of instructor. Offered: jointly with BIOST 579; AWSp.

STAT 581 Advanced Theory of Statistical Inference (3) Limit theorems, asymptotic methods, asymptotic efficiency and efficiency bounds for estimation, maximum likelihood estimation, Bayes methods, asymptotics via derivatives of functionals, sample-based estimates of variability: (bootstrap and jackknife); robustness; estimation for dependent data, nonparametric estimation and testing. Prerequisite: STAT 513; either MATH 426 or MATH 576. Offered: A.

STAT 582 Advanced Theory of Statistical Inference (3) Limit theorems, asymptotic methods, asymptotic efficiency and efficiency bounds for estimation, maximum likelihood estimation, Bayes methods, asymptotics via derivatives of functionals, sample-based estimates of variability: (bootstrap and jackknife); robustness; estimation for dependent data, nonparametric estimation and testing. Prerequisite: STAT 581. Offered: W.

STAT 583 Advanced Theory of Statistical Inference (3) Limit theorems, asymptotic methods, asymptotic efficiency and efficiency bounds for estimation, maximum likelihood estimation, Bayes methods, asymptotics via derivatives of functionals, sample-based estimates of variability: (bootstrap and jackknife); robustness; estimation for dependent data, nonparametric estimation and testing. Prerequisite: STAT 582. Offered: Sp.

STAT 586 Martingales: Survival Analysis (3) Theory of counting processes and martingales to provide unified study of survival analysis methods. Focus on survival distribution estimators, censored data rank statistics, regression methods with censored survival data. Development of small samples moments, asymptotic distributions, and efficiencies. Prerequisite: STAT 521 or STAT 583 or permission of instructor; recommended: STAT 576. Offered: jointly with BIOST 586; W.

STAT 590 Statistics Seminar (*, max. 15) Credit/no credit only. Prerequisite: permission of graduate program coordinator. Offered: AWSp.

STAT 591 Special Topics in Statistics (1-5, max. 15) Distribution-free inference, game and decision theory, advanced theory of estimation (including sequential estimation), robustness, advanced probability theory, stochastic processes or empirical processes. Prerequisite: permission of instructor. Offered: A.

STAT 592 Special Topics in Statistics (1-5, max. 15) Distribution-free inference, game and decision theory, advanced theory of estimation (including sequential estimation), robustness, advanced probability theory, stochastic processes or empirical processes. Prerequisite: permission of instructor. Offered: W.

STAT 593 Special Topics in Statistics (1-5, max. 15) Distribution-free inference, game and decision theory, advanced theory of estimation (including sequential estimation), robustness, advanced probability theory, stochastic processes or empirical processes. Prerequisite: permission of instructor. Offered: Sp.

STAT 598 Techniques of Statistical Consulting (1) Seminar series covering technical and non-technical aspects of statistical consulting, including skills in effective communication with clients, report writing, statistical tips and rules of thumb, issues in survey sampling, and issues in working as a statistical consultant in academic, industrial, and private-practice settings. Prerequisite: entry code. Offered: jointly with BIOST 598; ASp.

STAT 599 Statistical Consulting (*) Credit/no credit only. Prerequisite: permission of graduate program coordinator. Offered: AWSpS.

STAT 600 Independent Study or Research (*) Prerequisite: permission of graduate program coordinator. Offered: AWSpS.

STAT 700 Master's Thesis (*) Prerequisite: permission of graduate program coordinator. Offered: AWSpS.

STAT 800 Doctoral Dissertation (*) Prerequisite: permission of graduate program coordinator. Offered: AWSpS.
Women Studies

WOMEN 200 Introduction to Women Studies (5) I&S Feminist analysis of the construction and enforcement of gender differences and gender inequalities in various contexts. Emphasis on the intersection of race, class, sexuality, and nationality in the lives of women. Topics include feminist theory, motherhood, popular culture, sexual autonomy, racism, and activism in the United States, Asia, Latin America. Offered: AWSpS.

WOMEN 206 Philosophy of Feminism (5) I&S Philosophical analysis of the concepts and assumptions central to feminism. Theoretical positions within the feminist movement; view of the ideal society, goals and strategies of the movement, intersections of the sex-gender system with other systems of oppression. Offered: jointly with PHIL 206/POL S 212.

WOMEN 207 Introduction to Feminist Theory and Process (5) I&S Introduction to the multiplicity of feminist theories in both the United States and transnational contexts; examination of the histories of different theoretical positions and their relationship to feminist praxis. Topics include feminist analysis of knowledge, production, power, and the categories of gender, race, class, sexualities, ethnicity, and nation.

WOMEN 257 Psychology of Gender (5) I&S Major psychological theories of gender-role development; biological and environmental influences that determine and maintain gender differences in behavior; roles in children and adults; topics include aggression, cognitive abilities, achievement motivation, affiliation. Recommended: either PSYCH 101, PSYCH 102, or WOMEN 200. Offered: jointly with PSYCH 257.

WOMEN 283 Introduction to Women's History (5) I&S Includes units on American, European, and Third World women that examine centers of women's activities, women's place in male-dominated spheres (politics), women's impact on culture (health, arts), and the effect of larger changes on women's lives (technology, colonization). Offered: jointly with HIST 283: A.

WOMEN 290 Special Topics in Women Studies (2-5, max. 15) I&S Exploration of specific problems and issues relevant to the study of women. Offered by visiting or resident faculty members.

WOMEN 299 Women Studies Community in Colloquia (2) I&S Introduces new majors to the field of women studies. Includes helping students develop a course of study for their major, meeting their departmental advisor and the faculty. Students are encouraged to take this course immediately upon declaring the major. May be linked to service learning. Credit no credit only.

WOMEN 302 Research Methods in Women Studies (5) I&S Explores appropriate research methodologies for interdisciplinary work in women studies. Examines current debates and issues in feminist methodologies and critiques of methodology. Use of historical documents and theoretical texts. Computer applications in research in women studies. Prerequisite: either WOMEN 200 or WOMEN 206.

WOMEN 305 Feminism in an International Context (5) I&S Women and feminism from global theoretical perspectives. Critical theoretical ways of thinking about feminism. How women are differently situated throughout the world. How they are represented affects women's agency. Focus on how race and gender affect one another. Representations of and by women throughout the world.

WOMEN 310 Women and the Law (5) I&S Examines how law addresses women, how the courts have made attempts to address women of color, poor women, lesbians, and women with disabilities. Topics include constitutional construction of equality, employment discrimination, reproductive rights, regulation of sexuality, families and motherhood, sexual harassment, violence against women and international women and human rights.

WOMEN 313 Women in Politics (5) I&S DiStefano Theoretical, historical, and empirical studies of women's participation in political and social movements. Women's diverse efforts to improve their political, social, and economic status. Policy issues of particular concern to women. Women's political experiences in household, local, regional, national, and international arenas. Offered: jointly with POL S 313.

WOMEN 321 History of Afro-American Women and the Feminist Movement (5) I&S “Feminist Movement” from early nineteenth century to present. Treats relationship between Black and White women in their struggle for independence, at times together and at times apart. Discusses the reasons, process, and results of collaboration as well as opposition. Examines recent and contemporary attempts at cooperation. Offered: joint with AFRAM 321.

WOMEN 322 Race, Class, and Gender (5) I&S The intersection of race, class, and gender in the lives of women of color in the United States from historical and contemporary perspectives. Topics include racism, classism, sexism, activism, sexuality, and inter-racial dynamics between women of color groups. Offered: jointly with AES 322.

WOMEN 323 History of Racial Formation in the United States: 1800-1990 (5) I&S Yee Traces the development of the concept of race in the United States from the nineteenth century to the late twentieth century. Specific topics include paid and unpaid labor, media, reproduction, migration, social activism, and the processes of identity and community formation.

WOMEN 333 Gender and Globalization: Theory and Process (5) I&S Ramamurthy Theoretical, historical, and empirical analysis of how current processes of globalization are transforming the actual conditions of women’s lives, labor, gender ideologies, and politics in complex and contradictory ways. Topics include feminist exploration of colonialism, capitalism, economic restructuring policies, resistance in consumer and environmental movements. Offered: jointly with SI 333.

WOMEN 339 Social Movements in Contemporary India (5) I&S Ramamurthy Covers issues of social change, economic development, and identity politics in contemporary India studied through environmental and women’s movements. Includes critiques of development, and conflicts over forests, dams, women’s rights, religious community, ethnicity, and citizenship. Offered: jointly with ANTH 339/ SISA 339.

WOMEN 341 Native Women in the Americas (5) I&S Historiography, sociology, biography, autobiography, and fiction about native women in the United States and Canada. Offered: jointly with AIS 341; AWSpS.

WOMEN 350 Women in Law and Literature (5) I&S/VLPA Representations of women in American law and literature. Considers how women’s political status and social roles have influenced legal and literary accounts of their behavior. Examines how legal cases and issues involving women are represented in literary texts and also how law can influence literary expression. Offered: jointly with CHID 350.

WOMEN 351 Women of Color as Cross-Cultural Artists (5) I&S/VLPA Habeli-Pallan Provides a historical context for artistic forms produced by racialized women. Examines the cultural production of Chicanas and Latinas in relation to that Native American, African American, East and South Asian American, and Arab American women as well as those women of mixed heritage in the U.S. Offered: jointly with AAS 310.

WOMEN 353 Anthropological Studies of Women (5) I&S Critical examination of the intersections between anthropology, research on gender issues, and feminism. Readings and class discussions examine the ways women have been represented in the field of anthropological and the repercussions of these anthropological images of women on contemporary understandings of gender. Offered: jointly with ANTH 353; W.

WOMEN 355 Men and Masculinity (5) I&S Critical study of systematic responses of men to feminist movements, including conservative, pro-feminist, men’s rights, myopic, and religious responses. How men of color and gay men view these various men’s movements and their issues. Special attention given to philosophical problems such as nature of oppression, human nature, justice, and masculinity. Recommended: WOMEN 200.

WOMEN 357 Psychobiology of Women (5) NW Kenney Physiological and psychological aspects of women’s lives: determinants of biological sex; physiological and psychological events of puberty, menstruation, and menopause; sexuality; pregnancy, childbirth; the role of culture in determining the psychological response to the physiological events. Recommended: PSYCH/WOMEN 257. Offered: jointly with PSYCH 357.

WOMEN 383 Social History of American Women to 1890 (5) I&S Yee A multi-racial, multicultural study of women in the United States from the 17th century to 1890 emphasizing women’s unpaid work, participation in the paid labor force, charitable and reform activities from the 19th century social movements. Uses primary materials such as diaries, letters, speeches, and artifacts. Offered: jointly with HSTAA 373; W.
WOMEN 384 Social History of American Women in the 20th Century (5) I&S Analyzes major themes in the history of women in North America from 1890 through the 1990s. Themes include family and community formation, social activism, education, paid and unpaid labor patterns, war, migration, and changing conceptions of womanhood and femininity in the 20th century. Offered: jointly with HSTAA 374.

WOMEN 404 Critical Pedagogies of Social Change (5) I&S Examines theories of critical pedagogy as developed in struggles against race, class, and gender oppression in the U.S. and transnationally. Topics include the relation between theory and practice, the position of educators in struggles for social change, and the role of the arts in movement-building. Offered: jointly with AES 404.

WOMEN 405 Comparative Women’s Movements and Activism (5) I&S Comparative cultural, national, and historical study of women’s movements and activism. Critically analyzes multiple arenas of women’s movements and resistance. Topics include feminist anti-racism, pre-nationalism and nationalism, economic, and American politics, women’s and human rights, and national/transnational feminisms. Prerequisite: either WOMEN 205, WOMEN 305, or SOC 364.

WOMEN 415 Gender and Education (5) I&S Gender bias, discrimination, and gender-equity efforts in education. Includes curriculum instruction, instructional materials, testing, counseling, athletics, teacher education, educational employment issues, and sexual harassment. Relevant federal and state laws, court decisions, and strategies for promoting gender equity also addressed. Recommended: WOMEN 200 or SOC 110. Offered: jointly with EDCI 440; S.

WOMEN 417 The Politics of Talent Development (5) I&S Investigation of the psychological, cultural, socioeconomic, and political factors that enhance or inhibit the development of exceptional ability, focusing principally, but not exclusively, on women and girls. Pays special attention to issues of race, class, gender, geography, and an individual’s orientation to the mainstream of her culture.

WOMEN 423 Feminism, the State, and Democracy in Indonesia (5) I&S Questions how women’s issues and interests are affected by the history of Indonesia and by changes in the global political economy. Celebrates ways in which Indonesian women, feminists, and feminisms negotiate their subject positions. Analyzes issues of gender and human rights in national political arenas, and of democratic reform. Offered: AWSP.

WOMEN 424 Women in Midlife (5) I&S Explores women’s lives, experiences, and concerns in the midlife years. Topics include physical and physiological changes; psychological development; representations and treatment of midlife women in literature, media, and other institutions; economics of aging; crosscultural and subcultural differences in the aging process; the synergistic effects of sexism and ageism on women.

WOMEN 425 Femininity, Feminism, and Antifeminism in Popular Culture (5) I&S/VLPA Explores shifting meanings and reconstructions of femininity, feminism, and antifeminism in United States popular culture. Analyzes the incorporation and transformation of feminist critiques of dominant ideologies into popular culture. Popular forms examined may include television serials, music videos, advertisements, films, and novels. Prerequisite: WOMEN 200.

WOMEN 427 Women and Violence (5) I&S Ginorio Multi-disciplinary explorations of the continuum of violence that affects women’s lives, ranging from experience in personal settings (family violence) to cultural or state policies (prisons, wars). Violence against women explored in the context of societal, political, and state violence. Recommended: WOMEN 200.

WOMEN 429 Scandinavian Women Writers in English Translation (5) I&S/VLPA Gavel-Adams Selected works by major Scandinavian women writers from mid-nineteenth-century bourgeois realism to the present with focus on feminist issues in literary criticism. Offered: jointly with SCAND 427.

WOMEN 435 Gender and Spirituality (5) I&S Exploration of ways in which gender informs spiritual teachings and practices of different groups in ancient and contemporary times, with particular attention to the relationship between spiritual beliefs and the construction of social, psychological, and political realities.

WOMEN 438 Jewish Women in Contemporary America (5) I&S Examines how Jewish women’s identities are socially constructed and transformed in contemporary America, using social histories, memoirs, and ethnographies to analyze scholars’ approaches to Jewish women’s lives. Topics include the role of social class, religion, migration, the Holocaust, and race relations in Jewish women’s lives. Offered: jointly with SISJE 438.

WOMEN 440 Reading Native American Women’s Lives (5) I&S Seminar based on social science writings, autobiographies, biographies, and fiction written by, with, or about indigenous women of the United States and Canada. Offered: jointly with AIS 440.

WOMEN 442 Images of Natives in the Cinema and Popular Cultures (5) I&S/VLPA Ross Cultural examination of images of native people in cinema and popular culture based on social science writings and films by or about natives in the United States and Canada. Offered: jointly with AIS 442.

WOMEN 444 Criminality and “Deviance” in Native Communities (5) Seminar based on social science writings and biographies written by and about incarcerated natives and “deviance” in Native communities in the United States and Canada. Offered: jointly with AIS 444.

WOMEN 446 Global Asia (5) I&S Welland Explores how Asia has been constructed through transnational interactions of feminism, anti-colonialism, tourism, diaspora, and global capitalism. Topics include the cultural construction of similarity and difference, politics of representation, and political economy of global circulations of people and things. Prerequisite: one 200-level ANTH course. Offered: jointly with ANTH 442/SISA 442.

WOMEN 447 Economics of Gender (5) I&S Rose Microeconomic analysis of the sources of gender differences in earnings, labor force participation, occupational choice, education, and consumption. Economic theories of discrimination, human capital, fertility and intrahousehold resource allocation. Economics of the family in developed and developing countries. Prerequisite: 2.0 ECON 300. Offered: jointly with ECON 447.

WOMEN 450 Language and Gender (5) I&S, VLPA Biliuk Survey of the theoretical trends, methods, and research findings on the relationship between language and gender. Focus on power relations in gendered language use. Extensive study of research based on conversational analysis. Prerequisite: LING 201; either LING 201, LING 203, or ANTH 203. Offered: jointly with ANTH 450/LING 458.

WOMEN 451 Latina Cultural Production (5) I&S Examines the expressive culture of Chicanas, Mexican American, and Chicano/Latina women in the United States. Cultural and artistic practices in home and in literary, music, film, spoken word, performing and visual arts. Focuses on Chicana/Latina writers and artists re-envision traditional iconography. Offered: jointly with CHSTU 410.

WOMEN 453 Lesbian Lives and Culture (5) I&S An exploration and overview of lesbianism in historical, social, cultural, and interpersonal contexts. Prerequisite: either WOMEN 200 or WOMEN 206.

WOMEN 454 Women, Words, Music, and Change (5) I&S/VLPA Comparative analysis of use of myths, tales, music, and other forms of expressive culture to account for, reinforce, and change women’s status and roles. Recommended: WOMEN 353. Offered: jointly with ANTH 454.

WOMEN 455 Contemporary Feminist Theory (5) I&S Examines meaning of feminism and feminism in women’s lives in an international context. Building upon an analysis of racial hierarchies and institutionalized racism, explores strategies used by women engaged in feminist and anti-racist activism. Prerequisite: WOMEN 200.

WOMEN 457 Women in China to 1800 (5) I&S Ebrey Gender in Chinese culture, women’s situations in the patrilineal family system, and the ways women’s situations changed as other dimensions of China’s political system,
economy, and culture changed from early times through the nineteenth century. Offered: jointly with HSTAS 457.

WOMEN 458 Ideologies and Technologies of Motherhood (5) I&S Examines how motherhood is culturally constituted, regulated, and managed within various ideological and technological milieus. Uses ethnographies from anthropology and case studies from feminist legal theory. Topics include slave mothers, surrogate mothers, lesbian mothers, transracial mothers, co-mothers, teen mothers. Prerequisite: WOMEN 200. Offered: jointly with ANTH 484.

WOMEN 459 Gender Histories of Modern China, 18th to 20th Centuries (5) I&S Barlow Emergence of modernist social, political, intellectual gender formations in social activism, revolutionary writing, scientific ideologies, economic globalization. Stresses gender difference in colonial modernity, revolutionary movement, communism, post-socialist market society. Relates modern Chinese women to global flows, new division of labor, local and regional experience. Offered: jointly with HSTAS 459.

WOMEN 462 Isak Dinesen and Karen Blixen (5) VLPA Stecher-Hansen The fiction of Isak Dinesen (pseudonym for Karen Blixen) is reevaluated in light of current issues in literary criticism, particularly feminist criticism. Close readings of selected tales, essays, and criticism. Offered: jointly with SCAND 462.

WOMEN 468 Latin American Women (5) I&S/ VLPA Steele The elaboration of discourses of identity in relation to gender, ethnicity, social class, and political ideologies, by women writers from South America, Mexico, Central America, and the Caribbean. Testimonial literature, literature and resistance, women’s experimental fiction. Prerequisite: either SPAN 303 or SPAN 316; SPAN 321; one additional 300-level course above SPAN 303. Offered: jointly with SPAN 468.

WOMEN 474 Trans/Gender Queries (5) I&S Swarr Writings by and about people who fall outside common conceptions of “women” and “men.” Looks beyond this dualism in contemporary and historical global contexts, locating the emerging fields of transgender studies in feminist studies and asking what the category “transgender” enables and obscures.

WOMEN 476 Women and the City (5) I&S Englund Explores the reciprocal relations between gender relations, the layout of cities, and the activities of urban residents. Topics include feminist theory and geography (women, gender, and the organization of space); women and urban poverty, housing and homelessness: gender roles and labor patterns; geographies of childcare; and women and urban politics. Offered: jointly with GEOG 476.

WOMEN 483 Topics in U.S. Women’s History (5, max. 10) I&S Yee Selected topics in United States women’s history from the nineteenth and twentieth centuries. Prerequisite: either WOMEN 200, WOMEN 203, or WOMEN 353.

WOMEN 485 Issues for Ethnic Minorities and Women In Science and Engineering (3/5) I&S Addressed issues faced by women and ethnic minorities in physical sciences and engineering. Focuses on participation, barriers to participation, and solutions to those issues for women and ethnic minorities in physical sciences and engineering. Offered: jointly with PHYS 451.

WOMEN 486 Representing Beyond the Binaries: Mixing Race, Gender, and Sexuality in the Media (5) I&S Joseph Cultural studies approach to examining the mixed formations that race, sexuality, and gender take in the contemporary United States media. Draws upon multi-disciplinary scholarship in examination of the media. Offered: jointly with COM 490AES 490.

WOMEN 488 Women and/or Science (5) I&S Ginorio Explores science as a method of inquiry and as a profession while also expanding knowledge about women through the use of biographies of women scientists, discipline-based and feminist critiques, and the psycho-social concept of socially defined identities. Recommended: one Women Studies course and one college-level science course.

WOMEN 490 Special Topics in Women Studies (2-5, max. 15) I&S Exploration of specific problems and issues relevant to the study of women. Offered by visiting or resident faculty members. Primarily for upper-division and graduate students.

WOMEN 493 Senior Thesis (2-5, max. 15) Students conceptualize a topic, conduct primary and secondary research, and write a major paper or project that engages methodologies and theories in interdisciplinary women’s studies. Students work independently with a faculty member.

WOMEN 494 Women Studies Capstone (5) I&S Provides graduating seniors with the opportunity to demonstrate facility with writing, critical thinking, documentation of scholarly work, researching/gathering of information, and the ability to disseminate ideas to intended audiences via the creation of a capstone project. Offered: AWPSP.

WOMEN 495 Tutoring Women Studies (5) Students train to serve as tutors in designated courses. Facilitate weekly group discussions, assist with writing assignments, explain course materials. Credit/no credit only.

WOMEN 496 Global Feminisms: International and Indigenous Communities (5-12, max. 24) Participation in academic study abroad programs related to women’s studies. Explores globalization and study in international contexts or indigenous communities within the United States. Prerequisite: WOMEN 200.

WOMEN 497 Fieldwork in Women Studies (1-15, max. 15) Internship in local feminist-oriented agencies or projects. Includes a seminar component linking internship to scholarly literature and small group discussion. Supports in-depth exploration of social issues and skill development. Credit/no credit only. Offered: AWPSP.

WOMEN 499 Undergraduate Research (1-5, max. 10) Independent study and research supervised by a faculty member with appropriate academic interest. Offered: AWPSP.

WOMEN 501 History of Feminism (5) Study of feminism from the 18th through the 20th centuries in the national, international, and intranational world system, with a focus on imperialism, colonialism, nationalism, and modernity. Surveys the literature in a global context, supplemented by critical essays and historiographic reviews.

WOMEN 502 Cross Disciplinary Feminist Theory (5) Raises questions about how feminism becomes theory and what the relation of feminist theory is to conventional disciplines. Readings exemplify current crises in feminism (e.g., the emergence of neo-materialism; critical race theory; citizenship; identity; transnational and migrancy and questions of post-colonialism) to consider disciplinization.

WOMEN 503 Feminist Research and Methods of Inquiry (5) Explores appropriate methodologies for interdisciplinary work. Asks how scholarship is related to feminism as a social movement and to the institutions in which we work. Focuses on how similar objects of study are constituted in different disciplines for feminist scholars. Offered: Sp.

WOMEN 504 Philosophies and Techniques of Teaching (5) Acquaints students with professional and educational issues of college teaching. Students design a course, including a daily outline, reading materials, evaluation instruments, course activities, assessment plans. Includes weekly teaching exercises as well as videotaping an actual class. Prerequisite: experience as a TA or equivalent. Priority given to Women Studies graduate students.

WOMEN 505 Feminist Publishing (5) Seminar on feminist academic publishing. Students revise a scholarly paper in preparation for submission to an academic journal and provide critical commentary on other students’ scholarly work. Also addresses general and specific issues related to the profession of academic publishing.

WOMEN 512 Critical and Interdisciplinary Approaches to Women’s Health (3) Ensaig, Schroeder Critical examination of the historical, socio-political, and scientific influences on women’s health. Issues of sexism, racism, and heterosexism discussed from the perspective of different disciplines. Offered: jointly with NURS 512; W.

WOMEN 513 Seminar in Contemporary Women’s Health Issues (1-5, max. 12) Critical analysis of contemporary and historical literature relevant to health care for women across the life span. Synthesis of a holistic view of women’s health to guide research and practice. Offered: jointly with NURS 513.

WOMEN 534 Feminism and History of Women in China (5) Explores historical question of gendered subjects in modern China and feminist stories of emancipation of Chinese women asking how these render invisible other kinds of history. Prerequisite: background in China studies or ability to handle Chinese primary sources.

WOMEN 539 Social Movements in Contemporary India (5) Ramamurthy Covers issues of social change, economic development, and identity politics in contemporary India studied through environmental and women’s movements. Includes critiques of development and conflicts over forests, dams, women’s rights, religious community, ethnicity, and citizenship. Offered: jointly with SISSA 539/ANTH 539.

WOMEN 546 Gender and Colonialism in Eastern Asia (5) d Economic and political colonialization, post-colonialism, and statist-resistant citizenship; intra-Asian subimperialism, structuring domestic production, family, and gendered subjectivities; humanism and the New
School of Business Administration

Accounting

ACCTG 199 Accounting for Problem Solving (2, max. 4) Supplementary lectures, discussions, and problem solving sessions in introductory accounting. Enrollment priority to EOP students and others by permission. Credit may not be applied to fulfill specific program requirements. Credit/no credit only. Corequisite: ACCTG 215.

ACCTG 225 Fundamentals of Managerial Accounting (5) Analyses and evaluation of accounting information as part of the managerial process of planning, decision making, and control. Concentrates on information useful to enterprise managers. Prerequisite: ACCTG 215; ECON 200; may not be repeated.

ACCTG 301 Intermediate Accounting I (3) Concepts and principles of financial accounting. Analysis of controversies and problems related to the measurement of enterprise income and asset and liability valuation. Prerequisite: 2.0 in ACCTG 225; may not be repeated.

ACCTG 302 Intermediate Accounting II (3) Concepts and principles of financial accounting. Analysis of controversies and problems related to the measurement of enterprise income and asset and liability valuation. Prerequisite: 2.0 in ACCTG 301; may not be repeated.

ACCTG 303 Intermediate Accounting III (3) Concepts and principles of financial accounting. Analysis of controversies and problems related to the measurement of enterprise income and asset and liability valuation. Prerequisite: 2.0 in ACCTG 301; may not be repeated.

ACCTG 311 Cost Accounting (3) Introduction to the theory of cost accounting: job order, process, and standard cost systems; overhead accounting; problems in accumulation and allocation of costs; decision making with cost data. Prerequisite: 2.0 in ACCTG 301; may not be repeated.

ACCTG 320 Introduction to Accounting Information Systems (3) Concepts of accounting information systems in organizations. Processes of analyzing and designing accounting information systems, with emphasis on those using computer facilities. Internal controls and auditing considerations. Prerequisite: 2.0 in ACCTG 225; IS 300 which may be taken concurrently; may not be repeated.

ACCTG 375 Topics in Financial Reporting (4) Critical examination of the uses and limitations of general purpose financial statements that have been prepared in accordance with generally accepted accounting principles. Not open to credit to accounting majors or to students who have completed 301. Prerequisite: 2.0 in ACCTG 225; may not be repeated.

ACCTG 401 Federal Income Tax Factors in Business Decisions (3) Service course in taxation recommended for the junior year for non-accounting majors. May also be taken by MBA students for graduate credit. Not open to accounting majors. Prerequisite: 2.0 in ACCTG 225; may not be repeated.

ACCTG 411 Auditing Standards and Principles (3) Intensive introduction to the attest function in society today. The environment, the process, and the report of the public auditor are analyzed. Potential extensions of the attest function are examined. Prerequisite: 2.0 in ACCTG 302; 2.0 in ACCTG 311; 2.0 in either ACCTG 320 or ACCTG 330; may not be repeated.

ACCTG 420 Database Management for Accounting (3) Continuation of ACCTG 320, covering database and processing architectures, database reliability, database recovery, database security, database administration, intranets and the internet, and network security. Not available for credit to information systems majors or to students who have completed IS 410 and 445. Prerequisite: 2.0 in ACCTG 320; may not be repeated.

ACCTG 421 Tax Effects of Business Decisions (3) Issues in taxation, including tax considerations in business decision making, tax effects of business transactions, taxation of compensation, fringe benefits, capital gains, fixed asset transactions, disposition of business distribution from corporations. Prerequisite: 2.0 in ACCTG 302; may not be repeated.

ACCTG 440 Accounting and Financial Management Decisions (3) Business financial planning with an emphasis of the role of accounting information in financial decisions. Topics include the accounting and finance aspects of business valuation, short and long term financing, short and long term investments, alternative types of debt and equity financing, and related topics. Prerequisite: 2.0 in ACCTG 302; 2.0 in ACCTG 311; FIN 350; may not be repeated.

ACCTG 450 Business Taxation (3) Issues of taxation for entities other than individuals, including corporations, subchapter S corporations, partnerships, estates, and trusts. Includes
corporate distributions, liquidations, and reorganizations. Prerequisite: 2.0 in ACCTG 421; may not be repeated.

ACCTG 451 Individual Income Taxation (3) Political, economic, and social forces influencing federal income taxation, role of taxation in personal decisions. Coverage of individual income tax matters, including business and investment income, business and personal deductions, property transactions, and tax issues of employees. Prerequisite: 2.0 in ACCTG 421; may not be repeated.

ACCTG 460 Advanced Cost Accounting (3) Advanced analysis of cost and management accounting problems; special applications of cost accounting techniques for management planning and control; current developments in cost accounting. Prerequisite: 2.0 in ACCTG 421; may not be repeated.

ACCTG 480 Accounting for Not-for-Profit Organizations (3) Fund and budgetary accounting as applied to public sector organizations, such as governments, hospitals, and colleges. Prerequisite: 2.0 in ACCTG 302; may not be repeated.

ACCTG 485 Advanced Financial Accounting (3) Accounting for partnerships, accounting for business combinations, parent-subsidiary and branch relationships, foreign exchange. Prerequisite: 2.0 in ACCTG 302; may not be repeated.

ACCTG 490 Special Topics in Accounting (1-6, max. 6) Special topics of current concern to faculty and students. Offered only when faculty is available and student interest is sufficient. Class is announced in advance of scheduled offerings.

ACCTG 495 Accounting Internship (1-4, max. 6) One quarter's internship with a certified public accounting firm, industrial organization, or government agency. Credit/no credit only. Prerequisite: ACCTG 301.

ACCTG 499 Undergraduate Research (1-6, max. 9) Arranged and supervised by individual members of the faculty.

ACCTG 500 Financial Accounting (4) Introduction to concepts and procedures underlying determination and presentation of information for financial decisions by investors and other decision makers outside the business enterprise. Study of problems of valuation, income determination, and financial reporting.

ACCTG 501 Managerial Accounting (3) Study of the generation and the use of accounting information within the firm for purposes of planning and controlling operations. Topics covered include cost concepts, responsibility accounting systems, cost control, and the use of accounting information in short- and long-term management decision problems. Prerequisite: ACCTG 500.

ACCTG 503 Introduction to Accounting for Managers (4) Noreen, Sundem. Provides potential managers with a basic knowledge of financial and managerial accounting. Focuses on the use, not the preparation, of accounting information. Examples presented for a variety of for-profit and nonprofit organizations.

ACCTG 505 Intensive Analysis of Accounting Principles and Practices (18) Covers the subjects in the required core for undergraduate accounting majors: intermediate accounting, advanced accounting, cost accounting, auditing, and tax accounting. Credits will not count toward MBA degree. Prerequisite: ACCTG 215 and ACCTG 225 or equivalent, or permission of instructor.

ACCTG 510 Introduction to Financial Statement Analysis (4) Extension of the core financial accounting material, focusing on the use of financial statements to assess the financial position and prospects of companies. Examines the critical financial reporting issues that influence interpretation of financial statements. Prerequisite: either B A 502, ACCTG 500, or permission of instructor.

ACCTG 511 Advanced Financial Statement Analysis (4) Covers accounting issues related to firm valuation and use of financial statement information to assess the risks and rewards of various firm strategies. Prerequisite: ACCTG 510 or permission of instructor.

ACCTG 513 Tax Effects of Business Decisions (4) Importance of tax considerations in making business decisions. Covers regulatory and economic impacts of the U. S. tax system. Prerequisite: either B A 502, ACCTG 500, or permission of instructor.

ACCTG 515 Problems in Managerial and Cost Accounting (4) Extension of the core management accounting material. Uses cases and discussion to analyze costing techniques, use of accounting data in planning and evaluation managerial performance, and use of accounting data in short-run and long-run decisions. Prerequisite: either B A 502, ACCTG 501, or permission of instructor.

ACCTG 521 Cases and Issues in Information Quality and Assurance Services (4) Analysis of cases and discussions of current issues dealing with assurance services. Prerequisite: ACCTG 520.

ACCTG 523 Advanced Financial Analysis (4) Explores the use of published financial reports by decision makers external to the firm (e.g. investors and creditors). Emphasis is on traditional and statistical analyses of financial statements for the purposes of making economic decisions. Prerequisite: ACCTG 522.

ACCTG 524 Individual Taxation (4) Political, economic, and social forces influencing federal income taxation, role of taxation in personal decisions. Coverage of individual tax matters, including business and investment income, business and personal deductions, property transactions, and tax issues of employees.

ACCTG 525 Business and International Taxation (4) Issues of taxation for entities other than individuals, including corporations, subchapter S corporations, partnerships, estates, and trusts. Included corporate distributions, liquidations, and reorganizations. International dimensions of business taxation are introduced. Prerequisite: ACCTG 524.

ACCTG 527 Communications in Professional Accounting (4) Introduction to the communications practices of professional accountants. Development of effective written and oral skills employed in accounting presentations such as audit reports. Study of results of organizational communications research applicable to accounting firms and units within firms.

ACCTG 530 Tax Issues in Property Ownership (4) Analysis of gain and loss realization, recognition, and characterization. Detailed exploration of statutory and case law regarding acquisition, ownership, and disposition of assets. Treatment of capital and ordinary gains and losses. Timing issues regarding deferral transactions and installment reporting are analyzed. Prerequisite: undergraduate accounting concentration or equivalent.

ACCTG 531 Timing and Periods of Taxation (3) Analysis of the cash and accrual methods of accounting, choice of taxable period and multi-period transaction analysis. Consideration of statute of limitations and mitigation thereof. Details of passive activity losses. Prerequisite: undergraduate accounting concentration or equivalent.

ACCTG 534 Fundamentals of Corporate Taxation (3) Detailed analysis of contribution of assets to corporations. Calculation of recognized gains and basic effects of asset contributions. Treatment of income and deduction items of corporate operations. Analysis of distribution of assets to shareholders with respect to their stock. Prerequisite: undergraduate accounting concentration or equivalent.

ACCTG 535 Advanced Issues in Corporate Taxation (3) A continuation of 534. Fundamentals of moving assets out of and within corporate solution. Basics of corporate reorganizations: acquisitive and divisive. The details of the election to obtain (or avoid) the Section 338 election are explored in detail. Prerequisite: undergraduate accounting concentration or equivalent; ACCTG 534 or permission of instructor.

ACCTG 536 Advanced Issues in Corporate Taxation (3) Continuation of 534 and 535. Study of complex issues in corporate taxation planning. Substantial portion of course involves resolving case studies to improve analytic skills and to interrelate disparate corporate planning opportunities. Corporate reorganizations are analyzed in detail. Prerequisite: undergraduate accounting concentration or equivalent; ACCTG 535 or permission of instructor.

ACCTG 537 Income Taxation of Conduits I (3) Tax consequences to owners and entity from formation, operation, distributions from, and liquidation of partnerships and S corporations. Study of taxable and tax-free formations, nature of "bottom line" income and separately stated items, changes to owners' tax basis, basics of non-liquidating and liquidating distributions. Prerequisite: undergraduate accounting concentration or equivalent. Offered: W.

ACCTG 538 Income Taxation of Conduits II (3) A continuation of 537. Study of complex issues in partnership and S corporation taxation. Substantial portion involves resolution of case studies to improve analytic skills and interrelate partnership and S corporation planning issues. Sections 751(b) and 736 examined in detail. Prerequisite: undergraduate accounting concentration or equivalent.
concentration or equivalent; 537 or permission of instructor.

ACCTG 539 Tax Research and Decision Making (4) Decision-making processes in relation to problems of taxation. Tools of tax analysis and research and the communication of conclusions flowing from professional tax work. Role of the professional accountant in client business transactions and in negotiations with taxing authorities is highlighted and simulated on the basis of actual case histories. Prerequisite: undergraduate accounting concentration or equivalent.

ACCTG 541 Communications for Taxation Professionals (4) Introduction to the communications forms and to practices professional accountants and accounting managers. Development of effective written and oral skills employed in accounting presentations, such as audit reports and consultants’ reports. Study of results of organizational communications research applicable to accounting firms and/or units within firms. Prerequisite: undergraduate accounting concentration or permission of instructor.

ACCTG 543 Income Taxation of Trusts and Estates (3) Development of fundamental skills regarding income taxation of trusts and estates. Calculation of distributable net income and the distribution deduction for the fiduciary entity. Basic analysis of the throwback rules. Case studies. Prerequisite: undergraduate accounting concentration or equivalent.

ACCTG 547 Estate and Gift Taxation (3) Development of fundamental knowledge of the unified transfer tax on the transfer of property from one person to another. Calculation of gross estate, adjusted gross estate, and taxable estate. Calculation of gift and estate taxes owing. Discussion of estate planning concepts. Prerequisite: undergraduate accounting concentration or equivalent.

ACCTG 554 Governmental Accounting (4) Budgetary and financial accounting/reporting as applied at the state, local, and special-purpose governments; financial accounting and reporting for not-for-profit organizations.

ACCTG 556 Issues in International Accounting (4) Insights into the conceptual, managerial, professional; and institutional issues of international accounting. Focus on current topics in international accounting and on the cultural, managerial, and governmental forces that shape both internal and external accounting in specific countries.

ACCTG 575 Internship (14) Professional internship in graduate accounting program. Prerequisite: enrollment in MPAcc program, accounting and assurances track.

ACCTG 576- Independent Research Project Proposal (2-) Topic identification and development for research project to be completed in ACCTG 577. Prerequisite: enrollment in MPAcc program, accounting and assurances track.

ACCTG 577 Independent Research Project Proposal (4) Development and completion of independent research project. Topic identification and proposal approval completed in ACCTG 576. Prerequisite: enrollment in MPAcc program, accounting and assurances track; ACCTG 576.

ACCTG 579 Special Topics in Accounting (2/4, max. 12) Accounting topics of current concern to faculty and students. Offered only when faculty are available and sufficient student interest exists. Semester or content announced in advance of scheduled offering. Prerequisite: permission of instructor.

ACCTG 580 Introduction to Accounting Research (4) Examination of research problems and techniques in accounting. Interdisciplinary nature of accounting research emphasized. Work in finance, economics, and psychology used to develop current trends in accounting research. Prerequisite: ACCTG 511 or permission of instructor.

ACCTG 581 Seminar in Managerial Accounting (4) Critical examination of conceptual and practical issues of cost and managerial accounting. Specific topics may change from quarter to quarter, and they include application of behavioral, quantitative, and economic models to managerial accounting problems. Prerequisite: ACCTG 511 or permission of instructor.

ACCTG 582 Seminar in Managerial Accounting Research (4) Examination of research problems and techniques in accounting. Some topics may change from quarter to quarter, and they include application of behavioral, quantitative, and economic models to managerial accounting problems. Prerequisite: ACCTG 511 or permission of instructor.

ACCTG 600 Independent Study or Research (1-5, max. 15) Examination of research problems and techniques in accounting. Some topics may change from quarter to quarter, and they include application of behavioral, quantitative, and economic models to managerial accounting problems. Prerequisite: doctoral student status.

ACCTG 603 Seminar in Managerial Accounting Research (4) Critical analysis of current managerial accounting research, both published and unpublished. Prerequisite: doctoral student status and ACCTG 580 or equivalent or permission of graduate office.

ACCTG 604 Seminar in Managerial Accounting Research (4) Critical analysis of current managerial accounting research, both published and unpublished. Prerequisite: doctoral student status and ACCTG 580 or equivalent or permission of graduate office.

ACCTG 605 Seminar in Managerial Accounting Research (4) Critical analysis of current managerial accounting research, both published and unpublished. Prerequisite: doctoral student status and ACCTG 580 or equivalent or permission of graduate office.

ACCTG 606 Independent Study or Research (1-5, max. 15) Examination of research problems and techniques in accounting. Some topics may change from quarter to quarter, and they include application of behavioral, quantitative, and economic models to managerial accounting problems. Prerequisite: doctoral student status.

ACCTG 607 Independent Study or Research (1-5, max. 15) Examination of research problems and techniques in accounting. Some topics may change from quarter to quarter, and they include application of behavioral, quantitative, and economic models to managerial accounting problems. Prerequisite: permission of the School of Business Administration.

ACCTG 608 Independent Study or Research (1-5, max. 15) Examination of research problems and techniques in accounting. Some topics may change from quarter to quarter, and they include application of behavioral, quantitative, and economic models to managerial accounting problems. Prerequisite: permission of the School of Business Administration.

ACCTG 609 Independent Study or Research (1-5, max. 15) Examination of research problems and techniques in accounting. Some topics may change from quarter to quarter, and they include application of behavioral, quantitative, and economic models to managerial accounting problems. Prerequisite: permission of the School of Business Administration.

ACCTG 610 Independent Study or Research (1-5, max. 15) Examination of research problems and techniques in accounting. Some topics may change from quarter to quarter, and they include application of behavioral, quantitative, and economic models to managerial accounting problems. Prerequisite: permission of the School of Business Administration.

ACCTG 611 Independent Study or Research (1-5, max. 15) Examination of research problems and techniques in accounting. Some topics may change from quarter to quarter, and they include application of behavioral, quantitative, and economic models to managerial accounting problems. Prerequisite: permission of the School of Business Administration.
B A 541 Environmental Management I (4) Survey of environmental ethics, environmental laws and regulation, the economics of environmental decisions, and the relationship of business to public policy and the environment. Must be taken concurrently with B A 544. Prerequisite: permission of instructor.

B A 542 Environmental Management II (4) Applications of the functional areas of business to environmental concerns. Major federal legislation affecting these concerns applied to business problems in the areas of accounting, finance, marketing, management information systems, and organizational behavior. Must be taken concurrently with B A 544. Prerequisite: permission of instructor.

B A 543 Environmental Management III (4) Case studies that integrate the fundamentals of business and environmental management to address such issues as plant siting, regulatory compliance, production line changes, and innovative strategic responses to environmental issues. Case studies include results of student consulting projects and a capstone case in environmental management. Must be taken concurrently with 544. Prerequisite: B A 542 or permission of instructor.

B A 544 Environmental Management Seminar (1, max. 3) Guest lecturers from academia, business, government, and advocacy groups discuss environmental science, ethics, law, regulation, economics, finance, accounting, and policy issues. Seminar topics supplement course material in 541, 542, 543 which are to be taken concurrently.

B A 545 The Global Business Forum: Current Issues in Global Business (1, max. 3) Discussion of current trends in the global business environment and of international issues facing companies. Leaders from international businesses and other organizations, as well as faculty members from various departments and specializations, are invited to share their perspectives with seminar participants. Topics change each quarter.

B A 560 Cooperative Education in Business (1) Business practicum: internship with approved business or governmental agency. Open only to students who meet requirements of internship program. Internship credit may not be applied to fulfill specific course requirements or to credits required for graduation. Credit/no credit only. Offered: S.

B A 571 Research Reports (4-) Independent study in business administration: critical evaluation of business analysis and research methods. Effective communication of ideas emphasized. Methods and content of independent research studies subjected to critical evaluation. Open only to MBA non-thesis students. Prerequisite: instructor’s approval of preliminary research topic outline. 

B A 572 Research Reports (4-) Independent study in business administration: critical evaluation of business analysis and research methods. Effective communication of ideas emphasized. Methods and content of independent research studies subjected to critical evaluation. Open only to MBA non-thesis students. Prerequisite: B A 571.

B A 578 Practicum in Business Management (2) Provides an opportunity for first-year MBA students to apply the skills learned in the classroom to real world problems. Students participating in the Business Consulting Network (BCN) partner with client firms on an applied learning project that offers additional training opportunities not possible in the classroom. Credit/no credit only.

B A 580 Problems in Microeconomics (4) Study of microeconomic intuition, directed toward Business School Ph.D. students, showing the interconnections between formal, mathematically analysis and the unstructured economic questions posed by the world. Emphasis on setting up problems and examining the intuition behind the analysis of them. Many applications to specific business issues.

B A 700 Master’s Thesis (*)

B A 800 Doctoral Dissertation (*)

Business Administration Research Methods

BA RM 580 Applied Econometrics I (4) Emphasizes the application of econometric methods rather than the mathematical proofs of statistical procedures. Introduction to the linear regression model, interpretation of summary statistics, bias and precision of regression estimates, analysis of the residuals, and hypothesis testing. Prerequisite: STAT 342 or STAT 395 or STAT 481, or permission of instructor.

BA RM 590 Behavioral Research Methods-Theory and Design (4) Philosophy of science, development of scientific method, and meaning of behavioral research. Historical perspective of scientific investigation and the evaluation of research. Development of theory and its relationship to research. Various strategies and designs in behavioral research. Prerequisite: STAT 361, STAT 362, or permission of instructor.

BA RM 591 Behavioral Research Methods-Approaches and Applications (4) Considers alternative research approaches, such as laboratory and field experimentation, simulation, and surveys, with data-gathering techniques appropriate for each approach. It is primarily concerned with developing alternative approaches to research problems and with discussing specific applications. It builds upon a background of specific statistical tools and techniques and an understanding of theory development and research design. Prerequisite: STAT 361, STAT 362, or permission of instructor.

Business Communication

B CMU 301 Basic Written Business Communications (4) Broad analytical approach to written communications as a management tool. Analysis of the psychology, semantics, planning, and presentation of effective business writing. Practical applications through messages that inform and persuade, grant and refuse; plus short business reports and applications for positions. Cannot be taken for credit if CMU 302 already taken. Offered: AWSp.

B CMU 302 Basic Written Business Communications for Accounting Majors (4) Broad analytical approach to written communications as a management tool for accountants. Analysis of the psychology, semantics, planning, and principles of effective business writing. Practical applications through messages that inform and persuade, grant and refuse; plus short business reports and applications for positions. Cannot be taken for credit if CMU 301 already taken. Corequisite: ACCTG 301.

B CMU 410 Business Reports and Other Specialized Communications (4) Covers internal and external, written and oral business reporting. Considers communications strategies within the context of rapidly changing technologies. Students learn to apply primary and secondary research to quarterly-long, individual projects resulting in a variety of reports: proposals, progress reports, feasibility studies, business plans, etc. Prerequisite: either CMU 301 or CMU 302.

B CMU 490 Special Topics in Business Communications (1-6, max. 12) Students and faculty focus on current topics. Corequisites: either CMU 301 or CMU 302.

B CMU 499 Research in Business Communications (1-6, max. 9)

B CMU 509 Finding your Voice (2) Develop a leadership communication style by discovering core values and learning how to translate those values into effective messages. Students give speeches as well as critique speeches of classmates, produce written evaluation of speeches given in class and receive instructor feedback. Prerequisite: BA 501.

B CMU 510 Business Communications for Managers (4) Develops understanding of communication theories, describes strategies for planning managerial communications, and builds skills in oral and written reporting and persuading. Looks at how new technologies are changing the way people in business communicate, and the implications those changes have for organizations. Prerequisite: BA 501.

B CMU 579 Special Topics in Business Communication (2/4, max. 12) Business and managerial communication topics of current interest to faculty and students.

B CMU 600 Independent Study or Research (*)

Goethals, Kaltzki Offered: AWSp.

Business Economics

B ECON 300 Managerial Economics (4) Analysis of economic factors affecting decisions made by business firms. Demand and cost analysis, and alternative policies from the firm’s point of view. Prerequisite: ACCTG 225; ECON 201; either MATH 112, MATH 124, MATH 125, MATH 127, MATH 134, MATH 145, or Q SCI 291; either IND E 315, QMETH 201, Q SCI 381, PSYCH 315, PSYCH 318, STAT 220, STAT 311, or STAT 330; may not be repeated.

B ECON 301 Intermediate Macroeconomics (4) Analysis of economy with attention to the business cycle, output of goods and services (GNP), inflation, unemployment, and government’s fiscal and monetary policies. How
the economy affects individuals and firms and how to deal effectively with the economic environment. Prerequisite: ECON 201; may not be repeated.

B ECON 420 Financial Markets (4) Analysis of the structure and functions of the money and capital markets; the saving-investment process and financial intermediaries; supply and demand for lendable funds and the level and structure of interest rates, role of Federal Reserve and Treasury in money market developments. Prerequisite: either B ECON 301 or ECON 301; may not be repeated.

B ECON 426 Competing in the Global Economy (4) Examines the global environment for business and the challenges facing managers in this environment. Explores the implications of the common phrase "think global — act local." Prerequisite: either B ECON 300 or ECON 300; either B ECON 301 or ECON 301.

B ECON 427 International Finance (4) Asset choice and institutional operations in international financial and foreign exchange problems, the impact of international financial problems and operations on business, short- and long-term international financing. Prerequisite: either B ECON 300 or ECON 300; either B ECON 301 or ECON 301; may not be repeated.

B ECON 490 Special Topics in Business Economics (1-6, max. 6) Study and research on topics of current concern to faculty and students. Only offered when allowed by faculty availability and sufficient student interest. Seminar content to be announced in advance of scheduled offerings.

B ECON 499 Undergraduate Research (1-6, max. 9) Research in selected areas of business economics. Recommended: either ECON 301 or B ECON 300 and B ECON 301.

B ECON 500 Introduction to Business Economics (4) Factors underlying the determination of cost and prices for the industry and the firm, demand and supply analysis and firm behavior. The relation of the economic environment to the microeconomic decisions of the firm.

B ECON 501 Analysis of Global Economic Conditions (4) Analysis of real and monetary factors affecting national and international economics, supply and demand for money, interest rates and stabilization problems and policies, in relation to government policy effects on business and individual affairs. Focuses on global macroeconomic issues. Prerequisite: B ECON 500.

B ECON 520 Financial Markets (4) Analysis of the structures and functions of financial markets and institutions; the behavior of interest rates through time; the cross-sectional structure of interest rates; and the roles of the Federal Reserve and Treasury in financial markets. Prerequisite: FIN 509.

B ECON 527 International Finance (4) Study of selected problems in financing, international trade, investment, and foreign business operations; international aspects of money markets; problems of evaluation of foreign investments. Prerequisite: either B A 502 or both B ECON 501 and FIN 502.

B ECON 579 Special Topics in Business Economics (2/4, max. 12) Business economics topics of current concern to faculty and students. Offered only when faculty are available and sufficient student interest exists. Seminar content announced in advance of scheduled offering. Prerequisite: permission of instructor.

B ECON 600 Independent Study or Research (*) Business Policy

B POL 482 Strategies for New Ventures (4) Focuses on market analysis and strategy formation. Includes building an entrepreneurial firm, market opportunity analysis, product testing, developing and implementing business plans, venture financing, and managing a growing company. Prerequisite: B POL 471; MKTG 335; MKTG 455; FIN 454.

B POL 499 Undergraduate Research (1-6, max. 9).

Electronic Business

EBIZ 501 E-Business Marketing (4) Schlosser Uses current strategies for Internet marketing and explores new frontiers. Topics include examining the history, culture, and design of the Internet and the resulting impact on marketing; Web-based business models; Web demographics; Web usage behavior; privacy issues; brand loyalty; virtual communities; and commercial Web site effectiveness metrics. Offered: W.

EBIZ 502 E-Business Technology (4) Mookerjee Examines the underlying information technologies that are driving the e-business revolution, including the overall technical infrastructure required to execute an e-business solution. Taught via lectures, projects, and hands-on sessions in the E-Business lab. Students implement and manage an e-business site. Offered: A.

EBIZ 503 E-Business Economics (4) Rice, Schall, Tarhouni Uses economic principles to assess the implications of evolving Internet technology for business decision-making, market prices, and market structure. Develops theoretical extensions of the models covered in B A 500 to analyze the questions that the Internet poses. Includes a group paper and a group evaluation of an Internet company. Offered: W.

EBIZ 504 E-Business Strategy (4) Kotha Integrates issues pertaining to management of technology and entrepreneurship: the emergence of the global digital economy and its impact on commerce, business models in e-commerce, "networked entrepreneurship" and its place in existing corporations. Lectures and featured speakers from online Seattle firms, case discussions, and group projects. Offered: ASp.

EBIZ 509 Foundations of E-Business (2) Examines the fundamental technologies associated with business-to-consumer and business-to-business interaction and delivery of content via the Internet. Contrasts clients-versus-server-side approaches to database processing and XML, and execution of business rules and logic. Includes hands-on experience with the various technologies. Prerequisite: Permission of School of Business Administration. Offered: Sp.

EBIZ 579 Special Topics in E-Business (2-4, max. 12) Topics vary. Offered only when faculty members are available and there is sufficient student interest.

EBIZ 600 Independent Study or Research (8)

Entrepreneurship

ENTRE 370 Introduction to Entrepreneurship (4) Introduction to entrepreneurial practices with an emphasis on learning how to find business ideas, how to evaluate their potential, and how to recognize the barriers to success. Exposure to the stresses of a start-up business, the uncertainties that exist, and the behavior of entrepreneurs. Prerequisite: ACCTO 225; ECON 200; ECON 201.

ENTRE 402 Managing Rapid Growth Companies (4) Focuses on developing and managing rapid-growth businesses. Topics include developing and executing business plans in markets poised for rapid growth, expanding beyond niche segments, seeking venture financing from private and public markets, and managing and directing growth appropriate hiring and market expansion. Prerequisite ENTRE/MGMT 401.

ENTRE 440 Business Plan Competition Practicum (4) Explores the challenges/requirements of transforming an idea into a business. Emphasizes developing business concepts/strategy, marshalling resources, providing the business model, and creating strategic plans for growth. Students must attend the business plan competition resource nights and participate in the business plan competition held the following quarter.

ENTRE 472 Creating a Company I (4) Two-course sequence with ENTRE 473. Working in teams, students develop a business plan for a new venture, present their plans to a panel of investors, obtain funding, run the business, and exit the firm at the end of the second quarter. Prerequisite: ENTRE 370. Offered: AV.

ENTRE 473 Creating a Company II (4) Two-course sequence with ENTRE 472. Working in teams, students develop a business plan for a new venture, present their plans to a panel of investors, obtain funding, run the business, and exit the firm at the end of the second quarter. Prerequisite: ENTRE 472. Offered: WSp.

ENTRE 490 Special Topics in Entrepreneurship (1-6, max. 6) Prerequisite: ENTRE 370.

ENTRE 509 Foundations of Entrepreneurship (2) Evaluation of new market opportunities and starting a new venture, focuses on identifying and evaluating new venture opportunities, developing and testing market strategies, evaluating test market performance, and evaluating business plans. Emphasizes the interplay between marketing, manufacturing, finance, accounting and team management. Prerequisite: Permission of School of Business Administration. Offered: Sp.

ENTRE 510 Entrepreneurial Ventures (4) Uses the tools of competitive strategy to analyze the
success and failure of entrepreneurial ventures, identifying general strategic principles that might increase the probability that an entrepreneurial venture will succeed. Draws heavily on the principles of microeconomics and strategy. Prerequisite: B A 500; B A 502.

ENTRE 511 Entrepreneurial Marketing (2) Focuses on marketing issues related to the generation and development of innovative ideas, assessment of feasibility, implementation and execution, and valuation of business ventures, highlighting the real world applications by new ventures. Prerequisite: B A 501 and entrepre-

ENTRE 521 Corporate Entrepreneurship (4) Focuses on entrepreneurial activities in large, established corporation. Introduces the theory and best practices on the process of converting new ideas to commercial products and new businesses. Prerequisite: B A 500; B A 501; B A 502.

ENTRE 530 New Venture Creation and Management (4) Focuses on gaining experience in market analysis, new venture strategy formulation, and the management of a new venture. Topics include building an entrepreneurial firm, market opportunity analysis, product testing, developing and executing business plans, venture financing, and managing a growing company. Prerequisite: B POL 509; B A 501. Offered: W.

ENTRE 531 Developing Business Models for Emerging Technologies (4) Song Focuses on the commercialization of emerging technologies. Topics include conducting feasibility assessments of intellectual property landscape, evaluating business opportunities, analyzing competition, developing business models and strategies, constructing a professional quality business plan, and presenting business plan, transforming a new technology into a market-ready technology-based business. Offered: W.

ENTRE 532 Software Entrepreneurship (4) A case- and project-based course, focusing on starting a software or hardware company. Guest entrepreneurs, lawyers, and financiers discuss market identification and analysis, planning the business, financing, and typical operating and administrative problems.

ENTRE 540 Entrepreneurship Practicum (2, max. 4) Bigley, Sundem Enables students interested in new venture creation to explore their entrepreneurial aptitude by competing in a Business Plan Competition offered by the Center for Technology Entrepreneurship. Requires enrollment in the CTE certificate program. Credited/no credit only.

ENTRE 541 Technology Commercialization Practicum (4) Derrickson, Kotha Provides the experience of researching and creating a commercialization plan for a promising technology. Designed to apply the skills and perspectives of students in cross-disciplinary teams so they learn how to work effectively with peers in assessing complex and potentially ambiguous situations. Offered: W.

ENTRE 542 Venture Capital Investment Practicum (2) Dooley, Slig Provides overview and teaches the mechanics of the venture capital industry and culminates in intramural venture capital competition. Students assume the role of investors in a venture capital firm and real entrepreneurs pitch to them for investment dollars. Teams defend their allocation decisions before a judging panel of venture capitalists. Credit/no credit only. Offered: A.

ENTRE 557 Entrepreneurial Finance (4) Analyzes the unique financial issues facing entrepreneurial firms. Topics include assessing financial performance, financial forecasting and planning, financial management of rapidly growing businesses, start-up ventures, valuation, sources of financing, venture capital, initial public offerings, and the decision to harvest. Prerequisite: MBA core courses. Offered: jointly with FIN 557.

ENTRE 579 Special Topics in Entrepreneur- ship (2-4, max. 12) Topics vary. Offered only when faculty members are available and there is sufficient student interest.

ENTRE 581 Theoretical Foundations of Entrepreneurship (4) Song Focuses on the theoretical overview, entrepreneurs, environment and organizational founding, entrepreneurship’s links with other disciplines, venture capital and venture capitalists, new venture strategy and performance, growth processes and challenges, and entrepreneurial networks and alliances. Class sessions review and critique assigned readings associated with each topic. Offered: A.

ENTR 582 Technology, Innovation, and Entrepreneurship (4) Kotha Explores issues of how a knowledge-based economy competes and performs using technological innovations and entrepreneurship. Explores research on capabilities of broader entities; processes of learning at the firm, industry, technology, economy-level; development of know-how as evolutionary process; and explorations by firms, sectors and economies exploring new technolo-
gies and techniques. Offered: W.

ENTRE 590 New Venture Research Practicum (4) Song Explores students to new venture creation phenomena. Teaches how to think about and understand empirical research methods such as case studies, participant-observation, and other field methods while contributing to ongoing cumulative data collection process.

ENTRE 600 Independent Study or Research (1-)

Finance

FIN 350 Business Finance (4) Evaluating and funding projects within the firm. Time value of money, inflation, capital budgeting; risk and return in the financial markets, stocks, bonds, portfolios and diversifiable risk, market efficiency and the balance between debt and equity to fund the firm. Prerequisite: ACCTG 229, ECON 201; either MATH 112, MATH 124, MATH 125, MATH 134, MATH 145, or Q SCI 291; either IND E 315, MATH 390, QMTH 201, Q SCI 381, PSYCH 315, PSYCH 318, STAT 220, STAT 311, or STAT 390.

FIN 423 Banking and the Financial System (4) Role of banks and nonbank financial institutions in the financial system; asset choices of banks and nonbank financial institutions; problems in the management of financial institutions with emphasis on commercial banks. Prerequisite: FIN 350; either B ECON 300 or ECON 300; may not be repeated.

FIN 428 International Financial Management (4) Analysis of financial problems facing businesses engaged in international activities. Financing foreign investment, financial control of foreign operations, and working capital management including foreign exchange positions using cases and readings. Prerequisite: FIN 350.

FIN 450 Problems in Corporate Finance (4) Case problems in corporate financial manage-
ment. Includes cases on valuation of current assets, obtaining short-term loans, raising long-term capital, capital budgeting, and dividend policy. The management point of view is stressed. Prerequisite: FIN 350; either B ECON 300 or ECON 300.

FIN 453 Financial Theory and Analysis (4) Business financial strategic planning. Topics include business valuation and financing, performance evaluation, risk analysis, capital budgeting, and inflation and taxes. Emphasizes tools with real-world applications while incorporat-
ing modern finance concepts. Prerequisite: FIN 350; either B ECON 300 or ECON 300; may not be repeated.

FIN 454 Business Valuation, Investment, and Financing (4) Key issues in financial management using both analytical and case study illustrations. Valuation of public and private companies; cost of capital estimation; investment complications, such as taxes, inflation, risk, project interdependencies, and financing-investment interactions; leasing; mergers; spin-offs and carve-outs. Prerequisite: FIN 350; either B ECON 300 or ECON 300. Offered: W.

FIN 460 Investments (4) Introduction to the nature, problems, and process of evaluating particular securities and portfolio construction and administration. Special attention is directed to the risk and rate-of-return aspects of particular securities portfolios, and total wealth. Prerequisite: FIN 350; either B ECON 300 or ECON 300; may not be repeated.

FIN 461 Financial Futures and Options Markets (4) Introduction to financial futures and options markets. Institutional aspects and social functions of these markets, pricing of options and futures, and risk shifting by hedging. Prerequisite: FIN 350; either B ECON 300 or ECON 300; may not be repeated.

FIN 462 Management of Financial Risk (4) y Modern tools for managing financial risk. Fixed income securities and interest rate risk, credit risk, foreign currency risk, and insurance. Emphasis on use of futures, forwards swaps, and option contracts. Prerequisite: FIN 350; either B ECON 300 or ECON 300; FIN 461.

FIN 490 Special Topics in Finance (1-6, max. 6) Study and research on topics of current concern to faculty and students. Only offered when allowed by faculty availability and sufficient student interest. Seminar content to be announced in advance of scheduled offerings.
FIN 495 Finance Internship (1-4, max. 8) Internship with a private firm, nonprofit organization or government agency, where work experience involves substantial application of finance concepts learned in classroom. Credit/no credit only. Prerequisite: FIN 350. Offered: AWSpS.

FIN 499 Undergraduate Research (1-6, max. 9) Research in selected areas of business finance, resource allocation, and investments, with permission of instructor. Recommend: FIN 350; either B ECON 300 or ECON 300.

FIN 502 Business Finance (4) Financial management of the firm, including capital budgets, working capital analysis, and financing policy. Prerequisite: ACCTG 500, B ECON 500, QMETH 500.

FIN 509 Foundations of Asset Valuation (2) Introduction to valuation, focusing on topics in asset-pricing, fixed income, financial options, and international markets. Emphasizes both theoretical and applied concepts. Course material prepares students for advanced topics covered in the finance electives. Prerequisite: either B A 501 or FIN 502, or permission of School of Business Administration. Offered: Sp.

FIN 528 International Financial Management (4) Analysis of financial problems facing businesses engaged in international activities: financing foreign investment, financial control of foreign operations, and working capital management including foreign exchange positions using cases and readings. Prerequisite: B A 502 or FIN 509.

FIN 530 Financial Management of Banks (4) Analysis of problems in the financial management of commercial banks and other financial institutions. Loan and investment policies, liability management, capital policies, and other selected issues are discussed. Prerequisite: B A 502 or FIN 509.

FIN 550 Advanced Business Finance (4) Systematic coverage of key theoretical issues in financial management. Application of quantitative analysis to financial problems of the firm that are important in practice, including issues related to financing and investment. Prerequisite: FIN 509.

FIN 551 Problems in Business Finance (4) Uses case studies to examine a broad range of financial management topics, including forecasting financial statements, use of bank credit, working capital management, public and private securities issues, capital budgeting, and business valuation. Prerequisite: B A 502.

FIN 552 Problems in Corporate Planning and Financing (4) Uses case studies to examine business financing. Topics include financial statement analysis, financial planning and forecasting, banking relationships, and financing sources, including the use of derivative securities, venture capital, and private equity. Cannot be taken for credit in combination with FIN 551. Prerequisite: FIN 509.

FIN 553 Problems in Capital Investment Planning (4) Case discussions used to examine corporate resource allocation decisions. Topics include capital budgeting techniques, estimation of capital costs, capital budgeting systems, strategic investment decisions, and financial restructurings. Prerequisite: FIN 509.

FIN 555 Financing Decisions, Payout Policy, and Corporate Control (4) Analysis of business financial methods, payout policy, management compensation, ownership structure, and the distribution of control rights. Covers the major issues critical to structuring contracts within the corporation. Prerequisite: FIN 509.

FIN 557 Entrepreneurial Finance (4) Analyzes the unique financial issues facing entrepreneurial firms. Topics include assessing financial performance, financial forecasting and planning, financial management of rapidly growing businesses, start-up ventures, valuation, sources of financing, venture capital, initial public offerings, and the decision to harvest. Prerequisite: B A 502. Offered: jointly with ENTRE 557.

FIN 558 Mergers and Acquisitions (4) Advanced finance topics focusing on providing the necessary training to value, structure and close acquisitions. Additional topics include antitrust issues, the legal environment governing mergers, and antitakeover defense. Offered: WSp.

FIN 560 Investments (4) Introduction to the nature, problems, and process of evaluating particular securities and portfolio construction and administration. Special attention is directed to the risk and rate of return aspects of particular securities, securities portfolios, and total wealth. Prerequisite: FIN 509.

FIN 561 Financial Futures and Options Markets (4) Overview of futures markets and options markets. Analysis of pricing of futures contracts and options; comparison of futures, forward, and options contracts; risk management with hedging; alternative investment strategies; and review of empirical evidence. Prerequisite: FIN 509.

FIN 563 Real Options (2) Short overview of option pricing theory, followed by applications of option analysis in evaluating complex investment projects by business firms. Prerequisite: B A 502.

FIN 579 Special Topics in Finance (2/4, max. 12) Finance topics of current concern to faculty and students. Offered only when faculty are available and sufficient student interest exists. Seminar content announced in advance of scheduled offerings. Prerequisite: permission of instructor.

FIN 580 Doctoral Seminar in Financial Economics (4) Study of the financing of the corporation including current theoretical and institutional developments. Extensive reading and discussion in designated areas covering problems relating to financial management and to the social and economic implications of the financial process. Prerequisite: ECON 500 or permission of instructor.

FIN 590 Doctoral Seminar in Capital Market Theory (4) Decision making under uncertainty, information and capital market efficiency, portfolio theory, capital asset pricing model, arbitrage pricing model, and options pricing model. Prerequisite: ECON 500 or permission of instructor.

FIN 591 Doctoral Seminar in Corporate Finance (4) Principles of intertemporal choice, alternative valuation models, theory of investment under uncertainty, impact of dividend and financing decisions on firm valuation in perfect and imperfect markets, and theory of firm organization and agency costs. Prerequisite: FIN 590 and BA RM 581 or ECON 582 or permission of instructor.

FIN 592 Doctoral Seminar in Financial Research (4) Empirical research in finance with emphasis on methodology and scientific method. Empirical research in market efficiency, capital asset pricing model, options pricing model, and impact of firm's dividend and financing decisions on firm value. Prerequisite: FIN 590 and BA RM 581 or ECON 582 or permission of instructor.

FIN 599 Doctoral Seminar in Finance (1, max. 12) Study and research in advanced topics of finance. Generally concerned with unpublished areas of research, conducted by visiting professors and departmental faculty. Prerequisite: doctoral student status.

FIN 600 Independent Study or Research (*) Human Resources Management and Organizational Behavior HHRMOB 499 Undergraduate Research (1-6, max. 9) Information Systems I S 300 Introduction to Information Systems (5) Fundamentals of information systems, what they are, how they affect organizations. Technical and organizational foundations of information systems, building information systems, managing information system resources. Laboratory emphasizes using computer to analyze, coordinate, solve organizational decision-making problems. Prerequisite: ACCTG 225; ECON 200; either MATH 112, MATH 124, MATH 125, MATH 134, MATH 135, or MATH 145, either ECON 311, IND E 315, QMETH 201, Q SCI 291, Q SCI 391, PSYCH 315, PSYCH 318, STAT 220, STAT 311, or STAT 390; may not be repeated.

I S 310 Fundamentals of Business Information Technologies (4) Exposure to fundamental programming and scripting concepts, conceptual data modeling, database management, and XML. Applying data types and control structures. Continues the concepts of I S 300 of entity-relationship diagrams and record structure diagrams. Database management component includes relational databases, basic SQL, data architecture issues. Prerequisite: I S 300.

I S 320 Fundamentals of Application Programming (4) Fundamental programming concepts including data types, control structures, modularization, and structure programming. Developing solutions for problems in interactive business applications. Introduction to data and file structures. Extensive use of an event-driven programming language. Prerequi-
**I BUS 470 Management of International Trade Operations (4)** Integrated study of international trade functions, practices, concepts, management, strategy, and policy. The approach utilizes lectures, case studies, research, guest speakers, and extensive practical application. Prerequisite: I BUS 300.

**I BUS 480 Multinational Operations Management (4)** Case studies in foreign operations management: planning international objectives and strategies; developing multinational company structures and executives; adapting administrative practices and operating policies to international diversities. Prerequisite: I BUS 300; may not be repeated.

**I BUS 490 Special Topics in International Business (1-6, max. 12)** Students and faculty focus on current topics of concern. Offered when faculty, student interest, and availability allow. Prerequisite: I BUS 300.

**I BUS 491 CIIBS Track Seminar (1, max. 9)** Students meet with business community leaders to discuss international aspects of their companies. Allows for networking and sharing experiences with other students as well as practicing foreign languages. Credit/no credit only. Prerequisite: I BUS 300. Offered: AWSp.

**I BUS 495 International Business Internship (1-4, max. 8)** An internship with a company, not-for-profit organization, or government agency in an international business capacity. Credit/no credit only. Prerequisite: I Bus 300. Offered: AWSpS.

**I BUS 496 International Business Practicum (4)** Offers students opportunity to apply principles, concepts, and skills learned previously to actual business situation. Projects provide students an exposure to the issues and choices facing managers operating in an international business environment. Prerequisite: I BUS 300.

**I BUS 499 Undergraduate Research (1-6, max. 9)** Prerequisite: I BUS 300.

**I BUS 500 Foundations of International Business (2)** Introduction to governmental and organizational forces shaping international business. Considers the issues of trade, direct foreign investment, balance of payments, and comparative advantage. Looks at economic policies of governments and multilateral organizations such as WTO, IMF, and World Bank. Prerequisite: permission of School of Business Administration. Offered: Sp.

**I BUS 509 International Trade Policy (4)** Examines issues important to trade policy. Topics include trade policy basics, tariffs and non-tariff barriers, safeguards, voluntary restraints, dumping, subsidies and strategic trade theory, agricultural trade, developing country rules, regionalism, and services. Prerequisite: B A 500 or course in international economics, trade, or international finance, or permission of graduate office.

**I BUS 510 International Business in Less Developed Countries (4)** Understanding the economic, sociocultural, and political environment in the less developed countries. Problems of international trade and investment, north-south relations, commodities, technology transfer, foreign aid, and capital flows. Prerequisite: B A 500 or course in international economics or trade or international finance, or permission of graduate office.

**I BUS 540 International Business in Industrialized Countries (4)** Understanding the economic, sociocultural, and political environment in developed, industrialized countries. Problems of international trade and payments, economic integration, national policies, and supranational organizations' impact on managerial environments. Prerequisite: B A 500 or course in international economics or trade or international finance, or permission of graduate office.

**I BUS 550 International Business Consulting (4)** Research, analysis, and report on a specific international business project with an existing organization involved with international trade. Possible tasks include identifying most viable foreign target markets, developing best market entry strategies, establishing international terms and conditions of sale, and completing a preliminary marketing or business plan for clients.

**I BUS 560 Multinational Business Management (4)** Managerial responses to problems of international business operations. Strategy formulation in an international context; design and control of multinational organization; adaptation of management systems and policies to different economic, sociocultural, and political environments. Prerequisite: B A 500 or course in international economics or trade or international finance, or permission of graduate office.

**I BUS 561 Science, Technology, and Innovation Policies in East Asia (5)** Role of state and technological change in economic development. Analyzes state and corporate policies historically. Technology concepts, institutions, and policies in Japan, South Korea, Taiwan, and China. Examines sources of Asia's rise in world of technology and explores conditions for its successful continuation. Offered: jointly with SISEA 581.

**I BUS 562 Japanese Business and Technology (5)** Examination of Japan's postwar enterprise system in its historical context. Topics include corporate and financial structure, production and distribution, trade and investment policies, government-business relations, system of innovation, technological developments, prospects for the future. Offered: jointly with SISEA 582.

**I BUS 570 International Study Tour (2)** Educational international study tour. Includes pre-tour and post-tour activities. Prerequisite: B A 502 and permission of School of Business Administration.

**I BUS 572 Cross-Cultural Conversations on Contemporary Issues (1, max. 4)** Creates opportunities for students from across the globe to share information and perspectives on contemporary issues important to international business. In weekly, facilitated, small-group conversations, students improve their ability to formulate and express ideas and opinions, and practice persuasion and facilitation skills. Credit/no credit only.

**I BUS 575 Business Studies Abroad (1, max. 24)** Research and study of foreign business problems in the country or countries where the firm's office or branch is located. Limited to students who have the approval of their major advisor and a faculty member who has agreed to direct their work in accordance with a definite program of studies. Credit/no credit only.

**I BUS 579 Seminar: Special Topics in International Business (2/4, max. 12)** Application of international business principles to the analysis of a specific issue in trade or resource transfer, or to the business conditions in a particular country. Japan and other Pacific Rim countries are frequent topics. Prerequisite: B A 500 or permission of instructor.

**I BUS 600 Independent Study or Research (1-6)**

---

**Management**

**MGMT 200 Introduction to Law (5)** I & S Legal institutions and processes; law as a system of social thought and behavior and a frame of order within which rival claims are resolved and compromised; legal reasoning; law as a process of protecting and facilitating voluntary arrangements in a business society. Offered: AWSp.

**MGMT 300 Managing for Organizational Effectiveness (4)** Organizational behavior and organization theory concepts show how managers can improve organizational effectiveness by attending to the human side of the enterprise. Topics such as leadership, motivation, power and politics, and organization design are examined for their effects on performance. Offered: AWSpS.

**MGMT 311 Managing Human Resources (4)** The personnel/industrial relations function from a managerial perspective. Selection, compensation, performance appraisal, and training and development. Special emphasis on management relationships and relevant behavior science research.

**MGMT 312 Career Development Workshop (2)** Develops career goals in business administration and guides students toward the academic training that achieves their goals. Emphasizes development of the personal skills necessary to market yourself in a competitive marketplace and present yourself to potential employers.

**MGMT 321 Legal and Regulatory Environment of Business (4)** Managerial implications of restrictions imposed by government on corporations from legal point of view. Constitutional law impacting business managers; antitrust, administrative, and regulatory issues; environmental law, product liability law, and securities law. Not a business or commercial law course.

**MGMT 322 Investigating Modern Capitalism (4)** Business-government relationships in American history, with aim of defining and explaining patterns in attitudes and behavior rather than detailing events. Discussions organized in terms of policy areas (e.g., national banking, transportation, agriculture, energy, industry in wartime, trade, and research).

**MGMT 323 Business Ethics and Corporate Social Responsibility (4)** Philosophical and pragmatic perspectives, including values and social/ethical premises in organizational decision-making.
mature firms better understand the intellectual

global economy. Assists managers of more

help people who are not lawyers and who are

ations. Prerequisite: O E 200 or MGMT 200.

tional, collective bargaining. Individual

group, and organizational effectiveness.

MGMT 411 Recruiting and Hiring Talent (4)

Affirmative action, recruitment, testing,

Interviewing, placement, promotion, and overall

human resource planning. Prerequisite: MGMT

111.

MGMT 412 Performance Appraisal and

Compensation (4) The various kinds of

systems used by organizations to evaluate and

reward employee performance. Job analysis, job

evaluation, setting performance standards,

giving appraisal feedback, designing incentive

systems, administering a salary plan. 

Prerequisite: MGMT 311.

MGMT 413 Labor Law and Collective

Bargaining (4) Labor-management relations.

The legal context, union organizing, grievance

administration, collective bargaining. Individual

and group simulations used.

MGMT 421 Commercial Law (5) Principles of

the law of contracts, agency, property, sales,

negotiable instruments, and security transac-

transactions. Prerequisite: O E 200 or MGMT 200.

MGMT 422 Protecting Intellectual Property in

a Global Economy (2) Provides instruction to

help people who are not lawyers and who are

starting new companies recognize, protect,

develop, and manage intellectual property in a

global economy. Assists managers of more

mature firms better understand the intellectual

property protection process. Includes topics

related to e-commerce.

MGMT 430 Business Policy (4) Policy making

and administration from a general management

point of view. Emphasis is on problem analysis,

the decision-making process, administration and

control, and continuous reappraisal of policies

and objectives. Integrates and builds upon the

work of the core curriculum. Prerequisite: FIN

350; MKTG 301; either HRMOB 300 or MGMT

300; recommended: DPMGT 301. Offered:

AWSp.

MGMT 490 Special Topics in Management (1-6, max. 6) Topics of current interest to faculty and students. Offered when allowed by faculty

availability and sufficient student interest.

Content announced in advance of scheduled offerings.

MGMT 495 Management Internship (1-4, max. 8) Internship with a private firm, nonprofit organization or government agency, where work

experience involves substantial application of management concepts learned in class. Credit/no credit only. Prerequisite: MGMT 300.

MGMT 500 Management and Leadership (3)

Behavioral aspects of management with

emphasis on leadership, motivation, and
decision making. May include communication,

conflict management, group dynamics, and

organizational change.

MGMT 502 Business Strategy (3) Policy

decisions and strategic leadership from the

general management point of view. Determina-
tion of corporate product-service objectives,
development of a network of internal operating

policies and methods to achieve objectives at a

cost satisfactory to the consumer and to society. Prerequisite: all first-year required courses in MBA curriculum.

MGMT 504 Ethical Leadership (4) Reynolds

Examines the ethical aspects of conducting business. Topics include ethical decision-making, the ethical aspects of leadership and culture, stakeholder management, corporate social responsibility, sustainability and corporate governance. Prerequisite: First-year MBA required courses. Offered: W.

MGMT 505 Business Ethics (2) Business

organization’s political, social and legal

environments. Critical managerial issues from

historical, theoretical, and social/ethical

perspectives. Corporate political power, corporate boards of directors, industrial power, social responsibility, business ethics, roles of the corporation in society, themes of change.

MGMT 510 Developing Leadership Skills (0-2 , max. 2) Assessment, instruction , and coaching to develop leadership abilities.

Emphasizes team building and collaboration,

written, oral, and interpersonal communication,

and applied leadership activities.

MGMT 511 Leadership and Coaching

Practicum (2, max. 4) Gives Leadership Fellows a venue to analyze and assess their coaching activities with first-year MBA student teams, receive feedback from the instructor and their fellow coaches, discuss readings on leadership, coaching, collaboration, and communication, and hear guest speakers on related topics. Credit/no credit only.

MGMT 520 Designing a Corporate Strategy (4)

Addresses the broad question: what business(es) should we compete in? Focuses on decisions related to an appropriate level of diversification and the means by which that diversification is implemented. Includes the following issues: mergers and acquisitions, strategic alliances, joint ventures, LBOs, and spin-offs.

MGMT 521 Strategic Management of

Technology and Innovation (4) Dooley,

Steensma Examines how innovative firms often experience rapid and disruptive levels of growth and change and how without effective management of new technologies, the boom can quickly turn to bust. Investigates the micro-

economic drivers of competition in technology industries, explores how technological change affects competition, and examines the implications for competitive strategy. Offered: WSp.

MGMT 523 Business Ethics in a High

Technology Environment (4) Examines business ethics from philosophical, theoretical, and pragmatic perspectives. Explores ethical theories and values in business, attempts to place ethical concepts into a framework useful to practicing managers. Places emphasis on the ethical implications of rapidly changing hi-tech environments such as e-commerce and biotech.

MGMT 526 Competing in the Global Economy

(4) Dewenter, Steensma Examines the global environment for business and the challenges facing managers in this environment. Explores the implications of the common phrase “think globally — act locally.” Offered: WSp.

MGMT 530 Entrepreneurship (4) Entrepreneur-

ship, both in the form of (1) establishment of

new independent businesses owned largely by

those who manage them and (2) initiation of new enterprises having exceptional autonomy within larger organizations that finance and own them. Basic knowledge in accounting, marketing, and finance is assumed.

MGMT 531 Managing Intellectual Property

Rights (4) Comprehensive analysis of the

issues pertinent to the various forms of

intellectual property, including how to recognize, develop, maintain, and capitalize on them.

MGMT 540 Managing Human Capital (4)

Covers principles and techniques for recruiting, selecting, and developing employees, appraising their performance, and rewarding their contributions. Explores key topics primarily through case studies, readings, class discus-
sion, and fieldwork. Reviews legal and regulatory issues that surround these methods. Intended for both general managers and human resource professionals.

MGMT 544 Managing Effectively Across

Cultures (4) Chen Examines how, with increasing globalization of business, employees at all levels of corporations often work and interact with people from different nations, cultures. and how they need an understanding of cross-cultural management and challenges of international settings. Focuses on international organizational behavior and international human resource issues, practices. Offered: W.

MGMT 545 Leading and Managing High-

Performance Organizations (4) Focuses on

the nature and function of effective leadership

in high-performance systems. Includes visiona-

ry and transformational leadership, decision-making and empowerment, power and influence in organizations desiring flexibility and innovation, and leading organizational change. Places emphasis on leadership of emerging forms of organization such as learning organizations, virtual organizations, and networks.

MGMT 546 High Involvement Employees (4)

Focuses on two domains: (1) how managers can lead and motivate their people; and (2) how actual organizations, particularly high technology and entrepreneurial firms, employ these strategies. Specific topics include commitment, involvement, enthusiasm, effort, participation,
citizenship, and performance. Student teams investigate how local companies utilize these ideas.

MGMT 547 Successful Negotiations (2)
Focuses on a broad array of conflict resolution skills needed for effective management in a changing business environment. Examines methods of conflict resolution — bargaining, distributive and integrative negotiation, mediation, and arbitration. Applies these tools to managerial challenges such as employment contracts, buyer-seller agreements, and mediated and arbitrated agreements.

MGMT 548 Dealing in High Velocity Ventures (2)
Focuses on negotiations in ventures that lack conventional customers, suppliers, employees, joint-venture partners, strategic allies, and money. Analyzes negotiations with early potential customers and essential suppliers, sources of funding (e.g., “angels” and venture capitalists), critical partners and/or strategic allies (including established firms), and key employees. Prerequisite: MGMT 547.

MGMT 549 Dealing in the Global Arena (2)
For students who expect to engage in significant international business negotiations. Includes deal-structuring skills needed in a range of cross-border transactions and relationships. Individual segments develop broad analytical themes, cross-cultural dimensions, and distinctive national approaches to corporate governance and their impact on negotiating strategy. Prerequisite: MGMT 547.

MGMT 579 Special Topics in Management (2/4, max. 12)
In-depth study and research on topics of special interest to faculty members and students in the fields of human resources management, organizational behavior, and strategic management. Offered on an ad hoc basis. Content announced before scheduled offering.

MGMT 580 The Individual and the Organization (4)
Focuses on attributes the individual brings to the organization. Covers important performance-related processes such as learning, motivation, and decision-making as well as an understanding of personal attitudes and personality traits.

MGMT 581 Power, Influence, and Citizenship Behavior (4)
Focuses on ways in which the individual and the organization get things done through working with others. Includes leadership, social influence, and the use and abuse of power, with attention given to positive organizational activities such as citizenship behavior and extra role activities.

MGMT 582 Organization Entry, Training, and Exit (4)
Focuses on the systems, processes, and experiences that newcomers to organizations undergo. Covers staffing, employee selection, training, socialization, and attachment.

MGMT 583 Contemporary Research in Organizational Behavior (4)
Focuses on importance of group processes for organizational effectiveness. Covers concepts of group dynamics including interpersonal communication, role and norm development, and group decision making as well as organizational processes such as team development and organizational culture.

MGMT 584 Contemporary Research in Human Resource Management (4)
Focuses on the organization’s employee performance appraisal and compensation systems. Examines effects of different practices.

MGMT 590 Economic Foundations of Strategic Management (4)
Reviews the economic theories that support strategies pursued by firms and explores the links between market processes, firm strategy, and firm performance. Topics include agency theory, transaction cost economics, resource dependence, population ecology, and neo-Austrian economics.

MGMT 591 Sociological Foundations of Strategic Management (4)
Explores the sociology of organizations from multiple perspectives while introducing fundamental sociological questions and preparing students for conducting research in organizations. Emphasis on structural contingencies, institutions, resource dependence, population ecology, negotiated order and culture, organizational learning and decision making, organizational power and politics, networks, and inter-organizational relations.

MGMT 592 Contemporary Strategic Management Research (4)
Facilitates understanding of empirical foundations of theory development and testing in contemporary strategic management research. Examines the evaluation of ways in which the empirical tradition has evolved in the strategic management area. Attention to evaluating research methodologies used in the field.

MGMT 593 Special Topics in Strategic Management I (4)
MGMT 594 Special Topics in Strategic Management II (4)
Focuses on the social and political factors that help shape corporate strategy using stakeholder management as an integrating concept. Topics include corporate governance, corporate political activity, governmental regulation, comparative political economy, and normative aspects of strategic management, including ethics and corporate social responsibility.

MGMT 599 Doctoral Seminar in Management (1, max. 12)
Advanced topics in the fields of human resources management and organizational behavior. May be used by visiting faculty members to present topics of interest to students.

MGMT 600 Independent Study or Research (*)

Marketing

MKTG 301 Marketing Concepts (4)
Tools, factors, and concepts used in management in planning, establishing policies, and solving marketing problems. Topics include: marketing concepts, consumer demand behavior and location analysis, marketing, functions, institutions, channels, prices, and public policy. Prerequisite: ECON 200.

MKTG 335 Principles of Selling (4)
Focuses on selling from salesperson’s perspective, role of persuasion in professional selling and other organizational settings. In addition to coursework in such areas as consumer behavior, negotiation, and communication, students practice sales skills in role plays, presentations, and other exercises requiring practical application of selling theory. Prerequisite: MKTG 301.

MKTG 340 Advertising (4)
Management of the advertising function and its integration with other forms of promotion. Planning the program, determining the most effective approach, evaluation of media and budget, advertising research, advertising institutions, economic and social aspects. Prerequisite: MKTG 301; may not be repeated.

MKTG 370 Retailing (4)
Profit planning and business control; buying, stock control, pricing, promotion; store location, layout, organization, policies, systems; coordination of store activities. Prerequisite: MKTG 301; may not be repeated.

MKTG 410 Product Management (4)
Important aspects of product planning and development, concept testing, product-life cycle, portfolio analysis, targeting and positioning, branding issues, product-line extension, pricing policies, and implementing product decisions. Computer simulation project provides practice for implementing product strategies. Prerequisite: MKTG 301; may not be repeated.

MKTG 430 Sales Force Management (4)
Focuses on the role of the sales manager within the organization. Includes distribution planning, sales organization, management of the sales force, methods of sales, cost and financial analysis, and performance analysis. Prerequisite: MKTG 301; may not be repeated.

MKTG 445 Multicultural Marketing and Business Development (4)
Integrates tools from marketing, consulting, and multi-cultural business management to provide consulting services to small business in economically-distrusted communities. Emphasis on consulting sessions with client, strategic thinking exercises, class projects, and business planning. Working in teams with assistance from industry mentors and alumni from the course, students gain practical experience in multi-cultural marketing, consulting, and managing a business. Prerequisite: MKTG 301.

MKTG 446 Repositioning and Instituting Change in a Multicultural Business Environment (4)
Montoya, Rowland, Thomas Study of market forces, strategies for leading marketing organization change. Teams work with clients on implementing project. Emphasis on consulting sessions with client, strategic thinking exercises, class projects, and business planning. Working in teams with assistance from industry mentors and alumni from the course, students gain practical experience in multi-cultural marketing, consulting, and managing a business. Prerequisite: MKTG 301. Offered: Sp.

MKTG 450 Consumer Behavior (4)
Theory and practice pertinent to marketing decisions; utilization of theories from behavioral sciences in marketing research; theories of fashion, characteristics of goods, shopping behavior, product differentiation, market segmentation, and opinion leadership; application of concepts to management of advertising, personal selling, pricing, and channels of distribution. Prerequisite: MKTG 301; may not be repeated.

MKTG 455 Entrepreneurial Marketing (4)
Examines the skills and tools entrepreneurs need for bootstrap marketing in their start-up firms. Students learn to identify target market segments, position their products, estimate demand, set prices, gain access to channels, and manage the issues of rapid growth. Prerequisite: MKTG 301; may not be repeated.

MKTG 460 Marketing Research (4)
Examines marketing research process; steps of research design, questionnaire construction, sampling, data analysis, evaluation/presentation of
MKTG 465 Marketing Data: Measurement and Analysis (4) Tools for aiding market segmenta-
tion, positioning, product design, and demand analysis. Examines multidimensional scaling,
conjoint analysis, factor analysis, cluster analysis, discriminant analysis, multiple
regression, logistic regression, and decision trees. Emphasis on applications of practical
marketing problems and using statistical packages. Prerequisite: MKTG 301; may not be
repeated.

MKTG 467 Retail Strategy: Internet and
Global Dimensions (4) Explores how owners and
top managers of retail firms analyze and solve problems, design, implement, and
evaluate strategies and other wise manage for competitive advantage. Utilizes cases, readings,
and writing assignments as the main tools for teaching and learning. Prerequisite: MKTG 301; may not be
repeated.

MKTG 468 Strategic Market Management (4) Capstone course connecting principles, tools,
and elements of multiple marketing disciplines to a manager’s perspective and responsibilities in
today’s company. Emphasizes strategy, analysis, and problem solving. Analyzes marketing problems using conceptual and
quantitative tools utilized in marketing decision making. Prerequisite: MKTG 301; MKG 450;
MKTG 460; may not be repeated.

MKTG 485 Strategic Market Management (4) Utilize cases and/or projects to examine
strategic market-based management. Analyze marketing situations to identify market trends
and understand consumer and competitor behavior Develop and justify appropriate course of
action to address marketing problems and
opportunities in terms of product planning, distribution channels, pricing, and promotion. Prerequisite: MKTG 301.

MKTG 490 Special Topics and Issues in
Marketing (1-6, max. 12) Contemporary topics and issues in marketing for nonprofit
organizations, marketing of services, marketing in the public sector, and marketing in an
economy of scarcity. Ordinarily only one topic area is addressed in any one quarter. Course
content reflects contemporary developments and the current interests of instructors and
students. Prerequisite: MKTG 301.

MKTG 495 Marketing Internship (1-4, max. 8) An internship with a company, not for profit
organization, or government agency in a marketing capacity. Prerequisite: MKTG 301.

MKTG 496 Marketing Practicum (4) Rhodes Offers opportunities to apply principles,
concepts, and skills learned previously to actual business situations. Participation in class part-
time and/or an internship with a business, employer part-time. Prerequisite: MKTG 301.

MKTG 499 Undergraduate Research (1-6, max. 9) Prerequisite: MKTG 301.

MKTG 501 Marketing Management (4) Analysis and management of customer satisfaction in
goods and services markets by profit and nonprofit organizations. Buyer behavior, market
segmentation and product positioning, product policy, pricing, distribution, sales force and
advertising management, and market research in the contexts of strategy development, decision
making, implementation, and control.

MKTG 509 Foundations of Marketing Analysis (2) Examines analytical and statistical methods
useful in strategic decision making in marketing. A dynamic computer simulation activity allows
students to develop and receive feedback on competitive marketing strategies. Prerequisite:
either B A 501 or MKTG 501. Offered: Sp.

MKTG 510 New Product Development (4) Integrates business, design, and engineering
functions in the presentation and application of structures, tools, and methodologies important for
successful new product development. New product development projects are accomplished with a
cross-functional team emphasis. Prerequisite: B A 501.

MKTG 511 Business-to-Business Marketing (4) Integrated approach to product marketing
management in the business-to-business marketplace. Analysis of core competencies, competitive
environment, positioning and segmentation strategies, cost structure, and
customer satisfaction. Case-based and project-
oriented approach to studying marketing management in the business-to-business market.
Prerequisite: B A 501 or permission of instructor.

MKTG 512 Consumer Marketing and Brand
Management (4) Analysis of marketing strategies for consumer products and services. Focuses on consumer satisfaction and brand
management including product line and brand developments, pricing strategies, channel and
retail relationships, and marketing communica-
tion strategies for consumer goods and services. Prerequisite: B A 501.

MKTG 520 Marketing Channels (4) Channels of
distribution decisions for goods and services in
profit and nonprofit organizations. Considers methods of optimizing the number, quality of
institutions and activities employed in dealing with exchange, and space and time aspects of
channel management. Relates management of marketing channels to marketing mix, organiza-
tional objectives. Prerequisite: B A 501.

MKTG 530 Managing the Sales System (4) Examines the revenue generation function of a firm from a system-wide perspective. Topics include strategic and tactical considerations related to customer acquisition and retention, end-to-end sales and support operations, strategic partnerships, and continuous performance monitoring. Emphasis on case studies and team projects. Prerequisite: B A 501.

MKTG 540 Advertising and Promotion
Management (4) Management of advertising and promotional activities and their integration with other elements of the marketing mix. Topics include: understanding the communication process, analyzing markets, working with suppliers, establishing objectives, determining budgets, selecting media, measuring and evaluating effectiveness, using publicity and promotions. Legal, social, and economic consequences are considered. Prerequisite: B A 501.

MKTG 550 Managing Customer Relationships
Through Direct Marketing (4) Management of customer relationships through the lens of direct
marketing. Topics include direct marketing creative activity, strategy, and execution; media
and segmentation; direct marketing budgeting and financials; targeting, database, and
predictive modeling; catalog marketing; relationship marketing; business-to-business complex sales; privacy. Prerequisite: B A 501.

MKTG 555 Entrepreneurial Marketing and
Marketing (4) Examines the skills and tools entrepreneurs need for bootstrap marketing in
their firms. Covers how to target market segments, position products, estimate demand,
set prices, gain access to channels, and manage issues of rapid growth. Prerequisite: B A 501.

MKTG 560 Research for Marketing Decisions
(4) Methods and applications of marketing
research to solve marketing problems. Deals with: problem definition, research design,
questionnaire construction, sampling, and data analysis using SPSS. Introduces promising new
developments in online research, web surveys, and data analysis. Class research project
provides practical application. Prerequisite: B A 501.

MKTG 565 Database Marketing and Decision
Models (4) Examines methodologies that are
useful for analyzing customer databases. Presents models that can be applied in the
analysis of marketing problems and the support of marketing decisions. Prerequisite: B A 501.

MKTG 570 International Marketing (4) Analysis of the marketing strategies and tactics of
multinational corporations. Choice of entry strategies for foreign markets, analyzing
international competition at home and abroad, and developing global marketing strategies.
Prerequisite: B A 501; recommended: one I BUS
course.

MKTG 575 Marketing High-Technology
Products (4) Management of the marketing
requirements of high-technology products. Examines how markets for high-tech products
involve shortened product life cycles, demand
for continual product updates, perceived risk of adoption by customers, requirements for intensive customer service and relationships, and growing reliance on business partners. Prerequisite: B A 501.

MKTG 579 Special Topics in Marketing (2/4, max. 12) Marketing topics of current concern to faculty and students. Offered only when allowed by faculty availability and sufficient student interest. Seminar content to be announced in advance of scheduled offerings. Prerequisite: B A 501.

MKTG 581 Doctoral Seminar in Consumer Behavior (4) Survey of the field of consumer behavior introduces fundamental topics in consumer behavior including cognitive processes, emotion, and consumer satisfaction. Provides exposure to a variety of research methods including experiments, surveys, and phenomenological research.

MKTG 582 Doctoral Seminar in Multivariate Analysis for Marketing Research (4) Survey of methods useful for empirical evaluation of multivariate marketing phenomena and relationships. Includes an overview of measurement theory and practice; multidimensional scaling; conjoint analysis; cluster, factor, and discriminant analyses; multivariate analysis of variance; structural equation modeling; and other methods commonly encountered in academic marketing research.

MKTG 584 Doctoral Seminar in Research Issues in Marketing (4) Examination of research problems and issues in marketing. Specific topics vary depending on the interest of faculty and students.

MKTG 591 Doctoral Seminar in Consumer Behavior Research Topics (4) Investigates research topics of current interest in consumer behavior. Considers the processes used by consumers to acquire and evaluate marketing information including advertising, publicity, word of mouth, packaging, product description, price, and retail outlets, and examines ways the principles in social perception influence consumer individual responses to marketing-related activities.

MKTG 593 Doctoral Seminar in Marketing Management (4) Focuses on modeling research efforts in various areas of marketing. Discussion of mathematical and statistical modeling approaches which contribute to scientific development in the marketing area and ways in which modeling is used to characterize and summarize the nature of general marketing situations in complex environments.

MKTG 599 Doctoral Seminar in Marketing (1, max. 12) Study and research in advanced topics of marketing. The seminar is generally concerned with unpublished areas of research and conducted by visiting professors and departmental faculty. Prerequisite: doctoral student status.

MKTG 600 Independent Study or Research (*) Operations Management

OPMGT 301 Principles of Operations Management (4) Examines problems encountered in planning, controlling, and coordinating production of goods and services. Topics include: waiting-line management, quality assurance, production systems, project management, and inventory management. Computer and quantitative models used in formulating managerial problems. Prerequisite: ACCTG 225, MATH 112, MATH 124, MATH 125, MATH 134, or MATH 145; either ECON 311, IND E 315, QMETH 201, Q SCI 381, PSYCH 315, PSYCH 318, STAT 220, STAT 301, STAT 311, or STAT 390.

OPMGT 402 Introduction to Logistics (4) Logistics studies of the efficient delivery of goods and services. A total-cost approach recognizes this involves not only the obvious vehicle-routing issues but also shipmen size and mix, warehouse location, product design, and customer services. Includes study of real companies' logistics problems. Prerequisite: OPMGT 301.

OPMGT 443 Inventory and Supply Chain Management (4) Use of material and supply chain management in manufacturing and service organizations to reduce inventory levels while providing adequate service to customers. Specific topics include forecasting, Just-in-Time production, deterministic and stochastic inventory models, and material requirements planning (MRP). Prerequisite: OPMGT 301.

OPMGT 450 Introduction to Project Management (4) Focuses on the management of complex projects and the tools and techniques which have been developed in the past 25 years to assist managers with such projects. The course covers all elements of project planning, scheduling, and control as well as implementation and organizational issues. Prerequisite: OPMGT 301.

OPMGT 461 Business of Process Design (4) Examines systems theory, project design, and strategic decision-making in a teaming environment. Provides a unique opportunity to get involved with real-life design problems in the chemical and aeronautical industries. Prerequisite: OPMGT 301.

OPMGT 490 Special Topics in Operations Management (1-6, max. 20) Operations management topics of current concern to faculty and students. Potential topics are: logistics management, project scheduling, manufacturing strategy, site and location analysis, management of service operations. Prerequisite: OPMGT 301.

OPMGT 495 Operations Management Internship (1-4, max. 8) Internship with a private firm, nonprofit organization, or government agency. Prerequisite: OPMGT 301. Offered: ‘W’. Prerequisite: OPMGT 450 or equivalent.

OPMGT 535 Global Trade, Transportation, and Logistics Management (4) Goodchild, Schmitt, Shelton Provides an overview of trade, transportation, and logistics activities. Develops an understanding of the physical and information flows in supply chains, and the economic drivers of supply chain choices. Includes methods to analyze and improve logistics and transportation systems, including applications of policy, technology, and infrastructure. Offered: jointly with CEE 587/GTTL 501; AWSp.

OPMGT 536 Seminar in Global Trade, Transportation, and Logistics (4) Interdisciplinary seminar that brings together students with academics and practitioners at the forefront of trade, transportation, and logistics in discussions of selected topics. Additionally, students research issues of special interest. Prerequisite: OPMGT 535, GTTL 501, or permission of instructor. Offered: jointly with GTTL 502; Sp.

OPMGT 550 Project Management (4) Management of complex projects, and tools and techniques (e.g., CPM and PERT) developed to aid the planning, scheduling, and control of projects. Includes work breakdown structures, precedence networks, Gantt charts, resource leveling and allocation, and the use of microcomputer programs. Prerequisite: B A 502 or OPMGT 502 or equivalent.

OPMGT 570 Operations Strategy (4) Strategic management of operations and manufacturing in domestic and international companies. Developing and implementing a coherent strategy based on continuous improvement of quality, productivity, products, processes, and customer services. Facilities, capacity, process/ work-force planning, organization, people, systems integration, coordination between operations, marketing, engineering, and R&D. Prerequisite: B A 502 or OPMGT 502 or equivalent.

OPMGT 579 Special Topics in Operations Management (2/4, max. 12) Major topics in operations management and systems analysis. Emphasis on research and, where appropriate, application of quantitative analysis and computers. Topics vary, including workforce planning, project management, research and development management, quality assurance, technology planning and forecasting, systems analysis of complex organizations, and urban systems analysis. Prerequisite: B A 502.

OPMGT 584 Fundamentals of Operations Management Research (4) Survey of literature in inventory management and system theory. Prerequisite: OPMGT 301 or equivalent. Offered: ‘W’.

OPMGT 587 Advanced Topics in Inventory Management (4) Survey of inventory theory and practice. Prerequisite: OPMGT 599 and course in probability theory and in stochastic processes.
## School of Dentistry

### Dentistry

**Dental Public Health Sciences**

**DPH 201 Planning a Career in Dentistry for the Future** (2) Future-oriented overview of important concepts in dental science, contemporary modes of patient treatment, and dental-care delivery systems. Provides firsthand exposure to practice of dentistry and prerequisite materials in oral anatomy, epidemiology, and other basic sciences subjects. Open to all second-, and third-year undergraduate students. Offered: Sp.

**DPH 449 P-Directed Studies in Dental Public Health Sciences** (*) Students and faculty with common academic interests pursue them together within the curriculum by means of independent study and a tutorial student-faculty relationship. Credit/no credit only. Offered: AWSpS.

**DPH 510 Social and Historical Perspectives in Dentistry** (2) Examines dental care problems involving biological, behavioral, and community elements and has student develop hypotheses regarding nature and complexity of problem, set objectives, seek resources and information, and contribute to development of outcomes. Credit/no credit only. Offered: A.

**DPH 535 P-Scientific Literature in Clinical Decision Making** (1) Introduction to critical reading of individual articles in professional journals and integrating the findings of several articles. Use of the literature to assist the practicing dentist in making clinical decisions. Offered: Sp.

**DPH 541 P-Ethics in Dentistry** (1) Seminar improving ethical reasoning skills and conveying ethical and legal standards of the profession. Credit/no credit only. Offered: Sp.

**DPH 550 P-Directed Studies in Dental Public Health Sciences** (*, max. 6) Students and faculty members who have common academic interests can pursue them together within the curriculum by means of independent study and a tutorial student-faculty relationship. Credit/no credit only. Offered: AWSpS.

**DPH 568 Biostatistics in Dentistry** (3) Introduction to concepts and methods of descriptive and inferential statistics with applications in dentistry emphasized. Topics include probability distributions, random sampling and standard errors, hypothesis testing, multiple regression, ANOVA, chi-square tests. Prerequisite: B A 500 or equivalent. Offered: jointly with MATH 582.
include comparison of means and proportions, hypothesis testing, confidence intervals, non-parametric methods, linear regression, and correlation. Prerequisite: enrollment in School of Dentistry or permission of instructor. Offered: jointly with BIOST 510.

DPHS 569 Clinical Epidemiology and Study Design in Dentistry (2) An introduction to epidemiological methods as they relate to dental research. Topics covered include the estimation of disease occurrence at patient level and site level and the design and analysis of clinical trials with special emphasis on designs unique to dentistry, such as split-mouth designs. Offered: S.

DPHS 575 Behavioral Dental Research (1) Survey of behavioral science research and methodology in dentistry and related fields. Emphasis in various quarters varies: literature review, research design, instrumentation, data analysis. Designed for advanced students who plan a research career. Credit/no credit only. Prerequisite: doctoral degree or permission of instructor. Offered: AWSpS.

DPHS 640 P-Professional Issues: Clinical Management of the Fearful and Phobic (1) Introduction to assessment process and treatment strategies for successful management of anxious, fearful, or phobic patient, combined with clinical observation of diagnostic and treatment appointments of active patients. Offered: AWSpS.

DPHS 660 Dental Fear Clinic (2) Clinical instruction in the care of the severely anxious or phobic adult or child. Strategies from behavioral and cognitive psychology. Credit/no credit only. Prerequisite: graduate standing in dentistry or permission of instructor. Offered: AWSpS.

Dentistry

DENT 520 P-Clinical Practice Management 1 (1) Designed to provide the student with the knowledge required to manage a patient pool during the clinical program and in future dental practice including: obtaining a patient pool, authorized treatment planning, patient management in accordance with professional codes, risk management strategies, patient financial account management, and contemporary biohazardous materials guidelines. Offered: S.

DENT 521 P-Oral Pathology (3) Survey of the diseases of the oral-facial regions in lecture and laboratory sessions. Among the conditions discussed are diseases of teeth and their supporting structures and diseases of the oral and paranasal soft tissues and bones. Correlations between clinical findings, etiologic factors, and histopathologic features are stressed. Attendance in the laboratory is required. Offered: A.

DENT 522 P-Oral Pathology (3) Survey of the diseases of the oral-facial regions in lecture and laboratory strategies for successful management. Among the conditions discussed are diseases of teeth and their supporting structures and diseases of the oral and paranasal soft tissues and bones. Correlations between clinical findings, etiologic factors, and histopathologic features are stressed. Attendance in the laboratory is required. Offered: W.

DENT 523 Medical Emergencies in the Dental Setting (1) Initial emergency training, focusing primary upon recertification in BLS. Emphasizes intellectual and psychomotor skills for universal treatment of emergencies (which includes BLS). Offered: A.

DENT 533 Medical Emergencies in the Dental Setting II (2) Comprehensive medical emergency training, including review of BLS. Students participate in real-time simulated drills to prepare both their intellectual and psychomotor skills for emergency care situations. Credit/no credit only. Offered: A.

DENT 534 P-Geriatric Dentistry (1, max. 2) Two-quarter sequence on special needs of older persons seeking dental care: oral health, psychology of aging, socioeconomic problems, effective communication, dental management, and special problems in long-term care settings. Offered: WSp.

DENT 537 P-Hospital Dentistry (1) Introductory course presenting hospital procedures and protocol and the role of the dentist in the hospital. Offered: Sp.

DENT 543 Medical Emergencies in the Dental Setting III (1) Comprehensive review/refreshment of medical emergency training, including recertification in BLS. Students participate in real-time simulated drills to prepare both intellectual and psychomotor skills for emergency care situations. Offered: S.

DENT 547 Dental Practice Administration (2) Material essential to persons entering dentistry in a time of rapid change in health care systems, including practice management, career opportunities, and starting out in a private practice. Offered: A.

DENT 548 Dental Practice Administration (2) Material essential to persons entering dentistry in a time of rapid change in health care systems, including practice management, career opportunities, and starting out in a private practice. Offered: W.

DENT 549 Dental Practice Administration (2) Material essential to persons entering dentistry in a time of rapid change in health care systems, including practice management, career opportunities, and starting out in a private practice. Offered: Sp.

DENT 550 P-Special Studies in Dentistry (*, max. 12) Series of courses offered by the various departments from which students may elect study in areas of special interest to them. These courses include subject matter applicable to all phases of dentistry. Credit/no credit only. Offered: AWSpS.

DENT 551 P-Clinical Practice Management 2 (1) Designed to provide the student with the experience required to manage a patient pool during the clinical program and in future dental practice including: obtaining a patient pool, treatment planning, patient management in accordance with professional codes, risk management strategies, patient financial account management, and contemporary biohazardous materials guidelines.

DENT 552 P-Clinical Practice Management 2 (1) Designed to provide the student with the experience required to manage a patient pool during the clinical program and in future dental practice including: obtaining a patient pool, treatment planning, patient management in accordance with professional codes, risk management strategies, patient financial account management, and contemporary biohazardous materials guidelines.

DENT 553 P-Clinical Practice Management 2 (1) Designed to provide the student with the experience required to manage a patient pool during the clinical program and in future dental practice including: obtaining a patient pool, treatment planning, patient management in accordance with professional codes, risk management strategies, patient financial account management, and contemporary biohazardous materials guidelines.

DENT 554 P-Clinical Practice Management 2 (1) Designed to provide the student with the experience required to manage a patient pool during the clinical program and in future dental practice including: obtaining a patient pool, treatment planning, patient management in accordance with professional codes, risk management strategies, patient financial account management, and contemporary biohazardous materials guidelines.

DENT 555 P-Clinical Practice Management 2 (1) Designed to provide the student with the experience required to manage a patient pool during the clinical program and in future dental practice including: obtaining a patient pool, treatment planning, patient management in accordance with professional codes, risk management strategies, patient financial account management, and contemporary biohazardous materials guidelines.

DENT 556 P-Clinical Practice Management 2 (1) Designed to provide the student with the experience required to manage a patient pool during the clinical program and in future dental practice including: obtaining a patient pool, treatment planning, patient management in accordance with professional codes, risk management strategies, patient financial account management, and contemporary biohazardous materials guidelines.

DENT 557 P-Clinical Practice Management 2 (1) Designed to provide the student with the experience required to manage a patient pool during the clinical program and in future dental practice including: obtaining a patient pool, treatment planning, patient management in accordance with professional codes, risk management strategies, patient financial account management, and contemporary biohazardous materials guidelines.

DENT 562 Elective Offering in Advanced Cardiac Life Support (2) Introduction to airway management (masking/intubation/oropharyngeal airways/nasopharyngeal airways/crioclythrotyromy), 12-lead EKG recognition and diagnosis, cardiac physiology and pathophysiology, and pharmacologic action of several different medications. Students who pass AHA guidelines for completion of an ACLS course are awarded ACLS certification. Credit/no credit only. Offered: W.

DENT 563 Elements of Conscious Sedation (1-2) Details theory and techniques for rendering oral, inhalation, transmucosal, intramuscular, and intravenous forms of conscious sedation. Focuses on pharmacology and pharmacokinetics of nitrous oxide, benzodiazepines, narcotics, and barbiturates. Addresses usual applications, special considerations, legal issues, and proper record keeping. Emphasizes prevention and management of emergencies. Credit/no credit only. Offered: A.
DENT 565 Dental Photography (1) Provides student with sufficient knowledge and experience to select and use correct photographic equipment for photographing patients (facial and interoral), casts, instruments, x-rays, charts, and objects. Credit/no credit only. Offered: A.

DENT 566 Physical Diagnosis (1) Seminar on performing complete physical examination including basic assessment of overall patient, vital signs, cardiac, pulmonary, abdominal, extremities, neurologic, and head/neck. Examination techniques include observation, auscultation, percussion. Writing fundings and interpreting physical examinations. Offered: S.

DENT 568 Internal Medicine for Dentistry (1-3), max. 6) Review of major organ systems, including normal anatomy and physiology, common pathophysiology, medical interventions. Details modifications necessary for dental treatment and medical emergency management. Credit/no credit only. Offered: AS.

DENT 569 Contemporary Dental Practice Management (1) Chasteen Didactic study designed to update dental graduate students in recent developments in the management of a modern dental practice. Focuses on the business and legal aspects of dental practice. Credit/no credit only. Offered: A.

DENT 610 Introduction to Clinical Dentistry (2) Introduction to clinical dental training including infection control, personal dental hygiene, oral anatomical landmarks, medical histories, fluoride application, fabrication on athletic mouth guards, and professional ethics. Students participate in classroom exercise followed by rotations in functioning dental clinics. Offered: W.

DENT 640 P-Extramural Clinics in Geriatric Dentistry (2) Extramural geriatric clinical experience, including three days at a nursing home or community clinic, and brief didactic component. Credit/no credit only. Offered: AWSpS.

DENT 645 P-Hospital Rotation (2) Clinical experience that puts into practice the material presented in 537. The student is involved in hospital procedures and protocol and in dental care of the hospital patient as well as after-hours call duty. Offered: AWSpS.

DENT 650 P-Extramurals (*, max. 12) Extramural sites arranged to provide dental students, at varying levels of their education, with opportunities to treat a wide variety of patients in the delivery systems outside the school. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSpS.

DENT 651 P-Anesthesia Rotation (6) 1.5-month rotation in anesthesia at one of three local hospitals. Objectives: administration of anesthesia, management of emergency situations and airway problems, familiarization with pharmacology of anesthetic drugs; increased efficiency with venipuncture. Credit/no credit only. Offered: AWSpS.

DENT 652 P-Clinical Medicine Clerkship (4) One-month clinical rotation in clinical medicine at a local hospital. Objective is to increase the student's ability in physical evaluation of patients as well as to give in-depth knowledge of hospital procedures and commonly prescribed medications. Credit/no credit only. Offered: AWSpS.

DENT 655 Medical Emergency Management: Basic Life Support (1) Review of principles and practical applications for the management of medical emergencies in dental practice in conjunction with training and certification in Basic Life Support. Offered: S.

DENT 657 Comprehensive Clinic (1-10, max. 10) Clinical comprehensive care for patients. Offered: S.

DENT 659 Comprehensive Clinic (1-10, max. 10) Clinical comprehensive care for patients. Offered: S.

DENT 660 Temporomandibular Joint Diagnosis and Treatment (2, max. 8) Seminar and clinical sequence for comprehensive examination, diagnosis, and treatment of patients with temporomandibular joint problems. Includes management of dysfunction and morphologic alterations in associated muscles and occlusion. Prerequisite: permission of instructor. Offered: AW.

DENT 690 P-Extended Clinical Dentistry (1) Educational experiences in clinical dentistry. Available to students who have successfully completed the University of Washington Doctor of Dental Surgery curriculum and seek additional supervised experience in the delivery of oral health care services within three quarters of graduation and prior to licensure. Prerequisite: permission of instructor. Offered: AWSpS.

DENT 700 Master's Thesis (*) Offered: AWSpS. Oral Surgery

**OS 520 P-Local Anesthesia (2) Pharmacology, physiology, anatomy, and techniques of local anesthesia for dental students.**

**OS 530 Oral Surgery: Didactic (1, max. 3) Covers the scope of oral and maxillofacial surgery as practiced in the United States today. Introductory course for predoctoral dental students.**

**OS 532 P-Sedation and Pain Control (2) Techniques of sedation (oral, inhalational, intravenous) and pain control.**

**OS 550 P-Directed Studies in Oral Surgery (*, max. 16) See DPHS 449 for course description and prerequisite.**

**OS 560 Dental Sedation (2) For graduate students in the various dental specialties on the theory, application, and techniques of dental sedation. All modes of sedation, including oral, intramuscular, intravenous, and inhalation, are covered.**

**OS 630 P-Clinical Oral Surgery (2, max. 6) Clinical experience in simple and complex dentoalveolar and pre-prosthetic surgery. A problem-based course using an auto-tutorial approach covering the extraction of teeth, impaction surgery, medications, surgical complications, treatment of infections, bone cysts, maxillary sinus complications, and salivary gland and mucosal pathology. Credit/no credit only.**

**OS 651 P-Harborview Clerkship (2-10, max. 10) Four six-week rotation at Harborview Medical Center, including intensive instruction in oral surgery procedures and observing and assisting oral and maxillofacial surgery in the operating room. Credit/no credit only. Prerequisite: permission of department chairperson.**

**Pediatric Dentistry**

**PEDO 520 P-Pediatric Dentistry (4) Introduction to clinical pediatric dentistry, including behavior management, oral diagnosis, preventive dentistry, dental anomalies, radiography, anesthesia, restorative procedures, pulpal therapy, interceptive orthodontics, and traumatic dental injuries of the child patient. Offered: S.**

**PEDO 550 P-Directed Studies in Pediatric Dentistry (*, max. 6) See DPHS 449 for course description and prerequisite. Offered: S.**

**PEDO 560 Fundamentals of Pediatric Dentistry (1) Preclinical laboratory, lecture course covering fundamentals of primary care in pediatric dentistry, including behavior management, dental emergencies, prevention, diagnosis and treatment planning, and infection control. Offered: S.**

**PEDO 570 Pediatric Dentistry Seminar I (2) Series of seminars covering principles and theory of child development and behavior management for pediatric patient, including sedation, general anesthesia, and principles of informed consent, pathology of oral manifestations of diseases of children and adolescents, pediatric radiology, and use of computers in didactic, clinical, and research endeavors, and the scientific basis for the prevention and treatment of dental caries, periodontal disease, and developmental anomalies. Offered: S.**

**PEDO 571 Pediatric Dentistry Seminar II (2) Series of seminars covering principles and theory of child development and behavior management for pediatric patient, including sedation, general anesthesia, and principles of informed consent, pathology of oral manifestations of diseases of children and adolescents, pediatric radiology, and use of computers in didactic, clinical, and research endeavors, and the scientific basis for the prevention and treatment of dental caries, periodontal disease, and developmental anomalies. Offered: A.**

**PEDO 572 Pediatric Dentistry Seminar III (2) Series of seminars covering principles and theory of child development and behavior management for pediatric patient, including sedation, general anesthesia, and principles of informed consent, pathology of oral manifestations of diseases of children and adolescents, pediatric radiology, and use of computers in didactic, clinical, and research endeavors, and the scientific basis for the prevention and treatment of dental caries, periodontal disease, and developmental anomalies. Offered: W.**

**PEDO 573 Pediatric Dentistry Seminar IV (2) Series of seminars covering principles and theory of child development and behavior management for pediatric patient, including sedation, general anesthesia, and principles of informed consent, pathology of oral manifestations of diseases of children and adolescents, pediatric radiology, and use of computers in didactic, clinical, and research endeavors, and the scientific basis for the prevention and treatment of dental caries, periodontal disease, and developmental anomalies. Offered: Sp.**

**PEDO 574 Pediatric Dentistry Seminar V (2) Series of seminars covering principles and theory of child development and behavior**
PEDO 576 Pediatric Dentistry Seminar VII (2) Series of seminars covering principles and theory of child development and behavior management for pediatric patient, including sedation, general anesthesia, and principles of informed consent, pathology of oral manifestations of diseases of children and adolescents, pediatric radiology, and use of computers in didactic, clinical, and research endeavors, and the scientific basis for the prevention and treatment of dental caries, periodontal disease, and developmental anomalies. Offered: A.

PEDO 580 Developmental Disabilities Seminar (1) Multidisciplinary approach to managing children with developmental disabilities. Offered: S.

PEDO 581 Developmental Disabilities Seminar (1) Multidisciplinary approach to managing children with developmental disabilities. Offered: A.

PEDO 582 Developmental Disabilities Seminar (1) Multidisciplinary approach to managing children with developmental disabilities. Offered: W.

PEDO 584 Pediatric Dentistry Seminar (2) In-depth knowledge and understanding of the topics related to, and supportive of, the clinical practice of pediatric dentistry.

PEDO 600 Independent Study or Research (*) Prerequisite: permission of instructor. Offered: AW.

PEDO 610 Clinical Pediatric Dentistry (3) Major clinical experience for graduate pediatric dentistry students in basic through advanced pediatric dentistry. Offered for the length of the program at the University of Washington pediatric dental clinic.

PEDO 630 P-Clinical Pediatric Dentistry (1-, max. 7) Educational experiences in comprehensive clinical pediatric dentistry. Students register third and fourth years for 24 sessions in the pediatric dentistry clinic, a 3-day rotation at a community clinic, computer assisted clinical simulations, behavioral change projects, and a written analysis of videotaped patient/student clinic encounters. Offered: AWSpS.

PEDO 650 P-Pediatric Dentistry Extramurals (1-8, max. 6) Clinical extramurals in the field of children's dentistry. Prerequisite: permission of instructor. Offered: AWSpS.

PEDO 660 P-Clinical Pediatric Dentistry (1-3, max. 3) Clinical experience for graduate pediatric dental students in basic through advanced pediatric dentistry. Offered: S.

PEDO 661 P-Clinical Pediatric Dentistry (1-3, max. 3) Clinical experience for graduate pediatric dental students in basic through advanced pediatric dentistry. Offered: A.

PEDO 662 P-Clinical Pediatric Dentistry (1-3, max. 3) Clinical experience for graduate pediatric dental students in basic through advanced pediatric dentistry. Offered: W.

PEDO 663 P-Clinical Pediatric Dentistry (1-3, max. 3) Clinical experience for graduate pediatric dental students in basic through advanced pediatric dentistry. Offered: S.

PEDO 664 P-Clinical Pediatric Dentistry (1-3, max. 3) Clinical experience for graduate pediatric dental students in basic through advanced pediatric dentistry. Offered: Sp.

PEDO 665 P-Clinical Pediatric Dentistry (1-3, max. 3) Clinical experience for graduate pediatric dental students in basic through advanced pediatric dentistry. Offered: A.

PEDO 666 P-Clinical Pediatric Dentistry (1-3, max. 3) Clinical experience for graduate pediatric dental students in basic through advanced pediatric dentistry. Offered: W.

PEDO 667 P-Clinical Pediatric Dentistry (1-3, max. 3) Clinical experience for graduate pediatric dental students in basic through advanced pediatric dentistry. Offered: Sp.

PEDO 668 Clinical Clerkship in Pediatric Dentistry: Yakima Valley (*, max. 5) Comprehensive dental care for economically-disadvantaged children in a rural community health center. Offered: AWSpS.

PEDO 669 Supervised Clinical Teaching (1-3, max. 4) Graduate pediatric dental students provide clinical instruction for pediatric dental students by supervising clinical sessions. Offered: AWSpS.

PEDO 670 Hospital Pediatric Dentistry (1-3, max. 3) Diagnosis, management, and treatment of patients with disabilities in Children’s Hospital Dental Clinic. Offered: S.

PEDO 671 Hospital Pediatric Dentistry (1-3, max. 3) Diagnosis, management, and treatment of patients with disabilities in Children’s Hospital Dental Clinic. Offered: A.

PEDO 672 Hospital Pediatric Dentistry (1-3, max. 3) Diagnosis, management, and treatment of patients with disabilities in Children’s Hospital Dental Clinic. Offered: W.

PEDO 673 Hospital Pediatric Dentistry (1-3, max. 3) Diagnosis, management, and treatment of patients with disabilities in Children’s Hospital Dental Clinic. Offered: Sp.

PEDO 674 Hospital Pediatric Dentistry (1-3, max. 3) Diagnosis, management, and treatment of patients with disabilities in Children’s Hospital Dental Clinic. Offered: S.

PEDO 675 Hospital Pediatric Dentistry (1-3, max. 3) Diagnosis, management, and treatment of patients with disabilities in Children’s Hospital Dental Clinic. Offered: A.

PEDO 676 Hospital Pediatric Dentistry (1-3, max. 3) Diagnosis, management, and treatment of patients with disabilities in Children’s Hospital Dental Clinic. Offered: Sp.

PEDO 677 Hospital Pediatric Dentistry (1-3, max. 3) Diagnosis, management, and treatment of patients with disabilities in Children’s Hospital Dental Clinic. Offered: W.

PEDO 679 Care of the Disabled Pediatric Patient (1) Clinical experiences in the management of disabled patients. Offered: S.

PEDO 680 Pediatric Dentistry under General Anesthesia (1-4, max. 4) Clinical course involving preoperative assessment of comprehensive dental treatment under general anesthesia and follow-up care. Offered: S.

PEDO 681 Pediatric Dentistry under General Anesthesia (1-4, max. 4) Clinical course involving preoperative assessment of comprehensive dental treatment under general anesthesia and follow-up care. Offered: A.

PEDO 682 Pediatric Dentistry under General Anesthesia (1-4, max. 4) Clinical course involving preoperative assessment of comprehensive dental treatment under general anesthesia and follow-up care. Offered: W.

PEDO 683 Pediatric Dentistry under General Anesthesia (1-4, max. 4) Clinical course involving preoperative assessment of comprehensive dental treatment under general anesthesia and follow-up care. Offered: Sp.

PEDO 684 Pediatric Dentistry under General Anesthesia (1-4, max. 4) Clinical course involving preoperative assessment of comprehensive dental treatment under general anesthesia and follow-up care. Offered: S.

PEDO 685 Pediatric Dentistry under General Anesthesia (1-4, max. 4) Clinical course involving preoperative assessment of comprehensive dental treatment under general anesthesia and follow-up care. Offered: A.

PEDO 686 Pediatric Dentistry under General Anesthesia (1-4, max. 4) Clinical course involving preoperative assessment of comprehensive dental treatment under general anesthesia and follow-up care. Offered: W.

PEDO 687 Pediatric Dentistry under General Anesthesia (1-4, max. 4) Clinical course involving preoperative assessment of comprehensive dental treatment under general anesthesia and follow-up care. Offered: Sp.
Endodontics

ENDO 521 Introduction to Clinical Endodontics (4) Lecture component covers the biology, pathology, diagnosis, treatment, and outcome of dentin-pulp complex and pulp-related periapical pathology. Preclinical laboratory component covers endodontic treatment techniques on extracted teeth from different tooth groups as practice for clinical cases. Offered: Sp.

ENDO 534 P-Endodontic Clinical Procedures (1) Lecture course dealing with clinical procedures particular to endodontics, diagnosis and treatment of endodontic emergencies, and surgical management of endodontic problems. Offered: W.

ENDO 545 Honors Endodontics (2, max. 4) Seminar discussions of advanced endodontic diagnosis and treatment planning issues as well as clinical sessions on treatment of calcified negotiable canals, alternate instrumentation procedures and obturation systems. Credit/no credit only. Offered: W.

ENDO 550 P-Directed Studies in Endodontics (*, max. 6) See DPHS 449 for course description and prerequisites. Credit/no credit only.

ENDO 560 Advanced Endodontic Diagnosis and Treatment (2) Current concepts are presented and discussed relating to the diagnosis and treatment of pulpal and periapical pathosis. Criteria for evaluation of success or failure of root canal therapy are presented. Offered: W.

ENDO 561 Anatomical Basis for Clinical Endodontics (2) Root canal anatomy of significance in clinical endodontics is discussed in a seminar format. Offered: A.

ENDO 562 Anatomical Bases for Surgical Endodontics (2) Diagnosis and treatment of acute symptoms of dental origin, surgical endodontic therapy, traumatic dental injuries, and the relationship between periodontal and pulpal pathosis, including differential diagnosis and appropriate treatment planning, are discussed. Offered: Sp.

ENDO 563 Radiographic Interpretation (2) Various aspects of radiographic interpretation of particular relevance to endodontics, including interpretation of normal structures, acquired and developmental abnormalities, infections, sialoliths, dysplasias, cysts, malignant lesions, benign tumors, and various diseases other than tumors.

ENDO 566 Advanced Radiographic Interpretation (2) Various aspects of radiographic interpretation of particular relevance to endodontics, including malignant lesions, benign tumors, various diseases other than tumors, soft-tissue calcifications, and radiographic technique. Offered: W.

ENDO 568 Endodontic Practice Management (1) Essential elements for establishing and managing a successful specialty practice in Endodontics. Prerequisite: ENDU 562. Offered: A.

ENDO 580 Endodontic Seminar (2) Continuous weekly seminar devoted to review of endodontic and related literature and discussion of research methods.

ENDO 581 Endodontic Seminar (2) Continuous weekly seminar devoted to review of endodontic and related literature and discussion of research methods.

ENDO 582 Endodontic Seminar (2) Continuous weekly seminar devoted to review of endodontic and related literature and discussion of research methods.

ENDO 583 Endodontic Seminar (2) Continuous weekly seminar devoted to review of endodontic and related literature and discussion of research methods.

ENDO 584 Endodontic Seminar (2) Continuous weekly seminar devoted to review of endodontic and related literature and discussion of research methods.

ENDO 585 Endodontic Seminar (2) Continuous weekly seminar devoted to review of endodontic and related literature and discussion of research methods.

ENDO 586 Endodontic Seminar (2) Continuous weekly seminar devoted to review of endodontic and related literature and discussion of research methods.

ENDO 587 Endodontic Seminar (2) Continuous weekly seminar devoted to review of endodontic and related literature and discussion of research methods.

ENDO 590 Treatment Planning Seminar (2, max. 16) Weekly seminar to discuss controversial treatment problems, difficult diagnostic cases, and presentation of endodontic treatment cases.

ENDO 593 Clinical Practice Teaching (1, max. 3) Closely supervised experience in teaching clinical endodontics to the undergraduate dental student.

ENDO 594 Current Endodontic Literature (1) A review and critical evaluation of the current literature relative to endodontics.

ENDO 595 Endodontic Surgery (2) Reviews biological and technical aspects of endodontic surgery with emphasis on both the classic and current scientific surgical literature. Lectures and topic seminar discussion along with surgical case presentations.

ENDO 597 Endodontics Teaching Seminar (2) Weekly seminars devoted to an examination of general problems of teaching and learning and specific problems of endodontics teaching. Offered: W.

ENDO 598 Endodontics Teaching Seminar (2) Weekly seminars devoted to an examination of general problems of teaching and learning and specific problems of endodontics teaching. Offered: Sp.

ENDO 600 Independent Study or Research (*) Prerequisite: permission of graduate program adviser.

ENDO 630 P-Clinical Endodontics (1, max. 7) Student is required to complete endodontic treatment of anterior, premolar, and molar teeth. In addition to nonsurgical treatment of several endodontic cases, the student assists with a periapical surgery. Student must complete seven quarters of 630 and all course requirements before a grade is awarded.

ENDO 658 Endodontic Emergency Rotation (1) Clinical experience in managing and treating patients in pain. Offered: AWSpS.

ENDO 659 P-Endodontics Extended Learning (*, max. 4) Supplemental work in endodontics to correct an area of student deficiency. Credit/no credit only.

ENDO 660 Clinical Endodontics (4, max. 32) Clinical diagnosis and treatment of pulpal pathosis and related sequelae.
Oral Biology

ORALB 449 Undergraduate Research Topics in Oral Biology (1) Individual research on topics selected in collaboration with a faculty member. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSpS.

ORALB 520 P-Molecular Microbiology and Oral Diseases (3) Darveau Applies students' background knowledge in basic sciences to an understanding of the molecular bases of the interactions between microorganisms and oral tissues that lead to plaque formation and dental diseases. Principles of clinical asepsis and diagnosis of caries and periodontal diseases also covered. Offered: Sp.

ORALB 521 Medical Microbiology and Immunology (2) Darveau Bacterial structure, physiology and genetics. Viral structure and function. Bacterial and viral diseases of the respiratory tract, skin, GI tract, UG tract. Innate and adaptive immunity. Immune responses to infection, immunodeficiencies and autoimmunity. Offered: W.

ORALB 540 P-Clinical Oral Pathology Conference (2) Morton Seminar stressing basic science aspects and clinical findings of various oral lesions through exploration of etiology, pathogenesis, histopathology, and treatment modalities for oral pathology cases drawn from files of the Division of Oral Pathology. Offered: A.

ORALB 550 P-Directed Studies in Oral Biology (*, max. 12) Morton Selected readings and seminars on a topic chosen by individual arrangement in collaboration with a faculty member. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSpS.

ORALB 561 Oral Tissue Development, Structure, and Function (3, max. 6) Poppocks Selected readings and discussions explore recent advances in cellular and molecular biology relevant to oral biology and medicine. Special emphasis on craniofacial and dental development, oral mucosa and periodontal tissues, salivary gland function, and olation and gustation. Prerequisite: permission of instructor. Offered: WSp.

ORALB 562 Supervised Teaching in Oral Biology (1-5, max. 10) Directed and guided experience in selected topics in teaching techniques, teaching philosophy, and course design of courses given by the Department of Oral Biology. Students are required to participate in lecture and laboratory teaching under the supervision of the course director. Prerequisite: permission of instructor. Offered: AWSpS.

ORALB 564 Clinical Oral Pathology (1-3, max. 10) Morton Microscopic examination of oral lesions exhibiting basic histopathologic changes with gradual transition to the presentation of interesting cases from the Oral and Maxillofacial Biopsy Service, correlating the clinical findings with morphologic and pathogenic mechanisms. Primarily designed for DDS, MD, or DVM students. Offered: AWSpS.

ORALB 565 Clinical Oral Pathology (1-3, max. 10) Morton Presentation of interesting oral lesions from the dental school and the University of Washington Medical Center and the correlation of the clinical findings with the underlying morphologic and biochemical changes in the tissues. The relation of these oral lesions to systemic disease is stressed. Primarily designed for students with DDS, MD, or DVM, degrees. Prerequisite: permission of instructor. Offered: AWSpS.

ORALB 566 Surgical Oral Pathology (2-4, max. 16) Morton Students are trained to interpret microscopic slides of lesions from the oral cavity and related areas, and to correlate these with the clinical findings. Each student is responsible for the grossing of specimens and the preparation of histology reports. Primarily designed for students with DDS, MD, or DVM, degrees. Prerequisite: permission of instructor. Offered: AWSpS.

ORALB 570 Seminar in Oral Pathology (1-3, max. 9) Morton Consists of in-depth studies of specific oral diseases through use of seminar and discussion. Students are required to present literature reviews and to act as discussion leaders. Primarily designed for students with DDS, MD, or DVM, degrees. Prerequisite: permission of instructor. Offered: AWSpS.

ORALB 572 Oral Pathology (3, max. 6) Ozis Survey of the diseases of the oral facial regions in lecture and laboratory sessions. Diseases of teeth and their supporting structures and diseases of the oral and paroral soft tissues and bones. Correlation between clinical findings and histopathologic features. Attendance in the laboratory is required. Offered: AW.

ORALB 574 Clinical Stomatology (3) Morton Diseases of the oral cavity and jaw are presented as the practitioner encounters them-detailed clinical pictures, laboratory tests, radiographic findings, surgical exploration for the establishment of a therapeutic diagnosis. Offered: Sp.

ORALB 575 Oral Biology Seminar (1-3, max. 10) Izutsu Presentation and discussion of current research problems by members of the staff, investigators from other departments in the University, visiting scientists, and trainees. Prerequisite: permission of instructor. Offered: AWSpS.

ORALB 576 Molecular Aspects of Epithelial Biology (1-2, max. 2) Dale In-depth discussion of cytokiesonin, cell junctions, influence of growth factors, role of other agents on differentiation and function of normal stratified epithelia. Prerequisite: BIOL 440 (or equivalent) or permission of instructor. Offered: odd years; Sp.

ORALB 577 Applied Therapeutics in Dentistry (2) Watson Practical information about drugs included in practice of dentistry. Topics include evaluation of case histories, dental considerations pertaining to medical conditions and drug therapies, types of drugs and dosages used for common medical conditions, the pharmacology of drugs prescribed by the practitioner, and the mechanisms involved in drug interactions. Offered: odd years; A.

ORALB 578 Research Techniques in Oral Biology (2-4, max. 15) Introduction to biochemical, analytical, or morphological techniques employed in biochemistry or molecular pathology as well as in vitro techniques of tissue and organ culture. Prerequisite: permission of instructor. Offered: AWSpS.

ORALB 579 Molecular Biology (2) Presland Applications of molecular biology and recombinant DNA methodologies to oral biology topics of interest in dental sciences. Prerequisite: BIOCHEM 405 or BIOCHEM 406 or equivalent, and permission of instructor. Offered: S.

ORALB 580 Introduction to Molecular Biology Laboratory (4) Presland Includes laboratory experiences involving use of restriction enzymes, cloning of DNA into plasmid vectors and plasmid DNA isolation, RNA isolation from cells and tissues, PCR, DNA sequence analysis, and web-based DNA, and protein sequence analysis. Prerequisite: either BIOL 405, BIOL 406, or permission of instructor. Offered: A: even years.

ORALB 581 Secretory Process in Exocrine Glands (1-3, max. 3) Izutsu Biostructural, physiological, and biochemical aspects of individual secretory systems as integrated units. Faculty members with appropriate expertise participate in discussions and presentations during each of the three quarters. Offered: Sp.

ORALB 582 Secretory Process in Exocrine Glands (1-3, max. 3) Izutsu Biostructural, physiological, and biochemical aspects of individual secretory systems as integrated units. Faculty members with appropriate expertise participate in discussions and presentations during each of the three quarters.

ORALB 583 Secretory Process in Exocrine Glands (1-3, max. 3) Izutsu Biostructural, physiological, and biochemical aspects of individual secretory systems as integrated units. Faculty members with appropriate expertise participate in discussions and presentations during each of the three quarters.

ORALB 591 Advanced Topics in Oral Biology and Medicine I (1-2, max. 2) Herring Review of current molecular and cellular advances in developmental biology relevant to head and neck embryology, tooth development and epithelial differentiation. Offered: jointly with ORTHO 591; W.

ORALB 592 Advanced Topics in Oral Biology and Medicine II (1-2, max. 2) Herring Review of current scientific literature relevant to craniofacial and developmental biology and growth, bone biology and orthodontic tooth movement. Offered: jointly with ORTHO 592; Sp.

ORALB 600 Independent Study or Research (*) Prerequisite: permission of instructor. Offered: AWSpS.
ORALM 700 Master’s Thesis (*) Offered: AWSpS.

ORALM 800 Doctoral Dissertation (*) Offered: AWSpS.

Oral Medicine

ORALM 404 Considerations in Care of the Patient with a Disability (*, max. 6) Role of auxiliaries in dental treatment of the special patient, including psychosocial issues, communication techniques, wheelchair transfers; dental prevention, medical and dental management of specific disabilities; drug therapy, sedation, and anesthesia. Offered: AWSpS.

ORALM 460 Clinical Management of Patients with Disabilities (*, max. 10) Participation in chair/bedside dental treatment of a broad range of disabled populations, including homedwell and institutionalized patients. Offered: AWSpS.

ORALM 465 Dental Care of the Disabled Literature Review (1) Review of the current scientific literature pertaining to disability issues, research, clinical management, resources, and legislation relating to oral health of persons with disabilities. Credit/no credit only. Offered: AWSpS.

ORALM 513 Communication Skills I - Techniques (1) Different aspects of verbal and non-verbal communication, recognizing obstacles to effective communication, and developing strategies to overcome communication obstacles. Clinical interviewing exercises.

ORALM 514 Communication Skills II - Cultural Competency (1) Continuation of basic communication skills. Credit/no credit only. Offered: A.

ORALM 515 Communication Skills III - Interviewing and Hx-taking (1) Provides early clinical experience, and develops skills necessary to learn from patients what the practitioner needs to know about their social, medical, and dental histories to effective understand the “whole patient” so as to diagnose, plan, and provide appropriate treatment. Credit/no credit only. Offered: A.

ORALM 516 Physical Exam I (1) Addresses techniques of initial patient assessment including general survey of the patient and vital signs assessment. Includes development of skills through participation in clinical sessions. Credit/no credit only. Offered: W.

ORALM 517 Physical Examination II (2) Lectures, clinical rotations, and seminars addressing techniques of patient assessment including history-taking, physical examination, and interpretation of findings. Includes development of skills through participation in clinical sessions.

ORALM 520 P-Introduction to Oral Radiology (2) Physical, biological, technical, and diagnostic aspects of dental x-ray procedures. Offered: AWSpS.

ORALM 525 Physical Examination III (1) Intensive review and application of techniques of patient assessment including history-taking, physical examination, and interpretation of findings. Includes development of skills through participation in clinical sessions.

ORALM 526 General Medicine (2) Addresses medical, physical, and psychological conditions that impact the practice of dentistry. Provides information regarding collection of appropriate medical and physical data and integration of information into plans and practices relevant to the routine management of patients in dental practices. Instruction occurs via lectures, videos, assigned readings, and case scenarios.

ORALM 527 Introduction to Treatment Planning (1) Problem-oriented record system with basic concepts of treatment planning. Students prepare treatment plans in advance of seminar. Offered: Sp.

ORALM 528 Dental Education and Care of the Disabled (1) Addresses the special needs and dental management of patients with developmental disabilities such as Down’s syndrome, cerebral palsy, mental retardation, and other conditions such as head trauma. Utilizes instructional videos.

ORALM 529 Stomatology (4) Focuses on ability to recognize, diagnose, and treat non-dental oral diseases and conditions that are commonly encountered in clinical practice. Rotations through the oral medicine undergraduate clinic where students take history and examine patients presenting for comprehensive care or urgent care. Interpretation and management of non-dental oral pathology and medical/psychological issues. Offered: S.

ORALM 530 P-Acute and Chronic Orofacial Pain (1) Essential clinical and technical information and skills for diagnosis and treatment of acute and chronic pain, including differential diagnosis, and behavioral factors. Offered: A.

ORALM 532 P-Acute and Chronic Orofacial Pain (2) Essential clinical and technical information and skills for diagnosis and treatment of acute and chronic pain, including differential diagnosis, and behavioral factors. Offered: W.

ORALM 533 P-Acute and Chronic Orofacial Pain (2) Essential clinical and technical information and skills for diagnosis and treatment of acute and chronic pain, including differential diagnosis, and behavioral factors. Offered: Sp.

ORALM 540 P-Oral Medicine Senior Seminar (2, 4) Clinical conference devoted to case presentations of patients with dental treatment needs and complicating medical problems. Offered: AW.

ORALM 545 P-Clinical Conference in Oral Medicine (1, max. 2) Clinical pathologic conference utilizing interdisciplinary approach to patient care and emphasizing basic science application. Offered: AW.

ORALM 550 P-Directed Studies in Oral Diagnosis (*, max. 12) See DPHS 449 for course description and prerequisite. Offered: AWSpS.

ORALM 560 Advanced Diagnostic Techniques (2) Advanced diagnostic procedures used to identify oral and perioral diseases. Included are in-depth discussions of history analysis, methods for psychologic evaluation, soft and hard tissue diagnostic procedures, neurologic, salivary gland, and other tissue analyses requiring special procedures. Offered: AWSpS.

ORALM 564 Dental Care of the Disabled I (*, max. 10) Advanced topics in rehabilitation dentistry including psychosocial issues; characteristics and needs of patients with specific disabilities; patient management and use of portable equipment; drug therapy, sedation and anesthesia; dental prevention, and emergency procedures. Seminars and self-directed study. Prerequisite: permission of instructor. Offered: AWSpS.

ORALM 565 Oral Medicine Clinical Conference (*, max. 16) Clinical conference in which diagnostic data concerning patients seen in the oral medicine clinic are presented for evaluation. When possible, the patient is present with laboratory findings, radiographs, and the results of special tests. Offered: AWSpS.

ORALM 567 Behavioral Management of Acute and Chronic Orofacial Pain (2) Overview of adult psychopathology and illness behavior as it relates to psychosomatic concepts and chronic pain. Review of assessment and behavioral management strategies for the dental practitioner. Open to graduate students, postdoctoral fellows, residents in dentistry, medicine, psychology. Offered: Sp.

ORALM 570 Oral Medicine and Therapy (2, max. 6) Lecture directed toward the presentation and discussion of oral diseases and oral manifestations of systemic disease. Primarily the clinical manifestations’ relationship to generalized disease processes and patient management with in-depth discussions of therapy. Offered: AWSpS.

ORALM 576 Oral Medicine Literature Review (1) Seminar analyzes the recent literature concerning the area of oral medicine, diagnosis, and therapy for oral disease. Offered: AWSpS.

ORALM 578 Dental Care of the Disabled Literature Review (1, max. 3) Review of the current scientific literature pertaining to disability issues, including research, clinical management, resources, and legislation pertaining to oral health of persons with disabilities. Credit/no credit only. Offered: AWSpS.

ORALM 580 Current Concepts in Oral Radiology (2) Lecture/seminar covering current concepts in oral radiology including technical factors, radiation risks, observer characteristics and variation, radiographic localization, interpretation, and overview of current extraoral techniques. Offered: AWSpS.

ORALM 581 Advanced Seminars in Oral Radiology (2, max. 8) Explores aspects of oral and maxillofacial radiology and related fields. Offered: AWSpS.

ORALM 584 Dental Care of the Disabled III (*, max. 10) Field practice in community outreach to facilities and agencies serving disabled populations. Includes observation, dental screenings, patient education and in-service training of direct care staff. Prerequisite: ORALM 404 or ORALM 664. Offered: AWSpS.

ORALM 600 Independent Study or Research (*) Credit/no credit only. Offered: AWSpS.

ORALM 601 Oral Medicine Research Seminar (1, max. 10) Presentation and discussion of current research problems by graduate students, faculty, and investigators from other departments in the university. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSpS.
Orthodontics

ORTHO 449 Directed Studies in Orthodontics (*) See DPHS 449 for course description and prerequisite. Credit/no credit only. Offered: AWSpS.

ORTHO 520 P- Growth and Development of the Face and Dentition (2) Covers basic concepts in orthodontic work. Exposes students to the growth and development of the dentofacial structures and how orthodontists can use predict and use growth to treat malocclusion. Reviews concepts from basic biology and covers specific topics related to orthodontic tooth movement and orthopedic treatment. Offered: A.

ORTHO 521 Diagnosis and Treatment Planning in Orthodontics (3) Basic principles of pre and postnatal growth and development integrated with the recognition, analysis, and treatment of planning of problems encountered in dental and skeletal malocclusions.

ORTHO 522 P-Beginning Adjunctive Orthodontics (2) Lecture/laboratory instruction fabrication of orthodontic study models, clinical photography, and construction and use of removable and fixed orthodontic appliances.. Prerequisite: ORTHO 520. Offered: S.

ORTHO 550 P-Directed Studies in Orthodontics (*, max. 6) See DPHS 449 for course description and prerequisite. Offered: AWSpS.

ORTHO 551 Review of Selected Literature in Orthodontics (1) Students select a topic for review, review appropriate literature, and prepare written critique. Offered: WSp.

ORTHO 552 Journal Club (1) Graduate students review the current orthodontic literature. Offered: AWSp.

ORTHO 560 Orthodontics Seminar (1-5, max. 25) Methods of diagnosis, analysis, and treatment planning of malocclusion; analysis of methods and theoretical principles used in the treatment of malocclusion. The student presents a detailed case analysis and plan of treatment for each clinical patient supervised. Offered: AWSpS.

ORTHO 562 Orthodontic Theory (2) Lecture-seminar sequence dealing with interpretation and application of orthodontic principles and concepts. Pertinent literature, research findings, and current orthodontic theory are analyzed in depth. Offered: AWSpS.

ORTHO 563 Orthodontic Theory (2) Lecture-seminar sequence dealing with interpretation and application of orthodontic principles and concepts. Pertinent literature, research findings, and current orthodontic theory are analyzed in depth. Offered: AWSpS.

ORTHO 564 Orthodontic Theory (2) Lecture-seminar sequence dealing with interpretation and application of orthodontic principles and concepts. Pertinent literature, research findings, and current orthodontic theory are analyzed in depth. Offered: AWSpS.

ORTHO 565 Orthodontic Theory (2) Lecture-seminar sequence dealing with interpretation and application of orthodontic principles and concepts. Pertinent literature, research findings, and current orthodontic theory are analyzed in depth. Offered: AWSpS.

ORTHO 570 Roentgenographic Cephalometry (2) Basic principles, history, and techniques of roentgenographic cephalometry. Offered: W.

ORTHO 580 Functional Cranial Anatomy (3) Herring Lecture and laboratory dissection concentrating on clinical and functional anatomy of the head and neck. Offered: S.

ORTHO 582 Adult Orthodontics Seminar (2) Seminar for orthodontic, periodontic, and restorative dentistry graduate students in comprehensive, integrated diagnosis and treatment planning of the dental problems of the adult patient. Offered: AWSpS.

ORTHO 585 Surgical Orthodontic Diagnosis and Treatment Planning (3) Seminar for orthodontic graduate students and oral surgery residents in comprehensive, integrated diagnosis, and treatment planning for patients with major facial deformities. Offered: AWSpS.

ORTHO 584 Clinical Management of Cleft Lip and Palate and Craniofacial Anomalies (2) Management of these complex patients involves members of a dedicated, highly specialized multidisciplinary team. Insight gained into specific evaluation and treatment modalities of each discipline through lectures, seminars, assigned readings. Integrated approach to management is illustrated by attendance at craniofacial staffing and clinics. Prerequisite: graduate students in orthodontics. Offered: AW.

ORTHO 587 Management of Debilitated Dentitions (1, max. 2) Integrated diagnosis and treatment planning for patients with edentulous spaces, emphasizing use of osseointegrated implants and temporary anchorage devices. Offered: SpS.

ORTHO 589 Applied Psychology in Orthodontics and Pediatric Dentistry (1) Application of psychological theories, research, and intervention strategies to orthodontics and pediatric dentistry. Topics include the principles of behavior change, patient compliance with therapeutic regimens, and motivations for orthodontic treatment. Prerequisite: graduate standing in dentistry or permission of instructor. Offered: A.

ORTHO 590 Scientific Methodology in Dental Research (2) Review of the scientific method. Evaluation of dental literature. Discussion of proposed master’s degree research projects. Formulation and discussion of hypothetical research projects related to orthodontics. Offered: A.

ORTHO 591 Advanced Topics in Oral Biology and Medicine I (1-2, max. 2) Herring, Izutsu Review of current molecular and cellular advances in developmental biology relevant to head and neck embryology, tooth development and epithelial differentiation. Offered: jointly with ORALB 591; W.

ORTHO 592 Advanced Topics in Oral Biology and Medicine II (1-2, max. 2) Herring Review of current scientific literature relevant to craniofacial development and growth, bone biology and orthodontic tooth movement. Offered: jointly with ORALB 592; Sp.

ORTHO 597 Preclinical Technique (1) Techniques of construction and manipulation of the edgewise arch mechanism. Offered: S.
ORTHO 598 Archwire Formation (1) Principles of wire bending and the use of orthodontic pliers. Offered: ASpS.

ORTHO 599 Biomechanics (1) Principles of biologic reactions to application of orthodontic forces. Credit/no credit only. Offered: W.

ORTHO 600 Independent Study or Research (*) Managing the experimental protocol. Data collection and analysis. Preparation and writing of a thesis or publishable manuscript. Prerequisite: permission of instructor. Offered: SpS.

ORTHO 630 P-Introduction to Clinical Orthodontics (1) Direct clinical application of principles of orthodontic diagnosis and treatment planning for simple orthodontic appliances to modify tooth position in preparation for definitive restorative and/or periodontal therapy. Prerequisite: ORTHO 522. Offered: AW.

ORTHO 631 Minor Orthodontic Treatment (1) Clinical treatment of minor orthodontic problems suitable for the general dentist i.e., direct clinical application of principles of orthodontic diagnosis and treatment planning for simple orthodontic appliances to modify tooth position in preparation for definitive restorative or periodontal therapy. Offered: ASpS.

ORTHO 660 P-Clinical Orthodontics (1-6, max. 24) Clinical application of the techniques in the treatment of malocclusion. Offered: ASpS.

ORTHO 682 Adult Orthodontics Clinic (1) Clinic for orthodontic graduate students in the treatment of the dental problems of the adult patient. Offered: ASpS.

Periodontics

PERIO 449 Directed Studies in Periodontics (*) See DPHS 449 for course description and prerequisite.

PERIO 517 Introduction to Periodontics (2) Epidemiology, natural history, etiology, histopathology, and genetics of various periodontal diseases. Offered: Sp.

PERIO 525 P-Prevention/Periodontics (2-) Introduction to periodontal therapy. Offered: W.

PERIO 526 P-Prevention/Periodontics (2-) Overview of preventive dentistry, introduction to periodontal therapy. Offered: Sp.

PERIO 530 P-Principles of Periodontics (2-) Diagnosis of periodontal diseases and development of a treatment plan including maintenance program, rationale for non-surgical, surgical, and antibacterial management of periodontal diseases. Discussion of principles of various periodontal procedures. Prerequisite: PERIO 525-526 and PERIO 527. Offered: A.

PERIO 531 P-Principles of Periodontics (2-) Seminar emphasizing multidisciplinary approach to comprehensive treatment planning. Offered: W.

PERIO 540 Advanced Periodontics (1) Designed to improve the understanding of sequencing of patient care and providing periodontal therapy into the perspective of a comprehensive care system. Offered: A.

PERIO 550 P-Directed Studies in Periodontics (*, max. 6) See DPHS 449 for course description and prerequisite.

PERIO 561 Periodontal Case Management (2-, max. 8) Didactic presentation of clinical periodontics to provide a comprehensive view of the field and a grasp of modern therapeutics. Offered: A/WSp.

PERIO 566 Practice Management (1) Aspects of setting up and administering a private periodontal practice. Financing, insurance, office design, equipment, employees, professional forms, marketing strategies, and patient management. Prerequisite: PERIO 561. Offered: S.

PERIO 574 Periodontal Microbiology (2) Viral, bacterial classification; physiology, toxicity mechanisms reviewed. Formation and composition of plaque and calculus, and chemical methods of control discussed. Specific microbial flora of acute and chronic gingivitis, early onset forms of periodontitis, and adult periodontitis studied. Principles of antibiotic use reviewed. Offered: A.

PERIO 575 Immunologic Aspects of Oral Diseases (2) Lecture course designed to acquaint students with basic concepts of immunology and immunopathology. Topics include cellular immunology, antibody structure and function, complement system, immunopathologic mechanisms, tumor immunology and immunologic manifestations in mucocutaneous oral lesions as well as immunity of cancers and periodontal disease. Offered: W.

PERIO 577 Review of Literature (2, max. 16) Concise review of the scientific periodontal literature with specific focus on studies of periodontal diagnosis, wound healing, periodontal regeneration, microbiology, and implant procedures. Offered: A/WSp.

PERIO 578 Implant Literature Review (1) Verandt Reviews several topics related to dental implantology such as: history of dental implants, osseointegration, properties of materials, bone healing, bone augmentation procedures, success rates, pathogenesis of implant failures, and aesthetics in implantology. Discusses the relationship between surgical and restorative treatment phases. CR/NC only. Offered: A/WSp.

PERIO 580 Foundations in Implant Dentistry (1) London, Ragriodati Details the core surgical and prosthetic considerations in dental implant patient care. Topics include case planning, anatomy, radiography, surgery, componentry, occlusion, and applications for implant dentistry. Offered: S.

PERIO 586 Longitudinal Evaluation of Periodontal Therapy (1-, max. 9) Close examination of case progress from initial therapy to most recent maintenance visits to determine efficacy of method, demands upon patient, and temporal effect of therapy and survival. Preparation and delivery of a lecture on a therapeutic modality. Offered: A/WSp.

PERIO 592 Prescription Surgery (1-) Clinical course in periodontal surgery in which surgical procedures are performed on prescription basis for patients undergoing therapy in the undergraduate dental clinic. Exposes student to a wider spectrum of patients and to stimulate an environment in which the student encounter the problems in communication and patient management that occur in the private sector.

PERIO 600 Independent Study or Research (*) Prerequisite: permission of graduate program adviser.

PERIO 620 P-Introduction to Clinical Periodontics (1) Clinical periodontics, with emphasis on examination, assessment, and treatment planning. Offered: S.

PERIO 630 P-Periodontics (1-) Students diagnose periodontal disease and plan and perform periodontal therapies, treating patients in a stepwise manner, describing clinical conditions, and integrating periodontal therapy in a comprehensive plan of care. Prerequisite: PERIO 525-526 and PERIO 517. Offered: A.

PERIO 631 P-Periodontics (1-) Students diagnose periodontal disease and plan and perform periodontal therapies, treating patients in a stepwise manner, describing clinical conditions, and integrating periodontal therapy in a comprehensive plan of care. Prerequisite: PERIO 525-526 and PERIO 517. Offered: W.

PERIO 632 P-Periodontics (1-) Students diagnose periodontal disease and plan and perform periodontal therapies, treating patients in a stepwise manner, describing clinical conditions, and integrating periodontal therapy in a comprehensive plan of care. Prerequisite: PERIO 525-526 and PERIO 517. Offered: S.

PERIO 633 Advanced Clinical Periodontics (1-) Maintenance and treatment of patients with more complex periodontal involvement. Development of skill in comprehensive treatment planning and execution by the individual student. Allowance made for surgical periodontics and experience in assisting in the treatment of advanced cases.

PERIO 640 P-Advanced Clinical Periodontics (1-) Maintenance and treatment of patients with more complex periodontal involvement. Development of skill in comprehensive treatment planning and execution by the
individual student. Allowance made for surgical periodontics and experience in assisting in the treatment of advanced cases. Offered: A.

PERIO 641 P-Advanced Clinical Periodontics (-1) Maintenance and treatment of patients with more complex periodontal involvement. Development of skill in comprehensive treatment planning and execution by the individual student. Allowance made for surgical periodontics and experience in assisting in the treatment of advanced cases. Offered: W.

PERIO 659 P-Periodontics Extended Learning (*, max. 4) Supplemental work in periodontics to correct a need of student deficiency. Credit/no credit only.

PERIO 660 Clinical Periodontics ([2-6], max. 6) Clinical experience in diagnosis and treatment of periodontal disease.

PERIO 661 Advanced Root Preparation (1) Daubert Advanced skill development in the use of the periodontal probe, gracey curettes and instrument sharpening. Includes laboratory sessions on dentoforms leading up to treatment of initial therapy patients. Offered: S.

PERIO 662 Stomatoly Clinic (1, max. 4) The diagnosis and treatment of oral and perioral lesions including history taking, biopsies, hematological laboratory tests and chemotheray. Periodontal therapy in medically compromised patients in the hospital setting. Microscopic review of biopsy specimens. Offered: AWSpS.

PERIO 663 Pre-Prosthodontics Clinical Periodontics (*) Clinical diagnosis and treatment of periodontal disease for nonperiodontics student. Prerequisite: permission of department chairperson.

PERIO 665 Clinical Practice Teaching (*) Supervised experience in teaching clinical periodontics to undergraduate dentists students.

PERIO 665 Hospital Periodontics (1) Preparation in periodontics to practice in hospital situations, including experience in operation of nitrous oxide analgesia, general anesthesia, intravenous premedication, treating of out- and inpatients.

**Prosthodontics**

PROS 520 P-Introduction to Complete Dentures-Lecture (3) Didactic course in the treatment of completely edentulous patients. Instruction is provided in diagnostic procedures, complete denture construction, and maintenance care. Offered: A.

PROS 521 P-Management of Immediate Denture Patients (1) Lecture course describing and illustrating the clinical management of immediate denture patients (typical and overdenture). Offered: S.

PROS 523 P-Removable Partial Denture Design (2) Lectures in the basic principles of removable partial denture design. Practical drawings and more advanced designs are discussed in seminars. Certain technical aspects of design procedures are done in the classroom. Offered: W.

PROS 525 P-Partial Denture technique and Immediate dentures (4) Deals with those procedures the dentist must perform to fabricate a physiologically acceptable removable partial denture. The student gains experience via clinically submitted laboratory exercises prior to beginning prosthodontic treatment of a partially edentulous patient. The immediate denture component deals with the major treatment options and characteristics of immediate dentures.

PROS 560 Complete and Immediate Dentures (2) Lecture/seminar devoted to the diagnosis and treatment of the completely edentulous patient and the immediate denture patient, with emphasis on management of patients with difficulties in treatment. Offered: A.

PROS 562 Removable Partial Dentures (2) Lecture/seminar concentrating on factors peculiar to fabrication of removable partial dentures, with emphasis on management of combined fixed and removable therapy. Offered: W.

PROS 563 Maxillofacial Prosthetics I (1) Introductory lecture/seminar series with emphasis on diagnosis and prosthodontic rehabilitative treatment of patients who have experienced trauma or have congenital or acquired defects in the oral region. Offered: S.

PROS 564 Maxillofacial Prosthetics II (1) Introductory lecture series focusing on the prosthodontic rehabilitation of patients with loss and compromise of facial anatomy, i.e., ocular, orbital, nasal, auricular, combination intraoral/extraoral, and other related facial deformities.

PROS 571 Review of Literature Seminar (1, max. 12) Continuous weekly seminar devoted to the review of prosthodontic and related literature.

PROS 572 Special Topics Related to Prosthodontics (1) Lecture-seminar series focusing on relating principles of basic science to clinical application in prosthodontics. A wide and varied range of topics including surgery, psychology, speech, pharmacology, practice management, physiology, temporomandibular/jaw joint dysfunction.

PROS 600 Independent Study or Research (*) Prerequisite: permission of graduate program adviser.

PROS 620 P-Clinical Complete Dentures (1/3, max. 3) Basic principles of complete denture fabrication and of diagnosis and treatment of completely edentulous patient. In second quarter student completes denture patient care, provides follow-up treatment, and participates in four competency examinations. Offered: AW.

PROS 630 P-Clinical Prosthodontics ([1-2], max. 5) Clinical course involving the diagnosis and management of completely and partially edentulous patients. Removal of partial dentures and immediate dentures are fabricated. Follow-up care provided for patients previously treated.

PROS 640 P-Clinical Prosthodontic Maintenance (1, max. 3) Clinic involving additional patient treatment of completely edentulous patients, partial, or immediate dentures, plus indirect relines, managing adjustment chair, peer review, recall clinic, and follow-up care for patients previously treated. Offered: AWSP.

PROS 650 P-Extramurals in Prosthodontics (*, max. 12) Elective clinical experience or clinical practice teaching. Credit/no credit only. Prerequisite: permission of instructor.

PROS 660 Clinical Prosthodontics (1-2, max. 6) Practical application of material covered in 560 and 562.

PROS 665 Clinical Practice Teaching (1, max. 4) Supervised experience in teaching clinical prosthodontics to the undergraduate dental student.

**Restorative Dentistry**

RES D 510 P-Dental Materials Science (1/2), max. 3) Basic concepts of dental materials science including physical, mechanical, chemical, and biological properties of restorative dental materials. Clinical use of restorative dental materials also presented. Offered: WS.

RES D 515 P-Dental Anatomy (3) Lecture and laboratory on the morphology and nomenclature of individual teeth of the adult human dentition. Introduction to tooth histology and function and the influence of tooth anatomy on clinical dental procedures. Offered: A.

RES D 516 P-Introduction to Occlusion (3) Lecture/laboratory in the functional determinants of occlusal morphology. Preparation and waxing techniques for developing opposing quadrants by the additive waxing technique. Offered: W.

RES D 517 P-Functional Analysis of Occlusion (3) Clinical and laboratory experiences in examination and charting of patient’s occlusion, record-taking for analysis of occlusion on a dental articulator, and preclinical diagnostic correction of problems of occlusion on articulated clinical casts. Provides basic background or technique information relative to laboratory and clinical experiences. Offered: Sp.

RES D 520 P-Introduction to Operative Dentistry Technique (3) Introduces processes of restoring diseased or damaged tooth structure to proper health, form, function, and esthetics. Emphasis on basic principles of cavity preparation for one-surface restorations. Other considerations include restoration design, proper selection and use of restorative materials, and clinical considerations for restorative treatment planning. Following demonstration of competence in didactic and practical aspects. Limited opportunity available for introduction to restorative care. Offered: A.
RES D 521 P-Introduction to Operative Dentistry Technique (3) Introduces processes of restoring diseased or damaged tooth structure to proper health, form, function, and esthetics. Emphasis on basic principles of cavity preparation for multi-surface direct filling restorations. Other considerations include restorative design, proper selection and use of restorative materials, and clinical considerations for restorative treatment planning. Following demonstration of competence in didactic and practical aspects. Limited opportunity available for introduction to restorative care. Offered: W.

RES D 522 P-Introduction to Operative Dentistry Technique (3) Introduces processes of restoring diseased or damaged tooth structure to proper health, form, function, and esthetics. Emphasis on basic principles of cavity preparation for proper coverage cast gold and foundation buildup restorations. Other considerations include restoration design, proper selection and use of restorative materials, and clinical considerations for restorative treatment planning. Following demonstration of competence in didactic and practical aspects. Limited opportunity available for introduction to restorative care. Offered: Sp.

RES D 525 P-Fixed Prosthodontics (3) Serves as introduction to area of fixed prosthodontics dealing with indirect partial-coverage restorations and complete coverage restorations. Preclinical experience provided in tooth preparation, provisional restoration, and fabrication for various crown designs. Projects emphasize the various designs of single-tooth preparations and restoration. Offered: A.

RES D 526 P-Fixed Prosthodontics (3) Serves as introduction to area of fixed prosthodontics dealing with multiple-unit restorations. Preclinical experience provided with multiple tooth preparations and provisional restoration. Fabrication for various crown designs, singly and in conjunction with various pontic and connector types, to serve as fixed partial denture prostheses. Projects emphasize multiple-tooth preparation/restoration and implant-supported restorations. Offered: W.

RES D 527 P-Fixed Prosthodontics (3) Serves as introduction to area of fixed prosthodontics dealing with esthetic veneer indirect restorations. Preclinical experience provided in tooth preparation and restoration, fabrication for various esthetic veneer crown designs, singly and in conjunction with various pontic types to serve as fixed partial denture prostheses. Projects emphasize anterior single- and multiple-tooth preparation/restoration, provisional prostheses, and esthetic veneer restorations. Offered: Sp.

RES D 530 P-Restorative Dentistry (2) Lecture series related to 630 presenting restorative dentistry principles, including supportive material on clinical procedures. Emphasis on single-unit gold and esthetic veneer clinical procedures. Offered: A.

RES D 531 P-Restorative Dentistry (2) Lecture series related to 630 presenting restorative dentistry principles, including supportive material on clinical procedures. Emphasis on multiple-unit gold and esthetic veneer clinical procedures. Offered: W.

RES D 532 P-Restorative Dentistry (2) Lecture series related to 630 presenting restorative dentistry principles, including supportive material on clinical procedures. Offered: Sp.

RES D 535 Implant Dentistry (3) Junge Includes: history of implantology; basic science of osseointegration; surgical, prosthetic, and restorative considerations for the partially and fully edentulous patient; occlusal considerations of implant treatment; surgical placement and restorative procedures; management of patients; surgical and prosthodontic complications; developing a treatment plan on assigned case; and restoring a single tooth implant. Offered: A.

RES D 540 Esthetic Dentistry (2) Restorative procedures to create lifelike prosthodontics that mimic the appearance of natural teeth, including the theory and applications of bleaching, composites, and ceramics. Encompasses simple orthodontic and periodontic procedures for multidisciplinary treatment to improve restorative outcomes. Introduces proper technique, materials and case selection to maximize clinical issues. Credit/no credit only. Offered: A.

RES D 541 P-Advanced Restorative Dentistry (2) Broadens base of restorative procedures. Introduction of new techniques and presentation of complex restorative treatment involving other specialties. Offered: W.

RES D 542 P-New Developments in Dental Materials (1) Dental materials recently introduced to dental profession reviewed, compared to current materials, and clinically demonstrated. Offered: Sp.

RES D 550 P-Directed Studies in Restorative Dentistry (*, max. 6) See DPHS 449 for course description and prerequisite. Offered: AWSpS.

RES D 570 Review of Literature Seminar (1, max. 6) Continuous weekly seminar devoted to a review of restorative and related literature, and discussion of teaching methods, philosophy of teaching and treatment. Offered: AWSp.

RES D 580 Restorative Treatment Planning Seminar (1-, max. 8) Continuous weekly seminar to discuss controversial treatment problems and difficult diagnostic cases selected for graduate students. Offered: AWSp.

RES D 585 Advanced Dental Materials Science (2) Advanced concepts of dental materials science including physical, mechanical, chemical, and biological properties of restorative dental materials. Emphasis also on research design, testing methods, and proper selection of dental materials for clinical practice. Offered: W.

RES D 588 Masticatory Functional Analysis and Occlusal Adjustment (2) Lecture/seminar and clinical sessions in the study of the physiology of occlusion. Pertinent literature reviewed and discussed from the multidisciplinary viewpoint. The clinical sessions include training in masticatory functional analysis and treatment of occlusally related diseases. Offered: A.

RES D 589 Review of Literature in Occlusion (2) Seminar to review pertinent literature in occlusion. Offered: S.

RES D 590 Fundamentals of Fixed Prosthodontics (2-, max. 4) Lecture/laboratory/clinical sessions in the study of gnathological principles and procedures as they pertain to the treatment of comprehensive cases assigned to the students. Use and application of several articulators. Offered: A.

RES D 600 Independent Study or Research (*) Prerequisite: permission of graduate program adviser. Offered: AWSpS.

RES D 620 P-Comprehensive Treatment Planning in Restorative Dentistry (3) Orientation to restorative clinical operations, administrative procedures associated with patient management and completion of initial treatment plans. Emphasizes problem-based learning, treatment outcomes, the sequence of clinical treatment, and the diagnosis and management of caries-susceptible patients. Offered: S.

RES D 630 P-Clinical Restorative Dentistry ([1-3], max. 9) Clinical training in fundamental restorative dentistry procedures, including diagnostic, treatment planning, and therapeutic aspects of operative dentistry, fixed prosthodontics, and occlusal treatment. Offered: AWSp.

RES D 635 Clinical Restorative Dentistry (3) Verhoef Knowledge and experience in the diagnosis and restoration of diseased, damaged, and missing teeth. Experience in management of complex, inter-disciplinary treatment plans. Skills in patient communication and management. Utilization of broader range of restorative materials and techniques.

RES D 640 P-Advanced Clinical Restorative Dentistry ([1-3], max. 12) Clinical training in restorative dentistry procedures, including diagnostic, treatment planning, and therapeutic aspects of operative dentistry, fixed prosthodontics, and occlusal treatment. Offered: AWSp.

RES D 650 Restorative Dentistry Clinical Elective (1-6, max. 12) Elective offering in clinical areas related to discipline. Offered: AWSpS.

RES D 659 P-Restorative Dentistry Extended Learning (*, max. 4) Supplemental work in restorative dentistry to correct an area of student deficiency. Credit/no credit only. Offered: S.

RES D 660 Oral Rehabilitation ([1-6], max. 32) Clinical course to provide experience in diagnosis and treatment of patients requiring restorative procedures from single restorations to complex oral rehabilitative methods. Special emphasis is directed toward the integration of periodontics and occlusion as they relate to restorative dentistry. Offered: AWSpS.

RES D 665 Clinical Practice Teaching (1, max. 4) Supervised experience in teaching clinical fixed prosthodontics to undergraduate dental students. Offered: AWSpS.
Education Office. Offered: AWSpS.

prior to enrolling with an adviser in the Teacher endorsements. Arrangements must be made for certificated teachers working on additional depth classroom practicum experiences to committee chairperson and graduate program coordinator. Offered: AWSpS.

Prerequisite: permission of supervisory program coordinator. Offered: AWSpS.

College of Education

Education

EDUC 301 Introductory Practice in Community Service Activity (1-10, max. 10) Observation and participation in a variety of activities in a K-12 classroom. Placement made according to participant interests and needs. Participation on a predetermined schedule plus scheduled orientation and debriefing sessions are required. Offered: AWSp.

EDUC 305 The Purpose of Public Schools in a Democracy (5) I&S Explores issues and questions pertaining to public schools in a democratic society through directed readings, dialogue, individual and group projects designed to engage students with a series of crucial issues in public schools.

EDUC 310 Current Issues in Education (5, max. 10) I&S Covers a current issue and provides the opportunity to read and discuss educational issues with other students and faculty and to learn of opportunities in the College of Education programs.

EDUC 401 Practicum in Community Service Activity (1-18, max. 18) Tutoring and teaching experiences in a school or community service organization. Placement made according to participant interests and needs. Participation on a predetermined schedule plus scheduled orientation and debriefing sessions are required. Offered: AWSp.

EDUC 402 Practicum in Classroom Teaching and Management: Primary (1-18, max. 18) Tutoring and teaching experiences in a primary school setting (grades K-3). Placements made according to participants interest and needs. Participation on a predetermined schedule plus scheduled orientation and debriefing sessions.

EDUC 403 Practicum in Classroom Teaching and Management: Intermediate (1-18, max. 18) Tutoring and teaching experiences in an intermediate school setting (grades 4-8). Placements made according to participants interest and needs. Participation on a predetermined schedule plus scheduled orientation and debriefing sessions.

EDUC 404 Practicum in Classroom Teaching and Management: Secondary (1-18, max. 18) Tutoring and teaching experiences in an intermediate school setting (grades 6-12). Placements made according to participants interest and needs. Participation on a predetermined schedule plus scheduled orientation and debriefing sessions.

EDUC 502 Advanced Practicum in Classroom Teaching and Management (1-18, max. 18) In-depth classroom practicum experiences to certificated teachers working on additional endorsements. Arrangements must be made prior to enrolling with an adviser in the Teacher Education Office. Offered: AWSpS.

EDUC 700 Master’s Thesis (*) Prerequisite: permission of faculty adviser and graduate program coordinator. Offered: AWSpS.

EDUC 800 Doctoral Dissertation (*) Prerequisite: permission of supervisory committee chairperson and graduate program coordinator. Offered: AWSpS.

Early Childhood and Family Studies

ECFS 200 Introduction to Early Childhood and Family Studies (3) I&S, Joseph, Sandall Focuses on the development of young children and provides the opportunity to read and understand young children in the context of families and society. Develops observation skills in order to understand children’s behavior in learning environments. Examines various approaches to and purposes for assessment of young children and documentation of their development and learning. Explores approaches to assessing early learning environments. Offered: A.

ECFS 300 Child Observation and Assessment (5) I&S Joseph Focuses on observation and other methods used to study and understand young children in the context of families and society. Develops observation skills in order to understand children’s behavior in learning environments. Examines various approaches to and purposes for assessment of young children and documentation of their development and learning. Explores approaches to assessing early learning environments. Offered: A.

ECFS 301 Early Childhood Curriculum (5) I&S, Joseph, Sandall Focuses on the development of early childhood curriculum. Studies approaches to designing, organizing, and implementing early learning programs for young children. Studies curriculum content and methods for supporting children’s learning and development in the areas of physical development, social and emotional development; approaches to learning; and language and early literacy. Offered: W.

ECFS 302 Survey of Infant and Children at Risk (3) I&S Sandall Provides a survey of risk factors that can affect early childhood development, including prenatal and neonatal factors, and social/societal influences. Emphasizes understanding how risk factors can impact social-emotional, physical, and cognitive growth. Includes research-based principles and approaches to child guidance. Offered: Sp.

ECFS 303 Service Learning and Research I(3) Sandall First of a three-quarter sequence to provide students with opportunities in community-based early childhood or family support settings. Includes a field experience and a one-week seminar. The seminar ties together research and practice demonstrating how research informs evidence-based decision-making in programs and services for young children and families. Credit no credit only. Offered: A.

ECFS 304 Service Learning and Research II(3) Joseph, Sandall Second of a three-quarter sequence to provide students with opportunities in community-based early childhood or family support settings. Includes a field experience and a one-week seminar. The seminar ties together research and practice demonstrating how research informs evidence-based decision-making in programs and services for young children and families. Credit no credit only. Offered: W.

ECFS 305 Service Learning and Research III (3) Jegaathesan, Sandall Third of a three-quarter sequence to provide students with opportunities in community-based early childhood or family support settings. Includes a field experience and a one-week seminar. The seminar ties together research and practice demonstrating how research informs evidence-based decision-making in programs and services for young children and families. Credit no credit only. Offered: Sp.

ECFS 401 Understanding Early Childhood and Family Studies Research (3) I&S Jegaathesan Focuses on the kinds of knowledge, ways of knowing, and modes of inquiry relevant to early childhood and family studies. Through identifying and reviewing substantive research in these areas of interest, students locate ideas for inquiry within the research literature in early childhood and family studies. Offered: A.

ECFS 402 Social Policy and Young Children and Families (5) I&S, Joseph. Sandall Seeks to deepen understanding of contemporary social issues and problems that impact families and young children. Discusses legislation and other policies form a local, national, and global perspective. Explores the complex web of social, private, and governmental organization that impact families and young children. Offered: W.

ECFS 454 Advanced Service Learning and Research I (3) Sandall First of a three-quarter sequence leading to the completion and presentation of the senior project during spring quarter. Provides advanced opportunities to integrate theory and practice in community-based early childhood or family support programs and research settings. Included a weekly seminar to reflect on and expand on applied experiences. Offered: A.

ECFS 455 Advanced Service Learning and Research II (3) Sandall First of a three-quarter sequence leading to the completion and presentation of the senior project during spring quarter. Provides advanced opportunities to integrate theory and practice in community-based early childhood or family support programs and research settings. Included a weekly seminar to reflect on and expand on applied experiences. Offered: A.

ECFS 456 Senior Project (3) Sandall Third of a three-quarter sequence leading to the completion and presentation of the senior project. Community-based learning and research experience continues during the quarter. Offered: Sp.

Curriculum and Instruction

EDC&I 324 Physical Education and Health in the Schools (2) Techniques and procedures for teaching physical education and health in elementary and secondary schools. For students in Teacher Education Program. Credit/ no credit only.

EDC&I 341 The Teaching of Art in the Secondary School (3) For majors in secondary art education planning to teach on the junior or senior high school level.

EDC&I 353 Teaching in the Elementary School (3) Emphasizes selected teaching modes; lesson planning; classroom management procedures; grouping to accommodate pupils with special needs; utilization of learning resources; evaluation of teaching. Attention also given to school culture.
EDC&I 354 Teaching in the Secondary School (3) Development of basic skills in instructional methods, lesson planning, classroom management procedures, evaluation of teaching. Attention also given to school culture.

EDC&I 355 Language Arts in the Elementary School (3) Basic course in planning and teaching elementary language arts: listening and speaking, written composition, handwriting, spelling, creative and practical writing.

EDC&I 356 The Teaching of English (3) Combines theoretical understanding of teaching with specific techniques and materials for literature, language, composition, and mass media. Emphasis on research-based approach coordinated with concurrent experience in schools.

EDC&I 357 The Teaching of Speech (3) Special methods course in the teaching of speech communication at the elementary and secondary levels.

EDC&I 360 Reading in the Elementary School (3) Basic course in methods, techniques, and materials used the teaching reading through decoding, comprehension, strategies, and literature in primary and intermediate grades.

EDC&I 424 Multiethnic Curriculum and Instruction (3) Primarily for preservice and inservice teachers who have little or no previous exposure to issues related to ethnicity and school. Designed to help teachers better understand the student role in the ethnic education of students and acquire the insights, understandings, and skills needed to design and implement curricular and instructional strategies that reflect ethnic diversity.

EDC&I 425 Instructional Strategies for Minority Students (3) Designed to equip educators with appropriate skills in effective teaching of culturally and socioeconomically different students. Attention is directed to understanding how these students differ from mainstream youth and what the implications are for instructional strategies in the classroom.

EDC&I 434 Introduction to Computers in the Classroom (3) Overview of the uses of computers in education. Uses of computers in instruction, classroom management (gradebooks, utilities), evaluation of software, overview of programming, and word processing. Prior experience not required.

EDC&I 436 Design and Authoring of CAI (3) Introduction to the design of computer-assisted-instructional programs. Types of learning characteristics of effective instruction. Students design and produce CAI programs using authoring systems for computers. Offered: jointly with T C 436.

EDC&I 437 Uses of Computer Application Packages in Schools (3) Introduction to the instructional and management uses of application programs. Topics may include: databases, spreadsheets, word processing, graphics packages, graphing utilities, telecommunication, desktop publishing. Emphasis is on K-12 setting. Prerequisite: EDC&I 434.

EDC&I 443 Improvement of Teaching: Elementary School of Music (3) Advanced studies in the teaching of music in the elementary school. For experienced teachers.

EDC&I 451 Second Language Acquisition and Language Study (3) Stritikus, Varghese Identifies the major theories, concepts, processes, and factors pertinent to learning a second language, especially in relation to English. Relates second language acquisition theories, concepts, processes, and factors to pedagogical implication for classroom teaching.

EDC&I 453 Teaching the Bilingual-Bicultural Student (3) Educational needs of bilingual students: research findings, special programs, materials, and methodologies that bilingual-bicultural education can provide to meet those needs. Cultural combinations of bilingual populations in American culture; historical, social, and linguistic factors affecting their K-12 education.

EDC&I 454 Cooperative Learning in the Classroom (3) Theory and research on cooperative learning and current practices of managing such learning. Team learning activities and opportunities to plan and try out lessons and materials using several different cooperative strategies. Credit/no credit only.

EDC&I 455 The Language Arts: Language and Learning (3) The teaching of language arts requires research-based knowledge of language learning and its influence on listening, speaking, reading, writing, and nonverbal communication. Emphasizes techniques for building both a solid literacy curriculum and sound instructional practices.

EDC&I 456 Workshop in Instructional Improvement: Language Arts (1-6, max. 15) Individual or group study projects on the improvement of instruction in language arts.

EDC&I 457 Methods in Teaching English as a Second Language (3) Prepares preservice and in-service teachers to teach English as a second language and to meet the educational and linguistic needs of students who have little or no English language skills. Emphasis on a survey of first- and second-language acquisition research and its educational implications, as well as instructional strategies consistent with the audiolingual, cognitive, and creative construction approaches to second-language learning. Includes diagnostic-prescriptive strategies for classroom application.

EDC&I 458 Content Area ESL Instruction (3) Stritikus, Varghese Exposes students and engages them in how to support their English Language Learners in their content areas through sheltered instruction, specifically through the framework, Sheltered Instruction Observation Protocol (SIOP). Focuses specifically on the academic language needs of these students. Prerequisite: EDC&I 457.

EDC&I 459 Workshop in Instructional Improvement: Reading (1-6, max. 15) Projects on the improvement of instruction in reading. For experienced teachers and students in Teacher Education Program.

EDC&I 460 Early Literacy Instruction (3) Theory, research, and practice in early literacy acquisition including emergent literacy, phonemic awareness, word identification, comprehension, invented spelling, and writing. Emphasis on classroom instruction strategies for first and second language learners. Offered: A.

EDC&I 461 Materials for Teaching Reading: Children's and Young Adult's Literature (3) Designed to provide acquaintance with materials used in the teaching of reading. Trade books and materials from content areas are examined.

EDC&I 462 Reading Comprehension Instruction in Elementary and Secondary School (3) Research-based strategies for explicit teaching of reading comprehension of both fiction and content-area texts including issues of reading strategies, text difficulty, teacher modeling, guided reading, discussion, assessment, and adaptations for struggling students. Offered: Sp.

EDC&I 464 Educating Native-American Youth (3) Assists students in understanding the North American Indian child from cultural, socioeconomics, and psychological points of view. Provides opportunities for the student to apply knowledge and skills gained in other courses to prepare programs and leaning aids relevant to the educational situation of the Indian child.

EDC&I 465 Social Studies Education: Elementary School Programs and Practices (3) Stresses curriculum patterns, instructional procedures, resource materials, and the selection of content in social studies. For elementary and middle school teachers and students in Teacher Education Program.

EDC&I 468 Workshop in Instructional Improvement: Social Studies (1-6, max. 15) Individual or group study projects on the improvement of instruction in social studies.

EDC&I 469 Teaching African American Students and Culture (3) Examination of sociocultural and pedagogical factors that influence African American students' learning styles, opportunities, and outcomes; exploration of ways to reform teaching techniques to better accommodate cultural styles and experiences to improve the educational achievement of African American students.

EDC&I 470 Science Education: Elementary School Programs and Practices (3) Designed for classroom teachers with reference to the teaching and learning of science from kindergarten through grade 6. Emphasis is placed on objectives, methods, and materials as related to the concepts and processes of science.

EDC&I 471 Science Education: Secondary School Programs and Practices (3) Survey of the status and potential role of science in education; trends and their implications for the teaching of both biological and physical sciences in the junior and senior high schools; representative curricula and related teaching procedures; the psychology of concept formation and problem solving; and organization of science programs.

EDC&I 472 Environmental Education for Teachers (3) Status, selected problems, and role of environmental education in program of elementary, middle, and junior high schools. Opportunity to examine and receive instruction in use of existing environmental education.
EDC&I 473 Workshop in Instructional Improvement: Science (1-6, max. 15) Individual or group study projects on the improvement of instruction in science.

EDC&I 474 Multi-Ethnic Studies: Methods, Content, and Materials (3) Designed to help preserve and in-service teachers identify current materials and devise methods for implementing ethnic studies programs and for incorporating ethnic content into regular K-12 social studies, language arts, and humanities curricula. Special attention is given to teaching about American Indians, Mexican Americans, African Americans, Asian Americans, Puerto Rican Americans, and White ethnic groups.

EDC&I 475 Improvement of Teaching: Elementary School Mathematics (3) Designed for elementary teachers. Emphasis is placed on the contributions of research to the improvement of the teaching of mathematics in the elementary school. For experienced teachers.

EDC&I 476 Improvement of Teaching: Junior High School Mathematics (5) Exploration of mathematical concepts for the purpose of improving the teaching of middle school mathematics.

EDC&I 478 Special Topics in Mathematics for Teachers (2-9, max. 9) NW Study of selected areas of mathematics. Designed for the improvement of teachers of mathematics. Offered: jointly with MATH 497.

EDC&I 479 Workshop in Instructional Improvement: Mathematics (1-6, max. 15) Individual or group study projects for the improvement of instruction in mathematics.

EDC&I 482 Educational Technology in Schooling (3) Introduction to the application of technologies (computers, telecommunications, interactive video) in schools. Designed primarily for pre- and in-service teachers, but of interest to anyone involved in technology in education.

EDC&I 485 Workshop in Instructional Improvement: Educational Communication and Technology (2-6, max. 6) Individual or group study projects on the improvement of instruction through use of educational communication and technology.

EDC&I 488 Educational Technology and Learning in Alternative Settings (3) How educational technology can be used to encourage learning in nonschool environments, such as museums, radio and television broadcasts, parks and recreation centers, and distance education programs. Students investigate one of these areas and prepare a project.

EDC&I 494 Workshop in Improvement of Curriculum (1-6, max. 15) Stresses the application of procedures for curriculum development, maintenance, and evaluation. Opportunities furnished to develop and perfect strategies for program development with occasions given to utilize the strategies in master plan and materials preparation for simulated or real school situations. Specific focus of workshop is determined by instructor or by arrangement with district.

EDC&I 495 Workshop in Improvement of Teaching: Selected Topics, Issues, or Problems (1-6, max. 15) Individual or group study projects on the improvement of instruction. Specific focus of workshop is determined by instructor or by arrangement with district.

EDC&I 496 Workshop in Instructional Improvement (2-6, max. 6) Individual or group study projects on the improvement of instruction with attention to designing instructional plans.

EDC&I 499 Undergraduate Research (2-5, max. 5) Students developing studies under this rubric should be advised that a report or a paper setting forth the results of their investigations should be regarded as a basic part of the program.

EDC&I 500 Field Study (1-10, max. 10) Individual study of an educational problem in the field under the direction of a faculty member. Prerequisite: approved plan of study and permission of the instructor must be filed in the Office of Curriculum and Instruction in the College of Education.

EDC&I 505 Seminar in Curriculum and Instruction (1-5, max. 15) Seminar on advanced topics in curriculum and instruction. Critical examination of current research and practice. Content varies, check quarterly Time Schedule for topics to be covered. Prerequisite: permission of instructor.

EDC&I 510 History of Educational Technology (3) Examines the role of technology in education through history. Early systems of instruction, advent of textbooks, models for school architecture, instructional devices and teaching machines, mediated and distance learning. Focuses on the interplay between designed educational approaches and contexts in which they were implemented, and consequent success for failure.

EDC&I 511 Current Issues in Technology and Education (3) Examines current genres of learning technology, novel approaches for integrating technology into curriculum and instruction, and recent theoretical perspectives that inform future work in educational technology. Prerequisite: EDC&I 510 or instructor permission.

EDC&I 512 Survey of Educational Technology Research (2, max. 4) Critically examines active research projects in educational technology. Critiques of research practice. Corequisite: EDC&I 511 and EDC&I 580.

EDC&I 514 Seminar in Teacher Education (3) Focus on recent research, issues, and proposals for future development in teacher education, certification, and continuing professional growth. Alternate year offering focuses on either preservice or inservice issues. Prerequisite: permission of instructor.

EDC&I 531 Seminar: Critical Review of Curriculum (1-6, max. 15) Students formulate and apply criteria for assessing materials, with emphasis on linguistic, cultural, and psychological factors; instruction effectiveness, interest level; and educational objectives. Prerequisites: teaching experience and one basic course in the teaching of reading.

EDC&I 532 Seminar in Literacy Research (3, max. 9) Primary focus on those aspects of the literacy process that are of concern in a developmental literacy program. Emphasis on research design, evaluation of research, and research findings, dealing with factors influencing literacy ability, problems in skill development, recreational reading, and writing. Prerequisite: permission of instructor.

EDC&I 533 Seminar: Conducting Research in Reading (3, max. 6) Students design and conduct original research studies in the field of reading. Emphasis on research rationale, choice of productive research types, and reporting of research results and implications. Prerequisite: EDC&I 532.

EDC&I 534 Seminar in the Reading of Literature (3) Reading and its effect on reading skills, language development, social values, and literary judgment of children and adolescents. Emphasis on analysis of research in these areas and on the development of action research designed to study response to literature. Prerequisite: one 400- or 500-level education curriculum and instruction course in reading or language arts or one graduate course in literature for children or young adults.

EDC&I 535 Seminar: Conducting Research in Response to Literature (3, max. 6) Students design, conduct, and interpret original research studies in the field of reading literature within the context of the school curriculum. Emphasis on the analysis of literary content and structure and the relationship of those qualities to the literary experience. Prerequisite: EDC&I 534.

EDC&I 536 Inquiry and Methods in Writing Instruction (3) Traces covers methods of assessment and teaching written composition, spelling, and handwriting to children and youth, with, and without, disabilities. Particular attention is given to how to establish a strong writing program in elementary classrooms and how to teach writing strategies. Offered: jointly with EDSPE 528; Sp.

EDC&I 540 Teaching the Bilingual-Bicultural Student (3) Educational needs of bilingual students: research findings, special programs, materials, and methodologies that bilingual-bicultural education can provide to meet those needs. Cultural combinations of bilingual populations in American culture; historical, social, and linguistic factors affecting their K-12 education.

EDC&I 541 Seminar in Bilingual Education: Organization and Structure (4) Study of the structure and organizational aspects of bilingual programs. Includes study of the developmental and organizational factors affecting bilingual education. Assists graduate students in reviewing the historical antecedents in bilingual education and in developing a personal philosophy about bilingual education.
EDC&I 542 Approaches to Assessing Second Language Students in K-12 Schools (3) Stritikus, Varghese Examines the multiple ways of assessing linguistically diverse students in K-12 schools, including standardized and alternative assessments of these students. Prerequisite: a course in ESL methods.

EDC&I 543 Seminar in Bilingual Education: Instructional Strategies (4) Study of instructional factors affecting bilingual education. Particular emphasis is given to research related to the variables involved in teaching in a bilingual environment. Assists graduate students in exploring instructional methodologies and formats as they apply to bilingual education and in becoming familiar with the current issues in bilingual education.

EDC&I 544 Immigration and Education: Immigrant Student Perspectives (3) Stritikus, Varghese Examines the multitude of factors which shape the immigrant student experience in U.S. schools. Takes an interdisciplinary perspective drawing on research from sociology, anthropology, and education, to understand teaching and learning from the perspective of immigrant students.

EDC&I 545 Multilingual Socialization and Development (3) Stritikus, Varghese Examines the research base examining second language acquisition, and in and out of school contexts. Focuses on the home language practices of linguistically diverse students with the purpose of understanding how these processes influence school learning.

EDC&I 547 Sociolinguistics (3) Stritikus, Varghese The study of language in its social context and the study of social life through language. Explores issues in the field of sociolinguistics and sharpens tools to explore educational issues related to linguistic and cultural diversity. Prerequisite: EDC&I 453 or equivalent.

EDC&I 550 Educational Technology Research (3) Analysis, critique, and practical experience with research studies of all types (experimental, ethnographic, evaluation) concerning questions of interest to educational technologists. Prerequisite: EDC&I 480, a research methods course, or permission of instructor.

EDC&I 551 Introduction to Instructional Design (3) An experimental course in analyzing, designing, developing and formatively evaluating instructional products using the Instructional Systems Design (ISD) Mode. Also, discussion of how to successfully implement management principles. Business and industry training focus.

EDC&I 552 Management of Educational Technology Programs (3) Factors contributing to effective management of programs incorporating educational technology and microcomputers. Manager's role as agent of instructional change and processes leading to successful adoption and long-term implementation of new instructional system. Prerequisite: EDC&I 510.

EDC&I 553 Seminar on Instructional Systems Development (3) Critical analysis of processes involved in the development of instructional systems. Prerequisite: EDC&I 481 or permission of instructor.

EDC&I 555 Educational Futures (3) Concept of alternative futures stressing manageability of the future. Attention is given to current and future events that can or might impact education. Basic future studies methods are considered with opportunities to apply such methods within educational arena. Prerequisite: prior graduate course work or experience in education.

EDC&I 556 Elementary School Curriculum (4) Study of elementary school curriculum, its design, rationale, and delivery. Current trends and issues affecting elementary school curriculum analyzed.

EDC&I 558 Secondary School Curriculum (3) Systematic analysis of current curriculum practices, with particular emphasis on the social and historical forces affecting secondary-school curriculum.

EDC&I 559 Principles and Procedures of Curriculum Development (3) Intensive study of basic principles and procedures utilized in development of instructional programs. Participants have opportunities to apply such procedures in class activities. Attention given to curriculum foundations.

EDC&I 560 Social Studies Education Programs and Practices (3) Stresses curriculum patterns, instructional procedures, resource materials, and a selection of content in social studies education. For experienced teachers and students in Teacher Education Program.

EDC&I 561 Seminar in Language Arts (3) Study of language with special attention to research pertaining to the social context of language in the classroom. Course work includes group and individual analysis of language arts studies with attention to research design and measurement. Prerequisite: EDC&I 455.

EDC&I 562 Seminar in Reading and Language Arts: Secondary Emphasis (3) Study of recent research in listening, oral language, reading, and written language, emphasizing psychological and interrelated aspects. Prerequisite: permission of instructor.

EDC&I 563 Current Issues in Literacy Education (1-3, max. 6) Discussion of problems and issues of current interest and importance in language arts education.

EDC&I 565 Seminar in Social Studies Education: Elementary Emphasis (3) Intensive study of the social studies curriculum, with particular emphasis on current literature and research. Prerequisite: EDC&I 465 or equivalent.

EDC&I 566 Seminar in Social Studies Education: Secondary Emphasis (3) Intensive study of the social studies curriculum, with particular emphasis on current literature and research. Prerequisite: EDC&I 466 or equivalent.

EDC&I 567 Current Issues in Social Studies Education (1-3, max. 6) Discussion of problems and issues of current interest and importance in social studies education.

EDC&I 569 Educating Ethnic Minority Youths (4) Intensive analysis and review of the research and curricular programs related to the social, psychological, and political factors that influence the school experiences of ethnic minority youths. Special attention given to instructional and curricular programs for African-American, American-Indian, Mexican-American, Puerto Rican-American, and Asian-American students. Prerequisite: graduate standing or permission of instructor.

EDC&I 570 Seminar in Science Education: Elementary Emphasis (3) Investigation of curriculum and instruction in science at elementary-school levels, with particular emphasis on current literature and research. Prerequisite: EDC&I 470 or equivalent.

EDC&I 571 Seminar in Science Education: Secondary Emphasis (3) Investigation of curriculum and instruction in science at secondary-school levels, with particular emphasis on current literature and research. Prerequisite: EDC&I 471 or equivalent.

EDC&I 572 Current Issues in Science Education (1-5, max. 6) Discussion of topics and problems of current interest and importance in science education. Prerequisite: graduate standing.

EDC&I 573 School Reform and Multicultural Education (3) Similarities and differences among the visions, goals, and strategies of proposals for school reform and multicultural education are analyzed; implications for practice in curriculum and instruction are deduced from these analyses. Prerequisite: one course in multicultural education or permission of instructor.

EDC&I 574 Race, Gender, and Knowledge Construction: Curriculum Considerations (3) Using historical and contemporary perspectives, considers ways in which knowledge related to race and gender has been and is constructed and the implications of ways in which knowledge is constructed for curriculum reform and teaching. Prerequisite: one course in ethnic studies, multicultural education, or women studies or permission or instructor.

EDC&I 575 Seminar in Mathematics Education: Elementary Emphasis (3) Investigation of curriculum and instruction in mathematics at the elementary-school level; review of research and preparation of proposals. Prerequisite: graduate standing.

EDC&I 576 Seminar in Mathematics Education: Secondary Emphasis (3) Investigation of curriculum and instruction in mathematics at the secondary-school level; review of research and preparation of proposals. Prerequisite: graduate standing.

EDC&I 577 Current Issues in Mathematics Education (1, max. 6) Discussion of problems and issues of current interest and importance in mathematics education. Prerequisite: graduate standing.

EDC&I 578 Qualitative Methods of Educational Research (5) Survey of various qualitative research methods from a variety of disciplinary perspectives (anthropology, sociology, applied linguistics, cognitive psychology, policy analysis, and evaluation) with intensive experience in collection, analysis, and reporting of data. Prerequisite: second-year doctoral standing and one course in statistics. Offered: jointly with EDPSY 586.

EDC&I 579 Qualitative Methods of Educational Research (5) Survey of various qualitative research methods from a variety of disciplinary perspectives (anthropology,
sociology, applied linguistics cognitive psychology, policy analysis, and evaluation) with intensive experience in collection, analysis, and reporting of data. Prerequisite: second-year doctoral standing and one course in statistics. Offered: jointly with EDPSY 587.

EDC&I 580 Technology in Context (3) Focuses on development of appropriate methods and concepts for research on technology in schools, workplaces, and other naturalistic settings. Fieldwork exercises and reading exemplary studies in multiple disciplinary perspectives. Prerequisite: EDC&I 510, EDC&I 511, EDC&I 512, or permission of instructor.

EDC&I 581 Cognitive Systems Design (3) Covers the design of applied technology-based learning systems, informed by current views of learning, technology, and cognition. Emphasizes synthesizing students’ knowledge of technology, learning and research in collaborative settings. Prerequisite: EDC&I 510, EDC&I 511, EDC&I 512, EDC&I 580, or permission of instructor.

EDC&I 582 Design Experimentation and Implementation in Context (3) Introduces theoretical, methodological, and practical issues involved with studying the designed use of learning technologies in real world settings. Focuses on designing in empirical study of the designed system through partnerships involving education researchers, educators, and technologists. Prerequisite: EDC&I 510, EDC&I 511, EDC&I 512, EDC&I 580, EDC&I 581, or permission of instructor.

EDC&I 583 Message Design (3) Research and theory on design of instructional messages in various modalities (visual, auditory), and in various formats (pictorial, verbal, graphic). Prerequisite: EDC&I 480 or permission of instructor.

EDC&I 584 Instructional Graphics for Microcomputers (3) Study of current research on instructional uses of computer graphics. Development, selection, and application of design principles for graphically-based instructional and training programs. Prerequisite: EDC&I 436, EDC&I 481.

EDC&I 585 Technology and the Culture of Education (3) Social impact of technology on education in the United States and elsewhere: social, political, and cultural factors affecting educational communication and technology; roles and relationships among instructors and learners; appropriate technology in developing countries; technology’s long-term influence on thought and values. Prerequisite: EDC&I 480 or permission of instructor.

EDC&I 586 Current Issues for Computers in the Classroom (1, max. 6) Addresses many of the current topics in computer-related education. Issues and research related to computer uses in curriculum, instruction, and management of instruction.

EDC&I 587 Design and Application of Interactive and Immersive Instructional Systems (3) Theoretical and empirical questions involved in design of interactive instructional systems using such technologies as virtual reality and CAI. Specific problems inherent in design of complex learning environments: immersive structure, sequence of experiences, navigation, learner guidance. Educational uses of systems. Prerequisite: EDC&I 481 or EDC&I 583, EDC&I 436, or permission of instructor.

EDC&I 588 Seminar: Computers in Education (3) Provides opportunity for graduate students to analyze, discuss, and design research in areas of computers in education. Includes historical development of research in this area as well as a platform for the development of research proposals and refinement of ongoing research. Prerequisite: EDC&I 434 or EDC&I 436.

EDC&I 589 Current Issues in Educational Communications (1, max. 9) Discussion of problems and issues of current interest and importance in the field of educational communications. Serves also as a forum for discussion of doctoral research. Designed for master’s and doctoral candidates in educational communications. Credit/no credit only. Prerequisite: graduate standing.

EDC&I 590 Seminar in Elementary Education (3) Exploration of the philosophy, history, purposes, curriculum, methods, and school organization of elementary education. Prerequisite: EDC&I 556.

EDC&I 591 Seminar in Curriculum Research (3) Analysis of past and current empirical, historical, ethnographic research, and philosophical analysis of the curriculum field. Studies considered in empirical study of research in curriculum development, the curriculum plan, contextual characteristics, and factors related to curriculum participants. Group and individual analyses focus on theory generation and practical applications of research. Prerequisite: EDC&I 559 or permission of instructor.

EDC&I 592 Seminar in Secondary Education (3) Research and study of secondary education. Primary focus on factors involving change in secondary-school curriculum and organization. Prerequisite: EDC&I 558.

EDC&I 593 Seminar in Curriculum: Theory and Practice (3) Investigation of curriculum theory and practice. Consideration is given to theoretical writings that address the relationships between various curricular variables. Theoretical positions are related to current educational reforms and innovations. Prerequisite: EDC&I 559.

EDC&I 594 Seminar in Curriculum: Issues, Systems, Models (3) Emphasis on the current approaches to curriculum and curriculum innovation. Attention is given to major educational issues as they affect curricular activity. Prerequisite: EDC&I 559.

EDC&I 595 Seminar in Analysis of Teaching (3) Investigation of the ways in which classroom teaching has been analyzed from a variety of disciplinary perspectives. Focus on methods, findings, and implications of research on teaching. Prerequisite: teaching experience.

EDC&I 596 Seminar in Strategies of Instruction (3) Various instructional models applicable to all levels of schooling. Theoretical and philosophical bases for these instructional models are considered.

EDC&I 597 Curriculum Evaluation Seminar (3, max. 6) Focuses on the evaluators’ roles, evaluation theory and models, and selected curricular evaluations. Examples are drawn from the several disciplines commonly offered in the elementary and secondary schools. Students are expected to identify an evaluation problem and to develop an evaluation design that can be implemented as a practical solution to the problem. Prerequisite: EDC&I 559 and permission of instructor.

EDC&I 599 Independent Studies in Education (*) Independent studies or readings of specialized aspects of education. Prerequisite: permission of instructor.

EDC&I 600 Independent Study or Research (*) Prerequisite: permission of instructor.

EDC&I 601 Internship (1-10, max. 10) Credit/no credit only. Prerequisite: graduate standing and permission based on approval of proposal submitted during quarter preceding the internship.

EDUCATIONAL LEADERSHIP AND POLICY STUDIES

EDLPS 444 Constitution and American Public Education (3-6, max. 6) I&S Emphasis on the principles, processes, and content of constitutional law in an effort to provide new insights and new tools with which school administrators and teachers may examine questions involving political and civil rights in the United States, especially as these affect the conduct of education. Specific topics on constitutional freedom include the obligation to go to school; legal controls over curriculum, teachers, and students; and racial integration and equal financing of public schools. Open to law students and to nonlaw students enrolled as graduate students or as upper-division undergraduates. Credit/no credit only. Offered: jointly with LAW 444.

EDLPS 479 Crucial Issues in Education (3) Selected educational issues, policies, and contexts. Evolution of the American education enterprise, legal issues, professionalism, finance, and other vital educational concerns.

EDLPS 496 Workshop: Education Programs and Problems (1-6, max. 12) Study of such topics as planning, development, supervision, organization, operation, or evaluation of current or emerging programs or problems in education.

EDLPS 499 Undergraduate Research (*) Students developing studies under this rubric should be advised that a report or a paper setting forth the results of their investigations should be regarded as a basic part of the program.

EDLPS 501 Introduction: Leadership Beyond the Classroom (3-6, max. 12) Emphasis on principal certification program; explores Washington state laws, legal principles, context of public schools, multicultural issues, changing population. Essential skills of leadership: communication, human relations, strategies for shared decision making, and dealing with conflict. (Open only to students admitted to the EDLPS Principal/Program Administrator Preparation Program.)
EDLPS 502 Leadership Core (3-6, max. 6) Topics include moral dimensions of leadership; modes of inquiry; organizational theory and change; history of educational reform; curriculum deliberation and instructional leadership and supervision; school-centered inquiry and decision-making; policy, planning, and program evaluation; issues on diversity and multicultural education; American and Washington State school law; school finance and resource allocation; school-community relations. Instruction occurs in units and seminar throughout the academic year. Prerequisite: admission to Principal/Program Administrator Preparation Program.

EDLPS 503 Leadership Core (3-6, max. 6) Topics include moral dimensions of leadership; modes of inquiry; organizational theory and change; history of educational reform; curriculum deliberation and instructional leadership and supervision; school-centered inquiry and decision-making; policy, planning, and program evaluation; issues on diversity and multicultural education; American and Washington State school law; school finance and resource allocation; school-community relations. Instruction occurs in units and seminar throughout the academic year. Prerequisite: admission to Principal/Program Administrator Preparation Program.

EDLPS 504 Leadership Core (3-6, max. 6) Topics include moral dimensions of leadership; modes of inquiry; organizational theory and change; history of educational reform; curriculum deliberation and instructional leadership and supervision; school-centered inquiry and decision-making; policy, planning, and program evaluation; issues on diversity and multicultural education; American and Washington State school law; school finance and resource allocation; school-community relations. Instruction occurs in units and seminar throughout the academic year. Prerequisite: admission to Principal/Program Administrator Preparation Program.

EDLPS 505 Transition to Leadership (3-6, max. 6) Development and administration of systems for selection, evaluation and clinical supervision of certificated and classified personnel. Focuses on leadership models and transition to a leadership role, including opening a school or program and dealing with student/ school crises. (Only for students admitted to the EDLPS Principal/Program Administrator Program.)

EDLPS 507 Reflective Seminar (1-6, max. 6) Integration of theory and internship experience; group process laboratory and peer feedback and review of written work, oral presentations, and journals. Reading and discussion of crucial issues. (Only for students admitted to the EDLPS Principal/Program Administrator Preparation Program.) Credit/no credit only.

EDLPS 509 Planning, Organizing, and Decision Making (3) Application of principles utilized in planning, organizing, and decision making in districts and schools. Formation of policy and procedures; formal and informal organization; power, authority, and responsibility; utilization of people, time, and space.

EDLPS 510 School Finance (3) Financial practices and problems in districts and schools considered, including state and federal support plans, school plant planning, school business management, resource allocation, and budgeting and educational accountability.

EDLPS 511 School-Community Relations (3) Examines the dynamics of the interface between the public schools and the community. Special attention is given to the findings of research in relation to school-community power, types, and organizational influences.

EDLPS 512 Seminar in Personnel Administration and Development (3) Major emphasis on the analysis of factors to be considered in the selection and evaluation of teachers and administrators and considerations in staff development.

EDLPS 513 Seminar in Instructional Development and Supervision (3) Theory of the process of supervising instructionally effective school personnel, including an analysis of the techniques of supervision, theory of leadership and group process, interpersonal relations, and evaluation of teacher effectiveness.

EDLPS 514 Washington School Law (3) Overview of Washington State specific legal provisions affecting the organization and management of public schools, including school organization and operations, school finance, separation of church and state, school employment, student conduct, discipline and rights, equity, intergovernmental agreements, and student health and safety.

EDLPS 515 Management of Labor Relations in Education (3) Examination of procedures and techniques pertinent to the management of organizational conflict. Among the areas covered are collective bargaining, grievance procedures, mediation, fact finding, and arbitration.

EDLPS 516 Special Education and the Law (3) Overview of major state and federal laws affecting the operation and management of special education programs in public schools. Emphasis upon procedural and substantive rights of children with disabling conditions. Offered: jointly with EDSPE 504; W.

EDLPS 517 Seminar in Administration: Facilities (3) Contemporary issues, problems, and techniques of educational facility administration. Emphasis placed on such factors as planning, financing, development, design, construction, operation, liabilities, property management, state regulations. Credit/no credit only.

EDLPS 518 Reflective Seminar: The Superintendency (1-6, max. 6) Integration of theory and internship experience. Readings and discussion of crucial issues, presentations by local school superintendents: district budgeting processes, personnel, staff relations and collective bargaining, superintendent-board relations, bond issues, facilities planning, superintendent as instructional leader. Credit/no credit only.

EDLPS 519 Special Topics in Educational Leadership (1-10, max. 15) Readings, lectures and discussions pertaining to significant topics of special and current interest to educators. Focus is on issues of particular concern to K-12 administrators and other educators in leadership roles in districts and schools. Topics vary; check Time Schedule for topic(s) to be covered.

EDLPS 520 Education as a Moral Endeavor (3) An exploration of fundamental questions that have faced educational leaders in the past and most likely will continue to face them in the future. Foundational studies in history, philosophy, and sociology provide the basis for discussion and writing about these fundamental questions. Credit/no credit only.

EDLPS 521 Philosophy of Education (3) Philosophy of education considered as a study of the conceptual basis for educational policy and practice. Emphasis on relationships between enduring educational problems and fundamental philosophic issues; concepts that feature centrally in educational discourse; and conceptual analysis as a means for clarifying decisions regarding educational policy and practice.

EDLPS 522 Contemporary Philosophies of Education (3) Intensive study of the writings of selected contemporary philosophers of education.

EDLPS 523 Analysis of Educational Concepts (3) Selected concepts central to conduct and understanding of education.

EDLPS 524 Seminar in Philosophy of Education (3, max. 6) Philosophical examination of ways in which education might be studied. Uses and limits of conventional scientific approaches in education inquiry. Consideration of alternatives.

EDLPS 525 Educational Inquiry (3) General survey of epistemological issues underlying the several schools of thought or families of inquiry. Overview of various methods used in conduct of educational inquiry, examples of ways those methods are typically used, and exploration of strengths and weaknesses of those methods. Discussion throughout is in terms of assumptions regarding the nature of knowledge and purposes of inquiry. Must be taken in sequence. Credit/no credit only. Prerequisite: doctoral status in education.

EDLPS 526 Educational Inquiry (3) General survey of epistemological issues underlying the several schools of thought or families of inquiry. Overview of various methods used in conduct of educational inquiry, examples of ways those methods are typically used, and exploration of strengths and weaknesses of those methods. Discussion throughout is in terms of assumptions regarding the nature of knowledge and purposes of inquiry. Must be taken in sequence. Credit/no credit only. Prerequisite: doctoral status in education.

EDLPS 530 History of Education (3) Historical survey of education. Emphasis on relationship between idea and practice. Topics include education and colonialism, formation of state school systems, progressive education, equal educational opportunity, changes in textbooks and curricula, education and social structure, and education in the history of cultures.

EDLPS 531 History of American Higher Education (3) Examination of the historical development of the American higher education enterprise, including pre-colonial origins. Includes attention to the colonial colleges, the rise of new institutions in the nineteenth century, and the further development of American colleges and universities in the twentieth century. Leaders in these developments are identified.

EDLPS 532 Seminar: American Education in the Twentieth Century (3, max. 6) Selected problems in American education over the last century, with special emphasis on contemporary issues and trends.

<th>Course Title</th>
<th>Description</th>
<th>Credits</th>
<th>Notes</th>
</tr>
</thead>
<tbody>
<tr>
<td>EDLPS 533</td>
<td>Seminar in Educational Classics (3)</td>
<td>Analysis in depth and in the context of the relevant history of several major works in educational thought from Plato to Dewey.</td>
<td>3</td>
<td></td>
</tr>
<tr>
<td>EDLPS 534</td>
<td>History of the Modern University (3)</td>
<td>Growth of the modern university with attention to intellectual trends as well as organizational and curricular changes. Special attention is given to nine American universities in the twentieth century.</td>
<td>3</td>
<td></td>
</tr>
<tr>
<td>EDLPS 535</td>
<td>Historical Inquiry in Education Research (3, max. 6)</td>
<td>Methods and critique of historical research in education. Examination of landmark works in education history and historiography. Hands-on experience framing historical questions, finding historical sources, using historical evidence, substantiating historical claims, and addressing issues in the history of education.</td>
<td>3</td>
<td></td>
</tr>
<tr>
<td>EDLPS 536</td>
<td>Historical Analysis of Educational Issues (3)</td>
<td>Analysis and interpretation of the history of education in its broadest sense: the transfer of culture across generations. Examination of the problems of evidence and interpretation with which the authors of exemplary works in the history of education struggled.</td>
<td>3</td>
<td></td>
</tr>
<tr>
<td>EDLPS 540</td>
<td>Sociology of Education (3)</td>
<td>Examination of education and educational institutions by using the major conceptual tools of sociology. Emphasis on sociological thought and findings that have particular bearing on the understandings and judgments of educators.</td>
<td>3</td>
<td></td>
</tr>
<tr>
<td>EDLPS 541</td>
<td>Topics in Comparative Education (3, max. 6)</td>
<td>International efforts in education, including the role of the United States in overseas programs. Analysis of the relation of education and society in foreign areas, stressing social change and conflict. Regions of the world considered in the course vary from one offering to another.</td>
<td>3</td>
<td></td>
</tr>
<tr>
<td>EDLPS 542</td>
<td>Seminar in Educational Sociology (3)</td>
<td>Application of sociological principles to education, school problems, individual problems and investigations. For teachers, administrators, and those using educational sociology as a field for advanced degrees.</td>
<td>3</td>
<td></td>
</tr>
<tr>
<td>EDLPS 543</td>
<td>Seminar: Research in Educational Sociology (3)</td>
<td>Theory, concept, and method of sociological inquiry as applied to problems in education.</td>
<td>3</td>
<td></td>
</tr>
<tr>
<td>EDLPS 544</td>
<td>Comparative Education: Introduction to Concepts and Methods (3)</td>
<td>Introduction to research methods used in comparative education studies. Considers ways to study familiar and unfamiliar contexts, identifies the common pitfalls of international comparisons. Reviews ethnomet hodological tools of interview construction, cross-cultural observation strategies, documentary analysis, Education policy and practice is primary focus; useful for comparing other public policy issues internationally.</td>
<td>3</td>
<td></td>
</tr>
<tr>
<td>EDLPS 545</td>
<td>Knowledge and Data in Relation to Action (3)</td>
<td>Introduces L4L students to systematic inquiry—to fundamental ideas about knowing and knowledge, data and evidence, and to the applications of these ideas in settings that invite leadership action to address educational issues. (Only for students admitted to the Leadership for Learning Ed. D. Program.) Credit/no credit only.</td>
<td>3</td>
<td></td>
</tr>
<tr>
<td>EDLPS 546</td>
<td>Leadership Inquiry I: The design of research on Local Problems of Practice (3)</td>
<td>Examines research design, action research, critical inquiry, and mixed method research. Equips L4L students to recognize and create viable, rigorous designs for action-oriented research into local problems of practice. (Only for students admitted to the Leadership for Learning Ed. D. Program.)</td>
<td>3</td>
<td></td>
</tr>
<tr>
<td>EDLPS 547</td>
<td>Leadership Inquiry II: Developing Useful Qualitative Research (3)</td>
<td>Helps students, in the context of action-oriented research, develop data collection tools, produce high-quality quantitative and qualitative data, and construct evidence for claims the investigator wishes to make. (Only for students admitted to the Leadership for Learning Ed. D. Program.)</td>
<td>3</td>
<td></td>
</tr>
<tr>
<td>EDLPS 548</td>
<td>Leadership Inquiry III: Refining the Design and Analysis of Research that Informs Practice (3)</td>
<td>Teaches how to critically evaluate and improve research designs so that they are consistently, fully developed, and well-grounded in substantive and methodological literatures. Builds largely around the students’ own emerging dissertation designs. (Only for students admitted to the Leadership for Learning Ed. D. Program.)</td>
<td>3</td>
<td></td>
</tr>
<tr>
<td>EDLPS 549</td>
<td>Special Topics in Educational Studies (1-6, max. 15)</td>
<td>Readings, lectures, and discussions pertaining to significant and enduring ideas in the philosophy, history and sociology of education. Specific topics are critically examined in light of contemporary problems in education. Topics vary; check Time Schedule for topic(s) to be covered.</td>
<td>3</td>
<td></td>
</tr>
<tr>
<td>EDLPS 550</td>
<td>The Dynamics of Educational Organizations (3)</td>
<td>Exploration of the literature in organizational theory and leadership, the assumptions that underlie the development of various approaches to organizational theory and how these approaches are applied, and an acquaintance with different conceptual frames that can be used to determine how to improve and change organizations. Credit/no credit only.</td>
<td>3</td>
<td></td>
</tr>
<tr>
<td>EDLPS 551</td>
<td>Foundational Studies in Complex Organizations (3)</td>
<td>Examination of conceptual and theoretical bases for complex organizations, characterized by problematic goals, knotty decision-making processes, and fluid participation. Impact of information, power, beliefs, resources, organizational structure, and environment. Although issues discussed are generic, examples focus on educational organizations.</td>
<td>3</td>
<td></td>

</table>
Problems of federal, state, and local school support. Financing capital outlay, research, and public relations.

EDLPS 565 Power and Politics in Organizational Leadership and Decisionmaking (3)
Focuses on conceptual frameworks that can be used to analyze power-influence processes in complex organizations and research methods that are well-suited to the study of these processes. Opportunities to design studies of power relations and political processes are provided.

EDLPS 566 Education Policy Serving Disenfranchised Groups (3) This seminar examines programs and policies aimed at ameliorating conditions that face disenfranchised groups in contemporary K-12 schooling. Seminar members critically analyze the assumptions, design, and likely impact of these programs and policies on institutions and individuals. Designed for advanced doctoral students. Others admitted with permission of instructor.

EDLPS 567 Education Policy and the Improvement of Teaching and Learning (3)
Examines connections between policies and classroom practice, in P-12 and higher education settings. Of particular concern is the capacity of policy to improve the quality of curriculum and instruction. Students design and critique policies, drawing on research and feedback from policymakers.

EDLPS 568 Policy Evaluation in Education (3) Examination of methods for evaluating educational policies across the educational continuum. Students design and conduct a policy evaluation which draws on the policy evaluation literature. Examination of the uses of policy evaluation information in shaping organization-decision making is also included.

EDLPS 569 Issues in P-12 School Reform (3, max. 12) Copland, Knapp Offers rigorous ways to explore the meaning and action implications of contemporary reform movements in the P-12 public school system. Examines a different topic each quarter concerning reform at school, district, state, or federal levels through readings, discussion, projects, and analytical writing assignments. Offered: AWSpS.

EDLPS 570 Critical Views on Educational Leadership (3) Leadership theory is undergoing a wave of development influenced, in part, by critical theory and postmodern perspectives. Topics include the emerging literature on critical leadership perspectives with a particular goal of understanding how this informs leadership practice for those in educational organizations.

EDLPS 571 Instructional Renewal and the Achievement Gap (3) Examines the meaning of the performance gap between relatively advantaged and disadvantaged students in contemporary American schools and school districts, and the possibilities for reducing and closing it. Especially within classroom instruction. (Only for students admitted to the Leadership for Learning Ed. D. Program.)

EDLPS 572 Teaching, Learning, and Instructional Renewal in the Context of Learner Differences (2-5, max. 5) Examines the nature of learning and learner differences, and how educators can work productively with these differences, in relation to particular subjects (literacy, mathematics), diversity (language, culture, disability), assessment, and instructional technology. (Only for students admitted to the Leadership for Learning Ed. D. Program.) Credit/no credit only.

EDLPS 573 Professional Learning and Instructional Renewal (2-4, max. 4) Investigates professional learning and how to support it, based on cognitive research, sociocultural theory, and scholarship on teacher education (preservice and inservice). Offers system-level leaders ways to address the quality of teaching and learning in classrooms. (Only for students admitted to the Leadership for Learning Ed. D. Program.)

EDLPS 574 Education Policy Implementation (3) Honig Analyzes influences on implementation outcomes. Focuses on how skilled use of theoretical frameworks can help reveal relationships between policy and practice and evidence-based decisions that may improve implementation. Offered: Sp.

EDLPS 575 Education Policy Implementation (3) Honig Analyzes influences on implementation outcomes. Focuses on how skilled use of theoretical frameworks can help reveal relationships between policy and practice and evidence-based decisions that may improve implementation. Offered: Sp.

EDLPS 576 The American College and University (3) Introduction to contemporary United States higher education, with special emphasis on emerging trends, roles of the several kinds of institutions, the composition and character of student bodies and faculty, and the state coordination of colleges and universities.

EDLPS 577 Principles and Practices of Adult and Continuing Education (3) History and development of adult and continuing education in the United States: component parts of the field; issues, theory, and research; program planning for adults; professionalization of the field.

EDLPS 578 Seminar in the History and the Organization of Higher Education (3) Advanced seminar in the history and the organization of higher education.

EDLPS 579 Higher Education and the Law (3) Legal implications of university operations and an explanation of the legal and constitutional rights of students, faculty, and staff within the university. Special attention given to faculty employment and termination decisions; student protections, including due process; and university liabilities.

EDLPS 580 Academic Governance and Collective Bargaining in Higher Education (3) Explores the concept and operation of collective bargaining in higher education: its origin; the reasons for its growing popularity as a governance mechanism; the legal framework within which it operates; the rights, powers, and duties subsumed under its operation; and its relationship to the traditional form of faculty governance mechanisms.

EDLPS 581 Higher Education and the Law (3) Legal implications of university operations and an explanation of the legal and constitutional rights of students, faculty, and staff within the university. Special attention given to faculty employment and termination decisions; student protections, including due process; and university liabilities.

EDLPS 583 Higher Education and the Law (3) Legal implications of university operations and an explanation of the legal and constitutional rights of students, faculty, and staff within the university. Special attention given to faculty employment and termination decisions; student protections, including due process; and university liabilities.

EDLPS 584 Special Topics in Higher Education (1-6, max. 15) Readings, lectures, and discussions pertaining to significant topics of special and current interest to educators. Topics vary; check Time Schedule for topic(s) to be covered.

EDLPS 585 Resource Allocation in Higher Education (3) After attention to the basic tools of economic analysis, focus is on application of those tools to specific topics in higher education (e.g., access, budgeting, finance and policies, and funding alternatives).

EDLPS 586 Seminar in Teaching and Learning in Higher Education (3, max. 9) Theory and practice of instruction and learning in higher education.

EDLPS 587 Seminar in Administration of Community Colleges (3) For students preparing for administrative positions in community colleges. Principles and practices in organization and administration of community colleges.

EDLPS 588 The Community College (3) Intensive study of the community college—its history and present and future status. Curriculum, instruction, financial, and governance issues are also discussed.

EDLPS 589 Student Populations and Experiences in Higher Education (3) Examines foundational literature dealing with students in higher education. Primary focus is on how students change during college, how they make choices and decisions, what roles institutional climate and structure play in the students' experiences, and what impact college has on students.

EDLPS 590 Higher Education and Public Policy (3) Covers public policy processes affecting higher education. Issues concerned vary, but typically include fiscal context of higher education policy, access, equity, distance learning, and accountability policies.

Higher Education Equity, Reform, and Policy (3) Develops the critical and analytical lens that students apply to public policy issues as they directly relate to higher education in the United States. Offered: Sp.

EDLPS 591 Higher Education and Public Policy (3) Examines the meaning of policy design and implementation, particularly what researchers and practitioners define as good assessment and evaluation approaches. Develops competencies in planning assessment and evaluation strategies using these approaches.

EDLPS 592 Higher Education and the Law (3) Legal implications of university operations and an explanation of the legal and constitutional rights of students, faculty, and staff within the university. Special attention given to faculty employment and termination decisions; student protections, including due process; and university liabilities.

EDLPS 593 Higher Education and the Law (3) Legal implications of university operations and an explanation of the legal and constitutional rights of students, faculty, and staff within the university. Special attention given to faculty employment and termination decisions; student protections, including due process; and university liabilities.

EDLPS 594 Special Topics in Higher Education (1-6, max. 15) Readings, lectures, and discussions pertaining to significant topics of special and current interest to educators. Topics vary; check Time Schedule for topic(s) to be covered.

EDLPS 595 Independent Studies in Education (1-10, max. 10) Registration must be
accompanied by a study prospectus endorsed by the appropriate faculty adviser for the work proposed, and which with permission of the instructor, must be filed with the Office of Leadership and Policy Studies in the College of Education. Prerequisite: permission of instructor.

EDPSY 600 Independent Study or Research (*) Registration must be accompanied by a study prospectus endorsed by the appropriate faculty adviser for the work proposed, and which with permission of the instructor, must be filed with the Office of Leadership and Policy Studies in the College of Education. Credit/No credit only. Prerequisite: permission of instructor.

EDPSY 601 Internship (1-4, max. 12) Name of faculty member responsible for supervising the student should be indicated on program of studies. Credit/No credit only. Prerequisite: permission of Supervisory Committee chairperson or graduate program adviser.

**Educational Psychology**

EDPSY 228 Learning Motivation in Contexts (5) I&S How people learn and remember, what motivates them to learn, and how learning and motivation are shaped by social contexts in homes, school, and communities. Cognitive and socio-cultural theories of learning and motivation (including distributed cognition, goal theories, self-determination theory, and interest theories), especially as related to college learners.

EDPSY 304 Educational Psychology (5) Human learning in the educational setting. Cognition, development, learning, motivation, affective processes, and socialization. Emphasis on skills in influencing classroom learning and discipline. Open to students in the Music Education program or by permission of instructor. Offered: A.

EDPSY 431 Strategies for Classroom Research and Evaluation (5) Techniques and strategies for the design and implementation of studies of classroom instruction. Directed toward classroom teachers as consumers of instructional research and as evaluators in their own classrooms. Credit/No credit only.

EDPSY 447 Principles of Guidance (3) Study of guidance programs in elementary and secondary schools. Attention is given to the roles of specialists with emphasis on the role of the classroom teacher in school guidance programs. This course is designed for teachers, administrators, and prospective teachers.

EDPSY 449 Laboratory in Educational Psychology (2-6, max. 6) Special studies for counselors, teachers, administrators, and others concerned with student personnel and psychological services in schools and colleges. The course focuses on special topics that have either local or contemporary significance.

EDPSY 471 Educational Neuropsychology (5) Berninger Covers brain imaging technologies; micro- and macro-structure and function; brain development, and functional brain systems for reasoning, writing, and math and their developmental and instructional links. Recommended: prior course on learning.

EDPSY 490 Basic Educational Statistics (3) Measures of central tendency and variability, point and interval estimation, linear correlation, hypothesis testing. Offered: AWSpS.

EDPSY 495 Introduction to Educational Measurement (3) Practical understanding of test reliability, validity, and derived scores as they apply to external educational assessments; concepts of criterion and norm-referenced testing; review of group administered norm-referenced and criterion-referenced tests and/or testing programs; test interpretation; issues and ethics in large scale assessment. Prerequisite: EDPSY 490. Offered: W.

EDPSY 499 Undergraduate Research (*) Students developing studies under this rubric should be advised that a report or a paper setting forth the results of their investigations should be regarded as a basic part of the program. Offered: AWSpS.

EDPSY 500 Field Study (*) Individual study of an educational problem in the field under the direction of a faculty member. Prerequisite: approved plan of study and permission of the instructor must be filed in the Office of Educational Psychology in the College of Education. Offered: AWSpS.

EDPSY 501 Human Learning and Educational Practice (3) Systematic examination of current research about human learning in educational settings, including the study of behavioral, information processing, social construction, and the developmental perspectives on learning. Prerequisite: graduate standing. Offered: AWSpS.

EDPSY 502 Developmental Foundations of Early Learning (3) Perceptual-motor, language, and overall cognitive development in children from birth through primary-school age. Emphasis on Piagetian and Vygotskian approaches to development with a special focus on the connections between learning and development. Field-based course projects may be required. Prerequisite: EDPSY 501 or permission. Offered: Sp.

EDPSY 503 Theories of Intelligence (3) Reading and discussion of theoretical and research papers from the extensive literature on Piagetian and Vygotskian approaches to understanding processing conceptions of intelligence. A historical approach to the topic is followed by analysis of current writings on intelligence and its measurement. Credit/No credit only. Prerequisite: EDPSY 501 and graduate status in education or psychology. Offered: alternate years; W.

EDPSY 505 Instructional Theory (3) Sources, current state, and utility of prescriptive instructional theories with emphasis upon theories having a potential for guiding the design of instruction. Prerequisite: EDPSY 501 or equivalent.

EDPSY 507 Reading, Writing, and Arithmetic: Educational Assessment and Consultation (5) Students administer and interpret tests of reading, writing, arithmetic, and related developmental skills; integrate test, observational, and portfolio information in staffings and written reports; and consult with teachers regarding instructional interventions. Prerequisite: graduate standing in the school psychology specialization and permission of instructor. Offered: A.

EDPSY 508 Clinical Supervision-PRACTICUM (2-6, max. 12) Practicum in supervising counseling, group counseling, diagnostic activities, and remedial academic therapy. Prerequisite: advanced graduate standing in School Psychology. Offered: AWSpS.

EDPSY 509 Educational Issues in Human Development (5) Human development theories and models. Educational implications of theory, methodology, and application. Current research complements the historical antecedents of current practice. Age range covered varies as function of current issues in professional literature. Prerequisite: 15 credits in educational psychology or psychology. Offered: alternate years; W.

EDPSY 510 Cognition in the Context of the School Curriculum (3) Contemporary issues and trends in human learning, with a focus on reasoning within subject-matter areas such as mathematics, history, and science. Prerequisite: EDPSY 501 or equivalent. Offered: alternate years.

EDPSY 511 Seminar in Applied Educational Psychology (1, max. 6) Designed for graduate students in educational psychology. Applications of theoretical constructs to particular problems encountered in school counseling, practice.

EDPSY 512 Classroom Assessment Strategies (3) Development and evaluation of traditional, observational, essay, performance-based, portfolio assessments and grading models as they are used in classroom assessment; some review of current research on classroom-based assessment; classroom assessment ethics.

EDPSY 513 Instrument Development (3) Instrument development techniques including construct development, test and item specifications, item writing, planning for reliability and validity studies; ethics in test administration and interpretation. Intended for doctoral or masters students to develop instruments for their own research. Prerequisite: EDPSY 490 or equivalent.

EDPSY 518 Assessment and Diagnosis of Reading Disabilities (3) Techniques for individual assessment of students with reading difficulties (K-12) including formal assessment using standard assessment tools and informal diagnostic testing. Appropriate for classroom teachers, reading specialists, and school psychologists. Includes conducting and analyzing case studies. Prerequisite: EDCI 460, EDCI 462, other reading courses, or permission of instructor. Offered: alternate years; Sp.

EDPSY 519 Jategheasen Vulnerable Children and Families in Comparative Perspective: Psychosocial Development Processes (3) Research and theory examining the effects of disability, poverty, trauma and immigration and its impact on child development across cultures, effective interventions in educational and non-educational settings, and the consequences of critical issues in the context of psycho-social and development processes in different cultural and international contexts. Offered: Sp.

EDPSY 520 Psychology of Reading (3) Reviews current empirical research on cognitive processes in reading, including word and sub-word processes, syntax and comprehension, reading and perception, word recognition, concept development and meaning in reading, psychology of reading interests and skills. Prerequisite: EDPSY 501 or equivalent. Offered: alternate years.
EDPSY 521 Psychology of Writing (3)  Examines writing as a cognitive process and reviews current empirical research on writing, emphasizing primarily studies from a psychological perspective. Explores both developmental differences and individual differences in writing skills, together with instructional implications. Prerequisite: EDPSY 501 or equivalent. Offered: alternative years.

EDPSY 522 Reading Disability Clinic (3-5)  Supervised practicum in diagnosis and remediation of reading disabilities. Prerequisite: EDTEP 532, EDTEP 533 or equivalent; EDC&I 460 or permission of instructor.

EDPSY 523 Foundations of Ethnographic Research (3)  Jegaethesan Exploration of the main components of ethnographic endeavor. Students conduct ethnographic research including field entry, observing, listening, data analysis, and writing; typical issues and quandaries encountered in carrying fieldwork in a variety of settings, ethical issues, comprehension, intrusion, and access, experience and empathy, and power dynamics, and predication. Offered: A.

EDPSY 524 Problem Solving and Critical Thinking in Education (3)  Study of the classic and contemporary research literature concerned with human problem solving and critical thinking with emphasis upon applications to educational practice and further research. Prerequisite: EDPSY 501 or equivalent.

EDPSY 525 Creativity and Education (3)  Study of the classic and contemporary research literature about creativity with emphasis upon applications to educational practice, evaluation of strategies to promote creativity in the schools, and further research. Prerequisite: EDPSY 501 or equivalent.

EDPSY 526 Seminar on Metacognition (3)  Students read and discuss theoretical and research papers from the extensive literature on metacognition. Focuses on defining the concept of metacognition, establishing its range of applicability to educational matters, and becoming familiar with excellent examples of metacognitive research. Prerequisite: graduate status in education or psychology and permission of instructor.

EDPSY 527 Transfer of Learning (3)  Students read and discuss a representative sample of theoretical and research papers from extensive literature on teaching to promote transfer of what students learn to non-teaching environments. Historical approach to the topic is followed by analysis of current writings on transfer. Credit/no credit only. Prerequisite: EDPSY 501 and graduate status in education or psychology.

EDPSY 528 Achievement Motivation in Education (3)  Critical review of current research and major theories of achievement motivation in schools and other educational settings. Emphasis on the relationship of theories to the contexts and practice of education. Prerequisite: EDPSY 501 or permission of instructor. Offered: W.

EDPSY 530 Vygosky’s Socio-Cultural Approach to Mind (5)  Herrenkoh! Critical reading and discussion of the work of L.S. Vygotsky as well as contemporary psychologists and educators who have investigated cognition in social context. Discusses the implications of these approaches for the design of learning environments. Prerequisite: EDPSY 501. Offered: A.

EDPSY 531 Socialization of School-Age Children (3)  Study of personal social development and behavior from preschool ages through adolescence. Developmental theory and research are examined as the socialization influences of parents and peers and on such topics as aggression, emotional regulation, and social cognition. Prerequisite: EDPSY 501 or equivalent. Offered: W.

EDPSY 532 Adolescence and Youth (3)  Developmental processes and patterns examined with major theoretical and current research themes from behavioral sciences as applied to middle school and senior high students. Educational issues, social problems associated with adolescence in Western culture. Prerequisite: EDPSY 501 or equivalent.

EDPSY 533 Current Research in Adolescence (3)  Contemporary trends and patterns of adolescent research are examined with emphasis upon theoretical foundations, contrasting methodologies, and implications for further research. Exemplary studies and integrative reviews of research on adolescence are featured. Prerequisite: EDPSY 532 and EDPSY 501 or equivalents.

EDPSY 534 School Problems of Adolescence (3)  Study of the classic, contemporary, and emerging school problems of school age youth with emphasis upon problem solving strategies for educators and associated youth service personnel. Includes problems of academic achievement, interpersonal relations, and social deviancy in the schools. Prerequisite: EDPSY 532 or equivalent.

EDPSY 535 Education and the Highly Capable Learner (3)  Examination of major issues and problems in study and nurturance of highly capable children and youth in the educational setting. Emphasis placed on contributions of theory and research to educational problem solving for multiple aspects of advanced human capacity. Prerequisite: EDPSY 501 or equivalent.

EDPSY 536 Immigrant and Indigenous Children: Social Context of Learning (3)  Focuses on the broad context of family, school and society of immigrant and indigenous young children in the United States. Introduces the complex interplay of socio-cultural and psychological factors that impact these children’s learning. Offered: W.

EDPSY 540 School Psychological Assessment (5)  Study of assessment of human intelligence with supervised training in the administration, scoring, and interpretation of individual intelligence tests with emphasis on Stanford-Binet and Wechsler scales. Prerequisite: Graduate standing in the school psychology specialization and permission of instructor. Offered: A.

EDPSY 541 Group Tests in Counseling (5)  Emphasis on the utilization of objective measures in counseling. Prerequisite: EDPSY 490 or equivalent. Offered: Sp.

EDPSY 542 Career Development (3)  Emphasis on vocational development theory and research. Psychological, social, and economic determinants of vocational development and choice are examined as a basis for vocational counseling. Prerequisite: graduate standing or permission of instructor.

EDPSY 543 Facilitating Career Development (3)  Theory and practice in exploring, self-identified strengths, interests, resources, and other considerations when developing career plans. Emphasizes career development in the schools. Offered: Sp.

EDPSY 544 Counseling (5)  Emphasis on the theory and practice of counseling. Prerequisite: standing in School Psychology or permission of instructor.

EDPSY 545 Prepracticum (3-5)  Supervised practice in counseling. Prerequisite: EDPSY 545 or permission of instructor. Offered: WSp.

EDPSY 546 Educational Implications of Personality Theory (5)  Study of personality development and personality theories with continuous attention to the meaning of these in educational practice, testing, and counseling. Prerequisite: 15 credits of psychology or educational psychology. Offered: A.

EDPSY 549 Seminar in Consultation Methods (3)  Theory and practice of process consultation in educational settings. Field practice in teams with clients. Prerequisite: graduate standing in School Psychology or permission of instructor. Offered: W.

EDPSY 550 Family Counseling (3)  Introduction to family counseling theory and practice, emphasizing family dynamics and communication analysis. Prerequisite: graduate standing in school psychology or permission of instructor. Offered: W.

EDPSY 551 Group and Behavioral Intervention (3)  Introduction to competency-based skills for beginning school psychologists. Includes basic processes of group management skills with children including group process in social skills training, problem-solving techniques, behavioral principles, and parent training. Prerequisite: EDPSY 545 or course in counseling techniques or permission of instructor. Offered: Sp.

EDPSY 552 Multicultural Issues in School Counseling and School Psychology (3)  Examination of multicultural issues as they relate to the delivery of services provided by school counselors and school psychologists. Theoretical and applied aspects emphasized and case study format utilized. Prerequisite: graduate standing in School Psychology or permission of instructor. Offered: Sp.

EDPSY 555 Seminar in Counseling Specialty (1-2, max. 6)  Oriented toward the role of a counselor as a professional worker. Credit/no credit only. Offered: ASp.

EDPSY 560 Advanced Practicum in Personality Assessment (3)  Jones Designed for doctoral level school psychologists to learn advanced personality assessment for diagnosis of
EDPSY 567 Critical Readers in Educational Research (5) Examination of documents by selected contributors to the field of educational psychology, special focus on period from mid-nineteenth century to the late twentieth century. Prerequisite: graduate standing.

EDPSY 568 Critical Readers in Educational Psychology (3) Examination of documents by selected contributors to the field of educational psychology, special focus on period from mid-nineteenth century to the late twentieth century. Prerequisite: graduate standing.

EDPSY 569 Critical Readers in Educational Psychology (1-5, max. 15) Advanced seminar on selected topics in educational psychology. A critical appraisal of current research. Prerequisite: advanced degree work in educational psychology. Offered: A.W.

EDPSY 570 Seminar on Social-Emotional Assessment (3) Seminar on social-emotional assessment of school-aged children. Diagnostic systems including DSM IV presented in conjunction with assessment techniques. Emphasis on integrative method for understanding social emotional assessment batteries and reliability and validity of their test score interpretation. Prerequisite: graduate standing in school psychology or permission of instructor. Offered: A.

EDPSY 571 Seminar on Social-Emotional Assessment (3) Seminar on social-emotional assessment of school-aged children. Diagnostic systems including DSM IV presented in conjunction with assessment techniques. Emphasis on integrative method for understanding social emotional assessment batteries and reliability and validity of their test score interpretation. Prerequisite: graduate standing in school psychology or permission of instructor. Offered: A.

EDPSY 572 Seminar on Social-Emotional Assessment (3) Seminar on social-emotional assessment of school-aged children. Diagnostic systems including DSM IV presented in conjunction with assessment techniques. Emphasis on integrative method for understanding social emotional assessment batteries and reliability and validity of their test score interpretation. Prerequisite: graduate standing in school psychology or permission of instructor. Offered: A.

EDPSY 573 Seminar on Social-Emotional Assessment (3) Seminar on social-emotional assessment of school-aged children. Diagnostic systems including DSM IV presented in conjunction with assessment techniques. Emphasis on integrative method for understanding social emotional assessment batteries and reliability and validity of their test score interpretation. Prerequisite: graduate standing in school psychology or permission of instructor. Offered: A.

EDPSY 574 Seminar on Social-Emotional Assessment (3) Seminar on social-emotional assessment of school-aged children. Diagnostic systems including DSM IV presented in conjunction with assessment techniques. Emphasis on integrative method for understanding social emotional assessment batteries and reliability and validity of their test score interpretation. Prerequisite: graduate standing in school psychology or permission of instructor. Offered: A.

EDPSY 575 Seminar on Social-Emotional Assessment (3) Seminar on social-emotional assessment of school-aged children. Diagnostic systems including DSM IV presented in conjunction with assessment techniques. Emphasis on integrative method for understanding social emotional assessment batteries and reliability and validity of their test score interpretation. Prerequisite: graduate standing in school psychology or permission of instructor. Offered: A.

EDPSY 576 Seminar on Social-Emotional Assessment (3) Seminar on social-emotional assessment of school-aged children. Diagnostic systems including DSM IV presented in conjunction with assessment techniques. Emphasis on integrative method for understanding social emotional assessment batteries and reliability and validity of their test score interpretation. Prerequisite: graduate standing in school psychology or permission of instructor. Offered: A.

EDPSY 577 Seminar on Social-Emotional Assessment (3) Seminar on social-emotional assessment of school-aged children. Diagnostic systems including DSM IV presented in conjunction with assessment techniques. Emphasis on integrative method for understanding social emotional assessment batteries and reliability and validity of their test score interpretation. Prerequisite: graduate standing in school psychology or permission of instructor. Offered: A.

EDPSY 578 Seminar on Social-Emotional Assessment (3) Seminar on social-emotional assessment of school-aged children. Diagnostic systems including DSM IV presented in conjunction with assessment techniques. Emphasis on integrative method for understanding social emotional assessment batteries and reliability and validity of their test score interpretation. Prerequisite: graduate standing in school psychology or permission of instructor. Offered: A.

EDPSY 579 Seminar on Social-Emotional Assessment (3) Seminar on social-emotional assessment of school-aged children. Diagnostic systems including DSM IV presented in conjunction with assessment techniques. Emphasis on integrative method for understanding social emotional assessment batteries and reliability and validity of their test score interpretation. Prerequisite: graduate standing in school psychology or permission of instructor. Offered: A.

EDPSY 580 Seminar on Social-Emotional Assessment (3) Seminar on social-emotional assessment of school-aged children. Diagnostic systems including DSM IV presented in conjunction with assessment techniques. Emphasis on integrative method for understanding social emotional assessment batteries and reliability and validity of their test score interpretation. Prerequisite: graduate standing in school psychology or permission of instructor. Offered: A.

EDPSY 581 Seminar on Social-Emotional Assessment (3) Seminar on social-emotional assessment of school-aged children. Diagnostic systems including DSM IV presented in conjunction with assessment techniques. Emphasis on integrative method for understanding social emotional assessment batteries and reliability and validity of their test score interpretation. Prerequisite: graduate standing in school psychology or permission of instructor. Offered: A.

EDPSY 582 Seminar on Social-Emotional Assessment (3) Seminar on social-emotional assessment of school-aged children. Diagnostic systems including DSM IV presented in conjunction with assessment techniques. Emphasis on integrative method for understanding social emotional assessment batteries and reliability and validity of their test score interpretation. Prerequisite: graduate standing in school psychology or permission of instructor. Offered: A.

EDPSY 583 Seminar on Social-Emotional Assessment (3) Seminar on social-emotional assessment of school-aged children. Diagnostic systems including DSM IV presented in conjunction with assessment techniques. Emphasis on integrative method for understanding social emotional assessment batteries and reliability and validity of their test score interpretation. Prerequisite: graduate standing in school psychology or permission of instructor. Offered: A.

EDPSY 584 Seminar on Social-Emotional Assessment (3) Seminar on social-emotional assessment of school-aged children. Diagnostic systems including DSM IV presented in conjunction with assessment techniques. Emphasis on integrative method for understanding social emotional assessment batteries and reliability and validity of their test score interpretation. Prerequisite: graduate standing in school psychology or permission of instructor. Offered: A.

EDPSY 585 Seminar on Social-Emotional Assessment (3) Seminar on social-emotional assessment of school-aged children. Diagnostic systems including DSM IV presented in conjunction with assessment techniques. Emphasis on integrative method for understanding social emotional assessment batteries and reliability and validity of their test score interpretation. Prerequisite: graduate standing in school psychology or permission of instructor. Offered: A.

EDPSY 586 Seminar on Social-Emotional Assessment (3) Seminar on social-emotional assessment of school-aged children. Diagnostic systems including DSM IV presented in conjunction with assessment techniques. Emphasis on integrative method for understanding social emotional assessment batteries and reliability and validity of their test score interpretation. Prerequisite: graduate standing in school psychology or permission of instructor. Offered: A.

EDPSY 587 Seminar on Social-Emotional Assessment (3) Seminar on social-emotional assessment of school-aged children. Diagnostic systems including DSM IV presented in conjunction with assessment techniques. Emphasis on integrative method for understanding social emotional assessment batteries and reliability and validity of their test score interpretation. Prerequisite: graduate standing in school psychology or permission of instructor. Offered: A.

EDPSY 588 Seminar on Social-Emotional Assessment (3) Seminar on social-emotional assessment of school-aged children. Diagnostic systems including DSM IV presented in conjunction with assessment techniques. Emphasis on integrative method for understanding social emotional assessment batteries and reliability and validity of their test score interpretation. Prerequisite: graduate standing in school psychology or permission of instructor. Offered: A.

EDPSY 589 Seminar on Social-Emotional Assessment (3) Seminar on social-emotional assessment of school-aged children. Diagnostic systems including DSM IV presented in conjunction with assessment techniques. Emphasis on integrative method for understanding social emotional assessment batteries and reliability and validity of their test score interpretation. Prerequisite: graduate standing in school psychology or permission of instructor. Offered: A.

EDPSY 590 Seminar on Social-Emotional Assessment (3) Seminar on social-emotional assessment of school-aged children. Diagnostic systems including DSM IV presented in conjunction with assessment techniques. Emphasis on integrative method for understanding social emotional assessment batteries and reliability and validity of their test score interpretation. Prerequisite: graduate standing in school psychology or permission of instructor. Offered: A.

EDPSY 591 Seminar on Social-Emotional Assessment (3) Seminar on social-emotional assessment of school-aged children. Diagnostic systems including DSM IV presented in conjunction with assessment techniques. Emphasis on integrative method for understanding social emotional assessment batteries and reliability and validity of their test score interpretation. Prerequisite: graduate standing in school psychology or permission of instructor. Offered: A.
EDPSY 592 Advanced Educational Measurements (3) Theory of measurement; an examination of assumptions involved in test theory, errors of measurement, factors affecting reliability and validity, and item analysis and standards for educational and psychological tests. Prerequisite: EDPSY 490. Offered: Sp.

EDPSY 593 Experimental Design and Analysis (5) Experimental design with emphasis on the analysis of variance. Prerequisite: EDPSY 490 or equivalent. Offered: W.

EDPSY 594 Advanced Correlational Techniques (5) Multivariate analysis, including regression and multiple correlation; matrix algebra; factor analysis. Prerequisite: EDPSY 490 or equivalent. Offered: Sp.

EDPSY 595 Item Response Theory Models of Testing (3) In depth exploration of IRT models and their roles in the development of large scale educational and psychological tests. Prerequisite: EDPSY 490 or equivalent, EDPSY 592, EDPSY 594.

EDPSY 596 Program Evaluation (3) Advanced course in evaluation research emphasizing nontraditional designs, especially those that impose severe ecological constraints on the evaluator. Prerequisite: EDPSY 593, EDPSY 594, EDCI 597, or permission of instructor.

EDPSY 597 Technical Requirements of Large Scale Tests (3) Theoretical and practical understanding of the quantitative aspects of large-scale tests, including: scaling, norms development, and the development of derived and interpretive scores, evidence for validity and reliability. Prerequisite: EDPSY 490 or equivalent, EDPSY 592, EDPSY 595.

EDPSY 599 Independent Studies or Readings of Education (*) Independent studies or readings of specialized aspects of education. Offered: A/WSpS.

EDPSY 600 Independent Study or Research (*) Prerequisite: permission of instructor. required. Offered: A/WSpS.

EDPSY 601 Internship (3-10, max. 10) Offered: A/WSpS.

Special Education

EDSPE 404 Exceptional Children (3) Edgar Children with disabilities studied from the point of view of education.

EDSPE 414 Introduction to Early Childhood Special Education (3) Schwartz Provides students with a comprehensive overview of major aspects of the field of early childhood special education. Theoretical foundations and program development and implementation are presented in an approach that integrates theory, research, and practice. Offered: W.

EDSPE 419 Interventions for Families of Children with Disabilities (3) Upper-division course for professionals and paraprofessionals working with families of children with disabilities.

EDSPE 490 Undergraduate Research (2-5, max. 5) Students developing studies under this rubric should be advised that a report or a paper setting forth the results of their investigations should be regarded as a basic part of the program. Offered: A/WSpS.

EDSPE 500 Field Study (1-6, max. 6) Individual study of an educational problem in the field under the direction of a faculty member. Prerequisite: approved plan of study and permission of the instructor. Offered: A/WSpS.

EDSPE 502 Collaboration: Working with Parents and Professionals (3) Sandall Provides students with knowledge and skills for working collaboratively with other professionals, family members, and paraeducators. Focus is on the role of the special educator in forming and sustaining school, family, and community partnerships. Offered: WS.

Classroom Management for Elementary School Educators (2-3, max. 4) Examines how to set up effective classrooms to facilitate learning and the development of social behaviors. Focuses on strategies for effectively managing whole group (classroom) and individual behavior of students in the context of public schools.

EDSPE 504 Special Education and the Law (3) Brown Overview of major state and federal laws affecting the education and management of special education programs in public schools. Emphasis on procedural and substantive rights of children with disabilities. Offered: jointly with EDLP 516; W.

EDSPE 505 Curriculum Development of Students with Moderate to Severe Disabilities (3) Addresses issues and practices in the development of appropriate curriculum and accessing the general education curriculum for students with moderate to profound disabilities in educational settings. Topics include: assessing general education curriculum, inclusion, and development of IEPs.

EDSPE 506 Classroom Management of the Physical Problems of Individuals with Severe or Profound Disabilities (3) Overview and practices of physical management of students with severe or profound disabilities. Topics include principles of typical and atypical motor development, positioning, handling, use of adaptive equipment, and issues regarding the educational implications of students with medical and chronic illness.

EDSPE 507 Instructional Methods for Students with Moderate to Severe Disabilities (3) Davis Details a systematic instructional process for the education of students with moderate to severe or profound disabilities. Includes instructional methods and materials designed to promote the development of skills that are required in school, home, and community settings, and to reduce challenging behaviors.

EDSPE 510 Behavioral Measurement and Management in the Classroom (3) Response measurement in the classroom; use of data analysis for instructional decisions and behavior management for children with disabilities. Offered: A.

EDSPE 511 Methods of Applied Behavior Analysis Research (3) Schwartz Characteristics of applied behavior analysis are presented: direct, daily measurement, and the systematic investigation of important variables. Representative studies from various applied situations are discussed in terms of dependent and independent variables, research design, reliability, validity, and data analysis. Prerequisite: EDSPE 510 or equivalent preparation. Offered: WS.

EDSPE 513 Principles of Clinical Appraisal for Teachers of Exceptional Children (3) Jenkins Diagnostic instruments used in the clinical appraisal of exceptional children. Theoretical and measurement considerations are used to buttress practical experiences in appraisal related to eligibility and intervention. Offered: A.

EDSPE 514 Fundamentals of Reading for Children with Disabilities (3) Jenkins Emphasis on basic prereading and reading skills, such as phonics and structural analysis, specifically for the disabled child. Acquisition of comprehension skills by the disabled. Diagnosis of reading problems, published materials appropriate for children with disabilities, material modification. Offered: W.

EDSPE 515 Problems and Issues in Special Education (3, max. 9) Intensive examination of the issues pertinent to special education, such as legislation, interdisciplinary functions, and the role of special education in general education and placement practices. Offered: Sp.

EDSPE 517 Practicum in Research Design and Analysis in Special Education (1-4, max. 10) Critical analysis of current research in special education and related fields serves as background for designing applied research projects. Projects are examined, evaluated, and revised in seminar discussion. Prerequisite: EDPSY 490 and EDSPE 591 or equivalent and permission of instructor. Offered: A/WSpS.

EDSPE 518 Seminar in Special Education Research (1-3, max. 9) Designed for doctoral students in special education during their first year of residency. Each candidate selects a dissertation problem and submits a proposal. Topics such as the procurement of subjects, the reporting and communication of research findings, and the evaluation of research are stressed. The seminar leads to the evolution of a viable dissertation proposal. Credit/no credit only. Offered: A/WSp.

EDSPE 520 Seminar in Applied Special Education (1-12, max. 12) Designed for graduate students in special education. Focus on contemporary topics relating to the application of the theoretical constructs to special education. Offered: A/WSp.

EDSPE 521 Communication and Language in Young Exceptional Children (3) Review and discussion of theories of language acquisition as they relate to communication and language in young children with special needs. Review of research of language environments that relate to early literacy and education and how to use this information to modify environments for children with special needs. Offered: jointly with EDPSY 519; W.

EDSPE 522 Seminar on the Education of Students with Severe Disabilities (3) White Advanced graduate seminar arranged to study and discuss the essential components of providing a comprehensive approach to the identification and education of infants, children, adolescents, and young adults with severe disabilities. Offered: Sp.

EDSPE 523 Specific Numeracy Techniques for Elementary Students with Mild Disabilities (3) Neel Provides the teacher with specific techniques for teaching numeracy to elementary students with mild disabilities in inclusive settings. Prerequisite: EDTEP 522 or equivalent. Offered: SpS.
EDSPE 524 Functional Behavioral Assessment (3) Provides a solid foundation in the theory and practice of functional behavioral assessment (FBA). FBA is a required practice under special education law and considered a best practice for students with challenging behavior.

EDSPE 525 Educating Students with Autism or Severe Behavior Disorders (3) Schwartz Consideration of the identification, etiology, education, and outcomes of individuals with Autism Spectrum Disorder. Offered: Sp.

EDSPE 526 Techniques for Instructing Social Behaviors for Elementary Students with Mild Disabilities (3) Cheney Provides prospective and practicing teachers with foundational theory and knowledge to select specific techniques to promote social competency in elementary children with mild disabilities. Discusses research related to use of these techniques and interventions. Develops schoolwide, classroom, and individual plans for teaching social skills. Offered: Asp.

EDSPE 528 Inquiry and Methods in Writing Instruction (3) Covers methods of assessment and teaching written composition, spelling, and handwriting to children and youth with, and without, disabilities. Particular attention is given to how to establish a strong writing program in elementary classrooms and how to teach writing strategies. Offered: jointly with EDCI 536; Sp.

EDSPE 541 Education of Children with Behavior Disorders (3) New Introductory course covering characteristics of and educational practices for children with emotional/behavioral disabilities. Reviews theory, definitional issues, models, assessment, and instructional methods for educating children with emotional and behavioral disorders. Students develop a working knowledge of educational approaches for teaching students with emotional/behavioral disabilities. Offered: alternate years; W.

EDSPE 545 Instructional Modifications for the Education of Children with Mild Disabilities (3) In-depth analysis and application of several modifications of instructional techniques necessary for the education of students with mild disabilities. Offered: W.

EDSPE 546 Seminar in Educating Children with Behavior Disorders (3, max. 9) Cheney Advanced-level seminars focus on contemporary research topics relating to the effective education of children with serious behavior disorders. Students analyze and review research pertinent to the chosen topics and prepare a scholarly manuscript for dissemination. Offered: alternate years; W.

EDSPE 548 Special Topics in the Education of the Learning Disabled (3, max. 12) In-depth analysis of empirical findings in the specialty of learning disabilities with focus on the synthesis of research findings and their application to the educational environment. A paper suitable for publication required. Prerequisite: course in learning theory, introductory course in learning disabilities, or equivalent preparation.

EDSPE 551 Educational Assessment of Young Children with Special Needs (3) Special standardized and educational measurement and evaluation procedures for use with young children with a variety of disabling conditions. Observation, ecological assessment, and programming strategies are discussed in combination with practical application of the skills within an educational framework. Offered: A.

EDSPE 552 Curricula for Preschool Children with Disabilities (3) Sandall Basic theoretical models and approaches to curricula for preschoolers with disabilities. Critical review of preschool curricula, standards and benchmarks. Strategies for critiquing, evaluating, and adapting curricula.

EDSPE 553 Issues in Working with Families of Students with Disabilities (3) Explores issues, theories, models, research, and recommended practices related to family-professional relationships in special education. Explores the dynamics of interactions with families including roles and responsibilities, decision-making, communication, and collaboration. Offered: W.

EDSPE 555 Seminar: Early Childhood Education for Children with Mild Disabilities (3, max. 9) Sandall, Schwartz Advanced seminar on early childhood education for infants and young children with disabilities. Historical and current research from special education and related fields reviewed with regard to their application to the education of young children with disabilities.

EDSPE 565 Current Research in Early Childhood Special Education (2, max. 6) Explores theory, research, and practice in early intervention with infants, toddlers, and their families. Topics include typical and atypical development, assessment, curriculum, and intervention strategies.

EDSPE 599 Independent Studies in Education (1-3, max. 15) Independent studies or readings of specialized aspects of education. Registration must be accompanied by a study prospectus endorsed by the appropriate faculty adviser for the work proposed. Offered: A/W/S.

EDSPE 600 Independent Study or Research (1-3) Registration must be accompanied by a study prospectus endorsed by the appropriate faculty adviser for the work proposed. Offered: A/W/S.

EDSPE 601 Internship (1-10) Prerequisite: graduate standing and permission based on prearrangement of internship placement and approval by adviser. Offered: A/W/S.

Teacher Education Program

EDTEP 501 Community-Based Field Experience (2-10, max. 15) Field experience and group discussions accompanying the first quarter of sophomore year. Prerequisite: Elementary Teacher Education Program. Field experience in Community Based Organizations. Credit/no credit only. Prerequisite: elementary TEP student.

EDTEP 502 Second Quarter Field Experience — Elementary (2-10, max. 15) Field experience accompanying the second quarter of study in the Elementary Teacher Education Program. Offered: A.
EDTEP 533 Teaching and Learning in Literacy III (3) Introduces participants to the content and process of literacy learning in elementary school. Study of abilities needed for effective literacy use, instructional strategies to help children acquire these abilities, and assessment strategies to evaluate student progress. Prerequisite: elementary TEP student.

EDTEP 541 Dilemmas of Teaching and Learning in Elementary School (4) Covers human learning in the elementary school setting with emphasis on discipline-specific cognition and cognitive development. Prerequisite: elementary TEP student.

EDTEP 542 Meeting the Needs of All Students-Elementary (3) Overview of physical, cognitive, and social development of elementary school age children. Discussion of ways in which differences in development may affect children in school. Provides elementary teachers with understanding of how to facilitate the success of all children in general education classrooms. Prerequisite: elementary TEP student.

EDTEP 543 Teaching and Learning in Social Studies.(3) Strategies for teaching social studies and the arts through integrated thematic units of curriculum and instruction. Prerequisite: elementary TEP student.

EDTEP 544 Differentiated Instruction (2-, max. 8) Hudson, Varghese Introduction to the concepts and practice of differentiated instruction for children with diverse development-tal, linguistic, and cultural characteristics. Prerequisite: elementary TEP student. Offered: A&S/SPS.

EDTEP 551 Multicultural Teaching (3) Concepts, theories, and strategies that constitute major dimensions of multicultural education. Focus on racial and ethnic groups, social class, and gender. Dimensions of multicultural education examined include content integration, knowledge construction process, prejudice reduction, equity pedagogy, and empowering school culture and social structure. Prerequisite: TEP student.

EDTEP 552 Assessment in Elementary Education (1-2-, max 3) Emphasis on methods of assessment that reinforce understanding of the various disciplines. Includes performance assessments, assessments of student projects and papers, traditional exams, and observational exams. Prerequisite: elementary TEP student.

EDTEP 553 Introduction to Multicultural Education - Elementary (4) Banks, Gay Explores concepts, theories, and strategies that constitute major dimensions of multicultural education. Focuses on racial and ethnic groups, social class, and gender. Examines dimensions of multicultural education including content integration, knowledge construction process, prejudice reduction, equity pedagogy, and empowering school culture and social structure. Prerequisite: elementary TEP student. Offered: SP/SPS.

EDTEP 561 Dilemmas of Teaching and Learning (5) Study of human learning in an educational setting, with an emphasis on learning of school subjects. Topics include nature of learning, knowledge and teaching, motivation, culture, and cognition. Prerequisite: secondary TEP student.

EDTEP 562 Adolescent Development and Education I (3-) Overview of trends and issues of adolescent development and behavior in relation to contemporary secondary schooling. Psychological perspectives on adolescent identity, interpersonal relationships, academic engagement, and social deviancy in schools examined with special attention to classroom management and accommodating differences. Prerequisite: secondary TEP student.

EDTEP 563 Adolescent Development and Education II (-3) Overview of trends and issues of adolescent development and behavior in relation to contemporary secondary schooling. Psychological perspectives on adolescent identity, interpersonal relationships, academic engagement, and social deviancy in schools examined with special attention to classroom management and accommodating differences. Prerequisite: secondary TEP student.

EDTEP 564 Working in Secondary Schools (3) Organizational, personal, and interpersonal aspects of working as a teacher in a secondary school. Preparation for membership and leadership in a learning community and for continuing professional growth. Credit/no credit only. Prerequisite: secondary TEP student.

EDTEP 565 Planning and Teaching an Integrated Curriculum (3) Introduction of models for integrating curriculum, concurrent instructional and assessment strategies, and team planning skills. Provides direct and experiential learning activities and results in production of team-planned curricular units based on two different models of curriculum integration. Prerequisite: secondary TEP student.

EDTEP 571 Topics and Tensions in School and Society (3) Exploration of issues of value and value tension in American schools. Consideration of social values of equality, opportunity, pluralism, and community, historical and contemporary evidence of values in schooling, and how values can conflict in policy and practice. Prerequisite: secondary TEP student.

EDTEP 573 Assessment in Secondary Education (3) Strong emphasis on methods of assessment that reinforce understanding of the various disciplines, including performance assessments, assessments of student projects and papers, traditional exams, and observational exams. Prerequisite: secondary TEP student.

EDTEP 580 Teaching English and Language Arts in Secondary School I (5-) Teaching of English and Language Arts in middle, junior, or senior high school. Prerequisite: secondary TEP student.

EDTEP 581 Teaching English and Language Arts in Secondary School II (-3) Teaching of English and Language Arts in middle, junior, or senior high school. Prerequisite: secondary TEP student.

EDTEP 582 Teaching Mathematics in the Secondary School I (5-) Teaching of mathematics in middle, junior, or senior high school. Prerequisite: secondary TEP student.

EDTEP 583 Teaching Mathematics in the Secondary School II (-3) Teaching of mathematics in middle, junior, or senior high school. Prerequisite: secondary TEP student.

EDTEP 584 Teaching Social Studies in the Secondary School I (5-) Developing, teaching, and evaluating social studies courses on the middle, junior, and senior high school levels. Prerequisite: secondary TEP student.

EDTEP 585 Teaching Social Studies in the Secondary School II (-3) Developing, teaching, and evaluating social studies courses on the middle, junior, and senior high school levels. Prerequisite: secondary TEP student.

EDTEP 586 Teaching Science in the Secondary School I (-5) Teaching of science in middle, junior, or senior high school. Prerequisite: secondary TEP student.

EDTEP 587 Teaching Science in the Secondary School I (-3) Teaching of science in middle, junior, or senior high school. Prerequisite: secondary TEP student.

EDTEP 588 Teaching World Languages I (-5) Introduction to currently used foreign language teaching methods and approaches, including learning and teaching strategies and techniques for the four skills — reading, writing, speaking, listening — and culture. Current and future trends in pedagogy and technology. Prerequisite: secondary TEP student.

EDTEP 589 Teaching World Languages II (-3) Introduction to currently used foreign language teaching methods and approaches, including learning and teaching strategies and techniques for the four skills — reading, writing, speaking, listening — and culture. Current and future trends in pedagogy and technology. Prerequisite: secondary TEP student.

EDTEP 591 First Quarter Field Experience — Secondary (3) Field experience and small group discussions accompanying the first quarter of study in the Secondary Teacher Education Program. Observe school year opening full-time for approximately one month in August and September and two weeks full-time during the quarter in supervised school placements. Credit/no credit only. Prerequisite: secondary TEP student.

EDTEP 592 Second Quarter Field Experience — Secondary (3) Field experience and small group discussions accompanying the second quarter of study in the Secondary Teacher Education Program. Three weeks full-time during the quarter in supervised school placements. Credit/no credit only. Prerequisite: secondary TEP student.

EDTEP 593 Third Quarter Field Experience — Secondary (3) Field experience and small group discussions accompanying the third quarter of study in Secondary Teacher Education Program. Four weeks full-time during the quarter in supervised school placements. Credit/no credit only. Prerequisite: secondary TEP student.

EDTEP 595 Portfolio: Tool for Reflection — Secondary (3) Group discussions fostering integration of course work and field experience through reflection. Using program goals and targets, students illustrate their learning through multiple forms of evidence. Final portfolio is presented to an audience. Related field experience may be arranged. Credit/no credit only. Prerequisite: secondary TEP student.

EDTEP 600 Independent Study or Research (1) Registration must be accompanied by a study prospectus endorsed by the Director of Teacher Education and the faculty adviser for the work proposed. Credit/no credit only.
Aeronautics and Astronautics

A A 101 Air and Space Vehicles (5) NW Introduction to aircraft and spacecraft; how airplanes fly, how airplanes and rockets are made, how they are controlled, and how space missions are designed. Laboratory and computer simulations used as illustrations. Emphasis on conceptual, rather than mathematical, comprehension. Not recommended for upper-division students in physical sciences and engineering. Offered: A.

A A 210 Engineering Statics (4) NW Vector analysis applied to equilibrium of rigid body systems and subsystems. Force and moment resultants, free body diagrams, internal forces, and friction. Analysis of basic structural and machine systems and components. Prerequisite: either MATH 126, MATH 129, or MATH 136; PHYS 121; recommended: graphics background. Offered: AWSpS.

A A 299 Undergraduate Research (1-5, max. 10) Research on special topics under the supervision of a faculty member. Application of fundamentals learned in the classroom to real problems in research. Offered: AWSpS.

A A 301 Compressible Aerodynamics (4) Aerodynamics as applied to the problems of performance of flight vehicles in the atmosphere. Kinematics and dynamics of flow fields. Thin airfoil theory; finite wing theory. Prerequisite: PHYS 123; either AMATH 351, MATH 136, or MATH 307. Offered: Sp.

A A 321 Aerospace Laboratory I (3) Hands-on laboratory experience in aerospace instrumentation. Students build sensors, power supplies, and circuits. Application of signal conditioning to wind tunnel data. Digital systems, A/D conversion, D/A conversion, and actuator control. Introduction to instrumentation requirements for space vehicles. Offered: A.

A A 321 Aerospace Laboratory I (3) The design and conduct of experimental inquiry in the field of aeronautics and astronautics. Laboratory experiments on supersonic flow, structures, vibrations, material properties, and other topics. Theory, calibration, and use of instruments, measurement techniques, analysis of data, report writing. Offered: W.

A A 322 Aerospace Laboratory II (3) The design and conduct of experimental inquiry in the field of aeronautics and astronautics. Laboratory experiments on subsonic aerodynamics, supersonic flow, structures, propulsion, and other topics. Theory, calibration, and use of instruments, measurement techniques, analysis of data, report writing. Offered: Sp.

A A 331 Aerospace Structures I (4) Analysis and design of aerospace structures. Review of concepts of stress, deformation, strain, displacement and equations of elasticity. Applications to aerospace structural elements including general bending and torsion of rods and beams, and open and closed thin-walled structures and box beams. Prerequisite: CEE 220. Offered: W.

A A 400 Gas Dynamics (3) Introduction to kinetic theory and free molecule flow. Review of thermodynamics. One-dimensional gas dynamics: one-dimensional wave motion, combustion waves. Ideal and real gas application. Prerequisite: PHYS 123; CHEM E 260. Offered: W.

A A 402 Fluid Mechanics (3) Inviscid equations of motion, incompressible potential flows, small perturbation flows, bodies of revolution, viscous equations, exact solutions, laminar boundary-layer equations, similar solutions, integral methods. Compressibility, instability, turbulent boundary layers. Prerequisite: MATH 324; A A 301. Offered: Sp.

A A 405 Introduction to Aerospace Plasmas (3) Development of introductory electromagnetic theory including Lorentz force and Maxwell’s equations. Plasma description. Single particle motions and drifts in magnetic and electric fields. Derivation of plasma fluid model. Introduction to plasma waves. Applications to electric propulsion, magnetic confinement, and plasmas in space and Earth’s outer atmosphere. Prerequisite: PHYS 123; MATH 324. Offered: A.

A A 409 Computer Tools for Aerospace Engineers (2) Computer-aided drawing basics, threedimensional drawing, projections, views. Computer-aided design and analysis tools for stress and heat transfer calculations. Offered: A.

A A 410 Aircraft Design I (4-4) Conceptual design of a modern airplane to satisfy a given set of requirements. Estimation of size, selection of configuration, weight and balance, and performance. Satisfaction of stability, control, and handling qualities requirements. Offered: W.

A A 419 Aerospace Heat Transfer (3) Fundamentals of conductive, convective, and radiative heat transfer with emphasis on applications to atmospheric and space flight. Prerequisite: PHYS 123; MA 337. Offered: W.

A A 420 Spacecraft and Space Systems Design I (4-4) Design of space systems and spacecraft for advanced near-Earth and interplanetary missions. Astrodynamics, space environment, space systems engineering, mission design and analysis, space vehicle propulsion, flight mechanics, atmospheric entry, aerobraking, configuration, structural design, power systems. thermal management, systems integration. Oral presentations and report writing. Design topics vary. Offered: W.

A A 421 Spacecraft and Space System Design II (-4) A continuation of 420. Course content varies from year to year and is dependent on the design topic chosen for 420. Prerequisite: A A 420. Offered: Sp.

A A 430 Finite Element Structural Analysis (3) Introduction to the finite element method and application. One-, two-, and three-dimensional problems including frusces, beams, box beams, plane stress and plane strain analysis, and heat transfer. Use of finite element software. Prerequisite: CEE 220. Offered: A.

A A 432 Composite Materials for Aerospace Structures (3) Introduction to analysis and design of aerospace structures utilizing filamentary composite materials. Basic plastic properties and constitutive equations of composite laminates. Failure criteria, buckling analysis, durability, and damage tolerance of composite structures. Aerospace structure design philosophy and practices. Prerequisite: A A 332. Offered: W.

A A 440 Flight Mechanics I (3) Calculation of aerodynamic characteristics of aircraft and components including stability derivatives. Relation to wind tunnel and flight data. Vehicle equations of motion within the atmosphere, characteristics of propulsion systems and components including propellers. Prediction of performance, stability and control characteristics for a specific aircraft. - W.

A A 441 Flight Test Engineering I (3) Determination in flight of performance, stability, and control characteristics of aircraft; and comparison with predicted and wind tunnel results. Prerequisite: A A 311. Offered: Sp.

A A 448 Control Systems Sensors and Actuators (3) Study of control systems components and mathematical models. Amplifiers, DC servomotors, reaction mass actuators. Accelerometers, potentiometers, shaft encoders and resolvers, proximity sensors, force transducers, piezoceramic materials, gyroscopes. Experimental determination of component models and model parameters. Two 3-hour laboratories per week. Prerequisite: either A A 447 or E E 447. Offered: jointly with E E 448; W.

A A 449 Design of Automatic Control Systems (4) Design problems for aerospace vehicles, systems with unstable dynamics, lightly damped modes, nonminimum phase, nonlinear dynamics. Computer-aided analysis, design, and simulation, with laboratory hardware-in-the-loop testing. Team design reviews, oral presentations. Prerequisite: either A A 448 or E E 448. Offered: jointly with E E 449; Sp.

A A 470 Systems Engineering (4) Concepts of system approach, system hierarchies, functional analysis, requirements, trade studies, and other concepts used to define and integrate complex engineering systems. Introduction to risk analysis and reliability, failure modes and effects analysis, writing specifications, and lean manufacturing. Offered: jointly with IND E 470; A.

A A 480 Systems Dynamics (3) Equations of motion and solutions for selected dynamic problems; natural frequencies and mode shapes; response of simple systems to applied loads. Prerequisite: A A 312. Offered: Sp.

A A 496 Undergraduate Seminar (1) Lectures and discussions on topics of current interest in aviation and space technology by guest speakers. Topics vary. Offered: W.

A A 498 Special Topics (1-5, max. 15) Topics of current interest in the department of Aeronautics and Astronautics.

A A 499 Undergraduate Research Project (1-5, max. 10) Research on special topics under the supervision of a faculty member. Application of fundamentals learned in the classroom to real problems in research. A maximum of 6 credits may be applied toward senior technical electives. Offered: AWRSpS.

A A 501 Physical Gasdynamics I (3) Equilibrium kinetic theory; chemical thermodynamics; thermodynamic properties derived from quantum statistical mechanics; reacting gas mixtures; applications to real gas flows and gas dynamics. Offered: odd years; A.

A A 505 Vortex-Dominated Flows (3) Examines the vorticity equation, baroclinic torque, solenoidality, Biot-Savart’s formula, diffusion of vorticity. Burger vortex, system of vortices, Kelvin-Helmholtz instability, effects of density, shear and surface tension on instability, swirling flows, and other special topics. Prerequisite: A A 504. Offered: Sp; even years.

A A 507 Aerodynamics of Viscous Fluids I (3) Introduction to viscous flow; exact solutions of the laminar equations of motion; approximate equations. Exact solutions for laminar boundary-layer equations. Approximate methods for compressible laminar boundary layers. Offered: odd years; W.

514
A A 508 Aerodynamics of Viscous Fluids II (3) The phenomena of turbulence; transition prediction; Reynolds stresses; turbulent boundary-layer equations. Approximate methods for turbulent boundary layers. Prerequisite: A A 507 or permission of instructor. Offered: odd years; Sp.

A A 510 Mathematical Foundations of Systems Theory (4) Mathematical foundations for system theory presented from an engineering viewpoint. Includes set theory; functions; inverse; functions; metric spaces; finite dimensional linear spaces; linear operators on finite dimensional spaces; projections on Hilbert spaces. Applications to engineering systems stressed. Prerequisite: graduate standing or permission of instructor. Offered: jointly with CHEM E 510/E E 510/M E 510; A.

A A 513 Gas Laser Theory and Practice (3) Physics and fluid mechanics of gas lasers, with emphasis on performance of gas dynamic lasers, flowing chemical lasers, and gaseous electric lasers. Development of laser optics, interaction of radiation and matter, laser oscillation conditions, and methods of obtaining population inversions. Applications of high-power lasers emphasized. Offered: even years; Sp.

A A 518 Automatic Control of Flight Vehicles (3) Specifications of flight vehicle performance. Synthesis of stability augmentation systems and autopilot control laws in the frequency-domain and using multivariable control methods. Reduced-order controller synthesis, digital design, and implementation. Use of computer-aided control design packages. Prerequisite: A A 516 and A A 545. Offered: odd years; Sp.

A A 520 Seminar (1-, max. 10) Topics of current interest in aerospace engineering. Credit/no credit only. Prerequisite: A A major. Offered: AWSp.

A A 521 Aerodynamics of Aircraft Engines Components (3) Estimation of component performances. Inlets and nozzles. Aerodynamics of turbines and compressors. Radial equilibrium theory, through-flow theory. Offered: even years; W.

A A 525 Energy Conversion I (3) Energy resources. Heat generation by combustion, solar collection. Analysis of power systems for space and advanced commercial power generation. High-temperature cycles. Offered: even years; A.

A A 526 Special Topics in Fluid Physics (3) credit only. Prerequisite: A A major. Offered: AWSp.

A A 527 Aerothermodynamics of Aircraft Engines (3) Examination of the viscous compressible equations of fluid dynamics. Analysis of numerical accuracy, stability, and efficiency. Use of explicit, implicit, and flux split methods. Discussion of splitting, approximate factorization, discrete point, and finite volume approaches. Applications to the solution of simple hyperbolic systems of equations and the Euler equations. Offered: W.

A A 545 Computational Fluid Dynamics I (3) Numerical approximation of the inviscid compressible equations of fluid dynamics. Solution of the Navier-Stokes equations on structured grids. Prerequisite: A A 525 or permission of instructor. Offered: Sp.

A A 548 Linear Multivariable Control (3) Advanced concepts of control systems design, stability analysis, and optimization. Prerequisite: instructor. Offered: jointly with M E 549/E E 549.

A A 550 Nonlinear Optimal Control (3) Calculus of variations for dynamical systems, definition of the dynamic optimization problem, constrained and Lagrange multipliers, the Pontryagin Maximum Principle, necessary conditions. Prerequisite: graduate standing; recommended: A A 445, E E 447 or M E 471. Offered: jointly with E E 547/M E 547; A.

A A 555 Vibrations of Aerospace Systems (3) Continuous and discrete systems, natural frequencies, and modal analysis; forced vibrations and motion-dependent forces. Structural damping; control augmented structures. Measurements for structural dynamic testing. Prerequisite: A A 571 or equivalent. Offered: odd years; Sp.

A A 556 Space and Laboratory Plasma Physics (3) Discussion of waves, equilibrium and stability, diffusion and resistivity, basic plasma kinetic theory, and wave-particle
interactions. Prerequisite: either A A 405, ESS 515, or GPHYS 505, or permission of instructor. Offered: jointly with ESS 576; W.

A A 557 Physics of Fusion Plasmas (3) Review and comparison of single particle and fluid descriptions of plasmas. MDH equilibrium, flux surfaces, and basic toroidal description. Collisional processes including physical and velocity space diffusion. Introduction to island formation, stochasticity, and various plasma instabilities. Prerequisite: A A 405 or GPHYS 505. Offered: even years; W

A A 558 Plasma Theory (3) Equilibrium, stability, and confinement. Classical transport, collisionless and resistive skin depths. Ideal MHD equations formally derived and properties of plasmas in the ideal limit are studied. Straight and toroidal equilibrium. Linear stability analysis with examples. Taylor minimum energy principle. Prerequisite: either A A 405, A A 556, A A 557, ESS 576, or GPHYS 537. Offered: even years; Sp.

A A 559 Plasma Science Seminar (1, max. 10) Current topics in plasma science and controlled fusion with presentations by invited speakers, on-campus speakers, and students. Students expected to give a seminar once or twice a year with instructor reviewing the method of presentation and material used for the presentation. Credit/no credit only. Offered: AWSpS.

A A 560 Plasma Diagnostics (3) Jarboe Discusses plasma measurement methods including material probes and optical methods. Covers techniques for making measurement in a high electrical noise environment. Presents methods for measuring electron and ion temperatures, density, impurities, magnetic fields, fluctuations, and neutrals. Prerequisite: A A 405 or equivalent. Offered: even years, A.

A A 565 Fusion Reactor Fundamentals (3) Introduction to basic engineering features of fusion power plants. Brief description of basic fusion physics and discussion of power plants for leading the nuclear concepts. Engineering problems; blanket, shield neutrons; materials, thermal hydraulics; tritium, superconducting systems. Prerequisite: completion of or concurrent enrollment in A A 405 or permission of instructor. Offered: odd years; W.

A A 570 Manifolds and Geometry for Systems and Control (3) Morgansen Introduction to fundamentals of calculus on manifolds and group theory with applications in robotics and control theory. Topics include: manifolds, tangent spaces and bundles, Lie groups and algebras, coordinate versus coordinate-free representations. Applications from physics, robotics, and control theory. Offered: jointly with EE 570/M E 571; W; even years.

A A 575 Continuum Mechanics (3) General foundations of the fundamental concepts of motion, stress, energy, and electromagnetism for a continuum. General equations of conservation of mass, momentum, and energy. Linear and nonlinear elastic; viscous, and inelastic materials. Offered: jointly with CEE 508; even years; W.

A A 578 Optimization in System Sciences (3) Mesbah Convex sets, separation theorems, theorem of alternatives and their applications, convex analysis, convex functions, conjugation, subgradients, convex optimization, duality and applications, linear and semi-definite programming. Linear matrix inequalities, optimization algorithms, applications in system theory and control, bilinear, rank minimization, optimization software. Recommended: A A 547/M E 547/E 547. Offered: jointly with E E 578/M E 578; W, even years.

A A 580 Geometric Methods for Non-Linear Control Systems (3) Morgansen Analysis and design of nonlinear control systems focusing on differential geometric methods. Topics include controllability, observability, feedback linearization, invariant distributions, and local coordinate transformations. Emphasis on systems evolving on Lie groups and linearly uncontrollable systems. Prerequisite: A A 570/E E 570/M E 570. Offered: jointly with E E 580/M E 580; Sp; even years.

A A 589 Special Topics in Solid Mechanics (3) Offered: AWSpS.

A A 591 Robotics and Control Systems Colloquium (1, max. 3) Colloquium on current topics in robotics and control systems analysis and design. Topics presented by invited speakers as well as on-campus speakers. Emphasis on the cross-disciplinary nature of robotics and control systems. Credit/no credit only. Offered: jointly with CHEM E/E E/M E 591; AWSpS.

A A 593 Feedforward Control (3) Devasia Design feedback controllers for precision output tracking: inversion-based control of non-minimum-phase systems; effect of plant uncertainty on feedback control; design of feedforward controllers for applications such as vertical take off and landing aircraft, flexible structures and piezo-actuators. Prerequisite: A A 547/E E 547/M E 547. Offered: jointly with E E/M E 593; Sp; even years.

A A 594 Robust Control (3) Basic foundations of linear analysis and control theory, model realization and reduction, balanced realization and truncation, stabilization problem, coprime factorizations, Youla parameterization, linear matrix inequalities, H-infinity and H2 control, KYP lemma, uncertain systems, robust H2, integral quadratic constraints, linear parameter varying synthesis, applications of robust control. Offered: jointly with E E 594/M E 594; odd years; Sp.

A A 597 Networked Dynamics Systems (3) Provides an overview of graph-theoretic techniques that are instrumental for studying dynamic systems that coordinate their states over a signal-exchange network. Topics include network models, network properties, dynamics over networks, formation control, biological networks, observability, controllability, and performance measures over networks. Prerequisite: A A 547/E E 547/M E 547. Offered: jointly with E E 597/M E 597.

A A 599 Special Projects (1-5, max. 15) Investigation on a special project by the student under the supervision of a faculty member. Offered: AWSpS.

A A 600 Independent Study or Research (*) Offered: AWSpS.

A A 700 Master’s Thesis (*) Offered: AWSpS.

A A 800 Doctoral Dissertation (*) Offered: AWSpS.

Chemical Engineering

CHEM E 260 Thermodynamics (4) NW Introduction to the basic principles of thermodynamics from a macroscopic point of view. Emphasis on the First and Second Laws and the State Principle, problem solving methodology. Prerequisite: either CHEM 140, CHEM 142, or CHEM 145; either MATH 126, MATH 129, or MATH 136, PHYS 121. Offered: AWSpS.

CHEM E 301 Leadership Seminar (1) Stove Forum for industrial, academic, and government leaders to share their experiences and insights with students. Includes topics related to leadership in the chemical engineering profession including career planning, management skills, interpersonal skills, effective planning, entrepreneurship, ethics, and strategic decisions. Credit no credit only. Offered: A.

CHEM E 309 Creativity and Innovation (2) VLPA Alland Understanding creativity and creative thinking; its challenges and dynamics through knowledge, judgment, planning, and observation. Techniques of creative thinking. Design and development of creative games. Computer-aided creative thinking. Creation, protection, and exploitation of a useful idea, including bargaining and negotiations. Offered: jointly with MSE 309; Sp.

CHEM E 310 Material and Energy Balances (4) Chemical and physical process calculations: steady- and unsteady-state material and energy balances with specific examples in vapor-liquid contact operations and multiphase extraction, and introductory thermochemistry. Prerequisite:
either CHEM E 280 or ENGR 260 with either ENGR 142 or CSE 142. Offered: A.

CHEM E 326 Chemical Engineering Thermodynamics (4) Phase equilibria and chemical equilibria in multicomponent systems; theories of solution; chemical reaction analysis. Prerequisite: CHEM E 310 or either CHEM E 260 or CHEM E 456. Offered: W.

CHEM E 330 Transport Processes I (5) Introduction to momentum, heat, and mass; general aspects of fluid flow; the Navier-Stokes equations; one-dimensional flow with engineering applications. Prerequisite: CHEM E 310; either MATH 136 or MATH 307. Offered: W.

CHEM E 341 Energy and Environment (3) NW Malte Energy use. Fossil energy conversion. Oil, gas, coal resources. Air impacts. Nuclear energy: reactors, fuel cycle. Prerequisite: either MATH 112, MATH 124, or Q SCI 291; either CHEM 120, CHEM 142, PHYS 114, or PHYS 121. Offered: jointly with ENVR 341/M E 341; A.

CHEM E 442 Renewable Energy (4) NW Malte Introduction to renewable energy. Principles and practices: solar, wind, water, and biomass energy conversion. Prerequisite: either MATH 112, MATH 124, or Q SCI 291; either CHEM 120, CHEM 142, PHYS 115, or PHYS 122. Offered: jointly with M E 442/ENVIR 442; W.

CHEM E 345 Introduction to Fuel Cells (3) Adler, Schwartz. Stove Overview of fuel cells, fuel cell efficiency, types of fuel cells, applications of fuel cells, and fuels for fuel cells. Intended for students in science and engineering and fuel cell professionals desiring a technical knowledge of fuel cells. No credit available, if already given for CHEM E 445. Prerequisite: CHEM 162; PHYS 122; recommended: CHEM E 260. Offered: A.

CHEM E 355 Biological Frameworks for Engineers (3) For engineers with no prior experience in the biological sciences. Hands-on, project-based course covers fundamental concepts and language of biology from an engineering perspective. Topics include functions of life, information processing, proteins, DNA, genetic variability, control loops, energetics, tissues, organisms, ecosystems. Prerequisite: CHEM 142; PHYS 123; MATH 307; recommended: CHEM E 220. Offered: A.

CHEM E 375 Chemical Engineering Computer Skills (2) Finsly Use Excell, Matlab, and AspenPlus to solve typical chemical engineering problems. Solve realistic problems and explore alternatives that would be inaccessible for hand calculations. Includes equations of state, chemical equilibrium of simultaneous reactions, phase equilibria, plug flow reactors, heat transfer in 1-D, and time-dependent heat transfer. Credit/no credit only. Offered: W.

CHEM E 435 Transport Processes III (4) Mass transfer, basic principles, and applications to equipment design. Physical separation processes. Prerequisite: CHEM E 326; CHEM E 340. Offered: A.

CHEM E 436 Chemical Engineering Laboratory I (3) Lectures on statistics, experimental design, instrumentation, laboratory safety, and report writing; laboratory experiments on fluid mechanics and heat transfer. Emphasis on teamwork, experimental planning, procedures, report writing, and oral presentations. Prerequisite: CHEM E 326; CHEM E 340 which may be taken concurrently; T C 231; recommended: T C 333. Offered: ASp.

CHEM E 437 Chemical Engineering Laboratory II (3) Continuation of 436. Laboratory investigation of chemical engineering principles applied to equipment design with emphasis on mass transfer operations and chemical reactors. Prerequisite: CHEM E 435; CHEM E 436; CHEM E 465. Offered: W.

CHEM E 445 Fuel Cell Engineering (3) Introduction to electrochemical fuel cells for use in transportation and stationary power applications. Topics covered include types of fuel cells, single cell operation, stack engineering, overall system design, and safety, with emphasis on proton exchange membrane and solid oxide fuel cells. Prerequisite: CHEM E 330.

CHEM E 455 Surface and Colloid Science Laboratory (1/3, max. 3) Berg Laboratory techniques, equipment, and underlying fundamentals in surface and colloid science. Experiments in the measurement of surface tension, adsorption, wetting and spreading, colloid properties, emulsion preparation and stability, electrophoresis, and interfacial hydrodynamics. Recommended: CHEM E 326; CHEM E 330; CHEM E 461. Offered: Sp.

CHEM E 458 Surface Analysis (3) Understanding of solid surfaces for research and development in microelectronics, catalysis, adhesion, biomaterials science, wear, and corrosion science. Newer methods available to study surfaces of materials. Electron emission spectroscopies (ESCA, Auger); ion scattering, ion spectroscopic, photon spectroscopic, and thermodynamic methods. Offered: jointly with BIOEN 492; W.

CHEM E 461 Electrochemical Engineering (3) Schwartz Explores role of thermodynamics, electrochemistry, transport, kinetics, and mass transfer on behavior of electrochemical systems. Includes cell thermodynamics, faradaic and non-faradaic processes, ionic transport, nucleation and deposition, control, charge transfer kinetics, and mass transfer on solid surfaces. In-class demonstrations to illustrate concepts. Offered: W.

CHEM E 465 Reactor Design (4) Application of chemical kinetics and transport phenomena to the design of chemical reactors; characterization of batch and continuous-flow reactors in homogeneous and heterogeneous systems. Prerequisite: CHEM E 320; CHEM E 340. Offered: A.

CHEM E 471 Pulping and Bleaching Processes (3) Conversion of wood to mechanical and chemical pulps. Kraft, sulfite, and semichemical pulping processes. Chemical recovery systems. Bleaching of mechanical and chemical pulps. Offered: jointly with PSE 476; W.

CHEM E 472 Papermaking Processes (3) Fiber sources and properties, pulp and papermaking procedures, paper properties, and pulp fiber products. Stock preparation, sheet forming, water removal, finishing, coating, lamination, and printing. Offered: jointly with PSE 477; A.

CHEM E 473 Pulp and Paper Laboratory (2) Laboratory experiments in chemical and semichemical pulping of wood. Bleaching of chemical and high-yield pulps. Physical and chemical characteristics of pulp fibers. Offered: PSE 476; jointly with PSE 478; Sp.

CHEM E 480 Process Dynamics and Control (4) Dynamics of process units and systems instrumentation and control system design and analysis. Includes weekly laboratory. Prerequisite: CHEM E 435; CHEM E 465. Offered: W.

CHEM E 481 Process Optimization (3) Concepts and techniques of optimizing chemical engineering processes and systems, including classical and direct methods of search, linear and nonlinear programming, dynamic programming, statistical experiments, and evolutionary operation. Offered: Sp.

CHEM E 482 Advanced Topics in Process Control (3) Holt, Ricker Current topics in process control design and analysis. Possible topics include robustness analysis and design, time delay compensation, modern frequency response techniques, discrete control, adaptive control, model-based control, and nonlinear control. Prerequisite: CHEM E 480.

CHEM E 484 Electronic and Optoelectronic Polymers (3) Jenekhe Covers the chemistry, physics, materials science, and engineering applications of semiconducting and metallic conjugated polymers. Examines the structural origins of the diverse electronic and optoelectronic properties of conjugated polymers. Examines applications by light-emitting diodes, lasers, solar cells, thin film transistors, electrochromic devices, biosensors, and batteries. Prerequisite: either CHEM 237, CHEM 455, CHEM E 340, or MSE 310. Offered: A.

CHEM E 485 Process Design I (4) Applied economics in chemical engineering design and operations; measures of profitability, capital and operating cost estimates; introduction to design and design strategies. Prerequisite: CHEM E 480 which may be taken concurrently. Offered: W.
CHEM E 486 Process Design II (5) Comprehensive design of a specific process, including economic feasibility studies, utilization of market survey and plant location studies, process equipment design and optimization, and overall plant integration and layout. Prerequisite: CHEM E 485. Offered: Sp.

CHEM E 490 Engineering Materials for Biomedical Applications (3) Hoffman Combined application of the principles of physical chemistry and biochemical engineering, mass transfer, and fluid mechanics to biomedical problems. Case studies include considerations of the selection of materials, the design and the operation of instruments, components of, or entire, artificial organs (heart, kidney, lung) and artificial structural elements (bone, teeth, skin), all for use in contact with body fluids. Offered: jointly with BIOEN 490; W.

CHEM E 491 Controlled Release Systems-Principles and Applications (3) Hoffman Mechanisms or controlled release of active agents and the development of useful systems for this purpose. release mechanisms include diffusive, convective, or erosive driving forces. Applications to the biomedical, agricultural, forestry, and oceanography fields. Some special case studies covered in detail. Offered: jointly with BIOEN 491; even years; W.

CHEM E 497 Special Projects in Chemical Engineering Design ([1-6]-, max. 12) Chemical engineering design instruction and experience in special projects, such as industrially motivated, timely, or interdisciplinary projects. Project subject and content varies. Majors only. Prerequisite: CHEM E 340.

CHEM E 498 Special Topics in Chemical Engineering (1-4, max. 12) Topics of current interest in the field. Subject matter changes from quarter to quarter.

CHEM E 499 Undergraduate Research (1-6), max. 12) Independent research projects in chemical engineering. Offered: AWSpS.

CHEM E 510 Mathematical Foundations of Systems Theory (4) Mathematical foundations for system theory presented from an engineering viewpoint. Includes set theory; functions, inverse functions; metric spaces; finite dimensional linear spaces; linear operators on finite dimensional spaces; projections on Hilbert spaces. Applications to engineering systems stressed. Prerequisite: graduate standing or permission of instructor. Offered: jointly with A A 510/E E 510/M E 510; A.

CHEM E 511 Biomaterials Seminar (1) Hoffman, Horbett, Ratner Presentation of student research results. Credit/no credit only. Prerequisite: permission of instructor. Offered: jointly with BIOEN 511; AWSpS.

CHEM E 512 Methods of Engineering Analysis (3) Applications of mathematics to problems in chemical engineering: vector calculus; properties and methods of solution of first and second order partial differential equations; similarity transforms, separation of variables, Laplace and Fourier transforms. Prerequisite: MATH 205, MATH 307 or AMATH 351, MATH 324 or permission of instructor. Offered: jointly with AMATH 512; A.

CHEM E 515 Experimental Methods in Chemical Engineering Research (3) Baneyx, Berg, Jiang Lecture and laboratory studies in current research methods of chemical engineering. Includes surface science, biochemical engineering, colloidal chemistry, light scattering, and nanoscience techniques.

CHEM E 523 Seminar in Chemical Engineering (1) Topics of current interest in chemical engineering. Credit/no credit only. Offered: AWSp.

CHEM E 525 Chemical Engineering Thermodynamics (4) Review of principles of thermodynamics. Applications to problems in multiphase and multicomponent systems; theories of solutions. Prerequisite: undergraduate thermodynamics. Offered: A.

CHEM E 526 Topics in Thermodynamics (3) Classical and molecular thermodynamics of phase equilibria, solution theory, thermodynamic stability, and critical phenomena. Prerequisite: CHEM E 525 or permission of instructor.

CHEM E 531 Momentum, Heat, and Mass Transfer II (3) Continuation of 530. Flows of fluid-particle systems; convective heat transfer, natural convection. Prerequisite: CHEM E 530. Offered: W.

CHEM E 554 Nanoscale Science I: Contact Mechanics and Rheology on the Nanoscale (3) Overney Introductory nanoscale science with emphasis on contact mechanics, principle and concept of forces, scanning force microscopy, tribology (friction, wear, lubrication), rheology, ultrathin organic films, physical properties of polymers, and computer simulation.

CHEM E 557 Research in Interfacial and Colloid Science (1) Berg Weekly research seminar and discussion of scientific literature pertaining to interfacial and colloid science. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSp.

CHEM E 558 Surface Analysis (3) Ratner Understanding of solid surfaces for research and development in microelectronics, catalysis, adhesion, biomaterials science, wear, and corrosion science. Newer methods available to study surfaces of materials. Electron emission spectroscopies (ESCA, Auger); ion scattering, ion spectroscopic, photon spectroscopic, and thermodynamic methods. Offered: jointly with BIOEN 592; W.

CHEM E 560 Reactions at Solid Surfaces (3) Stuev Fundamental studies of adsorption systems and reactions that occur at surfaces with application toward heterogeneous catalysis, electrochemistry, etching, and corrosion. Analysis of reaction poisons and promoters, acid-base theory of metal surfaces, jellium theory of metals, and water and ion adsorption, plus other topics of current interest. Recommended: CHEM E 559 or CHEM E 560.

CHEM E 562 Hazardous Air Pollution (3) Control of emission of hazardous or toxic air pollutants. Government regulations, determination of needed control efficiency. Emission control by thermal incineration, catalytic incineration, flares, condensation, carbon adsorption, and adsorption (wet and dry). Hazardous waste incinerators. Case studies. Offered: jointly with CEE 556; W.

CHEM E 564 Applications of Chemical Kinetics (3) Fast reactions and highly energetic reactions with applications to combustion, explosions, and lasers. Coupling of transport processes and reaction rates, photochemical kinetics, intermolecular energy transfer, free radical, and chain reaction kinetics. Rate plasmas, flames, and biological systems.

CHEM E 565 Kinetics and Catalysis (3) Finlayson, Krieger, Stuev Homogeneous and heterogeneous systems with emphasis on chemical engineering principles applied to industrial reactor design. Prerequisite: CHEM E 525. Offered: W.

CHEM E 566 Control of Gaseous Air Pollutants (3) Pilot Physical and chemical processes used to control gaseous air pollutants. Absorption into liquids. Aqueous spray dryer scrubbers. Adsorption beds. Control of sulfur oxide and nitrogen oxide. Case studies of control aerosol particles. Case studies of particulate air-pollutant control systems. Prerequisite: CHEM E 468 or permission of instructor. Offered: jointly with CEE 559; odd years; A.

CHEM E 570 Chemistry of High Polymers (3, max. 6) Allan Fundamentals of high polymer chemistry, including kinetics of addition and condensation polymerization, the determination of average molecular weights and chain length distributions, solution properties and the relationship between molecular structure and plastic film and fiber properties of various polymers. Prerequisite: an undergraduate course in organic chemistry. Offered: W.

CHEM E 575 Nonlinear Analysis in Chemical Engineering (3) Finlayson Comparison of numerical techniques; similarity, perturbation, finite difference, Galerkin, orthogonal collocation methods as applied to nonlinear chemical engineering problems.

CHEM E 584 Electronic and Optoelectronic Polymers (3) Jenike Covers the chemistry, physics, materials science, and engineering applications of semiconducting and metallic conjugated polymers. Examines the structural origins of the diverse electronic and optoelectronic properties of conjugated polymers. Examplifies applications by light-emitting diodes, lasers, solar cells, thin film transistors, electrochromic devices, biosensors, and batteries. Prerequisite: either CHEM 237, CHEM 455, CHEM E 340, or MSE 310. Offered: A.

CHEM E 588 Research in Applied Microbiology (1) Lidstrom Weekly research seminar and discussion of scientific literature pertaining to applied microbiology. Credit/no credit only. Prerequisite: permission of instructor. Offered: jointly with MICROM 588; AWSpS.

CHEM E 590 Advanced Topics in Biomaterials (3) Major, controversial issues in application of synthetic materials to medical problems. Blood
compatibility, bioadhesion, intraocular lenses, contact lenses, polyurethanes, biodegradation, protein adsorption, corrosion, bone fixation, new materials, artificial heart, medical device regulation. Prerequisite: CHEM E 490 or BI/EN 490. Offered: jointly with BI/EN 590; odd years; Sp.

CHEM E 591 Robotics and Control Systems Colloquium (1, max. 3) Colloquium on current topics in robotics and control systems analysis and design. Topics presented by invited speakers as well as on-campus speakers. Emphasis on the cross-disciplinary nature of robotics and control systems. Credit/no credit only. Offered: jointly with A/E E/M E 591; AWSp.

CHEM E 599 Current Topics in Chemical Engineering (1-3, max. 12) Readings or lectures and discussions of topics of current interest in the field of chemical engineering. Subject matter changes from year to year. Prerequisite: permission of instructor.

CHEM E 600 Independent Study or Research (*) Offered: AWSp.

Civil and Environmental Engineering

CEE 100 Twenty First Century Civil and Environmental Engineering (1) Introduction to the modern discipline of civil and environmental engineering including major sub-disciplines, professional careers, projects and departmental faculty. Explores the different disciplines and their relevance to today’s students. Offered: W.

CEE 220 Introduction to Mechanics of Materials (4) NW introduction to the concepts of stress, deformation, and strain in solid materials. Development of basic relationships between loads, stresses, and deflections of structural and machine elements such as rods, shafts, and beams. Load-carrying capacity of these elements under tension, compression, torsion, bending, and shear forces. Prerequisite: A A 210. Offered: AWSp.

CEE 306 Construction Engineering I (3) Introduction to construction engineering, planning, methods, contracts, and specifications. Scheduling manually and by using computer software. Production estimates; equipment selection; ownership and operating costs; role of the engineer in construction and cost estimating.

CEE 320 Transportation Engineering I (3) Study of vehicular transportation fundamentals including geometric design, pavement design, traffic flow concepts, level of service analysis, intelligent transportation systems, travel demand prediction methods, and management of transportation systems. Includes a review of relevant vehicle operating characteristics. Prerequisite: MATH 126; PHYS 121.

CEE 345 Hydraulic Engineering (4) Extension and application of fluid mechanics principles to hydraulic engineering problems. Open channel flow, pipeline systems, turbomachinery, unsteady flow in pipes, diffusion and mixing processes, groundwater, surface water hydrology. Prerequisite: CEE 342. Offered: WS.

CEE 350 Environmental Engineering — Water and Air Quality (4) Description of water and air resources and parameters that characterize their quality, how their use alters their properties. Mass and energy balances as they apply to environmental systems. Global environment change. Basics of aquatic chemistry and microbiology applied to municipal water and wastewater treatment operations. Prerequisite: CHEM 142; MATH 126. Offered: Sp.

CEE 363 Constructional Materials (4) General treatment of physical and mechanical properties and engineering behavior of metallic and nonmetallic materials. Steel, aluminum, asphalt concrete, Portland cement concrete, wood. Laboratory testing, instrumentation, and investigation into macrobehavior. Correlation with microstructure and various aspects of materials science. Prerequisite: CEE 220.

CEE 366 Basic Soil Mechanics (4) Introduction to basic soil properties, soil classification, volumetric relationships, compaction, consolidation, soil rheology, shear strength, and foundation to settlement and stability of foundations. Prerequisite: CEE 220; CEE 342. Offered: WS.

CEE 379 Elementary Structures I (4) Eberhard, Miller, Türküyih Fundamental analysis and modeling of civil structural systems (trusses, beams, and frames), including design applications. Equilibrium, schematics, and constitutive relations; formal solution procedures emphasizing element-based stiffness methods; computer-based and manual techniques; verification and interpretation of results; case studies involving local structures. Prerequisite: CEE 220. Offered: ASp.

CEE 380 Elementary Structures II (4) MacRae, Roedter, Stanton Structural design concepts, procedures, and codes. Characterization and determination of loads (dead, live, seismic, wind, etc.) Structural systems and system behavior (load paths, lateral and vertical response, failure modes and limit states). Structural component behavior and design (composite action, inelastic bending, column stability, member capacities). Prerequisite: CEE 379. Offered: WS.

CEE 390 Civil Engineering Systems (3) Introduction to civil engineering system processes, decision methods, economic considerations, and optimization. Examples illustrating quantitative and subjective aspects of civil engineering practice. Prerequisite: MATH 308. Offered: A.

CEE 391 Graphics Communication and Computer-Aided Design (3) Introduction to graphics communication and computer-aided design tools to manipulate and design space, data, and geometric representations in civil engineering applications. Prerequisite: MATH 124.

CEE 392 Basic Civil Engineering Computing (1) Introduction to computer-based methods in civil and environmental engineering problems using Matlab. Prerequisite: CEE 220.

CEE 404 Infrastructure Construction (4) Muench Basic concepts of large infrastructure construction projects including planning, scheduling, life-cycle cost analysis (LLCA), construction cost, logistics, productivity and, where applicable, traffic impacts. Uses current and prototype industry software and involves direct contact with agency and contractor personnel involved in infrastructure projects. Prerequisite: CEE 306. Offered: Sp.

CEE 410 Traffic Engineering Fundamentals (3) General review of the fundamentals of traffic engineering, including their relationship to transportation operations management and planning, with emphasis on calculations and procedures in the Highway Capacity Manual; field surveys and data analysis. Prerequisite: CEE 320.

CEE 412 Transportation Data Management (3) Wang Introduction to modern concepts, theories, and tools for transportation data management and analysis. Applications of software tools for transportation data storage, information retrieval, knowledge discovery, data exchange, on-line information sharing, statistical analysis, system optimization, and decision support.

CEE 416 Urban Transportation Planning and Design (3) Brief review of major issues in urban transportation planning. Planning process discussed and transportation models introduced. Uses a systems framework, including goals and objectives, evaluation, implementation, and monitoring. A design term project, individual or small groups, utilizes material presented on a contemporary problem. Prerequisite: CEE 320. Offered: A.

CEE 418 Computer-Aided Planning of Urban Systems (3) Survey of on-line planning applications; use of various on-line systems to solve urban systems design problems; investigations of hardware/software tradeoffs; human factors in man-computer systems design theory as it relates to problem-solving activity. Offered: jointly with URBDP 429.

CEE 423 Heritage of Civil Engineering (3/4) I&S Contribution of civil engineering to civilization based on the lives and projects of prominent engineers and cultures. Incidents and
individuals from prehistory to the nineteenth century give the student an awareness of the profession and its influence on society. Industrial archaeology and historic sites are considered. An additional 1 credit may be earned by participating in a special project. Emphasis on the control of elements and the methodology, planning, objectives, and reasons for the project. May be used as social science distribution. Offered: W.

CxEE 424 GIS for Civil Engineers (3) GIS in civil engineering applications. Geographic and spatial data types and acquiring considerations. Data models and structures. Projections and transformations. Attribute-based operation, data models and structures. Projections and spatial data types and acquiring considerations. Training on Arc GIS software. Recommended: CxEE 316.

CxEE 425 Reinforced Concrete Construction (3) Janssen Processes in constructing reinforced concrete structures. Identification and development of solutions to potential constructability problems. Lectures augmented with industry speakers and a field trip to a building under construction. Requires senior or graduate standing in Civil Engineering or Construction Management and familiarity with reinforced concrete design/construction.

CxEE 428 Lightweight Cementitious Composites (2) Janssen Introduction to the process of designing within constraints and introductory experimental design. Importance of proper laboratory documentation. Examines the characteristics of cementitious binders and elementary composite behavior. Considers constructability. Interprets pre- and post-cracking elastic behavior. Organization and production of technical report the documents work performed. Offered: A.

CxEE 432 Seismology and Earthquake Engineering (3) Janssen Presents an overview of earthquake processes and details of the characteristics of destructive ground motion; illustrates the effects of such motion on engineering structures; reviews current practice in estimating earthquake hazards for important structures such as nuclear power plants. Prerequisite: either MATH 126, or both MATH 307 and MATH 308. Offered: jointly with ESS 465.

CxEE 436 Foundation Design (3) Design considerations for foundations and retaining structures. Subsurface investigations and determination of soil properties for design. Design of shallow and deep foundations and retaining structures. Foundations and soil considerations for waterfront structures. Prerequisite: CxEE 366.

CxEE 437 Engineering Geology I (3) General overview of engineering geology and its importance to civil engineers. Topics include geologic processes, hazards, subsurface investigations, classification of geologic materials, data synthesis, and natural construction materials.

CxEE 440 Professional Practice Studio (2) Fundamentals of integrated civil engineering design, professional services marketing, project management, team dynamics, total quality management, value engineering, professional liability, and applied ethics in engineering practice. Emphasis on written and oral communications and on ethical, social, and economic factors.

CxEE 441 Transportation and Construction Capstone (4) Comprehensive design project focusing on planning, design and construction of transportation project such as highways, transit, and airports. Prerequisite: CxEE 320; CxEE 440, which may be taken concurrently.

CxEE 442 Structural Geotechnical Capstone Design Project (4) Comprehensive team design project focusing on structural and geotechnical engineering. Requires design drawings, written reports, and oral presentations interfacing with related fields such as aesthetics and architecture, mechanical systems, traffic, environmental planning. Prerequisite: CxEE 440; two courses from CxEE 436, CxEE 451, CxEE 452, CxEE 453, CxEE 454, or CxEE 457.

CxEE 444 Water Resources and Hydraulic Engineering Capstone Design Project (4) Opportunity to effect design solutions for projects or major project components in such representative areas as reservoirs and associated systems for flood control, water supply, irrigation, and hydroelectric power. Surface water control systems. Bridge projects and related projects, small harbors, and coastal engineering problems. Prerequisite: CxEE 345; CxEE 440; either CxEE 475, CxEE 476, CxEE 482, CxEE 483, or CxEE 484.

CxEE 445 Environmental Engineering Capstone Design Project (4) Individual and group design studies addressing environmental engineering problems such as stormwater management, water and wastewater treatment facilities, and residual processing. Prepare proposals, engineering reports, and alternative evaluations; process equipment design, present reports on selected design problems. Prerequisite: CxEE 345; CxEE 440; either CxEE 475, CxEE 476, CxEE 481, CxEE 482, or CxEE 484.

CxEE 451 Design of Metal Structures (3) Introduction to the design and behavior of metal structures using LRFD concepts. Application of design methods and codes to columns, beams, frames, connections, and tension members. Prerequisite: CxEE 380; recommended: CxEE 457, CxEE 458.

CxEE 452 Design of Reinforced Concrete Structures (3) Fundamentals of design of buildings in reinforced concrete in accordance with current codes and practices. Prerequisite: CxEE 380.

CxEE 453 Prestressed Concrete Design (3) Analysis, design, and construction of prestressed concrete structures. Prerequisite: CxEE 452.

CxEE 454 Design of Timber Structures (3) The design and construction of timber structures, using elements made of sawn wood, glued-laminated wood, and plywood. Prerequisite: CxEE 380.

CxEE 455 Structural Unit Masonry (3) Structural behavior and design of reinforced brick, tile, and unit concrete masonry structures. Prerequisite: CxEE 380. Offered: jointly with ARCH 426.

CxEE 457 Advanced Structures I (3) The displacement method in matrix form with programming applications. Fundamentals of modeling of various types of structures. Prerequisite: CxEE 379.

CxEE 458 Advanced Structures II (3) Introduction to stability, including a consideration of elastic and inelastic buckling with applications to beam-columns and plates. Introduction to plastic analysis. Prerequisite: CxEE 457.

CxEE 459 Advanced Structural Mechanics (3) Formulation and solution of the basic equations of elasticity. Applications in 2-D stress analysis, torsion, thermal stresses, and beams on elastic foundation. Plate theory optional. Prerequisite: CxEE 379.

CxEE 462 Applied Limnology and Pollutant Effects on Freshwater (3) NW Principles of aquatic ecology that relate to causes and effects of water quality problems in lakes and streams. Population growth kinetics, nutrient cycling, eutrophication; acidification, oxygen/temperature requirements, and effects of various wastes on aquatic animals.

CxEE 463 Limnology Laboratory (2) NW Examination of biota of fresh waters, survey of limnological methods, analysis of data, and writing of scientific papers. Prerequisite: BIOL 473/FISH 473/CxEE 462, any of which may be taken concurrently. Offered: jointly with BIOL 474/FISH 474; A.

CxEE 472 Introduction to Hydraulics in Water Resources (3) Hydraulics related to environmental issues. Global hydrology; stratified flows; two-phase (bubble) flows; pollutant transport and mixing in reservoirs, lakes, coastal waters, and oceans; diffuser design and related case studies. Prerequisite: CxEE 342; CxEE 345.

CxEE 473 Coastal Engineering I (3) Linear theory of water waves, wave transformations due to boundary conditions, sediment motion, elementary tidal theory; applications illustrated by laboratory experiments and selected case histories. Prerequisite: CxEE 342.

CxEE 474 Hydraulics of Sediment Transport (3) Introduction to sediment transport in steady flows with emphasis on physical principles governing the motion of sediment particles. Topics include sediment characteristics, initiation of particle motion, particle suspension, bedforms, streambed ripples, analysis, sediment discharge formulae, and modeling of scour and deposition in rivers and channels. Prerequisite: CxEE 345.

CxEE 475 Analysis Techniques for Groundwater Flow (3) Development of appropriate equations to describe saturated groundwater flow, and application of numerical methods for solving groundwater flow problems and flow to wells. Participants required to solve specific problems using numerical techniques developed during the course. Prerequisite: CxEE 342.

CxEE 476 Physical Hydrology (3) Global water picture, data sources and data homogeneity, precipitation, evapotranspiration, hydrographs. Hydrologic data frequency analysis. Hydrologic design: flood mitigation, drainage. Introduction to deterministic and stochastic models. Prerequisite: CxEE 345.

CxEE 477 Open-Channel Engineering (3) Water flow in natural and constructed channels. Analysis and design of canals, transitions, energy dissipators, and similar structures. Analysis of surface profiles and effect of nonlinear alignment on flow. Introduction to river mechanics. Design-oriented problems. Prerequisite: CxEE 345.
CEE 480 Air-Quality Modeling (3) Evaluation of air-quality models relating air pollution emissions to environmental concentrations. Topics include meteorological dispersion models and various “receptor” models based on chemical “fingerprinting” of sources. Emphasizes current problems. Offered: jointly with ATM S 480.

CEE 481 Hydraulic Design for Environmental Engineering (3) Stensel Introduction to the theory and the practice of planning and design of urban water supply distribution, pump stations, and sewage and storm-water collection systems. Evaluation of service areas and service requirements and their relationships to urban and regional planning activities. Engineering methods and computer programs for designing basic system elements. Prerequisite: CEE 345; CEE 350.

CEE 482 Wastewater Treatment and Reuse (3) Introduction to wastewater treatment and systems, emphasizing fundamental biological, chemical and physical processes related to protection of public health and water pollution control. Detailed analysis of the configuration and sizing of major types of treatment processes for various sizes of plants and effluent requirements. Prerequisite: CEE 350.

CEE 483 Drinking Water Treatment (3) Scientific and engineering principles underlying drinking water treatment; analysis of key contaminants; development of conceptual models for how and why treatment processes work and mathematical models describing their performance under various design and operating scenarios; field trips to water treatment systems. Prerequisite: CEE 350.

CEE 484 Decentralized and On-Site Wastewater Management and Reuse (3) Design and performance of onsite and decentralized wastewater treatment. Determination of appropriate alternatives based on endpoints of water reuse, economics, policy, management, water quality, and ecological considerations. Meeting sanitation and water reuse for situations including, individual homes, rural areas, developing countries, and high density urban dwellings. Prerequisite: CEE 350.

CEE 486 Environmental Analysis Laboratory (3) Introduction to water quality parameters; theory of instrumentation and methods used for the environmental analysis. Laboratory analysis of environmental samples using a variety of techniques including titrations, chromatography, and absorption and emission spectrophotometry. Recommended: one year of general chemistry.

CEE 487 Solid-Waste Disposal (3) Describes sources and handling of municipal and industrial solid waste, with examination of collection, processing, recycling and resource recovery, and disposal alternatives. Public policy issues, local agencies and solid waste facilities, the legal and regulatory framework are all addressed in context of solid waste engineering.

CEE 488 Hazardous Wastes Engineering (3) Classification of hazardous wastes; resource recovery, Recovery Act regulations, characteristics and behavior of toxic organics; superfund; groundwater contamination, solutions. Hazardous waste site remedial action; case histories; sampling; landfill design. Stabilization and processing technologies, including incineration, carbon adsorption, emerging techniques. Prerequisite: CEE 351.

CEE 489 Water and Air Quality Sampling (2) Samples collected from lakes, streams, precipitation, and air and resulting (and supplemental) data interpreted for cause-effect and statistical inference. Design for water and air quality monitoring programs. Prerequisite: CEE 462.

CEE 490 Air-Pollution Control (4) Fundamental concepts of air pollution. Emission sources, atmospheric dispersion, ambient concentrations, adverse effects, governmental regulations, emission standards, air-quality standards, processes and equipment for controlling emissions. Offered: jointly with ENV H 461.

CEE 491 Deterministic Systems (3) Development of quantitative methods for mathematical problem solving with emphasis on computer applications. Linear programming, mathematics of the simplex algorithm, sensitivity analysis, dynamic programming, systems simulation, and goal programming. Class project required. Prerequisite: CEE 390.

CEE 492 Stochastic Systems (3) Introduction to probability distributions and statistics useful in systems analysis, conditional distributions, queuing theory and applications, Monte Carlo simulation, chance-constrained mathematical programming, and stochastic dynamic programming. Emphasis on application of the techniques to civil engineering systems problems, including transportation, water resources, and structures. Prerequisite: CEE 491.

CEE 493 Air-Pollution Source Testing and Equipment Evaluation (3) Engineering evaluation of air pollutant sources and air control equipment. Fundamentals of source testing and stack sampling including laboratory exercises.

CEE 494 Air-Pollution Control Equipment Design (3) Designs to control air pollutants from stationary sources. Procedures for calculating design and operating parameters. Fundamental mechanisms and processes of gaseous and particulate control equipment for absorption and adsorption of gaseous pollutants; electrostatic precipitation and filtration of particulate pollutants. Actual case studies. Offered: jointly with CHEM E/M E 488.

CEE 495 Sustainability and Design for Environment (3) Cooper Analysis and design of technology systems within the context of the environment, economy, and society. Applies the concepts of resource conservation, pollution prevention, life cycle assessment, and extended product responsibility. Examines the practice, opportunities, and role of engineering, management, and public policy. Offered: jointly with ENVIR 415/M E 415; S.

CEE 498 Special Topics (1-5, max. 5) Special topics in civil engineering offered as course with lecture and/or laboratory. Maximum of 6 credits in combination of 498 and 499 may be applied toward an undergraduate degree.

CEE 499 Special Projects (1-5, max. 5) Individual undergraduate research projects. Maximum of 6 credits in combination of 498 and 499 may be applied toward an undergraduate degree. Recommended: 400-level CEE course.

CEE 500 Civil and Environmental Engineering Seminars (1) Credit/no credit only. Prerequisite: graduate standing in Civil and Environmental Engineering.

CEE 504 Finite Element Methods in Structural Mechanics (3) Extension of the matrix methods of structural analysis to the solution of elasticity, plate, and shell problems by use of finite element approximations. Discussion of convergence and bounding and extension to investigation of stability and finite deformations. Prerequisite: CEE 501 or permission of instructor.

CEE 505 Engineering Computing (3) Lowes, Miller, Turkiyyah Applied computing in civil and environmental engineering contexts, including physical systems modeling, graphics and visualization, and data management. Program development using contemporary tools and strategies. Computer architecture fundamentals, theoretical and practical issues affecting memory use and performance. Offered: AW.

principles controlling the fate and distribution of environmental pollutants, and use of models to apply those principles. Includes modeling of physical transport in conjunction with chemical equilibrium and reaction kinetics. Applications models, and operational considerations for biological treatment systems used in environmental engineering. Applications include activated sludge design and optimization, fixed film reactors, nitrification, nitrogen removal, phosphorus removal, anaerobic treatment, and toxic organics removal. Prerequisite: CEE 540 and CEE 482 or equivalent.

CEE 545 Advanced Environmental Chemistry (3) Behavior of controlled chemical species (heavy metals, pesticides, disinfection by-products, and endocrine disruptors) and persistent organic pollutants in the environment. Modeling of chemical interactions pertinent to environmental technologies (ozonation, advanced oxidation, photochemical transformations, halogenation, dehalogenation, application of zero-valence metals and electrochemical controls). Prerequisite: aquatic chemistry or environmental engineering. Application of ecological concepts for analysis and interpretation of bioremediation problems and data (eutrophication, acid rain, and toxicity). Students participate in presentation and discussion of current research. Prerequisite: CEE 462 or BIOL 473 or permission of instructor.

CEE 547 Lake and Watershed Management (3) Application of current techniques for lake and watershed analysis and modeling using fundamentals of limnology. Approaches to restoring eutrophic lakes, land use impacts on water quality. Practical exercises using data from real lake systems. Prerequisite: CEE 462/ FISH 434, BIOL 473, or permission of instructor.

CEE 549 Advanced Topics in Environmental Engineering, Chemistry, and Biology (3) Special topics of current importance in environmental engineering. Application of fundamental chemical and biological principles to the study of such phenomena as the behavior of aqueous colloids, corrosion processes, bacterial metabolism in chemically complex solutions, and acid precipitation. May be taken more than once for credit. Prerequisite: CEE 540, CEE 541.

CEE 550 Environmental Chemical Modeling (3) Benjamie, Murray Physical/chemical principles controlling the fate and distribution of environmental pollutants, and use of models to apply those principles. Includes modeling of physical transport in conjunction with chemical equilibrium and reaction kinetics. Applications
include acid mine drainage, acid deposition, and groundwater and lake water contamination. Offered: jointly with OCEAN 524.

CEE 552 Environmental Regulations (3) GE
Principal emphasis on regulations pertaining to construction site stormwater runoff, including regulations for ground and requirements, how to analyze potential site problems and prepare plans to solve them, and specifying practices to avoid or reduce water pollutant releases. Briefer coverage of regulations concerning air pollutants, wetlands, hazardous wastes, and endangered species.

CEE 553 Seminar-Topics in Atmospheric Chemistry (1-3, max. 6) Charton, Harrison Seminar for atmospheric scientists, chemists, engineers in problems associated with the chemical composition of the atmosphere. Covers wide variety of topics, ranging from the natural system to urban pollution and global atmospheric change. Faculty lectures, student participation. Prerequisite: ATM S 301 or permission of instructor. Offered: jointly with ATM S 525.

CEE 554 Acoustics of Environmental Noise (4) Offered: jointly with M E 528.

CEE 555 Topics in Environmental Health (3) Introduction to human biology, including physiology, epidemiology, and toxicology. Study of contemporary environmental health problems and practices as they relate to radiological health, solid-waste disposal, occupational health, biometeorology, and bioengineering.

CEE 557 Air Resources Management (3) Technical, administrative, and legal aspects of air conservation. Current case studies involving engineering analysis, air-quality modeling, and regulatory aspects at local, state, and federal governmental levels.

CEE 558 Control of Gaseous Air Pollutants (3) Physical and chemical processes used to control gaseous air pollutants. Absorption into liquids. Aqueous spray dryer scrubbers. Adsorption beds. Control of sulfur oxide and nitrogen oxide. Case studies of control systems. Prerequisite: CHEM E 435 or permission of instructor. Offered: jointly with CHEM E 566; even years.

CEE 559 Control of Particulate Air Pollutants (3) Processes used to control emissions of particulate air pollutants. Use of settling chambers, cyclones, fabric filters, wet scrubbers, and electrostatic precipitators to control aerosol particles. Case studies of particulate air-pollutant control systems. Prerequisite: CHEM E 485 or permission of instructor. Offered: jointly with CHEM E 567; odd years.

CEE 560 Risk Assessment for Environmental Health Hazards (3/4) Faustman Examines context, methodologies, data, uncertainties, and institutional arrangements for risk assessment. Qualitative and quantitative approaches to identification, characterization, and control of environmental hazards to health emphasized through didactic and real world cases. Offered: jointly with ENV H 577/PB AF 589; A.

CEE 570 Hydrodynamics (4) Applications of the equations of motion to the flow of ideal and real fluids. Stagnation and fluid potential motion. Viscous flows; Navier-Stokes equations and some exact solutions. Boundary-layer theory. Introduction to turbulence. Two- and three-dimensional examples, including free surface flows. Applications of field equations to problems of engineering significance. Prerequisite: CEE 342 or equivalent.

CEE 571 Hydrodynamics in Water Quality (3) Theoretical, field study, and laboratory model approaches to diffusion in transport problems of concern to water resources engineers. Prerequisite: CEE 342 or permission of instructor.

CEE 573 Advanced Computational Hydraulics (4) Review of hydrodynamic and transport equations for hydraulic engineering application; numerical solution methods; implementation and practice with existing two- and three-dimensional numerical models; numerical model calibration and verification techniques; case studies. Theoretical and civil engineering decision makers. Prerequisite: CEEWA 474, CEE 570, CEE 571 or permission of instructor.

CEE 574 Advanced Hydrology (3) Detailed treatment of statistical methods used in hydrologic analysis. Stochastic hydrology, detailed examination and use of a deterministic watershed model (Stanford Watershed Model). Prerequisite: graduate standing in civil and environmental engineering or permission of instructor.

CEE 575 Advanced Hydrology (3) Detailed treatment of statistical methods used in hydrologic analysis. Stochastic hydrology, detailed examination and use of a deterministic watershed model (Stanford Watershed Model). Prerequisite: graduate standing in civil and environmental engineering or permission of instructor.

CEE 576 Water Resources Planning (3) Palmer Engineering, social, and economic factors involved in water resource development and management; water policies, programs, and administration; use relationships and conflicts; considerations for regional water resource systems. Offered: W.

CEE 577 Water-Quality Management (3) Application of biological, ecological, and chemical processes to modeling of water quality and use of such models in appropriate management of water resource systems. Includes units on the modeling of temperature, BOD, nutrient, phytoplankton, zooplankton, and other processes in lakes, streams, and estuaries. Recommended: CEE 476, CEE 485, CEE 462/FISH 434, and CEE 491.

CEE 578 Water Resource System Management and Operations (3) Burgess, Palmer A readings course in recent literature related to the modeling and management of water resources. Topics include drought management, expansion of existing water supplies, hydropower production, streamflow forecasting, water demand forecasting, regional water planning, climate change, and other topical issues. Recommended: CEE 556, CEE 557. Offered: A.

CEE 579 Advanced Traffic Detection Systems (3) Wang Introduction to advanced tracking and detection technologies in transportation engineering, including Global Positioning Systems (GPS), inductive loop detection systems, remote traffic microwave radar, computer-vision based technologies, and other emerging detection technologies with cutting-edge research in these areas.

CEE 580 Urban Transportation Planning (4) Rutherford Introduction to transportation planning, including trends and issues, land use and transportation interaction, surveys, public involvement, demand management, technology, forecasting, impacts, and policy strategies.

CEE 581 Travel Demand Forecasting (4) Rutherford Application of mathematical models to forecast urban travel behavior. Introduces emerging methods, land use models, travel demand models, including trip generation, trip distribution, mode choice, and network assignment. Discusses validation and ethics.

CEE 582 Intelligent Transportation Systems (3) Application of modern computer and communication technologies to transportation systems. Benefits to public agencies, commercial companies, and travelers. Coordination between private and public sectors. Intelligent Transportation System (ITS) social, organizational, and operational changes.

CEE 583 Airport Engineering (3) Definitions and terminology relating to airport engineering. Characteristics of aircraft, flight control, and resulting impact upon design process. Airport capacity, configuration, and planning associated with terminal design. Emphasis on geometric and structural design of pavements and airside. Design projects relating to airport engineering required. Prerequisite: permission of instructor.

CEE 584 Analytical Methods in Transportation I (3) Application of analytical and statistical methods to transportation planning problems. Analysis of probability distributions that describe variables. Development of statistical models for predicting transportation phenomena. Elementary sampling theory hypothesis testing, regression analysis, time series analysis, applied to transportation data. Prerequisite: graduate standing or permission of instructor. Offered: Sp.

CEE 585 Analytical Methods in Transportation II (3) Applications of advanced econometric methods to transportation issues. Topics include, but not limited to, systems of equations, duration models, limited dependent variable approaches, and count models. Hands-on modeling, with numerous data sets, available for application. Collaborative projects. Prerequisite: CEE 584 or permission of instructor.

CEE 586 Pedestrian Travel, Land Use, and Urban Form (3) Graduate seminar concentrating on walking as a mode of transportation in cities and city-regions, including social, cognitive, and perpetual dimensions of pedestrian movement and behavior theory. Offered: Sp.

CEE 587 Global Trade, Transportation, and Logistics Management (3) Goodchild, Schmitt Provides an overview of trade, transportation, and logistics activities. Develops
an understanding of the physical and information flows in supply chains, and the economic drivers of supply chain choices. Includes methods to analyze and improve logistics and transportation systems, including applications of policy, technology, and infrastructure. Offered: jointly with GTTL 501/OPMGT 535, AWSp.

CxEE 588 Land Use/Transportation Models (3)
Review of theoretical basis of several existing models used to forecast urban growth patterns and their associated land use, transportation, and energy requirements. Model validation studies in relation to empirical studies of urban growth and change. Environmental implications of alternative urban growth patterns. Offered: jointly with URBDP 530.

CxEE 589 Transit Systems Planning (3)
Planning, operational methods for urban public transportation. Review of technological, operating characteristics of vehicles and systems; financing, management, institutional aspects. Paratransit. Short-range planning, operational strategies, revenue-fare structures. Service network; route, frequency, mode choice, transit demand relating to service. Computer-aided methods for planning, design of transit systems. Prerequisite: graduate standing or permission of instructor.

CxEE 590 Traffic Systems Operations (3)
Operational planning, management of arterial and freeway traffic systems. Review of transporta-
tion system management strategies to achieve more efficient use of existing infrastructure, including improved and innovative traffic control systems and demand management policies, measures of effectiveness, impact assessment, traveler response. Introduction to use of relevant computer models and packages.

CxEE 591 Freight Transportation (3)
Overview of the technical and institutional aspects of transporting freight. Topics include the different modes of moving freight, the technology of transferring freight between modes at ports and terminals, issues that impact freight movement such as congestion and government regulation, and the future of freight mobility.

CxEE 592 Statistical Fundamentals for Construction and Materials Applications (3)
Mahoney. Overviews statistical measures used in various construction and materials decision-making processes. Subjects include data distributions, hypothesis tests (making decisions with statistics), regression analysis, sampling, quality control and assurance, and experimental design. Uses construction data to illustrate these measures. Offered: Sp.

CxEE 593 Construction Labor Law (3)
Goldblatt. In-depth study of construction labor topics, including labor-management organization, legislation, and regulation, collective bargaining, and job site administration. Examines importance of labor relations in construction firms, whether in a union setting or an open shop environment.

CxEE 594 Computer-Aided Construction (3)
Wang. Application of information technology to construction management and cost estimating. Topics include, but not limited to, computerized construction, fundamentals of computer hardware, construction management software tools, Web publishing, GPS application, and construction data management. Offered: S.

CxEE 595 Construction Materials (3)
Mahoney, Muench. Examines the use of aggregates, bituminous mixtures, Portland cement concrete, roller compacted concrete, soil and site stabilization, utility cuts and flowable backfill in construction projects. Emphasis on the behavior of materials in various construction applications. Offered: W.

CxEE 596 Pavement Construction (3)
Mahoney, Muench. Examines pavement construction, including pavement contracts and specifications, quality control and assurance programs, and plant and laydown operations. Reviews both national and international pavement construction practices. Offered: Sp.

CxEE 597 Pavement Construction and Quality Control (3)
Covers concepts of hot mix asphalt (HMA) and portland cement concrete (PPC) pavement construction including plant production, transport, placement, compaction, early age behavior, long-term performance, emerging technologies and research. Benefits students with a construction or transportation focus. Uses combination of instructor lectures, guest speakers and student led discussions.

CxEE 599 Special Topics in Civil and Environmental Engineering (1-3, max. 15)
Rutherford Special topics in civil and environmental engineering offered occasionally by permanent or visiting faculty members.

CxEE 600 Independent Study or Research (2-5)
Rutherford Topics covered depend on the faculty who offer the course and student interest. Prerequisite: permission of instructor.

CxEE 601 Internship (2)
Institution in an established program between industry, government, and the University. Prerequisite: permission of graduate program coordinator and committee chair.

CxEE 700 Master’s Thesis (*)
Prerequisite: permission of adviser.

CxEE 800 Doctoral Dissertation (*)
Prerequisite: permission of adviser.

Computer Science and Engineering

Computer Science and Engineering

CxEE 100 Fluency in Information Technology (5)
QSR Introduces skills, concepts, and capabilities necessary to effectively use information technology. Includes logical reasoning, managing complexity, operation of computers and networks, and contemporary applications such as effective Web searching and database manipulation, ethical aspects, and social impacts of information technology. Not available for credit to students who have completed CEE 142 or ENGR 142. Offered: jointly with INFO 100.

CCEE 142 Computer Programming I (4) NW, QSR Basic programming-in-the-small abilities and concepts including procedural programming (methods, parameters, return values), basic control structures (sequence, if/else, for loop, while loop), file processing, arrays and an introduction to defining objects. Offered: AWSpS.

CCEE 143 Computer Programming II (5) NW, QSR Continuation of 142. Concepts of data abstraction and encapsulation including stacks, queues, linked lists, binary trees, recursion, instruction to complexity and use of predefined collection classes. Prerequisite: CEE 142. Offered: AWSpS.

CxEE 190 Current Topics in Computer Science and Engineering (1-5, max. 15)
CxEE 303 Concepts and Tools for Software Development (3) Introduction to key concepts and tools in the development of software not introduced in the introductory programming courses. Includes programming with explicit memory management and layout (e.g. C or C++), techniques for group software development, modern design, implementation, and testing patterns and strategies, and societal impact. Prerequisite: CEE 143.

CxEE 321 Discrete Structures (4)
Mahoney Fundamentals of set theory, graph theory, enumeration, and algebraic structures, with applications in computing. Prerequisite: CEE 143, either MATH 126, MATH 129, or MATH 156.

CxEE 322 Introduction to Formal Models in Computer Science (3) Finite automata and regular expressions; context-free grammars and pushdown automata; nondeterminism; Turing machines and the halting problem. Emphasis on understanding models and their applications and on rigorous use of basic techniques of analysis. Induction proofs, simulation, diagonalization, and reduction arguments. Prerequisite: CEE 321.

CxEE 326 Data Structures (4)
Mahoney Abstract data types and their implementation as data structures. Efficient algorithms employing these data structures; asymptotic analyses. Dictionaries: balanced search trees, hashing. Priority queues: heaps. Disjoint sets with union, find. Graph algorithms: shortest path, minimum spanning tree, topological sort, search. Sorting. Not available for credit for students who have completed CEE 373. Prerequisite: CxEE 321.

CxEE 341 Programming Languages (4)
Mahoney Basic concepts of programming languages, including abstraction mechanisms, types, and scoping. Detailed study of several different programming paradigms, such as functional, object-oriented, and logic programming. No credit if CEE 413 has been taken. Prerequisite: CEE 143.

CxEE 370 Introduction to Digital Design (4)
Introduction to digital logic and its specification and simulation. Boolean algebra, combinational circuits including arithmetic circuits and regular structures, sequential circuits including finite-state-machines, use of programmable logic devices. Simulation and high-level specification techniques are emphasized.

CxEE 373 Data Structures and Algorithms (3)
Mahoney Fundamental algorithms and data structures for implementation. Techniques for solving problems by programming. Linked lists, stacks, queues, directed graphs. Trees: representations, traversals. Searching (hashing, binary search trees, multiway trees). Garbage collection, memory management. Internal and external sorting. Intended for non-majors. No credit to students who have completed 326, 374, or E E 374. Prerequisite: CEE 143.

CxEE 378 Machine Organization and Assembly Language (4)
Mahoney Differences and similarities in
machine organization; central processors; fundamentals of machine language and addressing; assembly language programming, including macros; operating system interfaces. No credit to students who have completed 410. Prerequisite: CSE 143; CSE 303; CSE 370.

CSE 399 CSE Foreign Study (*) Upper division computer science or computer engineering course, taken through an approved study abroad program, which there are no direct University of Washington equivalents. Credit/no credit only.

CSE 401 Introduction to Compiler Construction (3) Fundamentals of compilers and interpreters; symbol tables; lexical analysis, syntax analysis, semantic analysis, code generation, and optimizations for general purpose programming languages. No credit to students who have taken 413. Prerequisite: CSE 322; CSE 326; CSE 341; CSE 378.

CSE 403 Software Engineering (4) Fundamentals of software engineering using a group project as the basic vehicle. Topics covered include: software process, software project management, requirements specification, architectural and detailed design, testing and analysis, software process, and tools and environments. Prerequisite: CSE; 303; CSE 326; CSE 341; recommended: project experience in an academic or work setting.

CSE 410 Computer Systems (3) Structure and components of hardware and software systems. Machine organization, including central processor and input-output architectures; assembly language programming; operating systems, including process, storage, and file management. Intended for non-majors. No credit to students who have completed 378 or 451. Prerequisite: CSE 373.

CSE 413 Programming Languages and Their Implementation (3) Basic concepts and implementation strategies for modern functional and object-oriented programming languages such as Scheme and Java. Intended for non-majors. No credit to students who have completed CSE 341 or CSE 401. Prerequisite: CSE 373.

CSE 415 Introduction to Artificial Intelligence (3) NW Principles and programming techniques of artificial intelligence: DIG, symbol manipulation, knowledge representation, and probabilistic reasoning, learning, language understanding, vision, expert systems, and social issues. Intended for non-majors. Not open for credit to students who have completed 473. Prerequisite: CSE 373.

CSE 421 Introduction to Algorithms (3) Techniques for design of efficient algorithms. Methods for showing lower bounds on computational complexity. Particular algorithms for sorting, searching, set manipulation, arithmetic, graph problems, pattern matching. Prerequisite: CSE 322; CSE 326.

CSE 427 Computational Biology (3) Algorithmic and analytic techniques underlying analysis of large-scale biological data sets such as DNA, RNA, and protein sequences or structures, expression and proteomic profiling. Hands-on experience with databases, analysis tools, and genome markers. Applications such as sequence alignment, BLAST, phylogenetics, and Markov models. Prerequisite: CSE 326.

CSE 428 Computational Biology Capstone (5) Designs and implements a software tool or software analysis for an important problem in computational molecular biology. Prerequisite: CSE 326.

CSE 431 Introduction to Theory of Computation (3) Models of computation, computable and noncomputable functions, space and time complexity, tractable and intractable functions. Prerequisite: CSE 322.

CSE 446 Machine Learning (3) Methods for designing systems that learn from data and improve with experience. Supervised learning and predictive modeling: decision trees, rule induction, nearest neighbors, Bayesian methods, neural networks, support vector machines, and model ensembles. Unsupervised learning and clustering. CSE majors only. Prerequisite: CSE 326; either STAT 390 or STAT 391.

CSE 450 Animation Production Seminar (1) Students design individual animation for pre-planning, and advanced knowledge gained in previous animation courses applied to character motion and effects. Focus on the modeling and lighting of animated characters. Students from Art, CSE, and Music team up on projects to be built on commercially-available modeling and lighting packages. Prerequisite: either CSE 457, ART 380, or MUSIC 403.

CSE 455 Computer Vision (4) Detection of objects, faces, and people in digital images, as well as sequence alignment, BLAST, phylogenetics, and Markov models. Prerequisite: CSE 326.

CSE 456 Story Design for Computer Animation (4) Animation principles and production for story development and design. Design, development, and production of several story reels, which are a tool for the pre-production of animated features and shorts. Student use authoring tools to present finished work.

CSE 457 Computer Graphics (4) Introduction to computer image synthesis, modeling, and animation. Topics may include visual perception, displays and framebuffers, image processing, affine and projective transformations, hierarchical modeling, hidden surface elimination, shading, ray-tracing, anti-aliasing, texture mapping, curves, surfaces, particle systems, dynamics, character animation, and animation principles. Prerequisite: CSE 303; CSE 326; recommended: MATH 308.

CSE 458 Computer Animation (5) Introduction to basic principles of computer generated animation. Focus on the modeling and lighting of animated characters. Students from Art, CSE, and Music team up on projects to be built on commercially-available modeling and lighting packages. Prerequisite: either CSE 457, ART 380, or MUSIC 403.

CSE 459 Pre-Production for Collaborative Animation (5) Pre-production of collaboratively designed animated shorts. In-depth analysis of classical and computer generated works. Character design and pre-planning, model sheets, character rigging, storyreel and animatics, character motion, design for multiple characters, and principles of animation as applied to character motion and effects. Prerequisite: CSE 458.

CSE 460 Animation Capstone (5) The knowledge gained in previous animation courses to produce a short animated film. Topics include scene planning, digital cinematography, creature and hard surface modeling, animation and basics of character animation, and rendering techniques. Prerequisites: CSE 458, CSE 459.

CSE 464 Advanced Topics in Digital Animation (5) Students design individual animated works for professional quality demos, 2- and 3-D animations, special effects design, advanced character animation techniques, 3-D paint techniques and integration, short design, sequence planning, non-photorealistic rendering options, interactive animation for pre-planning, and advanced production techniques and strategies. Prerequisite: CSE 458.
CSE 466 Software for Embedded Systems (4)
Software issues in the design of embedded systems. Microcontroller architectures and peripherals, embedded operating systems and device drivers, compilers and debuggers, timer and interrupt systems, interfacing of devices, communications and networking. Emphasis on practical application of development platforms. Prerequisite: CSE 326; CSE 370; CSE 378.

CSE 467 Advanced Digital Design (4)
Advanced topics in the design of digital systems. Hardware description languages, combinational and sequential logic synthesis and optimization methods, partitioning, mapping to regular structures. Emphasis on reconfigurable logic as an implementation medium. Memory system design. Digital communication including serial/parallel and synchronous/asynchronous methods. Prerequisite: CSE 326; CSE 370.

CSE 468 Very Large Scale Integration (5)
Introduction to CMOS technology and circuit design; implementation of combinational and sequential logic; VLSI design methodologies; CAD tools for layout, simulation, and validation. Students design a VLSI chip using modern CAD tools. Prerequisite: CSE 370.

CSE 471 Computer Design and Organization (4) CPU instruction set, microarchitecture, and processor organization. Memory hierarchy design and organization, I/O and system components interconnection. Laboratory project involves design and simulation of an instruction set processor. Prerequisite: CSE 370; CSE 378.

CSE 472 Introduction to Computational Linguistics (5) NW/ILPA Hoard Introduction to computer applications of linguistic theory, including syntactic processing, semantic and pragmatic interpretation, and natural language generation. Prerequisite: either LING 200 or LING 400; either LING 461 or CSE 321. Offered: jointly with LING 472.

CSE 473 Introduction to Artificial Intelligence (3) Principal ideas and developments in artificial intelligence: Problem solving and search, game playing, knowledge representation and reasoning, uncertainty, machine learning, natural language processing. Not open for credit to students who have completed 415. Prerequisite: CSE 326; recommended: CSE 341.

CSE 476 Embedded System Design (5) System building course to provide students with a complete experience in embedded system design. Students will design, simulate, construct, debug, and document a substantial project of their choosing. Lectures will focus on case studies and emerging components and platforms. Prerequisite: CSE 451; CSE 466.

CSE 477 Digital System Design (5) Capstone design experience. Prototype a substantial project mixing hardware, software, and communication components. Focuses on use of embedded processors and programmable logic in digital system design, case studies, and emerging components and platforms. Provides a complete experience in embedded system design and management. Prerequisite: CSE 451; CSE 466; CSE 467.

CSE 481 Capstone Software Design (5, max. 15) Students work in teams to design and implement a software project involving multiple areas of the CSE curriculum. Emphasis is placed on the development process itself, rather than on the product. Prerequisite: CSE major; CSE 326; CSE 341; CSE 378; substantial programming experience, such as in CSE 451 or CSE 457.

CSE 484 Computer Security (4) Foundations of modern computer security, including software security, operating system security, network security, applied cryptography, human factors, authentication, anonymity, and web security. Prerequisite: CSE 326; CSE 376.

CSE 490 Special Topics in Computer Science and Engineering (1-5, max. 15) Lectures, discussions, and possibly labs on topics of current interest in computer science and engineering not covered by other CSE undergraduate courses.

CSE 497 Undergraduate Research Seminar (1) Students prepare and give a public talk on their faculty-sponsored research projects.

CSE 498 Senior Project (1-9, max. 9) A report (and perhaps demonstration) describing a development, survey, or small research project in computer science or an application to another field. Objectives: (1) integrating material from several courses, (2) introducing the professional literature, (3) gaining experience in writing a technical document, and (4) showing evidence of independent work. Work normally extends over more than one quarter, for a maximum of 6 credits for 498, 9 credits are required for 498H.

CSE 499 Reading and Research (1-24, max. 24) Available in special situations for advanced computer science majors to do reading and research in field, subject to approval of undergraduate adviser and CSE faculty member. Fee elective, but does not replace core course or computer science elective. Credit/no credit only.

CSE 501 Programming Language Analysis and Implementation (3) Design and implementation of compilers and run-time systems for imperative, object-oriented, and functional languages. Intra- and interprocedural analyses and optimizations. Prerequisite: CSE major and CSE 341; recommended CSE 401.

CSE 503 Software Engineering (3) Specification, implementation, and testing of large, multiperson, software systems. Topics include abstraction, information hiding, software development environments, and formal specifications. Prerequisite: CSE major and CSE 322, CSE 326, and CSE 376 or equivalents.

CSE 504 Advanced Topic in Software Engineering (3) Topics vary but may include software design and evolution, formal methods, requirements specifications, software and system safety, reverse engineering, real-time software, metrics and measurement, programing environments, and verification and validation. Prerequisite: CSE major or permission of instructor.

CSE 505 Principles of Programming Languages (3) Design and formal semantics of modern programming languages, includes functional and object-oriented languages. Prerequisite: CSE major and CSE 341.

CSE 506 Advanced Topics in Programming Languages (3) May include functional, object-oriented, parallel, and logic programming languages; semantics for languages of these kinds; type declaration, inference, and checking (including polymorphic types); implementation issues, such as compilation, lazy evaluation, combinators, parallelism, various optimization techniques. Implementation project required. Prerequisite: CSE major, CSE 501 which may be taken concurrently, and CSE 505.

CSE 510 Advanced Topics in Human-Computer Interaction (3) Content varies, including interface issues for networks, embedded systems, education applications, safety and critical systems, graphics and virtual reality, databases, and computer-supported cooperative work.

CSE 515 Statistical Methods in Computer Science (3) Introduction to the probabilistic and statistical techniques used in modern computer systems. Graphical models, probabilistic inference, statistical learning, sequential models, decision theory. Prerequisite: either STAT 341 or STAT 391, and graduate standing in computer science, or permission of instructor.

CSE 519 Current Research in Computer Science (1, max. 3) Weekly presentations on current research activities by members of the department. Only Computer Science graduate students may register, although others are encouraged to attend. Credit/no credit only.

CSE 520 Computer Science Colloquium (1, max. 9) Weekly public presentations on topics of current interest by visiting computer scientists. Credit/no credit only.

CSE 521 Design and Analysis of Algorithms I (3) Principles of design of efficient algorithms: recursion, divide and conquer, balancing, dynamic programming, greedy method, network flow, linear programming. Correctness and analysis of algorithms. NP-completeness. Prerequisite: CSE major and CSE 326 or equivalent. CSE majors only.

CSE 522 Design and Analysis of Algorithms II (3) Analysis of algorithms more sophisticated than those treated in 521. Content varies and may include such topics as algebraic algorithms, combinatorial algorithms, techniques for proving lower bounds on complexity, algorithms for special computing devices such as networks or formulas. Prerequisite: CSE major and CSE 521.

CSE 523 Computational Geometry (3) Algorithms for discrete computational geometry. Geometric computation, range searching, convex hulls, proximity, Voronoi diagrams, intersection. Application areas include VLSI design and computer graphics. Prerequisite: CSE major and CSE 521; recommended: CSE 457 or equivalent.

CSE 524 Parallel Algorithms (3) Design and analysis of parallel algorithms: fundamental parallel algorithms for sorting, arithmetic, matrix and graph problems and additional selected topics. Emphasis on general techniques and approaches used for developing fast and efficient parallel algorithms and on limitations to their efficiency. Prerequisite: CSE major and CSE 521.

CSE 525 Randomized Algorithms and Probabilistic Analysis (3) Beane, Guruswami, Karlin, Lee Examines algorithmic techniques: random selection, random sampling, backwards analysis, algebraic methods, Monte Carlo
methods, and randomized rounding; random graphs; the probabilistic method; Markov chains and random walks; and analysis tools: random variables, moments and deviations, Chernoff bounds, martingales, and balls in bins. Prerequisite: CSE 521 or equivalent; CSE majors only. Offered: WSp.

CSE 527 Computational Biology (3) Introduces computational methods for understanding biological systems at the molecular level. Problem areas such as mapping and sequencing, sequence analysis, structure prediction, phylogenetic inference, regulatory analysis. Techniques such as dynamic programming, Markov models, expectation-maximization, local search. Prerequisite: graduate standing in biological, computer, mathematical or statistical science, or permission of instructor.

CSE 528 Computational Neuroscience (3) Introduction to computational methods for understanding nervous systems and the principles governing their operation. Topics include representation of information by spiking neurons, information processing in neural circuits, and algorithms for adaptation and learning. Prerequisite: elementary calculus, linear algebra, and statistics, or by permission of instructor. Offered: jointly with NEUBEH 528.

CSE 531 Computability and Complexity I (3) Deterministic and nondeterministic time and space complexity, complexity classes, and complete problems. Time and space hierarchies. Alternation and the polynomial-time hierarchy. Circuit complexity. Probabilistic computation. Exponential complexity lower bounds. Interactive proofs. Prerequisite: CSE majors only; CSE 322 or equivalent.

CSE 532 Computational Complexity II (3) Advanced computational complexity including several of the following: circuit complexity lower bounds, #P and counting classes, probabilistically-checkable proofs, de-randomization, logic characteristics of complexity, communication complexity, time-space tradeoffs of data structures. Prerequisite: CSE majors only; Recommended: CSE 531.

CSE 533 Advanced Topics in Complexity Theory (3) An in-depth study of advanced topics in computational complexity. Prerequisite: CSE major.

CSE 536 Theory of Distributed Computing (3) Formal approaches to distributed computing problems. Topics vary, but typically include models of distributed computing, agreement problems, impossibility results, mutual exclusion protocols, concurrent reading while writing protocols, knowledge analysis of protocols, and distributed algorithms. Prerequisite: CSE major.

CSE 543 Computer System Performance (3) Emphasizes the use of analytic models as tools for evaluating the performance of centralized, distributed, and parallel computer systems. Prerequisite: CSE major and CSE 451.

CSE 546 Data Mining (3) Methods for identifying valid, novel, useful, and understandable patterns in data. Induction of predictive models from data: classification, regression, and probability estimation. Discovery of clusters and association rules.

CSE 549 High-Performance Computer Architectures (3) Algorithm design, software techniques, computer organizations for high-performance computing systems. Selected topics from: VLSI complexity for parallel algorithms, compiling techniques for parallel and vector machines, large MIMD machines, interconnection networks, reconfigurable memories, memory hierarchies in multiprocessors, algorithms for parallel machines, data flow architectures. Prerequisite: CSE major and CSE 548 or permission of instructor.

CSE 551 Operating Systems (3) Operating system design and construction techniques. Concurrent programming, operating system kernels, correctness, deadlock, protection, transaction processing, design methodologies, comparative structure of different kinds of operating systems, and other topics. Prerequisite: CSE major and CSE 451.

CSE 552 Distributed and Parallel Systems (3) Principles, techniques, and examples related to the design, implementation, and analysis of distributed and parallel computer systems. Prerequisite: CSE major and CSE 551.

CSE 557 Computer Graphics (3) Introduction to image synthesis and computer modeling, emphasizing the underlying theory required for undertaking computer graphics research. Topics include color theory, image processing, affine and projective geometry, hidden-surface determination, photorealistic image synthesis, advanced curve and surface design, dynamics, realistic character animation. Prerequisite: CSE major, solid knowledge of linear algebra.

CSE 558 Special Topics in Computer Graphics (3) Advanced topics in computer graphics not treated in CSE 557. Topics vary from year to year but typically include advanced aspects of image synthesis, animation, and 3D photography. Prerequisite: CSE major and CSE 557 or permission of instructor.

CSE 561 Computer Communication and Networks (3) Fundamentals of data transmission: coding, message formats, and protocols. Organization of computer networks. Examples of network implementations. Prerequisite: CSE or EE major and CSE 451 or equivalent.

CSE 567 Principles of Digital Systems Design (3) Principles of logic design, combinational and sequential circuits, minimization techniques, structured design methods, CMOS technology, complementary and ratioed gates, delay estimation and performance analysis, arithmetic circuits, memories, clocking methodologies, synthesis and simulation tools, VLSI processor architecture. Prerequisite: CSE major and basic knowledge of logic design.

CSE 568 Introduction to VLSI Systems (3) Introduction to CMOS technology and circuit design; combinational logic-design alternatives; register-design and system-clocking methodologies; datapath and subsystem design; VLSI system-design methodologies; CAD tools for synthesis, layout, simulation and validation; design of a complex VLSI chip. Prerequisite: CSE 567 or permission of instructor. CSE majors only.

CSE 571 AI-based Mobile Robotics (3) Overview of mobile robot control and sensing. Behavior-based control, world modeling, localization, navigation, and planning Probabilistic sensor interpretation. Basic robotics filters. Projects: Program real robots to perform navigation tasks. Prerequisite: CSE major and CSE 473, or permission of instructor.

CSE 573 Artificial Intelligence I (3) Intensive introduction to artificial intelligence: Problem solving and search, game playing, knowledge representation and reasoning, uncertainty, machine learning, natural language processing. Prerequisite: CSE 421 or equivalent; exposure to logic, probability and statistics; CSE major.

CSE 574 Artificial Intelligence II (3) Advanced topics in artificial intelligence. Subjects include planning, natural language understanding, qualitative physics, machine learning, and formal models of time and action. Students are required to do projects. Prerequisite: CSE major and CSE 573.

CSE 576 Computer Vision (3) Overview of computer vision, emphasizing the middle ground between image processing and artificial intelligence. Image formation, preattentive image processing, boundary and region representations, and case studies of vision architectures. Prerequisite: Solid knowledge of linear algebra, good programming skills, CSE or E E major or permission of instructor. Offered: jointly with E E 576.

CSE 577 Special Topics in Computer Vision (3) Topics vary and may include vision for graphics, probabilistic vision and learning, medical imaging, content-based image and video retrieval, robot vision, or 3D object recognition. Prerequisite: CSE/E E 576 or permission of instructor. Offered: jointly with E E 577.

CSE 581 Parallel Computation in Image Processing (3) Parallel architectures,
algorithms, and languages for image processing. Cellular array, pipelined and pyramid machines, instruction sets, and design issues. Parallel implementations of filtering, edge detection, segmentation, shape, stereo, motion, relaxation algorithms, multiresolution methods, and iconic-to-symbolic transforms. Students write and debug programs for parallel computers. Prerequisite: permission of instructor.

CSE 590 Research Seminar (*) Several offerings each quarter, on topics of current interest. Prerequisite: permission of instructor.

CSE 591 Group Projects in Computer Science (1-3, max. 3) Focuses on specialized topics and research activities in computer science. Credit/no credit only.

CSE 597 Performance Analysis (4) Broad introduction to computer system performance evaluation techniques and their application. Includes measurement/benchmarking, stochastic and trace driver simulation, stochastic queueing networks, and timed Petri nets. Applications of the techniques are studied using case study papers. CSE majors only. Not open for credit to students who have completed CSE 543.

CSE 599 Special Topics in Computer Science (1-3, max. 15) Studies of emerging areas and specialized topics in computer science.

CSE 600 Independent Study or Research (*) Credit/no credit only.

CSE 700 Master's Thesis (*) Credit/no credit only.

CSE 800 Doctoral Dissertation (*) Credit/no credit only.

Computer Science and Engineering Professional Master's Program

CSE P 501 Compiler Construction (4) Principles and practice of building efficient implementations of modern programming languages. Lexical, syntactic, and semantic analysis of programs. Intermediate program representations. Intra- and interprocedural analysis and optimization. Run-time system techniques. Related programming environment facilities such as source-level debuggers and profilers. Prerequisite: CSE majors only.

CSE P 503 Principles of Software Engineering (4) Study of major developments in software engineering over the past three decades. Topics may include design (information hiding, layering, open implementations), requirements specification (informal and formal approaches), quality assurance (testing, verification and analysis, inspections), reverse and re-engineering (tools, models, approaches). Prerequisite: CSE majors only.

CSE P 505 Programming Languages (4) A study of non-imperative programming paradigms such as functional, object-oriented, logic, and constraint programming. Programming language semantics and type theory. Prerequisite: CSE majors only.

CSE P 510 Human Computer Interaction (4) Topics in human-computer interaction, including tools and skills for user interface design, user interface software architecture, rapid prototyping and iterative design, safety and critical systems, evaluation techniques, and computer supported cooperative work. Prerequisite: CSE majors only.

CSE P 521 Applied Algorithms (4) Principles of design of efficient algorithms with emphasis on algorithms with real world applications. Examples drawn from computational geometry, biology, scientific computation, image processing, combinatorial optimization, cryptography, and operations research. Prerequisite: CSE majors only.

CSE P 524 Parallel Computation (4) Survey of parallel computing including the processing modes of pipelining, data parallelism, thread parallelism, and task parallelism; algorithmic implications of memory models; shared memory and message passing; hardware implementations; bandwidth and latency; synchronization, consistency, interprocessor communication; programming issues including implicit and explicit parallelism, locality, portability. CSE majors only.

CSE P 531 Computability and Complexity Theory (4) Survey of computer computation, including Turing Machines, Church’s Thesis, computability, incompleteness, undecidability, complexity classes, problem reductions, Cook’s theorem, NP-completeness, randomized computation, cryptography, parallel computation, and space complexity. Some emphasis will be placed on historical and philosophical aspects of the theory of computation. Prerequisite: CSE PMP majors only.

CSE P 544 Database Management System (4) Introduction to the principles of database management systems. Topics include database system architecture, data models, theory of database design, query optimization, concurrency control, crash recovery, and storage strategies. CSE majors only.

CSE P 545 Transaction Processing (4) Technology supporting reliable large-scale distributed computing, including transaction programming models, TP monitors, transactional communications, persistent queuing, software fault tolerance, concurrency control and recovery algorithms, distributed transactions, two-phase commit, data replication. Prerequisite: CSE majors only.

CSE P 546 Data Mining (4) Methods for identifying valid, novel, useful, and understandable patterns in data. Induction of predictive models from data: classification, regression, probability estimation. Discovery of clusters and association rules.

CSE P 548 Computer Architecture (4) Architecture of the single-chip microprocessor: instruction set design and processor implementation (pipelining, multiple issue, speculative execution). Memory hierarchy: on-chip and off-chip caches, TLBs and their management, virtual memory from the hardware viewpoint. I/O devices and control: buses, disks, and RAIDs. Prerequisite: CSE majors only.

CSE P 552 Distributed Systems (4) Principles, techniques, and examples related to the design, implementation, and analysis of distributed computer systems. Prerequisite: CSE PMP majors only.

CSE P 557 Current Trends in Computer Graphics (4) Introduction to computer image synthesis, modeling, and animation emphasizing the state-of-the-art algorithm applications. Topics may include visual perception, image processing, geometric transformations, hierarchical modeling, hidden-surface elimination, shading, ray-tracing, anti-aliasing, texture mapping, curves, surfaces, particle systems, dynamics, realistic character animation, and traditional animation principles. Prerequisite: CSE majors only.

CSE P 561 Network Systems (4) Current choices and challenges in network systems. Fundamental concepts combined with emphasis on evaluation of design/operations alternatives. Topics include alternative link, network, and transport-layer technologies, topologies, routing, congestion control multimedia, IPv6, ATM v. IP, network management and policy issues. Prerequisite: CSE majors only.

CSE P 567 Design and Implementation of Digital Systems (4) Overview of current implementation technologies for digital systems including custom integrated circuits, field-programmable logic, and embedded processors. Systems components such as buses and communications structures, interfaces, memory architectures, embedded systems, and application-specific devices. Focus on the design of large systems using modern CAD tools. Prerequisite: CSE majors only.

CSE P 573 Applications of Artificial Intelligence (4) Introduction to the use of Artificial Intelligence tools and techniques in industrial and company settings. Topics include foundations (search, knowledge representation) and tools such as expert systems, natural language interfaces and machine learning techniques. Prerequisite: CSE majors only.

CSE P 576 Computer Vision (4) Provides an overview of computer vision, emphasizing the middle ground between image processing and artificial intelligence. Image formation, pre-attentive image processing, boundary and region representations, and case studies of vision architectures.

CSE P 590 Special Topics in Computer Science (1-4, max. 20)

CSE P 595 Software Entrepreneurship (4) Provides an overview of the major elements of entrepreneurial activity in software, including market identification and analysis, evaluation and planning of the business, financing, typical operating and administrative problems, and alternatives for growth or sale.

CSE P 596 Business Basics Computer Science Professionals (4) Business principles relevant to the software industry in four areas: competitive strategy, finance, accounting, and human resources. Organized as a series of case studies and lectures. Progresses from an emphasis on tools to a more high-level look at competitive dynamics in high-tech industries.

CSE P 600 Independent Study or Research (1-4)

Electrical Engineering

operational amplifiers. Solution of first and second order linear differential equations associated with basic circuit forms. Prerequisite: either MATH 126 or MATH 136; PHYS 122.

E E 235 Continuous Time Linear Systems (5) Introduction to continuous time signal analysis. Basic signals including impulses, pulses, and unit steps. Periodic signals. Convolution of signals. Fourier series and transforms in discrete and continuous time. Computer laboratory. Prerequisite: either MATH 136, MATH 307, or AMATH 351 any of which may be taken concurrently; PHYS 122; CSE 142, which may be taken concurrently.

E E 299 Special Topics in Electrical Engineering (1-5, max. 10) Contemporary topics at the advanced undergraduate elective level. Faculty presents advanced elective topics not included in the established curriculum.

E E 311 Devices and Circuits I (5) Physics. characteristics, applications, analysis, and design of circuits using semiconductor diodes and field-effect transistors with an emphasis on large-signal behavior and digital logic circuits. Classroom concepts are reinforced through laboratory experiments and design exercises. Prerequisite: 1.0 in E E 233.

E E 331 Devices and Circuits II (5) Characteristics of bipolar transistors, large- and small-signal models for bipolar and field effect transistors, linear circuit applications, including low and high frequency analysis of differential amplifiers, current sources, gain stages, and output stages, internal circuitry of op-amps, op-amp configurations, op-amp stability and compensation. Weekly laboratory. Prerequisite: 1.0 in E E 331.

E E 351 Energy Systems (5) Develops understanding of modern energy systems through theory and analysis of the system and its components. Discussions of generation, transmission and utilization are complemented by environmental and energy resources topics as well as electromagnetic conversion, power electronics, electric safety, renewable energy, and electricity blackouts. Prerequisite: 1.0 in E E 233.

E E 361 Applied Electromagnetics (5) Introductory electromagnetic field theory and Maxwell’s equations in integral and differential forms; uniform plane waves in linear media; boundary conditions and reflection and transmission of waves; guided waves; transmission lines and Smith chart; electrostatics. Prerequisite: 1.0 in E E 233; MATH 324; PHYS 123.

E E 389 Introduction to Professional Issues (1) Afromowitz Covers topics of interest to students planning a professional and professional path, including: salaries, he value of advanced degrees, societal expectations of engineering professionals, the corporate enterprise, ethical dilemmas, patents and trade secrets, outsourcing, and the global market.

E E 399 Special Topics in Electrical Engineering (1-5, max. 5) New and experimental approaches to current electrical engineering problems. May include design and construction projects.

E E 400 Advanced Topics in Electrical Engineering (1-5, max. 10) Contemporary topics at the advanced undergraduate elective level. Faculty presents advanced elective topics not included in the established curriculum.

E E 401 Engineering Design in Large Teams (4) Engineering design process, including project management, team formation, working with technical literature, concept development (e.g., brainstorming-structural analysis, biomimetics, theory of inventive problem solving), intellectual property, high-tech ventures. Prerequisite: E E 215.

E E 402 Engineering Design in Large Teams: Robotics II (5) Engineering design process applied to robot design. Involves project management, mentoring, marketing, and multi-disciplinary collaboration. The team designs, prototypes, manufactures, assembles, texts, modifies, troubleshoots, and learns to operate a system that competes in an international design contest. Prerequisite: E E 215; E E 401.

E E 406 Engineering Design for K-12 Outreach (3) Wilson Design process targeted toward development of relevant activities for K-12 audiences in such areas as science and engineering. Instruction in basic design process, design specification combined with an overview of relevant cognitive/social development in K-12. Prerequisite: either E E 271, E E 331, E E 341, E E 351 or E E 361.

E E 415 Computer-Aided System Analysis and Design (3) Concepts, principles, and techniques concerned with the design, testing, and application of general-purpose problem-oriented computer programs for analyzing large-scale systems. Offered: Sp.

E E 417 Modern Wireless Communications (4) Liu Introduction to wireless networks as an application of basic communication theorems. Examines modulation techniques for digital communications, signal space, optimum receiver design, error performance, erro control coding for high reliability, multpath fading and its effects, RF link budget analysis, WiFi and CDMA systems. Prerequisite: E E 341; either IND E 315, MATH 390, or STAT 390. Offered: W.

E E 418 Network Security and Cryptography (3) Fundamental principles of cryptography and its application to network and communication security. An introduction to the fundamental tools in cryptography and the protocols that enable its application to network and communication security. Prerequisite: MATH 308; either MATH 390, STAT 390, or IND E 315. Offered: Sp.

E E 420 Design in Communications (4) Design projects in communications. Frequent projects solved by student teams. Reports and presentations. Prerequisite: 1.0 in E E 417 which may be taken concurrently.

E E 433 Analog Circuit Design (5) Design of analog circuits and systems applying modern integrated circuit technology: operational amplifiers, differential amplifiers, active filters, voltage references and regulators. Prerequisite: 1.0 in E E 332.

E E 436 Medical Instrumentation (4) Introductory course in the application of instrumentation to medical problems. Topics include transducers, signal-conditioning amplifiers, electrodes and electrochemistry, ultrasound systems, electrical safety, and the design of clinical electronics. Laboratory included. For upper-division and first-year graduate students who are preparing for careers in bioengineering—both research and industrial.

E E 447 Control System Analysis (4) Linear Servomechanism theory and design principles. Pole-zero analysis, stability of feedback systems by root locus and real-frequency response methods. Design methods of Bode and Nichols. Introduction to advanced topics in automatic control theory, state variable methods. Prerequisite: E E 233; E E 235; MATH 308.

E E 448 Control Systems Sensors and Actuators (3) Study of control systems components and mathematical models.
Amplifiers, DC servomotors, reaction mass actuators. Accelerometers, potentiometers, shaft encoders and resolvers, proximity sensors, force transducers, piezoelectric materials, gyroscopes. Experimental determination of component models and model parameters. Two 3-hour laboratories per week.

Prerequisite: either A A 447 or E E 447. Offered: jointly with A A 449.

E E 449 Design of Automatic Control Systems (4) Design of control systems for aerospace vehicles, systems with unstable dynamics, lightly damped modes, nonminimum phase, nonlinear dynamics. Computer-aided analysis, design, and simulation, with laboratory hardware-in-the-loop testing. Team design reviews, original presentations.

Prerequisite: either A A 448 or E E 448. Offered: jointly with A A 449.

E E 452 Power Electronics Design (5) Electronic conversion and control of electrical power. Includes semiconductor switching devices, power converter circuits, design of magnetics, and control of power converters. Also covers power electronics converter circuits; circuit simulation; extensive laboratory work a four-week power converter design project.

Prerequisite: 1.0 in E E 331; 1.0 in E E 351.

Prerequisite: 1.0 in E E 331; 1.0 in E E 351.

E E 455 Power System Dynamics and Protection (4) Analysis of symmetrical and unsymmetrical power systems' networks, fault analysis, and stability studies. Prerequisite: 1.0 in E E 351.

E E 456 Computer-Aided Design in Power Systems (4) Design-oriented course in power system engineering. Students are assigned a project concerning system operation and planning, steady-state and dynamic behaviors of power systems, or distribution systems. Each involves formulation of design criteria, development of approach, application of existing software. Prerequisite: either 1.0 in E E 454 or 1.0 in E E 455.

E E 457 Electric Energy Distribution Systems (4) Introduction to electric utility distribution systems. Primary and secondary network analysis and design, distribution substation problems, distribution transformers, capacitor application, overcurrent and overvoltage protection. System planning and reliability. Prerequisite: 1.0 in E E 351.

E E 462 Principles of Mobile Robotics (4) Design-oriented course in autonomous mobile robots. C programming, microprocessors, motors, gears, sensors, advanced sensing techniques, wireless communications, PID control, algorithmic control, reactive control, multi-tasking. Laboratory exercises include design, construction, and testing of autonomous mobile robots, which compete at the end of the term.

E E 463 Autonomous Mobile Robots (4) Design-oriented course in autonomous mobile robots. C programming, motors, sensors, IR and RF wireless communication, digital image processing, and robot motion control. Laboratory exercises include design, construction, and testing of autonomous mobile robots, which compete at the end of the term. Prerequisite: E E 462.

E E 465 Fiber Optics, Devices, and Applications (4) Wave propagation in optical waveguiding structures, signal distortion, coupling of modes, modulation, sources and detectors, fiber and measurement techniques, communication and sensor systems. Prerequisite: 1.0 in E E 332; recommended: E E 361.

E E 467 Antennas: Analysis and Design (4) Fundamentals of antennas, analysis, synthesis and computer-aided design, and applications in communications, remote sensing, and radars. Radiation pattern, directivity, impedance, wire antennas, arrays, numerical methods for analysis, horn antennas, microstrip antennas, and reflector antennas. Prerequisite: 1.0 in E E 361.

E E 471 Computer Design and Organization (5) Introduction to computer architecture, algorithms, hardware design for various computer subsystems, CPU control unit design, hardwired and microprogrammed control, memory organization, cache design, virtual memory, I/O organization, and I/O hardware design. Prerequisite: either E E 271 or CSE 370; CSE 134.

E E 472 Microcomputer Systems (5) Concepts of multi-level machines and computer systems organization. Utilizing microprocessors, digital computer studied at assembly- and high-language levels with emphasis on concepts of central processor architecture, memory organization, input/output and interrupts. Assembly language programming concepts applied to solution of various laboratory problems including I/O programming. Prerequisite: either E E 271 or CSE 370; CSE 143.

E E 473 Linear Integrated Circuits (5) Design of linear integrated circuits applying modern MOS and BJT integrated circuit technologies: single-stage amplifiers; current-mirror DC bias and active load circuits; stability and frequency compensation of single-stage and two-stage operational amplifiers; output stages; current and voltage reference circuits. Prerequisite: 1.0 in E E 332.

E E 476 Digital Integrated Circuit Design (5) Sechen Comprehensive view of digital integrated circuit design. Topics to be covered include the design of inverters, static logic circuits, switch logic, and synchronous logic. Students design, simulate, and layout a complete digital IC using modern computer-aided design tools. Prerequisite: either E E 271 or CSE 370; E E 331; CSE 143.

E E 477 VLSI II (5) Sechen Provides a fairly deep understanding of how IC-based memory and datapath blocks are designed using static and dynamic CMOS technologies. Gives student extensive experience with industry-standard computer-aided design tools, including Cadence (Virtuoso, DRC, LVS) and Avanti (Hpic). Credit not allowed for both E E 477 and E E 525. Prerequisite: E E 476.

E E 478 Design of Computer Subsystems (5) Design of digital computer subsystems and systems, using SSI, MSI, and LSI digital components. Combinational logic, sequential logic, memory hardware designs, I/O hardware and interface design, system design steps, high-speed digital circuit design, noise reduction techniques, and hardware description language. One four-hour laboratory each week and design project. Prerequisite: 1.0 in E E 331; 1.0 in E E 472.

E E 480 Microwave Engineering I (4) Analysis and design of transmission lines and matching circuits. Lossy transmission lines. Mode structures in metallic and dielectric waveguides. Microwave resonators and magnetic devices. Smith chart and matching techniques. Prerequisite: 1.0 in E E 361.

E E 481 Microwave Electronic Design (4) Design of microwave circuits using S-parameter techniques. Measurement techniques, CAD of microwave systems. Includes design, fabrication, and evaluation of a microwave amplifier. Prerequisite: 1.0 in E E 332; 1.0 in E E 361.

E E 482 Semiconductor Devices (4) Fundamentals of semiconductor theory: carrier diffusion and drift; concept of direct and indirect energy materials, effective mass of mobile carriers; device physics: homo- and heterojunctions, operating principles of bipolar, junction, and MOS field-effect transistors. Prerequisite: E E 332; E E 361.

E E 484 Sensors and Sensor Systems (4) Introduction to optical and solid-state chemical and physical sensors. Topics include transducer mechanisms, design parameters, fabrication methods and applications.

E E 485 Introduction to Photonics (4) Introduction to optical principles and phenomena. Topics include electromagnetic theory of light, interference, diffraction, polarization, photon optics, laser principles, Gaussian beam optics, semiconductor optics, semiconductor photonic devices. Prerequisite: E E 361 or PHY 123.

E E 499 Undergraduate Research and Special Projects (2-5, max. 10) Undergraduate research or design project carried out under the supervision of a faculty sponsor.

E E 500 Graduate Seminar (1, max. 9) Seminars on current topics in electrical engineering. More than one section may be offered in a given quarter. Credit/no credit only.
E E 501 Radar Remote Sensing (3) Sahr
General introduction to radar remote sensing of geophysical targets. Fundamentals of radar systems, range-time diagram, ambiguity function, pulse compression, spectrum estimation for underspread and overspread targets; multi-antenna correlations, interferometry, maximum entropy source imaging; Aperture Synthesis (SAR and ISAR). Prerequisite: E E 510A A 510M E 510; A.

E E 511 Introduction to Statistical Learning (4) Covers classification and estimation of vector observations, including both parametric and nonparametric approaches. Includes classification with likelihood functions and general discriminant functions, density estimation, supervised and unsupervised learning, feature reduction, model selection, and performance estimation. Prerequisite: either E E 505 or CSE 515. Offered: W.

E E 512 Graphical Models in Pattern Recognition (4) Bayesian networks, Markov random fields, factor graphs, Markov properties, standard models as graphical models, graph theory (e.g., moralization and triangulation), probabilistic inference (including pearl’s belief propagation, Hugin, and Shafer-Shenoy), junction trees, dynamic Bayesian networks (including hidden Markov models), learning new models, models in practice. Prerequisite: E E 508; E E 511. Offered: Sp.

E E 514 Information Theory I (4) Includes entropy, mutual information, Shannon’s source coding theorem, data compression to entropy limit, method of types, Huffman coding, Kraft inequality, arithmetic coding, Kolmogorov complexity, communication at channel capacity (channel coding), coding theory, introduction to modern statistical coding techniques, differential entropy, and Gaussian channels. Prerequisite: E E 505.

E E 515 Information Theory II (4) Includes advanced modern statistical coding techniques (statistical coding), advanced codes n graphs, source coding with errors (rate distortion), alternating minimization principles, channel coding with errors, network information theory, multiple description coding, and information theory in other areas including pattern recognition, bio-informatics, natural language processing, and computer science. Prerequisite: E E 514.

E E 516 Computer Speech Processing (4) Bilmes, Kirchoff, Ostendorf. Introduction to automatic speech processing. Overview of human speech production and perception. Fundamental theory in speech coding, synthesis and reproduction, as well as system design methodologies. Advanced topics include speaker and language identification and adaptation. Prerequisite: E E 505; E E 518.

E E 517 Statistical Language Processing (4) Bilmes, Kirchhoff, Ostendorf. Introduction to major issues in natural language processing and human language technology, with emphasis on statistical approaches. Addresses topics in statistical parsing and tagging, dialogue systems, information extraction, and machine translation. Prerequisite: E E 505.

E E 519 Stochastic Analysis of Data From Physical Systems (4) Atlas Computer systems for acquisition and processing of stochastic signals. Calculation of typical descriptors of such random processes as correlation functions, spectral densities, probability densities. Interpretation of statistical measurements made on a variety of physical systems (e.g., electrical, mechanical, acoustic, nuclear). Lecture plus laboratory. Prerequisite: E E 505 or equivalent.

E E 521 Multidimensional Signal Processing (3) Marks Multidimensional (MD) signals and systems, MD sampling theorem, sample dependence in higher dimensions, MD FIR filter design using windows and the McClellan transform, MD IIR filter stability and design. Current topics in MD signals and systems. Prerequisite: E E 442 or E E 518 or equivalent.

E E 525 VLSI II (5) Sechen Analyzes how IC-based memory and datapath blocks are designed using static and dynamic CMOS technologies. Gives students extensive experience with industry-standard computer-aided design tools, including Cadence (Virtuoso, DRC, LVS) and Avanti (Hspice). Credit not allowed for both E E 477 and E E 525. Prerequisite: E E 476.

E E 526 VLSI III (4) Helms, Sechen, Soma Ultra-high speed digital logical families based on output prediction logic; high-speed division; input and output pad design; state-of-the-art latch and flip-flop design; clock distribution, including PLLs and DLLs; noise considerations in high-speed digital IC design. Prerequisite: E E 477 or E E 525.

E E 527 Solid-State Laboratory Techniques (4) Darling Principles and laboratory techniques used in solid-state electronics research. Basic familiarity with practices and equipment used on campus. Laboratory safety; materials handling, storage and disposal; clean room use; photoresist characteristics; mounting, bonding, and probing; wet chemical etching; vacuum evaporation; patterning of metal films using photoresist. Extensive laboratory with limited enrollment. Prerequisite: graduate standing and permission of instructor.

E E 529 Semiconductor Optics and Optical Devices (4) Afromowitz, Yee Perturbations of energy states in semiconductors; direct and indirect transitions; absorption processes; optical constants; absorption spectroscopy; radiative and nonradiative transitions; processes occurring at p-n junctions; junction devices; LEDs and lasers, photovoltaics; self-electro-optic effect device; modern laser structures. Prerequisite: graduate standing or permission of instructor.

E E 531 Semiconductor Devices and Device Simulation (4) Darling, Lauritzen, Yee Physical principles of semiconductor devices. Generation, recombination, p-n junctions, MOS, metal-semiconductor and other interface structures. Carrier transport at low and high level injection levels. Device simulation used to demonstrate physical principles and basic device operation. Project using device simulation. Prerequisite: E E 452 or graduate standing.

E E 533 Photodetectors and Photodetection (4) Afromowitz, Yee Includes both the device physics and signal processing aspects of photodetection. Photodiodes, photodectors, photomultipliers, and solar cells are covered. Noise, signal-to-noise and imaging considerations are also discussed. Prerequisite: E E 482 or graduate standing.

E E 534 Power Electronics (4) Detailed study of DC-to-AC inverters, pulse-width modulated and resonant DC-to-DC converter topologies; drive and protection circuits for efficient switching of semiconductor devices. Includes extensive computer-aided circuit simulation and power supply control. Prerequisite: graduate standing.

E E 536 Design of Analog Integrated Circuits and Systems (4) Heij, Soma Some Design of analog VLSI: specifications, design, simulation, layout. Covering CMOS and Bi CMOS technologies. Prerequisite: E E 433 or equivalent and graduate standing in electrical or computer engineering, or permission of instructor.

E E 537 Computation Methods for Circuit Analysis and Simulation (3) Introduction to numerical algorithms and computer-aided techniques for the simulation of electronic circuits. Theoretical and practical aspects of important analyses: large-signal nonlinear DC, small-signal AC, nonlinear transient, and large-signal steady-state. Simulation concepts applied to the modeling and characterization of various electronic devices.

E E 538 Topics in Electronic Circuit Design (1-5, max. 5) Topics of current interest in electronic circuit and system design. Course content varies from year to year, based on current professional interests of the faculty member in charge. Prerequisite: permission of instructor.

E E 539 Advanced Topics in Solid-State Electronics (1-5, max. 5) Lectures or discussions of topics of current interest in the field of solid-state electronics for advanced graduate students having adequate preparation in solid-state theory. Subject matter may vary according to the interests of students and faculty. Prerequisite: permission of instructor.

E E 540 VLSI Testing (4) Soma VLSI testing and design-for-test techniques, covering digital systems, mixed analog-digital systems, integrated sensor systems, and radio-frequency systems. Projects include test algorithm design, testing of fabricated circuits, and parametric testing of state-of-the-art industry circuits. Prerequisite: either E E 477 or E E 525.

E E 542 Advanced Embedded Systems Design (5) Peckol Studies advanced embedded system design principles and practices. Emphasizes formal design methodologies such as hardware-software co-design, investigates techniques for performance optimization, and examines distributed embedded systems. Prerequisite: E E 478. Offered: A.

E E 543 Models of Robot Manipulation (3) Hannaford Mathematical models of arbitrary articulated robotic (or biological) arms and their application to realistic arms and tasks, including the homogeneous coordinate model of positioning tasks, the forward and inverse kinematic models, the Jacobian Matrix, and the recursive Newton-Euler dynamic model. Prerequisite: linear algebra and graduate standing or permission of instructor.

E E 544 Advanced Robot Manipulation (4) Hannaford, Meldrum Continuation of the analysis of robot manipulation, considering kinematic redundancy, control of robot manipulators in contact with the environment, teleoperation, and grasping with multi-fingered hands. Students will perform a project and critique a research paper in the area of the project. Prerequisite: E E 543.

E E 545 Autonomous Multi-Robot Systems (4) Design-oriented course in autonomous multi-robot systems. Wireless peer communication protocols, multi-robot control methodologies and computational issues. Laboratory exercises include design, construction, and testing of multiple autonomous mobile robots, which compete as a team at the end of the term. Prerequisite: either E E 482 or E E 463 or graduate student standing.

E E 546 Advanced Topics in Control System Theory (1-5, max. 5) Topics of current interest in control system theory for advanced graduate students with adequate preparation in linear and nonlinear system theory. Prerequisite: permission of instructor. Offered when adequate enrollment develops prior to close of advance registration.

E E 547 Linear Systems Theory (4) Linearity, linearization, finite dimensionality, time-varying vs. time-invariant linear systems, interconnectedness of linear systems, functional/structural descriptions of linear systems, system zeros and invertibility, linear system stability, system norms, state transition, matrix exponentials, controllability and observability, realization theory. Prerequisite: either A A 447, E E 447 or M E 471. Offered: jointly with A A 547/M E 547.

E E 548 Linear Multivariable Control (3) Introduction to MIMO systems, successive single loop design comparison, Lyapunov stability theorem, full state feedback controller design, observer design, LQR problem statement, design, stability analysis, and tracking design. LQG design, separation principle, stability robustness. Prerequisite: A A 547/E E 547/M E 547. Offered: jointly with A A 548/M E 548.

E E 550 Nonlinear Optimal Control (3) Calculus of variations for dynamical systems, definition of the dynamic optimization problem, constraints and Lagrange multipliers, the Pontryagin Maximum Principle, necessary conditions for optimality, the Hamilton-Jacobi-Bellman equation, singular arc problems, computational techniques for solution of the necessary conditions. Prerequisite: graduate standing. Recommended: A A 548 or E E 549. Offered: jointly with A A 550/M E 550.

E E 551 Power System Protection (4) Liu The protection of electric power systems from overcurrents and overvoltages. Analysis and design of overcurrents resulting from faults, lightning induced or otherwise, or from excessive loads or power swings. Analysis and design of overvoltages resulting from switching transients or lightning. Principal concern is with relays and lightning arrestors as protection means. Prerequisite: E E 455 or equivalent.

E E 552 Power Systems Dynamics and Control (4) Damborg, El-Sharkawi Advanced computer modeling and analysis of power systems. Application of modern systems and control theories. Prerequisite: E E 351 and E E 455 or permission of instructor.

E E 553 Power System Economics (4) Christie, Damborg, Liu Economic structure of power systems. Problem formulation, optimization methods and programming for economic analysis of power system operation and planning. Economic dispatch, load forecasting, unit commitment, interchange, planning and reliability analysis. Provides background to pursue advanced work in planning and operation. Prerequisite: graduate standing or permission of instructor.

E E 554 Large Electric Energy Systems Analysis (4) Christie, Liu Deals with problems whose solution depends upon the inversion of sparse matrices that occur in the planning and operational studies of large interconnected energy systems. Application studies include system model development, state estimation, and load flow. Prerequisite: E E 456 or permission of instructor.

E E 555 Fundamentals of Intelligent Systems (4) Fundamentals and applications of intelligent systems and biologically inspired algorithms such as neural networks, evolutionary computations, swarm optimization and fuzzy systems. Solving complex engineering applications with a combination of these technologies as well as with more traditional approaches such as statistical system theories.

E E 559 Special Topics in Electrical Energy Systems (1-5, max. 5) Topics of current interest
in electrical power and energy devices and systems. Content varies from year to year, based on current professional interests of faculty member in charge. Prerequisite: permission of instructor.

E E 562 Artificial Intelligence for Engineers (3) Shapiro Covers main areas of artificial intelligence (AI) without need for extensive prerequisites. Programming languages for AI; problem solving; representations; control strategies; searching strategies; predicate calculus; rule-based deduction; goal-directed planning; knowledge-based systems. Prerequisite: CSE 373 or equivalent.

E E 565 Computer-Communication Networks I (4) Network architectures and protocols; layered model; reliable transmission protocols at the data control layer; Transmission Control Protocols (TCP); routing algorithms; performance modeling, and analysis of packet-switched networks. Multi-access. Projects involving routing and multi-access principles. Prerequisite: E E 505 or equivalent.

E E 566 Computer-Communication Networks II (3) Local area, metropolitan area, satellite, and packet radio networks; routing algorithms for wide area networks; optimal design of packet-switched networks; congestion and flow control; fast packet switching; gigabit networks. Prerequisite: E E 565 or permission of instructor.

E E 567 Mobile Radio Networks (3) Wireless communication networks, including digital broadcasting, wireless LAN, wireless access networks and ultra wide band (UWB); OFDM modem design; MAC and RLP; TCP/UDP over wireless; cross-layer protocol optimization; radio network planning. Prerequisite: E E 506; E E 565.

E E 568 Image Processing Computer Systems (4) Kim All components of digital image-processing computer systems. Two-dimensional filtering and optimal filter design as well as basic image processing operations. Selected advanced image processing topics. Individual student project. Prerequisite: permission of instructor. Offered: jointly with BIOEN 568.

E E 570 Manifolds and Geometry for Systems and Control (3) Morgansen Introduction to fundamentals of calculus on manifolds and group theory with applications in robotics and control theory. Topics include: manifolds, tangent spaces and bundles, Lie groups and algebras, coordinate versus coordinate-free representations. Applications from physics, robotics, and control theory. Offered: jointly with A A 570 and M E 570; W; even years.

E E 571 High Frequency Circuits and Antennas: Computation of Fields and Waves (4) Planar microstrip structures are high frequency circuits and antennas used in communication, aerospace and computer industries. Examines the computation of fields and waves in such structures. How to calculate circuit parameters and radiation characteristics. Structures studied include microstrip lines, coupled lines, antennas, resonators, and directivities. Prerequisite: E E 482, E E 572, or equivalent.

E E 572 Electromagnetic Theory and Applications I (4) Electromagnetic waves in layered media; complex waves, leaky and slow waves, waves in periodic structures, optical fibers, ionsphere and other guiding structures; transients and dispersive media; waveguides and cavities; beam waves; eigenfunctions and eigenvalues. Prerequisite: graduate standing or permission of instructor.

E E 573 Electromagnetic Computations and Applications I (4) Fundamentals of computational electromagnetics, method of moments, integral equations, basis functions, iterative methods, periodic structures and Green’s Functions finite difference time domain method, Yee’s lattice, absorbing boundary conditions, variational principles, and finite element method. Applications in antennas, waveguides, and scattering problems. Prerequisite: E E 572 or permission of instructor.

E E 574 Electromagnetic Computations and Applications II (4) Tsang Current topics in computational electromagnetics, fast multipole multilevel method, sparse matrix canonical grid method, wavelet based methods, recursive method, spectral time domain method. Applications in large scale problems such as array antennas, radar cross section, rough surface scattering, and dense media scattering. Prerequisite: E E 573 or permission of instructor.

E E 575 Waves in Random Media (4) Tsang Propagation and scattering of electromagnetic, optical, and acoustic waves in turbulence and random media, scattering from rough surfaces and randomly distributed scatterers. Atmospheric turbulence, fog, rain, smog, clear-air turbulence detection, remote sensing, terrain scattering, scattering from blood cells and tissues, scattering by ocean waves. Applications to atmospheric sciences, bioengineering, geoscience, ocean engineering. Prerequisite: graduate standing or permission of instructor.

E E 576 Computer Vision (3) Overview of computer vision, emphasizing the middle ground between image processing and artificial intelligence. Image formation, preattentive image processing, boundary and region representations, and case studies of vision architectures. Prerequisite: Solid knowledge of linear algebra, good programming skills, CSE or E E major or permission of instructor. Offered: jointly with CSE 576.

E E 577 Special Topics in Computer Vision (3) Topics vary and may include vision for graphics, probabilistic vision and learning, medical imaging, content-based image and video retrieval, robot vision, or 3D object recognition. Prerequisite: CSE/E E 576 or permission of instructor. Offered: jointly with CSE 577.

E E 579 Advanced Topics in Electromagnetics, Optics, and Acoustics (1-5, max. 5) Topics of current interest in electromagnetics, optics, and acoustics. Content varies from year to year, based on current professional interests of faculty member in charge. Prerequisite: permission of instructor.

E E 580 Geometric Methods for Non-Linear Control Systems (3) Morgansen Analysis and design of nonlinear control systems focusing on differential geometric methods. Topics include controllability, observability, feedback, linearization, invariant distributions, and local coordinate transformations. Emphasis on systems evolving on Lie groups and linearly uncontrollable systems Prerequisite: A A 570/E E 580/M E 590. Offered: jointly with A A 580/M E 580; Sp. even years.

E E 586 Digital Video Coding Systems (4) Sun Introduction to digital video coding algorithms and systems. Theoretical and practical aspects of important topics on digital video coding algorithms, motion estimation, video coding standards, systems issues, and visual communications. Prerequisite: graduate standing or permission of instructor.

E E 587 Multimedia Compression and Networking (4) Hwang Addresses four major components of multimedia: 1) data compression of multimedia (e.g., speech, audio, image, and video); 2) quality of service (QoS) issues for data transmission over IP; 3) multimedia streaming and conferencing applications; and 4) intellectual property management and protection (IPMP) of multimedia contents. Co-requisite: E E 518.

E E 589 Advanced Topics in Sensors and Sensor Systems (3) Topics of current interest in sensors and sensor systems. Prerequisite: permission of instructor.

E E 590 Advanced Topics in Digital Computers (2-5, max. 15) Lectures or discussion of topics of current interest in the field of digital computers. Subject matter may vary from year to year. Prerequisite: permission of instructor.
E E 591 Robotics and Control Systems Colloquium (1, max. 3) Colloquium on current topics in robotics and control systems analysis and design. Topics presented by invited speakers as well as on-campus speakers. Emphasis on the cross-disciplinary nature of robotics and control systems. Credit/no credit only. Offered: jointly with A/CH E 591.

E E 592 Electrical Engineering Research Survey (1) Weekly presentations on current research activities by members of the department. Credit/no credit only.

E E 593 Feedforward Control Design (3) Devavaram Design feedforward controllers for precision output tracking; inversion-based control of non-minimum-phase systems; effect of plant uncertainty on feedforward control; design of feedforward controllers for applications such as vertical take off and landing aircraft, flexible structures and piezo-actuators. Prerequisite: A A 547/E E 547/M E 547. Offered: jointly with A A/M E 593; Sp; even years.

E E 594 Robust Control (3) Basic foundations of linear analysis and control theory, model realization and reduction, balanced realization and truncation, stabilization problem, coprime factorizations, Youla parameterization, matrix inequalities, H-infinity and H2 control, KYP lemma, uncertain systems, robust H2, integral quadratic constraints, linear parameter varying synthesis, applications of robust control. Offered: jointly with A A 594/M E 594; odd years; Sp.

E E 595 Advanced Topics in Communication Theory (1-5, max. 5) Extension of 507, 508, 518, 519, 520. Material differs each year, covering such topics as: detection theory, decision theory, game theory, adaptive communication systems, nonlinear random processes. Prerequisite: permission of instructor.

E E 596 Advanced Topics in Signal and Image Processing (2-5, max. 5) Topics of current interest in signal and image processing. Content may vary from offering to offering. Prerequisite: permission of instructor.

E E 597 Networked Dynamics Systems (3) Provides an overview of graph-theoretic techniques that are instrumental for studying dynamic systems that coordinate their states over a signal-exchange network. Topics include network models, network properties, dynamics over networks, formation control, biological networks, observability, controllability, and performance measures over networks. Prerequisite: A A 547/E E 547/M E 547. Offered: jointly with A A 597/M E 597.

E E 599 Selected Topics in Electrical Engineering (*) Prerequisite: permission of instructor.

E E 600 Independent Study or Research (*)

E E 700 Master’s Thesis (*)

E E 800 Doctoral Dissertation (*)

Industrial Engineering

IND E 101 Introduction to Industrial Engineering (1 & 5) Examines the basic concepts and methods of industrial engineering through team-based hands-on activities. Explores the profession of industrial engineering. Discusses resources available to Industrial Engineering students at the University of Washington. Offered: Sp.

IND E 315 Probability and Statistics for Engineers (3) NW Application of probability theory and statistics to engineering problems, distribution theory and discussion of particular distributions of interest in engineering, statistical estimation and data analysis. Illustrative statistical applications may include quality control, linear regression, and analysis of engineering data sets. Prerequisite: either MATH 136 or MATH 307. Offered: ASp.

IND E 316 Design of Experiments and Regression Analysis (4) NW Kapur Introduction to the analysis of data from planned experiments. Analysis of variance for multiple factors and applications of orthogonal arrays and linear graphs for fractional factorial designs to product and process design optimization. Regression analysis with applications in engineering. Prerequisite: IND E 315. Offered: jointly with STAT 316.; W.

IND E 337 Introduction to Manufacturing Systems (4) Storch Description of manufacturing systems. Includes discussion of current trends in manufacturing. Introduces process flow analysis, manufacturing organizations including job-shop, assembly lines, and group technology, manufacturing inventory philosophies (just-in-time, MRP, OPT), work environment, and work simplification.

IND E 410 Linear and Network Programming (4) Zabinsky Modeling and optimization of linear network problems. Topics include: optimization of linear systems, mathematical model design, simplex method, primal-dual algorithms, parametric programming, goal programming, network problems and algorithms, and PERT/CPM. Prerequisite: either MATH 136 or MATH 308; CSE 142. Offered: A.

IND E 411 Stochastic Models and Decision Analysis (4) Zabinsky Stochastic systems analysis to industrial engineering problems. Topics include: Markov chains, queueing theory, queuing applications, and decision analysis. Prerequisite: IND E 315; IND E 410. Offered: W.

IND E 424 Simulation (4) Beamon Discrete-event simulation methodology emphasizing model formulation and construction with modern simulation languages and environments, statistical basis for evaluating model results, design and management of simulation projects. Application to manufacturing, retail, and service industries. Prerequisite: IND E 337, which may be taken concurrently; IND E 411. Offered: W.

IND E 430 Manufacturing Scheduling and Inventory (4) Beamon Manufacturing scheduling and inventory control for different work organizations. Coverage of workforce scheduling, job- and flow-shop scheduling and order release, production line balancing, MRP II, Lean Production, and data management. Particular attention to computer-based aspects of management and scheduling for manufacturing and service industries. Prerequisite: IND E 337; IND E 410, both of which may be taken concurrently. Offered: A.

IND E 433 Introduction to Computational Manufacturing (4) Fundamentals in computer aided design/manufacturing. Visualization, 3-D wireframes, curves and surfaces, solid modeling. Numerical control machining, robotics, and assembly. Prerequisite: IND E 337; IND E 410. Offered: W.

IND E 439 Plant Layout and Material Handling (4) Beamon Design of new or expanding industrial facilities. Consideration of work organization and layout. Study of basic design of plant systems, including plumbing, electrical, HVAC, illumination, acoustics, and waste handling. In depth coverage of material handling system design and equipment choices. Prerequisite: IND E 410 which may be taken concurrently. Offered: A.

IND E 455 User Interface Design (4) Furness Design oriented to cover fundamentals of user interface design; models on human computer interaction, software psychology, input devices, usability, cognitive and perceptual aspects of human-computer interaction, advanced interface, and research methodologies are discussed. Offered: jointly with T C 455; A.

IND E 470 Systems Engineering (4) Concepts of system approach, system hierarchies, functional analysis, requirements, trade studies, and other concepts used to define and integrate complex engineering systems. Introduction to risk analysis and reliability, failure modes and effects analysis, writing specifications, and lean manufacturing. Offered: jointly with A A 470.
IND E 494 Design in the Manufacturing Firm (4) Storch Engineering design in manufacturing firms. Emphasis on topics include design methodology, concurrent engineering, and project management. Focus on the relationship between product design and manufacturing (design for production and assembly). Prerequisite: IND E 337; T C 333. Offered: W.

IND E 495 Industrial Engineering Design (4) Storch Capstone senior design project involving identification and synthesis of industrial engineering skills. Students apply their knowledge of industrial engineering to actual industrial problems. Prerequisite: IND E 494; IND E 351. Offered: Sp.

IND E 496 Technology-Based Entrepreneurship (3) Concentrates on hands-on aspects of innovation and entrepreneurial enterprise development. Examines relationships between innovation, iterative prototyping, and marketing testing. Students identify market opportunities, create new technology-based products and services to satisfy customer needs, and construct and test prototypes. Prerequisite: IND E 250; Offered: jointly with M E 496.

IND E 498 Special Topics in Industrial Engineering (1-5, max. 9) Lecture and/or laboratory.

IND E 499 Special Projects (2-5, max. 9).

IND E 513 Linear Optimization Models in Engineering (3) Ghate, Zabinsky Advanced formulation techniques to expand applications of linear programming to large-scale models. Appreciation of role of optimization models in engineering applications through introduction of techniques such as decomposition. Individual engineering projects. Prerequisite: IND E 410 and MATH 308 or permission of instructor.

IND E 516 Applications of Optimization in Engineering Design (3) Zabinsky Discussion of issues arising in applications of optimization to engineering design. Emphasis on formulating problems and selecting appropriate solution techniques. Random search methods for large-scale problems and selecting appropriate solution techniques. Prerequisite: IND E 515 and MATH 308 or permission of instructor. Offered: jointly with MATH 515.

IND E 518 Seminars on Advances in Manufacturing and Management (1) Ramulu Current topics and advances made in manufacturing and management. Topics presented by invited speakers from academia and industry. Emphasis on the multidisciplinary nature of manufacturing and management. Offered: jointly with M E 518 AWSp.

IND E 521 Quality Control in Manufacturing (3) Matrangelo Design of quality control systems in manufacturing. Use of advanced statistical process controls, sampling inspection techniques, process capability, and other statistical tools. Also includes vendor sourcing and control tools, methods for establishing specifications and tolerances, quality function deployment, and other quality control techniques. Prerequisite: graduate standing.

IND E 524 Robust Design and Quality Engineering (3) Kapur Introduction to robust design and quality engineering. Applications of design of experiments for product and process design optimization. Emphasis on optimal design using orthogonal arrays and linear graphs. System models using Chebyshev’s orthogonal polynomials. Robustness in design and quality improvement for complex systems including Taguchi methods for quality engineering. Prerequisite: IND E 316 or equivalent.

IND E 531 Computer Integrated Manufacturing (3) Design and analysis of advanced manufacturing systems from a strategic as well as technological perspective. Focus on information generation, management, and coordination aspects of complex manufacturing organizations. Examination of system integration alternatives and consequences for relationships with customers and suppliers. Prerequisite: IND E 431 or equivalent. Offered: jointly with M E 505.

IND E 535 Engineering Simulation (3) Beaman Advanced applications of discrete event, continuous, and combined discrete-continuous simulation modeling, detailed examination of fundamental computer programming concepts underlying the development of simulation languages, variance reduction techniques, and output analysis for various engineering, service systems, and manufacturing applications. Prerequisite: IND E 424 or equivalent.

IND E 537 Introduction to Manufacturing Systems (3) Storch Description of manufacturing systems. Includes discussion of current trends in manufacturing, especially lean principles. Introduces process flow analysis, manufacturing organizations including job-shop, assembly lines, and group technology, manufacturing inventory philosophies (just-in-time, MRP, OPT), work environment, and work simplification. Offered: jointly with ENV H 537; A.

IND E 538 Large Assembly Manufacturing Systems (3) Storch Presents principles of group technology, zone construction, product-oriented work breakdown structure. Application to shipbuilding, aircraft, die, and truck manufacture. Techniques of production planning, scheduling and control, organization, and plant layout, as well as the role of the computer, are studied in detail. Prerequisite: graduate standing.

IND E 542 User-Centered Design (4) Turns Explores the user-centered design paradigm from a broad perspective, emphasizing how user research and prototype assessment can be integrated into different phases of the design process. Students learn to think like a user-centered designer and carry out activities that are key to user-centered design. Offered: jointly with T C 518.

IND E 551 Elements of Dynamic Enterprise Modeling (3) Introduces practical techniques for modeling, analyzing, and implementing real-time enterprise control systems. Topics include model design and implementation, supply and forecast control, and logistics decisions. Prerequisite: basic mathematical tools supported with a symbolic algebra software tool. Requires basic computer skills. Offered: A.

IND E 552 Introduction to Real-Time Enterprise Control (3) Provides students with principles, designs, techniques and algorithms for synthesizing real-time control of enterprise processes, using hybrid systems theory. Application areas include supply chain management with a focus on hybrid systems, control, logistics decision schemas, transport, and system design. Dynamic synchronization procedures, minimum cost production, and maximum profit and ordering strategies. Prerequisite: IND E 551, or permission of instructor. Offered: W.

IND E 555 Introduction to Real-Time Enterprise Control (3) Provides students with principles, designs, techniques and algorithms for synthesizing real-time control of enterprise processes. Application areas include supply chain management with a focus on hybrid systems, control, logistics decision schemas, transport, and system design. Dynamic synchronization procedures, minimum cost production, and maximum profit and ordering strategies. Prerequisite: IND E 551, or permission of instructor. Offered: W.

IND E 556 Introduction to Ergonomics (3) Basic principles of ergonomics in work environment applied to problems of worker and management. Topics include measurement of physical work capacity, problems of fatigue and
heat stress, applied biomechanics, worker-machine interactions and communication, design of displays and controls. Prerequisite: basic human physiology or permission of instructor. Offered: jointly with ENV H 566/NSG 508; odd years; Sp.

IND E 567 Applied Occupational Health and Safety (3) Camp, Johnson Application of occupational safety and health principles. Student teams perform evaluations, assess protection methods/processes and exposures, health and safety procedures and programs, and develop engineering and administrative controls. Students perform on a consulting project with a local company including budgeting, project reporting, and presentation. Offered jointly with ENV H 559 and NSG 505. Offered: Sp.

IND E 569 Occupational Biomechanics (4) Lectures and laboratories address human occupational biomechanical and physiological limits and measurement, analysis, and modeling techniques that are used by ergonomists for design of safe, healthful, and productive physical work. Prerequisite: IND E 566 or permission of instructor. Offered: jointly with ENV H 569; even years, Sp.

IND E 570 Supply Chain Systems (3) Beamon Develops concepts related to the design, evaluation, and performance of supply chain systems through an exploration of contemporary practice and research, focusing on current issues, analytical frameworks, and case studies. Prerequisite: IND E 515 or equivalent.

IND E 591 Seminar (1-5) Credit/no credit only. Topics of current interest in industrial engineering. Prerequisite: graduate standing in Industrial Engineering or permission of instructor: A.

IND E 592 Seminar (1-5) Credit/no credit only. Topics of current interest in industrial engineering. Prerequisite: graduate standing in Industrial Engineering or permission of instructor: W.

IND E 593 Seminar (1-5) Credit/no credit only. Topics of current interest in industrial engineering. Prerequisite: graduate standing in Industrial Engineering or permission of instructor: Sp.

IND E 599 Special Topics in Industrial Engineering (1-5, max. 9) Prerequisite: permission of supervisor.

IND E 600 Independent Study or Research (*)

IND E 700 Master’s Thesis (*)

IND E 800 Doctoral Dissertation (*)

Materials Science and Engineering

MSE 170 Fundamentals of Materials Science (4) NW Fundamental principles of structure and properties of materials utilized in practice of engineering. Properties of materials are related to atomic, molecular, crystalline structure. Metals, ceramics, multiphase systems, and polymeric materials. Relationships between structure and electrical, mechanical, thermal, chemical properties. For advanced freshmen and sophomores. Prerequisite: either CHEM 150, CHEM 152, or CHEM 155. Offered: AWSpS.

MSE 298 Introduction to Modern Materials (1) Materials and advances in materials are at the core of a large number of significant technological advances. Seminar format highlights processing, properties, and uses of a broad class of materials for a variety of applications, each introduced by a faculty member from the department. Offered: Sp.

MSE 310 Introduction to Materials Science and Engineering (3) Introduces the materials field to new department majors. Examples are drawn from ceramics, metals, polymers, electronic materials and composites. Structure-properties-manufacturing-design relationships are emphasized. Materials selection design project. Introduction to research. Offered: A.

MSE 311 Integrated Junior Laboratory I (2) Laboratory experimental techniques including writing, literature search, research planning and computer applications. Optical microscopy experiments, sample preparations, X-ray equipment, and X-ray diffraction analysis of materials. Offered: A.

MSE 312 Integrated Junior Laboratory II (2) Materials processing related laboratory experiments, including powder synthesis, redox reactions of particulate materials, grain growth, recrystallization, phase transformation, green tape processing, particle interaction and rheology, slip and tape casting and drying, polymer and metal bonding, sintering behavior, metal welding, and heat treatment. Offered: W.

MSE 313 Integrated Junior Laboratory III (2) Kinetics and phase transformation related laboratory experiments, including solidification, mechanical properties related laboratory experiments, stress-strain behavior of materials and elastic modulus of materials, effect of work hardening on stress strain behavior, and effect of surface condition of the strength of glass. Offered: Sp.

MSE 321 Thermodynamics and Phase Equilibrium (4) Phase equilibria in materials systems of one, two, and three components. Determination of phase diagrams. Quantitative applications of thermodynamics to systems of interest to materials students; detailed review of thermodynamic laws and principles. Offered: A.

MSE 322 Kinetics and Microstructural Evolution (4) Applications of thermodynamic and kinetic principles to the study of transport processes, transformations and reactions in engineering materials. Thermal activation and rates of processes, nucleation and growth, phase transformations, grain growth, sintering, among other processes. Prerequisite: MSE 321. Offered: W.

MSE 331 Crystallography and Structure (3) Theory and practice of x-ray diffraction with applications to materials sitemaps. Principles of crystal symmetry, lattice systems, and stereographic projections. Bragg’s law of diffraction, Laue conditions, diffraction by X-rays, single crystal and powder diffraction techniques and their applications to lattice, phase, strain, and texture analyses. Prerequisite MSE 170. Offered: A.

MSE 333 Materials Characterization (3) Principles and applications of analytical techniques, imaging, diffraction and spectroscopy for materials characterization including crystal structures, texture formation, phase analysis. Nano- and micro-structures of materials including defects and second phases, chemistry, bonding, compositions of materials. Demonstrations and lab experiments involving light scattering and diffraction techniques. Prerequisite: MSE 170; MSE 331. Offered: S.

MSE 342 Materials Processing I (3) Provides students with the fundamentals and applications of metal and alloy processing techniques. Focuses on relationships between the processing fundamentals and practice, and between microstructure, and properties. Ferrous and non-ferrous metal and alloy processing are discussed. Prerequisite: MSE 170; MSE 322. Offered: W.

MSE 351 Electron Theory of Engineering Materials (3) Introduction to elementary solid-state concepts in materials, free electrons, and band theories. Principles to conduction in metals, insulators, semiconductors, and applications of semiconductors and devices. Prerequisite: MSE, 170, MSE 331. Offered: W.

MSE 352 Functional Properties of Materials I (3) Introduction to thermal properties, electrical (ionic and polaron) conduction and optical properties, including origins of color, interaction of light and wave with materials, lasers and optoelectronics. Focuses on the relations between physical properties and chemical composition, crystal structure and microstructure. Prerequisite: MSE 351. Offered: S.

MSE 431 Failure Analysis and Durability of Materials (3) Treats the areas of failure analysis and durability in a wide range of materials applications. Reviews concepts in mechanical and environmental behavior of materials. Includes instruments available to engineers, both destructive and nondestructive, and case studies. Prerequisite: MSE 333; MSE 342; MSE 362.

MSE 442 Materials Processing II (3) Develops a basic understanding of both engineering and science aspects of ceramic processing. Fundamentals of powder processing and characterization, green body formation, sintering, microstructural development and properties. Prerequisite: MSE 342. Offered: A.

MSE 443 Extractive Process Analysis (3) Extractive processes analyzed by the methods of material and energy balances, computational thermodynamics, process kinetics and reactor theory. Introduction to process optimization. Prerequisite: MSE 321. Offered: S.

MSE 452 Functional Properties of Materials II (4) Dielectric materials including ferroelectrics, piezoelectrics and pyroelectrics, magnetic properties, high temperature superconductivity,
shape memory materials. Detained discussion on relations of these properties with atomic and crystal structures, and applications. Prerequisite: MSE 351, MSE 352. Offered: W.

MSE 462 Mechanical Behavior of Materials II (4) Influence of structure on the mechanical properties of materials. Stress-strain tensors and response of materials to multiaxial loads. Effect of symmetry on elastic properties; spring dashpot analogs for viscoelasticity; strengthening mechanisms and continuum plasticity; failure probability and toughening mechanisms; creep, fatigue and stress corrosion cracking. Prerequisite: MSE 362. Offered: W.

MSE 463 Corrosion and Wear of Materials (4) Mechanisms of corrosion, thermodynamics, kinetics of corrosion. Passivity; Pourbaix diagrams; corrosion rate testing and measurements; forms of corrosion; effects of alloy and environmental variables; corrosion testing. Wear mechanisms: adhesive, abrasive, erosive. Fretting; surface roughness, wear testing. Coatings for corrosion and wear protection. Offered: S.

MSE 471 Introduction to Polymer Science and Engineering (3) Introduction of preparative methods of polymers; physical chemistry of polymer molecules; solution, liquid and solid phase; thermodynamics of polymers; methods of characterization; mechanical properties; fabrication techniques; properties of commercial polymers. Recommended: one quarter of physical chemistry and one quarter of organic chemistry. Offered: A.

MSE 473 Noncrystalline State (4) Chemistry of the amorphous state. Glass and amorphous semiconductors; structure, properties, and processing of vitreous materials. Prerequisite: MSE 170; MSE 321; MSE 331. Offered: S.

MSE 475 Introduction to Composite Materials (3) Microstructural design and processing of composite materials; polymeric, metallic, and ceramic matrices; fibers and fiber-reinforced composites, thermal, mechanical, and electrical properties. Recommended: basic background in materials science and engineering (level of MSE 170), mechanics of materials (level of CEE 220), and linear algebra and familiarity with matrix operations (level of MATH 308 or 318). Offered: A.

MSE 477 High Temperature Materials (4) Chemical and mineralogical composition; processing methods; thermal, physical, and chemical properties and tests; application in high-temperature processes. Prerequisite: MSE 310, MSE 321.

MSE 481 Science and Technology of Semiconductors (3) Fundamental and practical aspects of these materials for microelectronics, and materials for information technology. Prerequisite: CHEM 453 or CHEM 455. Offered: jointly with CHEM 494; A.

MSE 485 Introduction to Electronic Packaging and Materials (3) The governing equations of transport phenomena: mechanical, thermal, and electromagnetic behavior, thermomechanical and electromagnetic properties of packaging materials, electromagnetic characteristics of circuit and transmission lines, thermal management and reliability analysis of packaging, interconnect and material processing technology. Prerequisite: MSE 170. Offered: jointly with M E 485; A.

MSE 486 Fundamentals of Integrated Circuit Technology (3) Processing physics, chemistry and technology, including evaporation, sputtering, epitaxial growth, diffusion, ion implantation, laser annealing, oxidation, chemical vapor deposition, photolithography. Design considerations for bipolar and MOS devices, materials and process characterization. Future trends. Prerequisite: either E E 482 or MSE 351. Offered: jointly with E E 488; W.

MSE 487 Laboratory in Electronic Packaging and Materials (1) Laboratory course to accompany M E 485. Emphasizes the design, processing and reliability of electronic packaging used in consumer electronics. Corequisite: MSE 485. Offered: jointly with M E 487; A.

MSE 489 Integrated Circuit Laboratory (1) Hands-on experience in the building of a PMOS device, complete with oxidation, diffusion, photolithography, etching, metalization, and testing. Prerequisite: E E 486/MSE 486, which may be taken concurrently. Offered: jointly with E E 489; W.

MSE 491 Design in Materials Engineering I (2) Integration of technical materials engineering concepts with professional components related to materials engineering. Reviews materials design, teamwork, leadership, engineering economics, and ethics. Reports on the professional components important to the senior thesis and begin a two-quarter, team design project on materials engineering. Prerequisite: MSE 313. Offered: W.

MSE 492 Design in Materials Engineering II (2) Integration of technical materials engineering concepts with professional components related to materials engineering. Reviews project design, manufacturability, and quality control. Complete the two-quarter team design project on materials engineering. Prerequisite: MSE 491. Offered: Sp.

MSE 497 Undergraduate Research (1-5, max. 12) Research in materials under faculty supervision other than the MSE senior project. Cannot be used toward the technical elective requirements in the MSE major. Credit/no credit only.

MSE 498 Special Topics (1-5, max. 8) Special topics in materials science and engineering offered as a course with lectures, conferences, or laboratory. Offered: AWSpS.

MSE 499 Special Project (*, max. 5) Materials science and engineering field or laboratory investigations in group or individual setting. Written report required. Offered: AWSpS.

MSE 501 Advanced Processing of Inorganic Materials (3) Discusses advanced processes of inorganic materials including metals, ceramics, and electronic materials, such as high temperature processing, sintering, solidification, single crystal growth form liquid, and vapor phase deposition. Emphasizes both the fundamentals and practical approaches of these processing techniques. Offered: even years; A.

MSE 502 Sol-Gel Processing (3) Fundamentals of colloidal science and the physics and chemistry of the sol-gel process. Emphasizes the synthesis and applications of various materials, such as multi-component oxides, nano-composites, meso- and microporous materials, organic/inorganic hybrids, and biomaterials that have important applications in both leading technologies and modern industries. Offered: odd years; A.

MSE 504 Introduction to Microelectronic Mechanical Systems (4) Theoretical and practical aspects in design, analysis, and fabrication of MEMS devices. Fabrication processes, including bulk and surface micromachining. MEMS design and layout, MEMS CAD tools. Mechanical and electrical design. Applications such as micro sensors and actuators, or chemical and thermal transducers, recent advances. Offered: jointly with E E 502/M E 504; A.

MSE 510 Bonding, Crystallography, and Symmetry-Related Properties of Materials (3) Rigorous introduction to the fundamentals of bonding, symmetry, crystallography, and related properties. Quantum mechanical foundation of cohesion and properties of solids. Geometric approach to understanding symmetry elements in 2-D and 3-D, including point groups, space groups, stereographic projections, and bravais lattices. Tensor properties of crystals related to crystallography and symmetry. Offered: A.

MSE 512 Experimental Transmission Electron Microscopy (3) Fundamentals of electron optics as applied to microscopy; applications of contrast theories and electron diffraction with emphasis on defects and microstructure of crystalline solids. Prerequisite: MSE 510. Offered: W.

MSE 513 Transmission Electron Microscopy Laboratory (2) One four-hour laboratory and one two-hour discussion/demonstration per week; metallic, ceramic, electronic biological sample preparation techniques; diffraction, imaging, and spectroscopy techniques in electron microscopy. Prerequisite: MSE 512 which may be taken concurrently. Offered: W.

MSE 515 Advanced Transmission Electron Microscopy (3) Principles of image formation in crystalline and amorphous materials at the atomic resolution level; high spatial resolution electron diffraction with emphasis on convergent beam electron diffraction; quantitative elemental compositional and chemical analysis with energy dispersive x-ray spectroscopy and electron energy loss spectroscopy; high voltage electron microscopy. Prerequisite: MSE 512 and MSE 513. Offered: odd years; Sp.

MSE 518 Advanced Mineralogy (3) Crystal symmetry: point groups, space groups. Mathematical description of crystal structures; group theory and irreducible representations; tensor description of physical properties; stress, strain, piezoelectricity, elasticity; structural and magnetic phase transition, Landau theory, deformation and creep in crystals; elasto-
and Processing of Materials (4)
MSE 520 Seminar (1, max. 6) Review of research problems in recent literature. Registration required for all graduate students. Credit/no credit only. Offered: A/WSp.

MSE 524 Applied Rate Phenomena (3) Introduction to rate theory and transport processes. The principal thrust is on applications in ceramics and metallurgy. Prerequisite: basic course in transport phenomena or permission of instructor. Offered: W.

MSE 525 Kinetics and Phase Transformations (3) Thermodynamic basis for kinetic processes, including diffusion and phase transformation kinetics. Diffusion problems and solution methodologies, statistical treatment of diffusion, solid-liquid and solid-solid transformations, ordering transitions. Special topics related to grain growth, sintering, martensitic transformations. Prerequisite: MSE 322 and MSE 421 or equivalent. Offered: Sp.

MSE 528 Physics and Modeling f VLSI Fabrication (4) Physics of VLSI fabrication, emphasizing processing modeling and simulation. CMOS process, sequences, point defects and diffusion, ion implantation and annealing, film growth kinetics, deposition and etching, advanced photolithography. Process interactions and process integration. Extensive use of process simulation software. Prerequisite: either E E 486/MSE 467, E E 520/M 504/MSE 504, or E E 527. Offered: jointly with E E 528.

MSE 541 Defects in Materials (3) Detailed study of the general properties and effects of point, line, and planar defects in crystalline solids. Prerequisite: MSE 331 or equivalent. Offered: W.

MSE 544 Mechanical Behavior of Materials (3) Mechanical properties of metals, ceramics, and polymers. Elasticity and viscoelasticity. Macroscopic and microscopic aspects of deformation and fracture. Continuum plasticity and microscopic hardening mechanisms. High temperature deformation. Fracture mechanics, brittle and ductile fracture. Deformation and fracture mechanisms maps. Prerequisite: MSE 510 and MSE 541 or permission of instructor.

MSE 550 Magnetism, Magnetic Materials, and Related Technologies (3) A comprehensive introduction to magnetism, magnetic materials, and related applications. Discusses intrinsic and phenomenological concepts of magnetism, ordered magnetic materials (emphasizing their structure-sensitive properties), magnetic phenomena, small particles/thin films, and applications (magnetic recording, permanent magnets, quantitative imaging of magnetic domains, surface and interface magnetism, giant magneto-resistance). Offered: Sp.

MSE 555 Biomimetics: Biologically Inspired Design and Processing of Materials (4) How biological organisms produce materials with controlled structure, chemistry and hierarchy to attain physical properties far superior to traditional engineering materials. Fundamental biological building materials, their synthesis, and their self-assembly with emphasis on examples of soft and hard tissues.

MSE 559 Thin Film Science, Engineering, and Technology (3) The physics, chemistry, and engineering aspects of thin film deposition and technology. Vapor phase deposition emphasized. Topics include reactor types, vapor phase transport and hydrodynamics, surface and mass transport limited kinetics, nucleation and growth, homoepitaxy, heteroepitaxy, and thin film characterization. Prerequisite: permission of instructor. Offered: jointly with CHEM E 559.

MSE 562 Introduction to Electronic Composites (3) Fundamentals of microstructure-macro-property relation of electronic composites. This course covers applications (computers, laser packages, medical devices, MEMS, avionics), functions (mechanical, thermal, electromagnetic and optical), microstructure-macro-property relations, processing issues, and modeling of electronic composites. Recommended: 475 or M E 450. Offered: jointly with M E 562; odd years; Sp.

MSE 563 Advanced Composites: Design and Manufacturing (3) Manufacturing and processing techniques of metal-, polymer-, and ceramic-matrix composites; design considerations related to manufacturing techniques; non-destructive testing of composite structures. Fiber-matrix interfacial features and interactions. Interfacial thermodynamics applied to selection of fiber-matrix combinations. Prerequisite: MSE 475 or M E 450 or equivalent by permission of instructor. Offered: jointly with M E 563; Sp.

MSE 565 Electron Theory of Materials (3) Solid-state concepts of materials. Atomic bonding, statistical mechanics, Brillouin zone theory. Applications to conduction, optical, and magnetic properties of metals, semiconductors, and insulators. Prerequisite: MSE 466 or equivalent. Offered: W.

MSE 568 Active and Sensing Materials (3) Fundamental knowledge of the nano-structure property relations of active and sensing materials, and their devices. Examples of the active and sensing materials are: shape memory alloys (SMAs), ferromagnetic SMAs, ferroelec-

tric, pyroelectric and piezoelectric materials, thermoelectrics, electroactive and conducting polymers, photoactive polymers, photovoltaics, and electrochromic materials. Offered: jointly with M E 568; Sp.

MSE 590 Advanced Seminar in Materials Science and Engineering (2) Advanced topics in material science, led by faculty with specific expertise in the area of interest. Topics to be chosen and announced quarterly.

MSE 598 Engineering Materials Problems (4) Involves a concentrated project which may include the design of a system or process, or analysis of a set of data related to the materials engineering area. Requires a professional quality report and an oral presentation of the results.

MSE 599 Special Topics in Materials Science (1-5, max. 5) Studies of special advanced topics in materials science. Prerequisite: permission of instructor. Offered: A/WSp.

MSE 600 Independent Study or Research (*) Offered: A/WSp.

MSE 700 Master’s Thesis (*) Offered: A/WSp.

Mechanical Engineering

Mechanical Engineering

M E 230 Kinematics and Dynamics (4) NW Fabien Kinematics of particles, systems of particles, and rigid bodies; moving reference frames; kinetics of particles, systems of particles, and rigid bodies; equilibrium, energy, linear momentum, angular momentum. Prerequisite: A A 210.

M E 323 Engineering Thermodynamics (5) Kramlich Engineering thermodynamics, including thermodynamic concepts and properties, the first and second laws of thermodynamics, energy conversion, refrigeration, humidification, and combustion. Engineering design applications. Prerequisite: CHEM 142; MATH 126; PHYS 121.

M E 331 Introduction to Heat Transfer (4) Emery Study of heat transfer by conduction, radiation, and convection; elementary heat-exchanger design. Prerequisite: either M E 333 or CEE 342.

M E 333 Introduction to Fluid Mechanics (5) Riley Introduction to the basic fluid laws and their application. Conservation equations, dynamic similarity, potential flow, boundary-layer concepts, effects of friction, compressible flow, fluid machinery, measurement techniques. Prerequisite: AMATH 301; M E 323; either MATH 307 or AMATH 351.

M E 341 Energy and Environment (3) NW Malte Energy use. Fossil energy conversion. Oil, gas, coal resources. Air impacts. Nuclear energy principles, reactors, fuel cycle. Prerequisite: either MATH 112, MATH 124, or Q SCI 291; either CHEM 120, CHEM 142, PHYS 114, or PHYS 121. Offered: jointly with ENVIR 341/CHM E 341; A.

M E 354 Mechanics of Materials Laboratory (5) Tuttle Properties and behavior of engineering materials including stress-strain relations, strength, deformation mechanisms, strength, deformation, fracture, creep, and cyclic fatigue. Introduces experimental techniques common to
structural engineering, interpretation of experimental data, comparison of measurements to numerical/analytical predictions, and formal, engineering report writing. Lecture and laboratory. Prerequisite: MSE 170, CEE 220.

M E 355 Introduction to Manufacturing Processes (4) Ramulu Study of manufacturing processes, including interrelationships between the properties of the material, the manufacturing process and the design of components. Interpretation of experimental data, comparison of measurements to numerical/analytical predictions, and formal, engineering report writing. Prerequisite: M E 354.

M E 356 Machine Design Analysis (4) Chung Analysis, design, and selection of mechanical and electromechanical subsystems and elements, such as gears, linkages, cams, motors, and bearings. Lecture and laboratory. Prerequisite: M E 354.

M E 373 Introduction to System Dynamics (5) Garbini Mathematical modeling, analysis, and design of dynamic systems involving energy storage and transfer by lumped-parameter linear elements. Time-domain response by analytical methods and numeric simulation. Laboratory experiments. Prerequisite: either AMATH 351 or MATH 307; either AMATH 352 or MATH 308; E E 215; M E 230.

M E 395 Introduction to Mechanical Design (4) Cooper Process and methodology: decision making; optimization techniques; project planning; engineering economics; probabilistic and statistical aspects of mechanical design; ethical and legal issues. Lecture and laboratory. Prerequisite: M E 323; M E 333; M E 373; IND E 315 or MATH 390.

M E 403 Material-Removal Processes (3) Ramulu Cutting and noncutting processes for material removal in the shaping of manufactured products. Study of forces and of power consumption and relative costs in the various processes. Prerequisite: M E 355 which may be taken concurrently.

M E 406 Corrosion and Surface Treatment of Materials (3) Sandwith Corrosion fundamentals and forms (galvanic, crevice, pitting, stress corrosion, erosion, hydrogen and leaching). Principles of design, materials selection, cathodic protection and surface treatments (coatings, carburizing, nitriding and plating) applied to reduce corrosion. Failure analysis applied to case studies.

M E 409 Introduction to Numerical Control and Computer-Aided Manufacturing (3) Ramulu Control system fundamentals, numerical control (NC) machine control systems, and the design aspect of NC machine tools, programming methods of NC machines, computer-aided manufacturing, CNC, DNC, and process optimization. Prerequisite: M E 355 which may be taken concurrently.

M E 415 Sustainability and Design for Environment (3) Cooper Analysis and design of technology systems within the context of the environment, economy, and society. Applies the concepts of resource conservation, pollution prevention, life cycle assessment, and extended product responsibility. Examines the practices, opportunities, and role of engineering, management, and public policy. Offered: jointly with ENVIR 415/CEE 495.

M E 425 HVAC Engineering (4) Emery Heating, ventilating, and air conditioning of built environment. Human comfort, psychrometric processes, load computations, fluid distribution, and controls. Design analysis of HVAC system is taught in the lectures and applied in the class project. Prerequisite: M E 323; M E 331.

M E 426 Sustainable Energy Design (4) Malte Energy systems with renewable (solar) energy and efficient use of energy. Project-based learning: analysis, systems engineering, design, component characteristics, and environmental impacts. Prerequisite: M E 333.

M E 430 Advanced Energy Conversion Systems (4) Kramlich Advanced and renewable energy conversion systems and technologies are treated. Included are high efficiency combined cycles; renewable energy conversion involving solar, wind, and biomass; direct energy conversion and fuel cells; and nuclear energy. Environmental consequences of energy conversion and environmental control are discussed. Prerequisite: M E 323.

M E 431 Advanced Fluid Mechanics (4) Mescher Advanced topics in fluid mechanics, including kinematics, potential theory and vortex dynamics, viscous flow, turbulence, experimental and numerical methods, and design. Prerequisite: M E 333.

M E 432 Gas Dynamics (3) Dynamic and thermodynamic relationships for the flow of a gas. Application of thermodynamic processes involving nozzles, diffusers, compressors, and turbines. Prerequisite: either M E 333 or CEE 342. Offered: by request only.

M E 433 Turbomachinery (4) Aliseda Thermodynamics, gas dynamics, and fluid mechanics of axial and centrifugal compressors, pumps, and turbines. Selection of components for engineering applications. Design problems and/or laboratory experiments to illustrate operating characteristics of turbomachines.

M E 436 Friction and Wear of Materials (3) Study of principles of friction and wear behavior of materials and of those material properties that affect such behavior. Principles of lubrication. Applications to design of surfaces for wear resistance. Prerequisite: M E 333; M E 356.

M E 442 Renewable Energy (4) NW Malte Introduction to renewable energy. Principles and practices: solar, wind, water, and biomass energy conversion. Prerequisite: either MATH 112, MATH 124, or Q SCI 291; either CHEM 120, CHEM 142, PHYS 115, or PHYS 122. Offered: jointly with CHEM E 442/ENVIR 442.

M E 445 Introduction to Biomechanics (4) Sanders Presents the mechanical behavior of tissues in the body and the application to design of prostheses. Tissues studies include bone, skin, fascia, ligaments, tendons, heart valves, and blood vessels. Discussion of the structure of these tissues and their mechanical response to different loading configurations. An important part of the class is a final project. Offered: jointly with BI/EN 440.

M E 450 Introduction to Composite Materials and Design (3) Tuttle Synthesis of strain analysis of continuous fiber composite materials. Orthotropic elasticity, laminate theory, failure criterion, and design philosophies, as applied to structural polymeric composites. recommended: MSE 475.

M E 460 Kinematics and Linkage Design (3) Garbini Synthesis of linkage-type mechanisms using graphical and computer methods.

M E 468 Air-Pollution Control Equipment Design (3) Pilotti Designs to control air pollutants from stationary sources. Procedures for calculating design and operating parameters. Fundamental mechanisms and processes of gaseous and particulate control equipment for absorption and adsorption of gaseous pollutants; electrostatic precipitation and filtration of particulate pollutants. Actual case studies. Offered: jointly with CHEM E 468/CEE 494.

M E 469 Applications of Dynamics in Engineering (4) Storti Application of the principles of dynamics to selected engineering problems, such as suspension systems, gyroscopes, electromechanical devices. Includes introduction to energy methods, Hamilton’s principle and Lagrange equations and the design of dynamic systems. Prerequisite: M E 374.

M E 471 Automatic Control (4) Berg Dynamic system modeling; control system stability and performance analysis; compensator design by Bode and root-locus methods. Prerequisite: M E 374.

M E 473 Instrumentation (4) Garbini Principles and practice of industrial and laboratory measurement. Dynamics of instrument response; generalized performance analysis of
sensor systems; theory of transducers for motion, force, pressure, flow, and other measurements. Lecture and laboratory. Prerequisite: M E 374.

M E 474 Systems Modeling and Simulation (3) Fabien Unified approach to modeling of systems, and computer simulation of systems behavior. Selecting system variables; writing state, loop, and node equations; modal response and state transition response; system functions and convolution; analogs. Applications to control, vibrations, and other problems. Prerequisite: M E 374.

M E 477 Embedded Computing in Mechanical Systems (4) Garbini Analysis of electromechanical systems employing microcomputers for control or data acquisition. Microcomputer architecture, memory organization, C language programming, interfaces, and communications. Particular emphasis on design of hardware and software interfaces for real-time interaction with mechanical systems. Weekly laboratory. Prerequisite: M E 374.

M E 478 Finite Element Analysis (4) Reinhall Development of theory and concepts of finite element analysis. Applications in all areas of mechanical engineering, including mechanics of solids, heat transfer, and dynamics. Four mechanical systems. Weekly computer exercises. Prerequisite: M E 123; M E 374; either MATH 308 or AMATH 352.

M E 480 Introduction to Computer-Aided Technology (4) Ganter Principles of computer-aided technology. Computer-aided design, engineering, drafting, and manufacturing; computer-aided design systems, geometry, computer graphics, hardware, computer-aided vehicle/system design synthesis. System demonstrations, laboratories, and site visits. Prerequisite: M E 123; CSE 142.

M E 485 Introduction to Electronic Packaging and Materials (3) Taya The governing equations of transport phenomena: mechanical, thermal, and electromagnetic behavior; thermoelectrical and electromagnetic properties of packaging materials, electromagnetic characteristics of circuit and transmission lines, thermal management and reliability analysis of packaging, interconnect and material processing technology. Prerequisite: MSE 170. Offered: jointly with MSE 485.

M E 487 Laboratory in Electronic Packaging and Materials (1) Taya, Stribley Laboratory course to accompany M E 485 Experiments related to design, processing and reliability of electronic packaging used in consumer electronics. Corequisite: M E 485. Offered: jointly with MSE 487.

M E 490 Naval Architecture (3) Adee Theory of naval architecture; ship’s lines, hydrostatic curves, intact and damaged stability, launching.

M E 491 Naval Architecture (3) Adee Theory of naval architecture; strength, ABS rules, water waves, ship and platform motions.

M E 492 Naval Architecture (3) Adee Theory of naval architecture; dimensional analysis, resistance, model testing, propellers, steering.

M E 495 Mechanical Engineering Design (4) Cooper Design laboratory involving the identification and synthesis of engineering factors to plan and achieve specific project goals. Current literature and prerequisite texts are used as reference sources. Lecture and laboratory. Prerequisite: M E 395.

M E 496 Technology-Based Entrepreneurship (3) Concentrates on hands-on aspects of innovation and entrepreneurial enterprise development. Examines relationships between innovation, iterative prototyping, and marketing testing. Students identify market opportunities, create new technology-based products and services to satisfy customer needs, and construct and test prototypes. Prerequisite: IND E 250. Offered: jointly with IND E 496.

M E 498 Special Topics in Mechanical Engineering (1-5, max. 6) Lecture and/or laboratory. Maximum of 6 credits may be applied toward an undergraduate degree.

M E 499 Special Projects (2-5, max. 6) Written report required.

M E 501 Modern Manufacturing Processes (3) Ramulu General survey and introduction to modern manufacturing engineering processes. Fundamental principles and practices of modern manufacturing processes. Case studies and exercises relating the course material directly to modern industrial practice. Offered: A.

M E 502 Plasticity and Metal Forming (3) Stress-strain and stress-strain-rate relations in metal forming; plastic instability. Work of deformation. The slip-line field, load bounding, applications to frames, drawing, forging, and extrusion. Offered: odd years.

M E 504 Introduction to Microelectronic Mechanical Systems (4) Theoretical and practical aspects in design, analysis, and fabrication of MEMS devices. Fabrication processes, including bulk and surface micromachining. MEMS design and layout. MEMS CAD tools. Mechanical and electrical design. Applications such as micro sensors and actuators, or chemical and thermal transducers, recent advances. Offered: jointly with E E 502/ M SE 504.

M E 505 Computer Integrated Manufacturing (3) Design and analysis of advanced manufacturing systems from a strategic as well as technological perspective. Focus on information generation, management, and coordination aspects of complex manufacturing organizations. Examination of system integration alternatives and consequences for relationships with customers and suppliers. Offered: jointly with IND E 531.

M E 508 Theory and Design for Mechanical Measurements (3) Fundamental concepts of mechanical measurements, principles of sensors and transducers, signal conditioning and data acquisition, advanced experiment planning and analysis, and applications in mechanical engineering.

M E 510 Mathematical Foundations of Systems Theory (4) Damborg Mathematical foundations for system theory presented from an engineering viewpoint. Includes set theory; functions, inverse functions; metric spaces; finite dimensional linear spaces; linear operators on finite dimensional spaces; projections on Hilbert spaces. Applications to engineering systems stressed. Prerequisite: graduate standing or permission of instructor. Offered: jointly with A A S 540/CH E M 510 E 510; A.

M E 515 Life Cycle Assessment (3) Cooper Presents and discusses the computation structure and data sources for environmental Life Cycle Assessment. Uses Life Cycle Assessment to analyze materials, products, and services. The analysis either identifies opportunities for improvements or selects a superior alternative on the basis of pollution prevention and resource conservation. Offered: W.

M E 518 Seminars on Advances in Manufacturing and Management (1) Ramulu Current topics and advances made in manufacturing and management. Topics presented by invited speakers from academia and industry. Emphasis on the multidisciplinary nature of manufacturing and management. Offered: jointly with IND E 518; AWSp.

M E 519 Seminar (0-6) Credit/no credit only. Offered: AWSp.

M E 520 Seminar (-1, max. 6) Credit/no credit only. Offered: AWSp.

M E 521 Thermodynamics (3) Kramlich Fundamental concepts of temperature, thermodynamic properties, and systems. The first, second, and combined laws. Development of the relations of classical thermodynamics. Introduction to statistical thermodynamics. Prerequisite: M E 323 and graduate standing in mechanical engineering or permission of instructor. Offered: A.

M E 522 Thermodynamics (3) Malte Topics from statistical thermodynamics, including the Boltzmann, Bose-Einstein, and Fermi-Dirac statistics. Solutions of the Schrodinger wave equation and evaluation of the partition function for translation, rotation, and vibration. Prerequisite: M E 521 or permission of instructor. Offered: by request only.

M E 523 Energy and Environment Seminar (1) Malte Student discussions of topics in combustion science and technology, alternative fuels, renewable energy, environmental consequences of energy conversion, and design for environment. Also, presentations by outside experts. May be repeated for credit. Credit/no credit only. Offered: AWSp.

M E 524 Combustion (3) Kramlich Chemical and physical processes of combustion with applications to design of combustors, fuel selection, and consideration of environmental effects. Prerequisite: graduate standing in mechanical engineering or permission of instructor. Offered: odd years; Sp.

M E 525 Applied Acoustics I (3) Introduces acoustics through various applications such as

540
M E 526 Special Topics in Acoustics (3) Advanced study of special topics in acoustics, such as medical ultrasound, underwater sound, noise control and vibrations. Prerequisite: ME 525, or permission from instructor. Offered: A.

M E 528 Acoustics of Environmental Noise (4) Offered: jointly with CEE 554.

M E 530 Heat Conduction and Radiation (3) Mescher Heat conduction advanced fundamentals, emphasizing microscale applications. Radiative transfer for transparent and for absorbing and scattering media, emphasizing combustion, biomedial, and atmospheric/ oceanic environmental applications. Forward and inverse problems for both conduction and radiation. Prerequisite: graduate standing in mechanical engineering or permission of instructor. Offered: W.

M E 531 Conductive Heat Transfer (3) Analysis of steady-state and transient heat conduction in single- and multidimensional systems by mathematical, graphical, numerical, and analogical methods. Prerequisite: graduate standing in mechanical engineering or permission of instructor. Offered: by request only.

M E 532 Convective Heat Transfer (3) Kramlich Introduces the theories of fluid flow and conduction convection theory as applicable to forced- and natural-convection heat transfer. Condensation and boiling heat transfer. Prerequisite: graduate standing or permission of instructor. Offered: Sp.

M E 533 Fluid Mechanics I (3) Riley Basic conservation laws and kinematics of fluid flow constitutive relationships, Newtonian fluids, dimensional analysis, vorticity dynamics, inviscid flows, applications. Offered: A.

M E 534 Fluid Mechanics II (3) Riley Review of basic principles, some exact solutions and their interpretation, waves (water waves, sound waves, shock waves), boundary layers, jets and wakes, flow stability, turbulence, applications. Prerequisite: M E 533 or permission of instructor. Offered: W.

M E 535 Computational Techniques in Mechanical Engineering (3) Emery Advanced heat transfer studies of interest to mechanical engineers. Subject coverage varies from year to year. Prerequisite: permission of instructor. Offered: Sp.

M E 537 Topics in Fluid Mechanics (3) Selected fluid mechanics relevant to current advances in research and application. Topics selected vary with faculty and student interest, but have included flow stability, special topics in turbulence, and complex turbulent reacting flows. Offered: by request only.

M E 538 Turbulent Boundary Layer Theory (3) Characteristic features of turbulent boundary layers; development of the turbulent boundary layer equations; equilibrium boundary layers; integral methods of solution based on power law and wall-wake velocity profiles; methods of solution based on higher order constitutive equations; application to diffuser flows and free shear flows; new developments and physical models. Offered: odd years; A.

M E 541 Fatigue of Materials (3) Ramulu Macro and micro aspects of fatigue of metals and fatigue mechanisms. Analytical methods for fatigue and life assessment in advanced materials. Offered: W.

M E 543 Fluid Turbulence (3) Methods of characterizing fluid turbulence; probability concepts; spatial and temporal velocity correlations; spectral energy transfer; turbulent diffusion; isotropic turbulence and Kolmogoroff's hypothesis; Taylor's hypothesis; hot-wire measurement techniques. Prerequisite: 3 credits of graduate level fluid mechanics or permission of instructor. Offered: even years; W.

M E 544 Advanced Turbulence Modeling Techniques (3) Riley The Reynolds stress transport equations; plane homogeneous shear flow, modeling the pressure-strain, diffusion, and dissipation of the Reynolds stress tensors; one- and two-equation turbulence models; near-wall turbulence and wall functions; limitations of length scale and eddy viscosity modeling. Prerequisite: 3 credits of turbulence related course work. Offered: every years by request only; Sp.

M E 547 Linear Systems Theory (4) Linearity, linearization, finite dimensionality, time-varying vs. time-invariant linear systems, interconnection of linear systems, functional/structural descriptions of linear systems, system zeros and invertibility, linear system stability, system norms, state transition, matrix exponentials, controllability and observability, realization theory. Prerequisite: either A A 447, E E 447 or M E 471. Offered: jointly with E E 547A/A 547; A

M E 548 Linear Multivariable Control (3) Introduction to MIMO systems, successive single loop design comparison, Lyapunov stability theorem, full state feedback controller design, observer design, LQR problem statement, dynamic analysis and tracking design. LQG design, separation principle, stability robustness. Prerequisite: A A 547E/E E 547/M E 547. Offered: jointly with A A 548/E E 548.

M E 550 Nonlinear Optimal Control (3) Calculus of variations for dynamical systems, definition of the dynamic optimization problem, constraints and Lagrange multipliers, the Pontryagin Maximum Principle, necessary conditions for optimality, the Hamilton-Jacobi-Bellman equation, singular arc problems, computational techniques for solution of the necessary conditions. Prerequisite: graduate standing; recommended: A A 548 or E E 548. Offered: jointly with A A 550E/E E 550; odd years.

M E 551 Elasticity I: Elastostatics (3) Tata Elastostatics, including general formulations of 2D and 3D elastostatic problems (stress function method, complex variable method, displacement potential method). Eschelby's method is emphasized and used to solve 2D and 3D problems with special application to composite materials. Offered: W.

M E 552 Elasticity II: Viscoelasticity and Elastodynamics (3) Tata Elastodynamics includes wave propagation in linear elastic and linear viscoelastic solids where solids are monolithic materials, composite materials. Viscoelasticity part includes the stress-strain equations in terms of convolution integral, Fourier transform and Laplace transform modes. Simple and fundamental problems are solved by several techniques as demonstration. Offered: even years; Sp.

M E 553 Adhesion Mechanics (3) Tuttle Introduction to adhesion systems and test/evaluation techniques. Stress/strain analysis methods used with adhesive joints. Examples of practical applications. Prerequisite: graduate student status or permission of instructor. Offered: even years; Sp.

M E 555 Experimental Stress Analysis I (3) Tuttle Theory and practice of experimental techniques including strain gages and strain gage-based devices, thermocouples, LVDTs, and transducer design. Lecture and laboratory. Prerequisite: graduate standing or permission of instructor. Offered: A.

M E 557 Experimental Stress Analysis II (3) Tuttle Theory and practice of optical mechanics, including interferometric techniques (moire and holographic), geometric moir methods, and photoelasticity. Lecture and laboratory. Prerequisite: graduate standing or permission of instructor. Offered: every years; W.

M E 559 Introduction to Fracture Mechanics (3) Ramulu Applications of linear fracture mechanics to failure analysis and fracture control based on actual case studies. Fracture toughness and fatigue testing techniques, crack initiation and propagation fatigue life prediction of mechanical components subjected to environmental effects. Offered: W.

M E 560 Advanced Theory of Fracture (3) Ramulu Theories of linear fracture mechanics, fracture dynamics, ductile fracture, stable crack growth and mixed mode fracture. Discussion of advanced topics from recent literature. Prerequisite: M E 559 or permission of instructor. Offered: even years; Sp.

M E 562 Introduction to Electronic Composites (3) Tata Fundamentals of microstructure-macro-property relation of electronic composites. This course covers applications (computers, laser packages, medical devices, MEMS, avionics), functions (mechanical, thermal, electromagnetic and optical), microstructure-macro-property relations, processing issues, and modeling of electronic composites. Recommended: M E 450 or MSE 475. Offered: jointly with MSE 562; Sp.
M E 563 Advanced Composites: Design and Manufacturing (3) Manufacturing and processing of composites. Synthesis of inorganic-polymers, and ceramic-matrix composites; design considerations related to manufacturing techniques; non-destructive testing of composite structures. Fiber-matrix interface features and interactions. Interfacial thermodynamics applied to selection of fiber-matrix combinations. Prerequisite: M E 450 or MSE 475 or equivalent by permission of instructor. Offered: jointly with M SE 563; Sp.

M E 564 Mechanical Engineering Analysis (3) Storti Application of mathematical methods to the description and analysis of systems in mechanical engineering. Analogies in heat transfer, fluid flow, stress distribution, dynamics, and feedback control. Prerequisite: graduate standing in mechanical engineering or permission of instructor. Offered: A.

M E 565 Mechanical Engineering Analysis (3) Storti Applications of vectors, matrices, and partial differential equations to mechanical engineering systems, including computational techniques and analogies. Prerequisite: graduate standing in mechanical engineering or permission of instructor. Offered: W.

M E 568 Active and Sensing Materials (3) Fundamental knowledge of the nano-structure property relations of active and sensing materials, and their devices. Examples of the active and sensing materials are: shape memory alloys (SMAs), ferromagnetic SMAs, ferroelectric, pyroelectric and piezoelectric materials, thermoelectrics, electroactive and conducting polymers, photoactive polymers, photovoltaics, and electronic and magnetic materials. Offered: jointly with M SE 568; Sp.

M E 570 Manifolds and Geometry for Systems and Control (3) Morgansen Introduction to fundamentals of calculus on manifolds and group theory with applications in robotics and control theory. Topics include: manifolds, tangent spaces and bundles, Lie groups and algebras, coordinate versus coordinate-free representations. Applications from physics, robotics, and control theory. Offered: jointly with A A 570 and E E 570; W; even years.

M E 572 Methodologies for Engineering Design: Conceptual Design (3) Kumar Methodologies particularly useful in the conceptual or preliminary phase of a design. The design process. Impact of formulating independent functional requirements. Physical and functional coupling in design. Case studies in conceptual design of products and processes. Prerequisite: graduate standing or permission of instructor. Offered: even years; W.

M E 573 Methodologies for Engineering Design: Probabilistic Mechanical Design (3) Ranganathan Implementation of probabilistic methods to design. Loading, geometry, stress, strain/deflection described as random variables, compared to material properties/behavior in terms of random variables. Design, analysis, reliability, risk analyses conducted on common structures with results compared to conventional deterministic approaches. Projects using probabilistic methods to optimize selected component designs. Offered: every even year; Sp.

M E 578 Optimization in System Sciences (3) Mizbah Cover convex sets, separation theorems, theorem of alternatives and their applications, convex analysis, convex functions, conjugation, subgradients, convex optimization; duality theorems, linear and semi-definite programming. Linear matrix inequalities, optimization algorithms, applications in system theory and control, bilinear, rank minimization, optimization software. Recommended: A A 447/E E 547. Offered: jointly with A A/E E 578; W.

M E 580 Geometric Methods for Non-Linear Control Systems (3) Bergmann Analysis and design of nonlinear control systems focusing on differential geometric methods. Topics include controllability, observability, feedback linearization, invariant distributions, and local coordinate transformations. Emphasis on systems evolving on Lie groups and linearly uncontrollable systems Prerequisite: A A 570/E E 570; M E 570. Offered: jointly with A A 580/E E 580; Sp; every year.

M E 584 Combustion in Airbreathing Propulsion (3) Fundamentals of gasdynamics, mixing, and thermodynamics applies to the analysis and design of gas turbine, ramjet and scramjet engine combustors, with treatment of computer simulation. Offered: by request only.

M E 588 Dynamics and Vibrations (3) Shen Variational techniques, Hamilton’s principle, Lagrange’s equations applied to dynamics of particles and rigid bodies. Vibration analysis of multi-degree-of-freedom and constrained systems. Prerequisite: graduate standing in engineering or permission of instructor. Offered: A.

M E 589 Vibrations (3) Storti Study of systems with nonlinear damping and restoring forces excited by deterministic or random inputs. Applications in measurement, testing, and design of mechanical systems. Nonlinear systems are emphasized. Prerequisite: M E 588 or permission of instructor. Offered: even years; W.

M E 590 Vibrations (3) Reinhall Study of structures with nonlinear damping and restoring forces excited by deterministic or random inputs. Applications in measurement, testing, and design of mechanical systems. Random inputs are emphasized. Prerequisite: M E 588 or permission of instructor. Offered: even years; Sp.

M E 591 Robotics and Control Systems Colloquium (1, max. 3) Berg Colloquium on current topics in robotics and control systems analysis and design. Topics presented by invited speakers as well as on-campus speakers. Emphasis on the cross-disciplinary nature of robotics and control systems. Credit/no credit only. Offered: jointly with A A/CHEM E/E E 591; AWSp.

M E 593 Feedforward Control (3) Devasia Design feedforward controllers for precision output tracking; inversion-based control of non-minimum-phase systems; effect of plant uncertainty on feedforward control; design of feedforward controllers for applications such as vertical take off and landing aircraft, flexible structures and piezo-actuators. Prerequisite: A A 547/E E 547/M E 547. Offered: jointly with A A/E E 593; odd years.

M E 594 Robust Control (3) Basic foundations of linear analysis and control theory, model realization and reduction, balanced realization and truncation, stabilization problem, coprime factorization, Youla parameterization, matrix inequalities, H-infinity and H2 control, KYP lemma, uncertain systems, robust H2, integral quadratic constraints, linear parameter varying synthesis, applications of robust control. Offered: jointly with A A/E E 594; odd years; Sp.

M E 597 Networked Dynamics Systems (3) Provides an overview of graph-theoretic techniques that are instrumental for studying dynamic systems that coordinate their states over a signal-exchange network. Topics include network models, network properties, dynamics over networks, formation control, biological networks, observability, controllability, and performance measures over networks. Prerequisite: A A 547/E E 547/M E 547. Offered: jointly with A A 597/E E 597.

M E 598 Topics in Research (1) Doctoral seminar. Credit/no credit only. Offered: AWSp.
M E 599 Special Projects (1-5, max. 9) Written report required. Prerequisite: permission of department Chairperson. Offered: AWSpS.

M E 600 Independent Study or Research (*) Written report required. Offered: AWSpS.

M E 700 Master’s Thesis (*) Offered: AWSpS.

M E 800 Doctoral Dissertation (*) Offered: AWSpS.

Mechanical Engineering
Industrial Engineering

MEIE 516 Advanced Topics in Engineering Statistics (3) Roberts, Zabinsky Topics are flexible and tailored to the needs of the particular student group involved. Topics usually considered: regression, correlation, experimental design, Monte Carlo techniques, Markov processes, extreme value theory, time-series analysis. Prerequisite: graduate standing or permission of instructor.

MEIE 599 Special Projects in Industrial Engineering (1-5, max. 9) Prerequisite: permission of industrial engineering program director. Offered: AWSp.

Technical Communication

T C 100 Introduction to Technical Communication (3) Topics may include: virtual communities, human-computer interaction, web design, usability testing, visual design, and others. Explores course content through individual and group hands-on projects. Offered: A.

T C 231 Introduction to Technical Writing (3) Principles of organizing, developing, and writing technical information. Report forms and rhetorical patterns common to scientific and technical disciplines. Technical writing conventions such as headings, illustrations, style, and tone. Numerous written assignments required. Required for all engineering majors. Prerequisite: either C LIT 240, both ENGL 109 and ENGL 110, ENGL 111, I&S/VLPA 212, ENGL 121, ENGL 131, ENGL 182, ENGL 197, ENGL 198, ENGL 199, or ENGL 281. Offered: AWSpS.

T C 310 Introduction to Communication Design (5) Turns Functions of, and relationships among, major software tools in the context of common technical communication design problems. Students practice explaining and justifying design solutions in terms of key features and user characteristics. Offered: A.

T C 317 Survey of Usability Research Techniques (5) Introduces usability research methods used in the product-development process; contextual inquiry, surveys and interviews, focus groups, user profiling, usability testing, cognitive walkthroughs, heuristics, and others. Offered: Sp.

T C 318 Survey of User Experience Design (5) Provides a project-based introduction to the user interface design process and is oriented toward practical methods for approaching a design problem. Focuses on developing conceptual designs based on user need. Offered: Sp.

T C 319 Survey of Concepts in Human-Computer Interaction (5) Studies the social, cognitive, behavioral and contextual aspects of information systems and informational dimensions of the human-computer interface, and other user-centered design concepts. Surveys research literature of human information behavior, as well as ethical standards. Offered: W.

T C 333 Advanced Technical Writing and Oral Presentation (4) Emphasis on the presentation of technical information to various audiences. Style of writing required for proposals, reports, and journal articles. Oral presentation principles, including use of visuals, as well as organizing and presenting an effective talk. For engineering majors. Prerequisite: T C 231. Offered: AWSpS.

T C 400 Scientific and Technical Communication (5) Kasonic, Kolko Principles and practices of writing to communicate scientific and technical information to a variety of readers, including the expert, general scientific and technical reader, manager, and general public. Examines research and issues in the TC field including social contests and environments (legal, ethical, cultural). Required of technical communication majors. Prerequisite: T C 231. Offered: A.

T C 401 Style in Scientific and Technical Writing (5) Spyridakis Grammatical structures and stylistic strategies within specific professional contexts. Achieving clarity and conciseness through word choice and placement, using a variety of sentence structures for appropriate emphasis, developing effective tone. Required of technical communication majors. Prerequisite: T C 231. Offered: A.

T C 402 Scientific and Technical Editing (5) Farkas, Kolko Editorial responsibilities and practice in the communication of scientific and technical information; the editor’s role both as editor and as supervisor of publication groups. Addresses managing collaborative teams and basic XML concepts and metadata. Required of technical communication majors. Prerequisite: T C 400 with a minimum grade of 3.0; T C 401 with a minimum grade of 3.0. Offered: W.

T C 403 Publication Project Management (3) Plumb Responsibilities and practice in managing publication projects in scientific and technical organizations. Project design, coordination, production, and evaluation, including planning, organizing, staffing, and directing. Required of technical communication majors. Offered: Sp.

T C 407 Software User Assistance (5) Farkas Concepts and skills for preparing manuals, online help systems, performance-support systems, and other forms of locally stored and Web-based software user assistance. Includes principles of human-computer interaction, usability evaluation, and the software-development process. Students create both end-user and developer documentation. Prerequisite: T C 310. Offered: Sp.

T C 408 Public Documents: Proposals, EISs, Assessments (3) Bereano Analyzing special documents of public character: proposals, EISs, questionnaires, and environmental assessments. Understanding socio-political milieu in which they are prepared, organized, written; the specialized audiences (e.g., agencies with their missions, guidelines, constituencies; citizen groups; commercial interests) they serve. Documents, the decision-making process. Offered: odd years; Sp.

T C 411 Visual Media in Technical Communication (5) I&S/VLPA Williams Use of visuals in print and electronic communication. Topics include vision, perception, comparison of text and visual media principles for the selection and use of visual media, information graphics icons, page and screen design typography, and color. Offered: W.

T C 412 Print Production (5) Sauer, Williams Introduction to print production for technical communicators. Topics include digital pre-press, printing, binding, and finishing. Offered: Sp.

T C 415 Production Editing (4) Williams The editorial role in the preparation of text and visual materials for production. The editor’s responsibilities and prerogatives as they relate to those of other professionals in the production phase of the publications field.

T C 422 Style in Technical Writing (3) Grammatical structures and stylistic strategies. Achieving clarity and conciseness through word choice and placement, using a variety of sentence structures for appropriate emphasis, developing effective tone. Offered: W.

T C 435 Introduction to Content Management (3) Principles and practices of building, managing and using content management systems in the technical communication workplace. Examines both the intricacies of collaborative workflow and the organizational contexts that surround them.

T C 436 Design and Authoring of CAI (3) Winn Introduction to the design of computer-assisted-instructional programs. Types of learning, characteristics of effective instruction. Students design and produce CAI programs using authoring systems for computers. Offered: jointly with EDC&I 436; A.

T C 437 Web Design and Web Publishing (5) I&S/VLPA Farkas Design principles and skills including navigation, functional design, visual design, and content development. Includes the ongoing process of Web publishing. Addresses societal issues pertaining to the Web and the Internet. Students build a website and plan for ongoing Web publishing. Prerequisite: T C 310. Offered: W.

T C 438 Web Technologies (5) Markups languages and styles, JavaScript, Flash, Photoshop, and the fundamentals of digital sound and video. Includes an introduction to server-side technologies. Students expand their existing design skills to encompass the use of these Web technologies. Prerequisite: T C 310; T C 437. Offered: Sp.

T C 455 User Interface Design (4) Furness Design oriented to cover fundamentals of user interface design; models on human computer interaction, software psychology, input devices, usability, cognitive and perceptual aspects of human-computer interaction, advanced interface, and research methodologies are discussed. Offered: jointly with IND E 455; A.

T C 461 Japanese for Technical and Business Professions I (5) VLPA Kato Strengthens knowledge of grammar and vocabulary and applies this to basic technical business communication situations. Covers cultural concepts underlying these situations. Reviews authentic materials on technology-related topics. Teaches skills to analyze sentence structure for accurate interpretation. Lab work required. Placement test before admission. Offered: A.
T C 462 Japanese for Technical and Business Professions II (5) VLPA Kato Covers the functional/situational conversation skills necessary in technical and business communication situations, plus the cultural concepts underlying these situations. Reviews skills (such as prediction) for more effective reading and improves skills for analyzing complex sentence structure. Additional grammar, vocabulary, and kanji are introduced. Lab work required. Prerequisite: T C 461. Offered: W.

T C 463 Japanese for Technical and Business Professions III (5) VLPA Kato Covers the functional/situational conversation skills necessary in technical and business communication situations, plus the cultural concepts underlying these situations. Further improves skills introduced in previous courses and reviews skills for understanding inter-sentence structure. Additional grammar, vocabulary, and kanji introduced. Lab work required. Prerequisite: T C 462. Offered: Sp.

T C 493 Senior Study (5) Integration of knowledge and skills acquired during major program into one paper or project. Offered: A/WSpS.

T C 495 Professional Practice (3-10, max. 10) Williams Supervised internship in a publications organization approved by the faculty adviser. A minimum of one internship is required of students majoring in technical communication. Credit/no credit only. Offered: A/WSpS.

T C 496 Directed Research in Technical Communication (1-5, max. 10) Williams, in consultation with the faculty advisor, determines the topic and objective of the research. Prerequisite: permission of instructor. Offered: W.

T C 497 Study Abroad: Technical Communication (3-5, max. 15) Upper-division technical communication courses, for which there are no direct University of Washington equivalents, taken through the Department of Technical Communication’s Study Abroad Program. Offered: S.

T C 498 Special Topics (1-5, max. 15) Special topics in technical communication to be offered occasionally by permanent or visiting faculty members.

T C 499 Special Projects (1-5, max. 10) Individual undergraduate projects in technical communication. Offered: A/WSpS.

T C 501 Theoretical Dimensions of Technical Communication (4) Corey, Sauer Theories and research drawn from a variety of fields that inform such topics as the historical and social context of technical communication, the aims of technical discourse, readability, invention and audience, audience analysis, technical style, and graphics. Prerequisite: admission to an engineering or science program or permission of instructor. Offered: A.

T C 502 Empirical Traditions in Technical Communication (4) Williams Introduction to empirical traditions that inform research and practice in field of technical communication. Topics include epistemological assumptions underlying empirical research, empirical methods, and survey of results of empirical research on effects of text and visual media on comprehension, recall, and performance. Prerequisite: graduate Standing or permission of instructor. Offered: Sp.

T C 505 Computer-Assisted Communication (4) Koiko Explores computer-assisted communication from three perspectives: (1) cultural roles of communication technologies; (2) relationships between communication and information including information technologies in the workplace, academe, and other settings; and (3) application to design including models for audience analysis, task analysis, and cognitive systems engineering. Prerequisite: graduate standing or permission of instructor. Offered: Sp.

T C 509 Writing the Scientific Article (3) Hasselkorn, Illman Examination of principles and practice of writing research manuscripts, articles, abstracts, and oral presentations. Detailed examination of scientific publication process includes issues of style, organization, and ethics. Students draft, critique, and revise their own manuscripts and learn to review the manuscripts of others. Offered: Sp.

T C 510 Information Design (4) Farkas Examination of the design principles and procedures underlying the creation of both print and electronic information presentations. Topics include: print vs. electronic media, designing for the page and screen, information topologies, and hypermedia. Seminar includes a design project. Prerequisite: T C 501 or permission of instructor. Offered: A.

T C 511 Visual Media in Technical Communication (5) Williams Use of visuals in print and electronic media. Topics include vision, attention and perception, semiotics, depiction, information graphics, icons, typography, and principles of page and screen design. Offered: W.

T C 512 International Technical Communication (4) Spyridakis Examinations theory, research, and practice in the internationalization and localization of print and electronic documents. Topics include cultural models and schemata, contrastive rhetoric, controlled languages, translation, visuals, and usability testing. Prerequisite: graduate standing or permission of instructor. Offered: W.

T C 515 Ecological Information Systems (4) Introduction to cognitive work analysis framework. Prepares for active role in design and evaluation of information systems. Familiarization with basic concepts of cognitive systems engineering and practice in field study, data analysis, and transforming field findings into requirements for the design of an information system. Offered: jointly with LIS 515.

T C 517 Usability Testing (4) Ramey Discusses the human-computer interface (HCI) as the communicative aspect of a computer system. Analyzes usability issues in HCI design, explores design-phase methods of predictability, and introduces evaluative methods of usability testing. Prerequisite: substantial experience with computers and graduate standing, or permission of instructor. Offered: A.

T C 518 User-Centered Design (4) Tsutsui Explores the user-centered design paradigm from a broad perspective, emphasizing how user research and prototype assessment can be integrated into different phases of the design process. Students learn to think like a user-centered designer and carry out activities that are key to user-centered design. Offered: jointly with IHD E 545; W.

T C 520 Technical Communication Systems (4) Hasselkorn Emphasizes the role and function of communication as a key to understanding organizational frameworks and managerial practices. Traditional and innovative approaches to viewing and managing technical communication. Roles, responsibilities, impact of technology. Offered: W.

T C 521 Seminar: Current Issues in Technical Communication (1-2, max. 3) Presentations on current issues in technical communication. Credit/no credit only. Prerequisite: T C graduate student status or permission of instructor. Offered: AW.

T C 523 Seminar: Issues in TC Scholarship and Professional Activity (1, max. 3) Exploration of advanced issues in technical communication scholarship and practice. Credit/no credit only. Prerequisite: TC PHD student status or permission of instructor. Offered: A/WSpS.

T C 537 User-Centered Web Design (5) Farkas Theory and practice of the user-centered web development process. Principles and processes for documenting and implementing various development stages, including requirements analysis, user needs analysis, information architecture, prototyping, mockups, and production.

T C 561 Advanced Japanese for Technical and Business Professions 1 (4) Tsutsui Focuses on reading skills (e.g., vocabulary, phrases, grasping main ideas and paragraph structure) and familiarizes students with Japanese web sites and web reading tools. Students also develop the skills necessary for giving oral reports on technical/business articles. Teaches skills for writing summaries. Prerequisite: T C 463. Offered: A.

T C 562 Advanced Japanese for Technical and Business Professions 2 (4) Tsutsui Further develops reading skills. Students read more extensively, expand their technical/business vocabulary, and improve skills for grasping main ideas quickly. Students also improve oral skills for report giving and discussion and writing skills for emails and summaries. Lab work is required. Prerequisite: either T C 561, T C 495, or T C 601.

T C 563 Advanced Japanese for Technical and Business Professions 3 (4) Tsutsui Integrates the reading, oral, and writing skills acquired through the first-year and second-year technical/business Japanese sequences. Students work on research projects, give formal presentations, and submit project reports. Substantial individual readings are involved as well as individual conferences with the instructor on research methods, readings, and report drafts. Prerequisite: T C 562. Offered: Sp.
College of Forest Resources

CFR 500 Graduate Orientation Seminar (1) Introduction to graduate study at the College, student resources and services, and current research. Offered: A.

CFR 501 Forest Ecosystems-Community Ecology (5) Community ecology of forest ecosystems. Quantitative methods of community description. Role of limiting factors, competition and disturbance in determining community composition, structure and stability. Introduction to forest ecosystem productivity. History and application of successional theory. Prerequisite: basic ecology course or permission of instructor. Offered: A.

CFR 502 Data Collection, Analysis, and Presentation (3) Bakker Design of scientific experiments, collection of data, and use of computers to store, analyze and present data. Limited by equipment availability to 8 students; Urban Horticulture students have priority. Offered: Sp.

CFR 503 Current Issues in Restoration Ecology and Environmental Horticulture (1, max. 10) Critical evaluation and discussion of published research in urban horticulture and restoration. Students and faculty present and discuss research methods and questions from current literature. Offered: AWSp.

CFR 504 Research Processes in Forest Resources (4) Comprehensive survey of research processes for entering graduate students. Diagnostic and prescriptive evaluation of student research capabilities. Problem and hypothesis formulation, study design, multi-method strategies for gathering and analyzing data, and interpretation and presentation of results.

CFR 505 Introduction to Pulp, Paper, and Bioproducts (3) Hodgson, Gustafson Introduction to pulp and paper technology for PSE graduate students who do not have a prior background in pulp and paper. Broad overview of pulp and paper technology and the pulp and paper industry. Offered: concurrently with PSE 201; A.

CFR 507 Soils and Land Use Problems (4) Harrison Environmental concerns of soils; how soil properties control potential and reasonable possibilities of land use. Includes factors controlling soil stability, hydrology, fertility, and movement of pollutants. Field trip oriented with weekly activity summaries. Students also conduct field trips to soil-use problem sites.

CFR 509 Natural Resource Issues: Unspoken Basics (3) Natural resource issues emerge from interactions between humans and their biophysical world. Understanding resource problems and solutions requires integration of numerous areas of knowledge and methods of discovery. Objectives include exposure to, and development of, fundamental issues and skills essential for natural resource professionals. Offered: W.

T C 506 Directed Research in Technical Communication (1-5, max. 10) Students, working in teams under the supervision of individual faculty members, review relevant literature, pose research questions, design and conduct studies, and present the results in papers prepared either for submission to a professional journal or for presentation at a professional conference. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSp.

T C 507 Approaches to Teaching Technical Communication (1-2, max. 2) Kazonic Readings in pedagogical theory of technical communication and discussion of practical applications. Credit/no credit only. Prerequisite: concurrent teaching appointment or permission of instructor. Offered: AWSp.

T C 508 Special Topics (1-5, max. 6) Prerequisite: permission of instructor.

T C 509 Special Projects (1-5, max. 5) Written report required. Prerequisite: permission of graduate adviser or committee chair. Offered: AWSp.

T C 700 Master’s Thesis (*) Prerequisite: permission of thesis adviser. Offered: AWSp.

T C 800 Doctoral Dissertation (1-10) Credit/no credit only. Prerequisite: permission of thesis adviser. Offered: AWSp.
fire in western United States with emphasis on Pacific Northwest. One weekend field trip. Offered: A.

CFR 541 Advanced Landscape Ecology (5) Lawler Investigates the causes and consequences of spatial patterns in ecology. Concentrates on applied questions and approaches, covering topics such as scaling, landscape processes, pattern measurement, biogeography, landscape modeling, and conservation planning. Prerequisite: CFR 501. Offered: A, W.

CFR 545 Principles of Forest Entomology (3) Gara Historical perspective of the discipline, introduction to general entomology and taxonomy, forest insect ecology, integrated pest management concepts for defoliators, bark beetles, wood borers, and urban forestry pests. Offered: W.

CFR 549 Urban Horticulture Seminar (1, max. 6) Discussion by invited speakers on current topics in urban horticulture. Credit/no credit only. Offered: A.

CFR 550 Graduate Seminar (2-5, max. 10) Graduate seminar to evaluate current research topics in forest resources. Topics and requirements vary. Offered: AWSp.

CFR 561 Public Presentation in Urban Horticulture (2) Wolf Students learn to make public presentations in scientific, professional, and popular contexts and to interpret technical information for professional and lay audiences. Support materials, such as audiovisuals and graphics are discussed. Offered: W.

CFR 564 Advanced Forest Biometry (3/5) Turnblom Classical problems in analysis of forest populations and growth theory, and principles of parametric analysis and estimation processes in forest biometry. Offered: odd years; A.

CFR 571 Resource Policy and Administration (5) Study based on understanding of the actors, arenas, issues, and policy communities that form the context for policy development and implementation. Exploration of approaches to policy inquiry. Consideration of implications for both policy and management. Students develop a study design for course project. Offered: jointly with PB AF 592.

CFR 590 Graduate Studies (1-5, max. 5) Study in fields for which there is not sufficient demand to warrant the organization of regular courses. Offered: AWSp.

CFR 591 Seminar in Resource Policy and Management (1) Ryan Introduction and orientation for concurrent degree program between the Evans School of Public Affairs and the College of Forest Resources. Examines research and literature on contemporary issues related to the organization of natural resource science, policy, and management, through discussion among faculty, students, and invited speakers. Offered: jointly with PB AF 591; A.

CFR 592 Environmental Policy Processes (3) Cullen Presents background to establish the need for environmental policy. Explores in a comparative manner, examining both successes and failures, various strategies that have been used or proposed to protect the environment. Offered: jointly with PB AF 590.

CFR 595 Graduate Teaching Practicum (1-5, max. 5) Principles of teaching and learning applied to undergraduate instruction in the College of Forest Resources Development, delivery, and evaluation of lectures and homework assignments. Graduate teaching experience for CFR students only. Credit/no credit only. Offered: AWSp.

CFR 600 Independent Study or Research (*) Offered: AWSp.

CFR 601 Graduate Internship in Forest Resources (3-9, max. 9) Graduate internship under the supervision of a college faculty member. Credit/no credit only. Offered: AWSp.

Environmental Sciences and Resource Management ESRM 101 Introduction to Environmental Science (5) I&S/NW Harrison Covers the importance of the environment in society with particular emphasis on worldwide distribution and uses of resources, the role of natural and managed environments, and causes of environmental degradation. Introduces ethics of conservation and recycling. Cannot be taken for credit if ESC 110 already taken. Offered: AWSp.

ESRM 102 Forests and Society (5) I&S/NW Bradley, Ryan Introduces basic principles of social science, policy, and management, through discussion among faculty, students, and invited speakers. Offered: jointly with PB AF 102; A.

ESRM 104 Environmental and Resource Assessment (5) I&S/NW, QSR The processes of measuring, monitoring, and assessing environmental conditions; illustrated in diverse environmental and resource case studies. Explores the scientific method, hypothesis testing, sampling, and experimental designs, the role of questionnaires and polling techniques, remote sensing techniques, and population measurements. Prerequisite: either Q SCI 381 or STAT 311, or either of which may be taken concurrently. Offered: A.

ESRM 105 Environmental and Resource Assessment (5) I&S/NW The processes of measuring, monitoring, and assessing environmental conditions; illustrated in diverse environmental and resource case studies. Explores the scientific method, hypothesis testing, sampling, and experimental designs, the role of questionnaires and polling techniques, remote sensing techniques, and population measurements. Prerequisite: either Q SCI 381 or STAT 311, or either of which may be taken concurrently. Offered: A.

ESRM 201 Sustaining Pacific Northwest Ecosystems (5) I&S/NW, QSR The processes of measuring, monitoring, and assessing environmental conditions; illustrated in diverse environmental and resource case studies. Explores the scientific method, hypothesis testing, sampling, and experimental designs, the role of questionnaires and polling techniques, remote sensing techniques, and population measurements. Prerequisite: either Q SCI 381 or STAT 311, or either of which may be taken concurrently. Offered: A.

ESRM 202 Society and Sustainable Environments (5) I&S/NW Bradley, Ryan Introduces the application of social concepts and theories to understanding and managing urban, urbanizing and wildland landscapes in a sustainable manner. Of particular interest are the factors that shape patterns on the landscape and resulting social and economic benefits. Explores landscapes across the urban to wildland gradient. Offered: A.

ESRM 235 Introduction to Environmental Economics (5) NW Introduces environmental and natural resource economics. Discusses fundamental economic concepts, including markets and private property. Includes basic tools used in the economic assessment of environmental problems and applies these methods to key environmental issues. Offered: A.

ESRM 236 Introduction to Geographic Information Systems in Forest Resources (5) NW, QSR Applications of GIS technology to forest science and management. Fundamentals of GIS systems: data sources, preprocessing, map analysis, output; remote sensing as a source of GIS data, image analysis, and classification. Emphasis on GIS as a source of management and technical information requests. Offered: NW.

ESRM 300 Principles of Sustainability (2) I&S/NW, QSR Bare Overview of principles of sustainability, including discussion of current literature, presentation, and discussion with practitioners, and methods for balancing social, economic, and ecological consequences of proposed policies and actions. Students develop a plan to further their studies in natural resources and environmental sustainability. Prerequisite: ESRM 200; ESRM 201. Offered: W.

ESRM 301 Trees in Our Environment (5) NW Explores tree form and function from perspectives of dendrology, ecology, and adaptation in wildland and urban environments. Lectures, projects, and field investigations introduce 50-60 trees of the Pacific Northwest. Acquire skills to increase knowledge of trees. Prerequisite: either BIOL 162 or BIOL 220. Offered: Sp.

ESRM 304 Environmental and Resource Assessment (5) I&S/NW, QSR The processes of measuring, monitoring, and assessing environmental conditions; illustrated in diverse environmental and resource case studies. Explores the scientific method, hypothesis testing, sampling, and experimental designs, the role of questionnaires and polling techniques, remote sensing techniques, and population measurements. Prerequisite: either Q SCI 381 or STAT 311, either of which which may be taken concurrently. Offered: A.
stressing those aspects important in making land-planning decisions. Offered: W.

ESRM 315 Natural Resource Issues: Old-Growth and Forest Management (5) I&S/NW
Franklin Biological and social elements of current conflicts, especially those associated with old-growth and its disposition. Ecology of Pacific Northwest forests and landscapes, history of forest practices, application of emerging science, proposed alternative practices and policies, with inclusion of current proposal and its predecessors and successors. Open to majors and nonmajors. Offered: Sp.

ESRM 320 Marketing and Management from a Sustainability Perspective (5) I&S/NW
Paul Introduction to business concepts relating to marketing, human resource management, small businesses and entrepreneurship, and economics in the context of environmental resource management. Offered: A, S.

ESRM 321 Finance and Accounting from a Sustainability Perspective (5) I&S/NW
Paul Prerequisite: a business course. Offered: WS.

ESRM 323 Silviculture (5) NW Turnblom Silviculture techniques, including nursery practices, clear-cutting, seed trees, shelterwood, selection cutting, site preparation, regeneration methods, thinning, fertilization, chemicals, and regional silviculture in the Northeast, Southeast, Midwest, Rocky Mountains, California, Pacific Northwest, and Alaska. Multiple-use field trips. Offered: Sp.

ESRM 325 Forest Bioresources (3) NW Doty Explores current topics in forest bioresources with an emphasis on bioenergy, remediation of pollutants, and carbon sequestration. Prerequisite: either BIOL 162 or BIOL 180. Offered: A.

ESRM 326 Wildlife Habitat and Silviculture (3) NW Principles of wildlife habitat in forest and range ecosystems. Silvicultural principles applicable to wildlife conservation and management. Prerequisite: either ESRM 302 or ESRM 303. Offered: Sp.

ESRM 328 Forestry-Fisheries Interactions (4) NW Scharff Characteristics of forestry-fisheries interactions in terrestrial and aquatic landscapes. Effects of changes in landforms on forest and aquatic communities. River basin and watershed features. Forest stand dynamics, forest hydrology, fish and wildlife histories and behavior. Resource conflicts and resolution. Offered: jointly with FISH 326; even years; Sp.

ESRM 331 Landscape Plant Recognition (3) NW Reichard Field recognition of important groups of woody landscape plants, emphasizing diversity at the genus and family levels. Cultivated plant nomenclature. Plant descriptive characters evident in the field with eye and hand lens. Hardiness and landscape applications. Recommended: either BIOL 117 or BOTANY 113. Offered: jointly with BIOL 331; Sp/S.

ESRM 350 Wildlife Biology and Conservation (5) NW Manuwal Wildlife ecology and population biology, and interrelationships between wild animals and humans, including encouragement of wildlife population growth and productivity, control of pest populations, and preservation of endangered species with emphasis on forest environments and forest faunas. Open to nonmajors. Prerequisite: either BIOL 102, BIOL 162, BIOL 180, BIOL 202, BIOL 203, or BIOL 220, any of which may be taken concurrently. Offered: W.

ESRM 351 Wildlife Research Techniques (8) NW Manuwal West Scientific approaches to the field study of wildlife populations and habitat, including species identification and natural history, experimental design, and report writing. Emphasis on direct experience with current field techniques used in the study of vertebrate populations and habitat. Prerequisite: either BIOL 162, BIOL 180, or ESRM 350; recommended Q SCI 381. Offered: Sp.

ESRM 362 Introduction to Restoration Ecology (5) I&S/NW
Ryan An introduction to ecological restoration of damaged ecosystems. Examines the philosophical base of restoration as well as the social, biological and political forces that impact the success of any restoration project. Includes lectures, readings, case studies and field trips. Offered: jointly with ENVIR 362; A.

ESRM 368 Natural Resource Measurements (4) NW Turnblom Introduction to principles of measurement, basic field measurement skills, measurement of vegetation, including stand examination, timber cruising, size, weight, volume and biomass of trees, and stream flow. Laboratories include field exercises on sampling techniques for trees and lesser vegetation and linear regression modeling to predict quantities from basic measurements. Prerequisite: either IND E 315 or Q SCI 381; recommended ESRM 304. Offered: W.

ESRM 381 Management of Wildland Recreation and Amenities (3) NW Turnblom Introduction and overview of wildland recreation and amenities management. Agency history and objectives explored along with integration of recreation with other land uses. Water, forestry, wildlife, and wilderness resources for recreational uses discussed along with role of private enterprise in recreation and amenities. Topics of current and local interest. Offered: W.

ESRM 399 Undergraduate Internship (1-5, max. 15) Reichard Internship experience with a public agency or private company, supervised and approved by a faculty member. Preparation of professional report related to the experience is required. Credit/no credit only. Offered: A/W/Sp/S.

ESRM 400 Natural Resource Conflict Management (3) I&S/NW Ryan Introduction to the causes, dynamics, and consequences of natural resource conflicts as well as the range of procedural interventions used to manage conflict. Specific cases of environmental conflict and alternative dispute resolution procedures are examined. Emphasis on developing skills to effectively analyze, manage, and resolve natural resource conflicts. Offered: W.

ESRM 401 Spring Comes to the Cascades (3) NW Hinckley Examines the interaction between forests, environment and growth at three locations in the Cascades, from lowlands to alpine. Field trips and associate observations are linked to classroom or group project activities and are used to understand a number of ecological, physiological and meteorological concepts.

ESRM 402 Curation and Education in Public Gardens (3) I&S/NW
Wott Techniques of curatorial practice relevant to living collections of plants, including documentation, policies, conservation, and display. Aspects of establishing and implementation of a public horticulture program including assessment, program tools and methods, and funding in a public environment. Offered: even years; A.

ESRM 403 Forest and Economic Development in the Developing World (4) NW Eastin Examines the relationship between forests and economic development in tropical countries. Topics include the role of population growth, poverty, land tenure, and international trade on forest use as well as theories of economic development. Case examples of forest-based economic development in different countries and regions. Offered: S.

ESRM 404 Forest Science Inquiry for Teachers (5) Inquiry-based scientific methods for K-12 instruction; asking how and why questions; stating answerable questions; forming hypothesis to answer questions; testing hypothesis by making observations, making measurements and conducting experiments; displaying results. Writing curriculum plans to implement district and state requirements. Offered: S.

ESRM 409 Soil Ecology (5) NW Vogt Soil organisms in forest and other ecosystems, decomposition, nutrient cycling. Nitrogen transformation, mycorrhizae, effects of forest management. Offered: A.

ESRM 410 Forest Soils and Site Productivity (5) NW Harrison Considers unique properties and processes occurring in forest soils throughout the world with emphasis on soils of Pacific Northwest and aspects of forest soils that affect productivity. Two all-day Saturday field trips and one Saturday-Sunday field trip required. Recommended: ESRM 210. Offered: odd years; A.

ESRM 411 Plant Propagation: Principles, and Practice (3) NW Scott Science and practice of plant propagation including sexual (seed) and asexual (cutting, layering, grafting) propagation. Includes discussion of physiological effects, methodology and laboratory exercises. Wide variety of plants covered. Intended for majors in urban horticulture and urban forestry and others interested in reproducing landscape plants. Recommended: 10 credits of introductory biology or botany, or equivalent. Offered: Sp.

ESRM 412 Native Plant Production (3) NW Reichard, Wott Advanced plant propagation techniques, emphasizing native plants, propagation for restoration projects, and unique problems associated with providing appropriate plant material for restoration or conservation purposes. Emphasizes greenhouse and fieldwork, and includes lectures, field trips, and a class project. Recommended: ESRM 411, which may be taken concurrently. Offered: Sp.

ESRM 413 Soil Genesis and Classification (5) NW Zabowski Soil formation, morphology, classification, and relationship to the environment. Labs and weekend field trips illustrate properties and processes of forest and grassland soils in Washington. Recommended: ESRM 210. Offered: even years; Sp.

ESRM 414 Forest Soil Fertility and Chemistry (3) NW Harrison Tree growth depends, in part, on the interaction between chemical and biological activities within a given soil: the biological and
chemical parameters that influence the growth; soil solution chemistry and surface reactions; reactions and processes that control essential plant nutrient levels and forms in soil solutions. Recommended: ESRM 210. Offered: every year; Sp.

ESRM 415 Biology, Ecology, and Management of Plant Invasions (5) NW Reichard Explores how biological invasions are one of the most serious threats to the preservation of biodiversity worldwide. Explores the vectors which move plants and their pests, the biology and impacts of the invasive species, and management and policy approaches. Prerequisite: one of the following: BIOL 162, BIOL 220, BIOL 333, BIOL 471, BIOL 472, ESRM 401, ESRM 472, or ESRM 473. Offered: A, odd years.

ESRM 416 Field Survey of Wildland Soils (3) NW Harrison, Zabowski Study of soils in remote sites about which little information is available. Focus is field trip in Cascade Mountains just north of Glacier Peak with prior study of hiking area, soil and ecosystem changes, and wilderness use. Offered: S.

ESRM 420 Wildland Fire Management (5) NW Principles of wildland fire behavior, ecology, and management. Weather, fuels, and topography effects on fire behavior. Forest structure influence on historical and current fire ecology. Principles of firesafe forests. Management issues of fire control and use in wilderness, multiple-use forest, and the wildland-urban interface. Offered: A.

ESRM 423 International Trade, Marketing, and the Environment (3) I&S/NW Roos Introduction to international trade, marketing, and environmental business. Concepts include plan writing, exporting and importing, carbon credits, green marketing, and how global exchange rates affect environmental assets such as forests.

ESRM 425 Ecosystem Management (5) NW Franklin Scientific and social basis for ecological forestry. Forest practices to achieve integrated environmental and economic goals based upon material models of disturbance and stand development including alternative harvesting methods; adaptive management and monitoring; certification and global issues. Offered: A.

ESRM 426 Wildland Hydrology (4) NW Bolton Introduction to the hydrologic cycle and basic hydrologic methods as applied to wildlands. Effects of forest management activities on hydrologic processes. Offered: W.

ESRM 427 Integrated Management of Forest Landscapes in a Changing World (3) Franklin Examines objectives of 21st century forest management along a continuum from economic to ecological and dominance of mixed objectives; development of integrated approaches to simultaneously achieving ecological and economic goals at large scales and in mixed ownerships; recognizing and dealing with uncertainties associated with social and environmental changes. Prerequisite: ESRM 425. Offered: Sp.

ESRM 428 Principles of Silviculture and Their Application (5) NW Ford Focuses on the biology of major tree species in the PNW and their use in silviculture, stand development in plantation forest systems and its relationship to forest yield, the advantages and limitations of plantation silviculture relating to specific biotic, abiotic and economic conditions and management for objectives other than time yield. Prerequisite: ESRM 323. Offered: A.

ESRM 429 Water Center Seminar (1, max. 6) NW Steinmann Weekly seminars covering water resources and watershed topics with lectures from scientists on and off campus. Credit/no credit only. Offered: AWSp.

ESRM 430 Aerial Photos/Remote Sensing Natural Resources Explores the principles of photogrammetry, interpretation, and remote sensing; and their application to management of natural resources and wildlands. Uses for watersheds, forest resources, wildlife, point and nonpoint pollution, land-use planning, and outdoor recreation. Offered: Sp.

ESRM 435 Forest Entomology (3) NW Gara Introduction to general entomology, characteristics, life histories, ecological relations, and control of insects. Offered: A.

ESRM 436 Laboratory in Forest Entomology (2) NW Gara Introduction to the insect orders; identification of forest insects and their damage. One field trip to study insect problems required. Offered: A.

ESRM 441 Landscape Ecology (5) NW Franklin Basic landscape ecology concepts, including patches, corridors, networks, spatial dynamics; island biogeographic principles; landscape analysis methods; landscape models. Applications of landscape ecology in resource management (e.g., cumulative effects, cutting, patterns, and management of wildlife populations, and open space planning). Recommended: ESRM 326. Offered: W.

ESRM 444 Forest Ecosystems Protection: Insects and Diseases (5) Edmonds, Gara Examines the effects of insects and diseases on wildlife and managed forest ecosystems: defoliators, bark beetles, wood boring insects, abiotic and biotic diseases, insects and diseases in intensively managed forests, principles of insect and disease management. Prerequisite: either ESRM 301, 302 or 303 (can be taken concurrently). Offered: odd years; Sp.

ESRM 450 Wildlife Ecology and Conservation (5) NW Marzluff Covers advanced principles of wildlife ecology such as habitat selection, population viability, and landscape ecology, and illustrates how they apply to wildlife conservation problems with terrestrial, aquatic, and marine wildlife. Students must share costs of field trips. Prerequisite: either ESC 350 or ESRM 350; either CFR 250 or ESRM 250; recommended: introductory statistics. Offered: W.

ESRM 451 Urban Plant Protection (5) NW Gara Working knowledge on insects and diseases of plants growing in the urban environment. Emphasis placed on pest and damage recognition, control methods, and integrated pest management systems. Offered: even years; Sp.

ESRM 452 Field Ornithology (3) NW Manuwal Students learn field identification skills and are introduced to field methodologies through required indoor labs, field trips, and field exercises. Exercises include study of survey techniques, feeding ecology, and behavior. Students are required to share field trip costs. Prerequisite: either BIOL 102, BIOL 162, BIOL 180, BIOL 202, BIOL 203, or BIOL 220, any of which may be taken concurrently. Offered: odd years; A.

ESRM 455 Wildlife Seminar (1, max. 8) NW Manuwal, Ford Discussion of current research and application in wildlife biology and conservation. Credit/no credit only. Offered: AWSp.

ESRM 456 Biology and Conservation of Birds (3) NW Manuwal Major principles of natural history, avian reproductive biology, population ecology, and national and international conservation strategies for both hunted and unhunted birds. Emphasis on western United States. Prerequisite: either BIOL 102, BIOL 162, BIOL 180, BIOL 202, BIOL 203, or BIOL 220, any of which may be taken concurrently. Offered: odd years; A.

ESRM 457 Fish and Wildlife Toxicology (3/5) NW Overview of fish/wildlife toxicology; history of the field; regulations; methods used to assesses risks contaminants pose to fish/wildlife; classes of contaminants and their direct, sublethal and indirect effects; identification of potential pathway contaminants to fish/wildlife, their habitats and prey. Includes laboratory. Offered: jointly with FISH 455; W.

ESRM 458 Management of Endangered, Threatened, and Sensitive Species (5) NW Marzluff Biological underpinnings and political realities of endangered species management, including: legal issues, recovery teams, citizen rights, extinction, rarity, proactive management, captive propagation, reintroduction, species endangered in the Pacific Northwest. Students revise endangered species recovery plans. Offered: A.

ESRM 459 Wildlife Conservation in Northwest Ecosystems (3) NW Manuwal, Ford Extended field course offers Wildlife Science students personal interactions with wildlife managers and wildlife populations in strategic public and private lands in the northwestern United States and southern Canada. Students will share costs of trip. Offered when there is sufficient student demand. Prerequisite: ESRM 350; may not be repeated. Offered: Sp.

ESRM 460 Institutionalizing Sustainable Ecological Practices. (5) I&S/NW Greulich Present how to how sustainability and conservation are possible. Case studies of successful institution-alization of sustainable ecological functions, including curbside and biosolids recycling, ecological restoration, bioremediation, sustainable wood production, and product certification. Emphasis on individual student projects. Offered: jointly with ENVR 460; Sp.

ESRM 461 Forest Management and Economics (5) I&S/NW Greulich Presents important contemporary decision tools, especially how they are used by forest managers so they can interpret, critique and develop their basic applications in forestry. Topic include optimization techniques, including linear and nonlinear programming, concepts in interest and time evaluation of alternatives, marginal cost analysis and computer spreadsheet assisted analysis. Prerequisite: Q SCI 381 or STAT 311; Q SCI 291 or MATH 124. Offered: W.

ESRM 462 Restoration Ecology Capstone: Introduction (2) NW Manuwal, Ford First of a three-course capstone sequence in restoration ecology. Students review and assess project plans and installations. Class meets with
members of previous capstone classes to review their projects. Offered: jointly with ENVR/TESC/BES 462. Offered: A.

ESRM 463 Restoration Ecology Capstone: Proposal and Plan (3) NW Ewing, Fridley
Student teams prepare proposals in response to requests for proposals (RFPs) from actual clients. Clients may be governmental, non-profit organizations, and others. Upon acceptance of the proposal, teams prepare restoration plans. Prerequisite: ESRM 462. Offered: jointly with ENVR/TESC/BES 463. Offered: W.

ESRM 464 Restoration Ecology Capstone: Field Site Restoration (5) NW Ewing, Fridley
Teams take a restoration plan developed in ESRM 463 and complete the installation. Team participation may include supervision of volunteers. Teams prepare management guidelines for the client and conduct a training class for their use. Prerequisite: ESRM 463. Offered: jointly with ENVR/TESC/BES 464.: Sp.

ESRM 466 Forest Operations (5) Schiess Examines forest land surveying, low volume road access planning, and timber harvesting concepts. Low volume road design principles and practical application of field road location. Overview of road drainage design, construction techniques and maintenance. Reviews basic harvest systems and setting design processes, including cost, production control, environmental and safety considerations. Prerequisite: ESRM 250; ESRM 323; ESRM 368. Offered: Sp.

ESRM 470 Natural Resource Policy and Planning (5) I&S/NW Bradley, Ryan Introduction to and analysis of environmental policy-making processes, with a focus on forest and land policy and law. Use of policy models to examine the interaction of agencies, interest groups, Congress, and the courts in the legislative process. Policy implementation, evaluation, and change are also addressed. Offered: A.

ESRM 471 Urban Forest Landscapes (5) NW Bradley Comprehensive view of urban forest and urban forest landscapes. Includes close examination of factors that differentiate urban forest landscapes along the urban to woodland gradient. Compare legal, social, political, administrative, physical, and biological variations. Offered: Sp.

ESRM 472 Wetland Ecology and Management (5) NW Ewing Wetland types and functions, global and North American distribution, wetland plant types, soil chemistry. The influence of stresses on wetland composition and form. Autecology of wetland plants; response to and detection of stresses. Impacts of urbanization; management techniques. Recommended: either BIOL 417, BIOL 412, BOTANY 354, or BOTANY 371. Offered: A.

ESRM 473 Ecosystem-Based Restoration Ecology (5) NW Ewing Philosophy of restoration, structural components of ecosystem degradation, analysis of restoration projects and methods, and an ecosystem by ecosystem review of how systems are restored. An ecology courses that emphasizes applied scientific knowledge of ecosystems. Recommended: plant ecology, plant identification, horticulture, landscape ecology coursework. Offered: W.

ESRM 478 Plant Ecophysiology (5) NW Kim Explores physiological mechanisms that underlie ecological observations, including how above- and below-ground microclimates develop and affect plant physiological processes. Discusses acclimation to environmental change along with species differences in physiological processes and plant’s occupation of heterogeneous environments. Laboratories emphasize field measurement techniques. Prerequisite: either BIOL 102, BIOL 162, or BIOL 220. Offered: jointly with BIOL 424; W.

ESRM 479 Restoration Design (5) I&S/NW Fridley Covers the design process in ecosystem restoration demonstrated through examples of restoration necessitated by a number of extractive processes and other consumptive practices in human society. Examples include agriculture, forestry, grazing, wetland damage, water use, mining, recreation, urban activities, transportation and waste management. : Sp.

ESRM 480 Landscape Plant Science and Sustainable Management (5) NW Kim Principles and practices of management in urban and modified landscapes. Physiological basis for plant management and selection; site analysis and preparation; plant installation and aftercare; plant performance evaluation; long-term sustainable management and plant health care. Recommended: either ESRM 210 or ESRM 311; either BIOL 116 or BIOL 117. Offered: A.

ESRM 489 Foreign Study (1-5, max. 15)
Individual foreign study of topics for which there is not sufficient demand to warrant the organization of regular classes. Offered: AWSpS.

ESRM 490 Special Topics (1-5, max. 15)
Individual tutorial study of topics for which there is not sufficient demand to warrant the organization of regular classes. Offered: AWSpS.

ESRM 494 Senior Thesis Proposal (5)
Selection of a thesis topic, literature review, and preparation of a formal senior thesis proposal. Students select a faculty advisor to assist them in the proposal writing process. Regular or Honors credit. Offered: AWSpS.

ESRM 495 Senior Project (5) Individual study of an environmental science and resource management problem under direction of a faculty member. Requires a written project report. Generally taken in last year of residence. Offered: AWSpS.

ESRM 496 Senior Thesis (5) Statistical analysis and presentation of research results and discussion of results in a thesis paper. Students work with faculty advisors to complete field or laboratory research and then prepare the senior thesis. Offered: AWSpS.

ESRM 499 Undergraduate Research (1-5, max. 15) Individual research supervised by a faculty member. For advanced students desiring to extend their educational experience. Offered: AWSpS.

ESRM 5459

Paper Science and Engineering

PSE 104 Products and Energy from Renewable Resources (5) I&S/NW Gustafson, Hodgson, McKean Overview of the science and technology of producing pulp and paper. Introduction of the PSE major course sequence and various career options. Examination of Pacific Northwest pulp and paper production facilities. Offered: concurrently with CFR 505; A.

PSE 202 Pulp and Paper Lab and Field Studies (1) NW Gustafson, Hodgson, McKean Laboratory and field trip studies in pulp and paper technology. Visits to local forest product manufacturing facilities. Required for PSE majors. Credit/no credit only. Offered: A.

PSE 211 Creativity and Society (5) VLPA, I&S Allan Explores the nature of creativity and innovation in U.S. and other societies. Investigates the processes of thinking and techniques of idea generation in fields such as art, music, science, engineering and medicine. Offered: A.

PSE 248 Paper Properties (4) NW Acquaints students with raw material characteristics, physical and mechanical concepts, nomenclature, and procedures related to evaluating paper and paperboard product properties. Emphasizes structural, optical, mechanical, and moisture related properties. Prerequisite: PSE 201. Offered: A.

PSE 309 Creativity and Innovation (2) VLPA Allan Explores the nature of creativity and innovation and its challenges and dynamics through knowledge, judgment, planning, and observation. Techniques of creative thinking. Design and development of creative games. Computer-aided creative thinking. Creation, protection, and exploitation of a useful idea, including bargaining and negotiations. Offered: jointly with CHEM E 309; Sp.

PSE 399 Undergraduate Internship (1-5, max. 15) Internship experience with a public agency or private company, supervised and approved by a faculty member. Preparation of professional report reflecting on the experience is required. Credit/no credit only. Offered: AWSpS.

PSE 402 Paper Physics (3) NW Johnson Exploration of paper product behavior from a materials science perspective. Fundamental laws of physics, both deterministic and statistical, will be used to explain experimental
results. Discusses and analyzes theoretical models to explain paper behavior. Prerequisite: PSE 248; PHYS 121, 122, 123. Offered: A.

PSE 404 Raw Materials and Wet End Chemistry of Papermaking (3) NW McKean, Hodges Examines fiber properties for producing various paper and paperboard products. Studies the effects of fiber length, coarseness, and general morphology on properties. Explores characteristics, processing and use of secondary fiber and nonwood fiber. Introduces surface and colloid chemistry; papermaking + wet end chemistry; fillers, and functional additives. Prerequisite: PSE 201; PSE 202; PSE 248. Offered: Sp.

PSE 406 Natural Products Chemistry (3) NW Bura Covers the essential in natural products chemistry? celluloses, hemicelluloses, lignins, and extractives. Describes structure and chemistry of lignocellulosic biomass, as well as current work in the conversion of residues to bioethanol. Prerequisite: either CHEM 237 or CHEM 335.

PSE 450 Paper Science and Engineering Seminar (1, max. 4) Discussion of current topics in the science and technology of pulp and paper production. Emphasis on employer expectations of graduate students in the paper science industry. Credit/no credit only. Offered: Sp.

PSE 476 Pulping and Bleaching Processes (3) Gustafson Conversion of wood to mechanical and chemical pulps. Kraft, sulfite, and semi-chemical pulping processes. Chemical recovery systems. Bleaching of mechanical and chemical pulps. Offered: jointly with CHEM E 471; W.

PSE 478 Pulp and Paper Laboratory (2) Laboratory experiments in chemical and semi-chemical pulping of wood. Bleaching of chemical and high-yield pulps. Physical and chemical characteristics of pulp fibers. Prerequisite: PSE 476. Offered: jointly with CHEM E 473; Sp.

PSE 479 Pulp and Paper Laboratory II (3) Paper testing, paper additives, flocculation, drainage, retention, heat transfer, and fluid dynamics in papermaking from virgin and recycled raw materials. Prerequisite: PSE 402; PSE 477. Offered: W.

PSE 480 Pulp and Paper Process Control (3) Gustafson Control of pulp and paper processes. Sensors, actuators, interface equipment, and computer control strategies common to this industry. Prerequisite: PSE 476; PSE 477. Offered: W.

PSE 481 Pulp and Paper Unit Operation (3) Unit operations of particular interest in the pulp and paper industry in addition to those covered in CHEM E 330 and 340. Prerequisite: CHEM E 340. Offered: W.

PSE 482 Paper Science and Engineering Design I (3) I&S NW Briggs, Gustafson Basic engineering economics applied to design of pulp and paper facilities. Analysis of engineering alternatives based on use cost analysis and accounting tools. Introduction to process and mill design. Prerequisite: 2.0 in PSE 406; 2.0 in PSE 476; 2.0 in PSE 477. Offered: Sp.

PSE 487 Paper Science and Engineering Design II (5) Comprehensive design of pulp and paper processes, including: economic feasibility studies; process equipment design, optimization, and control; and overall process integration and layout. Safety and ethics in the design process. Prerequisite: PSE 482, which may be taken concurrently. Offered: Sp.

PSE 488 Polymer Chemistry (3) Allan Fundamentals of synthetic and natural polymers, including kinetics of formation, molecular weight distributions, and solid-state and solution properties. Prerequisite: either CHEM 237 or CHEM 335. Offered: W.

PSE 489 Foreign Study (1-5, max. 15) Individual foreign study of topics for which there is not sufficient demand to warrant the organization of regular classes. Offered: AAWSpS.

PSE 490 Special Topics (1-5, max. 15) Individual tutorial study of topics for which there is not sufficient demand to warrant the organization of regular classes. Offered: AAWSpS.

PSE 491 Undergraduate Studies (1-5, max. 5) Individual tutorial study of topics for which there is not sufficient demand to warrant the organization of regular classes. Offered: AAWSpS.

PSE 492 Undergraduate Studies (1-5, max. 5) Individual tutorial study of topics for which there is not sufficient demand to warrant the organization of regular classes. Offered: AAWSpS.

PSE 494 Senior Thesis Proposal (5) Selection of a thesis topic, literature review, and preparation of a formal senior thesis proposal. Students select a faculty advisor to assist them in the proposal writing process. Regular or Honors credit.

PSE 495 Senior Project (5) Individual study of an environmental science and resource management problem under direction of a faculty member. Requires a written project report. Generally taken in last year of residence. Offered: AAWSpS.

PSE 496 Senior Thesis (5) Statistical analysis and presentation of research results and discussion of results in a thesis paper. Students work with faculty advisors to complete field or laboratory research and then prepare the senior thesis. Offered: AAWSpS.

PSE 497 Pulp and Paper Internship (1-2, max. 3) Technical and economic analysis of commercial pulp and paper installations. Structured visits to industrial operations to observe technical aspects of pulp and paper curriculum in practice. Preparation of visitation reports and analysis in seminar setting. Offered: AAWSpS.

PSE 499 Undergraduate Research (1-5, max. 15) Individual research supervised by a faculty member. For advanced students desiring to extend their educational experience. Offered: AAWSpS.

The Information School

Informatics

INFO 100 Fluency in Information Technology (5) QSR Introduces skills, concepts, and capabilities necessary to effectively use information technology. Includes logical reasoning, managing complexity, operation of computer networks, and contemporary applications such as effective Web searching and database manipulation, ethical aspects, and social impacts of information technology. Offered: jointly with CSE 100.

INFO 198 Introductory Seminars in Informatics (1-5, max. 13) Selected introductory topics in informatics oriented toward freshman and non-major undergraduates and presented in a seminar format. Topics and content vary to represent the interests of the Information School faculty. Credits do not automatically apply to major/minor requirements.

INFO 200 Intellectual Foundations of Informatics (5) Information as an object of study, including theories, concepts, and principles of information, information seeking, cognitive processing, knowledge representation and structuring, and their relationships to physical and intellectual access to information. Development of information systems for storage, organization, and retrieval. Experience in the application of theories, concepts, and principles.

INFO 220 Information Research Strategies (3/5) I&S Use information technology for research and information problem-solving. Create web sites or other presentations, as well as find, manage, and evaluate information, and learn the ethical and legal constraints on information use.

INFO 221 Information Research Strategies in History (3) I&S Information research and problem solving in the context of history. Focuses on identifying information, need, information seeking, evaluation and presentation, and selection of the appropriate sources. Offered: jointly with HIST 221.

INFO 222 Understanding Photographs as Historic Documents (3) I&S/NW Introduction to understanding how to view and interpret information contained in photographs. Examines the photograph as artifact, intent of the photographer, photographic codes and meanings; how such information is used, misused, and manipulated for various purposes and how to navigate archival institutions in search of photographs. Offered: jointly with HIST 222.

INFO 299 Study Abroad - Informatics (1-5, max. 15) For participants in study abroad program. Specific course content varies. Credits do not automatically apply to major requirements.

INFO 310 Individual Perspectives on Information Systems (5) I&S Social, cognitive, behavioral, and contextual aspects of information systems, including human information behavior, interpersonal interaction, and social responses to information technology. Emphasis on well-being and information understanding.
exchanges as a communicative event. Exposure to experimental and naturalistic methodologies through laboratory assignments and field work.

INFO 320 Information Needs, Searching, and Presentation (5) Introduction to information needs, database and information organization and structure. Key and web database searching and browsing, and information presentation. Examination of underlying principles in knowledge representation, indexing, record structures, online search process, search strategies and tactics, assessment of user needs, reference interviewing, post-processing, organization and presentation of information.

INFO 330 Information Structures (5) Introduction to the concepts and methods used to analyze, store, manage, and present information and navigation. Equal weight is given to understanding structures and implementing them. Topics include information analysis and organization methods, XML, and metadata concepts and application.

INFO 340 Database Management and Information Retrieval (5) NW Theories and models in system-centered approaches to information retrieval and database management. Information retrieval and database management systems include text and multimedia databases, web search engines and digital libraries. Issues in system design, development and evaluation, and tools for searching, retrieval, user interfaces, and usability. Prerequisite: CSE 373.

INFO 341 Computer Networks and Distributed Applications (5) NW Basic concepts of local and wide area computer networking including an overview of services provided by networks, network topologies and hardware, packet switching, client/server architectures, network protocols, and network servers and applications. Also addresses management, security, authentication, and policy issues associated with distributed systems. Prerequisite: CSE 143.

INFO 344 Web Tools and Development (5) Introduction to fundamental web technologies with an emphasis on scripting and programming. Includes both client and server technologies. Examines effective information architecture for Web sites, information presentation on Web pages, privacy policies, and Web security. Prerequisite: CSE 142.

INFO 360 User-Centered Design (5) Introduces the theory and practice of user-centered design. Examines methods for identifying users’ needs, understanding users’ behaviors, envisioning and prototyping new systems, and evaluating the usability of systems. Emphasis on incorporating people in the design process from initial field observations to summative usability testing.

INFO 380 Information Systems Analysis and Management (5) Examines the evolution of how information is defined and managed in order to add value to organizations. Views information management and the CIO as key facilitators in creating or improving relationships, processes, competitiveness, products, and services.

INFO 414 Information Behavior (5) Advanced study of information behavior. Focus on the user-centered approach and the research literature of human information behavior. Introduces methods for evaluating and translating the results of user behavior studies into the design of information services and systems. Prerequisite: INFO 310.

INFO 419 Special Topics in Social Aspects of Information (1-5, max. 10) Various topics in the social aspects of information. Offered by visitors or resident faculty.

INFO 424 Information Visualization and Aesthetics (5) VLP Examines the visualization of information: the effects of human perception, the aesthetics of information design, the mechanics of visual display, and the semiotics of iconography. Examples may include census, epidemiological, crime, earth satellite, and medical data in the contexts of special computer applications, user populations, and cultures. Prerequisite: CSE 143.

INFO 430 Knowledge Organization and Representation (5) Advanced study of knowledge organization using classificationary structures and creation of metadata element sets for representation. Conceptual and practical foundations for creating systems for information organization and presentation. The creation, application, and use of a variety of systems and techniques for information organization and representation. Prerequisite: INFO 300; INFO 320.

INFO 440 Design Methods for Interaction and Systems (5) NW Theoretical and practical examination of the information systems design process. Techniques for assessing the need for technology, specifying the system design, and involving users in the design process are explored. Design methods include social impact statements, future scenarios, mock-ups, rapid prototyping, field testing, and heuristic evaluation. Prerequisite: CSE 373.

INFO 444 Value-Sensitive Design (5) Introduction to value-sensitive design (VSD), information system design that accounts for human values in a principled and comprehensive manner. Examination of existing systems from a VSD perspective. Explores VSD research methods including conceptual, technical, empirical investigation. Values include accountability, autonomy, consent, privacy, property, trust, and sustainability. Prerequisite: CSE 373.

INFO 446 Advanced Search Engine Systems (5) Focus on design, development, and evaluation of search engines. Theories and models in information retrieval for text and multimedia databases, Web search engines, recommendation systems, and digital libraries. Topics include language issues, data-mining, machine learning, user-profiling, visualization, user interfaces, usability. Coursework involves analytical comparisons of search engines. Prerequisite INFO 340.

INFO 447 Computer Supported Cooperative Work (5) Focuses on design and use of collaboration technologies to communicate, share information, and coordinate activity. Emphasis on behavioral aspects of adopting and using these technologies. Topics include the history of work in this and related fields, collaboration support for teams, organizations, and communities. Prerequisite: INFO 310.

INFO 449 Special Topics in Information Technology (1-5, max. 10) Various topics in information technology.

INFO 450 Information Ethics and Policy (5) Provides a framework for analyzing the ethical, legal, economic, and socio-political issues surrounding information, information technologies, and the information industries. Explores policy and ethical issues of information access and control including: intellectual property, file sharing, free speech, privacy, and national security.

INFO 454 Information Policy: Domestic and Global (5) National and international information policy: public and private sector policy in terms of privacy, access, and exploitation; technology infrastructures and policies supporting the information industries; digital convergence and the emerging mega-industries. Prerequisite: INFO 311.

INFO 458 Reading Seminar in Social Aspects of Information Systems (2, max. 12)Addresses foundational issues in social aspects of information systems. Introduces to the intellectual traditions that underlie fields such as computer ethics, social informatics, and value sensitive design. Format entails in-depth discussions based on careful reading of primary source texts selected by seminar participants.

INFO 470 Research Methods in Informatics (5) Introduction to the research process investigating information needs, creation, organization, flow, retrieval, and use. Stages include: research definition, questions, objectives, data collection and management, data analysis, and data interpretation. Techniques include: observation, interviews, questionnaires, and transaction-log analysis. Prerequisite: STAT 220 or STAT 311.

INFO 481 Project Management in Informatics (4) Introduces project management principles within the context of Informatics. Provides knowledge that managers need to implement information systems on time and within budget. Concentrates on methods and issues in organizing, planning, and controlling projects, and the use of computer-based project management tools.

INFO 484 Information Entrepreneurship (5) Investigates the development of innovative human-centered informatics products, with emphasis on the unique challenges and opportunities in high-value information products. Includes competition, strategic planning, tactical marketing, informatics product launches, and applied informetrics. Teamwork to create and present plans for innovative informatics products/services. Prerequisite: either INFO 300, INFO 310, or INFO 311.

INFO 490 Design and Development of Interactive Systems (4-8, max. 8) Design and formative evaluation of an interactive information system to solve a real problem. Student-organized team projects are encouraged. Must be taken for a minimum of 5 credits.
Prerequisite: INFO 340; INFO 341; INFO 380; INFO 440.

INFO 495 Internship in Informatics (1-5, max. 12) Internship in the private or public sector, as approved by faculty member. Work jointly supervised by faculty member (or approved academic sponsor) and an on-site work supervisor.

INFO 498 Special Topics in Informatics (1-5, max. 15) Various topics in informatics.

INFO 499 Independent Study (1-5, max. 15) Readings, design projects, or research under faculty supervision.

<2> Information School

INFX 501 Concepts in Algorithmic Thinking for Information (1) Presents programming concepts in the context of information science including the concepts of the algorithm, data storage, expressions, syntax, logic, objects, commands, and events. Introduces the algorithmic manipulation of information objects, and the mindset and methods of computer programming and application development. Credit/no credit only.

INFX 502 Database Concepts for Information Professionals (1) Introduces the terminology and concepts of working with relational database management systems. Emphasizes working with tables and extracting information from data using Structures Query Language (SQL) commands and tools. Credit/no credit only.

INFX 503 Website Design Concepts for Information Professionals (1) Introduces the context and construction of websites presenting an integrated understanding of web design principles, information behavior, and technical skills. Emphasizes the role of markup in information display and organization, the development of large sites, web strategy, and site construction. Credit/no credit only.

INFX 504 Networking and Network Applications for Information Professionals (1) Introduces the concepts, terminology and technologies of digital networks, including how networks operate and the influence networks have on the workplace and society. Includes preparation to think critically about the impacts of networking technologies on organizations, work groups and information systems. Credit/no credit only.

Information Management and Technology

IMT 500 The Information Management Framework (1) Overview of the major concepts in the MSIM curriculum. Includes an introduction to the concept of information as well as its relation to organizational management, technology, and design and culture.

IMT 501 Technology Foundations for Information Professionals (1-5, max. 5) Introduction to selected topics in information technology including systems concepts, computer architecture, computer network communication, discrete mathematics, database design, algorithms and data structures, imperative programming, markup languages, and end-user programming tools.

IMT 510 Human Aspects of Information Systems (4) Social, organizational, cognitive, behavioral and contextual aspects of information, including basic concepts in human information behavior, conceptual and practical frameworks used to study human-information interaction, and social responses to information technology. User-based and work-based evaluation and design of information systems. Exposure to experimental and interview methodologies.

IMT 520 Information Services and Resources (4) Concepts, processes, and skills of information involving creation, production, distribution, selection, collection, and services to facilitate access. Analysis of the information mediation process, including determining information needs; searching for, evaluation and presentation of appropriate results; and modalities for delivery of services.

IMT 525 Information Management and Technology in Sports (3) Explores the information perspective, including the role and the use of information in information management, and information technologies applied to the sports context. Examines modern and emerging information management and technology systems and their design and use in administering intercollegiate athletic functions.

IMT 530 Organization of Information Resources (4) Introduction to issues in organization of information and information objects including analysis of intellectual and physical characteristics of information objects; use of metadata and metadata standards for information systems; theory of classification, including semantic relationships and facet analysis; creation of controlled vocabularies; and display and arrangement.

IMT 531 Metadata Design and Interoperability (3) Design principles of metadata schemas and application profiles. Implementation of interoperable application profiles using XML technology. Focuses on achieving syntactic and semantic interoperability among diverse metadata schemas and application profiles. Prerequisite: either IMT 530, IMT 541, or instructor's permission.

IMT 532 Ontology Design and Interoperability (3) Studies semantic interoperability among different metadata schemas and ontologies. Elaborates on concepts and technology related to Topic Maps, RDF Schema, and Web Ontology Language (OWL) to achieve advanced and semantic data modeling of complex data that exist in the real world. Prerequisite: IMT 531 or instructor's permission.

IMT 540 Design methods for Interaction and Systems (4) Introduction to the theory and practice of user-centered design. Examines design methods for identifying and describing user needs, specifying and prototyping new systems, and evaluating the usability of systems. Examines design methodologies such as contextual design and value-sensitive design, giving specific emphasis to human-information interaction. Prerequisite: permission of instructor.

IMT 541 Principles of Database and Semi-Structured Data Systems (5) Introduction of database management systems for teh storage and access of structured and semi-structured information. Examines the relational model, Structured Query Language (SQL), Entity-Relationship modeling, database design methodology) conceptual, logical, and physical design), and Extensible Markup Language (XML) for storage, retrieval, and interchange. Prerequisite: IMT 540.

IMT 542 Principles of Information Retrieval Systems (3) Introduction to information systems for the storage and retrieval of unstructured information. Examines information retrieval architectures, processes, retrieval models, query languages, and methods of system evaluation. Gives emphasis to Internet-based services for storing and accessing information to be used in integrated application development. Prerequisite: IMT 540.

IMT 546 Data Communications and Networking (4) Local and wide area computer networking including network topologies and hardware, packet switching, client/server architectures, network protocols, and network servers and applications. Addresses server operating systems, management, security, authentication, and policy issues associated with distributed networks. Prerequisite: IMT 510.

IMT 548 Information System Design (5) Theoretical and practical examination of information systems analysis and design processes as they apply in the workplace. Explores techniques for assessing the need for technology, defining specifications, and involving users in the design process. Design methods include social impact statements, future scenarios, mock-ups, rapid prototyping, and field-testing. Prerequisite: IMT 540.

IMT 550 Policy, Law, and Ethics in Information Management (3) Select concepts, processes, and issues related to the organizational contexts within which information professionals practice. Topics include information as public/private good, intellectual property, privacy, confidentiality, information liability, and information policy. Focus on contemporary issues affecting the role of the information manager.

IMT 551 Foundations of Organizational Information Assurance (3) Examines concepts, elements, strategies, skills related to the life cycle of information assurance ? involving policies, practices, mechanisms, dissemination and validation ? that ensure the confidentiality, integrity, and availability of information and information systems. Analysis of the information assurance planning process, including determination and analysis of information assurance organization goals, the threat spectrum, risk, and legal and ethical issues.

IMT 552 Information Assurance Risk Assessment and Management (3) Examines the concepts, processes and skills related to risk management in information assurance involving risk assessment, risk analysis and mitigation planning. Analysis of the risk management process through several structured approaches that facilitate information assurance decision-making. Prerequisite: IMT 551.

IMT 553 Establishing and Managing Information Assurance Strategies (3-5) Applies and combines information assurance concepts, processes and skills to solve case studies from practitioner experiences and explore the role of policy in creating a successful information assurance program. Prerequisite: IMT 551, IMT 552.

IMT 580 Management of Information Organizations (4) Introduction to internal and
external management issues and practices in information organizations. Examines key topics drawn from the fields of organizational theory and behavior, including planning and decision-making, organizational structure, leadership and motivation. Reviews strategic and operational issues including human and organizational issues relevant to information technology introduction, use, and management.

IMT 581 Information and the Management of Change (3) Practical application of the critical roles and aspects of information and information processes in the management of organizational change. Topics include organization learning, knowledge management as a process, business process change, change project management, business/competitive intelligence, benchmarking, and best practices. Prerequisite: IMT 580.

IMT 582 Strategic Information Initiatives (4) Studies and applies strategic information initiatives within an organization, including: readiness assessment, organizational mandates, information inventories, content management, information classification audits, and information architecture initiatives. Focuses on building business cases for and leading information initiatives in organizations. Prerequisite: IMT 581.

IMT 583 Finance and Accounting Foundations for Information Professionals (3) Introduction to financial accounting, including the principles of double-entry accounting, balance sheets, income, and cash flow statements. Covers key financial ratios and their use for various analytical purposes, along with the elements of a financial plan or budget. Prerequisite: IMT 510; IMT 580.

IMT 584 Marketing Foundations for Information Professionals (3) Introduction to the principles of marketing. Looks at how to assess an environment from a marketing perspective, consumer and business behavior, market segmentation, product/service strategies, new product development processes, pricing, channels, retail/wholesale, marketing communication, and direct selling. Prerequisite: IMT 510; IMT 580.

IMT 585 Human Resource Management Foundations for Information Professionals (3) Introduction to human resource management for information professionals. Covers the principles of job analysis, employee selection, interviewing, training, and appraisal. Prerequisite: IMT 510; IMT 580.

IMT 586 Information Dynamics I (4) Introduction to the concepts and methods of information feedback, systems thinking, soft systems methodology (SSM), and “soft operations research,” as well as the quantitative modeling of complex dynamic systems by means of differential and integral equations (system dynamics). Offered: jointly with INSC 586.

IMT 587 Information Dynamics II (4) Advanced concepts and methods of information feedback, systems thinking, soft systems methodology (SSM), and “soft operations research,” as well as the quantitative modeling of complex dynamic systems by means of differential and integral equations (system dynamics), including model building, testing, and validating. Prerequisite: IMT 586.

IMT 588 Project Management in Information Organizations (4) Examines roles, responsibilities, and methods of planning, and controlling projects. Analysis of critical issues such as the relationship between project management and organizational culture, structure, and processes; cross-functional and globally distributed teams; project governance, metric, and risk and performance management; communication, decision-making, and conflict resolution; organizational learning, change and knowledge management. Offered: jointly with INSC 588.

IMT 589 Special Topics in Information Management (1-4, max. 12) Special study and research in topics of current concern to faculty and students.

IMT 595 Stakeholders, Information, and Technology (3-5, max. 5) Case study experience. Addresses system integration and the increasing demand to apply a broad range of technologies to the information needs of diverse user groups during the implementation of comprehensive information systems across an organization. Encourages student-organized individual/team projects. Credit/no credit only. Prerequisite: completion of IMT core courses 510 through 582.

IMT 598 Emerging Trends in Information Management and Technology (3) Focus on emerging trends in information management and information technology. Attention given to their impact on the fundamentals of the chief information officer and others managing the acquisition, retention, use and disposition of information and the enabling technologies. Exploration of methods and resources for trend discovery and tracking. Prerequisite: IMT 510.

IMT 599 Fieldwork in Information Management (1-4, max. 12) Supervised fieldwork. May be taken as many as six consecutive quarters. Prerequisite: enrollment in the MSIM program.

IMT 600 Independent Study or Research in Information Management (1-4) Independent study or research. Prerequisite: permission of instructor.

Information Science

INSC 500 Faculty Seminar (2) Presentations by faculty concerning research projects in which they are involved.

INSC 501 Theoretical Foundations for Information Science (3) In-depth exploration of the philosophical, theoretical, methodological, and historical foundation of information science and the study of information.

INSC 510 Theoretical Foundations of Human Information Behavior (4) Study of constructs, concepts, models, and theories information scientists use in organizing human information behavior. Socio-cognitive aspects of individuals needing, seeking, giving, and using information. Models of information behavior, conceptual frameworks, assumptions, analytical tools, and the factors that differentiate groupings of information users and predict or influence information behavior.

INSC 512 Community Analysis (4) Explores key concepts of community in its broadest sense, methodological approaches for analyzing information needs and available resources, how to design information services in response to identified needs, and service evaluation. Facilitating the information behavior of all groups within a community and identifying how their needs interconnect. Prerequisite: LIS 510. Offered: jointly with LIS 512.

INSC 518 Seminar in Human Information Interaction (4) Investigates conceptual frameworks, assumptions, analytical tools, concepts, models, and theories in human information interaction (HII). Topics may include theories of information behavior, information behavior in everyday life, social informatics, HII in organizations, or personal information management. Previous readings in HII preferred. Prerequisite: permission of instructor.

INSC 530 Knowledge Representation (2/4) In-depth survey of the various approaches to knowledge representations in areas such as taxonomy, library classification, anthropology, cognitive psychology, linguistics, and artificial intelligence.

INSC 540 HCI Design Foundations for Interactive Systems (4) Develops knowledge and skills for design-based inquiry of interactive systems. Practices user-centered design methods and studies theories of human-computer interaction, including: goal-based design and task analysis, scenario-based design, soft systems methodology, value sensitive design, universal design, and participatory design.

INSC 542 HCI Design Studio for Interactive Systems (4) Develops knowledge and skills for design-based inquiry of interactive systems. Includes a quarter-long project using appropriate methods and iteratively engages research, design, prototyping, and evaluation activities. Opportunity to reflect upon practice and receive critical review of work throughout the quarter.

INSC 544 Information Retrieval System (3) Covers theories and models in information retrieval (IR) and reviews user-centered and system-centered approaches. Issues involved in the design, development and evaluation of IR systems are examined including: methods and tools for document analysis, retrieval techniques, search engines, interfaces, usability, evaluation. Offered: jointly with LIS 544.

INSC 550 Information Policy (4) Doctoral seminar in the foundations of information policy including intellectual freedom, public/private good, intellectual property, privacy, and digital convergence, and the reshaping of information practices and information industries. Prerequisite: Permission of instructor.

INSC 555 Information and Values (4, max. 12) Explores value systems within a range of philosophical, socio-cognitive, and linguistic perspectives.

INSC 556 Teaching Practicum I (3) Doctoral student participation in teaching in a faculty-taught course. Credit/no credit only. Prerequisite: INSC 555.
INSC 570 Research Design (4) Introduction to empirical research, basics of theory construction and research design, types of research, ethical issues, instruments and techniques for descriptive research, measures of association. Employs an integrated (qualitative and quantitative) and focused approach.

INSC 571 Quantitative Methods in Information Science (5) Describes uses, characteristics, and theoretical bases of research methods and data analysis techniques used in quantitative research, emphasizing uses in information and library science. Topics include experimental design, descriptive and inferential statistics, the normal distribution, elementary probability, nonparametric statistics, and exploratory data analysis techniques. Prerequisite: INSC 570.

INSC 572 Qualitative Methods in Information Science (5) Principles and approaches to conducting qualitative research in information science, including how to design a qualitative study, role of context, methods of data collection and analysis, increasing the trustworthiness of data, minimizing observer effect, how to incorporate and build theory. Exposure to field research and data analysis. Prerequisite: INSC 570.

INSC 575 Research Practicum I (3) Students work with a researcher from the Information School as an active member of a research team. Credit/no credit only.

INSC 576 Research Practicum II (3) Students will work with an approved researcher as an active member of a research team. Credit/no credit only. Prerequisite: INSC 575 or permission of instructor.

INSC 578 Research Seminar (1-2, max. 15) Research presentations on a wide variety of topics in Information Science.

INSC 579 Research Colloquium in Information Science (2, max. 6) Research colloquium on various research topics in information science. Faculty, visitors, and students present current research. Credit/no credit only. Prerequisite: permission of instructor.

INSC 580 Organizational Theories of Information Systems (4) Survey of major trends of management of information systems (MIS) research. Introduces behavioral, economic, strategic, and technical research perspectives of MIS research. Reviews seminal articles in each area, identifies future research trends, develops research proposals, and conducts a small research project. Prerequisite: permission of instructor.

INSC 581 Organizational Theories of Information Systems (4) Surveys major strands of management of information systems research. Covers the behavioral, economic, strategic, and technical research perspectives of MIS research.

INSC 586 Information Dynamics I (4) Introduction to the concepts and methods of information feedback, systems thinking, soft systems methodology (SSM), and “soft operations research,” as well as the quantitative modeling of complex dynamic systems by means of differential and integral equations (system dynamics). Offered: jointly with IMT 586.

INSC 588 Project Management in Information Organizations (4) Examines roles, responsibilities, and methods of planning, and controlling projects. Analysis of critical issues such as the relationship between project management and organizational culture, structure, and processes; cross-functional and globally distributed teams; project governance, metric, and risk and performance management; communication, decision-making, and conflict resolution; organizational learning, change and knowledge management. Offered: jointly with IMT 588.

INSC 598 Special Topics in Information Science (3, max. 12)

INSC 599 Independent Study in Information Science (1-5, max. 15) Offered: jointly with IMT 599.

INSC 600 Independent Study or Research (*) Credit/no credit only.

INSC 800 Doctoral Dissertation (*) Credit/no credit only.

Information Technology Applications

ITA 340 Introduction to Web Publishing (3) Introduction to markup languages and publishing web content. Students gain understanding of HTML coding and extensions, image manipulation, information architecture, and web site publishing. Other topics include: the Web Accessibility Initiative, survey of Graphical User Interface (GUI) HTML editors, online privacy and security, and eXtensible Markup Language (XML).

ITA 341 Client-side Scripting and Design (3) Introduction to web browser design environment, scripting languages, JavaScript, Document Object Model (DOM), and creation of dynamic HTML web pages (DHTML) in combination with Cascading Style Sheets (CSS). Other topics include: client-server architecture and web design principles in the contexts of technical feasibility, usability, and accessibility. Prerequisite: ITA 340.

ITA 342 Introduction to SQL and Data Storage Technologies (3) Fundamentals of database design in a client-server architecture useful for web applications. Subsequent topics build upon foundation by introducing the Structured Query Language (SQL), open source tools MySQL and PHP for database processing, security issues in database applications, and XML as a alternate database storage technology. Prerequisite: ITA 341.

ITA 343 Server-side Programming and Web-data Integration (3) Provides framework to integrate server-side programming concepts and techniques, database technologies, and client-side scripting to design and implement dynamic web applications. Examines techniques using PHP, design and implementation of database (MySQL) connections, web application security, and XML data publication. Prerequisite: ITA 342.

Library and Information Science

LIS 462 Skills Approach to Information, Communications, and Technology (ICT) Literacy (3) Introduction to the Big6 14 Skills approach to information, communications, and technology (ICT) literacy for personal, school, district, or higher education settings. Includes technology within the Big6 framework, connection to standards, instructional design, assessment, curriculum mapping, peer design, the parent connection, program planning, and implementation.

LIS 498 Special Topics (1-5, max. 15) Library service and information science subject matter in seminars, workshops, or other appropriate formats. Topics vary and may be repeated for credit.

LIS 500 The Life Cycle of Information (2) Overview of the major concepts, processes and systems, actors, and operations in the life cycle of information. Introduction to the creation, publishing and distribution, evaluation and selection, organization, access, retrieval, and use of information. Exploration of the social context in which these processes and their stakeholders interact. Credit/no credit only.

LIS 505 Archival and Manuscript Services (3) Selection, organization, and uses of archival and manuscript collections. Emphasis on the principles and techniques; some attention to the administration of state archival and historical institutions' collections. Lecture, demonstration, and laboratory.

LIS 507 Preservation and Conservation of Library Materials (3) Consideration of the many factors contributing to the physical vulnerability of library materials of all kinds and an overview of resources and strategies for those who determine preservation policy or manage the application of such policy. No technical background necessary.

LIS 508 History of Recorded Information (4) Exploration of the history of ongoing transformation of recorded information within three broad spheres of human life: public communication, administrative and commercial operation, and personal communication.

LIS 510 Information Behavior (4) Introduction to the user-centered approach to information behavior. Theoretical foundations of various information behaviors such as information need, utilizing, gathering, seeking, etc. Synthesis of user studies, construction of user profiles, performance of gap analysis, and application of the results of user studies to improve services and system design. Prerequisite: LIS 500.

LIS 511 Systems Analysis (4) Introduction to the systems approach including basic concepts in the approach, dimensions of systems and steps in systems design. Emphasis is on the analysis, evaluation and design of information systems and services. Prerequisite: LIS 500.

LIS 512 Community Analysis (4) Explores key concepts of community in its broadest sense, methodological approaches for analyzing information needs and available resources, how to design information services in response to identified needs, and service evaluation. Facilitating the information behavior of all groups within a community and identifying how their needs interconnect. Prerequisite: LIS 510. Offered: jointly with INSC 512.

LIS 515 Ecological Information Systems (4) Introduction to cognitive work analysis framework. Prepares for active role in design and evaluation of information systems. Familiarization with basic concepts of cognitive systems engineering and practice in field study, data analysis, and transforming field findings
LIS 519 Special Topics in Information Behavior (1-4, max. 18) Introduction to innovative and specialized topics in information behavior. Course may be offered irregularly and may be repeated for credit. Prerequisite: LIS 510.

LIS 520 Information Resources, Services, and Collections (4) Concepts, processes, and skills related to parts of the life cycle of knowledge involving creation, production, distribution, selection, collection, and services to facilitate access. Specific discussion topics include characteristics of recorded knowledge; organizations and services devoted to managing access to recorded knowledge; principles associated with development of recorded knowledge and collections. Prerequisite: LIS 500.

LIS 521 Principles of Information Services (4) Analysis of the information mediation process, including determination and analysis of information needs; searching for, evaluation, and presentation of appropriate results; modalities for delivery of services; and current and future techniques. Prerequisite: LIS 520.

LIS 522 Collection Development (3) Access to materials as context for development and management of library collections in academic, public, school libraries. Community analysis, library mission; collection development policies, criteria, levels, responsibilities; aids to selection; collection evaluation, use studies; controversial materials.

LIS 523 Advanced Information Services (4) Investigation of the development, administration, and evaluation of information services for supporting the research process both within and across organizations. Prerequisite: LIS 521 or permission of instructor.

LIS 526 Government Publications (3) Introduction to government publications of the United States and their acquisition, organization, and use. Other topics covered include the public’s right to know, the Federal Depository Library Program, government influences in our daily lives, and future directions in government information. Credit/no credit only.

LIS 527 Business Information Resources (3) Survey of the extent and nature of business information and its sources, and of business information producers and consumers. Study and use of both print and on-line sources.

LIS 528 Health Sciences Information Needs, Resources, and Environment (3) Characteristics of users of health sciences information; health professionals, researchers, consumers and patients; environments (academic health sciences centers, hospitals, clinics, and public libraries); evaluation of information resources in health care; types and uses of health information management systems; policy issues, professional standards, education, and certification. Offered: jointly with MEDED 570.

LIS 529 Special Topics in Information Resources, Services and Collections (1-5, max. 18) Introduction to innovation and specialized topics in information resources, services and collections. Prerequisite: LIS 500, LIS 520.

LIS 530 Organization of Information and Resources (4) Introduction to issues in organization of information and documents including: analysis of intellectual and physical characteristics of documents; principles and practice in surrogate creation, including standards and selection of metadata elements; theory of classification, including semantic relationships and facet analysis; creation of controlled vocabularies; and display and arrangement. Prerequisite: LIS 500, which may be taken concurrently.

LIS 531 Catalogs, Cataloging, and Classification (4) Develops an understanding of library catalogs as information retrieval systems. Introduces library cataloging and classification. Focus on principles and standards in the creation of catalogs and cataloging records. Includes practice in descriptive and subject cataloging and classification. User perspective emphasized throughout. Prerequisite: LIS 500, LIS 530.

LIS 533 Advanced Cataloging and Classification (4) In-depth theory and practice in library cataloging and classification. Includes introduction to cataloging materials in a variety of formats. Prerequisite: LIS 500, LIS 530, and LIS 531.

LIS 536 Indexing and Abstracting (3) Exploration of issues in subject representation. Survey of different approaches, techniques, and methods for representing the subject matter of documents, including an evaluation of the role of users and context in subject representation. Formulation of policies for indexing and abstracting services. Prerequisite: LIS 530.

LIS 537 Construction of Indexing Languages (4) Exploration of the design, construction, evaluation, and maintenance of controlled indexing languages, including studies of how users are integrated into the design process. Through completion of thesaurus construction project, prepares students to design index languages, plan and implement a design project, and evaluate indexing languages. Credit/no credit only. Prerequisite: LIS 530.

LIS 538 Metadata: Evolving Principles and Practices (3) Principles, skills and practices in the conceptualization and implementation of metadata and metadata systems with a focus on semantic interoperability in distributed environments. Topics include metadata development for attribute and value spaces, metadata registry roles and services, organizational mechanisms, Web Services and advanced search engines. Prerequisite: LIS 530, LIS 540 or equivalent.

LIS 539 Special Topics in Organization of Information and Resources (1-4, max. 18) Introduction to innovative and specialized topics in the organization of information and resources. Prerequisite: LIS 500, LIS 530.

LIS 540 Information Systems, Architectures and Retrieval (5) Introduction and overview of information systems, system architectures, and retrieval models. Emphasis given to the role of users in the design, development, and evaluation of information retrieval systems and database management systems. Prerequisite: LIS 500, which may be taken concurrently.

LIS 541 Internet Technologies and Applications (3) Overview of Internet technologies including networking hardware, the TCP/IP protocol suite, addressing, packets and routing, the client/server model. End-user applications for communication and collaboration such as telnet, FTP, email, conferencing, and streaming media. Web site creation, development, and management. Credit/no credit only.

LIS 542 Conceptual Database Design (5) Introduction to relational database theory and technology from an information science perspective. Focuses on traditional transactional database theory, architecture and implementation in a user-centered systems context. Introduces set and graph theory, relational algebra, and data warehouses. Credit/no credit only. Prerequisite: LIS 511 or LIS 540.

LIS 543 Design of Information Systems (3) Discusses how theories of conceptual data modeling affect design of database and information systems, examines relationships between modeling and implementation, and bridges gaps between theoretical understanding of database design and implementation issues. Implements conceptual schemata development in LIS 542.

LIS 544 Information Retrieval System (3) Covers theories and models in information retrieval (IR) and reviews user-centered and system-centered approaches. Issues involved in the design, development and evaluation of IR systems are examined including: methods and tools for document analysis, retrieval techniques, search engines, interfaces, usability, evaluation. Offered: jointly with INSC 544.

LIS 545 Programming for Information Systems (5) Introduction to structured object-oriented programming for information systems. Focus on fundamental programming with attention to elementary algorithms and data structures, interface design, user testing, and knowledge representation. Prerequisite: LIS 540 or permission of instructor.

LIS 546 Network System Administration (4) Introduction to local area network hardware, topologies, operating systems, and applications. Covers aspects of network setup and management including network and application protocols, system configuration, security and Internet connectivity. Hands-on experience with network applications and operating systems. Prerequisite: LIS 500.

LIS 549 Special Topics in Information Systems, Architectures, and Retrieval (1-4, max. 18) Introduction to innovative and specialized topics in information systems, architectures, and retrieval. Prerequisite: LIS 540.

LIS 550 Information in Social Context (4) Concepts, processes, and issues related to the larger social context within which the life cycle of knowledge is played out. Discussion topics include intellectual freedom, information as public/private good, intellectual property, privacy, confidentiality, information liability, information and telecommunications policy, the economics of information, and other profes-
sisional values. Prerequisite: LIS 500, which may be taken concurrently.

LIS 551 Intellectual Freedom in Libraries (3) Analysis of issues related to intellectual freedom, particularly to implications for libraries and librarians. Consideration of current legal climate, conformity versus freedom in modern world, librarian as censor, social responsibility and individual freedom, intellectual freedom of children, prospects for future. Credit/no credit only.

LIS 554 Information Policy: Domestic and Global (5) National and international information policy; public policy; private sector policy in terms of privacy, access, and exploitation; technology infrastructures and policies supporting the information industries; digital convergence and the emerging mega-industries. Prerequisite: LIS 550 or permission of instructor.

LIS 558 Reading Seminar in Social Aspects of Information Systems (2) Addresses four fundamental issues in social aspects of information systems. Introduces students to the intellectual traditions that underlie such fields as computer ethics, social informatics, and value sensitive design. Format entails in-depth discussions based on careful reading of primary source texts selected by seminar participants. Prerequisite: permission of instructor.

LIS 559 Special Topics in the Social Context of Information (1-4, max. 18) Introduction to innovative and specialized topics in the social context of information. Course may be offered irregularly and may be repeated for credit. Prerequisite: LIS 550.

LIS 560 Instructional and Training Strategies for Information Professionals (3) Develops knowledge and skills in instruction and training functions for library and information settings. Issues and strategies for learning and teaching. Design, development, and evaluation of information and technology literacy programs. Addresses the needs of users when designing and delivering instruction. Prerequisite: LIS 550, which may be taken concurrently.

LIS 561 Storytelling: Art and Techniques (3) Storytelling, past and present, noting its development as an art form. Analyzing storytellers materials (folk literature and literary forms) throughout historical periods. Essential techniques necessary to this artistic skill. Planning storytelling programs for various ages, interest groups, and situations, utilizing folk, classic, and contemporary literature.

LIS 565 Children’s Materials: Evaluation and Use (4) Library materials for children from infancy through elementary grades. Focus on resources in all media that serve informational, educational, cultural, and recreational needs of the young. Focuses on standard bibliographies and other resources designed to meet informational needs of adults serving children. Prerequisite: LIS 500, LIS 510, LIS 520, or permission of instructor.

LIS 566 Young Adult Materials: Evaluation and Use (4) An overview of materials reflecting adolescents' interest in media and addressing their educational, cultural, and recreational needs. Students evaluate print literature, electronic ad other non-print media for young adults. Content also designed to assist adult caregivers of adolescents. Prerequisite: LIS 500, LIS 510, and LIS 520 or permission of instructor.

LIS 567 Public Library Services for Youth (3) Administration of youth departments in public libraries; planning and promoting programs and services; evaluation of library collections; community and professional roles of the youth librarian. Prerequisite: LIS 500 or permission of instructor.

LIS 568 Information Literacy for Teaching and Learning (3) Explores theories, process, and practical applications of information literacy. Examines the development of information literacy programs for libraries, community agencies, business, education or other information settings. Explores integral relationship between information and information literacy, and continual evaluation.

LIS 569 Special Topics in Instructional and Training Strategies for Information Professionals (1-5, max. 18) Introduction to innovative and specialized topics in instructional and training strategies for information professionals. Prerequisite: LIS 560.

LIS 570 Research Methods (4) Research as a process from problem definition and formulation of questions to design, data collection, analysis, and reporting. Students recognize research opportunities, translate them into researchable frameworks, design research projects, and implement results in libraries and other information agencies. Prerequisite: LIS 500, which may be taken concurrently.

LIS 579 Special Topics in Research Methods (1-4, max. 18) Introduction to innovative and specialized topics in research methods. Prerequisite: LIS 500, LIS 570.

LIS 580 Management for Information Organizations (4) Introduction to internal and external management issues and practices in information organizations. Internal issues include organizational behavior, organizational theory, personnel, budgeting, planning. External issues include organizational environments, politics, marketing, strategic planning, funding sources. Prerequisite: LIS 500, which may be taken concurrently.

LIS 581 Marketing and Planning for Libraries (3) Approaches to planning and marketing library products/services. Examines partnerships that can be forged between elements of marketing and appropriate futures strategies for libraries. Discusses marketing and planning as integrated processes with attention to short- and long-term goals and objectives. No particular library institutional setting is assumed. Prerequisite: LIS 500, which may be taken concurrently.

LIS 582 Strategic Planning and Management of Information Technology (3) Exploration of methods of strategic planning for managing information resources and technology to support online information needs and the role of the systems librarian and CIO. Topics include mission and goals, strategic planning, the information technology function within organizations, and the desirable abilities of managers and leaders. Prerequisite: LIS 580.

LIS 583 Knowledge Management (3) Introduction to contemporary topics in management of knowledge and use in organizations. Discussion topics include knowledge generation, knowledge taxonomy, knowledge transfer, organizational knowledge management practice, and knowledge management systems. Prerequisite: LIS 500; LIS 580; or permission of instructor.

LIS 584 Knowledge Management (3) Administration of the School Library Media Program (3) Develops competency in administering materials, equipment, and services of library media program as integral part of educational process of school. Focuses on developing skills in acquiring, organizing, and managing full range of learning resources for access and use, and communicating the program to users. Required for school library media specialists. Prerequisite: LIS 580.

LIS 586 Public Libraries and Advocacy (3) Examines the purpose and role of public libraries in an information society. Includes governance, services, and planning with special emphasis on advocacy for the library and community.

LIS 587 Library Technology Systems (4) Developing criteria for selection and design of information technology systems for libraries and information centers. Applying criteria in evaluation of hardware and software. Examining related management challenges, such as vendor relations, financing options, personnel requirements, and design of activities. Prerequisite: LIS 540, LIS 580, or permission of instructor.

LIS 588 Special Librarianship (3) Seminar in the practice of special librarianship in business and industrial firms, government agencies, and the free-lance sector. User services and information resources. Credit/no credit only. Prerequisite: LIS 580.

LIS 589 Special Topics in Management of Information Organization (1-4, max. 18) Introduction to innovative and specialized topics in management of information organizations. Prerequisite: LIS 500, LIS 580.

LIS 590 Directed Fieldwork (2-4, max. 8) Minimum of 100 hours, maximum of 200 hours of professional, supervised fieldwork in a library or professional information setting. Fieldwork is a one-quarter experience; however, this may be repeated in a different setting with a different set of learning objectives for a subsequent quarter. Library and Information Science majors only. Credit/no credit only. Prerequisite: 30 credits in Library and Information Science program.

LIS 592 Legal Research II (3/4) Legal tools that answer more complex legal research problems, such as federal legislative histories, sources of administrative law, specialized subject research. Federal emphasis. Builds on skills and techniques taught in LIS 591/LAW A 598. Extensive work with online resources. Prerequisite: LIS 591 or permission of instructor. Offered: jointly with LAW A 599.

LIS 593 Selection and Processing of Law Library Materials (3) Study of tools for collection development and collection development plans in law libraries. All law library technical processes, including acquisitions, budgeting, cataloging, and serials. Prerequisite: LIS 591 or permission of instructor.

LIS 594 Law Library Administration (4) Administration in law libraries, including organization, personnel, and management issues.
(e.g., interviewing, hiring, firing), communications, library planning, and bookkeeping. Credit/no credit only. Prerequisite: LIS 591 or permission of instructor.

LIS 595 Current Issues in Law Librarianship (4-4, max. 4) From a list of current topics in law librarianship, students select a topic, research it fully, write a major paper, and present their paper. Topics may include citation reform, ethics, and publisher practices. Credit/no credit only. Prerequisite: Law Librarianship majors or permission of instructor.

LIS 598 Special Topics in Information and Library Science (1-6, max. 18) Seminar dealing with various topics in information and library science. Offered by visitors or resident faculty.

Topics may be changed concurrently or permission of the Associate Dean of the Graduate School.

GRDSCH 630 Special Topics in College/University Teaching (2, max. 6) Interdisciplinary discussion of topics related to college/university teaching, with an emphasis on innovative teaching and preparing for faculty careers. Designed to address topics across disciplines, as a complement to discipline-specific courses offered in departments. Credit/no credit only.

LIS 600 Independent Study or Research (*) Credit/no credit only.

LIS 700 Master's Thesis (*) Credit/no credit only.

---

Interdisciplinary Graduate Programs

Biomolecular Structure and Design

BMSD 520 Research Seminar (1, max. 9) Group conferences on graduate student research. Prerequisite: BMSD graduate student or permission of instructor. Offered: AWSp.

BMSD 540 Literature Review (2) Emphasizes critical evaluation of original articles in literature from all fields relevant to Biomolecular Structure and Design. Scientific writing and oral presentations emphasized. Concurrent registration in BIOC 530 required. Prerequisite: first-year BMSD student or permission of instructor. Offered: A.

BMSD 541 Literature Review in Biomolecular Structure and Design (2) Emphasizes critical evaluation of original articles in literature from all fields relevant to Biomolecular Structure and Design. Scientific writing and oral presentations emphasized. Prerequisite: first-year BMSD student or permission of instructor. Offered: W.

BMSD 542 Literature Review in Biomolecular Structure and Design (2) Emphasizes critical evaluation of original articles in literature from all fields relevant to Biomolecular Structure and Design. Scientific writing and oral presentations emphasized. Prerequisite: first-year BMSD student or permission of instructor. Offered: Sp.

BMSD 599 Introduction to Research in Biomolecular Structure and Design (3-6, max. 24) Student works with one of the research groups within the Biomolecular Structure and Design Program for one quarter and then rotates to another laboratory for one additional quarter. Minimum two quarters, maximum four. Prerequisite: BMSD student or permission of instructor. Offered: AWSp.

Graduate School

GRDSCH 610 Teaching Mentorship (3, max. 6) Individualized project, under the direction of a faculty member, focused on issues of teaching and learning at the college/university level and designed to enhance the student's ability to make innovative contributions in teaching. Credit/no credit only. Prerequisite: permission of faculty member, graduate program coordinator, and the Associate Dean of the Graduate School.

GRDSCH 615 Teaching Assistant Preparation (1-6, max. 6) Department or University-wide training for teaching and research assistants. Credit/no credit only.

GRDSCH 616 Research Assistant Preparation (1-6, max. 6) Department or University-wide training for research assistants. Credit/no credit only.

GRDSCH 620 Teaching Mentorship Seminar (2) Interdisciplinary seminar. Individual mentorship projects are presented and discussed, as are more general topics related to the teaching mentorship experience. Credit/no credit only. Prerequisite: GRDSCH 610 which may be changed concurrently or permission of the Associate Dean of the Graduate School.

GRDSCH 630 Special Topics in College/University Teaching (2, max. 6) Interdisciplinary discussion of topics related to college/university teaching, with an emphasis on innovative teaching and preparing for faculty careers. Designed to address topics across disciplines, as a complement to discipline-specific courses offered in departments. Credit/no credit only.

---

Individual Ph.D.

IPHD 600 Independent Study (*)

IPHD 800 Independent Study (*)

Molecular and Cellular Biology

MCB 511 Cell Cycle Control (3) Breeden, Roberts, Edgar Studies recent advances in understanding cell-cycle control, arising from genetics and biochemical studies of fission and budding yeast, marine invertebrates, Drosophila, amphibians, and cultured cells. Addresses the biochemical processes and molecular interactions and the rate-limiting events in the cell cycle, and the coupling of those events to physiological signals. Offered: A.

MCB 513 Development Journal Seminar (1, max. 12) Moeens, Soriano, Swalla Examines current literature about specific topics in developmental biology. The seminar chooses current monthly topics and the group meets weekly to discuss published research papers. Topics may include: germ cell specification; cell migration and morphogenesis; axis formation; somitogenesis and stem cells. Offered: AWSp.

MCB 514 Molecular and Cellular Biology Literature Review (2) Raible Emphasizes critical evaluation of the original literature orally and in writing. Open only to first-year students in the Molecular and Cellular Biology Program.

MCB 515 Molecular and Cellular Biology Literature Review (2) Ememrman Emphasizes critical evaluation of the original literature orally and in writing. Open only to first-year students in the Molecular and Cellular Biology Program. Offered: W.

MCB 516 Molecular and Cellular Biology Literature Review (2) Ememrman Emphasizes critical evaluation of the original literature orally and in writing. Open only to first-year students in the Molecular and Cellular Biology Program. Offered: S.
MCB 517 Topics in Molecular and Cellular Biology (1-5, max. 12) Advanced in-depth coverage of specific areas of molecular and cellular biology of current interest. Lectures by University of Washington faculty and invited speakers involved in research in this area. A basic knowledge of principles of molecular and cellular biology assumed.

MCB 519 Topics in Cancer (1, max. 6) Examination of ways to integrate basic, clinical, and public health sciences to increase understanding of human biology and disease. Seminars in introduction to cancer research as viewed by basic, clinical, and public health sciences, origins of cancer, cancer prevention, cancer progression, and therapies for cancer. Credit/no credit only.

MCB 520 Tutorial in Molecular and Cellular Biology (1-2, max. 2) Enmann Special topics reading and discussion. Offered: A.

MCB 521 Embryos, Genes and Development (4) Parkhurst, Press, Soniano Introduction to vertebrate development and inheritance, emphasizing cellular, genetic, and molecular mechanisms. Focuses on development of fruit flies, nematodes, and mice. Emphasizes embryological processes including induction, determination, pattern formation. Relationship between development and evolution. Technologies include transgenic animals, genetics, mosaic analysis, homologous recombination, somatic cell genetics, embryonic manipulations. Offered: W.

MCB 532 Human Pathogenic Viruses (3) Galloway, Linal Replication, regulation, and pathogenesis of several groups of human viruses, including human immunodeficiency virus and papillomaviruses. Emphasis on the unique aspects of the viral-like cycles as they relate to effects on infected cells and organisms. Guest lecturers focus on viral immunology, measles, herpes simplex virus and HHV-8. Offered: W.

MCB 542 Nucleic Acids and Enzymes (2) Stoddard Covers the biology, evolution, mechanisms, and structure/function relationships of enzymes that act on DNA and RNA. Focuses both on various molecular systems, and also on important techniques used for their study, including high resolution structure determination, single molecule methods, kinetics and thermodynamic binding analyses, and protein engineering. Offered: Sp.

MCB 560 Biotechnology Externship (2-12, max. 12) Moon Supervised research in a biotechnology company. Prerequisite: permission of instructor and doctoral candidacy. Offered: AWSpS.

MCB 580 Teaching Practicum in Molecular and Cellular Biology (3, max. 6) Supervised training in the teaching of molecular and cellular biology. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSpS.

MCB 599 Introduction to Research in Molecular and Cellular Biology (*) (max. 20) The student rotates through one research laboratory involved in the Molecular and Cellular Biology Program per quarter. Open only to first-year students in the Molecular and Cellular Biology Program. Credit/no credit only. Offered: AWSpS.

MCB 600 Independent Study or Research (*) MCB 700 Master’s Thesis (*) Offered: AWSpS.

MUSEUM 581 Preservation and Management of Collections (5) I&S Lecture and demonstration of fundamental principles of collection management issues, emphasizing collection management needs of museum collection of all types. Application of principles through integrated collection management lab experiences addressing concerns of artifact handling, cataloging, photo-documentation, storage, and registration.

MUSEUM 582 Preservation of Collections II (5) I&S Lecture and demonstrations in the recognition and treatment of museum conservation problems for specimens of all types. Application of basic principles to specific preventive and active conservation and restoration problems encountered by curatorial personnel.

MUSEUM 583 Museum Operations Practicum (1-5, max. 15) Application of general museological training in one or more areas of supervised operation, including registration, education, exhibition, development, marketing or public relations, through project-oriented work in the Burke Museum or other approved University facility. Recommended: MUS 581, MUS 582.

MUSEUM 584 Museum Curation Practicum: Archaeology (1-5, max. 15) Application of museological training in curation of archeological collections including ethnographic, geological, or zoological collection materials in the Burke Museum. Supervised work ranges from fundamental collection documentation and research to preventive conservation, storage, and other special curation projects: Recommended: MUS 581.

MUSEUM 585 Museum Curation Practicum: General Collections (1-5, max. 15) Application of museological training in the curation of art, historic, botanical, geological, zoological, or other collections. Supervised work ranges from fundamental collection documentation and research to preventive conservation or storage, and other special curation projects: Recommended: MUS 581.

MUSEUM 586 Special Topics in Museology (1-5, max. 15) In-depth examination of selected current issues within the field of museology.

MUSEUM 590 Seminar in Museum Theory and Administration (5) Examination of principles of administrative theory and museum operations. Administrative structures and policies, management theory, board issues, organizational conflicts, planning issues, collection concerns, financial constructs, professional standards, and museum/Community relations from an organizational and management perspective. Recommended: MUS 580. Offered: jointly with ANTH 590.

MUSEUM 593 Seminar in Museum Exhibition Theory, methodology, and fundamental principles of museum exhibition process. Exhibition elements include planning, conceptual development, interpretation, design, production, installation, evaluation, and community impact of museum exhibitions. Application of exhibition principles through term exhibit project. Recommended: MUSEUM 590.

MUSEUM 594 Seminar in Museum Education Focus on museums as educational institutions with consideration of the place of education in the mission of museums, the educational role of museums compared to that of other institutions, the museum’s diverse audiences and their needs, and the educational methods and techniques museums may employ in pursuing their goals. Recommended: MUSEUM 580.

MUSEUM 598 Museum Internship (1-15, max. 15) Faculty supervised off-campus internships in museums and allied institutions. Each internship is individually established and provides students with practical experience and the opportunity to apply and learn new professional skills. Prerequisite: permission of instructor. Recommended: MUSEUM 580; MUSEUM 581; MUSEUM 582; MUSEUM 590.

MUSEUM 600 Independent Study or Research (1-10)

MUSEUM 700 Master’s Thesis (1-10) Credit/no credit only.

MUSEUM 710 Master’s Project (1-10, max. 10) Credit/no credit only.

Near and Middle Eastern Studies

NAMES 800 Doctoral Dissertation (*)

Neurobiology and Behavior

NEUBEH 501 Introduction to Neurobiology (4) Surveys all aspects of molecular and cellular neuroscience, including the electrical properties of neurons, synaptic physiology, and neuronal cell biology. Includes lecture discussion of original literature. Offered: A.

NEUBEH 502 Introduction to Neurobiology (5) Sher k Systems level survey of vertebrate system, focusing on sensory system, on motor system, and on neuroanatomy. Lectures cover topics in sensory and motor systems. Laboratory includes brain dissection and study of intact, prospected, and sectioned brain and spinal cord. Emphasis is on human nervous system. Offered: W.

NEUBEH 503 Cognitive and Integrative Neurobiology (4) Phillips Survey of all aspects of neuroscience, including a discussion of higher neural processes like motivation, decision making, attention, learning, and memory. Lecture and discussion of original literature. Offered: Sp.

NEUBEH 510 Seminar in Neurobiology and Behavior (0.5) Biweekly seminar on current...
topics. Required for students in the Graduate Program in Neurobiology and Behavior and for students admitted to the Graduate Neuroscience Program Training Grant. Credit/no credit only. Offered: AWSpS.

NEUBEH 515 Teaching Practicum in Neurobiology and Behavior (3-6, max. 15) Supervised training in the teaching of neuroscience and related scientific topics. Prerequisite: student standing in the Neuroscience and Behavior graduate program and permission of the instructor. Offered: AWSpS.

NEUBEH 526 Introduction to Laboratory Research in Neurobiology (4) Students become familiar with, and assist in, the performance of research on ongoing projects in designated laboratories. Emphasis on employed methodology and techniques. Credit/no credit only. Prerequisite: first-year graduate students in neurobiology. Offered: AWSpS.

NEUBEH 527 Current Topics in Neurobiology and Behavior (1) Sullivan Presentation and discussion of current research provides exposure to diverse areas of neurobiology and behavior research. Credit/no credit only. Prerequisite: graduate student in neurobiology and behavior program or permission of instructor. Offered: AWSpS.

NEUBEH 528 Computational Neuroscience (3) Fairhall, Rieke Introduction to computational methods for understanding nervous systems and the principles governing their operation. Topics include representation of information by spiking neurons, information processing in neural circuits, and algorithms for adaptation and learning. Prerequisite: elementary calculus, linear algebra, and statistics, or by permission of instructor. Offered: jointly with CSE 528.

NEUBEH 532 Discussion in Cell Signaling and Molecular Physiology (2) Fairhall, Rieke Discusses fundamental issues in cell excitation and molecular and cellular physiology. Focuses on problem solving and reading from original literature. Emphasizes student participation. Prerequisite: first-year graduate students in neurobiology or physiology and biophysics. Offered: jointly with P BIO 532; W.

NEUBEH 541 Neuroendocrinology (3) Steiner Emphasizes the cellular and molecular aspects of several topics in neuroendocrinology, including neuropeptide genes, reproduction, steroid hormone regulation of gene expression, mechanisms of hormone action, endocrine rhythms, and neural oscillations. Prerequisite: either BIOL 201, BIOL 202, or BIOL 202, or BIOL 180, BIOL 200, or BIOL 220; BIOC 440, BIOC 441, BIOC 442 or permission of instructor. Offered: jointly with P BIO 552; W, odd years only.

NEUBEH 545 Quantitative Methods in Neuroscience (3) Rieke, Shadlen Discusses quantitative methods applicable to the study of the nervous system. Revolves around computer exercises/discussion of journal papers. May include linear systems theory, Fourier analysis, ordinary differential equations, stochastic processes, signal detection and information theory. Prerequisite: NEUBEH 501, 502, 503, or by permission of instructor. Offered: jointly with P BIO 545; W, odd years.

NEUBEH 549 Molecular Basis of Neurodegenerative Disease (2) La Spada, Muchowski, Pallarack Introduces a broad range of neurodegenerative diseases, focusing upon the approaches that have led to recent discoveries and emphasizing the elucidation of mechanisms and pathways of disease pathogenesis. Offered: jointly with GENOME 549/PHCOL 549; W.

NEUBEH 550 Biophysics of Calcium Signaling (1) Hillie, Santana Introduction to cellular calcium signaling including theoretical and technical issues of calcium signal detection and biological conclusions. Prerequisite: CONJ 531 Offered: jointly with PBIIO 550; Sp.

NEUBEH 551 Mouse Models (1) Illustrates the use of transgenic and targeted-gene disruption technologies for developing mouse models of the disease. Introduces the methodology of producing transgenic and knock out mice. Discusses several examples of disease models using the most recent primary literature as a source. Offered: jointly with P BIO 551.

NEUBEH 552 Synaptic Integration (1) Binder, Powers Discussion of recent papers on how neurons in the central nervous system integrate concurrent synaptic inputs. Includes: effects of driving force on synaptic currents, effects of conductances on dendritic properties, transfer of currents from dendrites to soma, and transformation of currents into spike train outputs. Offered: jointly with P BIO 552.

NEUBEH 553 Learning and Memory: Synapses and Systems (2) Jagadeesh, Sullivan Five-week mini-course evaluates the current state of knowledge on the mechanisms that allow people to learn and remember. After introductory survey of basic cellular and molecular mechanisms underlying long-term synaptic plasticity and the multiple systems existing for learning and memory, students choose specific topics for discussion. Offered: jointly with P BIO 553.

NEUBEH 554 Motor Learning: Cellular and Network Mechanisms (1) Fetz, Perlmutter Five-week mini-course reviews the current state of research on cellular and network mechanisms of motor learning. After an introductory overview of behavioral and physiological examples of motor learning in various species and systems, students choose specific topics for discussion, using the primary literature as a source. Offered: jointly with P BIO 554.

NEUBEH 555 Sensory Receptors (1) Detwiler, Rieke Five-lecture mini-course examines how different kinds of sensory receptors detect and respond to different modalities of sensory stimuli. Discussion focuses on the cellular and molecular mechanisms of the underlying transduction processes and the experimental evidence that they are based on. Offered: jointly with P BIO 555.

NEUBEH 556 Axon Pathfinding Mechanisms (1) Bothwell Examines mechanisms governing axon growth cone behavior during embryonic development and during regeneration in the injured adult. Discusses approaches employing both invertebrate and mammalian model systems. Offered: jointly with P BIO 556.

NEUBEH 557 Ion Channel Gating (1) Zagotta Compares and contrasts mechanisms of gating in ligand-gated and voltage-gated ion channels. Covers basics of ligand gating and voltage gating, kinetic schemes, inactivation and desensitization, gating currents and partial agonists, and ion channel structure. Offered: jointly with P BIO 557.

NEUBEH 559 Neurobiology of Disease (3) Garden, Moeller, Neumaier, Weiss Introduces medically important neurological and psychiatric diseases and experimental approaches to understanding the basis for diseases and their treatments. Covers strokes, epilepsies, autoimmune diseases of the CNS, neurodegenerative diseases, autism, psychosis, anxiety disorders and mood disorders. Offered: jointly with NEURL 559/P BIO 559.

NEUBEH 600 Independent Study or Research (1) Credit/no credit only. Offered: AWSpS.

NEUBEH 700 Master’s Thesis (1) Offered: AWSpS.

NEUBEH 800 Doctoral Dissertation (1) Offered: AWSpS.

Nutritional Science

NUTR 300 Nutrition for Today (3) NW Kirk Science of nutrition as it relates to individual food choices, health behaviors, public health. Health topics include wellness, obesity, eating disorders, sports nutrition, prevention of chronic disease. Nutrients and nutritional needs across the lifespan. Issues facing society including food safety, biotechnology, use of supplements and botanicals. Offered: A.

NUTR 441 Chemistry of Foods (3) Peck Principles of food science integrated with laboratory sessions that observe the effects of various parameters of food composition, and applied sensory evaluation. Explores current trends in the culinary sciences to promote pleasurable eating. Recommended: general and organic chemistry. Offered: even years; S.

NUTR 445 Food Safety and Production Laboratory (2) Peck Examination of food safety systems including HACCP methodology. Experiential study of food production, receiving systems, inventory control, menu planning, budget consideration, and cost control. Offered: W.

NUTR 462 Medical Nutrition Therapy I (2) Peck Intervention strategies, counseling skills, and diet modifications that pertain to chronic disease prevention and management. Corequisite: NUTR 562. Offered: Sp.

NUTR 463 Medical Nutrition Therapy II (2) Peck Didactic training in nutrition support theories and skill development for interpretation of laboratory values. Management of fluids and electrolytes, and nutrition interventions in acute care. Prerequisite: NUTR 462; corequisite: NUTR 563. Offered: S.

NUTR 465 Nutritional Anthropology (3) I&S/ NW Neill Considers interrelationships between
biomedical, sociocultural, and ecological factors, and the influence of humans to respond to variability in nutritional resources. Topics covered include diet and human evolution, nutrition-related biobehavioral influences on human growth, development, and disease risk. Prerequisite: BIO A 201. Offered: jointly with BIO A 465.

NUTR 499 Undergraduate Research (1-5, max. 10) Independent study and research supervised by a faculty member with appropriate academic interest. Offered: AWSpS.

NUTR 500 Graduate Seminar: Current Issues in Nutritional Sciences (1) A review of current topics in nutritional science and public health nutrition. Provides a forum for student and faculty presentation, and review of current research efforts. Prerequisite: graduate student in nutrition. Offered: AWSp.

NUTR 511 Survey of Advanced Nutrition (2-3) Bruemmer, Chan Advanced introduction to nutritional sciences. Topics include macronutrient and micronutrient metabolism, energy balance and obesity, nutrient utilization in physical activity, nutritional needs and recommendations throughout the lifecycle, and the relationships between nutrition and atherosclerosis, diabetes, and cancer risk. Offered: A.

NUTR 520 Nutrition and Metabolism I (3) Rosenfeld Metabolic/physiologic concepts related to energy balance, carbohydrate, and protein nutrition. Addresses energy producing pathways, as well as food sources, digestion, absorption, and utilization of carbohydrates, protein, and various micronutrients. Additional topics include low carbohydrate diets, vegetarianism, protein deficiency, and inborn errors in carbohydrate and protein metabolism. Prerequisite: biochemistry. Offered: A.

NUTR 521 Nutrition and Metabolism II (3) Rosenfeld Discussion of normal lipid components of animal tissues, with review of their metabolism and physiological functions. Topics include digestion, absorption, transport, and utilization of dietary fats, cholesterol, and fat-soluble vitamins. Discusses in depth the roles played by lipids and various micronutrients in altering risk of atherosclerosis. Prerequisite: biochemistry. Offered: W.

NUTR 522 Nutrition and Metabolism III (3) Kirk Advanced Study of biologically essential minerals and vitamins. To include absorption, transport, function, storage, excretion; imbalance, deficiency and toxicity; dietary structures; role of these nutrients in prevention diseases directly or indirectly. Offered: Sp.

NUTR 526 Maternal and Infant Nutrition (3) Johnson Influence of maternal and infant nutrition on the health of populations. Nutrition-related physiological, psychological, and social factors in pregnancy, lactation, and infancy. Application of evidence-based approaches to maternal and infant nutrition recommendations and interventions for populations and high-risk individuals. Prerequisite: nutrition and human physiology. Offered: A.

NUTR 527 Nutrition: Childhood Through Adolescence (3) Rees, Trauma Interactions of nutrition with behavior, growth, and development of children, from infancy through adolescence. Critical evaluation of normative data and special problems, as well as strategies for individual health interventions. Prerequisite: graduate student in nutritional sciences or permission of instructor. Offered: even years; Sp.

NUTR 528 Nutrition in Aging (3) Drewnowski Physiological, psychological, social, cultural, and economic factors affecting health nutrition and status in the middle and later years. Prerequisite: human nutrition and human physiology. Offered: odd years; Sp.

NUTR 529 Nutrition Research Design (3) Duncan Critical review of selected nutrition literature. Evaluation of experimental design, research protocols, data analyses, and data presentations. Prerequisite: BIOST 511. Offered: odd years; A.

NUTR 530 Nutrition for Children with Special Health Care Needs (3) Lucas Principles of nutrition screening and assessment, clinical nutrition care, family-centered care, and health services as applied to meeting nutritional needs of children with special health care needs. Both population-based and individual care concepts are explored for children with a variety of chronic conditions. Offered: odd years; Sp.

NUTR 531 Public Health Nutrition (4) Johnson Explores the functions and essential services of public health as they apply to assuring access to a safe and nutritious food supply. Examines the practice of public health nutrition: nutrition environment, program planning, implementation, and evaluation; policy development, implementation and evaluation, and links between basic science and public health nutrition practice. Prerequisite: introductory nutrition. Offered: W.

NUTR 532 Fieldwork in Public Health Nutrition (1-12, max. 12) Peck Experience and service learning in organizations that plan, deliver, and promote population-based nutrition education and nutrition services. Prerequisite: Nutritional Sciences graduate student and permission of instructor. Offered: AWSpS.

NUTR 536 Nutrition Education Principles and Practice (2) Peck Examines principles of design and presentation of nutrition education for specific groups including developing goals and objectives, selection of components including activities, visual aids, and specifications of evaluation processes. Explores principles of communication, written and oral, in presenting nutrition education including learning styles, cultural competence, literacy levels, including, working with the media. Offered: W.

NUTR 537 Laboratory Rotation (1-4, max. 6) Exposure to research being conducted in the laboratories of the graduate nutrition faculty. Provides hands-on experience in laboratory research. Introduces the student to on-going research for preparation of dissertation topics. Prerequisite: permission of instructor. Offered: AWSp.

NUTR 538 Nutritional Epidemiology (3) Bresadola Application of epidemiological methods to current studies of diet, nutrition, and chronic disease. A discussion of current issues and controversies enable students to plan studies in nutritional epidemiology and disease prevention. Prerequisite: EPI 511 or EPI 512 and BIOST 511 or permission of instructors. Offered: jointly with EPI 538; A.

NUTR 545 Food Safety and Health (3) Bruemmer Presentation of emerging issues in food safety, sustainable agriculture, and biotechnology. Examines both domestic and global pressures on the food supply. Examines international policies that promote regional solutions for a safe food supply and access to nutritious foods. Recommended: course in microbiology. Offered: W.

NUTR 550 Obesity: Prevention and Control (3) Drewnowski Integrated biomedical and social approaches to obesity and provides opportunities to design and evaluate strategies for obesity prevention and control. Prerequisite: graduate standing or permission of instructor. Offered: W.

NUTR 551 Nutrition and Gene Expression (3) Rosenfeld Lectures, student presentations, and discussions of current research on nutrient/gene interactions. Focus on how dietary factors act both directly as transcriptional regulators or indirectly as inducers of signal transduction cascades leading to alterations in expression of proteins associated with cellular nutrient metabolism. Prerequisite: NUTR 520, NUTR 521, NUTR 522, or permission of instructor. Offered: W.

NUTR 555 Nutrition in Developing Countries (3) Gorstein Introduces issues of nutrition in developing countries, with an emphasis on the control and prevention of under nutrition and micronutrient deficiencies. Offered: jointly with GH 555; Sp.

NUTR 561 Dietetics Internship (6-10, max. 30) Peck Focuses on the competencies for entry-level practice in dietetics. Autumn and winter quarters include core experiences in wellness, public health, food service, ambulatory care, home health, and clinical services. Spring quarter activities are devoted to either nutrition therapy or public health, depending on student’s career goals. Prerequisite: clinical students only. Offered: AWSp.

NUTR 562 Nutrition and Chronic Disease (4) Bruemmer Epidemiology/pathophysiology of chronic disease related to nutrition (e.g., obesity, cardiovascular disease, osteoporosis, hypertension, diabetes). Examines nutritional risk/protective factors in relation to public health, individual nutrition, and clinical intervention. Prerequisite: physiology, biochemistry. Offered: Sp.

NUTR 563 Nutrition in Acute Care (4) Bruemmer Assessment of the nutritional demands and hypermetabolic response of trauma, surgery, organ failure, burns, AIDS, and neoplastic disease. Examines specialized nutritional support and substrate requirements in the acute care setting. Prerequisite: NUTR 562, or permission of instructor. Offered: S.

NUTR 564 Management of Nutrition Services (4) Bruemmer Policy and administrative issues that impact delivery of nutrition services in health care environments. Topics include organization behavior, productivity, financial environments, clinical management, and human resources. Offered: odd years; S.
NUTR 590 Special Topics in Nutritional Science (1-4, max. 4) Examines emerging issues in nutrition. Reviews the evidence and potential policy implications. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSpS.

NUTR 595 Nutritional Sciences Master's Practicum (1-12, max. 12) Peck Supervised practice experience providing students an opportunity to learn how nutritional sciences are applied to public health settings and in the formulation and application of public health policy. Credit/no credit only. Prerequisite: HSERV 511; NUTR 531; EPI 511; NUTR 520; 521; 522. Offered: AWSpS.

NUTR 600 Independent Study or Research (*) Offered: AWSpS.

NUTR 700 Master's Thesis (*) Offered: AWSpS.

NUTR 800 Doctoral Dissertation (*) Credit/no credit only. Offered: AWSpS.

Quantitative Ecology and Resource Management

QERM 502 Statistical Consulting for the Life Sciences (1-4) Conquest Consulting experience in data analysis, applied statistics, experimental design, parameter estimation, and sampling. Student provides consultation services to students and faculty. Students spend one classroom hour per week under faculty supervision discussing problems encountered. Prerequisite: QERM 482, QERM 483, STAT 421, STAT 423, or BIOST 514, BIOST 515, or equivalents, and permission of instructor. Offered: W.

QERM 514 Analysis of Ecological and Environmental Data I (4) Conquest Overview of generalized linear models (GLMs), their use in forestry, fisheries, wildlife ecology, and environmental monitoring. Analysis of the statistical tests that fall under GLMS: chi-square tests on contingency tables, t-tests, analysis of variances, etc. Statistical software S+/R used throughout. Offered: Sp.

QERM 521 Scientific Method in Resource Management (4) Ford Describes process of scientific discovery and strategies used for problems in ecology and natural resources management. Relationships between growth and use of objective knowledge in natural resources management is explored through case studies.

QERM 550 Ecological Modeling and Spatial Analysis (5) Ford Describes the principles of ecological modeling, and theoretical and methodological issues involved in their design and implementation. Emphasizes the analysis of spatial processes and how such analyses are used in developing ecological models. Students make and analyze a spatial process and/or construct a model of their own choice. Offered: W.

QERM 597 Seminar in Quantitative Ecology (2) Current topics in quantitative ecology and resource management. Fisheries, forestry, and marine resources. Offered: ASP.

QERM 598 Special Topics in Quantitative Resource Management (1-3, max. 12) Population and community ecology, systems ecology, and physical processes in ecosystems. Prerequisite: permission of instructor.

QERM 599 Research in Quantitative Resource Management and Ecology (*, max. 12) Topics can be theoretical in nature or combined theory and experiment. Research might be a prelude to thesis or dissertation research. Credit/no credit only.

QERM 600 Independent Study or Research (*)

QERM 700 Master’s Thesis (*)

QERM 800 Doctoral Dissertation (*)

Interdisciplinary Undergraduate Programs

Program on the Environment

ENVR 100 Environmental Studies:
Interdisciplinary Foundations (5) I&S/NW Introduces the interdisciplinary approach to environmental studies. Examines the ethical, political, social and scientific dimensions of current and historical environmental issues, at the local and global scale. First in a three course sequence required of Environmental Studies majors. Offered: ASP.

ENVR 150 Orientation to Environmental Studies (2) Broad overview of environmental studies. Faculty members and professionals from outside the University identify opportunities for study and work in the field and offer suggestions for optimal academic preparation. Strong emphasis on class participation and experiential learning.

ENVR 200 Environmental Studies:
Communication and Research (5) I&S Focuses on reading, writing, presentation, and critical analysis of written material, in an interdisciplinary context of environmental problems. Develops proficiency in use of bibliographic databases, scholarly journals, and the Internet as research tools. Second in three course series required of Environmental Studies majors. Prerequisite: ENVR 100. Offered: Wsp.

ENVR 210 Introduction to Environmental Modeling (5) NW,QSR Introduction to the use of computer modeling software in environmental policy and decision making. In weekly computer lab meetings, students use established programs to analyze the outcomes of management strategies and policy decisions relating to topics such as conservation of endangered species, climate change, and deforestation. Offered: jointly with Q SCI 210.

ENVR 220 Urban Ecology (5) I&S/NW Examines nature-society interactions in urban settings. Drivers, patterns, processes, impacts and consequences of urban and urbanizing ecosystems. Presents the state of our knowledge of urban ecology in its interdisciplinary format. Offered: W.

ENVR 215 Earth, Air, Water: The Human Context (5) NW Rhines Lab-based introduction to Earth’s environment, primarily for non-scientists: energy, atmosphere, ocean, and biosphere stability. Beginning from basic science, growing toward impacts and implications; e.g., study of the sun’s energy spectrum and greenhouse effect, construction of solar box cookers, study of energy profiles of developing countries. Offered: Sp.

ENVR 235 Introduction to Environmental Economics (5) I&S/NW Introduces non-economic majors to environmental and natural resource economics. Discussion of fundamental economic concepts, including markets and private property. Students learn basic tools used in the economic assessment of environmental problems and apply these methods to key environmental issues. Offered: jointly with ECON 235/ESRM 235.

Quaternary Sciences

QUAT 417 Environmental Change in the Glacial Ages (3) NW Porter Physical, biological evidence of climatic change during Quaternary Period; emphasizing stratigraphy, chronology, impact of alternating glacial/interglacial cycles on earth’s terrestrial, marine environments. Theories on causes of climatic variation. Offered: jointly with ESS 433.

QUAT 501 Seminar/Conference in Quaternary Environments (1, max. 6) Interdisciplinary seminar or conference in the changing natural environments of the Quaternary Period, with emphasis on climatic changes and their effects. Speakers from the University and elsewhere present lectures on their specialties, followed by discussion. Credit/no credit only.

QUAT 502 Interdisciplinary Quaternary Investigations (2, max. 6) Research course for interdisciplinary investigation of Quaternary problems. Student attends sessions of QUAT 501 and pursues a problem-oriented case study concurrently under faculty direction. Required paper on case study. Credit/no credit only. Prerequisite: graduate standing.

QUAT 504 Special Topics in Quaternary Sciences (1-3, max. 3) Environments and climate changes of past two million years (Quaternary Period) in context of modern surface processes, including historical changes, prehistorical environments of postglacial period, and Ice Age events. Provides scientific perspective on scale of modern and man-made environmental changes, including those of climate, in context of recent earth history. Credit/no credit only. Prerequisite: background courses in earth sciences and ecology.
ENVIR 243 Environmental Ethics (5) I&S Clatterbaugh, Coburn, Woody Focuses on some of the philosophical questions that arise in connection with environmental studies. Topics to be considered include: the ideological roots of current issues, values and the natural world, public policy and risk assessment, intergenerational justice, and social change. Offered: jointly with PHIL 243.

ENVIR 296 Study Abroad? Environmental Studies (1-15, max. 15) Environmental studies course taken through an approved study abroad program, for which there are no direct UW equivalents. Credit does not apply to major requirements without approval.

ENVIR 300 Environmental Studies: Synthesis and Application (5) I&S/NW Multi-scale case studies of socially and scientifically complex environmental problems, including how the Earth works as a biogeochemical system, ecological principles, human health, energy, and global change. Emphasizes quantitative environmental analysis. Third in a required three course series of Environmental Studies majors. Prerequisite: ENVIR 200; recommended: ENVIR major foundational courses. Offered: WSp.

ENVIR 313 Environmental Earth Science (5) NW Swanson Analysis of geologic constraints upon human activity and the environmental consequences of such activity. Topics include hillslope processes, fluvial and groundwater processes, earthquake and volcanic hazards, and environmental aspects of deforestation and atmospheric pollution. Prerequisite: either ESS 101, ESS 210, ESS 211, GEOL 101, GEOL 201, or GEOL 205. Offered: jointly with ESS 315; A.

ENVIR 330 Climate Change Impacts on Marine Ecosystems (5) NW Links the physics of climate to marine ecosystem processes, exploring both observed climate impacts from the past and projected ecosystem changes due to human-caused climate change in the future. Case studies include polar, sub-artic, temperate, tropical and upwelling ecosystems, and ocean-acidification and its projected impacts. Required: high school or college physics and algebra with a basic understanding of Newton’s laws and the ability to comprehend and construct vector diagrams. Offered: jointly with FISH 330.

ENVIR 341 Energy and Environment (3) NW Malte Energy use. Fossil energy conversion. Oil, gas, coal resources. Air impacts. Nuclear energy principles, reactors, fuel cycle. Prerequisite: either MATH 112, MATH 124, or Q SCI 291; either CHEM 120, CHEM 142, PHYS 114, or PHYS 121. Offered: jointly with M E 341/CHM E 341; A.

ENVIR 350 Independent Fieldwork (1-3, max. 5) Fieldwork, coursework, or other learning experience conducted off-campus, but supervised by UW faculty. 1 academic credit for 30 hours of environment-related work per quarter. Credit/no credit only.

ENVIR 360 Environmental Norms in International Politics (5) I&S Ingebritsen Surveys development of international environmental consciousness from 1960s to present. Models of "green development": ways in which norms for resource use have entered global politics. Patterns of state compliance with international environmental agreements, and why states fail short of meeting their international obligations. Offered: jointly with SCAND 350/SIS 350.

ENVIR 362 Introduction to Restoration Ecology (5) I&S/NW Malte An introduction to ecological restoration of damaged ecosystems. Examines the philosophical base of restoration as well as the social, biological and political forces that impact the success of any restoration project. Includes lectures, readings, case studies and field trips. Offered: jointly with ESRM 362; A.

ENVIR 371 Anthropology of Development (5) I&S/ NW Sivaramakrishnan Development refers to social, economic, cultural, political transformations viewed as progress. Studied from anthropological perspectives. Historical, social context for contemporary ideas of development. Role of development in promoting national cultures. Impact of development on individual citizenship, families, rural-urban relations, workers, business, environment. Prerequisite: one 200-level ANTH course. Offered: jointly with ANTH 371.

ENVIR 379 Environmental Sociology (5) I&S/ NW Lee Social processes by which environmental conditions are transformed into environmental problems; scientific claims, popularization of science, issue-framing, problem-amplification, economic opportunism, and institutional sponsorship. Examination of social constructs such as ecosystem, community, and free-market economy. Use of human ecology to assess whether the current framing of environmental problems promotes ecological adaptability. Offered: jointly with ESRM 371/SOC 379; WS.

ENVIR 380 Study Abroad: Comparative International Perspectives on Cities and the Environment (1/3, max. 3) I&S/NW Malte An interdisciplinary approach to integrating urban and environmental issues in two or more world cities. Includes site visits and interactions with foreign scholars and practitioners. Topics may include coastal development, transportation, parks, marine conservation, indigenous cultures, environmental planning, gentrification, urban governance, and watershed management. Offered: jointly with TEST 390/T UR 390.

ENVIR 384 Global Environmental Politics (5) I&S Examines the globalization of environmental problems, including climate change, ozone depletion, and loss of biodiversity, as well as the globalization of political responses to these problems within the framework of globalization as set of interlinked economic, technological, cultural and political processes. Offered: jointly with POL S 384.

ENVIR 415 Sustainability and Design for Environment (3) Cooper Analysis and design of technology systems within the context of the environment, economy, and society. Applies the concepts of resource conservation, pollution prevention, life cycle assessment, and extended product responsibility. Examines the practice, opportunities, and role of engineering, management, and public policy. Offered: jointly with CEE 495/M E 415; S.

ENVIR 416 Ethics and Climate Change (5) I&S Gardiner Critical examination of the ethical issues surrounding climate change. Prerequisite: either one philosophy or one environmental studies course. Offered: jointly with PHIL 416.

ENVIR 417 Advanced Topics in Environmental Philosophy (5) I&S Gardiner, Light Critical examination of issues in environmental philosophy. Topics vary. Prerequisite: one philosophy course. Offered: jointly with PHIL 417.

ENVIR 418 Communications and the Environment (5) I&S Examines the role of mass media in the resolution of environmental problems. Topics include strengths and weaknesses of media coverage, use of media by environmental groups and government agencies, media effects on public opinion, and mass communication and social movements. Offered: jointly with COM 418.

ENVIR 433 Environmental Degradation in the Tropics (5) I&S/NW Considers theories and controversies of environmental degradation in the tropics, ecological and social case studies of Central American rain forests and Southeast Asian coral reefs, and implications of environmental management techniques. Offered: jointly with SIS 433/SM 433.

ENVIR 439 Attaining a Sustainable Society (1/3, max. 3) I&S/NW Harr Discusses diverse environmental issues, the importance of all areas of scholarship to evaluating environmental challenges, and the connections between the past and the future, to reveal integrative approaches to protect the long-term interests of human society. Offered: jointly with FISH 439; A.

ENVIR 442 Renewable Energy (4) NW Malte Introduction to renewable energy. Principles and practices: solar, wind, water, and biomass energy conversion. Prerequisite: either MATH 112, MATH 124, or Q SCI 291; either CHEM 120, CHEM 142, PHYS 115, or PHYS 122. Offered: jointly with CHEM E 442/M E 442.

ENVIR 450 Special Topics in Environmental Studies (1-5, max. 15) Format may range from seminar/discussion to formal lectures to laboratory or modeling work.

ENVIR 451 Comparative Historical and Social Ecology of the Tropics (5) I&S Sivaramakrishnan Historical and social aspects of tropical environmental change. Comparative analysis of resource management, conservation, and environmental regulation issues in Asia, Africa, and Latin America from cultural and political economic perspectives. Special focus on issues of state policy, expert knowledge, social conflict, and international politics. Prerequisite: ANTH 210. Offered: jointly with ANTH 451.

ENVIR 460 Institutionalizing Sustainable Ecological Practices. (5) I&S/NW Lee Introduction to how sustainability and
conservation are possible. Case studies of successful institutionalization of sustainable ecological functions, including curbside and biosolids recycling, ecological restoration, biomediare, sustainable wood production, and product certification. Emphasis on individual student projects. Offered: jointly with ESC 460; Sp.

ENVIR 462 Restoration Ecology Capstone: Introduction of a three-course capstone sequence in restoration ecology. Students review and assess project plans and installations. Class meets with members of previous capstone classes to review their projects. Offered: jointly with ESRM/TESC/BES 462.

ENVIR 463 Restoration Ecology Capstone: Proposal and Plan (3) NW Student teams prepare proposals in response to requests for proposals (RFPs) from actual clients. Clients may be governments, non-profit organizations, and others. Upon acceptance of the proposal, teams prepare restoration plans. Prerequisite: ENVR 462; jointly with ESRM/TESC/BES 463.

ENVIR 464 Restoration Ecology Capstone: Field Site Restoration (5) NW Teams take a restoration plan developed in ESRM 463 and complete the installation. Team participation may include supervision of volunteers. Teams prepare management guidelines for the client and conduct a training class for their use. Prerequisite: ENVIR 463. Offered: jointly with ESRM/TESC/BES 464.

ENVIR 474 Problem Analysis in Urban Ecology (5) I&S/NW Alberti, Bradley, Hill, Marzluff, Ryan, ZumBrunnen Investigates pressing local issues in urban ecology and develops each into a researchable project proposal. Examines and evaluates how different disciplines study environmental issues, explores criteria for conducting and evaluating quality research, develops skills in problem formulation, and sharpens proposal writing skills. Offered: jointly with GEOG 466/CFR 474; A.

ENVIR 475 Environmental Impacts of Small Scale Societies (5) I&S/NW Grayson, Smith Examines environmental impacts (positive and negative) among prehistoric and historic/ethnographic small-scale (hunter-gatherer and horticultural) societies worldwide, and debates these impacts, within a theoretical framework provided by evolutionary ecology and biogeography. Offered: jointly with BIO A 475.

ENVIR 476 Introduction to Environmental Law and Process (3) I&S Bryant, Hershman Use and application of key statutes in marine living resources management. Overview of administrative law and process. Basic legal research, reading, and briefing selected judicial opinions. Participatory case study component. Designed for non-law graduate and advanced undergraduate students. Offered: jointly with SMA 476; A.

ENVIR 477 Marine Conservation (3) NW Parish Terrestrially based concepts of conservation biology applied to marine systems: human activities affecting the marine environment including fishing and pollution, influence of legal and cultural frameworks, and ecosystem management. Prerequisite: either BIOL 102, BIOL 162, BIOL 180, or BIOL 203. Offered: jointly with BIOL 477; W.

ENVIR 478 Topics in Sustainable Fisheries (3, max. 9) Alberti, Parish Series featuring local, national and internationally known speakers in fisheries management and conservation. Case studies. Conservation/ restoration in practice. Pre-seminar discussion section focusing on select readings. Final paper. Topics may include harvest management, whaling, by-catch, salmon, marine protected areas, introduced species, citizen action, co-management, and marine ethics. Offered: jointly with FISH 478/BIOL 478; odd years; W.

ENVIR 486 Problem Analysis in Urban Ecology (5) NW Alberti, Bradley, Hill, Marzluff, Ryan, ZumBrunnen Investigates pressing local issues in urban ecology and develops each into a researchable project proposal. Examines and evaluates how different disciplines study environmental issues, explores criteria for conducting and evaluating quality research, develops skills in problem formulation, and sharpens proposal writing skills. Offered: jointly with ESRM 474/GEOG 498/URBDP 443; A.

ENVIR 487 Applied Theory and Methods in Urban Ecology (5) I&S/NW Alberti, Bradley, Hill, Marzluff, Ryan, ZumBrunnen Discuss broad perspectives on urban ecology and how to analyze data relevant to urban ecology problems. Students write objectives and methods for a selected urban ecology problem that critiques different methodological approaches and reviews/synthesizes literature. Prerequisite: either ENVIR 486, CFR 474, or GEOG 486. Offered: jointly with CFR 475/GEOG 487; W.

ENVIR 488 Research in Urban Ecology (5) I&S/NW Alberti, Bradley, Hill, Marzluff, Ryan, ZumBrunnen Teams analyze, present, and begin to interpret data that is relevant to addressing issues in urban ecology. Write and orally present revised objectives and methods sections of interdisciplinary project and present results section. Prerequisite: either ENVIR 486, CFR 475, or GEOG 487. Offered: jointly with CFR 476/GEOG 488; Sp.

ENVIR 490 Pre-Capstone Seminar (2) Critique readings on environmental education and applied environmental work. Define a capstone experience based on personal interests and skills and complete a learning contract and a contextual bibliography for ENVIR 491. Recommended: 15 credits of ENVIR 201/202/203. Offered: Asp.

ENVIR 491 Capstone Experience (2-8, max. 8) Capstone experiences, arranged during ENVIR 490, may include internships and other applied environmental work, directed research on environmental topics, or team efforts. Credit/no credit only. Prerequisite: ENVIR 490. Offered: AWSpS.

ENVIR 492 Post-Capstone Seminar (3) Build writing skills around course readings and discussion. Complete three final products: a capstone analysis paper summarizing and contextualizing work in ENVIR 491; an integrative essay reflecting on academic and/or external practitioners' contributions; and a formal capstone presentation. Prerequisite: ENVIR 491. Offered: Asp.

ENVIR 496 Study Abroad -- Advanced Environmental Studies (1-15, max. 15) Environmental Studies course taken through an approved study abroad program for which there are no direct UW equivalents. Credit does not apply to major requirements without approval.

ENVIR 497 Seminar in Environmental Studies (1-3, max. 6) Intensive and advanced reading and discussion of selected works in interdisciplinary environmental studies. Credit/No credit only. Offered: AWSpS.

ENVIR 498 Independent Study (1-5, max. 5) Independent reading and/or research. Limited to majors and minors in Environmental Studies.

ENVIR 499 Undergraduate Research (1-15, max. 15) Undergraduate research in Environmental Studies. Offered: AWSpS.

ENVIR 500 Graduate Seminar in Environmental Studies (1-5, max. 15) Exploration of multidisciplinary themes in environmental studies. Topics vary.

ENVIR 501 Graduate Seminar in Environmental Management (1-5, max. 15) Addresses a contemporary interdisciplinary issue in environmental management by integrating the perspectives and theories of science/technology, public policy, and business.Format emphasizes interactive, hands-on approaches to problem solving, with visiting lectures by academic and/or external practitioners.

ENVIR 502 Business Strategy and the Natural Environment (4) Applies economic and business principles (marketing, accounting, operations) to understand interactions between business and the natural environment and how environmental issues influence business strategy. Theory and case studies explore strategies that both respect and seek competitive advantage from firms' interactions with the environment.

ENVIR 503 Role of Scientific Information in Environmental Decisions (3) Examines how science contributes to decisions that affect the natural environment: how science and scientists help frame debates and decisions; how scientific findings are incorporated into decision making processes; and how scientists and nonscientists deal with uncertainty.

ENVIR 511 Environmental Management -- Keystone Project I (2) Interdisciplinary project teams address regional environmental issues. May include working with external community partner agency. Environmental Management Certificate students only.

ENVIR 512 Environmental Management -- Keystone Project II (3) Interdisciplinary project teams address regional environmental issues. May include working with external community partner agency. Continuation of projects from autumn quarter. Prerequisite: ENVIR 511.

ENVIR 513 Environmental Management -- Keystone Project III (3) Interdisciplinary project teams address regional environmental issues. May include working with external community partner agency. Continuation of projects from winter quarter. Prerequisite: ENVIR 512.
ENVIR 535 Foresight in Science and Technology: Choices and Consequences (3) Examination of the foresight (or lack of it) with which we practice science and use technology. Contrasts potential risks of various choices with potential benefits. Credit/no credit only. Offered: jointly with PHYS 535/PHIL 501.

ENVIR 550 Global Commercialization of Environmental Technologies (4) Students work on faculty-supervised interdisciplinary teams (with students from business, sciences/engineering, and public policy) developing business plans for commercializing environmentally friendly technologies around the world. The projects involve collaborating with the EPA’s Environmental Technology Commercialization Center, with Battelle Labs, and with Puget Sound businesses. Offered: jointly with BUS 550.

ENVIR 585 Climate Impacts on the Pacific Northwest (4) Managerial knowledge of past/future patterns of climate to improve Pacific Northwest resource management. Topics include: the predictability of natural/human-caused climate changes; past societal reactions to climate impacts on water, fish, forest, and coastal resources; how climate and public policies interact to affect ecosystems and society. Offered: jointly with ATM S/ESS/SMA 585; Sp.

ENVIR 600 Independent Study or Research (1-5) Independent reading and research. Limited to students enrolled in the Program on the Environment’s graduate certificate programs.

Interschool or Intercollege Programs

Bioengineering

BIOEN 201 Bioengineering Tools (2) Thomas Introduces bioengineering; laboratory safety, acquisition and analysis, presentation tools for biomedical applications. Prerequisite: MATH 126; PHYS 121; corequisite: CSE 142; PHYS 122. Offered: W.

BIOEN 290 Introduction to Biomechanics (1) Verdugo Lectures on the various aspects of biomechanical studies and practice. Credit/no credit only. Offered: ASp.

BIOEN 301 Bioengineering Systems Analysis (4) Lewis, Neils, Pun Investigates static and dynamic problems that are found in medicine and biology. Exposes real biomedical applications of first- and second-order differential equations. Analyzes current biomedical and biomedical problems and make measurements of the systems that present those problems. Weekly laboratories. Prerequisite: BIOEN 201; either BIOL 180 or BIOL 201; CSE 142; PHYS 122; corequisite: either BIOL 200 or BIOL 202; MATH 307. Offered: Sp.

BIOEN 302 Introduction to Biomedical Instrumentation (4) Folch, Introduces the theory of measurement and the practicalities of measurement of biological variables. Basic amplifier theory, discussion of noise in physical systems and its reduction. Uses actuators to test biomedical systems. Prerequisite: BIOEN 301; CSE 142; E E 215. Offered: A.

BIOEN 303 Bioengineering Signal Processing (4) Gao, Lu, Neils Introduces signal processing techniques necessary to record and analyze medical and biological data. Uses transform calculus to analyze differential equations and develop approximations to functions. Introduces sampling and applies it to biological data. Prerequisite: BIOEN 302; BIOEN 304. Offered: W.

BIOEN 304 Introduction to the Biomechanics Analysis of Physiology I (4) Sauro Introduction of engineering analysis of physiological systems. Course covers cellular function through its control by the central nervous system. Prerequisite: BIOEN 201; CSE 142. Offered: A.

BIOEN 305 Introduction to the Bioengineering Analysis of Physiology II (4) Remick Introduction to the cardiovascular system. Explores the cardiovascular system as an engineering system in which the heart is a pump, and the load and distribution of blood to organs on the heart depend on the demands of the system. Introduces principles of fluid transport. Prerequisite: BIOEN 202; BIOEN 304; corequisite: either STAT 390 or IND E 315. Offered: W.

BIOEN 357 Introduction to Molecular Bioengineering (4) Broyers Introduces molecular bioengineering. Molecules as building blocks to engineer surfaces. Molecular therapeutics, drug delivery, diagnosis and biomaterials. Examines design principles for biomedical materials and devices. Prerequisite: either BIOL 200 or BIOL 202; BIOEN 303; BIOEN 305; recommended: either CHEM 223, CHEM 237, or CHEM 335. Offered: Sp.

BIOEN 420 Medical Imaging (4) Yuan Various medical imaging modalities (x-rays, CT, MRI, ultrasound, PET, SPECT, etc.) and their applications in medicine and biology. Extends basic concepts of signal processing (BIOEN 303) to the two and three dimensions relevant to imaging physics, image reconstruction, image processing, and visualization. Prerequisite: BIOEN 303; MATH 308; CSE 143. Offered: A.

BIOEN 440 Introduction to Bioinformatics (4) Sanders Presents the mechanical behavior of tissues in the body and the application to design of prostheses. Tissues studies include bone, skin, fascia, ligaments, tendons, heart valves, and blood vessels. Discussion of the structure of these tissues and their mechanical response to different loading configurations. An important part of the class is a final project. Offered: jointly with M E 445; Sp.

BIOEN 455 BioMEMS (4) Folch Introduction to BioMEMS. State-of-the-art techniques in patterning biomolecules, machining three-dimensional microstructures and building microfluidic devices. Various biomedical problems that can be addressed with microfabrication technology and the engineering challenges associated with it. Biweekly labs. Prerequisite: BIOEN 303. Offered: W.

BIOEN 467 Biochemical Engineering (3) Banerjee Application of basic chemical engineering principles to biochemical and biological process industries such as fermentation, enzyme technology, and biological waste treatment. Rapid overview of relevant microbiology, biochemistry, and molecular genetics. Design and analysis of biological reactors and product recovery operations. Prerequisite: either CHEM 223 with CHEM E 340 or either CHEM 237 or CHEM 335; recommended: CHEM E 465. Offered: jointly with CHEM E 467; Sp.

BIOEN 481 Bioengineering Design and Capstone Principles (4) Vaezy Teaches design principles in bioengineering and guides the development of design-based senior capstone projects. Prerequisite: BIOEN 303; BIOEN 305. Offered: Sp.

BIOEN 482 Bioengineering Capstone Project (2-6) Independent senior design project. Prerequisite: BIOEN 357; BIOEN 481; corequisite: STAT 390. Offered: AWSpS.

BIOEN 485 Computational Bioengineering (4) Thomas, Vicini Introduction to computational, mathematical and statistical approaches to the analysis of biological systems, including systems and control theory, molecular models and bioinformatics. Lectures and laboratory sessions emphasize practical problems in kinetics, metabolism and genomics. Prerequisite: CSE 143; BIOEN 305; MATH 308. Offered: A.

BIOEN 490 Engineering Materials for Biomedical Applications (3) Horbett Combined application of principles of physical chemistry and biochemistry, materials engineering, to biomedical products and problems. Applications include implants and medical devices, drug delivery systems, cell culture processes, diagnostics, and bioseparations. Offered: jointly with CHEM E 490; A.

BIOEN 491 Controlled-Release Systems: Principles and Applications (3) Pun Mechanisms for controlled release of active agents and the development of useful drug delivery systems for this purpose. Release mechanisms considered include diffusive, convective, and erosive driving forces. Delivery routes include topical, oral and in vivo. Some special case studies covered in detail. Offered: jointly with CHEM E 491; W.

BIOEN 492 Surface Analysis (3) Ratner Understanding of solid surfaces for research and development in microelectronics, catalysis, adhesion, biomaterials, science wear, and corrosion science. Newer methods available to study surfaces of materials. Electron emission spectroscopies (ESCA, Auger); ion scattering, ion spectroscopic, photon spectroscopic, and thermodynamic methods. Offered: jointly with CHEM E 458; Sp.

BIOEN 497 Bioengineering Education Outreach (1-2, max. 6) Work with K-12 schools.
BIOEN 499 Special Projects (2-6, max. 50)
Individually supervised projects under the supervision of an instructor. Offered: AWSpS.

BIOEN 510 Bioengineering Seminars (1)
Introductory seminar for new students; review of departmental research.

BIOEN 511 Biometrics Seminar (1) Hoffmann, Horbett, Ratner Presentation of student research results. Credit/No credit only. Prerequisite: permission of instructor. Offered: jointly with CHEM E 511.

BIOEN 513 Current Topics in Cardiac Physiology (1, max. 3) Regnier Current research in cardiac physiology. Student presentation and discussions of current research methodologies.

BIOEN 518 Nanotechnology Seminar (1, max. 18) Emphasizes frontier research in nanoscience and nanotechnology and on interfacial interactions within the nanotechnology community. Presented by experts in the field, with most being from other institutions. Prerequisite: graduate standing and permission of instructor. Credit/No Credit only. Offered: jointly with CHEM 597; AWSpS.

BIOEN 522 Biomechanics of Soft Tissue (3) Sanders Applies soft tissue biomechanics to medical research. Develops specific biomechanical questions and experiments to address those aims or hypotheses.

BIOEN 542 Computer Simulation in Biology (3) Bassingthwaighte, Graham Introduction to mathematical modeling of biological phenomena. Tutorial text explains how to derive equations for simple models and apply them to generate simulation data. Application topics include kinetics of biomolecular reactions and enzyme saturation, membrane transport, organisal predation, competition and growth, compartmental models, distributed media, physiological control systems, probabilistic models. Prerequisite: P BIO 405 and P BIO 406 or equivalent or permission of instructor.

BIOEN 555 Cellular and Molecular Biomechanics and Cell Function (3) Pollack Examines basic mechanisms of cell function with emphasis on motion. Includes principles of physics and chemistry, building to organelle structure and function; gel-like nature of cell and critical role of cell water; streaming, motility, contraction, mitosis, transport, and other cell basics.

BIOEN 560 Ultrasound in Bioengineering (4) Vaezy Fundamentals of ultrasonic generation, formation, resolution of wavefronts of absorption, scattering, and transmission. Convolutional and new methodology. (A, B, T-M mode, imaging, Doppler, tissue characterization, and nonlinear effects.) Prerequisite: E E/M E 525 for non-bioengineering students or permission of instructor.

BIOEN 561 Biomedical Optics (4) Advanced theories of optical and spectroscopic measurement with emphasis on biomedical laser applications. Laser principles, instrumentation, and current practice in various biomedical uses, covering such areas as medicine, surgery, and biology. Prerequisite: BIOEN 302 or equivalent, or permission of instructor.

BIOEN 565 Nuclear Magnetic Resonance in Biomedicine (2) Basic physics of nuclear magnetic resonance (NMR) imaging and spectroscopy are presented. Research applications of NMR in physiology and biochemistry are reviewed with emphasis on the brain. Grade based on written tests and small research paper. Prerequisite: permission of instructor. Offered: jointly with RADYG 550.

BIOEN 568 Image-Processing Computer Systems (4) Kim Components of digital computer systems. Two-dimensional filtering and optimal filter design as well as basic image-processing operations. Selected advanced image-processing topics introduced. Individual student project. Prerequisite: permission of instructor. Offered: jointly with E E 568.

BIOEN 571 Polymeric Materials (3) B. Ratner Relationships between configuration, conformation, molecular structure, properties of polymeric materials. Concepts relevant to tailoring polymer molecules and microstructures for specific applications. Interactions between polymers and the biological environment. Characterization and processing techniques relevant to polymeric materials. Prerequisite: one semester or two quarters of organic chemistry. Offered: jointly with MISE 571.

BIOEN 573 Biosensors and Biomedical Sensing (3) Yager In-depth overview of the principal types of biosensors. Topics include: how biological molecules are used in sensing, how the sensors operate, how different sensors compare, under what circumstances sensors can be useful, and the applicability of sensors to biomedical sensing. Prerequisite: BIOEN 436 or permission of instructor.

BIOEN 576 Laboratory Techniques in Protein Engineering (4) Stayton Practical introduction to fundamentals of recombinant DNA technology and protein engineering. Gene design, bacterial molecular biology, genetic engineering strategy. Laboratory project focused on making site-directed protein mutations. Techniques include the Polymerase Chain Reaction, DNA sequencing, DNA cutting/ligating, protein expression. Prerequisite: background in biochemistry or molecular biology or consent of instructor.

BIOEN 577 Cell and Protein Reaction with Foreign Materials (3) Horbett Major, controversial issues in which cell and protein interactions with foreign materials affect the biocompatibility of biomaterials. Description of the phenomenology and mechanisms of protein adsorption, mammalian cell adhesion, in particular, receptor biology and of methods used to study these phenomena. Surface properties of materials discussed in context of the course. Prerequisite: permission of instructor.

BIOEN 578 Biomembranes (3) Yager Develops an understanding of the molecular principles that underlie the self-assembly of surfactants into natural and model membrane, in particular, on the relationship between the chemical structure of lipid molecules and the three-dimensional aggregates that they form in water.

BIOEN 579 Host Response to Biomaterials (3) Giachelli Basic cell and molecular biology of the pathologies associated with biomaterial implantation that limit bioprosthesis use, including inflammation, infection, acute and chronic inflammation, wound healing and fibrosis, and structural alterations. Major methods for histological analysis of retrieved implants. Prerequisite: general biology, BIOEN 490 (may be taken concurrently) or permission of instructor.

BIOEN 584 Computational and Integrative Bioengineering (4) Vicini Advanced computational, mathematical, and statistical approaches to the analysis of biological systems, including molecular models, time series, fractal systems, population kinetic analysis, and stochastic simulation. Lectures and laboratory sessions emphasize practical problem solving and analysis, metabolism, and genomics. Final project, written and oral reports. Prerequisite: BIOEN 485.

BIOEN 586 Tissue Engineering (3) Giachelli, Horbett Explores methods to restore or replace function in the cardiovascular, epithelial, urinary, nervous, skeletal, and other systems in the human body by use of constructs that contain living cells. Presents scaffold preparation, angiogenesis, and use of stem cells.

BIOEN 590 Advanced Topics in Biomedical Engineering (3) Horbett Major, controversial issues in the application of synthetic materials to medical problems. Blood compatibility, biodegradation, intraocular lenses, contact lenses, polyurethanes, biodegradation, protein adsorption, corrosion, bone fixation, new materials, artificial heart, medical device regulation. Prerequisite: BIOEN 490 or CHEM E 490. Offered: jointly with CHEM E 590.

BIOEN 592 Surface Analysis (3) B. Ratner Understanding of solid surfaces for research and development in microelectronics, catalysis, adhesion, biomaterials science, wear and corrosion science. Newer methods available to study surfaces of materials. Electron emission spectroscopies (ESCA, Auger); ion scattering, ion spectroscopic, photon spectroscopic, and thermodynamic methods. Offered: jointly with CHEM E 598.

BIOEN 595 Research Rotation(1-10, max. 30)
Research rotation in the laboratories of core or adjunct faculty in the Department of Bioengineering. Credit/No credit only. Offered: AWSpS.

BIOEN 599 Special Topics in Bioengineering (1-6, max. 15) Offered at a graduate level periodically by faculty members within the Department of Bioengineering; concerns areas
of research activities with current and topical interest to bioengineers. Prerequisite: under-
graduate or graduate courses (or equivalent) determined individually for each special topic.

**Global Health**

**G H 201 Newly Emerging Diseases in Public Health (2) NW** White Newly recognized and
emerging disease pose a major problem for public health. AIDS, hantavirus infections, Ebola
virus infections, and the role of bacterial infection in the causation of stomach ulcers are
examples of problems to be studied. Other timely diseases are presented in this lecture
discussion course. Offered: A.

**G H 401 Introduction to Global Health (1)**
Wade Addresses a variety of themes in global health which serve as a base for an introduc-
tory-level understanding of the field. Empha-
sizes the diverse, disciplinary perspectives on global health. Credit/no credit only. Offered: A.

**G H 402 Multidisciplinary Perspectives in Global Health (1)** Gonzales, Wade Presenters from a variety of disciplines discuss their experiences working on global health issues in resource-poor settings. Speakers illustrate how their work is influenced by communication, culture, economic and socio-political realities. Credit/no credit only. Offered: Sp.

**G H 500 Global Health Seminar (1, max. 6)** Explores issues relevant to global health; themes vary by quarter. Required course for Global Health MPH and Global Health Certificate students. Credit/no credit only. Offered: AWSpS.

**G H 501 Introduction to Global Health (1)**
Wade Addresses a variety of themes in global health which serve as a base for an introduc-
tory-level understanding of the field. Empha-
sizes the diverse, disciplinary perspectives on global health. Offered: A.

**G H 502 Multidisciplinary Perspectives in Global Health (1)** Gonzales, Wade Presenters from a variety of disciplines discuss their experiences working on global health issues in resource poor settings. Speakers illustrate how their work is influenced by communication, culture, economic and socio-political realities. Offered: Sp.

**G H 505 P-Advanced Global Health (2)** Kimball Prepares health profession students for work in developing countries. Includes health care delivery systems, political, social, and economic determinants of health, major global health issues, and personal well-being while abroad. Lecture and seminar format with guest speakers, student presentations, and discussion. Offered: jointly with MED 560; Sp.

**G H 511 Problems in International Health (4)**
Gloyd Explores social, political, economic, environmental determinants of developing countries’ health; traces development of societal responses to problems. Includes: origins of primary health care; child survival; traditional systems; population; water; sanitation; international agencies; impact of economic policies. Case study formulating pharmaceutical policy in a developing country. Offered: A.

**G H 514 Global Population Health (3)**
Bezruchka Looks at determinants of population health in different countries, to learn about the
constraints of typical public health and development paradigms. Topics include
colonialism, development and underdevelop-
ment, political economy, culture, health behaviors, hierarchy, health care and medical harm. Offered: Sp.

**G H 521 International Program Management and Evaluation (3)**
Downer, O’Malley Overview of the program planning cycle as applied to international program management. Uses case studies and application exercises to develop skills in designing assessment activities for program planning, development, testing, and implementing programmatic interventions; managing resources and people, monitoring activities; and evaluating program outcomes. Offered: W.

**G H 531 Research Methods in Developing Countries (3/4)**
Gloyd, Mock Simple, practical methodologies to obtain and validate information regarding health status and health services in developing countries. Usefulness, validity, limitation of vital records, health reports, household (and cluster) surveys, nutritional anthropometry, and qualitative methods discussed. Lectures, computer lab, and student participation in community-based survey. Offered: jointly with EPI 539; W.

**G H 532 Responsible Conduct of Interna-
tional Research (3)**
Farquhar Prepares international and U.S. students to develop research proposals, conduct international field research, and present scholarly work. Topics include proposal writing, human subjects protection, data management, peer review, scholarly integrity, responsible authorship, and grants and budget management. Open to graduate and non-matriculated students. Credit/ no credit only. Offered: jointly with EPI 586; A.

**G H 544 Maternal and Child Health in Developing Countries (3)**
Mercer Emphasizes critical health problems of women and children in developing countries in social, economic, and cultural contexts. Practical approaches to developing MCH programs shared via lecture/ discussions, exercises, and small group work. Students acquire skills in baseline assessment, setting objectives, planning and evaluating interventions, and involving communities. Offered: jointly with HSERV 544: W.

**G H 553 Reproductive Health, Population and Development (2)**
Povey Provides students with an introduction to demographic conditions in Third World countries and an understanding of the consequences of rapid population growth on health and the environment. The context and effectiveness of family planning programs is a major focus. Offered: A.

**G H 555 Nutrition in Developing Countries (3)**
Gorzstein Introduces issues of nutrition in developing countries, with an emphasis on the control and prevention of undernutrition and micronutrient deficiencies. Offered: jointly with NUTR 555; Sp.

**G H 561 Tropical Medicine (1)**
Buckner, Pottinger Intended for professional health science students interested in learning the pathophysiology, epidemiology, and clinical presentation of disease conditions that re more commonly seen in less-developed countries, resource-limited settings, or tropical climates, and how to diagnose, treat, and follow the resolution of these diseases with commonly
limited resources. Credit/no credit only. Offered: jointly with MED 561; Sp.

**G H 562 AIDS: A Multidisciplinary Approach (2)**
Farquhar Comprehensive overview of the public health, clinical, and laboratory aspects of human immunodeficiency virus (HIV) infection and disease. Topics include the pathogenesis, natural history, and management of HIV infections. The impact of HIV/AIDS on community and global health care and prospects for prevention and control. Credit/no credit only. Offered: jointly with EPI 530/MED 530; A.

**G H 565 Diseases of Public Health Impor-
tance and Strategies for their Control (3)**
Public Health perspective of major disease of national and global importance. Discussion of origins, establishment, progression, and pathogenesis of diseases. Importance of immunological, intercellular and external factors, and strategies of disease prevention. Requires a grounding in cellular and molecular biology, microbiology, and immunology. Prerequisite: permission of instructor. Offered: Jointly with PABIO 550.

**G H 566 Biochemistry and Genetics of Pathogens and Their Hosts (4)** Provides a strong foundation in biochemistry, molecular biology, and genetics for students interested in disease. Principles will be illustrated through examples focusing on pathogens, and infectious and non-infectious disease. Prerequisite: undergraduate level course work in molecular biology or biochemistry or permission of instructor. Offered: Jointly with PABIO 551.

**G H 590 Selected Topics in Global Health (1-
4, max. 12)** Focuses on topics relevant to global health. Offered: AWSpS.

**G H 592 Program Seminars (1-6, max. 6)** Addresses specific educational needs of students within the Department of Global Health. Prerequisite: permission of instructor. Offered: AWSp.

**G H 593 MPH Thesis Workshop (1)**
Hagopian Introduces students to the issues involved in conceptualizing and completing thesis projects and the various international health organizations and faculty members available as resources to projects. Prerequisite: first-year Global Health MPH students. Offered: AWSp

**G H 595 Master-fs Practicum (1-6, max. 6)** Supervised practice experience providing an opportunity to apply knowledge and skills in a setting of relevance to global health. Credit/no credit only. Prerequisite: permission of faculty advisor. Offered: AWSpS.

**G H 600 Independent Study or Research (*)**
Prerequisite: permission of instructor. Offered: AWSpS.
Quantitative Science

Q SCI 210 Introduction to Environmental Modeling (5) NW, QSR Introduction to the use of computer modeling software in environmental policy and decision making. In weekly computer lab meetings, students use established programs to analyze the outcomes of management strategies and policy decisions relating to topics such as conservation of endangered species, climate change, and deforestation. Offered: jointly with ENVIR 210.

Q SCI 291 Analysis for Biologists I (5) NW, QSR Introduction to differential calculus, emphasizing development of basic skills. Examples promote understanding of mathematicians and applications to modeling and solving biological problems. Topics include optimization and curve analysis. Prerequisite: either MATH 120, a minimum score of 2 on advanced placement test, or a minimum score of 67% on MATHPC placement test. Not available for credit to those who have completed MATH 124 with a 2.0 or higher. Offered: AWSp.

Q SCI 292 Analysis for Biologists II (5) NW, QSR Gallicci, Greulich, Johnson Introduction to integral calculus, emphasizing development of basic skills. Examples promote understanding of mathematicians and applications to modeling and solving biological problems. Topics include areas under curves, volumes, and differential equations. Prerequisite: minimum grade of .7 in Q SCI 291. Not available for credit to students who have completed MATH 125 with a 2.0 or higher. Offered: WS.$P.$

Q SCI 381 Introduction to Probability and Statistics (5) NW, QSR Applications to biological and natural resource problems stressing the formulation and interpretation of statistical tests. Random variables, expectations, variance, binomial, hypergeometric, Poisson, normal, chi-square, “t” and “F” distributions. Prerequisite: either MATH 120, MATH 124, MATH 125, MATH 144, or Q SCI 291 or a minimum score of 2 on advanced placement test, or a minimum score of 67% on MATHPC placement test. Offered: W.$P.$

Q SCI 458 Fisheries Stock Assessment (4) NW Hilborn Emphasizes quantitative analysis of fisheries data to determine how the fishery would respond to alternative management actions. Major topics include production models, stocks and recruitment, catch at age analysis, and formulation of harvest strategies. Recommended: either Q SCI 456 or FISH 456. Offered: jointly with FISH 458, Sp.

Q SCI 480 Sampling Theory for Biologists (3) NW Theory and applications of sampling finite populations including: simple random sampling, stratified random sampling, ratio estimates, regression estimates, systematic sampling, cluster sampling, sample size determinations, applications in fisheries and forestry. Other topics include sampling plant and animal populations, sampling distributions, estimation of parameters and statistical treatment of data. Prerequisite: Q SCI 482; recommended: Q SCI 483. Offered: jointly with STAT 480; odd years.

Q SCI 482 Statistical Inference in Applied Research I: Hypothesis Testing and Estimation for Ecologists and Resource Managers (5) NW Analysis of variance and covariance; chi square tests; nonparametric procedures multiple and curvilinear regression; experimental design and power of tests. Application to biological problems. Use of computer programs in standard statistical problems. Prerequisite: either STAT 311 or Q SCI 381. Offered: AW.

Q SCI 483 Statistical Inference in Applied Research II: Regression Analysis for Ecologists and Resource Managers (5) NW Analysis of linear regression models and introduction to multiple regression. Address models and model selection using generalized F-tests; residual analysis. Application to categorical, count, binomial, transformed variables. Introduction to matrix formation of regression models and applications. Prerequisite: either Q SCI 381 or Q SCI 482. Offered: W.

Q SCI 486 Experimental Design (3) NW Topics in analysis of variance and experimental designs: choice of designs, comparison of efficiency, power, sample size, pseudoreplication, factor structure. Prerequisite: Q SCI 482; recommended: Q SCI 483. Offered: jointly with STAT 486; even years.

Q SCI 497 Special Topics in Quantitative Science (1-15, max. 15) NW Topics not normally offered in regular curriculum. Format ranges from seminar/discussion, formal lectures, laboratory, or modeling work. Offered: AWSp.$P.$

Q SCI 498 Internship (1-15, max. 15) Internship experience with a public agency or private company, supervised and approved by a faculty member. Preparation of professional report reflecting on the experience is required. Credit/no credit only. Offered: AWSp.$P.$

Q SCI 499 Research Experience (1-15, max. 15) Special studies in quantitative ecology and resource management for which there is not sufficient demand to warrant the organization of regular courses. Credit/no credit only.

University Conjoint

UCONJ 100 Introduction to Health Professions (1) Garcia Opportunities in health professions. Information on educational requirements, professional/patient interaction, licensing, registering for practice in profession, salaries, and career opportunities.

UCONJ 290 Diversity Issues in the Health Care Environment (1-2, max. 2) I&S Introductio to the complexity of the issues surrounding culture and health, the interrelatedness of ethnic and cultural characteristics and health care access, health and health care concerns of specific communities, traditional and alternative health care practices, and community-based promotion and disease prevention programs.

UCONJ 410 Health in the Context of Italian Culture (5) While in Italy, participants study relationship between current health issues, contemporary Italian history, socio-cultural environment, and European Union; health status of vulnerable populations; characteristics of culture and health care system that promote healthy outcomes; differences between health behaviors and outcomes in Italy and US. Offered: A.

UCONJ 411 Psychology of Aging (3) Kyjak Focuses on developing the skills necessary for critically evaluating current psychological theories of aging, research findings in this area, and the implications of findings on the aging person. Special consideration given to the effects of socioeconomic, sex, and ethnic differences in the psychology of aging. Open to upper-division undergraduates and beginning graduate students interested in the field of gerontology.

UCONJ 412 The Family in Later Life (3) Focuses on issues affecting older persons and their families. Addresses the influence of family structures on influences on families; roles, rules for and function of family members; inter-generational relationships; economics, political, and social policy affecting family life; and cultural variations and scarce resources for older persons and their families.

UCONJ 413 Current Issues in Aging (3) Describes the population trends at work in the United States and other developed nations with significant societal implications for care and management of elders. Evaluates selected public policies related to aging. Gives students proficiency in using resources related to aging on the Internet. Evaluates alternative long-term care models.

UCONJ 420 Biological Safety Practices (1) Designed to provide a knowledge base for upper division health science students to participate effectively in community outreach programs for the prevention of sexually-transmitted diseases. Offered cooperatively by the departments of Pharmacy and Medicine.

UCONJ 440 Biological Aspects of Aging (3) Introductory course on aspects of the biology of human aging and of functional changes associated with normal aging and with those illnesses that may be present in the elderly. Focus on the relationship between changes in physical function, environment, and quality of life. Includes theoretical perspective on aging as well as the aging process in specific physiological systems. Designed for upper-level undergraduate students with an interest in aging.

UCONJ 442 Social and Cultural Aspects of Aging (3) Involves faculty members from the various social science fields examining the range and variation of relationships among age-linked attitudes and cultural values related to aging; the social and economic factors that influence the elderly in contemporary society; the effects of ethnic and sex differences in

567
sociocultural aging. Open to upper-division undergraduates and beginning graduate students interested in gerontology.

UCONJ 443 Interdisciplinary Seminar on Aging (1-6, max. 15) Borgatta Interdisciplinary examination of the contemporary theoretical literature on gerontology and long-term care. For upper-level undergraduate and graduate students with an interest in aging. Quarterly offerings available from the Institute on Aging.

UCONJ 444 Interdisciplinary Collaborative Teams in Health Care (1-5, max. 10) Course open to students in UW Health Sciences schools. Students function as an interdisciplinary learning group within a problem based learning framework. The primary goal of the course is to promote the development of interdisciplinary practice in the care of urban and rural underserved patient populations. Credit/no credit only.

UCONJ 445 Bioterrorism Awareness for Health Professionals (1) Provides content in bioterrorism for students in the health professions. First in a two-course interdisciplinary sequence focusing on awareness level training designed to enhance recognition of an injury of illness potentially arising as a result of exposure to biological and chemical agents. Credit/no credit.

UCONJ 446 Bioterrorism Preparedness and Response for Health Professionals (2, max. 6) Focuses on bioterrorism preparedness and response for health professionals. Includes planning, system, and policy issues with an emphasis on clinical relevance. Content compliments UCONJ 445 (not a prerequisite).

UCONJ 450 Health Care in the Underserved Community (1) Recommended for students who are working with underserved communities. Students learn about the underserved population served by the community health projects on campus with a focus on inter-professional patient care.

UCONJ 490 Social Sensitivity in Health Care (3) & S Multidisciplinary course for health professionals students. Health professionals' roles in dealing with social, cultural, and physical barriers to health of low-income groups and ethnic people of color. Personal involvement through field experiences and faculty drawn from affected communities as well as health sciences, social work schools. Credit/no credit only.

UCONJ 497 Health Care in a Rural Community (3) Critical analysis built upon concepts relative to interdisciplinary health-care delivery in a rural community. Students develop an organizational model for rural health care and study innovative ways of mobilizing community resources and support for a comprehensive rural health-care system. Pharmacy students, nurses, and other health professionals study application of theory in an appropriate clinical setting within the conceptual framework of each student's professional field.

UCONJ 500 Seminar in Interprofessional Collaboration (1-3, max. 7) Interdisciplinary teams composed of students and community members placed in diverse urban settings to address an identified community need by developing and implementing collaborative, community-based projects. Seminars emphasize interprofessional collaborative practice, intrapersonal understanding, intergroup process skills, organizational savvy, community awareness, and sociocultural sensitivity. Graduate School of Public Affairs. Offered: AWSp.

UCONJ 503 International Health (1) Wade Weekly seminar introduces students to issues and opportunities of participating in health care systems in other countries. Guest speakers bring many perspectives of international health care experiences. Class discussions help prepare students for international placements.

UCONJ 504 Advanced Interdisciplinary Case Studies in Global Health (3) Gorstein, Kurth, Shell-Duncan Uses actual multidisciplinary case studies to 1) analyze quantitative parameters of diseases, 2) contrast the descriptive and analytic approaches of health sciences, anthropology and nutritional sciences, 3) integrate diverse disciplinary perspectives into cohesive information, 4) organize class presentations, and 5) apply critical thinking in approaching complex health issues. Offered: Sp.

UCONJ 505 Professional Interpersonal Styles of Communication with Families to Enhance Health Outcomes (3) Complex communication processes evaluated and applied to the family as unit of interaction within the interdisciplinary context. Empirical based communication practices analyzed considering family variables adherence, satisfaction, health outcomes, and cost effectiveness. Engagement in experiential learning through challenging clinical scenarios. Emphasizes cultural competencies. Prerequisite: professional student or permission of instructor.

UCONJ 510 Integrating Arts in the Classroom (4) Prepares prospective elementary education teachers to understand and acquire arts literacy through a comprehensive approach to learning and teaching in and through the arts. Course is school and arts-site based, inclusive of multiple art forms. Based on comprehensive art principles, and project oriented. Credit/no credit only. Offered: Sp.

UCONJ 511 Issues in Home Health Care Delivery (3) Service delivery issues relevant to provision of health care services across the life span in the home setting. Home health care as an important part of the health care system. Individual and multidisciplinary practice of health care disciplines. Emphasis on research literature. Prerequisite: graduate student standing, upper division with permission of instructor.

UCONJ 512 Dynamics of Patient Management: Diabetes Mellitus (2) Analysis of advanced knowledge related to interdisciplinary management of diabetes. Commonalities and differences in provider approaches, recent research and its effect on management practices, collaborative communication, knowledge application. Brief interactive presentations, decision-making opportunities, discussion. Credit/no credit only. Prerequisite: graduate standing in pharmacy, dietetics, nursing; third- or fourth-year medical student; or permission of instructor.

UCONJ 515 Promoting Health Behavior for Individuals and Families (2/4, max. 4) Brandt, Jordan, Kieckhefer, Lewis, Solchany, Speier Practice-focused, evidence-based, theory-driven interventions strategies to promote healing and health behavior at selected points from birth to death. Relevant for clinicians from diverse health settings. Emphasis on clinical skill development including decision-making and outcome management applicable for individuals and families. Prerequisite: permission of instructor. Offered: Sp.

UCONJ 517 Interdisciplinary Clinical Research Methods Seminar (2) LeResche, Mitchell Introduction to clinical research methods, including selection of research questions, study design, measurement, data analysis and practical aspects of conducting research in clinical settings. Offered: Only for students from Health Sciences schools who are conducting research under the Multidisciplinary Predoctoral Clinical Research Program; CR/NC: S.

UCONJ 520 Molecular Biophysics Research Seminar (1) Parson A series of research seminars for faculty and students involved with the molecular biophysics program. Credit/no credit only.

UCONJ 524 Developmental Neurobiology (3) Raible, Reh, Roelink, Rubel Survey of contemporary issues in developmental neurobiology, including neurogenesis and differentiation; electrophysiological, morphological, and biochemical regulation of cellular phenotype; neuronal pathways and synaptic contacts; cellular and synaptic plasticity, and behavior. Examination of molecular biological, morphological, electrophysiological, and behavioral approaches. Prerequisite: background in neurophysiology, neuroanatomy, molecular neurobiology. Offered: Sp.

UCONJ 525 Overview of Faculty Research in Neurobiology (1) Reviews research topics currently being studied in neurobiology. Student preparation consists of reading pertinent articles published on each topic. Credit/no credit only. Prerequisite: first-year graduate student in neurobiology.

UCONJ 530 Issues in Indian Health (3) Survey of historical and contemporary issues in Indian Health. Covers Indian contributions to health, traditional Indian Medicine, current disease epidemiology, development of Federal Indian Health policy, the Indian Health Service, tribal health programs, and consequences of major legislation on Indian Health. Prerequisite: current health science student or permission of instructor.

UCONJ 531 Introduction to Mind Body Medicine-An Experiential Elective (2) Sessions contain a didactic component followed by an experiential component and cover a variety of self-care techniques including meditation, exercise, and nutrition. The goals are to promote personal well being, a healthy lifestyle, reduce burnout, and reduce academic difficulties. Credit/no credit only.

UCONJ 540 Environment, Change and Human Health: The Role of the Health Professional (1/2, max. 2) Ouberle, Rosenblatt Explores the effect of environmental deteriora- tion on human health, and presents tools to address the problem. Offered: Sp.

UCONJ 548 Current Issues in First Nations Behavioral Health: Mental Health and Substance Abuse (3) Historical and intergenerational antecedents of tribal psychiat- ric and substance abuse disorders. Oppression, economic circumstances, and family functioning as shaping mechanisms for attachment. Implications of insufficient attachment for
STD/HIV research, including study design, laboratory methods, production of instruments for data collection, and methods for data analysis. Credit/no credit only.

UCONJ 584 Plant Tumors (1, max. 9) Gordon
Discussion of the literature of plant tumors and current research work being carried on in this area at the University. Offered cooperatively by the departments of Biochemistry, Botany, and Microbiology and Immunology. Credit/no credit only. Prerequisite: offered only to persons actively pursuing work in this area.

UCONJ 599 Selected Readings in Interdisciplinary Clinical Research (1, max. 6) Marshall, Mitchell Analysis and synthesis of selected readings and works in progress related to multidisciplinary and interdisciplinary clinical research. Credit/no credit only. Prerequisite: UCONJ 517; permission of instructor. Offered:

Law

LAW 300 Introduction to Law (3-6, max. 5) I&S Understanding the legal system, its functions in the social-economic order, legal reasoning, and the world of legal education and the legal profession. Open to nonlaw students only.

LAW 410 Problems in Professional Responsibility (4) I&S

LAW 415 Criminal Justice (3) I&S Examines pre-trial rights of persons suspected or accused of crime, primarily those rights covered by the Fourth, Fifth, Sixth, and Fourteenth Amendments of the U.S. Constitution.

LAW 416 International Contracting: Negotiation and Drafting (3) I&S Skills course designed to introduce process and problems of negotiating and drafting international agreements. Client interviewing and counseling and negotiation and drafting of a contract between parties in the United States and Japan. Credit/no credit only. Open to nonlaw students only.

LAW 422 Copyright (3) I&S

LAW 429 Public Land Law (3) I&S

LAW 440 Legal Issues of Internet Law (3) I&S Introduces the basic legal issues raised by networked digital technologies, such as the Internet. Covers jurisdiction, speech, privacy/access, property rights (copyrights, domain names), emerging law, leading policy debates, as well as fundamental Internet technical skills. Offered: S.

LAW 442 Land Law and the Urban Environment (3) I&S Examination of the major legal tools available to shape the urban environment by controlling the use of land. Considers zoning, subdivision controls, urban renewal, private land-use restrictions, and the rules of nuisance law. Credit/no credit only. Open to law and nonlaw students.

LAW 443 The Legal Process I (3/5) I&S The system of law and its functions rather than substantive law pertaining to any particular subject or discipline. Open only to nonlaw students. Credit/no credit only.

LAW 444 Constitution and American Public Education (3-6, max. 6) I&S Examines the relationships between the Constitution of the United States and the American system of public education, excluding higher education, in areas of constitutional freedom and legal controls, racial desegregation, and equal educational opportunity, including equal financing of the public schools. Credit/no credit only. Offered: jointly with EDLPS 444.

LAW 445 Major Issues in American Constitutional Law (3) I&S Significant themes in American constitutional law. Doctrine of judicial review, application of the Bill of Rights to the states, Supreme Court’s recognition of fundamental rights, the Equal Protection clause, the Religion clauses, freedom of speech, and Presidential powers. Open to law and nonlaw students.

LAW 447 Critical Perspectives in Law (3) I&S Examination of modern critical legal thought and critics views regarding proposed alternative forms of social ordering.

LAW 467 American Law and the American Indian (3) I&S Relationship between Indians and the United States from 1789 to the present. Significant constitutional, legislative, and judicial actions. Legal events explored within their political, military, social, and cultural contexts. Comparisons with other minority-group experiences. Offered: jointly with HSTAA 416.

LAW 476 International Economic Relations and Trade Policy (3) I&S Consideration of international control of national trade policies and permissible transnational reach of national trade or other regulation. The General Agreement on Tariffs and Trade (GATT) and the international monetary system examined from legal and economic perspective. Examination and comparison of prescriptive jurisdiction to public international law.

LAW 477 Law Literature and Film (2-4, max. 4) I&S/LVPA An examination of literary and cinematic portrayals of law and issues important to law, lawyers, and the legal system. Considers both portrayals purporting to depict the legal system as well as works envisioning lawyers and the legal system in a “better world.”

LAW 481 Land, American Culture and the Law: Perspectives on the Use and Ownership of the Natural Environment (1-6, max. 6) I&S

LAW 489 Law and Aging (3) I&S Survey of principal areas of law of special concern to aging population, considering health care and health care decision-making, public and private income maintenance programs, taxation, guardianships, conservatorships and other methods of protecting the property of the elderly. Counseling, and professional responsibility.

LAW 600 Independent Study or Research (*)

LAW 800 Doctoral Dissertation (*)

Law A

LAW A 501 Contracts [(2-6), max. 8]

LAW A 502 Civil Procedure I [(2-6), max. 6]
Discrimination issues covered in depth in LAW 556. Labor litigation covered in LAW 554. Compensation and occupational safety and hours, and benefits of employment, workers' compensation. Topics include employee duties, prohibited practices, and case law related to each form relevant to advising small business clients on the choice of business form utilized in their ventures. Not open to students who have taken Business Organizations. Offered: A.

LAW 576 International Criminal Law (3) Allen Examines responses by states and international organizations to international and transnational crimes. Covers substantive and procedural international criminal law, criminal responsibility, defenses and immunities, and the prosecution and punishment of international criminals in both national and in international tribunals. Prerequisite: LAW 505; recommended: LAW 574. Offered: W.

LAW 577 Immigration Law (4)

LAW 578 International Business Transactions (1-4), max. 4

LAW 579 Child Advocacy (4)

LAW 580 Family Law (4-5)

LAW 581 Washington Constitutional Law Seminar (1-4), max. 4

LAW 582 Bankruptcy (3) Introduction to business and consumer bankruptcy law based on the bankruptcy code and recent cases. Covers transactions and litigation aspects of bankruptcy law and practice. Considers the impact of bankruptcy on areas covered in other courses such as business organizations, commercial transactions, environmental law, family law, torts, and intellectual property.

LAW 583 Insurance Law (4)

LAW 584 American Public School Law (3) Constitutional, statutory, and common law principles common to all public education systems within the United States. Applicable law are a variety of substantive legal areas such as torts, property, contracts, administrative law, and fundamental rights. Offered: Sp.

LAW 585 Admiralty (4)

LAW 586 Secured Transactions IV (4)

LAW 588 Trade Security and Copyright Protection of Intellectual Property in High Tech Industry (3)

LAW 590 Constitutional Law: Equal Protection, Fundamental Rights, and Due Process of Law (4/5)

LAW 591 Constitutional Law: Freedom of Expression (4/5)

LAW 592 Constitutional Law II: The Fourteenth and First Amendments - Equal Protection, Fundamental Rights, Due Process of Law, Freedom of Expression and Religion (2-6), max. 8

LAW 594 International Trademark and Copyright (3) Focuses on international treaties as they relate to protection of trademarks and copyrights. Introduces international aspects of branches of intellectual property, including general principles of comparative and international law, and specific law related to obtaining and enforcing intellectual property rights in foreign countries. Prerequisite: either LAW 522 or Law E 588.

LAW 598 Legal Research I (3) Introduction to legal bibliography and law librarianship. Basic primary and secondary legal bibliographic tools. Integration of manual and computer resources for effective legal research. Emphasis on state materials. Prerequisite: law librarianship major or LIS 503 and LIS 530 which may be taken concurrently. Offered: jointly with LIS 591.

LAW 599 Legal Research II (3/4) Legal tools that answer more complex legal research problems, such as federal legislative histories, sources of administrative law, specialized subject research. Federal emphasis. Builds on skills and techniques taught in LIS 591/LAW A 598. Extensive work with online resources.

LAW A 500 Civil Procedure II (3)

LAW A 503 Evidence (2-6), max. 6

LAW A 506 Conflicts of Laws (2-6), max. 6

LAW A 507 Federal Courts and the Federal System (3/4)

LAW A 510 Problems of Professional Responsibility (2-4, max. 4)

LAW A 511 Seminar on Problems in International Environmental Law (1-4), max. 4

LAW A 512 Legislation and the Formulation of Public Policy (3)

LAW A 513 Evidence IV (4)

LAW A 514 Street Law ([1-8], max. 8)

LAW A 515 Criminal Procedure (5)

LAW A 516 International Contracting (2-4), max. 4 Credit/no credit only.

LAW A 517 Juvenile Justice Seminar (1-6), max. 6

LAW A 518 Appellate Advocacy (1-3), max. 3 Credit/no credit only.

LAW A 519 Pre-Trial Practice (3)

LAW A 520 Trial Advocacy (2-6), max. 6 Credit/no credit only.

LAW A 521 Trial Advocacy II (3, max. 6) Howard Addressed more advanced trial advocacy issues than are covered in LAW B 520. Includes a civil or criminal track of study and work with trial lawyers who specialize in that area of practice on more sophisticated issues of strategy, evidence, creative use of exhibits at
trial, technology in the courtroom, and ethics. Prerequisite: LAW B 520; permission of the Director of the Trial Advocacy Program. Offered: Wisp.

LAW B 522 Mediation of Disputes (3) Credit/no credit only.

LAW B 523 Negotiation (2-4, max. 4) Credit/no credit only.

LAW B 525 Alternative Dispute Resolution (3) Overview of alternative dispute resolution including negotiation, mediation, arbitration, med-arb, early neutral evaluation, mini-trials, summary jury trials, and E-ADR. Critical evaluation of each process occurs through a combination of assigned readings, roleplay exercises, videotapes, guest presentations, and student-designed classes.

LAW B 526 Mediation Clinic ([1-10]-, max. 10) Credit/no credit only.

LAW B 527 Criminal Law Clinic (8) Credit/no credit only.

LAW B 528 Unemployment Clinic ([2-8]-, max. 8) Credit/no credit only.

LAW B 529 Advanced Environmental Law and Practice (1-4, max. 4)

LAW B 530 Judicial Externship (1-15, max. 15)

LAW B 531 Immigration Law Clinic ([1-8]-, max. 8) Credit/no credit only.

LAW B 532 Advanced Clinic (1-4, max. 4) Advanced clinical training under the supervision of a law school faculty member in order to complete a project or case begun by the student during a clinic, or to pursue in more depth the subject of the clinic. Credit/no credit only. Prerequisite: Clinical basis for continued work.

LAW B 533 Interviewing and Counseling for Lawyers (2/3) Credit/no credit only.

LAW B 534 Affordable Housing Development Clinic ([1-12]-, max. 12)

LAW B 535 Legislative Externship (1-15, max. 15) Credit/no credit only.

LAW B 536 Drafting Basic Business Documents (1-3, max. 3)-

LAW B 537 Refugee Advocacy Clinic ([1-12]-, max. 12) Credit/no credit only.

LAW B 538 Agency Externships (1-15, max. 15) Credit/no credit only.

LAW B 539 Public Interest Law Externship ([1-15], max. 15) Credit/no credit only.

LAW B 540 Japanese Law (4) Basic institutions and processes of the Japanese legal system. Historical development and traditional role of law, reception of Western law, and cultural and structural factors that influence the function of law and legal institutions. Offered: jointly with SISEA 540.

LAW B 541 Law in East Asia: China (4) Introduction to the institutions and processes of the Chinese legal system. Focuses on the contemporary system and its role in relation to political, economic and social developments.

Examines legal aspects governing foreign trade and investment in China. Offered: jointly with SISEA 543.

Emphasis on the historical development and traditional roles of law, the reception of Western law, and cultural and structural factors that influence the function of law and legal institutions.

LAW B 543 Intellectual Property Law in East Asia (3)

LAW B 544 Transnational Litigation: United States-Japan ([2-4]-, max. 4)

LAW B 545 Survey of American Law and Practice (6) Provides an integrated introduction to the U. S. legal system, legal analysis, legal research, and legal writing. Introduces tools and techniques for basic legal research in U. S. materials. Credit/no credit only.

LAW B 546 United States-Japanese Corporate Relations ([2-4]-, max. 4)

LAW B 549 Government Regulation of Business in Japan (3) Offered: jointly with SISEA 549.

LAW B 550 Legal Analysis and Research for Students Not Trained in the Common-Law System ([1-4]-, max. 4)

LAW B 551 Comparative Law Seminar ([2-6]-, max. 6)

LAW B 552 Tutorial in Comparative Law ([1-4]-, max. 4)

LAW B 553 Chinese Legal Tradition (3) Offered: jointly with SISEA 553.

LAW B 555 Roman Law (3)

LAW B 556 Islamic Law (3) Selected topics in Islamic law that highlight major aspects of Islamic civilization. Offered: jointly with NEAR E 524.

LAW B 557 Southeast Asian Law (2-4, max. 4) Two or three countries in Southeast Asia are selected as case studies. Examines their legal and political histories; legal institutions and legal professions; commercial and investment laws; and compliance questions relating to labor standards, corruption, and human rights.

LAW B 558 Doctoral Thesis Seminar (2) Students draft thesis abstracts, tables of contents, preliminary chapters, and presents arguments orally to identify core theories and applied studies to incorporate in their work. Read a selection of published work and indicative articles drawn from the list of relevant sources for individual thesis-in-development.

LAW B 559 Comparative Law: Europe, Latin America, and East Asia (4)

LAW B 560 Criminal Justice Externship (1-15, max. 15) Credit/no credit only.

LAW B 561 International Law of the Sea (3) Offered: jointly with SMA 506.

LAW B 562 Quantitative Methods (4)

LAW B 563 Ocean Policy and Resources Seminar (3-) Study and research in selected legal problems relating to ocean and coastal law, marine trade and transportation, marine resources, and protection of the marine environment. Students prepare and present a research paper and critique papers prepared by other students. Prerequisite: LAW B 561, LAW B 565.

LAW B 565 U.S. Coastal and Ocean Law (4) Allen Study of the legal framework in the United States controlling allocation and use of coastal and marine resources. Topics include coastal zone management, fisheries management, protection of marine mammals and endangered species, marine pollution, offshore oil and gas development, and marine transportation. Offered: jointly with SMA 515.

LAW B 567 General Externship Perspectives Seminar (2) Credit/no credit only.

LAW B 573 Supreme Court Decision Making (2-4, max. 4) Examines Supreme Court decision making from both a theoretical and practical perspective. Surveys representative cases on the Court’s current docket. Extensive preparation required of participants, who play the roles of lawyers, justices, and commentators. Emphasis on developing appellate advocacy skills.

LAW B 577 Law, Literature and Film ([2-4]-, max. 4) An examination of literary and cinematic portrayals of, and issues important to law, lawyers, and the legal system. Considers both portrayals purporting to depict the legal system as well as works envisioning lawyers and the legal system in a “better world.”

LAW B 578 Seminar on Legal Problems of Economic Development ([1-6]-, max. 6)

LAW B 580 Externship Tutorial (2) Credit/no credit only.

LAW B 581 Land, American Culture, and the Law: Perspectives on the Use and Ownership of the Natural Environment ([1-6]-, max. 6)

LAW B 584 Indian Law Seminar (2-6, max. 6)

LAW B 589 Intellectual Property Law Seminar ([1-4]-, max. 4)

LAW B 590 The United States Constitution: Past, Present, and Future (2)

LAW B 593 Natural Resources Commons Property (3) A review of the different forms of natural resources and an exploration of the desirability of managing certain resources as commons or private property. Covers a review of the successes and failures by various groups in setting policy in this area.

LAW B 596 International Protection of Human Rights ([2-4]-, max. 6) Stift

LAW B 597 History of the Formation of the United States Constitution Seminar ([2-4]-, max. 6)

LAW B 598 Advanced Research and Writing Seminar ([1-4]-, max. 4)

LAW B 599 Special Topics (1-12, max. 12)
Law E 500 Advanced Writing Project (1-3, max. 3) Independent research and writing project supervised by a faculty member. Projects are structured to develop skills in research, analysis, and writing. Offered: AWSpS.

Law E 502 White Collar Crime (4)

Law E 503 Analytic Writing (3)

Law E 504 Emerging Issues in Urban Governance Seminar (3) Focuses on currently emerging issues in local government, such as municipal regulation of land use, the initiative process, technology and privacy, governmental responses to urban social problems and regional challenges. Production of publishable paper by student satisfies the advanced writing project requirement.

Law E 505 Frontiers of Tort Law (3)

Law E 506 Asian Contract Law and Practice (3) Examines how economic deregulation, financial restructuring and technological change affect contracts in Asia. Topics include licensing, franchise and e-commerce contract in Japan, China, and Taiwan; contract law and practice in Vietnam and Indonesia; cultural norms in contracting; convergence toward "global standards;" and the role of lawyers and other agents.
