**CFR 512 Biogeochemical Cycling in Soils and Forest Ecosystems (3)** Zabowski Elemental cycles in forests and soils. Fundamentals of processes involved in cycling are addressed along with alterations resulting from environment, vegetation, and soil types. Consideration of cycles of nutrients, metals, and other elements. Weekly discussion section reviews literature on biogeochemical cycling. Prerequisite: one soils course or permission of instructor. Offered: even years; W.

**CFR 513 Advanced Soil Genesis and Classification (5)** Zabowski Soil formation, morphology, classification, and relationship to the environment. Labs and field trips illustrate properties and processes of forest and grassland soils in Washington. Requires two weekend field trips and a graduate project. Prerequisite: CFR 510 or permission of instructor. Offered: even years; Sp.

**CFR 514 Advanced Forest Soil Fertility and Chemistry (4)** Harrison Chemical properties of soil, nutrient and toxic elements; supply, retention, and loss of nutrients in soils; utilization of geochemical and ecosystem models such as GEOCHEM, MAGIC, TRICLE-DOWN, and ILWAS in developing a quantitative understanding of the chemical function

of forest ecosystems. Prerequisite: general chemistry and geology of soils. Offered: odd years; Sp.

**CFR 515 Advanced Soil and Plant Analysis (3)** Harrison Plants and animals must acquire nutrient elements from their environment. Quantifying the composition of samples is the first step in understanding the processes in natural and manmade systems. Sampling, handling, preparation, storage, and analysis stressed. Prerequisite: one botany or plant science course, instrumental analysis, soils. Offered: even years; Sp.

**CFR 519 Conducting and Publishing an Industry Performance Review (3, max. 12)** Paun Focuses on the concepts of accounting, finance, and financial statement analysis; techniques for analyzing firm performance; and conducting competitor analyses. Conduct in-depth, comparative performance analyses of U.S. and Canadian paper firms and publish the findings as a peer-reviewed manuscript in a journal. Offered: WSp

**CFR 520 Geographic Information Systems in Forest Resources (5)** Applications of GIS technology to forest science and management. Fundamental of GIS systems: data sources, preprocessing, map analysis, output; remote sensing as a source of GIS data, image analysis, and classification. Emphasis on GIS as a source of management and technical information requests. Offered: AWSp.

**CFR 521 Current Topics in Forest Resources (2-5, max. 10)** Critical evaluation and discussion of published research in the broad field of forest resources. Topics and requirements vary. Offered: AWSp.

**CFR 522 Plant-Microbe Interactions (1, max. 3)** Doty Discusses current research related to forest tree-microbe interactions. Credit/no credit only. Offered: odd years; Sp.

**CFR 523 Forest Bioresources (3)** Doty Covers Phytoremediation (removing pollutants using plants), biofuel production, and carbon sequestration. Focuses on the biology rather than the chemistry. Emphasizes the latest research on how current practices in these areas are being improved. Offered: A.

**CFR 525 Advanced Wildland Hydrology (4)** Bolton Advanced treatment of hydrologic cycle and basic hydrologic methods as applied to wildlands. Effects of forest management activities on hydrologic processes. Graduate focus on a detailed field or modeling hydrologic analysis. Offered: W.

**CFR 526 Seminar in Advanced Silviculture (3)** Ford Seminar on current and emerging silvicultural issues and underlying biological principles. Topics include: stand management to enhance wildlife, biodiversity and high productivity in sub-tropical and tropical regions; computer simulation of stand growth; adaptation to changes in management objectives; soil conditions and productivity during stand rotation; and minimizing effects of catastrophic disruption. Prerequisite: ESRM 428. Offered: W.

**CFR 527 Ecosystems Seminar (1)** Discussion by invited speakers on current research related to ecosystems. Credit/no credit only.

**CFR 528 International Forestry (3)** Gara, Greulich Discussion on biological, social, and economic basis linked with forest practices in the world. Focuses on examples of how forests and renewable resources are both exploited and managed, with thoughts on how these resources can be sustainability managed. Emphasizes group presentations and seminar style discussion.

**CFR 529 Water Center Seminar (1, max. 6)** Weekly seminars covering water resources and watershed topics with lectures from scientists on and off campus. Credit/no credit only. Offered: jointly with FISH 529/PB AF 521; AWSp.

**CFR 535 Fire Ecology (3)** Fire regime concept as applied to fire ecology. Methodology for fire history research. History and function of forest fire in western United States with emphasis on Pacific Northwest. One weekend field trip. Offered: A.

**CFR 541 Advanced Landscape Ecology (5)** Lawler Investigates the causes and consequences of spatial patterns in ecology. Concentrates on applied questions and approach-

es, covering topics such as scaling, landscape processes, pattern measurement, biogeography, landscape modeling, and conservation planning. Prerequisite: CFR 501. Offered: odd years; W.

**CFR 545 Principles of Forest Entomology (3)** Gara Historical perspective of the discipline, introduction to general entomology and taxonomy, forest insect ecology, integrated pest management concepts for defoliators, bark beetles, wood borers, and urban forestry pests. Offered: W.

**CFR 547 Stream and River Ecology (5)** Naiman Characterizations of stream and river ecosystems from a watershed perspective. Emphasis on fundamental processes affecting the structure and dynamics of aquatic communities and the riparian zone. Resource conflicts, new technologies, field trips, and class projects. Recommended: general ecology, forestry-fisheries interactions. Offered: jointly with FISH 547; Sp.

**CFR 549 Urban Horticulture Seminar (1, max. 6)** Discussion by invited speakers on current topics in urban horticulture. Credit/no credit only. Offered: A.

**CFR 550 Graduate Seminar (2-5, max. 10)** Graduate seminar to evaluate and discuss current research topics. Topics and requirements vary. Offered: AWSp.

**CFR 554 Wildlife Seminar (1-2, max. 10)** West Discussion of current research and application in wildlife biology and conservation. Credit/no credit only. Offered: AWSp.

**CFR 561 Public Presentation in Urban Horticulture (2)** Students learn to make public presentations in scientific, professional, and popular contexts and to interpret technical information for professional and lay audiences. Support materials, such as audiovisuals and graphics are discussed. Offered: W.

**CFR 564 Advanced Forest Biometry (3/5)** Turnblom Classical problems in analysis of forest populations and growth theory, and principles of parametric analysis and estimation processes in forest biometry. Offered: odd years; A.

**CFR 567 Topics in Advanced Ecology (3, max. 6)** Discusses literature on active research areas or controversies in different branches of ecology. Offered: jointly with BIOL 567/ FISH 567; W.

**CFR 571 Resource Policy and Administration (5)** Study based on understanding of the actors, arenas, issues, and policy communities that form the context for policy development and implementation. Exploration of approaches to policy inquiry. Consideration of implications for both policy and management. Students develop a study design for course project. Offered: jointly with PB AF 592.

**CFR 590 Graduate Studies (1-5, max. 10)** Study of emerging scientific developments in Forest Resources that may develop into regular course offerings. Offered: AWSpS.

**CFR 591 Seminar in Resource Policy and Management (1)** Introduction and orientation for concurrent degree program between the Evans School of Public Affairs and the College of Forest Resources. Examines research and literature on contemporary issues related to the integration of natural resource science, policy, and management, through discussion among faculty, students, and invited speakers. Offered: jointly with PB AF 591; A.

**CFR 592 Environmental Policy Processes (3)** Presents background to establish the need for environmental policy. Explores in a comparative manner, examining both successes and failures, various strategies that have been used or proposed to protect the environment. Offered: jointly with PB AF 590.

**CFR 595 Graduate Teaching Practicum (1-5, max. 5)** Principles of teaching and learning applied to undergraduate instruction in the College of Forest Resources Development, delivery, and evaluation of lectures and homework assignments. Graduate teaching experience for CFR students only. Credit/no credit only. Offered: AWSp.

**CFR 600 Independent Study or Research (\*)** Offered: AWSpS.

**CFR 601 Graduate Internship in Forest Resources (3-9, max. 9)** Graduate internship under the supervision of a college faculty member. Credit/no credit only. Offered: AWPpS.

**CFR 700 Master's Thesis (\*)** Offered: AWPpS.

**CFR 800 Doctoral Dissertation (\*)** Offered: AWPpS.

## Environmental Sciences and Resource Management

**ESRM 100 Introduction to Environmental Science (5) I&S/NW** Covers the importance of the environment in society with particular emphasis on worldwide distribution and uses of resources, the role of natural and man-made environments, and causes of environmental degradation. Introduces ethics of conservation and recycling. Cannot be taken for credit if ESC 110 already taken. Offered: AWPpS.

**ESRM 101 Forests and Society (5) I&S/NW** Survey course covering forest ecosystems of the world, history of forestry and forest conservation, how forest ecosystems function, wildlife in forests, environmental issues in forestry, forest management, economics and products, and new approaches to forest management. Open to majors and nonmajors. Cannot be taken for credit if CFR 101 already taken. Offered: Sp.

**ESRM 150 Wildlife in the Modern World (5) I&S/NW** Covers major wildlife conservation issues in North America. Some global issues are also treated. Examples of topics include the conservation of large predators, effects of toxic chemicals on wildlife, old-growth wildlife, conservation of marine wildlife, recovery of the bald eagle, and gray wolf.

**ESRM 200 Society and Sustainable Environments (5) I&S/NW** Introduces the application of social concepts and theories to understanding and managing urban, urbanizing and wildland landscapes in a sustainable manner. Of particular interest are factors that shape patterns on the landscape and resulting social and economic benefits. Explores landscapes across the urban to wildland gradient. Offered: WSp

**ESRM 201 Sustaining Pacific Northwest Ecosystems (5) I&S/NW** Edmonds, Reichard Introduces the principles of ecology across an urban to wildland gradient and discusses how these landscapes can be sustainably managed. Explores basic ecological theories, plant communities, soil, climate, pollution, hydrology, and wildlife in classroom, labs, and field trips. Offered: A.

**ESRM 210 Introductory Soils (4) NW** Zabowski Physical, chemical, and biological properties that affect distribution and use patterns of this important ecosystem component. Includes soil morphology and genesis, plant nutrition and nutrient cycling, soil water, microbiology, and application of soil properties to environmental concerns. One Saturday field trip. Offered: A.

**ESRM 235 Introduction to Environmental Economics (5) NW** Rabotyagov Introduces environmental and natural resource economics. Discusses fundamental economic concepts, including markets and private property. Includes basic tools used in the economic assessment of environmental problems and applies these methods to key environmental issues. Offered: Sp.

**ESRM 250 Introduction to Geographic Information Systems in Forest Resources (5) NW, QSR** Applications of GIS technology to forest science and management. Fundamentals of GIS systems: data sources, preprocessing, map analysis, output; remote sensing as a source of GIS data, image analysis, and classification. Emphasis on GIS as a source of management and technical information requests. Offered: AWPpS.

**ESRM 300 Principles of Sustainability (2) I&S/NW** Overview of principles of sustainability, including discussion of current literature, presentation, and discussion with practitioners, and methods for balancing social, economic, and ecological consequences of proposed policies and actions. Students develop a plan to further their studies in natural resources and environmental sustainability. Recommended: ESRM 200; ESRM 201. Offered: W.

**ESRM 304 Environmental and Resource Assessment (5) I&S/NW, QSR** The processes of measuring, monitoring, and assessment; illustrated in diverse environmental and resource case studies. Explores the scientific method, hypothesis testing, sampling, and experimental designs, the role of questionnaires and polling techniques, remote sensing techniques, and population measurements. Prerequisite: either Q SCI 381 or STAT 311, either of which may be taken concurrently. Offered: ASP.

**ESRM 311 Soils and Land Use (3) NW** Harrison Intended for students concerned with environmental problems in the Puget Sound basin; also for those who intend to become professionally involved in land-planning decisions. Focus is on the significance of soils in understanding environmental problems and in promoting intelligent land-use decisions. Basic concepts of soil systems are presented, stressing those aspects important in making land-planning decisions. Offered: W.

**ESRM 315 Natural Resource Issues: Old-Growth and Forest Management (5) I&S/NW** Franklin Biological and social elements of current conflicts, especially those associated with old-growth and its disposition. Ecology of Pacific Northwest forests and landscapes, history of forest practices, application of emerging science, proposed alternative practices and policies, including analysis of current proposal and its predecessors and successors. Open to majors and nonmajors. Offered: Sp.

**ESRM 320 Marketing and Management from a Sustainability Perspective (5) I&S/NW** Paun Introduction to business concepts relating to marketing, human resource management, small businesses and entrepreneurship, and economics in the context of environmental resource management. Offered: A, S.

**ESRM 321 Finance and Accounting from a Sustainability Perspective (5) I&S/NW** Paun Introduction to business concepts relating to finance, accounting, and international business in the context of environmental resource management. Offered: WS.

**ESRM 323 Silviculture (5) NW** Turnblom Silviculture techniques, including nursery practices, clear-cutting, seed trees, shelterwood, selection cutting, site preparation, regeneration methods, thinning, fertilization, chemicals, and regional silviculture in the Northeast, Southeast, Midwest, Rocky Mountains, California, Pacific Northwest, and Alaska. Multiple-use field trips. Offered: Sp.

**ESRM 325 Forest Bioresources (3) NW** Doty Explores current topics in forest bioresources with an emphasis on bioenergy, remediation of pollutants, and carbon sequestration. Prerequisite: either BIOL 162, BIOL 180, or ESRM 162. Offered: A.

**ESRM 328 Forestry-Fisheries Interactions (4) NW** Schiess Characteristics of forestry-fisheries interactions in terrestrial and aquatic landscapes. Effects of changes in landforms on forest and aquatic communities. River basin and watershed features. Forest stand dynamics, forest hydrology, fish and wildlife histories and behavior. Resource conflicts and resolution. Offered: jointly with FISH 328; even years; Sp.

**ESRM 331 Landscape Plant Recognition (3) NW** Reichard Field recognition of important groups of woody landscape plants, emphasizing diversity at the genus and family levels. Cultivated plant nomenclature. Plant descriptive characters evident in the field with eye and hand lens. Hardiness and landscape applications. Recommended: either BIOL 117 or BOTANY 113. Offered: jointly with BIOL 331; Sp.

**ESRM 350 Wildlife Biology and Conservation (5) NW** Wirsing Wildlife ecology and population biology, and interrelationships between wild animals and humans, including encouragement of wildlife population growth and productivity, control of pest populations, and preservation of endangered species with emphasis on forest environments and forest faunas. Open to nonmajors. Prerequisite: either BIOL 162, BIOL 180, BIOL 220, or ESRM 162, any of which may be taken concurrently. Offered: A.

**ESRM 351 Wildlife Research Techniques (8) NW** West Scientific approaches to the field study of wildlife populations and

habitat, including species identification and natural history, experimental design, and report writing. Emphasis on direct experience with current field techniques used in the study of vertebrate populations and habitat. Prerequisite: either BIOL 162, BIOL 180, ESRM 162, or ESRM 350; recommended Q SCI 381. Offered: Sp.

**ESRM 362 Introduction to Restoration Ecology (5) I&S/NW** Bakker An introduction to ecological restoration of damaged ecosystems. Examines the philosophical base of restoration as well as the social, biological and political forces that impact the success of any restoration project. Includes lectures, readings, case studies and field trips. Offered: jointly with ENVIR 362; A.

**ESRM 368 Natural Resource Measurements (4) NW** Turnblom Introduction to principles of measurement, basic field measurement skills, measurement of vegetation, including stand examination, timber cruising, size, weight, volume and biomass of trees, and stream flow. Laboratories include field exercises on sampling techniques for trees and lesser vegetation and linear regression modeling to predict quantities from basic measurements. Prerequisite: either IND E 315, Q SCI 381, STAT 220, or STAT 311; recommended ESRM 304. Offered: W.

**ESRM 371 Environmental Sociology (5) I&S/NW** Social processes by which environmental conditions are transformed into environmental problems; scientific claims, popularization of science, issue-framing, problem-amplification, economic opportunism, and institutional sponsorship. Examination of social constructs such as ecosystem, community, and free-market economy. Use of human ecology to assess whether the current framing of environmental problems promotes ecological adaptability. Offered: jointly with SOC 379/ENVIR 379; WS

**ESRM 381 Management of Wildland Recreation and Amenities (3) NW** Bradley Introduction and overview of wildland recreation and amenities management. Agency history and objectives explored along with integration of recreation with other land uses. Water, forestry, wildlife, and wilderness resources for recreational uses discussed along with role of private enterprise in recreation and amenities. Topics of current and local interest. Offered: W.

**ESRM 399 Field or Teaching Internship (1-5, max. 15)** Internship experience in undergraduate teaching or in the environmental field, supervised and approved by a faculty member. Preparation of professional report reflecting on the experience is required. Credit/no credit only. Offered: AWPpS.

**ESRM 400 Natural Resource Conflict Management (3) I&S/NW** Ryan Introduction to the causes, dynamics, and consequences of natural resource conflicts as well as the range of procedural interventions used to manage conflict. Specific cases of environmental conflict and alternative dispute resolution procedures are examined. Emphasis on developing skills to effectively analyze, manage, and resolve natural resource conflicts. Offered: W.

**ESRM 401 Spring Comes to the Cascades (3) NW** Hinckley Examines the interaction between forests, environment and growth at three locations in the Cascades, from lowlands to alpine. Field trips and associate observations are linked to classroom or group project activities and are used to understand a number of ecological, physiological and meteorological concepts. Offered: Sp.

**ESRM 402 Curation and Education in Public Gardens (3) I&S/NW** Reichard Techniques of curatorial practice relevant to living collections of plants, including documentation, policies, conservation, and display. Aspects of establishing and implementation of a public horticulture program including assessment, program tools and methods, and funding in a public environment. Offered: even years; A.

**ESRM 403 Forest and Economic Development in the Developing World (4) NW** Eastin Examines the relationship between forests and economic development in tropical countries. Topics include the role of population growth, poverty, land tenure, and international trade on forest use as well as theories of economic development. Case examples of

forest-based economic development in different countries and regions. Offered: A.

**ESRM 409 Soil Ecology (5) NW Vogt** Soil organisms in forest and other ecosystems, decomposition, nutrient cycling. Nitrogen transformation, mycorrhizae, effects of forest management. Offered: A; even years.

**ESRM 410 Forest Soils and Site Productivity (5) NW Harrison** Considers unique properties and processes occurring in forest soils throughout the world with emphasis on soils of Pacific Northwest and aspects of forest soils that affect productivity. Two all-day Saturday field trips and one Saturday-Sunday field trip required. Recommended: ESRM 210. Offered: odd years; A.

**ESRM 411 Plant Propagation: Principles, and Practice (3) NW Kim** Science and practice of plant propagation including sexual (seed) and asexual (cutting, layering, grafting) propagation. Includes discussion of physiological effects, methodology and laboratory exercises. Wide variety of plants covered. Intended for majors in urban horticulture and urban forestry and others interested in reproducing landscape plants. Recommended: 10 credits of introductory biology or botany, or equivalent. Offered: Sp.

**ESRM 412 Native Plant Production (3) NW Bakker** Advanced plant propagation techniques, emphasizing native plants, propagation for restoration projects, and unique problems associated with providing appropriate plant material for restoration or conservation purposes. Emphasizes greenhouse and fieldwork, and includes lectures, field trips, and a class project. Recommended: ESRM 411, which may be taken concurrently. Offered: Sp.

**ESRM 413 Soil Genesis and Classification (5) NW Zabowski** Soil formation, morphology, classification, and relationship to the environment. Labs and weekend field trips illustrate properties and processes of forest and grassland soils in Washington. Recommended: ESRM 210. Offered: even years; Sp.

**ESRM 414 Forest Soil Fertility and Chemistry (3) NW Harrison** Tree growth depends, in part, on the interaction between chemical and biological activities within a given soil: the biological and chemical parameters that influence the growth; soil solution chemistry and surface reactions; reactions and processes that control essential plant nutrient levels and forms in soil solutions. Recommended: ESRM 210. Offered: even years; Sp.

**ESRM 415 Biology, Ecology, and Management of Plant Invasions (5) NW Reichard** Explores how biological invasions are one of the most serious threats to the preservation of biodiversity worldwide. Explores the vectors which move plants and their pests, the biology and impacts of the invasive species, and management and policy approaches. Prerequisite: one of the following: BIOL 162, BIOL 220, BIOL 333, BIOL 471, BIOL 472, ESRM 401, ESRM 472, or ESRM 473. Offered: A, odd years.

**ESRM 416 Field Survey of Wildland Soils (3) NW Harrison, Zabowski** Study of soils in remote sites about which little information is available. Focus is field trip in Cascade Mountains just north of Glacier Peak with prior study of hiking area, soil and ecosystem changes, and wilderness use. Offered: S; odd years.

**ESRM 420 Wildland Fire Management (5) NW** Principles of wildland fire behavior, ecology, and management. Weather, fuels, and topography effects on fire behavior. Forest structure influence on historical and current fire ecology. Principles of firesafe forests. Management issues of fire control and use in wilderness, multiple-use forest, and the wildland-urban interface. Offered: A.

**ESRM 423 International Trade, Marketing, and the Environment (3) I&S/NW** Introduction to international trade, marketing, and environmental business. Concepts include plan writing, exporting and importing, carbon credits, green marketing, and how global exchange rates affect environmental assets such as forests.

**ESRM 425 Ecosystem Management (5) NW Franklin** Scientific and social basis for ecological forestry. Forest practices to achieve integrated environmental and economic goals

based upon material models of disturbance and stand development including alternative harvesting methods; adaptive management and monitoring; certification and global issues. Offered: A.

**ESRM 426 Wildland Hydrology (4) NW Bolton** Introduction to the hydrologic cycle and basic hydrologic methods as applied to wildlands. Effects of forest management activities on hydrologic processes. Offered: W.

**ESRM 427 Integrated Management of Forest Landscapes in a Changing World (3) Franklin** Examines objectives of 21st century forest management along a continuum from economic to ecologic and dominance of mixed objectives; development of integrated approaches to simultaneously achieving ecological and economic goals at large scales and in mixed ownerships; recognizing and dealing with uncertainties associated with social and environmental changes. Recommended: ESRM 425. Offered: W.

**ESRM 428 Principles of Silviculture and Their Application (5) NW Ford** Focuses on the biology of major tree species in the PNW and their use in silviculture, stand development in plantation forest systems and its relationship to forest yield, the advantages and limitations of plantation silviculture relating to specific biotic, abiotic and economic conditions and management for objectives other than time yield. Prerequisite: ESRM 323. Offered: A.

**ESRM 429 Water Center Seminar (1, max. 6) NW** Weekly seminars covering water resources and watershed topics with lectures from scientists on and off campus. Credit/ no credit only. Offered: AWSp.

**ESRM 430 Hyperspatial Remote Sensing in Natural Resource Management (5) NW Moskal** Focuses on hyperspatial remote sensing fundamentals, interpretation and manipulation of aerial photography, satellite imagery, and Light Detection and Ranging (LiDAR). Uses traditional and 'state of the art' image processing techniques. Students learn to evaluate available hyperspatial remote sensing data sources and design simple projects related to environmental applications. Offered: Sp.

**ESRM 435 Forest Entomology (3) NW Gara** Introduction to general entomology, characteristics, life histories, ecological relations, prevention, and control of forest insects. Offered: W.

**ESRM 441 Landscape Ecology (5) NW Lawler** Basic landscape ecology concepts, including patches, corridors, networks, spatial dynamics; island biogeographic principles; landscape analysis methods; landscape models. Applications of landscape ecology in resources management (e.g., cumulative effects, cutting, patterns, anadromous fisheries, management of wildlife populations, and open-space planning). Recommended: either ESRM 201 or ESRM 250. Offered: A.

**ESRM 444 Forest Ecosystems Protection: Insects and Diseases (5) Edmonds, Gara** Examines the effects of insects and diseases on wildland and managed forest ecosystems: defoliators, bark beetles, wood boring insects, abiotic and biotic diseases, insects and diseases in intensively managed forests, principles of insect and disease management. Prerequisite: either ESRM 200, ESRM 201 or ESRM 300 any of which can be taken concurrently. Offered: odd years; Sp.

**ESRM 450 Wildlife Ecology and Conservation (5) NW Wirsing** Covers advanced principles of wildlife ecology such as habitat selection, population viability, and landscape ecology, and illustrates how they apply to wildlife conservation problems with terrestrial, aquatic, and marine wildlife. Students must share costs of field trips. Prerequisite: ESRM 350; recommended: introductory statistics. Offered: W.

**ESRM 451 Urban Plant Protection (5) NW Edmonds, Gara** Working knowledge on insects and diseases of plants growing in the urban environment. Emphasis placed on pest and damage recognition, control methods, and integrated pest management systems. Offered: even years; Sp.

**ESRM 452 Field Ornithology (3) NW Marzluff** Students learn field identification skills and are introduced to field methodologies through required indoor labs, field trips, and field exercises. Exercises include study of survey techniques,

feeding ecology, and behavior. Students are required to share field trip costs. Prerequisite: either BIOL 162, BIOL 180, or BIOL 220, any of which may be taken concurrently. Offered: odd years; A.

**ESRM 455 Wildlife Seminar (1, max. 8) NW West** Discussion of current research and application in wildlife biology and conservation. Credit/no credit only. Offered: AWSp.

**ESRM 456 Biology and Conservation of Birds (3) NW Marzluff** Major principles of natural history, avian reproductive biology, population ecology, and national and international conservation strategies for both hunted and un hunted birds. Emphasis on western United States. Prerequisite: either BIOL 162, BIOL 180, or BIOL 220, ESRM 162 any of which may be taken concurrently. Offered: odd years; A.

**ESRM 457 Fish and Wildlife Toxicology (3/5) NW Grue** Overview of fish/wildlife toxicology: history of the field; regulations; methods used to assess risks contaminants pose to fish/wildlife; classes of contaminants and their direct, sublethal and indirect effects; and contemporary threats of contaminants to fish/wildlife, their habitats and prey. Includes laboratory. Offered: jointly with FISH 455; W.

**ESRM 458 Management of Endangered, Threatened, and Sensitive Species (5) NW Marzluff** Biological underpinnings and political realities of endangered species management, including: legal issues, recovery teams, citizen rights, extinction, rarity, proactive management, captive propagation, reintroduction, species endangered in the Pacific Northwest. Students revise endangered species recovery plans. Offered: W.

**ESRM 459 Wildlife Conservation in Northwest Ecosystems (3) NW Manuwal, West** Extended field course offers Wildlife Science students personal interactions with wildlife managers and wildlife populations in strategic public and private lands in the northwestern United States and southern Canada. Students will share costs of trip. Offered when there is sufficient student demand. Prerequisite: ESRM 350; may not be repeated. Offered: Sp.

**ESRM 461 Forest Management and Economics (5) I&S/NW Greulich** Presents important contemporary decision tools, especially how they are used by forest managers so they can interpret, critique and develop their basic applications in forestry. Topics include optimization techniques, including linear and nonlinear programming, concepts in interest and time evaluation of alternatives, marginal cost analysis and computer spreadsheet assisted analysis. Prerequisite: Q SCI 381 or STAT 311; Q SCI 291 or MATH 124. Offered: W.

**ESRM 462 Restoration Ecology Capstone: Introduction (2-) NW Ewing, Fridley** First of a three-course capstone sequence in restoration ecology. Students review and assess project plans and installations. Class meets with members of previous capstone classes to review their projects. Recommended: SRM 362 and ESRM 479. Offered: jointly with ENVIR/TESC/BES 462; A.

**ESRM 463 Restoration Ecology Capstone: Proposal and Plan (-3-) NW Ewing, Fridley** Student teams prepare proposals in response to requests for proposals (RFPs) from actual clients. Clients may be governments, non-profit organizations, and others. Upon acceptance of the proposal, teams prepare restoration plans. Prerequisite: ESRM 462. Offered: jointly with ENVIR/TESC/BES 463. Offered: W.

**ESRM 464 Restoration Ecology Capstone: Field Site Restoration (-5) NW Ewing, Fridley** Teams take a restoration plan developed in ESRM 463 and complete the installation. Team participation may include supervision of volunteers. Teams prepare management guidelines for the client and conduct a training class for their use. Prerequisite: ESRM 463. Offered: jointly with ENVIR/TESC/BES 464. Offered: Sp.

**ESRM 465 Economics of Conservation (3) I&S/NW Perez-Garcia** Economic principles and their use in the analysis of contemporary conservation problems. Particular emphasis directed toward the conservation of forest resources in the Pacific Northwest and related policy issues. Offered: Sp.

**ESRM 468 Forest Operations (5) Schiess** Examines forest land surveying, low volume road access planning, and tim-

ber harvesting concepts. Low volume road design principles and practical application of field road location. Overview of road drainage design, construction techniques and maintenance. Reviews basic harvest systems and setting design processes, including cost, production control, environmental and safety considerations. Prerequisite: ESRM 250; ESRM 368; ESRM 323 which may be taken concurrently. Offered: Sp.

**ESRM 470 Natural Resource Policy and Planning (5) I&S/NW Bradley, Ryan** Introduction to and analysis of environmental policy-making processes, with a focus on forest and land policy and law. Use of policy models to examine the interaction of agencies, interest groups, Congress, and the courts in the legislative process. Policy implementation, evaluation, and change are also addressed. Offered: A

**ESRM 471 Urban Forest Landscapes (5) NW Bradley** Comprehensive view of urban forest and urban forest landscapes. Includes close examination of factors that differentiate urban forest landscapes along the urban to wildland gradient. Compare legal, social, political, administrative, physical, and biological variations. Offered: Sp.

**ESRM 472 Wetland Ecology and Management (5) NW Ewing** Wetland types and functions, global and North American distribution, wetland plant types, soil chemistry. The influence of stresses on wetland composition and form. Autecology of wetland plants; response to and detection of stresses. Impacts of urbanization; management techniques. Recommended: coursework in biology or ecology. Offered: A.

**ESRM 473 Ecosystem-Based Restoration Ecology (5) NW Ewing** Philosophy of restoration, structural components of ecosystem degradation, analysis of restoration projects and methods, and an ecosystem by ecosystem review of how systems are restored. An ecology courses that emphasizes applied scientific knowledge of ecosystems. Recommended: plant ecology, plant identification, horticulture, landscape ecology coursework. Offered: W.

**ESRM 478 Plant Ecophysiology (5) NW Kim** Explores physiological mechanisms that underlie ecological observations, including how above- and below-ground microclimates develop and affect plant physiological processes. Discusses acclimation to environmental change along with species differences in physiological processes and plant's occupation of heterogeneous environments. Laboratories emphasize field measurement techniques. Prerequisite: either BIOL 162 or BIOL 220. Offered: jointly with BIOL 424; W

**ESRM 479 Restoration Design (5) I&S/NW Erving, Fridley** Covers the design process in ecosystem restoration by presenting a series of weekly design problems that students solve as teams. Categorizes problems by disturbance type, including restoration necessitated by agriculture, urbanization, salt-marsh filling or diking, construction of transport corridors, etc. Includes a team design portfolio. Offered: Sp.

**ESRM 480 Landscape Plant Science and Sustainable Management (5) NW Kim** Principles and practices of plant management in urban and modified landscapes. Physiological basis for plant management and selection; site analysis and preparation; plant installation and aftercare; plant performance evaluation; long-term sustainable management and plant health care. Recommended: either ESRM 210 or ESRM 311; either BIOL 116 or BIOL 117. Offered: A.

**ESRM 489 Foreign Study (1-5, max. 15)** Individual foreign study of topics for which there is not sufficient demand to warrant the organization of regular classes. Offered: AWSpS.

**ESRM 490 Special Topics (1-5, max. 15)** Individual tutorial study of topics or courses under development to address the latest scientific developments in Forest Resources. Offered: AWSpS.

**ESRM 491 Field Studies (1-5, max. 10)** Independent field study or one time organized field courses with emphasis outside of the traditional classroom. Offered: AWSpS.

**ESRM 494 Senior Capstone Proposal (5-)** Selection of a capstone topic and type, either thesis or project. Students select a faculty advisor to assist them in the proposal writing process. Regular or Honors credit. Prerequisite: ESRM 200; ESRM 201; ESRM 300; ESRM 304. Offered: AWSpS.

**ESRM 495 Senior Project (-5)** Individual study of an environmental science and resource management problem under direction of a faculty member. Requires a written project report. Generally taken in last year of residence. Prerequisite: ESRM 494, which may be taken concurrently. Offered: AWSpS.

**ESRM 496 Senior Thesis (-5)** Statistical analysis and presentation of research results and discussion of results in a thesis paper. Students work with faculty advisors to complete field or laboratory research and then prepare the senior thesis. Prerequisite: ESRM 494, which may be taken concurrently. Offered: AWSpS.

**ESRM 499 Undergraduate Research (1-5, max. 15)** Individual research supervised by a faculty member. For advanced students desiring to extend their educational experience. Offered: AWSpS.

## Bioresource Science and Engineering

**BSE 104 Products and Energy from Renewable Resources (5) I&S/NW** Introduction to the structure, composition, and availability of renewable resources. Conversion of these materials into solid products, energy, and useful chemicals. Particular attention to the production of fiber (paper/board), fuels (ethanol/aromatics), and specialty chemicals (biopolymers, medicines, etc.). Comparison of renewable energy sources: biomass, water, geothermal, wind, and solar. Includes weekly laboratory session.

**BSE 150 Bioresource Science and Engineering Seminar (1) I&S/NW Gustafson** Introduces the science and technology of bioresources, including paper. Faculty, advisers, and guest lectures present on topics throughout the quarter. Credit/no credit only. Offered: A.

**BSE 201 Introduction to Pulp, Paper, and Bioproducts (3) NW Hodgson** Broad overview of the science and technology of producing pulp and paper. Introduction of the PSE major course sequence and various career options. Examination of Pacific Northwest pulp and paper production facilities. Offered: concurrently with CFR 505; A.

**BSE 202 Pulp and Paper Lab and Field Studies (1) NW Hodgson** Laboratory and field trip studies in pulp and paper technology. Visits to local forest product manufacturing facilities. Required for PSE majors. Credit/no credit only. Offered: A.

**BSE 211 Creativity and Society (5) VLPA, I&S Allan** Explores the nature of creativity and innovation in U.S. and other societies. Investigates the processes of thinking and techniques of idea generation in fields such as art, music, science, engineering and medicine. Offered: A.

**BSE 248 Paper Properties (4) NW** Acquaints students with raw material characteristics, physical and mechanical concepts, nomenclature, and procedures related to evaluating paper and paperboard product properties. Emphasizes structural, optical, mechanical, and moisture related properties. Prerequisite: BSE 201. Offered: A.

**PSE 309 Creativity and Innovation (2) VLPA Allan** Understanding creativity and creative thinking; its challenges and dynamics through knowledge, judgment, planning, and observation. Techniques of creative thinking. Design and development of creative games. Computer-aided creative thinking. Creation, protection, and exploitation of a useful idea, including bargaining and negotiations. Offered: jointly with CHEM E 309; Sp.

**BSE 399 Undergraduate Internship (1-5, max. 15)** Internship experience with a public agency or private company, supervised and approved by a faculty member. Preparation of professional report reflecting on the experience is required. Credit/no credit only. Offered: AWSpS.

**BSE 406 Natural Products Chemistry (5) NW Bura, McKean** Provides knowledge of chemistry of aqueous and solvent rich systems, natural and synthetic polymers, and of interactions with inorganic materials and trace substances present in biomass processing systems. Covers the chemistry of lignocellulosic biomass components: cellulose, hemicellulose, lignin, and extractives. Presents the fundamental chemistry

of biomass conversion process. Prerequisite: either CHEM 237 or CHEM 335. Offered: A.

**BSE 420 Pulping and Bleaching Processes (3)** Conversion of wood to mechanical and chemical pulps. Kraft, sulfite, and semi-chemical pulping processes. Chemical recovery systems. Bleaching of mechanical and chemical pulps. Offered: W.

**BSE 421 Papermaking Unit Operations Laboratory (3) Gustafson** Depends understanding of underlying principles of papermaking and to provide hands-on experience with major papermaking unit operations. Develops the ability to formulate and conduct a short investigation, to make appropriate measurements, to analyze data using appropriate statistics, and to report results in oral and written form. Prerequisite: BSE 340. Offered: W.

**BSE 422 Bioresource Engineering III (4) Gustafson** Introduces process simulators and their application to model unit operations and large scale integrated facilities such as biorefineries and pulp and paper mills. Covers applications to optimize processes for production and environmental impact, basic control equipment, process models used in control, types of controllers, and simple controller tuning. Prerequisite: BSE 421. Offered: A.

**BSE 426 Bioresource Laboratory (4) Bura, McKean** Covers bioconversion laboratory techniques, focusing on design and operation of conversion processes to produce high value biorenewable products based on chemistry of biomass. Products include ethanol, pulp, glycols, and sugar streams. Includes significant product design component, and hands-on laboratory creation of products based on design. Prerequisite: BSE 420; Q SCI 381. Offered: Sp.

**BSE 430 Papermaking Processes (5) McKean** Examines stock preparation operations (refining, screening, and cleaning) for papermaking and sheet forming as a unit of operations. Considers related unit operations of fluid dynamics and heat transfer as they apply to the commercial process. Covers sheet finishing operations of surface sizing, calendaring, and rewinding. Analyzes physics of fiber webs. Prerequisite: CHEM E 340. Offered: A.

**BSE 436 Pulp and Paper Laboratory II (3)** Paper testing, paper additives, flocculation, drainage, retention, heat transfer, and fluid dynamics in papermaking from virgin and recycled raw materials. Prerequisite: BSE 430. Offered: W.

**BSE 480 Bioresource Design I (4) I&S/NW Briggs, Gustafson** Design and production of biomass derived products meeting given specifications and financial constraints, integrating coursework knowledge to solve complex, open-ended design problems. Specific considerations in design include: economic, marketability, environmental, sustainability, ethical, health and safety, social, and political. Prerequisite: 2.0 in BSE 406; 2.0 in BSE 420; 2.0 in BSE 430. Offered: W.

**BSE 481 Bioresource Design II (5)** Comprehensive design of pulp and paper processes, including: economic feasibility studies; process equipment design, optimization, and control; and overall process integration and layout. Safety and ethics in the design process. Prerequisite: BSE 480. Offered: Sp.

**BSE 488 Polymer Chemistry (3) Allan** Fundamental review of synthetic and natural polymers, including kinetics of formation, molecular weight distributions, and solid-state and solution properties. Prerequisite: either CHEM 237 or CHEM 335. Offered: W.

**BSE 489 Foreign Study (1-5, max. 15)** Individual foreign study of topics for which there is not sufficient demand to warrant the organization of regular classes. Offered: AWSpS.

**BSE 490 Special Topics (1-5, max. 15)** Individual tutorial study of topics or courses under development to address the latest scientific developments in Forest Resources. Offered: AWSpS.

**BSE 497 Pulp and Paper Internship (1-2, max. 3)** Technical and economic analysis of commercial pulp and paper installations. Structured visits to industrial operations to observe technical aspects of pulp and paper curriculum in practice.

Preparation of visitation reports and analysis in seminar setting. Offered: AWSpS.

**BSE 499 Undergraduate Research (1–5, max. 15)** Individual research supervised by a faculty member. For advanced students desiring to extend their educational experience. Offered: AWSpS.

## School of Marine Affairs

### SCHOOL OVERVIEW

3707 Brooklyn Avenue Northeast

The School of Marine Affairs offers an interdisciplinary program of study leading to the Master of Marine Affairs degree. Marine affairs concerns management and policy questions on the uses of the coastal and offshore regions of the ocean and their resources. The core curriculum includes courses from marine affairs, economics, law, marine sciences, and public affairs.

### GRADUATE PROGRAM

Graduate Program Coordinator

3707 Brooklyn NE, Box 355685

206-543-4326, 206-543-7004

[uwsma@uw.edu](http://uwsma@uw.edu)

### Master of Marine Affairs

The School of Marine Affairs offers an internationally recognized master's degree program for launching careers in marine policy and administration. Students learn creative approaches to resolving marine problems and conflicts, charting rational use of living and non-living marine resources, and managing human activities on the coasts, at sea, and in estuaries, wetlands, and large inland bodies of water.

A major program objective is to prepare students for professional careers in policy making, management, teaching, and research. Breadth of study is emphasized, and all students are expected to gain familiarity with relevant aspects of the social, technological, and environmental sciences. In addition, each student is expected to develop a professional and scholarly proficiency in a particular aspect of marine affairs.

Completion of the MMA program normally requires two academic years for students who have received a baccalaureate degree. During the first year, students develop a comprehensive understanding of the marine affairs field and acquire analytic skills. During the second year, a special competence is developed in a topical area of interest (e.g., ocean and coastal management, ports and marine transportation, marine environmental protection, marine resources management, ocean and coastal tourism and recreation), and a thesis is prepared and presented under the guidance of a faculty supervisory committee. Individual courses of study may be adjusted to accommodate prior experience and academic background. Mid-career and other qualifying students can apply to follow a non-thesis track emphasizing additional coursework and a degree project.

### Admission Requirements

Admission to the School of Marine Affairs is based on evaluation of required application materials in competition with other applicants. Required materials include Graduate Record Examination general-test scores, completed departmental supplementary information form, three letters of recommendation, official academic transcripts, and a statement of career objectives. Applicants must apply directly to, and be accepted by, the University's Graduate

School. Course sequences begin each autumn quarter, and new students normally are admitted only at that time.

### Degree Requirements

59 credits as follows:

- The Core Curriculum (29 credits minimum)
  - Introduction to Marine Affairs: SMA 500 (5), SMA 501 (3)
  - Economics: SMA 536 (3). (Students may be waived by the Graduate Program Coordinator from SMA 536 due to adequate undergraduate training, but are required to take at least one economics course at the 400 or 500 level. The following courses are suggested: SMA 537 (3), SMA 538 (3), ECON 435 (5), ECON 436 (5).)
  - Marine Law: SMA 506/LAW 561 (3) or SMA 515/LAW 565(3)
  - Policy Analysis: SMA 519 (3) or PB AF 513 (3)
  - Policy Processes: one of the following: SMA 507 (3), SMA 508 (3), SMA 521 (3), SMA 523 (3), PB AF 590/CFR 592 (3) (when course content appropriate; check with Graduate Program Coordinator); PB AF 592/FM 571 (5)
  - Marine Science: SMA 591 (3). (Students may be waived by the Graduate Program Coordinator from SMA 591, but are required to take at least one 400- or 500-level science course. The following courses are suggested: SMA 510 (3); FISH 450 (4); FISH 454 (3); BIOL 472 (5); or BIOL 473 (3).)
  - Quantitative Skills: one of the following: The required skill level is equivalent to intermediate statistics, including an understanding of point estimates, confidence intervals and regression equations. Students not meeting this requirement through undergraduate classes or experience should take one appropriate course while at SMA. Recommended courses include: Q SCI 381 (5), STAT 301 (5), or STAT 311 (5). (Note: Although 300-level courses do not qualify for graduation credits, the School will waive 3 credits of the 59-credit SMA graduation requirement for students completing one of these courses.)
  - Social Science Data Collection and Analysis: one of the following: SMA 476 (3), SMA 512 (3), PB AF 507 (3), GEOG 425 (5), or CRF 400 (3)
  - Marine Affairs Seminar: SMA 550 (3)
- Electives (20 credits minimum or 10 additional elective credits for non-thesis track): Elective credits must qualify as graduate credit (typically 400- or 500-level courses) offered in any UW department or school. Students should consult with their advisor or Thesis Committee Chair in choosing a set of elective courses. At least 6 credits, and two courses must come from the following list of SMA courses: SMA 433 (5), SMA 480 (3), SMA 485 (3), SMA 499 (var.) (when subject is African Population, Development and Marine Environment), SMA 509 (3), SMA 510 (3), SMA 514 (3), SMA 516 (3), SMA 517 (3), SMA 540 (3), SMA 555 (3), SMA 581 (3), SMA 550 (1-3) (cannot simultaneously be used to meet core requirements).
- The Thesis and Thesis Presentation (10 credits minimum for thesis track students): SMA 700 (minimum 9 credits); SMA 570 (1).
- Career Skills (non-credit requirement): First year: One career counseling appointment during fall quarter. One resume review session during winter quarter. Second year: One career counseling appointment during fall quarter. One resume review session during winter quarter.

### Financial Aid

The School of Marine Affairs has a limited number of positions for graduate student appointments as research assistants. Applicants in need of support are urged to investigate outside sources of funding.

### COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at [www.uw.edu/students/crscat/](http://www.uw.edu/students/crscat/)

**SMA 103 Society and the Oceans (5) I&S/NW** Explores the social and policy dimensions of the ocean environment and ocean management policy. Attention to how human values, institutions, culture, and history shape environmental issues and policy responses. Examines case studies and influential frameworks, such as the ocean as "tragedy of the commons". Offered: jointly with SIS 103

**SMA 433 Environmental Degradation in the Tropics (5) I&S/NW** Considers theories and controversies of environmental degradation in the tropics, ecological and social case studies of Central American rain forests and Southeast Asian coral reefs, and implications of environmental management techniques. Offered: jointly with SIS 433.

**SMA 455 Marine Business Environment in Russia and Eastern Europe (3) I&S Kaczynski** International marine business environment of Russia and the maritime nations of East Europe; their transition process from communist to free market economic systems. Covers aspects of doing business in marine-related fields such as shipping, fisheries, shipbuilding, ports, and land infrastructures, marine tourism, and water sports. Offered: jointly with SISRE 455.

**SMA 476 Introduction to Environmental Law and Process (3) I&S Bryant, Hershman** Use and application of key statutes in marine living resources management. Overview of administrative law and process. Basic legal research, reading, and briefing selected judicial opinions. Participatory case study component. Designed for non-law graduate and advanced undergraduate students. Offered: jointly with ENVIR 476; A.

**SMA 480 Human Dimensions of Fishery Management (3) I&S/NW Gallucci, Miller** Techniques and philosophy for conservation, management and development of harvested marine populations. Emphasis on integration of ecological, sociological, and economic dimensions of institutional decision making for policy formation in uncertain environments. Offered: jointly with FISH 480.

**SMA 485 Pacific Recreation and Tourism Issues (3) I&S/NW Miller** Examines how marine tourism links people to one another and to the environment. Utilizes concepts from cultural anthropology, sociology, political science, geography, ecology, conservation biology, and planning. Topics include: ecotourism, ethnic tourism, marine parks and protected area, fisheries, sustainable development, tourism ethics, and marine environmental education.

**SMA 499 Undergraduate Research (1–15, max. 15)** Research on assigned topics under the supervision of faculty members. Prerequisite: permission of instructor.

**SMA 500 Introduction to the Human Dimensions of Global Change (3) Klinger** Introduces students to human dimensions of global change in the marine environment. Examines how changes are physical, social and institutional; and how global climate change affects the ability of ecosystems to provide services that support humankind. Explores globalization and third world development, changes the use of coastal and ocean resources. Offered: A.

**SMA 501 Integrated Marine Affairs Practice (3)** Introduction to the practice of integrated assessment in marine affairs through the use of case studies and group analysis projects. Prerequisite: SMA 500 plus two of the following: SMA 519, SMA 536, SMA 591, or permission of instructor. Offered: A.

**SMA 506 International Law of the Sea (3)** Offered: jointly with LAW B 561.

**SMA 507 International Organizations and Ocean Management (3)** *Miles* Survey of the manner in which international regimes and organizations attempt to manage and regulate the uses of the ocean. Primary emphasis is on the analysis of the effectiveness of regimes and of processes that support or constrain these organizations. Prerequisite: SMA 500 or permission of instructor. Offered: jointly with PB AF 538.

**SMA 508 National Marine Policy Processes (3)** *Miles* Comparative institutional dimensions of marine policy processes. Marine policy context at the national level and the dynamics that drive policy formulation and policy implementation.

**SMA 509 Integrated Coastal Management (3)** *Christie, Hershman* Managing multiple uses of coastal waters and the adjacent land; conflicts arising from competition for space and resources; organization, scientific, and economic problems associated with coastal management; planning and management experience in the United States and Southeast Asia. Prerequisite: SMA 500 or permission of instructor.

**SMA 510 Topics in Marine Ecology (3)** *Klinger* Study of ecological principles as they apply to marine species, populations, and ecosystems, using current examples from the primary literature, including contemporary issues such as species declines, species additions, pollution, and global change. Offered: W.

**SMA 512 Interviewing Methods and Environmental Topics (3)** *Miller* Focuses on qualitative techniques employed by social scientists and other researchers (e.g., sociologists, cultural anthropologists, political scientists, journalists, reporters) in interview situations. Students conduct interviews and limited participant observation with people in public, private, and activist sectors. Relevant to students with interests in marine affairs, forestry, fisheries, and environmental studies.

**SMA 514 Marine Pollution Management Issues (3)** *Leschine* Management and policy aspects of marine environmental protection, emphasizing the two-way interaction between environmental managers and environmental and policy scientists which shapes policy.

**SMA 515 U.S. Coastal and Ocean Law (3-5, max. 5)** *Hershman* Study of the legal framework in the United States controlling allocation and use of coastal and marine resources. Topics include coastal zone management, fisheries management, protection of marine mammals and endangered species, marine pollution, offshore oil and gas development, and marine transportation. Offered: jointly with LAW B 565.

**SMA 516 Seaport Management (3)** Role of port and harbor agencies in management of marine uses: cargo and trade, economic development, tourism and recreation, fisheries, environmental protection. Management functions of planning, marketing, finance, engineering, environmental assessment. Examples and guest speakers from Port of Seattle and other Puget Sound ports. Prerequisite: SMA 500 or permission of instructor.

**SMA 517 Marine Uses: Transportation and Commerce (3)** *Hershman* Role of the oceans in the transportation of people and materials, character and trends in vessel design and terminal facilities, pattern and nature of industry organization, regulations, economics of the shipping industry, management of fleets and vessels, individuals at sea and ashore, national policies affecting the merchant marine and port facilities. Prerequisite: SMA 500 or permission of instructor.

**SMA 519 Marine Policy Analysis (3)** *Leschine* Goal is appreciation for and basic working knowledge of techniques used in policy analysis. Techniques are explored in both quasi-realistic settings and in application to real world problems of marine policy.

**SMA 521 Governmental Responses to Global Climate Change (3)** *Miles* Exploration of major scientific, policy and legal issues pertaining to problems of global climate change including regime design, use of climate models, impact on hydrology water resources, and forests.

**SMA 523 International Science and Technology Policy (3)** *Miles* Analyzes the relationships between research and

development policy, capabilities, and national technological strategies for advanced industrial and less-developed countries. Deals with international implications as countries make policies in regional and global organizations. Examples chosen from space telecommunication, weather and climate modification, airline transportation, nuclear energy, and seabed exploration.

**SMA 525 Marine Protected Area Management and Science (3)** *Fluharty, Klinger* Examines management and scientific issues involved with the design, establishment, operation, and maintenance of MPAs. Offered: Sp.

**SMA 536 Applied Microeconomics for Marine Affairs (3)** *Huppert* Acquaints students with microeconomic tools commonly employed in policy analysis. Emphasis is placed on mastery of basic concepts, definitions, and models useful to marine policy, including determinants of price and outputs in competitive markets, effects of other market structures, market failure, and applied welfare economics.

**SMA 537 Economic Aspects of Marine Policy (3)** *Huppert* Development of pertinent economic concepts and their application to selected topics in marine policy decision making, including maritime policy, OCS oil and gas development, and wetlands management. Prerequisite: SMA 500 or permission of instructor. Offered: jointly with ECON 537; W.

**SMA 538 Economics of Living Marine Resources (3)** *Huppert* Develops pertinent economic concepts and applications for conservation, regulation, and restoration of fisheries and other living resources. Gives special attention to fishery management, including harvest regulation and enforcement, recreational fisheries evaluation, property rights regimes, contemporary issues, and marine protected area management. Offered: jointly with ECON 538; Sp.

**SMA 540 International Strategic Planning for Marine Resources (3)** *Kaczynski* Marine economies are affected by shrinking resources, population pressure, expanding economic globalization. Case studies from the third world and economies in transition illustrate strategic economic planning. Students research selected topics. Prerequisite: SMA 500 or permission of instructor. Offered: A.

**SMA 550 Special Topics in Marine Studies (1-3, max. 18)** Examination of various aspects of marine studies. Content varies, depending upon the interests of the faculty and students. Intended for the joint participation by the faculty and advanced students in the investigation of selected topics. One or more groups are organized each quarter.

**SMA 555 Comparative Marine Business in the North Pacific (3)** Strategies of Russian, Canadian, Japanese, and American enterprises and governments in promotion of marine business in the North Pacific. Socio-economic characteristics of the four powers; role of public and private sectors in foreign trade and investment; Russia's transition to free-market economic system; and business practices in the region. Offered: jointly with SISRE 555.

**SMA 570 Thesis Presentation (1)** *Fluharty* Completion of the thesis requirement for SMA. Prepare a professional presentation to a peer audience. Offered: AWSpS.

**SMA 581 Case Study Method: Living Marine Resource Management (3)** Introduces living marine resource management. Presents the case study method of research. Faculty presentations occupy first half of quarter, student presentations the second half. Prerequisite: SMA 580 or permission of instructor. Offered: jointly with FISH 581.

**SMA 585 Climate Impacts on the Pacific Northwest (4)** *Mantua, Snover* Knowledge of past/future patterns of climate to improve Pacific Northwest resource management. Topics include the predictability of natural/human-caused climate changes; past societal reactions to climate impacts on water, fish, forest, and coastal resources; how climate and public policies interact to affect ecosystems and society. Offered: jointly with ATM S/ESS/ENVIR 585; Sp.

**SMA 591 Marine Science in the Coastal Zone (3)** *Klinger* Presentation and analysis of the marine science of estuarine, coastal, and open ocean systems, including evaluation and interpretation of scientific information necessary for management. Lectures, discussions, and readings empha-

size the relevance of natural processes to marine environmental management and decision-making. Offered: jointly with OCEAN 591; A.

**SMA 600 Independent Study or Research (\*)**

**SMA 700 Master's Thesis (\*)**

## Oceanography

### SCHOOL OVERVIEW

108 Oceanography Teaching Building

Oceanography—study of the marine environment and its interactions with the earth, the biosphere, and the atmosphere—is prompted both by the intellectual desire to understand how the oceans move and how life develops in a salty, cold environment, and the need to use wisely the ocean's resources for the benefit of humanity. As an interdisciplinary science, oceanography integrates the basic principles of biology, chemistry, geology, physics, geophysics, mathematics, botany, zoology, meteorology, and geography. Applications of high technology to oceanographic instrumentation and vessels, increasingly sophisticated computers, satellite remote sensing, and innovative methodologies are rapidly opening new possibilities for exploration and study. Oceanography is divided into four areas of emphasis:

*Biological Oceanography* examines the processes governing the distribution, abundances, and production of plants, animals, and nutrients in the oceanic ecosystem. Emphasis is on investigations of bacteria, phytoplankton, zooplankton, and benthic organisms.

*Chemical Oceanography* investigates the complex chemistry, distribution, and cycling of dissolved substances, nutrients, and gases in seawater, the mechanisms controlling them and their origins and fates.

*Marine Geology and Geophysics* studies marine sediments (their formation, transport, and deposition); ocean basin formation (plate tectonics); processes governing shoreline formation; and the origin, structure, and history of the oceanic crust and upper mantle.

*Physical Oceanography* endeavors to understand and predict motions in the sea from millimeters through tidal and current scales to the great ocean gyres, the distribution of physical properties (temperature, salinity, sea ice), and air-sea interaction and its implications for climate.

### UNDERGRADUATE PROGRAM

#### Adviser

108 Oceanography Teaching Building, Box 357940

206-543-5039

[student@ocean.washington.edu](mailto:student@ocean.washington.edu)

The School of Oceanography offers the following programs of study:

- The Bachelor of Science degree with a major in oceanography
- The Bachelor of Arts degree with a major in oceanography
- Specializations include biological, chemical, or physical oceanography, or marine geology and geophysics
- A minor in oceanography

### Bachelor of Arts

*Suggested Pre-College Courses:* Interest in natural sciences and a good record in high school science courses, particularly mathematics. One year each of biology, chemistry, and physics recommended.

*Suggested First- and Second-Year College Courses:* MATH 124, MATH 125, MATH 126 (or Q SCI 291, A SCI 292, Q SCI 381); CHEM 142, CHEM 152 (or CHEM 144, CHEM 154); BIOL 180, BIOL 200; one of ESS 210, ESS 211, or ESS 212; PHYS 121, PHYS 122, PHYS 123 (or PHYS 114, PHYS 115, PHYS 116); OCEAN 220; and English composition.

### Department Admission Requirements

Students in good academic standing may declare this major at any time.

### General Education Requirements

- English composition (5 credits), with a minimum grade of 2.0
- Writing courses (10 credits), including OCEAN 220 (3 credits) and OCEAN 444 (5 credits)
- Quantitative and Symbolic Reasoning (10 credits), met by departmental requirements below
- Individuals & Societies (20 credits). 10 of these credits must be taken out of major, defined as courses that neither count toward major requirements below nor have the prefix of the department from which the student is earning a degree (includes co-listed courses).
- Visual, Literary, & Performing Arts (10 credits)
- Natural World (20 credits). 10 credits must be taken out of major, defined as courses that neither count toward major requirements below nor have the prefix of the department from which the student is earning a degree (includes co-listed courses).

### Major Requirements

Same as for the Bachelor of Science degree (see below), except only 10 credits of upper-division science, mathematics, or engineering courses are required.

## Bachelor of Science

*Suggested Pre-College and First- and Second-Year College Courses:* Same as for Bachelor of Arts degree (shown above).

### Department Admission Requirements

Students in good academic standing may declare this major at any time.

### General Education Requirements

Same as for the Bachelor of Arts degree (shown above).

### Graduation Requirements

Minimum 180 credits, to include the following:

- Foundational Courses (55 credits):* PHYS 121, PHYS 122, PHYS 123 (or PHYS 114, PHYS 115, PHYS 116); MATH 124, MATH 125, MATH 126 (or Q SCI 291, Q SCI 292, Q SCI 381); CHEM 142, CHEM 152 (or CHEM 144, CHEM 154); BIOL 180, BIOL 200; one of ESS 210, ESS 211, ESS 212 ; and BIOL 161-BIOL 162 or BIOL 180, BIOL 200, BIOL 220
- OCEAN 200, OCEAN 201, OCEAN 210, OCEAN 220, OCEAN 400, OCEAN 410, OCEAN 420, OCEAN 430, OCEAN 443, OCEAN 444 (35 credits)
- 400-level oceanography coursework selected in the student's area of specialization, in consultation with a faculty adviser (6 credits).
- Upper-division science, mathematics, or engineering, selected in the student's area of specialization, in consultation with a faculty adviser (20 credits)
- Free electives to bring credit total to minimum 180.
- Minimum 2.0 grade in all required oceanography courses.

## Minor

*Minor Requirements:* 25 credits as follows:

- OCEAN 200, OCEAN 210, OCEAN 220
- One of the following: OCEAN 400, OCEAN 410, OCEAN 420, or OCEAN 430
- OCEAN 442
- 9 credits of OCEAN electives, chosen from 300- and 400-level oceanography courses

## Student Outcomes and Opportunities

- Learning Objectives and Expected Outcomes:* The degree offers students a solid foundation in biological, chemical, geological, and physical oceanography, together with more specialized expertise in one of those options. Expertise is gained through team-based field and laboratory research during the sophomore and junior years, then by independent research on a thesis topic during the senior year. Emphasis is on building skills with the tools and techniques of shipboard oceanographic research and data analysis and interpretation. Students engage in fieldwork and data collection, learn to analyze and interpret that data, and prepare scientific reports. Additionally students acquire familiarity with the specialized instruments of oceanographic research. The program prepares students to enter the profession directly or to pursue graduate studies. Oceanographers seek to produce a new understanding of an ocean system and to explore the potential consequences to the marine environment of human activities. They collect samples and data, analyze and interpret them, and prepare and disseminate the results. They work at sea, on land, in laboratories, and with computers. Most are employed in education and research institutions and federal, state and local government agencies. Other employers include environmental consulting firms and private companies extracting and harvesting marine products. A degree can also serve as a background for a career in teaching, administration, marine affairs, computing, or environmental studies.
- Instructional and Research Facilities:* The school has extensive laboratory facilities equipped with highly specialized instruments and computers for teaching and research. The school operates two research vessels: the 274 foot R/V *Thomas G. Thompson*, used chiefly for open ocean research throughout the world, and the 65 foot R/V *Clifford A. Barnes*, used for research in coastal waters and estuaries of Washington. Undergraduate students have ample opportunities to gain research experience in the laboratories of faculty and to do oceanographic research in Puget Sound.
- Honors Options Available:* College Honors (Completion of both Interdisciplinary Honors and Departmental Honors requirements). With Distinction (School Honors). See adviser for requirements.
- Research, Internships, and Service Learning:* Special opportunities for oceanography majors are provided by involving students in undergraduate research projects and part-time employment.
- Department Scholarships:* See adviser for availability.
- Student Organizations/Associations:* The Student Oceanographic Society (SOS) provides peer advice, organizes field trips, sponsors alumni career panels, and holds social gatherings.

## GRADUATE PROGRAM

Graduate Student Services

108 Ocean Teaching, Box 357940

[student@ocean.washington.edu](mailto:student@ocean.washington.edu)

The School of Oceanography provides instruction and research opportunities at the graduate level in all areas: biological, chemical, and physical oceanography, and marine geology and geophysics. The program of study emphasizes

independent research in conjunction with basic and specialized courses. Interdisciplinary research is encouraged, and students enjoy the opportunity to work across the usual scientific boundaries. Coursework during the first two years is required in each option; specialized coursework is structured to fit the student's background and objectives. Foreign-language proficiency is required only when deemed crucial to scholarly research.

## Master of Science

The program of study includes coursework in the student's area of interest and the other oceanography options, as well as completion of an approved research project and oral presentation of the results. Thesis and non-thesis programs are offered; most students select the non-thesis option.

### Admission Requirements

- One official copy of transcript(s) from all colleges or universities attended.
- Minimum 3.00 GPA or B for last 90 quarter (60 semester) credits
- GRE scores
- TOEFL scores for international students.
- Statement of goals and objectives (to be defined in online application), which may include any or all of the following: How or why applicant became interested in oceanography, significant accomplishments, summary of research experience, research area(s) of special interest, ultimate goals, extracurricular activities and interests.
- Three letters of recommendation on School of Oceanography forms (included in online application). Recommendations should be from faculty or scientists familiar with the applicant's academic achievements and research experience. Applicants who have been out of school for some time may include recommendations from employer(s), but all efforts should be made to include at least one letter from academic faculty.

### Degree Requirements

36–45 credits, as follows:

Thesis program: Minimum 36 quarter credits (27 course credits and minimum 9 credits of thesis). Non-thesis program: Minimum 36 quarter credits of coursework.

- At least 18 of the minimum 36 quarter credits must be numbered 500 and above. (In a thesis program, 9 of the 18 credits must be course credits and 9 may be OCEAN 700, master's thesis.)
- Numerical grades in at least 18 quarter credits of coursework taken at the UW. The Graduate School accepts numerical grades (a) in approved 400-level courses accepted as part of the major, and (b) in all 500-level courses. A minimum cumulative GPA of 3.00 is required for a graduate degree at the University.
- Minimum three full-time quarters of residence credit. Part-time quarters may be accumulated to meet this requirement.
- In the thesis degree program, a thesis, approved by the supervisory committee, must be submitted to the Graduate School. A student must register for a minimum of 10 credits of thesis (OCEAN 700). With the exception of summer quarter, students are limited to a maximum of 10 credits per quarter of thesis (OCEAN 700).
- A final master's examination, either oral or written, as determined by the student's supervisory committee.

*Biological Oceanography Option:* The core curriculum consists of OCEAN 530 (3), OCEAN 531 (3), OCEAN 532 (3), OCEAN 533 (3). Master's level students must take a minimum of 3 credits of advanced biological oceanography courses.

**Chemical Oceanography Option:** The core curriculum consists of OCEAN 520 (3). Master's level students must take a minimum of three advanced chemical oceanography courses.

**Marine Geology and Geophysics Option:** The core curriculum consists of OCEAN 540 (3), OCEAN 541 (3), OCEAN 545 (3).

**Physical Oceanography Option:** The core curriculum consists of OCEAN 500 (1), OCEAN 510 (3), OCEAN 511 (3), OCEAN 512 (3), OCEAN 513 (3), OCEAN 514 (3), OCEAN 515 (3), OCEAN 517 (2). Physical oceanography students take a sequence of three courses in applied mathematics.

**Out-of-Option Requirement:** Minimum 12 credits of numerically graded, 500-level courses, 6 credits of which must be taken as 3-credit courses in two options outside a student's option. The remaining 6 out-of-option credits may be in courses in oceanography (outside a student's option) or in a related science selected at the discretion of the student and supervisory committee. These courses must be completed with the first two years of study. A grade of less than a 3.0 in any course will necessitate repeating the course or taking another course in that area as recommended by the student's committee.

## Doctor of Philosophy

The degree program places a strong emphasis on research following completion of course requirements and the general examination. Upon successful completion of the general examination, the student undertakes an original research investigation, which is described in the dissertation and defended during the final examination.

### Admission Requirements

- One official copy of transcript(s) from all colleges or universities attended.
- Minimum 3.00 GPA or B for last 90 quarter (60 semester) credits
- GRE scores
- TOEFL scores for international students.
- Statement of goals and objectives (to be defined in online application), which may include any or all of the following: How or why applicant became interested in oceanography, significant accomplishments, summary of research experience, research area(s) of special interest, ultimate goals, extracurricular activities and interests.
- Three letters of recommendation on School of Oceanography forms (available in online application). Recommendations should be from faculty or scientists familiar with the applicant's academic achievements and research experience. Applicants who have been out of school for some time may include recommendations from employer(s), but all efforts should be made to include at least one letter from academic faculty.

### Degree Requirements

Minimum 90 credits, as follows:

- Completion of a program of study and research as planned by the Graduate Program Coordinator in the student's major department or college and the Supervisory Committee. Half the total program, including dissertation credits, must be in courses numbered 500 and above. At least 18 credits of coursework at the 500 level and above must be completed prior to scheduling the general examination.
- Presentation of a minimum three years (nine full-time quarters) of resident study, two being at the UW with at least one year in continuous full-time residence. The year of full-time residence may be satisfied by completing any three full-time quarters (not necessarily continuous) at the University of Washington and must be completed prior to the general examination. Residence

requirement for the doctoral degree cannot be met solely by part-time study. A minimum of two academic years of resident study must be completed prior to scheduling the general examination.

- With the approval of the degree-granting unit, an appropriate master's degree from an accredited institution may be applied toward one year of resident study at the UW.
- Numerical grades must be received in at least 18 quarter credits of coursework taken at the UW. The Graduate School accepts numerical grades (a) in approved 400-level courses accepted as part of the major, and (b) in all 500-level courses. A minimum cumulative GPA of 3.00 is required for a graduate degree at the University.
- Creditable passage of the general examination. Registration as a graduate student is required the quarter the examination is taken and candidacy is conferred.
- Preparation and acceptance by the Dean of the Graduate School of a dissertation that is a significant contribution to knowledge and clearly indicates training in research. Credit for the dissertation ordinarily should be at least one-third of the total credit. The candidate must register for a minimum of 27 credits of dissertation over a period of at least three quarters. At least one quarter must come after the student passes the general examination. With the exception of summer quarter, students are limited to a maximum of 10 credits per quarter of dissertation (OCEAN 800).
- Creditable passage of a final examination, usually devoted to defense of the dissertation and the field with which it is concerned. The general and final examinations cannot be scheduled during the same quarter. Registration as a graduate student is required the quarter the examination is taken and the degree is conferred.
- Completion of all work for the doctoral degree within ten years. This includes quarters spent on leave or out of status as well as applicable work from the master's degree from the UW or a master's degree from another institution, if applied toward one year of resident study.

**Biological Oceanography Option:** The core curriculum consists of OCEAN 530 (3), OCEAN 531 (3), OCEAN 532 (3), OCEAN 533 (3). Doctoral level students must take a minimum of 9 credits of advance biological oceanography courses.

**Chemical Oceanography Option:** The core curriculum consists of OCEAN 520 (3). Doctoral level students must take a minimum of six advanced chemical oceanography courses.

**Marine Geology and Geophysics Option:** The core curriculum consists of OCEAN 540 (3), OCEAN 541 (3), OCEAN 545 (3).

**Physical Oceanography Option:** The core curriculum consists of OCEAN 500 (1), OCEAN 510 (3), OCEAN 511 (3), OCEAN 512 (3), OCEAN 513 (3), OCEAN 514 (3), OCEAN 515 (3), OCEAN 517 (2). Physical oceanography students are also expected to take a sequence of three courses in applied mathematics.

**Out-of-Option Requirement:** Minimum 12 credits of numerically graded, 500-level courses, 6 credits of which must be taken as 3-credit courses in two options outside a student's option. The remaining 6 out-of-option credits may be in courses in oceanography (outside a student's option) or in a related science selected at the discretion of the student and Supervisory Committee. These courses must be completed within the first two years of study. A grade of less than 3.0 in any course necessitates repeating the course or taking another course in that area as recommended by the student's committee.

## Financial Aid

Normally all students pursuing a graduate degree are supported by research or teaching assistantships, or by fellowships and scholarships from national or private sources.

Most appointments continue through the summer when students are engaged in research.

## COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at [www.uw.edu/students/crscat/](http://www.uw.edu/students/crscat/)

**OCEAN 100 Explore Oceanography at UW (1)** Explores the research and experiences of the Oceanography department's faculty, graduate students, and undergraduate students. Credit/no credit only. Offered: A.

**OCEAN 101 Survey of Oceanography (5) NW** Holistic view of fundamental principles of ocean science; the geography and geology of ocean basins; chemistry of sea water; physical dynamics of currents, waves, and tides; coastal processes; and the biology of diverse ecosystems such as deep sea vents, coral reefs, and estuaries. Intended for nonmajors.

**OCEAN 102 The Changing Oceans (5) I&S/NW** Historical case studies of research on the ancient oceans, deep-sea exploration, climate change and the oceans, and human impacts on marine life. Students consider societal factors affecting progress in marine science, changing popular attitudes toward the oceans, and key current policy implications of marine science. Intended for nonmajors. Offered: W.

**OCEAN 115 Astrobiology: Life in the Universe (5) NW** Introduction to the new science of astrobiology, study of the origin and evolution of life on Earth, and the search for microbial and intelligent life elsewhere in the Universe. Designed for non-science, liberal arts majors. Offered: jointly with ASTBIO/ASTR/ESS 115/BIOL 114.

**OCEAN 200 Introduction to Oceanography (3) NW** *Armbrust* Description of the oceans. Emphasis on relations of biology, chemistry, geology, and physics in marine environments. Examination of relationships and interactions at macro-, meso-, and microscales in the ocean. Intended for science majors. Offered: Sp.

**OCEAN 201 Introduction to Oceanography Lab (2) NW** *Ingalls* Provides opportunities to experiment with oceanographic concepts through laboratory and field experiences, and learn about the scientific method of inquiry as it applies to the study of geology, physics, chemistry, and biology of the ocean. Emphasizes topics that explore current challenges faced by the ocean and its ecosystem. Co-requisite: OCEAN 200. Offered: Sp.

**OCEAN 210 Ocean Circulation (3) NW** The large-scale circulation of the ocean. Topics include temperature-salinity analysis; water mass identification; water, salt, and heat budgets; chemical tracer distributions; advection and diffusion. Prerequisite: either Ocean 200, or OCEAN 250/BIOL 250/FISH 250; recommended: either PHYS 114 or PHYS 121. Offered: A.

**OCEAN 220 Introduction to Field Oceanography (3/5) NW** Design and conduct a field study in oceanography. Field trip required (usually during Spring break). Focus on active learning, deployment of instruments, data collection, interpretation, and presentation. Honors section incorporates additional field experimentation and study in marine biology. Writing class. Prerequisite: either OCEAN 200, or OCEAN 250/BIOL 250/FISH/250; recommended: OCEAN 210. Offered: Sp.

**OCEAN 230 Rivers and Beaches (3/5) NW** *Montgomery, Nittrouer* Introduction to Earth surface environments, the processes that shape them, how humans affect them and are affected by them. Weekend field trips examine mountains, rivers, deltas/estuaries, beaches, and environments beyond. Focus on linkages between these environments to illustrate coupling between landscapes and seascapes. Offered: jointly with ESS 230.

**OCEAN 240 Contemporary Issues in Oceanography (1-5, max. 9) NW** Selected topics of contemporary interest in oceanography such as hydrothermal vents, planetary volcanism, biogeochemical cycling, the ecology of Puget Sound, and the ocean's role in climate.

**OCEAN 250 Marine Biology (3/5) I&S, NW** Lecture-laboratory course in Marine Biology focusing on physical, biological, and social aspects of the marine environment. Topics include oceanography, ecology, physiology, behavior, conservation, fisheries, exploration, and activism. Evening marine biology movies and weekend field trip. Honors section research project. Offered: jointly with BIOL/FISH 250.

**OCEAN 260 The Puget Sound Ecosystem (3/5) I&S/NW** Examines historical human impacts on the land/water ecosystem of the Puget Sound, roles of regional governance and citizen action, and prospects for ecological restoration. Computer labs and field trips for additional credit. Offered: jointly with ENVIR 260.

**OCEAN 300 Study Abroad Marine Sciences (1-12, max. 12)** For participants of Marine Language Exchange Scholarship Program. Specific content varies and must be individually evaluated. Credit does not apply to major requirements without approval. Offered: AWSpS.

**OCEAN 310 The Puget Sound Nearshore: Processes and Problems (3) I&S/NW** An introduction to the geology, ecology, and politics of Puget Sound beaches. Content focuses on beach formation and sediment dynamics, with application to nearshore ecology and shoreline management. Three field trips to local beaches complement topics discussed in class.

**OCEAN 351 Field Investigations in Marine Biology (5)** Evaluates the relationships between man and marine systems in a field-oriented class. Case studies directly investigate marine biology. Studies include human activities and our effects on marine species and communities. Multiple field trips, lectures, and labs. Prerequisite: FISH 350/OCEAN 350. Offered: jointly with FISH 351; Sp.

**OCEAN 355 From Big Bang to the Blue Planet (3) NW** *Sachs* Explores the origin and evolution of the Earth, ocean, atmosphere, and life, with an emphasis on climate as the integrator of changes in the biosphere, cryosphere, hydrosphere, atmosphere, and lithosphere. Prerequisite: either CHEM 120 or CHEM 142; either PHYS 114 or PHYS 121; either BIOL 161, or BIOL 180.

**OCEAN 360 Marine Field Research (10) NW, QSR** *Scott Veirs, Val Veirs* Intensive off-campus marine research experience. Includes 5 weeks designing a field experiment and a 5-week cruise aboard a sailing research vessel to implement it. Offered: jointly with OCEAN 365; ASp.

**OCEAN 365 Practicing Sustainability Science (8) I&S/NW** *Scott Veirs, Val Veirs* Intensive off-campus experience. Studies sustainability science, marine policy, and "clean" technologies. Includes interaction with community stakeholders for 5 weeks and experimentation with sustainable technologies and practices in the marine environment during a 5-week cruise aboard an energy-efficient sailing catamaran. Offered: jointly with OCEAN 360; ASp.

**OCEAN 400 Chemical Oceanography (4) NW** Physical and chemical properties of seawater and marine products; processes determining the chemical makeup of the oceans. Prerequisite: either CHEM 152 or CHEM 155; OCEAN 210. Offered: W.

**OCEAN 401 Special Topics in Chemical Oceanography (3) NW.**

**OCEAN 410 Marine Geology and Geophysics (4) NW** Sedimentological and petrologic processes that determine the geologic record. Prerequisite: either ESS 101 or ESS 210. Offered: jointly with ESS 410; A.

**OCEAN 411 Special Topics in Marine Geology and Geophysics (3) NW**

**OCEAN 412 Seismic Exploration and Stratigraphy (5) Pratt, Sheets** Introduction to theory and practice of seismic exploration. Application of seismic techniques to understanding and constraining subsurface geology and structure, as well as to problems in natural resource exploration. Prerequisite: either ESS 213 or OCEAN 410; either MATH 126, MATH 129, or MATH 136; PHYS 123. Offered: jointly with ESS 467; W, even years.

**OCEAN 420 Physical Processes in the Ocean (4) NW** Physical properties and processes of the ocean: methods of describing ocean currents, waves, tides and mixing and their effect on movement of water parcels. Prerequisite: either PHYS 116 or PHYS 123; either MATH 126, MATH 129, MATH 146, or Q SCI 381; OCEAN 210. Offered: W.

**OCEAN 421 Special Topics in Physical Oceanography (3) NW**

**OCEAN 422 Ocean Dynamics (3) NW** Equations of motion governing flow of sea water. Conservation of mass, tracers, heat and momentum. Energy and vorticity balance. Buoyancy and rotational effects. Scale analysis. Applications to upper ocean dynamics, surface and internal waves, and wind-driven currents in the ocean. Prerequisite: MATH 126; PHYS 123; OCEAN 420.

**OCEAN 423 Ocean Circulation and Climate (3) NW** Quantitative treatment of ocean basin to global scale ocean circulation systems and their interaction with climate variability. Prerequisite: PHYS 123; MATH 125; recommended: OCEAN 210.

**OCEAN 430 Biological Oceanography (4) NW** Marine organisms, their quantitative distribution in time and space and their interactions with the ocean. Prerequisite: BIOL 200; OCEAN 210; recommended BIOL 220. Offered: A.

**OCEAN 431 Special Topics in Biological Oceanography (3) NW.** Prerequisite: one of OCEAN 200, BIOL 250/FISH 250/OCEAN 250.

**OCEAN 442 Oceanography of the Puget Sound (3) NW** Explores the role of oceanography in regional issues. Field opportunities and active investigation of applied oceanographic problems. Lectures, research trip, student co-teaching, discussion. Prerequisite: either CHEM 152, CHEM 221, BIOL 162, BIOL 220, ESS 101, or ESS 210. Offered: A.

**OCEAN 443 Design of Oceanographic Field Experiments (3) NW** Case histories, presentations, and class exercises used to teach methods of formulating a research problem and proposal writing. Methods of data analysis, presentation, error estimation, library resource and data base use; web page implementation and design. Principles of cruise planning. Prerequisite: OCEAN 400; OCEAN 410; OCEAN 420; OCEAN 430. Offered: W.

**OCEAN 444 Advanced Field Oceanography (5) NW** Conduct field experiment (designed in OCEAN 443) during a week-long cruise aboard a research vessel. Analyze samples data and present results in a series of drafts and a final term paper. Results are presented at a two-day-long public research symposium and on the students' individual websites. Prerequisite: OCEAN 443. Offered: Sp.

**OCEAN 450 Climatic Extremes (4) NW** Course examines earth history for extreme climatic conditions to predict future climate changes. Numerical climate models use PC-based computer programs to identify processes and feedbacks that control climate.

**OCEAN 451 Fluid Dynamics Laboratory (4) NW** Individual projects in experimental fluid dynamics with applications to practical problems. Experimental design, visualization, and measurement techniques applied to a problem selected by each student. Prerequisite: PHYS 123.

**OCEAN 452 Spatial Information Technology in Ecosystem Sciences (3) Logsdon** Introduces the use of Geographic Information Systems (GIS), remote sensing, and spatial analysis in the ecosystem sciences. Emphasizes sampling and analysis of spatially-referenced data about the coastal and marine environments, integrating these technologies in an applied research setting. Offered: jointly with FISH 452; A.

**OCEAN 453 Geospatial Pattern Analysis and Geostatistics (3) Logsdon** Focuses on the application of geospatial pattern analysis and geostatistics in earth science research. Develops understanding in detecting, describing, and estimating spatial pattern and trends. Prerequisite: either Q SCI 381 or Q SCI 482; OCEAN 452. Offered: jointly with FISH 453; W.

**OCEAN 454 Hydrothermal Systems: An Interdisciplinary View (3) NW** *Lilley* Provides a general, interdisciplinary overview of seafloor hydrothermal systems including impor-

tant geological, chemical and biological processes. Topics include tectonic and volcanic controls on hydrothermal systems, water/rock reactions, phase separation, temporal variability, fluxes to the deep sea, micro- and macro biology. Offered: Sp.

**OCEAN 479 Research in Marine Biology (1-15, max. 15)** Individual research on topics in marine biology. Research projects supervised by an individual faculty member. Projects may include laboratory work, fieldwork, and literature surveys. Prerequisite: BIOL 250/FISH 250/OCEAN 250; Q SCI 381. Offered: jointly with BIOL 479/FISH 479; AWSpS.

**OCEAN 492 Friday Harbor Apprenticeship (9/15) NW** Intensive, full-time research training experience where teams of students work on focused research problems guided by a group of faculty, postdoctoral, and graduate student mentors. Research questions vary.

**OCEAN 494 Field Experiences in Marine Science (1-15, max. 30) NW** *faculty* For participants in oceanography field work. Specific content varies and is individually evaluated. Credit does not apply to major requirements without approval.

**OCEAN 496 Study Abroad: Oceanography (1-15, max. 30) NW** For participants in UW study abroad program. Specific content varies and is individually evaluated. Credit does not apply to major requirements without approval.

**OCEAN 497 Advanced Special Topics in Oceanography (1-15, max. 15)**

**OCEAN 499 Undergraduate Research (1-15, max. 24)** Research on assigned topics that may involve laboratory work, fieldwork, or literature surveys. Offered: AWSpS.

**OCEAN 500 Current Problems in Oceanography (1)** Discussion of research topics that are currently being investigated within the school. Credit/no credit only. Prerequisite: permission of instructor. Offered: AW.

**OCEAN 501 Estuarine Circulation and Mixing (3)** Observed patterns of currents, mixing, and stratification from deep fjords to shallow coastal plain estuaries. Physical understanding of basic processes, such as tides, wind stress, topographic effects on turbulence, sill hydraulics, and exchange flow. Vertical mixing and residence times important to biological and pollution studies. Prerequisite: permission of instructor.

**OCEAN 502 Spatial Information Technology in Ecosystem Sciences (3) Logsdon** Introduces the use of Geographic Information Systems (GIS), remote sensing, and spatial analysis in the ecosystem sciences. Emphasizes sampling and analysis of spatially-referenced data about the coastal and marine environments, integrating these technologies in an applied research setting. Offered: jointly with FISH 502; A.

**OCEAN 503 Geospatial Pattern Analysis and Geostatistics (3) Logsdon** Focuses on the application of geospatial pattern analysis and geostatistics in earth science research. Develops understanding in detecting, describing, and estimating spatial pattern and trends. Recommended: introductory statistics or permission of instructor. Offered: jointly with FISH 503; W.

**OCEAN 506 Interdisciplinary Seminar in Oceanography (1-3, max. 12)** Lectures, discussions, and work on selected problems of an interdisciplinary nature. Prerequisite: permission of instructor.

**OCEAN 509 Seminar (1)** Introduction to current research topics for beginning graduate students. Credit/no credit only. Offered: AWSp.

**OCEAN 510 Physics of Ocean Circulation (3)** Structure of ocean basins; physical properties of seawater and the equation of state; heat, salt, fresh water budgets; tidal potential; Coriolis effect and geostrophic balance; major current systems and water masses; mixing, stirring in the ocean; simple waves; modern experimental methods in physical oceanography. Prerequisite: permission of instructor. Offered: A.

**OCEAN 511 Introduction to Fluid Dynamics (4)** Eulerian equations for mass-motion; Navier-Stokes equation for viscous fluids, Cartesian tensors, stress-strain relations; Kel-

vin's theorem, vortex dynamics; potential flows, flows with high-low Reynolds numbers; boundary layers, introduction to singular perturbation techniques; water waves; linear instability theory. Prerequisite: AMATH 403 or permission of instructor. Offered: jointly with AMATH/ATM S 505; A.

**OCEAN 512 Geophysical Fluid Dynamics I (4)** Dynamics of rotating stratified fluid flow in the atmosphere/ocean and laboratory analogues. Equations of state, compressibility, Boussinesq approximation. Geostrophic balance, Rossby number. Poincaré, Kelvin, Rossby waves, geostrophic adjustment. Ekman layers. Continuously stratified dynamics: Inertia-gravity waves, potential vorticity, quasigeostrophy. Prerequisite: OCEAN 511 or ATM S/AMATH 505. Offered: jointly with ATM S 509; W.

**OCEAN 513 Geophysical Fluid Dynamics II (3)** Theories, models of large-scale dynamics of oceans, atmospheres. Potential vorticity, Q principles; Rossby waves, ray tracing, Green's function, setup of general circulation; atmospheric "channels" versus ocean "basins"; wave-mean flow interaction, mountain drag, internal momentum flux; "Lagrangian" motion of particles, tracers; cascades, eddy flux of heat, moisture, Q. Prerequisite: OCEAN 512. Offered: Sp.

**OCEAN 514 Waves (3)** Application of marine hydrodynamics principles to wave motion in oceans. Offered: W.

**OCEAN 515 Ocean Circulation: Observations (3)** Modern large- and mesoscale ocean observations, interpreted in terms of contemporary circulation theories. Spectrum of temporal variability; eddies and eddy fluxes; ventilation; advection and diffusion in the abyss; transports of heat and salt; climatic scale of variability; modern methods for determining circulation. Prerequisite: OCEAN 510 or permission of instructor. Offered: Sp.

**OCEAN 516 Ocean Circulation: Theories (3)** Hydrodynamic theories concerning origin and characteristics of major ocean currents. Prerequisite: OCEAN 512 or permission of instructor.

**OCEAN 517 Methods and Measurements in Physical Oceanography (2)** Principal instruments and experimental methods of physical oceanography. Devices and systems that measure pressure, temperature, electrical conductivity, sea state, and velocity. Prerequisite: permission of instructor. Offered: alternate years.

**OCEAN 519 Seminar in Physical Oceanography (1, max. 9)** Discussion of selected problems of current interest in physical oceanography. Prerequisite: OCEAN 510 or permission of instructor.

**OCEAN 520 Marine Chemistry (3)** Processes controlling the chemical composition of seawater. Chemical distributions in the ocean, marine physical chemistry, chemical equilibrium, and concepts of mass balance. Mechanisms and models used to explain distributions of stable and radioactive isotopes, gases, trace metals, and biochemicals in the world's oceans. Offered: A.

**OCEAN 521 Aquatic Chemistry (3)** Application of physical chemistry and thermodynamics to processes that control chemical composition of natural waters. Equilibrium approach. Acid/base chemistry, the carbonate system, dissolution and precipitation, metal ions in solution, oxidation-reduction chemistry, silicate mineral reactions. Prerequisite: OCEAN 520 or permission of instructor. Offered: A.

**OCEAN 522 Marine Organic Geochemistry (3)** Sources, reactions, and fates of organic molecules in the marine environment along with the stable isotope geochemistry of marine organic substances. Prerequisite: CHEM 237 and CHEM 239 or permission of instructor.

**OCEAN 523 Geochemical Cycles (4)** Descriptive, quantitative aspects of earth as biogeochemical system. Study of equilibria, transport processes, chemical kinetics, biological processes; their application to carbon, sulfur, nitrogen, phosphorus, other elemental cycles. Stability of biogeochemical systems; nature of human perturbations of their dynamics. Prerequisite: permission of instructor. Offered: jointly with CHEM 523 and ATM S 508.

**OCEAN 524 Environmental Chemical Modeling (3)** Benjamin, Murray Physical/chemical principles controlling the fate and distribution of environmental pollutants, and use of models to apply those principles. Includes modeling of physical transport in conjunction with chemical equilibrium and reaction kinetics. Applications include acid mine drainage, acid deposition, and groundwater and lake water contamination. Offered: jointly with CEE 550.

**OCEAN 529 Seminar on Chemical Oceanography (\*, max. 24)** Lectures, discussions, and readings on selected problems of current interest. Prerequisite: permission of instructor. Offered: AWSp.

**OCEAN 530 Biological Oceanography: Bacteria and Protozoa (3)** Bacteria in the marine environment; fate of organic carbon in the ocean and the interrelationship of the carbon cycle with other biogeochemical cycles. Prerequisite: permission of instructor. Offered: W.

**OCEAN 531 Biological Oceanography: Phytoplankton (3)** Phytoplankton in the marine environment: ecology, primary productivity, and physiology. Phytoplankton growth and photosynthetic patterns; spatial and temporal distributions of phytoplankton; methods for determining distributions and rates of production and growth. Prerequisite: permission of instructor. Offered: W.

**OCEAN 532 Biological Oceanography: Zooplankton (3)** Distribution and abundance of pelagic animals in space and time; analysis of their interactions. Small-scale distributions and behavior, population dynamics and energetics, trophic structure and dynamics, pelagic community structure, models of populations and food chains, secondary production and biogeography. Prerequisite: permission of instructor. Offered: Sp.

**OCEAN 533 Biological Oceanography: Benthos (3)** Analysis of marine benthic communities; new research questions and method; ecologically important physics of benthic boundary layer; theories, mechanics, and observations of deposit feeding; succession as consequence of physical processes and biological interactions. Environments include deep-sea, continental shelves, estuaries, and intertidal, focusing on soft substrata. Prerequisite: permission of instructor. Offered: Sp.

**OCEAN 534 Methods and Measurements in Biological Oceanography (2)** Methods for bacteria, phytoplankton, and zooplankton population assessment. Rate measurements of phytoplankton, zooplankton, and bacterial production. Benthos measurements, including deep-sea environments. Prerequisite: permission of instructor.

**OCEAN 535 Biological Oceanography: An Overview (3)** Principles and practice of biological oceanography for students with strong background in physical sciences but little recent exposure to biology. Ecological principles at individual, population, and community levels; overview of discipline of biological oceanography; case studies of interdisciplinary problems shared with the physical sciences. Offered: W.

**OCEAN 536 Seminar in Geostatistics (1–3, max. 3)** Lectures and discussions on selected problems in the applications of statistics in earth science.

**OCEAN 539 Seminar in Biological Oceanography (\*, max. 24)** Lectures, discussions, and work on selected problems of current interest. Prerequisite: permission of instructor. Offered: AWSp.

**OCEAN 540 Marine Geological Processes (3)** Principles of thermodynamics, heat and mass transfer, fluid mechanics, continuum mechanics, and time-series analysis applied to marine geological and geophysical data with special applications to thermal balance of the oceanic lithosphere. Offered: W.

**OCEAN 541 Marine Sedimentary Processes (3)** Investigates fundamental process of marine sedimentation, including equations characterizing boundary-shear flows, initiation of grain motion, bedload and suspended-load transport, and sediment accumulation. Applies concepts to sediment dispersal in rivers, deltas, estuaries, beaches, continental shelves, slopes, and rises, with emphasis on the relationships between active processes and resulting deposits.

**OCEAN 542 Sediment Dynamics and Boundary-Layer Physics (4)** Theoretical descriptions of sediment transport processes constrained by laboratory demonstrations. The physics of boundary layers, initiation of motion, suspended load, bedload, bedforms, and continua transport (turbidity currents, debris flows, and suspensions) and its application to the geological record. Offered: jointly with ESS 526; W.

**OCEAN 545 Physics of the Oceanic Lithosphere (3)** Basic principles of elasticity, fluid flow, and heat transport with specific applications to the formation and evolution of the oceanic lithosphere. Includes deformation of the earth, flow in porous media, heat transport, and marine seismological and potential field techniques. Prerequisite: OCEAN 540. Offered: jointly with ESS 568.

**OCEAN 546 Continental-Margin Sedimentation (3)** Detailed evaluation of recent studies into processes forming strata on continental margins, including the diverse time scales ranging from sediment transport to sequence stratigraphy. Highlights the linkages with physical oceanographic processes, the fates of geochemical components, and the relationship to biological communities. Offered: jointly with ESS 527.

**OCEAN 549 Seminar in Geological and Geophysical Oceanography (\*, max. 24)** Lectures, discussions, and field and laboratory work on selected problems of current interest. Prerequisite: permission of instructor. Offered: AWSp.

**OCEAN 550 Geochemistry and Geophysics of Melt Generation (3)** Mantle flow beneath mid-ocean ridges and hot-spots, major element systematics, constraints from trace elements and isotopes on melting and mantle reservoirs, melt extraction, and crustal thickness and axial topography. Prerequisite: OCEAN 544 or permission of instructor. Offered: alternate years.

**OCEAN 551 Marine Seismology (3)** Practical application of seismic techniques to the study of the ocean basins. Analysis of refraction data, multichannel reflection profiling, surface wave studies, and earthquake analysis. Prerequisite: GPYS 502 or permission of instructor.

**OCEAN 552 Seminar in Geophysics and Geological Data Analysis (1)** Practical geophysical data analysis, map projections, gridding multibeam bathymetry processing, gravity and magnetic anomalies, downward continuation, magnetic inversion, seismic refraction and reflection, and microearthquake locations. Prerequisite: permission of instructor.

**OCEAN 554 Paleoclimate Proxies (3)** Alexander, Sachs Provides a critical evaluation of the most commonly applied paleoclimate proxies from the ocean, land, and ice sheets. Offered: jointly with ATM S 554/ESS 554; alternate years.

**OCEAN 558 Climate Modeling (3)** Bitz, Thompson Principles of Earth system modeling. Emphasis on atmosphere, ocean sea ice, and land-surface components. Climate forcing. Appropriate use of models. Topics of current interest including carbon cycle, atmosphere chemistry, and biogeochemistry. Prerequisite: either ATM S/OCEAN/ESS 587, ATM S 504 or ATM S 505. Offered: jointly with ATM S 559/ESS 559; Sp; alternate years.

**OCEAN 559 Advanced Seminar on Mid-Ocean Ridge Processes (\*, max. 9)** Lectures, discussions, and practical work on selected topics of current interest in mid-ocean ridge research. Prerequisite: permission of instructor.

**OCEAN 560 Atmosphere/Ocean Interactions (3)** Observations and theory of phenomena of the coupled atmosphere-ocean system. El Niño/Southern Oscillation; decadal tropical variability; atmospheric teleconnections; midlatitude atmosphere-ocean variability. Overview of essential ocean and atmospheric dynamics, where appropriate. Credit/no credit only. Prerequisite: ATM S 509 or OCEAN 512. Offered: jointly with ATM S 560; alternate years; Sp.

**OCEAN 569 Topics in Physical Oceanography (1–4, max. 24)** Lecture series on topics of major importance in physical oceanography. Offered: AWSp.

**OCEAN 570 Marine Microbial Interactions (1–3, max. 9)** Structure, function, and dynamics of natural mixed-species populations of marine bacteria and their interactions with

higher organisms; mixed-species culture methods; synecological field methods; species assemblages in specialized environments; mutualisms; sites and patterns of genetic exchange. Prerequisite: OCEAN 530 or permission of instructor. Offered: alternate years.

**OCEAN 571 Marine Primary Productivity (1–3, max. 9)** Patterns and mechanisms of marine phytoplankton primary production. Small-to-global-scale patterns of production; environmental regulation of production; absorption of electromagnetic radiation; fluorescence; carbon fixation; trophic interactions; remote sensing and other optical methods. Prerequisite: OCEAN 531 or permission of instructor. Offered: alternate years.

**OCEAN 572 Zooplankton Ecology (1–3, max. 9)** Life history strategies, dynamics and production of populations, vertical migration, interspecific interactions and community structure, models of complex assemblages of zooplankton, sampling methods and analysis, spatial heterogeneity. Prerequisite: OCEAN 532 or permission of instructor. Offered: alternate years.

**OCEAN 573 Benthic Biological Processes (1–3, max. 9)** Processes characteristic of soft-bottom benthic environments; areas and methods of rapid current progress; open research questions; deposit feeding; passive larval recruitment; physical, chemical, geological, and biological feedbacks in ecological succession; scaling of laboratory systems. Prerequisite: OCEAN 533 or permission of instructor. Offered: alternate years.

**OCEAN 574 Principles and Applications of Molecular Methods (3)** Applications of molecular techniques to questions in ecology, evolution, and natural resource management, with emphasis on advanced genome-enabled technologies and the analysis and interpretation of genetic data. Includes weekly discussion of empirical papers, and preparation/peer-review of a proposal. Prerequisite: permission of instructor. Offered: jointly with FISH 542; A.

**OCEAN 575 Molecular Techniques (4)** Laboratory on DNA methods. Experiments analyzing genetic variation at the intra- and interspecific level, including one experiment of student's own design. Techniques include DNA extraction and quantitation, PCR, DNA sequencing, RFLP analysis and cloning. Prerequisite: FISH 542 or OCEAN 574 or permission of instructor. Offered: jointly with FISH 543; W.

**OCEAN 578 Advanced Topics in Biological Oceanography (\*, max. 18)** Specialized research areas. Topic varies each year. Offered at Friday Harbor Laboratories. Prerequisite: permission of director of Friday Harbor Laboratories. Offered: S.

**OCEAN 580 Aquatic Kinetics (3)** Reaction rates and mass transport in water. Theories of chemical kinetics; experimental results from: CO<sub>2</sub> hydrolysis, Fe, Mn, and H<sub>2</sub>S oxidation, stable isotope fractionation, mineral dissolution; homogeneous, heterogeneous, microbial catalysis; reaction and transport at air-water, sediment-water, and O<sub>2</sub>/H<sub>2</sub>S interfaces. Prerequisite: permission of instructor.

**OCEAN 581 Geochemical Modeling (3)** Background to modeling concepts frequently encountered in chemical oceanography: box models, advection-diffusion problems, sediment diagenesis equations, and boundary layer (air-water and sediment-water interface) models. Problems requiring application of the models to chemical distributions in the ocean. Prerequisite: permission of instructor.

**OCEAN 582 River Basin Biogeochemistry (3)** The function of rivers and river basins in transporting materials to the oceans and their importance in biogeochemical cycles. Origin of water and water routing within drainage basins, sources and modification of dissolved and particulate materials in transport, ecological theory, and estuarine mixing zone transformations. Prerequisite: permission of instructor.

**OCEAN 583 Isotope Biogeochemistry (3)** The use of stable isotopes to study biogeochemical cycles in the oceans and atmosphere; specifically carbon, nitrogen, and sulfur cycles. Isotopic effects during photosynthesis, respiration, organic matter degradation. CaCO<sub>3</sub> dissolution, methanogenesis, nitrification/denitrification, and sulfate reduction. Prerequisite: permission of instructor.

**OCEAN 584 Ocean Tracers and Mixing (3)** The applications of tracers to studies of ocean circulation and ventilation. Processes within the ocean for which tracers have provided important information include gas exchange, mixed layer dynamics, thermocline ventilation, deep water formation and spreading, and mixing. Knowledge of partial differential equations suggested.

**OCEAN 585 Paleoclimatology (3)** History of environmental changes on earth over the past 100 million years as reconstructed from records in deep-sea sediments, ice sheets, and other ocean/terrestrial substrates. Examination of isotopic, geochemical, micropaleontological, and dating techniques. Role of the ocean in climate change. Prerequisite: permission of instructor.

**OCEAN 586 Current Research in Climate Change (2, max. 20)** Weekly lectures focusing on a particular aspect of climate (topic to change each year) from invited speakers (both UW and outside), plus one or two keynote speakers, followed by class discussion. Offered: jointly with ATM S 586/ESS 586.

**OCEAN 587 Climate Dynamics (3)** *Hartman, Thompson* Examines Earth's climate system; distribution of temperature, precipitation, wind ice, salinity, and ocean currents; fundamental processes determining Earth's climate; energy and constituent transport mechanisms; climate sensitivity; natural climate variability on interannual to decadal time scales; global climate models; predicting future climate. Offered: jointly with ATM S 587/ESS 587. Offered: A

**OCEAN 588 The Global Carbon Cycle and Climate (3)** *Emerson* Oceanic and terrestrial biogeochemical processes controlling atmospheric CO<sub>2</sub> and other greenhouse gases. Records of past changes in the earth's carbon cycle from geological, oceanographic and terrestrial archives. Anthropogenic perturbations to cycles. Develop simple box models, discuss results of complex models. Offered: jointly with ATM S 588/ESS 588. Offered: W.

**OCEAN 589 Paleoclimatology: Data, Modeling and Theory (3)** *Battisti, Emerson, Steig* Evidence for past changes in land and sea surface temperature, in precipitation and atmospheric dynamics, and in ocean circulation: both long and interannual timescales. Paleoclimate modeling and theory. Time series analysis and climate noise. Rapid climate change. Statistical reconstruction of interannual variability. Offered: jointly with ATM S 589/ESS 589. Offered: Sp.

**OCEAN 590 Advanced Topics in Oceanography (9–18, max. 18)** Advanced topics examining specialized and interdisciplinary areas of oceanographic research. Offered at Friday Harbor Laboratories. Prerequisite: permission of Director of Friday Harbor Laboratories. Offered: S.

**OCEAN 591 Marine Science in the Coastal Zone (3)** *Klinger* Presentation and analysis of the marine science of estuarine, coastal, and open ocean systems, including evaluation and interpretation of scientific information necessary for management. Lectures, discussions, and readings emphasize the relevance of natural processes to marine environmental management and decision-making. Offered: jointly with SMA 591; A.

**OCEAN 592 Communicating Ocean Sciences (4)** *Robigou* Explores improving communicating scientific knowledge through instruction of inquiry-based science in school classrooms. Students practice communicating science, and receive mentoring on how to improve their presentations. Prerequisite: Marine sciences studies background. Offered: Sp.

**OCEAN 593 Climate Science Seminar (1)** *Mote* Focuses on how to communicate climate science to many different audiences through careful construction of figures and through written and oral communication. Credit/no credit only. Offered: jointly with ATM S 593/ESS 593; W.

**OCEAN 596 Climate Science Capstone Project (1–5, max. 5)** *Mote* Climate capstone directed by a mentor, may be a group effort, and may encompass curriculum development, internships, workshop organization, etc., capturing interdisciplinary aspects of climate science and effective communication.

cation of climate science. Offered: jointly with ATM S 596/ESS 596; AWSpS.

**OCEAN 600 Independent Study or Research (\*)** Offered: AWSpS.

**OCEAN 700 Master's Thesis (\*)** Offered: AWSpS.

**OCEAN 800 Doctoral Dissertation (\*)** Offered: AWSpS.

## Quantitative Science

### PROGRAM OVERVIEW

The Center for Quantitative Science is an interdisciplinary program administered jointly by the School of Aquatic and Fishery Sciences and the School of Forest Resources. It provides high-quality instruction in mathematical and applied statistical methods for undergraduate students who major in the biological and ecological sciences, renewable resources management, and environmental studies. The center provides instruction in an atmosphere that emphasizes the use of quantitative methods to better understand a variety of scientific phenomena. Faculty represent various applied scientific disciplines within the [School of Forest Resources](#) and the [School of Aquatic and Fishery Sciences](#).

#### Adviser

005 Anderson Hall, Box 352100

206-543-1191

[cqs@uw.edu](mailto:cqs@uw.edu)

Students in environmental, biological, ecological, and resource management majors may wish to complete a minor in quantitative science to document their understanding of the mathematical and statistical methods used in these competitive and increasingly quantitative fields.

### Minor

**Minor Requirements:** A minimum of 26 credits, as follows:

- **Core courses (20 credits):** Q SCI 291, Q SCI 292 (or MATH 124, MATH 125); Q SCI 381, Q SCI 482
- **Electives (6–10 credits):** Two Q SCI courses at the 300 or 400 level to include one course from Q SCI 480, Q SCI 483, Q SCI 486
- A minimum grade of 2.0 is required in each course taken as part of the minor.

### COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at [www.uw.edu/students/crsat/](http://www.uw.edu/students/crsat/)

**Q SCI 291 Analysis for Biologists I (5) NW, QSR Briggs, Johnson** Introduction to differential calculus, emphasizing development of basic skills. Examples promote understanding of mathematics and applications to modeling and solving biological problems. Topics include optimization and curve analysis. Prerequisite: either MATH 120, a minimum score of 2 on advanced placement test, or a minimum score of 67% on MPT-A placement test. Not available for credit to students who have completed MATH 124 with a 2.0 or higher. Offered: AWSpS.

**Q SCI 292 Analysis for Biologists II (5) NW, QSR Gallucci, Johnson** Introduction to integral calculus, emphasizing development of basic skills. Examples promote understanding of mathematics and applications to modeling and solving biological problems. Topics include areas under curves, volumes, and differential equations. Prerequisite: minimum grade of .7 in Q SCI 291. Not available for credit to students who have completed MATH 125 with a 2.0 or higher. Offered: WSpS.

**Q SCI 381 Introduction to Probability and Statistics (5) NW, QSR Bare, Gallucci, Greulich, Punt** Applications to biological and natural resource problems stressing the formulation and interpretation of statistical tests. Random variables, expectations, variances, binomial, hypergeometric, Poisson, normal, chi-square, "t" and "F" distributions. Prerequisite: either MATH 120, MATH 124, MATH 125, MATH 126, MATH 144, or Q SCI 291, or a minimum score of 2 on advanced placement test, or a minimum score of 67% on MPT-A placement test. Offered: AWSpS.

**Q SCI 454 Ecological Modeling (5) NW Essington** Examines concepts in ecological modeling focusing on the rational, interpretation, and motivation for modeling in ecological sciences. Explores individual, population, and ecosystem-based models. Excel-based computer exercises, model building and interpretation, readings. Recommended: prior coursework in ecology and statistics. Offered: jointly with FISH 454; W.

**Q SCI 458 Modeling and Estimation in Conservation and Resource Management (4) NW Hilborn** Explores the use of models in the evaluation of alternative management policies for natural resources, including modeling approaches, fitting models to data, and evaluating alternative management policies. Emphasizes calculating risk of extinction, and design of biological reserves. Recommended: either Q SCI 454 or FISH 454. Offered: jointly with FISH 458; Sp.

**Q SCI 480 Sampling Theory for Biologists (3) NW Skalski** Theory and applications of sampling finite populations including: simple random sampling, stratified random sampling, ratio estimates, regression estimates, systematic sampling, cluster sampling, sample size determinations, applications in fisheries and forestry. Other topics include sampling plant and animal populations, sampling distributions, estimation of parameters and statistical treatment of data. Prerequisite: Q SCI 482; recommended: Q SCI 483. Offered: jointly with STAT 480; odd years.

**Q SCI 482 Statistical Inference in Applied Research I: Hypothesis Testing and Estimation for Ecologists and Resource Managers (5) NW Conquest, Turnblom** Analysis of variance and covariance; chi square tests; nonparametric procedures multiple and curvilinear regression; experimental design and power of tests. Application to biological problems. Use of computer programs in standard statistical problems. Prerequisite: either STAT 311 or Q SCI 381. Offered: AW.

**Q SCI 483 Statistical Inference in Applied Research II: Regression Analysis for Ecologists and Resource Managers (5) NW Skalski** Analysis of linear regression models and introduction to nonlinear models. Model selection using generalized F-tests; residual analysis. Application to categorical, count, binomial, transformed variables. Introduction to matrix formation of regression models and applications. Prerequisite: Q SCI 381; Q SCI 482. Offered: WSp.

**Q SCI 486 Experimental Design (3) NW Conquest** Topics in analysis of variance and experimental designs: choice of designs, comparison of efficiency, power, sample size, pseudoreplication, factor structure. Prerequisite: Q SCI 482; recommended: Q SCI 483. Offered: jointly with STAT 486; even years; W.

**Q SCI 497 Special Topics in Quantitative Science (1-15, max. 15) NW** Topics not normally offered in regular curriculum. Format ranges from seminar/discussion, formal lectures, laboratory or modeling work. Offered: AWSpS.

**Q SCI 498 Internship (1-15, max. 15)** Internship experience with a public agency or private company, supervised and approved by a faculty member. Preparation of professional report reflecting on the experience is required. Credit/no credit only. Offered: AWSpS.

**Q SCI 499 Research Experience (1-15, max. 15)** Special studies in quantitative ecology and resource management for which there is not sufficient demand to warrant the organization of regular courses. Credit/no credit only.

## Quaternary Sciences

### PROGRAM OVERVIEW

19 Johnson

Quaternary studies focus on the processes that presently shape the natural environment and have operated over approximately the past two and a half million years (Quaternary period). A knowledge of Quaternary events facilitates an understanding of earth history in relation to the modern environment and has predictive value with regard to present-day and future environmental changes.

Quaternary research is typically interdisciplinary, and thus it commonly involves related interests of two or more academic units. The Quaternary Research Center was established in 1967 to foster such interdisciplinary studies on a cooperative basis.

The center has the following goals:

- To understand environments and climate changes of the past two and a half million years in the context of modern surface processes, which include historical changes, prehistoric postglacial environments, and Ice Age events.
- To serve as a catalyst in fostering interdisciplinary studies in the fields of atmospheric sciences, archaeology/anthropology, botany, engineering, fisheries, forestry, geology, geophysics, oceanography, pedology, and zoology.
- To provide a scientific perspective on the scale of modern and man-made environmental changes, including climate changes, in the context of recent earth history.
- To conduct a curriculum jointly with other disciplines in the training of graduate students in Quaternary-oriented studies.
- To seek applications of Quaternary studies to modern environmental problems that will help predict consequences of policy decisions.

### GRADUATE PROGRAM

Students associated with the center obtain their degrees through cooperating departments. Students interested in graduate work at the center should apply to the department of their choice but plan to do their research in a Quaternary-related subject.

### RESEARCH FACILITIES

The research laboratories of the center provide an array of modern facilities for investigation of Quaternary problems.

#### QRC Resource Center

This specialized collection, dealing with a wide range of Quaternary topics, is among the most extensive in North America. It includes books, monographs, theses, journals, and maps, and houses a large, diverse reprint collection. Searches for library material can be conducted via the QRC [Web page](#).

#### Cosmogenic Nuclide Laboratory

John Stone, Director

The UW Cosmogenic Nuclide Laboratory analyses rare radionuclides produced by cosmic ray bombardment of the Earth's surface. These nuclides are useful for surface exposure dating and the study of geomorphic rates and processes. Current projects include work on Quaternary glaciations of Antarctica, Europe, and North America; dating of landslides and volcanic eruptions; and studies of erosion in both tectonically active and ancient, stable landscapes. The laboratory has sample preparation facilities and clean

labs for extraction of Al-26, Be-10, and Cl-36. For additional information, visit the laboratory's [website](#).

#### Geochemistry Library

Ronald S. Sletten, director

The Geochemistry Library conducts analyses of natural waters, soil, and sediment. Instrumentation includes ICP-OES, ICP-MS, laser diffraction particle size analyzer, and total organic/inorganic carbon analyzer for water samples. The library also conducts C-13 CP-MAS-NMR for natural organic and pulsed field gradient PFG-NMR for diffusion studies of water in porous media. The primary research foci are weathering, elemental cycling, and studies of permafrost soils. Current projects include investigation of biocomplexity of carbon cycling in Arctic soils in Greenland and physicochemical soil processes in Antarctica and Alaska.

#### Periglacial Laboratory

Bernard Hallet, Director

Research in the Periglacial Laboratory focuses on diverse processes at the interface between glaciology and geomorphology that are fundamental to understanding landscapes and soils in alpine and polar regions. Founded by Link Washburn, the laboratory has a long history of experimental research on periglacial processes with special attention given to the complex phenomena associated with freezing soils and rocks. Recently the lab has also served as a base of support for extensive field work involving electronic instrumentation to monitor surface processes in the Arctic, Antarctica, the Himalayas, southeast Tibet, and other regions across the globe.

#### Stable Isotope Laboratory

Eric J. Steig, Director

The Stable Isotope Laboratory is the main center for stable isotope studies for the QRC. The current emphasis in the laboratory is the development of high-resolution climate records covering the last ten millennia, from ice cores in the Canadian Arctic, Greenland, and Antarctica. Facilities in the laboratory include off-line and online preparation systems for D/H and 18/16O on water 13C/12C on carbonates and organic materials, and 15N/14N on nitrate and organics. Additional information, data, and other resources are available via the laboratory's [website](#).

### COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at [www.uw.edu/students/crscat/](http://www.uw.edu/students/crscat/).

**QUAT 501 Seminar/Conference in Quaternary Environments (1, max. 6)** Interdisciplinary seminar or conference in the changing natural environments of the Quaternary Period, with emphasis on climatic changes and their effects. Speakers from the University and elsewhere present lectures on their specialties, followed by discussion. Credit/no credit only.

**QUAT 502 Interdisciplinary Quaternary Investigations (2, max. 6)** Research course for interdisciplinary investigation of Quaternary problems. Student attends sessions of QUAT 501 and pursues a problem-oriented case study concurrently under faculty direction. Required paper on case study. Credit/no credit only. Prerequisite: graduate standing.

**QUAT 504 Special Topics in Quaternary Sciences (1-3, max. 3)** Environments and climate changes of past two million years (Quaternary Period) in context of modern surface processes, including historical changes, prehistorical environments of postglacial period, and Ice Age events. Provides scientific perspective on scale of modern and man-made environmental changes, including those of climate, in context of recent earth history. Credit/no credit only. Prerequisite: background courses in earth sciences and ecology.

# The Information School

## SCHOOL OVERVIEW

370 Mary Gates Hall

Box 352840

### Dean

Harry Bruce

### Associate Deans

Robert Mason, Research

Matthew Saxton, Academics

Never in our society's history has there been such a great need to manage so much information quickly and efficiently. The Information School is dedicated to preparing a rising generation of information leaders to embrace the challenges associated with the way we create, find, store, manipulate, and share information.

The School offers four degree programs, leading to the Bachelor of Science in Informatics, Master of Library and Information Science, Master of Science in Information Management, and Ph.D. in Information Science. The School also offers certificate programs, continuing education opportunities for professionals, and service courses for undergraduates in information fluency, research strategies, and technology. Graduates of the School assume a variety of professional roles in the public, private and non-profit sectors, with positions that span from information architects to children's librarians, from Web developers to information technology (IT) managers, from network and information assurance professionals to researchers and faculty in the information field.

The community is interdisciplinary, bringing together a variety of social science traditions, including: library and information science, computer science, sociology, communication, philosophy, and engineering. Most research addresses topics in the following broad categories:

- Ethics and Information
- Personal Information Management
- Human-Computer Interaction and Design
- Information Management
- Knowledge Organization
- Information Literacy
- Access to Information
- Information in Everyday Life

The School's work remains focused on the human impact of information. The research and curriculum of the school examines information systems and technology from a user-centered perspective. By retaining a focus on the human impact of information systems and technology, we build on our community values of trust, transparency, and mutual respect.

## History

Originally established in 1911, the Information School has the oldest library and information science program west of the Mississippi, and continues to offer the most extensive American Library Association-accredited library and information science degree in the Northwest region of the United States.

In 1998, the University set out to transform the School by charging it with a new mission, to become what it is today: a broad-based information school that meets the challenges and opportunities of the information age. With the addition of three new degree programs, a new dean, faculty, and state of the art facilities, the Information School became the University's sixteenth independently organized school/college in 2001.

The School seeks to explore the theoretical and applied cutting edges of the information field and to nurture the best of both worlds: traditional library values and ever-changing information frontiers.

## Passion

The School is inspired by information, wanting everyone to know how vital information is in all aspects of life.

## Vision

The School envisions a world where more effective use of information helps everyone discover, learn, innovate, solve problems, have fun, and make a better world. Information changes lives.

## Mission

The School prepares information leaders through researching the problems and opportunities of information, designing solutions to information challenges, and making information work.

## UNDERGRADUATE PROGRAM

Informatics students design, build, implement, and secure information systems that meet human, organizational, and societal needs.

Students have a strong people focus and they excel as user experience designers, business analysts, data managers, information architects, Web developers, and information assurance professionals.

### Adviser

470 Mary Gates Hall

Box 352840

206-543-1794

[informatics@ischool.washington.edu](mailto:informatics@ischool.washington.edu)

The Information School offers a Bachelor of Science in Informatics degree, with options in human-computer interaction and information architecture.

## Bachelor of Science

*Suggested First- and Second-Year College Courses:* INFO 100, INFO 200, an English composition course (selected from the University list), CSE 142, CSE 143, and STAT 311 or Q METH 201; courses that develop strong analytical, qualitative, and quantitative reasoning skills; courses that develop strong written and oral communication skills; courses that provide exposure to a variety of social science fields such as psychology, sociology, anthropology, or philosophy.

## Program Admission Requirements

### Regular Admission

- INFO 100 (5 credits); INFO 200 (5); CSE 142 (4); STAT 311 (5) or QMETH 201 (4); one English composition course selected from the University list (5), with a minimum grade of 2.0 in each course. Departmentally approved transfer equivalents may be used to substitute for prerequisite courses. Students with a previous technology background may request that INFO 100 be waived. If INFO 100 is waived, students must take an additional 5 elective credits in INFO-prefix courses or other electives approved by the adviser.
- Minimum 2.00 cumulative college GPA.
- Admission is competitive, based on the following criteria:
  - Overall academic performance
  - Grades in courses required for admission to the major
  - Personal statement reflecting an interest in and commitment to becoming a major in this field

- Other evidence of interest in and commitment to the field (e.g., work experience, internships).
- Meeting the above criteria does not guarantee admission.
- Application deadline is April 15. Students apply online at [www.ischool.washington.edu](http://www.ischool.washington.edu). Admission is for autumn quarter only.
- Admission is done annually and new students enter the program autumn quarter. Most students apply spring of their sophomore year and begin the program the following autumn quarter as a junior.
- Transfer students should contact the Information School as soon as they become interested in the informatics major. The School considers courses equivalent to INFO 100 and INFO 200 and may allow a student to be admitted provisionally on condition that she or he completes those courses or equivalents with a minimum grade of 2.0 early in the program.

### Freshman Direct Admission Program (FDAP)

- Designed to recruit top high school students to the program and to the UW. Students who indicate an interest in the Informatics program are automatically considered for FDAP participation upon application to the UW. They are evaluated based on careful review of qualitative and quantitative factors, including high school GPA, SAT scores, personal statement, and any additional information provided in their application file. Students selected for FDAP are involved in the academic and social life of the Information School, participating in courses, activities, and research opportunities as appropriate during their freshman and sophomore years.
- The number of early admission (FDAP) students will not exceed 10% of the number of majors admitted each year.

## Major Requirements

94–98 credits as follows:

- Courses required for admission to the program (23 credits, as shown above)
- Core courses (55 credits): INFO 330 (5), INFO 340 (5), INFO 343 (5), INFO 360 (5), INFO 380 (5), INFO 450 (5), INFO 470 (5), INFO 481 (4), INFO 490 (8), CSE 143 (5), CSE 373 (3)
- *Areas of study (16–20 credits):* Students may choose a transcriptable option in either human-computer interaction (HCI) or information architecture (IA). (See below.) Alternatively students may work with their adviser to select a minimum of four classes (16–20 credits) to create a customized program aligned with their personal interests or career goals. For example, networking and information assurance, as well as social computing/social informatics, are additional areas of strength within the School.

### General Education and Areas of Knowledge:

- English composition (5 credits)
- Quantitative/Symbolic Reasoning (5 credits)
- Writing courses (10 credits)
- Natural World (20 credits)
- Individuals & Societies (20 credits)
- Visual, Literary, & Performing Arts (20 credits)

Up to 15 credits of INFO-prefix courses from the University Areas of Knowledge list may be counted toward the UW Areas of Knowledge requirement (Natural World; Individuals & Societies; Visual, Literary, & Performing Arts).

Students must earn a minimum 180 credits to graduate.

### Options

*Human-Computer Interaction (HCI) Option (16–20 credits).* The notation "Human Computer Interaction" is transcripted as an option for a student who graduates with a Bach-

elior of Science in Informatics degree and who completes the following:

Minimum four courses, totaling at least 16 credits, from the areas listed below, with the following distribution:

- At least one course in two of the areas listed below, other than foundations: user interface software and technology; design; usability and user research; social and ethical dimensions. (INFO 360, the Information School HCI foundations course, is a requirement for all informatics majors. Students can take additional HCI foundations courses that do count toward the four-class HCI requirement from the list below.)
- At least one course from the list below from a participating department outside the Information School (art, computer science, or technical communication).
- Special topics courses such as INFO 498, HCDE 490, and HCDE 496 may be approved within any of the course areas below on an individual, per-course basis, depending on subject matter.
- Course areas:
  - Foundations: ART 383 (5), CSE 440 ( ), HCDE 319 (5)
  - User Interface Software and Technology: CSE 441 (5), INFO 344 (5), HCDE 438 (5)
  - Design: ART 483 (5), ART 484 (5), INFO 424 (5), HCDE 455 (4)
  - Usability and User Research: INFO 310 (5), HCDE 317 (5), HCDE 318 (5)
  - Social and Ethical Dimensions: INFO 444 (5), INFO 447 (5)

*Information Architecture (IA) Option (16–20 credits).* The notation “Information Architecture” is transcribed as an option for a student who graduates with a Bachelor of Science in Informatics degree and who completes four courses from the following list: INFO 320 (5), INFO 344 (5), INFO 431 (3), INFO 432 (3), INFO 445 (5), INFO 446 (5).

The courses in the Information Architecture option build upon INFO 330, INFO 340, and INFO 343, all courses required for the major.

### Continuation Policy

Students are expected to make satisfactory progress towards attainment of the Bachelor of Science degree. Under normal circumstances, an informatics major attending full-time makes satisfactory progress by completing the major requirements in approximately two years after admission to the major, or within three years for students admitted to the major as sophomores. Lack of academic progress may be evidenced by low scholarship as well as excessive course repeats, course drops, or University withdrawals and cancellations. For more details, see adviser.

### Student Outcomes

- *Learning Objectives and Expected Outcomes:* The informatics program prepares students for a wide range of endeavors in the information field including information management and technology, research and information services, interactive system design, human-computer interaction, and information science.

Graduates of the informatics program are qualified for jobs in the information and technology industry and in business, public service, and other professions. Possible job titles include user experience designer, business analyst, consultant, usability engineer, data manager, information architect, Web developer, network manager, project manager, and information assurance professional.

The program also provides strong preparation for graduate studies. Graduates are successfully placed in prestigious graduate schools and pursue a variety of programs, including information and management science,

information science, biomedical informatics, business and accounting, and information technology.

Informatics student-learning outcomes include the ability to assess people's information needs and behavior; ability to design information systems to meet people's information needs; ability to work with information technologies (e.g., database, networks, Internet-based, interface design); ability to evaluate the impact of information technologies on people; ability to communicate effectively; ability to manage projects; ability to build working systems; ability to organize and manage information; ability to work effectively individually and as part of a team; and ability to understand the research process and its implication for information systems design and use. All informatics courses are designed to produce these outcomes through a rigorous experiential learning approach that emphasizes group work, research, writing, oral presentations, and technology.

- *Instructional and Research Facilities:* Located on the third and fourth floors of Mary Gates Hall, the School offers an extensive software collection, a state-of-the-art computer classroom, an innovative Technology Exploration (TE) Lab, and excellent network connectivity. Students have access to software applications including titles for database and text management, programming, graphics, multimedia production, Web development, Internet exploration and collaboration, and office productivity. Students also have access to a large number of bibliographic databases and commercial information services.

The School also has a dedicated information science research facility at the Roosevelt Commons Building. The research space comprises 7,000 square feet of offices, workstations, research labs, and meeting spaces.

- *Honors Options Available:* With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- *Research, Internships, and Service Learning:* Internships are encouraged, but not required. Students participate in a variety of internships, paid and non-paid. A significant number of students also work part-time in Informatics or technology-related positions, and participate in public service.

Informatics students are extensively engaged in faculty research and internships. A significant percentage of informatics students participates in the University's Undergraduate Research Symposium each year. Students have co-authored publications with faculty, had their research accepted for presentation at national conference poster sessions, and been recognized with various awards, including the Mary Gates Research Training Endowment for three consecutive years (2001-03).

- *School Scholarships:* The Henry Scholarships, in the amount of approximately \$1500 each, are awarded to three second-year majors in recognition for academic achievement, leadership, and service to the School and in professional/student activities. Students to be considered for the award are nominated by the Information School faculty and Undergraduate Program Committee members. The merit-based awards, named after the founder of the school and first director, William Henry, are intended to recognize and honor student achievement.
- *Student Organizations/Associations:* Undergraduates participate in a number of the School's many student organizations, including the UW Informatics Undergraduate Association (IUGA) and the student chapter of the American Society of Information Scientists and Technologists (ASIST).

*Of Special Note:*

*Capstone Projects:* Students often use their capstone projects to identify interest areas, develop skills, and prepare for future pursuits. Through capstone projects, students demonstrate the skills, understanding, and competencies they can successfully use to prepare for employment and graduate studies.

*Information Sessions:* Prospective students are encouraged to attend an Informatics information session. For a schedule of information sessions, visit the School website at [www.ischool.washington.edu/informatics/infosessions.aspx](http://www.ischool.washington.edu/informatics/infosessions.aspx).

## GRADUATE PROGRAMS

The School offers graduate programs leading to the Master of Library and Information Science (MLIS), the Master of Science in Information Management (MSIM), and the Doctor of Philosophy (Ph.D.) in Information Science.

### Master of Library and Information Science

MLIS Adviser

370 Mary Gates Hall, Box 352840

206-543-1794

[mlis@ischool.washington.edu](mailto:mlis@ischool.washington.edu)

#### Admission Requirements

The MLIS program is offered in two delivery modes: residential (on-campus, two-year program) and distance (online with quarterly residencies, three-year program). When applying, applicants must indicate for which program they are applying. Applications should also include:

- A current resume highlighting any relevant work experience, volunteer activities, and honors, awards, and presentations
- Three letters of recommendation
- Personal statement of educational and professional goals and responses to two supplemental questions
- Official transcript from each relevant institution attended
- GRE Scores. Applicants with an earned doctorate (Ph.D., MD, JD) are not required to submit GRE scores.
- TOEFL score (for international students)

#### Degree Requirements

63 credits, as follows:

- *Core curriculum (34 credits):* LIS 500 (2), LIS 510 (4), LIS 520 (4), LIS 530 (4), LIS 540 (5), LIS 550 (4), LIS 560 (3), LIS 570 (4), LIS 580 (4)
- *Electives (29 credits)*
- *Portfolio or Thesis Option:* MLIS students must complete either a portfolio or thesis in order to graduate.
- *Directed Fieldwork:* LIS 590 (2–4, max. 8) is an elective course designed to provide students an opportunity to work in an information environment under the supervision of an experienced professional mentor.

### Master of Library and Information Science, Law Librarianship

The Law MLIS program is designed to prepare lawyers with an existing J.D. degree to serve as law librarians in courts, federal and state units of government, law schools, corporations, and law firms.

#### Admission Requirements

- A current resume highlighting any relevant work experience, volunteer activities, and honors, awards, and presentations
- Three letters of recommendation

- Personal statement of educational and professional goals and responses to two supplemental questions
- Official transcript from each relevant institution attended
- Earned J.D. prior to enrollment in the MLIS program
- TOEFL score (for international students)

### Degree Requirements

44 credits, as follows:

- *Core curriculum* (23 credits): LIS 500 (2), LIS 510 (4), LIS 520 (4), LIS 530 (4), LIS 540 (5), LIS 550 (4)
- *Law librarianship courses* (17 credits): LIS 591 (3), LIS 592 (3), LIS 593 (3), LIS 594 (4), LIS 595 (4)
- *Directed fieldwork*: LIS 590 (4)

## Master of Science in Information Management

### Admission Requirements

- A current resume highlighting any relevant work experience, volunteer activities, and honors, awards, and presentations
- Three letters of recommendation
- Personal statement of educational and professional goals
- Official transcript from each relevant institution attended
- GRE or GMAT scores. Applicants with an earned doctorate (Ph.D., M.D., J.D.) are not required to submit GRE or GMAT scores.
- TOEFL score (for international students)

### Degree Requirements, Day Option

65–71 credits, to include:

- *Core curriculum*:
  - *Foundational core courses*: IMT 480 (4), IMT 440 (1–5, max. 5), IMT 500 (1)
  - *Technology core courses*: IMT 540 (4), IMT 541 (5), IMT 542 (3)
  - *Management core courses*: IMT 580 (4), IMT 581 (3), IMT 582 (4)
  - *Integrating core courses*: IMT 598 (3), IMT 595 (3–5)
  - *Electives* (24 credits): Beyond the required core courses, students have the option of crafting a program of study, in collaboration with their faculty adviser, specific to their interests and career goals. MSIM course electives include, among others, principles of information retrieval systems, strategic planning and evaluation, and marketing foundations for information professionals.
  - *Internship*: MSIM internships are structured around a course (IMT 590) and are designed to provide students an opportunity to work in an information environment under the supervision of an experienced professional mentor. During the internship placement (lasting a minimum of two academic quarters), the student works to meet meaningful learning objectives that have been mutually defined by student and internship supervisor.

### Degree Requirements, Executive Option

47–53 credits, to include:

- *Core curriculum*:
  - *Foundational core courses*: IMT 480 (4), IMT 440 (1–5, max. 5), IMT 500 (1)
  - *Technology core courses*: IMT 540 (4), IMT 541 (5), IMT 542 (3)

- *Management core courses*: IMT 580 (4), IMT 581 (3), IMT 582 (4)
- *Integrating core courses*: IMT 598 (3), IMT 595 (3–5)
- *Electives*: Students complete a minimum of 11 credits of electives, which includes advanced MSIM courses, relevant upper-level coursework in other academic disciplines, or an Independent Study (IMT 600).

## Doctor of Philosophy in Information Science

Ph.D. Adviser

370 Mary Gates Hall

206-543-1794

[phd@ischool.washington.edu](mailto:phd@ischool.washington.edu)

### Admission Requirements

#### 90 credits minimum, to include:

- Current curriculum vitae highlighting any academic and/or work experience, honors, publications, presentations, and research experience
- Three letters of recommendation
- Personal statement of educational and professional goals
- Official transcript from each relevant institution attended
- GRE Scores. Applicants with an earned doctorate (Ph.D., M.D., J.D.) are not required to submit GRE scores.
- TOEFL score (for international students)

### Degree Requirements

90 credits minimum, to include:

- *Required courses*: INSC 501 (3), INSC 570 (4), INSC 572 (5), INSC 500 (2); two research practica; two teaching practica; at least one of the following quantitative methods courses: BIOST 502 (4), BIOST 517 (4), COM 520 (5), CS&SS 507 (3), PSYCH 524 (4)
- Additional elective coursework selected in consultation with faculty advisers
- 18 graded credits in courses at the 500 level and above (taken prior to general examination)
- 60 credits taken prior to general examination
- 27 dissertation credits (INSC 800)
- Preliminary review determined by a School-based advisory committee at the end of the required first-year of full-time study
- General examination upon completion of coursework and practica components to attain formal candidacy for the Ph.D. program (candidate's certificate)
- Successfully defend a dissertation before a Supervisory Committee (final examination)

## Financial Aid

The University of Washington Financial Aid Office administers a variety of government and University funded financial aid programs for which applicants must submit the Free Application for Federal Student Aid form (FAFSA). For more information, contact the UW Financial Aid Office, 105 Schmitz Hall. Information on the FAFSA is also available [online](#).

## Graduate Assistantships and Scholarships

Financial aid options for full-time students may include graduate assistantships and scholarships. Graduate assistants generally work 220 hours per quarter, and receive a tuition waiver as well as a monthly salary and medical

benefits. Prospective MLIS and MSIM students are encouraged to apply during the admission process and throughout the year as other positions become available. Please visit our Student Employment Opportunities page at [www.ischool.washington.edu/people/studenttempopenings.aspx](http://www.ischool.washington.edu/people/studenttempopenings.aspx) to apply for open positions. Ph.D. students are automatically considered for graduate student service appointments.

MLIS scholarships are awarded on a basis of financial need, based on information from the Free Application for Federal Student Aid (FAFSA), and academic merit.

Information regarding additional sources of financial aid, from sources outside the Information School, is available at the Information School Financial Aid Resources [web page](#).

## Special Research Facilities

Located on the third and fourth floors of Mary Gates Hall, one of the University's high-technology buildings, the School offers an extensive software collection, a state-of-the-art computer classroom, an innovative Technology Exploration (TE) Lab, and excellent network connectivity. Students have access to software applications including titles for database and text management, programming, graphics, multimedia, Web development, Internet exploration and collaboration, and office productivity. Students also have access to a large number of bibliographic databases and commercial information services.

The School also has a dedicated information science research facility at the Roosevelt Commons Building. The research space comprises 7,000 square feet of offices, workstations, research labs, and meeting spaces.

For more information, please visit the School's website at [www.ischool.washington.edu/technology/](http://www.ischool.washington.edu/technology/).

## Continuing and Professional Education

The Information School works with University of Washington Educational Outreach to offer classes, workshops, and certificate programs for continuing education and professional development. Current certificate programs include Web technology solutions; information assurance and cybersecurity; and school library professional. Those interested in continuing education or certificate programs should contact UW Professional & Continuing Education, 4311 11th Avenue NE, Box 354978, University of Washington, Seattle, WA 98105. Phone: 206-543-2320 or see [www.pce.uw.edu/ext/](http://www.pce.uw.edu/ext/).

## Informatics

**INFO 100 Fluency in Information Technology (5) QSR** Introduces skills, concepts, and capabilities necessary to effectively use information technology. Includes logical reasoning, managing complexity, operation of computers and networks, and contemporary applications such as effective Web searching and database manipulation, ethical aspects, and social impacts of information technology. Offered jointly with CSE 100.

**INFO 200 Intellectual Foundations of Informatics (5) I&S** Information as an object of study, including theories, concepts, and principles of information, information seeking, cognitive processing, knowledge representation and restructuring, and their relationships to physical and intellectual access to information. Development of information systems for storage, organization, and retrieval. Experience in the application of theories, concepts, and principles.

**INFO 220 Information Research Strategies (3/5) I&S** Use information technology for research and information problem-solving. Create websites or other presentations, as well as find, manage, and evaluate information, and learn the ethical and legal constraints on information use.

**INFO 221 Information Research Strategies in History (3) I&S** Information research and problem solving in the context of history. Focuses on identifying information, need, information seeking, evaluation and presentation, and selection of the appropriate sources. Offered: jointly with HIST 221.

**INFO 222 Understanding Photographs as Historic Documents (3) I&S/NW** Introduction to understanding how to view and interpret information contained in photographs. Examines the photograph as artifact, intent of the photographer, photographic codes and meanings; how such information is used, misused, and manipulated for various purposes and how to navigate archival institutions in search of photographs. Offered: jointly with HIST 222.

**INFO 320 Information Needs, Searching, and Presentation (5)** Introduction to information needs, database and information organization and structure, Web and database searching and browsing, and information presentation. Examination of underlying principles in knowledge representation, indexing, record structures, online search process, search strategies and tactics, assessment of user needs, reference interviewing, post-processing, organization and presentation of information.

**INFO 330 Information Structures (5)** Introduction to the concepts and methods used to analyze, store, manage, and present information and navigation. Equal weight is given to understanding structures and implementing them. Topics include information analysis and organization methods, XML, and metadata concepts and application.

**INFO 340 Database Management and Information Retrieval (5) NW** Theories and models in system-centered approaches to information retrieval and database management. Information retrieval and database management systems include text and multimedia databases, web search engines and digital libraries. Issues in system design, development and evaluation, and tools for searching, retrieval, user interfaces, and usability. Prerequisite: CSE 143.

**INFO 341 Computer Networks and Distributed Applications (5) NW** Basic concepts of local and wide area computer networking including an overview of services provided by networks, network topologies and hardware, packet switching, client/server architectures, network protocols, and network servers and applications. Also addresses management, security, authentication, and policy issues associated with distributed systems. Prerequisite: CSE 142.

**INFO 343 Web Technologies (5)** Explores the best practices of usability and accessibility of design, styling of visual content and scripting to support interactivity including client-side protocols, markup, technologies and algorithms for building effective pages, sites, and web presentations. Prerequisite: CSE 142.

**INFO 344 Web Tools and Development (5)** Introduction to fundamental web technologies with an emphasis on scripting and programming. Includes both client and server technologies. Examines effective information architecture for websites, information presentation on Web pages, privacy policies, and Web security. Prerequisite: CSE 142; INFO 343.

**INFO 360 User-Centered Design (5) I&S** Introduces the theory and practice of user-centered design. Examines methods for identifying users' needs, understanding users' behaviors, envisioning and prototyping new systems, and evaluating the usability of systems. Emphasis on incorporating people in the design process from initial field observations to summative usability testing.

**INFO 380 Information Systems Analysis and Management (5)** Examines the evolution of how information is defined and managed in order to add value to organizations. Views information management and the CIO as key facilitators in creating or improving relationships, processes, competitiveness, products, and services.

**INFO 424 Information Visualization and Aesthetics (5) VLPA** Examines the visualization of information: the effects of human perception, the aesthetics of information design, the mechanics of visual display, and the semiotics of iconography. Examples may include census, epidemiological, crime, earth satellite, and medical data in the contexts of special

computer applications, user populations, and cultures. Prerequisite: CSE 143.

**INFO 430 Knowledge Organization and Representation (5)** Advanced study of knowledge organization using classificatory structures and creation of metadata element sets for representation. Conceptual and practical foundations for creating systems for information organization and representation. The creation, application, and use of a variety of systems and techniques for information organization and representation. Prerequisite: INFO 200; INFO 330.

**INFO 431 Metadata Design (3)** Explores principles of metadata schema and application profile design and implementation using XML technologies. Examines syntactic and semantic interoperability among diverse schemas and application profiles. Prerequisite: INFO 330; INFO 340.

**INFO 432 Ontology Design (3)** Covers concepts and technologies supporting semantic interoperability among different metadata and ontologies including topic maps, RDF, schema, and Web Ontology Language (OWL). Includes advanced semantic modeling of complex data. Prerequisite: INFO 431.

**INFO 444 Value-Sensitive Design (5)** Introduction to value-sensitive design (VSD), information system design that accounts for human values in a principled and comprehensive manner. Examination of existing systems from a VSD perspective. Explores VSD research methods including conceptual, technical, empirical investigations. Key values include accountability, autonomy, consent, privacy, property, trust, sustainability. Prerequisite: CSE 373.

**INFO 445 Advanced Database Design, Management, and Maintenance (5)** Advanced perspectives on DBMS theory, architecture, and implementation. Conceptual, logical, physical modeling. Index structures, query optimization and performance tuning, relational algebra, transaction processing, and concurrency control. Operational databases, decision support systems, and data warehousing. Projects in database implementation and integration. Social implications of large distributed database systems. Prerequisite: INFO 340; CSE 344.

**INFO 446 Advanced Search Engine Systems (5)** Focus on design, development and evaluation of search engines. Theories and models in information retrieval for text and multimedia databases, Web search engines, recommendation systems, and digital libraries. Topics include language issues, data-mining, machine learning, user-profiling, visualization, user interfaces, usability. Coursework involves analytical comparisons of search engines. Prerequisite INFO 340.

**INFO 447 Computer Supported Cooperative Work (5) I&S** Focuses on design and use of collaboration technologies to communicate, share information, and coordinate activity. Emphasis on behavioral and social aspects of adopting and using these technologies. Topics include the history of work in this and related fields, collaboration support for teams, organizations, and communities.

**INFO 450 Information Ethics and Policy (5) I&S** Provides a framework for analyzing the ethical, legal, economic, and socio-political issues surrounding information, information technologies, and the information industries. Explores policy and ethical issues of information access and control including: intellectual property, file sharing, free speech, privacy, and national security.

**INFO 454 Information Policy: Domestic and Global (5) I&S** National and international information policy: public and private sector policy in terms of privacy, access, and exploitation; technology infrastructures and policies supporting the information industries; digital convergence and the emerging mega-industries.

**INFO 458 Reading Seminar in Social Aspects of Information Systems (2, max. 12)** Addresses foundational issues in social aspects of information systems. Introduction to the intellectual traditions that underlie fields such as computer ethics, social informatics, and value sensitive design. Format entails in-depth discussions based on careful reading of primary source texts selected by seminar participants.

**INFO 461 Cooperative Aspects of User Centered Design (5)** Introduces the theory and practice of cooperative user-centered software design, applying fundamental theories and techniques from social psychology, computer-supported collaborative work, and software engineering. Prerequisite: INFO 360.

**INFO 463 Input and Interaction (5)** Introduces input and interaction techniques for desktop, mobile, and other computing environments. Combines motor and perceptual psychology, interaction design, and input devices and software in the study of human-computer systems. Emphasizes using human performance models in inform the design of new interaction techniques. Prerequisite: INFO 360.

**INFO 470 Research Methods in Informatics (5)** Introduction to the research process investigating information needs, creation, organization, flow, retrieval, and use. Stages include: research definition, questions, objectives, data collection and management, data analysis, and data interpretation. Techniques include: observation, interviews, questionnaires, and transaction-log analysis. Prerequisite: either STAT 220, STAT 311, or QMETH 201.

**INFO 481 Project Management in Informatics (4)** Introduces project management principles within the context of Informatics. Provides knowledge that managers need to implement information systems on time and within budget. Concentrates on methods and issues in organizing, planning, and controlling projects, and the use of computer-based project management tools.

**INFO 490 Design and Development of Interactive Systems (4–8, max. 8)** Design and formative evaluation of an interactive information system to solve a real problem. Student-organized team projects are encouraged. Must be taken for a minimum of 5 credits. Prerequisite: INFO 360; INFO 380; INFO 470.

**INFO 495 Internship in Informatics (1–5, max. 12)** Internship in the private or public sector, as approved by faculty member. Work jointly supervised by faculty member (or approved academic sponsor) and an on-site work supervisor.

**INFO 498 Special Topics in Informatics (1–5, max. 15)** Various topics in informatics.

**INFO 499 Independent Study (1–5, max. 15)** Readings, design projects, or research under faculty supervision.

## Information School

**INFX 501 Concepts in Algorithmic Thinking for Information (1)** Presents programming concepts in the context of information science including the concepts of the algorithm, data storage, expressions, syntax, logic, objects, commands, and events. Introduces the algorithmic manipulation of information objects, and the mindset and methods of computer programming and application development. Credit/no credit only.

**INFX 502 Database Concepts for Information Professionals (1)** Introduces the terminology and concepts of working with relational database management systems. Emphasizes working with tables and extracting information from data using Structures Query Language (SQL) commands and tools. Credit/ no credit only.

**INFX 503 Website Design Concepts for Information Professionals (1)** Introduces the context and construction of websites presenting an integrated understanding of web design principles, information behavior, and technical skills. Emphasizes the roll of markup in information display and organization, the development of large sites, web strategy, and site construction. Credit/no credit only.

**INFX 504 Networking and Network Applications for Information Professionals (1)** Introduces the concepts, terminology and technologies of digital networks, including how networks operate and the influence networks have on the workplace and society. Includes preparation to think critically about the impacts of networking technologies on organizations, work groups and information systems. Credit/no Credit only.

**INFX 508 Reading Seminar (2)** Discusses theoretical works and contemporary research in areas related to information

science, information management, or information technology and design. Introduces students to the intellectual traditions that underlie the field. Credit/no credit only.

**INFX 531 Metadata Design (3)** Design principles of metadata schemas and application profiles—implementation of interoperable application profiles using XML technology. Focuses on achieving syntactic and semantic interoperability among diverse metadata schemas and application profiles. Prerequisite: either LIS 530 or IMT 530; INFX 542; or instructor's permission.

**INFX 532 Ontology Design (3)** Studies semantic interoperability among different metadata schemas and ontologies. Elaborates on concepts and technology related to Topic Maps, RDF Schema, and Web Ontology Language (OWL) to achieve advanced and semantic data modeling of complex data that exist in the real world. Prerequisite: INFX 531 or instructor's permission.

**INFX 538 Metadata Design Studio (4)** Principles, skills and practices in the conceptualization and implementation of metadata systems with a focus on semantic web. Project-based exploration of domain and abstract data modeling, attribute/value space definition, and machine encoding decision. Prerequisite: either LIS 530 or IMT 530; INFX 542; or permission of instructor.

**INFX 542 Information Structures Using XML (4)** Introduces the concepts and methods used to analyze, store, manage, and present information and navigation. Equal weight given to understanding structures and implementing them. Topics include information analysis and organizational methods as well as XML and metadata concepts and application. Prerequisite: INFX 503.

**INFX 543 Relational Database Management Systems (4)** Introduction to relational database design and development theory, concepts and skills, including traditional transactional database theory, architecture, and implementation in a user-centered systems context using SQL. Introduces database modeling, security, and privacy issues. Prerequisite: INFX 502 or permission of instructor.

**INFX 544 Information Retrieval Systems (3)** Introduction to theory and models in information retrieval and the systems for storage and retrieval of unstructured information. Examines information retrieval architectures, processes, retrieval models, query languages, and methods of system evaluation, methods and tools for document analysis, interfaces, and usability.

**INFX 546 Data Communications and Networking (4)** Covers local and wide area computer networking including topologies and hardware, packet switching, client/server architectures, network protocols, and network servers and applications. Also addresses server operating systems, management, security, authentication, and policy issues associated with distributed networks.

**INFX 563 Advanced Relational Database Management Systems (4)** Advanced relational database design and development theory using SQL, concepts and skills. Topics include advanced T-SQL; backup and recovery; and triggers and reporting services. Prerequisite: INFX 501; INFX 543.

**INFX 571 Research Seminar (2–4, max. 10)** Students work in teams under the supervision of individual faculty members to engage in research or design activities and learn through hands-on participation and study. Learning activities include data collection, data analysis, building prototypes, testing or evaluation, or dissemination activities.

**INFX 594 Degree Research Project (3)** Includes analysis, design, completion, documentation, and presentation of a faculty-defined individual or group research project demonstrating professional-level knowledge and skills. Meets culminating experience Master's degree requirement. Credit/no credit only. Prerequisite: completion of 30 credits and advisor approval of an MLIS degree plan or completion of 38 MSIN core credits.

**INFX 595 Capstone I - Project Planning (2)** Analysis and preliminary design of an approved individual or group research or implementation project demonstrating professional-level knowledge and skills. Credit/no credit only. Prerequisite:

either completion of all MSIM core courses or completion of 30 credit hours and advisor approval of an MLIS degree plan.

**INFX 596 Capstone II - Project Implementation (3)** Implementation of a project demonstrating professional-level knowledge and skills based on a project plan developed in INFX 595. Prerequisite: INFX 595.

**INFX 598 Special Topics (1–4, max. 30)** Introduces innovation and specialized topics relating to the study of information in any context.

## Information Management and Technology

**IMT 500 The Information Management Framework (1)** Overview of the major concepts in the MSIM curriculum. Includes an introduction to the concept of information as well as its relation to organizational management, technology, and design and culture.

**IMT 510 Human Aspects of Information Systems (4)** Social, organizational, cognitive, behavioral and contextual aspects of information, including basic concepts in human information behavior, conceptual and practical frameworks used to study human-information interaction, and social responses to information technology. User-based and work-based evaluation and design of information systems. Exposure to experimental and interview methodologies.

**IMT 520 Information Services and Resources (4)** Concepts, processes, and skills of information involving creation, production, distribution, selection, collection, and services to facilitate access. Analysis of the information mediation process, including determining information needs; searching for, evaluation and presentation of appropriate results; and modalities for delivery of services.

**IMT 525 Information Management and Technology in Sports (3)** Explores the information perspective, including the role and the use of information, information management, and information technologies applied to the sports context. Examines modern and emerging information management and technology systems and their design and use in administering intercollegiate athletic functions.

**IMT 530 Organization of Information Resources (4)** Introduction to issues in organization of information and information objects including analysis of intellectual and physical characteristics of information objects; use of metadata and metadata standards for information systems; theory of classification, including semantic relationships and facet analysis; creation of controlled vocabularies; and display and arrangement.

**IMT 540 Design methods for Interaction and Systems (4)** Introduction to the theory and practice of user-centered design. Examines design methods for identifying and describing user needs, specifying and prototyping new systems, and evaluating the usability of systems. Examines design methodologies such as contextual design and value-sensitive design, giving specific emphasis to human-information interaction. Prerequisite: permission of instructor.

**IMT 542 Principles of Information Retrieval Systems (3)** Introduction to information systems for the storage and retrieval of unstructured information. Examines information retrieval architectures, processes, retrieval models, query languages, and methods of system evaluation. Gives emphasis to Internet-based services for storing and accessing information to be used in integrated application development. Prerequisite: IMT 540.

**IMT 546 Data Communications and Networking (4)** Local and wide area computer networking including network topologies and hardware, packet switching, client/server architectures, network protocols, and network servers and applications. Addresses server operating systems, management, security, authentication, and policy issues associated with distributed networks. Prerequisite: IMT 510.

**IMT 548 Information System Design (5)** Theoretical and practical examination of information systems analysis and design processes as they apply in the workplace. Explores

techniques for assessing the need for technology, defining specifications, and involving users in the design process. Design methods include social impact statements, future scenarios, mock-ups, rapid prototyping, and field-testing.

**IMT 550 Policy, Law, and Ethics in Information Management (3)** Select concepts, processes, and issues related to the organizational contexts within which information professionals practice. Topics include information as public/private good, intellectual property, privacy, confidentiality, information liability, and information policy. Focus on contemporary issues affecting the role of the information manager.

**IMT 551 Foundations of Organizational Information Assurance (3)** Examines concepts, elements, strategies, skills related to the life cycle of information assurance—involving policies, practices, mechanisms, dissemination and validation—that ensure the confidentiality, integrity, and availability of information and information systems. Analysis of the information assurance planning process, including determination and analysis of information assurance organization goals, the threat spectrum, risk, and legal and ethical issues.

**IMT 552 Information Assurance Risk Assessment and Management (3)** Examines the concepts, processes and skills related to risk management in information assurance involving risk assessment, risk analysis and mitigation planning. Analysis of the risk management process through several structured approaches that facilitate information assurance decision-making. Prerequisite: IMT 551.

**IMT 553 Establishing and Managing Information Assurance Strategies (3–5)** Applies and combines information assurance concepts, processes and skills to solve case studies from practitioner experiences and explore the role of policy in creating a successful information assurance program. Prerequisite: IMT 551, IMT 552.

**IMT 580 Management of Information Organizations (4)** Introduction to internal and external management issues and practices in information organizations. Examines key topics drawn from the fields of organizational theory and behavior, including planning and decision-making, organizational structure, leadership and motivation. Reviews strategic and operational issues including human and organizational issues related to technology introduction, use, and management.

**IMT 581 Information and the Management of Change (3)** Practical application of the critical roles and aspects of information and information processes in the management of organizational change. Topics include organization learning, knowledge management as a process, business process change, change project management, business/competitive intelligence, benchmarking, and best practices. Prerequisite: IMT 580.

**IMT 582 Strategic Information Initiatives (4)** Studies and applies strategic information initiatives within an organization, including: readiness assessment, organizational mandates, information inventories, content management, information audits, and information architecture initiatives. Focuses on building business cases for and leading information initiatives in organizations.

**IMT 583 Finance and Accounting Foundations for Information Professionals (3)** Introduction to financial accounting, including the principles of double-entry accounting, balance sheets, income, and cash flow statements. Covers key financial ratios and their use for various analytical purposes, along with the elements of a financial plan or budget.

**IMT 584 Marketing Foundations for Information Professionals (3)** Introduction to the principles of marketing. Looks at how to assess an environment from a marketing perspective, consumer and business behavior, market segmentation, product/service strategies, new product development processes, pricing, channels, retail/wholesale, marketing communication, and direct selling.

**IMT 585 Human Resource Management Foundations for Information Professionals (3)** Introduction to human resource management for information professionals. Covers the

principles of job analysis, employee selection, interviewing, training, and appraisal.

**IMT 586 Information Dynamics I (4)** Introduction to the concepts and methods of information feedback, systems thinking, soft systems methodology (SSM), and “soft operations research,” as well as the quantitative modeling of complex dynamic systems by means of differential and integral equations (system dynamics). Offered: jointly with INSC 586.

**IMT 587 Information Dynamics II (4)** Advanced concepts and methods of information feedback, systems thinking, soft systems methodology (SSM), and “soft operations research,” as well as the quantitative modeling of complex dynamic systems by means of differential and integral equations (system dynamics), including model building, testing, and validating. Prerequisite: IMT 586.

**IMT 588 Project Management in Information Organizations (4)** Examines roles, responsibilities, and methods of planning, and controlling projects. Analysis of critical issues such as the relationship between project management and; organizational culture, structure, and processes; cross-functional and globally distributed teams; project governance, metric, and risk and performance management; communication, decision-making, and conflict resolution; organizational learning, change and knowledge management. Prerequisite: introductory coursework in project management or permission of instructor. Offered: jointly with INSC 588.

**IMT 589 Special Topics in Information Management (1-4, max. 12)** Special study and research in topics of current concern to faculty and students.

**IMT 595 Stakeholders, Information, and Technology (3-5, max. 5)** Capstone experience. Addresses system integration and the increasing demand to apply a broad range of technologies to the information needs of diverse user groups during the implementation of comprehensive information systems across an organization. Encourages student-organized individual/team projects. Credit/no credit only. Prerequisite: completion of IMT core courses 510 through 582.

**IMT 598 Emerging Trends in Information Management and Technology (3)** Focus on emerging trends in information management and information technology. Attention given to their impact on the functions of the chief information officer and others managing the acquisition, retention, use and disposition of information and the enabling technologies. Exploration of methods and resources for trend discovery and tracking. Prerequisite: permission of instructor.

**IMT 590 Fieldwork in Information Management (1-4, max. 12)** Supervised fieldwork. May be taken in as many as six consecutive quarters. Prerequisite: enrollment in the MSIM program.

**IMT 600 Independent Study or Research in Information Management (1-4)** Supervised independent study or research. May be taken in as many as six consecutive quarters. Prerequisite: enrollment in the MSIM program.

## Information Science

**INSC 500 Faculty Seminar(2)** Presentations by faculty concerning research projects in which they are involved.

**INSC 501 Theoretical Foundations for Information Science (3)** In-depth exploration of the philosophical, theoretical, methodological, and historical foundation of information science and the study of information.

**INSC 512 Community Analysis (4)** Explores key concepts of community in its broadest sense, methodological approaches for analyzing information needs and available resources, how to design information services in response to identified needs, and service evaluation. Facilitating the information behavior of all groups within a community and identifying how their needs interconnect. Prerequisite: LIS 510. Offered: jointly with LIS 512.

**INSC 518 Seminar in Human Information Interaction (4)** Investigates conceptual frameworks, assumptions, analytical tools, concepts, models, and theories in human information interaction (HII). Topics may include theories of information behavior, information behavior in everyday life, social infor-

matics, HII in organizations, or personal information management. Previous readings in HII preferred. Prerequisite: permission of instructor.

**INSC 535 Classification Theory (3)** Survey of classificatory principles from bibliographic, philosophical, socio-cognitive, and linguistic perspectives. Overview of history of bibliographic classification and exploration of some existing bibliographic classification systems. Ramification of theoretical approach for classification practice. Prerequisite: LIS 530. Offered: jointly with LIS 535.

**INSC 538 Seminar in Information Organization (4)** Seminar on information organization, focusing on any area of information organization, including, classification theory, meta-data, document theory, information organization in information systems; social and political aspects of classification, controlled vocabularies, and cataloging history.

**INSC 541 HCI Design Foundations for Interactive Systems (4)** Develops knowledge and skills for design-based inquiry of interactive systems. Students practice user-centered design methods and study theories of human-computer interaction, including but not limited to: goal-based design and task analysis, scenario-based design, soft systems methodology, value sensitive design, universal design, and participatory design.

**INSC 542 HCI Design Studio for Interactive Systems (4)** Develops knowledge and skills for design-based inquiry of interactive systems. Includes a quarter-long project using appropriate methods and iteratively engages research, design, prototyping, and evaluation activities. Opportunity to reflect upon practice and receive critical review of work throughout the quarter.

**INSC 543 Value Sensitive Design (4)** Text Develop knowledge and skills to account for human values in design, development, and deployment of information systems. In-depth examination of value sensitive design theory, methods, and practice, including stakeholder project. Prerequisite: permission of instructor.

**INSC 544 Information Retrieval System (3)** Covers theories and models in information retrieval (IR) and reviews user-centered and system-centered approaches. Issues involved in the design, development and evaluation of IR systems are examined including: methods and tools for document analysis, retrieval techniques, search engines, interfaces, usability, evaluation. Offered: jointly with LIS 544.

**INSC 546 Assistive Technology and Inclusive Design (4)** Examines interactive technologies for users with alternative skills or in alternative contexts. Covers universal design, inclusive design, and assistive technologies. Addresses needs of users with physical limitations, children/elders, users in developing nations, and mobile users.

**INSC 547 Collaborative and Social Computing (4)** Seminar on the design of collaborative and social computing systems. Introduces theories for analyzing collaborative on-line and face-to-face. Student apply a theoretical perspective through the design of a social or collaborative application. Application domains include blogging, tagging, on-line communities, social recommending, ubiquitous computing, and collaboration in domestic settings.

**INSC 555 Information and Values (4, max. 12)** Explores value systems within a range of different social and technological environments.

**INSC 557 Cultural and Ethnic Dimensions in Information Science (4)** Examines ethnic and cultural dimensions of information storage and transfer, knowledge creation and exchange, and information-related values in an increasing global world. Readings from anthropology, cultural learning, cross-cultural communications, and ethnic traditions provide the basis for discussions about conducting research across culturally distinct communities. Prerequisite: permission of instructor.

**INSC 565 Teaching Practicum I (3)** Doctoral student participation in teaching in a faculty-taught course. Credit/no credit only.

**INSC 566 Teaching Practicum II (3)** Doctoral student takes primary teaching responsibility for a course under supervision of a faculty liaison. Credit/no credit only. Prerequisite: INSC 565.

**INSC 570 Research Design (4)** Introduction to empirical research, basics of theory construction and research design, types of research, ethical issues, instruments and techniques for descriptive research, measures of association. Employs an integrated (qualitative and quantitative) and focused approach.

**INSC 571 Quantitative Methods in Information Science (5)** Describes uses, characteristics, and theoretical bases of research methods and data analysis techniques used in quantitative research, emphasizing uses in information and library science. Topics include experimental design, descriptive and inferential statistics, the normal distribution, elementary probability, nonparametric statistics, and exploratory data analysis techniques. Prerequisite: INSC 570.

**INSC 572 Qualitative Methods in Information Science (5)** Principles and approaches to conducting qualitative research in information science, including how to design a qualitative study, role of context, methods of data collection and analysis, increasing the trustworthiness of data, minimizing observer effect, how to incorporate and build theory. Exposure to field research and data analysis. Prerequisite: INSC 570.

**INSC 575 Research Practicum I (3)** Students work with a researcher from the Information School as an active member of a research team. Credit/no credit only.

**INSC 576 Research Practicum II (3)** Students will work with an approved researcher as an active member of a research team. Credit/no credit only. Prerequisite: INSC 575 or permission of instructor.

**INSC 578 Research Seminar (1-2, max. 15)** Research presentations on a wide variety of topics in Information Science.

**INSC 579 Research Colloquium in Information Science (2, max. 30)** Research colloquium on various research topics in information science. Faculty, visitors, and students present current research. Credit/no credit only. Prerequisite: permission of instructor.

**INSC 581 Organizational Theories of Information Systems (4)** Surveys major strands of management of information systems research. Covers the behavioral, economic, strategic, and technical research perspectives of MIS research.

**INSC 586 Information Dynamics I (4)** Introduction to the concepts and methods of information feedback, systems thinking, soft systems methodology (SSM), and “soft operations research,” as well as the quantitative modeling of complex dynamic systems by means of differential and integral equations (system dynamics). Offered: jointly with IMT 586.

**INSC 588 Project Management in Information Organizations (4)** Examines roles, responsibilities, and methods of planning, and controlling projects. Analysis of critical issues such as the relationship between project management and; organizational culture, structure, and processes; cross-functional and globally distributed teams; project governance, metric, and risk and performance management; communication, decision-making, and conflict resolution; organizational learning, change and knowledge management. Prerequisite: introductory coursework in project management or permission of instructor. Offered: jointly with IMT 588.

**INSC 598 Special Topics in Information Science (3, max. 12)**

**INSC 599 Independent Study in Information Science (1-5, max. 15)** Readings, design projects, or research under faculty supervision. Prerequisite: permission of instructor and PhD program chair.

**INSC 600 Independent Study or Research (\*)** Credit/no credit only.

**INSC 800 Doctoral Dissertation (\*)** Credit/no credit only.

## Information Technology Applications

**ITA 340 Introduction to Web Publishing (3)** Introduction to markup languages and publishing web content. Students gain understanding of HTML coding and extensions, image manipulation, information architecture, and website publishing. Other topics include: the Web Accessibility Initiative, survey of Graphical User Interface (GUI) HTML editors, on-line privacy and security, and eXtensible Markup Language (XML).

**ITA 341 Client-side Scripting and Design (3)** Introduction to web browser design environment, scripting languages, JavaScript, Document Object Model (DOM), and creation of dynamic HTML web pages (DHTML) in combination with Cascading Style Sheets (CSS). Other topics include: client-server architecture and web design principles in the contexts of technical feasibility, usability, and accessibility. Prerequisite: ITA 340.

**ITA 342 Introduction to SQL and Data Storage Technologies (3)** Fundamentals of database design in a client-server architecture useful for web applications. Subsequent topics build upon foundation by introducing the Structured Query Language (SQL), open source tools MySQL and PHP for database processing, security issues in database applications, and XML as a alternate database storage technology. Prerequisite: ITA 341.

**ITA 343 Server-Side Programming and Web-data Integration (3)** Provides framework to integrate server-side programming concepts and techniques, database technologies, and client-side scripting to design and implement dynamic web applications. Examines techniques using PHP, design and implementation of database (MySQL) connections, web application security, and XML data publication. Prerequisite: ITA 342.

## Library and Information Science

**LIS 462 Skills Approach to Information, Communications, and Technology (ICT) Literacy (3)** Introduction to the Big6 TM Skills approach to information, communications, and technology (ICT) literacy for personal, school, district, or higher education settings. Includes technology within the Big6 framework, connection to standards, instructional design, assessment, curriculum mapping, peer collaboration, the parent connection, program planning, and implementation.

**LIS 498 Special Topics (1–5, max. 15)** Library service and information science subject matter in seminars, workshops, or other appropriate formats. Topics vary and may be repeated for credit.

**LIS 500 The Life Cycle of Information (2)** Overview of the major concepts, processes and systems, actors, and operations in the life cycle of information. Introduction to the creation, publishing and distribution, evaluation and selection, organization, access, retrieval, and use of information. Exploration of the social context in which these processes and their stakeholders interact. Credit/no credit only.

**LIS 501 History and Foundations of Libraries and Librarianship (3)** Introduces the history of libraries, major issues in contemporary library and information work, and types of libraries. Examines the role of libraries in society, the development of professional librarianship, and the role of librarians.

**LIS 505 Archival and Manuscript Services (3)** Selection, organization, and uses of archival and manuscript collections. Emphasis on the principles and techniques; some attention to the administration of state archival and historical institutions' collections. Lecture, demonstration, and laboratory.

**LIS 507 Preservation and Conservation of Library Materials (3)** Consideration of the many factors contributing to the physical vulnerability of library materials of all kinds and an overview of resources and strategies for those who determine preservation policy or manage the application of such policy. No technical background necessary.

**LIS 508 History of Recorded Information (4)** Exploration of the history and ongoing transformation of recorded information within three broad spheres of human life: public communication, administrative and commercial operation, and personal communication.

**LIS 510 Information Behavior (4)** Introduction to the user-centered approach to information behavior. Theoretical foundations of various information behaviors such as information need, utilizing, gathering, seeking, and evaluating. Synthesis of user studies, construction of user profiles, performance of gap analysis, and application of the results of user studies to improve services and system design. Prerequisite: LIS 500.

**LIS 511 Systems Analysis (4)** Introduction to the systems approach including basic concepts in the approach, dimensions of systems and steps in systems design. Emphasis is on the analysis, evaluation and design of information systems and services. Prerequisite: LIS 500.

**LIS 512 Community Analysis (4)** Explores key concepts of community in its broadest sense, methodological approaches for analyzing information needs and available resources, how to design information services in response to identified needs, and service evaluation. Facilitating the information behavior of all groups within a community and identifying how their needs interconnect. Prerequisite: LIS 510. Offered: jointly with INSC 512.

**LIS 515 Ecological Information Systems (4)** Introduction to cognitive work analysis framework. Prepares for active role in design and evaluation of information systems. Familiarization with basic concepts of cognitive systems engineering and practice in field study, data analysis, and transforming field findings into requirements for the design of an information system. Offered: jointly with T C 515.

**LIS 517 Information Seeking Behavior in Ethnolinguistic Communities (3)** Examines the role of culture and language in seeking and processing of information by ethnolinguistic groups. Examines behaviors of gatekeepers including exploration of the Gatekeeper Model and methodological considerations in conducting cross-cultural research into information seeking behavior. Develops appropriate service models for ethnolinguistic groups. Prerequisite: LIS 510.

**LIS 519 Special Topics in Information Behavior (1–4, max. 18)** Introduction to innovative and specialized topics in information behavior. Course may be offered irregularly and may be repeated for credit. Prerequisite: LIS 510.

**LIS 520 Information Resources, Services, and Collections (4)** Concepts, processes, and skills related to parts of the life cycle of knowledge involving creation, production, distribution, selection, collection, and services to facilitate access. Specific discussion topics include characteristics of recorded knowledge; organizations and services devoted to managing access to recorded knowledge; principles associated with development of recorded knowledge and collections. Prerequisite: LIS 500.

**LIS 521 Principles of Information Services (4)** Analysis of the information mediation process, including determination and analysis of information needs; searching for, evaluation, and presentation of appropriate results; modalities for delivery of services; and current and future techniques. Prerequisite: LIS 520.

**LIS 522 Collection Development (3)** Access to materials as context for development and management of library collections in academic, public, school libraries. Community analysis, library mission; collection development policies, criteria, levels, responsibilities; aids to selection; collection evaluation, use studies; controversial materials.

**LIS 523 Advanced Information Services (4)** Investigation of the development, administration, and evaluation of information services for supporting the research process both within and across organizations. Prerequisite: LIS 521 or permission of instructor.

**LIS 524 Adult Reader Services in the Public Library (3)** Focuses on developing and performing readers' advisory services for contemporary adult fiction and non-fiction. Includes interpersonal and marketing skills necessary to pro-

mote reading including reading advocacy, readers' advisory interviewing, writing advisory annotations, presenting book talks, and conducting book discussion groups.

**LIS 525 Genres for Adult Readers (3)** Reviews characteristics of the most popular genres of fiction, including speculative fiction, mystery/thriller/suspense, romance, westerns, and graphic fiction/memoir. Helps to develop practice in book talking, preparing annotated booklists, and making reading suggestions to library users.

**LIS 526 Government Publications (3)** Introduction to government publications of the United States and their acquisition, organization, and use. Other topics covered include the public's right to know, the Federal Depository Library Program, government influences in our daily lives, and future directions in government information. Credit/no credit only.

**LIS 527 Business Information Resources (3)** Survey of the extent and nature of business information and its sources, and of business information producers and consumers. Study and use of both print and on-line sources.

**LIS 528 Health Sciences Information Needs, Resources, and Environment (3)** Characteristics of users of health sciences information; health professionals, researchers, consumers and patients; environments (academic health sciences centers, hospitals, clinics, and public libraries); evaluation of information resources in health care; types and uses of health information management systems; policy issues, professional standards, education, and certification. Offered: jointly with MEDE 570.

**LIS 529 Special Topics in Information Resources, Services and Collections (1–5, max. 18)** Introduction to innovation and specialized topics in information resources, services and collections. Prerequisite: LIS 500, LIS 520.

**LIS 530 Organization of Information and Resources (4)** Introduction to issues in organization of information and documents including: analysis of intellectual and physical characteristics of documents; principles and practice in surrogate creation, including standards and selection of meta-data elements; theory of classification, including semantic relationships and facet analysis; creation of controlled vocabularies; and display and arrangement. Prerequisite: LIS 500, which may be taken concurrently.

**LIS 531 Catalogs, Cataloging, and Classification (4)** Develops an understanding of library catalogs as information retrieval systems. Introduces library cataloging and classification. Focus on principles and standards in the creation of catalogs and cataloging records. Includes practice in descriptive and subject cataloging and classification. User perspective emphasized throughout. Prerequisite: LIS 500, LIS 530.

**LIS 533 Advanced Cataloging and Classification (4)** In-depth theory and practice in library cataloging and classification. Includes introduction to cataloging materials in a variety of formats. Prerequisite: LIS 500, LIS 530, and LIS 531.

**LIS 534 Indigenous Systems of Knowledge (3)** Conceptual foundations and comparative analysis of indigenous knowledge organization systems. Feasibility and use of contemporary knowledge organization mechanisms including thesauri and ontologies in expressing the cultures and artifacts of indigenous peoples. Prerequisite: LIS 530 or permission of instructor.

**LIS 535 Classification Theory (3)** Survey of classificatory principles from bibliographic, philosophical, socio-cognitive, and linguistic perspectives. Overview of history of bibliographic classification and exploration of some existing bibliographic classification systems. Ramification of theoretical approach for classification practice. Prerequisite: LIS 530. Offered: jointly with INSC 535.

**LIS 536 Indexing and Abstracting (3)** Exploration of issues in subject representation. Survey of different approaches, techniques, and methods for representing the subject matter of documents, including an evaluation of the role of users and context in subject representation. Formulation of policies for indexing and abstracting services. Prerequisite: LIS 530.

**LIS 537 Construction of Indexing Languages (4)** Exploration of the design, construction, evaluation, and maintenance of controlled indexing languages, including studies of how users are integrated into the design process. Through completion of thesaurus construction project, prepares students to design index languages, plan and implement a design project, and evaluate indexing languages. Credit/no credit only. Prerequisite: LIS 530.

**LIS 539 Special Topics in Organization of Information and Resources (1–4, max. 18)** Introduction to innovative and specialized topics in the organization of information and resources. Prerequisite: LIS 500, LIS 530.

**LIS 540 Information Systems, Architectures and Retrieval (5)** Introduction and overview of information systems, system architectures, and retrieval models. Emphasis given to the role of users in the design, development, and evaluation of information retrieval and database management systems. Prerequisite: LIS 500, which may be taken concurrently.

**LIS 541 Internet Technologies and Applications (3)** Overview of Internet technologies including networking hardware, the TCP/IP protocol suite, addressing, packets and routing, the client/server model. End-user applications for communication and collaboration such as telnet, FTP, e-mail, conferencing, and streaming media. Website creation, development, and management. Credit/no credit only.

**LIS 542 Conceptual Database Design (5)** Introduction to relational database theory and technology from an information science perspective. Focuses on traditional transactional database theory, architecture and implementation in a user-centered systems context. Introduces set and graph theory, relational algebra, and data warehouses. Credit/no credit only. Prerequisite: LIS 511 or LIS 540.

**LIS 543 Design of Information Systems (3)** Discusses how theories of conceptual data modeling affect design of database and information systems, examines relationships between modeling and implementation, and bridges gaps between theoretical understanding of database design and implementation issues. Implements conceptual schema development in LIS 542.

**LIS 544 Information Retrieval System (3)** Covers theories and models in information retrieval (IR) and reviews user-centered and system-centered approaches. Issues involved in the design, development and evaluation of IR systems are examined including: methods and tools for document analysis, retrieval techniques, search engines, interfaces, usability, evaluation. Offered: jointly with INSC 544.

**LIS 545 Programming for Information Systems (5)** Introduction to structured object-oriented programming for information systems. Focus on fundamental principles of programming with attention to elementary algorithms and data structures, interface design, user testing, and knowledge representation. Prerequisite: LIS 540 or permission of instructor.

**LIS 546 Network System Administration (4)** Introduction to local area network hardware, topologies, operating systems, and applications. Covers aspects of network setup and management including network and application protocols, system configuration, security and Internet connectivity. Hands-on experience with network applications and operating systems. Prerequisite: LIS 500.

**LIS 549 Special Topics in Information Systems, Architectures, and Retrieval (1–4, max. 18)** Introduction to innovative and specialized topics in information systems, architectures, and retrieval. Prerequisite: LIS 540.

**LIS 550 Information in Social Context (4)** Concepts, processes, and issues related to the larger social context within which the life cycle of knowledge is played out. Discussion topics include intellectual freedom, information as public/private good, intellectual property, privacy, confidentiality, information liability, information and telecommunications policy, the economics of information, and other professional values. Prerequisite: LIS 500, which may be taken concurrently.

**LIS 551 Intellectual Freedom in Libraries (3)** Analysis of issues related to intellectual freedom, particularly to implications for libraries and librarians. Consideration of current legal climate, conformity versus freedom in modern world, librarian as censor, social responsibility and individual freedom, intellectual freedom of children, prospects for future. Credit/no credit only.

**LIS 554 Information Policy: Domestic and Global (5)** National and international information policy: public and private sector policy in terms of privacy, access, and exploitation; technology infrastructures and policies supporting the information industries; digital convergence and the emerging mega-industries. Prerequisite: LIS 550 or permission of instructor.

**LIS 558 Reading Seminar in Social Aspects of Information Systems (2)** Addresses foundational issues in social aspects of information systems. Introduces students to the intellectual traditions that underlie fields such as computer ethics, social informatics, and value sensitive design. Format entails in-depth discussions based on careful reading of primary source texts selected by seminar participants. Prerequisite: permission of instructor.

**LIS 559 Special Topics in the Social Context of information (1–4, max. 18)** Introduction to innovative and specialized topics in the social context of information. Course may be offered irregularly and may be repeated for credit. Prerequisite: LIS 550.

**LIS 560 Instructional and Training Strategies for Information Professionals (3)** Develops knowledge and skills in instruction and training functions for library and information settings. Issues and strategies for learning and teaching. Design, development, and evaluation of information and technology literacy programs. Addresses the needs of users when designing and delivering instruction. Prerequisite: LIS 500, which may be taken concurrently.

**LIS 561 Storytelling: Art and Techniques (3)** Storytelling, past and present, noting its development as an art form. Analyzing storytellers materials (folk literature and literary forms) throughout historical periods. Essential techniques necessary to this artistic skill. Planning storytelling programs for various ages, interest groups, and situations, utilizing folk, classic, and contemporary literature.

**LIS 565 Children's Materials: Evaluation and Use (4)** Library materials for children from infancy through elementary grades. Focus on resources in all media that serve informational, educational, cultural, and recreational needs of the young. Focuses on standard bibliographies and other resources designed to meet informational needs of adults serving children. Prerequisite: LIS 500, LIS 510, LIS 520, or permission of instructor.

**LIS 566 Young Adult Materials: Evaluation and Use (4)** An overview of materials reflecting adolescents' interest in media and addressing their educational, cultural, and recreational needs. Students evaluate print literature, electronic and other non-print media for young adults. Content also designed to assist adult caregivers of adolescents. Prerequisite: LIS 500, LIS 510, and LIS 520 or permission of instructor.

**LIS 567 Public Library Services for Youth (3)** Administration of youth departments in public libraries; planning and promoting programs and services; evaluation of library collections; community and professional roles of the youth librarian. Prerequisite: LIS 500 or permission of instructor.

**LIS 568 Information Literacy for Teaching and Learning (3)** Explores theories, process, and practical applications of information literacy. Examines the development of information literacy programs for libraries, community agencies, business, education or other information settings. Explores integral relationship between technology and information literacy, and continual evaluation.

**LIS 569 Special Topics in Instructional and Training Strategies for Information Professionals (1–5, max. 18)** Introduction to innovative and specialized topics in instructional and training strategies for information professionals. Prerequisite: LIS 560.

**LIS 570 Research Methods (4)** Research as a process from problem definition and formulation of questions to design, data collection, analysis, and reporting. Students recognize research opportunities, translate them into researchable frameworks, design research projects, and implement results in libraries and other information agencies. Prerequisite: LIS 500, which may be taken concurrently.

**LIS 579 Special Topics in Research Methods (1–4, max. 18)** Introduction to innovative and specialized topics in research methods. Prerequisite: LIS 500, LIS 570.

**LIS 580 Management of Information Organizations (4)** Introduction to internal and external management issues and practices in information organizations. Internal issues include organizational behavior, organizational theory, personnel, budgeting, planning. External issues include organizational environments, politics, marketing, strategic planning, funding sources. Prerequisite: LIS 500, which may be taken concurrently.

**LIS 581 Marketing and Planning for Libraries (3)** Approaches to planning and marketing library products/services. Examines partnerships that can be forged between elements of marketing and appropriate futures strategies for libraries. Discusses marketing and planning as integrated processes with attention to short- and long-term goals and objectives. No particular library institutional setting is assumed. Prerequisite: LIS 500, which may be taken concurrently.

**LIS 582 Strategic Planning and Management of Information Technology (3)** Exploration of methods of strategic planning for managing information resources and technology to support online information services and the role of the systems librarian and CIO. Topics include mission and goals, strategic planning, the information technology function within organizations, and the desirable abilities of managers and leaders. Prerequisite: LIS 580.

**LIS 583 Cross Cultural Approaches to Leadership (3)** Explores alternative leadership models as reflected in the literatures of multiple cultures. Examines ethical dimensions of leadership in the context of complex relationships among the peoples and agencies that comprise the global environment. Uses imagination in the application of cross cultural forms of leadership. Prerequisite: permission of instructor.

**LIS 584 Knowledge Management (3)** Introduction to contemporary topics in management of knowledge creation and use in organizations. Discussion topics include knowledge generation, knowledge taxonomy, knowledge transfer, organizational knowledge management practice, and knowledge management systems. Prerequisite: LIS 500; LIS 580, or permission of instructor.

**LIS 585 Administration of the School Library Media Program (3)** Develops competency in administering materials, equipment, and services of library media program as integral part of educational process of school. Focuses on developing skills in acquiring, organizing, and managing full range of learning resources for access and use, and communicating the program to users. Required for school library media specialists. Prerequisite: LIS 580.

**LIS 586 Public Libraries and Advocacy (3)** Examines the purpose and role of public libraries in an information society. Includes governance, services, and planning with special emphasis on advocacy for the library and community.

**LIS 587 Library Technology Systems (4)** Developing criteria for selection and design of information technology systems for libraries and information centers. Applying criteria in evaluation of hardware and software. Examining related management challenges, such as vendor relations, financing options, personnel requirements, and design of auxiliary activities. Prerequisite: LIS 540, LIS 580, or permission of instructor.

**LIS 588 Special Librarianship (3)** Seminar in the practice of special librarianship in business and industrial firms, government agencies, and the free-lance sector. User services and information resources. Credit/no credit only. Prerequisite: LIS 580.

**LIS 589 Special Topics in Management of Information Organization (1–4, max. 18)** Introduction to innovative and spe-

cialized topics in management of information organizations. Prerequisite: LIS 500, LIS 580.

**LIS 590 Directed Fieldwork (2–4, max. 8)** Minimum of 100 hours, maximum of 200 hours of professional, supervised fieldwork in a library or professional information setting. Fieldwork is a one-quarter experience; however, this may be repeated in a different setting with a different set of learning objectives for a subsequent quarter. Library and Information Science majors only. Credit/no credit only. Prerequisite: 30 credits in Library and Information Science program.

**LIS 591 Legal Research I (3)** Introduction to legal bibliography and law librarianship. Basic primary and secondary legal bibliographic tools. Integration of manual and computer resources for effective legal research. Emphasis on state materials. Offered: jointly with LAW A 598.

**LIS 592 Legal Research II (3/4)** Legal tools that answer more complex legal research problems, such as federal legislative histories, sources of administrative law, specialized subject research. Federal emphasis. Builds on skills and techniques taught in LIS 591/LAW A 598. Extensive work with online resources. Prerequisite: LIS 591 or permission of instructor. Offered: jointly with LAW A 599.

**LIS 593 Selection and Processing of Law Library Materials (3)** Study of tools for collection development and collection development plans in law libraries. All law library technical processes, including acquisitions, budgeting, cataloging, and serials. Prerequisite: LIS 591 or permission of instructor.

**LIS 594 Law Library Administration (4)** Administration in law libraries, including organization, personnel, and management issues (e.g., interviewing, hiring, firing), communications, library planning, and bookkeeping. Credit/no credit only. Prerequisite: LIS 591 or permission of instructor.

**LIS 595 Current Issues in Law Librarianship (4-, max. 4)** From a list of current topics in law librarianship, students select a topic, research it fully, write a major paper, and present their paper. Topics may include citation reform, ethics, and publisher practices. Credit/no credit only. Prerequisite: Law Librarianship majors or permission of instructor.

**LIS 596 Professional Portfolio (3)** Preparation and presentation of reflective working and presentation portfolios representing the student's goals, achievements, knowledge and skills, experience and professional objectives. Development of plans for ongoing professional development. Prerequisite: completion of 30 credit hours and advisor approval of MLIS degree plan.

**LIS 598 Special Topics in Information and Library Science (1–6, max. 18)** Seminar dealing with various topics in information and library science. Offered by visitors or resident faculty. Topics are changed from quarter to quarter. May not be offered every quarter. Prerequisite: determined by specific course.

**LIS 600 Independent Study or Research (\*)** Credit/no credit only.

**LIS 700 Master's Thesis (\*)** Credit/no credit only.

# Interdisciplinary Graduate Programs

## Astrobiology

### PROGRAM OVERVIEW

C319 Physics-Astronomy Building

Astrobiology—the study of life in the universe—investigates the wide range of multidisciplinary factors that may influence the origin and evolution of life on Earth and beyond. Such investigation demands intense interdisciplinarity, for which the astrobiology program at the University of Washington is creating a new community of scholars, investigators, and educators - a community skilled in multidisciplinary methods and thinking that pushes boundaries beyond the commonplace with intellectual vigor, creativity, and rigorous methodology.

Astrobiology at the University of Washington builds on the strengths of traditional academic structure to transcend the limits of specialization through the synergy of multidisciplinary cooperation in both research and education.

The internationally recognized graduate certificate program offers a rigorous, interdisciplinary curriculum in cooperation with the PhD programs of participating departments. The program's unique features bond students and faculty from widely disparate departments. Participating graduate students gain the personal and professional skills necessary to successfully engage in multidisciplinary collaborations.

The emerging field of astrobiology benefits from and is shaped by the perspectives of multiple disciplines directed at a common problem. It benefits also from the breadth of perspective offered by diversity in culture and race among the program's participants.

### GRADUATE PROGRAM

#### Graduate Program Coordinator

C304 Physics-Astronomy, Box 351580

206-685-2392

[office@astro.washington.edu](mailto:office@astro.washington.edu)

### Graduate Certificate Program

#### Admission Requirements

UW academic departments participating in the Graduate Certificate Program in Astrobiology provide expertise in the following primary collaborating disciplines:

- Aeronautics and Astronautics
- Astronomy
- Atmospheric Sciences
- Biochemistry
- Biology
- Genome Sciences
- Earth and Space Sciences
- History (of Science)
- Microbiology
- Oceanography

Students wishing to participate in the Astrobiology Graduate Certificate Program must be accepted for admission by the PhD program of one of these departments. Contact the appropriate participating department for PhD program application requirements and deadlines.

#### Certificate Requirements

15 credits minimum, to include:

- ASTBIO 501 (4), ASTBIO 502 (4)
- Three astrobiology-only seminar series (1 credit)
- One cognate course approved by the student's advisory committee to ensure sufficient breadth (see program website for current list of cognate courses)
- One quarter of a research rotation in an area outside the student's home discipline (3 to 10 credits)
- Participation in a minimum of three workshops comprising the capstone experience (non-credit)
- Astrobiology ethics seminar (variable credits)

Additional credits may be earned through:

- Other approved cognate courses
- Astrobiology public lecture series (1 credit)

Successful completion of the certificate requires a minimum cumulative GPA of 3.00 for all required courses and a grade of 2.7 or higher for each elective course.

### COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at [www.uw.edu/students/crscat/](http://www.uw.edu/students/crscat/)

**ASTBIO 115 Astrobiology: Life in the Universe (5) NW** Introduction to the new science of astrobiology, study of the origin and evolution of life on Earth, and the search for microbial and intelligent life elsewhere in the Universe. Designed for non-science, liberal arts majors. Offered: jointly with ASTR/BIOL/ESS/OCEAN 115.

**ASTBIO 501 Astrobiology Disciplines (4)** Review of research and subject matter relevant to astrobiology from within the disciplines of biology, astronomy, oceanography, atmospheric science, chemistry, planetary science, and geology.

**ASTBIO 502 Astrobiology Topics (4)** Investigation in detail of research topics of current interest.

## Biology Teaching

### PROGRAM OVERVIEW

The Graduate School Biology Teaching Group offers an interdisciplinary program that leads to the degree of Master of Science in biology for teachers. Although designed specifically for biology teachers in K-12 schools and community colleges, other life science educators, such as those in environmental learning centers, may find the program especially worthwhile. The program emphasizes broadening the student's understanding of the various fields of biological science, with the improvement of the student's effectiveness as a teacher as the primary goal. Opportunities for coursework within the departments of the University in biological science and science education are provided. Each student is asked to perform an in-depth study of a biological science problem in the context of its relevance to the teaching of biological science. Facilities and guidance are provided by a sponsoring professor and advisory committee drawn from the Biology Teaching Group and the several biological science departments of the University.

### GRADUATE PROGRAM

#### Graduate Program Coordinator

222 Hitchcock, Box 355320

206-543-1689

## Master of Science

#### Admission Requirements

- Secondary teaching certificate or evidence of professional involvement in K-12 or public education
- Bachelor's degree in biology or closely related field. Students in related fields must have adequate preparation in science.
- Minimum GPA of 3.00 in the most recent 90 graded quarter credits (60 semester credits)
- Graduate Record Examination test scores
- Two or three letters of recommendation.
- Statement of professional experience and objectives.

#### Degree Requirements

36 credits, to include:

- Minimum 18 credits at the graduate level: minimum 18 must be graded. These categories are not mutually exclusive.
- All coursework must be at or above the 400 level.
- Each student plans a program to meet his or her own educational objectives, selecting at least one course from each of the following areas: botany, genetics, microbiology, zoology, and from the College of Education. One course in biochemistry is also required unless already completed in prior academic work. Courses in biomedical history, fisheries, forest resources, environmental studies, etc. may be appropriate for the student's interests. The Graduate Program Coordinator assists the student in this planning.

## Biomolecular Structure and Design

### GRADUATE PROGRAM

#### Graduate Program Coordinator

G514 Health Sciences, Box 357420

206-543-5474

The department's graduate program is directed toward the education of doctoral students who anticipate careers that involve teaching or research in the biomedical sciences. Graduates from the program have a broad knowledge of biological structure at all levels, from the molecular to the human anatomical, with a major emphasis on the cellular level.

Graduate students select research and teaching options in their program. The research options are designed to provide training for a student in one or two of the following areas: cell and developmental biology, neurobiology, quantitative biology, cellular immunology, molecular biology, and macromolecular structure. Teaching options prepare the student to teach in one of the anatomical sub-disciplines: human anatomy, neuroanatomy/neurobiology, histology, embryology/developmental biology, cell biology, and macromolecular structure.

## Master of Science

#### Admission Requirements

- A minimum GPA of 3.00
- A bachelor's degree in one of the following or a related area: chemistry, biology, physics, biochemistry, or biophysics.
- GRE
- The minimal course requirements for successful applicants are:

- Chemistry: general, organic, and physical
- Physics: one year
- Mathematics: one year of calculus; multivariable calculus and/or linear algebra are strongly recommended
- Biology and/or Biochemistry: one year general biology plus one advanced course in biology or biochemistry
- Undergraduate research experience is strongly recommended.
- International students must have a minimum score on one test as follows: 7.0 IELTS; 92 TOEFL iBT; 237 TOEFLC; 580 TOEFL; 90 MLT.
- International students hoping to study with BMSD faculty in the Chemistry Department must have a minimum score on one test as follows: 26 on the speaking portion of the TOEFL iBT; 7.0 on the speaking portion of the IELTS; 70 on the Versant English Test; 55 on the TSE; 230 on the SPEAK test administered at the UW

### Degree Requirements

36 credits, to include:

- **Required courses:** BIOC 530 (3); BMSD 540, BMSD 541, BMSD 542 (2, 2, 2); BMSD 520 (0.5) to be taken every quarter
- 12 graded credits of elective courses covering at least three of the four BMSD categories of topics: biomolecular structure, techniques in biomolecular structure, molecular and cellular biology, and chemistry
- At least one sequence of Biomedical Research Integrity workshops in the first or second year of the program. The Biomedical Research Integrity (BRI) Series is a sequence of lectures and workshops offered during summer quarter each year.
- **Teaching:** In order to gain practical teaching experience, students in the program serve as teaching assistants for two quarters.
- **Research:** Students rotate through a minimum of two and a maximum of three participating laboratories during their first year. The opportunity exists for students to do an early rotation during summer quarter.

**BMSD 520 Research Seminar (1, max. 9)** Group conferences on graduate student research. Prerequisite: BMSD graduate student or permission of instructor. Offered: AWSp.

**BMSD 540 Literature Review (2)** Emphasizes critical evaluation of original articles in literature from all fields relevant to Biomolecular Structure and Design. Scientific writing and oral presentations emphasized. Concurrent registration in BIOC 530 required. Prerequisite: first-year BMSD student or permission of instructor. Offered: A.

**BMSD 541 Literature Review in Biomolecular Structure and Design (2)** Emphasizes critical evaluation of original articles in literature from all fields relevant to Biomolecular Structure and Design. Scientific writing and oral presentations emphasized. Prerequisite: first-year BMSD student or permission of instructor. Offered: W.

**BMSD 542 Literature Review in Biomolecular Structure and Design (2)** Emphasizes critical evaluation of original articles in literature from all fields relevant to Biomolecular Structure and Design. Scientific writing and oral presentations emphasized. Prerequisite: first-year BMSD student or permission of instructor. Offered: Sp.

**BMSD 599 Introduction to Research in Biomolecular Structure and Design (3-6, max. 24)** Student works with one of the research groups within the Biomolecular Structure and Design Program for one quarter and then rotates to another laboratory for one additional quarter. Minimum two quarters, maximum four. Prerequisite: BMSD student or permission of instructor. Offered: AWSpS.

## Environmental Management

### PROGRAM OVERVIEW

274 Mary Gates Hall

The graduate certificate in Environmental Management (EM) is an interdisciplinary program designed to prepare students to contribute to sustainable utilization and enhancement of the natural and human environment. Through coursework, seminars, and a culminating two-quarters-long keystone project, students acquire the tools to solve real-world environmental problems via the three avenues of science, policy, and business. Keystone projects provide a unique opportunity for graduate students to gain practical experience working in an interdisciplinary team with students from a variety of disciplines, a faculty mentor, and in collaboration with a community partner. The EM program provides education and training opportunities for a diverse array of graduate students preparing for management careers in the non-profit, for-profit, and public sectors, as well as for those who contribute legal, scientific, and technical expertise to environmental decision making—locally, nationally, and internationally. Key benefits of the program include:

- Broadening knowledge, perspectives, and skills beyond the academic home discipline through core courses, keystone projects, and participation in a community of faculty and students from various departments that share the common goal of environmental stewardship and sustainability.
- Gaining practical experience crafting interdisciplinary solutions to real-world environmental issues and making connections with community partners outside the University.
- Receiving a printed certificate and record on the transcript from the Graduate School to document completion of the interdisciplinary program in Environmental Management.

The flexible curriculum is suitable for students from many backgrounds, such as engineering, physical and natural sciences, public policy, economics, geography, public health, and political science, to name a few. There is no other comparable interdisciplinary educational experience currently available to graduate students at the University of Washington.

## GRADUATE PROGRAM

### Graduate Program Coordinator

274 Mary Gates Hall

Box 352802

206-221-6129

[envirmgt@uw.edu](mailto:envirmgt@uw.edu)

### Admission Requirements

- Enrollment in a graduate and professional degree program in any school of the University of Washington.
- Completion of a one-quarter upper-level or graduate-level course in applied quantitative methods (e.g., microeconomics, numerical modeling, applied statistical methods) or pure quantitative methods (e.g., mathematics or statistics); or social or natural science.
- Facility with written argument and communication. This skill is demonstrated in the letter of application.

The program is governed by the Steering Committee for Environmental Management.

The certificate's courses and projects prepare students to contribute legal, scientific, social science, and technical

expertise to environmental decision making at the local, national, and international scales. Students are required to broaden their knowledge and skills base beyond their home discipline; to read material from other fields with critical facility; to understand and appreciate the goals and analysis methods common to other fields; and to appreciate, communicate with, and collaborate with experts from other fields, who have different perspectives and priorities.

### Certificate Requirements

Minimum 20 credits, to include:

- Three core courses (9+ total credits; courses vary by year)
- Team-based keystone project (ENVIR 511, ENVIR 512, 4 credits each)
- 3+ credits of electives selected in consultation with the Graduate Program Coordinator and approved by the EM director

## Global Trade, Transportation, and Logistics

### PROGRAM OVERVIEW

313 Loew

The aim of the graduate certificate program in Global Trade, Transportation, and Logistics (GTTL) is to enable graduate students to augment their degree programs in preparation for careers that demand the combined knowledge of trade, transportation, and logistics. Particular attention is directed to the study of activities involved in the flow of goods from point of origin to point of consumption on a global scale. The wide range of issues addressed includes the management of the intermodal connections among maritime, aviation, and overland modes of transport; environmental and energy concerns; advancements in telecommunications; and the legal, regulatory, and technological infrastructures that facilitate global commerce and transportation.

The GTTL graduate certificate program is responsive to the needs of government and industry for trained university graduates. The program is overseen by the Interdisciplinary Committee on Global Trade, Transportation, and Logistics. Members come from the University and the private and public sectors. GTTL works with leaders in business and government organizations to develop internships and jobs, in addition to offering a number of scholarship opportunities for graduate students. The GTTL certificate is based on a set of course requirements to be fulfilled in conjunction with the student's existing graduate degree program.

### Interdisciplinary Committee

The Interdisciplinary Committee periodically reviews the content of the core courses, recommends instructors, maintains the list of eligible electives, and coordinates with course instructors regarding scheduling and prerequisites. The committee is assisted in these tasks by the lead core-course instructor, the program Executive Director, the Managing Director, and the Graduate School staff, as appropriate. The committee also oversees the policy on admission to the graduate certificate program.

## GRADUATE PROGRAM

### Graduate Program Coordinator

313 Loew, Box 352193

206-616-5778

[gttl@uw.edu](mailto:gttl@uw.edu)

Students associated with GTTL receive the graduate certificate upon completing the program's requirements and obtain their degrees through cooperating academic units. GTTL prepares students for careers in international trade, transportation, and logistics by offering a comprehensive program encompassing selected courses from the disciplines mentioned below. Those students completing the graduate certificate receive an appropriate notation on their transcript and a letter of achievement, signed by the head of the student's academic unit and the Dean of the Graduate School.

### Admission Requirements

Students admitted into graduate degree programs in the following units are eligible for the GTTL graduate certificate: aeronautics and astronautics; business administration; civil and environmental engineering; communication; economics; education; forest resources; geography; international studies; law; marine affairs; political science; public affairs; technical communication; and urban design and planning. Graduate students from other departments may be admitted on an ad hoc basis.

### Certificate Requirements

Minimum 20 credits: two core courses (8 credits) and four elective courses (at least 12 credits).

The core courses—GTTL 501 and GTTL 502—provide a basic overview of the academic theories, political-economic structures, industrial dynamics, public policies, and strategic issues concerning the study, business, and regulation of global trade, transportation, and logistics.

Students select electives from a continually updated list. Most electives (and core courses) may also satisfy a student's home department requirements. At least one elective must come from outside the home department to reinforce the interdisciplinary objective of the certificate program. A substitution policy developed by the committee assures that an appropriate mix of electives can be found for each student. GTTL 600 (Independent Study) and GTTL 601 (Internship) provide an alternative means to gain elective credits.

## COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at [www.uw.edu/students/crs-cat/](http://www.uw.edu/students/crs-cat/).

**GTTL 501 Global Trade, Transportation, and Logistics Management (4)** Goodchild, Schmitt, Shelton Provides an overview of trade, transportation, and logistics activities. Develops an understanding of the physical and information flows in supply chains, and the economic drivers of supply chain choices. Includes methods to analyze and improve logistics and transportation systems, including applications of policy, technology, and infrastructure. Offered: jointly with CEE 587/OPMGT 535; AWSp.

**GTTL 502 Seminar in Global Trade, Transportation, and Logistics (4)** Interdisciplinary seminar that brings together students with academics and practitioners at the forefront of trade, transportation, and logistics in discussions of selected topics. Additionally, students research issues of special interest. Prerequisite: OPMGT 535, GTTL 501, or permission of instructor. Offered: jointly with OPMGT 536; Sp.

**GTTL 598 Global Aviation Management (3)** Integrates aviation-related engineering, marketing, logistics, global trade, transport geography, and finance disciplines. Introduction to airplane, airport, and air traffic technology; aircraft/air traffic control/airline terminology; and aviation practices.

**GTTL 599 Special Topics in Global Trade, Transportation, and Logistics Studies (1–5, max. 15)** Selected topics with special emphasis on issues of pressing importance to the world trading community. Topics vary with departmental

discretion. Prerequisite: Graduate students or permission of instructor.

**GTTL 600 Independent GTTL Studies(\*)** Opportunity to pursue GTTL-related issues that may not be explored in established UW courses. May involve projects undertaken in conjunction with entities beyond the University, subject to instructor approval.

**GTTL 601 Internship in GTTL Studies(3–5, max. 9)** Opportunity to pursue relevant research or to gain practicum experience in the employment of a department-approved public or private entity.

## Graduate School

### COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at [www.uw.edu/students/crs-cat/](http://www.uw.edu/students/crs-cat/).

**GRDSCH 610 Teaching Mentorship (3, max. 6)** Individualized project, under the direction of a faculty member, focused on issues of teaching and learning at the college/university level and designed to enhance the student's ability to make innovative contributions in teaching. Credit/no credit only. Prerequisite: permission of faculty member, graduate program coordinator, and the Associate Dean of the Graduate School.

**GRDSCH 615 Teaching Assistant Preparation (1–6, max. 6)** Department or University-wide training for teaching and research assistants. Credit/no credit only.

**GRDSCH 616 Research Assistant Preparation (1–6, max. 6)** Department or University-wide training for research assistants. Credit/no credit only.

**GRDSCH 620 Teaching Mentorship Seminar (2)** Interdisciplinary seminar. Individual mentorship projects are presented and discussed, as are more general topics related to the teaching mentorship experience. Credit/no credit only. Prerequisite: GRDSCH 610 which may be taken concurrently or permission of the Associate Dean of the Graduate School.

**GRDSCH 630 Special Topics in College/University Teaching (2, max. 6)** Interdisciplinary discussion of topics related to college/university teaching, with an emphasis on innovative teaching and preparing for faculty careers. Designed to address topics across disciplines, as a complement to discipline-specific courses offered in departments. Credit/no credit only.

## Health Services Administration

### GRADUATE PROGRAM

Graduate Program Coordinator-In-Residence and Executive Programs

H660 Health Sciences, Box 357660

206-543-8778

[mhap@uw.edu](mailto:mhap@uw.edu)

[depts.washington.edu/mhap/](http://depts.washington.edu/mhap/)

The graduate program in Health Services Administration offers two modes of study leading to the Master of Health Administration (MHA) degree: an in-residence program and an executive program. The MHA degree is accredited by the Accrediting Commission for Education in Health Services Administration. It provides the educational foundation for careers in management, planning, consulting, and policy-making in ambulatory care organizations, hospitals,

long-term care facilities, mental health care organizations, government agencies, planning agencies, and other organizational settings in the health field. The curriculum is designed to be interdisciplinary with a faculty drawn from the graduate schools of Public Health, Business Administration, Public Affairs, Nursing, Medicine, and Law. Concentrations of study may vary according to the student's academic interests and career objectives. In addition to academic work, in-residence MHA students are strongly encouraged to participate in an internship experience in a health facility or agency typically under the preceptorship of the administrator or director of that organization.

Concurrent degree programs combining health administration with business administration, medicine, law, or public administration are also offered. These curricula (with the exception of the MHA/M.D. and MHA/JD) typically require three years of intensive academic study and culminate in joint degrees (MHA/MBA, MHA/M.D., MHA/MPA, MHA/JD).

The Executive Master of Health Administration program, launched in January 1998, is designed primarily for mid-career physicians and other clinical practitioners, as well as experienced health services managers, who have demonstrated interest or competency in administration or management. It offers advanced curriculum in planning, organizing, and implementing programs that improve the cost-effectiveness and quality of patient care. Courses meet once each month for three-day sessions (typically Thursday through Saturday) for 24 months (October to September). This program structure allows practicing professionals to continue their careers while gaining a graduate degree.

### Admission Requirements

Applicants to the in-residence program must submit, in addition to Graduate School admission requirements, a supplemental program application, four narrative statements, a resume, a self-assessment, three recommendations, and scores from either the GRE or the GMAT. MCAT or LSAT scores are accepted for relevant concurrent degree applicants. Informational interviews with members of the program faculty may be requested but are not required for the formal admission review process. Relevant health services experience is preferred. Applicants are accepted for autumn quarter only of each year. Application deadline is January 15. Applications received after this date (U.S. and Canadian only) are considered on a space-available basis.

Applicants to the executive program must submit the same application materials as listed above for the in-residence program. Priority for admission is given to applicants with medical/clinical training and professional experience. Applicants are accepted for autumn quarter only of each year. Applications are reviewed following the preferred deadline of April 30. Applications received after this date (U.S. and Canadian only) are reviewed on a space-available basis.

Applicants can expect to hear about the status of their application within approximately four weeks of the application deadline. Those interested in applying should contact the program office as soon as possible to inquire about availability and the application process.

Earlier application deadlines and additional documentation are required for international applicants.

### Financial Aid

Financial support for current MHA students may be available from several sources: loans, work study positions, internships, possible outside fellowships, and possible teaching or research assistantships outside the program. For more information on financial aid, contact the UW Office of Student Financial Aid (105 Schmitz Hall, Box 355880, 206-543-6101, [osfa@uw.edu](mailto:osfa@uw.edu)) or the MHA program office.

## Research Facilities

In addition to its University facilities, the program makes extensive use of community health facilities and agencies for research and training.

## Individual PhD

### COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at [www.uw.edu/students/crsat/](http://www.uw.edu/students/crsat/)

**IPHD 600 Independent Study (\*)**

**IPHD 800 Independent Study (\*)**

## Molecular and Cellular Biology

### GRADUATE PROGRAM

#### Graduate Program Coordinator

T466 Health Sciences, Box 357275

206-543-0253

[mcb@uw.edu](http://mcb@uw.edu)

The Molecular and Cellular Biology Program (MCB) is a leader in applying the techniques of molecular and cellular biology to advance the understanding of basic biological sciences. The goal of the doctoral program is to broadly train students to think about science in a rigorous and critical manner. Since scientific methods, equipment, and knowledge are changing rapidly, students learn to focus on important issues in an evolving research environment. This program is appropriate for students interested in future careers in research and teaching in academia as well as biotechnology and pharmaceutical companies.

Twelve departments across three schools have faculty members actively pursuing research in molecular and cellular biology. The departments participating in the program include [Biochemistry](#), [Bioengineering](#), [Biological Structure](#), [Biology](#), [Environmental Health](#), [Genome Sciences](#), [Immunology](#), [Microbiology](#), [Pathobiology](#), [Pathology](#), [Pharmacology](#), and [Physiology and Biophysics](#).

At the Fred Hutchinson Cancer Research Center (FHCRC), the divisions of Basic Sciences and Molecular Medicine participate in the joint Molecular and Cellular Biology graduate program. Shared FHCRC facilities are available for electron microscopy, flow cytometry, tissue culture, and image analysis. A biotechnology center for DNA and protein synthesis and sequencing, animal facilities, a biological production facility that focuses on monoclonal antibody production, extensive libraries, and a biocomputing center provide further support for the research effort.

Recently the MCB Program has established relationships with the Institute for Systems Biology as well as Seattle Biomed. These collaborations allow MCB students access to labs conducting research using a systems approach to biology or a global focus on infectious disease.

### Faculty Interests

Over 250 faculty members from the UW, the FHCRC, the ISB, and Seattle Biomed are researching molecular and cellular biology and are skilled in the training of graduate students. Faculty research interests encompass both prokaryotic and eukaryotic cells in the following general areas: genetics, cell biology, neurobiology, immunology, virology,

molecular structure, developmental biology, cancer biology, plant biology, genomics/proteomics, and microbiology.

### Doctor of Philosophy

#### Admission Requirements

- Applicants must have completed a baccalaureate or advanced degree by the time of matriculation; degrees emphasizing biology, physical or natural sciences, and mathematics are preferred.
- GRE scores. General Test. A Subject Test (e.g., biology, biochemistry, chemistry) is not required but recommended.
- Letters of recommendation
- Statement of purpose

#### Degree Requirements

90 credits, including:

- **Credit Requirements:** MCB students complete 21 graded credits of coursework with 9 credits of the CONJ series and 12 credits of graded elective courses. MSTP students receiving a PhD through the MCB Program are required to have 18 graded credits, and should petition the MCB directors to accept medical school courses in lieu of the remaining 3 credits.
- **First Year:** Students complete most of their formal course requirements, select a permanent adviser, and establish a doctoral Supervisory Committee. A typical first-year class schedule includes six five-week modules of the MCB conjoint series, three lab rotations, three quarters of literature review, and one or more graded elective classes. Following the third rotation, students generally choose a permanent adviser in whose lab they pursue research for the rest of their educational career, generally three to four years. During the summer, students complete the biomedical research integrity lecture series.
- **Second Year:** Students form their doctoral Supervisory Committee by the end of December, define their doctoral projects, take additional elective courses, participate as teaching assistants for a minimum of one quarter, complete either a second academic teaching assistantship or an alternative education experience, and hold their first committee meeting.
- **Third Year and Beyond:** By the end of spring quarter of the third year, the student completes the general examination and is conferred official PhD candidacy by the Graduate School. The student then focuses on the dissertation research and continues to meet with the Supervisory Committee each spring quarter to report on research progress and plans for the coming year. When the Supervisory Committee agrees that a student is ready, the final examination is scheduled. Upon successful completion of the final examination and acceptance of the completed dissertation by the Graduate School, a student is conferred the degree of Doctor of Philosophy.

### Financial Aid

The MCB Program provides a stipend plus tuition and health benefits for the first year of study. At the end of the first year of study, students choose a doctoral committee, and subsequent years of support are provided by the department of the committee chair. Students maintaining satisfactory academic progress receive funding for the duration of their graduate training.

### COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at [www.uw.edu/students/crsat/](http://www.uw.edu/students/crsat/)

**MCB 511 Cell Cycle Control (3)** *Breeden, Roberts, Edgar* Studies recent advances in understanding cell-cycle control, arising from genetics and biochemical studies of fission and budding yeast, marine invertebrates, *Drosophila*, amphibians, and cultured cells. Addresses the biochemical processes and molecular interactions and the rate-limiting events in the cell cycle, and the coupling of those events to physiological signals. Offered: A.

**MCB 513 Development Journal Seminar (1, max. 12)** *Moens, Soriano, Swalla* Examines current literature about specific topics in developmental biology. The seminar chooses current monthly topics and the group meets weekly to discuss published research papers. Topics may include: germ cell specification; cell migration and morphogenesis; axis formation; somitogenesis and stem cells. Offered: AWSp.

**MCB 514 Molecular and Cellular Biology Literature Review (2)** *Raible* Emphasizes critical evaluation of the original literature orally and in writing. Open only to first-year students in the Molecular and Cellular Biology Program.

**MCB 515 Molecular and Cellular Biology Literature Review (2)** *Emerman* Emphasizes critical evaluation of the original literature orally and in writing. Open only to first-year students in the Molecular and Cellular Biology Program. Offered: W.

**MCB 516 Molecular and Cellular Biology Literature Review (2)** *Emerman* Emphasizes critical evaluation of the original literature orally and in writing. Open only to first-year students in the Molecular and Cellular Biology Program. Offered: S.

**MCB 517 Topics in Molecular and Cellular Biology (1-5, max. 12)** Advanced in-depth coverage of specific areas of molecular and cellular biology of current interest. Lectures by University of Washington faculty and invited speakers involved in research in this area. A basic knowledge of principles of molecular and cellular biology assumed.

**MCB 519 Topics in Cancer (1, max. 6)** Examination of ways to integrate basic, clinical, and public health sciences to increase understanding of human biology and disease. Seminars in introduction to cancer research as viewed by basic, clinical, and public health sciences, origins of cancer, cancer prevention, cancer progression, and therapies for cancer. Credit/no credit only.

**MCB 520 Tutorial in Molecular and Cellular Biology (1-2, max. 2)** *Emerman* Special topics reading and discussion. Offered: A.

**MCB 521 Embryos, Genes and Development (4)** *Parkhurst, Priess, Soriano* Introduction to vertebrate and invertebrate development emphasizing cellular, genetic, and molecular mechanisms. Focuses on development of fruit flies, nematodes, and mice. Emphasizes embryological processes including induction, determination, pattern formation. Relationship between development and evolution. Technologies include transgenic animals, genetics, mosaic analysis, homologous recombination, somatic cell genetics, embryonic manipulations. Offered: W.

**MCB 532 Human Pathogenic Viruses (3)** *Galloway, Linail* Replication, regulation, and pathogenesis of several groups of human viruses, including human immunodeficiency virus and papillomaviruses. Emphasis on the unique aspects of the viral-like cycles as they relate to effects on infected cells and organisms. Guest lecturers focus on viral immunology, measles, herpes simplex virus and HHV-8. Offered: W.

**MCB 533 Evolutionary Genetics and Genomics (3)** *Malik, Peichel* Introduces classic concepts and approaches in evolutionary genetics. Familiarizes students with genomic approaches, tools and resources, and demonstrates how evolutionary approaches and modern genomic tools are brought to bear on important biological questions. Offered: A.

**MCB 560 Biotechnology Externship (2-12, max. 12)** *Moon* Supervised research in a biotechnology company. Prerequisite: permission of instructor and doctoral candidacy. Offered: AWSpS.

**MCB 580 Teaching Practicum in Molecular and Cellular Biology (2, max. 4)** Supervised training in the teaching of molecular and cellular biology. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSpS.

**MCB 599 Introduction to Research in Molecular and Cellular Biology (\*, max. 20)** The student rotates through one research laboratory involved in the Molecular and Cellular Biology Program per quarter. Open only to first-year students in the Molecular and Cellular Biology Program. Credit/no credit only. Offered: AWSpS.

**MCB 600 Independent Study or Research (\*)**

**MCB 700 Master's Thesis (\*)** Offered: AWSpS.

**MCB 800 Doctoral Dissertation (\*)**

## Museology

### GRADUATE PROGRAM

#### Graduate Program Coordinator

Burke Museum, Box 353010

206-616-8280

The museology graduate program is designed to provide the generalized training, knowledge, and skills necessary to pursue a professional career in museum work. The program is directed toward the training of a broad range of museum professionals interested in curation and management of collections in anthropology, art, botany, geology, history, and zoology as well as in interpretive programs and museum administration.

Courses include required core museology subjects as well as a range of classes offering students the chance to specialize in interest areas. Coursework is divided between the theoretical and practical aspects of museum operations. Classes take the form of lecture courses, seminars, special lectures by guest speakers, field trips, laboratory and collection management courses, practicums, and internships.

Practical experience, an essential component of the program, is provided by several museological institutions at the University of Washington, including the Thomas Burke Memorial Washington State Museum, the Henry Art Gallery, the Herbarium, the Arboretum, the Fish Collection, and the University Libraries. The Burke Museum acts as host of the museology program. Located on the campus of the University of Washington, the Burke Museum is Washington state's natural-history and anthropology museum, and is the oldest and largest natural-history museum in the Northwest. It has nationally and internationally ranked collections focusing on the anthropology, geology, and zoology of the Pacific region and Pacific Rim.

### Admission Deadline

The application deadline for autumn quarter admission is February 1. Applications completed and postmarked on or before this date are reviewed by the appropriate admission committee. Late applications may be submitted until April 15, although consideration is not guaranteed if enrollment targets have been met.

### Program Requirements

The museology graduate program takes two years to complete, consisting of six quarters of academic study and research. During the first year, students carry on average between 10 and 15 credits each quarter; during the second year, the number of credits may vary depending on research, practicum, and internship work. Students may enroll part time with permission from the program director. Requirements for successful completion of the Master of Arts degree include:

- Completion of a minimum of 36 quarter credits, including 27 course credits and 9 thesis or thesis-project credits, with at least 18 credits of coursework numbered 500 or above, including a thesis or thesis project.
- A minimum of three quarters of full-time residence credit or part-time equivalent.
- Demonstration of reading competence in one foreign language, if required by the student's supervisory committee due to the student's area of specialization.
- Completion of an internship in an off-campus museum or related agency approved by the supervisory committee prior to submission of the student's thesis or thesis project.
- Presentation of a thesis proposal by the beginning of the fourth quarter of study.
- Successful completion of an oral examination, covering both the thesis topic and the field of museology in general, following submission of the thesis or thesis project.
- Completion of all degree requirements within six years.

The following courses are required of all students unless exempted by petition to the program coordinating committee or credited for relevant coursework completed at other universities: MUSEUM 580, MUSEUM 581; MUSEUM 583 or MUSEUM 584 or MUSEUM 585; MUSEUM 582, MUSEUM 598, MUSEUM 590, MUSEUM 593, MUSEUM 594, MUSEUM 595; MUSEUM 700 or MUSEUM 710. In addition, two or more courses are required in an academic discipline relevant to the area of specialization.

The museology program also offers a graduate certificate in museum studies as an option for graduate students in other degree programs at the University. To qualify, students must take a specified minimum set of key courses in areas that emphasize either collection research and management, or museum administration and interpretation, to include hands-on work experience. Information and application materials for the certificate can be obtained from the museology program office.

### COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at [www.uw.edu/students/crscat/](http://www.uw.edu/students/crscat/)

**MUSEUM 580 Introduction to Museology (5)** Museum history, philosophy, and basic operations, including organization, income, collection management, conservation, exhibition, security, education, research, and ethics.

**MUSEUM 581 Preservation and Management of Collections (5) I&S** Lecture and demonstration of fundamental principles of collection management issues, emphasizing collection management needs of museum collection of all types. Application of principles through integrated collection management lab experiences addressing concerns of artifact handling, cataloging, photo-documentation, storage, and registration.

**MUSEUM 582 Preservation of Collections II (5) I&S** Lecture and demonstrations in the recognition and treatment of museum conservation problems for specimens of all types. Application of basic principles to specific preventive and active conservation and restoration problems encountered by curatorial personnel.

**MUSEUM 583 Directed Fieldwork in Museum Operations (1-5, max. 15)** Application of general museological training in one or more areas of supervised operation areas, including registration, education, exhibition, development, marketing or public relations. Credit/no credit only. Recommended: MUSEUM 580.

**MUSEUM 584 Directed Fieldwork in Archaeological Collections (1-5, max. 15)** Application of museological training in curation of archeological collections at the Burke Museum. Supervised work ranges from fundamental collection docu-

mentation and research to preventive conservation, storage, and other special curation projects. Prerequisite: MUS 581.

**MUSEUM 585 Directed Fieldwork in General Collections (1-5, max. 15)** Application of museological training in the curation of art, historic, botanical, geological, zoological, or other collections. Supervised work ranges from fundamental collection documentation and research to preventive conservation or storage, and other special curation projects. Credit/no credit only. Recommended: MUSEUM 581.

**MUSEUM 586 Philosophy and Ethics of Museum Collections (3) Clavir** Explores ethics and issues related to collections housed in contemporary museums, addressing collections of many types including tangible and intangible aspects. Explores the meaning of "preserving cultural/natural significance": what museums, zoos, aquaria and botanical gardens preserve, what they do not preserve, for whom, and how. Offered: W, odd years.

**MUSEUM 588 Special Topics in Museology (1-5, max. 15)** In-depth examination of selected current issues within the field of museology.

**MUSEUM 590 Seminar in Museum Theory and Administration (5)** Examination of principles of administrative theory and museum operations. Administrative structures and policies, management theory, board issues, organizational conflicts, planning issues, collection concerns, financial constructs, professional standards, and museum/community relations from an organizational and management perspective. Recommended: MUS 580. Offered: jointly with ANTH 590.

**MUSEUM 592 Social Issues and Museums (3)** Explores the ways museums have engaged in social issues and the implications of that engagement. Through readings and discussions, considers the fragile and interesting boundaries between museums and society and the changing expectations on museums to contribute to the common good of society.

**MUSEUM 593 Seminar in Museum Exhibition (5)** Theory, methodology, and fundamental principles of museum exhibition process. Exhibition elements include planning, conceptual development, interpretation, design, production, installation, evaluation, and community impact of museum exhibitions. Application of exhibition principles through term exhibit project. Recommended: MUSEUM 590.

**MUSEUM 594 Seminar in Museum Education (5)** Focus on museums as educational institutions with consideration of the place of education in the mission of museums, the educational role of museums compared to that of other institutions, the museum's diverse audiences and their needs, and the educational methods and techniques museums may employ in pursuing their goals. Recommended: MUSEUM 580.

**MUSEUM 596 Introduction to Audience Research in Informal Learning Settings (3)** Provides an introduction to the field of audience research as it relates to museum practice. Basic types, ethics, and practices of audience research introduced and practiced through readings, reflective fieldwork, mentorships, and discussions.

**MUSEUM 597 Directed Fieldwork in Audience Research (1-5, max. 15) Morrissey, Satwic, Visscher** Applies museological training in visitor studies gained from audience research coursework. Includes implementation of audience research and evaluation projects within a variety of local museums, zoos, and aquaria. Students develop and practice skills in data collection, analysis, and reporting of results. Credit/no credit only. Prerequisite: MUSEUM 596. Offered: AWSp.

**MUSEUM 598 Museum Internship (1-15, max. 15)** Faculty supervised off-campus internships in museums and allied institutions. Each internship is individually established and provides students with practical experience and the opportunity to apply and learn new professional skills. Prerequisite: permission of instructor. Recommended: MUSEUM 580; MUSEUM 581; MUSEUM 590.

**MUSEUM 600 Independent Study or Research (1-10)**

**MUSEUM 700 Master's Thesis (1-10)**

**MUSEUM 710 Master's Project (1-10, max. 10)** Credit/no credit only.

## Near and Middle Eastern Studies

### GRADUATE PROGRAM

#### Graduate Program Coordinator

311 Loew Hall, Box 352192

206-543-6398

The interdisciplinary PhD program in Near and Middle Eastern Studies is designed for students who wish to pursue research with a comparative perspective in Near Eastern languages and literature: Arabic, Hebrew, Persian (or Dari or Tajik), Turkish and Central Asian Turkic languages; Near Eastern linguistics; Islamic topics, namely, Islamic law, history, institutions, theology, and mysticism; comparative religion: Judaism, Christianity, and Islam; and interdisciplinary investigations of modern topics using the social sciences. The program, administered by an interdisciplinary Graduate School faculty group, includes courses offered in the Department of Near Eastern Languages and Civilization, the Jackson School of International Studies, and other departments on campus. Students must take courses in both the humanities and social sciences.

#### Admission Deadline

Application deadline for autumn quarter admission is February 1.

#### Degree Requirements and Satisfactory Progress

Specific coursework and areas of concentration are determined by the student's interests within the framework of the degree and satisfactory progress requirements listed below.

- Within 18 months of admission, demonstration of a general knowledge of history and culture in one of the following general fields: Islamic civilization; Arabic, Hebrew, Persian, Turkish, or Central Asian Turkic languages and literature; the modern Middle East; or comparative religion either through previous degree work or through examination administered by the program.
- Within three years of admission, completion of two advanced courses in the humanities, one of which must be in the Department of Near Eastern Languages and Civilization (NELC), and two advanced courses in the social sciences, one of which must be in the Department of History. These courses are in addition to work the student may have done at the B.A. and MA level.
- Within three years of admission, completion of a graduate seminar. Two graduate seminars are required if none was taken at the MA level.
- A student is expected to have studied three languages, two of which must be regional languages and one of which must be a "Western" European language other than English, such as French, German, Italian, Russian, or Spanish. The student's Supervisory Committee decides whether a fourth language is required and whether the fourth required language is European or regional. Students pursuing language-related work may anticipate a fourth required language, whereas those pursuing social-science-related studies may not. Before the general examination (see below) may be taken, the student must complete the language requirements including the second-year level in a regional language different from the two languages offered at the time of admission if both were not regional languages.

- Disciplinary method and theory requirements: For all students conducting field work or working with documents, whether social science or humanities focused, and for all social science-oriented students, the following courses are strongly encouraged: (a) ANTH 550; and (b) POL S 491; or (c) their equivalents in appropriate disciplines. For students doing both humanities-oriented research and not conducting field work, two method and theory courses in the appropriate discipline or disciplines (e.g., comparative literature, philosophy) are required.
- Disciplinary core courses: Each student is required to take two disciplinary core courses in appropriate fields. Core courses (or field courses) survey the literature, methods, and theoretical issues involved in a broad field of inquiry, as opposed to elective topical courses, which cover a much smaller area. Core courses should be chosen according to the anticipated research interests and fields for preliminary examination of each student. For example, these core disciplinary courses might focus on comparative politics, comparative religion, feminist theory, ethnicity and nationalism, analysis of linguistic structures, seminar in cognitive anthropology, comparative legal institutions, or international political economy. Courses on a narrow field of inquiry (such as Arab-Israeli conflict) do not constitute field or core courses, though they may contribute to a student's general field.

#### Annual Review

A subcommittee of the Near and Middle Eastern Studies program faculty meets each spring to review the progress of all students in the PhD program. Either the chair of the student's committee, the program's graduate adviser, or the program's director informs students of the results of this annual review.

#### PhD Examinations and Dissertation

- Preliminary examinations, consisting of three written and an oral. The three written examinations include: area of specialization, theory and discipline, and a self-designated field, revolving around the student's interest. The oral examination, following the written examinations, is two hours in length and addresses all these areas.
- General examination, consisting of a take-home part and an oral part.
- Final examination, the PhD thesis defense.

Students must meet general University requirements concerning admission to candidacy for the doctoral degree, the dissertation, and final examinations, including an oral examination.

A student's PhD Supervisory Committee consists of no less than three members of the UW's Graduate School faculty as well as a representative of the Graduate School (GSR). The chair of the committee must be an active member of the Graduate School faculty. At least two members of the committee must be members of the Near and Middle Eastern Studies faculty group. Additional members may be asked to join the committee.

Students write a dissertation as the final requirement for the PhD degree. The topic of the dissertation is set in consultation with the PhD candidate's Supervisory Committee.

### COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at [www.uw.edu/students/crscat/](http://www.uw.edu/students/crscat/)

#### N&MES 800 Doctoral Dissertation (\*)

## Neurobiology and Behavior

### GRADUATE PROGRAM

#### Graduate Program Coordinator

T471Health Sciences, Box 357270

206-685-1647

[neubehav@uw.edu](mailto:neubehav@uw.edu)

Understanding the brain represents both a major scientific challenge and a wonderful research opportunity. Investigations into the mechanisms of neural function require an interdisciplinary approach using the knowledge base and techniques of anatomy, biochemistry, molecular biology, physiology, pharmacology, and the behavioral sciences. Neuroscientists and their students must use these different approaches in their research and training if they are to make inroads to solving the major questions in neuroscience.

The University of Washington has met this challenge by establishing the interdisciplinary graduate program in neurobiology and behavior. The laboratories of more than 120 faculty members in over 20 departments within the School of Medicine, College of Arts and Sciences, and College of Engineering have combined efforts to form the doctoral training program, continuing a long history of collaborative efforts that cross University boundaries.

The program is designed to allow students to obtain both broad training in the neurosciences and more intensive coursework in specific areas of interest. The program emphasizes flexibility and encourages students to take responsibility in the design of their own curriculum. Students have the opportunity to work with faculty whose interests span the breadth of neuroscience research. Graduates of the program are well prepared for a variety of careers involving academic, research, industrial, and public policy positions.

#### Doctor of Philosophy

##### Admission Requirements

- Applicants must have completed a baccalaureate or advanced degree by the time of matriculation; degrees emphasizing biology, physical or natural sciences, and mathematics are preferred.
- GRE scores: general test required; subject test not required, but recommended.
- Minimum three (3) letters of recommendation
- Statement of purpose and curriculum vitae.
- All must be submitted online via the Graduate School application process.

Applications received after the deadline are considered at the discretion of the directors.

Students who have emphasized either biological or physical sciences in their undergraduate careers are invited to apply. Applicants are requested to send a copy of their academic record, GRE scores (including, if possible, scores on a subject test such as chemistry, physics, molecular and cellular biology, psychology, or biology), and three letters of recommendation from the persons who can best evaluate their potential for success in graduate study. New students enter the graduate program September 15. Applications received on or before the deadline are given full consideration. Applications received after the deadline are considered at the discretion of the directors.

##### Degree Program Requirements

90 credits, to include:

- Credit Requirements: 20 graded credits of coursework with NEUBEH core curriculum and 10 credits of graded/ungraded elective courses approved by the curriculum committee chairs and the student's advisers.
- First Year: Students complete most of their formal course requirements, select a permanent adviser, and establish a doctoral Supervisory Committee. A typical first-year class schedule includes the NEUBEH 501, NEUBEH 502, NEUBEH 503, NEUBEH 504, NEUBEH 532, NEUBEH 559 series, three lab rotations, and three quarters of the seminar series and journal clubs. Following the third rotation, students generally choose a permanent dissertation adviser in whose lab they pursue research for the rest of their educational career, generally four to five years.
- Second Year: Students form their doctoral Supervisory Committee by the end of winter quarter, define their doctoral projects, take additional elective courses, and participate in a teaching internship for a minimum of two quarters (or equivalent), and hold their first committee meeting.
- Third Year and Beyond: By the end of autumn quarter of the third year, the student completes the general examination and is conferred official PhD candidacy by the Graduate School. The student then focuses on dissertation research and continues to meet with the Supervisory Committee annually. Annual student evaluations and progress reports are due each spring quarter. When the Supervisory Committee agrees that a student is ready, the final examination is scheduled. Upon successful completion of that examination and acceptance of the completed dissertation by the Graduate School, the student is conferred the PhD degree.

### Admission Process

Students who have emphasized either biological or physical sciences in their undergraduate careers are invited to apply. Applicants are requested to send a copy of their academic record, GRE scores (including, if possible, scores on a subject test such as chemistry, physics, molecular and cellular biology, psychology, or biology), and three letters of recommendation from the persons who can best evaluate their potential for success in graduate study. New students enter the graduate program September 15. Applications received on or before the deadline are given full consideration. Applications received after the deadline are considered at the discretion of the directors.

### Financial Aid

The NEUBEH program provides a salary with benefits (insurance plus tuition) for the first three quarters of study during rotations. Once the student has entered a dissertation laboratory, support is provided by the department of the dissertation adviser. Students maintaining satisfactory academic progress receive funding for the duration of their graduate training.

## COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at [www.uw.edu/students/crscat/](http://www.uw.edu/students/crscat/)

**NEUBEH 501 Introduction to Neurobiology (3)** *Carlson* Survey of molecular, cellular, and developmental neuroscience, including gene regulation, the cytoskeleton, protein sorting in the secretory pathway, growth factors, and neurotransmitter receptors. Includes lecture discussion of original literature. Offered: A.

**NEUBEH 502 Introduction to Neurobiology (5)** *Sherk* Systems level survey of vertebrate system, focusing on sensory system, on motor system, and on neuroanatomy. Lectures cover topics in sensory and motor systems. Laboratory includes brain dissection and study of intact, prosected, and

sectioned brain and spinal cord. Emphasis is on human nervous system. Offered: W.

**NEUBEH 503 Cognitive and Integrative Neurobiology (4)** *Phillips*

Survey of all aspects of neuroscience, including a discussion of higher neural processes like motivation, decision making, attention, learning, and memory. Lecture and discussion of original literature. Offered: Sp.

**NEUBEH 504 Biophysics of Nerve, Muscle, and Synapse (3)** *Sullivan* Introduces biophysical properties of nerve and muscle cells. Topics include intrinsic electrical properties of neurons, ion channels, receptor signaling, calcium signaling, contraction of muscles, and synaptic function. Offered: jointly with PBIO 504; A.

**NEUBEH 510 Seminar in Neurobiology and Behavior (0.5)** Biweekly seminar on current topics. Required for students in the Graduate Program in Neurobiology and Behavior and for students supported on Graduate Neuroscience Program Training Grant. Credit/no credit only. Offered: AWSp.

**NEUBEH 511 Seminar in Advanced Neurobiology (1-3, max. 15)** Weekly faculty lectures, student presentations, and discussions of past and current scientific literature in neurobiology and behavior. Offered: AWSp.

**NEUBEH 512 Readings in Advanced Neurobiology and Behavior (1-3, max. 15)** Guided study of the primary literature of neurobiology and behavior. Emphasizes critical analysis, accuracy of expression, bibliographical technique, and other factors of good scholarship. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSp.

**NEUBEH 515 Teaching Practicum in Neurobiology and Behavior (3-6, max. 15)** Supervised training in the teaching of neuroscience and related scientific topics. Prerequisite: graduate standing in the Neurobiology and Behavior graduate program and permission of the instructor. Offered: AWSp.

**NEUBEH 526 Introduction to Laboratory Research in Neurobiology (4)** Students become familiar with, and assist in, the performance of research on ongoing projects in designated laboratories. Emphasis on employed methodology and techniques. Credit/no credit only. Prerequisite: first-year graduate students in neurobiology. Offered: AWSp.

**NEUBEH 527 Current Topics in Neurobiology and Behavior (1)** *Sullivan* Presentation and discussion of current research provides exposure to diverse areas of neurobiology and behavior research. Credit/no credit only. Prerequisite: graduate student in neurobiology and behavior program or permission of instructor. Offered: AWSp.

**NEUBEH 528 Computational Neuroscience (3)** *Fairhall, Rao* Introduction to computational methods for understanding nervous systems and the principles governing their operation. Topics include representation of information by spiking neurons, information processing in neural circuits, and algorithms for adaptation and learning. Prerequisite: elementary calculus, linear algebra, and statistics, or by permission of instructor. Offered: jointly with CSE 528.

**NEUBEH 532 Discussion in Cell Signaling and Molecular Physiology (3)** *Fairhall, Rieke* Discusses fundamental issues in cell excitability and molecular and cellular physiology. Focuses on problem solving and reading from original literature. Emphasizes student participation. Prerequisite: first-year graduate students in neurobiology or physiology and biophysics. Offered: jointly with P BIO 532; W.

**NEUBEH 541 Neuroendocrinology (3)** *Steiner* Emphasizes the cellular and molecular aspects of several topics in neuroendocrinology, including neuropeptide genes, reproduction, steroid hormone regulation of gene expression, mechanisms of hormone action, endocrine rhythms, and neural oscillations. Prerequisite: either BIOL 201, BIOL 202, and BIOL 203, or BIOL 180, BIOL 200, and BIOL 220; BIOC 440, BIOC 441, BIOC 442 or permission of instructor. Offered: jointly with P BIO 509; W, odd years only.

**NEUBEH 545 Quantitative Methods in Neuroscience (3)** *Rieke, Shadlen* Discusses quantitative methods applicable to the study of the nervous system. Revolves around com-

puter exercises/discussion of journal papers. May include linear systems theory, Fourier analysis, ordinary differential equations, stochastic processes, signal detection and information theory. Prerequisite: NEUBEH 501, 502, 503, or by permission of instructor. Offered: jointly with P BIO 545; W, odd years.

**NEUBEH 549 Molecular Basis of Neurodegenerative Disease (2)** *La Spada, Muchowski, Pallanck* Introduces a broad range of neurodegenerative diseases, focusing upon the approaches that have led to recent discoveries and emphasizing the elucidation of mechanisms and pathways of disease pathogenesis. Offered: jointly with GENOME 549/PHCOL 549; W.

**NEUBEH 550 Biophysics of Calcium Signaling (1)** *Hille, Santana* Introduction to cellular calcium signaling including theoretical and technical issues of calcium signal detection and biological conclusions. Prerequisite: CONJ 531 Offered: jointly with PBIO 550; Sp.

**NEUBEH 551 Mouse Models (1)** Illustrates the use of transgenic and targeted-gene disruption technologies for developing mouse models of the disease. Introduces the methodology of producing transgenic and knock out mice. Discusses several examples of disease models using the most recent primary literature as a source. Offered: jointly with P BIO 551.

**NEUBEH 552 Synaptic Integration (1)** *Binder, Powers* Discussion of recent papers on how neurons in the central nervous system integrate concurrent synaptic inputs. Includes: effects of driving force on synaptic currents, effects of conductances on dendritic properties, transfer of currents from dendrites to soma, and transformation of currents into spike train outputs. Offered: jointly with P BIO 552.

**NEUBEH 554 Motor Learning: Cellular and Network Mechanisms (1)** *Fetz, Perlmutter* Five-week mini-course reviews the current state of research on cellular and network mechanisms of motor learning. After an introductory overview of behavioral and physiological examples of motor learning in various species and systems, students choose specific topics for discussion, using the primary literature as a source. Offered: jointly with P BIO 554.

**NEUBEH 555 Sensory Receptors (1)** *Detwiler, Rieke* Five-lecture mini-course examines how different kinds of sensory receptors detect and respond to different modalities of sensory stimuli. Discussion focuses on the cellular and molecular mechanisms of the underlying transduction processes and the experimental evidence that they are based on. Offered: jointly with P BIO 555

**NEUBEH 556 Axon Pathfinding Mechanisms (1)** *Bothwell* Examines mechanisms governing axon growth cone behavior during embryonic development and during regeneration in the injured adult. Discusses approaches employing both invertebrate and vertebrate model systems. Offered: jointly with P BIO 556.

**NEUBEH 557 Ion Channel Gating (1)** *Zagotta* Compares and contrasts mechanisms of gating in ligand-gated and voltage-gated ion channels. Covers basics of ligand gating and voltage gating, kinetic schemes, inactivation and desensitization, gating currents and partial agonists, and ion channel structure. Offered: jointly with P BIO 557.

**NEUBEH 559 Neurobiology of Disease (3)** *Garden, Moeller, Neumaier, Weiss* Introduces medically important neurological and psychiatric diseases and experimental approaches to understanding the basis for diseases and their treatments. Covers stroke, epilepsy, autoimmune diseases of the CNS, neurodegenerative diseases, autism, psychosis, anxiety disorders and mood disorders. Offered: jointly with NEURL 559/P BIO 559.

**NEUBEH 561 From Biophysics to Neural Computation (2)** *Fairhall* Introduces the mathematics and methods of neuronal modeling. Develops, compares, and relates dynamical systems approaches and empirical characterizations of neuronal function. Includes lectures, student-led journal paper discussions, biweekly computational workshops on neuronal modeling packages, and a computations project.

Recommended: differential equations and linear algebra.  
Offered: jointly with P BIO 561; Sp.

**NEUBEH 600 Independent Study or Research (\*)** Credit/no credit only. Offered: AWSpS.

**NEUBEH 700 Master's Thesis (\*)** Offered: AWSpS.

**NEUBEH 800 Doctoral Dissertation (\*)** Offered: AWSpS.

## Nutritional Science

### GRADUATE PROGRAM

#### Graduate Program Coordinator

305 Raitt, Box 353410

206-543-1730

[nutr@uw.edu](mailto:nutr@uw.edu)

The Interdisciplinary Graduate Program in Nutritional Sciences offers programs of study leading to Master of Science (MS), Doctor of Philosophy (PhD), and Master of Public Health Nutrition (MPH) degrees. The graduate program is designed for the needs of students with a strong science background who wish to pursue (1) advanced training in nutritional science or clinical research, (2) advanced training in nutritional epidemiology and diet-disease interactions, or (3) training in public health nutrition practice. Additional training in clinical and community nutrition is provided to those students who wish to satisfy the didactic and internship requirements of the American Dietetic Association, prior to obtaining Registered Dietitian (R.D.) status.

The principal areas of study are biochemical and molecular nutrition, clinical nutrition, and community or public health nutrition. Members of the core faculty represent the School of Public Health and Community Medicine, the Fred Hutchinson Cancer Research Center, and the University of Washington Medical Center. The program also draws on a larger group of interdisciplinary faculty from the College of Arts and Sciences, Schools of Medicine and Nursing, other units on campus, and from affiliated institutions in the Seattle area.

Each program of study is designed by the student in consultation with, and with the approval of, a supervisory committee. All students begin working on a research project under the supervision of an appropriate faculty member in the early stages of their graduate experience. Public health field placements, which follow the first year of required coursework, are an integral part of the MPH curriculum.

The research environment at the UW includes research facilities in Raitt Hall, a student computer facility, and library. Students also have access to faculty mentors and research facilities through the Medical Center, the South Lake Union Research Hub, the Fred Hutchinson Cancer Research Center, the Clinical Research Center, and the Clinical Nutrition Research Unit. Additional clinical facilities include Harborview Medical Center, Northwest Kidney Center, Seattle Children's, Pacific Medical Center, the Cancer Care Alliance, and the Center for Human Development and Disabilities.

Students may enter the graduate degree program after completing a bachelor's or a master's degree. Previous coursework in chemistry, biochemistry, and human physiology is required. Students who wish to supplement their degree program with ADA-approved training leading to R.D. status must complete all didactic requirements before applying to the supervised dietetic internship.

The internship specialty areas are clinical and community nutrition. Applicants should contact the Dietetic Internship Director for detailed admission requirements.

## COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at [www.uw.edu/students/crscat/](http://www.uw.edu/students/crscat/).

**NUTR 300 Nutrition for Today (3)** NW Kirk Science of nutrition as it relates to individual food choices, health behaviors, public health. Health topics include wellness, obesity, eating disorders, sports nutrition, prevention of chronic disease. Nutrients and nutritional needs across the lifespan. Issues facing society including food safety, biotechnology, use of supplements and botanicals. Offered: A.

**NUTR 302 Food Studies: Harvest to Health (3)** I&S/NW Kirk Examines the many facets of the modern food supply from production and processing to distribution, marketing, and retail. Systems approach to foods studies considers geopolitical, agricultural, environmental, social, and economic factors along the pathway from harvest to health. Prerequisite: NUTR 300. Offered: Sp.

**NUTR 405 Phys Activity in Health and Disease (3)** Duncan Impact of physical activity on individual and public health. Overview of physiological adaptations to activity, exercise prescription, exercise epidemiology, and prevention of chronic diseases. Public health recommendations for activity in the U.S. population, and the effects of the built environment on activity. Prerequisite: either BIOL 118 or BIOL 180. Offered: jointly with EPI 405; Sp.

**NUTR 441 Molecular Gastronomy: The Science of Food (3)** Peck Studies the scientific principles behind modern culinary techniques, with emphasis on sensory evaluation, nutrient quality, and health. Recommended: general and organic chemistry. Offered: even years; S.

**NUTR 499 Undergraduate Research (1-5, max. 10)** Independent study and research supervised by a faculty member with appropriate academic interest. Offered: AWSpS.

**NUTR 500 Graduate Seminar: Current Issues in Nutrition (1, max. 4)** A review of current topics in nutritional science and public health nutrition. Provides a forum for student and faculty presentation, and review of current research efforts. Prerequisite: graduate student in nutrition. Offered: AWSp.

**NUTR 505 Phys Activity in Health and Disease (3)** Duncan Impact of physical activity on individual and public health. Overview of physiological adaptations to activity, exercise prescription, exercise epidemiology, and prevention of chronic diseases. Public health recommendations for activity in the U.S. population, and the effects of the built environment on activity. Prerequisite: either BIOL 118 or BIOL 180. Offered: jointly with EPI 502; Sp.

**NUTR 511 Survey of Advanced Nutrition (2-3)** Averill, Chan Advanced introduction to nutritional sciences. Topics include macronutrient and micronutrient metabolism, energy balance and obesity, nutrient utilization in physical activity, nutritional needs and recommendations throughout the lifecycle, and the relationships between nutrition and atherosclerosis, diabetes, and cancer risk. Offered: A.

**NUTR 520 Nutrition and Metabolism I (3)** Rosenfeld Metabolic/physiologic concepts related to energy balance, carbohydrate, and protein nutrition. Addresses energy producing pathways, as well as food sources, digestion, absorption, and utilization of carbohydrates, protein, and various micronutrients. Additional topics include low carbohydrate diets, vegetarianism, protein deficiency, and inborn errors in carbohydrate, and protein metabolism. Prerequisite: biochemistry. Offered: A.

**NUTR 521 Nutrition and Metabolism II (3)** Rosenfeld Discussion of normal lipid components of animal tissues, with review of their metabolism and physiological functions. Topics include digestion, absorption, transport, and utilization of dietary fats, cholesterol, and fat-soluble vitamins. Discusses in depth the roles played by lipids and various micronutrients in altering risk of atherosclerosis. Prerequisite: biochemistry. Offered: W.

**NUTR 522 Nutrition and Metabolism III (3)** Rosenfeld Advanced Study of biologically essential minerals and vitamins. To include absorption, transport, function, storage, excretion; imbalance, deficiency and toxicity; dietary structures; role of these nutrients in prevention diseases directly or indirectly. Offered: Sp.

**NUTR 526 Maternal and Infant Nutrition (3)** Johnson Influence of maternal and infant nutrition on the health of populations. Nutrition-related physiological, psychological, and social factors in pregnancy, lactation, and infancy. Application of evidence-based approaches to maternal and infant nutrition recommendations and interventions for populations and high-risk individuals. Prerequisite: human nutrition and human physiology. Offered: A.

**NUTR 527 Pediatric Nutrition (3)** Trahms Addresses the influence of nourishment on growth, development, and behavior of children, including children with special health care needs, in both individual and population-based environments. Includes principles of nutrition and assessment, critical evaluation of normative data, clinical and community nutritional care, and family-centered care. Prerequisite: coursework in human nutrition and human physiology or permission of instructor. Offered: even years; Sp.

**NUTR 529 Nutrition Research Design (3)** Duncan Critical review of selected nutrition literature. Evaluation of experimental design, research protocols, data analyses, and data presentations. Prerequisite: BIOST 511. Offered: A.

**NUTR 531 Public Health Nutrition (4)** Johnson Explores the functions and essential services of public health as they apply to assuring access to a safe and nutritious food supply. Examines the practice of public health nutrition: nutrition environment, program planning, implementation, and evaluation; policy development, implementation and evaluation, and links between basic science and public health nutrition practice. Prerequisite: introductory nutrition. Offered: W.

**NUTR 532 Fieldwork in Public Health Nutrition (1-12, max. 12)** Experience and service learning in organizations that plan, deliver, and promote population-based nutrition education and nutrition services. Prerequisite: Nutritional Sciences graduate student and permission of instructor. Offered: AWSpS.

**NUTR 536 Nutrition Education Principles and Practice (2)** Drewnowski, Examines principles of design and presentation of nutrition education for specific groups including developing goals and objectives, selection of components including activities, visual aides, and specifications of evaluation processes. Explores principles of communication, written and oral, in presenting nutrition education including learning styles, cultural competence, literacy levels, including, working with the media. Offered: W.

**NUTR 537 Laboratory Rotation (1-4, max. 6)** Exposure to research being conducted in the laboratories of the graduate nutrition faculty. Provides hands-on experience in laboratory research. Introduces the student to on-going research for preparation of dissertation topics. Prerequisite: permission of instructor. Offered: AWSpS.

**NUTR 538 Nutritional Epidemiology (3)** Beresford Application of epidemiological methods to current studies of diet, nutrition, and chronic disease. A discussion of current issues and controversies enable students to plan studies in nutritional epidemiology and disease prevention. Prerequisite: EPI 511 or EPI 512 and BIOST 511 or permission of instructors. Offered: jointly with EPI 538; A.

**NUTR 545 Food Safety and Health (3)** Bruemmer Presentation of emerging issues in food safety, sustainable agriculture and biotechnology. Examines both domestic and global pressures on the food supply. Examines international policies that promote regional solutions for a safe food supply and access to nutritious foods. Recommended: course in microbiology. Offered: W.

**NUTR 550 Obesity: Prevention and Control (3)** Drewnowski Integrates biomedical and social approaches to obesity and provides opportunities to design and evaluate strategies for obesity prevention and control. Prerequisite: graduate standing or permission of instructor. Offered: W.

**NUTR 555 Nutrition in Developing Countries (3)** *Gorstein* Introduces issues of nutrition in developing countries, with an emphasis on the control and prevention of under nutrition and micronutrient deficiencies. Offered: jointly with G H 555; Sp.

**NUTR 560 Nutritional Counseling for Chronic Disease (1-3)** Examines nutritional intervention strategies and counseling skills that pertain to chronic disease prevention and management. Builds appropriate knowledge base and skills levels needed to create appropriate care plans and counseling strategies designed to meet individual client assessment/counseling situations. Offered: Sp.

**NUTR 561 Dietetics Internship (1-10, max. 30)** Focuses on the competencies for entry-level practice in dietetics. Autumn and winter quarters include core experiences in wellness, public health, food service, ambulatory care, home health, and clinical services. Spring quarter activities are devoted to either nutrition therapy or public health, depending on student's career goals. Prerequisite: clinical students only. Offered: A.

**NUTR 562 Nutrition and Chronic Disease (4)** *Bruemmer* Epidemiology/pathophysiology of chronic disease related to nutrition (e.g., obesity, cardiovascular disease, osteoporosis, hypertension, diabetes). Examines nutritional risk/protective factors in relation to public health, individual nutrition, and clinical intervention. Prerequisite: physiology, biochemistry. Offered: Sp.

**NUTR 563 Nutrition in Acute Care (4)** *Bruemmer* Assessment of the nutritional demands and hypermetabolic response of trauma, surgery, organ failure, burns, AIDS, and neoplastic disease. Examines specialized nutritional support and substrate requirements in the acute care setting. Prerequisite: NUTR 562, or permission of instructor. Offered: S.

**NUTR 564 Management of Nutrition Services (3)** *Bruemmer, Lund* Examines healthcare policy and administrative issues that impact delivery of nutritional services in different healthcare settings. Topics include organizational behavior, productivity, project management, financial reporting, and human resources. Offered: odd years; S.

**NUTR 590 Special Topics in Nutritional Science (1-4, max. 4)** Examines emerging issues in nutrition. Reviews the evidence and potential policy implications. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSpS.

**NUTR 595 Nutritional Sciences Master's Practicum (1-12, max. 12)** *Lund* Supervised practice experience providing students an opportunity to learn how nutritional sciences are applied to public health settings and in the formulation and application of public health policy. Credit/no credit only. Prerequisite: HSERV 511; NUTR 531; EPI 511; NUTR 520; 521; 522. Offered: AWSpS.

**NUTR 600 Independent Study or Research (\*)** Offered: AWSpS.

**NUTR 700 Master's Thesis (\*)** Offered: AWSpS.

**NUTR 800 Doctoral Dissertation (\*)** Credit/no credit only. Offered: AWSpS.

## Quantitative Ecology and Resource Management

### PROGRAM OVERVIEW

The Quantitative Ecology and Resource Management (QERM) Interdisciplinary Graduate Program offers students a unique opportunity to apply statistics, mathematics, and decision science to a broad range of problems in terrestrial and marine ecology, natural resource management, biometrics, and mathematical biology. The program attracts mathematically trained students interested in working on

these problems, and biologically or environmentally trained students wishing to develop or enhance their quantitative skills.

The QERM program is interdisciplinary, bringing together diverse faculty from a wide range of academic areas such as statistics, applied mathematics, forestry, biology, aquatic and fishery sciences, oceanography, and marine affairs. This diversity provides strength to the program.

## GRADUATE PROGRAM

### Graduate Program Coordinator

304 Loew Hall, Box 352182

206-616-9571

[qerm@uw.edu](mailto:qerm@uw.edu)

Both a Master of Science and Doctor of Philosophy degree are offered; graduates are capable of continuing the development and extension of biometrical and biomathematical modeling as they enter the educational, research, or private-sector work force.

### Admission Requirements

- Background in probability and mathematical statistics, linear algebra, and differential equations. Applicants with little or no statistical background should take additional coursework prior to applying. Although not mandatory, this background makes a student's application more competitive.
- Successful completion of the following coursework (or equivalent) prior to applying: MATH 126 (or equivalent); MATH 308 (or equivalent).
- Strongly recommended: MATH 394-MATH 395; STAT 341-STAT 342, or STAT 481.
- Also taken into consideration:
  - Minimum 3.00 GPA in last 60 semester or last 90 quarter credits required.
  - Normally, completion of college-level courses in probability and mathematical statistics, linear algebra, and differential equations.
  - Scores on Graduate Record Examination (GRE). Competitive applicants generally score above the 75th percentile on the verbal and analytic sections, and above the 85th percentile on the quantitative section.
  - Minimum TOEFL score of 580 (237 for computer-based tests) - for international students only.
  - Knowledge of the intended area of study, including clearly written statement of objectives.
  - Recommendations from persons familiar with the applicant's academic ability and potential.
  - Admission is also dependent on program resources and fit between student interests and faculty research. Students should explore faculty research interests by reviewing the QERM website, [depts.washington.edu/qerm](http://depts.washington.edu/qerm), to determine if their area of research interest is conducted at the UW. Students are not required to enter the QERM program with a faculty adviser selected in advance. Typically students identify their research and faculty adviser during their first year of study.
- Application deadline for autumn quarter is January 15.

### Degree Requirements (For Master of Science and Doctor of Philosophy)

Required coursework reflects the expectation that the student already has a fundamental understanding of the principles of statistical inference and ecological modeling. Required coursework taken during the first year includes: STAT 512 and STAT 513, AMATH 410, AMATH 422, ESRM 490, QERM 514, and QERM 597.

Following the first year of core coursework, students select elective coursework in an area of emphasis ranging from biometry, mathematical modeling, and resource management. Additional elective coursework in basic biology and ecology gives students greater insight into the environmental systems in which they expect to apply their quantitative training.

Requirements for successful completion of the master of science degree include:

- Successful completion, at the MS level, of the applied methods and statistical theory qualifying examinations administered after the first year of study.
- Successful completion of a minimum 36 quarter credits, including 27 course credits and 9 thesis credits, with at least 18 credits of coursework numbered 500 or above, including a thesis.
- Receipt of numerical grades in at least 18 quarter credits of coursework taken at the UW.
- Completion of a seminar on results of the research and oral defense of the thesis.
- Completion of all University requirements for graduation.

Requirements for successful completion of the doctoral degree, minimum of 90 credits, include:

- Successful completion of the applied methods and statistical theory qualifying examinations at the PhD level, following the first year of study.
- Successful completion of a minimum of 90-quarter credits, including 27 dissertation credits. Completion of an MS degree may be applied toward one year of the PhD program. The core QERM courses must be taken if the student has obtained an MS from another program.
- A seminar on results of the research and an oral defense of the dissertation.
- Completion of all University requirements for graduation.

### Financial Aid

Funding opportunities include fellowships, teaching, and research assistantships and are available for each year of study. The Graduate School or the home department of the QERM faculty adviser provides this funding. Tuition is typically included as part of the financial package. Funding decisions are made yearly; attempts are made to continue support for students making satisfactory progress.

## COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at [www.uw.edu/students/crsat/](http://www.uw.edu/students/crsat/).

**QERM 514 Analysis of Ecological and Environmental Data I (4)** *Conquest* Overview of generalized linear models (GLMs), their use in forestry, fisheries, wildlife ecology, and environmental monitoring. Analysis of the statistical tests that fall under GLMs: chi-square tests on contingency tables, t-tests, analysis of variances, etc. Statistical software S+/R used throughout. Offered: Sp.

**QERM 597 Seminar in Quantitative Ecology (2)** Current topics in quantitative ecology and resource management. Fisheries, forestry, and marine resources. Offered: ASp.

**QERM 598 Special Topics in Quantitative Resource Management (1-3, max. 12)** Population and community ecology, systems ecology, and physical processes in ecosystems. Prerequisite: permission of instructor.

**QERM 599 Research in Quantitative Resource Management and Ecology (\*, max. 12)** Topics can be theoretical in nature or combined theory and experiment. Research might be a prelude to thesis or dissertation research. Credit/no credit only.

QERM 600 Independent Study or Research (\*)

QERM 700 Master's Thesis (\*)

QERM 800 Doctoral Dissertation (\*)

# Urban Design and Planning

## PROGRAM OVERVIEW

The PhD in Urban Design and Planning at the University of Washington is one of 39 PhD programs in urban and regional planning in North America, and one of the oldest, founded in 1967. This program brings together faculty from disciplines ranging from architecture to sociology to focus on the interdisciplinary study of urban problems and interventions. Covering scales from neighborhoods to metropolitan areas, the program addresses interrelationships between the physical environment, the built environment, and the social, economic, and political institutions and processes that shape urban areas. The breadth of this program permits students to pursue doctoral studies in the various aspects of urban design and planning as well as in a number of related social science, natural resource, and engineering areas.

The program seeks to prepare scholars who can advance the state of research, practice, and education related to the built environment and its relationship to society and nature in metropolitan regions throughout the world. It provides a strong interdisciplinary educational experience that draws on the resources of the entire University, and on the laboratory provided by the Seattle metropolitan region and the Pacific Northwest. The program emphasizes the educational values of interdisciplinarity, intellectual leadership and integrity, and the social values of equity, democracy, and sustainability. It seeks to promote deeper understanding of the ways in which public decisions shape and are shaped by the urban physical, social, economic, and natural environment. The program envisions its graduates becoming leaders in the international community of researchers, practitioners, and educators who focus on improving the quality of life and environment in metropolitan regions.

## GRADUATE PROGRAM

### Graduate Program Coordinator

311 Loew, Box 352192

206-543-6398

## Doctor of Philosophy

### Admission Requirements

Admission to the PhD program is based on evidence of promise of high scholarly achievement and research orientation. The applicant's statement of purpose, Graduate Record Examination (GRE) test results, letters of recommendation, and examples of past work constitute the basis for the admission evaluation.

Applicants typically have a master's degree in fields ranging from planning and public affairs to natural and social sciences. Students interested in a professional degree in urban design and planning should apply to the [master's program in urban design and planning](#).

**Application Deadline:** All application materials are due by February 1. International applicants are encouraged to submit the Graduate School on-line application form by November 1.

For more information, see the program's [website](#).

### Degree Requirements

90 credits, divided into three phases.

#### Phase I: The Core Curriculum

The core curriculum defines the intellectual foundation of the program. While the program retains considerable flexibility in defining a research agenda within urban and environmental planning and policy, it provides a common foundation for all students to build upon. Students enter the program with a master's degree, in fields ranging from planning and public affairs to natural and social sciences. Depending on the academic preparation of the student, the core requirements can be met within one to two years.

**Required Courses:** Five courses, normally completed during the first year unless schedule conflicts make this infeasible. Courses from Phase II requirements may also be taken in the first year.

- **Core Sequence:** URBDP 591, URBDP 592, URBDP 593
- **Restricted Electives (before completion of Phase I):**
  - Qualitative Research Methods - One of the following: URBDP 598, GEOG 425, HIST 598, HSERV 526, POL S 493.
  - Quantitative Research Methods - One of the following: CS&SS 594, CS&SS 504, CEE 584

#### Phase II: Area of Study

Students develop with their Supervisory Committee a description of their proposed areas of study. These areas of scholarship must demonstrate an interdisciplinary research approach to an application within urban and environmental planning and policy. The description should develop a curriculum proposal approved by the Supervisory Committee that addresses the following advanced study requirements:

**Curriculum Requirements:** Seven courses and a teaching seminar, in addition to advanced courses directly related to the area of study selected by the student. Some courses may be taken in the first year.

- **Urban Processes and Patterns:** Three courses—For course options, see program website at: [depts.washington.edu/urbdpphd/Phase\\_II.shtml](https://depts.washington.edu/urbdpphd/Phase_II.shtml).
- **Research Design and Methods:** Two courses—For course options, see program website at: [depts.washington.edu/urbdpphd/Phase\\_II.shtml](https://depts.washington.edu/urbdpphd/Phase_II.shtml).
- **Urban and Environmental Design and Planning:** Two courses—For course options, see program website at: [depts.washington.edu/urbdpphd/Phase\\_II.shtml](https://depts.washington.edu/urbdpphd/Phase_II.shtml).
- **Teaching Methods:** One teaching seminar and experience as a TA for at least one quarter, before completion of Phase III.

**General Examination:** A critical review of the literature in the area of study, developed by the student, which integrates interdisciplinary research on that area of study and identifies areas of potential research opportunity that may subsequently form the basis for a dissertation proposal. The review should demonstrate broad familiarity with relevant research in the chosen area, and with the range of theory and methods applied within the reviewed literature.

#### Phase III: Dissertation

Once the student passes the general examination, he or she is advanced to the level of doctoral candidate, and is expected to build on the critical review of the literature to develop a dissertation proposal. The dissertation proposal should demonstrate the characteristics of interdisciplinarity, relevance to urban and environmental planning and policy, and potential for contribution to scholarship.

## Financial Aid

The Interdisciplinary PhD program in Urban Design and Planning attempts to provide funding for doctoral program

applicants in a way that makes the program attractive to the strongest potential applicants, ensures their effective mentoring while in the program, and actively engages and energizes faculty to improve the program and to bring research funding to support students.

# Interdisciplinary Undergraduate Programs

## Education, Learning, and Society

### UNDERGRADUATE PROGRAM

#### Adviser

B507 Padelford

206-616-2352

[elsminor@uw.edu](mailto:elsminor@uw.edu)

#### Minor

The Education, Learning, and Society (ELS) minor—sponsored jointly by the College of Education and the College of Arts and Sciences—provides a strong background in how human beings learn, and how society, environment, and culture shape learning.

#### Minor Requirements

31 credits, as follows:

- One of the following (5 credits): PSYCH 206 (prerequisite, PSYCH 101), NURS 201, or EDPSY 304.
- One of the following (5 credits): CHID 210, EDUC 305, EDUC 310, or SOC 292.
- *Field Experience* (5 credits): EDUC 401. (Other courses that may fulfill this requirement, with approval, include GEN ST 350, EDC&I 499, EDPSY 499, EDSPE 499, CHID 497, GEN ST 470.
- *Colloquium* (1 credit): GEN ST 300
- *Electives* (15 credits): Selected from an approved list, available from the program adviser. While taking GEN ST 300, students create a curricular plan to provide a rationale for their choice of electives.
- Up to 10 credits may overlap with a student's major and up to 5 credits may overlap with another minor.
- Minimum 10 credits in upper-division courses.

## Honors

211 Mary Gates Hall

[uwhonors@uw.edu](mailto:uwhonors@uw.edu)

The four-year University Honors Program features an interdisciplinary Honors core curriculum, Honors academic advising, foreign study programs and exchanges, and opportunities for independent study. It provides an academic community and educational opportunities to those students who are willing to take academic risks, think across disciplinary boundaries, and engage in experiential learning (e.g., research, leadership, community and/or international engagement).

To be considered for admission to the University Honors Program at entrance, students must apply to the Honors Program when they submit their Application for Undergraduate Admission to the University. Selection is based on a student's high school record, essays, and a recommendation from the secondary school. Students also may seek admission based on their academic performance during their freshman year at the University.

Students who are accepted into the University Honors Program in their freshman year and complete the Honors Core Curriculum alone graduate "With Interdisciplinary Honors." When students complete both the Core Curriculum and the Honors requirements in their chosen major, they graduate "With College Honors in *Name of Major*." Students who do not participate in or complete the Honors Core Curriculum but are admitted into and complete the Honors Program in their chosen major will receive a degree "With Honors in *Name of Major*." By special arrangement it is possible for students to complete a degree "With College Honors" in departments, schools, or programs that do not offer a formal Honors option.

### Core Curriculum

47 credits as follows:

- HONORS 100 (1 credit)
- One Honors social science course (HONORS 230 series or Honors I&S course) (5 credits)
- One Honors arts/humanities course (HONORS 210/HONORS 240 series or Honors VLPA course) (5 credits)
- One Honors interdisciplinary course [HONORS 390 series or Honors course coded with two or three Areas of Knowledge designations (VLPA, I&S, NW)] (5 credits)
- Three Honors science courses (HONORS 220 series or other Honors NW courses). Some colleges or departments may have restrictions. For information, see the Honors Program website. (15 credits)
- Combination of any three 4- or 5-credit Honors VLPA, I&S, NW courses and HONORS prefix courses. Some colleges or departments may have restrictions. For information see the Honors Program website. (15 credits)
- HONORS 496 (1 credit)
- At least 15 credits of courses with the HONORS prefix, excluding HONORS 100 and HONORS 496.
- In at least one major in which the student is pursuing Interdisciplinary or College Honors, no more than three courses used in the major may apply toward the Honors core curriculum.
- Courses specifically required in Departmental Honors may not be applied toward the Honors core curriculum.
- Students may fulfill no more than 15 credits of Honors core requirements by completing an ad hoc project in a non-Honors course outside the major or by way of a non-Honors study abroad program.
- Minimum cumulative 3.30 GPA in all courses completed at the UW.

### Departmental Honors

Typically students apply for admission to Departmental Honors in their junior year of college, although some majors have earlier entrance options. Each department at the UW has a unique set of Departmental Honors requirements. For links to specific information about each department, see the Honors Program website.

## COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at [www.uw.edu/students/crscat/](http://www.uw.edu/students/crscat/)

**HONORS 100 Honors at the UW—Knowledge Across the Disciplines (1)** Showcases a wide range of interdisciplinary disciplines, research, faculty, and experimental opportunities at the UW. Topics and approaches vary.

**HONORS 205 What We Know and How We Know It (5) C** Helps students to develop methods of researching and gaining knowledge through critical reading of texts, dialogue, reflective writing, and visiting faculty lecturers from different disciplines.

**HONORS 210 Humanities for Honor Students I (5, max. 15) VLPA/I&S** Evolution of an idea or a discipline central to the humanities. Content varies from year to year. For university honors students only. Offered: A.

**HONORS 211 Humanities for Honor Students II (5, max. 15) VLPA/I&S** Evolution of an idea or a discipline central to the humanities. Content varies from year to year. For university honors students only. Offered: W.

**HONORS 212 Humanities for Honor Students III (5, max. 15) VLPA/I&S** Evolution of an idea or a discipline central to the humanities. Content varies from year to year. For university honors students only. Offered: Sp.

**HONORS 220 Science for Honor Students I (5, max. 15) NW** Evolution of an idea or concept central to the natural sciences. Intended for non-science majors. Content varies from year to year. For university honors students only. Offered: A.

**HONORS 221 Science for Honor Students II (5, max. 15) NW** Evolution of an idea or concept central to the natural sciences. Intended for non-science majors. Content varies from year to year. For university honors students only. Offered: W.

**HONORS 222 Science for Honor Students III (5, max. 15) NW** Evolution of an idea or concept central to the natural sciences. Intended for non-science majors. Content varies from year to year. For university honors students only. Offered: Sp.

**HONORS 230 Social Science for Honor Students I (5, max. 15) I&S** Development of an idea, concept, or institution central to the social sciences. Content varies from year to year. For university honors students only. Offered: A.

**HONORS 231 Social Science for Honor Students II (5, max. 15) I&S** Development of an idea, concept, or institution central to the social sciences. Content varies from year to year. For university honors students only. Offered: W.

**HONORS 232 Social Science for Honor Students III (5, max. 15) I&S** Development of an idea, concept, or institution central to the social sciences. Content varies from year to year. For university honors students only. Offered: Sp.

**HONORS 240 Fine Arts for Honor Students I (5, max. 15) VLPA** Evolution of an art form, an idea, or a discipline central to the fine arts. Content varies from year to year. For university honors students only. Offered: A.

**HONORS 241 Fine Arts for Honor Students II (5, max. 15) VLPA** Evolution of an art form, an idea, or a discipline central to the fine arts. Content varies from year to year. For university honors students only. Offered: W.

**HONORS 242 Fine Arts for Honor Students III (5, max. 15) VLPA** Evolution of an art form, an idea, or a discipline central to the fine arts. Content varies from year to year. For university honors students only. Offered: Sp.

**HONORS 251 Western Civilization I (5, max. 15) I&S/VLPA** Introduction to ideas and society in Western Civilization. For university honors students only. Offered: A.

**HONORS 252 Western Civilization II (5, max. 15) I&S/VLPA** Introduction to ideas and society in Western Civilization. For university honors students only. Offered: W.

**HONORS 253 Western Civilization III (5, max. 15) I&S/VLPA** Introduction to ideas and society in Western Civilization. For university honors students only. Offered: Sp.

**HONORS 261 World Civilization I (5, max. 15) I&S/VLPA** Introduction to ideas and society of civilization other than the Western. Specific civilization (Chinese, Japanese, Middle Eastern, South Asian) differs from year to year and section to section. For university honors students only. Offered: A.

**HONORS 262 World Civilization II (5, max. 15) I&S/VLPA** Introduction to ideas and society of civilization other than the Western. Specific civilization (Chinese, Japanese, Middle Eastern, South Asian) differs from year to year and section to section. For university honors students only. Offered: W.

**HONORS 263 World Civilization III (5, max. 15) I&S/VLPA** Introduction to ideas and society of civilization other than the Western. Specific civilization (Chinese, Japanese, Middle Eastern, South Asian) differs from year to year and section to section. For university honors students only. Offered: Sp.

**HONORS 300 Introduction to the Professions (2-5, max. 15)**

Studies oriented toward professional work (law, medicine, public affairs). For university honors students only.

**HONORS 345 Interdisciplinary Writing Seminar (5) C**

Investigates emerging topics of interest in the arts and sciences and frames the investigation of subject matter through writing and dialogic inquiry within a particular field. Students discuss, revise, and reflect upon their work through peer review, in-class writing activities, and editorial feedback.

**HONORS 350 Honors Seminar (2, max. 20)**

Discussion of selected topics in a variety of subject-matter fields. Topics and reading material vary from year to year. For university honors students only. Credit/noP credit only.

**HONORS 391 Honors Interdisciplinary Study I (5) VLPA/**

**I&S/NW** Develops ideas, concepts, or institutions that cut across the arts, humanities, social sciences, and natural sciences. Offered: AWSpS.

**HONORS 392 Honors Interdisciplinary Study II (5) I&S/NW**

Develops ideas, concepts, or institutions that cut across the social sciences and natural sciences. Offered: AWSpS.

**HONORS 393 Honors Interdisciplinary Study III (5) VLPA/**

**NW** Develops ideas, concepts, or institutions that cut across the arts, humanities, and natural sciences. Offered: AWSpS.

**HONORS 394 Honors Interdisciplinary Study IV (5) VLPA/**

**I&S/NW** Develops ideas, concepts, or institutions that cut across the arts, humanities, and social sciences. Offered: AWSpS.

**HONORS 396 Interdisciplinary Special Topics--Natural Science (1-5, max. 10) NW**

Special courses drawn from interdisciplinary groups in the natural sciences. Content varies.

**HONORS 397 Interdisciplinary Special Topics--Social Science (1-5, max. 10) I&S**

Special courses drawn from interdisciplinary groups in the social sciences. Content varies.

**HONORS 398 Interdisciplinary Special Topics--Humanities (1-5, max. 10) VLPA**

Special courses drawn from interdisciplinary groups in the humanities. Content varies.

**HONORS 496 Teaching What You Know: Integration of the Honors Core Curriculum (1)**

Allows students completing the College Honors Program to reflect on and present to peers the intersection between their interdisciplinary core courses and experimental learning projects. Credit/no credit only. Offered: AWSpS.

**HONORS 499 Honors Independent Study or Research (1-5, max. 10)**

Faculty supervised Honors independent study or research for students in areas extending beyond their major departments or along lines not otherwise accommodated by existing Honors courses. Honors students only.

# Interschool or Intercollege Programs

## Bioengineering

### DEPARTMENT OVERVIEW

N107 William H. Foege Building

Bioengineering encompasses a wide range of activities in which the disciplines of engineering and biological or medical science intersect. Such multidisciplinary endeavors are yielding new discoveries and major advances that are revolutionizing the health care system. The Department of Bioengineering, housed jointly in the School of Medicine and the College of Engineering, provides a comprehensive, multidisciplinary program of education and research and is recognized as a leading bioengineering program in the world. Major areas of research and education include distributed diagnosis and home healthcare (d2h2), molecular bioengineering and nanotechnology, engineered biomaterials and tissue engineering, medical imaging and image-guided therapy, and computational bioengineering.

### UNDERGRADUATE PROGRAM

#### Adviser

N107 William H. Foege Building, Box 355061

206-685-2000

[bioeng@uw.edu](mailto:bioeng@uw.edu)

[depts.washington.edu/bioe/programs/bachelors/bs.html](https://depts.washington.edu/bioe/programs/bachelors/bs.html)

The Bioengineering Program offers the following programs of study:

- The Bachelor of Science in Bioengineering degree
- A five-year B.S./MS option (consult website or adviser for details)

### Bachelor of Science in Bioengineering

**Suggested First- and Second-Year College Courses:** CHEM 142, CHEM 152, CHEM 162 (or CHEM 144, CHEM 154, CHEM 164); CSE 142, English composition, MATH 124, MATH 125, MATH 126, PHYS 121.

#### Department Admission Requirements

Admission is competitive. Students may be admitted at three different points. Consult the department's website for more information.

- **Direct Admission.** The department enrolls up to 25 percent of its incoming class directly from high school. Students accepted to the UW who indicate bioengineering as their preferred major on their freshman application are considered. Strong applicants have completed chemistry, biology, and calculus in high school. Admission is for autumn quarter only.
- **Early Admission.** Students enrolled at the UW are eligible to apply at the end of the freshman year if they have completed and earned at least a 2.50 GPA in the following courses: MATH 124, MATH 125, MATH 126; CHEM 142, CHEM 152, CHEM 162 (or CHEM 144, CHEM 154, CHEM 164); and 5 credits of English composition. A 2.50 GPA guarantees consideration but not admission. Application deadline is July 1 for autumn quarter admission.
- **Upper Admission.** Requires 59 credits of coursework with at least a 2.50 GPA: MATH 124, MATH 125, MATH 126; CHEM 142, CHEM 152, CHEM 162 (or CHEM 144, CHEM 154, CHEM 164); PHYS 121, PHYS 122; BIOL

180, BIOL 200; AMATH 301; and 5 credits of English composition. Any of BIOL 180, PHYS 122, and AMATH 301 may be in progress at time of application. A 2.50 GPA guarantees consideration but not admission. Application deadlines are February 1 for spring quarter and July 1 for autumn quarter. Consult the department's website or adviser for more details.

#### Graduation Requirements

Students follow requirements in effect at time of entry into the department. 180 credits as follows:

##### General Education Requirements (108 credits):

- **Areas of Knowledge:** 24 total credits in Visual, Literary, & Performing Arts (VLPA) and Individuals & Societies (I&S), with at least 10 credits in each area.
- **Written and Oral Communication (8 credits):** 5 credits of English composition, from the approved University list; HCDE 231. Additional writing credits are built into the major core courses.
- **Mathematics (24 credits):** MATH 124, MATH 125, MATH 126; either MATH 307 or AMATH 351; either MATH 308 or AMATH 352; STAT 390 or IND E 315.
- **Natural Science (44 credits):** CHEM 142, CHEM 152, CHEM 162 (or CHEM 144, CHEM 154, CHEM 164) and CHEM 223 (or CHEM 237); PHYS 121, PHYS 122; BIOL 180, BIOL 200, BIOL 220.
- **General Electives (8 credits)**

##### Major Requirements (72 credits):

- **Engineering Fundamentals (4 credits):** AMATH 301
- **Bioengineering Core (44 credits):** BIOEN 215, BIOEN 315, BIOEN 316, BIOEN 317, BIOEN 325, BIOEN 326, BIOEN 327, BIOEN 335, BIOEN 336, BIOEN 337, BIOEN 345, BIOEN 401; either 10 credits of BIOEN 402, or 4 credits of BIOEN 403 plus BIOEN 404 and BIOEN 405.
- **Bioengineering Senior Electives (15 credits):** Fifteen (15) credits from an approved departmental list, including completion of one of three concentration areas: **Molecular and Materials Bioengineering:** four courses from approved departmental concentration list. **Cells, Tissue, and Systems Bioengineering:** four courses from approved departmental concentration list. **Diagnostics and Therapeutic Instruments:** PHYS 123; four courses from approved departmental concentration list. See department for approved list.
- **Approved Engineering Electives (9 credits):** Chosen from a departmentally approved list or from additional bioengineering senior elective credit. See department for approved list.
- **Grade Requirements:** Minimum 2.0 grade in each bioengineering course applied to the major.

### Student Outcomes and Opportunities

- **Learning Objectives and Expected Outcomes:** Bioengineering students learn to apply engineering synthesis and analysis to biological problems and to glean design principles from nature to solve medical problems and create biomedical devices and materials. A key piece of the degree program is the senior capstone research and design project, through which students develop their knowledge and skills by joining in the department's cutting-edge research. Bioengineering graduates are prepared to enter graduate school, medical school, or the growing biomedical industry. The department's goal is to prepare students to be leaders and innovators in improving human health and health care. Bioengineering graduates have the ability to apply knowledge of mathematics, science, and engineering; the ability to design and conduct experiments, as well as to analyze and interpret data; the ability to design a system, component, or process to meet desired needs; the ability to function on multi-disciplinary teams; the ability to identify, formulate, and solve engineering problems; an

understanding of professional and ethical responsibility; the ability to communicate effectively; the broad education necessary to understand the impact of engineering solutions in a global and societal context; a recognition of the need for, and an ability to engage in, life-long learning; knowledge of contemporary issues; the ability to use the techniques, skills, and modern engineering tools necessary for engineering practice; an understanding of biology and physiology; the capability to apply advanced mathematics (including differential equations and statistics), science, and engineering to solve the problems at the interface of engineering and biology; the ability to make measurements on and interpret data from living systems, addressing the problems associated with the interactions between living and non-living materials and systems.

- **Instructional and Research Facilities:** The department is housed in the newly constructed Foege North building. Amenities include instructional laboratories, an advanced computing lab for class instruction and student use, a general computer lab for student use, a student work room, a seminar room, and meeting space. Departmental offices are also located in this building. Other laboratories are located in the College of Engineering and the School of Medicine. The Department of Bioengineering houses UWEB (University of Washington Engineered Biomaterials), participates in the Center for Nanotechnology, and sponsors many other research centers relating to our five thrust areas in Computational Bioengineering, Distributed Diagnosis and Home Healthcare, Engineered Biomaterials, Medical Imaging and Image-guided Therapy, and Molecular Bioengineering and Nanotechnology.
- **Honors Options Available:** College Honors (Completion of both Interdisciplinary Honors and Departmental Honors requirements). Departmental Honors (see adviser for requirements). For Interdisciplinary Honors, see University Honors Program.
- **Research, Internships, and Service Learning:** Many undergraduate bioengineers are involved in internships. The department participates in the College of Engineering Co-op Program and maintains an internship website for majors.
- **Department Scholarships:** Several scholarships are available for majors.
- **Student Organizations/Associations:** The Biomedical Engineering Society (BMES), the campus chapter of the national professional organization, organizes social events as well as events that support student interest in medical school, graduate school, and industry.

**Of Special Note:** Courses on technology commercialization are available to seniors.

## GRADUATE PROGRAM

### Graduate Program Coordinator

N107 William H. Foege Building, Box 355061

206-685-2000

[bioeng@uw.edu](mailto:bioeng@uw.edu)

[depts.washington.edu/bioe/programs/phd/phd-apply.html](https://depts.washington.edu/bioe/programs/phd/phd-apply.html)

The Department of Bioengineering offers programs of study which lead to the Master of Science (MS) and Doctor of Philosophy (PhD) degrees.

### Master of Science

The Master of Science degree program provides breadth of knowledge of engineering, biology, and medicine, and depth of knowledge in a particular research area. The degree prepares students for careers in academic, industrial, or hospital environments.

## Admission Requirements

All application materials must be received in the appropriate office by the deadline. International applications are due by December 1; domestic applications are due by December 15. Late and/or incomplete applications are not reviewed. Required application items include:

- Graduate School Application
- Department of Bioengineering Admission Form
- Statement of Purpose
- Resume/Curriculum Vitae
- Three letters of recommendation
- One set of official transcripts
- Official GRE scores
- Official TOEFL scores (from international applicants only)

More information about the application is online at [depts.washington.edu/bioe/programs/phd/phd-apply.html](https://depts.washington.edu/bioe/programs/phd/phd-apply.html). Materials sent in addition to those listed above are considered non-essential and do not enhance the application.

Applicants are expected to have the following courses as part of their undergraduate education: ordinary differential equations, linear algebra, signal analysis, probability theory and statistics, programming, electrical engineering and physics, chemistry, materials science, rate processes and mathematics, and cell and molecular biology. Admitted students must be knowledgeable of these topics prior to entrance to the MS program.

## Degree Requirements

Course requirements for the MS in Bioengineering are detailed below. All core and elective courses must be taken for a numerical grade. Students must complete a one-quarter teaching assistantship. The timing of the teaching assistantship is decided in consultation with the department and the faculty adviser.

Note: A single course may not count for two separate requirements.

36 credits as follows:

- Molecular Bioengineering: BIOEN 501 (4)
- Cellular Bioengineering: BIOEN 502 (4)
- Systems Bioengineering: BIOEN 503 (4)
- Biostatistics (4)
- Bioengineering seminar: BIOEN 510 (1)
- Bioengineering elective courses, chosen in consultation with faculty adviser: 10 credits
- Master's thesis: BIOEN 700 (9 credits)

## Master of Pharmaceutical Bioengineering

The Master of Pharmaceutical Bioengineering (PHARBE) program is an evening degree program designed to enable working local engineers, scientists, researchers, and professionals in the biotechnology, pharmaceutical, and related industries to explore advanced education in the areas of molecular and cellular biology, drug discovery and design, pharmaceuticals, and translational pharmaceuticals. Professionals may also complete three certificate programs without applying for degree status.

## Admission Requirements

- B.S. degree or equivalent in a relevant science (field/research), public health (biomedical related) or engineering (field/research) related, or have a B.S. degree or equivalent in unrelated field and two years' experience working within a scientific or engineering group for a biotechnology or pharmaceutical company or related industry. Clinical degrees are considered.

- Applicants who have a bachelor's degree other than a B.S., professional experience, and completed recommended prerequisite course work are also considered for admission.

- Minimum 3.00 GPA in the last 90 quarter credit hours (60 semester credit hours). Students who have a BA/BS degree with under a 3.00 GPA and have two years' work experience may be approved for graduate non-matriculated (GNM) status for Basic Biosciences. Students who receive a 3.0 or above in their Basic Biosciences courses under GNM status are considered for degree admissions.

- o

- Official GRE scores

- One set of official (unopened) transcripts from each non-UW institution attended

- *Prerequisite Course Requirements:* The following courses must be completed with a 2.0 or greater in each course before applying to the degree program. Students whose undergraduate degree majors are in engineering, biology, chemistry or pharmacy are exempt from the prerequisite course requirement. *Calculus:* Minimum of one quarter (or one semester) of college calculus

- *Chemistry:* Minimum of two quarters (one semester) of college general chemistry. Additional course in organic chemistry is recommended.

- *Biology:* Minimum of one quarter (semester) of general biology

- *Physics:* one quarter (PHYS 114).

- Applicants are evaluated on professional experience, previous degrees earned, or most recent/undergraduate GPA, Basic Biosciences courses GPA (if applicable), letters of recommendation, statement of intent, and GRE test scores. Admission to the program is not guaranteed.

- Applicants who do not qualify for admission to the PHARBE degree program may be admitted to courses and/or to Pharmaceutical Bioengineering Certificate programs.

- *English Proficiency:* Students who are non-native English speakers are expected to have adequate English language proficiency. The Graduate School requires a TOEFL score of at least 580, unless applicants are citizens of Australia, Canada, Ireland, New Zealand, or the United Kingdom; or hold a bachelor's or advanced degree from an accredited institution in any of these countries.

## Degree Requirements

Minimum 40 credits, with a minimum cumulative GPA of 3.00, as follows:

- *Basic Biosciences Curriculum (20 credits):* Molecular and Cellular Biology I (4), Molecular and Cellular Biology II (4), Pharmaceuticals I (4), Pharmaceuticals II (4), Statistics and Experimental Design (4)

- *Advanced Tracks:* Students are required to take 16 credits from one of two advanced tracks in Translational Pharmaceuticals or Drug Discovery and Design. Students must complete 20 credits of the Basic Biosciences core courses before enrolling in advanced track courses.

- *Translational Pharmaceuticals (16 Credits):* Preclinical Development (4), Process Development (4), Formulation and Delivery (4), Clinical Development (4)

- *Drug Discovery and Design (16 Credits):* Molecular Biotechnology (4), Drug Discovery & Design (4), Molecular Targets & Drug Classes (4), Systems Biology and Bioinformatics (4)

- Departmental Seminar (4 Credits)

- *Optional Capstone Project:* Students have the option of completing a professional capstone project in either

the Drug Discovery and Design or Process Development courses.

## Doctor of Philosophy

The objective of the PhD program is to train individuals for careers in bioengineering research and teaching. The program has three major objectives: (1) breadth of knowledge about engineering, biology, medicine, and the interdisciplinary interface between these different fields; (2) depth of knowledge and expertise in a particular scientific specialty; (3) demonstrated independence as a bioengineering researcher. These objectives are fulfilled through a combination of educational and research experiences. The program is rigorous but maintains flexibility to accommodate qualified students from diverse academic backgrounds. Entrance to the PhD program does not require prior completion of the MS degree and may be made directly after the B.S. An optional dual PhD degree in bioengineering and nanotechnology is available; see [www.nano.washington.edu](https://www.nano.washington.edu) for more information.

## Admission Requirements

See the application process detailed in the MS section.

While it is not required to complete an MS degree before beginning the PhD, every graduate student is expected to have the following courses as part of her or his undergraduate education: ordinary differential equations, linear algebra, signal analysis, probability theory and statistics, programming, electrical engineering and physics, chemistry, materials science, processes and mathematics, and cell and molecular biology. Admitted students must be knowledgeable of these topics prior to entrance to the PhD program.

## Degree Requirements

90 credits, to include:

The PhD program consists of a rigorous set of core courses, elective courses, and a focused research project. Three major milestones punctuate that work: the qualifying examination, the general examination, and the final examination (dissertation defense). Additionally, students must complete a one-quarter teaching assistantship. The timing of the teaching assistantship is decided in consultation with the department and the faculty adviser.

All core and elective courses must be taken for a numerical grade. A single course may not count for two separate requirements. Required courses include:

- Molecular Bioengineering: BIOEN 501 (4)
- Cellular Bioengineering: BIOEN 502 (4)
- Systems Bioengineering: BIOEN 503 (4)
- Biostatistics (4)
- Bioengineering seminar: BIOEN 510 (1)
- 16 credits of bioengineering elective courses, chosen in consultation with faculty adviser
- 27 credits of dissertation writing (BIOEN 800)

Ordinarily, a student progressing well will follow this schedule:

- First Year: Complete one to three lab rotations and select a thesis adviser no later than the end of spring quarter.
- Second Year: Pass the qualifying examination and form a Supervisory Committee by the end of that year.
- Third Year: Pass the general examination.
- Fourth Year (and subsequent years): Make an annual progress report to, and receive feedback from, the Supervisory Committee.
- Fifth Year: Defend the dissertation.

## Medical Scientist Program

A Medical Scientist Training Program (MSTP) exists for the support of individuals interested in coordinated graduate school/medical school study leading to both the M.D. and PhD degrees. Students entering this highly competitive program are given an opportunity to pursue a flexible, combined course of study and research. Early inquiry is essential for this option. Contact the MSTP office at 206-685-0762.

## Research Facilities

As the Department is established within the College of Engineering and the School of Medicine, bioengineering students have access to all engineering and health science departments and facilities. A wide range of technologies and virtually all aspects of biomedical research tools are available.

## Financial Support

Financial support is available to qualified graduate students in the form of traineeships, fellowships, and teaching and research assistantships. Funding is derived from federal research and training programs, the Graduate School Fund for Excellence and Innovation, and programs sponsored by private agencies. Questions regarding financial support may be directed to the adviser.

## COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at [www.uw.edu/students/crscat/](http://www.uw.edu/students/crscat/).

**BIOEN 215 Introduction to Bioengineering Problem Solving (3)** *Taylor, Thomas* Introduces bioengineering through a problem solving approach. Topics include: creative problem solving techniques, self-directed inquiry, engineering ethics, social constraints, and engineering design process. Offered: W.

**BIOEN 299 Introduction to Bioengineering (1)** *Verdugo* Lectures on the various aspects of bioengineering; orientation in bioengineering studies and practice. Credit/no credit only. Offered: ASP.

**BIOEN 315 Biochemical Molecular Engineering (3)** *Daggett* Introduces the requisite organic, physical, and biochemistry for incoming bioengineers to understand biological systems at the molecular level. Prerequisite: CHEM 223 or CHEM 237; BIOL 200, which may be taken concurrently. Offered: Sp.

**BIOEN 316 Biomedical Signals and Sensors (3)** *Gao, Neils* Introduces the sources, detection, and processing of signals in medial instrumentation. Includes analog and digital signal processing in the time and frequency domains. Emphasizes component strengths and limitations, to develop systems that improve safety, accuracy, and reliability. Prerequisite: AMATH 301 and PHYS 122; BIOEN 317, which must be taken concurrently; either MATH 307 or AMATH 351, which may be taken concurrently. Offered: Sp.

**BIOEN 317 Biomedical Signals and Sensors Laboratory (2)** *Neils* Uses computational and experimental projects covering methods to acquire, process, and analyze signals from physiological and biochemical origins. Co-requisite: BIOEN 315 and BIOEN 316. Offered: Sp.

**BIOEN 325 Biotransport I (3)** *Lewis, Neils, Pun* Introduces momentum and heat transport in medical and biological systems. Examines how differential and control-volume analyses produce ordinary and partial differential equations; develops analytical and computational solution methods. Prerequisite: AMATH 301; either MATH 307 or AMATH 351; PHYS 122; BIOL 220. Offered: A.

**BIOEN 326 Solid and Gel Mechanics (3)** *Thomas* Introduces solid mechanics and interactions of biological structures and medical materials. Emphasizes the relationships be-

tween composition, structure, properties and performance of metals and ceramics, synthetic and natural macromolecules, cells, tissues, and self assembling systems. Prerequisite: CHEM 162; PHYS 122; BIOEN 315. Offered: A.

**BIOEN 327 Fluids and Materials Laboratory (2)** *Neils, Taylor* Practical exploration of the behavior of fluids and soft materials that occur in biological systems and biomedical devices; and the interaction between cells and their environment. Includes methods of measurement, analysis, and design. Co-requisite: BIOEN 325 and BIOEN 326. Offered: A.

**BIOEN 335 Biotransport II (3)** *Bryers, Pun, Woodrow* Studies the principles of combined mass transport in homogeneous and heterogeneous reaction systems as applied to biological processes. Introduces chemical and biochemical reaction kinetics, methods of evaluating kinetic parameters for reaction rate data, and prediction of the performance of biological and biochemical processes. Prerequisite: BIOEN 325. Offered: W.

**BIOEN 336 Bioengineering Systems and Control (3)** *Sauro* Reviews linear and nonlinear systems analysis and control system design and biological and medical applications. Prerequisite: BIOEN 327; either MATH 308 or AMATH 352. Offered: W.

**BIOEN 337 Mass Transport and Systems Laboratory (2)** *Taylor, Woodrow* Uses computational and experimental laboratory exercises to demonstrate time- and space-dependent linear and nonlinear systems with specific emphasis on bioengineering application. Prerequisite: BIOEN 327; BIOEN 335 and BIOEN 336, which must be taken concurrently; either STAT 390 or IND E 315, which may be taken concurrently. Offered: W.

**BIOEN 345 Failure Analysis and Human Physiology (4)** *Regnier, Taylor, Thomas* Applies engineering analysis to understand human physiology and pathology of the engineering of solutions to medical and biological problems. Includes laboratory. Prerequisite: BIOEN 215; BIOEN 335; BIOEN 336; BIOEN 337. Offered: Sp.

**BIOEN 401 Bioengineering Capstone Principles (3)** *Yager* Teaches design principles in bioengineering and guides the development of design and research-based senior capstone projects. Prerequisite: either STAT 390 or IND E 315. Offered: Sp.

**BIOEN 402 Bioengineering Capstone Research and Design (2-6, max. 10)** Independent senior design project. Prerequisite: BIOEN 401. Offered: AWSpS.

**BIOEN 403 Bioengineering Capstone Research (2-, max. 4)** Independent senior research project. Prerequisite: BIOEN 401. Offered: AWS.

**BIOEN 404 Bioengineering Team Design I (3)** *Neils* First course in team design project course sequence. Prerequisite: BIOEN 401. Offered: W.

**BIOEN 405 Bioengineering Team Design II (3)** *Neils* Second course in team design project course sequence. Prerequisite: BIOEN 404. Offered: Sp.

**BIOEN 420 Medical Imaging (4)** *Yuan* Various medical imaging modalities (x-rays, CT, MRI, ultrasound, PET, SPECT, etc.) and their applications in medicine and biology. Extends basic concepts of signal processing (BIOEN 303) to the two and three dimensions relevant to imaging physics, image reconstruction, image processing, and visualization. Prerequisite: BIOEN 303; MATH 308; CSE 143. Offered: A.

**BIOEN 423 Introduction to Synthetic Biology (3)** Studies mathematical modeling of transcription, translation, regulation, and metabolism in cell; computer aided design methods for synthetic biology; implementation of information processing, Boolean logic and feedback control laws with genetic regulatory networks; modularity, impedance matching and isolation in biochemical circuits; and parameter estimation methods. Prerequisite: either MATH 307 or CSE 321; MATH 308. Offered: jointly with E E 423/CSE 486.

**BIOEN 424 Advanced Systems and Synthetic Biology (3)** Introduces advanced topics in systems and synthetic biology. Topics include advanced mathematical modeling; computational standards; computer algorithms for computational

analysis; and metabolic flux analysis, and protein signaling pathways and engineering. Prerequisite: either BIOEN 423, E E 423, or CSE 486. Offered: jointly with E E 424/CSE 487; W.

**BIOEN 425 Laboratory Methods in Synthetic Biology (4)** Designs and builds transgenic bacterial using promoters and genes taken from a variety of organisms. Uses construction techniques including recombination, gene synthesis, and gene extraction. Evaluates designs using sequencing, fluorescence assays, enzyme activity assays, and single cell studies using time-lapse microscopy. Prerequisite: either BIOEN 423, E E 423, or CSE 486; either CHEM 142, CHEM 144, or CHEM 145. Offered: jointly with E E 425/CSE 488.

**BIOEN 440 Introduction to Biomechanics (4)** *Sanders* Presents the mechanical behavior of tissues in the body and the application to design of prostheses. Tissues studies include bone, skin, fascia, ligaments, tendons, heart valves, and blood vessels. Discussion of the structure of these tissues and their mechanical response to different loading configurations. An important part of the class is a final project. Offered: jointly with M E 445; Sp.

**BIOEN 455 BioMEMS (4)** *Folch* Introduction to BioMEMS. State-of-the-art techniques in patterning biomolecules, machining three-dimensional microstructures and building microfluidic devices. Various biomedical problems that can be addressed with microfabrication technology and the engineering challenges associated with it. Biweekly labs. Prerequisite: BIOEN 303. Offered: W.

**BIOEN 457 Advanced Molecular Bioengineering (4)** *Stayton* Fundamentals of molecular recognition: thermodynamics, forces, kinetics. Manipulation of recognition processes for current molecular bioengineering research and development. Fundamental physical chemistry of molecular recognition in the context of biomedicine. Therapeutics based on cells. Prerequisite: BIOEN 357; BIOEN 405. Offered: Sp.

**BIOEN 467 Biochemical Engineering (3)** *Baneyx* Application of basic chemical engineering principles to biochemical and biological process industries such as fermentation, enzyme technology, and biological waste treatment. Rapid overview of relevant microbiology, biochemistry, and molecular genetics. Design and analysis of biological reactors and product recovery operations. Prerequisite: either CHEM 223 with CHEM E 340 or either CHEM 237 or CHEM 335; recommended: BIOEN E 465. Offered: jointly with CHEM E 467; Sp.

**BIOEN 481 Bioengineering Design and Capstone Principles (4)** *Vaezy* Teaches design principles in bioengineering and guides the development of design-based senior capstone projects. Prerequisite: BIOEN 303; BIOEN 305. Offered: Sp.

**BIOEN 482 Bioengineering Capstone Project ([2-6]-, max. 8)** Independent senior design project. Prerequisite: BIOEN 357; BIOEN 481; corequisite: STAT 390. Offered: AWSpS.

**BIOEN 485 Computational Bioengineering (4)** *Thomas, Vicini* Introduction to computational, mathematical and statistical approaches to the analysis of biological systems, including systems and control theory, molecular models and bioinformatics. Lectures and laboratory sessions emphasize practical problems in kinetics, metabolism and genomics. Prerequisite: CSE 143; BIOEN 305; MATH 308. Offered: A.

**BIOEN 490 Engineering Materials for Biomedical Applications (3)** *Horbett* Combined application of principles of physical chemistry and biochemistry, materials engineering, to biomedical problems and products. Applications include implants and medical devices, drug delivery systems, cell culture processes, diagnostics, and bioseparations. Offered: jointly with CHEM E 490; A.

**BIOEN 491 Controlled-Release Systems: Principles and Applications (3)** *Pun* Mechanisms for controlled release of active agents and the development of useful drug delivery systems for this purpose. Release mechanisms considered include diffusive, convective, and erosive driving forces. Delivery routes include topical, oral and in vivo. Some special case studies covered in detail. Offered: jointly with CHEM E 491; W.

**BIOEN 492 Surface Analysis (3)** *B. Ratner* Understanding of solid surfaces for research and development in microelec-

tronics, catalysis, adhesion, biomaterials, science wear, and corrosion science. Newer methods available to study surfaces of materials. Electron emission spectroscopies (ESCA, Auger); ion scattering, ion spectroscopic, photon spectroscopic, and thermodynamic methods. Offered: jointly with CHEM E 458; Sp.

**BIOEN 497 Bioengineering Education Outreach (1–2, max. 6)** Work with K-12 schools or community organizations. Current science education research and instructional techniques. May involve presentations or instruction in hands-on activities.

**BIOEN 498 Special Topics (1–6, max. 15)** Topics of current interest in the field, offered as lectures, conferences, or laboratory. Offered: AWSpS.

**BIOEN 499 Special Projects (1–6, max. 24)** Individual undergraduate bioengineering projects (research or independent study) under the supervision of an instructor. Credit/no credit only. Offered: AWSpS.

**BIOEN 501 Molecular Bioengineering (4)** Bryers Examines advanced topics in molecular diffusion, reaction kinetics, and convective transport modeling as applied to biological systems. Includes mathematical analysis and numerical simulation techniques applied to: Non-Fickian diffusion, rotational versus translational diffusion, immobilized enzyme kinetics, drug release, and gene delivery. Offered: A.

**BIOEN 502 Cellular Bioengineering (4)** Giachelli Covers basic principles of cell biology (including cell structure, function, and signaling), recombinant RNA/DNA technology, and specific examples of cellular bioengineering applications including gene delivery, RNA silencing, and tissue engineering. Prerequisite: BIOEN 501. Offered: W.

**BIOEN 503 Systems Bioengineering (4)** Regnier, Vicini Explores whole-body or organ physiology topics from an engineering perspective. Uses various model systems to elucidate engineering principles such as feedback control and homeostatic regulation. Includes real-world examples, computer modeling, and research design approaches. Prerequisite: BIOEN 502. Offered: Sp.

**BIOEN 504 Introduction to Technology Commercialization (4)** Explores essential business, legal, engineering, and other skills necessary to take new technology from research to market. Covers intellectual property, market analysis, licensing, funding mechanisms such as venture capital, and product marketing.

**BIOEN 505 Studies in Technology Commercialization (4)** Explores essential business, legal, engineering, and other skills necessary to take new technology from research to market. Covers intellectual property, market analysis, licensing, funding mechanisms such as venture capital, and product marketing; introduces strategic planning, management of commercialization effort. Prerequisite: BIOEN 504.

**BIOEN 506 Applying Technology Commercialization (4)** Explores essential business, legal, engineering, and other skills necessary to take new technology from research to market. Covers intellectual property, market analysis, licensing, funding mechanisms such as venture capital, and product marketing, market feasibility analysis, and business plan development. Prerequisite: BIOEN 505.

**BIOEN 508 Career Pathways in Academia (1.5)** Stayton Overviews academic career options and job search preparation. Evaluates academic institutions and faculty appointments, identifies components of the academic curriculum vitae, teaching and research statements, and introduces tenure and faculty issues. Offered: A; even years.

**BIOEN 509 Bioengineering Departmental Seminar (1, max. 16)** Bassingthwaight Research review and discussions centered on demonstrating approaches and solving scientific problems. Seminar lectures led by faculty and visiting faculty in Bioengineering and related disciplines. Credit/no credit only. Offered: WSp.

**BIOEN 510 Bioengineering Seminars (1)** Introductory seminar for new graduate students; review of departmental research.

**BIOEN 511 Biomaterials Seminar (1, max. 18)** Hoffman, Horbett, Ratner Presentation of student research results. Credit/no credit only. Prerequisite: permission of instructor. Offered: jointly with CHEM E 511.

**BIOEN 513 Current Topics in Cardiac Physiology (1, max. 3)** Regnier Current research in cardiac physiology. Student presentation and discussions of current research methodologies.

**BIOEN 516 Medical Imaging Seminar (1)** Weekly seminars, presented by UW faculty members, researchers and graduate students from UW, other academic institutions, and industry, on image computing and medical imaging. Topics include digital video, image processing, computer graphics, video/image compression, image analysis, algorithms and systems, pattern recognition, multimedia computer architectures, and other applications. Credit/no credit only.

**BIOEN 518 Nanotechnology Seminar (1, max. 18)** Emphasizes frontier research in nanoscience and nanotechnology and on intellectual interactions within the nanotechnology community. Presented by experts in the field, with most being from other institutions. Prerequisite: graduate standing and permission of instructor. Credit/No Credit only. Offered: jointly with CHEM 597; AWSp.

**BIOEN 520 Orthopedic Biomechanics (4)** Ching Mechanical engineering applied to musculoskeletal system with emphasis on techniques in orthopedic surgery. Measurement of mechanical properties of tissues. mechanics of bone, soft tissue, and muscle, mechanics of upper extremity, spine, and lower extremity. Engineering in surgery, gait analysis, joint replacement, fracture fixation. Prerequisite: BIOEN 440.

**BIOEN 522 Biomechanics of Soft Tissue (3)** Sanders Applies soft tissue biomechanics to medical research. Develops specific biomechanical questions and experiments to address those aims or hypotheses.

**BIOEN 523 Introduction to Synthetic Biology (3)** Studies mathematical modeling of transcription, translation, regulation, and metabolism in cell; computer aided design methods for synthetic biology; implementation of information processing, Boolean logic and feedback control laws with genetic regulatory networks; modularity, impedance matching and isolation in biochemical circuits; and parameter estimation methods. Prerequisite: either MATH 307 or CSE 321; MATH 308. Offered: jointly with E E 523/CSE 586.

**BIOEN 524 Advanced Systems and Synthetic Biology (3)** Introduces advanced topics in systems and synthetic biology. Topics include advanced mathematical modeling; computational standards; computer algorithms for computational analysis; and metabolic flux analysis, and protein signaling pathways and engineering. Prerequisite: either BIOEN 523, E E 523, or CSE 586. Offered: jointly with E E 524/CSE 587; W.

**BIOEN 525 Microfabrication and Microfluidics (3)** Folch, Yager Studies the use of 2- and 3-dimensional structures in research and biomaterials, cells, and complex liquids. Focuses on micropatterning of surfaces and microfluidic chemical analytical systems. Co-requisite: BIOEN 553.

**BIOEN 553 Microfabrication and Microfluidics Laboratory (2)** Folch, Yager Studies the creation of 2- and 3-dimensional structures for use in research with biomaterials, cells, and complex liquids. Each student will fabricate at least one PDMS device and demonstrate its function. Credit/no credit only. Co-requisite: BIOEN 552.

**BIOEN 555 Cellular and Molecular Biomechanics and Cell Function (3)** Pollack Examines basic mechanisms of cell function with emphasis on motion. Includes principles of physics and chemistry, building to organelle structure and function; gel-like nature of cell and critical role of cell water; streaming, motility, contraction, mitosis, transport, and other cell basics.

**BIOEN 565 Nuclear Magnetic Resonance in Biomedicine (2)** Basic physics of nuclear magnetic resonance (NMR) imaging and spectroscopy are presented. Research applications of NMR in physiology and biochemistry are reviewed with emphasis on the brain. Grade based on written tests and

small research paper. Prerequisite: permission of instructor. Offered: jointly with RADGY 550.

**BIOEN 568 Image-Processing Computer Systems (4)** Kim Components of digital processing computer systems. Two-dimensional filtering and optimal filter design as well as basic image-processing operations. Selected advanced image-processing topics introduced. Individual student project. Prerequisite: permission of instructor. Offered: jointly with E E 568.

**BIOEN 573 Biosensors and Biomedical Sensing (3)** Yager In-depth overview of the principal types of biosensors. Topics include: how biological molecules are used in sensing, how the sensors operate, how different sensors compare, under what circumstances sensors can be useful, and the applicability of sensors to biomedical sensing. Prerequisite: BIOEN 436 or permission of instructor.

**BIOEN 576 Laboratory Techniques in Protein Engineering (4)** Stayton Practical introduction to fundamentals of recombinant DNA technology and protein engineering. Gene design, bacterial molecular biology, genetic engineering strategy. Laboratory project focused on making site-directed protein mutations. Techniques include the Polymerase Chain Reaction, DNA sequencing, DNA cutting/splicing, protein expression. Prerequisite: background in biochemistry or molecular biology or consent of instructor.

**BIOEN 577 Cell and Protein Reaction with Foreign Materials (3)** Horbett Study of ways in which cell and protein interactions with foreign materials affect the biocompatibility of biomaterials. Description of the phenomenology and mechanisms of protein adsorption, mammalian cell adhesion, and cell receptor biology and of methods used to study these phenomena. Surface properties of materials discussed in context of the course. Prerequisite: permission of instructor.

**BIOEN 578 Biomembranes (3)** Yager Develops an understanding of the molecular principles that underlie the self-assembly of surfactants into natural and model membranes; in particular, on the relationship between the chemical structure of lipid molecules and the three-dimensional aggregates that they form in water.

**BIOEN 579 Host Response to Biomaterials (3)** Giachelli Basic cell and molecular biology of the pathologies associated with biomaterial implantation that limit bioprosthetic use, including hemostasis, infection, acute and chronic inflammation, wound healing and fibrosis, and structural alterations. Major methods for histological analysis of retrieved implants. Prerequisite: general biology, BIOEN 490 (may be taken concurrently) or permission of instructor.

**BIOEN 586 Tissue Engineering (3)** Giachelli, Horbett Explores methods to restore or replace function in the cardiovascular, epithelial, urinary, nervous, skeletal, and other systems in the human body by use of constructs that contain living cells. Presents scaffold preparation, angiogenesis, and use of stem cells.

**BIOEN 590 Advanced Topics in Biomaterials (3)** Horbett Major, controversial issues in application of synthetic materials to medical problems. Blood compatibility, bioadhesion, intraocular lenses, contact lenses, polyurethanes, biodegradation, protein adsorption, corrosion, bone fixation, new materials, artificial heart, medical device regulation. Prerequisite: BIOEN 490 or CHEM E 490. Offered: jointly with CHEM E 590.

**BIOEN 592 Surface Analysis (3)** B. Ratner Understanding of solid surfaces for research and development in microelectronics, catalysis, adhesion, biomaterials science, wear and corrosion science. Newer methods available to study surfaces of materials. Electron emission spectroscopies (ESCA, Auger); ion scattering, ion spectroscopic, photon spectroscopic, and thermodynamic methods. Offered: jointly with CHEM E 558.

**BIOEN 598 Research Rotation (1–10, max. 30)** Research rotation in the laboratories of core or adjunct faculty in the Department of Bioengineering. Credit/no credit only. Offered: AWSpS.

**BIOEN 599 Special Topics in Bioengineering (1–6, max. 30)**

Offered at a graduate level periodically by faculty members within the Department of Bioengineering; concerns areas of research activities with current and topical interest to bioengineers. Prerequisite: undergraduate or graduate courses (or equivalent) determined individually for each special topic.

**BIOEN 600 Independent Study or Research (\*)** Credit/no credit only. Offered: AWPSP.

**BIOEN 700 Master's Thesis (\*)** Credit/no credit only. Offered: AWPSP.

**BIOEN 800 Doctoral Dissertation (\*)** Credit/no credit only. Offered: AWPSP.

## Global Health

### DEPARTMENT OVERVIEW

The Department of Global Health was launched in January 2007 with generous support from the Bill & Melinda Gates Foundation, the state of Washington, and the University of Washington, with a mandate to harness the extraordinary expertise, energy, and creativity of faculty across all 17 UW schools and colleges to create a comprehensive academic global health program.

The Department is housed in both the School of Medicine and School of Public Health and brings together enormous expertise in global health through our closely affiliated centers - Center for AIDS Research; International Clinical Research Center; International Training and Education Center for Health; Health Alliance International; and the Global Health Resource Center; a major institute - the Institute for Health Metrics and Evaluation; and our key programs - the Pathobiology Pre-doctoral Global Health Basic Laboratory Science Program, the Kenya Research Program, the new Global Medicines Policy and Research Program, and our Global Health Leadership programs.

The Department has over 230 regular, adjunct, affiliate, or clinical faculty and 336 graduate students.

### GRADUATE PROGRAM

Graduate Program Coordinator

S432 Foege Building, Box 355065

206-897-1804

[ghprog@u.washington.edu](mailto:ghprog@u.washington.edu)

### Master of Public Health

The Master of Public Health (MPH) program in the Department of Global Health is a rigorous, 12- to 21-month program that gives students multidisciplinary, comprehensive training in global public health. All Global Health MPH students are required to complete 63 total credits, including core MPH courses (17–20 credits), global health courses (12 or more credits), a global health-related practicum, and a research or practice thesis based on original scholarly work and relating to health in developing countries. Graduates of this program will be able to approach global health issues with a solid grounding in basic public health disciplines. They will have practical experience, be skilled in applied research, and have an understanding of the sociopolitical matrix of health determinants of the developing world.

### Admissions Requirements

- Completed Graduate School Application
- Goal statement (1–2 pages)

- Transcripts: A set of sealed official transcripts from each institution of higher learning attended should be mailed directly to the department.
- Test Scores: GRE scores must be submitted, sent directly to the University by the Educational Testing Service using institution code 4854. No subject test is required. Applicants with a PhD, JD, DDS, MD or related degree from an accredited United States school do not need to submit GRE scores; Applicants to the Health Metrics and Evaluation Track, and UW or WWAMI MD students applying for the concurrent MD/MPH degree may substitute MCAT scores for GRE scores. Any other application without GRE scores is considered incomplete and is not reviewed.
- English Language Proficiency: Proficiency in English is required for graduate study at the University of Washington. Therefore, every applicant whose native language is not English must demonstrate English language proficiency in one of the following ways:
  - A bachelor's degree from a regionally accredited institution in the United States or from an institution in Australia, the Bahamas, Canada, Ireland, New Zealand, Singapore, Trinidad and Tobago, or the United Kingdom.
  - Documentation verifying that the applicant's undergraduate degree (bachelor's level) is from an institution where all instruction is in English.
  - A minimum English language proficiency test score, as follows: 7.0 on the IELTS; 92 on the Internet-based TOEFLiBT; 237 on the computer-based TOEFLC; 580 on the paper TOEFL; or 90 on the MLT.
  - If an applicant is admitted with a score lower than the minimum scores listed above, but in the range of scores listed below, the student is required to take designated Academic English Program (AEP) courses upon matriculation and until the student has met the English language proficiency requirement for the degree: 6.0–6.9 (IELTS); 61–91 (TOEFLiBT); 173–236 (TOEFLC); 500–579 (TOEFL); or 80–89 (MLT).
  - Successful completion of the UW Intensive English Program.

- Three letters of recommendation
- Current resume or CV (maximum 3 pages)
- Application Due Date: December 1 for the following autumn quarter.

### Degree Requirements

#### General Track

The General Track is designed for students with substantial global health experience who envision careers requiring an array of competencies to work among multiple agencies involved in global health, including ministries of health, non-governmental organizations and academic institutions. The General Track provides a broad curriculum with a wide selection of courses and maximal flexibility to develop one's own curricular direction. Students can focus on policy development; program design, implementation, and management; health education promotion; program evaluation; research; tropical medicine; and others.

Minimum 63 credits, as follows:

- Global Health Foundations Course: G H 511
- Global Health Management Course: G H 521
- Either G H 531/EPI 539 or G H 532/EPI 586
- Global Health Seminar: G H 500 is to be taken each quarter in residence
- Global Health Thesis Workshop: G H 593 taken each of the first three quarters in the program
- Biostatistics: At least one of the following: BIOST 511 or BIOST 517

- Epidemiology: At least one of the following: EPI 511, EPI 512, or EPI 513
- Environmental Health: At least one of the following: ENV H 511, ENV H 517, ENV H 570, ENV H 577, or ENV H 584
- Social and Behavioral Sciences: HSERV 510
- Practicum: 3–6 credits of G H 595
- Thesis: At least 9 credits of G H 700
- Qualitative Methods: If a student's thesis is primarily qualitative, a course in qualitative methods is required, either HSERV 521 or HSERV 526. These courses may be substituted by another qualitative methods course with permission from thesis chair. In the case of a substitution, please contact a student services staff member.
- At least 30 credits must be from graduate-level in-classroom courses.
- At least 18 credits must be from Global Health in-classroom courses.

#### Leadership, Policy and Management Track

Designed for mid-career professionals, the Leadership, Policy and Management (LPM) Track seeks to train creative leaders, effective managers, and influential policy advocates who will translate knowledge into action to transform health systems. In addition to the MPH core curriculum, students complete case-based coursework and practical experiences focusing on key competencies of leadership (fostering individual and team growth, managing cultural differences, public speaking, conflict resolution); management (financial, human resources, organizational design, operations research); and policy development and advocacy (issue identification, stakeholder mapping, options analysis). A practicum or "professional affiliation" with local or national institutions provides hands-on training, and students complete a practice thesis applying LPM skills to an actual organization, implementation or policy challenge. A four-quarter (12 month) "accelerated" option is available to students who seek and are able to complete a more concentrated curriculum than the traditional two-year program.

Minimum 63 credits, as follows:

- General Track requirements (above)
- Core Seminar Series: The following seminars must be taken during the first year of study: Leadership Development for Global Health Managers (2 credits), Organizational Leadership and Management (2), and Global Health Policy Development and Advocacy (2).
- Additionally, at least one course each from three of the four following "competency" clusters: Ethics and Human Rights, Law and Policy, Management, and Program Evaluation.

#### Epidemiology Global Health Track

The purpose of the Epidemiology MPH-Global Health Track is to combine broad training in public health with specific training in the principles and methods of epidemiology and community health in developing countries. The degree requirements include course work in epidemiology, biostatistics, global health, health services, and environmental health; a practice experience in a public health agency (practicum); and completion of a research-based master's thesis. The degree is appropriate for individuals who possess an MD, DVM, DDS, ND, or PhD degree who seek a career in public health practice or academia, or medical students interested in a combined MD/MPH program. We also consider exceptional individuals with a bachelor's degree and health-related background who seek an MPH to prepare for a master's-level career in public health practice or research, or who plan to apply to the PhD program in Epidemiology after completion of an MPH.

Minimum 63 credits, as follows:

- EPI 510, EPI 512, EPI 513, EPI 514

- BHOST 511, BHOST 512, BHOST 513; or BHOST 517, BHOST 518
- G H 511
- HSERV 510
- Global Health Seminar: G H 500/EPI 592 taken all quarters, minimum three times
- Practicum: EPI 595
- Either ENV H 511, ENV H 517, or ENV H 577
- Epidemiology Electives: 6 credits from approved list.
- Global Health Electives: 6 credits from approved list.
- Thesis: 9–18 credits, EPI 700

### Health Metrics and Evaluation Track

The Health Metrics and Evaluation (HME) Track is designed for individuals with demonstrated quantitative skills who intend to pursue careers at the national and international level in quantitative research, methods and modeling development, survey design and analysis, health system and program evaluation, policy analysis, or academia. The HME Track curriculum follows the established MPH core requirement model while incorporating a set of methodological and analytical courses from a variety of quantitative disciplines.

Minimum 63 credits, as follows:

- Global Health Foundations Course: G H 511
- Biostatistics: At least one of the following: BHOST 511 or BHOST 517
- Epidemiology: At least one of the following: EPI 511, EPI 512, or EPI 513
- Environmental Health: At least one of the following: ENV H 511, ENV H 517, ENV H 570, ENV H 577, or ENV H 584
- Social and Behavioral Sciences: HSERV 510
- HME-Specific Courses: G H 515, G H 533
- HME Seminar: At least three quarters of appropriate sections of G H 590
- Research Methods: At least three quarters of appropriate sections of G H 590
- Method, Tools, and Data: One appropriate section of G H 590
- Practicum: 3–6 credits of G H 595
- Thesis: At least 9 credits of G H 700
- Electives: Students are encouraged to take 10 elective credits from other departments of the School of Public Health and across the University of Washington.
- At least 30 credits must be from graduate-level in-classroom courses.
- At least 18 credits must be from Global Health in-classroom courses.

### Peace Corps Master's International Track

The Peace Corps Master's International (PCMI) Track of the Global Health MPH is designed for students who do not necessarily have developing country health work experience, although they are expected to have substantial (about two years) work experience beyond college, preferably in a health setting. This program is particularly well-suited for students who for financial or other reasons have not been able to engage in global health activities. Students gain developing country work experience by fulfilling a requirement to serve two years in the Peace Corps after completing their first academic year of coursework. Curriculum for this track is otherwise identical to that of the General Track. After returning from the Peace Corps and completing the degree, graduates of this track will have similar career opportunities to those in the General Track.

### Concurrent Degrees with MPH

The Department of Global Health encourages students to take full advantage of the University's unique position as

a leading education, research, and service institution and to consider one of the many concurrent degree programs available with the MPH. Enrollment in a concurrent degree program at the University permits a student to proceed in a coordinated way towards sequential completion of both degrees in a shortened period of time. Some of the options available are not formal concurrent programs, but the degrees listed can be pursued in parallel with the Global Health MPH. In some cases, agreements may be reached between the two programs to allow for sharing of some credits and/or projects. Most concurrent degrees begin with a successful application to the other school, followed by an application to the MPH during the first year of study in the first program.

## COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at [www.uw.edu/students/crscat/](http://www.uw.edu/students/crscat/)

**G H 201 Newly Emerging Diseases in Public Health (2) NW** White Newly recognized and emerging disease pose a major problem for public health. AIDS, hantavirus infections, Ebola virus infections, and the role of bacterial infection in the causation of stomach ulcers are examples of problems to be studied. Other timely diseases are presented in this lecture discussion course. Offered: A.

**G H 401 Introduction to Global Health (1) Gonzales, Wade** Addresses a variety of themes in global health which serve as a base for an introductory-level understanding of the field. Emphasizes the diverse, multidisciplinary perspectives on global health. Credit/no credit only. Offered: A.

**G H 402 Multidisciplinary Perspectives in Global Health (1) Gonzales, Wade** Presents from a variety of disciplines discuss their experiences working on global health issues in resource-poor settings. Speakers illustrate how their work is influenced by communication, culture, economic and socio-political realities. Credit/no credit only. Offered: Sp.

**G H 415 Global Health Challenges (4) I&S Murray** Introduces principal health problems of the world's populations, and major challenges to improving health globally. Explores interdisciplinary factors accounting for health patterns, ranging from either physiological basis to their economic, social, and political context. Prerequisite: MATH 124; either BIOL 180, STAT 311, or Q SCI 381. Offered: A.

**G H 490 Special Topics (1–5, max. 15)** Offered: AWSpS.

**G H 499 Undergraduate Research (1–15, max. 15)** Offered: AWSpS.

**G H 500 Global Health Seminar (1, max. 6)** Explores issues relevant to global health; themes vary by quarter. Required course for Global Health MPH and Global Health Certificate students. Credit/no credit only. Offered: AWSp.

**G H 501 Introduction to Global Health (1) Gonzales, Wade** Addresses a variety of themes in global health which serve as a base for an introductory-level understanding of the field. Emphasizes the diverse, multidisciplinary perspectives on global health. Offered: A.

**G H 502 Multidisciplinary Perspectives in Global Health (1) Gonzales, Wade** Presents from a variety of disciplines discuss their experiences working on global health issues in resource poor settings. Speakers illustrate how their work is influenced by communication, culture, economic and socio-political realities. Offered: Sp.

**G H 505 P-Advanced Global Health (2) Kimball** Prepares health profession students for work in developing countries. Includes health care delivery systems, political, social, and economic determinants of health, major global health issues, and personal well-being while abroad. Lecture and seminar format with guest speakers, student presentations, and discussion. Offered: jointly with MED 560; Sp.

**G H 511 Problems in International Health ([0–4], max. 4)** Gloyd Explores social, political, economic, environmental determinants of developing countries' health; traces devel-

opment of societal responses to problems. Includes: origins of primary health care; child survival; traditional systems; population; water; sanitation; international agencies; impact of economic policies. Case study formulating pharmaceutical policy in a developing country. Offered: A.

**G H 514 Global Population Health (3) Bezruchka** Looks at determinants of population health in different countries, to learn about the constraints of typical public health and development paradigms. Topics include colonialism, development and underdevelopment, political economy, culture, health behaviors, hierarchy, health care and medical harm. Offered: Sp.

**G H 515 Global Health Challenges (4) Murray** Introduces principal health problems of the world's populations, and major challenges to improving health globally. Explores interdisciplinary factors accounting for health patterns, ranging from either physiological basis to their economic, social, and political context. Prerequisite: either BHOST 511, BHOST 512, and BHOST 513, or BHOST 517 and BHOST 518, or equivalent; either EPI 511 or both EPI 512 and EPI 513. Offered: A.

**G H 516 Health and Human Rights (3)** Examines the basic concepts in the fields of human rights law and public health, and uses those concepts to examine the interdependence and tensions between the two fields. Introduction to the fields of public health and human rights law, examining the impact of health policies and programs on human rights. Offered: jointly with LAW H 540.

**G H 521 International Program Management and Evaluation (3) Downer, O'Malley** Overview of the program planning cycle as applied to international program management. Uses case studies and application exercises to develop skills in designing assessment activities for program planning; developing, testing, and implementing programmatic interventions; managing resources and people, monitoring activities; and evaluating program outcomes. Offered: Sp.

**G H 531 Research Methods in Developing Countries (3/4) Gloyd, Micek** Simple, practical methodologies to obtain and validate information regarding health status and health services in developing countries. Usefulness, validity, limitation of vital records, health reports, household (and cluster) surveys, nutritional anthropometry, and qualitative methods discussed. Lectures, computer lab, and student participation in community-based survey. Offered: jointly with EPI 539; W.

**G H 532 Responsible Conduct of International Research (3) Farquhar** Prepares international and U.S. students to develop research proposals, conduct international field research, and present scholarly work. Topics include proposal writing, human subjects protection, data management, peer review, scholarly integrity, responsible authorship, and grants and budget management. Open to graduate and non-matriculated students. Credit/no credit only. Offered: jointly with EPI 586; A.

**G H 533 Population Health Measurement (4) Lim** Introduces approaches for measuring population health such as burden of disease methods. Provides an understanding of the technical basis, uses, and limitations of these methods, particularly in developing countries. Predominantly quantitative. Recommended: G H 515. Offered: W.

**G H 537 Qualitative Research Methods for Public Health (4)** Covers a range of qualitative, ethnographic tools for practical applications in public health. Methods covered include direct observation, informant interviews, focus groups, and formal methods. Covers Rapid Assessment Procedures and Participatory Action Research. Student teams investigate research questions using these techniques. Offered: jointly with HSERV 526.

**G H 538 Qualitative Methods in Health Services Research (3)** Provides theoretical training in qualitative research and in depth training in qualitative data management, analysis, interpretation, and presentation. Focuses on how to frame qualitative research questions, design appropriate research strategies, and integrate qualitative and quantitative methods in research designs in public health. Offered: jointly with HSERV 521.

**G H 543 Global Health Pharmacy: Medicines, Practice and Policy (2)** *Garrison, Stergachis* Introduces the critical role of pharmaceuticals in addressing the major diseases affecting persons in resource-limited settings, such as HIV/AIDS, malaria, and tuberculosis. Addresses the wide range of relevant issues, including burden of disease, human resource capacity, regulation, drug safety/pharmacovigilance, drug distribution, pharmacoconomics, financing, intellectual property, and drug trade policies. Credit/no credit only. Offered: W.

**G H 544 Maternal and Child Health in Developing Countries (3)** *Mercer* Emphasizes critical health problems of women and children in developing countries in social, economic, and cultural contexts. Practical approaches to developing MCH programs shared via lecture/discussions, exercises, and small group work. Students acquire skills in baseline assessment, setting objectives, planning and evaluating interventions, and involving communities. Offered: jointly with HSERV 544; W.

**G H 545 Child Health in Developing Countries ([0-3], max. 3)** *Denno* Provides an understanding of the causes and functional effects of the most prominent child health problems. Examines trends and progress in global child health and explores potential explanations for these trends. Offered: W.

**G H 553 Reproductive Health, Population and Development (2)** *Povey* Provides students with an introduction to demographic conditions in Third World countries and an understanding of the consequences of rapid population growth on health and the environment. The context and effectiveness of family planning programs is a major focus. Offered: A.

**G H 555 Nutrition in Developing Countries (3)** *Gorstein* Introduces issues of nutrition in developing countries, with an emphasis on the control and prevention of under nutrition and micronutrient deficiencies. Offered: jointly with NUTR 555; Sp.

**G H 557 War and Mental Health (1)** *Kanter* Examines the impact of war on mental health in both military and civilian populations. Focuses on posttraumatic stress disorder, including assessment, treatment, epidemiology, and neurobiology. Addresses other psychiatric disorders, substance abuse, brain injury, and psychosocial effects. Credit no credit only. Offered: jointly with PBSC 515.

**G H 561 Tropical Medicine (1)** *Buckner, Pottinger* Intended for professional health science students interested in learning the pathophysiology, epidemiology, and clinical presentation of disease conditions that are more commonly seen in less-developed countries, resource-limited settings, or tropical climates, and how to diagnose, treat, and follow the resolution of these diseases with commonly limited resources. Credit/no credit only. Offered: jointly with MED 561; Sp.

**G H 562 AIDS: A Multidisciplinary Approach (2)** *Farquhar* Comprehensive overview of the public health, clinical, and laboratory aspects of human immunodeficiency virus (HIV) infection and disease. Topics include the pathogenesis, natural history, and management of HIV infections. The impact of HIV/AIDS on community and global health care and prospects for prevention and control. Credit/no credit only. Offered: jointly with EPI 530/MED 530; A.

**G H 563 HIV/STI Prevention Research Methods (3)** Focuses on current research and implementation of HIV/STI prevention (biomedical, behavioral, and public health interventions). Includes analyzing strength of research evidence to support candidate interviews, understanding key features of clinical trial design, and applying appropriate/feasible interventions for specific settings and populations. Offered: jointly with EPI 549; Sp.

**G H 565 Diseases of Public Health Importance and Strategies for their Control (3)** *Cangelosi* Public Health perspective of major disease of national and global importance. Discussion of origins, establishment, progression, and pathogenesis of diseases. Importance of immunological, intercellular and external factors, and strategies of disease prevention. Requires a grounding in cellular and molecular biology, microbiology, and immunology. Prerequisite: permission of instructor. Offered: Jointly with PABIO 550; Sp.

**G H 566 Biochemistry and Genetics of Pathogens and Their Hosts (4)** *Campbell* Provides a strong foundation in biochemistry, molecular biology, and genetics for students interested in disease. Principles will be illustrated through examples focusing on pathogens, and infectious and non-infectious disease. Prerequisite: undergraduate level course work in molecular biology or biochemistry or permission of instructor. Offered: Jointly with PABIO 551; A.

**G H 571 Essential of Clinical Care and Capacity Building in Low Income Countries (2)** *Pak-Gorsteni, Zunt* An interdisciplinary case-based forum of presentations by local and international lecturers and class discussions on realities of providing healthcare in low-income settings. Covers issues in prevention, socioeconomic underpinnings, management of medical and surgical conditions, and sustainable strategies to build capacity. Credit/no credit only. Offered: W.

**G H 572 Global Health Fieldwork: Preparation, Integration, Reentry (2)** *Roesel* Prepares students for community-based global health experiences, and provides them the opportunity to share, discuss, and reflect on these experiences after they return to the U.S. Explores the problems and promise of current global health strategies. Credit/no credit only. Prerequisite: participation in International Health Opportunities Program or similar experience. Offered: S.

**G H 590 Selected Topics in Global Health (1-4, max. 12)** Focuses on topics relevant to global health. Offered: AWSpS.

**G H 592 Program Seminars (1-6, max. 6)** Addresses specific educational needs of students within the Department of Global Health. Prerequisite: permission of instructor. Offered: AWSpS.

**G H 593 MPH Thesis Workshop (1)** *Hagopian* Introduces students to the issues involved in conceptualizing and completing thesis projects and the various international health organizations and faculty members available as resources to projects. Prerequisite: first-year Global Health MPH students. Offered: AWSpS.

**G H 595 Master's Practicum (1-6, max. 6)** Supervised practice experience providing an opportunity to apply knowledge and skills in a setting of relevance to global health. Credit/no credit only. Prerequisite: permission of faculty advisor. Offered: AWSpS.

**G H 600 Independent Study or Research (\*)** Prerequisite: permission of instructor. Offered: AWSpS.

**G H 700 Master's Thesis (\*)** Prerequisite: permission of instructor. Offered: AWSpS.

## University Conjoint

### COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at [www.uw.edu/students/crscat/](http://www.uw.edu/students/crscat/)

**UCONJ 100 Introduction to Health Professions (1)** *Garcia* Opportunities in health professions. Information on educational requirements, professional/patient interaction, licensing, registering for practice in profession, salaries, and career opportunities.

**UCONJ 290 Diversity Issues in the Health Care Environment (1-2, max. 2)** *I&S* Introduction to the complexity of the issues surrounding culture and health, the interrelatedness of ethnic and cultural characteristics and health care access, health and health care concerns of specific communities, traditional and alternative health care practices, and community-based promotion and disease prevention programs.

**UCONJ 410 Health in the Context of Italian Culture (5)** While in Italy, participants study relationship between current health issues, contemporary Italian history, socio-cultural environment, and European Union; health status of vulnerable populations; characteristics of culture and health

care system that promote healthy outcomes; differences between health behaviors and outcomes in Italy and US. Offered: A.

**UCONJ 411 Psychology of Aging (3)** *Kiyak* Focuses on developing the skills necessary for critically evaluating current psychological theories of aging, research findings in this area, and the implications of findings on the aging person. Special consideration given to the effects of socioeconomic, sex, and ethnic differences in the psychology of aging. Open to upper-division undergraduates and beginning graduate students interested in the field of gerontology.

**UCONJ 412 The Family in Later Life (3)** Focuses on issues affecting older persons and their families. Addresses demographic influences on families; roles, rules for and function of family members; inter-generational relationships; economics, political, and social policy affecting family life; and cultural variations and supportive resources for older persons and their families.

**UCONJ 413 Current Issues in Aging (3)** Describes the population trends at work in the United States and other developed nations with significant societal implications for care and management of elders. Evaluates selected public policies related to aging. Gives students proficiency in using resources related to aging on the Internet. Evaluates alternative long-term care models.

**UCONJ 420 Biological Safety Practices (1)** *Kenny* General introduction to appropriate laboratory procedures used for handling potentially hazardous biological agents. Particular focus on laboratory safety and appropriate protocols that should be employed by those engaged in infectious disease and recombinant DNA research. Credit/no credit only.

**UCONJ 422 Sexually Transmitted Diseases: An Overview (2)** *Gardner* Clinically oriented course designed to provide a knowledge base for upper division health science students to participate effectively in community outreach programs for the prevention of sexually-transmitted diseases. Offered cooperatively by the departments of Pharmacy and Medicine.

**UCONJ 440 Biological Aspects of Aging (3)** Introductory course on aspects of the biology of human aging and of functional changes associated with normal aging and with those illnesses that may be present in the elderly. Focus on the relationship between changes in physical function, environment, and quality of life. Includes theoretical perspective on aging as well as the aging process in specific physiological systems. Designed for upper-level undergraduate students with an interest in aging.

**UCONJ 442 Social and Cultural Aspects of Aging (3)** Involves faculty members from the various social science fields examining the range and variation of relationships among age-linked attitudes and cultural values related to aging; the social and economic factors that influence the elderly in contemporary society; the effects of ethnic and sex differences in sociocultural aging. Open to upper-division undergraduates and beginning graduate students interested in gerontology.

**UCONJ 443 Interdisciplinary Seminar on Aging (1-6, max. 15)** *Borgatta* Interdisciplinary examination of the contemporary theoretical literature on gerontology and long-term care. For upper-level undergraduate and graduate students with an interest in aging. Quarterly offerings available from the Institute on Aging.

**UCONJ 445 Bioterrorism Awareness for Health Professionals (1)** Provides content in bioterrorism awareness for students in the health professions. First in a two-course interdisciplinary sequence focusing on awareness level training designed to enhance recognition of an injury of illness potentially arising as a result of exposure to select chemical and biological agents. Credit/no credit.

**UCONJ 446 Bioterrorism Preparedness and Response for Health Professionals (2, max. 6)** Focuses on bioterrorism preparedness and response for health professionals. Includes planning, system, and policy issues with an emphasis on clinical relevance. Content compliments UCONJ 445 (not a prerequisite).

**UCONJ 450 Health Care in the Underserved Community (1)**

Recommended for students who are working with underserved communities. Students learn about the underserved population served by the community health projects on campus with a focus on inter-professional patient care.

**UCONJ 490 Social Sensitivity in Health Care (3) I&S** Multidisciplinary course for health professions students. Health professionals' roles in dealing with social, cultural, and physical barriers to health care of low-income groups and ethnic people of color. Personal involvement through field experiences and faculty drawn from affected communities as well as health sciences, social work schools. Credit/no credit only.

**UCONJ 497 Health Care in a Rural Community (3)** Critical analysis built upon concepts relative to interdisciplinary health-care delivery in a rural community. Students develop an organizational model for rural health care and study innovative ways of mobilizing community resources and support for a comprehensive rural health-care system. Pharmacy students, nurses, and other health professionals study application of theory in an appropriate clinical setting within the conceptual framework of each student's professional field.

**UCONJ 500 Seminar in Interprofessional Collaboration ([1-3]-, max. 7)** Interdisciplinary teams composed of students and community members placed in diverse urban settings to address an identified community need by developing and implementing collaborative, community-based projects. Seminars emphasize interprofessional collaborative practice, intrapersonal understanding, interpersonal group process skills, organizational savvy, community awareness, and sociocultural sensitivity. Graduate School of Public Affairs. Offered: AWP.

**UCONJ 501 Interdisciplinary Rural Health Care Issues (1-3, max. 6)** Emphasizes interdisciplinary solutions to rural health challenges. Addresses rural core competencies for advanced practice, leadership, and practice inquiry. Competencies include definitions, funding, delivery models, demographics, outcomes, disparities, access, farm economics, nutrition, environment, and workforce issues. Reviews population-based and clinical case studies in rural health. Offered: S.

**UCONJ 503 International Health (1)** Wade Weekly seminar introduces students to issues and opportunities of participating in health care systems in other countries. Guest speakers bring many perspectives of international health care experiences. Class discussions help prepare students for international placements.

**UCONJ 504 Advanced Interdisciplinary Case Studies in Global Health (3)** Gorstein, Kurth, Shell-Duncan Uses actual multidisciplinary case studies to 1) analyze quantitative parameters of diseases, 2) contrast the descriptive and analytic approaches of health sciences, anthropology and nutritional sciences, 3) integrate diverse disciplinary perspectives into cohesive information, 4) organize class presentations, and 5) apply critical thinking in approaching complex health issues. Offered: Sp.

**UCONJ 511 Issues in Home Health Care Delivery (3)** Service delivery issues relevant to provision of health care services across the life span in the home setting. Home health care as an important component in health care system. Individual and multidisciplinary practice of health care disciplines. Emphasis on research literature. Prerequisite: graduate student standing, upper division with permission of instructor.

**UCONJ 513 Dynamics of Patient Management: Diabetes Mellitus (2)** Analysis of advanced knowledge related to interdisciplinary management of diabetes. Commonalities and differences in provider approaches, recent research and its effect on management practices, collaborative communication, knowledge application. Brief interactive presentations, decision-making opportunities, discussion. Credit/no credit only. Prerequisite: graduate standing in pharmacy, dietetics, nursing; third- or fourth-year medical student; or permission of instructor.

**UCONJ 515 Promoting Health Behavior for Individuals and Families (2/4, max. 4)** Brandt, Jordan, Kieckhefer, Lewis,

Solchany, Spieker Practice-focused, evidence-based, theory-driven intervention strategies to promote healing and health behavior at selected points from birth to death. Relevant for clinicians from diverse health settings. Emphasis on clinical skill development including decision-making and outcome management applicable for individuals and families. Prerequisite: permission of instructor. Offered: Sp.

**UCONJ 520 Molecular Biophysics Research Seminar (1)** Parson A series of research seminars for faculty and students involved with the molecular biophysics program. Credit/no credit only.

**UCONJ 524 Developmental Neurobiology (3)** Raible, Reh, Roelink, Rubel Survey of contemporary issues in developmental neurobiology, including neurogenesis and differentiation; electrophysiological, morphological, and neurochemical regulation of cellular phenotype; neuronal pathways and synaptic contacts; cellular and synaptic plasticity; and behavior. Examination of molecular biological, morphological, electrophysiological, and behavioral approaches. Prerequisite: background in neurophysiology, neuroanatomy, molecular neurobiology. Offered: Sp.

**UCONJ 525 Overview of Faculty Research in Neurobiology (1)** Reviews research topics currently being studied in neurobiology. Student preparation consists of reading pertinent articles published on each topic. Credit/no credit only. Prerequisite: first-year graduate student in neurobiology.

**UCONJ 530 Issues in Indian Health (3)** Survey of historical and contemporary issues in Indian Health. Covers Indian contributions to health, traditional Indian Medicine, current disease epidemiology, development of Federal Indian Health policy, the Indian Health Service, tribal health programs, and consequences of major legislation on Indian Health. Prerequisite: current health science student or permission of instructor.

**UCONJ 531 Introduction to Mind Body Medicine-An Experiential Elective (2)** Sessions contain a didactic component followed by an experiential component and cover a variety of self-care techniques including meditation, exercise, and nutrition. The goals are to promote personal well being, a healthy lifestyle, reduce burnout, and reduce academic difficulties. Credit/no credit only.

**UCONJ 540 Environmental Change and Human Health: The Role of the Health Professional (1/2, max. 2)** Oberle, Rosenblatt Explores the effect of environmental deterioration on human health, and presents tools to address the problem. Offered: Sp.

**UCONJ 548 Current Issues in First Nations Behavioral Health: Mental Health and Substance Abuse (3)** Historical and intergenerational antecedents of tribal psychiatric and substance abuse disorders. Oppression, economic circumstances, and family functioning as shaping mechanisms for attachment. Implications of insufficient attachment for neuro-development and developmental psychopathology. Traditional vs. mental health and substance abuse assessment and treatment. Self as provider to tribal clients, communities, systems.

**UCONJ 555 Principles of STD/HIV Research (3)** Provides MD and PhD fellows and graduate students with a comprehensive overview of the current state of knowledge in specific areas of STD/HIV research, including study design, laboratory methods, production of instruments for data collection, and methods for data analysis. Credit/no credit only.

**UCONJ 584 Plant Tumors (1, max. 9)** Gordon Discussion of the literature of plant tumors and current research work being carried on in this area at the University. Offered cooperatively by the departments of Biochemistry, Botany, and Microbiology and Immunology. Credit/no credit only. Prerequisite: offered only to persons actively pursuing work in this area.

**UCONJ 599 Selected Readings in Interdisciplinary Clinical Research (1, max. 6)** Marshall, Mitchell Analysis and synthesis of selected readings and works in progress related to multidisciplinary and interdisciplinary clinical research. Credit/no credit only. Prerequisite: UCONJ 517; permission of instructor. Offered: AWP.

# School of Law

## DEPARTMENT OVERVIEW

### Dean

Kellye Y. Testy

### Associate Deans

Steve Calandrillo

Penny A. Hazelton

Mary Hotchkiss

Peter Nicolas

### Assistant Deans

Stephanie Cox

Naomi Sanchez

### Interim Assistant Dean

Stephanie Cox

Established in 1889, the School of Law is a member of the Association of American Law Schools and is on the American Bar Association's list of approved law schools. Graduates of the School are prepared to practice law anywhere in the United States. Additional information about the School is contained in the current *School of Law* catalog.

## FACILITIES AND SERVICES

The School of Law, housed in William Gates Hall since 2003, is equipped with classroom, clinical, library, lounge, and office facilities. Eleven classrooms are equipped for multi-media presentations, wireless internet connection, and assistive-listening systems.

The Marian Gould Gallagher Law Library, one of the finest in the country, is among the largest university law collections on the west coast. The collection currently contains more than 450,000 bound volumes and volume equivalents of microform. In addition to the extensive main collection, it houses important materials that support the Asian, marine, sustainable international development, and tax law graduate programs and serves as a federal depository for selected United States government documents. The library is equipped with the latest in microreaders and printers in order to make full use of the growing microform collection. The library is a subscriber to LEXIS, WESTLAW, the Western Library Network, and other research databases.

## JURIS DOCTOR PROGRAM

The Juris Doctor (JD) degree is conferred upon a student who has met the residence requirements, consisting of nine quarters of at least 12 credits each, and has earned at least 135 credits satisfactory to the School of Law.

As with most law schools in the United States, the first-year courses are required and are designed to introduce students to basic legal skills, foundational subject matter, and the variety of public and private processes with which the profession is concerned. Those courses deal with contracts, torts, property, civil procedure, criminal law, constitutional law, and basic legal skills.

Except for a required course in professional responsibility, the public service requirement, and an advanced writing project requirement, courses in the second and third years are elective. Therefore, a student may choose a program designed to suit his or her interests and needs. JD candidates are required to perform 60 hours of public-service legal work during the second or third year.

### Admission

New students may enter the School of Law only in autumn quarter. For first-year students, instruction begins earlier than for upper-class students. Students must have earned a baccalaureate degree from an accredited college or university prior to commencing the study of law.

All applicants are required to take the Law School Admission Test (LSAT) and to register for the Law School Data Assembly Service (LSDAS). Registration packets and test information are available at most law schools and from Law School Admission Council, Box 2000, Newtown, PA 18940-0998. [www.lsac.org](http://www.lsac.org)

No specific prelaw course is required or recommended, and the School of Law subscribes to the remarks set forth on prelaw preparation in *The Official Guide to U.S. Law Schools (2000 Edition)*. Applications for admission to the next entering class must be postmarked no later than January 15. To be assured of consideration, an applicant must have complete credentials, including the LSDAS report, filed in the School of Law by February 1. An application fee (at this writing, \$50) also is required.

### Transfer Applicants

Students who have completed at least one year at a member school of the Association of American Law Schools may apply for admission with advanced standing, with credit for no more than one year of such work. A student who has completed or expects to complete at least two years of work at a member school of the Association of American Law Schools and who expects to graduate from that member school may apply to this school for admission as a non-degree candidate.

Applicants should request application forms and instructions from the admissions office in time to permit filing of all application materials by July 10.

Applications are considered only if vacancies exist. Selection is based on evidence either (1) that the candidate can produce above-average work at this law school, or (2) that the candidate will contribute to the diversity of the student body.

Students working on law degrees to be conferred by the University have priority over non-degree candidates in the selection of courses. This policy is in accordance with the general University policy on the registration of nonmatriculated students.

### Financial Aid

Students in need of financial assistance may receive University aid, School of Law aid, federal loans, or aid from all these sources. To be considered for aid, applicants must submit the Free Application for Federal Student Aid (FAFSA) by February 28. FAFSAs are available in December at most college financial aid offices, or may be obtained by writing or calling the Office of Student Financial Aid, 105 Schmitz Hall, Box 355880, University of Washington, Seattle, WA 98195, 206-543-6101, [offa@uw.edu](mailto:offa@uw.edu). Applicants for admission should not wait until they have been admitted before applying for financial aid.

School of Law grants are awarded primarily on the basis of financial need, although scholarship or other factors may be considered for certain awards. Inquiries concerning School of Law aid should be addressed to Financial Aid Coordinator, School of Law, William Gates Hall, Box 353020, University of Washington, Seattle, WA 98195-3020; [uwla-waid@uw.edu](mailto:uwla-waid@uw.edu).

### Inquiries

A more detailed statement on admission policy and application procedure is available from the School of Law. Requests for application materials and the University law school bulletin should be addressed to Law School Admissions, William Gates Hall, Box 353020, University of

Washington, Seattle, WA 98195-4617; [admissions@law.washington.edu](mailto:admissions@law.washington.edu); 206-543-4078.

## GRADUATE PROGRAM

### Graduate Program Coordinator

William Gates Hall, Box 353020

206-543-4937

[gradlaw@uw.edu](mailto:gradlaw@uw.edu)

In addition to the professional law program leading to the Juris Doctor degree, the law faculty offers graduate programs leading to the Master of Laws (LL.M.) in Asian and Comparative Law, the law of sustainable international development, intellectual property law and policy, and taxation. The School of Law offers the Doctor of Philosophy (PhD) degree in Asian and Comparative Law only.

## Master of Laws

### Admission Requirements

- Minimum GPA of 3.00 or B in the most recent two years of study.
- U.S. applicants must have completed their first degree in law (JD or equivalent) at a school accredited by the American Bar Association.
- International students must have a first degree in law (LL.B., B.Law) or equivalent and a minimum TOEFL score of 580 or 237 (TOEFLC).

### Degree Requirements, Asian and Comparative Law

36 credits, as follows:

- *Required courses:* LAW B 551 (6), LAW 600 (6), LAW B 550 (3-4); two courses in Asian and comparative law
- *Elective courses:* Additional courses, chosen in consultation with adviser, to bring total credits to 36.

### Degree Requirements, Intellectual Property Law and Policy

40 credits, to include:

- *Required core courses:* LAW P 501 (8), LAW P 510 (6)
- *Additional requirement for students not trained in the common law system:* LAW P 503 (3)
- At least 16 additional credits drawn from a list of approved elective courses.
- Research project and thesis

### Degree Requirements, Law of Sustainable International Development

40 credits, as follows:

- 15 credits in Law School classes. The remaining 25 credits may be earned in any other departments of the University. Sustainable International Development students are required to take courses in at least three departments other than the Law School.
- *Writing and Research Requirement:* Completion of a research paper is required and is generally satisfied by LAW B 578 (6).
- LAW A 545 (4)

### Degree Requirements, Taxation

36 credits, as follows:

- *Required courses:* LAW T 501 (3), LAW T 502 (3), LAW T 503 (2/3), LAW T 504 (3), LAW T 510 (3), LAW T 511 (1-4)
- *Core electives:* Two of the following courses: LAW T 515 (3), LAW T 516 (3), LAW T 521 (3), LAW T 530 (3)
- *Electives:* Additional courses, chosen in consultation with adviser, to reach 36 credits for degree

## Doctor of Philosophy

### Admission Requirements

Admission to the PhD program is limited to exceptional scholar-lawyers who are fluent in English and in another language. Prospective PhD students must normally complete the LL.M. program before being accepted as PhD students. The School does, however, welcome applications from candidates with equivalent academic standing and a demonstrated capacity for advanced research and writing.

### Degree Requirements

90 credits, to include:

- An LL.M. degree is counted toward the credit necessary for the PhD program.
- Doctoral thesis seminar (4 credits)
- Other coursework (26–29 credits): Coursework varies according to student's research interest areas and is determined in consultation with supervising committee
- Doctoral dissertation (27–30 credits)

### Financial Aid

Scholarship funds for graduate students in law are quite limited. Inquiries should be made to Law School Graduate Admissions, William Gates Hall, Box 353020, University of Washington, Seattle, WA 98195, U.S.A.; [gradlaw@uw.edu](mailto:gradlaw@uw.edu); 206-543-4937.

### Inquiries

Requests for applications and program brochures for all School of Law LL.M. programs except the LL.M. in taxation, as well as information regarding application procedures, should be addressed to Law School Graduate Admissions, William Gates Hall, Box 353020, University of Washington, Seattle, WA 98195, U.S.A.; [gradlaw@uw.edu](mailto:gradlaw@uw.edu).

Requests for applications and program brochures for the LL.M. in taxation should be addressed to Law School Graduate Tax Admissions, William Gates Hall, Box 353020, University of Washington, Seattle, WA 98195; [gradlaw@uw.edu](mailto:gradlaw@uw.edu).

## COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at [www.uw.edu/students/crscat/](http://www.uw.edu/students/crscat/)

### Law

**LAW 300 Introduction to Law (3–6, max. 5) I&S** Understanding the legal system, its functions in the social-economic order, legal reasoning, and the world of legal education and the legal profession. Open to nonlaw students only.

**LAW 410 Problems in Professional Responsibility (4) I&S**

**LAW 415 Criminal Justice (3) I&S** Examines pre-trial rights of persons suspected or accused of crime, primarily those rights covered by the Fourth, Fifth, Sixth, and Fourteenth Amendments of the U.S. Constitution.

**LAW 416 International Contracting: Negotiation and Drafting (3) I&S** Skills course designed to introduce process and problems of negotiating and drafting international agreements. Client interviewing and counseling and negotiation and drafting of a contract between parties in the United States and Japan. Credit/no credit only. Open to nonlaw students only.

**LAW 422 Copyright (3) I&S**

**LAW 429 Public Land Law (3) I&S**

**LAW 440 Legal Issues of Internet Law (3) I&S** Introduces the basic legal issues raised by networked digital technologies, such as the Internet. Covers jurisdiction, speech, privacy/access, propriety rights (copyrights, domain names), emerging

law, leading policy debates, as well as fundamental Internet technical skills. Offered: S.

**LAW 442 Land Law and the Urban Environment (3) I&S** Examination of the major legal tools available to shape the urban environment by controlling the use of land. Considers zoning, subdivision controls, urban renewal, private land-use restrictions, and the rules of nuisance law. Credit/no credit only. Open to law and nonlaw students.

**LAW 443 The Legal Process I (3/5) I&S** The system of law and its functions rather than substantive law pertaining to any particular subject or discipline. Open only to nonlaw students. Credit/no credit only.

**LAW 444 Constitution and American Public Education (3–6, max. 6) I&S** Examines the relationships between the Constitution of the United States and the American system of public education, excluding higher education, in areas of constitutional freedom and legal controls, racial desegregation, and equal educational opportunity, including equal financing of the public schools. Credit/no credit only. Offered: jointly with EDLPS 444.

**LAW 445 Major Issues in American Constitutional Law (3) I&S** Significant themes in American constitutional law. Doctrine of judicial review, application of the Bill of Rights to the states, Supreme Court's recognition of fundamental rights, the Equal Protection clause, the Religion clauses, freedom of speech, and Presidential powers. Open to law and nonlaw students.

**LAW 447 Critical Perspectives in Law (3) I&S** Examination of modern critical legal thought and critics views regarding proposed alternative forms of social ordering.

**LAW 467 American Law and the American Indian (3) I&S** Relationship between Indians and the United States from 1789 to the present. Significant constitutional, legislative, and judicial actions. Legal events explored within their political, military, social, and cultural contexts. Comparisons with other minority-group experiences. Offered: jointly with HSTAA 416.

**LAW 476 International Economic Relations and Trade Policy (3) I&S** Consideration of international control of national trade policies and permissible transnational reach of national trade or other regulation The General Agreement on Tariffs and Trade (GATT) and the international monetary system examined from legal and economic perspective. Examination and comparison of prescriptive jurisdiction to public international law.

**LAW 477 Law Literature and Film (2–4, max. 4) I&S/VLPA** An examination of literary and cinematic portrayals of and issues important to law, lawyers, and the legal system. Considers both portrayals purporting to depict the legal system as well as works envisioning lawyers and the legal system in a "better world."

**LAW 481 Land, American Culture and the Law: Perspectives on the Use and Ownership of the Natural Environment (1–6, max. 6) I&S**

**LAW 489 Law and Aging (3) I&S** Survey of principal areas of law of special concern to aging population, considering health care and health care decision-making, public and private income maintenance programs, taxation, guardianships, conservatorships and other methods of protecting the property of the elderly, counseling, and professional responsibility.

**LAW 600 Independent Study or Research (\*)**

**LAW 800 Doctoral Dissertation (\*)**

### Law A

**LAW A 501 Contracts ([2–8]-, max. 8)**

**LAW A 502 Civil Procedure I ([2–6]-, max. 6)**

**LAW A 503 Property I ([2–8]-, max. 8)**

**LAW A 504 Torts ([2–8]-, max. 8)**

**LAW A 505 Criminal Law ([2–5]-, max. 5)**

**LAW A 506 Legal Analysis, Research, and Writing ([1–6]-, max. 6)**

**LAW A 507 Constitutional Law I: Constitutional Structures of Government ([3/6]-, max. 6)**

**LAW A 508 Comparative and International Law Survey (3)** *Taylor, Walsh, Winn* Survey of basic principles of public international law; comparative and historical overview of various legal traditions (civil law, common law, Islamic law, and mixed systems). Examines sources, subjects, and challenges of international law, and methodology of comparing foreign legal systems, providing perspective on U.S. legal system and rules. Offered: Sp.

**LAW A 509 Administrative Law (3–4, max. 4)**

**LAW A 510 Sales (3–4) LAW A 511 Payment Systems (3/4)**

**LAW A 512 Secured Transactions (3–4)**

**LAW A 513 Creditor-Debtor Law ([2–3]-)**

**LAW A 514 Publicly Held Corporations (3) LAW A 515 Business Organizations (5)**

**LAW A 516 Legal Accounting (3)**

**LAW A 517 Securities Regulations (4)** Examines the federal regulations of the offer and sale of securities and the public offering process under the Securities Act of 1933; exemptions from federal registration; the reporting obligations of public companies under the Securities Exchange Act of 1934, and the examination of the impact of the Sarbanes-Oxley Act of 2002.

**LAW A 518 Restitution (3)**

**LAW A 519 Transmission of Wealth (5) LAW A 520 Property II ([2–8]-, max. 8)**

**LAW A 521 Community Property (2/3)**

**LAW A 522 Copyright (3/4) LAW A 523 Real Estate Transactions (3/4)**

**LAW A 524 Private Land Development (3)**

**LAW A 525 Water Law (4)**

**LAW A 526 Copyrights and Trademarks (5)**

**LAW A 527 Environmental Law: Pollution Control (4)**

**LAW A 529 Public Land Law (3)**

**LAW A 530 Basic Income Tax ([2–6]-, max. 6)**

**LAW A 531 Death and Gift Taxation (2–5, max. 5)**

**LAW A 532 Taxation of Business Entities (5)**

**LAW A 534 Mergers and Acquisitions (4)** Deals with tactics, strategy, and state and federal law relating to transactions by means of which corporations and other forms of business entity combine. Emphasizes corporate law with some treatment of federal tax and securities law issues. Prerequisite: either LAW A 515 or LAW A 567.

**LAW A 535 Trademarks and Unfair Competition (2)**

**LAW A 537 Taxation of Corporations, Partnerships, and Limited Liability Companies (4)**

**LAW A 538 Estate Planning Workshop (3–4)**

**LAW A 540 Land Use Planning Seminar (3)**

**LAW A 541 Transnational Tax (5)**

**LAW A 542 Land Law and the Urban Environment (3)**

**LAW A 543 Business Reorganization Under the Bankruptcy Code (4)**

**LAW A 545 International Environmental Law (4)**

**LAW A 546 Patents ([2–4]-, max. 4)**

**LAW A 547 Critical Perspectives in Law (3-).** Involves close reading of texts in sociological and critical traditions of thinking about law, including work of such thinkers as Marx, Weber, Durkheim, Berger, Benjamin, Foucault, and Derrida; also work of thinkers who have written from a perspective informed by theories or experiences of politics, gender, race, and sexuality.

**LAW A 548 Civil Rights ([2–6]-, max. 6)**

**LAW A 549 Advanced Legal Research (4)****LAW A 550 Constitutional Law ([2-8]-, max. 8)****LAW A 551 Constitution and American Public Education (3-6)****LAW A 552 Antitrust Law and Policy ([2-5]-, max. 5)**

**LAW A 553 Feminist Jurisprudence (4)** Explores the intersections of law and sex, gender, and sexuality with the aid of various theoretical lenses, prominently feminist legal theory. Focuses on those areas of law where notions of sex, gender, and sexuality seem conflated and confused.

**LAW A 554 Labor Relations and the Law ([1-5]-, max. 5)****LAW A 556 Employment Discrimination ([2-4]-, max. 4)**

**LAW A 558 National Security Law Seminar ([2-6]-, max. 6)** *Allen* Three-quarter seminar that provides an opportunity for study and research in selected legal issues relating to national security law and its processes and institutions. Prerequisite: LAW A 507; recommended: LAW A 574; LAW A 557, either of which may be taken concurrently. Offered: AWSp.

**LAW A 560 Employment Issues (2/3)** Examination of issues under selected employee protection laws. Analysis of the Fair Labor Standards Act, Workers' Compensation, and Social Security Act (related to retirement, disability, and supplemental income benefits). Includes assessment of public assistance issues for low-wage workers. Prerequisite: LAW A 509, LAW A 562, or permission of instructor.

**LAW A 561 Law and Economics (3-4, max. 4)** Offered: jointly with PB AF 519.

**LAW A 562 Employment Law (3-4)** Examines the law governing the employment relationship, including the establishment and termination of employment. Topics include employee duties, prohibited employment practices, regulation of wages, hours, and benefits of employment, workers' compensation and occupational safety and health.

**LAW A 563 Local Government Law (3)** **LAW A 564 American Legal History (1-4, max. 4)** Reviews the American legal history from colonial times to the civil rights era. Readings cover early constitutionalism, the republican revolution, the antebellum movement, the end of slavery, the regulatory state, and rights of women and minority groups.

**LAW A 565 American Indian Law (4)****LAW A 566 Theories of Justice ([2-4]-, max. 4)**

**LAW A 567 Closely Held Business Organizations (4)** Examines elements of various unincorporated business forms and closely held corporations. Reviews relevant state statutes and case law related to each form relevant to advising small business clients on the choice of business form utilized in their ventures. Not open to students who have taken Business Organizations. Offered: A.

**LAW A 571 International Organizations Seminar (3)** Provides a critical introduction to some of the issues that are important to understanding how international organizations function today. Focuses on the role of international organizations in the modern forms of international law-making, regulation, and global governance.

**LAW A 574 International Law (2-4)****LAW A 575 Legal History Seminar (3)**

**LAW A 576 International Criminal Law (3)** *Allen* Examines responses by states and international organizations to international and transnational crimes. Covers substantive and procedural international criminal law, criminal responsibility, defenses and immunities, and the prosecution and punishment of international criminals in both national and in international tribunals. Prerequisite: LAW A 505; recommended: LAW A 574. Offered: W.

**LAW A 577 Immigration Law (4)****LAW A 578 International Business Transactions ([1-4]-, max. 4)**

**LAW A 579 Child Advocacy Seminar (2-4, max. 4)** *Kelly* Includes child abuse and neglect, parental rights termination,

paternity, and an overview of other practice areas as they intersect with issues of child abuse and neglect. Focuses on Washington law and practice, covering applicable substantive and procedural law, local practice rules, and professional responsibility. Offered: A.

**LAW A 580 Family Law (3-5, max. 5)**

**LAW A 581 Washington Constitutional Law Seminar ([1-4]-, max. 4)** Studies the history, structure, content, and role of state constitutions generally, and the development of Washington's Constitution in particular. Examines the important distinctions between the federal constitution and state document, and the interplay between them. Covers state declarations of rights and the substantive sections of state constitutions that relate to the structure, role, and constraints. Offered: A.

**LAW A 582 Consumer Bankruptcy (3-4)** Introduction to business and consumer bankruptcy law based on the bankruptcy code and recent cases. Covers transactions and litigation aspects of bankruptcy law and practice. Considers the impact of bankruptcy law on areas covered in other courses such as business organizations, commercial transactions, environmental law, family law, torts, and intellectual property.

**LAW A 583 Insurance Law (4)**

**LAW A 584 American Public School Law (3)** Constitutional, statutory, and common law principles common to all public education systems within the United States. Applicable law are a variety of substantive legal areas such as torts, property, contracts, administrative law, and fundamental rights. Offered: Sp.

**LAW A 585 Admiralty (3-5)****LAW A 588 Trade Security and Copyright Protection of Intellectual Property in High Tech Industry (3)****LAW A 589 Elder Law (4)****LAW A 590 Constitutional Law: Equal Protection, Fundamental Rights, and Due Process of Law (4/5)****LAW A 591 Constitutional Law: Freedom of Expression (4/5)**

**LAW A 592 Constitutional Law II ([2-8]-, max. 8)** Focuses on civil liberties. Provides a detailed examination of constitutional rights of equal protection, substantive due process, procedural due process, as well as property rights under the Taking Clause and Contract Clause. Prerequisite: LAW A 507.

**LAW A 595 Jurisprudence and Legal Philosophy ([2-4]-, max. 4)** Surveys classic jurisprudential questions in the study of the nature, norms, and justifications of legal systems. Focuses on theories of adjudication, and cover the major twentieth-and twenty-first century schools of jurisprudential thought, especially American Legal Realism, Natural Law, Legal Positivism, and Critical Legal Theory.

**LAW A 597 Intensive Legal Writing Workshop (2-3)** Focuses on how the rhetorical situation of legal writing influences choices about grammar, syntax, sentence structure, and paragraph structure. Students learn to use structures that best serve law-trained readers' needs for clear, concise, cohesive writing, and practice critical reading skills and techniques for self- and peer-editings.

**LAW A 598 Legal Research I (3)** Introduction to legal bibliography and law librarianship. Basic primary and secondary legal bibliographic tools. Integration of manual and computer resources for effective legal research. Emphasis on state materials. Prerequisite: law librarianship major or LIS 503 and LIS 530 which may be taken concurrently. Offered: jointly with LIS 591.

**LAW A 599 Legal Research II (3/4)** Legal tools that answer more complex legal research problems, such as federal legislative histories, sources of administrative law, specialized subject research. Federal emphasis. Builds on skills and techniques taught in LIS 591/LAW A 598. Extensive work with online resources. Prerequisite: LIS 591 or permission of instructor. Offered: jointly with LIS 592.

**Law B****LAW B 500 Civil Procedure II (3)****LAW B 503 Evidence ([2-6]-, max. 6)****LAW B 506 Conflicts of Laws ([2-6]-, max. 6)****LAW B 507 Federal Courts and the Federal System (3/4)****LAW B 510 Problems of Professional Responsibility (2-4, max. 4)****LAW B 511 Seminar on Problems in International Environmental Law ([1-4]-, max. 4)****LAW B 512 Legislation and the Formulation of Public Policy (3)****LAW B 513 Evidence Seminar ([2-4]-, max. 4)****LAW B 514 Street LawClinic ([1-8]-, max. 8)****LAW B 515 Criminal Procedure: Investigation (5)****LAW B 516 International Contracting ([2-4]-, max. 4)** Credit/no credit only.**LAW B 517 Juvenile Justice Seminar ([1-6]-, max. 6)****LAW B 518 Appellate Advocacy ([1-3]-, max. 3)** Credit/no credit only.**LAW B 519 Pre-Trial Practice (3)****LAW B 520 Trial Advocacy ([2-6]-, max. 6)** Credit/no credit only.

**LAW B 521 Trial Advocacy II (3-, max. 6)** *Howard* Addressed more advanced trial advocacy issues than are covered in LAW B 520. Includes a civil or criminal track of study and work with trial lawyers who specialize in that area of practice on more sophisticated issues of strategy, evidence, creative use of exhibits at trial, technology in the courtroom, and ethics. Prerequisite: LAW B 520; permission of the Director of the Trial Advocacy Program. Offered: WSp.

**LAW B 522 Mediation of Disputes (3)** Credit/no credit only.**LAW B 523 Negotiation (2-4, max. 4)** Credit/no credit only.

**LAW B 524 Alternative Dispute Resolution Seminar (2-, max. 4)** Provides opportunities for study, research, and writing related to the legal, policy, and ethical issues in the emerging field of alternative dispute resolution (ADR). Research papers satisfy the advanced writing requirement for JD students. Prerequisite: permission of instructor if LAW B 525 already completed.

**LAW B 525 Alternative Dispute Resolution (3)** Overview of alternative dispute resolution including negotiation, mediation, arbitration, med-arb, early neutral evaluation, mini-trials, summary jury trials, and E-ADR. Critical evaluation of each process occurs through a combination of assigned readings, roleplay exercises, videotapes, guest presentations, and student-designed classes.

**LAW B 526 Mediation Clinic ([1-10]-, max. 10)** Credit/no credit only.**LAW B 527 Criminal Law Clinic (8)** Credit/no credit only.**LAW B 528 Unemployment Compensation Clinic ([2-8]-, max. 8)** Credit/no credit only.**LAW B 529 Advanced Environmental Law and Practice (1-4, max. 4)****LAW B 530 Judicial Externship (1-15, max. 15)****LAW B 531 Immigration Law Clinic ([1-8]-, max. 8)** Credit/no credit only.

**LAW B 532 Advanced Clinic (1-4, max. 4)** Advanced clinical training under the supervision of a law school faculty member in order to complete a project or case begun by the student during a clinic, or to pursue in more depth the subject of the clinic. Credit/no credit only Prerequisite: Clinical basis for continued work.

**LAW B 533 Interviewing and Counseling for Lawyers (2/3)** Credit/no credit only.**LAW B 534 Affordable Housing Development Clinic ([1-12]-, max. 12)**

**LAW B 535 Legislative Externship (1–15, max. 15)** Credit/no credit only.

**LAW B 536 Drafting Basic Business Documents ([1–3]-, max. 3)**

**LAW B 537 Refugee Advocacy Clinic ([1–12]-, max. 12)** Credit/no credit only.

**LAW B 538 Agency Externships (1–15, max. 15)** Credit/no credit only.

**LAW B 539 Public Interest Law Externship ([1–15]-, max. 15)** Credit/no credit only.

**LAW B 540 Japanese Law (4)** Basic institutions and processes of the Japanese legal system. Historical development and traditional role of law, reception of Western law, and cultural and structural factors that influence the function of law and legal institutions. Offered: jointly with SISEA 540.

**LAW B 541 Chinese Law (4)** Introduction to the institutions and processes of the Chinese legal system. Focuses on the contemporary system and its role in relation to political, economic and social developments. Examines legal aspects governing foreign trade and investment in China. Offered: jointly with SISEA 543.

**LAW B 543 Intellectual Property Law in East Asia (3)**

**LAW B 544 Transnational Litigation: United States-Japan ([2–4]-, max. 4)**

**LAW B 545 Survey of American Law and Practice (6)** Provides an integrated introduction to the U. S. legal system, legal analysis, legal research, and legal writing. Introduces tools and techniques for basic legal research in U. S. materials. Credit/no credit only.

**LAW B 546 Comparative Corporate Relations ([2–4]-, max. 4)**

**LAW B 549 Government Regulation of Business in Japan (3)** Offered: jointly with SISEA 549.

**LAW B 550 Legal Analysis and Research for Students Not Trained in the Common-Law System ([1–4]-, max. 4)**

**LAW B 551 Comparative Law Seminar ([2–6]-, max. 6)**

**LAW B 552 Tutorial in Comparative Law ([1–4]-, max. 4)**

**LAW B 553 Chinese Legal Tradition (3)** Offered: jointly with SISEA 553.

**LAW B 555 Roman Law (3)**

**LAW B 556 Islamic Law (3)** Selected topics in Islamic law that highlight major aspects of Islamic civilization. Offered: jointly with NEAR E 524.

**LAW B 557 LAW B 557 (4–6, max. 6)** Through class instruction and individual tutoring, students select research topics, submit periodic writing assignments, and make formal presentations, culminating in the submission of a major research paper.

**LAW B 558 Doctoral Thesis Seminar (2)** Students draft thesis abstracts, tables of contents, preliminary chapters, and presents arguments orally to identify core theories and applied studies to incorporate in their work. Read a selection of published work and indicative articles drawn from the list of relevant sources for individual thesis-in-development.

**LAW B 559 Comparative Law: Europe, Latin America, and East Asia (4)**

**LAW B 560 Criminal Justice Externship (1–15, max. 15)** Credit/no credit only.

**LAW B 561 International Law of the Sea (3)** Offered: jointly with SMA 506.

**LAW B 562 Quantitative Methods (4)** Covers logic, applications, and limits of quantitative reasoning in the law. Includes mathematics from areas such as statistics, game theory, and social-choice theory, together with legal examples from areas such as discrimination, torts, and CLS to help (re)consider issues such as proof, deterrence, and identity politics.

**LAW B 563 Marine Law and Policy Seminar (2–4, max. 6)** Study and research in selected legal problems relating to

ocean and coastal law, marine trade and transportation, marine resources, and protection of the marine environment. Students prepare and present a research paper and critique papers prepared by other students. Prerequisite: LAW B 561, LAW B 565.

**LAW B 565 U.S. Coastal and Ocean Law (3–5, max. 5)** *Allen* Study of the legal framework in the United States controlling allocation and use of coastal and marine resources. Topics include coastal zone management, fisheries management, protection of marine mammals and endangered species, marine pollution, offshore oil and gas development, and marine transportation. Offered: jointly with SMA 515.

**LAW B 567 General Externship Perspectives Seminar (2)** Credit/no credit only.

**LAW B 573 Supreme Court Decision Making (2–4, max. 4)** Examines Supreme Court decision making from both a theoretical and practical perspective. Surveys representative cases on the Court's current docket. Extensive preparation required of participants, who play the roles of lawyers, justices, and commentators. Emphasis on developing appellate advocacy skills.

**LAW B 576 Selected Problems on Environmental Protection Seminar ([2–6]-, max. 6)**

**LAW B 577 Law, Literature and Film ([2–4]-, max. 4)** An examination of literary and cinematic portrayals of, and issues important to law, lawyers, and the legal system. Considers both portrayals purporting to depict the legal system as well as works envisioning lawyers and the legal system in a "better world."

**LAW B 578 Seminar on Legal Problems of Economic Development ([1–6]-, max. 6)**

**LAW B 580 Externship Tutorial (2)** Credit/no credit only.

**LAW B 581 Land, American Culture, and the Law: Perspectives on the Use and Ownership of the Natural Environment ([1–6]-, max. 6)**

**LAW B 584 Indian Law Seminar ([2–6]-, max. 6)** Covers advanced topics in Indian Law. Prerequisite: LAW A 565 or permission of instructor.

**LAW B 589 Intellectual Property Law Seminar ([1–4]-, max. 4)**

**LAW B 590 The United States Constitution: Past, Present, and Future (2)**

**LAW B 591 Law and Society in Asia ([2–6]-, max. 6)**

**LAW B 593 Natural Resources Commons Property (3)** A review of the different forms of natural resources and an exploration of the desirability of managing certain resources as commons or private property. Covers a review of the successes and failures by various groups in setting policy in this area.

**LAW B 594 Public Land Law Seminar ([2–6]-, max. 6)**

**LAW B 596 International Protection of Human Rights ([2–4]-, max. 6)** *Stilt*

**LAW B 597 History of the Formation of the United States Constitution Seminar ([2–6]-, max. 6)**

**LAW B 598 Advanced Research and Writing Seminar ([1–4]-, max. 4)**

**LAW B 599 Special Topics (1–12, max. 12)**

## Law E

**LAW E 500 Advanced Writing Project (1–3, max. 3)** Independent research and writing project supervised by a faculty member. Projects are structured to develop skills in research, analysis, and writing. Offered: AWSpS.

**LAW E 502 White Collar Crime (3–4)**

**LAW E 503 Analytic Writing (3)**

**LAW E 504 Emerging Issues in Urban Government Seminar (6)** Focuses on currently emerging issues in local government, such as municipal regulation of land use, the initiative process, technology and privacy, governmental responses to urban social problems and regional challenges. Production

of publishable paper by student satisfies the advanced writing project requirement.

**LAW E 505 Frontiers of Tort Law (3)**

**LAW E 506 Asian Contract Law and Practice (3)** Examines how economic deregulation, financial restructuring and technological change affect contracts in Asia. Topics include licensing, franchise and e-commerce contract in Japan, China, and Taiwan; contract law and practice in Vietnam and Indonesia; cultural norms in contracting; convergence toward "global standards;" and the role of lawyers and other agents.

**LAW E 507 Access to Justice Seminar (2)** Explores the legal, ethical, and financial issues involved in providing legal services to moderate income persons. Uses a combination of lectures and interactive discussion. Credit/no credit only.

**LAW E 508 Persuasive Writing (2)** *Anderson* Studies persuasion and rhetoric by practicing legal argument: working with facts, framing issues, constructing legal arguments. Studies examples of good and bad persuasive writing and practice written advocacy skills in a number of assignments. Students practice advocacy in the context of pre-trial motions and appeals.

**LAW E 509 European Union Law (3)** Survey of the legal origins of the European Union and the synthesis of the major European legal traditions achieved. Focus on the process of harmonizing national laws of the member states and economic integration in the area of competition law and free movement of goods and services.

**LAW E 510 Banking Regulation (2–3)** Introduces the basics of banking law and regulation. Topics include separate sections on U.S. regulation of financial services with emphasis on federal regulation of banks, and on international, cross-border, and comparative banking regulatory issues.

**LAW E 511 Venture Capital Deals (4)** *O-Conner* Focuses on the legal environment of venture capital (VC) financing of technology start-ups. Analyzes relevant statutes and regulations, and the standard set of negotiated terms in typical VC deals. Students negotiate and draft VC deal documents. Offered: W.

**LAW E 512 Law, Globalization, and Multinational Corporations (3)** An interdisciplinary workshop that examines the role of multinational corporations in a global society. Topics include the legal construct of the multinational corporation, the multinational and the state, the multinational and human rights, and the multinational in the international arena. Offered: jointly with SIS 562.

**LAW E 514 The Law of Nonprofit Organizations (2–4, max. 4)** Examines laws generally applicable to nonprofit corporations and legal issue relating to cooperatives, credit unions, and thrift/mutual associations. Attention given to the Washington Nonprofit Corporations Act with comparable statutes and model legislation.

**LAW E 515 Criminal Justice (3)**

**LAW E 516 Criminal Procedure: Adjudication (5)** Covers the formal charging, trial, and appellate stages of criminal proceedings, including grand jury proceedings, prosecutorial discretion in charging, pretrial release and detention, charging and venue joinder and severance, double jeopardy assistance of counsel, discovery, and disclosure, criminal trials appeals, and collateral post conviction remedies.

**LAW E 517 Foreign Trade and Investment Law of the People's Republic of China (1–4, max. 4)** Introduction to the regulatory regime governing foreign trade and investment in China and in-depth coverage of key aspects of the regime, with focus on issues faced by U.S. businesses. Covers specific regulations, their implementation in practice, as well as the political and economic background. Offered: jointly with SISEA 517.

**LAW E 518 Torts II (4)** *Wolcher* Covers advanced topics in tort law, including defamation, invasion of privacy, intentional infliction of mental distress, medical malpractice, misuse of legal proceedings, misrepresentation, interference with prospective advantage, nuisance, products liability, toxic

torts, trespass to chattels, conversion, and vicarious liability. Prerequisite: LAW A 504. Offered: Sp.

**LAW E 519 Philosophy of Law (4)** Explores jurisprudence as “the jurist’s quest for a systematic vision that will order and illuminate the realities of the law” and legal philosophy as “the philosopher’s effort to understand the legal order and its role in human life.” Examines various texts, emphasizing works of one or more proponents and critics of liberalism.

**LAW E 521 Advanced Trial Advocacy (3)**

**LAW E 522 Gay, Lesbian, Bisexual, and Transgendered Rights and the Constitution (1–4, max. 4)** *Nicolas* Examines various constitutional provisions from a gay rights perspective. Topics include the rights of equal protection and substantive due process, as well as the 1st and 9th Amendments and the Full Faith and Credit Clause. Offered: A.

**LAW E 523 Entrepreneurial Law Clinic (3)** Prerequisite: LAW A 526, LAW E 547, or LAW A 546. Offered: S.

**LAW E 524 Child Advocacy Clinic ([4–12]-, max. 12)** Credit/no credit only.

**LAW E 525 Poverty Law (4)** Overview of legal issues affecting poor people, including relevant background readings on poverty and access to justice, and selection problems such as housing and homelessness, education, employment issues of low-wage workers, income support and welfare reform, consumer law, family law, and child care.

**LAW E 526 Law Reform in Transition Economies Seminar (2–4, max. 6)** *Clarke, Ramasastry, Taylor* Using interdisciplinary perspectives and case studies, this seminar probes the assumptions, methods and outcomes of commercial law reform in transition economies. Also highlights and critiques the role of international lawyers in this important, emerging area of practice.

**LAW E 527 Bankruptcy Client Representation Project (1–4, max. 4)** *Kuno* Provides an opportunity for students to interview a client, evaluate the appropriateness of different forms on bankruptcy as a solution to their debt problems, and provide representations in obtaining the bankruptcy. Student teams are paired with pro bono attorneys under the supervision of a part-time faculty member. Offered: W.

**LAW E 528 Appellate Advocacy Clinic (2-, max. 4)** Clinical training in appellate litigation with both seminar and practical components dealing with appellate procedure, strategy, and applicable substantive law. Students represent clients in state appellate court, writing at least one appellate brief and participating in oral argument.

**LAW E 529 Tribal Court Public Defense Clinic (4-, max. 12)** Offers clinical training in substantive areas of law implicated in representation of Native American tribal court criminal and dependency proceedings. Open to third year students in the JD program. Recommended: LAW A 565; LAW B 503; LAW B 515; and LAW B 520, which may be taken concurrently. Offered: AWSp.

**LAW E 531 Advanced American Indian Law (3)** *Anderson, Rodgers* Covers Indian hunting and fishing rights, water rights, Indian gaming, religious freedom and cultural property issues, environmental statutes unique to tribes, and comparative Indigenous international issues. Prerequisite: LAW A 565. Offered: W.

**LAW E 532 Sports Law (3/4)** Analyzes sports cases and materials that cover multiple disciplines, including contracts, torts, constitutional, antitrust, labor and employment, intellectual property, and criminal law. Participation in problem solving exercises and drafting and negotiations sessions, which explore areas like player and coaching contracts, investigation of NCAA rules infractions, and possible sanctions against universities.

**LAW E 533 Civil Rights, Social Movements, the Political Process, and the Development of Law Seminar (4)** Explores the relationships between social movements, the legislative development of statutes, and the judicial enforcement of those statutes. Uses civil rights history and laws (race, sex, disability, and LGBT) as cases studies to understand how the political process impacts the development and interpretation of law.

**LAW E 534 Human Rights Law: Philosophy and Practice (4)** Explores international human rights law through a rigorous curriculum including both human rights philosophy and practice. Topics include aspects of human rights with various disciplines from environmental law and public health to business. Prerequisite: LAW B 596; LAW A 574, both of which may be taken concurrently.

**LAW E 535 Basic Income Tax Concepts (3)** Basic federal income tax principles, how the tax law impacts a wide variety of business and personal transactions and decisions, and what a reformed tax law might look like.

**LAW E 536 Practical and Professional Responsibility Issues in the Small or Solo Law Practice (3–4, max. 4)** Credit/no credit only.

**LAW E 537 Refugee Law (2)** Examines the processes in the United States for the admission of refugees and for the adjudication of asylum claims. Explores international refugee policy and evolving legal norms concerning asylum, temporary protection, repatriation, resettlement and internal displacement.

**LAW E 538 International Civil Litigation in U.S. Courts (3–4, max. 4)** Examines the special procedural and substantive law governing both private as well as semi-public disputes in U.S. Courts and arising out of transnational transactions. Explores international arbitration and considers comparative aspects.

**LAW E 539 United States and European Union E-Commerce Law (2/3)** Compares the different attitudes to regulation of e-commerce and the information society in the U.S. and the European Union. Topics may include: an introduction to European Union institutions, regulatory, cultural themes in the Internet; e-society and e-commerce in Europe; regulation of illegal, harmful content, and Internet Service Provider liability, etc.

**LAW E 540 Legal Issues of Internet Law (3)** Introduces the basic legal issues raised by networked digital technologies, such as the Internet. Covers jurisdiction, speech, privacy/access, propriety rights (copyrights, domain names), emerging law, leading policy debates, as well as fundamental Internet technical skills. Offered: S.

**LAW E 541 Electronic Commerce and Information Technology (3)** Introduction to legal and policy issues raised by electronic commerce and other emerging information technologies. Topics vary and may include intellectual property and contract issues raised by establishing an online commercial presence, rights and obligations of users of network services including constitutional rights, information privacy, electronic contracts, electronic payments, etc.

**LAW E 543 Crime, Privacy, and Accountability on the Internet (2)** An exploration of criminal activity on the Internet and issues that arise in investigating it. Examines the tension between privacy rights and the need for accountability. Includes substantive criminal statutes, constitutional rights and procedural laws that implement privacy and protections, and the practicalities of Internet crime investigations.

**LAW E 544 Privacy Law (2)** Examines the legal doctrines of privacy and confidentiality used to protect personal information. Aims to understand how courts and legislatures seek to protect information as new technologies and institutional practices emerge. Studies scope and implications of federal statutes that attempt to establish fair information practices with respect to electronic personal information.

**LAW E 545 International Trade Law (2–4)** Introduces the legal framework, policies, and jurisprudence of the World Trade Organization (WTO). Provides an overview of the regulation of trade in goods, services, and intellectual property that is necessary for international legal practice, as well as provide the policy analysis to better understand the trade dimensions of international legal disputes.

**LAW E 546 International Commercial Arbitration (2–3, max. 3)** Introduces the legal framework of international commercial arbitration (ICA) with a focus on the New York Convention of 1958 and the United States Federal Arbitration Act of 1925.

**LAW E 547 Legal Protection for Computer Software (3)** Addresses copyright, patent, trademark, trade dress, trade secret, and contract protection for software. Also addresses how the law places boundaries around legal protection through anti-trust law and the doctrines of fair use and preemption. **LAW E 548 Litigation Strategies in Technology Protection (3)** Deals with procedural and substantive legal issues in enforcement of patents. Proceeds through a litigation in the order that parties normally would. Teaches substantive legal issues in conjunction with procedural and strategic considerations. Prerequisite: either LAW A 546, LAW E 567, or LAW P 501.

**LAW E 550 Patent Prosecution (4)** Addresses fundamentals of patent application drafting, through a combination of lectures and assignments. Addresses all aspects of proceedings before the U.S. Patent and Trademark Office, including preparing new applications, and examiner interviews. Recommended: engineering or science background. Prerequisite: either LAW A 546, LAW E 567, or LAW P 501.

**LAW E 551 Law and Entrepreneurship (4)** Planning-oriented course uses the problem method to explore the corporate tax, and securities law, general business and financial considerations related to small business formation and financing. Prerequisite: LAW A 515; LAW A 530.

**LAW E 552 Strategic Intellectual Property Commercialization (3)** Comprehensive coverage of issues related to exploitation of intellectual property rights as a business asset for new companies, or as a source of income for existing businesses. Prerequisite: either LAW A 546, LAW E 567, or LAW P 501.

**LAW E 553 Technology Law and Public Policy (2)** Survey of the domains of public policies that have been affected by the information revolution. Examines issues from Internet taxation, to personal data privacy, information warfare. Discusses the implications of the new public policies and whether it is feasible for states to enact different information policies.

**LAW E 554 Technology Law and Public Policy Clinic ([2–4]-, max. 10)** Clinical training in legislative and public policy advocacy under supervision of law school faculty. Examines legislative process, drafting, commentary and advocacy, appellate advocacy, and professional responsibility concerns. Supervised practice experience representing public interest with respect to law and technology. Credit/no credit only. Prerequisite: LAW E 553, which may be taken concurrently.

**LAW E 555 Legislation (3–5)** *Andersen, Vaughn, Watts* Studies topics related to legislation and the legislative process. Examines the structure and operation of legislative bodies as well as the contemporary debates and laws that surround the process. Considers the theories and canons of statutory construction and interpretation. Introduces the basic techniques of statutory drafting. Offered: W.

**LAW E 558 Law of Democracy: Voting Rights and Election Law (3)** Examines the Law that governs the American system of democracy and considers the legality and desirability of competing models for structural reform. Considers various methods of voting and representation, the right to vote, and the Voting Rights Act.

**LAW E 560 Contemporary Muslim Legal Systems Seminar (2–6, max. 6)** *Lombardi* Provides a forum for in-depth research of legal developments in nations where governments are trying to establish legal systems that ensure economic development and human rights, while at the same time ensuring that their law respects “Islamic norms.” Prerequisite: LAW B 556. Offered: A.

**LAW E 566 Innocence Project Northwest Clinic (3–4, max. 10)** Offers students clinical training investigating and litigating claims of actual innocence on behalf of prisoners serving lengthy sentences for serious crimes. Open to second- and third-year students in the JD program.

**LAW E 567 Survey of Intellectual Property (3–6, max. 6)** *O'Connor* Intended for both law students who are only interested in a general overview of intellectual property and non-law students who are seeding a certificate in intellectual property law and policy. Designed as an alternative to

Patents, Trademark and Unfair Competition Law, and Copyrights. Prerequisite: either LAW A 522, LAW A 546, LAW E 588, or LAW P 501. Offered: W.

**LAW E 568 Indian Law Clinic (4, max. 12)** Supervised practice component on Indian law practice and procedure and advocacy skills. Provide legal advice, brief services and representation to low income Indian clients under the direct supervision of a practicing attorney. Client counseling research, negotiation, and community education. Offered: AWSp.

**LAW E 569 Advanced Mediation Practicum (3)** *Ewalt* Advanced clinical practicum in mediation under the supervision of the faculty and experienced mediators. Students convene and mediate cases referred to the Mediation Clinic from government agencies and other sources. Only for students who have successfully completed the Mediation Clinic LAW B 526, or have other comparable experience. Offered: A.

**LAW E 570 International Economic Relations and Comparative Trade Policy (3/4)**

**LAW E 572 Race and the Law (3-4)** Evaluates the legal regulation of race in the U.S. Addresses the racial and legal history of major groups in the U.S. including African-Americans, Asian-American, Latinos, Native Americans, and Whites, and examines the nexus between law and the construction of race as a concept and locus of identity.

**LAW E 575 Telecommunications Law and Policy (2)** Survey basic policy principles underlying our nation's telecommunications laws. Focus on administrative and statutory law, paying special attention to the design and implementation of the Telecommunications Act of 1996. Addresses the role played by antitrust, economic regulation and constitutional law (particularly the First Amendment) in shaping our nation's telecommunications landscape.

**LAW E 577 Drafting Technology Contracts (3)** Covers advanced drafting and negotiating licenses and other technology agreements.

**LAW E 579 International and Foreign Law Research (2)** Overview of international law materials. Examine primary materials in the vernacular and in translations: constitutions, charters, codes, administrative rules, cases, treaties and other international agreements. Focuses on practice tools such as directories, guides, digests, and proceedings. Prerequisite: LAW A 506 or permission of instructor.

**LAW E 580 Sexual Violence and the Law (3)** Introduces substantive legal areas including: evidence and rape shield laws; protection orders; civil liability of perpetrators and third-parties, and restorative civil remedies in housing, employment, and education contexts. Looks a national trends and primarily focuses on Washington State Law.

**LAW E 582 Information Policy: Domestic and Global (5)** National and international information policy: public and private sector policy in terms of privacy, access, and exploitation; technology infrastructures and policies supporting the information industries. Coverage includes freedom of information privacy, copyright, telecommunications, and emerging technologies.

**LAW E 588 Trademark and Unfair Competition Law (3)** *Hoffmann* Provides a comprehensive review of issues relating to protection of trademarks and other trade identity symbols under the common law and the Federal Lanham Act. Offered: A.

**LAW E 589 IP Innovations in Science and Technology (2-, max. 6)** *Takenaka* Covers controversial intellectual property law and policy questions arising from evolving science, technology and e-commerce, and addresses cutting edge issues from a multidisciplinary perspective. Examines the current legal regimes and research environment and explores innovative methods for maximizing the exploitation of advanced science and technology. Offered: AWSp.

**LAW E 592 Federal Appellate Advocacy (1-6, max. 6)** Representation of an otherwise pro se litigant in an appeal in the Ninth Circuit. Preparation of the opening and reply brief and conduct the oral argument. Requires substantial research,

multiple drafts, and painstaking familiarity with the record. Prerequisite: permission of the instructor. Credit/no credit only.

**LAW E 593 Environmental Law Litigation and Practice (4-, max. 12)** Survey of environmental litigation and practice regarding various environmental issues. Examines information-gathering (Freedom of Information Act), formal discovery, case selection, document control, and presentation in complex litigation, representation of groups, professional responsibility issues, working with scientists/presenting scientific evidence, and trial techniques. Prerequisite: LAW A 527, which may be taken concurrently.

**LAW E 594 Environmental Law Clinic (4-, max 12)** Examines applicable environmental law and procedure, skills training, and professional responsibility concerns. Participation in a carefully supervised practice experience representing clients in cases involving environmental issues. Students must be Rule 9 qualified. Credit/no credit only. Prerequisite: LAW A 527; LAW E 593, which may be taken concurrently.

**LAW E 597 Global Warming and Justice Seminar (4)** *Rodgers* Explores case studies (worldwide but with an emphasis on indigenous peoples) addressing multiple legal responses to the consequences of climate change. Explores remedies under U.S. and international law. Offered: WSp.

**LAW E 598 The Law and Climate Change Seminar (4)** *Rodgers* Develops student understanding of the consequences of anticipated climate change across a spectrum of issues that include human health, the earth, and its oceans. Covers the practice of agriculture, revised energy futures, legislative responses to climate change, and local, state, regional, and tribal efforts to address it. Offered: Sp.

**LAW E 599 Legislative Advocacy Clinic (2-4, max. 12)** Clinical training in legislative and public policy advocacy. Topics include the legislative process, drafting commentary, advocacy, building a legislative agenda, working with coalitions, and ethics. Direct work with non-profit and other organizations advocating in the state legislature to develop and move legislation as well as respond to proposed legislation. Prerequisite: LAW A 579. Offered: AWSp.

## Health Law

**LAW H 501 Fundamentals of Health Law (4)** Topics include: health care reform; obligations to provide care (including EMTALA); medical decision-making law; private health insurance and managed care (including ERISA, HIPPA, and COBRA); Medicare; Medicaid and SCHIP; regulation of health care providers; staff privileges and hospital-physician contracts; tax exemption; antitrust, and fraud and abuse laws.

**LAW H 502 Medical Malpractice (3/4)**

**LAW H 503 Medical Ethics and Jurisprudence (3-)**

**LAW H 504 Legal, Ethical, and Social Issues in Public Health Genetics (3)** *Kuszler, Mastroianni* Equips the student to anticipate and assess potential legal, ethical, and social barriers complicating the incursion of new genetic advances, information, and technologies into public and private health care delivery efforts. Prerequisite: GENET 371 or equivalent. Offered: jointly with PHG 512/B H 514; W.

**LAW H 506 International Bioethics, Social Justice and Health Seminar (1, max 3)** *Kuszler, Rivin* Explores case studies of ethical dilemmas in research and medical practice and violations of international human rights norms in the design, implementation and evaluation of health programs and policies. Bioethics and human rights law will be the foundational tools for critically evaluating global health impact. Credit/no credit only. Offered: AWSp.

**LAW H 507 Law, Medicine, and Ethics in the Context of Pain Management (2)** Reviews the problem of physicians failing to relieve pain of the patients in the dying process and the legal and ethical issues they face as well as the cultural sources of the problem.

**LAW H 508 Beginning of Life: Rights and Choices (2)** Addresses the controversial legal issues engendered by our increasing control over the beginning of life. Focuses on the law, regulation, and policy implications of contracep-

tion; new reproductive and genetic technologies, including surrogate parenthood, sperm and egg donation, in-vitro fertilization, and other methods of conquering infertility; and abortion.

**LAW H 509 End of Life: Rights and Choices (2)** Address controversial legal issues engendered by our increasing control over the end of life. Focuses on patient autonomy issues at the end of life including withdrawal of life support, surrogate decision making, advance directives, and patient choice to hasten death with medical assistance (physician aid in dying). Offered: Sp.

**LAW H 510 Topics in Law and Medicine ([1-4]-, max. 4)**

**LAW H 511 International Research Ethics, Law and Policy (3)** *Kuszler, Rivin* Exploration of legal requirements and ethical principles related to responsible conduct and research in a variety of different government structures, health care systems and research environment. Compares and contrasts law and ethical standards applicable to research enterprises in developing countries, industrialized countries, and ethically distinct communities. Offered: jointly with B H 553; A.

**LAW H 515 Global Health Law (3)** *Kuszler* Provides an examination of the legal, economic, social, ethical, and political aspects of global health. Explores the emergence of global health law as a multilateral tool to address health disparities and improve the health of the vulnerable. Offered: A.

**LAW H 512 Health Law (2)** *Kuszler* Analysis of law, the legal system and current legal problems as they related to the financing and delivery of health care services. Offered: jointly with HSERV 551; A.

**LAW H 520 Genetics and the Law (3)** *Kuszler* Explores and analyzes legal issues arising from genetic technologies and information. Statutes, regulations, and cases demonstrate the constitutional, contract, tort, criminal, and family law use of genetic science to determine rights, disputes, and controversies. Prerequisite: LAW H 504/B H 514/PHG 512 or permission of instructor. Offered: jointly with PHG 523.

**LAW H 524 Forensic Evidence (3)** Examines the application of the rules of evidence in cases that involve forensic evidence. Examines paradigmatic cases involving homicide and physical or sexual assault, although the principles examined are applicable generally in civil and criminal cases.

**LAW H 525 Criminal Law and Procedure (3)** Provides an understanding of U.S. criminal law and criminal procedure. Explores basic principles of liability, defenses, and basic constitutional principles governing interactions between police and suspects. Open to forensic nursing students and graduate law students, but not JD students.

**LAW H 530 Disability Law (3)** Considers the definition of disability as defined by statute (ADA, FRA), case law, and social perception. Focuses on education law and entitlements, assess to and discrimination in employment, housing, public transportation, and health care.

**LAW H 531 Disability Clinic (4-, max. 12)** Clinical training in disability law issues, including access to Medicaid and other public benefits, assistive technology issues, transit accessibility, and low-wage worker accommodation issues, among other possible issues. Students represent clients at Columbia Legal Services under supervision of CLS attorneys. Prerequisite: LAW H 530.

**LAW H 534 Mental Health and the Law (3)** Covers medical and legal definitional issues as well as major civil and criminal law issues, including standards and procedures for involuntary commitment; consent for, and informed refusal of, treatment; de-institutionalization/community-based treatment; the insanity defense; competency to stand trial; and punishment of the mentally ill convict.

**LAW H 536 Research Ethics and Regulation (3)** *Mastroianni* Explores the ethical foundations, principles and concepts, and U.S. laws related to the conduct of research with humans subjects, and (3) the responsible conduct of research Required for graduate students in the Department of Bioethics and Humanities, School of Medicine. Offered: jointly with B H 536. W.

**LAW H 540 Health and Human Rights (3)** Examines the basic concepts in the fields of human rights law and public health, and uses those concepts to examine the interdependence and tensions between the two fields. Introduction to the fields of public health and human rights law, examining the impact of health policies and programs on human rights. Offered: jointly with G H 516.

**LAW H 545 FDA Law (3)** *Kuszler* Surveys the scope of regulatory authority accorded to the FDA. Focuses on products used in medical care, notably pharmaceutical drugs, medical devices, and biologics. Considers food safety, regulation of cosmetics, and oversight of carcinogenic substances. Offered: Sp.

**LAW H 570 Bio-entrepreneurship and the Law (3)** Covers legal issues in bio-entrepreneurship by tracking product development through a VC-backed start-up company. **LAW H 573 Empirical Methods in Socio-Legal Research (2-, max. 4)** Provides an introduction to research design and methodology. Designed to help students develop skills in qualitative and quantitative research methods in order to gain the ability to conduct and evaluate empirical socio-legal research.

**LAW H 579 Interactive Seminar (1, max. 30)** *Austin* Interactive seminar series on topics broadly related to public health genetics, including genetic epidemiology, pharmacogenomics, and medical genetics, as well as current ethical, legal, social, economic, and policy issues. Offered: jointly with PHG 580; AWSp.

**LAW H 580 Advanced Health Law (3)** Considers the impact of antitrust law, fraud, and abuse prohibitions, the corporate practice of medicine doctrine, tax law and other state and federal laws upon emerging health care entities. Focuses on integrated health care delivery systems. Prerequisite: LAW H 501.

**LAW H 582 Health Care Fraud and Abuse (2-3)** Considers federal and state laws that impose criminal and civil penalties on health care providers for activities ranging from payment for referrals, submissions of false claims, misconduct in medical research, the illegal disclosure of patient information, and the abuse and neglect of patients in long term care settings.

**LAW H 590 Advanced Research and Writing Seminar in Health Law (2-, max. 4)** *Kuszler* Dedicated research and writing seminar. Includes a substantial paper on a health law topic. Offered: WSp.

**LAW H 594 Animal Law (3)** Examines substantive law and procedure, specific cases, legislation, and background societal mores that force an evolution and backlash in the level of jurisprudential and legislative comfort with new ways of seeing and speaking about animals other than humans. Offered: WSp.

**LAW H 599 Health Law Tutorial (1-4)** Focuses on a specialized area of health law. Prerequisite: limited to students in the Graduate Program in Health Law; must be approved by the program director. Offered: AWSp.

## Intellectual Property Law

**LAW P 501 Intellectual Property Law Core (6-8)** Intensive study of intellectual property law core subjects: patents, copyrights, trade secrets, and trademarks. Examines fundamental principles their underlying policies, and how the laws inter-relate. Not open to students who have taken LAW A 522, LAW A 546, LAW E 567, or LAW E 588.

**LAW P 503 Introduction to Legal Systems and Skills for Intellectual Property Law (2-3, max. 3)** Introduces the U.S. system of state and federal courts in the context of intellectual property. Discusses how intellectual property laws come from the common law as well as state and federal statutes and regulations. Teaches legal research, writing, case briefing, and analysis skills.

**LAW P 504 Economic Analysis of Intellectual Property (2-3)** Explores the intersection between intellectual property law and economics from both a macro and micro economic perspective; economic justification of intellectual property law; and portfolio management tools that can evaluate intel-

lectual property protection as an investment. Prerequisite: either LAW P 501 or LAW E 567. Recommended: economics. Offered: W.

**LAW P 505 International Intellectual Property Law (2-3)** Focuses on international treaties as they relate to protection of trademarks and copyrights. Introduces international aspects of branches of intellectual property, including general principles of comparative and international law, and specific law related to obtaining and enforcing intellectual property rights in foreign countries. Prerequisite: either LAW A 522, LAW E 567, LAW E 588, or LAW P 501.

**LAW P 506 Transnational Intellectual Property Law Theory and Practice (3)** *Takenaka* Studies comparative intellectual property law using a series of lectures, license exercises, and a mock trial. Consists of a series of lectures on campus followed by a one-week intensive transnational seminar hosted by a law school in Asia or Europe Offered: Sp.

**LAW P 509 Antitrust and Intellectual Property Rights (2-3)** *Bangasser* Examines in-depth application of competition law and policy to the creation and exploration of the intellectual property. Offered: Sp.

**LAW P 510 Advanced Writing Seminar in Intellectual Property Law and Policy (2-, max. 4)** *Gomulkiewicz* Develops advanced research and writing skills under the direction of an advisor. Students present a substantial research paper on copyright, patent, trademark, or trade secret law. Offered: WSp.

**LAW P 522 Advanced Copyright Law (2)** Advanced, in-depth study of copyright law and policy. Explores the boundaries of copyright protection and how copyright law relates to other intellectual property laws. Prerequisite: either LAW A 522, LAW E 567, or LAW P 501.

**LAW P 528 LL.M. Intellectual Property Law Practicum (1-4, max. 6)** Experience with an approved non-profit organization, judicial or legislative body, or governmental agency on issues related to intellectual property law and policy. Students work under the guidance of experienced practitioners; both student and field supervisor provide the supervising law faculty member with a final written evaluation. Credit/no credit only.

**LAW P 535 Entertainment Law (3)** A primer on the various forms of legal protection (trade secrets, copyright, trademarks, publicity law, and licensing) that form the bases for various types of entertainment. Considers key industries: books, music, movies, television, internet, and computer games. Prerequisite: LAW P 501 or permission of the instructor.

**LAW P 539 Law, Technology, and Development (2-3, max. 3)** *Snyder, Winn* Provides an overview of selected principles and theories of development economics, and considers the implications of technological innovation, intellectual property rights, government regulation, trade policy, and technical standards for the achievement of development objectives. Mass media coverage of current developments enriches class discussions.

**LAW P 545 Advanced Patent Law Seminar (3)** *Taylor* Studies public policy and practice considerations relating to patenting research results in high technology. Examines the most up-to-date issues in legal protection of technology from the comparative law perspective. Prerequisite: either LAW A 546 or LAW P 501. Offered: W.

**LAW P 590 Graduate Intellectual Property Law Tutorial (1-4, max. 4)** Focuses on a specialized area of intellectual property law. Limited to students in the Graduate Program in Intellectual Property Law and Policy. Tutorial must be approved by the program director.

## Law (Taxation)

**LAW T 502 Federal Tax Controversies and Procedures (3)**

**LAW T 503 Problems of Timing (2-3, max. 3)**

**LAW T 504 Property Dispositions and Transactions (3)**

**LAW T 505 Introduction to Income Taxation (2)** Addresses a number of fundamental income tax concepts, including the

computation of individual tax liability, statutory exclusions, deductions, and gains. Also deals with issues related to character and timing.

**LAW T 506 Tax Practice and Skills (1)** Orientation to core concepts of tax practice, including administrative structure and nature of tax law, nuances of statutory interpretation, and the relative authority of statutory, administrative, and judicial sources. Includes overview of print and online tools for federal tax research.

**LAW T 507 Federal Tax Policy Seminar (2-4, max. 4)** Examines the theoretical and policy considerations applied in assessing existing and proposed federal tax regimes. Topics include: the nature of the income tax as a tax on saving and consumption; consumption taxes as alternatives to taxes on income; tax policy and charitable giving; taxes and the poor; and more.

**LAW T 510 Estate and Gift Taxation (3)**

**LAW T 511 Taxation of Partners and Partnerships ([1-4]-, max. 4)**

**LAW T 512 Exempt Organizations ([2-4]-, max. 4)**

**LAW T 513 Estate Planning (3)**

**LAW T 514 Drafting Estate Planning Documents (2)** *Adams* Includes the drafting of several documents used in contemporary estate planning practice, including wills, trusts, client letters, powers of attorney, health care directives, gift and estate tax returns, and opinion letters. Prerequisite: LAW T 513, which may be taken concurrently. Offered: Sp.

**LAW T 515 International Taxation I (3)**

**LAW T 516 International Taxation II (3)**

**LAW T 517 Estate and Gift Taxation II (2)**

**LAW T 518 Taxation of S Corporations (3)**

**LAW T 519 Canadian-United States Tax Issues (2)** *Ko* Overview to various cross-border issues, including the Canadian income tax (and its GST tax), residency for Canadian tax purposes, principles relating to operation of Canadian business in the United States and profit repatriation and U.S. investment in Canada and similar repatriation issues.

**LAW T 520 Tax Ethics (2)** Considers the role of ethics in tax practice and its application to specific problems faced by tax professionals. Explores substantive rules governing tax. Addresses ethical problems of tax professionals in connection with structuring transactions, resolving tax controversies with and presenting cases to the IRS, and representing litigants in tax controversies.

**LAW T 521 Compensation and Benefits I (3)**

**LAW T 522 Compensation and Benefits II (2)**

**LAW T 523 International Estate Planning (2)**

**LAW T 524 Transfer Pricing Seminar (2)** *Andrade* Reviews section 482 of U.S. Internal Revenue Code and the Treasury regulations thereunder with a focus on multinational corporations (MNCs) and their related party transactions that are subject to the arm's length standard. Application of U.S. transfer pricing regulations to related party transactions involving MNCs.

**LAW T 525 Advising Privately-Owned Businesses (3)** Explores the role of the lawyer as an advisor through case studies examining a range of structural planning issues and the practical and analytical challenges of the planning process. Emphasizes tax and business considerations, and creative planning strategies. Prerequisite: LAW A 530; LAW A 515, which may be taken concurrently.

**LAW T 526 Federal Tax Clinic (2/3-, max. 9)** Clinical training in federal tax litigation under the supervision of members of the law school faculty.

**LAW T 527 Taxation of Financial Instruments (2)** Examines the classification and tax consequences of various financial instruments including: fixed, variable, and contingent rate debt instruments; secondary market transactions in debt instruments, such as coupon stripping and market discount purchases; and transactions in common stock-equity deriva-

tives, such as notional principal contracts, hedging transactions and monetization strategies

**LAW T 528 Graduate Tax Practicum (2)** Field-based experience in a department-approved public or private entity, of eight hours per week minimum under the guidance of experienced practitioners. The student and practitioner produce a final report summarizing the practicum experience to the supervising faculty member, who decides whether to award academic credit. Credit/no credit only.

**LAW T 530 Corporate Reorganizations and Acquisitions (2-3, max. 3)** Examines the federal income taxation of business entities and their owners. Limited to coverage of the fundamental concepts of corporate and partnership taxation.

**LAW T 531 Advanced Corporate Tax Problems (2)** Examination (through case studies) of consolidated tax returns, limits on the use of tax benefits, carryover of tax attributes, classifications of debt versus equity, and corporate penalty taxes.

**LAW T 532 Taxation of Estates, Trusts, and Beneficiaries (2-3, max. 3)**

**LAW T 533 Tax Crimes: Investigations, Prosecutions, and Penalties (2)** *Chiconie* Focuses on elements of tax and related crimes with a view of the governmental investigative tools and powers, including IRS summonses, search warrants, and Grand Jury investigations. Covers taxpayer's rights and defenses in a criminal case; the IRS voluntary disclosure program; and the elements of civil penalties. Offered: AWSp.

**LAW T 534 State and Local Taxation (4)**

**LAW T 536 Taxation of Trans-Pacific Transactions (2/3)**

**LAW T 537 Business Planning ([2-6]-, max. 6)**

**LAW T 538 Estate Planning for Business Interests (2-3)** Business succession and estate planning issues for the owners of closely held business, including shareholder agreements, recapitalizations, family limited partnerships and limited liability companies, taxable acquisitions, split dollar agreements, redemptions to pay death taxes, electing small business trusts and more. Prerequisite: LAW T 510

**LAW T 539 Matrimonial Tax (2)** Covers tax aspects of married relationships and the tax impact of the dissolution of a marriage. Includes joint returns, the marriage tax penalty, innocent spouse relief from joint return liability, pre-nuptial agreements, transfer tax effects of inter-spousal transfers, alimony, child support, and marital property transfers incident to divorce.

**LAW T 541 Limited Liability Companies (2)**

**LAW T 542 State and Local Tax II: Advanced State Tax Concepts (2)** *Okimoto* Covers the interplay between the federal tax and state tax systems. Covers attributional and economic nexus, unitary business principle, state combined reporting versus federal consolidated filings, expense disallowance, adjustments to the federal tax base, fair appointment, alternative business tax, and state tax implications of mergers and acquisitions. Offered: W.

**LAW T 543 Advanced Partnership Tax (2)** Builds on the material covered in the basic course, Taxation of Partners and Partnership. It covers more sophisticated aspects of partnership allocations; transactions between partners and partnerships; and sale or exchange of partnership interests. Prerequisite: LAW T 511.

**LAW T 544 Tax Aspects of Charitable Giving (20)** Examines income, gift and estate tax consequences of charitable gifts of cash and property. Includes: theoretical and policy bases of charitable deduction; technical requirements; effect of receipt of benefits; percentage limitations based on donee and type of property; application of carryover rules; effect of partial cash or cash equivalent consideration.

**LAW T 545 International Taxation of Intellectual Property (2)** *Smith* Overview of the tax consequences of various types of common commercial arrangements that involve the development, ownership, and use of intangible property within multinational groups. Explores tax efficient arrangements such as contract research and licensing arrangement, cost-

sharing arrangement, and the use of intangible holding companies.

**LAW T 546 Taxation of Real Estate Interests (2)** An in-depth study and analysis of the tax consequences of acquiring, developing, operating, and disposing of interests in real property. Focuses on practical approaches to structuring sale-leaseback transactions, syndications, installment sales, and like-kind exchanges. Considers the application of the passive activity loss rules in real estate.

**LAW T 547 International Taxation of Electronic Commerce (2-, max. 4)** Electronic commerce is defined as the exchange of digital information in connection with the purchases and sale of goods and services. Seminar and discussion format. Explores the potential methods and approaches for the taxation of earnings associated with electronic commerce.

**LAW T 548 Tax Writing (2)** Designed to improve writing skills as they relate to practice of tax law. Students draft many types of tax documents. Also considers professional responsibility aspects of tax practice. Recommended: LAW T 506.

# School of Medicine

## SCHOOL OVERVIEW

### Dean

Paul G. Ramsey

C314 Health Sciences

### Associate Deans

Scott Barnhart

Albert J. Berger

John B. Coombs

D. Daniel Hunt

Eric B. Larson

Richard A. Molteni

Thomas E. Norris

Gordon A. Starkebaum

Andrew A. Ziskind

### Assistant Deans

Carol F. MacLaren

Susan G. Marshall

Werner E. Samson

### WWAMI Coordinators/Assistant Deans

Dennis Valenzano, University of Alaska (interim)

James R. Blackman, Boise, Idaho

Philip D. Cleveland, Spokane, Washington

Andrew Turner, University of Idaho and Washington State University

Sylvia J. Moore, University of Wyoming

Dwight E. Phillips, Montana State University (interim)

Established in 1946, the School of Medicine is the only medical school directly serving the states of Washington, Wyoming, Alaska, Montana, and Idaho (WWAMI). Located in the Warren G. Magnuson Health Sciences Center, the School operates a decentralized program of medical education (WWAMI) via a regional network of teaching affiliates.

The School's basic-science departments provide educational opportunities for students from all schools and colleges within the University. Clinical teaching programs are conducted at the University of Washington Medical Center, Harborview Medical Center, Seattle Children's, and the Veterans Affairs Puget Sound Health Care System, as well as at other clinical affiliates in Seattle and throughout the WWAMI states.

The School admits approximately 210 medical students to its first-year class and has a total enrollment of over 800 students pursuing the Doctor of Medicine degree. The full-time faculty numbers approximately 1,700 members. The affiliated University residency-training network enrolls approximately 900 house officers. Enrollment in the graduate programs in the basic sciences exceeds 500 students, and approximately 800 postdoctoral fellows are enrolled in various advanced training programs. The School has baccalaureate and graduate programs in occupational therapy, physical therapy, prosthetics and orthotics, and medical technology. The School participates in training a broad spectrum of other allied health professionals. The School is also home for the Physician Assistant Training Program known as MEDEX.

## WWAMI Program

The WWAMI program was initiated in 1971 as an effort to decentralize medical education, provide a broader range of educational opportunities for students, and address the need for primary-care physicians oriented toward ru-

ral practice. It is an integral part of the undergraduate medical curriculum and is a fully accredited program of the School of Medicine. The WWAMI program is named for the five states (Washington, Wyoming, Alaska, Montana, and Idaho) that share resources and responsibilities in the regional educational program. Funds appropriated to the WWAMI program by the Wyoming, Alaska, Montana, and Idaho legislatures assure each state of positions for its students in the entering medical class each year.

### First-Year Training

In the first year of the WWAMI program, approximately 40 percent of the students admitted to the University's School of Medicine receive their first year of medical school training at Washington State University, the University of Wyoming, the University of Alaska, Montana State University, or the University of Idaho. Washington State University positions not filled by volunteers are assigned by lottery. Every Washington-resident applicant should recognize the opportunity of assignment to Washington State University during the first year. Students from Wyoming, Alaska, Montana, and Idaho attend their home-state institutions. While at these institutions, they enroll in prescribed one-year medical school basic-science courses taught by on-site science faculty and are provided supplemental resources from the University of Washington's School of Medicine faculty. These students join their classmates at the UW's campus in Seattle for their second year of medical studies.

### Third- and Fourth-Year Training

At the conclusion of the second year, students enter the portion of the curriculum that is predominantly clinical. Required, selective, and elective clerkships are described below. As part of clinical training, students complete clerkships at the UW, at its affiliated hospitals, or at community clinical units located in the five-state region. During third- and fourth-year clerkships, School of Medicine full-time and clinical faculty members provide supervised clinical training in required as well as elective clerkships through the WWAMI region.

## ACADEMIC PROGRAMS

### Bachelor of Science

A program leading to a baccalaureate degree with a major in [microbiology](#) is offered through the College of Arts and Sciences.

### Bachelor of Clinical Health Sciences

A program leading to a baccalaureate degree with a major in clinical health services is offered through the [MEDEX](#) program.

### Bachelor of Science in Medical Technology

A curriculum in medical technology is offered by the Department of Laboratory Medicine. This program provides study in basic laboratory science that includes clinical laboratory training and is designed to prepare knowledgeable and skilled laboratory scientists for a variety of employment opportunities. Information concerning admission to the medical technology program appears under [Laboratory Medicine](#) in this catalog.

### Bachelor of Science in Prosthetics and Orthotics

The Department of Rehabilitation Medicine offers a Bachelor of Science degree in prosthetics and orthotics. The curriculum provides professional training in the basic sciences and the clinical application, design, and fabrication of prostheses and orthoses. Information concerning admission to

the curriculum in prosthetics and orthotics may be found under [Rehabilitation Medicine](#) in this catalog.

## MEDEX Northwest Physician Assistant Training

MEDEX Northwest, UW School of Medicine, is a program designed to train physician assistants. The program has been in existence since 1978 and is accredited by ARC-PA, the Accreditation Review Commission on Education for the Physician Assistant. MEDEX currently trains approximately 80 students annually in three didactic training sites (Seattle, Yakima, and Spokane). Discussions are currently underway to have a fourth training site in Anchorage, AK. Students return to their home communities in the WWAMI region (Washington, Wyoming, Alaska, Montana, Idaho) plus a variety of sites in Oregon and Nevada for their clinical year of training.

MEDEX Northwest is currently an eight-quarter program. The first four quarters consist of intense clinical and didactic instruction at one of didactic training sites. The final four quarters are spent in clinical experiences throughout the Northwest region. At the completion of the program, students are eligible to sit for the National Certifying Examination for Physician Assistants.

## Master of Occupational Therapy

The Department of Rehabilitation Medicine offers graduate degrees in occupational therapy. The curriculum provides professional training in the health sciences and in the theory and practice of occupational therapy as it impacts occupational performance across the life span and in the various arenas of practice. Occupational therapy addresses daily living skills including self-care, work, and leisure/play. Information concerning admission to the occupational therapy program appears under [Rehabilitation Medicine](#) in this catalog.

## Doctor of Physical Therapy

The Department of Rehabilitation Medicine offers graduate degrees in physical therapy. The curriculum provides professional education in the basic sciences and in the clinical use of physical therapy evaluation and management strategies in the treatment or prevention of neuromusculoskeletal dysfunction. Information concerning admission to the physical therapy program appears under [Rehabilitation Medicine](#) in this catalog.

## Master of Science and Doctor of Philosophy

Work leading to master's and doctoral degrees is offered, in accordance with the requirements of the Graduate School, in the departments of [Biochemistry](#), [Biengineering](#), [Biological Structure](#), [Immunology](#), [Microbiology](#), [Pathology](#), [Pharmacology](#), and [Physiology and Biophysics](#). Master's degree programs are offered by the departments of [Laboratory Medicine](#), [Medical History and Ethics](#), and [Rehabilitation Medicine](#). Students may work toward these degrees concurrently with the M.D. degree, taking additional years beyond the typical four-year medical curriculum.

Concurrent degrees are possible in many other departments and colleges of the University. Recent graduates have pursued concurrent degrees in the basic sciences of medicine and the School of Public Health and Community Medicine. A student who intends to work toward a graduate degree should confer with the chairperson of the department in which graduate study is to be pursued and with the Associate Dean for Academic Affairs of the School of Medicine. Specific requirements for admission to work for advanced degrees appear in the Graduate School section of this catalog. Permission to pursue advanced degrees is granted to medical students only if they are progressing normally in the medical curriculum and show evidence of being able to take on this additional work load.

## Doctor of Medicine

Upon completion of the curriculum of the School of Medicine, the M.D. degree is awarded to those candidates who (1) have given evidence of good moral character, (2) have satisfactorily completed the requirements of the curriculum, (3) have fulfilled all special requirements, and (4) have discharged all indebtedness to the University.

### Admission

(Procedures and policies described are subject to change. Information regarding changes is available from the School of Medicine Admissions Office.)

### Selection Factors

Candidates for admission to the University of Washington School of Medicine are considered comparatively on the basis of academic performance, motivation, maturity, personal integrity, and demonstrated humanitarian qualities. A knowledge of, and exposure to, the needs of individuals and society and an awareness of health-care delivery issues are desired. Extenuating circumstances in an applicant's background are evaluated as they relate to these selection factors.

Applicants must submit scores from the Medical College Admission Test (MCAT). This exam must be taken no later than autumn of the year before matriculation and cannot be more than three years old at the time of matriculation. MCAT registration blanks are available through premedical advisers or through the Office of Admissions. Under exceptional circumstances, to be determined by the Admissions Committee, the GRE may be considered during the admission process; however, if accepted, the applicant is required to take the MCAT prior to matriculation.

The following science course requirements must be completed before matriculation but preferably by the time of application: A total of 32 semester hours or 48 quarter hours of undergraduate courses divided into (a) chemistry, 12 semester/18 quarter hours, which can be satisfied by taking any combination of inorganic or organic chemistry, biochemistry, or molecular biology courses; (b) physics, 4 semester/6 quarter hours; (c) biology, 8 semester/12 quarter hours; and (d) other ("open") science subjects, 8 semester/12 quarter hours, which can be met by taking other courses in any of the three categories above.

Although a biochemistry course is not absolutely required for admission to the medical school, it is very strongly suggested for entering students. The biochemistry course for the first-year medical students focuses on molecular mechanisms central to human health and disease and is taught with the presumption that participants have already mastered the fundamentals of biochemistry, including molecular genetics, structure and activity of proteins, and metabolism. A comprehensive undergraduate biochemistry course is the most expedient way to gain this knowledge.

Under exceptional circumstances certain course requirements may be waived for individuals who present unusual achievements and academic promise. All candidates must demonstrate substantial academic ability in their major field as well as in the required courses. Candidates should be proficient in the use of the English language and basic mathematics and are expected to have a basic understanding of personal computing and information technologies.

Students who entered in the fall of 2003 had a mean GPA of 3.69 and the following mean MCAT scores: Verbal, 10.0; Physical Science, 10.3; Biological Science, 10.8; and a median Writing Sample of P.

Completion of three years of coursework at an accredited college or university is the minimum required before possible matriculation; however, all entrants in recent years have earned bachelor's degrees. No specific major is advised. A broad background in the humanities and liberal arts is encouraged, indeed expected.

### Application Procedure

The University of Washington participates in the American Medical College Application Service (AMCAS). The deadline for submitting an application to AMCAS is November 1 and no waivers are granted. After receiving the application from AMCAS, the School of Medicine will ask qualified individuals to submit a \$35 application fee and supplemental application materials. Every attempt is made to notify applicants of the final action by the end of March of the year of matriculation.

Residents of the states of Washington, Wyoming, Alaska, Montana, or Idaho are eligible to apply. Individuals with a demonstrated interest in research may apply for the M.D./PhD program (MSTP) regardless of residency. Applicants from outside this five-state region who come from disadvantaged backgrounds or who have demonstrated a commitment to serving underserved populations are considered. Foreign applicants, in addition to the above requirements, must also have a permanent-resident visa. Applications are not considered from persons who have failed to meet minimum standards at another medical or dental school.

The deadline for submitting additional application materials is January 15. These supplemental materials include:

- A supplemental application form. This is sent to qualified applicants after the School of Medicine has received the AMCAS application.
- A 300-word autobiographical statement in which the candidate describes the origin and development of his or her motivation to be a physician and any other issues of importance to the candidate. The applicant may request that the Personal Comments section of the AMCAS application be used to fulfill this requirement.
- A concise statement, not exceeding 200 words, as to why the candidate wants to attend the University of Washington School of Medicine.
- A premedical-committee letter of recommendation or three letters from instructors from whom the candidate has taken courses. These letters should be critical evaluations of the candidate's academic ability, strengths and weaknesses, the difficulty of coursework undertaken, motivation for medicine, personal maturity, and special attributes and assets.
- A \$35 fee. This is automatically waived for those who have qualified for AMCAS fee waivers. Others seeking a waiver of this fee should submit their requests directly to the School of Medicine Admissions Office.
- Acknowledgment of having read, understood, and of being able to meet, with or without reasonable accommodation, the Essential Requirements of Medical Education at the University of Washington School of Medicine: Admission, Retention, and Graduation Standards, sent with the supplemental application form.
- Conviction/Criminal History Information Form. Washington state law requires that all individuals who have access to children under 16 years of age, developmentally disabled people, and other vulnerable persons, disclose background information concerning crimes and offenses against these populations.

Candidates from Wyoming, Alaska, Montana, and Idaho are required to submit residency certifications from their respective state certifying officers. Proof of legal residence for Washington residents also may be requested. Determination of state of legal residence is not made by the School of Medicine; specific instructions regarding this requirement are furnished at the time of application. Those who enter as residents of Wyoming, Alaska, Montana, and Idaho are expected to spend their first year at the university site in their particular state. Twenty Washington students begin their medical education by spending the first year at Washington State University in Pullman. Offers of acceptance, therefore, are conditional upon agreement to participate in the WWAMI Program.

Inquiries, address changes, or other information regarding the application should be transmitted in writing and directed to the Committee on Admissions, Office of Admissions, Box 356340, School of Medicine, University of Washington, Seattle, Washington 98195-6340; or e-mail [askuwsom@uw.edu](mailto:askuwsom@uw.edu).

### Medical Curriculum

#### Basic Science Curriculum (149 credits)

The first two years of the medical-student curriculum is identified as the Basic Science Curriculum. It consists of three phases, or groups, of courses in the human biology series, courses in the sciences basic to medicine, organ systems courses taught by basic and clinical disciplines, and introduction to clinical medicine. The first phase is designed to provide the background in basic disciplines required for the organ-system courses. In the second phase, emphasis is placed on learning the normal and pathophysiologic properties of several human organ systems, and upon correlating these properties with clinical methods of data collection and problem formulation. Students pursue the introduction to clinical medicine course throughout the first two years, learning to interview patients, obtain a medical history, and perform the physical examination.

The academic demands of the Basic Science Curriculum are scaled so that most students are also able to take elective courses that broaden their background.

#### First-Year Required Courses

- Microscopic Anatomy (Histology)
- Gross Anatomy and Embryology (including trunk and head and neck anatomy)
- Mechanisms in Cell Physiology
- Biochemistry
- Systems of Human Behavior I
- Cell and Tissue Response to Injury (Pathology)
- Microbiology and Infectious Diseases/Introduction to Immunology
- Nervous System
- Critical Reading and Evaluation of Medical Literature
- Introduction to Clinical Medicine

#### Second-Year Required Courses

- Cardiovascular System
- Respiratory System
- Principles of Pharmacology I
- Endocrine System
- Systemic Pathology
- Genetics
- Skin System
- Gastrointestinal System
- Epidemiology
- Hematology
- Musculoskeletal System
- Medicine, Health, and Society
- Urinary System
- Systems of Human Behavior II
- Principles of Pharmacology II
- Reproduction
- Nutrition for Physicians
- Introduction to Clinical Medicine

#### Clinical Curriculum (148 credits)

The clinical curriculum is pursued in the third and fourth years of medical school. It includes prescribed clerkships to be completed by all students (84 credits or 42 weeks) in family medicine, internal medicine, obstetrics and gynecology, pediatrics, psychiatry, and surgery, plus clinical

electives (32 credits or 16 weeks) in four clinical areas including clerkships in rehabilitation medicine/chronic care, emergency care/trauma, neurology, and surgery electives. Additional clinical or non-clinical electives (a minimum of 32 credits or 16 weeks) are also required.

During the clinical curriculum, students gain clinical knowledge and gradually increase their clinical problem-solving abilities while working as junior members of the medical-care team. Each team is headed by a faculty clinician working in one of the medical school-affiliated hospitals, clinics, or practices.

### Independent Investigative Inquiry

In addition to the basic and clinical curricula, each student must complete 8 credits in independent student and investigation in one or more of the biological, behavioral, sociocultural, or epidemiological sciences basic to medicine, culminating in a scholarly product or written paper. The purpose of this requirement is for the student to gain an understanding of the philosophy and methods of scientific investigation.

### Student Evaluation and Promotion

The awarding of the Doctor of Medicine degree is contingent upon satisfactory completion of academic and non-cognitive requirements. The latter includes the acquisition of behavioral patterns and attitudes consistent with the School's professional standards and the oath that all students take at the time of graduation. As such, student evaluation is based on observations by the faculty and others involved in teaching of the student's behavior and conduct as well as papers and examinations. Every student is required to pass Steps 1 and 2 of the United States Medical Licensing Examination, all University of Washington examinations, and to complete an approved independent investigative inquiry project before receiving the Doctor of Medicine degree. Periodic reviews of student performance are conducted by the School's Student Progress Committee. Students are informed of their deficiencies and the remedial requirements, if any, for these deficiencies. Dismissal from the School may occur if the student fails to maintain an acceptable academic record, fails to follow academic directives provided by the School's committees, or fails to develop attitudes and behavioral patterns appropriate to a career in medicine.

The Faculty Council on Academic Affairs (FCAA) reviews the Student Progress Committee's action, and the Dean of the School of Medicine has final approval of the committee's and council's recommendations. A review mechanism is available within this process. Once dismissal or withdrawal from the School has occurred, the student may petition for reinstatement through the FCAA. Reinstatement is not considered without substantial evidence that the problems causing the dismissal or withdrawal have been resolved. Only one petition through the FCAA is allowed. If more than one year elapses after the withdrawal or dismissal, the individual may be required to apply for readmission through the admission process. If a reinstatement petition is denied by the FCAA, the decision is final with no further avenue for review. Subsequent requests for admission must be directed through standard admission procedures.

### Honor Society

Alpha Omega Alpha (AOA) is a national honor medical society. A charter as Alpha of Washington was granted to the School of Medicine in 1950 by AOA. Members are elected by AOA on the basis of high scholarship and good moral character. The purpose of AOA is to recognize and perpetuate excellence in the medical profession. Its goals are to promote scholarship and research in medical school, encourage high standards and conduct, and recognize high attainment in medical science, practice, and related fields. Its motto is "Worthy to serve the suffering."

### Grading System

Grades awarded in each course in the M.D. curriculum are Pass or Fail in the first-year basic science curriculum; Honors, Pass, or Fail in the applied-science curriculum; and Honors, High Pass, Pass, or Fail in the clinical curriculum. The School's goal is to provide a curriculum that defines the competencies to be achieved by the student at each level. However, a pattern of documented evaluator concerns about a student's performance may indicate unsatisfactory performance when the record is viewed as a whole, even though passing grades have been assigned. Honors may be awarded in a course on predetermined criteria that may involve additional work in the subject as selected by the student. The grading system precludes the ranking of students and no class standing is assigned.

The School of Medicine reserves the right to revise or modify the curriculum, system of evaluation, or graduation requirements.

### Graduation with Honors

A degree of Doctor of Medicine with Honors may be awarded to students with high achievement who, in addition, have demonstrated initiative and success in clinical and scholarly pursuits related to medicine. Candidates for graduation with honors are nominated by the departments each year and are selected on the basis of a review of their academic records by the Honors and Awards Committee.

### Office of Multicultural Affairs

The Office of Multicultural Affairs assists students from disadvantaged backgrounds who are pursuing M.D. or M.D.-PhD degrees. The program nurtures interests in medical careers by providing a variety of support services and enrichment activities in the areas of recruitment, education, admission, retention, and professional development. The School considers applicants from disadvantaged backgrounds or those who have a demonstrated commitment to work with underserved populations. Students should contact the Office of Multicultural Affairs for assistance during the application process. The program offers counseling and advocacy, referrals to University and community resources, tutoring, financial-aid information, and numerous opportunities to interact with other minority health-care professionals within the community. Various student organizations also provide minority medical students a means to interact socially and pursue shared interests, to offer peer support, and to assist with community-outreach activities.

U-DOC, a high-school summer-enrichment program offered by the Office of Multicultural Affairs, is a six-week program for students who have completed their junior year in high school. U-DOC's goal is to foster, affirm, and encourage high school students' interest in the medical profession by allowing them to further explore medical careers and to obtain a valuable introduction to college life. U-DOC is offered in each of the five WWAMI states.

The Western Consortium Summer Medical Education Program (SMEP) offers undergraduate and some qualified postbaccalaureate students a six-week summer academic-enrichment program that includes biology, chemistry, physics, communications, study skills, and MCAT preparation. Structured clinical and research activities are also offered. Housing, stipends, and travel assistance are available.

A prematriculation program for entering minority or disadvantaged medical students is offered for six weeks during the summer. The program is designed to facilitate students' entry into medical school by providing instruction in histology as well as enrichment activities in areas such as study skills, stress management, test-taking skills, research, clinical practice, and community health. Stipends and travel assistance are available to students who qualify.

During the regular school year, the Office of Multicultural Affairs serves as a support network for both the academic and nonacademic needs of students, and facilitates stu-

dents' access to the multiple resources in the School of Medicine, the WWAMI region, and the community.

The Native American Center of Excellence was established in 1992 as part of the Office of Multicultural Affairs to encourage Native American students to pursue medicine as a career, to promote research on Native American health issues, and to foster the preparation of Native American students for faculty roles in academic medicine. The Center of Excellence provides educational experiences that integrate western medicine with the Native American way of life, offers a variety of support services to promote the academic development of students, and sponsors a variety of educational opportunities within the Native American community.

Inquiries and requests for additional information may be obtained from the Office of Multicultural Affairs, Box 357430, School of Medicine, University of Washington, Seattle, Washington 98195-7430; 206-685-2489.

## Medical Scientist Training (M.D.-PhD) Program

A limited number of highly qualified candidates who wish to pursue both the M.D. and PhD degrees are considered annually. M.D./PhD students are permitted a wide choice of research specializations from among numerous disciplines and interdisciplinary areas of biomedical sciences. The program emphasizes continuity of both clinical and basic sciences exposure. Among participating graduate departments and interdepartmental disciplines are biochemistry, bioengineering, chemistry, environmental health, epidemiology, genetics, immunology, microbiology, molecular biotechnology, pathology, pharmacology, physiology and biophysics, and zoology. The participating interdepartmental and affiliate programs are neurobiology and behavior, molecular and cellular biology. Students can also conduct their research at the Fred Hutchinson Cancer Research Center.

Applicants who wish to be considered for the M.D./PhD program must submit the Medical Scientist Training Program application as soon as possible. Both the application and any supplemental material requested must be completed by January 15. Serious consideration is rarely given to applicants with minimal research experience and/or a cumulative GPA of less than 3.50 or MCAT scores of less than 10 in each category.

Applicants should correspond directly with the administrator of the Medical Scientist Training Program:

MSTP  
University of Washington  
Health Sciences Building, Room I264  
Box 357470  
Seattle WA 98195-7470  
206-685-0762  
[mstp@pathology.washington.edu](mailto:mstp@pathology.washington.edu)  
[www.pathology.washington.edu/mstp/](http://www.pathology.washington.edu/mstp/)

## Financial Information

### Fees and Other Charges

All fees and extra service charges are payable in U.S. dollars and due at the time specified for such fees and charges. The University reserves the right to change any of its fees and charges without notice. Resident tuition for 2003-2004 is \$4,149 per quarter; nonresident tuition is \$9,796 per quarter.

### Financial Assistance

Financial aid awards are based on the demonstrated need of the students. All applicants for aid must submit the Free Application for Federal Student Aid (FAFSA). This requires disclosure of financial information from the student and the student's parents. The Federal Direct Stafford Loan (subsidized and unsubsidized), Perkins Loan, and the Primary Care Loan are the primary sources of aid. Institutional

loans are also available from the School of Medicine. Limited amounts of grant funds are available to Washington state residents who meet specific funding criteria. Parental information is not required for grant funds, the Stafford Loan, or the Perkins Loan.

Scholarships are available through the School of Medicine scholarship fund. These awards vary in amount and require financial information from the student and the student's parents. There is a separate application for the School of Medicine scholarship, which has a May 31 due date.

Financial aid information is distributed to all accepted applicants. The FAFSA form may be obtained at [www.fafsa.ed.gov](http://www.fafsa.ed.gov) or from the UW Office of Student Financial Aid or the School of Medicine Financial Aid Office. The deadline for receipt of the financial-aid application by the processor is February 28. Applicants must meet this deadline to be considered for all available aid sources regardless of the status of their admission file. Late applicants are awarded only Stafford and Unsubsidized Stafford loans.

Outside employment is discouraged while the student is enrolled in medical-school course work.

## Enrichment Opportunities

Students may enhance their medical education through a variety of sponsored activities that offer students an opportunity to explore areas of special interest, such as working in rural or urban clinics that serve medically underserved communities, undertaking medical research projects, or participating in an international exchange program with a developing country. Brief descriptions of two of the more formally structured programs follow.

### Rural/Underserved Opportunities Program (RUOP)

This program exposes students to rural medicine and utilizes clinical training sites in all five states. For one month during the summer between the first and second years, students work with physicians in small communities, offering a chance to better understand the challenges and opportunities in these settings. Students receive a stipend supported by the Family Health Foundation, the Academy of Family Physicians, Area Health Education Centers, and the School of Medicine.

### Medical Student Research Training Program

Summer research opportunities are offered to UW medical students interested in gaining valuable experience from training in medical research. This research is planned and carried out under the supervision of a faculty sponsor and is undertaken during the summer between the first and second years. Student trainees in the program receive a stipend supported largely by gifts given by donors specifically to fund student research. The project is ten weeks, full-time, on a working schedule of forty hours per week, and the student may not be enrolled in courses for credit during this time. At the conclusion of the summer, the students prepare posters that are presented as part of the Medical Student Research Forum.

## GRADUATE MEDICAL EDUCATION AND POSTDOCTORAL TRAINING

The University of Washington School of Medicine offers a broad array of residency and fellowship programs. Training occurs at the University of Washington Medical Center, Harborview Medical Center, Veterans Affairs Puget Sound Health Care System, Seattle Children's, and other affiliated training sites in Seattle and throughout the WWAMI region. Postdoctoral research fellowship opportunities in the basic sciences are also offered.

## CONTINUING MEDICAL EDUCATION

The Office of Continuing Medical Education, School of Medicine, offers a wide variety of courses for physicians and health-care professionals in the Pacific Northwest and throughout the nation.

Offerings include short courses of one to three days, one- to two-week board-review courses, visiting professorships, preceptorships, and mini-residencies. Other offerings include lecture series at hospitals, video-tape presentations, self-directed instructional materials, and other specific courses requested by members of the medical community throughout the WWAMI region. Information on offerings is available from its website at [www.uwcmce.org](http://www.uwcmce.org).

All physicians also are invited to participate in continuing medical education programs offered by clinical departments, such as grand rounds and regular conference series.

The University of Washington School of Medicine is accredited by the Accreditation Council for Continuing Medical Education to sponsor continuing medical education for physicians. All programs sponsored by the Office of Continuing Medical Education are applicable to physician relicensure requirements of the Washington Board of Medical Examiners and for Category I credit of the Physician's Recognition Award of the American Medical Association. Prescribed credit for the American Academy of Family Physicians and other types of credit are included in the program offerings when appropriate.

Brochures and calendars for courses are available for more detailed information. For information concerning Continuing Medical Education programs, contact:

University of Washington School of Medicine  
Office of Continuing Medical Education  
Box 358220  
1325 4th Avenue, Suite 2000

## Anesthesiology

### DEPARTMENT OVERVIEW

BB1459 Health Sciences

The Department of Anesthesiology maintains an active program of teaching and research for both the specialist and nonspecialist. Medical students are introduced to the principles of anesthetic management and the effects of anesthetic agents on circulatory and respiratory physiology. The clinical-clerkship program provides basic training in airway management and care of the unconscious patient. A three-year residency program is available for physicians who desire specialty training in anesthesiology. In addition, advanced clinical and research training is offered in several major subspecialty areas (cardiac anesthesia, neuro-anesthesia, pediatric anesthesia, obstetrical anesthesia, pain management, and regional anesthesia). Opportunities for collaborative research are available to undergraduate and graduate students. The department conducts a regular series of clinical conferences, didactic lectures, and research seminars. Questions regarding medical student clerkships may be directed to Dr. John Bramhall at 206-231-2847 or [bramhall@uw.edu](mailto:bramhall@uw.edu). Other training questions may be directed to the Residency Coordinator at 206-543-2773 or [lfg@uw.edu](mailto:lfg@uw.edu).

## COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at [www.uw.edu/students/crscat/](http://www.uw.edu/students/crscat/).

**ANEST 498 Undergraduate Thesis (\*) Sivarajan** By special arrangement. Time and credit to be arranged. Offered: AWSpS.

**ANEST 499 Undergraduate Research (\*) Sivarajan** Specific research problems relating to pulmonary, cardiovascular, renal, obstetric, and central nervous system functions, and their alteration by anesthetic techniques and agents. (Six weeks, full-time. Limit: two students.) Offered: AWSpS.

**ANEST 501 P-Preceptorship in Anesthesiology (1) Sivarajan** An opportunity for first- and second-year medical students to gain experience with medical practice situations by observing clinical faculty members in their offices. Prerequisite: permission of instructor. Offered: AWSpS.

**ANEST 665 P-Basic Anesthesia Clerkship - Anchorage (4, max. 8) Sivarajan** Introduction to the principles of airway management, ventilatory support, use of local anesthetics, techniques of patient monitoring and fluid therapy. Skills taught include airway management, venipuncture, lumbar puncture and endotracheal intubation. Prerequisite: third- or fourth-year student. (Two weeks, full-time.) Offered: AWSpS.

**ANEST 667 P-Basic Anesthesia Clerkship Billings (4, max. 8)** Introduction to the principles of airway management, ventilatory support, use of local anesthetics, techniques of patient monitoring and fluid therapy. Skills taught include airway management, venipuncture, lumbar puncture and endotracheal intubation. Prerequisite: third- or fourth-year student. (Two weeks, full-time. Limit: three to five students each two-week period.) Affiliated hospitals. Offered: AWSpS.

**ANEST 668 P-Basic Anesthesia Clerkship Missoula (4, max. 8)** Introduction to the principles of airway management, ventilatory support, use of local anesthetics, techniques of patient monitoring and fluid therapy. Skills taught include airway management, venipuncture, lumbar puncture and endotracheal intubation. Prerequisite: third- or fourth-year student. (Two weeks, full-time. Limit: three to five students each two-week period.) Affiliated hospitals. Offered: AWSpS.

**ANEST 671 P-Basic Anesthesia Clerkship Boise (4, max. 8)** Introduction to the principles of airway management, ventilatory support, use of local anesthetics, techniques of patient monitoring and fluid therapy. Skills taught include airway management, venipuncture, lumbar puncture and endotracheal intubation. Prerequisite: third- or fourth-year student. (Two weeks, full-time. Limit: three to five students each two-week period.) Affiliated hospitals. Offered: AWSpS.

**ANEST 677 P-Basic Anesthesia Clerkship Swedish (4, max. 8)** Introduction to the principles of airway management, ventilatory support, use of local anesthetics, techniques of patient monitoring and fluid therapy. Skills taught include airway management, venipuncture, lumbar puncture and endotracheal intubation. Prerequisite: third- or fourth-year student. (Two weeks, full-time. Limit: three to five students each two-week period.) Affiliated hospitals. Offered: AWSpS.

**ANEST 678 P-Basic Anesthesia Clerkship VA (4, max. 8)** Introduction to the principles of airway management, ventilatory support, use of local anesthetics, techniques of patient monitoring and fluid therapy. Skills taught include airway management, venipuncture, lumbar puncture and endotracheal intubation. Prerequisite: third- or fourth-year student. (Two weeks, full-time. Limit: three to five students each two-week period.) Affiliated hospitals. Offered: AWSpS.

**ANEST 679 P-Basic Anesthesia Clerkship HMC (4, max. 8)** Introduction to the principles of airway management, ventilatory support, use of local anesthetics, techniques of patient monitoring and fluid therapy. Skills taught include airway management, venipuncture, lumbar puncture and endotracheal intubation. Prerequisite: third- or fourth-year student. (Two weeks, full-time. Limit: three to five students each two-week period.) Affiliated hospitals. Offered: AWSpS.

**ANEST 680 P-Basic Anesthesia Clerkship - UWMC (4)** *Siv-  
arajan* Introduction to the principles of airway management,  
ventilatory support, use of local anesthetics, techniques of  
patient monitoring and fluid therapy. Skills taught include  
airway management, venipuncture, lumbar puncture and  
endotracheal intubation. Prerequisite: third- or fourth-year  
student. (Two weeks, full-time. Limit: three to five students  
each two-week period.) Affiliated hospitals. Offered: AWSpS.

**ANEST 681 P-Advanced Clerkship in Anesthesiology (8, max.  
16)** *Siv-  
arajan* Clerkship for students desiring greater expo-  
sure to anesthesiology as a specialty. Individual programs  
can be arranged in the following areas: surgical anesthesia,  
obstetrical anesthesia, and pain clinic. Prerequisite: Third-  
or fourth-year student. (Four weeks, full-time. Limit: two  
students per period.) Affiliated hospitals. Offered: AWSpS.

**ANEST 682 P-Basic Anesthesia Clerkship - Anchorage (4)**  
*Siv-  
arajan* Introduction to the principles of airway manage-  
ment, ventilatory support, use of local anesthetics, tech-  
niques of patient monitoring and fluid therapy. Skills taught  
include airway management, venipuncture, lumbar punc-  
ture and endotracheal intubation. Prerequisite: third- or  
fourth-year student. (Two weeks, full-time.) Offered: AWSpS.

**ANEST 697 P-Anesthesiology Special Electives (\*, max. 24)**  
*Siv-  
arajan* Special clerkships, externships, or research op-  
portunities can at times be made available at institutions  
other than the University of Washington. Students wishing  
to elect this course should obtain a special assignment form  
from the Dean's office at least one month before advance  
registration. Prerequisite: permission of instructor. (Four to  
twelve weeks, full-time.) Offered: AWSpS.

**ANEST 699 P-WWAMI Anesthesiology Special Electives (\*,  
max. 24)** By special arrangement for qualified students,  
special clerkships or externships may be available at institu-  
tions other than the University of Washington located within  
the WWAMI region. Prerequisite: permission of department.

## Biochemistry

### PROGRAM OVERVIEW

303 Bagley

Biochemistry is the study of the living organism at the mo-  
lecular level. It draws on the techniques of analytical, or-  
ganic, inorganic, and physical chemistry in determining the  
molecular basis of vital processes.

### UNDERGRADUATE PROGRAM

#### Adviser

109 Bagley, Box 351700

206-616-9880, 206-543-9343, 206-685-8376

[advisers@chem.washington.edu](mailto:advisers@chem.washington.edu)

The Biochemistry Program offers the following programs  
of study:

- The Bachelor of Science degree with a major in bio-  
chemistry (requires 197 credits)
- The Bachelor of Arts degree with a major in biochemistry

#### Bachelor of Science

*Suggested First- and Second-Year Courses:* BIOL 180,  
BIOL 200 (or BIOL 201, BIOL 202); CHEM 142, CHEM 152,  
CHEM 162 (or CHEM 144, CHEM 154, CHEM 164; or CHEM  
145, CHEM 155, CHEM 165), CHEM 237, CHEM 238,  
CHEM 239, CHEM 241, CHEM 242; MATH 124, MATH 125,  
MATH 126; PHYS 121, PHYS 122, PHYS 123 (or PHYS 114,  
PHYS 115, PHYS 116 with one physics lab course strongly  
recommended).

#### Program Admission Requirements

Beginning spring quarter 2010, application to B.A. and  
B.S. degree programs in biochemistry is competitive. Appli-  
cants are considered in the following groups: Direct Fresh-  
man Admission, Early Admission, First-Year Admission, and  
Regular Admission. Completion of minimum requirements  
described below does not guarantee admission. All ap-  
plicants have the right to petition and appeal the depart-  
ment's admission decision. Applications are considered  
twice each academic year and are due on the second  
Friday of October and the second Friday of April, with the  
exception of Direct Freshman Admission. The application  
and additional information is available at [depts.washing-  
ton.edu/chem/undergrad/](http://depts.washington.edu/chem/undergrad/).

#### Direct Freshman Admission

- Open to freshman students formally admitted to the UW.
- Score of 5 on the AP chemistry examination.
- Indication on the UW freshman application of biochem-  
istry as the student's first choice of major.
- Successful direct-admission applicants generally have  
received a minimum 1400 on the SAT (math and verbal  
sections), or minimum 30 on the ACT.
- Admission is for autumn quarter only.

#### Early Admission

- Students with exceptional records can apply for consid-  
eration for early admission to the biochemistry major via  
the Honors or Research track. Students seeking early  
admission should submit an application that includes:
  - Cover sheet (available on the Department of Chem-  
istry website)
  - Unofficial transcript
  - Statement of purpose. May include a description of  
interest in biochemistry, career goals, undergraduate  
research interests, degree interest (B.A. or B.S.), and  
any other information applicant believes is useful in  
evaluating the application.
  - (Research Track only) Written letter or recommenda-  
tion from research adviser.
- Honors Track. Students participating in the chemistry  
Honors sequence who have completed the following  
courses with a minimum cumulative GPA of 3.00: CHEM  
145, CHEM 155 (10 credits); MATH 124 and MATH 125,  
or MATH 134 and MATH 135 (10 credits).
- Research Track. Students who have performed at least  
6 credits of undergraduate research (CHEM 199, CHEM  
299, or higher) and who provide a strong recommenda-  
tion from faculty research adviser. Chemistry under-  
graduate research may be considered as well.

#### First-Year Admission

- Course requirements: CHEM 142, CHEM 152, CHEM  
162 (or CHEM 144, CHEM 154, CHEM 164; or CHEM  
145, CHEM 155, CHEM 165) (15 credits). BIOL 180 (5  
credits); MATH 124, MATH 125 (or MATH 134, MATH  
135) (10 credits).
- Factors included in the admission decision include  
academic performance as measured by GPA in courses  
required for application, difficulty of other courses com-  
pleted, frequency of incompletes or withdrawal grades,  
number of repeated courses, relevant work and life ex-  
perience, and record of honors.
- Successful applicants for the B.S. biochemistry pro-  
gram typically have a cumulative GPA greater than 3.20  
in courses listed above under course requirements.  
Successful applicants for the B.A. biochemistry pro-  
gram typically have a cumulative GPA greater than 3.00  
in courses listed above under course requirements.

#### Regular Admission

- Course requirements: CHEM 142, CHEM 152, CHEM  
162 (or CHEM 144, CHEM 154, CHEM 164; or  
CHEM 145, CHEM 155, CHEM 165) (15 credits). CHEM  
237, CHEM 238 (or CHEM 335, CHEM 336) (8 credits).  
BIOL 180, BIOL 200 (10 credits). MATH 124, MATH 125  
(or MATH 134, MATH 135) (10 credits).
- Factors in the admission decision include academic  
performance as measured by GPA in courses required  
for application, difficulty of other courses completed,  
frequency of incompletes or withdrawal grades, number  
of repeated courses, relevant work and life experience,  
and record of honors.
- Successful applicants for the B.S. biochemistry pro-  
gram typically have a cumulative GPA greater than 2.50  
in courses listed above under course requirements, with  
no individual course grade lower than a 2.0. Successful  
applicants for the B.A. biochemistry program typically  
have a cumulative GPA greater than 2.00 in courses list-  
ed above under course requirements, with no individual  
grade below a 1.7.

#### Continuation Policy

Students enrolled in the degree programs in biochemis-  
try must maintain both a cumulative GPA and individual  
course grades consistent with requirements for their de-  
gree. Students pursuing B.S. degrees must maintain a  
minimum cumulative GPA of 2.50 for courses required for  
the major, and minimum 2.0 grades for individual courses  
required for the major. Students pursuing B.A. degrees  
must maintain a minimum cumulative GPA of 2.00 for  
courses required for the major, and a minimum 1.7 for  
individual courses required for the major. Failure to main-  
tain these GPA and grade standards results in the student  
being placed on academic probation for one quarter, and  
dropped from the major if marked improvement in academ-  
ic performance is not achieved. Students who experience  
extraordinary circumstances may petition for one or more  
additional probationary quarters.

#### Major Requirements

107 credits, as follows:

- *General Chemistry:* CHEM 142, CHEM 152, CHEM 162  
(or CHEM 144, CHEM 154, CHEM 164; or CHEM 145,  
CHEM 155, CHEM 165)
- *Organic Chemistry:* CHEM 237, CHEM 238, CHEM 239,  
CHEM 241, CHEM 242 (or CHEM 335, CHEM 336, CHEM  
337, CHEM 346, CHEM 347)
- *Physical Chemistry:* CHEM 452, CHEM 453 (or CHEM  
455, CHEM 456, CHEM 457)
- *Biochemistry:* BIOC 426, BIOC 440, BIOC 441, BIOC 442
- *Biology:* BIOL 180, BIOL 200
- *Mathematics:* MATH 124, MATH 125, MATH 126 (or  
MATH 134, MATH 135, MATH 136)
- *Physics:* PHYS 121, PHYS 122, PHYS 123 (or PHYS 114,  
PHYS 115, PHYS 116), with the PHYS 121 sequence  
recommended
- *Genome Science:* GENOME 371
- 11 credits chosen from a current department list (avail-  
able in 303 Bagley or at [depts.washington.edu/chem/  
undergrad/degreeeqs.html](http://depts.washington.edu/chem/undergrad/degreeeqs.html)) of upper-division science  
classes including math, biology, microbiology, chemis-  
try, and genome sciences. Up to 9 credits of approved  
advanced-level undergraduate research may also be ap-  
plied to this requirement. Research conducted outside  
chemistry or biochemistry must first be approved by a  
biochemistry adviser.
- *Grade and Graduation Requirements:* Minimum 2.50  
GPA required for all courses counted toward the major;  
minimum 2.0 grade required for all chemistry, biology,  
and biochemistry courses counted toward the major.  
Minimum 2.50 GPA required for the BIOC 440, BIOC

441, and BIOC 442 sequence. Minimum overall cumulative 2.50 GPA required for graduation.

## Bachelor of Arts

90–92 credits as follows:

- **General Chemistry:** either CHEM 142, CHEM 152, CHEM 162, (or CHEM 144, CHEM 154, CHEM 164; or CHEM 145, CHEM 155, CHEM 165)
- **Organic Chemistry:** either CHEM 237, CHEM 238, CHEM 239, CHEM 241, CHEM 242, or CHEM 335, CHEM 336, CHEM 337, CHEM 346, CHEM 347
- **Biochemistry:** BIOC 405, BIOC 406
- **Physical Chemistry:** CHEM 452, CHEM 453
- **Biology:** BIOL 180, BIOL 200
- **Mathematics:** either MATH 124, MATH 125, MATH 126, or MATH 134, MATH 135, MATH 136
- **Physics (12–15 credits):** either PHYS 121, PHYS 122, PHYS 123, or PHYS 114, PHYS 115, PHYS 116
- **Science Electives:** 9 credits to be taken from a current department list available in 303 Bagley or at [depts.washington.edu/chem/undergrad/degreeeqs.html](http://depts.washington.edu/chem/undergrad/degreeeqs.html). Up to 3 credits of advanced undergraduate research may count toward this requirement. Research conducted outside chemistry or biochemistry must first be approved by a biochemistry adviser.
- **Grade and Graduation Requirements:** Minimum grade of 1.7 in chemistry, biochemistry, and biology courses required for the major. Minimum cumulative 2.00 GPA required for graduation.

## Student Outcomes and Opportunities

- **Learning Objectives and Expected Outcomes:** At the conclusion of their studies, graduating biochemistry majors should possess a general working knowledge of the basic areas of biochemistry; be proficient in basic laboratory skills; have the ability to carry out strategies for solving scientific problems; have an understanding of the principles and applications of modern instrumentation, computation, experimental design, and data analysis; have had the opportunity to gain experience with a research project; have the ability to communicate scientific information clearly and precisely; have the ability to read, understand, and use scientific literature; have an awareness of the broader implications of biochemical processes; have had the opportunity to work as part of a team to solve scientific problems; and have had an introduction to opportunities in, and requirements for, the careers available to biochemistry majors. Students planning a career in biomedical research, the health professions, or biotechnology find the biochemistry degree to be an excellent choice. The degree is also good preparation for graduate school in any aspect of biochemical or biomedical research.
- **Instructional and Research Facilities:** Research facilities for the department are housed in the Biochemistry-Genetics Building, which provides approximately 52,000 square feet of research space, conference rooms, and a departmental library. In the immediate vicinity are the departments of Immunology, Genome Sciences, Microbiology, and Pharmacology, as well as programs in biomolecular structure, molecular medicine, neurobiology and molecular and cellular biology, with which the department has common research interests. Laboratories are equipped with modern research equipment and are supported by external, centralized research facilities. An emphasis on biomedical research is facilitated by the location of the department within the School of Medicine.
- **Honors Options Available:** College Honors (Completion of both Interdisciplinary Honors and Departmental Honors requirements). Departmental Honors (see adviser for requirements).

- **Research, Internships, and Service Learning:** No formal internship program. Students are encouraged to pursue national and regional internships. See adviser for more information.
- **Program Scholarships:** Resident tuition scholarships and book prizes are awarded annually by the Department of Chemistry to eligible chemistry and biochemistry majors. Applications are available during the month of March for the following academic year. See department adviser for more information.
- **Student Organizations/Associations:**
  - Alpha Chi Sigma: the UW affiliate of the national chemistry-related science organization for chemistry and biochemistry majors
  - Phi Lambda Upsilon: the UW affiliate of the national chemistry honorary society
  - The Free Radicals: a general undergraduate club for chemistry and biochemistry majors.

### Of Special Note:

- This degree requires a minimum of 197 credits.
- Students are strongly encouraged to participate in undergraduate research.

## COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at [www.uw.edu/students/crscat/](http://www.uw.edu/students/crscat/)

**BIOC 405 Introduction to Biochemistry (3) NW** Brockerhoff, Daum, Hol, Survey of basic principles of biochemistry and molecular biology, emphasizing broad understanding of chemical events in living systems in terms of metabolism and structure-function relationships of biologically important molecules. Suitable for pre-majors, for students interested in careers in medicine, dentistry, pharmacy, medical technology. Prerequisite: BIOL 200; either CHEM 223, CHEM 237, or CHEM 335. Offered: A.

**BIOC 406 Introduction to Biochemistry (3) NW** Hurley, Merz Survey of basic principles of biochemistry and molecular biology, emphasizing broad understanding of chemical events in living systems in terms of metabolism and structure-function relationships of biologically important molecules. Suitable for pre-majors, for students interested in careers in medicine, dentistry, pharmacy, medical technology. Prerequisite: BIOC 405. Offered: W.

**BIOC 426 Basic Techniques in Biochemistry (4) NW** Chung, Petra Introduction to basic biochemistry experiments. Acquaints students (largely Biochemistry majors) with basic biochemical laboratory techniques. Prerequisite: BIOC 440, which may be taken concurrently. Offered: ASp.

**BIOC 440 Biochemistry (4) NW** Bosch, Kleivit Biochemistry and molecular biology (with quiz sections) for undergraduate students in molecular and cellular biology, for biochemistry majors, and graduate students in other science departments. Prerequisite: 2.5 BIOL 200; 2.5 in either CHEM 224, CHEM 239, or CHEM 337; 2.0 in either MATH 124, MATH 134, or MATH 144. Offered: A.

**BIOC 441 Biochemistry (4) NW** Parson, Young Biochemistry and molecular biology (with quiz sections) for undergraduate students in molecular and cellular biology, for biochemistry majors, and graduate students in other science departments. Prerequisite: 2.2 in BIOC 440. Offered: W.

**BIOC 442 Biochemistry (4) NW** Kimelman, Palmiter Biochemistry and molecular biology (with quiz sections) for undergraduate students in molecular and cellular biology, for biochemistry majors, and graduate students in other science departments. Prerequisite: either 2.2 in BIOC 406 or 2.2 in BIOC 441. Offered: Sp.

**BIOC 496 Research Seminar for Undergraduates (1, max. 2) NW** formal presentations of student research. One credit applies to research component of a relevant major. Credit/no credit only. Offered: jointly with CHEM 496; Sp.

**BIOC 499 Undergraduate Research (\*)** Investigative work on enzymes, proteins, lipids, molecular biology, developmental biology, intermediary metabolism, physical biochemistry, and related fields. Credit/no credit only. Offered: AWSpS.

**BIOC 515–519** (For description, see listing for “Current Literature Conferences” at the end of this section.)

**BIOC 520 Seminar (1)** Seminar dealing with timely topics in the field of biochemistry. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSpS.

**BIOC 525–529** (For description, see listing for “Current Literature Conferences” at the end of this section.)

**BIOC 530 Introduction to Structural Biology (3) Baker, Gelb, Hol, Kleivit, Sten Kamp, Stoddard** Graduate-level discussion of the structure, function, and chemistry of proteins, control of enzymatic reactions. Prerequisite: a comprehensive course in biochemistry and permission. Offered: A.

**BIOC 533 Topics In Biochemistry (1, max. 30)** Provides in-depth examination of current topics in biochemistry, molecular biology, and structural biology. Designed to help participants in basic science departments become acquainted with latest ideas on selected topics. Emphasis on analysis of key concepts in the field with reference to classical papers and recent literature. Prerequisite: permission of instructor. Offered: AWSpS.

**BIOC 534 Topics In Molecular Biophysics (1.5)** Emphasis on methods used to study macromolecular structure and dynamics, including x-ray crystallography, NMR, optical spectroscopy, computer modeling, protein folding and ligand binding. Two topics covered each quarter; students may register for one or both. Prerequisite: permission of instructor. Offered: AWSpS.

**BIOC 535–539** (For description, see listing for “Current Literature Conferences” at the end of this section.)

**BIOC 540 Literature Review (2) Parson** Emphasizes critical evaluation of original articles in the literature. For first-year graduate students in biochemistry and students of other science departments, with permission. Offered: jointly with BMSD 540 A.

**BIOC 541 Literature Review (2) Palmiter** Emphasizes critical evaluation of original articles in the literature. For first-year graduate students in biochemistry and students of other science departments, with permission. Offered: W.

**BIOC 542 Literature Review (2) Morris** Emphasizes critical evaluation of original articles in the literature. For first-year graduate students in biochemistry and students of other science departments, with permission. Offered: Sp.

**BIOC 546–548** (For description, see listing for “Current Literature Conferences” at the end of this section.)

**BIOC 555–559** (For description, see listing for “Current Research Conferences” at the end of this section.)

**BIOC 565–569** (For description, see listing for “Current Research Conferences” at the end of this section.)

**BIOC 575–579** (For description, see listing for “Current Research Conferences” at the end of this section.)

**BIOC 581 Introduction to Biochemical Research (4, max. 16)** Student works with one of the research groups within the department for one quarter and then rotates to other laboratories for second and third quarters. Credit/no credit only. Prerequisite: graduate standing in biochemistry or permission of instructor. Offered: AWSpS.

**BIOC 586–588** (For description, see listing for “Current Research Conferences” at the end of this section.)

**BIOC 600 Independent Study or Research (\*)** Offered: AWSpS.

**BIOC 700 Master’s Thesis (\*)** Offered: AWSpS.

**BIOC 800 Doctoral Dissertation (\*)** Offered: AWSpS.

<4>Current Literature Conferences

**BIOC 515–519, 525–529, 535–539, 546–548 Current Literature Conference in Biochemistry** Weekly literature reviews of topics pertinent to ongoing research in biochemistry.

Students may register for more than one conference each quarter. Credit/no credit only. Prerequisite: permission of instructor. (Only 25 credits may be counted toward degree.)

**BIOC 515 Matrix Macromolecules in Morphogenesis and Development (1, max. 30)**

**BIOC 516 Molecular Mechanisms of Blood Clotting (1, max. 30)** *Davie* Offered: AWSpS.

**BIOC 517 Protein Structure (1, max. 30)** *Baker* Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSpS.

**BIOC 518 Signaling in Development (1, max. 30)** *Ruohola-Baker* Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSpS.

**BIOC 525 Phytoremediation (1, max. 4)** Literature survey of phytoremediation topics. Discussion of latest techniques for the use of plants to concentrate heavy metals in the soil and of plants and plant-bacteria combinations to detoxify various organic contaminants. Credit/no credit only.

**BIOC 526 Control of Growth and Differentiation During Development (1, max. 30)** *Hauschka* Credit/no credit only. Offered: AWSpS.

**BIOC 528 Signal Transduction (1, max. 30)** *Hurley* Credit/no credit only. Offered: AWSpS.

**BIOC 529 Molecular Biology of Early Development (1, max. 30)** *Kimelman* Offered: AWSpS.

**BIOC 535 Macromolecular Structure (1, max. 30)** *Klevit* Offered: AWSpS.

**BIOC 536 Control of Cell Growth (1, max. 30)** *Morris* Offered: AWSpS.

**BIOC 537 Regulation of Gene Expression (1, max. 30)** *Palmiter* Offered: AWSpS.

#### Current Research Conferences

**BIOC 555-559, 565-569, 575-579, 586-588 Current Research Conferences in Biochemistry** Weekly group conferences concerning ongoing graduate student and post-doctoral research in biochemistry. Students may register for more than one conference each quarter. Credit/no credit only. Prerequisite: permission of instructor. (Only 25 credits may be counted toward degree.)

**BIOC 555 Cell and Molecular Biology of Connective Tissue Proteins (1, max. 30)** *Bornstein* Offered: AWSpS.

**BIOC 556 Enzymatic and Genetic Aspects of Blood Clotting (1, max. 30)** *Davie* Offered: AWSpS.

**BIOC 557 Growth Regulation by Calcium Binding Proteins (1, max. 30)** *Davis* Offered: AWSpS.

**BIOC 559 Membrane Biochemistry and Cell Growth (1, max. 30)** *Glomset* Offered: AWSpS.

**BIOC 560 Protein Folding (1, max. 30)** *Baker* Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSpS.

**BIOC 561 Origin of Polarity (1, max. 30)** *Ruohola-Baker* Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSpS.

**BIOC 565 Plant Molecular Genetics (1, max. 30)**

**BIOC 566 Growth and Differentiation of Skeletal and Cardiac Muscle (1, max. 30)** *Hauschka* Offered: AWSpS.

**BIOC 568 Molecular and Genetic Aspects of G Protein Signal Transduction (1, max. 30)** *Hurley* Offered: AWSpS.

**BIOC 569 Inductive Events in Early Development (1, max. 30)** *Kimelman* Offered: AWSpS.

**BIOC 575 NMR Analysis of Proteins and Nucleic Acids (1, max. 30)** *Klevit* Offered: AWSpS.

**BIOC 576 Sequential Analysis of Growth Regulation (1, max. 30)** *Morris* Offered: AWSpS.

**BIOC 577 Gene Regulation in Transgenic Mice (1, max. 30)** *Palmiter* Offered: AWSpS.

**BIOC 578 Electron Transport in Photosynthesis (1, max. 30)** *Parson* Offered: AWSpS.

**BIOC 588 Molecular Biology of Yeast Gene Regulation (1, max. 30)** *Young* Offered: AWSpS.

## Bioethics and Humanities

### UNDERGRADUATE PROGRAM

#### Adviser

A204 Health Sciences Building

Box 357120

206-543-5145

[bhinfo@uw.edu](mailto:bhinfo@uw.edu)

The Department of Bioethics and Humanities offers the following programs of study:

- A minor in bioethics and humanities

#### Minor

*Minor Requirements:* 25 credits of bioethics and humanities and related courses (15 of the 25 credits must be B H), with a minimum 2.0 grade required in each course presented for the minor.

- One of the following core courses: B H 411, B H 474/PHIL 411, PHIL 240, or PHIL 242.
- One of the following core courses: B H 401, B H 417, or B H 481.
- Electives selected from the following to bring total credits for the minor to 25. (15 credits for the minor must be B H courses.) B H 401, B H 402/PHIL 412, B H 404/PHIL 413, B H 411, B H 417, B H 440/PHIL 459, B H 474/PHIL 411, B H 481, B H 483, B H 485, B H 497, B H 499; ANTH 305, ANTH 308, ANTH 322, ANTH 374, ANTH 375, ANTH 440, ANTH 474, ANTH 475/HSERV 475, ANTH 476, ANTH 477, ANTH 479, CHID 332, CHID 433, CHID 434, GEOG 280, GEOG 380, GEOG 480, G H 201, HIST 311, HIST 312, HSTAA 316, HUM 211, NURS 410, NURS 412, PHARM 493, PHIL 102, PHIL 160, PHIL 240, PHIL 242, PHIL 345, PHIL 360, PHIL 409, PHIL 410, PHIL 415, PHIL 440, PHIL 460, PHIL 481, and PHIL 482.
- Core courses (listed in 1 and 2, above) may be used as electives if they are not counted toward the core requirements. If a B H course is cross-listed with another department's course, the course may be counted toward the B H-course minimum even if taken under the other department's prefix.

### GRADUATE PROGRAM

#### Graduate Program Coordinator

206-221-6548

[gradprog@uw.edu](mailto:gradprog@uw.edu)

The department offers a master of arts in bioethics, which provides students the foundational knowledge, skills, and experience to enrich their careers and broaden their competency in bioethics. The program offers training in research and clinical aspects of bioethics as well as empirical and normative methods of analysis, in conjunction with another professional degree. It also prepares students to teach, publish, and conduct research that incorporates bioethical analysis. Opportunities for in-depth focus on a topic of interest are available through elective courses, mentored research, and individualized practicum experiences.

The curriculum is a flexible two-year program. The target population is post-doctoral clinical fellows and graduate students concurrently enrolled in professional degree programs at the UW (i.e., law, nursing, or medicine).

### Application and Admission

Qualified candidates include:

- Physicians accepted into a UW clinical fellowship program or the Treuman Katz Pediatric Bioethics Fellowship program,
- Students enrolled in a graduate program in the Schools of Law or Nursing, or in the undergraduate medical education program in the School of Medicine.
- Others with relevant healthcare, professional, or research background should contact the Director of Graduate Studies prior to applying.

Candidates should possess strong writing, critical thinking, and verbal communication skills. GRE scores are not required. Application due date is March 1.

### Degree Requirements

40 credits, as follows:

- Ethical theory (10 credits)
- Empirical research methods (6 credits)
- Clinical ethics (6 credits)
- Research ethics (3 credits)
- Approved electives (6 credits)
- Practicum (3 credits)
- Master's project (6 credits)

Students are encouraged to take additional electives based on interest and area of specialty, with guidance from their faculty mentor(s).

### COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at [www.uw.edu/students/crscat/](http://www.uw.edu/students/crscat/)

**B H 401 History of Modern Medicine (3) I&S** *Berryman* Survey of evolution of medical theory, practice, and institutions in European and American society from the late 18th century to the present. Medical background not required. Recommended: prior courses in sciences and/or history.

**B H 402 Ethical Theory (5) I&S** *Jecker* Studies the major normative ethical theories, including both teleological and deontological approaches. Emphasizes moral philosophy during the eighteenth and nineteenth centuries, as well as contemporary commentary. Recommended: one basic course in ethics. Offered: jointly with PHIL 412.

**B H 404 Metaethical Theory (5) I&S** *Jecker* Studies the major metaethical theories, including both cognitivist and noncognitivist approaches. Emphasizes moral philosophy during the twentieth century, as well as contemporary commentary. Recommended: one introductory philosophy course. Offered: jointly with PHIL 413.

**B H 411 Introduction to Bioethics (3) I&S** *Jecker* Case-based approach to major topics in bioethics, such as abortion, genetic testing, physician-assisted suicide, and euthanasia. Emphasizes utilizing ethical principles and methods of case analysis.

**B H 417 Disease in History (3) I&S** *Whorton* Study of Western civilization's experience with epidemic disease, the growth of understanding of the causes of disease, the formation of a philosophy of prevention, and the development of programs to protect the public health. Emphasis on the last two centuries. Medical background not required.

**B H 440 Philosophy of Medicine (5) I&S** *Jecker* Familiarizes students with central issues in the philosophy of medicine. Focuses on the nature of medical knowledge, the connection between theory and observation, the meaning of medical concepts, and the relationship between theories and the world. Recommended: prior courses in philosophy, history of science, or history of medicine. Offered: jointly with PHIL 459.

**B H 474 Justice in Health Care (5) I&S/VLPA** *Jecker* Examination of the ethical problem of allocating scarce medical resources. Emphasizes the fundamental principles of justice that support alternative health policies. Recommended: prior courses in philosophy or ethics. Offered: jointly with PHIL 411.

**B H 481 The Pursuit of Health in American Society (3) I&S** *Whorton* Examination of the development of concern for personal health over the past two centuries, and of the evolution of philosophies and practices of health promotion. Emphasis on the influence of both medicine and popular culture on shaping of attitudes toward diet, exercise, alcohol, drugs, sex, and other health behavior.

**B H 483 The Rise and Development of Sports Medicine (3) I&S** *Berryman* Evolution of medical thought related to exercise for good health, training for sport participation, and treatment of sport-related injuries. Begins with ancient period, concludes with present. Development of specialization in sports medicine, sport team physicians, preventive medicine, concepts of fitness and wellness as related to exercise prescription, and exercise science.

**B H 485 Concepts of the Body in Nineteenth- and Twentieth-Century America (3) I&S** *Berryman* Investigation of ideas relating to corporeal self in nineteenth- and twentieth-century America. Evolution of physical ideals of manliness/femininity, how ideals related to surrounding culture, how different bodily activities developed to realize ideals. Athleticism, physiognomy, beauty contests, body building, decorations, cosmetics, anthropometry, and phenology.

**B H 497 Bioethics and Humanites Special Electives (\*, max. 30)**

**B H 499 Undergraduate Research (\*, max. 5)** Investigative work in biomedical ethics or history of the biomedical sciences.

**B H 501 Alternative Approaches to Healing (2)** Surveys the different philosophies and practices of the major alternative approaches to healing. Provides a characterization of alternative medicine accompanied by presentations by practitioners of chiropractic, naturopathic, homeopathic, traditional Chinese medicine, energy, and mind-body therapies. Credit/no credit only.

**B H 505 Professional Seminar I (3)** Methods for identifying a bioethics research question and developing a systematic approach to investigating it, including utilization of bibliographic sources in bioethics, philosophy, history. Prerequisite: permission of instructor.

**B H 506 Professional Seminar II (2)** Includes conducting research in ethics, writing, giving oral presentations, facilitating seminars, developing curriculum vitae, and career planning.

**B H 511 P-Medical Ethics (2)** *McCormick* Studies ethical problems arising in clinical settings of medicine; introduces philosophical analysis and argument in practical contexts. Includes clinician-guest speakers. Credit/no credit only.

**B H 512 P-The Human Face of Medicine (2)** *McCormick* Readings and discussing literature by and about physicians and patients to better understand the human values undergirding medical practice and ethical issues arising in the "doctor-patient" relationship.

**B H 513 P-Ethical Responsibilities of Medical Practice (2)** *Dudzinski, McCormick* Provides intensive and practical guidance about management of principal ethical and legal problems that arise in clinical practice: informed consent, confidentiality, decisions regarding life-support, advance directives and surrogate decision-makers, duty to care for indigent and risky patients. Offered: one-week intensive; S.

**B H 514 Legal, Ethical, and Social Issues in Public Health Genetics (3)** *Kuszler, Mastroianni* Equips the student to anticipate and assess potential legal, ethical, and social barriers complicating the incursion of new genetic advances, information, and technologies into public and private health care delivery efforts. Prerequisite: GENET 371 or equivalent. Offered: jointly with LAW H 504/PHG 512; W.

**B H 515 Public Commentary on Ethical Issues in Health Genetics (3)** *Edwards* Explores issues in public health genetics through academic commentary, personal narratives, science fiction, and film using ethical frameworks from narrative ethics, feminist ethics, and principlism. Includes cloning, assisted reproduction, prenatal genetic testing presymptomatic genetic testing, gene therapies, scientific responsibility, and GMOs. Graduate students only. Offered: jointly with PHG 525; Sp.

**B H 516 Ethical Frameworks for Public Health Genetics (3)** *Mastroianni* Application of ethical principles to problems in genetics practice, policy, and research. Includes: historical experiences with genetic screening and genetic engineering; application of ethical frameworks to emerging problems in public health genetics. Prerequisite: LAW H 514/B H 514/PHG 512 or permission of instructor. Offered: jointly with PHG 522; W.

**B H 517 Respectful Death: Exploring Interdisciplinary End-of-Life Care (3)** *Farber, McCormick* Explores end-of-life care and develops the skills necessary to provide respectful care in a collaborative, team setting to patients and families living with serious life limiting illness during the last 6–12 months of life. Offered: jointly with FAMED 546.

**B H 518 Spirituality in Health Care (2)** *Carrigan, Farber, McCormick* Examination of the beliefs, values, meaning, and spirituality of health professionals for the well-being of their patients as well as for themselves. Offered: jointly with FAMED 547/SOC W 587.

**B H 523 Biomedical Ethics (3)** *McCormick* Selected topics in medical ethics emphasizing methods of ethical reasoning about moral dilemmas and contributions of philosophical theories and principles to practical problems of medicine. Students provided with opportunities to test their value assumptions and analytical skills. Open to graduate and professional students and others with appropriate background.

**B H 527 Research Methods in Bioethics (3)** *Starks* Introduces the range of methods available for conducting research in bioethics, including both normative and empirical approaches using quantitative and qualitative methods. Students formulate research questions and explore how the application of these approaches generate different research results and products. Offered: Sp.

**B H 530 Genetic Discovery in Medicine and Public Health (3)** *Burke* Addresses the implications of discoveries in genetic science for clinical and public health practice, with an emphasis on health policy and ethics. Offered: jointly with PHG 542; W.

**B H 535 Medical Ethics and Jurisprudence (3)** *Dudzinski, Kuzler* Examines the relationship between bioethics and law. Reviews the basic concepts of both disciplines; their theoretical and practical connections. Analysis of principle legal cases and statutes illustrating such issues as informed consent to treatment, foregoing life support, research with human subjects, confidentiality, and allocation of health care resources.

**B H 536 Research Ethics and Regulation (3)** *Mastroianni* Explores the ethical foundations, principles and concepts, and U.S. laws related to the conduct of research with human subjects. Required for graduate students in the Department of Medical History and Ethics, School of Medicine. Offered: jointly with LAW H 536; W.

**B H 548 Methods in Clinical Ethics (3)** *Schellenberg* Introduces the history, practice, and research methods in clinical ethics. Case-based examination of methods including principlism, casuistry, narrative methods, virtue ethics. Prerequisite: permission of instructor. Offered: A.

**B H 549 Classic Cases in Bioethics (3)** *Dudzinski* Analysis of complex ethical cases from UWSOM clinical departments, case law, literature, and media. Case discussions focus on implications for delivery of medical care. Prerequisite: permission of instructor.

**B H 550 Current Topics in Bioethics (3)** *Edwards* Analysis of complex ethical cases from UWSOM clinical departments, literature, and media. Case discussion focuses on public policy implications. Prerequisite: permission of instructor.

**B H 551 Human Genomics: Science, Ethics, and Society (3)** *Fullerton* Explores the ethical and social implications of human molecular genetics and genomics investigation. Recent research is critically evaluated for its potential impact on scientific practice, research participation, and societal understandings. Prerequisite: LAW H 504/B H 514/ PHG 512 or permission of instructor. Offered: jointly with PHG 551/ GENOME 573; A.

**B H 552 Advanced Qualitative Methods (4)** *Starks* Examines and compares phenomenology, discourse analysis, and grounded theory. Reviews the history of ideas and critically reads examples of published articles to appreciate how each method frames questions and produces different analyses.

**B H 553 International Research Ethics, Law and Policy (3)** *Rivin* Exploration of legal requirements and ethical principles related to responsible conduct and research in a variety of different government structures, health care systems and research environment. Compares and contrasts law and ethical standards applicable to research enterprises in developing countries, industrialized countries, and ethically distinct communities. Offered: jointly with LAW H 511; A.

**B H 554 Ethics in Clinical Contexts (2)** *Cooper, Edwards* Introduces the tools of clinical ethics in the context of case studies drawn from specific medical specialties. Focuses on ethical issues in clinical cases; special emphasis on understanding perspectives of clinician, patient, and trainee. Credit/no credit only.

**B H 560 Genomics, Ethics, and Policy (2)** *Burke, Edwards, Fullerton, Starks* Explores the intersection of genomics, ethics, and policy, with a particular focus on examining the benefits of genomics for medically underserved communities. Offered: S.

**B H 595 Ethics Practicum (1–6, max. 6)** Students participate in clinical ethics rounds, case discussions, review of research protocols, or other professional activities related to bioethics. Credit/no credit only. Prerequisite: by permission of instructor.

**B H 596 Masters Research Project ([1–12]-, max. 12)** Research project culminating in a scholarly paper suitable for publication in a peer-reviewed journal. Credit/no credit only. Majors only.

**B H 597 Special Topics in Medical Ethics (1-, max 15)** Various special topics in medical ethics. Offered: AWSpS.

**B H 600 Independent Study or Research (\*)**

## Biological Structure

### DEPARTMENT OVERVIEW

G514 Health Sciences

The department promotes an understanding of biological processes through the study and analysis of structure-function relationships. The research problems that interest members of the faculty are diverse, including cellular differentiation and development explored in a variety of biological systems, neuroscience, molecular biophysics, biomolecular structure, and quantitative biology with an emphasis on computer-graphic representations of biological structures. This diversity creates a lively atmosphere in the department that provides a stimulating environment for the training of scientists with a variety of backgrounds.

The Department of Biological Structure recruits students through interdisciplinary PhD programs at the University of Washington. Faculty of the Department of Biological Structure are affiliated with one or more of these programs that provide high quality training in a wide range of scientific research areas. These multidisciplinary programs include faculty from the departments of Biochemistry, Bioengineering, Biological Structure, Biology, Environmental Health, Genetics, Immunology, Microbiology, Molecular Biotechnology, Oceanography, Pathobiology, Pathology,

Pharmacology, and Physiology and Biophysics, as well as research groups in the Fred Hutchinson Cancer Research Center.

The department does not offer a specific course of study leading to a Master of Science degree. An MS degree may be awarded, however, for students who meet the following requirements: One year of coursework (30 credits), concentrating in one or more areas that include neurobiology, cell and molecular biology, or developmental biology. Minimum 30 credits of research. Basic knowledge of statistics. One quarter of teaching as an assistant. A thesis committee approves the course of study, administers a general examination and reviews the research proposal prior to the thesis defense.

## COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at [www.uw.edu/students/crscat/](http://www.uw.edu/students/crscat/).

**B STR 301 General Anatomy (4) NW Pittack** Survey of systemic human anatomy, including human skeletal system, muscular system, respiratory system, circulatory system, nervous system, digestive system, endocrine system, urinary system, and reproductive system. For second-, third-, and fourth-year undergraduates. Offered: Sp.

**CONJ 401, 402, 403 Human Anatomy and Physiology (4, 4, 4)** See Conjoint Courses.

**B STR 431 Introduction to Neuroanatomy (4) NW Broderson, Mulligan, Westrum** Survey of the anatomy and functional organization of the human central nervous system, with clinical applications. Prerequisite: admission to the School of Dentistry. Offered: W.

**CONJ 480 Neuroscience and Rehabilitation Professionals (5)** See Conjoint Courses.

**B STR 498 Undergraduate Thesis (\*)** Individual research projects under the supervision of an instructor. For senior medical students. Offered: AWSpS.

**B STR 499 Undergraduate Research (\*)** Individual research projects in cellular and developmental biology, experimental immunology, reproductive biology, neurobiology, molecular structure, morphometrics, computer modeling, and related fields under the supervision of an instructor. Offered: AWSpS.

**B STR 501 Gross Anatomy and Embryology (1-13, max. 13) Clark** Lecture and laboratory dissection course in regional anatomy: thorax, abdomen, pelvis, perineum. Prerequisite: permission of instructor. Offered: A.

**B STR 502 Gross Anatomy (1-5, max. 5) Graney** Lecture and laboratory dissection course in regional anatomy: upper and lower extremities. Prerequisite: permission of instructor. Offered: W.

**B STR 510 Seminar in Anatomy (1) Graney** Scientific and historical basis of selected studies in biological structure, anatomy, and human development. Original literature used as basis for textbook descriptions is reviewed. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSp.

**B STR 512 Human Microanatomy (4) Muller** Lectures and laboratory treating the specialized tissues and organs of the body from the microscopic and ultramicroscopic points of view. Prerequisite: permission of instructor. Offered: A.

**B STR 515 Biological X-Ray Structure Analysis (3) Stenkamp** Theory of x-ray diffraction, with emphasis on applications to biological systems. Prerequisite: permission of instructor. Offered: W.

**B STR 519 Current Problems in Macromolecular Structure (2, max. 10) Stenkamp** A discussion of macromolecular structures related to specific areas of biological research. Emphasis on discussion of relevant research papers and use of computer graphics to visualize the molecular structures. Offered: AWSpS.

**CONJ 520 Anatomy and Autopsy (1/2, max. 2) Fligner** See Conjoint Courses.

**B STR 520 Structure Based Design of Drugs (3) Hol, Verlinde** Lecture and discussion on research papers illustrating protein structure based design of new drugs. Review of methods and extensive discussion of all known mechanisms of drug resistance. Offered: even years; W.

**B STR 521 Advanced Biomacromolecular Crystallography (3) Hol, Merritt, Stenkamp** Aspects of protein crystallography ranging from crystal growth, phase determination methods, density averaging to refinement, fiber diffraction of DNA and proteins. Offered: odd years; Sp.

**CONJ 524 Structural Basis of Neural Transduction (1.5)** See Conjoint Courses.

**UCONJ 524 Developmental Neurobiology (3) Raible, Reh, Roelink, Rubel** See University Conjoint Courses.

**B STR 530 P-Gross Anatomy and Embryology for Dental Students (8/13, max. 13) Broderson, Clark** Normal anatomy of the thorax, abdomen, pelvis, and perineum are discussed and dissected employing cadavers. The development of the organ systems is presented and related to definitive adult structure. Developmental anomalies and diagnostic anatomy are also discussed. Prerequisite: admission to School of Dentistry. Offered: A.

**B STR 540 Special Problems in Anatomy (1-6, max. 6)** Special projects in anatomy under sponsorship of faculty member. Prerequisite: graduate, medical, or dental student standing and permission of instructor. Offered: AWSpS.

**B STR 541 P-Microscopic Anatomy for Dental Students (4) Muller** Lecture and laboratory work in microscopic anatomy. For dental students taking HUBIO 510; others by permission of instructor. Offered: A.

**CONJ 542 Development (1.5)** See Conjoint Courses.

**CONJ 545 Molecular Interactions and Medicine (1.5)** See Conjoint Courses.

**B STR 555 Laboratory Rotation in Biological Structure (\*, max. 5)** Introduction to experimental design, research methods, and scientific thought in laboratories of faculty members. Provides hands-on experience, an entrance into the literature of the field, and opportunities for discussion with all members of the laboratory. First-year dental students only. Prerequisite: permission of instructor. Offered: AWSpS.

**B STR 557 Biomolecular Structure Seminar (1) Hol** Literature review of key research in Biomolecular Structure in the form of short presentations by participants followed by discussion. Critical evaluation of methods and results regarding properties and protein structure determination. Credit/no credit only. Prerequisite: graduate standing in biological structure or biochemistry and permission of instructor. Offered: AWSp.

**B STR 580 P-Anatomy Teaching Practicum (\*, max. 8) Clark** Opportunity for medical student (or other professional student) to gain teaching experience in biological structure and human biology courses, including gross anatomy, histology, and neuroanatomy. May include lecture, laboratory, conference, depending on student interest, experience. Credit based on course credit in which student is assisting. Prerequisite: permission of course chairperson. Offered: AWSp.

**B STR 584 Seminar in Neurogenesis (1) Bermingham-McDonogh** Discussion of current research on process by which neurons are generated in the nervous system. Offered: AWSpS.

**CONJ 585 Surgical Anatomy (1-3, max. 12) Graney** See Conjoint Courses.

**B STR 591 X-Ray and NMR Analysis of Macromolecular Structure (1, max. 9) Hol** Weekly discussion of current topics in research on molecular structure, usually emphasizing techniques of x-ray crystallography. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSpS.

**B STR 598 Reading in Biological Structure (2)** Critical evaluation of research in biological structure, including current problems, methods and future directions by reading and

discussing research and review papers. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSpS.

**B STR 600 Independent Study or Research (\*)** Offered: AWSpS.

**B STR 700 Master's Thesis (\*)** Offered: AWSpS.

**B STR 800 Doctoral Dissertation (\*)** Offered: AWSpS.

## Comparative Medicine

### DEPARTMENT OVERVIEW

T142 Health Sciences

The Department of Comparative Medicine provides education and research opportunities in the use of animals in biomedical research, testing, and education. In addition, training is provided for veterinarians in the diagnosis, treatment, and prevention of the diseases of laboratory animals. Current educational programs include scheduled courses in the principles and techniques of animal experimentation (C MED 407) for biomedical graduate students, zoonotic diseases, and training in laboratory-animal medicine for veterinary medical students and veterinarians, combined with a Master of Science degree program in comparative medicine. Areas of current research interests include enteric disease, lymphocyte biology, biology of aging, mouse genomics, generation and characterization of transgenic animal models, somatic cell gene transfer, and animal models of gene therapy.

### GRADUATE PROGRAMS

**Graduate Program Coordinator**

T136 Health Sciences, Box 351790

206-685-3261

### Postdoctoral Program

Postdoctoral training in the areas of laboratory animal medicine and comparative pathology is offered to persons with a D.V.M. or equivalent degree. Training consists of a combination of coursework, clinical residency rotations, and research leading to a Master of Science degree in comparative medicine. The program also prepares participants for specialty certification by the American College of Laboratory Animal Medicine. Financial assistance is normally provided. A detailed description of the postdoctoral program is available on the department's website at [depts.washington.edu/compmed/](http://depts.washington.edu/compmed/).

### Master of Science

The Master of Science degree in comparative medicine provides advanced training in comparative medicine to veterinarians. Admission to the degree program requires acceptance into the department's postdoctoral training program. The degree option involves additional elective courses, the completion of a more-involved research project, and a thesis.

### Predocorial Program

This program is designed to acquaint veterinary medical students with laboratory-animal medicine as a veterinary specialty. Specific areas covered include control/treatment of the principal diseases of common laboratory animals and their role in biomedical research. Blocks of four to eight weeks are available for fourth-year students year-round. Stipend support is normally provided.

## COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at [www.uw.edu/students/crsctat/](http://www.uw.edu/students/crsctat/).

**C MED 407 Principles of Animal Experimentation: The Mouse (3)** Brabb, Grossmann, Treuting Focus on biology and care of mice used in medical research, and the experimental design and ethics of animal research. Includes lectures and problem-based learning. For graduate and advanced undergraduate students. Prerequisite: permission of instructor. Offered: AWPSP.

**C MED 499 Undergraduate Laboratory Research (1–6, max. 6)** Ladiges, Price Specific problems in comparative medicine. Credit/no credit only. Offered: AWPSP.

**C MED 512 Introduction to the Anatomical Analysis of Animal Disease (2)** Brabb, Iritani, Treuting Use of animals in experimental study of disease; techniques of animal necropsy, characterization, interpretation of gross and microscopic lesions, correlation of lesions with altered physiological processes, differentiation between naturally occurring and experimentally induced lesions. Prerequisite: PATH 444, PATH 445, or equivalent, and permission of instructor. Enrollment limited: two students per quarter. Offered: AWPSP.

**C MED 514 Comparative Pathology Conference (1, max. 6)** Liggitt, Treuting Focus on histopathology of naturally occurring and experimentally induced lesions of primates, laboratory and domestic animals, fish, wildlife, and birds. Participants discuss the lesions and the basic pathogenetic mechanisms that underlie them. Prerequisite: PATH 500 or equivalent and permission of instructor. Credit/no credit only. Offered: AWPSP.

**C MED 516 Current Literature in Laboratory Animal Medicine (1, max. 12)** Liggitt Critical evaluation of recent articles on laboratory animal medicine and science. Emphasis on literature dealing with spontaneous diseases of laboratory animals, biology and husbandry, zoonotic diseases, and animal models of human disease. Experimental design, use of animals in research, and methods of reviewing manuscripts. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWPSP.

**C MED 518 Clinical Conference Seminar (1, max. 12)** Price Clinical reports of cases of spontaneous and induced diseases, animal models of human disease, and zoonotic diseases discussed. Disease prevalence and preventive medicine measures. Diagnostic exercises. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWPSP.

**C MED 520 Biology of Laboratory Animals (1)** Brabb, Frevert, Iritani, Treuting Fundamentals of the morphological, functional, and applied aspects of anatomy, physiology, pharmacology, biochemistry, and immunology of the commonly used laboratory animal species. Similarities and differences within, and between, species, including man. Husbandry, genetics, behavior, and nutrition. Prerequisite: permission of instructor. Offered: A.

**C MED 521 Biology of Laboratory Animals (1)** Brabb, Iritani, Treuting Fundamentals of the morphological, functional, and applied aspects of anatomy, physiology, pharmacology, biochemistry, and immunology of the commonly used laboratory animal species. Similarities and differences within, and between, species, including man. Husbandry, genetics, behavior, and nutrition. Prerequisite: permission of instructor. Offered: W.

**C MED 526 Epidemiology of Diseases Communicable from Nature (3)** DiGiacomo, Rausch, Weigler Explores the public health aspects of zoonotic diseases, their epidemiology and approaches to control. Focuses on the major viral, rickettsial, bacterial, protozoal, helminthic, and fungal diseases transmitted from wild and domesticated animals to humans. Prerequisite: C MED 511, C MED 512, or C MED 520 or permission of instructor. Offered: jointly with EPI 526; Sp.

**C MED 530 Diseases of Laboratory Animals (1)** Brabb, Iritani, Treuting Analysis of etiology, pathogenesis, pathology, and disease processes in rodents, lagomorphs, carnivores,

and nonhuman primates. Prerequisite: permission of instructor. Offered: A.

**C MED 531 Diseases of Laboratory Animals (1)** Brabb, Iritani, Treuting Analysis of etiology, pathogenesis, pathology, and disease processes in rodents, lagomorphs, carnivores, and nonhuman primates. Prerequisite: permission of instructor. Offered: W.

**C MED 540 Animal Models (1)** Brabb, Iritani, Treuting Naturally occurring and experimentally induced analogs of human diseases in animals with emphasis on diseases in search of animal models, and approaches to identifying new models. Animal models of categorical disease (e.g., cancer, atherosclerosis, gerontology) discussed. Prerequisite: permission of instructor. Offered: Sp.

**C MED 590 Selected Topics in Animal Medicine (2–5, max. 10)** Brabb, Frevert, Iritani, Treuting Radiation biology, genetics, anesthesiology and experimental surgery, preventive medicine, and ethical aspects of use of animals in biomedical teaching and research. Specific topics vary from year to year, depending on the expertise of the annual visiting professor. Prerequisite: permission of instructor. Offered: AWPSP.

**C MED 592 Comparative Pathology for the Scientist (3)** Introduces the interpretation of pathological changes in animals used for biomedical research, with a focus on the mouse. Covers study design and interpretation, techniques to measure pathological changes in major organ systems plus other topical material related to preclinical drug studies and translational research.

**C MED 600 Independent Study or Research (\*)** Credit/no credit only. Offered: AWPSP.

**C MED 601 Internship Rotation—Laboratory Animal Medicine (1–)** Credit/no credit only. Prerequisite: DVM degree. Offered: AWPSP.

**C MED 700 Master's Thesis (\*)** Credit/no credit only. Offered: AWPSP.

## Conjoint (Medicine)

### COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at [www.uw.edu/students/crsctat/](http://www.uw.edu/students/crsctat/).

**CONJ 401 Human Anatomy and Physiology (4)** Linder, Melby An integrated course on the structure and function of the human body with laboratory work in gross anatomy, histology, and physiology. Primarily for pharmacy doctoral students. Others by special permission of instructors. Prerequisite: BIOL 220; either CHEM 155 or CHEM 162. Offered: A.

**CONJ 402 Human Anatomy and Physiology (4)** Linder, Melby An integrated course on the structure and function of the human body with laboratory work in gross anatomy, histology, and physiology. Primarily for pharmacy doctoral students. Others by special permission of instructors. Prerequisite: CONJ 401. Offered: W.

**CONJ 403 Human Anatomy and Physiology (4)** Linder, Melby An integrated course on the structure and function of the human body with laboratory work in gross anatomy, histology, and physiology. Primarily for pharmacy doctoral students. Others by special permission of instructors. Prerequisite: CONJ 402. Offered: Sp.

**CONJ 475 Alcoholism: A Course for Medical Students and Students in the Allied Health Sciences (2)** Kivlahan, Samson A lecture course for medical students in the allied health sciences in any year that will cover an introduction to the epidemiology, diagnostic strategies, natural history, physiologic effects, and treatment of alcohol-related disorders. Offered: Sp.

**CONJ 480 Neuroscience for Rehabilitation Professionals (5)** Anderson, Mulligan, Slimp Survey of the structure and function of the central nervous system, emphasizing sensorimotor systems and higher integrative functions, coupled with clinical correlations. Required for occupational therapy, physical therapy, and prosthetic/orthotic students. Others by permission.

**CONJ 504 Topics of Molecular Medicine (1.5)** Focuses on an important topic in medicine and science. Lectures introduce clinical and basic science background, followed by a seminar/discussion with speakers. Prerequisite: Graduate standing and permission of instructor. Offered: jointly with CONJ 504; Sp.

**CONJ 505 P-Pain Clinic Preceptorship (1)** One morning a week for a total of 30 hours per quarter spent observing patient care in either inpatient or outpatient settings at University of Washington Medical Center; associated readings. Prerequisite: first- or second-year medical student standing. Coordinator: Pain Center.

**CONJ 513 Clinical Medical and Human Genetics (4)** Rotations through Medical Genetics clinics for graduate students enrolled in the Molecular Medicine Pathway. Students review clinical data, identify the molecular basis of genetic disorders and assess how scientific studies have changed the assessment and natural history of these conditions. Limit of 4 students per quarter. Offered: jointly with MOL-MED 513; AWPSP.

**CONJ 514 Molecular Medicine (3)** Eary, Rosen Introduces how basic sciences impact the practice of medicine, using patient case histories to introduce key areas of clinical research and investigative medicine. Topics include cancer biology; drug development; gene- and cell-based therapeutics; inflammation and host response; vascular disease; and obesity and weight regulation. Prerequisite: Graduate standing. Offered: jointly with CONJ 514; W.

**CONJ 515 Interdisciplinary Health and Human Services Delivery in Rural Communities (1)** House Provides opportunities for students in health and human services to explore current trends and issues of service delivery in rural communities. Demographics, economics, community structure, culture, and professional/personal issues are addressed. Field trip fee. Prerequisite: major standing in a health or human services profession. Credit/no credit only. Offered: Sp.

**CONJ 516 What Every Physician Should Know About Oral Health (1)** Lewis, Mouradian, Slayton Didactic elective for students interested in understanding oral health and its relationship to systemic health. Special interest to students planning careers in primary care, public health, or who are likely to practice in rural or underserved communities. Includes weekly seminars and clinical demonstrations. Credit/no credit only. Offered: Sp.

**CONJ 520 Anatomy and Autopsy (1/2, max. 2)** Fligner Students attend autopsies at UWMC affiliated hospitals for demonstration of normal anatomic relationships and gross pathological changes in various diseases. Offered as elective concurrent with HUBIO 520P. Prerequisite: HUBIO 510P or equivalent, permission of instructor, and orientation. Offered: WSP.

**CONJ 524 Structural Basis of Signal Transduction (1.5)** Xu Focuses on the structure-function relationship of key enzymes in signal transduction (protein/lipid kinases; phosphatases etc.) and the structural consequences of protein phosphorylation. Teaches students to look into critical structural details using PC or Mac. Prerequisite: undergraduate course in biochemistry and basic cell biology, or permission of instructor. Offered: W.

**CONJ 526 Introduction to Systems Biology and Quantitative Approaches to Biomedical Sciences (1.5)** Aitchison Covers philosophy of systems biology, experimental design, and the linkages between discovery and hypothesis driven science. Reviews quantitative systems biology tools for genomics, proteomics, modeling and data integration, and emerging technologies. Offered: W.

**CONJ 530 Directing Stem Cells Toward Regenerative Medical (1.5)** GE An introduction to the rapidly developing field

of human embryonic stem cells in regenerative medicine crossing all medical disciplines including ethics. A strong background in biological sciences is required. Offered: Sp.

**CONJ 531 Signaling Mechanisms in Excitable Cells (1.5)** *Hille* Membrane electricity. Structure and roles of voltage-gated and ligand-gated ion channels in electrical signaling. Calcium as a second messenger. Exocytosis and its regulation. Phototransduction in photoreceptors. Prerequisite: comprehensive undergraduate course in general biochemistry and molecular biology, or permission of instructor. Offered: A.

**CONJ 532 Signal Transduction from the Cell Membrane to the Nucleus (1.5)** *Beavo, Moon, Storm* Intracellular signaling pathways leading from cell membrane receptors to nucleus. Pathways activated by seven transmembrane receptors and G-proteins, insulin/PI3 kinase, nitric oxide and WNTs and mechanisms of signal termination. Cytokine/Jak/Stat signaling and role of subcellular localization in signal transduction. Prerequisite: basic knowledge of biochemistry. Offered: A.

**CONJ 533 The Dynamic Chromosome (1.5)** *Henikoff, Roth* The chromosome viewed as the ultimate organelle. How chromosomes are maintained and propagated. Epigenetic regulation of genes. Genetic, biochemical, and cytologic methods for understanding chromosome functions. Prerequisite: cell biology, biochemistry, and genetics. Offered: A.

**CONJ 534 Selected Problems in Nervous System Development (1.5)** Introduces students to current issues in developmental neurobiology. Topics include regionalization of the neuroectoderm, mechanisms of neurogenesis, axon patterning and plasticity, and cell death. Not intended to be comprehensive; examines the experimental basis for current views in the field of a few topical issues.

**CONJ 535 RNA Structure and Biological Function (1.5)** *Ferre-D'Amare, Stoddard* Survey of the diversity of cell-biological roles played by RNA with emphasis on structural principles and structure-function relationships. Readings from the current literature to cover both, methods for the study of RNA, and examples of the function of this nucleic acid as part of the machinery for gene expression. Offered: W.

**CONJ 536 Experimental Design in Cell Biology (1.5)** Focuses on experimental design in cell biology. A topic of current research interest is covered in depth in order to follow a line of investigation and critically evaluate the strengths and limitations of various experimental strategies. Offered: jointly with BIOL 546.

**CONJ 537 Mechanism of Transcriptional Regulations (1.5)** *Tsukiyama* Focuses on biochemical mechanisms of gene transcription covering a broad range of transcriptional regulation, including mechanisms of transcriptional initiation, elongation and termination. Discusses regulation of transcription by chromatin. Includes a special lecture regarding regulation of transcription in cell growth and differentiation. Offered: A.

**CONJ 538 Genetic Instability and Cancer (1/1.5)** *Maizels, Monnat* Seminar focusing on molecular pathways that maintain genomic stability in all cells and that carry out programmed changes in genomic structure in the immune system. Special attention devoted to understanding how failure in these pathways leads to genomic instability and malignancy. Prerequisite: permission of instructor.

**CONJ 539 Biological Basis of Neoplasia (1.5)** *Kemp, Zarbl* Lecture/discussion on cellular and molecular mechanisms underlying phenotypes associated with cancer, including genetic pre-disposition, injury, and instability; alteration in control of cell division and cell death; failure of differentiation; tumor angiogenesis and metastasis. Molecular biology of tractable model systems is emphasized. Prerequisite: introductory biochemistry and cell biology. Offered: S.

**CONJ 540 Basic Science of Urologic Complications (3)** Introduction to the multidisciplinary nature of the most common urologic complications ranging from prostate cancer to erectile dysfunction. Covers epidemiology, clinical and surgical treatments, current dogmas and approaches/models in basic study of underlying disease mechanisms, and a

journal review of each complication. Prerequisite: biological science course.

**CONJ 541 Molecular Biology of Cellular Processes (1.5)** *Bornstein* Translational control; cytoskeleton and molecular motors; protein targeting, sorting and secretion; apoptosis; regulation of cell function by extracellular matrix. Prerequisite: comprehensive undergraduate course in biochemistry and molecular biology or permission of instructor. Offered: Sp.

**CONJ 542 Development (1.5)** *Raible, Roelink* Molecular mechanisms of development; molecules and pathways used for the patterning of developing organisms. Similarities and differences in the making of plants, invertebrates, and vertebrates. Prerequisite: Comprehensive undergraduate courses in Biology, Molecular Biology, or permission of instructor. Offered: W.

**CONJ 544 Protein Structure, Modification and Regulation (1.5)** *Stoddard, Strong* Overview of general principles of protein structure, including forces that contribute to folding and stabilization, followed by an extended coverage of the means by which protein structure and function are modified and regulated. Examples from recent developments in protein folding, processing, and allosteric regulation. Prerequisite: introductory biochemistry and cell biology.

**CONJ 545 Molecular Interactions and Medicine (1.5)** *Verlinde* Forces governing molecular interactions in biology; with a focus on medicine. Principles of computer modeling techniques in use for predicting the molecular behavior of proteins, ligands and their complexes. In computer ligand discovery; drug design, and the understanding at the atomic level of some genetic diseases. Two computer lab sessions. Offered: Sp.

**CONJ 546 Survey of Technologies for Molecular Biology (1.5)** *Bumgarner* Provides a broad overview of modern technologies used in molecular biology with particular emphasis on DNA sequencing and gene expression. In addition to methods and applications for the technologies, examines the theoretical basis and underlying instrumentation through which these technologies are implemented. Offered: A.

**CONJ 547 Molecular Evolution of Viral-Host Interactions (1.5)** *Katze* Focuses on the interactions between viruses and the cells they infect, with special emphasis on evolutionary battle that occurs between the invading virus and its host. Examines new technologies being used to molecularly dissect virus-host interactions. Offered: Sp.

**CONJ 548 Modeling Proteins and Proteomes (1.5)** *Samudrala* Provides hands-on experience for modeling protein structures, using the models to predict function, and applying the prediction methods to all proteins encoded by an organismal genome. Provides an overview of protein structure, how it mediates function, and its importance for understanding protein interaction networks. Focuses on the technologies involved for protein structure modeling. Offered: W.

**CONJ 549 Microbial Population Biology (1.5)** *Mittler* Principles of ecology and evolution as they apply to microorganisms. Prerequisite: advanced undergraduates with permission of instructor. Offered: even years; Sp.

**CONJ 550 P-Clinical Infectious Diseases (3)** Lecture series by faculty members from various departments, authorities in the field of clinically important infectious diseases. Lectures, reading assignments, and handouts emphasize epidemiology, clinical manifestations, laboratory findings, diagnosis, treatment, and prevention. Oriented for second-year medical students. Credit/no credit only.

**CONJ 551 Immunity (1.5)** *Strong* Provides an understanding of the central cellular and molecular players in the mammalian immune system at a level appropriate for the non-specializing graduate student. Selected topics include the molecular basis of B and T cell activation and effector functions and the mechanisms of innate immunity. Offered: Sp.

**CONJ 552 Metabolic Flexibility in Biology (1.5)** Focuses on small molecules and the ways that chemistry of these molecules facilitates life under changing conditions. Includes systems from microbiology to human physiology to under-

stand aspects of cancer, aging, and animation. Explores topics including bioenergetics/metabolic flux, adaptation, and allometric scaling. Prerequisite: undergraduate organic chemistry and biochemistry.

**CONJ 553 Clinical Management of HIV (3)** *Kim* Provides in-depth case-based training on the diagnosis and clinical management of HIV and associated conditions. Includes interactive format with speakers who have experience in both resource-rich and resource-limited settings. Offered: W.

**CONJ 554 Fundamentals of Hypnosis (1)** *McCann, Schnee-weiss* Examines phenomena associated with hypnosis, as well as its safe use in clinical practice. Offered: Sp.

**CONJ 556 Drug Addiction: Mechanisms, Prevention, and Treatment (2)** *Chavkin* Presents the key advances, insights, methods, and challenges for our understanding of drug addiction from psychological, pharmacological, psychiatric, community prevention, legal, and neurodevelopmental perspectives. Enhances familiarity with the multidisciplinary approaches required to understand addiction as a disease. Offered: A.

**CONJ 557 Microbial Evolution and Ecology (1.5)** Selected topics in microbial evolution including evolution of the main lines of descent, and bacterial and archaeal speciation and co-speciation, and evidence for early microbial life on Earth. Prerequisite: MICROM 412 or general microbiology background. Offered: ASP.

**CONJ 558 Fundamentals of Prokaryotic Biology (1.5)** *Harwood, Leigh* Covers basic principles in prokaryotic cell structure, genomics, and metabolism. Provides an introduction to prokaryotic physiology, bacterial pathogenesis, and microbial ecology.

**CONJ 559 Scientific Ideas at Work (1.5)** *Gray, Maizels* Examines how basic biomedical research leads to discovery of new therapeutics and diagnostics for treatment of human disease. Considers disease mechanism and impact, need for a drug, preclinical studies, clinical testing and drug approval, and how technology developed in an academic laboratory is translated into a commercial product. Offered: jointly with MOLMED 559; Sp.

**CONJ 585 Surgical Anatomy (1-3, max. 12)** *Graney* Guided dissection of selected regions, supplemented by conferences. Offered conjointly by the departments of Biological Structure and Surgery. Prerequisite: permission of department. Coordinator: Department of Biological Structure.

**CONJ 669 P-Chronic Care/Spokane - Deaconess Palliative Care (8)** *GE* Provides exposure to the areas of rehabilitation, geriatrics, palliative care, and pain management. Students are assigned to a preceptor and clinical site to concentrate their clinical activities.

**CONJ 670 P-Chronic Care/Billings - St. Vincent Healthcare (8)** Provides exposure to the areas of rehabilitation, geriatrics, palliative care, and pain management. Includes didactic orientation of the first day, and patient case presentations during didactics on last day.

**CONJ 671 P-Chronic Care/Boise - Saint Alphonsus Palliative Care (8)** Provides exposure to the areas of rehabilitation, geriatrics, palliative care, and pain management. Includes didactic orientation of the first day, and patient case presentations during didactics on last day.

**CONJ 672 P-Chronic Care/Boise - St. Luke's Palliative Care (8)** Provides exposure to the areas of rehabilitation, geriatrics, palliative care, and pain management. Includes didactic orientation of the first day, and patient case presentations during didactics on last day.

**CONJ 673 P-Chronic Care/Boise VAMC (8)** Exposure to rehabilitation, geriatrics, palliative care, and pain management. Students are assigned to a preceptor and clinical site to concentrate their clinical activities.

**CONJ 674 P-Chronic Care/Alaska AMCA (8)** Exposure to rehabilitation, geriatrics, and pain management. Students are assigned to a preceptor and clinical site to concentrate their clinical activities.

**CONJ 675 P-Chronic Care/Palliative Care - GHHS Tacoma (8)** Exposure to the areas of rehabilitation, palliative care, and pain management. Students focus on one area and are assigned to a preceptor and clinical site to concentrate their clinical activities in that content area. Includes didactic orientation on the first day and patient case presentations during didactic on the last day.

**CONJ 677 P-Clinical Allergy and Immunology (\*, max. 12)** (Boise Veterans Affairs Hospital), (University of Washington Medical Center) Clinic and office experience in diagnosing and managing allergic disease. Clinical conferences, hospital rounds on clinical immunology and allergy. Student may elect a flexible program, emphasizing adult or pediatric allergy. Prerequisite: MED 665 or basic clerkships in Departments of Family Medicine or Pediatrics. (Four weeks, full-time.)

**CONJ 678 P-Pain Clinic Clerkship (8)** Full-time, four-week clerkship emphasizing comprehensive care of patients with chronic pain from benign diseases and cancer. Faculty members from multiple departments provide student with didactic and bedside experiences; student member of treatment team. Involves both inpatient and outpatient activities. Prerequisite: completion of human biology series, MED 665.

**CONJ 679 P-Chronic Care/Palliative Care-PRMC (8)** Exposure to palliative care. Students are assigned to a preceptor and clinical site to concentrate their clinical studies. Includes didactic orientation on the first day and patient case presentations during didactics on last day.

**CONJ 680 P-Detoxification and Rehabilitation Program for Alcoholism and Drug Abuse (\*, max. 16)** Reoux Supervised introduction to alcoholic detoxification and rehabilitation and drug abuse. Supervised clinical experience in a variety of alcoholism and drug abuse treatment programs; accompanied by a core series of lectures and discussions. For medical students only. Prerequisite: PBSCI 664, PBSCI 665, PBSCI 666, PBSCI 667, or PBSCI 668.

**CONJ 681 P-Chronic Care/Palliative Care- Children's (8)** Exposure to palliative care. Students are assigned to a preceptor and clinical site to concentrate their clinical activities. Includes didactic orientation on the first day and patient case presentations during didactic on the last day.

**CONJ 682 P-Chronic Care/Palliative Care- HMC (8)** Exposure to palliative care. Students are assigned to a preceptor and clinical site to concentrate their clinical activities. Includes didactic orientation on the first day and patient case presentations during didactic on the last day.

**CONJ 683 P-Chronic Care/Palliative Care- UWMC PC Consult (8)** Exposure to palliative care. Students are assigned to a preceptor and clinical site to concentrate their clinical activities. Includes didactic orientation on the first day and patient case presentations during didactic on the last day.

**CONJ 684 P-Chronic Care/Palliative Care- Multicare Hospice (8)** Exposure to palliative care. Students are assigned to a preceptor and clinical site to concentrate their clinical activities. Includes didactic orientation on the first day and patient case presentations during didactic on the last day.

**CONJ 685 P-Chronic Care/Palliative Care- Providence Everett (8)** Exposure to the areas of rehabilitation, palliative care, and pain management. Students focus on one area and are assigned to a preceptor and clinical site to concentrate their clinical activities in that content area. Includes didactic orientation on the first day and patient case presentations during didactic on the last day.

**CONJ 686 P-Chronic Care/Rehab- Children's (8)** Exposure to rehabilitation. Students focus on one area and are assigned to a preceptor and clinical site to concentrate their clinical activities in that content area. Includes didactic orientation on the first day and patient case presentations during didactic on the last day.

**CONJ 687 P-Chronic Care/Rehab - HMC (8)** Exposure to rehabilitation. Students focus on one area and are assigned to a preceptor and clinical site to concentrate their clinical activities in that content area. Includes didactic orientation on the first day and patient case presentations during didactic on the last day.

**CONJ 688 P-Chronic Care/Rehab - VA RMS (8)** Exposure to rehabilitation. Students focus on one area and are assigned to a preceptor and clinical site to concentrate their clinical activities in that content area. Includes didactic orientation on the first day and patient case presentations during didactic on the last day.

**CONJ 689 P-Chronic Care/Rehab- VA SCI (8)** Exposure to rehabilitation. Students focus on one area and are assigned to a preceptor and clinical site to concentrate their clinical activities in that content area. Includes didactic orientation on the first day and patient case presentations during didactic on the last day.

**CONJ 690 P-Chronic Care/Rehab - UWMC (8)** Exposure to rehabilitation. Students are assigned to a preceptor and clinical site to concentrate their clinical activities. Includes didactic orientation on the first day and patient case presentations during didactic on the last day.

**CONJ 691 P-Clerkship in Chronic Care - Boise PMR (8)** Required clerkship for 4th Year Medical students, concentrating on geriatrics, palliative care, and rehab medicine using lectures, group discussions, standardized patients, and case scenarios.

**CONJ 692 P-Chronic Care Clerkship - Spokane, St. Luke's Rehab (8)** Exposure to geriatrics. Students focus on one area and are assigned to a preceptor and clinical site to concentrate their clinical activities in that content area. Includes didactic orientation on the first day and patient case presentations during didactic on the last day.

**CONJ 693 P-Chronic Care/Geriatrics - HMC (8)** Exposure to geriatrics. Students focus on one area and are assigned to a preceptor and clinical site to concentrate their clinical activities in that content area. Includes didactic orientation on the first day and patient case presentations during didactic on the last day.

**CONJ 694 P-Chronic Care/Geriatrics - VA (8)** Exposure to geriatrics. Students focus on one area and are assigned to a preceptor and clinical site to concentrate their clinical activities in that content area. Includes didactic orientation on the first day and patient case presentations during didactic on the last day.

**CONJ 695 P-Chronic Care/Pain Management - Roosevelt (8)** Exposure to pain management. Students focus on one area and are assigned to a preceptor and clinical site to concentrate their clinical activities in that content area. Includes didactic orientation on the first day and patient case presentations during didactic on the last day.

**CONJ 696 P-WRITE Clinical Electives (\*, max. 24)** Clinical electives for WRITE program. Offered: AWSpS.

**CONJ 697 International Exchange Clerkship (12)** Hunt Participation in health care delivery systems in developing countries; observation of relationship of host country's traditional medicine with Western medicine. Students live in cross-cultural setting to better understand their own assumptions about health care and life styles. Offered: Sp.

**CONJ 698 P-Foreign Medical Student Clerkship (\*, max. 24)** A limited number of students from foreign medical schools are accepted for individually designed clinical clerkships at available sites after all UWMC students are accommodated. Prerequisite: permission of Associate Dean for Academic Affairs, School of Medicine.

**CONJ 699 P-Clinical Clerkships (\*, max. 32)**

family medicine encompasses all ages, both sexes, each organ system and, every disease entity. The prime instructional goal of the department is the education and training of physicians who apply the knowledge and skills of this and other medical disciplines in family practice. Implicit in this goal is the necessity for continual development of new knowledge and its application in the clinical activities of the department.

The Department of Family Medicine was founded in 1971 and is involved with instruction of medical students in several ways. These include presentations in the basic curriculum of the first two years, clinical clerkships as part of the clinical core curriculum, and other elective courses and programs, including an underserved, interdisciplinary service-learning program, a four-week rural or urban underserved experience, an introductory continuity preceptorship, and independent investigative inquiry and research opportunities. A graduate residency program in family medicine provides clinical training that meets the standards of the American Board of Family Practice and the Council on Graduate Medical Education of the American Medical Association. Active affiliations are maintained throughout the WWAMI region in predoctoral, residency, fellowship, and continuing medical education in clinical care, teaching, and research.

## COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at [www.uw.edu/students/crscat/](http://www.uw.edu/students/crscat/)

**FAMED 499 Undergraduate Research (\*)** Research activities arranged with University or community-based physicians in diversified areas relating to family medicine. Prerequisite: permission of course coordinator. Offered: AWSpS.

**FAMED 501 P-Introduction to Family Medicine: Preceptorship (2.5)** Students spend one morning per week for one or more quarters working with a practicing community family physician. Prerequisite: first- and second-year medical students, permission of course coordinator. Offered: AWSpS.

**FAMED 505 P-Rural/Urban Preceptorship (\*, max. 12)** Opportunity to work in a variety of underserved medical settings in rural and urban areas of Washington, Wyoming, Alaska, Idaho, and Montana. Prerequisite: permission of course coordinator. Offered: AWSpS.

**FAMED 540 Topics in Health and Human Services in Rural Communities (1)** Explores topics important to rural clinical practice. Includes rural health research, rural health policy, cultural competency, models of rural health practice, and others. Includes panel discussions, a case study, and a required field trip to a rural community.

**FAMED 545 Preclinical Geriatric Elective (2)** Covers disease and disability prevention, health promotion, and positive attitudes that can contribute to successful aging. Emphasis on optimum aging, site visits, and extensive contact with diverse older people. Prerequisite: permission of course faculty.

**FAMED 546 Respectful Death: Exploring Interdisciplinary End-of-Life Care (3)** Farber, McCormick Explores end-of-life care and develops the skills necessary to provide respectful care in a collaborative, team setting to patients and families living with serious life limiting illness during the last 6–12 months of life. Offered: jointly with B H 517.

**FAMED 547 Spirituality in Health Care (2)** Examination of the beliefs, values, meaning, and spirituality of health professionals for the well-being of their patients as well as for themselves. Offered: jointly with B H 518/SOC W 587.

**FAMED 555 P-Wilderness Medicine (1/2)** Elective provides didactic and field experience for third-year medical students in types of medical emergencies and clinical problems unique to rural and wilderness communities, including trauma, survival hypothermia, altitude, frostbite, heat illness,

## Family Medicine

### DEPARTMENT OVERVIEW

C408 Health Sciences

Family medicine is the medical specialty which provides continuing, comprehensive health care for the individual and family. It is a specialty in breadth that integrates the biological, clinical, and behavioral sciences. The scope of

lightning, and river rescue. Credit/no credit only. Prerequisite: permission of course coordinator.

**FAMED 556 Spanish for Health Professionals (1)** Instruction in interviewing Spanish-speaking patient. Credit/no credit only. Prerequisite: permission of course faculty or coordinator.

**FAMED 557 Hispanic Health and Health Care Disparities (1)** Acosta Covers Hispanic culture and language, history of Hispanics in the United States, Hispanic health status issues, and effective strategies for working across cultures and linguistic barriers. Designed to help the learner understand and respond better to the healthcare needs of the Hispanic community.

**FAMED 560 P-Indian Health Problem-Based Learning Cases (1)** Presents common Indian health problems via problem-based learning cases. Prerequisite: permission of course coordinator.

**FAMED 561 LGBTQ Health and Health Disparities (3)** Covers the history and health status of the Lesbian, Gay, Bisexual, Transgendered, Queer, and Intersex (LGBTQ) community in the U.S.; effective strategies and skills for working with the LGBTQ community; and is designed to help the learner understand and respond better to the health care needs of the LGBTQ community.

**FAMED 630 P-WRITE Family Medicine Clinical Clerkship (\*, max. 24)** Basic clinical clerkship for students enrolled in the WRITE Program. Prerequisite: permission of course coordinator.

**FAMED 635 P-Clinical Clerkship in Family Medicine - Chyenenne (12)** For description and prerequisite, see 636. Offered: AWSpS.

**FAMED 636 P-Clinical Clerkship in Family Medicine - Wenatchee (12)** Stresses ambulatory primary care with emphasis on comprehensive, integrated care to patients of both genders and all ages. Student functions as clerk in community or residency site, and participates in care of assigned patients in a variety of settings: office, hospital, home, community resources. Prerequisite: third- or fourth-year medical students. Offered: AWSpS.

**FAMED 637 P-Clinical Clerkship in Family Medicine - Spokane GHC (12)** For description and prerequisite, see 636. Offered: AWSpS.

**FAMED 638 P-Clinical Clerkship in Family Medicine - Othello (12)** For description and prerequisite, see 636. Offered: AWSpS.

**FAMED 640 P-Clinical Clerkship in Family Medicine—Boise (12)** For description and prerequisite, see 636. Offered: AWSpS.

**FAMED 641 P-Clinical Clerkship in Family Medicine—Spokane (12)** For description and prerequisite, see 636. Offered: AWSpS.

**FAMED 642 P-Clinical Clerkship in Family Medicine—Madigan (12)** For description and prerequisite, see 636. Offered: AWSpS.

**FAMED 643 P-Clinical Clerkship in Family Medicine—Tacoma (12)** For description and prerequisite, see 636. Offered: AWSpS.

**FAMED 644 P-Clinical Clerkship in Family Medicine—University of Washington Medical Center (12)** For description and prerequisite, see 636. Offered: AWSpS.

**FAMED 645 P-Clinical Clerkship in Family Medicine—Group Health (12)** For description and prerequisite, see 636. Offered: AWSpS.

**FAMED 646 P-Clinical Clerkship in Family Medicine—Swedish First Hill (12)** For description and prerequisite, see 636. Offered: AWSpS.

**FAMED 647 P-Clinical Clerkship in Family Medicine—Swedish Cherry Hill (12)** For description and prerequisite, see 636. Offered: AWSpS.

**FAMED 648 P-Clinical Clerkship in Family Medicine—Renton Valley (12)** For description and prerequisite, see 636. Offered: AWSpS.

**FAMED 649 P-Clinical Clerkship in Family Medicine—Olympia (12)** For description and prerequisites, see 636. Offered: AWSpS.

**FAMED 650 P-Clinical Clerkship in Family Medicine—Anacortes (12)** For description and prerequisite, see 636. Offered: AWSpS.

**FAMED 651 P-Clinical Clerkship in Family Medicine—Omak (12)** For description and prerequisite, see 636. Offered: AWSpS.

**FAMED 652 P-Clinical Clerkship in Family Medicine—Spokane Valley (12)** For description and prerequisite, see 636. Offered: AWSpS.

**FAMED 653 P-Clinical Clerkship in Family Medicine—Anchorage (12)** For description and prerequisite, see 636. Offered: AWSpS.

**FAMED 655 P-Clinical Clerkship in Family Medicine—Havre (12)** For description and prerequisite, see 636. Offered: AWSpS.

**FAMED 656 P-Clinical Clerkship in Family Medicine—Whitefish (12)** For description and prerequisite, see 636. Offered: AWSpS.

**FAMED 657 P-Clinical Clerkship in Family Medicine—Pocatello (12)** For description and prerequisite, see 636. Offered: AWSpS.

**FAMED 658 P-Clinical Clerkship in Family Medicine—Sea Mar Clinic (12)** For description and prerequisite, see 636. Offered: AWSpS.

**FAMED 659 P-Clinical Clerkship in Family Medicine—Country Doctor (12)** For description and prerequisite, see 636. Offered: AWSpS.

**FAMED 660 P-Clinical Clerkship in Family Medicine—Yakima (12)** For description and prerequisites, see 636. Offered: AWSpS.

**FAMED 661 P-Clinical Clerkship in Family Medicine—Bremerton (12)** For description and prerequisites, see 636. Offered: AWSpS.

**FAMED 662 Clinical Clerkship in Family Medicine - Buffalo (12)** For description and prerequisites, see 636. Offered: AWSpS.

**FAMED 663 Clinical Clerkship in Family Medicine - Petersburg (12)** For description and prerequisites, see 636. Offered: AWSpS.

**FAMED 664 P-Clinical Clerkship in Family Medicine - Billings (12)** For description and prerequisites, see 636. Offered: AWSpS.

**FAMED 665 P-Clinical Clerkship in Family Medicine—Missoula (12)** For description and prerequisites, see 636. Offered: AWSpS.

**FAMED 666 P-Clinical Clerkship in Family Medicine—Torrington (12)** For description and prerequisites, see 636. Offered: AWSpS.

**FAMED 668 P-Clinical Clerkship in Family Medicine - Nome (12)** For description and prerequisites, see 636. Offered: AWSpS.

**FAMED 670 P-Advanced Underserved Clerkship (\*, max. 24)** Students gain experience, knowledge, and skills needed to care for rural, specific ethnic or underserved populations. Prerequisite: third- or fourth-year medical students, permission of course coordinator. Offered: AWSpS.

**FAMED 672 P-Advanced Preceptorship International (\*, max. 24)** For medical students desiring primary care experience abroad. Special project deals with influences of social, cultural, educational, and economic forces on health care delivery. Prerequisite: third- or fourth-year medical students, permission of course coordinator. Offered: AWSpS.

**FAMED 673 P-Advanced Preceptorship at WWAMI Clinical Centers (\*, max. 12)** Supplemental experience in Family Medicine for late third- or fourth-year students at selected WWAMI clinical centers. Prerequisite: completion of basic 6-week clerkship in Family Medicine; permission of course coordinator. Offered: AWSpS.

**FAMED 674 Advanced Interviewing in Primary Care (8)** Emphasizes developing competency in patient-centered interviewing, interview organization and time management and will be introduced to primary care counseling skills and methods of health behavior change. Prerequisite: permission of course faculty.

**FAMED 680 P-Traditional Indian Medicine Clerkship in Primary Care Setting (\*, max. 16)** Broadens students' knowledge about the traditional Indian perception of health and illness, and expands their experience and skills with Traditional Indian Medicine (TIM) by interacting with a TIM practitioner, Native physician, patients and their families, and the local Native community. Prerequisite: either UCONJ 530, Indian Health Pathway declaration, or permission of course coordinator or faculty. Offered: AWSpS.

**FAMED 681 P-Indian Health Care Clerkship (\*, max. 16)** Examines the health disparities, health systems, and cultural/community strengths associated with American Indian/Alaska Native or other indigenous peoples. Prerequisite: either UCONJ 530, Indian Health Pathway declaration, or permission of course coordinator or faculty. Offered: AWSpS.

**FAMED 688 P-Family Medicine Subinternship (8)** Students serve as interns for Family Medicine services associated with residency programs under the supervision of family medicine residents and attending physicians. Schedules mix inpatient and ambulatory experiences as determined by the site and the student has the same call as R-1 on service.

**FAMED 697 P-Family Medicine Special Electives (\*, max. 24)** Supplemental experience in rural/urban practice or a family medicine department in a setting not already established through the family medicine curriculum. Prerequisite: third- or fourth-year medical students, permission of course coordinator. Offered: AWSpS.

**FAMED 698 P-Clinical Clerkship in Family Medicine, Away (12)** For description and prerequisites, see 636. Offered: AWSpS.

**FAMED 699 P-WWAMI Family Medicine Special Electives (\*, max. 24)** By special arrangement for qualified students, special clerkships or externships may be available at institutions other than the University of Washington located within the WWAMI region. Prerequisite: permission of course coordinator. Offered: AWSpS.

## Genome Sciences

### DEPARTMENT OVERVIEW

S-250 Foege Building

The Department of Genome Sciences was created in 2001 with the merger of the Department of Genetics and the Department of Molecular Biotechnology.

### GRADUATE PROGRAM

#### Graduate Program Coordinator

S-340 Foege Building, Box 355065

206-616-7297

[gensci@uw.edu](mailto:gensci@uw.edu)

The Department of Genome Sciences offers a graduate program leading to the doctor of philosophy degree. Students are admitted only to the doctoral program.

The faculty and students of the Department of Genome Sciences study a broad range of topics, including the genetics of *E. coli*, yeast, *C. elegans*, *Drosophila*, and mouse; human and medical genetics; mathematical, statistical, and computer methods for analyzing genomes and theoretical and evolutionary genetics; and genome-wide studies by such approaches as sequencing, transcriptional and translational analysis, polymorphism detection, and identification of protein interactions. Successful completion of

the graduate program, generally over a period of five years, leads to the PhD in Genome Sciences.

The department's goal is to address leading edge questions in biology and medicine by developing and applying genetic, genomic, and computational approaches that take advantage of genomic information now available for humans, model organisms, and a host of other species.

## Doctor of Philosophy

### Admission Requirements

- Baccalaureate or advanced degree, either in a science such as biology, biochemistry, or related field, or in a computational area such as computer science or mathematics. The ideal candidate has experience in both areas. The most competitive applicants have excellent GRE scores as well as extensive laboratory research experience.
- Personal statement describing the applicant's academic and scientific background, research goals, and motivation for applying
- Curriculum vitae
- Unofficial copies of transcripts.
- Unofficial copies of GRE scores (and TOEFL scores, for international applicants). Applicants who have provided official scores to the UW Graduate School need not send additional copies.
- Three letters of reference from professors or others who are able to provide insight on the applicant's qualifications. Reference letters may be submitted online or by hard copy.
- Applicants still in school who will have earned additional courses not yet listed on the transcript should send a list of such additional courses to be taken before graduation.

### Degree Requirements

90 credits, to include:

- *First year:* Core courses, covering such topics as gene regulation, genomics, genetic analysis, genomic informatics, computational biology, proteomics, and population genetics, as well as literature review. Students rotate through a minimum of three laboratories before selecting a thesis lab at the end of the first year. Actual courses are determined in consultation with adviser. Electives focused on specific areas of interest. Students have the option of selecting mentors from core faculty members in the Department of Genome Sciences as well as from adjunct and affiliate faculty members from several UW departments and the Fred Hutchinson Cancer Research Center.
- *Second year:* Thesis research and additional electives. At the end of the second year, the student takes the general examination for PhD candidacy.
- *Third year:* Students serve as teaching assistants for two undergraduate courses.
- *Final years:* Most students complete their research and defend their dissertation during their fifth year.
- During all years, students participate in the departmental Journal Club and Research Reports functions, and attend presentations of well-known researchers via the departmental seminar series.

## Financial Aid

Genome Sciences provides full funding, including a competitive twelve-month salary, tuition waiver, and health insurance. Support is contingent upon satisfactory academic progress.

## Research Facilities

The department is located in the William H. Foege Building. Students are assigned space in the laboratories of faculty members with whom they do their rotations or dissertation research. State-of-the-art research facilities are available in the department for cellular, protein, and DNA analysis. Extensive computer and library resources are available to students.

## COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at [www.uw.edu/students/crscat/](http://www.uw.edu/students/crscat/)

## Genome Sciences

**GENOME 261 Genomes and Society (4) NW** Schivell Explores current technological advances in genome research and how these advances are impacting society. Topics include sequencing of the human genome, stem cell research, cloning, genetically modified foods, immunizations/public health, and genetic therapy. Appropriate for non-science majors. Offered: W.

**GENOME 351 Human Genetics: The Individual and Society (4) NW** Principles of Mendelian inheritance as illustrated by human traits and diseases; chromosomes and sex determination; distribution of genes in populations; natural selection and evolution; counseling and genetic engineering; ethical issues. Appropriate for non-science majors.

**GENOME 371 Introductory Genetics (5) NW** Covers gene transmission, including chromosome mapping, genetic pathways; mutational analysis biological processes emphasizing mutations affecting chromosome transmission. Introduction to genomics—cloning and sequence analysis of whole genomes. Emphasizes formal genetic mechanisms, molecular techniques. For biological sciences majors. Prerequisite: minimum grade of 1.5 in BIOL 180; minimum grade of 1.5 in BIOL 200; may not be repeated. Offered: AWSpS.

**GENOME 372 Genomics and Proteomics (5) NW** Covers emerging fields of genomics and proteomics. Discusses key technologies and their applications to the study of human and model organism genomes. Prerequisite: GENOME 371.

**GENOME 373 Genomic Informatics (4) NW** Focuses on methods for analyzing large genetic data sets and their application to biological problems, including sequence alignment and search methods, gene prediction, phylogenetic trees, and microarray analysis.

**GENOME 411 Gene Action (5) NW** Molecular genetics: description of fundamental genetics processes such as mutation, repair, genetic exchange, recombination, and gene expression. Use of genetic strategies to analyze complex biological processes. Focus is on prokaryotic organisms. Prerequisite: BIOL 200; either CHEM 223, CHEM 237, or CHEM 335. Offered: jointly with MICROM 411; W.

**GENOME 414 Molecular Evolution (5) NW** Survey of empirical approaches to the study of molecular evolution and ecology, drawing on examples from a variety of taxa and the recent literature. Topics include DNA sequencing and systematics, fingerprinting approaches in behavioral ecology, and adaptive evolution at the molecular level. Prerequisite: BIOL 354. Offered: jointly with BIOL 414

**GENOME 453 Genetics of the Evolutionary Process (3) NW** Contributions of genetics to the understanding of evolution. Processes of mutation, selection, and random genetic events as they affect the genetic architecture of natural populations and the process of speciation. Emphasis on experimental data and observation, rather than mathematical theory. Prerequisite: either GENOME 371 or GENOME 372.

**GENOME 454 The Origins of Genetics (4) NW** Discovery and eventual triumph of Mendelism in the early twentieth century. Concepts of heredity from ancient times to the nineteenth century. Mendel's work and its rediscovery. Evidence

contributing to cornerstone of classical genetics—the chromosome theory of heredity. Prerequisite: either GENOME 351, GENOME 371, or GENOME 372. Offered: A.

**GENOME 463 Hands-On Science for Elementary School Teachers (5)** Offers prospective and practicing teachers an opportunity to learn science through the hands-on teaching methods recommended for teaching science at the elementary level.

**GENOME 465 Advanced Human Genetics (4) NW** Eichler, King Explores genetic analysis of naturally occurring variation in humans; origins and consequences of mutation, as mediated by selection, migration, population structure and drift; approaches to finding human disease genes and characterizing them at the molecular level; relevance of to other species to analysis of human genes. Prerequisite: GENOME 371; either GENOME 372 or BIOC 440. Offered: W.

**GENOME 466 Cancer Genetics (3) NW** Focuses on three types of cancer-related genetics. DNA repair, mitotic recombination, chromosome loss and imbalance, and other aspects of genomic instability. Metastatic cancer as an example of natural selection and evolution. Yeast and nematodes as models for the study of cancer genetics. Prerequisite: either GENOME 371 or GENOME 372. Offered: odd years.

**GENOME 475 Debates in Genetics (3)** Utilizes the original scientific literature as the basis for discussion of a range of genetic issues that impact society. Discussions are student-led; evaluations are based both on participation in class and on a research paper. Prerequisite: BIOL 200; either BIOL 355, BIOL 401, BIOL 402, or GENOME 371.

**GENOME 490 Undergraduate Seminar (2, max. 6) NW** Seminar for advanced undergraduate students engaged in individual research projects or those who wish to gain an understanding of genetic research by analysis of the primary literature. Assignments emphasize the rationale for research projects and the presentation and interpretation of research findings. Offered: AWSpS.

**GENOME 496 Peer Teaching Assistants in Genome Sciences (1–5, max. 5)** Direct experience in the classroom teaching a discussion section for non-majors in genome sciences courses. Peer teaching assistants attend lectures and weekly preparation meetings and gain in-depth background on the subject material. In addition, peer TAs are given training in teaching techniques and course preparation. Credit/no credit only. Prerequisite: GENOME 371.

**GENOME 499 Undergraduate Research (\*, max. 30) Credit/no credit only.** Offered: AWSpS.

**GENOME 501 Introduction to Research Materials (1–10)** The student undertakes a research project in one of the research groups within the department for a quarter at a time. Credit/no credit only. Prerequisite: graduate standing in the Department of Genome Sciences or permission of graduate program coordinator. Offered: AWSpS.

**GENOME 503 An Inquiry Approach to Teaching Genetics at the Introductory High School Level (2, max. 6)** Provides advanced science content on topics in genetics and bioethics that are taught in secondary biology classrooms, as well as pedagogical strategies for conveying concepts to pre-college students. Workshop participation required.

**GENOME 504 StarNet: Research Experiences for Students and Teachers (3, max. 9)** Explores the scientific knowledge, technical skills, and pedagogical strategies related to teaching DNA sequencing and bioethics in a high school classroom. Workshop participation required.

**GENOME 505 StarNet: Teacher Research Experience (9)** Participating teachers carry out an independent research project in a University of Washington laboratory. Teachers, scientists, and StarNet staff meet weekly for an informal research talk.

**GENOME 506 The Science Education Partnership (5, max. 15)** Provides secondary school teachers training in molecular biology, genetics and biotechnology, as well as resources and ongoing support designed to enhance biology instruction. Workshop participation required. Credit/no credit only.

**GENOME 520 Seminar (1, max. 15)** Credit/no credit only. Prerequisite: graduate standing in the Department of Genome Sciences or permission of graduate program coordinator. Offered: AWSp.

**GENOME 522 Journal Club (1)** Presentation and discussion of current scientific literature. For Genome Sciences graduate students only. Credit/No credit only. Offered: AWSp.

**GENOME 523 Research Reports (1)** *Thomas* Presentation and discussion of current student research. For Genome Sciences grad students only. Credit/No credit only. Offered: AWSp.

**GENOME 525 Current Literature in Human Genetics (1)** Topics from current literature in human genetics. Students and faculty each present one topic per quarter. Credit/no credit only. Prerequisite: graduate or postdoctoral status. Offered: AWSp.

**GENOME 540 Introduction to Computational Molecular Biology: Genome and Protein Sequence Analysis (4)** Algorithmic and probabilistic methods for analysis of DNA and protein analysis. Students must be able to write computer programs for data analysis. Prior coursework in biology and probability highly desirable. Prerequisite: permission of instructor. Offered: W.

**GENOME 541 Introduction to Computational Molecular Biology: Molecular Evolution (4)** Computational methods for studying molecular evolution. Students must be able to write computer programs for data analysis. Prior coursework in biology and probability highly desirable. Prerequisite: GENOME 540 or permission of instructor. Offered: Sp.

**GENOME 547 Scientific Writing (1.5)** For graduate students principally in their second and third year. Focuses on the preparation of research manuscripts for publication. Also considers other scientific writing such as thesis proposals and fellowship and grant applications.

**GENOME 549 Molecular Basis of Neurodegenerative Disease (2)** *La Spada, Muchowski, Pallanck* Introduces a broad range of neurodegenerative diseases, focusing upon the approaches that have led to recent discoveries and emphasizing the elucidation of mechanisms and pathways of disease pathogenesis. Offered: jointly with NEUBEH 549/PHCOL 549; W.

**GENOME 550 Methods and Logic in Genetics (3)** Critical reading and detailed discussion of genetics-related scientific research papers. Material emphasizes methodological and logical themes of importance in modern genetics, for example: origin of mutants, genetic epistasis, pulse labeling, and in vivo gene function. Prerequisite: first-year genetics graduate students only. Offered: A.

**GENOME 551 Principles of Gene Regulation (1.5)** A detailed examination of the mechanisms of transcription and translation as determined by experimental genetics, molecular biology and biochemistry.

**GENOME 552 Technologies for Genome Analysis (1.5)** Discussion of current and newly-emerging technologies in genome analysis with regard to applications in biology and medicine and to potential advantages and limitations. Prerequisite: permission of instructor. Offered: A.

**GENOME 553 Advanced Genetic Analysis (1.5)** Classical genetic analysis is a powerful approach to dissect complex biological processes. Selective removal, addition, or alteration of specific proteins to identify and order genes in a pathway, define protein function, determine tissue and temporal requirements for gene function, and distinguish among competing hypotheses to explain biological phenomena.

**GENOME 554 Genomic Informatics (1.5)** Many complete genome sequences are known. Each of these encodes the instructions for making an entire organism, but how can we hope to decipher the code? Focuses on methods for analyzing genome sequences, ranging from large-scale organizational pattern to gene prediction and detailed local alignment methods.

**GENOME 555 Protein Technology (1.5)** Focuses on current and emerging technologies and approaches in protein analysis, and considers applications of these technologies

in biology, biotechnology and medicine. Prerequisite: BIOC 440; GENOME 551; GENOME 552; GENOME 553; GENOME 554.

**GENOME 559 Introduction to Statistical and Computational Genomics (3)** Rudiments of statistical and computational genomics. Emphasis on basic probability and statistics, introduction to computer programming, and relevant Web databases.

**GENOME 561 Molecular Population Genetics and Evolution (1.5)** Surveys recent literature to gain an understanding of the basic principles of molecular population genetics and evolution as applied to analysis of genome data. Requires some computer analysis of genome data.

**GENOME 562 Population Genetics (4)** *Felsenstein* Mathematical and experimental approaches to the genetics of natural populations, especially as they relate to evolution. Emphasis on theoretical population genetics. Prerequisite: permission of instructor. Offered: alternate years; W.

**GENOME 565 Advanced Human Genetics (4)** *NW Eichler, King* Explores genetic analysis of naturally occurring variation in humans; origins and consequences of mutation, as mediated by selection, migration, population structure and drift; approaches to finding human disease genes and characterizing them at the molecular level; relevance of to other species to analysis of human genes. Prerequisite: GENOME 371; either GENOME 372 or BIOC 440. Offered: W.

**GENOME 570 Phylogenetic Inference (3)** *Felsenstein* Methods for inferring phylogenies (evolutionary trees)—biological assumptions, statistical foundations, and computational methods. A comprehensive introduction for graduate students in the biological sciences to phylogenetic methods using data from molecular sequences, continuous and discrete characters, and gene frequencies. Prerequisite: introductory courses in evolution and in statistics. Offered: alternate years; W.

**GENOME 573 Human Genomics: Science, Ethics, and Society (3)** Explores the ethical and social implications of human molecular genetics and genomics investigation. Recent research is critically evaluated for its potential impact on scientific practice, research participation, and societal understandings. Prerequisite: LAW H 504/B H 514/PHG 512 or permission of instructor. Offered: jointly with B H 551/PHG 551.

**GENOME 576 Genetic and Genomic Analysis of Bacteria (1.5)** In-depth coverage of genetic and genomic strategies used to analyze complex biological processes in bacteria. Focuses on general approaches, with examples drawn from studies of pathogenic organisms where possible. A combination of lectures and seminar-style discussions of primary literature.

**GENOME 580 Ethics in Biomedical Research and Teaching (1)** Explores ethical issues in research and teaching and discusses avenues of responsible conduct.

**GENOME 581 Seminar in Drosophila Genetics (1)** *Berg* Discussions of contemporary research in and novel methods for genetic, cell biological, and molecular biological analysis of *Drosophila* development. Credit/no credit only. Offered: AWSp.

**GENOME 582 Seminar in Mouse Genetics (1)** *Braun* Discussion of contemporary research in and novel methods for genetic, cell biological, and molecular analysis of mammalian development, with utilization of transgenic techniques. Credit/no credit only. Offered: AWSp.

**GENOME 584 Seminar in DNA Replication (1)** *Brewer, Fangman* Discussions of contemporary research in and novel methods for genetic, cell biological, and molecular biological analysis of budding yeast, with emphasis on the mechanisms and control of DNA replication. Credit/no credit only. Offered: AWSp.

**GENOME 585 Seminar in Bacterial Genetics (1)** *Manoil* Discussions of contemporary research in and novel methods for genetic, cell biological, and molecular biological analysis of bacterial assembly mechanisms, with emphasis on the

topogenesis of membrane proteins. Credit/no credit only. Offered: AWSp.

**GENOME 586 Seminar in Mammalian Genetics (1)** *Sibley* Discussions of contemporary research in and novel methods for genetic, cell biological, and molecular biological analysis of mammalian genetics, with emphasis on lymphoblast development. Credit/no credit only. Offered: AWSp.

**GENOME 587 Seminar in Nematode Genetics (1)** *Thomas* Discussions of contemporary research in and novel methods for genetic, cell biological, and molecular biological analysis of nematode development, with emphasis on neurogenesis and other developmental processes. Credit/no credit only. Offered: AWSp.

**GENOME 590 Population Genetics Seminar (1)** *Felsenstein* Weekly presentation by participants of current literature and ongoing research in evolution, molecular evolution, evolutionary genetics of natural populations, human population genetics, and quantitative genetics applied to animal and plant breeding. Credit/no credit only. Prerequisite: GENOME 562 or permission of instructor.

**GENOME 599 Special Topics in Molecular Biotechnology (\*, max. 12)** Prerequisite: permission of instructor. Offered: AWSp.

**GENOME 600 Independent Study or Research (\*)** Credit/no credit only. Offered: AWSp.

**GENOME 700 Master's Thesis (\*)** Offered: AWSp.

**GENOME 800 Doctoral Dissertation (\*)** Offered: AWSp.

## Human Biology Courses

### COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at [www.uw.edu/students/crscat/](http://www.uw.edu/students/crscat/).

**HUBIO 500 P-Medical Practice Preceptorship at WWAMI Sites (1, max. 3)** Personal experience with, and insight into, medical practice situations. Student is stationed with carefully selected clinical faculty members in their offices in accordance with the student's preference of discipline at the WWAMI sites. Registration limited to first-year medical students at WWAMI sites. Offered: AWSp.

**HUBIO 501 P-Human Biology Special Projects (\*)** *MacLaren* Designed for medical students electing a special study project related to the Introduction to Clinical Medicine or other human biology courses, which are offered during the first and second years in the School of Medicine. Primarily intended for students in remedial or extended programs. Prerequisite: permission of assistant dean for curriculum. Offered: AWSp.

**HUBIO 505 P-WWAMI Preceptorship (1)** Opportunity for first-year medical students at WWAMI sites to gain personal experience with medical practice situations by being assigned to selected clinical faculty members in their offices. Offered: Asp.

**HUBIO 510 P-Microscopic Anatomy: Histology (6)** *Muller* Lectures and laboratories in microscopic anatomy designed to provide the principles and concepts of histology, to define the morphological characteristics of the cells, tissues, and organs of the human body, and to relate this information to functional processes studied in concurrent and subsequent courses. Offered: A.

**HUBIO 511 P-Gross Anatomy and Embryology (8/13, max. 13)** *Clark* Structural organization of human body at the macroscopic level to provide a foundation for physical examination and functional assessment of the human organism. Integrates embryological development with study of the cadaver and examination of the normal living body. Concentrates on exploration of the body cavities and the viscera they contain. Offered: A.

**HUBIO 512 P-Mechanisms in Cell Physiology (5)** *Detwiler* Physiology of the cell membrane, including ionic and electrical potential gradients; active transport, excitability, and action potentials; biophysics of sensory receptors; neuromuscular transmission; muscle energetics and contractility; spinal reflexes and central synaptic transmission; autonomic nervous system; energy metabolism and temperature regulation; epithelial transport; gastrointestinal motility and secretions. Offered: A.

**HUBIO 513 P-Introduction to Clinical Medicine (3-)** *E. Goldstein, Issac, Maestas* Instruction in communication skills and interview techniques to form the basis for the doctor-patient relationship and for the skills of communicating with patients. The patient profile is obtained. Attention to developing comfort in the physician role. Offered: A.

**HUBIO 514 P-Biochemistry I-A (4-)** *Maizels* Classical molecular and cellular biochemistry, cellular physiology and molecular genetics. Metabolic interrelationships as they occur in the individual stressed and related to disturbances in disease states. Offered: A.

**HUBIO 516 P-Systems of Human Behavior (5)** *Murray* Effects of behavioral factors in major management problems faced in medical practice relating to cultural background, social role, sexual identity, and belief systems. Acquisition of skills in analyzing behavior, defining objectives, and designing precise treatment strategies. Offered: A.

**HUBIO 522 P-Introduction to Clinical Medicine (4-)** *E. Goldstein, Isaac, Maestas* Medical history is introduced and instruction in data collection is begun. Experience in conducting medical interviews with patients to obtain the medical history and patient profile. Special problems related to interviewing are addressed. Offered: W.

**HUBIO 523 P-Introduction to Immunology (2)** Topics covered include: basic concepts such as antigens; antibodies; complement; B- and T-lymphocyte function, including interactions with each other and with accessory cells; immunological tolerance; major histocompatibility complex and role of these basic concepts in immunopathology (immunodeficiencies, hypersensitivities, autoimmunity, blood transfusion, and transplantation).

**HUBIO 524 P-Biochemistry I-B (4)** *Maizels* Classical molecular and cellular biochemistry, cellular physiology and molecular genetics. Metabolic interrelationships as they occur in the individual stressed and related to disturbances in disease states. Offered: W.

**HUBIO 530 P-Clinical Epidemiology and Evidence-Based Medicine (2)** *Kestenbaum* Community health and disease, including assessment of disease risk and mechanisms of epidemic detection, spread, and control; interpretation of research design, data analysis, bias source; and clinical epidemiology, including evaluation and application of diagnostic tests, natural history of disease, and quantitative aids for clinical decision making. Offered: W.

**HUBIO 531 P-Head, Neck, Ear, Nose, and Throat (5)**

**HUBIO 532 P-Nervous System (8)** *Dacey, Mulligan* An integrated approach to the normal structure and function of the nervous system, including the eye. Presents neuropathological examples as well as clinical manifestations of neurological disease.

**HUBIO 534 P-Microbiology and Infectious Disease (9)** *Moseley* An introduction to medical microbiology and infectious diseases. Emphasizes the biology of microbial pathogens and the mechanisms of pathogenesis. Covers clinical manifestations, epidemiology, general principles of diagnosis, therapy, and prevention of infectious disease. Offered: Sp.

**HUBIO 535 P-Introduction to Clinical Medicine (4)** *E. Goldstein, Isaac, Maestas* Adult screening physical examination is taught through the use of lecture, audiovisual aids, and small-group tutorial, where students in supervised setting practice the physical examination on one other. Further practice in the performance and recording of the patient profile and medical history. Offered: Sp.

**HUBIO 540 P-Cardiovascular System (6)** *Feigl* Interdisciplinary approach to cardiovascular medicine, including anatomy, physiology, radiology, pathology, medicine, and surgery. Function of the cardiovascular system in health and disease. Offered: A.

**HUBIO 541 P-Respiratory System (4)** *Culver* Interdisciplinary approach to the respiratory system, including anatomy of thorax and lungs, ventilation mechanics, blood-gas transport, gas exchange, acid-base balance, and the physiology and pathology of obstructive, restrictive, and pulmonary-vascular diseases. Offered: A.

**HUBIO 542 P-Introduction to Clinical Medicine (4-)** *E. Goldstein, McDonough* Advanced instruction in interview technique, history taking, and physical examination, with emphasis on detection of abnormalities. Offered: A.

**HUBIO 543 P-Principles of Pharmacology I (5)** *Vincenzi* Includes general principles of pharmacology and the specific pharmacology of major drugs acting on the autonomic and cardiovascular systems. Offered: A.

**HUBIO 547 P-Pathology IIA (5)** *Norwood* Examines patterns of cell and tissue response to injury. Covers mechanisms of cell injury, the inflammatory process, thrombosis, normal and abnormal growth, neoplasia, and clinicopathological correlation. Includes a description of the major pathologic changes associated with specific diseases in the different organ systems. Uses a multidisciplinary approach to some diseases which effect more than one organ system including cardiovascular, renal, and respiratory and covers molecular changes in response to environmental exposure to pollution, radiation, and physical injury.

**HUBIO 548 P-Cases in Clinical Ethics (1)** Provides exposure to key issues in clinical ethics as well as the tools for ethical reasoning and critical thinking that support the student's current and future work. Prerequisite: second-year medical students.

**HUBIO 550 P-Introduction to Clinical Medicine (4-)** *E. Goldstein, McDonough* Advanced instruction in interview technique, history taking, and physical examination, with emphasis on identification of problems and correlation of findings with pathophysiological mechanisms. Offered: W.

**HUBIO 551 P-Gastro-Intestinal System (4)** *Saunders* Anatomy of the gastrointestinal system; physiology and pathology of digestion and hepatic function; and physical and laboratory examination. Offered: W.

**HUBIO 552 P-Hematology (3)** *Becker* Familiarizes students with the basic pathophysiologic mechanisms leading to disturbances of red cell, white cell, and platelet production, as well as abnormalities of hemostasis presenting clinical problems. Pathophysiology, rather than minute details of individual disease, is stressed. Offered: W.

**HUBIO 553 P-Musculoskeletal System (4)** *Schmale* Gross, surface, applied, and radiographic anatomy. Clinical manifestations in the musculoskeletal system and pathophysiology of trauma, aging, infection, and inflammation, as well as congenital and metabolic disorders. Dissections, physical examinations, and problem based learning. Offered: W.

**HUBIO 554 P-Genetics (2)** *Raff* Review of basic genetic principles and their applications in clinical medicine. Includes human chromosomal disorders; patterns of inheritance, genetic counseling, amniocentesis; pathogenesis of hereditary diseases, monogenic and multifactorial; role of genetics in common diseases; behavioral genetics; drug-gene interactions; and prevention and treatment of genetic diseases, including prenatal diagnosis and population screening. Offered: A.

**HUBIO 555 P-Medicine, Health, and Society (3)** *Harris* Interdisciplinary introduction to health services designed for future health care practitioners. Examines the history, organization, and effectiveness of the U.S. health care system. Stresses the student's ability to adopt a broad perspective across health care disciplines and traditional boundaries. Offered: W.

**HUBIO 556 P-Hormones and Nutrients (4)** *Lipkin* Introduction to principles of human endocrinology, metabolism, and

nutrition; the physiology and pathophysiology of endocrine systems, glucose and lipid metabolism, and fluid and salt balance; and the importance of proper nutrition in certain disease states.

**HUBIO 557 P-Pathology IIB (2-)** *Norwood* Examines patterns of cell and tissue response to injury. Covers mechanisms of cell injury, the inflammatory process, thrombosis, normal and abnormal growth, neoplasia, and clinicopathological correlation. Includes a description of the major pathologic changes associated with specific diseases in the different organ systems. Uses a multidisciplinary approach to some diseases which effect more than one organ system including cardiovascular, renal, and respiratory and covers molecular changes in response to environmental exposure to pollution, radiation, and physical injury.

**HUBIO 559 P-Problem Based Learning (3)** *B. Goldstein* Teaches students to methodically solve medical problems by gathering, sorting, and interpreting data. Students learn life-long self-education and self-evaluation skills. Provides practice working as a health care team by including medical, nursing, and physician assistant students in each group. Offered: W.

**HUBIO 560 P-Introduction to Clinical Medicine (5)** *E. Goldstein, McDonough* Introduction to clinical and laboratory diagnosis. Offered: Sp.

**HUBIO 562 P-Urinary System (4)** *Jefferson* Anatomy, physiology, and pathology of the kidney, ureter, bladder, and prostate; pathophysiology and treatment of common fluid and electrolyte problems; renal pharmacology; major clinical urinary system syndromes, with current diagnostic approaches and therapy. Offered: Sp.

**HUBIO 563 P-Brain and Behavior (3)** *Pascualy* Major psychiatric disorders are defined and described, and a systematic approach to differential diagnosis is presented. Conceptual development, pathogenesis, epidemiology, nomenclature, and the terminology used in psychiatry are discussed. Offered: Sp.

**HUBIO 564 P-Principles of Pharmacology II (3)** *Chavkin* Lectures and conferences on drugs that act on the central nervous system. Emphasis on physiological and biochemical mechanisms, with consideration of therapeutic and adverse effects. Offered: Sp.

**HUBIO 565 P-Reproduction (4)** *Steiner* Normal development of the human reproductive system. Sexual differentiation, puberty, endocrine control of testicular and ovarian function, gamete biology, fertilization, implantation, immunology and endocrinology of pregnancy, labor and delivery, pathology of the male and female reproductive organs, contraception, prolactin and lactation, aging and infertility. Offered: Sp.

**HUBIO 566 P-Pathology IIC (-3)** *Norwood* Examines patterns of cell and tissue response to injury. Covers mechanisms of cell injury, the inflammatory process, thrombosis, normal and abnormal growth, neoplasia, and clinicopathological correlation. Includes a description of the major pathologic changes associated with specific diseases in the different organ systems. Uses a multidisciplinary approach to some diseases which effect more than one organ system including cardiovascular, renal, and respiratory and covers molecular changes in response to environmental exposure to pollution, radiation, and physical injury.

**HUBIO 567 P-Skin System (2)** *Colven* Gross and microscopic anatomy. Physiology, protection, temperature control, pigmentation, and photosensitivity. Pathology and genetics of skin abnormalities, including tumors. Introduction to clinical evaluation, including physical examination and illustrating examples of inflammatory, vascular, immunological (including drug hypersensitivity), and neoplastic diseases. Offered: A.

**HUBIO 590 P-Medical Information for Decision Making (1)** *Tarczy-Hornoch* Introduction to methods for: a) identifying and retrieving high quality, relevant documents for clinical decision making, b) applying rigorous criteria when reading primary research studies, reviews of primary studies, or other medical information sources that report on the

effectiveness of therapeutic or preventive interventions. Prerequisite: first-year medical students. Offered: W.

**HUBIO 595 P-Independent Investigative Inquiry, IHOP (8)** Roesel With faculty mentorship, students investigate a global health issue, work on a community health project, and create an academic poster. Prerequisite: IHOP students only. Offered: S.

#### **HUBIO 596 P-WWAMI Non-Clinical Selectives II (\*)**

**HUBIO 597 P-Independent Investigative Inquiry (8)** Independent research with faculty sponsor and completion of paper in fulfillment of the independent investigative inquiry graduation requirement. Offered: Sp.

**HUBIO 598 P-WWAMI Non-Clinical Selectives (\*)** Courses offered at WWAMI university sites designed to satisfy the non-clinical selective graduation requirement for medical students. Offered: AWSp.

**HUBIO 599 P-Independent Study in Medical Science (6)** Marshall Independent research with faculty sponsor and completion of paper as partial fulfillment of non-clinical selective graduation requirement. Offered: Sp.

**HUBIO 600 P-Capstone Course: Preparation for Residency (2, max. 4)** A combination of large group lectures and small group discussions and workshops reviewing clinical skills in history-taking and physical examinations, imaging studies, common and emergency drugs, ACLS, infectious disease control, common clinical problems, and other topics that are encountered in residency training. Offered: Sp.

## Immunology

### DEPARTMENT OVERVIEW

H564 Health Sciences

For those contemplating careers in biomedical research, immunology provides challenging and exciting intellectual opportunities. Progress in the discipline in the past decade has been extraordinary, a fact nowhere more visible than at the University of Washington. The Department of Immunology, launched in 1989, now includes more than 30 faculty and 200 scientists, students, post-docs and staff, all engaged in elucidating fundamental immunological mechanisms and how these mechanisms impact human health, infectious, autoimmune and allergic diseases, and cancer. Current members of the department have distinguished records in the area of lymphocyte signaling, T and B cell development, macrophage function, antigen processing, immuno-tolerance, and the structure of antigen receptors.

Consider the fundamental processes that underlie immune function. First, millions of potentially injurious macromolecules must be recognized. Second, recognition of these macromolecules, generally structures associated with potential pathogens, must trigger powerful effector mechanisms that permit elimination of the offending microorganisms. Finally, these recognition and effector systems must distinguish the universe of potentially harmful molecules from an equally diverse repertoire of structurally similar 'self' components. How is such specific molecular recognition achieved? How do the cells responsible for mediating host defense develop, and what signaling systems direct their responses? These are questions being addressed by members of the program at the molecular, cellular, and whole organism levels.

### GRADUATE PROGRAM

#### **Graduate Program Coordinator**

H564 Health Sciences, Box 357650

[immgrad@uw.edu](mailto:immgrad@uw.edu)

206-685-3955, fax 206-543-1013

The graduate program, organized through the Department of Immunology, occupies contemporary laboratory and office space in the H and I wings of the Health Sciences complex, where many faculty are based. Other members of the training faculty are based in contiguous wings of the Health Sciences complex or at one of four affiliated institutions: Fred Hutchinson Cancer Research Center, Benaroya Research Center at Virginia Mason, Children's Hospital, and the Institute for Systems Biology. The University of Washington is a premier institution for biomedical research in the nation, ranking second among all institutions in overall support from the NIH. The research environment is augmented by affiliated institutions, creating an open and collegial partnership for basic, translational, and clinical research in which collaborations and open sharing of ideas and reagents take place. Members of the program have been instrumental in development and application of contemporary technologies, including flow cytometry, confocal microscopy, high-throughput genomic, proteomic, and computational analysis, and generation and analysis of transgenic/knockout/knockin mice to address important immunological and biological questions. Training of students occurs in an open environment which is intellectually stimulating, scientifically diverse, and strongly interactive. All immunology graduate students are assured financial support for the term of their studies.

### Master of Science

Students are not admitted to the department specifically as candidates for a master's degree. A terminal master's degree can be awarded if the faculty deems the student has made some progress in the program but not enough to be consistent with earning the PhD

### Doctor of Philosophy

#### **Admission Requirements**

Students are admitted for autumn quarter; application deadline is January 1 for U.S. citizens and November 1 for international applicants. Requirements for admission are flexible. However, most successful applicants have completed survey courses in biology, chemistry, and physics; one year of organic chemistry; and mathematics through integral calculus. Prior exposure to immunology through formal coursework, or especially through laboratory research, is desirable. A bachelor's degree is required, as is evidence of superior scholarship and above average performance on the GRE General Test. A GRE subject test is not required.

International students must take the Test of English as a Foreign Language (TOEFL); 250 is the minimum acceptable score on computer test.

#### **Degree Requirements**

90 credits, to include:

- 18 graded credits in the first two years of study. First-year coursework consists of consecutive 5-week long courses taken autumn through spring quarters - two per quarter (for 1-1/2 to 2 graded credits each); winter quarter, all first year students also take Immunology 532 (4 graded credits), for a total of 13 or 13.5 graded credits the first year, depending on course choices. In the second year, 4.5 or 5 additional graded credits are required, earned by taking electives winter and/or spring quarters. As part of the first- and second-year coursework, students take two 5-week courses that specifically focus on cancer immunology.
- Autumn quarter of the first year, students may take an elective and attend selected lectures of the undergraduate immunology course, IMMUN 441. Students are required to attend the departmental seminar series, Journal Club, and research-in-progress talks beginning the first quarter and continuing throughout enrollment.

- All elective courses must be relevant to biomedical research, and be rigorous enough to include either a final exam or required written paper for a grade. Elective classes must be at the 500 level, and receive a numerical grade.
- Each graduate student takes the Qualifying Examination during July immediately following the second year of classes. (MSTP students take Qualifying Examinations following the first year of graduate classes.) The qualifying examination is two parts - written and oral.
- Students who pass the Qualifying Examination then prepare for the General Examination, which must be taken within 15 months of the Qualifying Examination.
- The dissertation must meet all format requirements before being accepted by the Graduate School.

## COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at [www.uw.edu/students/crsclat/](http://www.uw.edu/students/crsclat/)

**IMMUN 441 Introduction to Immunology (4)** NW General properties of immune responses; cells and tissues of immune system; lymphocyte activation and specificity; effector mechanisms; immunity to microbes; immunodeficiency and AIDS; autoimmune diseases; transplantation. Prerequisite: BIOL 220; may not be repeated; recommended: GENOME 371, GENOME 372, BIOC 405, or BIOC 440. Offered: A.

**IMMUN 499 Undergraduate Research (\*, max. 24)** Investigative work on a variety of topics, including mechanisms of antigen recognition, T-cell development and differentiation, immunogenetics, lymphocyte activation, MHC gene structure and function, retrovirology, and the pathogenesis of autoimmune diseases, among others. Prerequisite: permission of instructor. Offered: AWSpS.

**IMMUN 532 Advanced Immunology (4)** Examines the molecular and cellular basis of immune function. Students must have completed a baccalaureate degree in a biological specialty and be conversant with molecular genetics. Topics include: hematopoiesis, antigen receptor structure, lymphocyte development, antigen presentation, and cytokines. Prerequisite: graduate standing in Immunology; other graduate students with permission of instructor. Offered: W.

**IMMUN 533 Host Defense to Cancer (2)** Clark Addresses the mechanisms of cellular homeostasis, balancing cells of immune system, programmed cell death, immune surveillance, cancer immunotherapy. Companion course with IMMUN 535. Prerequisite: graduate standing in immunology; other graduate students with permission of instructor. Offered: odd years, Sp, weeks 1-5.

**IMMUN 534 Central Issues in Immunology (2, max. 4)** Presentations by participants of topics relating to the broad study of immunology. Prerequisite: graduate standing in Immunology. Offered: Sp.

**IMMUN 535 Host Defense to Infection (2)** Clark Addresses the mechanisms protecting against pathogens that infect patients with cancers; immune regulation; new developments in vaccines. Companion course with IMMUN 533. Prerequisite: graduate standing in Immunology; other graduate students with permission of instructor. Offered: even years, Sp, weeks 1-5.

**Current Research Conferences** Weekly group conferences concerning ongoing graduate students and postdoctoral research in immunology. Students may register for more than one conference each quarter.

**IMMUN 550 Selected Topics in Immunology (1, max. 30)** Formal seminar-discussion course for advanced students focused on recent developments in the field and consisting of literature research and intensive in-depth study of important and timely topics. Credit/no credit only. Prerequisite: graduate standing in Immunology. Offered: AWSp.

**IMMUN 551 Research Conference in Regulation of T Cell-Dependent B Cell Maturation (1, max. 30)** Clark Weekly

group conferences concerning ongoing graduate students and postdoctoral research in immunology. Students may register for more than one conference each quarter. Credit/no credit only. Prerequisite: graduate standing in Immunology. Offered: AWSpS.

**IMMUN 552 Research Conference in Principles of Antiviral Immunity (1, max. 30)** *Stetson* Weekly group conferences concerning ongoing graduate students and postdoctoral research in immunology. Credit/no credit only. Prerequisite: Immunology graduate student; permission of instructor. Offered: AWSpS.

**IMMUN 553 Research Conference in Recombination and Repair in B Cell Development (1, max. 30)** *Maizels* Weekly group conferences concerning ongoing graduate students and postdoctoral research in immunology. Students may register for more than one conference each quarter. Credit/no credit only. Prerequisite: graduate standing in Immunology. Offered: AWSpS.

**IMMUN 554 Research Conference in Immunogenetic Aspects of Human Autoimmunity (1, max. 30)** *Nepom* Weekly group conferences concerning ongoing graduate students and postdoctoral research in immunology. Students may register for more than one conference each quarter. Credit/no credit only. Prerequisite: graduate standing in Immunology. Offered: AWSpS.

**IMMUN 555 Research Conference in Model of Autoimmune Disease and Their Regulation (1, max. 30)** *Goverman* Weekly group conferences concerning ongoing graduate students and postdoctoral research in immunology. Students may register for more than one conference each quarter. Credit/no credit only. Prerequisite: graduate standing in Immunology. Offered: AWSpS.

**IMMUN 556 Research in Conference in Regulation of Autoimmunity and Allergic Inflammation (1, max. 30)** *Ziegler* Weekly group conferences concerning ongoing graduate student and postdoctoral research in immunology. Students may register for more than one conference each quarter. Credit/no credit only. Prerequisite: graduate standing in Immunology.

**IMMUN 557 Research Conference in Thymic Environment (1, max. 30)** *Farr* Weekly group conferences concerning ongoing graduate student and postdoctoral research in immunology. Students may register for more than one conference each quarter. Credit/no credit only. Prerequisite: graduate standing in Immunology. Offered: AWSpS.

**IMMUN 558 Research Conference in Apoptosis and Autoimmunity (1, max. 30)** *Elkon* Weekly group conferences concerning ongoing graduate student and postdoctoral research in immunology. Students may register for more than one conference each quarter. Credit/no credit only. Prerequisite: graduate standing in Immunology. Offered: AWSpS.

**IMMUN 559 Cytokine Gene Regulation (1, max. 30)** *Bix* Social, cognitive, behavioral, and contextual aspects of information systems, including human information behavior, interpersonal interaction, and social responses to information technology. Emphasis on human well-being and information exchange as a communicative event. Exposure to experimental and interview methodologies. Offered: AWSpS.

**IMMUN 560 Research Conference in Progress in T Cell Research (1, max. 30)** *Bevan, Fink, Goverman, Kaja* Weekly group conferences concerning ongoing graduate student and postdoctoral research in immunology. Students may register for more than one conference each quarter. Credit/no credit only. Prerequisite: graduate standing in Immunology. Offered: AWSpS.

**IMMUN 561 Research Conference in Mechanisms of Peripheral Tolerance (1, max. 30)** *Fink* Weekly group conferences concerning ongoing graduate student and postdoctoral research in immunology. Students may register for more than one conference each quarter. Credit/no credit only. Prerequisite: graduate standing in Immunology. Offered: AWSpS.

**IMMUN 563 Research Conference in Macrophage Biology: Signaling and Phagocytosis (1, max. 30)** *Aderem* Weekly group conferences concerning ongoing graduate student and postdoctoral research in immunology. Students may reg-

ister for more than one conference each quarter. Credit/no credit only. Prerequisite: graduate standing in Immunology. Offered: AWSpS.

**IMMUN 564 Research Conference in Cellular/Molecular Regulation of T Cell Responses (1, max. 30)** *Greenberg* Weekly group conferences concerning ongoing graduate student and postdoctoral research in immunology. Students may register for more than one conference each quarter. Credit/no credit only. Prerequisite: graduate standing in Immunology. Offered: AWSpS.

**IMMUN 565 Research Conference in Innate Immune Defenses Against Virus Infection (1, max. 30)** *Gale* Weekly group conferences concerning ongoing graduate students and postdoctoral research in immunology, with a major focus placed on understanding virus and host regulation of innate immune processes. Students may register for more than one conference each quarter. Credit/no credit only. Prerequisite: graduate standing in Immunology. Offered: AWSpS.

**IMMUN 566 Research Conference in Role of Innate Mechanisms in Generation and Maintenance of Protective Immune Memory (1, max. 30)** *Kaja* Weekly group conferences concerning ongoing graduate students and postdoctoral research in immunology. Students may register for more than one conference each quarter. Credit/no credit only. Prerequisite: graduate standing in Immunology. Offered: AWSpS.

**IMMUN 568 Research Conference in Regulation of the Inflammatory Response of Myeloid Cells (1, max. 30)** *Hamerman* Weekly group conferences concerning ongoing graduate students and postdoctoral research in immunology, with a major focus placed on understanding the regulation of the inflammatory response of myeloid cells. Students may register for more than one conference each quarter. Credit/no credit only. Prerequisite: graduate standing in Immunology. Offered: AWSpS.

**IMMUN 571 Research Conference in Development and Activation of B Cells (1, max. 30)** *Rawlings* Weekly group conferences concerning ongoing graduate student and postdoctoral research in immunology. Students may register for more than one conference each quarter. Credit/no credit only. Prerequisite: graduate standing in Immunology.

**IMMUN 572 Research Conference in Signal Transduction in B-Cells (1 max. 30)** *Scharenberg* Weekly group conferences concerning ongoing graduate student and postdoctoral research in immunology. Students may register for more than one conference each quarter. Credit/no credit only. Prerequisite: graduate standing in Immunology.

**IMMUN 573 Immunology Seminar Series (1, max. 30)** Weekly discussion in which original research results are presented and discussed. Emphasis is on new and original contributions to field of immunology and related areas; occasional seminars are concerned with review of important topics. Credit/no credit only. Prerequisite: graduate standing in Immunology; other graduate students with firm background in Immunology and permission of instructor.

**IMMUN 574 Research Conference in Kaposi's Sarcoma-Associated Herpesvirus: Interactions with B-Cells and Endothelial Cells (1, max. 30)** *Lagunoff* Weekly group conferences concerning ongoing graduate student and postdoctoral research in immunology. Students may register for more than one conference each quarter. Credit/no credit only. Prerequisite: graduate standing in Immunology. Offered:

**IMMUN 575 Research Conference in Infection and Immunity (1, max. 30)** *Bevan* Weekly group conferences concerning ongoing graduate student and postdoctoral research in immunology. Students may register for more than one conference each quarter. Credit/no credit only. Prerequisite: graduate standing in Immunology.

**IMMUN 576 Research Conference in Transcriptional Regulation in the Immune System (1, max. 30)** *Weinmann* Weekly group conferences concerning ongoing graduate student and postdoctoral research in immunology. Students may register for more than one conference each quarter. Credit/no credit only. Prerequisite: graduate standing in Immunology. Offered: AWSpS.

**IMMUN 577 Research Conference in Lymphocyte Homing and Function (1, max. 30)** *Campbell* Weekly group conferences concerning ongoing graduate student and postdoctoral research in immunology. Students may register for more than one conference each quarter. Credit/no credit only. Prerequisite: graduate standing in Immunology. Offered: AWSpS.

**IMMUN 578 Research Conference in Immunology and the Pathogenesis of Tuberculosis (1, max. 30)** *Ramakrishnan* Weekly group conferences concerning ongoing graduate student and postdoctoral research in immunology. Students may register for more than one conference each quarter. Credit/no credit only. Prerequisite: graduate standing in Immunology. Offered: AWSpS.

**IMMUN 579 Research Conference in Costimulation and Autoimmune Disease (1, max. 30)** *Latchman* Weekly group conferences concerning ongoing graduate student and postdoctoral research in immunology. Students may register for more than one conference each quarter. Credit/no credit only. Prerequisite: graduate standing in Immunology. Offered: AWSpS.

**IMMUN 599 Introduction to Immunology Research (1-10, max. 40)** Current problems in immunological research. Credit/no credit only. Prerequisite: graduate standing in Immunology. Offered: AWSpS.

**IMMUN 600 Independent Study or Research (\*)** Credit/no credit only. Prerequisite: graduate standing in Immunology. Offered: AWSpS.

**IMMUN 700 Master's Thesis (\*)** Credit/no credit only. Prerequisite: graduate standing in Immunology. Offered: AWSpS.

**IMMUN 800 Doctoral Dissertation (\*)** Credit/no credit only. Prerequisite: graduate standing in Immunology. Offered: AWSpS.

## Laboratory Medicine

### DEPARTMENT OVERVIEW

NW 120, UW Medical Center

Medical technology, offered by the Department of Laboratory Medicine, is a profession of highly knowledgeable and skilled individuals who perform clinical laboratory tests on patient samples. This is a critical part of health care, as the results obtained by these laboratory tests are a vital tool for physicians in their diagnosis, treatment, and prevention of disease.

### UNDERGRADUATE PROGRAM

#### Adviser

NW 120, UW Medical Center

206-598-6131

[medtech@uw.edu](mailto:medtech@uw.edu)

The Department of Laboratory Medicine offers the following program of study:

- Bachelor of Science in Medical Technology degree

### Bachelor of Science

- *Pre-professional Phase.* During the first two years, students enroll as pre-majors in the College of Arts and Sciences, satisfying general education requirements as well as completing prerequisite courses.
- *Professional Phase.* The professional phase begins autumn quarter of the third year and continues for seven consecutive quarters at the UW School of Medicine. Courses in the first year of the professional phase provide students an appropriate theoretical background and basic technical skills that enable

them to function effectively in the clinical laboratory. The final year is offered in the clinical laboratories of the UW Medical Center and its principal affiliates. Students in the core clinical laboratories receive on-the-bench training in chemistry, hematology, immunohematology, and microbiology.

**Suggested First- and Second-Year College Work:** Completion of University writing, reasoning, and general education requirements. Electives, not required for admission or graduation, may include: CHEM 321, MICROM 301, GENET 351, GENET 371, B STR 301, PHIL 115, PHIL 241, CLAS 101, CLAS 205, PATH 410, UCONJ 420. Begin taking admission requirements, shown below.

### Department Admission Requirements

- BIOL 118, BIOL 180, BIOL 200, BIOL 220; CHEM 142, CHEM 152, CHEM 162 (or CHEM 144, CHEM 154, CHEM 164); CHEM 223, CHEM 224 (or CHEM 237, CHEM 238, CHEM 239); MATH 124 or MATH 144 or STAT 220.
- Complete all general education requirements including 10 credits of Individuals & Societies, and 10 credits of Visual, Literary, & Performing Arts, as well as all required English and writing courses.
- Students admitted to the medical technology program must be exempt from or have successfully completed any required English as a Second Language (ESL) courses no later than August 31 of the application year or admission is cancelled.

**Application Procedure:** See program adviser for application form. Application deadline is February 15, to begin the following autumn quarter.

### Major requirements

136–144 credits as follows:

- **Courses Required for Admission (44–47 credits):** See list above.
- **Didactic Courses (46–51 credits):** BIOC 405, BIOC 406; MICROM 441, MICROM 442, MICROM 443, MICROM 444, MICROM 445; LAB M 321, LAB M 322, LAB M 418, LAB M 419, LAB M 420, LAB M 421.
- **Clinical Rotations (46 credits):** LAB M 423, LAB M 424, LAB M 425, LAB M 426, LAB M 427.
- A minimum grade of 2.0 in all LAB M courses and a minimum GPA of 2.00, both cumulative and in required courses, are required for graduation.

### Student Outcomes and Opportunities

- **Learning Objectives and Expected Outcomes:** Graduates of the medical technology program are expected to have in-depth knowledge of the relationships between laboratory data and pathologic processes, and how laboratory data relate to clinical medicine. They have experience with the performance and quality control of routine and specialized medical laboratory testing procedures and an understanding of the theoretical basis of these procedures. In addition, they have experience trouble-shooting and resolving typical problems in the clinical laboratory and are familiar with laboratory quality assurance, safety, governmental regulations, information systems, management, research design and practice, educational methodology, continuing education, communication, ethics, professionalism, and concepts and principles of laboratory operations. Successful medical technologists enjoy studying the biological, chemical, and physical sciences and find personal satisfaction and intellectual reward in applying scientific methods in the diagnosis and evaluation of disease. A medical technologist may practice as a generalist, using knowledge in several of the scientific areas, or may specialize in one scientific area in larger hospitals. Medical technologists may work in a variety of settings, including clinical laboratories in large medical centers, hospitals, and clinics. Others carry out re-

search in industrial, public health, and medical laboratories, or teach in hospitals, colleges, and universities.

- **Instructional and Research Facilities:** The major training sites are the University of Washington Medical Center and Harborview Medical Center. Affiliate hospitals include Seattle Children's, Labcorp Dynacare, Group Health Cooperative, MultiCare Health System, Northwest Hospital, Providence Everett Medical Center, Providence St. Peter Hospital, Veterans' Affairs Puget Sound Health Care System, Virginia Mason Medical Center, Evergreen Hospital Medical Center, and Highline Medical Center. The Puget Sound Blood Center is also affiliated with the University of Washington. These laboratories support patient care, and provide training and research in the major clinical divisions of chemistry, hematology, immunohematology (blood banking), and microbiology, including multiple subspecialties in these divisions. In addition, students can either receive training in a variety of clinical laboratory rotations designed to enrich their core clinical experiences or participate in research in collaborative projects supervised by faculty members in the Department of Laboratory Medicine. Enrichment rotations include subspecialty sections in chemistry, hematology, and/or microbiology; molecular diagnostics laboratories; and laboratories where multi-tasking skills are utilized.
- **Honors Options Available:** For Interdisciplinary Honors, see University Honors Program.
- **Internship Opportunities:** One or two internships per year in Japan available to graduates of the medical technology program.
- **Department Scholarships:** Several offered.
- **Student Organizations/Associations:** None currently active.

**Of Special Note:** The medical technology program is accredited by the National Accrediting Agency for Clinical Laboratory Sciences, 5600 N. River Road, Suite 720, Rosemont, IL 60018-5119, (847) 939-3597, (773) 714-8880, (773) 714-8886 (fax), [info@naaccls.org](mailto:info@naaccls.org), [www.naacls.org](http://www.naacls.org). Graduates are eligible for certification by the Board of Registry of the American Society for Clinical Pathology and by the National Credentialing Agency for Laboratory Personnel, Inc.

## COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at [www.uw.edu/students/crscat/](http://www.uw.edu/students/crscat/)

**LAB M 321 Medical Technology: Introductory Clinical Hematology (6)** Calvo Lecture and laboratory coverage of the theoretical and practical aspects important in the evaluation of blood cells, to include their production, morphology, function, and associated pathology. Instrumentation used in testing included, as well as quality control and quality assurance issues. Limited to Medical Technology students. Offered: W.

**LAB M 322 Medical Technology: Introductory Clinical Chemistry (5)** Bankson Lecture and laboratory covering the theoretical and practical concepts associated with testing procedures performed in clinical chemistry. Limited to Medical Technology students. Offered: A.

**LAB M 418 Topics in Clinical Chemistry (5)** Bankson Continuation of LAB M 322. Lecture and laboratory exercises covering fundamentals of instrumentation and methodology in the clinical chemistry laboratory. Limited to Medical Technology students. Offered: Sp.

**LAB M 419 Clinical Coagulation (4)** Calvo Lecture and laboratory coverage of the theory of the hemostatic system, to include tests used in the diagnosis/monitoring of patients with abnormal bleeding and/or thrombosis. Instrumentation as appropriate for testing included. Quality control and quality assurance discussed. Limited to Medical Technology students. Offered: A.

**LAB M 420 Laboratory Analysis of Urine and Body Fluids (3)** Lampe Lecture and laboratory covering urinalysis testing procedures and associated disease entities. Analysis of other body fluids. Methods of microscopic examination by use of bright-field, phase, and polarizing microscopy. Limited to Medical Technology students. Offered: A.

**LAB M 421 Medical Microbiology (1/6, max. 6)** Lampe Lecture and laboratory coverage of human infections and diagnostic procedures used for isolation, identification, and antimicrobial susceptibility testing of the microorganisms associated with disease. Limited to Medical Technology students. Offered: S.

**LAB M 423 Clinical Chemistry (\*-, max. 24)** Bankson Clinical testing using automated and manual methods. Measurement of pancreatic function and intestinal absorption, renal and liver function, enzymes, electrolytes, blood gases, lipids, toxicology, urinalysis, endocrinology, and immunology. Limited to Medical Technology students. Offered: AWSp.

**LAB M 424 Clinical Microbiology (\*-, max. 24)** Lampe Techniques used in the diagnostic microbiology laboratory, including quality control, specimen evaluation, identification of pathogenic microorganisms, and antimicrobial susceptibility testing. Limited to Medical Technology students. Offered: AWSp.

**LAB M 425 Clinical Hematology (\*-, max. 24)** Calvo Clinical study of techniques used in the diagnostic evaluation of blood cells, including production, proliferation, survival, morphologic, and functional features. Assessment of proteins and cells important in hemostasis included. Quality control and quality assurance issues considered. Biomolecular techniques appropriate for evaluation of the hematology and hemostatic systems discussed. Limited to Medical Technology students. Offered: AWSp.

**LAB M 426 Clinical Immunohematology (1–7, max. 7)** Nester Lecture and laboratory covering theory of transfusion medicine and serological procedures used in the evaluation of cellular antigen systems. Principles of immunology and genetics included as appropriate for the techniques performed; screening of donor units to provide a safe product discussed. Quality control and quality assurance issues considered. Limited to Medical Technology students. Offered: SpS.

**LAB M 427 Selected Studies in Laboratory Medicine (\*-, max. 24)** Lampe Selected clinical study in the major scientific disciplines of laboratory medicine, to include molecular diagnostics, or pursuance of a clinical research study. Credit/no credit only. Limited to Medical Technology students. Offered: AWSpS.

**LAB M 499 Undergraduate Research (\*)** Specific project in clinical laboratory investigation. Offered: AWSpS.

**LAB M 502 Laboratory Medicine Grand Rounds (1, max. 6)** Greisman Grand rounds are concerned with current topics in the field of laboratory medicine. Credit/no credit only. Offered: AWSp.

**LAB M 510 Laboratory Medicine Research Conference (1, max. 6)** Tait Presentation and discussion of ongoing research and development projects by faculty, residents, fellows, and graduate students. Open to graduate students in laboratory medicine and other medical sciences. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSp.

**LAB M 520 Seminar in Organization and Management in Laboratory Medicine (3)** Chandler Core course for the Master of Science degree in laboratory medicine. Prerequisite: graduate student standing in laboratory medicine or permission of instructor. Offered: odd years; Sp.

**LAB M 521 Advanced Laboratory Hematology (1, max. 6)** Sabbath Lectures on diagnostic clinical hematology with emphasis on clinicopathological correlation. For laboratory medicine graduate students with special interest in diagnostic clinical hematology. Prerequisite: graduate standing and permission of instructor. Offered: AWSp.

**LAB M 522 Hematopathology Seminar (2)** Wood Identification of normal lymphocyte and bone marrow subpopula-

tions, diagnosis of leukemias, lymphomas, and benign conditions that resemble them. Emphasis on histopathology, cytochemical, immunological, and molecular markers. Clinicopathologic correlation. Offered: jointly with PATH 522; even years; W.

**LAB M 526 Clinical Chemistry Methods and Clinical Interpretation (5)** *Baird, Bankson, Schiller* Teaches clinical chemistry analytical concepts and methods in quality assurance, validation procedures, reference ranges, spectrophotometry, enzymology, immunoassays, molecular biology, chromatography, and drug monitoring. Teaches the pathophysiology of all organ systems, along with the interpretation of related laboratory tests. Students present clinical chemistry cases. Offered: A.

**LAB M 590 P-Research Projects in Laboratory Medicine (\*)** *Tait* Opportunity for laboratory experience on a research problem related to laboratory medicine. Students investigate areas of potential clinical importance. Projects selected from areas such as chemistry, coagulation, hematology, immunology, microbiology, virology, molecular diagnostics, and computer applications. Research goals established by instructor in discussion with student. Prerequisite: permission of instructor. Offered: AWSpS.

**LAB M 596 Clinical Chemistry Seminar (2)** *Rainey* Theory and practice of clinical chemistry. For postdoctoral and graduate students in clinical chemistry. Prerequisite: permission of instructor. Offered: AWSpS.

**LAB M 600 Independent Study or Research (\*)** Credit/no credit only. Prerequisite: graduate standing in laboratory medicine. Offered: AWSpS.

**LAB M 601 Internship (3-9, max. 9)** Credit/no credit only. Prerequisite: graduate standing in laboratory medicine. Offered: AWSpS.

**LAB M 680 P-Clinical Laboratory Testing: Methods and Interpretation (\*)** *Wener* Provides the third- and fourth-year medical student with the opportunity to evaluate clinical laboratory data in the clinical laboratory setting. One-on-one teaching using case material and actual clinical samples. Offered: AWSpS.

**LAB M 685 P-Laboratory Case Studies for Clinical Diagnosis (4)** *Nester* Clinical case presentations and discussions aimed at test selection, disease-induced alterations, efficient algorithms, factors confounding interpretation, testing economics. Prerequisite: completion of required clerkships. (Four weeks half-time) Offered: W. **LAB M 699 P-WWAMI Laboratory Medicine Special Electives (\*, max. 24)** By special arrangement for qualified students, special clerkships or externships may be available at institutions other than the University of Washington located within the WWAMI region. Prerequisite: permission of department.

**LAB M 700 Master's Thesis (\*)** Credit/no credit only. Offered: AWSpS.

## MEDEX Northwest

### DEPARTMENT OVERVIEW

Suite 200, Roosevelt Commons

MEDEX Northwest, established in 1969, has the long-standing mission to train health care providers who will practice primary care in medically underserved and rural areas of the UW School of Medicine's service region (Washington, Wyoming, Alaska, Montana, Idaho—or WWAMI). MEDEX also has a formal agreement to train students from Nevada.

## UNDERGRADUATE PROGRAM

### Bachelor of Clinical Health Sciences

#### Admission Requirements

Candidates for the Bachelor of Clinical Health Services degree are admitted to the University of Washington at the junior-year level. They pursue an eight-quarter sequence of prescribed studies in the MEDEX Northwest Physician Assistant Training Program. Admission to the professional training program is competitive, administered by MEDEX Northwest within the School of Medicine. Because of the program's emphasis on prior medical experience, the great majority of applicants are working adults who have completed their pre-professional undergraduate coursework at other colleges and universities.

MEDEX students must be admitted into the bachelor's option during the time of their physician assistant training in order for their MEDEX coursework to be considered as matriculated credits. Matriculation in the Bachelor of Clinical Health Services degree option is dependent upon both admission to the University and acceptance by MEDEX Northwest. For additional information, contact MEDEX Northwest Physician Assistant Program, Box 354980, 206-616-4001.

#### General Education Requirements

- *Proficiency:* English composition (5 credits); Quantitative and Symbolic Reasoning (4/5 credits)
- *Areas of Knowledge (40 credits):* At least 10 credits each in Visual, Literary, and Performing Arts (VLP); Individuals and Societies (I & S); and Natural World (NW). No more than 5 of the remaining 10 credits may come from one of the three fields.
- Additional credits, beyond the major requirements shown below, to bring the minimum total to 180 credits.

#### Major Requirement

129 credits as follows:

MEDEX 450 (6 credits), MEDEX 451 (6), MEDEX 452 (6), MEDEX 453 (5), MEDEX 454 (7), MEDEX 455 (7), MEDEX 456 (3), MEDEX 457 (2), MEDEX 458 (2), MEDEX 459 (2), MEDEX 460 (3), MEDEX 461 (3), MEDEX 462 (3), MEDEX 463 (19), MEDEX 465 (19), MEDEX 466 (19), MEDEX 467 (19), MEDEX 468 (2), MEDEX 469 (2), MEDEX 470 (1), MEDEX 471 (1), MEDEX 472 (1), MEDEX 473 (1), MEDEX 474 (1), MEDEX 475 (1). These courses are taken over eight quarters, not all in numerical order. (Although MEDEX 450 and MEDEX 451 must be taken the first summer quarter of the program, they do not count toward the 180 credits required for the Bachelor of Clinical Health Services degree. The remaining 129 credits shown in this paragraph constitute the major for this degree.)

### Physician Assistant Training

#### Course Requirements

141 credits as follows:

MEDEX 450 (6), MEDEX 451 (6), MEDEX 452 (6), MEDEX 453 (5), MEDEX 454 (7), MEDEX 455 (7), MEDEX 456 (3), MEDEX 457 (2), MEDEX 458 (2), MEDEX 459 (2), MEDEX 460 (3), MEDEX 461 (3), MEDEX 462 (3), MEDEX 463 (19), MEDEX 465 (19), MEDEX 466 (19), MEDEX 467 (19), MEDEX 468 (2), MEDEX 469 (2), MEDEX 470 (1), MEDEX 471 (1), MEDEX 472 (1), MEDEX 473 (1), MEDEX 474 (1), MEDEX 475 (1). These courses are taken over a period of eight quarters, not all in numerical order.

## GRADUATE PROGRAM

### Master in Clinical Health Services

Offered through MEDEX Northwest and the UW School of Medicine, the Extended Master of Clinical Health Services (EMCHS) for physician assistants is designed for professionals who have worked as PAs for at least two years and hold a bachelor's degree. The EMCHS helps students assume leadership roles through the development of skills and techniques needed to manage the rapidly changing world of health care.

#### Admission Requirements

- Baccalaureate degree from a regionally accredited U.S. institution or equivalent foreign institution.
- Minimum 3.00 GPA for the most recent two years of full-time equivalent coursework (90 quarter or 60 semester credits).
- Physician Assistant-Certified (PA-C) by the National Commission on Certification of Physician Assistants (NCCPA).
- An official transcript from the college or university of the highest degree obtained by the applicant.
- An official letter of support from current employer.
- International applicants must demonstrate English language proficiency.

#### Degree Requirements

42 credits, as follows:

- *Courses:* MEDEX 510, MEDEX 511, MEDEX 512, MEDEX 513, MEDEX 521, MEDEX 522, MEDEX 523, MEDEX 524, MEDEX 525, MEDEX 528, MEDEX 531, MEDEX 532, MEDEX 533, MEDEX 536, MEDEX 537, MEDEX 538, focused study (5 credits)
- Minimum grade of 2.7 in all required courses.
- Minimum GPA of 3.00 in all required courses.

## COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at [www.uw.edu/students/crsctat/](http://www.uw.edu/students/crsctat/)

**MEDEX 401 Introduction to Paramedicine (8)** Introduces the history of paramedicine and role of the paramedic, as well as medical concepts and technical skills relevant to its practice. Prerequisite: Seattle/King County Paramedic students only. Offered: A.

**MEDEX 402 Airway Management (3)** Teaches cognitive and psychomotor skills critical to basic and advanced airway management. Includes enhanced techniques of rapid sequence intubation. Prerequisite: MEDEX 401 which may be taken concurrently. Offered: A.

**MEDEX 403 Patient Assessment (4)** Teaches patient assessment and total patient care management. Provides didactic and laboratory exposure necessary to perform competent and thorough patient exams. Prerequisite: MEDEX 401 which may be taken concurrently. Offered: A.

**MEDEX 404 Medical Emergencies I (5)** Studies the pathophysiology and treatment of medical emergencies encountered in cardiopulmonary, neurovascular, endocrine, renal, and obstetric patients. Introduces the pharmacology of neurovascular and cardiopulmonary medications. Prerequisite: MEDEX 403. Offered: W.

**MEDEX 405 Trauma Emergencies (5)** Emphasizes advanced pre-hospital management of the critical trauma patient. Teaches the pathophysiology and treatment of burns and trauma to the head, chest, and abdomen. Includes advanced techniques in surgical airway. Prerequisite: MEDEX 403 which may be taken concurrently. Offered: W.

**MEDEX 406 Medical Emergencies II (3)** Studies the pathophysiology and treatment of alcoholism, environmental disorders, infections and communicable diseases, hematology, toxicology, and psychiatric emergencies. Prerequisite: MEDEX 405. Offered: Sp.

**MEDEX 407 Special Considerations for Paramedicine (4)** Emphasizes the care and treatment of pediatric, geriatric, and bariatric patients. Reviews special considerations encountered in scenarios such as multiple casualty, confined space, and extrication incidents. Prerequisite: MEDEX 406 which may be taken concurrently. Offered: Sp.

**MEDEX 408 Advanced Certifications (5)** Instruction in PEPP, PALS, ACLS, ATLS, and National Registry curricula and certifications. Credit/no credit. Prerequisite: MEDEX 407. Offered: S.

**MEDEX 414 Paramedic Clinical Practicum I (3)** Participation in all aspects of patient care in the HMC-ER and OR with a primary focus on patient assessment and examination, as well as proficiency in IV cannulation and airway management. Credit/no credit only. Prerequisite: MEDEX 401 which may be taken concurrently; Seattle/King County Paramedic students only. Offered: A.

**MEDEX 415 Paramedic Field Practicum I (6)** Consists of regularly scheduled ride time with Seattle Medic One in which the student is closely mentored and evaluated by Seattle Fire Department paramedics as the student begins actively participating in patient care. Emphasizes aspects of scene management and total patient care competence. Credit/no credit only. Prerequisite: MEDEX 401 which may be taken concurrently. Offered: A.

**MEDEX 424 Paramedic Clinical Practicum II (3)** Participation in patient care in the HMC-ER with a focus on patient assessment, examination, IV cannulation, and airway management. Emphasizes the critical care of patients in the cardiovascular intensive care unit. Credit/no credit only. Prerequisite: MEDEX 414. Offered: W.

**MEDEX 425 Paramedic Field Practicum II (7)** Consists of regularly scheduled ride time with Seattle Medic One in which the student is closely mentored and evaluated by Seattle Fire Department paramedics as the student begins actively participating in patient care. Emphasizes scene management and total patient care competence. Credit/no credit only. Prerequisite: MEDEX 415. Offered: W.

**MEDEX 434 Paramedic Clinical Practicum III (4)** Participation in patient care in the CHRM-ER and OR with a focus on pediatric patient assessment, examination and proficiency in IV cannulation and airway management. Emphasizes the care of expectant mother and newborn through rotations in the UW Labor and Delivery department. Credit/no credit only. Prerequisite: MEDEX 424. Offered: Sp.

**MEDEX 435 Paramedic Field Practicum III (8)** Consists of regularly scheduled ride time with Seattle Medic One. The student assumes graduated responsibility for patient care and scene management while being closely evaluated by Seattle Fire Department paramedics as the student begins actively participating in patient care. Emphasizes the field care of the pediatric patient and expectant mother. Credit/no credit only. Prerequisite: MEDEX 425. Offered: Sp.

**MEDEX 444 Paramedic Clinical Practicum IV (3)** Participation in patient care in the HMC Emergency Department, Neurology Clinic, Pulmonary Clinic, and Cardiology Clinic. Focuses on trauma management, extrication, MCI, and search/rescue. Includes observation of a minimum of three autopsies with the medical examiner. Credit/no credit only. Prerequisite: MEDEX 434. Offered: S.

**MEDEX 445 Paramedic Field Practicum IV (11)** Consists of regularly scheduled ride time with Seattle Medic One paramedics. The student assumes all responsibilities for scene management and patient care. Evaluations determine completion of the program. Credit/no credit only. Prerequisite: MEDEX 435. Offered: S.

**MEDEX 450 Basic Science in Clinical Medicine (6)** Review of important basic science concepts that include relevant topics for a health care clinician. Prerequisite: permission of the MEDEX Program. Offered: WS.

**MEDEX 451 Anatomy and Physiology in Clinical Medicine (6)** Uses an organ system approach to human anatomy and physiology relevant for a health care clinician. Offered: AS.

**MEDEX 452 Pathophysiology for Primary Care (6)** Basic pathological and pathophysiological concepts of diseases commonly encountered in primary-care practice. Pathophysiology studied per organ system. Offered: A.

**MEDEX 453 Basic Clinical Skills (5)** Provides the student with mastery of a screening history and physical examination and thoroughness in data-collection skills. Offered: ASp.

**MEDEX 454 Adult Medicine I (7)** Problem-oriented approach to the diagnosis and management of common primary care conditions. Introduction to relevant laboratory and radiological procedures. Organ system approach. Offered: W.

**MEDEX 456 Maternal and Child Health for the MEDEX Practitioner I (3)** Designed to acquaint students with principles of prenatal care and primary-care pediatrics. Offered: W.

**MEDEX 457 Behavioral Medicine I (2)** Develops and demonstrates skills needed for assessment, diagnosis and management of common emotional problems in a clinical setting. Offered: A.

**MEDEX 458 Behavioral Medicine (2)** Develops and demonstrates skills needed for assessment, diagnosis and management of common emotional problems in a clinical setting. Offered: W.

**MEDEX 459 Behavioral Medicine (2)** Develops and demonstrates skills needed for assessment, diagnosis and management of common emotional problems in a clinical setting. Offered: Sp.

**MEDEX 460 Principles of Patient Management (3)** Provides systematic approach to pharmacological therapies including drug choice, risk factor identification and administration. Includes non-pharmacological therapies and emphasizes health education and health promotion strategies. Offered: W.

**MEDEX 461 Principles of Patient Management (3)** Provides systematic approach to pharmacological therapies including drug choice, risk factor identification and administration. Includes non-pharmacological therapies and emphasizes health education and health promotion strategies. Offered: Sp.

**MEDEX 462 Maternal and Child Health for the MEDEX Practitioner II (3)** Continuation of 456. Emphasis on diagnosis and treatment of common pediatric problems. Offered: Sp.

**MEDEX 463 Clinical Clerkships I (19)** Full-time clinical clerkship spent in institution-based or specialty practice settings with the supervision of licensed health care providers. Credit/no credit only. Offered: AWSpS.

**MEDEX 465 Clinical Clerkships II (19)** Continuation of clinical clerkships spent in institution-based or specialty practice settings with supervision of licensed health care providers. Credit/no credit only. Offered: AWSpS.

**MEDEX 466 Family Practice Clerkship for the MEDEX Practitioner I (19)** *Ballweg* Family practice under the supervision of physicians throughout the Pacific Northwest. Common primary-care problems. Students and preceptors are educated in the utilization and management of the physician assistant in practice. Students keep computerized records of patient encounters and complete a variety of written assignments. Credit/no credit only. Offered: AWSpS.

**MEDEX 467 Family Practice Clerkship for the MEDEX Practitioner II (19)** *Ballweg* Further experience in primary-care practice with emphasis on independent patient management by the student supervised by family practitioners. Credit/no credit only. Offered: AWSpS.

**MEDEX 468 Emergency Medicine I for the MEDEX Practitioner (2)** Approach to the diagnosis and management of common emergency conditions for primary care physician assistants. Organ system approach. Offered: W.

**MEDEX 469 Emergency Medicine II for the MEDEX Practitioner (2)** Continuation of MEDEX 468. Approach to diagnosis and management of common emergency conditions for

primary care physician assistant. Organ system approach. Offered: Sp.

**MEDEX 470 Professional Role Development (1)** Explores professional role development, health access issues, licensing issues, health care quality, interdisciplinary relationships, diverse populations and the health care environment. Offered: A.

**MEDEX 471 Professional Role Development (1)** Explores professional role development, health access issues, licensing issues, health care quality, interdisciplinary relationships, diverse populations and the health care environment. Offered: W.

**MEDEX 472 Professional Role Development (1)** Explores professional role development, health access issues, licensing issues, health care quality, interdisciplinary relationships, diverse populations and the health care environment. Offered: Sp.

**MEDEX 473 Technical Skills (1)** Introduces clinical skills and procedures through hands-on experiences. Offered: A.

**MEDEX 474 Technical Skills (1)** Introduces clinical skills and procedures through hands-on experiences. Offered: W.

**MEDEX 475 Technical Skills (1)** Introduces clinical skills and procedures through hands-on experiences. Offered: Sp.

**MEDEX 499 Special Field Projects/Independent Study (1-19, max. 19)** Clinical clerkships and independent study activities. Credit/no credit only. Offered: AWSpS.

**MEDEX 510 Healthcare for Rural and Medically Underserved Populations (5)** Overview of the nature and severity of disparities in health care access and delivery to rural and urban underserved populations for practicing clinicians. Prerequisite: EMCHS students only. Offered: S.

**MEDEX 511 Healthcare Administration and Public Health (5)** Applies the basic principles of healthcare administration and public health to specific communities and practices. Prerequisite: EMCHS students only. Offered: S.

**MEDEX 512 Academic Medicine and Specialty Practice for Practicing Clinicians (5)** Overview for practicing clinicians of primary care as well as medical and surgical specialty practice within the academic medicine environment. Prerequisite: admission to the program. Offered: S.

**MEDEX 513 Global Health for Practicing Clinicians (5)** Overview of global health concerns and solutions including disease processes, health systems, cultural competency and the impacts of health policies on local populations. Prerequisite: admission to the program. Offered: S.

**MEDEX 521 Capstone Project I (3)** Includes capstone project introduction, literature review, critical reading, research design and proposals, ethics, IRB, research writing, and results presentation. Credit/no credit only. (Two weeks on the Seattle campus, six weeks online). Prerequisite: EMCHS students only. Offered: S.

**MEDEX 522 Capstone Project II (1)** Details students' choice of capstone project and preparation of a detailed proposal including the timeline for completion. Credit/no credit only. Prerequisite: MEDEX 521. Offered: A.

**MEDEX 523 Capstone Project III (1)** Students work on capstone projects. Credit/no credit only. Prerequisite: MEDEX 522. Offered: W.

**MEDEX 524 Capstone Project IV (1)** Continuation of work on the capstone project. Credit/no credit only. Prerequisite: MEDEX 523. Offered: Sp.

**MEDEX 525 Capstone Project V (5)** Completion of the capstone project, preparation of finals drafts, submission of finished projects to faculty mentors, and Presentations of projects. Credit/no credit only. Prerequisite: MEDEX 524. Offered: S.

**MEDEX 528 Investigative Skills for Practicing Clinicians (5)** Overview of the principles, research methods, and biostatistical and epidemiological techniques necessary to understand and conduct academic and clinical research. Applications critically appraise the public health and biomedical literatures drawing examples from current scien-

tific literature and existing data. Prerequisite: admission to EMCHS program. Offered: S.

**MEDEX 531 Clinical Residencies I (3)** Clinical residencies spent in community-based or institution-based practice settings with the supervision of licensed health care providers. Credit/no credit only. Prerequisite: EMCHS students only. Offered: AWSpS.

**MEDEX 532 Clinical Residencies II (3)** Clinical residencies spent in community-based or institution-based practice settings with the supervision of licensed health care providers. Credit/no credit only. Prerequisite: EMCHS students only. Offered: AWSpS.

**MEDEX 533 Clinical Residencies III (3)** Clinical residencies spent in community-based or institution-based practice settings with the supervision of licensed health care providers. Credit/no credit only. Prerequisite: EMCHS students only. Offered: AWSpS.

**MEDEX 536 Health Policy for Practicing Clinicians (4)** Overview of United States health policy issues including payment structures, quality, disparities, workforce and legislative impact. Prerequisite: EMCHS students only. Offered: W.

**MEDEX 537 Leadership for Practicing Clinicians (4)** Leadership skills for clinical practice, community, the profession, and organizations. Prerequisite: EMCHS students only. Offered: A.

**MEDEX 538 The Physician Assistant Profession (4)** Overview of the physician assistant profession, focusing on the history of the profession, education, economics, legal, political, and professional aspects of the physician assistant profession, current and future physician assistant roles, and hot topics. Prerequisite: EMCHS students only. Offered: Sp.

**MEDEX 540 Healthcare for Rural and Underserved Populations (5)** Overview of the nature and severity of disparities in health care access and delivery to rural and urban underserved populations. Offered: S.

**MEDEX 541 Healthcare Administration and Public Health (5)** Application of the basic principles of healthcare administration and public health to specific communities and practices. Offered: S.

**MEDEX 542 Academic Medicine and Specialty Practice (5)** Overview of primary care as well as medical and surgical specialty practice within the academic medicine environment. Offered: S.

**MEDEX 543 Global Health (5)** Overview of global health concerns and solutions including disease processes, health systems, cultural competency and the impacts of health policies on local populations. Offered: S.

**MEDEX 550 Basic Science in Clinical Medicine (6)** Intensive review of important basic scientific concepts relevant to clinical medicine. Prerequisite: MEDEX Northwest students only. Offered: S.

**MEDEX 551 Anatomy and Physiology (6)** Overview and review of human anatomy and physiology by organ system. Prerequisite: MEDEX students only. Offered: S.

**MEDEX 552 Pathophysiology for Primary Care (6)** Examines pathological and pathophysiological concepts of diseases commonly encountered in primary care practice. Studies pathophysiology per organ system. Offered: A.

**MEDEX 553 Basic Clinical Skills (5)** Provides the student with mastery of history-taking and physical examination skills, thoroughness in data collection, medical record-keeping, and verbal presentation skills. Offered: A.

**MEDEX 554 Adult Medicine I (7)** Problem-oriented, organ-system approach to the diagnosis and management of common primary care conditions. Offered: W.

**MEDEX 555 Adults Medicine II (7)** Problem-oriented, organ-system approach to the diagnosis and management of common primary care conditions. Offered: Sp.

**MEDEX 556 Maternal Child Health I (3)** Examines the principles of prenatal care and primary care pediatrics. Offered: W.

**MEDEX 557 Behavioral Medicine I (2)** Helps to develop and demonstrate skills needed for assessment, diagnosis, and management of common behavioral and emotional problems in a clinical setting. Offered: A.

**MEDEX 558 Behavioral Medicine II (2)** Helps to develop and demonstrate skills needed for assessment, diagnosis, and management of common behavioral and emotional problems in a clinical setting. Offered: W.

**MEDEX 559 Behavioral Medicine III (2)** Helps to develop and demonstrate skills needed for assessment, diagnosis, and management of common behavioral and emotional problems in a clinical setting. Offered: Sp.

**MEDEX 560 Principles of Patient Management I (3)** Provides systematic approach to pharmacological therapies including drug choice, risk factor identification, and administration. Includes non-pharmacological therapies and emphasizes health education and health promotion. Offered: W.

**MEDEX 561 Principles of Patient Management II (3)** Provides systematic approach to pharmacological therapies including drug choice, risk factor identification, and administration. Includes non-pharmacological therapies and emphasizes health education and health promotion. Offered: Sp.

**MEDEX 562 Maternal Child Health II (3)** Emphasizes the diagnosis and treatment of common pediatric problems. Prerequisite: MEDEX 556. Offered: Sp.

**MEDEX 563 Clinical Clerkships I (19)** Full-time clerkships spent in institution-based or specialty practice setting with the supervision of licensed health care providers. Credit/no credit only. Offered: AWSpS.

**MEDEX 565 Clinical Clerkships II (19)** Full-time clerkships spent in institution-based or specialty practice setting with the supervision of licensed health care providers. Credit/no credit only. Prerequisite: MEDEX 563. Offered: AWSpS.

**MEDEX 566 Family Practice Clerkship I (19)** Family practice under the supervision of physicians throughout the Pacific Northwest. Common primary-care problems. Students and preceptors are educated in the utilization and management of the physician assistant in practice. Students keep computerized records of encounters and complete a variety of written assignments. Credit/no credit only. Offered: AWSpS.

**MEDEX 567 Family Practice Clerkship II (19)** Further experience in primary care practice with an emphasis on independent patient management by the student supervised by family practitioners. Prerequisite: MEDEX 566. Offered: AWSpS.

**MEDEX 568 Emergency Medicine I (2)** Diagnosis and management of common emergency conditions for primary care practitioners. Organ system approach. Offered: W.

**MEDEX 569 Emergency Medicine II (2)** Diagnosis and management of common emergency conditions for primary care practitioners. Organ system approach. Offered: Sp.

**MEDEX 570 Professional Role Development I (1)** Explores professional role development, health assess issues, licensing issues, health care quality, interdisciplinary relationships, diverse populations, and the health care environment. Offered: A.

**MEDEX 571 Professional Role Development II (1)** Explores professional role development, health assess issues, licensing issues, health care quality, interdisciplinary relationships, diverse populations, and the health care environment. Offered: W.

**MEDEX 572 Professional Role Development III (1)** Explores professional role development, health assess issues, licensing issues, health care quality, interdisciplinary relationships, diverse populations, and the health care environment. Offered: Sp.

**MEDEX 573 Technical Skills I (1)** Introduces clinical skills and procedures through hands-on experiences. Offered: A.

**MEDEX 574 Technical Skills II (1)** Introduces clinical skills and procedures through hands-on experiences. Offered: W.

**MEDEX 575 Technical Skills III (1)** Introduces clinical skills and procedures through hands-on experiences. Offered: Sp.

**MEDEX 588 Investigative Skills for Entry-Level Clinicians (5)** Overview of the principles, research methods, and biostatistical and epidemiological techniques necessary to understand and conduct academic and clinical research. Application appraise the public health and biomedical literatures drawing on examples from current scientific literature and existing data. Offered: S.

**MEDEX 599 Independent Study (1–19, max. 19)** Supervised clinical clerkship or independent study activities to meet specific needs. Credit/no credit only. Prerequisite: permission of the MEDEX program. Offered: AWSpS.

## Medical Education and Biomedical Informatics

### DEPARTMENT OVERVIEW

E312 Health Sciences

The Department of Medical Education and Biomedical Informatics (MEBI) is comprised of three units: the Division of General Medical Education, the Division of Biomedical and Health Informatics, and MEDEX Northwest—the Division of Physician Assistant Studies. The Division of General Medical Education serves the medical school and health sciences community through program support, evaluation, and research in the field of medical education ([www.mebi.washington.edu](http://www.mebi.washington.edu)). The Division of Biomedical and Health Informatics consists of a research and training program that emphasizes both basic and applied aspects of informatics with a view toward making a difference in people's lives through interdisciplinary collaboration between faculty and students ([www.bhi.washington.edu](http://www.bhi.washington.edu)). MEDEX Northwest is a regional program that selects experienced health care providers for training as physician assistants and is dedicated to improving access to medical care and emphasizes delivery of health care services to medically underserved populations in the Northwest ([www.medex.washington.edu](http://www.medex.washington.edu)).

The Department of Medical Education and Biomedical Informatics offers courses in the theory and application of medical education and biomedical and health informatics. Courses are designed for faculty, graduate and undergraduate students, postgraduates and fellows in the health sciences who desire further training in the methods, issues, research, and technology of medical education and biomedical informatics. MEBI offers master's and doctoral degrees, as well as certificates and fellowship training, in biomedical and health informatics. MEDEX Northwest offers a program of study leading to a certificate with an optional degree available (a Bachelor of Clinical Health Services). MEDEX also offers an optional master's degree pathway link with the Extended Degree Program in Public Health. MEDEX provides full-time training in three sites (Seattle, Spokane, and Yakima) and offers part-time training in Seattle and Spokane.

### GRADUATE PROGRAM

Graduate Training Program Coordinator

I-264 Health Sciences, Box 357240

(206) 616-0369

[informat@uw.edu](mailto:informat@uw.edu)

### Master of Science

#### Admission Requirements

- Possession of a baccalaureate degree from an institution within the United States or an equivalent degree

from a recognized college or university from outside the United States.

- A minimum undergraduate GPA of 3.00, for the last 90 graded quarter credits or 60 graded semester credits.
- Prior formal college-level coursework, verified by official transcripts, in mathematics (including statistics), computer programming (at least two quarters), and biology (or zoology), as evidenced by official transcripts.
- GRE scores are required unless the applicant holds an earned doctorate (such as PhD, DDS, M.D., EdD, JD) from an accredited U.S. institution. GRE scores must be from testing within the past five years.
- GRE scores are required for all international applicants, including holders of foreign doctorates (such as PhD, DDS, M.D., EdD, JD).
- A test of English language proficiency (usually the TOEFL) is also required for most international applicants, unless they have an earned undergraduate or graduate degree from an accredited U.S. institution. For the TOEFL a minimum score of 600 (paper-based) or 250 (computerized) is required, and the scores must be from a test taken within the past two years.

### Degree Requirements

60 credits, as follows:

- **Foundational courses:** MEBI 530 (3), MEBI 550 (3), MEBI 552 (3); either LIS 510 (4) or LIS 544 (3); two of the following courses: MEBI 534 (3), MEBI 535 (3), HSERV 503/EPI 503 (3); a graduate-level statistics class
- **Elective courses:** Four additional courses to establish depth of knowledge in the student's chosen area of specialization. These must be approved by the student's academic adviser.
- **Research seminars:** At least 3 credits of MEBI 590 and at least 3 credits of MEBI 591
- **Thesis and final examination:** All students must complete an MS thesis and pass a final examination for the master's degree.

### Doctor of Philosophy

#### Admission Requirements

- Possession of a baccalaureate degree from an institution within the United States or an equivalent degree from a recognized college or university from outside the United States.
- A minimum undergraduate GPA of 3.00 for the last 90 graded quarter credits or 60 graded semester credits.
- Prior formal college-level coursework, verified by official transcripts, in mathematics (including statistics), computer programming (at least two quarters), and biology (or zoology), as evidenced by official transcripts.
- GRE scores are required unless the applicant holds an earned doctorate (such as PhD, DDS, M.D., EdD, JD) from an accredited U.S. institution. The GRE scores must be from testing within the past five years.
- GRE scores are required for all international applicants, including holders of foreign doctorates (such as PhD, DDS, M.D., EdD, JD).
- A test of English language proficiency (usually the TOEFL) is also required for most international applicants, unless they have an earned undergraduate or graduate degree from an accredited U.S. institution. For the TOEFL a minimum score of 600 (paper-based) or 250 (computerized) is required, and the scores must be from a test taken within the past two years.

### Degree Requirements

90 credits, to include:

- **Foundational courses:** MEBI 520 (2), MEBI 530 (3), MEBI 550 (3), MEBI 552 (3); either LIS 510 (4) or LIS

544 (3); two of the following: MEBI 534 (3), MEBI 535 (3), HSERV 503/EPI 503 (3); a graduate level statistics class

- **Courses for depth of knowledge:** Five additional courses to establish the necessary depth of knowledge in the student's chosen area of specialization. These must be approved by the student's academic adviser.
- **Research seminars:** 12 credits of research seminars that must include at least 3 credits of MEBI 590 and at least 6 credits of MEBI 591
- **Oral presentations:** All students must satisfactorily present material in an oral format. Students should present at least once per year. This requirement is fulfilled by journal club and research seminar (MEBI 590 and MEBI 591) presentations.
- **Formal examinations:**
  - **The qualifying examination:** All students must pass a qualifying examination (oral and written) that covers breadth of knowledge prior to formally creating a PhD Supervisory Committee and proceeding with their dissertation research.
  - **The general examination:** The general examination includes an oral and written part. The oral portion is a public presentation of the student's area of research, and includes an oral examination covering the student's in-depth knowledge of her or his area.

**Final examination (dissertation defense):** A candidate for the PhD must present a dissertation demonstrating original and independent investigation and significant achievement in the field of biomedical and health informatics.

## COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at [www.uw.edu/students/crsat/](http://www.uw.edu/students/crsat/)

**MEBI 498 Special Topics in Biomedical and Health Informatics (1-4, max. 12)** Readings, lectures, and discussions pertaining to significant problems or issues in Biomedical and Health Informatics. Offered: AWSp.

**MEBI 499 Undergraduate Research (\*, max. 12)** Investigative research or directed readings in medical education and in biomedical and health informatics. Prerequisite: permission of instructor.

**MEBI 510 Topics in Medical Education Research (1/3, max. 12)** Selected research topics in medical education. Development of skills in critical analysis and production of original research. Optional: 1 additional credit for seminar focusing on application of issues in education practice. Credit/no credit only. Offered: AWSp.

**MEBI 511 Current Issues in Medical Education (2)** Addresses current issues in medical education in the context of historic and contemporary developments. Topics include curriculum development, teaching, and learning, clinical knowledge and reasoning, assessment, professional development, program evaluation, and certification. Offered: A.

**MEBI 512 Leadership in Academic Medicine (1)** Explores the theoretical and practical aspects of leadership in academic medicine. Topics include qualities of effective leadership, leadership styles, and impact of institutional organization and culture on leadership. Prerequisite: permission of instructor. Offered: S.

**MEBI 520 Teaching Methods in Medical Education (2)** Ambrozy Empirical and theoretical merits of different teaching methods as applied to medical education. Structuring and leading group discussions, using questions, organizing and delivering lectures, identifying styles of clinical supervision, providing constructive feedback, and presenting effective clinical demonstrations. Offered: W.

**MEBI 521 Evaluation of Learning in the Health Sciences (3)** Carline Basic issues and methods for evaluation of learning: cognitive performance, psychomotor skills, and reasoning

abilities in classroom, laboratory, and clinical settings. Practical applications of instruments such as multiple-choice questions, essays, oral examinations, checklists, rating scales, simulations, and patient management problems. Recommended: MEBI 520. Offered: Sp.

**MEBI 522 Research in Medical Education (2)** Scott Individualized, problem-based overviews of research methods and research design pertinent to research and scholarship in medical education. Development and sequencing of research projects from conceptualization through literature review, including proposal development, project implementation, data management, analysis, and write-up. Assessment and critical reading of related literature stressed. Offered: A.

**MEBI 530 Medical Informatics (3)** Tarczy-Hornoch Overview of biomedical and health informatics concepts, theories, and applications, including the historical evolution and the current and future research directions within the context of information flow in health care settings. Offered: A.

**MEBI 531 Life and Death Computing (3)** Kalet Computing and programming concepts and methods underlying the solution of safety-critical and complex problems in biology, medicine, and health for both research and practice. Includes an introduction to programming in Common Lisp, network programming, and bioinformatics. Prerequisite: CSE 142 or equivalent. Offered: A.

**MEBI 532 Computing Concepts for Medical Informatics II (3)** Kalet Continuation of topics begun in MEBI 531: multi-programming and operating system principles, client-server, network programming with sockets, macros, higher level languages, software engineering. Prerequisite: MEBI 531 or equivalent. Offered: W.

**MEBI 533 Public Health and Informatics (3)** Introduction to the emerging field of public health informatics. Covers general public health topics as well as key public health informatics issues and applications. Evaluates a public health information system. Prerequisite: either MEBI 530 or permission of instructor. Offered: jointly with HSERV 509; Sp.

**MEBI 534 Biology and Informaticists (3)** Brinkley A computing and information oriented treatment of the core concepts of human biology, addressing structure and function at three levels or organization: organism, cell, and gene. Each level includes examples of key anatomic and physiologic concepts, presented from a computational perspective and with the use of electronic resources. Offered: A.

**MEBI 535 Clinical Topics for Informaticists (3)** Masuda Builds on Biology for Informaticists and introduces the student to a variety of clinical disciplines, representative clinical problems from these disciplines, and informatics issues and applications within these disciplines. Lecturers include faculty from the Schools of Medicine, Nursing, Pharmacy, and Dentistry. Prerequisite: MEBI 530, MEBI 531, MEBI 534. Offered: W.

**MEBI 536 Bioinformatics and Gene Sequence Analysis (3)** Rose Nature and relevance of molecular sequence information, computer-based protein, and DNA sequence analysis, molecular sequence and genomic databases, and methods for database accession and interrogation. Prerequisite: background in molecular biology and permission of instructor. Offered: jointly with PABIO 536/PHG 536; Sp.

**MEBI 537 Informatics Research and Evaluation Methods (4)** Gennari Introduces the many facets of evaluation and research for Biomedical and Health Informatics projects. Focuses on formal studies of the application of information technology in medicine, conducted while an information resource is under development and after the resource is in routine service. Offered: A.

**MEBI 540 Critically Appraising and Applying Evidence in Health Care (3)** Wolf Literature appraisal skills for various articles (therapy effectiveness, diagnostic tests, literature reviews, clinical measurement, prognosis, quality of care, decision analysis, causation/etiology, guidelines, and economic evaluation). Appraisal of clinical information from literature, strengths/weaknesses of data, analyses, study design/applicability to a current patient's problem. Prereq-

uisite: permission of instructor. Offered: jointly with HSERV 528; W.

**MEBI 541 Introduction to Systematic Reviews and Meta-analysis of Evidence (3)** *Wolf* Conceptual understanding of the quantitative methods used to synthesize evidence. Methods for pooling evidence across independent studies, pooling binary/continuous outcomes, differences between fixed and random effects models, and guidelines for appraising published systematic reviews/meta-analyses. Prerequisite: introductory level courses in statistics, epidemiology or biostatistics. Prerequisite: permission of instructor. Offered: jointly with HSERV 529/EPI 541; Sp.

**MEBI 542 Medical Information for Decision Making (1)** Introduction to methods for: a) identifying and retrieving high quality, relevant documents for clinical decision making, b) applying rigorous criteria when reading primary research studies or reviews of primary studies or other medical information sources that report on the effectiveness of therapeutic or preventive interventions. Prerequisite: first-year dental student; graduate students, or other health science student standings with permission of instructor. Offered: AW.

**MEBI 550 Knowledge Representation and Applications (3)** *Kalet* A readings class in knowledge representation, as described in the primary artificial intelligence and biomedical informatics literature. Topics may include: frame-based systems, description logics, theorem proving, complexity vs. tractability, ontologies, rule-based systems, and biomedical domain applications. Prerequisite: any artificial intelligence course (e.g., CSE 415 or better), or permission of instructor.

**MEBI 552 Clinical Decision Support (3)** *Doctor* Provides foundation in clinical decision making and support (including decision analysis, Bayesian analysis, belief networks, artificial intelligence, neural networks) presented in the context of local and national decision support systems and the movement to decrease errors in healthcare. Prerequisite: MED 530, MED 531, MED 535, MED 537, CSE 415 or permission of instructor. Offered: W.

**MEBI 554 Biomedical Information Interactions and Design (3)** *Demiris, Pratt* Introduction to theoretical frameworks and research methodologies that underpin the study of human-information interactions and the design of biomedical information systems to support them. Emphasis on understanding informational needs and specifications that drive the design of health information systems. Offered: Sp.

**MEBI 570 Health Sciences Information Needs, Resources, and Environment (3)** *Fuller* Characteristics of users of health sciences information; health professionals, researchers, consumers and patients; environments (academic health sciences centers, hospitals, clinics, and public libraries); evaluation of information resources in health care; types and uses of health information management systems; policy issues, professional standards, education, and certification. Offered: jointly with LIS 528.

**MEBI 580 Computing Fundamentals for Health Providers (3)** Enables health professionals to solve work/practice challenges using existing features of desktop computers. Emphasizes productivity concepts. Introduces extended features of common software packages, as well as basic concepts/methods of small system management and support. Prerequisite: admission to Health Informatics Certificate Program or by instructor permission. Offered: jointly with NURS 521; W.

**MEBI 590 Selected Topics in Health Informatics (1-3, max. 12)** Computers and information technology are improving and changing healthcare education, research, and clinical practice. Informatics faculty and researchers from the UW and affiliated institutions present their research findings as well as discuss their views of national developments in their respective disciplines. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSp.

**MEBI 591 Biomedical Health Informatics Research Colloquium (1)** Provides forum for extensive interactive research discussions. Format is round table with short presentations and long facilitated discussion amongst students and core BHI faculty. Both students and faculty present. Topics primarily research focused (ongoing and proposed research.),

but also journal articles, current topics of debate, and other. Credit/no credit only.

**MEBI 598 Special Topics in Biomedical and Health Informatics (1-4, max. 12)** Readings, lectures, and discussions pertaining to a significant biomedical and health informatics problem or an emerging issue. Topics vary. Offered: AWSp.

**MEBI 599 Independent Study or Research (\*, max. 12)**

**MEBI 600 Independent Study/Research (1-10)** Individual readings or study, including independent study in preparation for doctoral examinations, research, etc. Prerequisite: permission of instructor.

**MEBI 700 Master's Thesis (1-15)** Prerequisite: permission of instructor. Offered: AWSp.

**MEBI 800 Doctoral Dissertation (1-10)**

## Medicine

### DEPARTMENT OVERVIEW

RR512 University of Washington Medical Center

[domchair@uw.edu](mailto:domchair@uw.edu)

Active programs in teaching, research, and patient care are carried on at the University of Washington Medical Center, Veteran's Administration Puget Sound Health Care System (VAPSHCS), Harborview Medical Center, Pacific Medical Center, the Puget Sound Blood Center, the Northwest Kidney Center, and the Fred Hutchinson Cancer Research Center. Major affiliations for clinical teaching also exist with Providence Medical Center and Swedish Hospital Medical Center. There are many additional affiliations with community hospitals in Seattle, the state of Washington, and the WWAMI region. Medical students, interns, medical residents, and postdoctoral research fellows rotate through these various hospitals and participate in the learning experiences offered at each.

### COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at [www.uw.edu/students/crscat/](http://www.uw.edu/students/crscat/)

### Emergency Medicine

**MED EM 501 P-Emergency Medicine Preceptorship (1)** Provides opportunities for first- and second-year medical students to gain experience working in an emergency setting. Students shadow faculty in Emergency Medicine during their shifts. Includes learning about common conditions seen in the emergency department and the opportunity to work on history taking and physical exam skills. Credit/no credit only. Prerequisite: permission of instructor.

**MED EM 550 P-Introduction to Emergency Medicine (1)** Presentation of common medical and surgical emergencies and their urgent management, especially within the framework of rapid patient assessment and stabilization. Lecture topics include chest pain and myocardial infarction, basic arrhythmia management, and burn and wound care.

**MED EM 605 P-Emergency Medicine UWMC (\*, max. 16)** Clerkship emphasizes the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: FAMED; MED; OB/GYN; PEDS; PBSCI; and SURG required clerkships.

**MED EM 606 P-Emergency Medicine HMC (\*, max. 16)** Clerkship emphasizes the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: FAMED; MED; OB/GYN; PEDS; PBSCI; and SURG required clerkships.

**MED EM 625 P-Emergency Medicine Spokane (\*, max. 16)** Clerkship emphasizes the management of ambulatory

emergencies, severely injured, and critically ill patients. Prerequisite: FAMED; MED; OB/GYN; PEDS; PBSCI; and SURG required clerkships.

**MED EM 645 P-Emergency Medicine Boise, St. Lukes (\*, max. 16)** Clerkship emphasizes the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: FAMED; MED; OB/GYN; PEDS; PBSCI; and SURG required clerkships.

**MED EM 646 P-Emergency Medicine Boise, Saint Alphonsus (\*, max. 16)** Clerkship emphasizes the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: FAMED; MED; OB/GYN; PEDS; PBSCI; and SURG required clerkships.

**MED EM 657 P-Emergency Medicine Fairbanks (\*, max. 16)** Clerkship emphasizes the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: FAMED; MED; OB/GYN; PEDS; PBSCI; and SURG required clerkships.

**MED EM 668 P-Emergency Medicine Casper (\*, max. 16)** Clerkship emphasizes the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: FAMED; MED; OB/GYN; PEDS; PBSCI; and SURG required clerkships.

**MED EM 680 P-Emergency Medicine Elective Madigan (8)** Basics of emergency medicine, including the primary survey, secondary survey, and approach to the critically ill patient. Students supervised by emergency boarded staff physicians at Madigan Army Medical Center Emergency Department. Prerequisite: basic clerkship in medicine, surgery, obstetrics, or pediatrics.

**MED EM 681 P-Emergency Medicine Elective - HMC (\*, max. 16)** Elective clerkship emphasizing the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: all 3rd year required clerkships.

**MED EM 682 P-Emergency Medicine Elective UWMC (\*, max. 16)** Elective clerkship emphasizing the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: all 3rd year required clerkships.

**MED EM 697 P-Emergency Medicine Special Electives (\*, max. 24)** By specific arrangement, for qualified students, special clerkship, externship, or research opportunities that can at times be made available at institutions other than University of Washington. Faculty can advise students of opportunities. Students wishing to elect this course should obtain from Dean's office a special assignment form at least one month before preregistration. Prerequisite: permission of instructor at away site and department. (Two, four, six, or twelve weeks.) Offered: AWSp.

**MED EM 699 P-WWAMI Emergency Medicine Special Elective (\*, max. 24)** By special arrangement for qualified students, special clerkships or externships may be available at institutions other than the University of Washington located within the WWAMI region. Prerequisite: permission of department and away site.

### Medicine

**MED 498 Undergraduate Thesis (\*)**

**MED 499 Undergraduate Research (\*)** Case studies, with laboratory research. Available to undergraduates and medical students.

**MED 505 P-Preceptorship in Medicine (1)** To provide opportunity for first- and second-year medical students to gain personal experience with medical practice situations by being stationed with carefully selected clinical faculty members in their offices. Credit/no credit only. Prerequisite: permission of department.

**MED 510 Health Issues of Sexual Minorities (1)** Introduction to the special health care issues and barriers confronting persons identified as bisexual, gay, lesbian, or transgendered. Includes lectures, panels, and case presentations by faculty and community experts.

**MED 530 AIDS: A Multidisciplinary Approach (2)** Comprehensive overview of the public health, clinical, and labora-

tory aspects of human immunodeficiency virus (HIV) infection and disease. Topics include the pathogenesis, natural history, and management of (HIV) infections. The impact of HIV/AIDS on community and global health care and prospects for prevention and control. Credit/no credit only. Offered: jointly with EPI 530/G H 562.

**MED 531 P-Human Genetics (\*)** Weekly seminar dealing with a variety of topics in medical genetics given by faculty of the Division of Medical Genetics and related departments and divisions. Open to medical students with a good foundation in genetics.

**MED 533 P-Clinical Endocrinology (2)** Emphasis on the most major and dependable symptoms, signs, laboratory tests, and therapy for clinical endocrinopathies. Patient illustrated. Limited to second-year medical students. Offered: W.

**MED 534 Wilderness Medicine (1)** Provides training in medical emergencies and clinical situations unique to wilderness settings where access to medical care is limited. Experience gained in patient assessment and the management of common wilderness situations including altitude illness, burns, trauma, diving injuries, hypo- and hyperthermia, and toxin exposures.

**MED 536 Introduction to Critical Care Medicine (1)** *King* Uses a combination of didactics, time spent observing rounds and physicians on-call in the ICU as well as dedicated bedside teaching by a critical care attending physician to teach about core topics in pediatric and adult critical care medicine including shock, respiratory failure, sepsis, mechanical ventilation, and palliative care. Offered: W.

**MED 546 Clinical Applications of Gene Therapy (2)** Overview of the current status of gene therapy. Discusses its role in the future practice of medicine. Lecture and literature reviews.

**MED 547 Quantitative Methods in Medical Genetics (2)** Computational methods of use for medical genetics. Review of problem sets. Topics range from basic probability to linkage analysis. Prerequisite: genetics and permission of instructor.

**MED 549 Clinical Medical Genetics (1)** Review of current clinical advances in medical genetics. Includes lectures and discussion of cases from medical genetics clinic. Prerequisite: genetics or human genetics and permission of instructor.

**CONJ 550 P-Clinical Infectious Diseases (3)** See Conjoint Courses.

**MED 555 P-Mind, Body, and Pen: Writing and the Art of Becoming a Physician (1)** Provides forum for medical students to write about issues in medicine and medical education. Focuses on writing as a process for giving voice to the conflicting demands and dilemmas of becoming a physician. Explores personal narratives, dreams and disappointments, chronic illness and death, empathy and revulsion, authenticity and power.

**UCONJ 555 Principles of STD/HIV Research (3)** See University Conjoint Courses.

**MED 556 Visual Thinking: How to Observe in Depth (1)** Uses Visual Thinking Strategies to look at art and enhance diagnostic acumen. Expands observational and critical thinking skills, and encourages open-ended discussion. Skills applied in assessing patients. Combination of slide sessions and observation of original objects at Seattle museums.

**MED 560 P-Advanced Global Health (2)** Prepares health profession students for work in developing countries. Includes health care delivery systems, political, social, and economic determinants of health, major global health issues, and personal well-being while abroad. Lecture and seminar format with guest speakers, student presentations, and discussion.

**MED 561 Tropical Medicine (1)** Intended for professional health science students interested in learning the pathophysiology, epidemiology, and clinical presentation of disease conditions that are more commonly seen in less-developed countries, resource-limited settings, or tropical climates, and how to diagnose, treat, and follow the reso-

lution of these diseases with commonly limited resources. Credit/no credit only.

**MED 565 P-The Healer's Art: Awakening the Heart of Medicine (1)** Encourages cultivation of human dimensions in practice of medicine while strengthening personal commitment to medicine as a life's work. Facilitates student recognition of commonality of personal concerns among peers and student response to the dimension of mystery in the experience of illness as well as development the capacity for awe.

**MED 599 P-Transfusion Machine (3)** Group discussions and didactic sessions cover broad category of transfusion medicine. Hands-on laboratory experience in red cell serology/compatibility, coagulation, and histocompatibility with emphasis on diagnosis and management of clinical problems. Based at Puget Sound Blood Center. Prerequisite: fourth-year medical student standing; third-year student standing with permission of instructor.

**MED 600 Independent Study or Research (\*)** Credit/no credit only. Prerequisite: permission of instructor.

**MED 630 P-WRITE Medicine Clinical Clerkship (\*, max. 24)** Basic clinical clerkship for students enrolled in the WRITE Program. Prerequisite: completion of basic curriculum; third- and fourth-year students; acceptance in the WRITE program.

**MED 655 P-Clinical HIV Care (8)** Full-time outpatient and inpatient elective in HIV care for senior medical students. Students see patients for routine care and acute medical problems that do not require hospitalization, as well as provide inpatient consults. Prerequisite: MED 665.

**CONJ 677 P-Clinical Allergy and Immunology (\*, max. 12)** See Conjoint Courses.

**MED 695 P-Clinical Aspects of Aging (8)** (*Harborview Long Term Care Service, HMC, Seattle V.A. Medical Center, Boise V.A. Medical Center*) Work with elderly patients as subintern with Senior Care Program. Inpatient and ambulatory setting in nursing homes and patients' homes. Interdisciplinary approach. Prerequisite: MED 665.

**MED 697 P-Medicine Special Electives (\*, max. 24)** Special clerkship, externship, or research opportunities that can at times be made available at institutions other than University of Washington. Faculty can advise students of opportunities. Students wishing to elect this course should obtain from Dean's office a special assignment form at least three months before preregistration. Prerequisite: permission of department. (Two, four, six, or twelve weeks.)

**MED 699 P-WWAMI Medicine Special Electives (\*, max. 24)** By special arrangement for qualified students, special clerkships or externships may be available at institutions other than the University of Washington located within the WWAMI region. Prerequisite: permission of department.

## Medicine Elective Clerkship

**MEDECK 601 P-Ward Medicine Subinternship Seattle (\*, max. 24)** Students act in the capacity of interns on the medical wards under supervision of house staff and visiting physicians. They attend all regular medicine rounds and conferences as their schedules permit. Prerequisite: MEDRCK 601. (Four or six weeks.)

**MEDECK 602 P-Primary Care Seattle (8/12)** Six-week, full-time ambulatory care block in primary care internal medicine. Students participate in several clinics at University of Washington Medical Center following a panel of patients in medicine, rheumatology, and virology clinics. Prerequisite: MEDRCK 601 and permission of instructor.

**MEDECK 603 P-Clinical Cardiology and Electrocardiography Seattle(8)** Clerkship in clinical cardiology-combined inpatient-outpatient assignments, ECG interpretation. Prerequisite: MEDRCK 601. (Four weeks.)

**MEDECK 604 P-Clinical Dermatology Seattle (8)** Participation in dermatology clinics and inpatient consultations. Journal club and clinical conferences each week with entire staff. A continuing series of teaching seminars and weekly

dermatopathology conferences. Prerequisite: MEDRCK 601. (Four weeks.)

**MEDECK 605 P-Clinical Endocrinology and Metabolism Seattle (\*, max. 12)** (*Seattle-based program*); (*Madigan*) Clerkship in clinical endocrinology and metabolism combined inpatient and outpatient assignments at selected hospitals. Prerequisite: MEDRCK 601.

**MEDECK 606 P-Clinical Gastroenterology Seattle (8)** Participation in consulting ward rounds, procedures, conferences, and selected clinics with full-time divisional staff at University and Veterans Administration hospitals, and at Pacific and Harborview medical centers, plus directed tutorial work. Prerequisite: MEDRCK 601. (Four weeks, full-time.)

**MEDECK 607 P-Clinical Hematology/Oncology Seattle (8)** Outpatient and inpatient experience with hematologic/oncologic disorders. The elective includes teaching rounds, conferences, and evaluation of laboratory work. Prerequisite: MEDRCK 601. (Four weeks.)

**MEDECK 608 P-Clinical Infectious Diseases Seattle (8)** Students participate in the consulting service throughout the hospital, attend daily plate rounds, conferences, and seminars. Participate in consulting service throughout hospital to learn microbiological aspects of infectious diseases through the clinical laboratories. Prerequisite: MEDRCK 601. (Four weeks.)

**MEDECK 609 P-Nephrology and Fluid Balance Seattle (8)** Students see clinical nephrologic problems under close supervision, participate in nephrology and transplant rounds, see consults with renal fellow and attending, and work up patients in renal clinics, participate in seminars with clerks from all three hospitals. Prerequisite: MEDRCK 601. (Four weeks.)

**MEDECK 610 P-Clinical Respiratory Disease and Critical Care Medicine Seattle (8)** Training in respiratory disease diagnosis and pulmonary therapy, with special emphasis on cardiopulmonary function testing and interpretation. Inpatient and outpatient teaching rounds, conferences, and basic science integration. Prerequisite: MEDECK 610. (Four weeks.)

**MEDECK 611 P- Dermatologic Surgery Seattle (8)** Dermatologic surgery elective for senior medical students. Instruction in Mohs surgery, conventional skin surgery, cosmetic procedures, wound healing and closure, and intraoperative and postoperative patient management. Prerequisite: MEDECK 611.

**MEDECK 612 P-Clinical HIV Care Seattle (8)** Full-time outpatient and inpatient elective in HIV care for senior medical students. Students see patients for routine care and acute medical problems that do not require hospitalization, as well as provide inpatient consults. Prerequisite: MEDRCK 601.

**MEDECK 613 P-Clinical Nutrition Seattle (8)** Instruction in nutritional assessment and care of both inpatients and outpatients. Students work with preceptors at a variety of hospital and clinic teaching sites, attend nutrition-related seminars, and practice interview skills on standardized patients. Prerequisite: HUBIO 568; MEDRCK 601.

**MEDECK 614 P-Clinical Oncology Seattle (8)** Students functioning as primary physicians are responsible for the work-ups and daily care of patients receiving marrow transplants, high-dose chemotherapy or immunotherapy on an intensive-care research ward. Emphasis is on the management and supportive care of patients with pancytopenia and immunosuppression, transplantation biology, cancer chemotherapy, and infectious disease problems. Prerequisite: MEDRCK 601. (Four weeks.)

**MEDECK 615< P-Rheumatology Seattle (8)** Full-time inpatient-outpatient clerkship in rheumatology. Clinical experience provided in diagnosis and treatment of rheumatic diseases, utilizing outpatient clinics and hospitalized patients at the University of Washington Medical Center, Harborview Medical Center, or VAMC. Emphasis on concepts in pathophysiology, diagnosis, and treatment of these diseases. In addition to patient contact, reading, seminars, and preceptorial sessions are the methods of instruction. Prerequisite: MEDRCK 601.

**MEDECK 616 P-Dermatology Clinic Seattle (\*, max. 5)** Students attend dermatology clinic on Monday mornings and Thursday afternoons for twelve weeks. Two half-days per week. Prerequisite: MEDRCK 601. Offered: AWSpS.

**MEDECK 617 P-Harborview Evening Clinic Seattle (2)** A longitudinal elective for senior medical students who assume primary responsibility for a panel of medical patients in an outpatient clinic. Direct care of patients is supplemented by didactic sessions dealing with issues in ambulatory care. Students are strongly encouraged to participate for four quarters. Prerequisite: MEDRCK 601 and permission of instructor.

**MEDECK 618 P-Medical Consultation Seattle (8)** Full-time outpatient and inpatient elective in peri-operative medical consultation for senior medical students. Students see patients in the medical consultation clinic, then follow them daily when they come in for surgery. Prerequisite: MEDRCK 601.

**MEDECK 619 P-Management of Sexually Transmitted Diseases Seattle (2)** Instruction and clinical experience in diagnosis, treatment, management, and patient counseling of sexually transmitted diseases. Instruction in genitourinary physical examination skills; relevant laboratory techniques and management of patients with STDs. Prior to the elective, each student must review a packet of didactic materials. Prerequisite: MEDRCK 601, SURG 665, and OB GYN 665.

**MEDECK 620 Critical Care Medicine Subinternship - HMC (8)** Participating students function at the sub-intern level on the MICU service at Harborview Medical Center. Through direct patient care responsibilities, students learn about various forms of critical care illness and gain experience in the application of mechanical ventilation, arterial blood gas analysis, and palliative care medicine. Offered: AWSp.

**MEDECK 621 Critical Care Medicine Subinternship - UWMC (8)** Participating students function at the sub-intern level on the MICU service at UWM. Through direct patient care responsibilities, students learn about various forms of critical care illness and gain experience in the application of mechanical ventilation, arterial blood gas analysis, and palliative care medicine. Offered: AWSp.

**MEDECK 626 P-Clinical Cardiology and Electrocardiography Tacoma (8)** Clerkship in clinical cardiology-combined inpatient-outpatient assignments, ECG interpretation. Prerequisite: MEDRCK 601. (Four weeks.)

**MEDECK 627 P-Clinical Endocrinology and Metabolism Tacoma (\*, max. 12)** (Seattle-based program); (Madigan) Clerkship in clinical endocrinology and metabolism combined inpatient and outpatient assignments at selected hospitals. Prerequisite: MEDRCK 601.

**MEDECK 628 P-Clinical Infectious Diseases Tacoma (8)** Students participate in the consulting service throughout the hospital, attend daily plate rounds, conferences, and seminars. Participate in consulting service throughout hospital to learn microbiological aspects of infectious diseases through the clinical laboratories. Prerequisite: MEDRCK 601. (Four weeks.)

**MEDECK 629 P-Clinical Respiratory Disease and Critical Care Tacoma (8)** Training in respiratory disease diagnosis and pulmonary therapy, with special emphasis on cardiopulmonary function testing and interpretation. Inpatient and outpatient teaching rounds, conferences, and basic science integration. Prerequisite: MEDRCK 601. (Four weeks.)

**MEDECK 630 P-Ward Medicine Subinternship Tacoma (\*, max. 24)** Students act in the capacity of interns on the medical wards under supervision of house staff and visiting physicians. They attend all regular medicine rounds and conferences as their schedules permit. Prerequisite: MEDRCK 601. (Four or six weeks.)

**MEDECK 633 P-Clinical Cardiology and Electrocardiography Washington (8)** Clerkship in clinical cardiology-combined inpatient-outpatient assignments, ECG interpretation. Prerequisite: MEDRCK 601. (Four weeks.)

**MEDECK 634 P-Clinical Dermatology Washington (8)** Participation in dermatology clinics and inpatient consultations. Journal club and clinical conferences each week with entire staff. A continuing series of teaching seminars and weekly dermatopathology conferences. Prerequisite: MEDRCK 601. (Four weeks.)

**MEDECK 636 P-Clinical Gastroenterology Washington (8)** (Sacred Heart Spokane) Participation in consulting ward rounds, procedures, conferences, and selected clinics with full-time divisional staff at University and Veterans Administration hospitals, and at Pacific and Harborview medical centers, plus directed tutorial work. Prerequisite: MEDRCK 601. (Four weeks, full-time.)

**MEDECK 638 P-Clinical Infectious Diseases Washington (8)** Students participate in the consulting service throughout the hospital, attend daily plate rounds, conferences, and seminars. Participate in consulting service throughout hospital to learn microbiological aspects of infectious diseases through the clinical laboratories. Prerequisite: MEDRCK 601. (Four weeks.)

**MEDECK 639 P-Nephrology and Fluid Balance Washington (8)** Students see clinical nephrologic problems under close supervision, participate in nephrology and transplant rounds, see consults with renal fellow and attending, and work up patients in renal clinics, participate in seminars with clerks from all three hospitals. Prerequisite: MEDRCK 601. (Four weeks.)

**MEDECK 640 Critical Care Medicine Subinternship - Washington (8)** Participating students function at the sub-intern level on the MICU. Through direct patient care responsibilities, students learn about various forms of critical care illness and gain experience in the application of mechanical ventilation, arterial blood gas analysis, and palliative care medicine. Offered: AWSp.

**MEDECK 644 P-Clinical Dermatology Wyoming (8)** Participation in dermatology clinics and inpatient consultations. Journal club and clinical conferences each week with entire staff. A continuing series of teaching seminars and weekly dermatopathology conferences. Prerequisite: MEDRCK 601. (Four weeks.)

**MEDECK 651 P-Ward Medicine Subinternship Alaska (\*, max. 24)** Students act in the capacity of interns on the medical wards under supervision of house staff and visiting physicians. They attend all regular medicine rounds and conferences as their schedules permit. Prerequisite: MEDRCK 601. (Four or six weeks.)

**MEDECK 653 P-Clinical Cardiology and Electrocardiography Alaska (8)** Clerkship in clinical cardiology-combined inpatient-outpatient assignments, ECG interpretation. Prerequisite: MEDRCK 601. (Four weeks.)

**MEDECK 654 P-Clinical Dermatology Alaska (8)** Participation in dermatology clinics and inpatient consultations. Journal club and clinical conferences each week with entire staff. A continuing series of teaching seminars and weekly dermatopathology conferences. Prerequisite: MEDRCK 601. (Four weeks.)

**MEDECK 664 P-Clinical Dermatology Montana (8)** Participation in dermatology clinics and inpatient consultations. Journal club and clinical conferences each week with entire staff. A continuing series of teaching seminars and weekly dermatopathology conferences. Prerequisite: MEDRCK 601. (Four weeks.)

**MEDECK 665 P-Nephrology and Fluid Balance - Montana (8)** Students see clinical nephrologic problems under close supervision, participate in nephrology and transplant rounds, see consults with renal fellow and attending, and work up patients in renal clinics, participate in seminars with clerks from all three hospitals. Prerequisite: MEDRCK 601. (Four weeks.)

**MEDECK 671 P-Ward Medicine Subinternship Idaho (\*, max. 24)** Students act in the capacity of interns on the medical wards under supervision of house staff and visiting physicians. They attend all regular medicine rounds and conferences as their schedules permit. Prerequisite: MEDRCK 601. (Four or six weeks.)

**MEDECK 673 P-Clinical Cardiology and Electrocardiography Idaho (8)** Clerkship in clinical cardiology-combined inpatient-outpatient assignments, ECG interpretation. Prerequisite: MEDRCK 01. (Four weeks.)

**MEDECK 674 P-Clinical Dermatology Idaho (8)** Participation in dermatology clinics and inpatient consultations. Journal club and clinical conferences each week with entire staff. A continuing series of teaching seminars and weekly dermatopathology conferences. Prerequisite: MEDRCK 601. (Four weeks.)

**MEDECK 677 P-Clinical Hematology/Oncology Idaho (8)** Outpatient and inpatient experience with hematologic/oncologic disorders. The elective includes teaching rounds, conferences, and evaluation of laboratory work. Prerequisite: MEDRCK 601. (Four weeks.)

**MEDECK 678 P-Clinical Infectious Diseases Idaho (8)** Students participate in the consulting service throughout the hospital, attend daily plate rounds, conferences, and seminars. Participate in consulting service throughout hospital to learn microbiological aspects of infectious diseases through the clinical laboratories. Prerequisite: MEDRCK 601. (Four weeks.)

**MEDECK 679 P-Nephrology and Fluid Balance Idaho (8)** Students see clinical nephrologic problems under close supervision, participate in nephrology and transplant rounds, see consults with renal fellow and attending, and work up patients in renal clinics, participate in seminars with clerks from all three hospitals. Prerequisite: MEDRCK 601. (Four weeks.)

**MEDECK 680 P-Clinical Respiratory Disease and Critical Care Medicine Idaho (8)** Training in respiratory disease diagnosis and pulmonary therapy, with special emphasis on cardiopulmonary function testing and interpretation. Inpatient and outpatient teaching rounds, conferences, and basic science integration. Prerequisite: MEDECK 610. (Four weeks.)

**MEDECK 681 P-Clinical Aspects of Aging Idaho (8)** Work with elderly patients as subintern with Senior Care Program. Inpatient and ambulatory setting in nursing homes and patients' homes. Interdisciplinary approach. Prerequisite: MEDRCK 601.

**MEDECK 689 P-Clinical Infectious Diseases Idaho (8)** Students participate in the consulting service throughout the hospital, attend daily plate rounds, conferences, and seminars. Participate in consulting service throughout hospital to learn microbiological aspects of infectious diseases through the clinical laboratories. Prerequisite: MEDRCK 601. (Four weeks.)

**MEDECK 690 P-General Internal Medicine Shiprock (8)** Clerkship located at the Northern Navajo Medical Center in Shiprock, New Mexico. Students are involved in all aspects of patient care, including home visits, ambulatory care, and hospital stays. Prerequisite: MEDRCK required clerkship. Offered: AWSpS.

**MEDECK 691 P-Medicine Special Electives Seattle (\*, max. 24)** By special arrangement for qualified students, special clerkships or externships. Prerequisite: permission of department.

**MEDECK 692 P-Medicine Special Electives Washington (\*, max. 24)** By special arrangement for qualified students, special clerkships or externships. Prerequisite: permission of department.

**MEDECK 693 P-Medicine Special Electives Wyoming (\*, max. 24)** By special arrangement for qualified students, special clerkships or externships. Prerequisite: permission of department.

**MEDECK 694 P-Medicine Special Electives Alaska (\*, max. 24)** By special arrangement for qualified students, special clerkships or externships. Prerequisite: permission of department.

**MEDECK 695 P-Medicine Special Electives Montana (\*, max. 24)** By special arrangement for qualified students, special clerkships or externships. Prerequisite: permission of department.

**MEDECK 696 P-Medicine Special Electives Idaho (\*, max. 24)** By special arrangement for qualified students, special clerkships or externships. Prerequisite: permission of department.

**MEDECK 697 P-Medicine Special Electives Away (\*, max. 24)** Special clerkship, externship, or research opportunities that can at times be made available at institutions other than University of Washington. Faculty can advise students of opportunities. Students wishing to elect this course should obtain from Dean's office a special assignment form at least three months before preregistration. Prerequisite: permission of department. (Two, four, six, or twelve weeks.

## Medicine Required Clerkship

**MEDRCK 601 P-Clinical Clerkship (\*, max. 24)** Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (Twelve weeks, full-time.)

**MEDRCK 612 P-Clinical Clerkship Seattle-Madigan (\*, max. 24)** Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (Twelve weeks, full-time.)

**MEDRCK 614 P-Clinical Clerkship Seattle-Montesano (\*, max. 24)** Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (Twelve weeks, full-time.)

**MEDRCK 621 P-Clinical Clerkship Spokane (\*, max. 24)** Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (Twelve weeks, full-time.)

**MEDRCK 622 P-Clinical Clerkship Seattle-Spokane (\*, max. 24)** Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (Twelve weeks, full-time.)

**MEDRCK 624 P-Clinical Clerkship Seattle-Wenatchee (\*, max. 24)** Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (Twelve weeks, full-time.)

**MEDRCK 630 P-Write Medicine Clinical Clerkship (\*, max. 24)** Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (Twelve weeks, full-time.)

**MEDRCK 632 P-Clinical Clerkship Seattle-Jackson (\*, max. 24)** Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident

and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (Twelve weeks, full-time.)

**MEDRCK 634 P-Clinical Clerkship Seattle-Sheridan (\*, max. 24)** Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (Twelve weeks, full-time.)

**MEDRCK 636 P-Clinical Clerkship Seattle-Douglas (\*, max. 24)** Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (Twelve weeks, full-time.)

**MEDRCK 652 P-Clinical Clerkship Seattle-Anchorage (\*, max. 24)** Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (Twelve weeks, full-time.)

**MEDRCK 654 P-Clinical Clerkship Seattle-Soldotna (\*, max. 24)** Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (Twelve weeks, full-time.)

**MEDRCK 671 P-Clinical Clerkship Billings (\*, max. 24)** Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (Twelve weeks, full-time.)

**MEDRCK 672 P-Clinical Clerkship Seattle-Billings (\*, max. 24)** Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (Twelve weeks, full-time.)

**MEDRCK 674 P-Clinical Clerkship Seattle-Dillon (\*, max. 24)** Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (Twelve weeks, full-time.)

**MEDRCK 676 P-Clinical Clerkship Seattle-Missoula (\*, max. 24)** Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (Twelve weeks, full-time.)

**MEDRCK 691 P-Clinical Clerkship Boise (\*, max. 24)** Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (Twelve weeks, full-time.)

# Microbiology

## DEPARTMENT OVERVIEW

K-335A Health Sciences

Microbiology is a natural science that deals with microorganisms such as bacteria, fungi, protozoa, algae, and viruses. It is concerned with the nature and properties of these organisms, their effects on humans and the environment, and how they can be exploited to provide useful products.

## UNDERGRADUATE PROGRAM

### Adviser

K-335A Health Sciences, Box 357242

206-543-2572

[advmicro@uw.edu](mailto:advmicro@uw.edu)

The Department of Microbiology offers the following programs of study:

- The Bachelor of Science degree with a major in microbiology
- A minor in microbiology

## Bachelor of Science

*Suggested First- and Second-Year Courses:* PHYS 114, PHYS 115, PHYS 116, or PHYS 121, PHYS 122, PHYS 123; one of the following: MATH 112, MATH 124, MATH 144, Q SCI 381, or STAT 311.

MICROM 410, the first microbiology course for majors, is taken after completion of BIOL 200 and organic chemistry (CHEM 223 or CHEM 237). To graduate in four years, a student must complete introductory biology and organic chemistry before autumn quarter of the junior year.

MICROM 101, MICROM, 301, and MICROM 302, offered to non-majors, serve as introductory courses, but cannot be used to fulfill graduation requirements for a major in microbiology. MICROM 301 is a prerequisite for students applying to nursing, physical therapy, or dental school.

### Department Admission Requirements

- A minimum of 75 credits applicable to graduation, with a minimum cumulative GPA of 2.25 in prerequisite chemistry and biology courses.
- Completion of the following prerequisite courses: BIOL 180, BIOL 200, BIOL 220; CHEM 142, CHEM 152, CHEM 162; CHEM 223, CHEM 224, or CHEM 237, CHEM 238, CHEM 239.

### Major Requirements

Minimum 94 credits (including microbiology courses) in the biological, physical, and mathematical sciences, as follows:

- BIOL 180, BIOL 200, BIOL 220, or equivalent (15 credits/one year)
- Inorganic chemistry: CHEM 142, CHEM 152, CHEM 162 (16 credits) (or CHEM 145, CHEM 155); Organic chemistry: CHEM 223, CHEM 224 (8 credits) (or CHEM 237, CHEM 238, CHEM 239; or CHEM 335, CHEM 336, CHEM 337)
- MICROM 402, MICROM 410, MICROM 411, MICROM 412, MICROM 431, MICROM 441, MICROM 442, MICROM 443, MICROM 496, and MICROM 445 or MICROM 450 (31 or 32 credits)
- Approved microbiology electives (5 credits, not to include MICROM 101, MICROM 301, MICROM 302)
- PHYS 114, PHYS 115 (8 credits) (or PHYS 121, PHYS 122) (PHYS 116 or PHYS 123 recommended)

- Either MATH 112, MATH 124, MATH 127, MATH 144, Q SCI 381, or STAT 311 (5 credits)
- BIOC 405, BIOC 406 (6 credits) (or BIOC 440, BIOC 441, BIOC 442)
- For all required and elective microbiology courses used toward graduation, a minimum 2.25 cumulative GPA and a minimum grade of 1.8 in each course.
- Transfer students must complete at least 20 of the required and elective microbiology credits at the UW.

## Minor

Minor Requirements: 30 credits as follows:

- 15 credits in biology and chemistry (BIOL 200 or BIOL 161-BIOL 162 or equivalent; CHEM 237 or CHEM 220, CHEM 221, or equivalent)
- 15 credits in 400-level, graded microbiology courses, including at least one lab course (MICROM 402 or MICROM 431 or MICROM 443; MICROM 302 also acceptable), and both MICROM 410 and MICROM 496.
- Minimum cumulative 2.00 GPA for all courses counted toward the minor.

## Student Outcomes and Opportunities

- **Learning Objectives and Expected Outcomes:** The department's objective is to provide a major with the best instruction possible in broad areas of microbiology so students qualify for a wide variety of positions with a terminal B.S. degree or qualify to pursue advanced degrees in graduate or professional schools. Microbiology offers students an excellent education in the biology of microorganisms, namely bacteria, fungi, protozoa, and viruses. Through learning about the biology of these microorganisms and viruses, students more fully understand the pivotal position they occupy in establishing and maintaining our biosphere, their effects on human, animal, and plant life, and how the biological properties of certain microbes are exploited for certain purposes. Microorganisms are important in drinking water, wastewater and sewage treatment, production and spoilage of foods, production of antibiotics, bioremediation of toxic compounds, and genetic engineering of organisms having unique characteristics. Students gain insight into strategies used by microorganisms and viruses to cause disease and the mechanisms used by their host to defend themselves. Graduates have found research positions in biotechnology and pharmaceutical companies, as well as in state and government positions hiring microbiologists. Students interested in a health profession or graduate program benefit from this program.
- **Instructional and Research Facilities:** Microbiology courses are taught using state-of-the-art facilities in the teaching wing of the Health Sciences building. Research labs are located in the Health Sciences, Fred Hutchinson Cancer Research Center, NW Regional Primate Research Center, and UW Rosen building.
- **Honors Options Available:** With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- **Research, Internships, and Service Learning:** MICROM 499, undergraduate laboratory research, is offered for credit. See adviser for details.
- **Department Scholarships:** The department offers four awards each year. More information is available at the department's website.
- **Student Organizations/Associations:** The Microphiles Club is open to all students. The club sponsors field trips to local biotech companies, speakers on topics such as research and career opportunities, graduate school, and peer teaching.

## GRADUATE PROGRAM

### Graduate Program Coordinator

K335A Health Sciences, Box 357242

206-543-2572

[advmicro@uw.edu](mailto:advmicro@uw.edu)

The Department of Microbiology offers a graduate program leading to the Doctor of Philosophy degree. Students interested in graduate work should obtain the necessary application forms from the department.

### Admission Requirements

Students can be admitted to the PhD program with a background in any biological science discipline. Selection is based on the evaluation of a student's undergraduate record for indications of the ability to excel in independent, creative research. The department strongly recommends that undergraduate preparation include courses in biochemistry, physics, general and organic chemistry, microbiology, molecular biology and cell biology. To be competitive with the applicant pool, prospective students are also strongly advised to seek opportunities to carry out undergraduate research.

*Required background courses* (generally satisfied prior to entry into the graduate program):

- A one year course in biochemistry (equivalent to BIOC 440, BIOC 441, and BIOC 442)
- A course in classical and molecular genetics (equivalent to GENOME 371 or GENOME 372)
- A course in general microbiology (equivalent to MICROM 410)
- A course in medical microbiology and basic immunology is recommended for those considering research in the area of medical microbiology or virology

### Degree Requirements

90 credits minimum, as follows:

- **Conjoint courses (6 credits):** 6 credits from the following conjoint courses: CONJ 524, CONJ 531, CONJ 532, CONJ 533, CONJ 534, CONJ 535, CONJ 537, CONJ 538, CONJ 539, CONJ 541, CONJ 543, CONJ 544, CONJ 545, CONJ 546, CONJ 547, CONJ 548, CONJ 549 (1.5 credits each). It is recommended that students take additional conjoint courses or choose one or more of the Genome Sciences modules: GENOME 551, GENOME 552, GENOME 553, GENOME 554, GENOME 555, GENOME 556, GENOME 559 (1.5 credits each).
- **Virology and Bacteriology courses (6–7 credits):** Three of the following courses; one virology and one bacteriology course must be among those selected: MCB 532 (3), MCB 542 (3), MICROM 441 (4), MICROM 450 (3), MICROM 510 (3), MICROM 530 (3), MICROM 553 (3)
- **Faculty Research Presentations** for first-year students: MICROM 599 (2)
- **Lab Rotation:** MICROM 500, minimum of three quarters
- **Journal Club:** MICROM 522, continuous enrollment
- **Seminar:** Microbiology 520 seminar series or attendance at Fred Hutchinson seminars. Students at Fred Hutchinson are also encouraged to attend the Microbiology seminars. To be taken every quarter unless a conflict with teaching exists.
- **Research Discussion Groups:** To be taken every quarter. Students should register for the appropriate course number for credit.
- **Additional requirements:**
  - Teaching assistantship in at least two lab courses for undergraduates (usually satisfied in the first and/or second year).

- Give at least two formal lectures in an undergraduate course (third or fourth year).
- Be first author on multiple papers related to thesis research which are published or accepted for publication in refereed journals. Under some circumstances, one first-author publication would satisfy this requirement.
- General examination, dissertation, final exam

## COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at [www.uw.edu/students/crscat/](http://www.uw.edu/students/crscat/)

**MICROM 101 Microbes and Society (5) NW Anderson, Brill** Intended for liberal arts majors and students not majoring in the biological sciences. Focuses on activities of bacteria, viruses, and other microorganisms, and their influence on humans. Microbe-related topics include disease, bioterrorism, food, biotechnology, and ecology. Examines the nature of scientific inquiry, along with major biological concepts. Offered: W.

**MICROM 301 General Microbiology (3) NW Anderson, Lara, Nester** Acquaints students with microorganisms and their activities. Topics include microbial cell structure and function, metabolism, microbial genetics, and the role of microorganisms in disease, immunity, and other selected applied areas. Prerequisite: either CHEM 120, CHEM 140, CHEM 142, or CHEM 145; recommended: biology; organic chemistry. Offered: AWSpS.

**MICROM 302 General Microbiology Laboratory (2) NW Anderson, Chandler, Gray** Laboratory course primarily for students taking 301. Covers a variety of microbiological techniques, with experiments designed to illustrate major concepts of bacteriology, virology, and immunology. No auditors. Recommended: MICROM 301 which may be taken concurrently. Offered: ASpS.

**MICROM 402 Fundamentals of General Microbiology Laboratory (3) NW Fulton, Gray** Isolation of a broad range of non-pathogenic bacteria from natural sources, using selective and enrichment techniques, with microscopic, biochemical, and molecular identification. Related exercises include genetics, physiology, quantitation, and growth energetics. Prerequisite: BIOL 200; recommended: MICROM 410 which may be taken concurrently. Offered: ASp.

**MICROM 410 Fundamentals of General Microbiology I (3) NW Lara, Parsek** Survey of the microbial world, metabolism, biosynthesis, regulation, growth, structure, and function. Required for students majoring in microbiology; recommended for students majoring in biology. Prerequisite: BIOL 200; either CHEM 223, CHEM 237, or CHEM 335. Offered: A.

**MICROM 411 Gene Action (5) NW Gray, Traxler** Molecular genetics: description of fundamental genetic processes such as mutation, repair, genetic exchange, recombination, and gene expression. Use of genetic strategies to analyze complex biological processes. Focuses on prokaryotic organisms. Prerequisite: BIOL 200; either CHEM 223, CHEM 237, or CHEM 335. Offered: jointly with GENOME 411; W.

**MICROM 412 Prokaryotic Diversity (3) NW Leigh** Structure, biochemical properties, and genetics of the major groups of prokaryotes. Prerequisite: BIOL 200; recommended: either CHEM 223, CHEM 237, or CHEM 335; MICROM 410. Offered: Sp.

**MICROM 431 Prokaryotic Recombinant DNA Techniques (3) NW Anderson, Chandler** Laboratory course emphasizing concepts and techniques/methodologies in recombinant DNA research employing bacteria and their viruses. Topics and experiments/demonstrations include genomic and plasmid DNA isolation, restriction mapping, cloning, transposon mutagenesis, sequencing, and Western and Southern blotting. No auditors. Prerequisite: either BIOL 200 or MICROM 301. Offered: W.

**MICROM 435 Microbial Ecology (3) NW** Consideration of the various roles that microorganisms, particularly bacteria and cyanobacteria, play in environmental processes. The interrelationships among microorganisms and the effects of the physical, chemical, and biological properties of their environment are discussed and assessed. Prerequisite: BIOL 180. Offered: even years; Sp.

**MICROM 440 Introductory Bacteriology for Medical Technologists (1) NW** *Anderson* Limited introduction to basic microbiology, with focus on structure, metabolism, and genetics of medically important organisms. Open only to medical technology students. Credit/no credit only. Offered: A.

**MICROM 442 Medical Bacteriology (3) NW** *Cookson, Fulton* Medically important bacterial pathogens are discussed in terms of the clinical, therapeutic, and epidemiological aspects of diseases caused by them, molecular mechanisms of pathogenesis and their identification in the clinical laboratory. Laboratory course 443 coordinates. Prerequisite: BIOL 200; recommended: MICROM 410; MICROM 441. Offered: W.

**MICROM 443 Medical Bacteriology Laboratory (3) NW** *Anderson, Chandler, Fulton* Required for medical technology students, microbiology majors; elective for medical students. Procedures for isolation and identification of pathogenic bacteria, testing their susceptibility to antibiotics. No auditors. Prerequisite: BIOL 200; recommended: MICROM 410. Offered: AW.

**MICROM 444 Medical Mycology and Parasitology (4) NW** *Anderson, Fulton, Schmer, White* Consideration of medically important fungi and parasites, with emphasis on their biology in relation to disease and its laboratory diagnosis. For medical technology students, microbiology majors, and medical students as an elective. Prerequisite: BIOL 200; recommended: immunology. Offered: Sp.

**MICROM 445 Medical Virology (2) NW** *Lagunoff* An introductory course emphasizing basic understanding of medical virology and viral pathogenesis. The biochemical, replication, host-parasite relationships and pathogenesis of animal viruses are examined. Prerequisite: either BIOL 180 or BIOL 200; Sp.

**MICROM 450 Molecular Biology of Viruses (3) NW** *Champoux* Introduction to the molecular biology of viruses and virus-host relationships. Designed for advanced undergraduates and graduate students in the biological sciences. Coverage includes bacterial and animal viruses, with an emphasis on the molecular mechanisms of viral gene expression and regulation. Prerequisite: BIOL 200; recommended: MICROM 410, MICROM 411, GENET 371, or GENET 372. Offered: W.

**MICROM 482 Peer Teaching Assistants in Microbiology (1-5, max. 10)** Direct experience in teaching a microbiology laboratory class. Peer TA's attend concurrent accompanying lecture course, meet weekly to coordinate, give introductory lab remarks, supervise the execution of lab exercises, and assist in preparing/grading of quizzes/exams. Training in teaching techniques, approaches. Student evaluation provided. CR/NC only. Prerequisite: MICROM 402; MICROM 410. Offered: AWSpS.

**MICROM 490 Aquatic Microbiology (3/5) NW** *Herwig* Basic principles of aquatic microbiology and aquatic microbial ecology: role and identity of aquatic microorganisms; introduction to modern methodologies for research. Laboratory work with local freshwater and marine samples for those enrolled in the five-credit section. Recommended: 15 credits of biological science, 10 credits of chemistry. Offered: jointly with FISH 490.

**MICROM 495 Honors Undergraduate Research (\*-) Leigh** Specific problems in microbiology or immunology. Offered: AWSpS.

**MICROM 496 Undergraduate Library Research (2)** An introduction to library research techniques and to microbiological literature. Staff assign a topic and supervise the project. Offered: AWSpS.

**MICROM 499 Undergraduate Laboratory Research (\*-) Leigh** Specific problems in microbiology or immunology. Credit/no credit only. Offered: AWSpS.

**MICROM 500 Introduction to Research (\*, max. 20)** Introduction to research areas of the faculty and the techniques employed in their investigations. Credit/no credit only. Prerequisite: graduate standing in microbiology or permission of instructor. Offered: AWSpS.

**MICROM 510 Physiology of Bacteria (3)** *Harwood* Topics of current interest concerning the molecular biology and physiology of bacteria. Prerequisite: MICROM 410 and BIOC 440, 441, and 442, or permission of instructor. Offered: odd years; W.

**MICROM 520 Seminar (1) Leigh** Credit/no credit only. Offered: AWSpS.

**MICROM 522 Current Research in Microbiology (1)** *Harwood, Parsek, Traxler* Weekly student and faculty seminar presentations based on the current literature. Credit/no credit only. Prerequisite: graduate standing in microbiology. Offered: AWSpS.

**MICROM 526 Research of Cell Surface Problems (1)** *Traxler* Weekly research seminar and discussion of scientific literature pertaining to the process of membrane protein biogenesis. Credit/no credit only. Prerequisite: permission of instructor.

**MICROM 529 Mechanisms of Bacterial Pathogenesis (1)** *Fang* Student and faculty seminar presentations based on current research pertaining to mechanisms of bacterial pathogenesis at the molecular and cellular levels. Credit/no credit only. Prerequisite: graduate standing in microbiology. Offered: AWSpS.

**MICROM 530 Evolution of Prokaryotic Diversity (3) Leigh** Evolution, diversity, and genomics of prokaryotic microorganisms. Lectures, discussions, and reading of current literature. Open to graduate students in the biological sciences and advanced undergraduates with permission of instructor. Offered: even years; W.

**MICROM 531 Prokaryotic Diversity and Evolution Laboratory (2) Leigh** Enrichment, isolation, and molecular phylogenetic characterization of selected prokaryotic organisms. Prerequisite: permission of instructor. Offered: even years; W.

**MICROM 532 Seminar in General Microbiology (1, max. 15) Leigh** Weekly seminar concerning research topics in the genetics and biochemistry of selected bacteria. Credit/no credit only. Prerequisite: MICROM 410, permission of instructor. Offered: AWSpS.

**MICROM 533 Herpesvirus Research Meeting (1) Lagunoff** Weekly research seminar and discussion of scientific literature pertaining to the study of molecular virology of Kaposi's Sarcoma-associated herpesvirus. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSpS.

**MICROM 534 Research Seminar in Salmonella Pathogenesis (1) Fang** Provides a formal group setting for discussion and evaluation of a student's research progress. Credit/no credit only. Offered: AWSpS.

**MICROM 540 Virology (3) Katze** Introduces new approaches and technologies being used in modern virology laboratories to provide a better understanding of the fields of virology and virus-host interactions. Covers topics in bio-defense, viral genomics and proteomics, and systems biology as it pertains to virus/host infection. Prerequisite: permission of instructor. Offered: W; even years.

**MICROM 553 Molecular Mechanisms of Bacterial Pathogenesis (3) Ramakrishnan, Salama** Mechanisms of bacterial pathogenesis explored at the molecular, genetic, and cellular levels through selected models as presented in the current scientific literature. Prerequisite: MICROM 411 or equivalent. Offered: odd years; A.

**MICROM 554 Seminar in Molecular and Medical Microbiology (1, max. 15) Cookson** Weekly one-hour seminar in which recent advances in molecular biology of microbial pathogenesis or the current research of the participants is presented

and discussed critically. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSpS.

**MICROM 555 Advanced Clinical Microbiology (2.5) Limaye** Attendance at daily plate rounds of the Division of Clinical Microbiology. Designed to increase understanding of clinical microbiological work and its application to the care of the patient. Credit/no credit only. Prerequisite: MICROM 443 and permission of instructor. Offered: AWSpS.

**MICROM 560 Research and Journal Club in Retrovirology (1) Linial** Weekly research seminar and discussion of literature in areas of retroviral replication and transformation. Prerequisite: graduate or permission of instructor. Offered: AWSpS.

**MICROM 562 Oncogene and Retrovirus Research Seminar (1) Linial, Overbaugh** Weekly discussions of ongoing research related to retroviral replication, retroviral oncogenes and pathology. Prerequisite: graduate standing or permission of instructor. Offered: AWSpS.

**MICROM 563 Research Seminar in Mycobacterial Pathogenesis (1) Ramakrishnan** . Discussion of research topics in the study of the pathogenesis of tuberculosis and the microbial and host factors contributing to this complex infection. Credit/no credit only. Offered: AWSpS.

**MICROM 585 Research in Cell and Molecular Biology (1, max. 15) Champoux** Weekly research seminar. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSpS.

**MICROM 588 Research in Applied Microbiology (1) Lidstrom** Weekly research seminar and discussion of scientific literature pertaining to applied microbiology. Credit/no credit only. Prerequisite: permission of instructor. Offered: jointly with CHEM E 588; AWSpS.

**MICROM 599 Research Presentations (2)** Current research review. Credit/no credit only.

**MICROM 600 Independent Study or Research (\*)** Credit/no credit only. Offered: AWSpS.

**MICROM 700 Master's Thesis (\*)** Credit/no credit only.

**MICROM 800 Doctoral Dissertation (\*)** Credit/no credit only. Offered: AWSpS.

---

## Molecular Medicine

---

### PROGRAM OVERVIEW

J291A Health Sciences

Molecular medicine is an interdisciplinary approach to human biology that integrates and applies advances in the basic biomedical and genomic sciences and in biotechnology to the understanding, diagnosis and treatment of human disease. The Molecular Medicine Training Program (MMTP) at the University of Washington is designed to train Ph.D. researchers to use advances in basic sciences to solve problems relevant to human disease; and, conversely, to use insights from human disease processes to solve fundamental biological problems. Training in Molecular Medicine incorporates three key elements: case-based courses, clinical exposure, and dual mentorship of Ph.D. research.

The MMTP is open to graduate students in Ph.D. programs in the Departments of Biochemistry, Bioengineering, Genome Sciences, Immunology, Microbiology, Pathology, Pharmacology, Physiology & Biophysics, and in the interdisciplinary Molecular and Cellular Biology Program.

The MMTP is overseen by faculty representing one of the participating departments.

## COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at [www.uw.edu/students/crscat/](http://www.uw.edu/students/crscat/).

**MOLMED 504 Topics of Molecular Medicine (1.5)** Focuses on an important topic in medicine and science. Lectures introduce clinical and basic science background, followed by a seminar/discussion with speakers. Prerequisite: Graduate standing and permission of instructor. Offered: jointly with CONJ 504; Sp.

**MOLMED 513 Clinical Medical and Human Genetics (4)** Byers Rotations through Medical Genetics clinics for graduate students enrolled in the Molecular Medicine Pathway. Students review clinical data, identify the molecular basis of genetic disorders and assess how scientific studies have changed the assessment and natural history of these conditions. Limit of four students per quarter. Offered: jointly with CONJ 513; AWSp.

**MOLMED 514 Molecular Medicine (3)** Eary, Rosen Introduces how basic sciences impact the practice of medicine, using patient case histories to introduce key areas of clinical research and investigative medicine. Topics include cancer biology; drug development; gene- and cell-based therapeutics; inflammation and host response; vascular disease; and obesity and weight regulation. Prerequisite: Graduate standing. Offered: jointly with CONJ 514; W.

**MOLMED 559 Scientific Ideas at Work (1.5)** Gray, Maizels Examines how basic biomedical research leads to discovery of new therapeutics and diagnostics for treatment of human disease. Considers disease mechanism and impact, need for a drug, preclinical studies, clinical testing and drug approval, and how technology developed in an academic laboratory is translated into a commercial product. Prerequisite: graduate standing. Offered: jointly with CONJ 559; Sp.

## Neurological Surgery

### DEPARTMENT OVERVIEW

325 9th Avenue, Harborview Medical Center

[askuwns@uw.edu](mailto:askuwns@uw.edu)

The Department of Neurological Surgery is dedicated to teaching and research in the entire spectrum of diseases of the central and peripheral nervous system. Instruction in this area is provided for medical students and postgraduate physicians.

The department's medical-student instruction includes participation in the human-biology curriculum as well as in elective basic-science and clinical experiences. These are available at Harborview Medical Center, University of Washington Medical Center, Veterans Affairs Puget Sound Health Care Center, and Seattle Children's. The department also has several course offerings correlating research and clinical problems of the nervous system, including the research seminars in neuro-oncology, molecular imaging, stem cell biology, and clinical and basic-science correlates of the epilepsies.

Selected medical students also may elect research experience within the Department of Neurological Surgery. The department research facilities are housed in the Medical Research Tower of the University of Washington Medical Center, at Harborview Research and Training Building, and at Veterans Affairs Puget Sound Health Care System. Investigations are under way at these institutions in many areas of molecular biology, stem cell biology, neurophysiology, brain function and epilepsy research, neuroanatomy, nanotechnology, molecular imaging, behavioral research, outcomes research (cranial and spine), trauma research, and neuro-oncology.

In addition to undergraduate instruction, a fully certified residency program in neurological surgery is available for selected postgraduate physicians. The eight-year program emphasizes preparation for a career in academic neurosurgery.

## COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at [www.uw.edu/students/crscat/](http://www.uw.edu/students/crscat/).

**NEUR S 498 Undergraduate Thesis (\*)** Bobola, D'Ambrosio, Ellenbogen, Horner, Moroud, Morrison, Rostomily, Silber Offered: AWSpS.

**NEUR S 499 Undergraduate Research (\*)** Bobola, D'Ambrosio, Ellenbogen, Horner, Moroud, Morrison, Ojemann, Rostomily, Silber Investigation of special problems as an intimate member of the research team in the neurological surgery laboratories. Research to lead to a thesis, if desired. List of projects available on request. Prerequisite: permission of instructor. Offered: AWSpS.

**NEUR S 505 P-Preceptorship in Academic Neurosurgery (1)** Ellenbogen, Kliot, J. Ojemann, Rostomily, Sekar, Silbergeld Opportunity for first- and second-year medical students to observe the research, teaching, and patient-care activities of academic neurosurgery. Prerequisite: permission of instructor. Offered: AWSpS.

**NEUR S 542 Clinical and Basic Research Correlates of Epilepsy (2)** Avellino, G. Ojemann, J. Ojemann, Silbergeld Clinical symptoms and treatment of epilepsy; related basic research in neuroanatomy, neurophysiology, neuropsychology, and neuropharmacology of epilepsy. Prerequisite: HUBIO 532 for medical students; permission of instructor for others.

**NEUR S 680 P-Neurological Surgery Clerkship (\*, max. 8)** Ellenbogen Student serves clinical clerkship as an intimate member of the staff, participating in inpatient and outpatient care, both preoperative and postoperative, involving neurological surgery patients. University of Washington Medical Center or a University-affiliated hospital may be selected, subject to approval of the department. Prerequisite: HUBIO 563. (Four weeks.) Offered: AWSpS.

**NEUR S 697 P-Neurological Surgery Special Electives (\*, max. 24)** Ellenbogen By specific arrangement, for qualified students, special clerkship, externship, or research opportunities can be made available at institutions other than the University of Washington. Students wishing to elect this course should obtain from the Dean's office a special assignment form at least one month before preregistration. Prerequisite: permission of instructor. Offered: AWSpS.

**NEUR S 699 P-WWAMI Neurological Surgery Special Electives (\*, max. 24)** Ellenbogen By special arrangement for qualified students, special clerkships or externships may be available at institutions other than the University of Washington located within the WWAMI region. Prerequisite: permission of department.

## Neurology

### DEPARTMENT OVERVIEW

RR650 University of Washington Medical Center

[neurolog@uw.edu](http://neurolog@uw.edu)

Neurology, previously a division of the Department of Medicine, became an independent department at the University of Washington School of Medicine in autumn of 1995. The four-year residency program (including an internship) offers superb training in all facets of neurology in a setting of great institutional strength in fundamental neuroscience research. In addition, the Department of Neurology offers

exceptional training programs in the Divisions of Neurogenetics and Pediatric Neurology and in the Epilepsy Center. A clinical-clerkship program provides basic training in neurology patient care. The Neurology Department is active in teaching, research, and patient care at the University of Washington Medical Center, Seattle Veterans Affairs Medical Center, Harborview Medical Center, Children's Hospital and Medical Center, and the Fred Hutchinson Cancer Research Center. Medical students, interns, neurology residents, and postdoctoral research fellows rotate through these various hospitals and participate in the learning experiences offered at each.

## COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at [www.uw.edu/students/crscat/](http://www.uw.edu/students/crscat/).

**NEURL 495 Community Rehabilitation of the Neurologically Impaired: Internship (\*, max. 5)** Fraser, Clemmons Supervised work with a neurologically disabled vocational rehabilitation population within a multidisciplinary vocational rehabilitation unit. Offered: AWSpS.

**NEURL 499 Undergraduate Research (\*, max. 25)** Provides an opportunity to gain research experience and direct participation in clinical or basic science investigation in neurological topics. Offered: AWSpS.

**NEURL 505 P-Preceptorship in Neurology (1)** Kraus Provides an opportunity for first and second-year medical students to gain personal experience with neurology practice situations by being stationed with carefully selected clinical faculty members in their offices. Prerequisite: permission of instructor. Offered: Sp.

**NEURL 536 Topics in Clinical Neurology (1)** Spain Lectures on epilepsy, stroke, coma, drug overdose, dementia, headache, myelopathies, infectious disease. Offered: S.

**NEURL 555 Frontiers in Neuroimmunology (1)** Moeller Current concepts and developments in neuroimmunology. Credit/no credit only. Prerequisite: either NBIO 301 or IMMUN 441. Offered: AWSpS.

**NEURL 559 Neurobiology of Disease (3)** Garden, Moeller, Neumaier, Weiss Introduces medically important neurological and psychiatric diseases and experimental approaches to understanding the basis for diseases and their treatments. Covers stroke, epilepsy, autoimmune diseases of the CNS, neurodegenerative diseases, autism, psychosis, anxiety disorders and mood disorders. Offered: jointly with NEUBEH 559/P BIO 559.

**NEURL 633 P-Introduction to Neurology- Anchorage Alaska (8)** Kraus Provides the medical student with a general understanding of basic clinical neurology. For third- or fourth-year students. Prerequisite: medicine, or family medicine, or surgery, or pediatrics. Offered: AWSpS.

**NEURL 634 P-Introduction to Neurology-Anchorage (8)** Provides the medical student with a general understanding of basic clinical neurology at Alaska Native Medical Center in Anchorage, Alaska. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

**NEURL 637 P-Introduction to Neurology-Missoula (8)** Provides the medical student with a general understanding of basic clinical neurology at Montana Neurobehavioral Specialist in Missoula, MT. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery or pediatrics.

**NEURL 638 P-Introduction to Neurology-Great Falls (8)** Provides the medical student with a general understanding of basic clinical neurology at Advanced Neurology Specialists in Great Falls, Montana. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

**NEURL 639 P-Introduction to Neurology-Neurology Associates, Billings (8)** Provides the medical student with a gen-

eral understanding of basic clinical neurology at Neurology Associates in Billings, Montana. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

**NEURL 640 P-Introduction to Neurology—Billings Clinic (8)** Provides the medical student with a general understanding of basic clinical neurology at Billings Clinic in Billings, Montana. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

**NEURL 642 P-Introduction to Neurology—St. Lukes Boise (8)** *Kraus* Provides the medical student with a general understanding of basic clinical neurology. For third- or fourth-year students. Prerequisite: medicine, or family medicine, or surgery, or pediatrics. Offered: AWPSP.

**NEURL 643 P-Introduction to Neurology—Dr. Lyons, Boise (8)** Provides the medical student with a general understanding of basic clinical neurology at the office of Dr. George Lyons in Boise, Idaho. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

**NEURL 644 P-Introduction to Neurology—Dr. Vincent, Idaho Falls (8)** Provides the medical student with a general understanding of basic clinical neurology at the office of Dr. Stephen Vincent in Idaho Falls, Idaho. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

**NEURL 645 P-Introduction to Neurology—Dr. Garland, Idaho Falls (8)** Provides the medical student with a general understanding of basic clinical neurology at the office of Dr. Erich Garland in Idaho Falls, Idaho. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

**NEURL 647 P-Introduction to Neurology—Dr. Lindholm, Boise (8)** Provides the medical student with a general understanding of basic clinical neurology at the office of Dr. Karin Lindholm in Boise, Idaho. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

**NEURL 648 P-Introduction to Neurology—Dr. Coats, Coeur d'Alene (8)** Provides the medical student with a general understanding of basic clinical neurology at the office of Dr. Michael Coats in Coeur d'Alene, Idaho. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

**NEURL 653 P-Introduction to Neurology—Spokane (8)** *Kraus* Provides the medical student with a general understanding of basic clinical neurology. For third- or fourth-year students. Prerequisite: medicine, or family medicine, or surgery, or pediatrics. Offered: AWPSP.

**NEURL 654 P-Introduction to Neurology—Dr. Greeley, Spokane (8)** Provides the medical student with a general understanding of basic clinical neurology at the office of Dr. David Greeley in Spokane, Washington. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

**NEURL 655 P-Introduction to Neurology—Dr. Clark, Spokane (8)** Provides the medical student with a general understanding of basic clinical neurology at the office of Dr. J. Robert Clark in Spokane, Washington. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

**NEURL 656 P-Introduction to Neurology—Wenatchee (8)** Provides the medical student with a general understanding of basic clinical neurology at Wenatchee Valley Medical Center in Wenatchee, Washington. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

**NEURL 657 P-Introduction to Neurology—Dr. Sloop, Yakima (8)** Provides the medical student with a general understanding of basic clinical neurology at the office of Dr. Richard Sloop in Yakima, Washington. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

**NEURL 658 P-Introduction to Neurology—Olympia Neurology (8)** Provides the medical student with a general understanding of basic clinical neurology at Olympia Neurology in Olympia, Washington. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

**NEURL 659 P-Introduction to Neurology—NW Neurology, Lakewood (8)** Provides the medical student with a general understanding of basic clinical neurology at Northwest Neurology, a Franciscan Medical Group clinic, in Lakewood, Washington. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

**NEURL 660 P-Introduction to Neurology—Madigan (8)** Provides the medical student with a general understanding of basic clinical neurology at Madigan Army Medical Center in Tacoma, Washington. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

**NEURL 661 P-Introduction to Neurology—Neurology and Neurosurgery Associates, Tacoma (8)** Provides the medical student with a general understanding of basic clinical neurology at Neurology and Neurosurgery Associates in Tacoma and Puyallup, Washington. Students will spend time at both clinics. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

**NEURL 662 P-Introduction to Neurology—Group Health, Tacoma (8)** Provides the medical student with a general understanding of basic clinical neurology at Group Health Tacoma Medical Center in Tacoma, Washington. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

**NEURL 663 P-Introduction to Neurology—Group Health, Eastside (8)** Provides the medical student with a general understanding of basic clinical neurology at Group Health Eastside Specialty Center in Redmond, Washington. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

**NEURL 664 P-Introduction to Neurology—Burien (8)** Provides the medical student with a general understanding of basic clinical neurology at South Seattle Neurology Associates in Burien. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

**NEURL 665 P-Introduction to Neurology—UWMC (8)** *Kraus* Provides the medical student with a general understanding of basic clinical neurology, at UWMC. For third- or fourth-year students. Prerequisite: medicine, or family medicine, or surgery, or pediatrics. Offered: AWPSP.

**NEURL 666 P-Introduction to Neurology—HMC (8)** Provides the medical student with a general understanding of basic clinical neurology at Harborview Medical Center in Seattle, Washington. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

**NEURL 667 P-Introduction to Neurology—VA (8)** Provides the medical student with a general understanding of basic clinical neurology at the VA Medical Center in Seattle, Washington. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

**NEURL 668 P-Introduction to Neurology—Northwest Hospital (8)** Provides the medical student with a general understanding of basic clinical neurology at Northwest Hospital in Seattle, Washington. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

**NEURL 669 P-Introduction to Neurology—Virginia Mason (8)** Provides the medical student with a general understanding of basic clinical neurology at Virginia Mason Medical Center in Seattle, Washington. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

**NEURL 670 P-Introduction to Neurology—Minor and James (8)** Provides the medical student with a general understanding of basic clinical neurology at Minor and James Medical in Seattle, Washington. Prerequisite: completion of one

required clerkship in medicine, family medicine, surgery, or pediatrics.

**NEURL 671 P-Introduction to Neurology—Swedish (8)** Provides the medical student with a general understanding of basic clinical neurology at Swedish Medical Center I in Seattle, Washington. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

**NEURL 672 P-Introduction to Neurology—Group Health, Seattle (8)** Provides the medical student with a general understanding of basic clinical neurology at Group Health Capitol Hill Campus in Seattle, Washington. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

**NEURL 681 P-Seizure Clinic Clerkship (2.5)** *A. Wilensky* Evaluation and follow-up of patients with seizure disorders. Limited contact with inpatients. Prerequisite: MED 665 and permission of instructor. Offered: AWPSP.

**NEURL 685 Epilepsy and Clinical Electroencephalography (\*, max. 12)** *Miller* Introduction into epilepsy and the use and interpretation of the electroencephalogram and other clinical studies used to assess it, under the direct supervision of several of the faculty epileptologists and clinical neurophysiologists. Offered: AWPSP.

**NEURL 686 P-Clinical Neurology (8)** *Swanson* Clerkship including both inpatient and outpatient experiences and didactic sessions on neurological subjects. Student assigned to one of the affiliated hospitals and supervised by neurology residents and full-time staff. Offered: AWPSP.

**NEURL 687 P-Advanced Clinical Clerkship in Child Neurology (\*, max. 8)** *Gospe* Advanced course in neurology dealing with neurological disease in children. Supervision by child neurology residents and attending. Prerequisite: NEURL 665, third- and fourth-year medical students. (Limit: one student.) Offered: AWPSP.

**NEURL 697 P-Neurology Special Electives (\*, max. 24)** By special arrangement for qualified students, special clerkships or externships may be available at institutions outside the WWAMI region. Students should obtain special assignment form from the Dean's Office at least one month prior to preregistration. Prerequisite: permission of department advisor. Offered: AWPSP.

**NEURL 699 P-WWAMI Neurology Special Electives (\*, max. 24)** By special arrangement for qualified students, special clerkships or externships may be available at institutions other than the University of Washington located within the WWAMI region. Prerequisite: permission of advisor. Offered: AWPSP.

## Obstetrics and Gynecology

### DEPARTMENT OVERVIEW

BB667 Health Sciences Building

The Department of Obstetrics and Gynecology is involved with teaching, patient care, and research in the areas of normal and abnormal human reproduction: growth and development of the fetus, normal and complicated obstetrics, and surgical and medical diseases of the female reproductive system, including endocrinology, oncology, infectious disease, urogynecology, psychosocial problems, primary and preventive health care, and ethics.

### COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at [www.uw.edu/students/crsca/](http://www.uw.edu/students/crsca/)

**OB GYN 498 Undergraduate Thesis (\*)** By arrangement.

**OB GYN 499 Undergraduate Research (\*, max. 30)**

**OB GYN 550 P-Voluntary Pregnancy Termination: An Overview of Medical and Social Issues (2)** *Easterling, Miller* A flexible curriculum which allows the medical student to observe in an abortion clinic, read articles and a textbook on abortion. Can be used by medical student as elective credit.

**OB GYN 551 Perinatal Care Elective (1)** Provide an introduction and overview of perinatal care for first- or second-year medical students with emphasis on late third trimester, labor and delivery, and postpartum. Opportunity to observe the patient-provider relationship. Optional labor and delivery observation. Offered: AWSp.

**OB GYN 579 P-Obstetric and Gynecologic Investigation (\*)** The investigation may cover any one of the following fields: normal and complicated pregnancy, hormone assays in obstetrics and endocrinology, obstetric and gynecologic oncology, genetics. By arrangement.

**OB GYN 590 HIV and STIs in Women and Children (3)** Examines the emerging global public health crisis and the plight of women and children with HIV/STIs. Reviews targeted approaches pertaining to women and children and their vulnerability to HIV/STIs. Prerequisite: EPI 511 or EPI 512-513. Offered: jointly with EPI 507; Sp.

**OB GYN 660 P-Introduction to Obstetrics and Gynecology, Billings, St. Vincent (\*, max. 12)** Introductory clerkship providing comprehensive medical care and counseling to female patients. Includes management and delivery of obstetrical patients, diagnosis and management of gynecologic diseases, hospital rounds, outpatient clinics, seminars, tutorial, and community health-care agencies for women. Prerequisite: HUBIO 565. (Six weeks. Limit: one student.)

**OB GYN 661 P-Introduction to Obstetrics and Gynecology Aberdeen (12)** Exposure to the areas of rehabilitation, palliative care, and pain management. Students focus on one area and are assigned to a preceptor and clinical site to concentrate their clinical activities in that content area. Includes didactic orientation on the first day and patient case presentations during didactic on the last day.

**OB GYN 662 P-Introduction to Obstetrics and Gynecology - Libby (12)** Clerkship equivalent to OB GYN 665 offered in Libby, Montana. Includes experience in several private physician's offices. Prerequisite: 3rd year Medical student after completion of HUBIO series.

**OB GYN 665 P-Introduction to Obstetrics and Gynecology, UH-HMC (\*, max. 12)** Introductory clerkship providing comprehensive medical care and counseling to female patients. Includes management and delivery of obstetrical patients, diagnosis and management of gynecologic diseases, hospital rounds, outpatient clinics, seminars, tutorial, and community health-care agencies for women. Rotations occur at UWMC and Harborview Medical Center. Prerequisite: HUBIO 565. (Six weeks. Limit: four students.)

**OB GYN 666 P-Introduction to Obstetrics and Gynecology, Boise (\*, max. 12)** Clerkship equivalent to 665 offered at Boise, Idaho (WWAMI). Includes experience in several private physician offices. Prerequisite: HUBIO 565. (Six weeks. Limit: one student. Not offered summer quarter.)

**OB GYN 667 P-Introduction to Obstetrics and Gynecology, Madigan (\*, max. 12)** Clerkship equivalent to 665 offered at Madigan Army Medical Center, Tacoma. Prerequisite: HUBIO 565. (Six weeks. Limit: three students.)

**OB GYN 668 P-Introduction to Obstetrics and Gynecology, Spokane (12)** Clerkship equivalent to 665 offered at Spokane (WWAMI). Includes experience in several private physicians' offices. Prerequisite: HUBIO 565. (Six weeks. Limit: two students.)

**OB GYN 669 P-Introduction to Obstetrics and Gynecology, Swedish (12)** Clerkship equivalent to 665 offered at Swedish Hospital Medical Center. Prerequisite: HUBIO 565. (Six weeks. Limit: one student.) Not offered summer quarter.

**OB GYN 670 P-Introduction to Obstetrics and Gynecology, GH-Central (12)** Clerkship equivalent to 665 offered at the

Central facility of Group Health Cooperative of Puget Sound in Seattle. Students spend time in delivery room, surgery, and clinic, and have a specific preceptor assigned. Prerequisite: HUBIO 565. (Six weeks. Limit: two students.)

**OB GYN 671 P-Introduction to Obstetrics and Gynecology, Anchorage (12)** Clerkship equivalent to 665 offered at Anchorage, Alaska (WWAMI). Includes experience in several private physicians' offices as well as Providence Hospital. Prerequisite: HUBIO 565. (Six weeks. Limit: four students.)

**OB GYN 672 P-Introduction to Obstetrics and Gynecology, GH-East (12)** Clerkship equivalent to 665 offered at the Eastside facility of Group Health Cooperative of Puget Sound in Redmond. Students spend time in delivery room, surgery, and clinic, and have a specific preceptor assigned. Prerequisite: HUBIO 565. (Six weeks. Limit: one student.)

**OB GYN 673 P-Introduction to Obstetrics and Gynecology, Military, Madigan (12)** Clerkship equivalent to 665 offered at Madigan Army Medical Center. Students spend time in delivery room, surgery, and clinic, and have a specific preceptor assigned. Prerequisite: HUBIO 565. (Six weeks. Limit: two students.)

**OB GYN 676 P-Introduction to Obstetrics and Gynecology, Missoula (12)** Clerkship equivalent to 665 offered in Missoula, Montana. Students spend time in delivery room, surgery, and clinic, and have a specific preceptor assigned. Prerequisite: HUBIO 565. (Six weeks. Limit: one student.)

**OB GYN 677 P-Introduction to Obstetrics and Gynecology, Rock Springs (12)** Equivalent of OB GYN 665, offered in Rock Springs, Wyoming. Student rotates among outpatient clinic, labor and delivery, operating suites, and medical/surgical inpatient areas. (Limit: two students.) Offered: AS.

**OB GYN 678 P-Introduction to Obstetrics and Gynecology, Billings (\*, max. 12)** Clerkship equivalent to OB GYN 665 offered at Spokane (WWAMI). Includes experience in several private physicians' offices. Prerequisite: HUBIO 565. (Six weeks. Limit: one student.)

**OB GYN 679 P-Introduction to Obstetrics and Gynecology, Cheyenne (\*, max. 12)** Clerkship equivalent to OB GYN 665 offered at Spokane (WWAMI). Includes experience in several private physicians' offices. Prerequisite: HUBIO 565. (Six weeks. Limit: one student.)

**OB GYN 681 P-Gynecological Oncology Subspecialty (8)** Experience in reproductive tract malignancy, chemotherapy, and radiation therapy. Student follows selected patients through primary surgery, recovery, and initial adjuvant treatment, as well as continuing treatment in both clinic and inpatient settings. Prerequisite: basic OB GYN Clerkship. (Limit: two students each four weeks.)

**OB GYN 682 P-Antenatal High-Risk Obstetrics (8)** Four weeks on high-risk antenatal obstetrics ward and clinic. Students responsible for initial workups, daily laboratory evaluations, continuing care of high-risk antepartum patients. Weekly conference with obstetrics attending; presentation of one or more topics per rotation. Excellent coordination with resident and attending staff required to maintain patient-care continuity. (Limit: two students each four weeks.)

**OB GYN 685 P-Subspecialty Gynecology UWMC (8)** Explores specialty areas in gynecology including: urogynecology, family planning, adolescent gynecology, and reproductive endocrinology and infertility. Students see and evaluate patients in both the outpatient and inpatient setting, follow patients to the operating room and fully participate in their hospital care, and consult on inpatients and Emergency Room visits. Exposes interested students to the breadth and depth of benign gynecologic subspecialty areas, the faculty and resident of the University of Washington, and the OB GYN resident program (Limit: one student every four weeks.)

**OB GYN 686 P-Introduction to Obstetrics and Gynecology, Yakima (\*, max. 12)** Clerkship equivalent to OB GYN 665 offered at Spokane (WWAMI). Includes experience in several private physicians' offices. Prerequisite: HUBIO 565. (Six weeks. Limit: one student.)

**OB GYN 687 P-Introduction to Obstetrics and Gynecology, Fairbanks (\*, max. 12)** Clerkship equivalent to OB GYN 665

offered at Spokane (WWAMI). Includes experience in several private physicians' offices. Prerequisite: HUBIO 565. (Six weeks. Limit: one student.)

**OB GYN 688 P-Introduction to Obstetrics and Gynecology, Caldwell-Meridian (\*, max. 12)** Clerkship equivalent to OB GYN 665 offered at Spokane (WWAMI). Includes experience in several private physicians' offices. Prerequisite: HUBIO 565. (Six weeks. Limit: one student.)

**OB GYN 689 P-Introduction to Obstetrics and Gynecology, Havre (\*, max. 12)** Clerkship equivalent to OB GYN 665 offered at Spokane (WWAMI). Includes experience in several private physicians' offices. Prerequisite: HUBIO 565. (Six weeks. Limit: one student.)

**OB GYN 690 P-Introduction to Obstetrics and Gynecology, Sandpoint (\*, max. 12)** Clerkship equivalent to OB GYN 665 offered at Spokane (WWAMI). Includes experience in several private physicians' offices. Prerequisite: HUBIO 565. (Six weeks. Limit: one student.)

**OB GYN 691 P-Introduction to Obstetrics and Gynecology, Tacoma (\*, max. 12)** Clerkship equivalent to OB GYN 665 offered at Spokane (WWAMI). Includes experience in several private physicians' offices. Prerequisite: HUBIO 565. (Six weeks. Limit: one student.)

**OB GYN 692 P-Introduction to Obstetrics and Gynecology, Bozeman (\*, max. 12)** Clerkship equivalent to 665 offered at Boise, Idaho (WWAMI). Includes experience in several private physician offices. Prerequisite: HUBIO 565. (Six weeks. Limit: one student.)

**OB GYN 693 P-Introduction to Obstetrics and Gynecology, Valley Medical Center (\*, max. 12)** Clerkship equivalent to OB/GYN 665 offered at Spokane (WWAMI). Includes experience in several private physicians' offices. Prerequisite: HUBIO 565 (Six weeks. Limit one student).

**OB GYN 694 P-Introduction to Obstetrics and Gynecology, Billings 2 (\*, max. 12)** Clerkship equivalent to OB/GYN 665 offered at Spokane (WWAMI). Includes experience in several private physicians' offices. Prerequisite: HUBIO 565 (Six weeks. Limit one student).

**OB GYN 695 P-Introduction to Obstetrics and Gynecology, Tri Cities (\*, max. 12)** Clerkship equivalent to OB GYN 665 offered in the Tri Cities. Includes experience in several private physicians' offices. Prerequisite: HUBIO 565 (Six weeks. Limit one student).

**OB GYN 696 P-Introduction to Obstetrics and Gynecology, Walla Walla (\*, max. 12)** Clerkship equivalent to 665 offered in Walla Walla. Includes experience in several private physician offices. Prerequisite: HUBIO 565. (Six weeks. Limit: one student.)

**OB GYN 697 P-Obstetrics and Gynecology Special Electives (\*, max. 24)** By arrangement, for qualified students, special clerkship or research opportunities can sometimes be made available at other institutions. Students wishing to elect this course should obtain special assignment form one month before preregistration. Department evaluates student performance. Prerequisite: permission of department.

**OB GYN 699 P-WWAMI Obstetrics and Gynecology Special Electives (\*, max. 24)** By special arrangement for qualified students, special clerkships or externships may be available at institutions other than the University of Washington located outside the WWAMI region. A special assignment form must be obtained one month in advance of preregistration. Prerequisite: permission of department.

## Ophthalmology

### DEPARTMENT OVERVIEW

RR801 University of Washington Medical Center

The Department of Ophthalmology is responsible for the instructional and research programs in diseases of the eye and visual system and its adnexae.

Medical-student instruction is provided, including multiple electives in the clinical years. Graduate physicians are provided with three years of residency training at the affiliated hospitals. An optional internship is available in ophthalmology. A two-year ophthalmic plastics and orbit fellowship, and a two-year surgical retina fellowship, are offered. Patient care is provided under the supervision of full- and part-time faculty physicians at the University of Washington Medical Center, Harborview Medical Center, Veterans Affairs Medical Center, and Seattle Children's.

Clinical research programs relate to eye diseases. Laboratory research encompasses neurophysiology of vision, morphology of the retina and visual system, corneal wound healing, biochemistry of ocular tissues, and anatomy/physiology of the orbit. Postdoctoral training is offered in all these disciplines.

For more information on residencies and fellowships, contact Ingrid Noe at [ingrid@uw.edu](mailto:ingrid@uw.edu). For more information on medical student clerkships, contact Dorrie Quirante at [dorieq@uw.edu](mailto:dorieq@uw.edu).

## COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at [www.uw.edu/students/crscat/](http://www.uw.edu/students/crscat/).

**OPHTH 498 Undergraduate Thesis (\*)** Kinyoun (University of Washington Medical Center) Thesis-based research in vision and ophthalmology. Elective. Offered: AWSpS.

**OPHTH 499 Undergraduate Research (\*)** Kinyoun (University of Washington Medical Center) Laboratory or clinical research in morphology, biochemistry, immunology, experimental pathology, or clinical studies of the eye and visual system. Offered: AWSpS.

**OPHTH 501 P-Ophthalmology Preceptorship (1)** Kinyoun Individualized experiences with one or more of the full-time faculty members of the department covering research, teaching, and patient care. Student observes activities in the clinic, hospital ward, operating room, and research laboratories. Prerequisite: first- and second-year medical student standing and permission of instructor. Offered: AWSpS.

**OPHTH 681 P-Ophthalmology Clerkship - HMC/Eye Institute (4/8)** Students gain experience in the diagnosis and treatment of common ocular disorders. Basic examination techniques, including tonometry, ophthalmoscopy, and biomicroscopy. Prerequisite: completion of human biology series. Offered: AWSpS.

**OPHTH 683 P-Pediatric Ophthalmology Clerkship - Seattle Children's (4)** Student examines and observes treatment of children with ocular diseases and learns to differentiate trivial from potentially blinding disorders. Furnishes programmed text in general ophthalmology. Prerequisite: completion of human biology series. Offered: WS.

**OPHTH 685 P-Ophthalmology Clerkship - VAPSHCS (4)** Participation in diagnosis and treatment of medical and surgical ocular disease. Outpatient examinations, inpatient surgery, as well as neuro-ophthalmologic, retinal, and glaucoma consultations. Basic techniques involved in tonometry, ophthalmoscopy, and biomicroscopy of eye. Prerequisite: completion of human biology series. Offered: AWSpS.

**OPHTH 686 P-Ophthalmology Clerkship - GHC Puget Sound (4)** Diagnosis and treatment of ocular disease in outpatients. Weekly assignments to Group Health ophthalmologist responsible for the care of walk-in and urgent patients, demonstrating findings pertinent to the future practice of primary-care physicians. Examination techniques, including tonometry, ophthalmoscopy, and biomicroscopy of eye. Prerequisite: completion of human biology series. Offered: AWSpS.

**OPHTH 688 P-Ophthalmology Clerkship - Anchorage (8)** Four-week externship at Alaska Native Medical Center in Anchorage. Opportunity to learn and practice common eye examination techniques, including slit-lamp biomicroscopy,

tonometry, and funduscopy. Patients seen three days a week; two days spent in the operating room. Prerequisite: completion of human biology series, MED 665, and SURG 665; fourth-year medical students only. Offered: AWSpS.

**OPHTH 689 P-Ophthalmology Clerkship - Spokane (4)** Diagnosis and management of commonly seen eye diseases. Subspecialty clinics include cornea, retina, glaucoma, contact lenses, and strabismus. Prerequisite: completion of human biology series. Offered: AWSpS.

**OPHTH 690 P-Ophthalmology Clerkship - Missoula (4)** Diagnosis and management of commonly seen eye diseases. Subspecialty clinics include cornea, retina, glaucoma, contact lenses, and strabismus. Prerequisite: completion of human biology series. Offered: AWSpS.

**OPHTH 691 P-Ophthalmology Clerkship - Nampa (4)** Diagnosis and management of commonly seen eye diseases. Subspecialty clinics include cornea, retina, neuro-ophthalmology, glaucoma, contact lenses, and strabismus. Prerequisite: completion of human biology series. Offered: AWSpS.

**OPHTH 697 P-Ophthalmology Special Electives (\*, max. 24)** Kinyoun By specific arrangement, for qualified students, special clerkship, externship, or research opportunities can at times be made available at institutions or clinics other than the UW. Students wishing to elect this course should obtain from the Dean's office a special assignment form at least one month before preregistration. Prerequisite: permission of instructor. Offered: AWSpS.

**OPHTH 699 P-WWAMI Ophthalmology Special Electives (\*, max. 24)** By special arrangement for qualified students, special clerkships or externships may be available at institutions other than the University of Washington located within the WWAMI region. Prerequisite: permission of department. Offered: AWSpS.

## Orthopaedics

### DEPARTMENT OVERVIEW

BB1043 University of Washington Medical Center

The Department of Orthopaedics is actively involved in quality patient care, teaching, and research concerning bone and joint problems. Special areas of expertise include foot and ankle, hand and microvascular, hip and knee, arthritis, sports medicine, pediatric orthopaedics, shoulder and elbow, spine, trauma, and tumors.

In addition to providing instruction for medical students, the department provides education at the graduate, residency, and post-residency levels. Selected medical students may elect research experience in the department. A fully approved residency offers opportunities to carry out fundamental and clinical research. Residents may work toward the Master of Science degree by meeting the requirements of the Graduate School and the academic unit offering the degree program.

### COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at [www.uw.edu/students/crscat/](http://www.uw.edu/students/crscat/).

**ORTH 498 Undergraduate Thesis (\*)** Eyre Student works directly with a preceptor in selecting a suitable area for laboratory or clinical research in the area of orthopaedics, and develops a thesis for recognition. Offered: AWSpS.

**ORTH 499 Undergraduate Research (\*)** Eyre Investigation of pertinent musculoskeletal problems in the orthopaedic laboratories as part of the research group. Offered: AWSpS.

**ORTH 505 P-Preceptorship in Orthopaedic Surgery (1)** Opportunity for first- and second-year medical students to gain experience with clinical faculty members in the community.

Students observe general aspects of private practice from a longitudinal perspective. Prerequisite: permission of department. Offered: AWSpS.

**ORTH 585 P-Sports Medicine (2)** O'Kane Lectures, patient problem presentations, and seminar discussions to explore impact of exercise and sport participation on various body systems. Includes nutritional concerns, biomechanics of certain sports injuries and cardiovascular, pulmonary, and musculoskeletal concerns. Prerequisite: second-year medical student standing. Offered: Sp.

**ORTH 644 P-General Orthopaedic Clerkship - Jackson (\*, max. 8)** Provides a basic education in the fundamentals of the musculoskeletal system. Heavy emphasis is placed on the reconstructive alternatives in the treatment of degenerative joint diseases. Prerequisite: completion of HUBIO series; third- and fourth-year students. Enrollment limited to three. Offered: AWSpS.

**ORTH 650 P-General Orthopaedic Clerkship-Billings (\*, max. 8)** Bransford, Chansky Provides a basic education in the fundamentals of the musculoskeletal system. Emphasizes reconstructive alternatives in the treatment of degenerative joint diseases. Prerequisite: completion of HUBIO series; third- and fourth-year students. Enrollment limited to three. Offered: AWSpS.

**ORTH 668 P-Pediatric Orthopaedics - Spokane (\*, max. 8)** Acquaints students with all aspects of musculoskeletal problems in childhood. Includes didactic conferences and seminars, and opportunities for active participation in both inpatient and outpatient care at Shriners Hospital for Children in Spokane. Prerequisite: SURG 665 or HUBIO 553. (Four weeks, full-time.) Offered: AWSpS.

**ORTH 669 P-General Orthopaedic Clerkship - Spokane (\*, max. 8)** Provides a basic education in the fundamentals of musculoskeletal system. Heavy emphasis placed on the reconstructive alternatives in the treatment of degenerative joint diseases. Prerequisite: HUBIO series; third- and fourth-year students. Offered: AWSpS.

**ORTH 675 P-Preceptorship in Orthopaedics (\*, max. 4)** Student spends full time with the preceptor during all his or her working day in order to gain a better understanding of the diagnosis and the management of problems of the musculoskeletal system as seen in the private orthopaedic practice. Prerequisite: SURG 665 or HUBIO 553 and permission of department. (Two weeks, full-time.) Offered: AWSpS.

**ORTH 676 P-Pediatric Orthopaedics - Seattle Children's (\*, max. 8)** Conrad, Mosca, Schmale, Song, White Acquaints students with all aspects of musculoskeletal problems in childhood. Didactic conferences and seminars, and opportunities for active participation in both inpatient and outpatient care at Children's Hospital and Medical Center, and correlative anatomy and pathology. Prerequisite: SURG 665 or HUBIO 553. (Four weeks, full-time.) Offered: AWSpS.

**ORTH 677 P-Musculoskeletal Trauma (\*, max. 8)** Allan, Barei, Beingessner, Bellabarba, Benirschke, Bransford, Chapman, Dunbar, Hanel, Hansen, Henley, Katolik, Mirza Harborview Medical Center. Emergency room, wards, operating room, and outpatient clinics. Instruction in general and special clinics, including hand, hip, foot, and fracture, with emphasis placed on physical examination of the patient. Students take correlative anatomy and pathology. Prerequisite: SURG 665, HUBIO 553. (Four weeks, full-time.) Offered: AWSpS.

**ORTH 678 P-Musculoskeletal Oncology (8/12)** Conrad, Weisstein In-depth experience on musculoskeletal oncology service with primary involvement in initial evaluation, staging, treatment, and postoperative follow-up of patients with various musculoskeletal malignancies. Elective involves experience in surgical, oncologic, radiologic, and pathologic principles of managing sarcomas. Prerequisite: basic orthopaedic elective or permission of instructor. Offered: AWSpS.

**ORTH 680 P-General Orthopaedic Clerkship-VAMC (\*, max. 8)** Bransford, Chansky Veteran's Administration Hospital: structured to provide a basic education in the fundamentals of the musculoskeletal system. Heavy emphasis is placed on the reconstructive alternatives in the treatment

of degenerative joint diseases. Prerequisite: completion of HUBIO series; third- and fourth-year students. Enrollment limited to three. Offered: AWSpS.

**ORTHP 681 P- Sports Medicine Orthopaedic Clerkship (8)** *Green, Larson, O'Kane, Kadel, Teitz, Wahl* Orthopaedic subspecialty clerkship at University of Washington Medical Center. Preceptor-based outpatient, inpatient, emergency, or operative orthopaedic care. Students work primarily in one subspecialty area and in one general orthopaedic clinic. For students who plan careers in orthopaedic surgery. Prerequisite: completion of HUBIO series, third- and fourth-year medical students. Offered: AWSpS.

**ORTHP 682 P-Outpatient Orthopaedics (8)** Outpatient orthopaedic experience at University of Washington Medical Center. Emphasis on physical exam, diagnosis, radiographic evaluation, and non-operative treatment. Rotation through general orthopaedics as well as all subspecialty areas. For students who plan careers in primary care. Prerequisite: completion of HUBIO series. Offered: AWSpS.

**ORTHP 684 Disorders of the Spine (8)** *Chapman, Lee, Wagner* Evaluation and assessment strategies of spinal disorders for patients of all ages and a wide variety of clinical conditions including trauma, deformity, degenerative disorders, metabolic, and inflammatory diagnoses. Opportunities exist to participate in outpatient, surgical, and conference based teaching sessions aimed at all experience levels and individualized for practitioners with interest in medical specialties, emergent care, radiology, physiatry, intervention pain management, and surgical specialties. Offered: AWSpS.

**ORTHP 685 P-Adult Reconstruction: Total Joint Service (8)** Preceptor-based outpatient, inpatient, emergency, and operative orthopaedic care. Students work with faculty in the Total Joint Service which specializes in lower extremity adult reconstructive surgery, including: complex primary hip/knee arthroplasty; less invasive approaches to hip/knee arthroplasty; revision hip/knee arthroplasty; periacetabular and proximal femoral osteotomy; osteotomy about the knee; and hip arthroscopy. Offered: AWSpS.

**ORTHP 687 P-Shoulder and Elbow (8)** *Matsen, Warme* Preceptor-based outpatient, inpatient, emergency, and operative orthopaedic care. Work with the faculty in the Shoulder and Elbow Service, which provides comprehensive evaluation and management for a wide range of shoulder and elbow problems, including: arthritis, dislocation or instability, fractures, rotator cuff/tendon tears, joint stiffness, and unsuccessful previous surgery. Offered: AWSpS.

**ORTHP 697 P-Orthopaedic External Elective (\*, max. 12)** Special arrangements can be made for students desiring to take orthopaedic electives at other institutions. Programs generally approved include orthopaedic clerkships at other universities or at large orthopaedic institutes. Prerequisite: HUBIO 553 and permission of department. Offered: AWSpS.

**ORTHP 699 P-WWAMI Orthopedics Special Electives (\*, max. 24)** By special arrangement for qualified students, special clerkships or externships may be available at institutions other than the Univ.

ersity of Washington located within the WWAMI region. Prerequisite: permission of department.

## Otolaryngology—Head and Neck Surgery

### DEPARTMENT OVERVIEW

BB1165 University of Washington Medical Center

The Department of Otolaryngology—Head and Neck Surgery provides clinical care for patients with a broad spectrum of disorders affecting the head and neck region, including the ears, nose, and throat. A major portion of departmental effort is directed toward basic research in the areas of sensorineural hearing disorders, physiology of the larynx, and cancer treatment and rehabilitation. The department supports a number of research fellows and advanced degree candidates, and is responsible for a four-year residency program and for the training of medical students in subjects relevant to the specialty.

### COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at [www.uw.edu/students/crscat/](http://www.uw.edu/students/crscat/)

**OTOHN 498 Undergraduate Thesis (\*)** *Rubel, Futran* Student works directly with department faculty in selecting a suitable area for laboratory or clinical research in the area of otolaryngology, and develops a thesis for recognition. Offered: AWSpS.

**OTOHN 499 Undergraduate Research (\*)** *Rubel, Futran* Research opportunities offered under direction in the area of otolaryngology. (Twelve weeks.) Offered: AWSpS.

**OTOHN 501 P-Preceptorship in Otolaryngology—Head and Neck Surgery (1)** *Hillel* One morning a week for a total of 30 hours per quarter spent observing patient care in either inpatient or outpatient settings at the University of Washington Medical Center; associated readings. Prerequisite: first- or second-year medical student standing. Coordinator: OTOHNS office. Offered: AWSpS.

**OTOHN 679 P-Otolaryngology—Head and Neck Surgery Clerkship Missoula (4/8, max. 24)** *Futran, Hillel, Manning, Whipple* Introduction to surgical subspecialty of otolaryngology-head and neck surgery. Students see patients in clinic, join inpatient rounds, have an opportunity to go to operating room. Prerequisite: human biology series; recommended: Medicine and Surgery required clerkships. Offered: AWSpS.

**OTOHN 680 P-Otolaryngology—Head and Neck Surgery Clerkship UWMC (4/8, max. 24)** *Futran* Introduction to surgical subspecialty of otolaryngology-head and neck surgery. Structured to allow broad introduction to breadth of specialty. Students see patients in clinic, join inpatient rounds, have an opportunity to go to operating room. Rotation at UWMC. Prerequisite: human biology series; recommended: Medicine and Surgery required clerkships. Offered: AWSpS.

**OTOHN 681 P-Otolaryngology-Head and Neck Surgery Clerkship-HMC (4/8, max. 24)** *Whipple* Introduction to surgical subspecialty of otolaryngology-head and neck surgery. Structured to allow broad introduction to breadth of specialty. Students see patients in clinic, join inpatient rounds, and have an opportunity to go to the operating room. Prerequisite: human biology series; recommended: medicine and surgery required clerkships. Offered: AWSpS.

**OTOHN 682 P-Otolaryngology-Head and Neck Surgery Clerkship-VA (4/8, max. 24)** *Coltrera* Introduction to surgical subspecialty of otolaryngology-head and neck surgery. Structured to allow broad introduction to breadth of specialty. Students see patients in clinic, join inpatient rounds, and have an opportunity to go to the operating room. Prereq-

uise: human biology series; recommended: medicine and surgery required clerkships. Offered: AWSpS.

**OTOHN 683 P-Otolaryngology—Head and Neck Surgery Clerkship Madigan (\*, max. 8)** *(Madigan Army Medical Center)* Individual externship training at an outpatient clinic, where visits average twelve hundred per month, supplemented by inpatient assignments. Students may reside at the hospital during externship, using facilities of bachelor officer quarters and hospital mess. Prerequisite: completion of human biology series. (Two or four weeks, full-time.); recommended: medicine and surgery required clerkships. Offered: AWSpS. Offered: AWSpS.

**OTOHN 684 P-Otolaryngology-Head and Neck Surgery Clerkship-Seattle Children's (4/8, max. 24)** *Manning* Introduction to surgical subspecialty of otolaryngology-head and neck surgery. Structured to allow broad introduction to breadth of specialty. Students see patients in clinic, join inpatient rounds, and have an opportunity to go to the operating room. Prerequisite: human biology series; recommended: medicine and surgery required clerkships. Offered: AWSpS.

**OTOHN 685 P-Otolaryngology—Head and Neck Surgery Clerkship - Boise (4/8, max. 24)** Introduction to surgical subspecialty of otolaryngology-head and neck surgery. Structured to allow broad introduction to breadth of specialty. Students see patients in clinic, join inpatient rounds, have an opportunity to go to operating room. Prerequisite: human biology series; recommended: medicine and surgery required clerkships. Offered: AWSpS.

**OTOHN 686 P-Otolaryngology—Head and Neck Surgery Clerkship Greater Seattle Private Practice (\*, max. 4)** *Hillel* Provides exposure to all aspects of patient care through a private practice setting. The student is exposed to the outpatient clinic and operating room procedures with daily directed contact with one attending faculty member. Contact administrator to arrange rotation. Prerequisite: permission of course director; recommended: medicine and surgery required clerkships. Offered: AWSpS.

**OTOHN 687 P-Otolaryngology-Head and Neck Surgery Clerkship-Spokane (4/8, max. 24)** Introduction to surgical subspecialty of otolaryngology-head and neck surgery. Structured to allow broad introduction to breadth of specialty. Students see patients in clinic, join inpatient rounds, and have an opportunity to go to the operating room. Prerequisite: human biology series; recommended: medicine and surgery required clerkships. Offered: AWSpS.

**OTOHN 688 P-Otolaryngology-Head and Neck Surgery Clerkship-Anchorage (4/8, max. 24)** Introduction to surgical subspecialty of otolaryngology-head and neck surgery. Structured to allow broad introduction to breadth of specialty. Students see patients in clinic, join inpatient rounds, and have an opportunity to go to the operating room. Prerequisite: human biology series; recommended: medicine and surgery required clerkships. Offered: AWSpS.

**OTOHN 697 P-Otolaryngology—Head and Neck Surgery Away Externship (8)** *Fultran* By specific arrangement. Special clerkship, externship, or research opportunities can at times be made available at institutions other than the University of Washington. Students wishing to elect this course should obtain a special assignment form from the Dean's office at least one month before preregistration. Prerequisite: permission of clerkship director. Offered: AWSpS.

**OTOHN 699 P-Otolaryngology—Head and Neck Surgery Clerkship WWAMI (4/8, max. 8)** By special arrangement for qualified students, special clerkships or externships may be available at institutions other than the University of Washington located within the WWAMI region. Prerequisite: permission of department. Offered: AWSpS.

# Pathology

## DEPARTMENT OVERVIEW

C516 Health Sciences

Pathology is the study of disease; its causes, mechanisms, and effects on the body. Pathology is both a basic biological science and a specialty of medicine. As a medical specialty, practiced by M.D.s, it includes the laboratory evaluation of organs, tissues and fluids to assist other physicians in reaching a diagnosis. As a basic science, practiced by PhDs, pathology focuses on the experimental investigation of the molecular processes of disease, using techniques of cell and organ culture, biochemistry, molecular biology, and genetics.

## GRADUATE PROGRAM

Graduate Program Adviser

C516 Health Sciences, Box 357470

206-616-7551

The Department of Pathology offers graduate training in experimental pathology, with an emphasis on the cellular and molecular biological basis of disease, leading to the Doctor of Philosophy degree in cellular and molecular pathology. The primary goal of the graduate program is to train individuals for careers as practicing scientists in biomedical research, investigating basic disease mechanisms. Emphasis is on development of skills in hypothesis generation and testing, including the design, accomplishment and critical interpretation of experiments. Experimental pathology uses the full range of biomedical research techniques (including biochemistry, molecular biology, cell biology, animal modeling) to attempt to elucidate the mechanisms underlying human disease. Graduates of the program usually continue research careers at biotechnology companies or universities/research institutes.

## Doctor of Philosophy

### Admission Requirements

- Copy of the Graduate School Application
- Official transcripts
- Official GRE scores. The department also recommends that applicants take the Subject Test in Biology or related area.
- Statement of purpose and research interests
- Three or more letters of recommendation
- Personal statement that addresses the relationship between personal background and aspirations

### Special Requirements

Prospective candidates should have taken undergraduate courses in the sciences, and have acceptable scores on the Graduate Record Examination, including advanced biology or chemistry. Some experience in a research laboratory is strongly recommended. Those wishing to matriculate toward both the M.D. and PhD degrees must gain admission to both the Graduate School and the School of Medicine.

### Degree Requirements

90 credits, to include:

- *Required coursework:* PATH 500 (3), PATH 501 (1), PATH 507 (2), PATH 512 (1.5), PATH 513 (1.5), PATH 515 (1.5), PATH 516 (3), PATH 551 (2–5); BIOST 511 (4); CONJ 538 (1/1.5), CONJ 539 (1.5)
- *Research before the general examination:* PATH 600
- *Research after the general examination:* PATH 800

- *Recommended courses:* CONJ 531 (1.5), CONJ 532 (1.5)
- General examination
- Dissertation
- Final examination

## Financial Aid

Funding for students is provided from departmental and University funds, training grants, a variety of institutional fellowships, and research grants of individual faculty members.

## Research Facilities

The department emphasizes the cellular and molecular approach to the investigation of the pathogenesis of disease in mammalian species. Special facilities exist for training in electron microscopy; cell, tissue, and organ culture; recombinant DNA techniques; histochemistry and cytochemistry; analytical biochemistry; immunology; and molecular and cell biology.

## Residency Training Program

The department supervises a residency-training program in anatomic pathology and, jointly with the Department of Laboratory Medicine, in clinical pathology for qualified medical doctors. Subspecialty training is also available through clinical fellowships. Persons who complete the residency program are eligible for certification by the American Board of Pathology. For additional information, contact the Resident Program Director, Department of Pathology, Box 356100 or visit the Residency Program [website](#).

## COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at [www.uw.edu/students/crsat/](http://www.uw.edu/students/crsat/)

**PATH 450 Cell Biology of Aging (3)** *Martin, Rabinovitch, Wolf* Pathophysiology of aging at cell and tissue levels (cell replication limits, telomere shortening, accrual of oxidative damage, caloric restriction effects, loss of postreplicative cells, longevity assurance genes). Proseminar based on student participation. Undergraduate honors students, graduate students with biology, zoology, genetics or medical sciences back grounds. Prerequisite: permission of instructor. Offered: W.

**PATH 498 Undergraduate Thesis (\*)** Elective.

**PATH 499 Undergraduate Research (\*)** Elective.

**PATH 500 Molecular Basis of Disease (3)** *Parks* Designed for first and second-year graduate students to introduce the concepts of general pathology at the cellular and molecular levels. Offered: W.

**PATH 501 Pathology Proseminars (1)** Small group discussions and presentations by students based on critical reading of original papers, or on concurrent seminars, in many areas of experimental pathology and medicine. Topic varies by quarter. Prerequisite: permission of instructor. Offered: AWSpS.

**PATH 502 Inflammation and Repair (2)** Lecture-seminar; a seminar course dealing with an in-depth examination of the processes involved in inflammation and repair. Credit/no credit only. Prerequisite: permission of instructor. Offered: even years.

**PATH 507 Introduction to Pathology Research (2)** *Bornfeldt, Swisshelm* Current developments and approaches to investigation of the molecular and cellular basis of disease. Members of the Pathology faculty present and discuss their own research projects. Credit/no credit only. Prerequisite: permission of instructor. Offered: A.

**PATH 510 Introduction to Pathology Methods (3)** *Bowen-Pope* Laboratory course designed to introduce graduate

students to the fundamentals of image analysis, histology, histopathology, post mortem evaluation, surgical pathology, and other methods used to investigate disease etiology, progression, and manifestation in humans and in animal models. Prerequisite: permission of instructor. Offered: Sp.

**PATH 511 Topics in Experimental Pathology (1–2, max. 10)** *Bornfeldt* Focus on areas of research relevant to experimental pathology. Prerequisite: permission of instructor. Offered: AWSpS.

**C MED 512 Introduction to the Anatomical Analysis of Animal Disease (5, max. 10)** See Comparative Medicine courses.

**PATH 512 Molecular Basis of Disease: Death and Repair (1.5)** First in a series designed to introduce students to medically important diseases and physiologic processes and experimental approaches to elucidating the cellular processes underlying these diseases. Covers basic cell/tissue processes that underlie normal homeostasis and most disease and, including apoptosis, necrosis, stem cells, inflammation, granulation tissue, tissue regeneration, repair and fibrosis.

**PATH 513 Mechanisms of Neurodegeneration (1.5)** Introduction to the cellular and molecular mechanisms that underlie neurodegenerative diseases, including introduction to the normal development and anatomy of the central nervous system, a review of epidemiologic, genetic, and clinical research tools used in the investigation of these diseases, and a systematic review of the major neurodegenerative diseases.

**C MED 514 Comparative Pathology Conference (1, max. 6)** See Comparative Medicine courses.

**PATH 515 Molecular Basis of Disease: Atherosclerosis and Myocardial Infarction (1.5)** *Bornfeldt, Bowen-Pope, Clowes, Dichek, Murry, Raines, Schwartz, Wight* Introduces medically important diseases and experimental approaches to understanding the basis for diseases and their treatments. Covers atherosclerosis, including lipids, extracellular matrix, cell signaling, inflammation, and downstream complications such as myocardial infarction and arrhythmias. Offered: Sp.

**PATH 516 Molecular Basis of Human Genetic Disease (3)** Introduces the underlying mechanisms in human genetic disorders, ranging from the single nucleotide, through genomic instability, and chromosomal rearrangements. Includes tissue and organ specific examples of the manner in which these disorders provide insights into human biology. Offered: Sp.

**PATH 517 The Biology and Pathology of Aging (3/4)** *Wolf* Surveys the biology and pathologies of the aging phenomena in multiple species and at multiple organismal levels from whole animals to molecules. Prerequisite: coursework in biology, biochemistry, molecular biology, and genetics. Offered: Sp.

**PATH 520 Experimental Pathology Seminar (1)** Review of current research in various areas of experimental pathology by members of the department and visiting scientists. Credit/no credit only.

**PATH 521 Anatomy and Autopsy (1)** *Fligner* Students view an autopsy, and learn how autopsy can diagnose disease, determine cause of death, and improve patient care. Requirements include orientation session, autopsy, and a Clinical-Autopsy conference. Participants must be free at least one morning per week to attend an autopsy at UWMC. Prerequisite: UW medical students only. Offered: WSp.

**PATH 522 Hematopathology Seminar (2)** *Sabath* Identification of normal lymphocyte and bone marrow subpopulations, diagnosis of leukemias, lymphomas, and benign conditions that resemble them. Emphasis on histopathology, cytochemical, immunological, and molecular markers. Clinicopathologic correlation. Offered: jointly with LAB M 522; W; even years.

**PATH 530 Human Cytogenetics (\*, max. 4)** *Disteche* Sources and methods of preparation and identification of human chromosomes. Molecular structure and mapping of chromosomes. Human cytogenetic pathology: karyotype-phenotype

interactions, chromosome breakage, and cancer cytogenetics. Prerequisite: permission of instructor. Offered: even years.

**PATH 544 General and Systemic Pathology ([2-3]-, max. 5)** *Narayanan* Basic pathologic processes that underlie disease, including cell alterations, genetic and developmental pathology, environmental pathology, neoplasia, immunopathology, inflammation, infection, and systemic diseases. Correlates gross, functional, and biochemical alterations. For first-year dental students and graduate students. Requires reasonable grounding in biological and chemical sciences. Prerequisite for nondental students: permission of instructor.

**PATH 551 Experimental and Molecular Pathology (2-5, max. 20)** Introduction to experimental pathology. A tutorial course designed to introduce a graduate student (medical, dental) or senior undergraduate to selected methods and problems through literature surveys and/or laboratory experience. Exploration of causes at the cellular and molecular levels in the study of disease is emphasized. Prerequisite: permission of instructor.

**PATH 552 Contemporary Anatomic Pathology (2-5, max. 30)** *Schwartz* Study of recent developments in anatomic pathology. Subject includes areas of basic science and review of systemic pathology. Recent developments and interpretation of these findings are stressed. For pathology residents, fellows, and trainees. Credit/no credit only. Prerequisite: permission of instructor.

**PATH 555 Environmental Pathology (3)** *Monnat, Rhim* Modern morphologic, cell biological, and molecular approaches to environmental disease associated with exposure/predisposition. Lectures, seminar discussion, and student presentations. Prerequisite: PATH 410 or PATH 444 or HUBIO 520; recommended: ENV H 514 and ENV H 515. Offered: alternate years.

**CONJ 560, 561 Tumor Biology (3, 2)** See Conjoint Courses.

**PATH 560 Molecular Analysis of Human Disease (\*, max. 10)** Review and discussion of contemporary research on molecular basis of human disease. Focus on mutational mechanisms, genetic instability, AIDS, and cancer. Students participate in weekly group discussion and work with faculty to select, develop, and present discussion topic. Prerequisite: medical, graduate, or professional standing and permission of instructor. Offered: AWSp.

**PATH 562 P-Cardiovascular Pathology Conference (\*)** *Reichenbach* Course consists of two parts: a laboratory review of gross and microscopic cardiovascular pathology of selected autopsied cases followed by a combined clinical (medical and/or surgical) and pathology conference discussing these cases. Prerequisite: HUBIO 540 and permission of instructor.

**PATH 600 Independent Study or Research (\*)** Credit/no credit only.

**PATH 667 P-Renal Pathology Laboratory (\*, max. 6)** Laboratory elective for third- and fourth-year medical students. Read current literature, review various renal biopsies and urine sediments, and read standard texts prior to a weekly topic-oriented conference. All students earn 1 credit for one-hour seminar per week. May be taken concurrently with MED 693. Prerequisite: permission of instructor.

**PATH 680 P-Diagnostic Pathology Clerkship—University of Washington Medical Center (\*, max. 24)** *Swanson* Medical student participation in dissection and study of autopsy and surgical pathology cases. Cases worked up under senior staff, including dissection, microscopic examination, and literature review. Attendance at pathology conferences and seminars expected. Prerequisite: third- or fourth-year student standing.

**PATH 681 P-Diagnostic Pathology Clerkship—Harborview Medical Center (\*, max. 24)** *Deubner*

**PATH 682 P-Diagnostic Pathology Clerkship—Veterans Administration Hospital (\*, max. 24)** *Thorning*

**PATH 683 P-Diagnostic Pathology Clerkship—Medical Examiner's Office (\*, max. 24)** *Raven*

**PATH 687 P-Diagnostic Pathology Clerkship—Children's Hospital and Medical Center (\*, max. 24)** *Patterson*

**PATH 688 P-Diagnostic Pathology Clerkship—Madigan Army Medical Center (\*, max. 24)**

**PATH 690 P-Diagnostic Pathology Clerkship—Northwest Medical Center (\*, max. 24)** *Patton*

**PATH 691 P-Diagnostic Pathology Clerkship—General Hospital of Everett (\*, max. 24)**

**PATH 697 P-Pathology Special Electives (\*, max. 24)** By specific arrangement, students can have clerkships, externships, or research opportunities at institutions other than the University of Washington. Students who wish to elect this course should obtain Special Assignment forms from the Dean's office at least one month before advance registration. Prerequisite: permission of instructor.

**PATH 699 P-WWAMI Pathology Special Electives (\*, max. 24)** By special arrangement for qualified students, special clerkships or externships may be available at institutions other than the University of Washington located within the WWAMI region. Prerequisite: permission of department.

**PATH 700 Master's Thesis (\*)**

**PATH 800 Doctoral Dissertation (\*)**

## Pediatrics

### DEPARTMENT OVERVIEW

RR314 Health Sciences

Pediatrics involves the study of physical and behavioral development of humans, in health and disease, from conception to adulthood.

Instruction is provided through conjoint courses, lectures, conferences, clerkships, and electives. Faculty members participate in teaching the basic curriculum and offer 20 electives, in addition to the general pediatrics clerkship at multiple WWAMI sites. A residency program is offered with a wide variety of electives as well as the traditional hospital-inpatient and clinic experience. Postdoctoral fellowship training is available in many subspecialty areas of pediatrics. The major teaching hospitals in Seattle are Seattle Children's, University of Washington Medical Center, and Harborview Medical Center.

### COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at [www.uw.edu/students/crsat/](http://www.uw.edu/students/crsat/).

**PEDS 498 Undergraduate Thesis (\*)** *Bennett* For medical students. Offered: AWSpS.

**PEDS 499 Undergraduate Research (\*)** *Bennett* Participation in various clinical or basic research programs in progress, specifically: child development, developmental biology, human embryology and teratology, medical genetics, infectious diseases, neonatology, neuroembryology, cardiology, endocrinology and metabolism, immunology, respiratory disease. Offered: AWSpS.

**PEDS 505 P-Preceptorship in Pediatrics (1)** *Bennett* To provide opportunity for first- and second-year medical students to gain personal experience with medical practice situations for pediatricians by being stationed with carefully selected clinical faculty members in their offices. Prerequisite: permission of instructor. Enrollment limited. Coordinator: Department of Pediatrics. Credit/no credit only. Offered: AWSpS.

**PEDS 530 P- Homeless Youth and Their Medical Care (1)** *Bonnar, Breuner* Clinic-based setting for seminar and interview practice with adolescents; students learn how to deal with special health problems and other related problems of

"street kids" through interviews and observations. Credit/no credit only. Offered: W.

**PEDS 611 City Doc FREE-TEEN Clinic (\*, max. 24)** *Breuner, Giesel* Participation in a free clinic for out-of-home youth, either Monday or Tuesday evenings. Clinical services include general medical care, with a focus on reproductive health, STD evaluations/treatment, and the impact of a homeless lifestyle on general health. Offered: AWSpS.

**PEDS 624 Pediatric Emergency Medicine - Spokane (8)** Students manage patients with the supervision of a Pediatric Emergency Medicine attending or fellow. Includes the opportunity to manage patients with a wide spectrum of disease processes as well as learn key emergency medicine procedural skills. Prerequisite: 4th year medical students who have completed their core pediatrics rotation. Offered: AWSpS.

**PEDS 625 Pediatric Emergency Medicine (8)** Elective in Pediatric Emergency Department at Children's Hospital and Regional Medical Center. Students manage patients with the supervision of a Pediatric Emergency Medicine attending or fellow. Includes the opportunity to manage patients with a wide spectrum of disease processes as well as learn key emergency medicine procedural skills. Prerequisite: 4th year medical students who have completed their core pediatrics rotation. Offered: AWSpS.

**PEDS 630 P-WRITE Pediatrics Clinical Clerkship (\*, max. 24)** Basic clinical clerkship for students enrolled in the WRITE Program. Prerequisite: completion of basic curriculum; third- and fourth-year students; acceptance in the WRITE program.

**PEDS 636 P-Pediatric Cardiology - Spokane (\*, max. 24)** *Johnston* Emphasis on physical diagnosis and electrocardiography and on clinical knowledge of diagnostic techniques and surgical possibilities for inpatients and outpatients with cardiovascular problems. Opportunity to observe catheterizations and cardiovascular operations. Weekly clinics and twice-daily inpatient rounds. Prerequisite: PEDS 665. (Limit: one student.) Offered: AWSpS.

**PEDS 637 P-Pediatric Cardiology - Anchorage (\*, max. 24)** *Johnston* Emphasis on physical diagnosis and electrocardiography and on clinical knowledge of diagnostic techniques and surgical possibilities for inpatients and outpatients with cardiovascular problems. Opportunity to observe catheterizations and cardiovascular operations. Weekly clinics and twice-daily inpatient rounds. Prerequisite: PEDS 665. (Limit: one student.) Offered: AWSpS.

**PEDS 655 P-Pediatric General Clerkship, Jackson, WY (\*, max. 24)** *McArthur* General introductory inpatient and outpatient pediatric clerkship. Takes place primarily in an active pediatric group practice with appropriate outpatient and inpatient opportunities, including access to a community hospital with nursery, pediatric beds, and physician-staffed emergency room. Prerequisite: HUBIO 563. (Six weeks, full time. Limit: twenty-four students.) Offered: AWSpS.

**PEDS 656 P-Pediatric General Clerkship—Wenatchee (\*, max. 24)** General introductory inpatient and outpatient pediatric clerkship. Open to all third- and fourth-year medical students. Prerequisite: HUBIO 563. (Six weeks, full time.) Offered: AWSpS.

**PEDS 657 P-Pediatric General Clerkship - Missoula (\*, max. 24)** General introductory inpatient and outpatient pediatric clerkship. Provides exposure to diverse settings where children receive health services. The six-week experience takes place in three active pediatric practices with appropriate outpatient and inpatient opportunities and at Community Medical Center.

**PEDS 658 P-Pediatric General Clerkship - Boise (\*, max. 24)** General introductory inpatient and outpatient pediatric clerkship. Provides exposure to diverse settings where children receive health services. The six-week experience takes place in three active pediatric practices with appropriate outpatient and inpatient opportunities and at St. Luke's Medical Center.

**PEDS 659 Pediatric General Clerkship—Billings, MT (\*, max. 24)** *Kummer, Starr* General introductory inpatient and

outpatient pediatric clerkship. Exposes students to diverse settings where children receive health services. The six-week experience takes place primarily in two active pediatric group practices with appropriate outpatient and inpatient opportunities. Offered: AWSpS.

**PEDS 660 Pediatric General Clerkship—Cheyenne, WY (\*, max 24)** *Horam* Introductory inpatient and outpatient pediatric clerkship that exposes students to environments in settings where children receive medical and health services. The 6-week experience takes place primarily in an active pediatric group practice with appropriate outpatient and inpatient opportunities. Offered: AWSpS.

**PEDS 661 P-Pediatric General Clerkship, Anchorage (\*, max. 24)** *McArthur* General introductory pediatric clerkship. One-half in hospital setting; one-half in outpatient department, clinic, or private office. Open to all third- and fourth-year medical students. Prerequisite: HUBIO 563. (Six weeks, full time. Limit: twenty-four students.) Offered: AWSpS.

**PEDS 662 P-Pediatric General Clerkship (\*, max. 24)** *Newman* General introductory pediatric clerkship. One-half in hospital setting; one-half in outpatient department, clinic, or private office. Location preferences are considered. Open to all third- and fourth-year medical students. Prerequisite: HUBIO 563. (Six weeks, full time. Limit: twenty-four students.) Offered: AWSpS.

**PEDS 663 P-Pediatric General Clerkship—Mary Bridge (\*, max. 24)** *Kodama* General introductory pediatric clerkship. One-half in hospital setting; one-half in outpatient department, clinic, or private office. Location preferences are considered. Open to all third- and fourth-year medical students. Prerequisite: HUBIO 563. (Six weeks, full time. Limit: twenty-four students.) Offered: AWSpS.

**PEDS 664 P-Pediatric General Clerkship—Pocatello, ID (\*, max. 24)** *Denton* General introductory pediatric clerkship. One-half in hospital setting; one-half in outpatient department, clinic, or private office. Open to all third- and fourth-year medical students. Prerequisite: HUBIO 563. (Six weeks, full time. Limit: twenty-four students.) Offered: AWSpS.

**PEDS 665 P-Pediatric General Clerkship—Seattle, WA (\*, max. 24)** *Bennett* General introductory pediatric clerkship. One-half in hospital setting; one-half in outpatient department or clinic. Open to all third- and fourth-year medical students. Prerequisite: HUBIO 563. (Six weeks, full time. Limit: twenty-four students.) Offered: AWSpS.

**PEDS 666 P-Pediatric General Clerkship—Great Falls, MT (\*, max. 24)** *Marron* General introductory pediatric clerkship. One-half in hospital setting; one-half in outpatient department, clinic, or private office. Open to all third- and fourth-year medical students. Prerequisite: HUBIO 563. (Six weeks, full time. Limit: twenty-four students.) Offered: AWSpS.

**PEDS 667 P-Pediatric General Clerkship—Madigan (\*, max. 24)** *Newman* General introductory pediatric clerkship. One-half in hospital setting; one-half in outpatient department, clinic, or private office. Open to all third- and fourth-year medical students. Prerequisite: HUBIO 563. (Six weeks, full time. Limit: twenty-four students.) Offered: AWSpS.

**PEDS 668 P-Pediatric General Clerkship—Spokane, WA (\*, max. 24)** *Maixner* General introductory pediatric clerkship. One-half in hospital setting; one-half in outpatient department, clinic, or private office. Open to all third- and fourth-year medical students. Prerequisite: HUBIO 563. (Six weeks, full time. Limit: twenty-four students.) Offered: AWSpS.

**PEDS 669 P-Neonatal Pediatrics-Clerkship (\*, max. 24)** *Loren* Participation in the activities in the newborn and premature divisions; ward rounds, seminars, conferences, and familiarization with certain laboratory techniques, particularly those relating to acid-base balance. Prerequisite: PEDS and OB GYN core clerkships. (Limit: two students.) Offered: AWSpS.

**PEDS 670 P-Pediatric Infectious Diseases (\*, max. 24)** *Smith* Students see and work up clinic consultations and present in detail to attending physician. Daily rounds include problem-solving discussions and didactic presentations in broad category of infectious diseases. Opportunity for

experience in clinical research and laboratory techniques. Prerequisite: PEDS and MED core clerkships; third- or fourth-year medical student standing. (Limit: one student.) Offered: AWSpS.

**PEDS 671 Pediatric Endocrinology (\*, max. 24)** *Fechner* Focuses on the evaluation of the normal progression of hormone mediated processes in children and the recognition, diagnosis and management of a variety of endocrine problems. Includes participation in clinics, inpatient endocrine rounds and a variety of conferences at Children's Hospital and Regional Medical Center.

**PEDS 672 P-Office Practice - Spokane (\*, max, 12)** Opportunity to observe and function in the private office settings of a number of clinical pediatric faculty and to accompany pediatricians as they pursue their daily activities in the community. Prerequisite: PEDS 665. Offered: ASWpS.

**PEDS 673 P-Office Practice (\*, max. 12)** *Bennett* Opportunity to observe and function in the private office settings of a number of clinical pediatric faculty and to accompany pediatricians as they pursue their daily activities in the community. Prerequisite: PEDS 665. Offered: AWSpS.

**PEDS 674 P-Pediatric Genetics - Spokane (\*, max, 24)** Clinical focus on evaluation and management of children with genetic disorders. Exposure to genetic counseling, the evaluation of children with hereditary structural defects, and diagnosis and management of children with inborn errors of metabolism. Emphasis on genetic mechanisms the cause human disease. Prerequisite: PEDS 665. (two, four, six, or twelve weeks. Limit: one student.) Offered: AWSpS.

**PEDS 675 P-Clinical Elective in Complementary and Alternative Medicine (8)** Clinical elective for students interested in a better understanding of CAM. Includes four different weekly clinical placements with selected CAM providers in the community: naturopathic physician, chiropractor, acupuncturist, and massage therapist. Also includes a weekly two-hour seminar discussing the evidence supporting the use of alternative treatments. Prerequisite: permission of course faculty.

**PEDS 678 P-Pediatric Infectious Diseases Boise (\*, max. 24)** *Smith* Students see and work up clinic consultations and present in detail to attending physician. Daily rounds include problem-solving discussions and didactic presentations in broad category of infectious diseases. Opportunity for experience in clinical research and laboratory techniques. Prerequisite: PEDS and MED core clerkships; third- or fourth-year medical student standing. (Limit: one student.) Offered: AWSpS.

**CONJ 677 P-Clinical Allergy and Immunology (\*, max. 12)** See Conjoint Courses.

**PEDS 679 P-Clinical Problems in Developmental Disabilities (\*, max. 12)** *Bennett* Experience in multidisciplinary evaluation and management of the handicapped child. Student performs pediatric evaluations, obtains appropriate consultations, observes additional professional assessments (e.g., psychological testing), and plans rehabilitation program. Opportunity to provide parent counseling. Prerequisite: PEDS 665. (Limit: one students.) Offered: AWSpS.

**PEDS 680 P-Pediatric Clinics (\*, max. 24)** *Bennett* One to ten half-day sessions may be elected each week for four weeks in the following areas: general pediatrics, endocrinology, neurology, immunology, arthritis, cardiology, congenital defects and retardation, well-child, teratology, adolescent medicine, allergy, cystic fibrosis, hematology, prematurity, neonatology, and poison control. Enrollment limited. Prerequisite: PEDS 665.

**PEDS 681 P-Pediatric Genetics (\*, max. 24)** *Raff* Clinical focus on evaluation and management of children with genetic disorders. Exposure to genetic counseling, the evaluation of children with hereditary structural defects, and diagnosis and management of children with inborn errors of metabolism. Emphasis on genetic mechanisms that cause human disease. Prerequisite: PEDS 665. (Two, four, six, or twelve weeks. Limit: one student.) Offered: AWSpS.

**PEDS 683 P-Pediatric Nephrology (8)** *Symons* Four-week elective clerkship at Children's Hospital and Medical Center.

Students participate in nephrology and transplant rounds, consult with renal fellows and attendings, and work up patients in renal clinics. Participation in seminars; special course in fluid balance. Prerequisite: third- or fourth-year medical student, PEDS 665, and MED 665 or equivalent. (Limit: two students.) Offered: AWSpS.

**PEDS 684 P-Pediatric Pulmonary Medicine (8)** *Redding* Respiratory disorders, diagnostic techniques and treatments unique to children in the inpatient, intensive care, and outpatient settings. Application of principles of pulmonary physiology to clinical problems. Students conduct consultations under the supervision of the attending and present a topic of choice. Inpatient rounds and clinics. Prerequisite: PEDS 665, fourth-year medical student standing. (Limit: one student.) Offered: AWSpS.

**PEDS 685 P-Pediatric Hematology and Oncology (\*, max. 24)** *Geyer* One-on-one teaching plus four weekly didactic sessions. Specific training in techniques and interpretation of bone marrow aspirations, intravenous chemotherapy, transfusions, and laboratory techniques of hematologic evaluation. Self-learning programs available. Prerequisite: PEDS 665. (Two, four, six, or twelve weeks, full-time.) (Limit: one student.) Offered: AWSpS.

**PEDS 686 P-Pediatric Cardiology (\*, max. 24)** *Johnston* Emphasis on physical diagnosis and electrocardiography and on clinical knowledge of diagnostic techniques and surgical possibilities for inpatients and outpatients with cardiovascular problems. Opportunity to observe catheterizations and cardiovascular operations. Weekly clinics and twice-daily inpatient rounds. Prerequisite: PEDS 665. (Limit: one student.) Offered: AWSpS.

**PEDS 690 P-Advanced Pediatric Clerkship - Boise (\*, max. 24)** *Bennett* Inpatient and/or outpatient experience with responsibilities comparable to intern for patient workup, diagnosis, and care. Prerequisite: PEDS 665. (Limit: two students.) Offered: AWSpS.

**PEDS 691 P-Advanced Pediatric Clerkship - Seattle (\*, max. 24)** *Bennett* Inpatient and/or outpatient experience with responsibilities comparable to intern for patient workup, diagnosis, and care. Available at Seattle Children's. Prerequisite: PEDS 665. Offered: AWSpS.

**PEDS 692 P-Advanced Pediatric Clerkship - Spokane (\*, max. 12)** Inpatient and outpatient experience with responsibilities comparable to intern for patient workup, diagnosis, and care. Prerequisite: PEDS 665. (Limit: two students.) Offered: AWSpS.

**PEDS 697 P-Pediatric Special Electives (\*, max. 24)** *Bennett* By specific arrangement, for qualified students, special clerkship externship or research opportunities at institutions other than University of Washington. The faculty can advise of possible opportunities. Obtain special assignment form from Dean's office at least one month before preregistration. Prerequisite: permission of instructor at away site. Offered: AWSpS.

**PEDS 699 P-WWAMI Pediatrics Special Electives (\*, max. 24)** *Bennett* By special arrangement for qualified students, special clerkships or externships may be available at institutions other than the University of Washington located within the WWAMI region. Prerequisite: permission of department at away site.

## Pharmacology

### DEPARTMENT OVERVIEW

E401 Health Sciences

Pharmacology is the science that deals with the nature of interactions between drugs and biological systems, and with the applications of such interactions to the treatment of disease. Courses in this field are given for medical, dental, pharmacy, nursing, and graduate students.

## GRADUATE PROGRAM

### Graduate Program Coordinator

E-417 Health Sciences, Box 357280

206-685-9252

[phcoladm@uw.edu](mailto:phcoladm@uw.edu)

The Department of Pharmacology offers the Doctor of Philosophy degree.

## Doctor of Philosophy

### Admission Requirement

A baccalaureate degree with a major in any of the sciences, such as biochemistry, chemistry, pharmacy, physics, physiology, psychology, or zoology. Students are selected from the applicant pool based on several criteria, including academic records, recommendations, and previous research experience.

### Graduation Requirements

Minimum 90 credits, to include:

- PHCOL 510, PHCOL 511, PHCOL 512, and PHCOL 513 (2 credits each) with a grade of 2.7 or above for each class. Enrollment in PHCOL 507 throughout graduate school. PHCOL 514 in the first, second, and third years of graduate study.
- PHCOL 519 (laboratory rotations) for autumn, winter, and spring quarters of the first year with the purpose of acquainting the student with various areas of pharmacology and research under investigation within the department. During each quarter, the student carries out a research project in the laboratory of a faculty member. At the end of the quarter, the student gives a presentation on the rotation research project that is evaluated by the faculty, using the criteria of scientific content, delivery, knowledge of the subject, and organization of material. The student receives a grade and academic credit for PHCOL 519. Students entering the PhD program with an MS degree or equivalent may petition to enroll in only one quarter of PHCOL 519 before selecting a lab. Rotations may occur outside the department by special permission only.
- Four advanced 2–3 credit graded elective courses in pharmacology in addition to the PHCOL 510–PHCOL 513 series. Nine graded credits (non-seminar) in graduate-level courses in physiology, biochemistry, molecular biology, immunology, cell biology, or other relevant areas. The courses should strengthen the foundation of the student's thesis proposal.
- Creditable passage of a comprehensive written exam on general pharmacology, to be taken during summer quarter of the second year. During the first quarter of the third year of study, students take the oral general examination, given by the Supervisory Committee. The examination is based in part on an evaluation of the student's proposed research for the dissertation and on his or her knowledge of the major disciplines important to the research. Based on the result, the committee may recommend termination, further work and subsequent reexamination, or approval of the student's performance and candidacy for the PhD degree.
- After successful completion of the general examination, the student devotes most of his or her time to thesis research in the third and subsequent years of study.
- The research project for the PhD dissertation is chosen by the candidate and faculty sponsor and approved by the candidate's Supervisory Committee. Research must represent a worthy and fundamental contribution showing originality in concept and implementation.

When the candidate has concluded the research project and prepared a complete copy of the dissertation, the sponsor obtains approval of the Graduate School and sets

a date for the final examination. The final examination is concerned principally with the subject matter of the dissertation, but may include the background and origins of the dissertation problem as well as its practical applications and extrapolations.

### Financial Aid

Financial support is offered to students who maintain satisfactory academic progress. Tuition and stipends are provided by National Institutes of Health training grants, University of Washington teaching assistantships, individual research grants, and fellowships from private sources.

## COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at [www.uw.edu/students/crscat/](http://www.uw.edu/students/crscat/).

**PHCOL 401 General Pharmacology I (2–4, max. 4)** Wang Principles governing drug-receptor interactions, dose-response relationships, desensitization, and tolerance. Drug toxicity, allergy, mutagenesis, and carcinogenesis. Pharmacogenomics and DNA/RNA therapies. General pharmacology of drugs acting on the endocrine and vascular systems. For pharmacy students and other undergraduates. Recommend: background in biology, biochemistry, and introductory physiology. Offered: A.

**PHCOL 402 General Pharmacology II (3/4)** Storm General pharmacology of drugs acting on the autonomic, cardiovascular, and central nervous systems. For Pharmacy students and other undergraduates. Prerequisite: PHCOL 401. Offered: W.

**PHCOL 434 General Pharmacology (2)** Grubbs, Watson Lectures concerning the action of drugs on physiological and pathological processes with special emphasis on agents of special importance in the practice of dentistry. For dental students. Offered: A.

**PHCOL 435 General Pharmacology (2)** Grubbs Lectures concerning the action of drugs on physiological and pathological processes with special emphasis on agents of special importance in the practice of dentistry. For dental students. Offered: W.

**PHCOL 498 Undergraduate Thesis (\*)** Offered: A.

**PHCOL 499 Undergraduate Research (\*)** Participation in departmental research projects. Offered: AWSpS.

**PHCOL 507 Pharmacology Seminar (1)** Presentation of comprehensive reports on recent medical and scientific literature in fields of current importance. Research progress reports, and reports on results of completed research. Prerequisite: permission of instructor. Offered: AWSp.

**PHCOL 510 Drug Discovery and Emerging Therapeutics (2)** Zheng Consideration of the general principles and current approaches involved in modern drug discovery and development, with an emphasis on basic concepts in drug action, delivery, and metabolism. Discussion of novel drug discovery techniques and emerging non-standard therapeutics. Prerequisite: organic chemistry, biochemistry, and introductory anatomy and physiology. Offered: W.

**PHCOL 511 Autonomic/Cardiovascular Pharmacology (2.5)** Nathanson Consideration of the pharmacology of the cardiovascular and autonomic nervous systems. Emphasizes the mechanisms of neurotransmitter, hormone, drug action at autonomic synapses, and the molecular basis for physiology and pathophysiology of the cardiovascular system. Lectures, group discussion, and analysis of recent research. Prerequisite: organic chemistry, biochemistry, introductory anatomy, and physiology. Offered: W.

**PHCOL 512 Neuropharmacology (2)** Bajjalieh Consideration of the neurobiological basis of drug action on the central nervous system, including mechanism of action and therapeutic use in psychiatric disorders; neurodegeneration/neuroinflammation; control of neuronal excitability and pain; and drug abuse and addiction. Lecture, group discussion,

and analysis of recent research. Recommended: organic chemistry, biochemistry, introductory anatomy, and physiology. Offered: Sp.

**PHCOL 513 Endocrine Pharmacology and Chemotherapeutics (2)** McKnight Consideration of the pharmacology of endocrine systems including the hypothalamic/pituitary regulatory peptides, glycoprotein hormones/growth factors, peptide and steroid hormones. Basic principles of chemotherapy of endocrine and other cancers, as well as viral and microbial diseases. Lecture, group discussion, and analysis of recent research. Prerequisite: organic chemistry, biochemistry, introductory anatomy, and physiology. Offered: Sp.

**PHCOL 514 Current Topics in Pharmacology (1)** McKnight Current research related to the mechanisms of drug action presented in a seminar format. Presentations include relevant background material as well as detailed experimental results taken from current research articles. Prerequisite: permission of instructor. Offered: AWSp.

**PHCOL 515 General Pharmacology Laboratory (\*, max. 9)** Laboratory course for professional and graduate students who wish to do independent laboratory research under the direction of a specific faculty member. Prerequisite: permission of instructor. Offered: AWSp.

**PHCOL 519 Introduction to Laboratory Research in Pharmacology (4)** Storm On a rotation basis students carry out individual research projects in the laboratories of different faculty members. At the end of each quarter students make formal presentations of their work. For first-year graduate students in pharmacology. Offered: AWSpS.

**PHCOL 529 Ion Channel Pharmacology (2)** Catterall, Tempel Current topics in ion channel structure, function, genetics, and pharmacology, including consideration of role in electrical signaling in cell membranes and information transfer and processing in nervous system, inherited diseases of ion channels, and sites and mechanisms of action of drugs and toxins. Prerequisite: CONJ 532 and CONJ 536 or permission of instructor. Offered: odd years; A.

**PHCOL 530 Neuronal Signaling Pathways (2)** Beavo, Pham, Storm, Xia Advanced consideration of the molecular events between drug or hormone binding to receptors and the resulting responses. Emphasizes roles played by signal transduction pathways in regulation of synaptic plasticity, memory formation, neuronal apoptosis and developmental neurobiology. Prerequisite: UCONJ 532 or permission of instructor. Offered: even years; W.

**PHCOL 531 Genetic Analysis of Signaling Systems (3)** McKnight, Moon Current topics involving signal transduction are discussed with an emphasis on genetic analysis of multicellular systems and creative experimental design. Prerequisite: 9 credits of graduate-level courses in molecular and cellular biology, biochemistry, or genetics, or permission of instructor. Offered: odd years; Sp.

**PHCOL 534 Molecular Basis of Addictive Drug Action (2)** Chavkin, Mackie, Stella Advanced consideration and discussion of current literature addressing the basis of opiate, psychostimulant, and cannabinoid effects on signal transduction events, electrical activity of neurons, and drip-motivated behaviors in animal models of human drug abuse. Prerequisite: PHCOL 512 or permission of instructor. Offered: even years; A.

**PHCOL 535 Transcriptional Control in Human Disease (3)** Bomsztyk, Wang Advanced consideration and discussion of the mechanisms regulating transcription/gene expression and of aberrant transcription factors which disrupt this process found in cancer and other human diseases. Prerequisite: PHCOL 512 or permission of instructor. Offered: even years; Sp.

**PHCOL 550 An Overview of Faculty Research (1)** Wang Reviews research topics currently being studied in pharmacology. Student reads articles published on each topic. Credit/no credit only. Prerequisite: first-year student standing in pharmacology. Offered: A.

**PHCOL 560 Regulation of Cell Function by Cyclic Nucleotide Phosphodiesterases (1)** Beavo Discussion of research strat-

egies, methodologies, and literature relating to regulation of cyclic nucleotide levels in the cell. Emphasis on practical problem solving, data analysis, and presentation of methods important to understanding published data and designing new experiments in this area of research. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSpS.

**PHCOL 561 Molecular Properties of Ion Channels (1)** *Catterall* Discussion of research strategies, methodologies, and literature concerning the structure, function, and regulation of sodium and calcium channels and the mechanism of action of drugs on them. Emphasis on experimental problem solving, data analysis, and presentation. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSpS.

**PHCOL 562 Regulation of Synaptic Physiology (1)** *Chavkin* Discussion of research strategies and methodologies involved in the regulation of signal transduction and synaptic physiology. Emphasis on practical problem solving, data analysis, and presentation methods important to modern scientific work. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSpS.

**PHCOL 563 Signal Transduction Mechanisms in Neuroplasticity and Neuron Growth (1)** *Storm* Discussion of research strategies, methodologies, and literature relating to signal transduction mechanisms important for neuroplasticity and regulation of neuron growth in the central nervous system. Emphasis on practical problem solving, data analysis, and presentation methods important to modern scientific work. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSpS.

**PHCOL 564 Cellular Regulation by Protein Kinases (1)** *McKnight* Analysis of research problems, techniques, and emerging concepts in the study of the function of protein kinases. Emphasis on critical evaluation of research and development of presentation skills. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSpS.

**PHCOL 565 Intercellular Signaling in Development (1)** *Moon* Molecular genetic approaches to dissecting the roles and mechanisms of intracellular signaling during development. Emphasis on vertebrate genes related to *Drosophila* segment polarity genes. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSpS.

**PHCOL 566 Molecular Pharmacology of Neurotransmitter and Neurokinin Receptors (1)** *Nathanson* Discussion of research strategies and methodologies in the areas of molecular neurobiology and signal transduction of muscarinic receptors, G-proteins, and neurokinin receptors. Emphasis on practical problem solving, data analysis, and presentation methods important to modern scientific work. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSpS.

**PHCOL 567 Mechanisms of Carcinogenesis (2)** *Xia* Lectures/presentations of biochemical and molecular basis of carcinogenesis induced by environmental agents, including approaches to identification of carcinogens. Role of cell proliferation and cell death (apoptosis) in cancer formation and cancer treatment. Molecular mechanisms that regulate proliferation and apoptosis. Prerequisite: ENV H 516, ENV H 405, or permission of instructor. Offered: jointly with ENV H 567; A.

**PHCOL 568 Pharmacology of Free Radicals (1)** *Vincenzi* Advanced considerations of current literature and experimental design, implementation and interpretation of research dealing with the effects of reactive oxygen species and free radicals on cell membranes and cells. Discussion of the relationships of such phenomena to human disease and the effects of drugs thereon. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSpS.

**PHCOL 569 Molecular Genetics of Potassium Channel Function (1)** *Tempel* Discussion of research strategies, methodologies, and literature concerning the structure, function, and regulation of potassium channel genes and their role in behavior as studied in mutant mice. Emphasis on experimental problem solving, data analysis, and presentation. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSpS.

**PHCOL 571 Molecular Mechanisms of Neurosecretion (1)** *Bajjalieh* Discussion of research strategies, methodologies, and literature relating to regulation of cyclic nucleotide levels in the cell. Emphasis on experimental problem solving, data analysis, and presentation. Credit/no credit only. Prerequisite: permission of instructor.

**PHCOL 572 Transcriptional Regulation of Growth Control Genes (1)** *Wang* Discussion of research strategies, methodologies, and literature relating to proliferative growth control, cellular differentiation, and gene expression. Emphasis on practical problem solving, data analysis, and presentation. Credit/no credit only. Prerequisite: permission of instructor.

**PHCOL 573 Signaling Systems Linked to Neuroinflammation (1)** *Stella* Discussion of research strategies, methodologies and literature related to neuroinflammation, microglial cell activation, and the cannabinoid signaling pathway. Emphasis on solving practical problem, data analysis, and presentation. Prerequisite: permission of instructor. Offered: A, W, Sp, S.

**PHCOL 575 Structural Biology of Ubiquitination (1)** *Zheng* Discussion of research strategies, methodologies and literature concerning the structure, function, and regulation of ubiquitin-protein ligases and the mechanism underlying ubiquitination and ubiquitin-dependent proteolysis. Emphasis on experimental problem solving, data analysis, and presentation. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSpS.

**PHCOL 576 Pharmacological, Molecular, and Functional Characterization of G-protein Coupled Receptors (1)** *Hague* Discusses research strategies, methodologies, and literature relating to the pharmacological characterization, molecular biology, and functional coupling of GPCR's. Emphasizes practical problem solving, data analysis, and presentation. Prerequisite: permission of instructor. Credit no credit only. Offered: AWSpS.

**PHCOL 577 Regulatory Roles of Ubiquitin in the Nucleus (1)** *Gardner* Focuses on the design and implementation of research aimed at understanding the nuclear functions of the small protein modifier ubiquitin. Strongly emphasizes the understanding of current literature, experimental design and troubleshooting, data analysis, and presentation of experimental results. Prerequisite: permission of instructor. Credit no credit only. Offered: AWSpS.

**PHCOL 578 A-Kinase Anchoring Proteins in Cell Signaling Research (1)** *Scott* Focuses on the design and implantation of research A-Kinase anchoring proteins in cell signaling. Emphasizes understanding experimental design and troubleshooting, data analysis, and presentation of experimental results. Credit/no credit only. Offered: AWSpS.

**PHCOL 600 Independent Study or Research (\*)** Pharmacology graduate students only. Offered: AWSpS.

**PHCOL 700 Master's Thesis (\*)** Pharmacology graduate students only. Offered: AWSpS.

**PHCOL 800 Doctoral Dissertation (\*)** Pharmacology graduate students only. Offered: AWSpS.

## Physiology and Biophysics

### DEPARTMENT OVERVIEW

G424 Health Sciences

Physiology deals with the processes, activities, and phenomena incidental to, and characteristic of, life and living organisms. Based upon physics, chemistry, and mathematics, physiology interlocks closely with the other basic medical sciences anatomy, molecular biology, immunology, biochemistry, pharmacology, and pathology and with psychology. Research in physiology is accomplished by analyzing the molecular, cellular, and integrative properties of the system under study. For this reason, physiology appeals to

students with diverse backgrounds and goals. Courses in this field are given for medical, dental, pharmacy, nursing, and graduate students.

## GRADUATE PROGRAM

### Graduate Program Coordinator

G424 Health Sciences, Box 357290

206-685-0519

[pbio@uw.edu](mailto:pbio@uw.edu)

The Department of Physiology and Biophysics offers advanced instruction and training leading to both the Master of Science and Doctor of Philosophy degrees. Students aspiring only to the MS degree are rarely accepted. Students pursuing a PhD degree in physiology and biophysics may emphasize molecular and cellular physiology, biophysics, neurobiology, respiratory physiology, or endocrinology. Studies leading to the doctoral degree require five to six years to complete. The first year is spent acquiring a broad knowledge of physiology via a sequence of courses and laboratory rotations. After selection of a special area of study, the second year is spent taking advanced seminars in the area of specialization and developing a thesis proposal. After admission to candidacy, the latter years are spent pursuing the area in depth and completing an original-research project.

Individuals with graduate degrees in physiology and biophysics often pursue careers in teaching and research in colleges and universities and in biotech industries. With additional training, graduates have been successful in medicine, law, creative writing, and high-level computer programming.

The department participates in interdisciplinary PhD degree programs in Neurobiology and Behavior, and in Molecular and Cellular Biology.

## Master of Science

The Master of Science degree is normally granted as part of the path of study leading to the Doctor of Philosophy degree. Students are normally admitted only to the Doctor of Philosophy degree.

## Doctor of Philosophy

### Admission Requirements

To apply for admission, a student must provide academic transcripts, Graduate Record Examination (GRE) scores, four letters of recommendation, and a statement of purpose. Because of the broad scope and interdisciplinary nature of the graduate program, there are no specific prerequisites for admission. However, most students have backgrounds in the physical and/or biological sciences. These include majors in biology, physics, mathematics, engineering, computer science, chemistry, and psychology. The most important requirement is a strong motivation and excitement about doing science.

### Degree Requirements

90 credits minimum, as follows:

Due to the broad nature of research interests in the department and the diversity of graduate-student backgrounds, formal course requirements are kept to a minimum and are completed in the first year. Students are encouraged to shape their own graduate education, as they choose the majority of their coursework and the scientific direction for their research. Courses available include those offered by other departments, both in the Medical School and elsewhere on campus. Electives may be chosen from a list of mini-courses whose topics reflect the current interests of faculty and students. Students are required to take at least six mini courses.

*Required Courses:*

- CONJ 531 (1.5), CONJ 532 (1.5), P BIO 532 (2), NEUBEH 501 (3), NEUBEH 502 (3), P BIO 508 (2–5, max. 5; must be taken three times), P BIO 513 (4), P BIO 519 (1)
- Six departmental mini-courses, to be completed prior to the general examination, from the following: P BIO 509 (3), P BIO 545 (3), P BIO 550 (1), P BIO 551 (1), P BIO 552 (1), P BIO 553 (2), P BIO 554 (1), P BIO 555 (1), P BIO 556 (1), P BIO 557 (1), P BIO 559 (3).
- P BIO 600 (before general examination)
- P BIO 800 (after general examination)
- Note: P BIO 503 (4) is highly recommended, but not required

**General Examination:** The General Exam must be taken by the last day of autumn quarter of the third year. After passing the General Exam the student is advanced to candidacy for the doctoral degree. The student then registers for P BIO 800 and continues working on thesis research.

**Final Examination:** The culmination of the program is the submission of a written doctoral thesis and the presentation of this work in a public lecture attended by members of the department and the University.

## Research Facilities

The department is well equipped to provide instruction and research training in cellular and molecular physiology, neurobiology, membrane biophysics, respiratory physiology, muscle biophysics, endocrinology, reproduction, and physiological psychology. The facilities of the Regional Primate Research Center, adjacent to the department, are available to qualified trainees who need to use primates in their research.

## COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at [www.uw.edu/students/crscat/](http://www.uw.edu/students/crscat/)

**CONJ 401, 402, 403 Human Anatomy and Physiology (4, 4, 4)** Linder, Melby See Conjoint Courses.

**P BIO 498 Undergraduate Thesis (\*)** Offered: AWSpS.

**P BIO 499 Undergraduate Research (\*)** Offered: AWSpS.

**P BIO 504 Biophysics of Nerve, Muscle, and Synapse (3)** Sullivan Introduces biophysical properties of nerve and muscle cells. Topics include intrinsic electrical properties of neurons, ion channels, receptor signaling, calcium signaling, contraction of muscles, and synaptic function. Offered: jointly with NEUBEH 504; A.

**P BIO 505 Human Physiology (4–)** Wordeman Intensive coverage of physiology across the life span through lectures, conference. Includes excitable tissue, neurophysiology, skeletal muscle; spinal reflex; autonomic nervous system; temperature regulation, neuroendocrinology, and reproductive physiology. Required for dental, graduate nursing, and bioengineering students. Also offered for graduate students. Offered: A.

**P BIO 506 Human Physiology (4)** Berger Intensive coverage of physiology across the life span through lectures, conference. Includes cardiovascular, respiratory physiology renal, body fluids; gastrointestinal, and acid base balance. Required for dental, graduate nursing, and bioengineering students. Also offered for graduate students. Prerequisite: P BIO 505, or equivalent with permission of the instructor. Offered: W.

**P BIO 507 Cardiovascular and Respiratory Physiology (3)** Cardiovascular physiology: the heart, microcirculation, hemodynamics, regional circulation, and reflex integration. Respiratory physiology: the lung, pulmonary circulation, alveolar ventilation, gas exchange, control of breathing, acid-base regulation, exercise. Offered: W.

**P BIO 508 Introduction to Laboratory Research in Physiology (2–5)** Students participate in the performance of ongoing

projects in designated research laboratories. Emphasis is on experimental design, methodology and techniques. For first- and second-year graduate students in physiology and biophysics to provide a basis for future independent research. Offered: AWSpS.

**P BIO 509 Neuroendocrinology (3)** Steiner Emphasizes the cellular and molecular aspects of several topics in neuroendocrinology, including neuropeptide genes, reproduction, steroid hormone regulation of gene expression, mechanisms of hormone action, endocrine rhythms, and neural oscillations. Prerequisite: either BIOL 201, BIOL 202, and BIOL 203, or BIOL 180, BIOL 200, and BIOL 220; BIOC 440, BIOC 441, BIOC 442 or permission of instructor. Offered: jointly with NEUBEH 541; W, odd years only.

**P BIO 510 Physiology Survey (2)** Reading and discussion of the research literature in cellular, molecular, and systems physiology. Students write a critical evaluation of each paper in the manner of a peer review. All three quarters are required for second-year P BIO students. Prerequisite: completion of one year of P BIO graduate study. Offered: A.

**P BIO 511 Physiology Survey (2)** Reading and discussion of the research literature in cellular, molecular, and systems physiology. Students write a critical evaluation of each paper in the manner of a peer review. All three quarters are required for second-year P BIO students. Prerequisite: completion of one year of P BIO graduate study. Offered: W.

**P BIO 512 Physiology Survey (2)** Reading and discussion of the research literature in cellular, molecular, and systems physiology. Students write a critical evaluation of each paper in the manner of a peer review. All three quarters are required for second-year P BIO students. Prerequisite: completion of one year of P BIO graduate study. Offered: Sp.

**P BIO 513 Practicum in Teaching Physiology and Biophysics (4)** Students undertake instructional material development, presentation of materials and develop problem-solving techniques. Credit/no credit only. Offered: AW.

**P BIO 516 Physiological Proseminar (7)** Hlastala Guided survey of the experimental literature in cardiovascular and respiratory physiology. Course conducted as seminar with oral analysis of assigned papers and topics. Prerequisite: permission of instructor. Offered: A.

**P BIO 518 Research Topics in Cardiovascular Physiology (1)** Feigl Graduate students and faculty members present and discuss current literature and research. Prerequisite: permission of instructor.

**P BIO 519 Membrane and Muscle Biophysics Seminar (1)** Hille Lectures on current research topics in cell membrane function and muscle contraction. Credit/no credit only. Prerequisite: permission of instructor. Offered: Sp.

**P BIO 520 Physiology Seminar (\*)** Selected topics in physiology. Prerequisite: permission of instructor.

**P BIO 521 Biophysics Seminar (\*)** Selected topics in biophysics. Prerequisite: permission of instructor.

**P BIO 522 Selected Topics in Respiratory Physiology (1–3, max. 3)** Hildebrandt Advanced seminar on selected topics, including pulmonary mechanics, gas exchange, lung fluid balance, regulation of breathing, pulmonary circulation, respiration in the neonate, liquid breathing, airway dynamics, lung structure and development, cardiopulmonary interactions, exercise physiology. Prerequisite: permission of instructor. Offered: AWSpS.

**P BIO 523 Heat Transfer and Temperature Regulation (2–5, max. 5)** Brengelmann Thermal exchange between the body surface and the environment. Heat production and distribution within the body. Properties of cutaneous and deep temperature receptors. Neural integration and homeothermy. Prerequisite: permission of instructor.

**P BIO 525 Readings in Advanced Physiology and Biophysics (\*)** Guided study of the experimental literature of physiology and biophysics. Essays are written and discussed with the staff. Emphasis is placed on critical analysis, accuracy of expression, bibliographical technique, and other factors of good scholarship. Prerequisite: permission of instructor. Offered: A.

**P BIO 526 Readings in Advanced Physiology and Biophysics (\*)** Guided study of the experimental literature of physiology and biophysics. Essays are written and discussed with the staff. Emphasis is placed on critical analysis, accuracy of expression, bibliographical technique, and other factors of good scholarship. Prerequisite: permission of instructor. Offered: W.

**P BIO 527 Readings in Advanced Physiology and Biophysics (\*)** Guided study of the experimental literature of physiology and biophysics. Essays are written and discussed with the staff. Emphasis is placed on critical analysis, accuracy of expression, bibliographical technique, and other factors of good scholarship. Prerequisite: permission of instructor. Offered: SpS.

**CONJ 531 Signaling Mechanisms in Excitable Cells (1.5)** See Conjoint Courses.

**P BIO 541 Motor Systems I: Peripheral, Spinal, and Cortical Mechanisms (3)** Binder, Fetz Discussion of research papers on the physiology of the motor unit and the spinal and cortical neurons that control motor unit activity. Prerequisite: NEUBEH 501–503 or permission of instructor.

**P BIO 542 Motor Systems II: Brainstem Mechanisms (3)** Anderson, Fuchs Critical discussion of research papers and resulting concepts regarding the roles of various brainstem systems in controlling somatic and ocular movements. **Each student is responsible for leading the discussion of one topic.** Prerequisite: NEUBEH 502 and NEUBEH 503 or equivalent and permission of instructor.

**P BIO 545 Quantitative Methods in Neuroscience (3)** Rieke, Shadlen Discusses quantitative methods applicable to the study of the nervous system. Revolves around computer exercises/discussion of journal papers. May include linear systems theory, Fourier analysis, ordinary differential equations, stochastic processes, signal detection and information theory. Prerequisite: NEUBEH 501, 502, 503, or by permission of instructor. Offered: jointly with NEUBEH 545;W; odd years.

**P BIO 547 Readings in Cell Physiology (2/3, max. 15)** Hille Reading and discussion of research literature on excitable cells. Emphasis on membrane excitability, transport, contractility, growth factors, and extracellular matrix. Topics vary. Prerequisite: CONJ 501 or equivalent. Offered: W.

**P BIO 548 Molecular Mechanisms of Synaptic Plasticity (2)** Barria Discusses recent primary literature on the molecular mechanisms underlying structural and functional changes of dendritic spines and synapses in the mammalian brain as result of synaptic activity and experience. Offered: jointly with NEUBEH 548; Spring, odd years.

**P BIO 550 Biophysics of Calcium Signaling (1)** Hille, Santana Introduction to cellular calcium signaling including theoretical and technical issues of calcium signal detection and biological conclusions. Prerequisite: CONJ 531 Offered: jointly with NEUBEH 550; Sp, odd years.

**P BIO 552 Synaptic Integration (1)** Binder, Powers Discussion of recent papers on how neurons in the central nervous system integrate concurrent synaptic inputs. Includes: effects of driving force on synaptic currents, effects of conductances on dendritic properties, transfer of currents from dendrites to soma, and transformation of currents into spike train outputs. Offered: jointly with NEUBEH 552.

**P BIO 553 Learning and Memory: Synapses and Systems (2)** Jagadeesh, Sullivan Five-week mini-course evaluates the current state of knowledge on the mechanisms that allow people to learn and remember. After introductory overviews of the cellular and molecular mechanisms underlying long-term synaptic plasticity and the multiple systems existing for learning and memory, students choose specific topics for discussion. Offered: jointly with NEUBEH 553.

**P BIO 554 Motor Learning: Cellular and Network Mechanisms (1)** Fetz, Perlmutter Five-week mini-course reviews the current state of research on cellular and network mechanisms of motor learning. After an introductory overview of behavioral and physiological examples of motor learning in various species and systems, students choose specific top-

ics for discussion, using the primary literature as a source. Offered: jointly with NEUBEH 554.

**P BIO 555 Sensory Receptors (1)** *Detwiler, Rieke* Five-lecture mini-course examines how different kinds of sensory receptors detect and respond to different modalities of sensory stimuli. Discussion focuses on the cellular and molecular mechanisms of the underlying transduction processes and the experimental evidence that they are based on. Offered: jointly with NEUBEH 555

**P BIO 556 Axon Pathfinding Mechanisms (1)** *Bothwell* Examines mechanisms governing axon growth cone behavior during embryonic development and during regeneration in the injured adult. Discusses approaches employing both invertebrate and vertebrate model systems. Offered: jointly with NEUBEH 556.

**P BIO 557 Ion Channel Gating (1)** *Zagotta* Compares and contrasts mechanisms of gating in ligand-gated and voltage-gated ion channels. Covers basics of ligand gating and voltage gating, kinetic schemes, inactivation and desensitization, gating currents and partial agonists, and ion channel structure. Offered: jointly with NEUBEH 557.

**P BIO 558 Concepts and Mechanisms in Mitosis (2)** *Ashbury, Wordeman* Examines how the mitotic spindle organizes and separates duplicated chromosomes during cell division. Overview of spindle components and key mechanistic concepts. Discusses recent or classic papers from the primary literature.

**P BIO 559 Neurobiology of Disease (3)** *Garden, Moeller, Neumaier, Weiss* Introduces medically important neurological and psychiatric diseases and experimental approaches to understanding the basis for diseases and their treatments. Covers stroke, epilepsy, autoimmune diseases of the CNS, neurodegenerative diseases, autism, psychosis, anxiety disorders and mood disorders. Offered: jointly with NEURL 559/NEUBEH 559.

**P BIO 561 From Biophysics to Neural Computation (2)** Introduces the mathematics and methods of neuronal modeling. Develops, compares, and relates dynamical systems approaches and empirical characterizations of neuronal function. Includes lectures, student-led journal paper discussions, biweekly computational workshops on neuronal modeling packages, and a computations project. Recommended: differential equations and linear algebra. Offered: jointly with NEUBEH 561; Sp.

**P BIO 594 Neurological Study Unit (0.5)** Faculty and student discussion of neurological topics illustrated with clinical cases or demonstrations include the following: physiology, neuroanatomy, neurology, neuropathology, neurosurgery, and psychiatry. Credit/no credit only. Prerequisite for medical students: HUBIO 532. Offered: AW.

**P BIO 600 Independent Study or Research (\*)** Offered: AWSp.

**P BIO 700 Master's Thesis (\*)** Offered: AWSpS.

**P BIO 800 Doctoral Dissertation (\*)** Offered: AWSpS.

## Psychiatry and Behavioral Sciences

### DEPARTMENT OVERVIEW

BB1644 Health Sciences

[pbsci@uw.edu](http://pbsci@uw.edu)

The department offers coursework, clinical training, and research opportunities for undergraduate students, medical students, graduate physicians, and graduate students in allied health programs such as psychology, social work, and psychiatric nursing.

A biobehavioral approach is emphasized, which incorporates intrapersonal, interpersonal, and sociocultural factors. Intrapersonal factors include emotion, perception,

cognition, psychodynamics, neurochemistry, neuroanatomy, neurophysiology, genetics, and the developmental and aging processes. Interpersonal factors focus upon dyadic, familial, and group interactions. Sociocultural factors include the cultural, social, institutional, and community systems as well as the environment and epidemiology of health and disease.

### GRADUATE PROGRAM

The Medical School curriculum is divided into a core (basic) curriculum and an elective curriculum. Within its core curriculum the Department of Psychiatry and Behavioral Sciences offers material covering learning theory, cognition, memory, perception, neuropharmacology, social growth and development, epidemiology of health and disease, psychopathology, psychotherapy, and neuropsychiatry and behavioral medicine, as well as training in interviewing skills and assessment techniques. Its elective program includes a variety of clinical experiences and advanced didactics and seminars designed to further the knowledge and skills developed within the basic curriculum. In addition, the department encourages research and other scholarly pursuits by students in areas of interest to them. Stipends are available for research studies.

### Residency Training in Psychiatry

A four-year residency for medical school graduates and a three-year post-internship residency prepares physicians for Specialty Board Certification in Psychiatry. Clinical rotations on inpatient, outpatient, emergency, and consultation/liaison services are augmented by individual supervision and didactic lectures. With the program's integrative orientation, residents become proficient in psychotherapy, psychopharmacology, and community liaison with patients of all ages. Fellowships in child, geriatric, addiction, community, forensic and consultation-liaison psychiatry, and psychiatric neuroscience are available.

### Clinical Psychology Internship Program

The one-year internship in clinical psychology, accredited by the American Psychological Association, offers advanced clinical training to candidates for the doctorate in clinical psychology from graduate programs accredited by the American Psychological Association. Training tracks with the internship in general adult, general child, rehabilitation and health psychology, and public behavioral health and justice policy (adult and child). Advanced research skills training is also available as part of an INH-funded training grant for selected internship participants.

### Postdoctoral Fellowship Training

Postdoctoral fellowships for advanced clinical and research training in behavioral medicine, broadly construed, are also offered.

### COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at [www.uw.edu/students/crscat/](http://www.uw.edu/students/crscat/)

**CONJ 475 Alcoholism: A Course for Medical Students in the Allied Health Sciences (2)** See Conjoint Courses.

**PBSCI 498 Undergraduate Thesis (\*)** Opportunity to complete work on psychiatric research projects or to pursue a specific psychiatric topic in depth, for instance, through library research.

**PBSCI 499 Undergraduate Research (\*, max. 15)** Opportunities are available for participation in a wide variety of ongoing research in the behavioral sciences and clinical psychiatry, or for the development of an individual investigative project under the supervision of a faculty sponsor.

**PBSCI 505 P-Psychiatry Preceptorship (1)** *Combs* Opportunity for first- and second-year medical students to gain direct experience with clinical faculty members in psychiatry. Includes opportunities to observe different areas of psychiatry including addiction, child, geriatrics, community, crisis, and consultation. Prerequisite: permission of department. Offered: AWSp.

**PBSCI 515 War and Mental Health (1)** Examines the impact of war on mental health in both military and civilian populations. Focuses on posttraumatic stress disorder, including assessment, treatment, epidemiology, and neurobiology. Addresses other psychiatric disorders, substance abuse, brain injury, and psychosocial effects. Credit no credit only. Offered: jointly with G H 557.

**PBSCI 525 P-Psychiatry and the Law (3)** *Goldenberg* Concentration on major issues in psychiatry and law. Outside speakers from legal, judicial, and psychiatric communities. Lectures on assessment in forensic settings, competence to stand trial, and criminal responsibility. Discussions on personality disorders and correctional environments. For medical students, psychiatric residents and graduate psychology, psychosocial nursing, social work, and law students.

**PBSCI 530 P-Developmental Psychoanalytic Psychotherapy (2)** *Schimmelbusch* Examines how failures of psychological development lead to disorders of regulation of affects and cognition, and how psychoanalytic treatment reinstitutes normal development. Treatment process viewed from a psychoanalytic and psychobiological perspective. Clinical case discussion integrates theoretical concepts.

**PBSCI 535 Modern Concepts of Psychoanalysis (2)** *Schimmelbusch* Examines childhood developmental stages in light of inborn and environmental determinants. Correlates developmental phases with adult personality functioning. Views emotional development from a psychoanalytic and psychobiological point of view. Clinical case discussion integrates theoretical concepts.

**PBSCI 546 Psychiatric Epidemiology (3)** *Vander Stoep* Applies epidemiological methods to the study of mental illnesses. Topics include historical studies; distribution of mental illness, classification and measurement; epidemiology of depression; genetic and environmental etiological factors; developmental epidemiology. Prerequisite: either EPI 511, EPI 512, HSERV 591, or permission of instructor. Offered: Sp.

**PBSCI 548 P-Aging and Adult Development (1-3, max. 3)** Aging in Western technologically advanced societies frequently involves losses in status, stamina, and economic and social supports. Consideration given to losses among the aged. Students select projects in the area of aging and work at their own levels of expertise and sophistication. Seminar format with guided reading.

**PBSCI 560 P-Psychological Interventions for Primary Care Physicians (1)** *Kent* Focuses on the integration of primary care and mental health issues. Reading, lectures, videos, and role plays are utilized to review evidenced-based psychological interventions which can be employed in an outpatient primary care setting. Emphasizes issues of somatization, depression, anxiety, and health behavior change.

**PBSCI 591 P-Seminars and Conferences in Psychiatry: Seminar in Clinical Neuropsychology (\*)** Introduction to neuropsychological studies of brain-behavior relationships. Exposure to neuropsychological assessment procedures and manifestation of neurocognitive deficits in selected mental and medical disorders, e.g., epilepsy, AIDS, sleep disorders, trauma, toxin exposure, vascular disorders, psychiatric disorders. Develop knowledge of neuropsychological assessment procedures and applications to diverse medical conditions. Prerequisite: psychological assessment experience.

**PBSCI 600 Research in Psychiatry (1-15)** Independent laboratory research under the guidance and supervision of research scientists in the Psychiatry Department. Faculty permission required.

**PBSCI 630 P-WRITE Psychiatry Clinical Clerkship (\*, max. 24)** Basic clinical clerkship for students enrolled in the

WRITE Program. Prerequisite: completion of basic curriculum; third- and fourth-year students; acceptance in the WRITE program.

**PBSCI 662 P- Basic Psychiatry Clerkship - Missoula (12)** Students work at St. Patrick Hospital with adult and adolescent inpatients and in the emergency room for emergent care exposure. Students will have outpatient experience through the Adult Intensive Outpatient program, Pain Treatment Center and in faculty outpatient practices. Didactics include psychopharmacology, addiction, psychosis, mood disorders, child and geriatric psychiatry. Prerequisite: completion of the HUBIO series; third and fourth year students.

**PBSCI 663 P- Basic Psychiatry Clerkship - Billings (12)** Students work at St. Patrick Hospital with adult and adolescent inpatients and in the emergency room for emergent care exposure. Students will have outpatient experience through the Adult Intensive Outpatient program, Pain Treatment Center and in faculty outpatient practices. Didactics include psychopharmacology, addiction, psychosis, mood disorders, child and geriatric psychiatry. Prerequisite: completion of the HUBIO series; third and fourth year students.

**PBSCI 665 P-Basic Clinical Clerkship (12)** Inpatient clerkship in psychiatry. Students have primary responsibility under the direction of attending psychiatrists and residents for diagnosis and care of patients at University of Washington Medical Center, Harborview Medical Center, or Veterans Administration Hospital. Emergency room, crisis intervention, consultation to patients with psychiatric dysfunction. Familiarity with psychopharmacology and short-term hospitalization emphasized. (Six weeks, full-time.)

**PBSCI 666 P-WWAMI Psychiatry and Behavioral Sciences Clerkship (12)** Rotation aims to increase student's skills in basic psychiatry, social psychiatry, transcultural psychiatry, and community psychiatry. Orientation is around the diagnosis, treatment, and clinical management of White, Aleut, Indian, and Eskimo children and adults in outpatient, inpatient, and community settings. Third-, fourth-year medical students. Prerequisite: HUBIO 563. (Limit: three students.)

**PBSCI 667 P-Basic Psychiatry Clerkship, Boise (12)** Basic psychiatry clerkship at Veterans Administration Medical Center in Boise, Idaho. Fulfills graduation requirement for clerkship in Psychiatry.

**PBSCI 668 P-Psychiatry Clerkship, Spokane (12)** Students work on adult, geriatric, and adolescent inpatient psychiatric units of Sacred Heart Medical Center, following patients after transfer to partial hospitalization or outpatient clinic. Didactics include basic psychiatric diagnosis, treatment, and pharmacotherapy. Prerequisite: completion of HUBIO series; third and fourth-year medical students.

**PBSCI 669 Basic Psychiatry Clerkship, Wyoming (12)** Students work in the Wyoming Behavioral Institute with adult, adolescent, and child inpatients. Students have some outpatient experience and emergent care assessment experience at the Wyoming Medical Center. Didactics and discussion include topics such as psychopharmacology, emergent care and assessment, diagnosis, and substance abuse issues.

**PBSCI 670 P-Clerkship in Consultation/Liaison Psychiatry UWMC (\*, max. 24)** Assessment of patients with major psychosocial problems associated with physical disease, including: problems stemming from the way the illness is perceived and experienced, liaison with other clinical disciplines on complex diagnosis and treatment of problems. (Limit: one student; four weeks.) Prerequisite: HUBIO 563; satisfactory completion of required Psychiatry Clerkship

**PBSCI 671 P-Clerkship in Consultation/Liaison Psychiatry HMC (\*, max. 24)** Prerequisite: HUBIO 563; satisfactory completion of required Psychiatry Clerkship. (Limit: two students.)

**PBSCI 672 P-Elective Clerkship in Primary Care Psychiatry at Boise VAMC (8/12)** Assessment and treatment of patients with acute psychiatric problems in a primary care/rural setting. Consultation work on general medicine and surgery; assessment and dealing with outpatient psychi-

atric problems as they initially present. Evaluations, crisis intervention strategies, and brief therapies stressed. Prerequisite: satisfactory completion of required Psychiatry Clerkship (Four to six weeks; UW students only.)

**PBSCI 673 P-Outpatient Psychiatry Elective (\*, max. 24)** Offered at Harborview Outpatient Center. Students function as subinterns, conducting diagnostic interviews, initiating and managing pharmacotherapeutic treatment regimens, and providing crisis intervention, under the supervision of the full-time attending at Psychopharmacology Clinic. Prerequisite: satisfactory completion of required Psychiatry Clerkship. (Four to six weeks, full-time.)

**PBSCI 676 P-Inpatient Clerkship in Psychiatry at American Lake VA (8/12) Johnston** For medical students with a defined interest in psychiatry who wish to develop their knowledge and skills in the evaluation, management, and treatment of a wide range of acute and chronic psychiatric conditions requiring inpatient hospital treatment. Prerequisite: satisfactory completion of required Psychiatry Clerkship. (Four to six weeks, full-time.)

**PBSCI 677 P-Alcohol and Drug Treatment Clerkship at American Lake VA (8/12) Lim** Student assists in every phase of the substance-abuse treatment, including admission interviews, patient evaluation, problem identification, group and individual psychotherapy, assertiveness training, anger control, human sexuality, medical evaluation and treatment, couples therapy, discharge and aftercare planning. Experience primarily clinical. Prerequisite: satisfactory completion of required Psychiatry Clerkship. (Four to six weeks, full-time.)

**PBSCI 678 P-Clerkship in Psychiatric Long-Term Care and Rehabilitation (\*, max. 12) Johnston** Two- to six-week clerkship provides learning experiences in rehabilitation of long-term psychiatric patients with medical illness. Multidisciplinary team approach, working with homeless mentally ill. Diagnostic skills emphasized. Spectrum of diseases (cardiovascular, Huntington's, organic brain syndrome) is such that physical rehabilitation is not an emphasis. Prerequisite: HUBIO 563; satisfactory completion of required Psychiatry Clerkship.

**PBSCI 680 P-Clerkship in Emergency Psychiatry (\*, max. 24)** Pasic Emphasis on clinical evaluation, acute management, and treatment planning for individual patients. Experience in coordinating these activities with other emergency room personnel, and various hospital and community resources. Emphasis on skills useful to physicians in any specialty. Third- and fourth-year medical students only. Prerequisite: satisfactory completion of required Psychiatry Clerkship. (Four or six weeks, full-time.)

**PBSCI 685 P-Geriatric Psychiatry Clerkship (\*, max. 12)** Two- to six-week elective (four weeks highly recommended). Participation in the evaluation and care of older persons with psychopathology, such as intellectual impairment and depression, in a variety of settings. Emphasis on improving clinical skills regarding diagnosis and treatment of common behavioral problems in the elderly. Prerequisite: satisfactory completion of required Psychiatry Clerkship.

**PBSCI 688 P-Subinternship in General Psychiatry (\*, max. 16)** Students function as interns under the supervision of house staff and attending psychiatrists. Further development of their diagnostic and therapeutic skills emphasized. Special areas of interest, such as family intervention, substance abuse, psychoses, neuropsychiatry, community psychiatry, administration, research pursued. Prerequisite: satisfactory completion of required Psychiatry Clerkship; permission of instructor. (Four or six weeks, full-time.)

**PBSCI 695 P-Advanced Clerkship in Child Psychiatry - CSTC (\*, max. 24)** Provides an opportunity to participate in evaluation and treatment of children and adolescents. Prerequisite: satisfactory completion of required Psychiatry Clerkship; fourth year medical student status. 2/4/6 weeks.

**PBSCI 696 P-Advanced Clerkship in Child Psychiatry (\*, max. 24)** Provides students an opportunity to participate in evaluation and treatment. Experiences in specialized clinics are also available. It is suggested that the student contact the instructor prior to enrollment. Prerequisite: satisfactory

completion of required Psychiatry Clerkship. (Four or six weeks, full-time. Limit: two students.)

**PBSCI 697 P-Psychiatry Special Electives (\*, max. 24)** By special arrangement, clerkships, externships, and research opportunities can be made available at other institutions. Students obtain permission from Dr. Combs before obtaining a special assignment form from the Dean's office one month before advance registration. Students contact affiliating institutions. Does not fulfill the requirement for a basic clerkship in psychiatry.

**PBSCI 699 P-WWAMI Psychiatry and Behavioral Sciences Special Electives (\*, max. 24)** By special arrangement for qualified students, special clerkships or externships may be available at institutions other than the University of Washington located within the WWAMI region. Prerequisite: permission of department.

## Radiation Oncology

### DEPARTMENT OVERVIEW

NN106 University of Washington Medical Center

Radiation oncology is the branch of clinical medicine that utilizes high-energy radiation to treat disease, usually cancer. The department consists of three divisions: clinical radiation oncology, medical radiation physics, and experimental cancer biology. Training programs are offered in all three divisions. Research programs in the Department of Radiation Oncology are aimed at the physical and biological mechanisms of interactions between ionizing radiations, and normal and malignant tissues, with particular emphasis on high linear energy transfer (LET) radiation effects. The department is actively involved in radiation treatment planning work particularly in regard to intensity modulated radiation therapy (IMRT). Other programs involve the application of positron emission tomography (PET) to elucidate differences between cancers and normal tissues, and the development of specialized radiopharmaceuticals.

### COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at [www.uw.edu/students/crscat/](http://www.uw.edu/students/crscat/)

**R ONC 499 Undergraduate Research (\*, max. 24) Douglas, Kalet, Kane, Kelly, Koh, Laramore, Liao, Patel, Phillips, Russell, Schwartz, Wang, Wilbur, Yas** Opportunities in clinical or laboratory investigation in radiation oncology, radiation physics, or computer-related research. Student participation in ongoing or new projects. Open to students in the biological or physical sciences.

**R ONC 505 P-Radiation Oncology Preceptorship (1)** Students choose to either follow an attending physician through all aspects of radiation oncology including consults, follow up, and treatment planning; or follow an small cohort of patients throughout their treatment course to learn about the experience of a cancer patient undergoing treatment for life-threatening disease. Credit/no credit only.

**R ONC 695 P-Clinical Cancer Management (\*, max. 8) Douglas** Participation in the clinical management of patients with cancer, emphasizing a multi-modality approach. Includes clinical assessment, planning of radiation treatment, and follow-up evaluation of patients. Special procedures include three-dimensional treatment planning, implant brachytherapy and intraoperative radiation. Daily teaching conferences with faculty and residents. Prerequisite: MED 665 or permission of instructor.

**R ONC 697 P-Radiation Oncology Special Elective (\*, max. 24) Douglas** By specific arrangement for qualified students, special clerkship, externship or research opportunities can be made at institutions other than the University of Wash-

ington. Students should obtain a "Special Assignment" form from the Dean's Office at least one month before advance registration. Prerequisite: permission of instructor.

**R ONC 699 P-WWAMI Radiation Oncology Special Electives (\*, max. 24)** Douglas By special arrangement for qualified students, special clerkships or externships may be available at institutions other than the University of Washington located within the WWAMI region. Prerequisite: permission of department.

## Radiology

### DEPARTMENT OVERVIEW

RR215 University of Washington Medical Center

Diagnostic radiology is that branch of clinical medicine that specializes in the interpretation of various imaging modalities in order to detect, to characterize, and (with increasing frequency) to treat a wide variety of diseases. Historically, x-rays were the first energy source utilized for these purposes, and they continue to be a mainstay of this discipline. More recently, the armamentarium has grown to include ultrasound, computed tomography, magnetic resonance, and positron-emission tomography. In nuclear medicine, one of radiology's major subspecialties, radio-nuclides are employed for both diagnostic and therapeutic purposes. Another subspecialty is interventional radiology, wherein aspirations and biopsies, as well as therapeutic procedures such as abscess drainage, tumor embolization, and vascular stents are performed percutaneously.

The Department of Radiology consists of two clinical divisions: diagnostic radiology and nuclear medicine. Both divisions are ably supported by technologists and faculty members in the field of radiation physics. Instruction in radiology is provided for medical students, residents, and fellows as well as for other physicians. The faculty and its teaching and research activities are represented in each of the hospitals affiliated with the University.

### COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at [www.uw.edu/students/crscat/](http://www.uw.edu/students/crscat/)

**RADGY 498 Undergraduate Thesis(\*)** Supervised clinical and/or laboratory research in the broad field of medical imaging, culminating in a thesis. Offered: AWSpS.

**RADGY 499 Undergraduate Research (\*)** Opportunity to gain research experience and direct participation in either clinical or basic sciences investigation in diagnostic and/or nuclear medicine. Offered: AWSpS.

**RADGY 505 P-Preceptorship in Nuclear Medicine (1, max. 24)** Early (University of Washington Medical Center) Opportunity for first- and second-year medical students to gain experience with faculty in clinical and academic environments. Students observe general aspects of the Nuclear Medicine Division, including clinical problems, the different relationships in the clinic between physician and patient, and several research aspects of the division. Prerequisite: permission of instructor. Offered: AWSpS.

**RADGY 508 Physical Aspects of Medical Imaging (4)** Stewart Quantitative physical principles of medical imaging are presented for electromagnetic and sonic radiation. Methods of image formation and analysis are discussed for conventional film radiography, CT, DSA, PET, B-mode ultrasound and Doppler ultrasound.

**RADGY 550 Nuclear Magnetic Resonance in Biomedicine (2)** Hayes, Kushmerick, Richards, Yuan Basic physics of nuclear magnetic resonance (NMR) imaging and spectroscopy are presented. Research applications of NMR in physiology

and biochemistry are reviewed with emphasis on the brain. Grade based on written tests and small research paper. Prerequisite: permission of instructor. Offered: jointly with BIOEN 565; odd years; Sp.

**RADGY 580 P-Nuclear Medicine Technique, Physics, and Instrumentation (2.5)** Lewellen Provides familiarization with basic nuclear phenomena and with the instrumentation used in the practice of nuclear medicine. There are discussions and laboratory exercises. Practical experience in instrument operation and sample counting are provided. Prerequisite: permission of instructor. Offered: S.

**RADGY 600 Independent Study or Research (\*)** Prerequisite: permission of Dr. Nelson and faculty sponsor. Offered: AWSpS.

**RADGY 689 P-Introduction to Diagnostic Radiology - Billings (4)** Half-time clerkship in the field of medical imaging. Lectures, case discussions, film reading, and independent study provide an overview of the subspecialty areas of diagnostic radiology and nuclear medicine. Emphasis on utilization and selection of imaging tests, radiologic anatomy, and interpretation of commonly encountered studies. Offered: AWSpS.

**RADGY 690 P-Introduction to Diagnostic Radiology - Nampa (4)** Half-time clerkship in the field of medical imaging. Lectures, case discussions, film reading, and independent study provide an overview of the subspecialty areas of diagnostic radiology and nuclear medicine. Emphasis on utilization and selection of imaging tests, radiologic anatomy, and interpretation of commonly encountered studies. Offered: AWSpS.

**RADGY 691 P-Introduction to Diagnostic Radiology Alaska (4)** Half-time clerkship in the field of medical imaging. Lectures, case discussions, film reading, and independent study provide an overview of the subspecialty areas of diagnostic radiology and nuclear medicine. Emphasis on utilization and selection of imaging tests, radiologic anatomy, and interpretation of commonly encountered studies. Offered: AWSpS.

**RADGY 692 P-Introduction to Diagnostic Radiology Spokane (4)** Half-time clerkship in the field of medical imaging. Lectures, case discussions, film reading, and independent study provide an overview of the subspecialty areas of diagnostic radiology and nuclear medicine. Emphasis on utilization and selection of imaging tests, radiologic anatomy, and interpretation of commonly encountered studies. Offered: AWSpS.

**RADGY 693 P-Introduction to Diagnostic Radiology Seattle (4)** Half-time clerkship in the field of medical imaging. Lectures, case discussions, film reading, and independent study provide an overview of the subspecialty areas of diagnostic radiology and nuclear medicine. Emphasis on utilization and selection of imaging tests, radiologic anatomy, and interpretation of commonly encountered studies. Offered: AWSpS.

**RADGY 694 P-Advanced Clinical Clerkship (8)** Harms Full-time clerkship provides a more in depth experience in diagnostic radiology and nuclear medicine. Required rotations in the subspecialty areas of radiology augment the basic lecture series and case discussions of Radiology 693. For those with a special interest in diagnostic radiology. Prerequisite: permission of instructor and departmental education coordinator. Offered: AWSpS.

**RADGY 695 P-Radiology Sub-specialty Elective (\*, max. 8)** Harms Clinical rotation in one of the sub-specialty areas of radiology at the University of Washington and affiliated hospitals. Requires special arrangements and permission from a preceptor and the education coordinator in Radiology. Two or four weeks. Offered: AWSpS.

**RADGY 696 P-Nuclear Medicine Clerkship (\*, max. 12)** Early Daily participation at University of Washington Medical Center nuclear medicine clinic emphasizing technical performance, diagnostic interpretation, and clinical relevance of nuclear imaging. Daily clinical teaching conferences of the division. Four- and six-week clerkships can be preplanned in areas such as pulmonary, cardiovascular, renal, bone,

computer analysis. Prerequisite: permission of instructor. Offered: AWSpS.

**RADGY 697 P-Radiology Special Electives (\*, max. 24)** Harms Radiologic training in a nonaffiliated institution. Permission and arrangements must be made at the time of registration through direct communication between the student and the education coordinator in Radiology. A written outline from a preceptor at the intended site required. Prerequisite: permission of radiology education coordinator. Offered: AWSpS.

**RADGY 699 P-WWAMI Radiology Special Electives (\*, max. 24)** By special arrangement for qualified students, special clerkships or externships may be available at institutions other than the University of Washington located within the WWAMI region. Prerequisite: permission of department.

## Rehabilitation Medicine

### DEPARTMENT OVERVIEW

BB928 Health Sciences

The Department of Rehabilitation Medicine provides education for medical students, interns, residents, and allied health students in occupational therapy, physical therapy, and prosthetics and orthotics in a comprehensive approach to rehabilitation problems. This includes special diagnostic and evaluative procedures; methods and rationale in the application of principles of occupational therapy, physical therapy, prosthetics and orthotics, and other health professions; and advanced investigation of special problems encountered in the field. In addition, the department conducts a residency training program for the specialty of physical medicine and rehabilitation.

The department offers curricula leading to the following degrees: Master of Occupational Therapy, Doctor of Physical Therapy, and a Bachelor of Science in the field of prosthetics and orthotics. The department also offers post-professional degrees in rehabilitation science (MS and PhD) with options for individuals with previous rehabilitation-related training to pursue academic or research careers.

### Occupational Therapy

Head

Elizabeth M. Kanny

The profession of occupational therapy appeals to people who enjoy thinking creatively and flexibly to solve problems, and who want to assist people with disabilities perform activities important in their daily lives. Occupational therapists provide services related to occupational performance (activities) in everyday life in the areas of self-care, work, education, or play and leisure. They work with people who have physical illness or injury, social or emotional difficulties, congenital or developmental problems, or who are in need of preventive strategies to enhance health and well-being; and with people in all age groups from diverse cultural and ethnic groups and socioeconomic levels.

Occupational therapists help people with impairments or limitations live as productive and quality of life as possible. Services focus on increasing independence, enhancing development, and providing compensatory strategies, and minimizing or preventing disability. Therapists adapt activities and environments, select therapy activities meaningful to clients, and provide client, family, and caregiver education. For example, an occupational therapist may teach adaptive dressing techniques to a client who has lost use of a hand following a stroke, help a child with autism interact with peers, or modify a computer for a young adult with a spinal cord injury returning to work.

Today's occupational therapists practice in rehabilitation centers, outpatient rehabilitation clinics, schools, hospitals, mental health facilities, private practice, skill nursing facilities, home healthcare, and community health programs. The most common work settings for occupational therapists are school systems, hospitals, and long-term care facilities. The current and future job outlook for occupational therapists is excellent. The occupational therapy program is accredited by the Accreditation Council for Occupational Therapy Education (ACOTE), which can be contacted at: ACOTE c/o AOTA, P.O. Box 31220, Bethesda, MD, 20824-1220, phone 301-652-2682. Standards comply with the U.S. Department of Education criteria for recognition of accrediting agencies. Graduates of the program are eligible to sit for the national certification examination for occupational therapist. The National Board for Certification in Occupational Therapy (NBCOT) is the certifying agency responsible for development and implementation of this examination. Most states, including Washington, require state licensure in order to practice.

## Master of Occupational Therapy

### Admission Requirements

- Applicants must have completed a bachelor's degree in any major and taken the Graduate Record Exam (GRE) within the past five years. Eight prerequisite courses must be completed prior to admission to the program. In addition, applicants must have volunteer or work experience in at least two practice areas of occupational therapy. The admission process occurs once a year for entry autumn quarter of each year; applications are evaluated starting January 15 of each year.
- Specific prerequisite courses at the UW include the following. For students who have attended schools other than the UW, comparable courses must be taken:
  - Natural Sciences: BIOL 118, 5 credits; B STR 301, 4 credits; CHEM 120, 5 credits; PHYS 114, 4 credits; PHYS 117, 1 credit; EDPSY 490, 3 credits.
  - Social Sciences: PSYCH 305, 5 credits; PSYCH 306, 5 credits; SOC 110, 5 credits or ANTH 202, 5 credits.
- To apply, students must have completed five of the prerequisite courses, with three courses in the natural sciences. They must have earned a 3.00 minimum GPA in the prerequisite courses with no single course graded less than 2.5; and have a minimum 3.00 GPA on the most recent 60 semester or 90 quarter credits. Admission is based on academic ability, communication skills, and understanding and experience in occupational therapy. Detailed program requirements and selection process information may be obtained by calling 206-598-5764, or by consulting the program's website at [rehab.washington.edu/education/degree/ot/](http://rehab.washington.edu/education/degree/ot/), or by sending an e-mail to [ot@uw.edu](mailto:ot@uw.edu).

### Degree Requirements

**Courses:** The following courses must be completed satisfactorily in the scheduled sequence, beginning autumn quarter only, at the UW: REHAB 400, REHAB 401, REHAB 403, REHAB 414, REHAB 442, REHAB 444, REHAB 445, REHAB 448, REHAB 451, REHAB 452, REHAB 566, REHAB 570, REHAB 571, REHAB 572, REHAB 574, REHAB 575, REHAB 576, REHAB 577, REHAB 578, REHAB 579, REHAB 580, REHAB 581, REHAB 582, REHAB 584, REHAB 585, REHAB 591, REHAB 594, and CONJ 480.

**Student Evaluation:** The University grade-point system is used in student evaluation. A student must maintain a cumulative GPA of 3.0 in all required professional coursework to retain satisfactory standing and to graduate. Detailed scholastic requirements are available on the program's website at [rehab.washington.edu/education/degree/ot/](http://rehab.washington.edu/education/degree/ot/).

**Continuation Policy:** If at any point the OT curriculum cumulative GPA falls below 3.00, the student is placed on academic probation and must raise it to 3.00 by the end

of two subsequent quarters. If a student is unable to remove his or her probation status, he or she is subject to dismissal from the program. If a student receives a grade below 2.7 in a required course, continuation in the program is reviewed and determined by the Occupational Therapy Advisory and Evaluation Committee.

**Fieldwork Placement:** The student must satisfactorily complete all academic coursework before taking the two required Level II Fieldwork placements (REHAB 594). Both fieldwork placements must be satisfactorily completed within 24 months following completion of the academic portion of the program in order to graduate.

For more information on the Master of Occupational Therapy program, visit the department's website at [rehab.washington.edu/education/degree/ot/](http://rehab.washington.edu/education/degree/ot/).

## Physical Therapy

### Head

Mark Guthrie

Physical therapy is a direct form of professional patient care that can be applied in most disciplines of medicine. The principal objective in physical therapy is to restore or improve motor function in individuals with musculoskeletal or neuromuscular problems.

Management of problems related to motor function is only part of the work of physical therapy. Equally important is rebuilding self-confidence and creating a desire to return to a normal, active life. Other primary objectives of physical therapy are prevention of disability and pain, and training in mobility skills for those who must adapt to permanent disability.

As a consequence of the scope of the profession, physical therapists function in a variety of settings, the most familiar being the hospital. Physical therapists also plan, provide, evaluate, and direct patient care in outpatient clinics, rehabilitation centers, health maintenance organizations, developmental centers, home-health agencies, schools, extended-care facilities, voluntary health programs, industry, and private practices. The physical therapist may be found anywhere quality health care is needed. Increasingly, physical therapists are becoming involved in basic and clinical research, such as the academic community, either as full-time faculty members or as supervisors of clinical education, and as consultants in local, state, and federal health-planning activities.

Physical therapists function in compliance with the licensing laws and ethical principles that govern the practice of physical therapy. The steps to licensure as a physical therapist vary slightly from state to state, but all physical therapists graduate from an accredited curriculum of physical therapy that includes a specific period of clinical training. As physical therapy relates to the majority of medical specialties, the education program is broad in scope, including an emphasis on physical and social sciences. The physical therapist evaluates the patient's problem by testing such factors as range of joint motion, muscle strength, posture and gait, pulmonary function, sensory perception, orthotic and prosthetic fit, reflexes and muscle tone, and functional skills. Intervention procedures used may include ultrasound, superficial heat and cold, electrical stimulation, massage, traction, joint mobilization, biofeedback, therapeutic exercise, and assisted ambulation training.

As with all professionals in health fields, physical therapists are responsible for subscribing to a program of continuing education. Some therapists also develop the knowledge and skills of a specialist via continuing education and concentrated practice in one area, such as sports or pediatric therapy. A formal mechanism for certifying specialists is implemented by the national professional association, the American Physical Therapy Association.

The University of Washington program in physical therapy is accredited by the American Physical Therapy Association.

Commission on Accreditation in Physical Therapy Education.

## Doctor of Physical Therapy

### Admission Requirements

- Enrollment is limited to 40 students each year and admission is competitive.
  - Application is restricted to those who are U.S. citizens or U.S. permanent residents by the autumn program entrance date.
  - Applicants are required to submit scores from the General Test portion of the Graduate Record Examinations (GRE).
  - Prior to the application deadline of December 15, the student must have met the following academic requirements:
    - Minimum 3.00 GPA on all college-level courses
    - Minimum 3.00 GPA on PT prerequisite courses
    - Minimum 2.0 (C) grade on each PT prerequisite course
    - Half (50%) of PT prerequisite courses completed. For a list of PT prerequisite course descriptions, see the program website at [depts.washington.edu/rehab/pt/eligibility.asp](http://depts.washington.edu/rehab/pt/eligibility.asp)
  - Minimum requirements above must be maintained until program entrance and all prerequisite courses must be finished at that time. Applicants must complete a bachelor's degree before they start the program.
  - Most clinical internship placement sites require potential trainees to undergo a criminal history background check for crimes against vulnerable populations. To ensure that all students offered positions in the PT program have no such history and therefore will be able to finish the clinical portion of the curriculum, the completion of a criminal background check process is required of applicants accepting admission.
- ### Degree Requirements
- 154 credits, as follows:
- **Year One**
    - *Autumn Quarter:* REHAB 403 (2), REHAB 444 (4), REHAB 451 (1), REHAB 504 (2), REHAB 509 (1), REHAB 517 (2), REHAB 521 (3)
    - *Winter Quarter:* CONJ 480 (5), REHAB 400 (4), REHAB 445 (4), REHAB 452 (1), REHAB 506 (2), REHAB 517 (2), REHAB 521 (3)
    - *Spring Quarter:* REHAB 401 (4), REHAB 442 (4), REHAB 448 (1), REHAB 507 (3), REHAB 517 (2), REHAB 521 (3), REHAB 536 (1)
    - *Summer Quarter:* REHAB 500 (4), REHAB 508 (4), REHAB 517 (2), REHAB 537 (2), REHAB 538 (2), REHAB 540 (2)
  - **Year Two**
    - *Autumn Quarter:* REHAB 414 (2), REHAB 511 (5), REHAB 523 (4), REHAB 547 (3), REHAB 566 (1)
    - *Winter Quarter:* REHAB 502 (4), REHAB 512 (4), REHAB 527 (3), REHAB 529 (2)
    - *Spring Quarter:* REHAB 476 (2), REHAB 502 (4), REHAB 503 (3), REHAB 513 (2), REHAB 566 (1)
    - *Summer Quarter:* REHAB 416 (2), REHAB 505 (2), REHAB 514 (3), REHAB 566 (3), REHAB 591 (3)
  - **Year Three**
    - *Autumn Quarter:* REHAB 591 (1), REHAB 595 (10)
    - *Winter Quarter:* REHAB 591 (1), REHAB 595 (10)
    - *Spring Quarter:* REHAB 591 (2), REHAB 595 (10)

## Prosthetics and Orthotics

### Director

Ann Yamane

The prosthetist-orthotist is a member of the rehabilitation health care team, which also includes physicians, surgeons, physical and occupational therapists, psychologists, vocational rehabilitation counselors, and other appropriate specialists. Team members work together with physically challenged individuals to enhance their daily life and increase their functional abilities.

The two groups of prosthetic-orthotic devices which can potentially enter into the rehabilitation of an individual are (1) prosthetic devices, which replace or substitute for a missing limb or part of a limb, and (2) orthotic devices, which help with the control of motion and the support of a weakened body segment. Practitioners provide direct patient care and management. Practitioners work in conjunction with physicians, surgeons, and therapists to evaluate the prosthetic or orthotic needs of the patient. They design the appropriate device, supervise technicians who fabricate them, and evaluate the fit and functional use for each patient. To evaluate function, the prosthetist-orthotist must have a detailed knowledge of anatomy and kinesiology, joint range of motion, muscle strength and human locomotion.

Before designing a prosthesis or orthosis, the prosthetist-orthotist examines a patient to find any conditions that might affect the future success of the orthosis or prosthesis. Following the evaluation, the prosthetist-orthotist obtains an impression of the affected segment along with the appropriate measurements. A technician fabricates the prosthesis or orthosis, and the prosthetist-orthotist fits the patient and makes changes as necessary.

[pando96@uw.edu](mailto:pando96@uw.edu)

The prosthetics and orthotics division offers the following program of study:

- The Bachelor of Science degree with a major in prosthetics and orthotics

## Bachelor of Science

**Suggested First- and Second-Year Courses:** Courses fulfilling the general education requirements including proficiency and areas of knowledge (20 credits of VLPA, 20 credits of I & S) should be completed during the first two years prior to entry into the program. Prerequisite coursework (general biology, general physics, human anatomy and physiology, general chemistry, psychology) is also completed during this time. Suggested courses include: SOC 110, COM 201, COM 220, PSYCH 203, PSYCH 306, and courses using computer applications.

### Department Admission Requirements

- Minimum 2.70 cumulative GPA
- Prior to admission, students must complete the following prerequisites with a minimum combined GPA of 2.70: BIOL 161 - BIOL 162 or MICROM 301, MICROM 302, PHYS 114, PHYS 117, PHYS 115, PHYS 118, PSYCH 101, CHEM 120, BSTR 301, BIOL 118, STAT 220.
- Completion of the University writing and reasoning requirements (5 credits of English composition and 5 credits of quantitative and symbolic reasoning with a minimum grade of 2.0; two additional writing courses totaling a minimum of 10 credits with a minimum grade of 0.7; and the College of Arts and Sciences Areas of Knowledge requirements (20 credits in Visual, Literary & Performing Arts, 20 credits in Individuals & Societies, and 20 credits in the Natural World). Courses listed above may apply to Areas of Knowledge requirements.

Postbaccalaureate (fifth-year) students are exempt from the writing and reasoning requirements but not from the Areas of Knowledge requirements.

- Admission to the program is competitive based on scholastic achievement, written skills, references, and involvement in activities or work related to the health professions.
- Departmental Application Deadline: January 15 for entry autumn quarter.

### Major Requirements

90 credits as follows:

- **Courses:** The following courses must be taken in the scheduled sequence beginning autumn quarter only at the University of Washington: REHAB 340, REHAB 341, REHAB 342, REHAB 343, REHAB 400, REHAB 401, REHAB 402, REHAB 403, REHAB 414, REHAB 420, REHAB 421, REHAB 423, REHAB 424, REHAB 427, REHAB 428, REHAB 430, REHAB 442, REHAB 444, REHAB 445, REHAB 451, REHAB 452, REHAB 448, REHAB 499, REHAB 504, REHAB 506, REHAB 509; CONJ 480.
- **Grade Requirements:** A student must maintain a minimum cumulative program GPA of 2.50, and "credit" grades in all courses that are graded credit/no credit, to maintain good standing in the program and be eligible for graduation. A 2.0 minimum grade is required in each course. A grade below 2.0 in a required course must be repeated at the next offering with a minimum grade of 2.0 received in the repeated course.
- **Continuation Policy:** If at any point the cumulative GPA in the curriculum courses falls below 2.50, the student is placed on academic probation. In order to be removed from probation, the student must achieve a cumulative GPA of 2.50 by the end of two consecutive quarters, or within a time frame designated by the Advisory and Evaluation Committee. If a student is unable to remove his or her probation status, he or she is subject to dismissal from the program.

## Student Outcomes and Opportunities

- **Learning Objectives and Expected Outcomes:** The prosthetics-orthotics degree is recognized as a broad, undifferentiated degree requiring the acquisition of general knowledge and basic skills in applicable domains of medicine. The educational process of a prosthetist-orthotist includes the assimilation of knowledge, acquisition of technical skills, and development of judgment through patient care experiences in preparation for independent analysis and problem solving required in clinical practice. Prosthetists and orthotists are employed in private practices and hospitals. There are also a limited number of opportunities in research positions throughout the country. Upon successful completion of the prosthetics and orthotics program, the student has learned the skills necessary to function as an entry-level resident in prosthetics-orthotics, and is awarded a Bachelor of Science degree by the University of Washington School of Medicine. The practitioner program is accredited through the Commission on Accreditation of Allied Health Education Programs (CAAHEP), 1361 Park Street, Clearwater FL 33756, 727-210-2350 (phone), 727-210-2354 (fax), [www.caahep.org](http://www.caahep.org). The degree in prosthetics-orthotics gives the student eligibility to enter a one-year clinical residency for each discipline at a National Commission on Orthotics and Prosthetics Education (NCOPE) approved site. This residency requirement must be completed for eligibility to apply for the National Certification Boards administered by the American Board for Certification in Orthotics and Prosthetics, Inc. (ABCOP).

National Commission on Orthotic and Prosthetic Education

phone: 703-836-7114  
fax: 703-836-0838  
[www.abcop.com](http://www.abcop.com)

- **Instructional and Research Facilities:** Much of the didactic and patient clinical instruction occurs in the ninth-floor classroom areas in the "BB" wing of the Health Sciences Building. A student fabrication laboratory on the eighth floor of the Health Sciences Building accommodates the technical laboratory components of the curriculum. Students are placed throughout the curriculum in eighteen facilities in the surrounding Seattle area for their required 500 hours of clinical experience.
- **Honors Options Available:** For Interdisciplinary Honors, see University Honors Program.
- **Research, Internships, and Service Learning:** None available.
- **Department Scholarships:** None offered.
- **Student Organizations/Associations:** Prosthetics-Orthotics Student Association

## POST-PROFESSIONAL PROGRAMS

### Master of Science in Rehabilitation Science

Designed for rehabilitation practitioners who wish to pursue coursework and research to enhance their professional growth. For selected students lacking appropriate post-professional training, it is the degree that precedes the PhD in Rehabilitation Science

### Doctor of Philosophy in Rehabilitation Science

#### Director

Deborah Kartin

Rehabilitation science is an interdisciplinary field that focuses on human function and disability. Basic and applied research from health sciences, social sciences, engineering, and related fields is directed toward (1) enhancing physical and psychosocial functioning, participation in life situations, and quality of life of people with disabilities; and (2) informing relevant social and health care policy.

The program targets students from diverse backgrounds in rehabilitation-related fields including occupational therapy, physical therapy, speech and language pathology, rehabilitation counseling, medicine, nursing, prosthetics and orthotics, and engineering.

The goal of the PhD program in rehabilitation science is to prepare researchers, educators, and leaders in the area of rehabilitation science to contribute to the development of rehabilitation practice, research, and policy. Graduates of the PhD program are prepared as researchers, educators, and leaders in the field of rehabilitation science, who may work in academic institutions, service delivery systems (e.g., hospitals, public schools), government agencies, and the private sector. These individuals are prepared to address research, education, service delivery, and policy issues from an interdisciplinary perspective. Following are three overarching outcomes for graduates of this program.

- Demonstrate advanced knowledge and productivity in rehabilitation science specific to research, education, service delivery, and/or policy.

- Demonstrate leadership in interdisciplinary collaboration for the purpose of optimizing research, education, service delivery, and/or policy.
- Generate and extend knowledge that is innovative and rigorously tested within a focused area of rehabilitation science.

### Admission Requirements

- Baccalaureate degree from a college or university of recognized rank.
- Official Graduate Record Examination (GRE) General Test Scores.
- Copy of current professional certification/licensure to practice (as appropriate).
- Recent sample of scholarly writing. This may include a published or unpublished manuscript such as in-depth literature review in a focused area; a research report; or a concept analysis.
- Letters of recommendation from three persons knowledgeable about the individual's potential for doctoral-level work in rehabilitation science.
- Letter of application in response to specific questions listed on the application related to the pursuit of doctoral studies.
- Resume/CV.

### Degree Requirements

100 credits minimum, as follows:

Courses: Core course series (21 credits), coursework and practicum experiences in teaching (minimum of 5 credits), and coursework in research methods (minimum of 18 credits). Relative to the latter, credit requirements may be partially met through independent study. In addition, each student must complete three cognates (minimum of 6 credits each) specific to the student's goals. The student's committee and the core faculty in the rehabilitation science doctoral program must approve the entire course of study. General requirements: In addition to meeting all requirements of the UW Graduate School, all students are expected to meet the following general requirements.

- Minimum 3.00 cumulative and quarterly GPA.
- 100 credits minimum, of which 30 are dissertation credits.
- Completion of at least one teaching practicum (3-credit minimum).
- Satisfactory completion of a Research and Scientific Inquiry Day manuscript and presentation.
- Satisfactory completion of general examinations.
- Dissertation.
- Final examination.

For more information on the PhD program in Rehabilitation Science, visit the program's website at [rehab.washington.edu/education/degree/rehabsci/](http://rehab.washington.edu/education/degree/rehabsci/).

## COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at [www.uw.edu/students/crsctat/](http://www.uw.edu/students/crsctat/).

**REHAB 300 Introduction to Occupational Therapy (1)** *Rollinger* Introduction to occupational therapy profession. Provides historical perspectives, theoretical foundations, and clinical case studies in various practice arenas. Credit/no credit only. Offered: ASp.

**REHAB 340 Spinal Orthotics (5)** *Yamane* Instruction and review of anatomy and biomechanics of the spine, patient evaluation, and prescription considerations as related to spinal orthotics. Lectures provide background knowledge of orthotic treatment principles for spinal pathologies. Laboratory experience includes patient evaluation, impression and measurement techniques, fabrication methods, and fitting criteria. Required for prosthetics and orthotics majors.

tory experience includes patient evaluation, impression and measurement techniques, fabrication methods, and fitting criteria. Required for prosthetics and orthotics majors.

**REHAB 341 Upper Extremity Prosthetics I (4)** *Okumura* Principles of upper extremity prosthetic management and prescription considerations: functional evaluation, preprosthetic care, use of prosthetic components and materials, fabrication, harnessing, prosthetic training, documentation, and billing. Incorporates anatomy, biomechanics, and pathomechanics with clinical experience as they pertain to upper extremity prosthetics. Required for prosthetics and orthotics majors.

**REHAB 342 Upper Extremity Prosthetics II (4)** *Okumura* Principles of upper extremity prosthetic management and prescription considerations: functional evaluation, preprosthetic care, use of prosthetic components and materials, fabrication, harnessing, prosthetic training, documentation, and billing. Incorporates anatomy, biomechanics, and pathomechanics as they pertain to upper extremity prosthetics. Required for prosthetics and orthotics majors. Prerequisite: REHAB 341.

**REHAB 343 Upper Extremity Orthotics (2-4, max. 4)** *Yamane* Lecture and laboratory instruction in patient evaluation, prescription considerations, componentry, and fabrication procedures for upper extremity orthoses. Required for prosthetics and orthotics majors.

**REHAB 400 Medical Science (4)** Lectures in fields related to: general surgery, obstetrics and gynecology, internal medicine, neurology, rehabilitation medicine, orthopaedics, psychiatry and behavioral sciences, rheumatology, and pediatrics. Required for occupational therapy, prosthetics and orthotics, and physical therapy students. Credit/no credit only.

**REHAB 401 Medical Science (4)** Lectures in fields related to: general surgery, obstetrics and gynecology, internal medicine, neurology, rehabilitation medicine, orthopaedics, psychiatry and behavioral sciences, rheumatology, and pediatrics. Required for occupational therapy, prosthetics and orthotics, and physical therapy students. Credit/no credit only.

**REHAB 402 Medical Science Laboratory (1, max. 2)** To introduce students to the role of allied health professionals in the treatment of pathologies presented in 400, 401 lectures. Credit/no credit only.

**REHAB 403 Physiological Principles for Rehabilitation Professionals (2)** *Slimp* Normal and pathological physiology of the cardiovascular, respiratory, and musculoskeletal systems as a basis for evaluation and intervention in occupational therapy, physical therapy, and prosthetics/orthotics. Required for majors.

**REHAB 413 Special Studies in Physical Therapy (1-15, max. 24)** Theory and practice in specialized areas of physical therapy. Credit/no credit only.

**REHAB 414 Psychological Aspects of Rehabilitation (2)** *I&S Patterson* Psychological processes underlying adjustment to disability; application of behavioral/analysis systems in patient therapy management; effects of cognitive or personality deficits on patient performance and treatment strategies. Credit/no credit only.

**REHAB 416 Principles of Physical Therapy Administration (2, max. 4)** *Guthrie* The nature of administration, economic trends, operational policy, aspects of supervision, ethical and legal influences applicable to a physical therapy department. Required for physical therapy students. Credit/no credit only.

**REHAB 420 Lower Extremity Prosthetics I (8)** *Abrahamson* Instruction in patient evaluation, casting, cast modification, socket fabrication, static and dynamic alignment, alignment duplication, suspension systems, and documentation for transtibial amputation. Required for prosthetics and orthotics majors; others by permission of instructor.

**REHAB 421 Lower Extremity Prosthetics II (11)** *Abrahamson* Instruction in transfemoral patient evaluation, casting, cast modification, socket fabrication, static and dynamic alignment, alignment duplication, suspension systems, and documentation for transfemoral amputation. Required for prosthetics and orthotics majors; others by permission of instructor.

ment, alignment duplication, suspension systems, and documentation. Methods of fitting through knee and hip disarticulation levels demonstrated. Required for prosthetics and orthotics majors; others by permission of instructor.

**REHAB 423 Lower Extremity Orthotics I (6)** *Yamane* Patient evaluation and prescription considerations for orthotic management of the lower extremity. Lectures provide instruction in the biomechanics of the lower extremity during ambulation, clinical indications and fitting criteria for a variety of orthotic devices. Laboratory sessions provide experience in fabrication principles, and impression and measurement techniques. Required for prosthetics and orthotics majors.

**REHAB 424 Lower Extremity Orthotics II (8)** *Yamane* Orthotic treatment of pathological conditions that affect the knee and hip addressed. Focus is placed on development of prescription recommendation, fabrication, fitting, and follow-up of orthoses that support, assist, or stabilize the knee and hip. Required for prosthetics and orthotics majors; others by permission of instructor.

**REHAB 427 Applied Prosthetics and Orthotics I (1-, max. 4)** *Hafner* Presentation and discussion of current clinical practice using research and journal articles and case presentations. Required for prosthetics and orthotics majors; others by permission of instructor. Credit/no credit only.

**REHAB 428 Applied Prosthetics and Orthotics II (1-4, max. 13)** Experience in patient management under the preceptorship of certified practitioners at clinical affiliation sites. Required for prosthetics and orthotics majors.

**REHAB 430 Engineering Concepts (2)** *Okumura* Principles of mechanics and strength of materials, force analysis, and hydraulic control in relationship to orthotics and prosthetics design. Required for prosthetics and orthotics majors.

**REHAB 442 Applied Kinesiology (4)** *Guthrie* Study of joint motion and muscle function in relation to both the normal and abnormal state, emphasizing gait. Specific techniques employed in the field of rehabilitation medicine are analyzed. Required for Department of Rehabilitation Medicine students; others by permission.

**REHAB 444 Functional Musculoskeletal Anatomy (4-)** *Guthrie* Functions of musculoskeletal system as applied to patterns of motion. Anatomy of peripheral-vascular and peripheral-nervous system. Required for occupational therapy students, prosthetics and orthotics students, and physical therapy students; others by permission of instructor.

**REHAB 445 Functional Musculoskeletal Anatomy (4)** *Guthrie* Functions of musculoskeletal system as applied to patterns of motion. Anatomy of peripheral-vascular and peripheral-nervous system. Required for occupational therapy students, prosthetics and orthotics students, and physical therapy students; others by permission of instructor.

**REHAB 448 Applied Kinesiology Laboratory (1)** *Guthrie, Okumura, Powell, Robinson, Rollinger* Instruction and laboratory focus on practical experience and clinical problem solving in kinesiology. Potential topics include muscle and joint motion testing, sensory/perceptual assessment, prosthetic and orthotic devices, wheelchair use, gait training.

**REHAB 451 Functional Anatomy Laboratory (1)** *Bennett, Rollinger* Study of musculoskeletal, peripheral-vascular, and peripheral-nervous systems from prosected material. Required for physical therapy, occupational therapy, and prosthetic/orthotic students.

**REHAB 452 Functional Anatomy Laboratory (1)** *Bennett, Rollinger* Study of musculoskeletal, peripheral-vascular, and peripheral-nervous systems from prosected material. Required for physical therapy, occupational therapy, and prosthetic/orthotic students.

**REHAB 476 Prosthetic and Orthotic Evaluation and Use (2)** *Okumura* Instruction in mechanical component substitution for functional losses. Emphasis is on biomechanical principles, prosthetic-orthotic components, and alignment and fitting techniques. Credit/no credit only. Required for physical therapy students.

**REHAB 496 Special Topics in Rehabilitation (1-9, max. 14)** Guided opportunity for in-depth study in specific areas of rehabilitation. Topics vary.

**REHAB 498 Undergraduate Thesis (\*)**

**REHAB 499 Undergraduate Research (\*)** Opportunity to design, perform, and analyze research investigation in problem areas in rehabilitation medicine. These include clinical and basic research problems in, for example, head and spinal injury, chronic disease, pain neurophysiology, electrodiagnosis, communication, and bioengineering.

**REHAB 500 Clinical Clerkship in Physical Therapy (4)** *Robinson* Observation, instruction, and supervised practice in treatment of patients in diverse clinical settings. Emphasis is given to the application of previously learned material and skills to specific clinical problems. Required for physical therapy students. Credit/no credit only.

**REHAB 502 Pediatric Physical Therapy (4- max. 8)** *McCoy* Provides foundational knowledge in development and an overview of pediatric physical therapy practice for children with atypical development. Presents examination, evaluation, and development of physical therapy plans of care for children with various disabilities within the frameworks of family-centered care and disablement models.

**REHAB 503 Lifespan III: Geriatric Physical Therapy (3)** *Matsuda* Theory and principles of exercise procedures used when treating the geriatric patient. Includes a discussion of age related changes in the systems essential to movement control; factors contributing to physical disability and frailty with aging; adaptation of assessment and treatment procedures to the geriatric patient. Lectures and laboratories.

**REHAB 504 Physical Therapy Procedures I: Assessment (2)** *Maitland* Development of clinical competence in patient assessment techniques from a neuromusculoskeletal perspective. Special emphasis on upper quadrant anatomy, posture evaluation and medical record documentation.

**REHAB 505 Introduction to Pharmacology (2)** *Guthrie* Pharmacological survey of drugs commonly prescribed for clients seen in a physical therapy practice setting. Presentations on basic principles. Additional data search and group reports. Overview of medical emergencies. Credit/no credit only.

**REHAB 506 Physical Therapy Procedures II: Assessment (2)** Development of clinical competence in patient assessment techniques from a neuromusculoskeletal perspective. Discussion of normal and pathological findings. Special emphasis on lower quadrant anatomy, posture evaluation, and medical record documentation skills. Lecture and laboratory format.

**REHAB 507 Physical Therapy Procedures III: Modalities (3-4)** Principles and practice of physical therapy clinical treatment procedures utilizing therapeutic modalities. Lecture and laboratory format.

**REHAB 508 Principles of Therapeutic Exercise (4)** *McQuade* Theory, principles and practice of exercise procedures used for treatment purposes in physical therapy, including motor learning, variables of motor performance, and exercise prescription. Lectures and laboratories. Simulated patient problems.

**REHAB 509 Physical Therapy Procedures: Functional Skills Assessment (1)** *Robinson* Development of clinical competence in assessment and training of basic patient functional skills, including handling techniques, transfers and assisted ambulation.

**REHAB 510 Rehabilitation Psychology (2)** *Pepping* Processes and management methods for assimilation of disability, enhancing patient participation in rehabilitation process, and for helping in maintenance of performance; behavioral management and case conference strategies; rehearsal of contingency management techniques. Required for residents; others by permission of instructor.

**REHAB 511 Musculoskeletal IV: Clinical Management (5)** Physical therapy clinical evaluation and management of patients with musculoskeletal dysfunction. Special emphasis on upper quadrant anatomy. Lecture and laboratory format.

**REHAB 512 Musculoskeletal V: Clinical Management (4)** *Maitland* Physical therapy clinical evaluation and management of patients with musculoskeletal dysfunction. Special emphasis on lower quadrant anatomy. Lecture and laboratory format.

**REHAB 513 Special Studies in Physical Therapy (1-5, max. 15)** Theory and practice in specialized areas of physical therapy. Includes organization and administration of specialized programs, advanced evaluation and treatment techniques, role of the consultant. Credit/no credit only.

**REHAB 514 Systems Review for Physical Therapists (3)** *Maitland* Development of advanced physical assessment skills to provide students with the ability to determine if a patient's disorder is within the scope of practice for physical therapy or requires referral to another healthcare provider. Lectures and laboratory format, with an emphasis on the lab component. Credit/no credit only.

**REHAB 516 Medical Information for Rehabilitation Counselors (3)** *Johnson* Lectures in medical science field regarding the etiology, prognosis, and physical restoration of common disabling conditions. Case studies are used extensively, and major emphasis is placed on vocational implications of physical disability. Prerequisite: permission of instructor.

**REHAB 517 Physical Therapy Seminar (2-3, max. 21)** *Kartin* Group seminar format focused on physical therapy topics pertaining to transcurricular and professional practice issues. Credit/no credit only.

**REHAB 519 P-Preceptorship in Rehab Medicine (1)** *Hays* Explores the field of physical medicine and rehabilitation. Students observe a physiatrist one half day each week, and gain understanding of the management of acute injuries, chronic disease, and disabilities. Offered: AWSpS.

**REHAB 520 Seminar (1-5, max. 12)** Conferences, seminars, discussions of advanced physical medicine and rehabilitation topics for graduate students, residents and postdoctoral fellows in rehabilitation medicine. Lectures, discussion, and laboratory work in selected aspects appropriate to elected area of study for applicants for master-level degree.

**REHAB 522 Neurophysiological Topics in Rehabilitation Medicine (2)** *Anderson* Review of traditional neurophysiological concepts and an exposition of recent advances in neurophysiological research related to the practice of rehabilitation medicine. Prerequisite: resident standing in rehabilitation medicine or permission of instructor.

**REHAB 523 Neuroscience III: Applied Neurology (4)** *Kelly* Theory and principles of advanced exercise procedures used when treating patients with neurologic pathology. Includes the application of principles of motor learning and control; facilitation and inhibition of variables affecting functional motor performance; adaptation of assessment and treatment procedures to patients with different types of neurologic impairments. Lectures and laboratories.

**REHAB 527 Neuroscience IV: Special Topics in Neurologic Rehabilitation (3)** *Kelly* Critical analysis and application of physical therapy assessment and treatment techniques to problems related to specific adult neurological disorders. Neurological disorders to be covered include stroke, spinal cord injury, traumatic brain injury, and multiple sclerosis.

**REHAB 528 International Clinical Clerkship (2)** *Robinson* Short-term clinical education experience outside the United States. Participants work in a mentored relationship as part of a multi-disciplinary rehabilitation team providing direct clinical services and consultation to patients and their caregivers. Sponsored sites selected and screened by Clinical Coordinator. Students may choose area of clinical focus. Credit/no credit only.

**REHAB 529 Professional and Practice Issues in Physical Therapy (2)** *Guthrie* Augments the student's understanding of the profession and current issues in healthcare. Includes healthcare delivery, scope of practice, professional organization, political activism, specialist certification, licensure, collaboration, therapeutic relationships, disclosure, privacy, and informed consent. Credit/no credit only.

**REHAB 530 Medical Aspects of Vocational Counseling (2-3)** *Johnson* Introduction to vocational implications of physical and emotional disabilities. Methods, counseling techniques, therapeutic modalities, community resources used in producing vocational assistance for persons with disabilities. Prerequisite: resident standing in rehabilitation medicine or permission of instructor.

**REHAB 532 Clinical Affiliation for Rehabilitation Counselors (5-6)** *Johnson* Under preceptorship of rehabilitation counseling staff, students counsel and evaluate patients with severe physical, emotional, or social problems; administer vocational testing; obtain placement on job stations; work with community resources for vocational/educational placement; and develop activity-oriented schedules. Prerequisite: permission of instructor.

**REHAB 536 Patient Evaluation and Clinical Decision Making (1-2, max 8)** General principles and practice of physical therapy patient evaluation and use of the clinical decision-making models. The application of patient management principles through examination techniques and documentation strategies. Lecture and laboratory format.

**REHAB 537 Functional Mobility Skills (2)** *Matsuda* Principles and practice of physical therapy interventions related to functional mobility skills, including transfer training, wheelchair fitting, wheelchair mobility, gait training, and caregiver training. Lecture and laboratory format.

**REHAB 538 Integumentary, Edema Management, and Circulatory Screening for PT (2)** *Robinson* Principles and practice of physical therapy evaluation and interventions related to wound care, burn care, edema management, circulatory screening, and splinting applications. Lecture and laboratory format.

**REHAB 539 Communication Disorders in Rehabilitation Medicine (1)** *Yorkston* Overview of communication disorders secondary to central and peripheral nervous system impairment. Emphasis on facilitating identification of speech/language disorders with discussion of implications for rehabilitation.

**REHAB 540 Acute Care Practice in Physical Therapy (2)** *Robinson* Principles and practice of physical therapy evaluation and interventions related to individuals with diagnoses in the recent onset (or acute) stage of development.

**REHAB 544 Functional Anatomy for Physiatrists (2-)** *Goldstein* Lectures and demonstrations to illustrate functional anatomy as applied by physicians in the practice of clinical rehabilitation. Intended to enhance functional assessments and to improve neuro/musculo/skeletal diagnosis and treatment through greater understanding of the underlying anatomy. Prerequisite: resident standing in rehabilitation medicine; others by permission of instructor.

**REHAB 545 Functional Anatomy for Physiatrists (2)** *Goldstein* Lectures and demonstrations to illustrate functional anatomy as applied by physicians in the practice of clinical rehabilitation. Intended to enhance functional assessments and to improve neuro/musculo/skeletal diagnosis and treatment through greater understanding of the underlying anatomy. Prerequisite: resident standing in rehabilitation medicine; others by permission of instructor.

**REHAB 546 Teaching Practicum in Rehabilitation (1-3, max. 15)** Integration of knowledge and skills in teaching through teaching in the classroom or presentation of a mini-course, workshop, or in-service training series. Prerequisite: MEBI 520 and permission of instructor.

**REHAB 547 Biomechanics Basis of Exercise (3)** *McQuade* Provides an in-depth exploration of the neuromechanical basis of exercise. Focuses on the applications of biomechanical principles to exercise, including: exercise equipment analysis; neuromuscular basis of strength, power and flexibility; and joint kinematics and stability. Prerequisite: knowledge of basic kinesiology and biomechanics or permission of instructor.

**REHAB 550 Neuropsychology in Rehabilitation (2)** *Bombardier, Ehde* Examination and management of patients with brain lesions, as well as an understanding of the conse-

quences of such conditions. Prerequisite: graduate standing in rehabilitation medicine.

**REHAB 555 P-Neuromuscular Electrodiagnosis (2.5) Kraft** Demonstration of fundamentals of electromyography and peripheral nerve stimulation followed by participation in clinical electrodiagnosis examinations. Develops awareness of knowing when such procedures are indicated for patients and interpreting results rather than developing proficiency in performing these examinations. Prerequisite: HUBIO 560 and permission of instructor.

**REHAB 556 Foundations of Rehabilitation Science (3) Johnson, Yorkston** Overview of rehabilitation science and social constructs of disability emphasizing bio-psycho-social-environmental models of the enabling-disabling process across the lifespan. Lays the philosophical and theoretical foundations for the study of rehabilitation as a science and is designed to promote interdisciplinary thinking. Prerequisite: graduate student, instructor permission.

**REHAB 557 Evidence-Based Rehabilitation (3) Kartin, Yorkston** Addresses frameworks for evaluation the evidence in rehabilitation science; asking answerable questions, using advanced search strategies; critically appraising literature; understanding the systematic review process; conducting and interpreting meta-analyses; developing evidence-based practice guidelines; communicating the evidence to stakeholders; and translating evidence into rehabilitation practice. Prerequisite: permission of instructor. Offered: S.

**REHAB 558 Qualitative and Quantitative Research in Rehabilitation (3) Ciol, Dudgeon** Provides an orientation and critical analysis of current practices in disability and rehabilitation research by appraising methodologies and strategies used to investigate consequences of human function, activity performance, and social participation. Topics include introduction to qualitative and quantitative methodologies with respect to rehabilitation research. Prerequisite: Instructor permission. Offered: W.

**REHAB 560 Defining and Measuring Outcomes in Rehabilitation Research (3) Amtmann** Introduces the importance, methods, and challenges of outcomes research in rehabilitation. Addresses definitions and importance of outcomes research; behaviors measurement, functional abilities, quality of life, and consumer satisfaction; outcomes measurement for diverse populations across lifespan; research outcomes design; and challenges specific to outcomes research. Prerequisite: permission of instructor. Offered: A.

**REHAB 561 Epidemiological and Health Services Approaches to Rehabilitation Research (3) Bamer, Hoffman, Johnson** Introduces the application of principles and methods from the fields of epidemiology and health services to rehabilitation research. Provides an overview of epidemiological research methods applicable to rehabilitation research, health services approaches, ethics, and use of research to inform disability policy. Prerequisite: permission of instructor. Offered: A.

**REHAB 562 Motor Control: Neural Substrates for Movement and Rehabilitation (3) Ciol, Kelly, Yorkston** Develops knowledge related to neural control of movement; movement dysfunction from neurologic pathology; and methodological approaches to investigating neural control of movement. Includes concepts in motor control; motor learning; and neural plasticity relating to movement dysfunction in people with neurologic pathology and to rehabilitation science. Prerequisite: permission of instructor. Offered: Sp.

**REHAB 566 Special Topics in Rehabilitation (1-9, max. 14)** Philosophy and concepts in the interdisciplinary rehabilitation of persons with major disabilities, including advanced content in the rehabilitation theory and process of selected categories.

**REHAB 567 Practicum in Rehabilitation (1-12, max. 24)** Specialized practicum experience in environment providing rehabilitation services. Practicum arrangements and permission by instructor.

**REHAB 568 Biophysics as Applied to Physical Medicine (2) Esselman** Propagation and absorption characteristics

of physical forms of energy used for treatment in physical medicine. Physiologic effects basic to prescription of the physical therapy modalities. Prerequisite: resident standing in rehabilitation medicine; others by permission of instructor.

**REHAB 570 Foundations of Occupational Therapy (5) Powell** An overview of the practice of occupational therapy, emphasizing the role of occupational performance in context, frames of reference, clinical reasoning, and purposeful activity. Introduces the diversity of occupational therapy practice environments through didactic and clinical experiences. Offered: A.

**REHAB 571 Occupational Performance through the Life Span (4) Stewart** Overview of human development as it relates to occupational performance and functional adaptation in the ages and stages of life from infancy through old-old age. Emphasis will be placed on environmental influences, activity, and occupational roles, tasks, and component behaviors as they relate to individuals in different ages and stages. Offered: W.

**REHAB 572 Occupational Therapy Theory and Practice in Psychosocial Dysfunction I (1-7, max. 7) Enge** An overview of bodies of knowledge in psychosocial practice as related to occupational performance. Learning topics include major frames of reference, effects of psychosocial disorders on occupational performance (life activities), and occupational therapy evaluation and intervention skills. Lectures, reading, class discussions, role-playing, problem-based learning, and fieldwork comprise the learning experiences. Offered: SpS.

**REHAB 573 Occupational Therapy in Community Practice (4) Engel** Bodies of knowledge in occupational performance as they relate to the emerging area of community-based practice. Includes traditional and evidence based practice in the realms of health promotion, prevention, evaluation, and intervention. Lectures, assigned readings, class discussions, role playing, site visits, films, laboratory exercises, and problem-based learning tutorials. Offered: Sp.

**REHAB 574 Occupational Therapy Theory and Practice in Physical Disabilities I (6) Dudgeon** Provides theoretical bases and clinical practice skills used in evaluation and intervention of occupational performance (life activities). Focus is on individuals with sensorimotor (physical) and/or cognitive impairments. Practical applications of theory occur through lecture, laboratory, and problem-based learning approaches. Offered: A.

**REHAB 575 Occupational Therapy Theory and Practice in Physical Disabilities II (5) Powell** Provides theoretical bases and clinical practice skills used in evaluation and intervention of occupational performance (life activities). Focus is on individuals with sensorimotor (physical) and/or cognitive impairments. Practical applications of theory occur through lecture, laboratory, and problem-based learning approaches. Offered: W.

**REHAB 576 Occupational Therapy Theory and Practice in Pediatrics (1-7, max. 7)** Provides knowledge and skills necessary for providing occupational therapy evaluation, intervention, and transition services focused on occupational performance (life activities) for children and teens with disabilities and their families. Offered: W.

**REHAB 577 Occupational Therapy Theory and Practice in Geriatrics (5) Powell** Occupational therapy evaluation and intervention with older adults. Covers psychology, physiology, and socio-demographics of aging. Emphasis on interaction skills with the elderly and occupational performance (life activities). Laboratory experiences and fieldwork in the practice setting enhance didactic coursework. Offered: Sp.

**REHAB 578 Occupational Performance Analysis (3) Kanny** Skills in the analysis, adaptation, and sequencing of therapeutic and functional activities as they apply to occupational performance. Analysis focuses on performance components (sensorimotor, cognitive, psychosocial, psychosocial, psychological), temporal aspects (chronological, developmental), and environmental aspects (physical, social, cultural). Offered: S.

**REHAB 579 Therapeutic Communication (3) Kanny** Introduces basic principles and skills of effective interpersonal communication in dyadic interactions and in groups. Emphasis on effective listening, interviewing, and principles and concepts of occupational therapy groups. Lectures, readings, class discussions, role playing, and in-class exercises comprise the learning experiences. Offered: Sp.

**REHAB 580 Introduction to Research in Rehabilitation (3) Dudgeon** Evaluation of rehabilitation research literature and design of research studies relevant to rehabilitation. Offered: S.

**REHAB 581 Application of Measurement Systems (3) Deitz** Provides basis for critically evaluating and using tests and measurements in occupational therapy evaluation. Focus on reliability, validity, norms, test development process, statistics relevant to tests and measurement, and ethical implications of testing. Critical evaluation of selected standardized test used in occupational therapy. Offered: A.

**REHAB 582 Assistive Technology in Rehabilitation (3) Dudgeon** Overview of the field of assistive technology as it impacts occupational performance in self-care, work, and leisure activities. Covers interface devices, computer applications, environmental controls, augmentative communications, power mobility, seating and positioning systems, and sensory enhancements. Offered: W.

**REHAB 584 Health-Care Trends and Issues (3) Kanny** Overview of the health services system in the United States and current trends and issues facing occupational therapists within this system. Content includes: health service providers, reimbursement of health care services, regulation, personnel and role delineation, and health policy and advocacy. Offered: A.

**REHAB 585 Leadership: Administration and Management (4) Kanny** Provides student with knowledge and skills needed for leadership positions in occupational therapy practice. Focuses on administration and management functions including strategic planning, program planning, marketing, fiscal management, program evaluation, and personnel management. Offered: W.

**REHAB 587 Industrial Rehabilitation (3) Dudgeon** Provides knowledge and skills related to vocational assessment and industrial rehabilitation for individuals with medical or psychosocial problems. Emphasizes worker characteristics, job analysis, and accommodation in business and industrial settings. Clinical simulation components provide applications to specific diagnostic, impairment, or disability conditions. Offered: Sp.

**REHAB 591 Graduate Project (1-4, max. 7)** Graduate project focused on research, administration, education, practice, policy, or other scholarly or creative work. Required of graduate, entry-level occupational therapy and physical therapy students. Offered: AWSpS.

**REHAB 592 Principles of Orthotic Use in Rehabilitation (2) Chang** General principles and clinical applications of orthoses in patient management, with exposure to research issues in orthotic design.

**REHAB 593 Principles of Prosthetic Use in Rehabilitation (1) Czerniecki** General principles of prevention of amputation, prosthetic design, biomechanics, and clinical applications of upper and lower extremity prostheses.

**REHAB 594 Clinical Fieldwork in Occupational Therapy (10, max. 30) Rollinger** 12-week, full-time, fieldwork, delivering occupational therapy services to clients focusing on application of meaningful occupation under direct supervision. Exposure to varied clients across the lifespan and in various setting reflective of current practice. Students must complete a minimum of two 12-week placements. Credit/no credit only. Offered: AWSpS.

**REHAB 595 Clinical Affiliation in Physical Therapy ([2-10], max. 30) Robinson** Clinical practice of physical therapy techniques under supervision in community-based clinics. Credit/no credit only.

**REHAB 596 Electromyography and Clinical Neurophysiology (4) Kraft** Didactic course covering electromyography

and clinical neurophysiology. First part covers basic neurophysiology and second covers electromyography, nerve conduction studies, somatosensory-evoked potentials, residual- and auditory-evoked potentials, single fiber EMG, late response, quantitative analysis, and macro EMG. Prerequisite: resident standing in rehabilitation medicine; others by permission of instructor.

**REHAB 597 Electromyography and Electrodiagnosis Laboratory (1-)** *Kraft* Elective work in clinical electromyography and other electrodiagnostic methods. Prerequisite: resident standing in rehabilitation medicine; others by permission of instructor.

**REHAB 598 Electromyography and Electrodiagnosis Laboratory (1-)** *Kraft* Elective work in clinical electromyography and other electrodiagnostic methods. Prerequisite: resident standing in rehabilitation medicine; others by permission of instructor.

**REHAB 599 Electromyography and Electrodiagnosis Laboratory (1)** *Kraft* Elective work in clinical electromyography and other electrodiagnostic methods. Prerequisite: resident standing in rehabilitation medicine; others by permission of instructor.

**REHAB 600 Independent Study or Research (\*)** Credit/no credit only.

**REHAB 685 P-Chronic Disease and Disability (4)** *Hays* Meets chronic-care requirement for medical students. Structured clinical experience on rehabilitation medicine services. Differences between acute and chronic medicine, identification of disability problems, and therapeutic techniques for removing disability. Hospitals are within University system, local area, and WWAMI area. Prerequisite: third-year medical student standing.

**REHAB 686 P-Rehabilitation Medicine Clerkship—Pediatrics (8/12)** *Hays, Massagli* Meets chronic-care requirement for medical students. Incorporates material of 685 and expands into disabling pediatric disease. School planning, family counseling, community support services included. Four- or six-week package permits inpatient, outpatient, and consultation experience. Recommended for students contemplating pediatrics. Prerequisite: third-year medical student standing.

**REHAB 687 P-Rehabilitation Medicine Clerkship (8/12)** *Hays* Meets chronic-care requirement for medical students. Incorporates material of 685 and expands into disability problems. Four- or six-week package permits inpatient, outpatient, and consultation experience. Recommended for careers in family medicine, internal medicine, rheumatology, cardiology, neurology, geriatrics, orthopedic surgery, neurosurgery, and cardiovascular surgery. Prerequisite: third-year medical student standing.

**REHAB 689 P-Spinal Cord Injury (8/12)** *Steins* Introduction to diagnosis, management, rehabilitation of patients with spinal-cord injuries. Interaction with rehabilitation team, psychiatrists, and subspecialists in urology, neurosurgery, and plastic surgery. Performance at subintern level expected. Veterans Administration Medical Center only. Prerequisite: MED 665, SURG 665.

**REHAB 697 P-Rehabilitation Medicine Special Elective (\*, max. 24)** Equivalent to 686, 687, or 688. Satisfies requirements in rehabilitation medicine/chronic care. Student arranges with another university, using the "Special Assignment Form." Students can qualify after review, similar experience at another university. Prerequisite: permission of instructor.

**REHAB 699 P-WWAMI Rehabilitation Medicine Special Electives (\*, max. 24)** By special arrangement for qualified students, special clerkships or externships may be available at institutions other than the University of Washington located within the WWAMI region. Prerequisite: permission of department.

**REHAB 700 Master's Thesis (\*)** Credit/no credit only.

**REHAB 800 Doctoral Dissertation in (\*)** Offered: AWSpS.

## Surgery

### DEPARTMENT OVERVIEW

BB487 University of Washington Medical Center

The Department of Surgery carries out instruction during all four years of School of Medicine attendance. The third-year six-week clerkship constitutes the core of student exposure to general surgery and is required of all students. The fourth-year emergency-room clerkship is also a required part of the curriculum. The department offers a variety of fourth-year elective clerkships in a number of the specialty aspects of the department's clinical activities, including but not limited to trauma, cardiothoracic surgery, plastic surgery, vascular surgery, transplantation, surgical critical care, pediatric surgery, and the management of burn patients.

### COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at [www.uw.edu/students/crscat/](http://www.uw.edu/students/crscat/)

**SURG 498 Undergraduate Thesis (\*)** Offered to those students who have engaged in undergraduate research in general surgery. (Full- or part-time.)

**SURG 499 Undergraduate Research (\*)** Provides an opportunity to participate in ongoing research projects or carry out an independent research project under supervision of Department of Surgery faculty. Practical experience in experimental design and execution is provided under direct supervision of selected faculty members. (Full- or part-time.)

**SURG 505 P-Preceptorship in Surgery (1)** Opportunity for first- and second-year medical students to gain personal experience with clinical faculty members in the community. Students observe general aspects of private practice, including clinical problems seen; practice limitation; doctor-doctor, doctor-patient, and doctor-nurse relationships in the office and hospital. Prerequisite: permission of department.

**SURG 600 Independent Study or Research (\*)**

**SURG 630 P-WRITE Surgery Clinical Clerkship (\*, max. 24)** Basic clinical clerkship for students enrolled in the WRITE Program. Prerequisite: completion of basic curriculum; third- and fourth-year students; acceptance in the WRITE program.

**SURG 647 P-Rural Surgery Clerkship, Powell (8)** Designed to supplement basics learned in SURG 665. Opportunity to participate in general surgery and various other subspecialties in a smaller city. Recommended for students entering primary care. Prerequisite: Surgery required clerkship and permission of department.

**SURG 648 P-Rural Surgery Clerkship, Libby (8)** Designed to supplement basics learned in SURG 665. Opportunity to participate in general surgery and various other subspecialties in a smaller city. Recommended for students entering primary care. Prerequisite: Surgery required clerkship and permission of department.

**SURG 649 P-Rural Surgery Clerkship, Lewistown (8)** Designed to supplement basics learned in SURG 665. Opportunity to participate in general surgery and various other subspecialties in a smaller city. Recommended for students entering primary care. Prerequisite: Surgery required clerkship and permission of department.

**SURG 650 P-Rural Surgery Clerkship, Twin Falls (8)** Designed to supplement basics learned in SURG 665. Opportunity to participate in general surgery and various other subspecialties in a smaller city. Recommended for students entering primary care. Prerequisite: Surgery required clerkship and permission of department.

**SURG 653 P-Pediatric Surgery Spokane (8)** Student functions as a subintern directly assisting on the services and

will be an integral part of the team. Prerequisite: Surgery required clerkship.

**SURG 654 P-Cardiothoracic Surgery - Spokane (8)** *faculty* The student functions as a subintern and directly assists on the service and is an integral part of the team. Prerequisite: surgery required clerkship.

**SURG 656 P-Trauma/Acute Care Surgery - Boise (8)** The student functions as a subintern and directly assists on the service and is an integral part of the team at St. Alphonsus Trauma Services. (Four weeks).

**SURG 657 P-Vascular Surgery - Spokane (4/8)** Student spends two or four weeks at the Vascular Institute in Spokane. The student functions as a subintern and directly assists on the service and is an integral part of the team.

**SURG 658 P-Ambulatory Surgery Clerkship Mary Bridge (4)** Rotation focuses on increasing the student's ability as a primary care physician to recognize and form an initial plan of management for common surgical problems seen in the outpatient setting. Offered: AWSpS.

**SURG 659 P-Ambulatory Surgery Clerkship Madigan (4)** Rotation focuses on increasing the student's ability as a primary care physician to recognize and form an initial plan of management for common surgical problems seen in the outpatient setting. Offered: AWSpS.

**SURG 660 P-Ambulatory Surgery Clerkship Group Health (4)** Rotation focuses on increasing the student's ability as a primary care physician to recognize and form an initial plan of management for common surgical problems seen in the outpatient setting. Offered: AWSpS.

**SURG 661 P-Surgical Intensive Care Unit Sub-Internship VA (8)** Designed to augment experience gained in 665. Excellent opportunity to participate in the management of critically ill patients under the close supervision of the staff/house staff. Recommended for students entering surgery or primary care. Prerequisite: Surgery required clerkship.

**SURG 662 P-Community Surgery Clerkship Longview (8)** Designed to supplement basics learned in 665. Excellent opportunity to participate in general, thoracic, vascular, and plastic surgery in a group practice in a smaller city. Recommended for students entering primary care. Prerequisite: Surgery required clerkship and permission of department.

**SURG 663 P-Subinternship in General Surgery Virginia Mason (\*, max. 16)** Diagnosis, preoperative care, and postoperative care; management of surgical emergencies, the ICU patient, and outpatient follow-up of discharged patients. Students function at the intern level under close supervision of the staff and house staff. Prerequisite: Surgery required clerkship.

**SURG 664 P-Subinternship in General Surgery HMC (\*, max. 16)** Diagnosis, preoperative care, and postoperative care; management of surgical emergencies, the ICU patient, and outpatient follow-up of discharged patients. Students function at the intern level under close supervision of the staff and house staff. Prerequisite: Surgery required clerkship.

**SURG 665 P-Clinical Clerkship UWMC (\*, max. 12)** Diagnosis and management of problems amenable to surgical therapy. Physiological basis of surgical care, differential diagnosis and decision making, and the basic principles of surgical management. Care of inpatients and outpatients, including participation in the operating rooms.

**SURG 666 P-Clinical Clerkship Boise (12)** Diagnosis and management of surgical problems. Physiological basis of surgical care, differential diagnosis and decision making, and basic principles of surgical management. Care of inpatients and outpatients, including participation in the operating rooms. Fulfills graduation requirement for Surgery.

**SURG 667 P-Clinical Clerkship Spokane (12)** Diagnosis and management of surgical problems. Physiological basis of surgical care, differential diagnosis and decision making, and basic principles of surgical management. Care of inpatients and outpatients, including participation in the operating rooms. Fulfills graduation requirement for Surgery.

**SURG 668 P-Clinical Clerkship Casper (12)** Diagnosis and management of problems amenable to surgical therapy. Physiological basis of surgical care, differential diagnosis and decision making, and the basic principles of surgical management. Care of inpatients and outpatients, including participation in the operating rooms. Fulfills graduation requirement for Surgery.

**SURG 669 P-Clinical Clerkship Billings (12)** Diagnosis and management of problems amenable to surgical therapy. Physiological basis of surgical care, differential diagnosis and decision making, and the basic principles of surgical management. Care of inpatients and outpatients, including participation in the operating rooms. Fulfills graduation requirement for Surgery.

**SURG 670 P-Clinical Clerkship Missoula (12)** Diagnosis and management of problems amenable to surgical therapy. Physiological basis of surgical care, differential diagnosis and decision making, and the basic principles of surgical management. Care of inpatients and outpatients, including participation in the operating rooms. Fulfills graduation requirement for Surgery.

**SURG 671 P-Clinical Clerkship Madigan (12)** Diagnosis and management of problems amenable to surgical therapy. Physiological basis of surgical care, differential diagnosis and decision-making, and the basic principles of surgical management. Care of inpatients and outpatients, including participation in the operating rooms. Fulfills graduation requirement for Surgery.

**SURG 672 P-Clinical Clerkship HMC (\*, max. 12)** Diagnosis and management of problems amenable to surgical therapy. Physiological basis of surgical care, differential diagnosis and decision making, and the basic principles of surgical management. Care of inpatients and outpatients, including participation in the operating rooms. **Fulfills graduation requirement for Surgery.** Prerequisite: HUBIO 563.

**SURG 673 P-Clinical Clerkship VA (\*, max. 12)** Diagnosis and management of problems amenable to surgical therapy. Physiological basis of surgical care, differential diagnosis and decision making, and the basic principles of surgical management. Care of inpatients and outpatients, including participation in the operating rooms. **Fulfills graduation requirement for Surgery.** Prerequisite: HUBIO 563.

**SURG 674 P-Clinical Clerkship Virginia Mason (\*, max. 12)** Diagnosis and management of problems amenable to surgical therapy. Physiological basis of surgical care, differential diagnosis and decision making, and the basic principles of surgical management. Care of inpatients and outpatients, including participation in the operating rooms. **Fulfills graduation requirement for Surgery.** Prerequisite: HUBIO 563.

**SURG 675 P-Clinical Clerkship - Caldwell, ID (\*, max. 12)** Diagnosis and management of problems amenable to surgical therapy. Physiological basis of surgical care, differential diagnosis and decision making, and the basic principles of surgical management. Care of inpatients and outpatients, including participation in the operating rooms.

**SURG 681 P-Peripheral Vascular Disease (4/8, max. 8)** Peripheral arterial and venous problems, including methods of clinical evaluation; new diagnostic procedures; and the available methods of treatment. Patient workup, performance of diagnostic studies, and presentation of case material to the staff. Prerequisite: Surgery required clerkship.

**SURG 682 P-Clinical Burn Care (\*, max. 12)** Offered on the burn unit of Harborview Medical Center. Exposure to the care of patients with thermal injury, including management of severe metabolic and septic problems and opportunity to participate in surgical procedures. Exposure to plastic and reconstructive surgery. Prerequisite: Surgery required clerkship.

**SURG 683 P-Pediatric Surgery Externship (8/12)** Surgical conditions peculiar to the particular age group with a preponderance of congenital and neoplastic conditions that are amenable to surgical treatment. A reasonable background of knowledge in human embryology and genetics is recommended. Prerequisite: Surgery required clerkship.

**SURG 685 P-Cardiothoracic Surgery Externship (\*, max. 12)** Serve as subintern, participate in patient care while learning cardiopulmonary hemodynamics of cardiac and thoracic surgery. Observe a wide variety of both cardiac and thoracic disease entities. Participate in the open-heart procedures in the operating room. Opportunity to gain additional understanding of physiology of cardiopulmonary bypass.

**SURG 686 P-Plastic Surgery Clerkship and Preceptorship (\*, max. 12)** Introduces fundamental techniques and enhances knowledge of plastic surgery, wounds, trauma, burns, cancers, and pediatric and adult cosmetic and reconstructive surgery. Participate in all surgery-related activities. Prerequisite: Surgery and Medicine required clerkships.

**SURG 687 P-Transplantation Surgery Clerkship (8)** Clerkship is in the University regional multi-organ transplantation center. Student participates fully in the care of all transplant patients, on twice daily multidisciplinary rounds, in pre-operative conference, and in the operating room and on the donor harvest team. Weekly didactic teaching sessions. Prerequisite: Surgery and Medicine required clerkships.

**SURG 688 P-Subinternship in General Surgery (\*, max. 16)** Offered on the general surgery wards of the University-affiliated hospitals. Diagnosis, preoperative care, and post-operative care; management of surgical emergencies, the ICU patient, and outpatient follow-up of discharged patients. Students function at the intern level under close supervision of the staff and house staff. Prerequisite: Surgery required clerkship.

**SURG 689 P-Community Surgery Clerkship Coeur d' Alene (8)** Designed to supplement basics learned in 665. Excellent opportunity to participate in general, thoracic, vascular, and plastic surgery in a group practice in a smaller city. Recommended for students entering primary care. Prerequisite: SURG 665 and permission of department.

**SURG 690 P-Alaska Native Medical Center Surgery Sub-Internship (8/12)** Designed to supplement basics learned in 665. Excellent opportunity to participate in general, thoracic, vascular, and plastic surgery in a specialized population of patients. Recommended for students entering primary care. Prerequisite: SURG 665 and permission of department.

**SURG 691 P-Surgical Intensive Care Unit Sub-Internship HMC (8)** Designed to augment experience gained in 665. Excellent opportunity to participate in the management of critically ill patients under the close supervision of the staff/house staff. Recommended for students entering surgery or primary care. Prerequisite: Surgery required clerkship.

**SURG 692 P-Ambulatory Surgery Clerkship Seattle Children's (4)** Rotation focuses on increasing the student's ability as a primary care physician to recognize and form an initial plan of management for common surgical problems seen in the outpatient setting. Offered: AWSpS.

**SURG 693 P-Rural Surgery Clerkship, Buffalo (8)** Designed to supplement basics learned in SURG 665. Opportunity to participate in general surgery and various other subspecialties in a smaller city. Recommended for students entering primary care. Prerequisite: Surgery required clerkship and permission of department.

**SURG 694 P-Rural Surgery Clerkship, Riverton (8)** Designed to supplement basics learned in SURG 665. Opportunity to participate in general surgery and various other subspecialties in a smaller city. Recommended for students entering primary care. Prerequisite: Surgery required clerkship and permission of department.

**SURG 695 P-Vascular Thoracic Surgery (8/12)** The student spends two weeks on the vascular and two weeks on the thoracic surgery services at Harborview Medical Center. The student functions as a subintern and directly helps the residents manage all patients on the service and is an integral part of the OR team.

**SURG 696 P-Breast Surgery- Spokane (4/8)** Two or four weeks at the Breast Center in Spokane. Student functions as a subintern directly assisting on the service and is an integral part of the team.

**SURG 697 P-Surgery Special Electives (\*, max. 24)** Special clerkship, externship, or research opportunities can at times be made available at institutions other than the University of Washington. Students wishing to elect this course should obtain from the Dean's office a special assignment form at least one month before preregistration. Prerequisite: Surgery required clerkship and permission of department.

**SURG 698 P-Clinical Clerkship Fairbanks (\*, max. 24)** Includes the diagnosis and management of surgical problems. Focuses on the physiological basis of surgical care, differential diagnosis and decision making, and basic principles of surgical management. Care of inpatients and outpatients, including participation in the operating rooms. Fulfills graduation requirement for Surgery.

**SURG 699 P-WWAMI Surgery Special Electives (\*, max. 24)** By special arrangement for qualified students, special clerkships or externships may be available at institutions other than the University of Washington located within the WWAMI region. Prerequisite: permission of department.

## Urology

### DEPARTMENT OVERVIEW

BB1115 Health Sciences

Urology is the surgical discipline concerned with diseases of the urinary tract in males and females, and the genital system in the male. The science is broadly based: major areas of practical and investigative concern include congenital defects, cancer, renal diseases, reproductive biology, neuropathology, renal stone formation, and transplantation.

Clinically, the field encompasses a large variety of technical skills including real-time imaging and manipulation, endoscopy, laparoscopy and robotics, and open surgery. Medical diagnosis and treatment are a large part of the discipline.

The department is actively involved in patient care, instruction, and research concerning the problems of urology. Training for medical students starts in the second year and continues through the third and fourth years. Training is also provided for residents, fellows, nurses and applied specialists. The department is responsible for a fully approved urology residency program. Contact the Urology Clerkship Coordinator at 206-731-3205 for further information.

### COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at [www.uw.edu/students/crscat/](http://www.uw.edu/students/crscat/)

**UROL 498 Undergraduate Thesis (\*)** Provides an opportunity for medical students to write in the area of urology.

**UROL 499 Undergraduate Research (\*)** The student participates in current urologic research projects under supervision of full-time staff. Certain specific problems may be elected by the student. Elective for medical students.

**UROL 501 P-Urology Preceptorship (1)** Individual experiences with one or more of the full-time department faculty members covering research, teaching, and patient care. Students observe activities in the clinic, hospital ward, operating room, and research laboratories. Prerequisite: first- or second-year medical student standing; permission of instructor.

**UROL 675 P-Urology Preceptorship (\*, max. 8)** Student follows a private practice preceptor in all of his or her work. Becomes acquainted with the office management of urological problems. Prerequisite: UROL 680, HUBIO 562. (Two or four weeks.)

**UROL 680 P-Urology Clerkship (\*, max. 8)** *Berger, Ellis, Grady, Krieger, Lange, Mayo, J. Miller, L. Miller, Mitchell, Penson, Porter, Takayama, Wessells* Full activities of clinical service. Basic principles of urology emphasized. Prerequisite: HUBIO 562. (Two or four weeks.)

**UROL 681 P-Female Urology (4)** *J. Miller, L. Miller* Observation of cases of lower urinary tract disorders specific to women, emphasizing behavioral management and multidisciplinary care. Ninety-five percent of cases observed are women. Not intended as the only exposure to urology for students considering urology as career choice. Prerequisite: third- or fourth-year standing and permission of instructor.

**UROL 682 P-Urology Clerkship Spokane (\*, max. 8)** Full activities of clinical service. Basic principles of urology emphasized. Prerequisite: HUBIO 562. (Two or four weeks.)

**UROL 683 P-Urology Clerkship Boise (\*, max. 8)** Full activities of clinical service. Basic principles of urology emphasized. Prerequisite: HUBIO 562. (Two or four weeks.)

**UROL 685 P-Urology Subinternship (\*, max. 12)** *Berger, Ellis, Grady, Krieger, Lange, Mayo, J. Miller, L. Miller, Mitchell, Penson, Porter, Takayama, Wessells* Subintern is responsible for patient workups and for preoperative and postoperative care and participates in the operating room. Prerequisite: MED 665 or pediatrics basic clerkship, or permission of instructor.

**UROL 690 P-Urology Specialties (\*, max. 8)** For those who wish further exposure to a specific aspect of urology. Students can spend time with one attending at University of Washington Medical Center, Harborview Medical Center, Children's Hospital and Medical Center, or Veterans Administration Hospital studying oncology, infections, infertility, stone disease, impotence, or other aspects of urology. Prerequisite: UROL 680 and permission of instructor.

**UROL 697 P-Urology Special Electives (\*, max. 24)** Special clerkship, externship, or research opportunities can at times be made available at institutions other than the University of Washington. Students wishing to elect this course should obtain from the Dean's office a special assignment form at least one month before preregistration. Prerequisite: permission of instructor. (Six or twelve weeks.)

**UROL 699 P-WWAMI Urology Special Electives (\*, max. 24)** By special arrangement for qualified students, special clerkships or externships may be available at institutions other than the University of Washington located within the WWAMI region. Prerequisite: permission of department.

# School of Nursing

## SCHOOL OVERVIEW

T310 Health Sciences

### Dean

Marla Salmon

T318 Health Sciences

### Associate Deans

Cathryn Booth-LaForce, Executive Associate Dean

Brenda Zierler, Technology Innovations in Education & Research

Joie Whitney, Acting Associate Dean, Research

Susan L. Woods, Academic Services

Nurse professionals are members of interdisciplinary teams in clinics, hospitals, and community settings, and work with people of all ages, cultural backgrounds, and lifestyles to help them achieve the highest level of wellness possible. Nurse practitioners fill critical health care needs in both urban and rural settings, often for portions of the population who have not received adequate health care. Nurse scientists conduct important research about a variety of health problems and how best to promote health, prevent disease, and care for people who are ill. Nurses also teach in colleges and universities throughout the world.

## UNDERGRADUATE PROGRAM

### Adviser

T310 Health Sciences, Box 357260

206-543-8736

[sonas@uw.edu](mailto:sonas@uw.edu)

The School of Nursing offers the following programs of study:

- Bachelor of Science in Nursing degree with eligibility to take the licensure examination to become a registered nurse.
- An accelerated Bachelor of Science in Nursing option for candidates with an existing bachelor's degree. This option provides eligibility to take the licensure examination to become a registered nurse.
- A four-quarter modification of the basic curriculum is available for the registered nurse. This B.S.N. Completion (R.N. to B.S.N.) program is available at UW Bothell and UW Tacoma, and prepares graduates go on for advanced degrees in Nursing.

## Bachelor of Science in Nursing

*Suggested First- and Second-Year College Courses:* See below, under Admission Requirements.

### Admission Requirements

Admission to the nursing major occurs once a year, for autumn quarter, with an application deadline of January 15. Selection is competitive.

#### Application

- To be considered for admission, applicants must satisfy one of the following requirements at time of application.
  - Three out of the total prerequisite science courses completed with a minimum GPA in these three courses of 3.00
  - Four out of the total prerequisite science courses with a minimum GPA in these four courses of 2.80.

The science prerequisite courses are CHEM 120, CHEM 220, CHEM 221 (three-quarter chemistry series for UW

students, two quarter sequence - one general chemistry and one organic - for non-UW applicants); BIOL 118/BIOL 119; B STR 301; MICROM 301 (– MICROM 302 for UW students. Non-UW applicants - must take a separate microbiology lab if lab is not included in the general microbiology course.); NUTR 300.

- Together with the application and college transcript(s), applicants submit a personal statement; a resume outlining volunteer/paid health-care experience, community service, and cultural awareness; and a recommendation from a health care provider (employer or volunteer coordinator).
- Applicants are expected to have 100 hours of health care experience in a paid or volunteer position in one setting for three months or more. The majority of applicants present health care experiences of several hundred hours for nine months or more.
- After an initial review of all applications, some applicants are asked to attend a proctored essay session. The proctored essay dates are published in the admissions publication. Eligible applicants are invited via e-mail.

*Entrance Requirements:* Prior to beginning the nursing program in the autumn, students must meet the following requirements:

- A minimum of 90 credits to include the following courses:
  - Written communication (10 credits): English composition and W-courses.
  - Problem-solving (8 credits): one QSR course, chosen from MATH 107, MATH 111, MATH 112, MATH 120, MATH 124, MATH 134, MATH 144, PHIL 115, PHIL 120, PHIL 470, or Q SCI 291. One statistics course, such as STAT 220, STAT 311, Q SCI 381, QMETH 201, or EDPSY 490.
  - Visual, Literary, & Performing Arts (VLPA) (15 credits).
  - Individuals & Societies (I&S) (15 credits): to include NURS 201 or equivalent.
  - Natural World (NW) (26–33 credits): to include CHEM 120, CHEM 220, CHEM 221 (three quarter chemistry series for UW students; two-quarter sequence - one general chemistry and one organic - for non-UW applicants); BIOL 118, BIOL 119; B STR 301; MICROM 301 plus (- MICROM 302 for UW students. Non-UW applicants - must take a separate microbiology lab if lab not included in general microbiology course.); NUTR 300.
  - Electives to complete 90 credits.
- A minimum 2.00 cumulative GPA is required, and a minimum grade of 2.0 for each prerequisite course. Because admission is competitive, the GPA for admission is usually significantly higher.
- All applicants must be exempted from all English language proficiency requirements at UW in order to start the program. If offered admission the applicant is required to pay for a background check to be run by a company specified by the School of Nursing.

For additional information on admission criteria, specific prerequisites, and deadlines, as well as application forms, visit the School of Nursing website, [www.son.washington.edu](http://www.son.washington.edu). To contact the School of Nursing Office of Academic Services, call (206) 543-8736 or 1-800-759-NURS or e-mail [sonas@uw.edu](mailto:sonas@uw.edu). Information sessions are offered periodically in the School of Nursing, Health Sciences Building T310, and an Information Session podcast is available. For a schedule of sessions or to listen to podcast, visit [www.son.washington.edu/admissions/info/default.asp](http://www.son.washington.edu/admissions/info/default.asp).

### Major Requirements

Students need a minimum of 180 credits to graduate with a bachelor's degree from the University of Washington. The required credits in the nursing curriculum total 91–92; thus

88–89 credits must be earned through general education, nursing prerequisites, and elective courses.

#### Year One of Program

- Quarter 1–Autumn
  - NCLIN 302 Practicum: Health Assessment (4–5 credits)
  - NCLIN 306 Practicum: Basic Skills of Nursing Practice (4)
  - NURS 304 Human Responses I (3)
  - NURS 301 Clinical Applications of Anatomy and Physiology (3)
  - NURS 309 Pharmacotherapeutics in Nursing Practice I (2)
  - TOTAL CREDITS: 16–17
- Quarter 2–Winter
  - NURS 401 Care in Illness I (5)
  - NCLIN 402 Practicum: Care in Illness II (4)
  - NURS 308 Human Responses II (3)
  - NURS 310 Pharmacotherapeutics in Nursing Practice II (3)
  - TOTAL CREDITS: 15
- Quarter 3–Spring
  - NURS 405 Care in Illness II (5)
  - NCLIN 406 Practicum Care in Illness II (4)
  - NURS 303 Foundations of Professional Nursing (3)
  - NURS 407 Cultural Variation and Nursing Practice (3)
  - NURS 404 Gerontological Nursing (2)
  - TOTAL CREDITS: 17

#### Year Two of Program

- Quarter 4/5\*–Autumn
  - NURS 415 Nursing of Families: Childbearing and Childrearing (5)
  - NCLIN 416 Practicum: Nursing of Families (4)
  - NMETH 403 Introduction to Research in Nursing (3)
  - NURS 410 Legal and Ethical Issues in Clinical Practice (3)
  - TOTAL CREDITS: 15
- Quarter 4/5\*–Winter
  - NURS 417 Psychosocial Nursing in Health and Illness (3)
  - NCLIN 418 Practicum: Psychosocial Nursing (4)
  - NCLIN 409 Partnerships in Community Health (6)
  - TOTAL CREDITS: 13

\*Half of senior class completes courses listed above in Quarter 4, followed by those in Quarter 5; the other half of the class completes courses listed under Quarter 5, followed by those listed in Quarter 4.

- Quarter 6–Spring
  - NCLIN 411 Transition to Professional Practice (12)
  - NURS 412 Health Care Systems (3)
  - TOTAL CREDITS: 15

TOTAL CREDITS IN NURSING MAJOR: 91–92

## Accelerated Bachelor of Science in Nursing option

### Admission Requirements

Admission occurs once a year, for summer quarter, with an application deadline in autumn quarter. Selection is competitive.

### Application Requirements

- Cumulative college-level GPA of 3.00 or higher.
- At least four of the total prerequisite science courses completed with a minimum grade of 3.0 in each course, and a cumulative GPA in these courses of 3.30 or higher. Science prerequisite courses are CHEM 120, CHEM 220, CHEM 221 (three-quarter chemistry series for UW students; two quarter sequence—one general chemistry and one organic—for non-UW applicants); BIOL 118/BIOL 119; B STR 301; MICROM 301 plus MICROM 302 for UW students. (Non-UW applicants must take a separate microbiology lab if lab is not included in the general microbiology course); NUTR 300.
- Together with the application and college transcript(s), applicants submit a series of personal statements; a resume outlining volunteer/paid healthcare experience, community service, and cultural awareness; and three recommendations: healthcare, academic, and character.
- Applicants are expected to have 200 hours of healthcare experience in a paid or volunteer position in one setting, completed within 12 months preceding submission of the application. The majority of applicants present healthcare experiences of several hundred hours.
- After the School of Nursing conducts an initial review of all applications, competitive applicants are asked to attend a proctored essay session.

**Entrance Requirements:** Prior to beginning the nursing program in summer, students must meet the following requirements:

- Bachelor's degree in a non-nursing field.
- Completion of a lifespan growth and development course—NURS 201 or equivalent.
- Completion of one statistics course, such as STAT 220, STAT 311, Q SCI 381, QMETH 201, or EDPsy 490.
- Completion of all Natural World courses: CHEM 120, CHEM 220, CHEM 221 (three-quarter chemistry series for UW students; two-quarter sequence—one general chemistry and one organic—for non UW applicants); BIOL 118, BIOL 119; B STR 301; MICROM 301 plus MICROM 302 for UW students. (Non UW applicants must take a separate microbiology lab if lab not included in general microbiology course.); NUTR 300. Minimum cumulative 3.30 GPA in these courses.
- Minimum 3.00 cumulative GPA, and minimum 3.0 grade for each prerequisite course.
- All applicants must be exempted from all English language proficiency requirements at UW in order to start the program. If offered admission the applicant is required to pay for a background check to be run by a company specified by the School of Nursing,

For additional information on admission criteria, specific prerequisites, and deadlines, as well as application forms, visit the School of Nursing website, [www.son.washington.edu](http://www.son.washington.edu). To contact the School of Nursing Office of Academic Services, call (206) 543-8736 or 1-800-759-NURS or e-mail [sonas@uw.edu](mailto:sonas@uw.edu). Information sessions are offered periodically in the School of Nursing, Health Sciences Building T310, and an Information Session podcast is available. For a schedule of sessions or to listen to podcast, visit [www.son.washington.edu/admissions/info/default.asp](http://www.son.washington.edu/admissions/info/default.asp).

### Major Requirements

- Quarter 1: NCLIN 302 (4 credits), NCLIN 306 (4), NURS 303 (3), NURS 304 (3), NURS 308 (3), NURS 309 (2), NURS 310 (2). Total credits: 21
- Quarter 2: NURS 301 (3 credits; may be waived by completion of a challenge exam), NURS 417 (3), NCLIN 409 (6), NCLIN 418 (4). Total credits: 16
- Quarter 3: NURS 401 (5 credits), NURS 415 (5), NCLIN 402 (4), NCLIN 416 (4). Total credits: 18
- Quarter 4: NURS 404 (2 credits), NURS 405 (5), NURS 410 (5), NURS 412 (3) NCLIN 406 (4). Total credits: 19
- Quarter 5: NMETH 403 (4 credits), NURS 407 (3), NCLIN 411 (12). Total credits: 19

### Student Outcomes and Opportunities

- Learning Objectives and Expected Outcomes: The School of Nursing prepares its graduates to function as generalists in professional nursing practice and to collaborate with other health-care providers. The B.S.N./A.B.S.N. undergraduate curriculum emphasizes theory and clinical practice to ensure critical thinking, human caring, and clinical expertise. Clinical experiences are provided in institutional and community settings for preventive and acute care. For the ten goals of the B.S.N. degree program, visit [www.son.washington.edu/admissions/bsn/curriculum.asp](http://www.son.washington.edu/admissions/bsn/curriculum.asp).
- Instructional and Research Facilities: Learning Laboratory
- Honors Options Available: College Honors (Completion of both Interdisciplinary Honors and Departmental Honors requirements). With Distinction (Program Honors). See adviser for requirements.
- Research Internships and Service Learning: Students complete eight clinical courses during the B.S.N. program beginning with the first quarter of the program. Each student experiences placements in medical-surgical nursing, pediatric, family nursing, psychosocial mental health, and community-based nursing. Clinical hours per course range from six hours/week during the first quarter to 24 hours/week during the final quarter.
- Department Scholarships: Limited scholarships based on student need established by FAFSA. Students are invited to apply after they have been admitted to the program by completing the School of Nursing Financial Aid application.
- Student Organizations/Associations: Students may join the Professional Organization of Nursing Students (PONS) after admission to the program. PONS' involvement spans all aspects of the undergraduate program: recruitment, orientation, education, fund raising, and social events.

## GRADUATE PROGRAM

### Graduate Program Coordinator

T310 Health Sciences, Box 357260

206-543-8736

[sonas@uw.edu](mailto:sonas@uw.edu)

The School of Nursing offers graduate study leading to the degrees of Master of Nursing (MN), Master of Science (MS), Doctor of Nursing Practice (DNP) and Doctor of Philosophy in nursing science (PhD). The MN and DNP programs admit R.N.s interested in advanced clinical practice. The MS program trains beginning level nurse investigators involved in the testing of knowledge relevant to research and nursing science. The PhD program prepares students for roles as scientists, scholars and educators. Neither the MS or PhD program requires R.N. licensure for admission.

The Master of Nursing program develops increased competence in selected areas of clinical nursing. The following specialties are available (subject to change; please

visit School of Nursing website): adult clinical nurse specialist, adult nurse practitioner (generalist, adult acute care, adult/older adult, infectious disease, rural adult), advanced practice community-health systems nursing (cross-cultural nursing and global health, occupational and environmental health nursing, healthy aging, communities for youth, rural health), neonatal clinical nurse specialist, neonatal nurse practitioner, nurse midwifery, perinatal nurse specialist, psychiatric mental health nurse practitioner, and an independent MN A thesis or non-thesis project is required for the MN degree. A concurrent MN/MPH degree is also available.

MS students have the option of creating their own research program, each student working closely with faculty member who shares his/her research interest, or applying to the [Clinical Informatics and Patient-Centered Technologies \(CIPCT\)](#) specialty. All MS students are required to write a thesis that advances knowledge in nursing science.

The Doctor of Nursing Practice (DNP) program admits both licensed R.N.s and A.R.N.P.s and prepares the graduate for a tripartite role in advanced practice nursing, leadership, and practice inquiry. The following specialties are available (subject to change; please visit School of Nursing website): adult clinical nurse specialist, adult nurse practitioner (generalist, adult acute care, adult/older adult, infectious disease, rural adult), advanced practice community-health systems nursing (cross-cultural nursing and global health, occupational and environmental health nursing, healthy aging, communities for youth, rural health), family nurse practitioner, neonatal clinical nurse specialist, neonatal nurse practitioner, nurse midwifery, perinatal nurse specialist, and psychiatric mental health nurse practitioner. Applicants who already have a MN degree may apply to earn a DNP degree in their same specialty or choose a different one. The DNP program of study culminates in a capstone clinical investigative project.

The PhD in Nursing Science program is a research-based degree program that trains students to create knowledge that will influence and alter the health of individuals, groups, and populations, using current theories of nursing science. PhD students work closely with faculty to create their own research-based programs of study. These programs of study are based on applicants' research interests as they intersect with the current research interests of School of Nursing faculty. The PhD in Nursing Science program also offers an optional concentration in statistics in partnership with the Center for Statistics and the Social Sciences. All PhD students must submit a dissertation at the end of their program of study.

Part-time study is available for graduate degree programs. Course work may be started prior to formal admission to a program as a graduate nonmatriculated student (GNM). GNM status allows the student to take non-clinical courses and to earn up to 12 graduate-level credits which may be applied to a graduate program if the student is later admitted. Time limits for acceptance of courses taken as a GNM student are six years for a master's degree and ten years for a doctoral degree from the first course to completion of the degree.

## Master of Nursing

### Admission Requirements

- Baccalaureate degree from a nationally accredited nursing program with a minimum GPA of 3.00 on a 4.00 scale for the last 90 graded quarter credits, or
- Associate of arts degree or diploma from a nationally accredited R.N. program, in combination with a baccalaureate degree in a field other than nursing, acceptable to the UW. In addition, R.N.s with non-nursing baccalaureate degrees are required to demonstrate competencies in community health and professional leadership equivalent to those of baccalaureate degree nursing

graduates, and are required to submit nursing equivalency essays.

- A 3-credit basic course in descriptive and inferential statistics with a grade of at least 2.0.
- An active, unrestricted United States R.N. license at the time of application. If the applicant does not have a Washington State license, the applicant must obtain one prior to beginning the UW Master of Nursing program.
- Proof of English Language Proficiency. All applicants to the MN program whose native language is not English must demonstrate English language proficiency. Unless, the applicant received a degree from an institution in an English-speaking country, or can provide official evidence that their previous degree instruction was in English, the applicant should submit one of the following minimum test scores (applicants with scores below the minimum are unfortunately not eligible to apply to the MN program): IELTS, 7.0; TOEFLiBT, 92; TOEFLC, 237; TOEFL, 580; MLT, 90.

In addition, because the School of Nursing wants to assure success in clinical placements during their programs of study, all MN applicants whose native language is not English must submit a minimum score for spoken English. The following are acceptable tests and minimum scores (applicants with scores below the minimum are unfortunately not eligible to apply to the MN program): IELTS (speaking portion only), 7.0; TOEFLiBT (speaking portion only), 26; Versant English Test, 70; TSE, 55; SPEAK, 230.

- Applicants who do not have the applicable minimum required scores are ineligible to apply to the UW MN program. Test scores must be from within the last two years. For questions about proof of English language proficiency, contact the School of Nursing. Applications to both the School of Nursing and to the UW Graduate School via the Graduate School online admissions process.
- Resume describing relevant work, professional, and volunteer experiences.
- Three letters of recommendation, one academic, one clinical, and one additional recommendation of either type. Recommendations may be submitted online through the Graduate School.
- Admission essay relevant to the focal area objectives. (If applying to two focal areas, a separate goal statement must be submitted for each.)
- One official transcript from each collegiate institution attended, mailed to the School of Nursing along with other application materials.
- If admitted to the MN program, the applicant is required at that time to obtain criminal history/background check clearances via a service designated by the School of Nursing. All applicants pay a fee for this service.

## Degree Requirements

37–40 credits, as follows:

Nursing science and professional foundations (15 credits); clinical practice (6 credits); scholarly inquiry (10 credits with scholarly project or 13 credits with thesis); related coursework (6 credits). Specific courses determined in consultation with adviser according to the student's specific background and needs.

## Master of Nursing/Master of Public Health Concurrent Degree Program (MN/MPH)

### Admission Requirements

See admission requirements for MN and MPH individual degrees. Students must apply separately to, and be accepted by, each school. Students already enrolled in one school may apply for admission to the other and to the

concurrent degree track. Students are encouraged to complete up to one year of study in one school before entering the other.

### Degree Requirements

See MN and MPH individual degree requirements; differences are as follows:

At least 18 quarter credits for the master's degree in each program must be numbered 500 and above. Numerical grades must be received in at least 18 quarter credits of coursework for each degree and all required courses must be taken graded. Up to 12 credits taken in one school can be counted toward the other school's total credit requirements, if approved by both programs. Electives for each department can be fulfilled by taking the required courses of the other department.

One thesis is required. The 9 required thesis credits can be taken in either school, which then becomes the "home" school and the source of the thesis committee chair as well as the program authorized to approve the thesis. Each school agrees to accept the other school's thesis as meeting its thesis requirement. Faculty from each school should be involved in development of the thesis and sit on the thesis committee.

## Master of Science

### Admission Requirements

- A baccalaureate degree in any discipline from a regionally accredited institution of higher learning with a minimum GPA of 3.00 on a 4.00 scale for the last 90 graded quarter credits by date of enrollment. Applicants to the Master of Science need not have a previous degree in nursing.
- A 3-credit basic course in descriptive and inferential statistics with a grade of at least 2.0. Visit the School of Nursing website for a list of approved statistics courses.
- Proof of English Language Proficiency. All applicants to the MS program whose native language is not English must demonstrate English language proficiency. Unless, the applicant received a degree from an institution in an English-speaking country, or can provide official evidence that the previous degree instruction was in English, the applicant should submit one of the following minimum test scores: IELTS, 7.0; TOEFLiBT, 92; TOEFLC, 237; TOEFL, 580; MLT, 90.

An MS applicant with any of the range of scores listed below, might be admitted to the MS program but would be required upon matriculation to take designated [Academic English Program \(AEP\)](#) courses through UW English Language Programs: IELTS, 6.0–6.9; TOEFLiBT, 61–91; TOEFLC, 173–236; TOEFL, 500–579; MLT, 80–89.

MS applicants are not required to submit minimum spoken English scores. Test scores must be from within the last two years.

- Three letters of recommendation, two from persons qualified to comment on the applicant's academic abilities and one from a person who can provide work-related (practice) information.
- Applications to both the School of Nursing and to the UW Graduate School via the Graduate School online admissions process.
- Resume describing relevant work, professional, and volunteer experiences.
- Admission essay relevant to the focal area objectives. (If applying to both focal areas, a separate goal statement must be submitted for each. The application is reviewed for the second choice after a decision has been made on the application to the first choice, and after the application deadline.)
- If admitted to the MS program, the applicant is required at that time to obtain criminal history/background

check clearances via a service designated by the School of Nursing. All applicants pay a fee for this service.

- For students planning to take clinical nursing courses as part of their program of study, an active, unrestricted Washington R.N. license is required. Other applicants to the Master of Science program are not required to have an active R.N. license or to have a previous degree in nursing.

### Degree Requirements

49 credits, as follows:

Nursing science (15 credits); professional foundations (3 credits); theory development (5 credits); modes of inquiry (11 credits); thesis (9 credits); related coursework (6 credits). Specific courses determined in consultation with adviser according to the student's specific background and needs.

## Doctor of Nursing Practice

### Admission Requirements

- Baccalaureate degree from a nationally accredited nursing program with a minimum GPA of 3.00 on a 4.00 scale for the last 90 graded quarter credits. Applicants with a Masters degree from a nationally accredited nursing program are also welcome to apply and must have a minimum GPA of 3.00 on a 4.00 scale for the last 90 graded credits of the Masters degree.  
- OR -  
Associate of Arts degree or diploma from a nationally accredited R.N. program, in combination with a baccalaureate degree in a field other than nursing, is acceptable. In addition, R.N.s with non-nursing baccalaureate degrees are required to demonstrate competencies in community health and professional leadership equivalent to those of baccalaureate degree nursing graduates, and are required to submit nursing equivalency essays.
- If an applicant has not completed a Masters degree, a 3-credit basic course in descriptive and inferential statistics with a grade of at least 2.0.
- Proof of English Language Proficiency. All applicants to the DNP program whose native language is not English must demonstrate English language proficiency. Unless, the applicant received a degree from an institution in an English-speaking country, or can provide official evidence that their previous degree instruction was in English, he/she should submit one of the following minimum test scores (applicants with scores below the minimum are unfortunately not eligible to apply to the DNP program): IELTS, 7.0; TOEFLiBT, 92; TOEFLC, 237; TOEFL, 580; MLT, 90.

In addition, because the School of Nursing wants to assure success in clinical placements during their programs of study, all DNP applicants whose native language is not English must submit a minimum score for spoken English. The following are acceptable tests and minimum scores (applicants with scores below the minimum are unfortunately not eligible to apply to the DNP program): IELTS (speaking portion only), 7.0; TOEFLiBT (speaking portion only), 26; Versant English Test, 70; TSE, 55; SPEAK, 230.

Applicants who do not have the applicable minimum required scores are ineligible to apply to the UW DNP program. Test scores must be from within the last two years. For questions about proof of English language proficiency, contact the School of Nursing.

- Applications to both the School of Nursing and to the UW Graduate School via the Graduate School online admissions process.
- Three letters of recommendation, one academic, one clinical, and one additional recommendation of either type. Recommendations may be submitted online through the Graduate School.

- Admission essay relevant to the specialty's objectives. (If applying to two specialties, a separate goal statement must be submitted for each.)
- Resume describing relevant work, professional, and volunteer experiences.
- An example of applicant's scholarly writing. This paper must analyze a current clinical problem or professional issue, using appropriate references to make the argument and support the applicant's position. The paper must be written solely by the applicant and be a maximum of 5 double-spaced pages (excluding references).
- One official transcript from each collegiate institution attended, mailed to the School of Nursing along with other application materials.
- All applicants to the Doctor of Nursing Practice program must have an active, unrestricted United States R.N. license at the time of application. If the applicant does not have a Washington State R.N. license, the applicant must obtain one prior to beginning the UW Doctor of Nursing Practice program.
- If admitted to the DNP program the applicant is required at that time to obtain criminal history/background check clearances via a service designated by the School of Nursing. All applicants pay a fee for this service.

### Degree Requirements

90 credits minimum, as follows:

- Advanced Practice (minimum 45 credits)
- Leadership (minimum 15 credits)
- Practice Inquiry (minimum 30 credits)

## Doctor of Philosophy

### Admission Requirements

- A baccalaureate degree from a college or university of recognized rank. Although the majority of applicants have a master's degree in nursing, neither a nursing background nor R.N. licensure is required for admission.
- Applications to both the School of Nursing and to the UW Graduate School via the Graduate School online admissions process.
- Proof of English Language Proficiency. All applicants to the PhD program whose native language is not English must demonstrate English language proficiency. Unless, the applicant received a degree from an institution in an English-speaking country, or can provide official evidence that their previous degree instruction was in English, the applicant should submit one of the following minimum test scores: IELTS, 7.0; TOEFLiBT, 92; TOEFLC, 237; TOEFL, 580; MLT, 90.

A PhD applicant with any of the range of scores listed below, might be admitted to the PhD program but would be required upon matriculation to take designated [Academic English Program \(AEP\)](#) courses through UW English Language Programs: IELTS, 6.0–6.9; TOEFLiBT, 61–91; TOEFLC, 173–236; TOEFL, 500–579; MLT, 80–89.

PhD applicants are not required to submit minimum spoken English scores. Test scores must be from within the last two years.

- An example of applicant's scholarly writing (25 pages or less). Examples are a published or unpublished manuscript illustrative of concept analysis, an in-depth literature review in a focused area, or a research report. Theses are not accepted. The paper is reviewed for clarity and thoroughness, its articulation with relevant published literature, and the degree to which it raises important issues for the development of nursing science. (International students whose original scholarly writing is not in English should submit a copy of the writing translated into English).

- Letters of recommendation from three persons knowledgeable about the individual's potential for a research career in nursing.
- Personal statement in response to specific questions listed on the application related to the pursuit of doctoral studies. The statement is used to evaluate the applicant's ability in written self-expression and the congruency of goals and research interests with the program objectives.
- If admitted to the PhD program the applicant will be required at that time to obtain criminal history/background check clearances via a service designated by the School of Nursing. All applicants will pay a fee for this service.

### Degree Requirements

93 credits minimum, as follows:

- **Theory and Domain of Knowledge (minimum 41 credits):** Course work in this category provides grounding in science and nursing science fundamental to examination of more specific issues in the relationship of human health and nursing.
- **Scholarly Inquiry (minimum 52 credits):** Course work deals with means of developing knowledge. Exposure to variety of approaches with encouragement to develop advanced skills is at least one methodology. Includes 27 dissertation credits.

### Financial Aid

A limited number of nurse traineeships are available for pre-master's study. Other financial aid is available on a limited basis. Teaching assistantships and research assistantships are available to a limited number of students. Priority for these appointments is given to pre-doctoral students.

### Additional Information

For additional information on current graduate program content, admission criteria, deadlines, as well as application forms, visit the School of Nursing website at [www.son.washington.edu](http://www.son.washington.edu). To contact the Office of Academic Services, School of Nursing, call (206) 543-8736 or 1-800-759-NURS or e-mail [sonas@uw.edu](mailto:sonas@uw.edu). Information sessions for the MN and DNP degree programs **only** are offered periodically in the School of Nursing, Health Sciences Building T310, and an Information Session podcast is available. For a schedule of sessions or to listen to podcast, visit [www.son.washington.edu/admissions/info/default.asp](http://www.son.washington.edu/admissions/info/default.asp). Sessions are **not** offered for MS and PhD programs.

## COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at [www.uw.edu/students/crscat/](http://www.uw.edu/students/crscat/)

### Nursing (NURS)

**NURS 200 Critical Approach to Women's Health (3)** Interdisciplinary examination of women's health from a critical social-political approach. Discusses issues of gender, race, class, heterosexism, etc. in relation to women's health policies.

**NURS 201 Growth and Development Through the Life Span (5–6, max, 6) I&S** Focuses on human growth and development throughout the life span. Emphasizes influence of growth and development theory and research on achievement of health and health promotional efforts directed toward persons of various ages and life styles. Optional service learning component. Open to nonmajors.

**NURS 202 Difference and Identity on University Campus (5)** Allen Novels, autobiographies, films, and music are used to explore how American who are seen as white are charac-

terized by people who are seen as non-white. Since many freshmen find campus life more socially diverse than their home communities, the focus is on young adults and college environments.

**NURS 203 Health Care Terminology for Nursing (2)** Designed to improve reading, writing, listening, and comprehension skills with respect to health care terminology. Offered: SpS.

**NURS 301 Clinical Applications of Anatomy and Physiology (3)** Application of anatomic and physiologic concepts to selected clinical phenomena. Focuses on integrated responses and functional health patterns. Exemplars of developmental and lifespan factors are identified. Includes experiential activities to enhance integration of content. Offered: AS.

**NURS 303 Foundations of Professional Nursing (2–3)** Exploration of the profession of nursing, including past and present work of nurses, the experience of being ill and seeking health care, and the U.S. health care system. Offered: Sp.

**NURS 304 Human Responses I (3)** Examines normal and pathophysiological responses to states of health and illness. Examines internal and external defense systems, balance and regulation of body systems, and integration of these concepts in the assessment and management of patient problems. Offered: A.

**NURS 308 Human Responses II (3)** Examines normal and pathophysiological responses to states of health and illness. Examines internal and external defense systems, balance and regulation of body systems, and integration of these concepts in the assessment and management of patient problems. Offered: W.

**NURS 309 Pharmacotherapeutics in Nursing Practice I (2–)** Emphasizes the principles of pharmacology, drug therapy, pharmacologic-therapeutic classes of drugs, clinically important prototype drugs, and drug information resources. Nursing issues related to drug administration are also discussed. First of a 2-quarter sequence. Offered: A.

**NURS 310 Pharmacotherapeutics in Nursing Practice II (2–3)** Emphasizes the principles of pharmacology, drug therapy, pharmacologic-therapeutic classes of drugs, clinically important prototype drugs, and drug information resources. Nursing issues related to drug administration are also discussed. Second of a two-quarter sequence. Offered: W.

**NURS 401 Care in Illness I (5)** Introduces major concepts relevant to the experience of acute and chronic illness, including physiological, pathophysiological, behavioral and experimental human responses, assessment of functional health status and interdisciplinary therapeutics in common alteration across the lifespan. First of a two-quarter sequence. Offered: W

**NURS 404 Gerontological Nursing (2)** Focuses on theoretical and practical information about basic and complex concepts and issues relevant to the nursing care of older people across the continuum of care.

**NURS 405 Care in Illness II (5)** Continuation of 401, further examining selected psychopathologic and pathophysiologic alterations in health of individuals in context of families across life span. Emphasizes assessing functioning in psychosocial, cultural, person-environment relationships, and health care resources to plan nursing strategies for acutely/chronically ill individuals of all ages.

**NURS 407 Culture, Diversity, and Nursing Practice (3)** Analyzes the impact of cultural, social, and global factors on the health of multicultural and diverse groups at the individual, population, and systems levels. Students gain knowledge and skills to effectively respond to the health care needs of multicultural societies through non-discriminatory and culturally appropriate nursing care practice. Offered: Sp.

**NURS 408 Nursing Care with Families in the Community (3)** Application of biopsychosocial and social environmental theories and assessments to diagnose alterations in health/mental health of families, small groups in community settings. Emphasizes interpersonal and clinical therapies; coor-

dination of community resources, evaluating effectiveness of changes; characteristics of nursing care in home visiting.

**NURS 410 Legal and Ethical Issues in Clinical Practice (3)** Identification of ethical and legal issues and the ensuing dilemmas relevant to the profession of nursing and nurses as health professionals and citizens. Selected problems and dilemmas affecting nurses, nursing, and the delivery of health care analyzed using specific moral-ethical perspectives. Offered: AW.

**NURS 412 Health Care Systems (3)** Introduction to analysis of health care systems with emphasis on political economy of health, access and utilization, disparities in health, public and private health insurance and reimbursement issues. Comparison of U.S. and other national health care systems. Offered: Sp.

**NURS 413 Health in a Developing Nation: Study Abroad (5)** *Dorrenbos* Experimental learning opportunity in a developing resource-poor country. Explores the country's health challenges and health care system, including policies and interventions aimed to reduce inequalities in health. Addresses socio-cultural, environmental, economic, political, and ecological factors.

**NURS 415 Nursing of Families: Childbearing and Childrearing (5)** Applies family concepts to nursing of childbearing and childrearing families. Focuses on family as context for care of individuals. Emphasizes use of physiological, psychological, developmental, cultural, and environmental theories for health promotion, disease prevention, and nursing therapeutics. Offered: AW.

**NURS 417 Psychosocial Nursing in Health and Illness (3)** Examines psychosocial disorders/issues of life transitions from integrated perspective of biological, social sciences, nursing, and humanities. Emphasizes utilizing psychosocial nursing and interpersonal therapeutics for assessment, intervention, health promotion with individuals/families/groups at risk for experiencing psychosocial disorders. Prerequisite: NCLIN 418, which may be taken concurrently. Offered: AW.

**NURS 419 Transition to Professional Practice (3)** Focuses on critical examination, synthesis, and evaluation of professional nursing care. Emphasizes mastery, synthesis, and application of theory, research, and practice in relation to nursing management, leadership and nursing care of individual clients of groups of clients and populations. Offered: SpS.

**NURS 430 Interpersonal Relationships in Nursing (3)** Theory, current research, and practice in communication to develop and maintain interpersonal relationships with clients and health care colleagues. Lecture/discussion and laboratory learning opportunities include concepts of relationship development and disorder, interpersonal and group therapeutic communication processes, health care interviewing, and social support.

**NURS 445 Topics in Nursing (1-10, max. 10)** Guided survey and discussion of current literature on major topics in physiological nursing. Seminar/lecture with analysis and discussion of selected topics and readings. May have clinical component. Implications for nursing practice and health care emphasized.

**NURS 450 Study Abroad Preparation: International Nursing in Context (1, max 4)** *Carr, Kennedy, Lindenberg, Muecke* Introduction to the language (if other than English), history and culture of the host country, and examination of international health issues pertinent to the country. Required course for students taking a Study Abroad quarter. Course may be taken as distance learning. Offered: AWSpS.

**NURS 466 Continuing Education in Nursing (3)** Planning, developing, and evaluating continuing education programs in various institutions and agencies. Includes the application of adult learning principles to a variety of situations, such as workshops, in-service and staff development programs.

**NURS 488 Youth at High Risk for Drug Abuse, Suicide Behaviors, Aggression, and Depression (3)** Study of adolescent problem behaviors: causes, connections, and contexts. Two central themes are understanding vulnerability to drug abuse, suicide behaviors, and other related behaviors within

social network contexts and exploring implications for prevention and early intervention programming.

**NURS 489 Alcohol Problems in Family and Society (3)** Analysis of family problems associated with alcoholism. Emphasis on psychological, cultural, and social implications; examination of various counseling practices employed and theories of prevention.

**NURS 492 Anthropology of Refugees (3) I&S** The refugee phenomenon, its emergence in postcolonial world, and structure of life history of refugees. Ethnic change, involuntary deculturation, and acculturation as they occur in refugee life histories. Prerequisite: one 200-level ANTH course or LING 203. Offered: jointly with ANTH 492.

**NURS 499 Special Electives (1-4, max. 15)** Seminars on selected nursing issues of clinical problems, with independent study option, under supervision of nursing faculty. Offered: AWSpS.

**NURS 500 Children and Adolescents with Special Health Needs, Their Families and Communities (3/4, max. 4)** *Acker, Brandt, Kieckhefer, Jolley, Magary* Includes advanced health care approached for providers of children and adolescents with chronic physical, neurobiological, developmental, or psychosocial problems. Emphasizes evidence based, culturally competent, and comprehensive assessment, referral and management strategies. Describes exemplars of leadership processes related to policy, care coordination, family centered, and multidisciplinary approaches.

Prerequisite: permission of instructor. Offered: A.

**NURS 501 Advanced Mental Health Interventions with Children (3)** Developmentally based assessment and therapeutic approaches relevant for children with psychosocial health problems. Consideration to matching therapeutic approaches with specific nature of symptomatology and other child, family, cultural, and environmental characteristics, including social and educational systems. Individual and group evaluation research emphasized. Prerequisite: NURS 500.

**NURS 502 Human Responses in Health and Illness I (3)** Survey of selected human responses to environmental demands in health and illness as expressed at physiologic, pathophysiologic, experiential, and behavioral levels. Such concepts as host defenses, ventilation, circulation, elimination, and nutrition are discussed. Prerequisite: graduate standing.

**NURS 503 Human Responses in Health and Illness II (3)** Survey of selected human responses to environmental demands in health and illness at physiologic, pathophysiologic, experiential, and behavioral levels. Such concepts as immune response, stress response, circadian rhythms, pain, sleep, cognition, and consciousness. Prerequisite: graduate standing.

**NURS 504 Clinical Nursing Therapeutics (1-6, max. 6)** Critical analysis of therapeutic modalities to assist patients with a variety of responses to health problems. Includes selected therapies such as suction/drainage, positioning to address responses in critical, life threatening, and chronic/continuing health states. Varying credits assigned for modules covering particular therapies. Prerequisite: NURS 502, NURS 503, or permission of instructor.

**NURS 505 Selected Topics in Psychosocial and Community Health Nursing (2-10, max. 10)** In-depth exploration of the major theoretical issues in psychosocial nursing. Seminar with analysis and discussion of selected topics and readings and implications for research and health care.

**NURS 506 Role and Context of Advanced Practice Psychiatric Mental Health Nursing (3)** Introduction to advanced practice roles in Psychiatric Mental Health Nursing. Diverse populations, practice settings, health care systems, standards of practice, certification, and licensing criteria relevant to the advanced practice role examined within the context of a broad range of ethical, clinical, and educational issues. Examines future directions. Credit/no credit only.

**NURS 507 Mental Health of Older Adults (3)** Examines the dynamics of mental health research and practice in normal,

optimal and pathological aging. Focuses on psychosocial and environmental influences on mental health of older adults. Topics include: models of aging, cognitive impairment, depression, severe mental illness, and successful strategies to enhance mental health in older adults.

**NURS 508 Seminar in Group Treatment (2)** Seminar on the theoretical basis for working with various treatment groups. Analysis of selected approaches to group treatment. Analysis of leader responsibilities and functions in the development of therapeutic group experiences.

**NURS 509 Issues in Violence and Aggression for Health Professionals (3)** Focuses on research and theory of violent/aggressive behavior. Perspectives of victim, offender, family, community, society examined. Focus is recognition of violence against women. Course is designed to challenge students to clarify beliefs, values related to topics such as rape, homicide, domestic violence. Prerequisite: graduate nursing student or permission of instructor.

**NURS 511 Seminar in Neonatal Nursing (3)** Neonatal neurobehavioral and physiologic adaptation within context of physical and social environment. Neonatal responses to alterations in growth and illness. Assessment modalities and therapeutic strategies used during the neonatal period. Prerequisite: NURS 514 or permission of instructor.

**NURS 512 Critical and Interdisciplinary Approaches to Women's Health (3)** Critical examination of the historical, socio-political, and scientific influences on women's health. Issues of sexism, racism, and heterosexism discussed from the perspective of different disciplines. Offered: jointly with WOMEN 512.

**NURS 514 Physiologic Adaptations in Women and Children: Physiologic Adaptations During Pregnancy and Postpartum (1-6, max. 6)** *Blackburn* Analyzes the developmental physiologic adaptations in four units: women/reproductive processes, pregnancy/postpartum, fetus/neonate, and infancy through adolescence. Emphasis on implications for nursing practice. Examination of evidence-base for selected intervention strategies.

**NURS 515 Common Adolescent Health Problems (3)** Focuses on assessment, clinical decision making, and management of common adolescent problems. Concepts and theories of health promotion, adolescent development, and intervention strategies are explored to provide a broad framework for caring for adolescents in primary settings.

**NURS 516 Pediatric Pulmonary Anatomy and Physiology: Clinical Applications (2)** Examines evidenced-based approach to pediatric pulmonary conditions. Includes lung structure and function from infancy through adolescence with detailed analysis of the components parts of the pulmonary system, i.e., neurological control, upper and lower airways, parenchyma, and chest wall.

**NURS 517 Pediatric Pulmonary Pathophysiology: Clinical Applications (2)** Evidence-based approach to pediatric pulmonary pathophysiology and current treatment. Critical analysis and application of interdisciplinary management and long-term follow-up for children with pulmonary special health care needs. Emphasizes family centered care and professional leadership role of the advanced practice nurse. Prerequisite: permission of instructor.

**NURS 518 Advanced Practice Pediatric Primary Care Management (3)** Focuses on use of clinical decision making framework to develop theoretically and empirically sound individualized management plans for the young child, with physical and behavioral symptoms of common pediatric illness, in the primary care setting. Prerequisite: PNP or FNP specialty, or permission of instructor.

**NURS 519 Curriculum Development in Nursing Education (3)** Theoretical rationale for curriculum development, study of curricular problems in nursing in relation to the elements of the curriculum as described in a curricular design. Prerequisite: graduate standing.

**NURS 520 Evaluation of Clinical Performance in Nursing (3)** For graduate students preparing for faculty or staff development positions in nursing. Theory and principles of evaluation. Instruments to appraise clinical nursing performance

developed as part of course requirements. Prerequisite: graduate standing or permission of instructor.

**NURS 521 Computing Fundamentals for Health Providers (3)** Enables health professionals to solve work/practice challenges using existing features of desktop computers. Emphasizes productivity concepts. Introduces extended features of common software packages, as well as basic concepts/methods of small system management and support. Prerequisite: admission to Health Informatics Certificate Program or by instructor permission. Offered: jointly with MEDED 580; W.

**NURS 522 Legal and Ethical Issues in Advanced Practice Nursing (3)** *Shannon* Reviews selected ethical issues in health care and legal guidelines relevant to health care decision-making. Explores bioethics as a type of applied ethics. Focuses on preparing students for ethical challenges in advanced nursing roles. Offered: Sp.

**NURS 523 Communities, Populations, and Systems: Theoretical Foundations (3)** Focus on construction and analysis of research-based philosophies and theories related to nursing practice at the community, population, and systems levels. Synthesize and apply knowledge about social and environmental justice, determinants of health, and human health responses to populations and communities. Examine and evaluate leadership roles for nurses in community settings.

**NURS 524 Conceptual Foundations for Care Systems Management (3)** Critical analysis of nature and theoretical bases of care systems management practice. Concepts of nursing and organization science foundations to person-provider transaction management and leadership in context of economic, political, and social environments and health outcomes. Prerequisite: graduate standing.

**NURS 525 Managing Clinical Effectiveness Within Care Systems (3)** Optimizing person-provider clinical therapeutic transactions at multiple levels of care systems complexity and population aggregation. Emphasis on designing, managing and evaluating clinical effectiveness and efficiency within care systems. Prerequisite: NURS 524 or permission of instructor.

**NURS 526 Managing Organizational Effectiveness Within Care Systems (3)** Analysis of management strategies for attaining effective and efficient organizational structures and processes within health care systems. Prerequisite: NURS 524 or permission of instructor.

**NURS 527 Managing Effective Access and Utilization Within Care Systems (3-4)** In-depth inquiry into health care access and resource utilization patterns among diverse populations, with emphasis on management strategies for establishing effective population-system fit. Additional credit for exploring access and utilization patterns within specific populations.

**NURS 528 Implications of Human Embryology and Genetics for Clinical Practice (3)** Normal development of the human embryo and fetus and principles of human genetics. Alterations in development leading to common anomalies and implications for clinical practice. Prerequisite: graduate standing or permission of instructor.

**NURS 529 Childhood Common Developmental and Behavior Issues (2)** Focus on common developmental and behavioral issues presented by children and their families in primary care setting. Emphasis on the developmental, family, and cultural aspects of assessment and management of the common issues.

**NURS 530 Conceptual Frameworks for Parent-Child Nursing (3)** Designed to assist graduate students in exploration, criticism, and analysis of selected concepts, frameworks, and models relevant to parent-child nursing practice. Group seminar work focuses on the discussion of issues influencing the roles and practice of clinical nurse specialists in parent-child nursing. Skills necessary for developing a conceptual framework for practice.

**NURS 531 Selected Topics in Family and Child Nursing (1-6, max. 12)** In-depth examination of the literature pertinent to major theoretical issues in parent and child nursing.

Seminar with analysis and discussion of selected topics and readings. Implications for research, prevention, and health care stressed. Prerequisite: permission of instructor.

**NURS 532 Professional Issues in Advanced Parent and Child Nursing (2-5, max. 5)** History and current issues in advanced parent and child nursing practice and interface with health care systems. Advanced practice roles in provision, implementation, and evaluation of health care services for women, children, and families. Opportunity for application to specific advanced practice roles. Prerequisite: permission of instructor.

**NURS 533 Healthcare of Cancer Survivors (2)** Focuses on teaching the health science graduate students about cancer survivorship issues. Discusses the health concerns of those who have been cured of their initial malignancy but are still at risk of long-term effects of chemotherapy, radiation, and surgery.

**NURS 534 Seminar in Nursing in Gerontology (3)** Gerontological research findings applied to complex nursing problems in maintenance of health and maximum functioning in the aged.

**NURS 535 Seminar in Neuroscience Nursing (3)** Guided survey of clinical and experimental literatures regarding selected concepts of human functioning mediated by the nervous system: consciousness, mentation, movement, sensation, integrated regulation, coping with disability. Clinical and research measurement, current research and implications for further research, clinical applications.

**NURS 536 Biological Aspects of Cancer: Implications for Care (3)** Survey of major concepts from tumor biology and implications for advanced oncology nursing practice. Areas covered include carcinogenesis, cancer epidemiology, pathology, metastasis, treatments (chemotherapy, radiation, surgery, immunotherapy), and cancer detection and prevention. Discussion of role of advance nurse clinician and complex patient responses are incorporated into discussion of basic biological concepts.

**NURS 537 Symptom Management in Cancer Care and Serious Illness (3)** *Berry, Nguyen* Focuses on assessment, integration of research findings into clinical decision-making, diagnostic reasoning, and management of common symptoms experienced by adult patients with cancer and/or serious illness. Explores individual and family responses to serious illness and malignant processes. Emphasizes concepts of prevention, tailored patient/family education, management and evaluation strategies. Offered: Sp.

**NURS 538 Management of Adults with Respiratory Dysfunction (3)** In-depth examination of problems such as abnormal secretions and shortness of breath associated with respiratory dysfunction due to pulmonary diseases and other pathophysiological states.

**NURS 539 Seminar in Critical-Care Nursing (3, max. 9)** Systematic inquiry into pathophysiology, initial nursing management, and systems of care for the critically ill adult or child.

**NURS 540 Special Topics in Biobehavioral Nursing and Health Systems (3-6, max. 9)** Guided survey of the experimental literature of major topics in physiological nursing, including cardiopulmonary, biology of aging, neuromuscular, cancer, and endocrine. Course conducted as a seminar with analysis and discussion of selected topics and readings. Implications for future research and health care are emphasized.

**NURS 541 Women's Health Care: Diagnosis and Management (1-6, max. 6)** Examines advanced practice women's health care issues including unique health issues for women, health maintenance, contraceptive care, diagnosis, and treatment of women's health problems across the lifespan. Prerequisite: permission of instructor.

**NURS 542 Theoretical Foundations of Advanced Practice Nursing: Childbearing I (4)** Analyzes and applies concepts of advanced practice nursing/nurse-midwifery care, specific to the normal childbearing woman, during preconception, antepartum, intrapartum, and postpartum. Examines primary care management of pregnant client within the con-

text of the individual, family, socio-cultural environment, and health care system.

**NURS 543 Theoretical Foundations of Advanced Practice Nursing: Childbearing II (1-4, max. 4)** Analyzes and applies concepts of advanced practice nursing/nurse-midwifery care, specific to at-risk childbearing woman, during preconception, antepartum, intrapartum, and postpartum. Examines primary care management of at-risk pregnant client within the context of the individual, family, socio-cultural environment, and health care system. Offered: W.

**NURS 544 Psychosocial Adaptations of Individuals and Families during the Perinatal Period (3)** Adaptation of individuals and families during the perinatal period, with emphasis on psychosocial adaptation, consumer education, transition to parenthood, parent-infant interaction and community based support. Prerequisite: permission of instructor.

**NURS 545 Care of the Neonate and Infant (2-3, max. 3)** Adaptation of neonate to the extrauterine environment and continuum of care to promote the health of infants within the context of family, community, and other environments. Prerequisite: NURS 514, NURS 528, or permission of instructor.

**NURS 546 Interpersonal Aspects of Behavior (3)** Selected theories in relation to psychosocial development and adaptation across life span for individuals, families, and small groups and as explanatory models of major psychosocial disabilities. General and psychosocial nursing models evaluated for heuristic value for research and practice. Prerequisite: graduate standing or permission of instructor.

**NURS 547 Biologic Aspects of Psychosocial Disabilities (3)** Analysis of biological processes influencing psychosocial behavior in response to internal and external stimuli. Research and theory of neuroendocrine mechanisms in psychosocial disabilities. Analysis of nursing management and evaluation of biopsychosocial modalities used in modification of behavior. Prerequisite: graduate standing in nursing or permission of instructor.

**NURS 548 Frameworks in Infant Mental Health (3)** *Spieker* Review infant mental health (IMH) and early development from a developmental interdisciplinary perspective. Pays special attention to brain development, sensory integration, early communication, and emotion regulation. Offered: A.

**NURS 549 Assessment in Psychosocial Nursing (3)** Conceptual and clinical approaches to advanced-level data collection and diagnostic reasoning in psychiatric/psychosocial disorders. Synthesizes knowledge from psychosocial nursing and multiple allied fields to enhance learners' cognizance of principles for establishing accurate and comprehensive data bases and sound multifaceted diagnostic formulations. Emphasizes DSM diagnostic scheme.

**NURS 550 White Privilege and Racism in Health and Human Services (3)** Explores relationships among the psychosocial health of people of color, American cultural patterns of intersecting forms of oppression (e.g., gender, race, and class) and the role of health professionals in defining, ameliorating and/or aggravating psychosocial distress. Credit/no credit only. Offered: jointly with WOMEN 550.

**NURS 551 Theoretical Foundations of Primary Care (1-3, max. 4)** Presentation and interpretation of theoretical basis of advanced nursing practice in primary care. Provides students with conceptual foundation upon which to base their development as nurse practitioners. Prerequisite: graduate standing; permission of instructor.

**NURS 552 Health Promotion (2-3)** Emphasis on evidence for health promotion, risk reduction, screening, and disease prevention through the lifespan in primary care. Examines issues, including cultural diversity, impacting individual, family, and population health; evidence supporting risk assessment and behavior change; factors contributing to health disparities; and barriers to health at micro and macro levels. Prerequisite: permission of instructor; recommended: nurse practitioner students take fieldwork concurrently.

**NURS 553 The Mentally Ill Offender in Correctional and Community Settings (3)** Survey of social, political, economic,

legal, and moral problems posed by individuals with mental disorders who commit crimes. Covers historical antecedents and current responses of correctional and mental health systems to mentally ill offenders, prevalence and correlates of incarceration, and roles of professionals in correctional mental health field. Credit/no credit only. Offered: W.

**NURS 554 Psychosocial Interventions in Nursing (3)** Course focuses on conceptual foundations and interpersonal skills for therapeutic interventions to promote personal change and effective adaptation. Emphasizes forming and maintaining a therapeutic alliance and utilizing a client-centered approach to define problems and select appropriate therapeutic interventions. Examines traditional, non-traditional, and multicultural therapeutic perspectives.

**NURS 555 Mental Health Assessment of Infant and Toddlers (3)** Focuses on developing and improving skills to conduct multi-disciplinary, relationship-based assessments of infants and toddlers, framed primarily by the Diagnostic Classification for Developmental and Mental Health Disorders, Revised (DC-0-3R). Required course in the graduate certificate program in infant mental health. Prerequisite: NSG 537 and permission of instructor. Offered: S.

**NURS 556 Addictions and Substance Abuse: Biopsychosocial Perspectives (3)** Psychosocial and pathophysiological aspects of substance use examined for their effects on individuals and families throughout life span. Theories and empirical findings serve as basis for evaluating preventive and therapeutic nursing approaches to substance use disorders, including those related to target populations. Prerequisite: basic course in biological sciences.

**NURS 557 Health, Culture, and Community (3)** *Chrisman* A multidisciplinary approach to the development of leadership in personal and organizational cultural competence in community-based participatory research. Emphasizes understanding collaborative assessment, planning, and evaluation of health promotion and disease prevention programs to address the social determinants of health at the population level. Offered: jointly with HSERV 576; W.

**NURS 558 Infancy: The Context of Relationships (3)** Overview of the parent-child relationship from an ecological framework. Topics include infant regulatory behaviors, parent-child interaction, attachment theory, and prevention in primary care.

**NURS 559 Theories of Psychiatric Disabilities (3)** Theories from psychosocial nursing, psychiatry, and behavioral sciences explanatory of psychiatric disabilities provide basis for identifying psychosocial problems. Structure and functions of mental health organizations and social networks analyzed. Prerequisite: NURS 547 or permission of instructor.

**NURS 560 Dynamics of Community Health Practice (3)** Analysis of principles of community health as applied to the delivery of clinical services in order to improve public health, reduce disparities, provide leadership in delivery of care, and synthesize one's clinical role with public health. Examines environmental, social, cultural, and behavioral determinants of health. Includes family, aggregates, and populations. Offered: jointly with HSERV 508.

**NURS 561 Selected Topics in Comparative Nursing Care Systems (2-3, max. 10)** In-depth examination of the literature pertinent to major theoretical issues in cross-cultural nursing and health-care systems. Seminar with analysis and discussion of selected topics and readings. Implications for research and health care stressed.

**NURS 562 Clinically Applied Anthropology (3)** Anthropology as it relates to interdisciplinary delivery of culturally relevant health care. Cultural variation in illness beliefs and behavior, types of healing practices, illness prevention, social support networks. Prerequisite: graduate standing, permission of instructor. Offered: jointly with ANTH 562.

**NURS 563 Advanced Community Health Nursing (3)** Systematic inquiry into the nature and foundations of community health nursing. Analytic and theoretical perspectives on health risk assessment and nursing interventions in the community. Implications for community health nursing ser-

vices. Prerequisite: permission of instructor and graduate standing.

**NURS 564 Biopharmacological Management in Psychosocial Nursing (3)** Biological and pharmacological interventions pertinent to practice of psychosocial nursing, including psychopharmacology, electroconvulsive therapy, and phototherapy. Emphasis on empirical neuroendocrine bases and then nursing management issues pertaining to these interventions. Legal and ethical issues pertaining to advanced practice and putative neurological mechanism are examined. Prerequisite: NURS 547 or permission of instructor.

**NURS 565 Self-Management Strategies and Techniques in Patient Care (3)** Theories underlying cognitive/behavioral self-management strategies and techniques in patient care. Evaluation of the clinical appropriateness and utility for nursing. Application to such clinical problems as abstinence in the recovering alcoholic, depression, and eating disorders. Prerequisite: graduate standing or permission of faculty.

**NURS 566 Work Stress and Health (3)** Delineates our understanding of the relationship between work-related stressors and worker health. Theoretical models of job-stress are considered and methodological issues examined. Uses social justice framework to explore worker stress and health disparities in immigrants and other disadvantaged populations. Offered: Sp.

**NURS 567 Theoretical Basis of Management of Stress Response (3)** Theories of physiologic responses linked to theories of cognitive/affective and behavioral responses to stressors. Conceptual basis of self-management techniques. Research findings relevant to these theories and techniques examined and analyzed. Prerequisite: course in human physiology or physiologic psychology, permission of instructor.

**NURS 568 Health Politics and Policy (3)** Analyzes the formal and informal political context of health care delivery, professionals, and institutions in the United States. Addresses medical coverage and public persuasion, as well as policy analysis. Special attention is paid to women's political resources and participation. Credit/no credit only.

**NURS 569 Observation and Assessment of Relationships (3)** *Spieker* Recognizing patterns of behavior in interactions between young children and their caregivers. Assessment of relationships in the early years. Students learn to incorporate an attachment theory approach and observation tools from research into the work of their own discipline or field. Offered: Sp.

**NURS 570 Family Concepts: Health and Illness (3)** Emphasizes the family as unit of care across the life span. Predominant themes: factors influencing family health promotion, including resilience, vulnerability, risk reduction, and health policy; continuity, change and transition; and promotion of family health during acute and chronic illness episodes.

**NURS 571 Advanced Interpersonal Therapeutics with Families (3)** Models and research on therapeutic relationships and interpersonal processes evaluated and applied to group interactions among family members, among professionals, and between the family, professionals, and macrosystems. Partnership building emphasized. Individual and group characteristics examined across the life span in social, cultural, and health contexts. Prerequisite: permission of instructor.

**NURS 573 Professional Issues for Nurse Practitioners (2)** Presentation and analysis of current health care trends and key professional issues influencing nurse practitioner practice. The NP's leadership role, role in influencing health policy, accountability to the profession/public, marketability, and legal dimensions of practice are stressed. Credit/no credit only. Prerequisite: NP student nearing program completion or permission.

**NURS 574 Family Interpretation and Management of Disordered Behavior across Cultures (3)** Examines interpretation and management of disordered behavior from the perspective of families—intergenerational and across cultures. Critically reviews selected theoretical frameworks

for understanding families. Emphasizes theory, cultural perspective, and family assessment skills to plan relevant family interventions to assist families in managing disordered behaviors of family members.

**NURS 575 Grief and Loss in Clinical Practice (2-4, max. 4)** Analysis and study of social, cultural, and psychological conditions that influence human loss, grief, and death in modern society. Research findings, selected readings, and direct experience provide direction for examination of philosophical, theoretical, and pragmatic issues underlying choices and decisions in clinical practice. Open to graduate students with permission of instructor. (Limit: sixteen students.)

**NURS 576 Assessment and Collaboration with Communities and Systems (3)** Examines, critiques, and applies theory in assessing communities, populations, and systems cross-culturally. Focuses on advanced practice, executive leadership/policy, and practice inquiry; broad definition of community includes organizations. Emphasizes team work in assessment implementation, i.e., survey, interview, focus groups, observation/participant observation to advance understanding of social determinants of health.

**NURS 577 Seminar in Infant Mental Health Intervention Models, Consultation, and Leadership (1-, max. 3)** Capstone course in Infant Mental Health Certificate Program. Explores intervention models, role of consultation and leadership in the field. Field work in Infant Mental Health Program serves as context for exploring consultation and leadership roles. Synthesis and reflection of personal preparation and role encouraged. Offered: AWS.

**NURS 578 Social Justice and Determinants of Health (3)** Uses multiple data sources to critically analyze social justice and determinants of health in populations and communities. Critiques preventive theories related to the reduction of health disparities in complex systems. Examines theories related to the development, implementation, and evaluation of health policies and other systems' level approaches.

**NURS 579 Transcultural Nursing Practices (3)** Seminars examine four decades of nursing practice literature and other disciplines related to appropriate and competent care of diverse and multicultural populations. Concepts and methods from anthropology and other behavior sciences are considered in relationship with current health practice guidelines. Graduate standing or instructor permission.

**NURS 580 Current Issues in Occupational and Environmental Medicine (2, max. 12)** *Kaufman* Interdisciplinary seminar on current and emerging topics in the practice of environmental and occupational health. Faculty- and student-led presentations with an interdisciplinary focus, including occupational hygiene, nursing, and medical issues. Prerequisite: environmental health graduate student, occupational health nursing student, or permission of instructor. Offered: jointly with ENV H 596; AWSp.

**NURS 581 Study of International Health (2-3)** International health based on the concept of health ecology. Assigned readings, discussions, and analysis of different perspectives, strategies, systems, and the wide range of conditions and forces affecting global and local health and illness. Emphasizes roles of health care providers.

**NURS 582 Culture, Society, and Genomics (3)** Examines social and cultural issues of human genome sequencing and control of genetic expression. Attitudes and behaviors toward health, illness, and disability are studied using historical, contemporary, and cross-cultural case study material. Offered: jointly with ANTH 574/PHG 521.

**NURS 583 Emotions and Mental Health: From Adversity to Adaptation (3)** *Betrus, Elmore* Provides an understanding of nature and function of emotions as well as relationship of emotion to mental health/illness. Emphasizes adversity arising from individual and community sources and its impact on emotional health. Addresses implications for interpersonal and social policy interventions.

**NURS 584 Critical and Interdisciplinary Approach to Health Policy (3)** Advanced seminar to critically analyze various public health policies from a social justice framework.

**NURS 585 Introduction to Forensic Nursing and Health Care (3)** *Baker* Examination of the practice, roles, functions, and evolution of the forensic nurse specialty; its relationship to other disciplines and professions; its roles working with victims of crime, violence and abuse, along with offender populations. Introduction to ethical issues in forensic health services.

**NURS 586 Forensic Nursing and Health Care for Vulnerable Populations (3)** *Baker* Focuses on the roles of forensic nurses and other working with populations at risk for violence, assault, and abuse; emphasizing issues related to age, race/ethnicity and gender. Examines concepts of vulnerability, dependence, and victimization; interactions with criminal justice and health care systems.

**NURS 587 Role Transition Seminar (2)** Emphasizes the transition to doctoral study and eventual post-graduate roles. Includes information to clarify expectations and skills to facilitate success: various forms of scholarly and interpersonal communication, principles of scholarly collaboration, giving and receiving critiques, development of a program of study, and other topics developed by participants. Prerequisite: Enrolled in PhD program in Nursing Science. Credit/no credit only.

**NURS 588 Philosophical Basis of Nursing Inquiry (3)** Overview and critical analysis of historical and contemporary views of knowledge development and of science, with particular emphasis on the ways these views influence approaches to nursing inquiry. Emphasis on analyzing the underlying epistemological and ontological assumptions and implications of diverse approaches to knowledge generation in nursing.

**NURS 589 Theoretical Perspectives in Nursing (3)** Critical analysis of theory development, including evaluation of relationships among theories, evidence, and explanation. Diverse approaches used to appraise historical and contemporary milestones in the development and evaluation of nursing knowledge. Emphasis on process and implications of theory development for nursing research, practice, education, and systems. Prerequisite: NURS 588. Offered: W.

**NURS 590 Ecology of Human Health (5)** Provides conceptual foundation for the study of human health ecology within nursing science. Frameworks for understanding human health as an outcome of individual, family, and group interactions and transactions with environments are applied. Provides the basis for evaluation and developing therapeutic approaches to improve health.

**NURS 591 Advanced Seminar in Nursing Science (3, max. 15)** In-depth analysis and evaluation of literature in focused areas of research. Synthesis of literature related to selected fields of nursing science. Oral analysis of assigned papers and topics. Prerequisite: graduate standing or permission of instructor.

**NURS 592 The Science of Nursing Therapeutics (4)** Addresses the state of the science of nursing therapeutics. Students examine the practices of nursing to promote, maintain, and restore human health from an ecological perspective. Therapeutics considered from the perspectives of the individual, family, and community systems.

**NURS 593 Preventive Therapeutics (3)** Examines literature in the field of health promotion and illness prevention with the purpose of students developing their individual model of health promotion and illness prevention in their own foci of interest considering the social and political forces prevailing.

**NURS 594 Advanced Seminar on Healing (3)** Advanced seminar to critically analyze current thinking and practice applications that fall under the heading of "healing."

**NURS 595 Synthesis of Nursing Science (3)** Advanced seminar for critical analysis, integration, and synthesis of material for a research proposal. Focus includes discussion of research integrity and ethics including scientific conduct, risk management related to scientific misconduct and negligence. Prerequisite: NURS 587; NURS 588; NURS 589; NURS 590; NURS 592; NMETH 579; and NMETH 580. Credit/no credit only.

**NURS 596 Colloquium, Scientific Conduct, and Dissertation Seminar (2, max. 12)** Focuses on group discussion of issues pertinent to research conduct. Scientific conduct issues include guidelines relevant to designing, conducting, and disseminating research; risk management in reference to scientific misconduct and negligence; and collaborative and peer-review skills relevant to intra- and interdisciplinary research.

**NURS 599 Selected Readings in Nursing Science (1-3, max. 18)** Analysis of synthesis of selected readings with faculty mentor. Credit/no credit only. Prerequisite: permission of instructor.

## Nursing (NSG)

**NSG 501 Teacher Practice Essentials-Models of Teaching & Learning (3)** Integrative approach to understanding teaching learning that explores how various educational models and principles frame the processes of teaching and learning. Focus toward advanced practice nurses interested in teaching. Prerequisite: permission of instructor and graduate student status.

**NSG 502 Advanced Teacher Practice Essentials-Expertise in Teaching (3)** Critical analysis of how educational models and principles frame teaching to promote expertise in practice. Aimed toward advance practice nurses interested in teaching. Builds and expands content of NSG 501. Prerequisite: NSG 501 and graduate student status.

**NSG 503 Advanced Teacher Practice Essentials-Diverse Learners (3)** Focus on relevance and inclusiveness of addressing diversity of learners within teaching and learning activities. Aimed toward advance practice nurses interested in teaching. Further expands content of NSG 501 and NSG 502. Prerequisite: NURS 501 and graduate student status.

**NSG 504 Advanced Teacher Practice-Challenges in Teaching (3)** Focus on challenges facing educator during teaching encounters. Addresses influence of belief structures on learner's motivation for change. For advance practice nurses interested in teaching. Prerequisite: NSG 501 and graduate student status.

**NSG 505 Applied Occupational Health and Safety (3)** *Camp, Johnson* Application of occupational safety and health principles. Student teams perform evaluations, assess production methods/processes and exposures, health and safety procedures and programs, and develop engineering and administrative controls. Students perform on a consulting project with a local company including budgeting, project reporting, and presentation. Offered jointly with ENVH 559 and IND E 567. Offered: Sp.

**NSG 506 Occupational Safety Management(4)** Explores industrial organization and methods of integrating safety and industrial hygiene programs with industrial operations. Investigates philosophic issues related to industrial safety and health such as responsibility for safety, dependency on safe practice, and hierarchy of prevention. Contains numerous case problems and student involvement opportunities. Offered: jointly with ENV H 560; Sp.

**NSG 507 Technical Aspects of Occupational Safety (3)** Explores specific hazards associated with major industries, as well as hazards common to all industries. Covers machine guarding, electrical safety, systems safety analysis, materials handling, and working at heights. Offered: jointly with ENV H 562; W.

**NSG 508 Introduction to Ergonomics (3)** Basic principles of ergonomics in work environment applied to problems of worker and management. Topics include measurement of physical work capacity, problems of fatigue and heat stress, applied biomechanics, worker-machine interactions and communication, design of displays and controls. Prerequisite: basic human physiology or permission of instructor. Offered: jointly with ENV H 566/IND E 566; W.

**NSG 509 Pathophysiology for Advanced Practice Nursing (1)** Synchronous Web pathophysiology class addresses immune and inflammatory responses with related content on infections and atherosclerosis. Focus on understanding the physiologic/pathophysiologic basis for disease processes

and the relationship of various treatment modalities to these concepts. Prerequisite: Recent (within 5 yrs.) upper division anatomy/physiology course or permission of instructor.

**NSG 510 Assessment and Management of Neonatal Problems (5)** Focus on pathophysiology of disease processes, assessment, diagnosis, and management of common health problems experienced by term and preterm neonates in neonatal intensive care settings. Includes foundations for clinical decision making for neonatal nurse practitioners and examination of interdisciplinary roles. Prerequisite: NURS 514.

**NSG 511 Prevention Issues in Community Health (3)** An interdisciplinary overview of community health prevention approaches focusing on the social determinants of health and health disparity reduction among vulnerable populations. Analysis of community and population preventive strategies across the life course. Roles of advanced community health nurses as prevention leaders and consumers of prevention information are emphasized. Offered: Sp.

**NSG 512 Prevention Critique in Community Health (3)** Critical examination of community health prevention programs that build community health capacity and show promise in facilitating long-term health equity among vulnerable populations. Focuses on the leading health disparities among USA racial and ethnic people of color, and how to be a critical program consumer, adopter and adapter. Offered: A.

**NSG 513 Psychopharmacology for Children and Adolescents (1)** *Tyson, Walsh* Reviews pertinent issues in prescribing psychoactive medications to children and adolescents. Emphasizes empirical neuroendocrine bases, and nursing management relevant to these interventions. Examines legal and ethical issues pertaining to prescribing for children and adolescents. Offered: S.

**NSG 514 Integrating Health Care and Culture (2-3, max. 3)** *Lenart* Prepares clinicians to integrate experience and knowledge with creative approaches and evidence-based strategies to improve cross-cultural health care, including complementary and alternative medicine/healthcare (CAM) practices. Focuses on relationships between clinicians, clients, and families emphasizing discovery of commonalities among cultures to enhance collaboration. Offered: Sp.

**NSG 515 Issues in Men's Health (2)** *Berry* Studies selected issues in men's health. Focuses on significant issues particular to men's health. Includes discussion of basic management of selected men's health issues. Credit/no credit only. Offered: S.

**NSG 517 Integrating Assessment and Knowledge of CAM into Allopathic Care (3)** *Schwenka* Explores strategies to assess and evaluate CAM use into conventional healthcare across the lifespan. Cultural, ethical, legal, and professional issues related to referral and collaboration within an integrative healthcare system. Challenges healthcare specialists to incorporate integrative principles into their practices. Offered: Sp.

**NSG 518 Botanical Medicines and Dietary Supplements (2-3)** *Kiefer, De Pasquale* Exploration of commonly used herbs and evaluation of their evidence base, treating frequently occurring acute and chronic health conditions. Optional laboratory experiences at Bastyr University herb garden and medicine-making laboratory. Field trip to identify Pacific Northwest botanicals.

**NSG 519 Qi Gong and Reflexology (1)** *Marazita* Focuses on history, evidence, and self-practice of traditional Chinese medicine's Qi gong and reflexology. Examines how Qi gong combines movement, meditation, and breathing regulation to enhance qi energy flow. Explores how foot reflexology re-education, re-patterns, and re-conditions neurological reflexes in the soles of the feet to maximize health. Offered: S.

**NSG 521 Infectious Disease and Infection Control (2)** Critical analysis of factors that influence infectious disease control including delivery of therapeutics, and the role of nursing and other health disciplines in health care and public health system responses, with a population-based

perspective of infectious disease prevention, control, and management.

**NSG 522 Life Span Physiology and Pathophysiology for Advanced Practice (3)** Analysis of normal and abnormal human responses in major organ systems in individuals across the life span. Examination of normal physiology, evidence based and selected disorders pertaining to each system.

**NSG 525 Privilege, Oppression, and Social Justice in Health Care (3-4, max. 4)** Allen, Schroeder, Ward Focuses on professional development skills that challenge white privilege, racism, and other oppressions in health care. Analysis of racism and privilege, application of that analysis to other oppressions such as gender, class, heterosexism, ableism, etc. Overall goal to enable health care professionals create more socially just health care system. Credit/no credit only.

**NSG 530 Professional Identity and Leadership Processes in Nursing (2-4, max. 4)** Analysis of professional identity and effective leadership processes. Clarification and advancement of professional identity; analysis of self as leader; critical examination of perspectives of leadership and change; development and application of skills in leadership, conflict management, and collaboration to advance the profession and improve health outcomes. Offered: AS.

**NSG 531 Evidence-Based Management of Common Health Concerns: Episodic/Acute Emphasis (1-3, max. 3)** Evidence-based clinical decision making and management of common health problems, emphasizing episodic/acute concerns. Critical appraisal of data to determine diagnosis and comprehensive plan of care within scope of advanced practice nursing. One in a series of advanced patient care management courses. Prerequisite: permission of instructor; recommended: prior/concurrent NCLIN 501.

**NSG 532 Evidence-Based Management of Gender-Related Health Concerns (1-3, max. 3)** Evidence-based clinical decision making and management of common gender-related health concerns for non-pregnant adults. Critical appraisal of data to determine appropriate diagnosis and plan of care within scope of advanced practice nursing. One in a series of advanced patient care management courses. Prerequisite: permission of instructor; recommended: prior/concurrent NCLIN 501.

**NSG 533 Evidence-Based Management of Common Health Concerns: Chronic Emphasis (1-3, max. 3)** Evidence-based clinical decision making and management of common health problems, emphasizing chronic health concerns. Critical appraisal of data to determine diagnosis and comprehensive plan of care within scope of advanced practice nursing. One in a series of advanced patient care management courses. Prerequisite: permission of instructor; recommended: prior/concurrent NCLIN 501.

**NSG 534 Evidence-Based Management of Common Mental Health Concerns (1-3, max. 3)** Evidence-based clinical decision making and management of common mental health problems. Critical appraisal of data to determine diagnosis, comprehensive plan of care, and need for referral within scope of advanced practice nursing. One in a series of advanced patient care management courses. Prerequisite: permission of instructor; recommended: prior/concurrent NCLIN 501.

**NSG 537 Infant Development and Psychopathology (3)** Spieker Infant Mental Health Certificate Program core course. Examines attachment-theory approaches to development and psychopathology in children aged 3 and under; contribution of prenatal factors, parent factors, parent-child relationships, post-institutional effects, and international and cross-cultural issues to developmental and developmental psychopathology. Offered: W.

**NSG 538 Using Infant Mental Health Approaches in Practice Settings (3)** Kelly Infant Mental Health Certificate Program core course. Examines attachment-theory based approaches to intervening with caregivers and young children in variety of settings. Curricular material can be used to support any caregiver who has a significant relationship with a young child/ren, typically developing, at risk for delay, or diagnosed with special needs. Offered: Sp.

**NSG 539 Assessment and Management of Common Psychosocial and Biophysical Conditions in the Perinatal Period (1-3, max. 3)** Focuses on integrate three areas of knowledge specific to nurse-midwifery and advanced neonatal and perinatal nursing practice: psychosocial adaptations during the perinatal period; management of the childbearing woman; and fetus and neonate at risk for commonly occurring health problems during the perinatal period.

**NSG 545 Pedagogical Frameworks for a Practice-Based Discipline (3)** Altman, Simpson Analyses pedagogical frameworks that educators employ to coach, transform, and mentor learners in developing knowledge, skills, and affective dimensions within a practice-based context. Applies pedagogies that engage learners in higher order thought. Assesses the impact of pedagogies on learner outcomes in academic or clinical settings. Offered: A.

**NSG 546 Instructional Technology (3)** Altman, Simpson Develops expertise in the theoretical foundations and proposal of instructional design, technology, and analysis for a focused population of learners. Offered: W.

**NSG 547 Capstone Teaching Seminar (3-6, max. 10)** Altman, Simpson Completion, presentation, and analysis of a project that synthesizes nursing and interdisciplinary knowledge about education in nursing. Students collaborate with a faculty/clinical mentor, present their project in a capstone seminar, and analyze the impact of their project on nursing education. Offered: Sp.

**NSG 548 Basic Arrhythmia, Conduction Disturbance, and 12-Lead Electrocardiography Interpretation (2)** Covers the theory and practice of basic arrhythmia, conduction disturbance, and 12-lead electrocardiography (ECG) interpretation, and selected pharmacologic and electrical management. Content is appropriate for primary care, and provides foundation for advanced interpretation for students in acute/critical care.

**NSG 549 Complex Arrhythmia, Conduction Disturbance, and 12-Lead Electrocardiography Interpretation (2)** Covers the theory and practice of complex arrhythmia, conduction disturbance, and 12-lead electrocardiography (ECG) interpretation, and selected pharmacologic and electrical management. Appropriate for acute/critical care. Prerequisite: NSG 548, or satisfactory pretest of basic ECG interpretation.

**NSG 550 Seminar on Professional Issues in Nursing Education (3)** Seminar on role and related professional issues in nursing education. Prerequisite: either NSG 545, B NURS 513, or T NURS 513; either NSG 546, B NURS 511, or T NURS 511. Offered: jointly with B NURS 550/T NURS 550.

**NSG 554 Occupational Health Nursing: Practice Issues (3)** Examination of current, emerging occupational health and safety topics affecting worker populations. Includes discussion of workforce groups, work environments, and socio-political contexts; introduces prevalent health matters resulting from occupational exposures; applies theoretical concepts to the prevention of work-related injuries and illnesses; and identifies issues affecting advanced professional practice and leadership roles.

**NSG 558 Occupational Health Nursing: Advanced Practice and Leadership in Program Development (3)** Examination of advanced professional practice and leadership in the context of occupational health and safety programs. Focuses on assessment, development, implementation, and evaluation of programs involving workplace health surveillance, case management, workers' compensation, and health promotion in consideration of political, economic, legal, ethical issues, and application of current research.

**NSG 561 Community Health Systems for Equity (3)** GE Defines, evaluates, and synthesizes how community health systems promote health equity. Emphasizes how various systems, such as care systems, public health, governmental, tribal, family, and social-kin, nonprofit, faith-based, and business systems, inhibit or promote communal health. Highlights advanced practice, practice inquiry, and leadership implications. Offered: A.

**NSG 597 Synthesis of Advanced Practice Nursing (3)** Synthesize new or higher levels of knowledge and skills of ad-

vanced practice nursing specialty, practice inquiry, and leadership to demonstrate competency of doctoral essentials and program objectives. Recommend concurrent clinical practicum. Prerequisite: doctoral candidacy or supervisory committee permission.

## Nursing Clinical

**NCLIN 302 Practicum: Health Assessment (1-5, max. 5)** Lecture and lab emphasize nursing skills in communication, interviewing, functional and physical health assessment. Includes: basic communication skills, beginning physical and psychosocial assessment of the individual across the lifespan, and family assessment. Credit/no credit only. Offered: AS.

**NCLIN 306 Practicum: Basic Skills of Nursing Practice (4)** Practicum in communication, interviewing, health assessment, identification of threats to health in clinical settings. Explores risk, vulnerability identification, communication, physical/psychosocial assessment of individuals across lifespan, nursing care planning, documentation, psychomotor skills development. Credit/no credit only. Prerequisite: NCLIN 302, which may be taken concurrently.

**NCLIN 402 Practicum: Care in Illness I (4)** Provides supervised nursing care to individuals/families with acute/ chronic illness across the lifespan. Emphasizes beginning skills in systematic assessment, including person/environment fit, developing competency in selected nursing therapies, and developing role as care agent for persons of all ages. Credit/no credit only. Prerequisite: NCLIN 401, which may be taken concurrently.

**NCLIN 406 Practicum: Care in Illness II (1-10, max. 10)** Provides supervised nursing care to individuals and families with acute and chronic illness. Emphasis on increasing skill in systematic assessment, developing competency in selected nursing therapies, and developing role as caring agent for persons of all ages. Credit/no credit only.

**NCLIN 409 Partnerships in Community Health (6)** Analysis, application, and evaluation of community partnership process for health. Analysis of nursing role in community/public health, including community building, collaboration, policy. Development and formulation of community interventions to maintain/promote biopsychosocial health/promotion of health/prevention of injury and disease.

**NCLIN 411 Transition to Professional Practice (8-12)** Focuses on critical examination, synthesis, and evaluation of professional nursing care with individual clients or groups reflecting diverse settings, ages, and ethnic communities. Emphasizes mastering theoretical concepts, applying research finding, improving skill competency, and developing clinical leadership capabilities. Credit/no credit. Recommended: completion of first five quarters in the BSN program.

**NCLIN 416 Practicum: Nursing of Families: Childbearing and Childrearing (4)** Provides the opportunity for supervised nursing of childbearing and childrearing families and individuals. Emphasizes expanding nursing process skills, especially health promotion, with individuals and families during childbearing and childrearing. Credit/no credit only. Prerequisite: NURS 415, which may be taken concurrently. Offered: AW.

**NCLIN 418 Practicum: Psychosocial Nursing (4)** Provides supervised psychosocial nursing care to individuals/families/groups/communities with threats to or alterations in psychosocial health. Emphasizes increasing skill in systematic assessment, developing competency in selected psychosocial nursing interventions, and evaluation of treatment outcomes. Credit/no credit only. Prerequisite: NURS 417, which may be taken concurrently. Offered: AW.

**NCLIN 490 Special Laboratory Elective (1-4, max. 4)** Provides supervised laboratory experience to enhance and document clinical skills and decision making. Prerequisite: permission of instructor.

**NCLIN 499 Clinical Practicum Elective (1-5)** Provides opportunities to develop nursing skills in the care of individuals, groups, communities, or care-systems. Individually arranged with faculty member for application of theory and

principles to direct care, consultation, education, or care coordinator roles. Prerequisite: NCLIN 302; NCLIN 306; NCLIN 402; NCLIN 406.

**NCLIN 500 Comprehensive Health Assessment (3)** Uses didactic and experimental learning to develop evidence-informed advanced assessment skills including systematic collection, organization, interpretation, and communication of data reflecting the health status of adolescents/adults/older adults. Emphasizes a holistic analysis of developmental, familial, physiological, psychosocial, occupational, environmental, functional, nutritional, and cultural aspects of health. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWS

**NCLIN 501 Diagnostic Health Assessment (1-5, max. 5)** Examines evidence-informed clinical decision-making in the advanced assessment of symptoms experienced by adolescents/adults/older adults. Uses didactic and experimental learning in the systematic collection, integration, analysis, interpretation, and communication of focuses subjective and objective data, including formulation of diagnostic hypotheses. Credit/no credit only. Prerequisite: NCLIN 500, which may be taken concurrently. Offered: AWS

**NCLIN 502 Pediatric Health Assessment and Promotion ([1-2], max. 2)** Uses didactic and experimental learning to develop evidence informed advanced assessment skills including systematic collection, organization, interpretation, integration, and communication of data reflecting health status of children from birth to adolescence. Emphasizes holistic analysis of development, familial, physiological, psychosocial, environmental, functional, nutritional, and cultural aspects of health. Credit/no credit only. Prerequisite: permission of instructor. Offered: A.

**NCLIN 503 Advanced Fieldwork Community Health Nursing (2-6, max. 12)** Guided experience in delineating nursing roles in community settings. Development of a philosophy of community health nursing. Application of core concepts pertaining to health, ethics, care, and community. A minimum of four hours of guided experience weekly. Prerequisite: graduate standing and permission of instructor.

**NCLIN 505 Diagnostic Testing and Monitoring in Serious Illness (2)** Lecture, discussion, and laboratory sessions to develop students' assessment, diagnostic, and monitoring expertise in the care of acutely ill individuals. Students refine clinical decision-making skills, apply specialized assessments, gain insight into clinical experts' critical thinking, and refine assessment knowledge for a specific patient population. Prerequisite: NCLIN 501 or equivalent.

**NCLIN 508 Seminar in Group Treatment (1)** Seminar on the theoretical basis for working with various treatment groups. Analysis of selected approaches to group treatment. Analysis of leader responsibilities and functions in the development of therapeutic group experiences.

**NCLIN 509 Teaching Methods and Practicum in Nursing Education (2-10, max. 10)** Guided experience in selected teaching-learning situations in nursing, in both classroom and clinical situations. Identification, analysis, and solution of teaching-learning problems in clinical nursing. Minimum of seven hours of guided experience weekly.

**NCLIN 510 Group Work with High-Risk Youth (3-6, max. 6)** Theory and application course in group counseling for high-risk youth. Central theme is group leader effectiveness in helping young people increase school performance, decrease drug involvement, and increase emotional well-being. Open to graduate students in nursing, education, and related human services professions.

**NCLIN 512 Advanced Practicum in Family and Child Nursing I (2-12, max. 35)** Clinical seminar and practicum provide opportunities to develop advanced nursing practice competencies in the care of women, families, children, and/or adolescents. Focuses on the application of theory and principles when providing direct patient care, patient education, and the collaboration of care with individuals and/or groups.

**NCLIN 514 Seminar in Home Care for Chronic Illness (3)** Home-care services as component of community health

nursing. Understanding effects of direct nursing functions on care of chronically ill persons and their families. Selected field study experiences in community health settings. Prerequisite: NURS 563, graduate standing, and permission of instructor.

**NCLIN 515 Health Assessment for Advanced Practice Neonatal Nursing (1 or 3)** Develops knowledge and skills to obtain and evaluate health histories and perform systematic physical assessment on newborns and young infants using a diagnosis reasoning process and evidence-based approach. Analyses data to develop differential diagnoses and management plans. Prerequisites: Required for NNP, NCNS, NM students; others with permission of instructor. Credit/no credit only.

**NCLIN 526 Managing Organizational Effectiveness Within Care Systems (1)** Analysis of management strategies for attaining effective and efficient organizational structures and processes within health care systems. Prerequisite: NURS 524 or permission of instructor.

**NCLIN 531 Nursing Process in Parent-Child Nursing (4)** Includes lecture, seminar, and laboratory instruction designed to assist the student with knowledge and skill acquisition related to nursing care of individuals and families with regard to childbearing and childrearing. Prerequisite: NURS 530.

**NCLIN 532 Advanced Practice in Community Health Systems Nursing: Overview (3)** Seminar and practicum focusing on evidence-based approaches to community health systems nursing, integration and application of theories, and content related to social determinants of health and social justice. Emphasizes the development of advanced practice, leadership, and practice inquiry competence. Credit/no credit only. Offered: A.

**NCLIN 533 Advanced Practice in Community Health Systems Nursing: Culture (3)** Seminar and practicum focusing on evidence-based approaches to community health systems nursing, integration and application of theories, and content related to cultural issues affecting the health of individuals, populations, and communities. Emphasizes the development of advanced practice, leadership, and practice inquiry competence. Credit/no credit only. Offered: W.

**NCLIN 534 Advanced Practice in Community Health Systems Nursing: Assessment (3)** Seminar and practicum focusing on evidence-based approaches to community health systems nursing. Includes integration and application of theories and content related to the assessment and appraisal of communities and populations. Emphasizes the development of advanced practice, leadership, and practice inquiry competence. Credit/no credit only. Offered: Sp.

**NCLIN 535 Advanced Practice in Community Health Systems Nursing: Policy (4)** Seminar and practicum focusing on evidence-based approaches to community health systems nursing. Includes integration and application of theories and content related to health-related organizational and public policy that promotes health equity. Emphasizes the development of advanced practice, leadership, and practice inquiry competence. Credit/no credit only. Offered: A.

**NCLIN 536 Advanced Practice in Community Health Systems Nursing: Health Systems (4)** Seminar and practicum focusing on evidence-based approaches to community health systems nursing. Includes integration and application of theories and content related to systems level models of practice to service delivery among communities and populations. Emphasizes the development of advanced practice, leadership, and practice inquiry competence. Credit/no credit only. Offered: W.

**NCLIN 540 Infant Mental Health Practice: Parent Child Relationships and Intervention (3-6, max. 18)** Focuses on reflective practice, relationship-based consultation, and therapeutic interventions with infants/toddlers and caregivers. Students complete required clinical practicum at assigned community sites for three quarters. . Credit/no credit only. Prerequisite: admission to Infant Mental Health certificate program. Offered: AWSpS.

**NCLIN 541 Advanced Practice Specialist Clinical Practicum (1-10, max. 10)** Apply, synthesize, evaluate, and communi-

cate knowledge about a specific domain of advanced medical/surgical or forensics nursing practice. Emphasis is on specialization and role development. Prerequisite: Related sciences (CNS, NE, APGN, ID-CNS, IC-APN), or NURS 509 and NURS 585; or permission of instructor.

**NCLIN 542 Advanced Practice Specialist Clinical Practicum II (1-10, max. 10)** Apply, synthesize, evaluate, and communicate knowledge about a specific domain of advanced medical/surgical or forensics nursing practice. Fieldwork emphasizes greater depth/complexity/independence in specialization and role development. Seminars emphasize critical analysis of role-related issues. Capstone experience for clinical practicum. Credit/no credit only. Prerequisite: NCLIN 541.

**NCLIN 543 Advanced Practice Specialist Clinical Practicum III (1-10, max. 10)** Apply, synthesize, evaluate, and communicate knowledge about a specific domain of advanced medical/surgical or forensics nursing practice. Role development within specialty context. Emphasis is on critical analysis of leadership-related issues. For students in final clinical, serves as capstone. Credit/no credit only. Prerequisite: NCLIN 542.

**NCLIN 544 Advanced Practice Specialist Clinical Practicum IV (1-10, max. 20)** Apply, synthesize, evaluate, and communicate knowledge about a specific domain of advanced medical/surgical or forensics nursing practice. Fieldwork serves as capstone experience. Seminar emphasis is on consultation and collaboration. Credit/no credit only. Prerequisite: NCLIN 543.

**NCLIN 546 Management of Acute and Chronic Wounds (2-3)** Evaluation and treatment of acute and chronic wounds. Includes wound healing physiology, pathophysiology, patient evaluation, evaluation of environmental and systemic factors related to risk of impaired healing, methods for assessing wound progress, and evidenced based treatment options. Optional one credit clinical and lab experience.

**NCLIN 549 Nurse Practitioner Clinical Practicum I: Adults/Older Adults (1-10, max. 10)** Clinical fieldwork and seminar in advanced nursing practice with individual/groups. Students practice under clinical preceptor supervision. Focuses on data collection/critical thinking related to health status and threats to health, incorporating knowledge from the biological, behavioral, and social sciences. Credit/no credit only. Prerequisite: permission of instructor, or NCLIN 501 or equivalent.

**NCLIN 550 Nurse Practitioner Clinical Practicum II: Adults/Older Adults (1-10, max. 10)** Clinical fieldwork and seminar in advanced practice nursing. Builds on NCLIN 549, emphasizing critical thinking related to the differential diagnosis/management of health problems and human responses. Students practice under clinical preceptor supervision. Addresses selected role issues in advanced practice nursing. Credit/no credit only. Prerequisite: NCLIN 549 or permission of instructor.

**NCLIN 551 Advanced Practice Nursing Clinical Practicum III: Adults/Older Adults (1-10, max. 10)** Clinical fieldwork and seminar in advanced practice nursing. Builds on NCLIN 550, emphasizing the integration and application of previous learning in the care of people with multiple health problems. Students practice under preceptor supervision. Addresses selected role issues in advanced practice nursing. Credit/no credit only. Prerequisite: NCLIN 550 or permission of instructor.

**NCLIN 552 Nurse Practitioner Clinical Practicum IV: Adults/Older Adults (1-10, max. 10)** Intensive clinical experience in which students integrate previous learning to assume responsibility for care of older adults and/or adults with multiple health problems. Students practice as an advanced practice nurse supervised by a preceptor, assuming increasing responsibility for planning/implementing therapies and for documenting/evaluating outcomes. Credit/no credit only. Prerequisite: NCLIN 551.

**NCLIN 553 Seminar in Primary Care I: Health Promotion (2/3, max. 3)** Clinical application of major theories of health promotion, risk assessment, health behavior change, and disease prevention across the age span. Emphasizes

an evidence-based approach, with consideration of cultural, socio-economic, and diversity factors. Includes clinical practicum.

Prerequisite: NURS 552, which may be taken concurrently; permission of instructor.

**NCLIN 556 Seminar in Primary Care II: Evidence Based Management of Common Health Concerns (3-5)** Examines clinical application of theories of illness management across the age span. Emphasizes an evidence-based approach to assessment, differential diagnosis, and management with consideration of cultural, socio-economic and diversity factors. Utilizes technology to support clinical decision-making. Includes clinical practicum. Taught in conjunction with NURS 518. Credit/no credit only. Prerequisite: graduate standing and permission of instructor.

**NCLIN 557 Seminar in Primary Care III: Evidence Based Management of Common Health Concerns (3-4)** Examines clinical application of theories of illness management across the age span. Emphasizes an evidence-based approach to assessment, differential diagnosis, and management with consideration of cultural, socio-economic and diversity factors. Utilizes technology to support clinical decision-making. Identifies opportunities for leadership and inquiry in clinical practice. Credit/no credit only. Prerequisite: graduate standing and permission of instructor.

**NCLIN 559 Seminar in Primary Care IV: Management of Common Health Concerns (4-6, max. 6)** Examines clinical application of theories of chronic illness management across the age span. Emphasizes evidence based approach to assessment, differential diagnosis, skill development, and management considering cultural, socio-economic, and diversity factors. Focuses on chronic care model, coordination of care, poly drug therapy, and technology support for clinical decisions. Includes clinical practicum. Credit/no credit only. Prerequisite: permission of instructor.

**NCLIN 560 Seminar in Primary Care V: Complex Clinical Decision Making ([1-11]-, max. 11)** Clinical practicum and primary care seminar focuses on evidence based approach to assessment and management of complex, multi-problem patient/family situations across the age span. Special attention to synthesizing practice, leadership, and inquiry in advanced practice. Credit/no credit only. Prerequisite: NCLIN 553; NCLIN 556; NCLIN 557; and NCLIN 559 or permission of instructor.

**NCLIN 562 Professional Interpersonal Styles of Communication with Families to Enhance Health Outcomes (3)** Complex communication processes evaluated and applied to the family as unit of interaction within interdisciplinary context. Empirical based communication practices analyzed considering family variables adherence, satisfaction, health outcomes, and cost effectiveness. Engagement in experiential learning through challenging clinical scenarios. Emphasizes cultural competencies. Prerequisite: professional student or permission of instructor.

**NCLIN 566 Advanced Clinical Practicum in Psychosocial Nursing (1-9, max. 20)** Seminar and practicum focus on development of advanced clinical and role-function skills. Practicum in settings with select populations under supervision of expert clinicians. Seminars use evidenced-based practice criteria to integrate cases into discussion. Credit/no credit only. Prerequisite: NURS 570, NURS 564, one theory course, or permission of instructor.

**NCLIN 570 Practicum in Adult Psychosocial Assessment (2)** Under supervision of faculty/preceptors from clinical agencies, students use evidence-based practice criteria to assess individuals, groups, and families. Students gain skills in psychosocial interviewing, mental status examinations, and assessing psychosocial variables by standardized instruments and clinical interview. Credit/no credit only. Prerequisite: NURS 549 or permission of instructor.

**NCLIN 572 Practicum in Physical Assessment (2)** Physical health assessment in practicum with the opportunity to refine skills in taking a complete health history and in performing physical examinations in a clinical setting. Credit/no credit only. Prerequisite: either NCLIN 500; 501, or permission of instructor.

**NCLIN 573 Advanced Field Study in Family Nursing (2-9, max. 9)** Advanced practice development in direct care, consultation, and/or care coordination with individual families or groups of families across the life span. Opportunities provided to strengthen interpersonal therapeutic process skills, family nursing approaches relevant to family health promotion, problematic family health patterns. Prerequisite: concurrent registration in NURS 572, NCLIN 574; recommended: NURS 571.

**NCLIN 599 Independent Study Clinical Practicum (1-12, max. 25)** Clinical practicum to develop advanced-practice nursing skills in care of individuals, groups, communities, or care systems. Individually arranged with faculty member for application of theory and principles to direct care, consultation, education or care coordinator roles. Prerequisite: matriculated MN, DNP students or post-masters student, and permission of academic adviser and instructor. Offered: AWSpS.

**NCLIN 798 Tripartite Immersion Practicum (1-12, max. 12)** Practicum to enhance and expand student competencies for articulating and enacting the tripartite role in a practice setting (practice inquiry, advanced practice, leadership) relevant to the student's advanced practice nursing specialty and doctoral program. Credit/no credit only. Prerequisite: permission of instructor and supervisory committee. Offered: AWSpS.

## Nursing Methods

**NMETH 403 Introduction to Research in Nursing (3)** Organization of the structure of nursing knowledge through research. Concepts and processes of research utilized in the investigation of nursing science.

**NMETH 499 Undergraduate Research (1-5, max. 12)** Supervised individual scholarly inquiry on a specific nursing problem.

**NMETH 520 Scholarly Inquiry for Nursing Practice (4)** Killien, Schepp, Simpson Analyzes conceptual, theoretical, and empirical knowledge as a basis for evidence-based practice. Examines methodological approaches to scholarly inquiry and research applied to nursing practice. Evaluates role of advanced practice nurses in research. Offered: AWS.

**NMETH 521 Methods of Research in Nursing (2)** Continuation of 520, with emphasis on methods of research applied to the solution of problems in all fields of nursing.

**NMETH 522 Data Management for Research Professionals (4)** Surveys industrial strength data management, using techniques applicable to multi-center, longitudinal research trials with survey instruments. Involves challenges research professionals face as they graduate from a student project to a study with hundreds of cases, variables, multiple survey instruments and a staggered, repeated sampling protocol. Credit/no credit only.

**NMETH 523 Project Management and System Analysis for Health Informatics (3)** Masuda Overview of information technology project management principles as contained within the Project Management Body of Knowledge (PM-BOK) and the Systems Development Life Cycle within formal Systems Analysis. Offered: A.

**NMETH 524 Healthcare Information Systems and the Electronic Health Records (3)** Masuda, Murphy Overview and analysis of healthcare informatics issues, including patient safety and Information Technology (IT), infrastructure, clinical systems, definitions and functions of EHR systems, IT leadership in health care organizations, informatics change management, including key user roles evaluating EHR and workflow changes. Offered: W.

**NMETH 526 Patient-Centered Interactive Health Communication Technologies(3)** Overview of current and emerging consumer-centric eHealth tools and technologies. Researchers and practitioners from multiple disciplines present theories, concepts, and principles from health, information, cognition, and human-factors sciences as they relate to development and use of these tools and technologies.

**NMETH 527 Introduction to Health Informatics and Systems Thinking (3)** Masuda, Oyler Examines how informatics aids in the transformation of healthcare delivery and how to most effectively use the theories and best practices in informatics toward building and deploying informatics solutions. Offered: A.

**NMETH 528 Computing Concepts: From Theory to Application (3)** Johnson Survey of conceptual and applied computing concepts. Conceptual topics include a global survey of hard/software, networking, information systems analysis/design, and programming. The applied component emphasizes desktop system management skills and the creative use of spreadsheets to enhance personal productivity. Offered: W.

**NMETH 529 Database Concepts and Applications in Clinical Informatics (3)** Oyler Introduction to relational database theory and technology from a health informatics perspective. Focuses on transactional database theory, architecture and implementation in a socio-technical context. Analyses database applications used in clinical environments. Introduces knowledge bases and data warehouses. Prerequisite: NMETH 528. Offered: Sp.

**NMETH 530 Proposal and Project Development (3/5)** Jarret, Killien, Schepp, Simpson Focuses on the application of methods of inquiry to develop a scholarly proposal through faculty-guided small group discussion and individual composition. Students select project option to complete the conceptual phase and most activities to fulfill their plan. Prerequisite: NMETH 520. Offered: AWSpS.

**NMETH 532 Developing an Evidence Base for Complementary and Alternative Medicine Practices (2/3)** Berry, Booth-LaForce, Brandt, Magyary Focuses on skill enhancement for evaluation CAM-related evidence and the implications for translating evidence to practice. Examines the challenges of CAM studies and describes strategies for improvement. Examines factors such as environment, culture, provider-patient relationship, and personal characteristics influencing research. Prerequisite: NMETH 520 or equivalent. Offered: WSpS.

**NMETH 533 Appraising Evidence for Clinical Practice (4)** Teaches skills for evaluating and appraising health related evidence for clinical practice. Develops advanced competency in searching and evaluating literature. Examines the merits of different types and levels of evidence; analyzing the generalizability and implications for clinical practice. Prerequisite: basic statistics course, NMETH 520, or equivalent. Offered: AWSpS.

**NMETH 534 Translating Evidence to Clinical Practice: Conceptual, Methodological and Clinical Issues (4)** Examines conceptual, methodological, clinical and policy issues associated with translating evidence to practice. Translation of best evidence, including clinical guidelines, evaluated for impact on quality improvement, safety, accessibility, cost effectiveness, health status and quality of life. Addresses contextual challenges. Prerequisite: permission of instructor; either basic statistics course, NMETH 520, or NMETH 533. Offered: AWSpS.

**NMETH 570 Seminar in Clinical Research in Nursing (3)** Philosophy, problems of design; use of criterion measures in terms of patient care.

**NMETH 575 Methodological Issues in Family Research (3)** Emphasizes research with the family as unit of analysis. Examines patterns of family functioning in relation to responses to health situations. Reviews family units from generational and intergenerational perspectives. Critiques methods assessing dyadic and triadic relationships and therapeutic interventions on family outcomes. Prerequisite: permission of instructor.

**NMETH 579 Research Design and Methods in Nursing Science (4)** Focuses on elements of rigorous research designs and methods commonly used in nursing science; including descriptive, explanatory, predictive and experimental and quasi-experimental designs, concepts of validity and reliability, and integration of design with analytical approaches for clinical research.

**NMETH 580 Methodological Perspectives in Nursing Inquiry**

**(3)** Allows students to translate philosophical and theoretical perspectives into research methodologies. Foci includes the relationship of theoretical perspectives to methodologies; the methodological issues among and between varying schools of thought such as interpretive/postmodern, critical/feminist, and contemporary empiricist; and how the methodologies influence choices of research design and methods.

**NMETH 581 Observational Research Methods (2–6, max. 6)**

Examines observational methods for conducting verbal and nonverbal behavioral research. Emphasizes critical analysis and rigor in research question formulation, measurement decisions, coding scheme development, data collection, and analysis and interpretation of data. In-depth application of observational method optional. Prerequisite: graduate standing and basic research methods course or permission of instructor. Offered: W.

**NMETH 582 Interpretative Methods in Nursing Research**

**(4-)** Seminar and field practicum for interpretative research methods. Study on health-related issues using a selected tradition in interpretative methods. Prerequisite: permission of Instructor.

**NMETH 583 Interpretative Methods in Nursing Research**

**(4)** Seminar and field practicum for interpretative research methods. Study on health-related issues using a selected tradition in interpretative methods. Prerequisite: permission of Instructor.

**NMETH 584 Methods: Physiologic Measures (4)** Exploration of the measurement of physiologic functioning in human and animal models. Examples include biochemical and biophysical measure. Students develop beginning skills with one physiologic measure. Prerequisite: physiology and chemistry and permission of instructor.

**NMETH 585 Meta-Analysis (4)** Meta-analysis examined as a method to synthesize research. Overview of meta-analytic methods; description of the collection, analysis, synthesis, and reporting of studies; explanation of statistical calculations; and discussion of reliability and validity measures incorporated into meta-analytic design. Prerequisite: permission of instructor.

**NMETH 586 Instrument Development and Testing (4)**

Includes measurement theory, reliability, validity, level of measurement, and the process of scale development, modification, or translation. Students learn to evaluate, develop, modify, translate, and test instruments for use in research. Prerequisite: student in health science discipline and permission of instructor.

**NMETH 587 Methods of Theory Testing: Causal Modeling with Path Analysis and Structural Equation Modeling (4)**

Includes causal inferencing and theory testing through causal modeling with path analysis and structural equations modeling. Students learn to evaluate theory models and to apply the content by developing and testing models. Prerequisite: student in health science discipline and permission of instructor.

**NMETH 590 Special Topics in Nursing Research (2–5, max. 9)**

Examination of a specific research method, with evaluation of appropriateness, efficiency, rigor of measurement, and potential for inference for nursing research. Prerequisite: minimum of 5 credits of basic nursing research methodology at graduate level and permission of instructor.

**NMETH 591 Clinical Outcome Research I (4)**

Examination of philosophical, analytical, and methodological decisions and processes in evaluating the effectiveness of interventions and programs designed to enhance health outcomes. Alternative designs are addressed in consideration of underlying assumptions about prevention/causation research; clinical human phenomena; design sensitivity; and threats to validity. Theory development emphasized. Prerequisite: permission of instructor.

**NMETH 592 Clinical Outcome Research II (2–4, max. 4)**

Application and evaluation of philosophical, methodological, and analytical concepts and issues examined in 591. Two modules are offered: a) case study and small-n studies

and b) large-n studies. Students demonstrate application of decision-making process involved in development of clinical outcome study. Prerequisite: permission of instructor.

**NMETH 593 Time Series and Sequential Analysis (4)**

Basic introduction to terminology and methods of time series and sequential analysis as applicable to nursing-relevant processes in the form of samples of interval and categorical data collected over time; autocorrelation, autoregression, spectrum, socinor, Markovian, lag sequential, and log-linear analyses. Development of practical analysis skills on real data sets. Prerequisite: permission of instructor. Credit/no credit only.

**NMETH 598 Special Projects ([1–12]-, max. 12)**

Fulfills the requirements of the non-thesis option for Master's students in nursing. Projects involve scholarly inquiry with in-depth focused analysis, culminating in a written product/report for dissemination. Credit/no credit only. Prerequisite: NMETH 520 or permission of instructor.

**NMETH 600 Independent Study or Research (\*)** Credit/no credit only.

**NMETH 700 Master's Thesis (\*)** Credit/no credit only.

**NMETH 799 Capstone Clinical Investigative Project ([1–12]-, max. 28)**

Capstone project reflects culmination practice inquiry knowledge and competencies. Students collaborate with clinicians, consumers, faculty or fellow students to examine clinical questions which involve translating evidence to practice, and ultimately informs and influences care and enhances health outcomes. Credit/no credit only. Prerequisite: permission of supervisory committee. Offered: AWSpS.

**NMETH 800 Doctoral Dissertation (\*)**

Credit/no credit only. Prerequisite: permission of Supervisory Committee chairperson or Graduate Program Coordinator.

# School of Pharmacy

## SCHOOL OVERVIEW

### Dean

Thomas A. Baillie

### Associate Deans

Nanci L. Murphy

Stanley S. Weber

Established in 1894, the UW School of Pharmacy is proud of its strong commitment to excellence and the recognition given to its faculty, students, and graduates for their outstanding educational, research, and service activities. The School's Dean's Office and three departments - Medicinal Chemistry, Pharmaceuticals, and Pharmacy - are located in the H-Wing of the Health Sciences Building and the South Campus Center. The School is a member of the American Association of Colleges of Pharmacy and its programs are accredited by the Accreditation Council on Pharmacy Education.

## ENTRY-LEVEL DOCTOR OF PHARMACY PROGRAM

The School of Pharmacy offers a four-year program leading to the entry-level Doctor of Pharmacy (Pharm.D.) degree. The curriculum of the Pharm.D. program is designed to provide students the scientific background and clinical skills necessary to take the North American Pharmacist Licensure Examination (NAPLEX) and the Multistate Pharmacy Jurisprudence Examination (MPJE) to enter professional practice.

Limited class enrollment allows for individualized attention from instructors while students still enjoy the benefits of attending a large university. Instructional methods emphasize the critical thinking, problem-solving, and clinical skills necessary to provide rational drug therapy, reduce medication-related problems, promote healthy lifestyles and disease prevention, optimize health outcomes, enhance patient adherence, and render care in a changing health-care system. The School fosters a commitment to life-long learning and provides an environment where students develop the knowledge, attitudes, and skills consistent with the profession's high standards.

### Admission

Admission is for autumn quarter only. Applicants who are current UW students or who are considered admissible to UW are not assured admission. Admission is competitive, based on a number of factors including cumulative and prerequisite GPA's, PCAT scores, written communication skills as demonstrated in application essays and an on-site pre-interview essay, interview results, and review of all application materials. Competitiveness varies from year to year, depending on size and strength of the applicant pool.

Because of limits on enrollment, the School cannot admit all qualified applicants. On average, over 600 students apply each year for 86 generally available positions. Admission is contingent upon satisfactory completion of all prerequisites, eligibility to obtain a Washington State Pharmacy Intern Certificate, and satisfactory results on the Criminal Background Check and Conviction/Criminal History Information Form. Accepted students are required to meet the University and Health Sciences immunization requirements.

After a preliminary assessment of the applicant pool, based on completeness of the application, review of all application materials, prerequisite and cumulative GPA thresholds and PCAT score thresholds, the most qualified applicants are invited for an interview in Seattle with mem-

bers of the Pharm.D. Admissions Committee. Preference is given to residents of Washington State and residents from states participating in the Western Interstate Commission for Higher Education (WICHE) Pharmacy Student Exchange Program (Alaska, Hawaii, and Nevada). Applicants who meet or exceed GPA and PCAT minimum thresholds are not guaranteed an interview. Offers of interview are dependent on the size and competitiveness of the applicant pool. The School of Pharmacy includes a pre-interview writing skills assessment as part of the Pharm.D. admission process.

Further information on admission requirements, application procedures, and program content is available from the School of Pharmacy Office of Academic and Student Programs or at [depts.washington.edu/pha/students/](https://depts.washington.edu/pha/students/).

## GRADUATE PROGRAMS

To foster the interests of students who seek to engage in creative discovery and research, the School also offers graduate education leading to the PhD degree in medicinal chemistry and pharmaceuticals, and an MS/PhD in pharmaceutical outcomes research and policy. The School also offers a concurrent Pharm.D./Ph.D program degree in either pharmaceuticals or medicinal chemistry. In addition, the School offers an MS degree in biomedical regulatory affairs, and also offers, in partnership with Educational Outreach, a certificate program in biomedical regulatory affairs.

## Medicinal Chemistry

### DEPARTMENT OVERVIEW

The Department of Medicinal Chemistry offers programs of graduate study leading to the degrees of Master of Science and Doctor of Philosophy. The primary mission of the program is to train versatile scientists for careers in the pharmaceutical and medical sciences. To this end, graduates of the program acquire a broad knowledge base in medicinal chemistry, pharmacology, and biochemistry, which is important in the rapidly evolving, multidisciplinary biomedical arena. The department further offers diverse opportunities for research at the interface between biology and chemistry, with emphasis on issues of biomedical importance.

Graduates of the program acquire the skills necessary to develop quantitative and qualitative methodologies necessary for the study of biochemical processes that occur at the cellular and subcellular levels. These include the elucidation of biochemical transformations and interactions using techniques such as protein engineering, and a broad array of supportive spectroscopic techniques including mass spectrometry and NMR.

One major area of research interest is the role of biotransformation processes in the toxicification and detoxification of drugs and environmental contaminants. A second area of interest is the determination of protein and small ligand structure and function using, NMR, mass spectroscopy, and other biophysical techniques. Issues of biomedical importance include elucidation of mechanisms of drug-induced cell toxicity, drug-drug and drug-herbal interactions, identification of enzyme attributes that dictate substrate specificity and catalytic mechanism, pharmacogenetics, proteomics and mechanisms of viral assembly.

Most students proceed directly to the doctoral degree program. Successful completion of a series of cumulative examinations and at least two quarters of teaching experience are among the requirements for completion of the doctoral program.

## GRADUATE PROGRAM

### Graduate Program Coordinator

H164 Health Sciences, Box 357610

206-543-2224

[medchem@uw.edu](mailto:medchem@uw.edu)

### Admission Requirements

Students with undergraduate degrees in pharmacy or in the biological or physical sciences are accepted for graduate study in medicinal chemistry. Undergraduates who plan to pursue graduate study are encouraged to expedite their programs by selection of pertinent electives. Although the choice of electives varies with the student's ultimate goals, graduate study in medicinal chemistry requires an adequate background in biological and physical sciences.

### Degree Requirements

#### Master of Science

At least 27 credits of coursework, inclusive of thesis and non-thesis research, including a research project, preparation of an acceptable thesis, and passing a final examination.

#### Doctor of Philosophy

90 credits minimum, to include:

Achieve a level of proficiency in organic, medicinal and physical chemistry, pharmacology, biochemistry, and molecular biology. Most coursework is completed in the first two to two-and-a-half years. The program is flexible and easily adaptable to meet individual interests and needs.

In the first year, students rotate through the laboratories of at least two faculty members. At the end of the first year, the student chooses a faculty sponsor and a dissertation research project.

- *First year:* CHEM 530, CHEM 531, CHEM 532 (3, 3, 3); MEDCH 501, MEDCH 502, MEDCH 503 (4, 4, 4); MEDCH 520 (1 credit each quarter); MEDCH 582 (1 credit each quarter); MEDCH 600
- *Second year:* BIOC 530 (3); MEDCH 527 (3) MEDCH 541 (3); PHCOL 510, (2) PHCOL 511 (2); MEDCH 520 (1 credit each quarter); MEDCH 582 (1 credit each quarter); MEDCH 600
- *Third year:* MEDCH 520 (1 credit each quarter); MEDCH 582 (1 credit each quarter); MEDCH 600 (7 credits each quarter)
- *Fourth year:* MEDCH 700 or MEDCH 800

### Financial Aid

Financial support in the form of research assistantships and fellowships may be available to students in good standing throughout their graduate careers. Availability of financial support varies from year to year, and prospective applicants should contact the graduate program coordinator for additional information.

## COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at [www.uw.edu/students/crscat/](http://www.uw.edu/students/crscat/)

**MEDCH 400 Fundamental Concepts in Medicinal Chemistry (3)** W. Nelson Principles of physical organic chemistry; chemical bonding, stereochemistry, acids/bases, and reaction mechanisms relevant to processes such as drug distribution, specificity, and metabolism. Prerequisite: either CHEM 239 or CHEM 337. Offered: A.

**MEDCH 495 Special Studies in Medicinal Chemistry (\*, max. 6)** Opportunity to expand the breadth and depth of

understanding in specific areas. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSpS.

**MEDCH 499 Independent Study/Research (\*, max. 24)** Research problems in medicinal chemistry. Prerequisite: cumulative GPA of 2.50 and permission of instructor. Offered: AWSpS.

**MEDCH 501 Advanced Medicinal Chemistry (4)** *S. Nelson* Advanced study of the various classes of medicinal compounds, with particular emphasis on biological activity, mechanism of action, biotransformation, and the structural and physical properties governing absorption, distribution, and excretion. Prerequisite: permission of instructor. Offered: AWSp.

**MEDCH 502 Advanced Medicinal Chemistry (4)** *W. Nelson, Rettie* Advanced study of the various classes of medicinal compounds, with particular emphasis on biological activity, mechanism of action, biotransformation, and the structural and physical properties governing absorption, distribution, and excretion. Prerequisite: permission of instructor. Offered: AWSp.

**MEDCH 503 Advanced Medicinal Chemistry (4)** *Atkins, W. Nelson* Advanced study of the various classes of medicinal compounds, with particular emphasis on biological activity, mechanism of action, biotransformation, and the structural and physical properties governing absorption, distribution, and excretion. Prerequisite: permission of instructor. Offered: AWSp.

**MEDCH 520 Seminar (1, max. 30)** Graduate students attend seminars and make one formal presentation per year while in residence; maximum of three presentations. Credit/no credit only. Offered: jointly with PCEUT 520; AWSpS.

**MEDCH 521 Advanced Medicinal Chemistry (3)** *Atkins, W. Nelson* Application of integrated data from the physical and biological sciences to problems of chemotherapy, including transport of drugs to site of action, biotransformation of drugs, interaction of drugs with enzyme systems, and recent advances in drug design. Prerequisite: CHEM 457, CHEM 531, and BIOC 442, or permission of instructor. Offered: Sp.

**MEDCH 525 Alternative and Complementary Medicines (2)** *Elmer* Study of popular alternative and complementary medicines used in the United States. Focus on herbal products with some coverage of homeopathic and other non-nutritional dietary supplements. Demonstration of resources for current objective information on these controversial medicines. Credit/no credit only. Offered: A.

**MEDCH 528 Biophysical Enzymology and Biopharmaceuticals (3)** Covers in-depth treatment of chemical catalysis and transition state theory as related to enzyme mechanisms; thermodynamics and kinetics of protein-ligand interactions, protein-protein-interactions and protein-lipid interactions, and methods for their study. Discusses therapeutically relevant examples, including viruses, therapeutic antibodies, and drug targets. Offered: W; even years.

**MEDCH 530 Mass Spectrometry of Drugs, Toxicants, and Metabolites (3)** *Goodlett* Current approaches to the combination of liquid chromatography with mass spectrometry for small molecules. Mass spectrometry of drugs, toxicants, metabolites. Emphasis on interpretation skills, with problem sets each week. Introduction to LC/MS instrumentation. Ionization methods appropriate for small molecules. Capillary LC/MS and capillary electrophoresis. Offered: even years; Sp.

**MEDCH 535 P-Diagnostic Medicinal Chemistry (3)** *S. Nelson* Examination of clinical diagnostic tests with regard to the chemical or biochemical rationale of the testing method, interpretation of test results, and major factors influencing test values with special emphasis on the effects of medications. Clinical laboratory data from patients considered in light of these factors. Prerequisite: MEDCH 571, BIOC 406, or equivalent, or permission of instructor. Offered: W.

**MEDCH 541 Mass Spectrometry Based Proteomics (3)** *Goodlett* Covers basics of sample preparation, data generation, instrumentation, ionization, and data interpretation of peptide tandem mass spectra manually. Uses database search engines and bioinformatics in systems biology re-

lated proteomics. Prerequisite: MEDCH 530 or permission of instructor. Offered: odd years; Sp.

**MEDCH 550 Mechanistic Studies in Medicinal Chemistry (1)** *S. Nelson* Discussion of research strategies and methods used to carry out studies of mechanisms of drug action, metabolism, and toxicities. Emphasis is on problem solving through theoretical and experimental approaches and on data analysis and interpretation. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSpS.

**MEDCH 551 Flavin and Heme-Containing Monooxygenases (1)** *Rettie* Discussion of research strategies and methodologies concerning the structure, function, and polymorphic expression of human monooxygenases, especially the cytochrome P450s and flavin-containing monooxygenases. Emphasis placed on experimental problem solving, data analysis, and presentation. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSpS.

**MEDCH 552 Medicinal Chemistry Aspects of Drug Action and Drug Metabolism (1)** *W. Nelson* Discussion of research strategies, methodologies, and literature concerning the mechanisms of drug action and drug metabolism, particularly as these apply to opiate drugs and beta blockers. Emphases placed on problem solving, data analysis, and presentation. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSpS.

**MEDCH 553 Structure and Function of Macromolecular Protein Assemblies (1)** *Atkins* Discussion of research strategies, methods, and current literature concerning macromolecular self-assembly processes and protein-protein interactions as they relate to biological specificity. Emphasis on experimental approaches used in current literature. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSpS.

**MEDCH 554 The Mechanism of Action and Pharmacokinetics of Biotherapeutic Agents and Other Natural Products (1)** *Elmer* Discussion of the literature, research possibilities, and questions that need to be addressed in the area of the application of microorganisms and other natural products for therapeutic purposes. Emphases on problem solving, research strategies, literature evaluation, and data analysis. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSpS.

**MEDCH 555 Current Topics in Biological Mass Spectrometry (1)** *Goodlett* Emphasis on applications in the area of protein toxins, bioactive peptides, and microbial diseases and on current developments in the use of small scale separations with mass spectrometry. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSpS.

**MEDCH 556 Clinical and Mechanistic Aspects of Drug Metabolism (1)** *Totah* Discussion of research methodologies and new approaches to elucidate chemical mechanisms and enzymology of reactions catalyzed by cytochrome P-450. Emphasis on clinical applications and predicting in vivo drug behavior and toxicity. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSpS.

**MEDCH 558 Human Cytochrome P-450 Biochemistry (1)** *Kunze* Presentation and discussion of research strategies and methodologies related to current problems in human drug metabolism by cytochrome P-450 enzymes. Emphasis on hypothesis testing and experimental problem solving in the areas of enzyme kinetics and mechanism. Credit/no credit only. Prerequisite: permission of instructor. Offered: even years; AWSpS.

**MEDCH 559 Molecular Motors (1)** *Catalano* Discussion of molecular motors, particularly those associated with virus assembly pathways. Emphasizes kinetic, biochemical, and biophysical approaches to dissect the molecular mechanisms of motor function. Offered: AWSpS.

**MEDCH 561 P-Immunizing and Antimicrobial Agents (4)** *Lee* Chemical and biologic properties of agents used to prevent or treat infectious diseases, including diagnostic, prophylactic, and therapeutic uses of immunizing biologicals and spectrum, action mechanisms, resistance patterns, toxicity, and therapeutic applications of antibiotics, antifungals, and antivirals. Prerequisite: MICROM 301, MICROM 302,

MEDCH 570, or equivalent, PharmD major, or permission of instructor. Offered: Sp.

**MEDCH 562 P-Medicinal Chemistry (3)** *S. Nelson* Study of the various classes of medicinal compounds with particular emphasis on biological activity, mechanism of action, biotransformation, and the structural and physical properties governing absorption, distribution, and excretion. Prerequisite: MEDCH 400 or satisfactory completion of qualifying exam. Offered: A.

**MEDCH 563 P-Medicinal Chemistry (3)** *W. Nelson, Rettie* Study of the various classes of medicinal compounds with particular emphasis on biological activity, mechanism of action, biotransformation, and the structural and physical properties governing absorption, distribution, and excretion. Prerequisite: MEDCH 400 or satisfactory completion of qualifying exam. Offered: W.

**MEDCH 564 P-Medicinal Chemistry (3)** *Atkins, W. Nelson* Study of the various classes of medicinal compounds with particular emphasis on biological activity, mechanism of action, biotransformation, and the structural and physical properties governing absorption, distribution, and excretion. Prerequisite: MEDCH 400 or satisfactory completion of qualifying exam. Offered: Sp.

**MEDCH 570 P-Medicinal Biochemistry I (3)** *Catalano* Introduction to biochemistry for Pharm.D. students with an emphasis on those aspects of biochemistry which are particularly relevant to understanding human disease and therapeutic intervention strategies. Offered: W.

**MEDCH 571 P-Medicinal Biochemistry II (3)** *Kunze* Continuation of discussions of those aspects of biochemistry which are particularly relevant to understanding human disease and therapeutic intervention strategies. Offered: Sp.

**MEDCH 582 Topics in Medicinal Chemistry (1, max. 30)** Discussion of pertinent articles from current literature. Credit/no credit only. Offered: AWSp.

**MEDCH 599 Cumulative Exams for Medicinal Chemistry (1)** Quarterly cumulative examinations for graduate students. Credit/no credit only. Offered: AWSpS.

**MEDCH 600 Independent Study or Research (\*)** Credit/no credit only. Offered: AWSpS.

**MEDCH 700 Master's Thesis (\*)** Credit/no credit only. Offered: AWSpS.

**MEDCH 800 Doctoral Dissertation (\*)** Credit/no credit only. Offered: AWSpS.

## Pharmaceutics

### DEPARTMENT OVERVIEW

The Department of Pharmaceutics offers programs of study leading to the Doctor of Philosophy degree.

#### Program Description

The doctoral degree program in pharmaceutics trains research scholars in the fundamental aspects of drug disposition and drug action. Drug disposition pertains to the facets of drug absorption, distribution, and elimination. Areas of emphasis include: drug delivery - processes for enhancing the absorption of a drug and targeting it to the site of action in order to improve therapeutic effect; drug metabolism - enzyme-catalyzed molecular transformations that often impart different disposition and pharmacological properties compared to the parent molecule; and drug excretion - the transport of drug molecules into excretory fluids such as the renal filtrate and bile. Pharmacokinetics is the study of the time course of these processes and its relationship to pharmacological effects. Students in the program gain expertise in basic biochemical, cellular, and molecular

techniques, quantitative analytical methods, and in the elaboration of mathematical models to describe the kinetics of drug disposition and action. Scientists graduating from this program are capable of investigating the causes of inadequate exposure to a drug at the target site. They are able to elucidate the relationship between the kinetics of drug and metabolites in various body compartments or tissues and the manifestation of pharmacologic, therapeutic, and toxic effects. They are also able to probe the effects of alteration of physiological and biochemical processes (which may occur due to disease states or genetic variations) on drug disposition and pharmacological response. Many of these studies require expertise with *in vitro* methodologies, which students also acquire. Often students gain experience in the conduct of pharmacokinetic and pharmacodynamic studies in animals and man.

Typically graduates interact with clinicians, medicinal chemists, biochemists, pharmacologists, analytical chemists, and physiologists. This is possible because their training is highly interdisciplinary at the didactic and research levels.

A wide range of career paths is available to graduates. Opportunities include research in the pharmaceutical industry; research in hospitals, institutes, and foundations; teaching and research in academic institutions; and positions with government regulatory agencies.

## GRADUATE PROGRAM

### Graduate Program Coordinator

H272 Health Sciences, Box 357610

206-543-9434

[pceut@uw.edu](mailto:pceut@uw.edu)

## Doctor of Philosophy

### Admission Requirements

- One copy of official transcripts in a sealed envelope from each college attended
- Official GRE score report
- All foreign students must take the TOEFL and TSE test and send in the official score report
- Statement of personal goals describing applicant's background, academic interests, and career objectives
- A résumé or curriculum vitae listing educational and employment history
- Three letters of recommendation from persons in a position to evaluate the applicant's potential for graduate school.

### Degree Requirements

Minimum 90 credits of coursework, to include:

- **Credits and Scholarship:** Minimum 41 credits of coursework, exclusive of thesis and non thesis research. 3.00 GPA in all numerically graded courses numbered 400 and 500. Minimum passing grade in any given course is 2.7, except required pharmaceuticals courses (PCEUT 501, PCEUT 502, PCEUT 503, PCEUT 506) in which a passing grade is 3.0. Credits earned for a master's degree may apply towards the doctoral degree.
- **Teaching Experience:** Minimum two quarters of teaching assistant experience. Students are not asked to assist more than one class an academic quarter (< 12 contact hours/week). Most students complete this requirement during the first three years in the program.
- **Examinations and Progress Evaluation:** A series of preliminary, cumulative (written) examinations; a General Examination (oral) for advancement to PhD

candidacy; a Final Examination (defense of the thesis). See Appendix A, "Progression Steps In Relation to the Doctoral Degree," for an overview. Appendix B describes the cumulative examination, which precedes the General Exam. Appendix C provides details about formation of a doctoral Supervisory Committee and its role in the General Exam and thesis defense. Appendix D provides details about the structure and conduct of the General Exam.

- **Master's Degree Bypass:** Students who qualify for continuation to the PhD degree may be allowed to bypass the MS degree. See Appendix A for petition procedure.
- **Seminars:** All students must present a minimum of two and a maximum of four seminars while in the doctoral program (PCEUT 520). In addition, a presentation of papers from current literature is required twice a year, starting at the beginning of the second year until defense of the thesis (PCEUT 583). See Appendix E, "Training in Oral Communication through Seminars and Journal Club" for additional details.
- **Didactic:** Coursework for the doctoral program is divided into four components: (a) prerequisites which define the level of entry into the program; (b) a required core program which is analogous to the major; (c) elective courses, which are not required but are encouraged; (d) seminars and literature review.
  - Prerequisites:
    - MATH 124 (5 credits)
    - MEDCH 400 (3 credits)

Applicants with a Pharm.D. degree should have fulfilled the medicinal chemistry requirement. MEDCH 400 can be taken in autumn quarter of the first year. Candidates are accepted on condition that any deficiencies in course requirements are rectified by the end of the first academic year.

- Core Program:
  - 506 (6 credits)
  - PCEUT 501 (5 credits)
  - PCEUT 502 (4 credits)
  - 503 (5 credits)
  - 510. PHCOL 511, PHCOL 512, PHCOL 513, (2 credits each)
  - BIOST 511(4 credits)
  - BIOST 512(4 credits)
  - TC 509 (3 credits)
  - PCEUT 600, PCEUT 800 (variable credit)

Students entering with previous graduate-level course work in the required areas may have some of the above courses waived. In addition, all students must attend the following training sessions, preferably during the first academic year: chemical safety, biological safety, and bioethics training. Radiation safety and animal care may also be required, if relevant to the student's thesis research.

- Directed Electives:
 

Electives are not required. However, students are encouraged to take elective courses that might benefit their thesis project and career goals. *Courses that might be of interest can be found in the disciplines of biotransformation/biochemistry, biologics/drug delivery, pharmacology/cell biology, and physiological modeling/biostatistics.*
- Seminars and Literature Review:
  - PCEUT 520 (1 credit/quarter; 3 quarters/year until graduation)

Beginning the second year, students make one presentation each year, with a maximum of four presentations. A general topic seminar is presented in the

second year; research presentations in subsequent years.

- PCEUT 583 (1 credit/quarter; 3 quarters/year until graduation)

Beginning the second year, students make two presentations each year until graduation. Journal club presentation is waived in the quarter during which the student is scheduled to make a PCEUT 520 seminar presentation.

### Research:

- PCEUT 600, PCEUT 800 (variable credit)

Students complete three research laboratory rotations (PCEUT 600, 2 credits), one per quarter, starting autumn quarter of their first year. A student may opt to complete a rotation in summer quarter, before the initiation of classes. This involves an early appointment in the department and, thus, decisions must be made at the time they accept the offer to enroll. Matching of available labs with each incoming student is facilitated by the first year graduate adviser. Student preferences are given due consideration.

Students must choose a thesis adviser by the end of spring quarter in their first academic year (See Appendix A for additional details).

Students must begin research in the lab of their adviser by summer quarter at the end of their first academic year (PCEUT 600, variable credit). Most students may find that after-class and off-hours are the best and most productive time for laboratory research (See Appendix A1b for additional details).

After successful completion of the master's bypass requirements (see Appendix A for details), students sign up for PCEUT 800 (variable credit), until the defense of their thesis.

### Cumulative Examination

Students begin taking cumulative exams in autumn quarter of their second academic year, and continue taking them at every offering until completion of pass requirements or until they take the maximum of eight exams. A total of eight exams are offered, two each in autumn, winter, spring, and summer quarters. For each exam, there two questions. Students must pass four of eight exams to complete the cumulative requirement. Students who do not achieve this goal are given the option of completing requirements for a terminal master's degree or withdrawal from the program.

## Financial Aid

All students in the program receive financial support in the form of research assistantships, Public Health Service predoctoral training fellowships, and other fellowships such as the William E. Bradley Graduate Fellowship or those from the American Foundation for Pharmaceutical Education or from several pharmaceutical companies.

**PCEUT 499 Undergraduate Research (1-6, max. 12)** Research problems in drug disposition, drug targeting, and drug development. Prerequisite: Cumulative GPA of 2.5 and permission of the instructor.

**PCEUT 501 Advanced Pharmacokinetics I (5)** *Ho, Shen, Unadkat* Drug absorption, distribution, excretion, metabolism, and effects in mammalian systems. Compartmental model and model-independent approaches examined. Drug disposition studied in a physiologically realistic context taking nonlinear events into account. Aimed at development of innovative methods for data analysis and evaluation in biological systems. Prerequisite: PCEUT 506 or PCEUT 532, or permission of instructor.

**PCEUT 502 Pharmacokinetics of Drug Metabolism (4)** *Kunze, Levy, Thummel* Advanced study of drug metabolism pharmacokinetics. Topics emphasize linear and nonlinear metabolic clearance kinetics, metabolite kinetics, *in vitro-in vivo* predictions, and drug-drug interaction kinetics. Prerequisite: PCEUT 506 or permission of instructor.

**PCEUT 503 Drug Transport and Delivery (5)** *Ho, Hu, Mao, Shen, Unadkat, Wang* Provides advance knowledge of the physico-chemical and biological concepts underlying in vivo transport and delivery of drugs. Prerequisite: PCEUT 506.

**PCEUT 506 Pharmacokinetic Principles (6)** *Isoherranen* Covers the fundamentals of pharmacokinetics. Includes lectures and laboratory exercises on the key concepts in pharmacokinetics, including compartmental kinetics, clearance, protein binding, bioavailability, pharmacodynamics, clinical pharmacokinetics, and Michaelis-Menten kinetics.

**PCEUT 510 Drug Interactions (3)** *Collins, Horn, Shen, Thummel* Covers common pharmacokinetic mechanisms underlying clinically important interactions between drugs, and patient- and drug-related factors that predispose a patient to adverse drug effects. Includes case-based discussion of approaches to identification, clinical evaluation, and clinical management of drug-drug interaction risk. Prerequisite: PHARM 560; PHARM 561; PHARM 563; and PHARM 564.

**PCEUT 513 Basic Concepts in Pharmacogenetics and Toxicogenomics (3)** *Eaton, Thummel* Addresses current DNA sequencing and genotyping approaches, and basic concepts of pharmacogenetics and toxicogenomics. Emphasis placed on applications of genomic technologies to the understanding of "gene-environment interactions" that cause diseases of public health importance, including cancer, chronic neurological diseases, and adverse drug reactions. Prerequisite: GENET 372 or equivalent. Offered: jointly with ENV H 513/PHG 513.

**PCEUT 520 Seminar (1, max. 30)** *Kelly* Graduate students attend seminars and make one formal presentation per year while in residence; maximum of three presentations. Credit/no credit only. Offered: jointly with MEDCH 520.

**PCEUT 531 P-Pharmaceutical Formulation: Principles and Dosage Forms (4)** *Bloedow, Lee, Link, Mao* Physicochemical principles involved in formulating stable dosage forms suitable for human administration. Hands-on laboratory experience with formulating extemporaneous preparations routinely encountered in community and hospital pharmacies.

**PCEUT 532 P-Clinical Pharmacokinetics (5)** *Anderson, Levy, Isoherranen* Basic principles of pharmacokinetics and their application to the clinical setting, including: single-dose intravenous and oral kinetics, multiple dosing, nonlinear pharmacokinetics, metabolite kinetics, pharmacogenetics, and the role of disease in drug clearance and dose requirements, and kinetics of drug-drug interactions. Prerequisite: PCEUT 531.

**PCEUT 533 P-Biopharmaceutics and Drug Delivery (3)** *Ho, Levy, Shen, Thummel* Basic principles of biopharmaceutics and drug delivery, and their application to therapeutics including oral and non-oral route of drug administration for traditional and biotechnology drugs. Fundamental principles related to assessment of bioavailability and bioequivalence, drug-drug and food-drug interactions for orally administered drugs. Prerequisite: PCEUT 532.

**PCEUT 570 Advanced Research Topics (1, max. 15)** Combines a discussion of the practical aspects and experimental techniques used to address the questions relating to drug disposition with comprehensive theoretical treatment of pharmacokinetic principles. Prerequisite: permission of the instructor.

**PCEUT 583 Topics in Pharmaceutics (1, max. 30)** *Isoherranen* Discussion of pertinent articles from current literature and recent laboratory results. Credit/no credit only.

**PCEUT 584 Pharmacokinetic Discussion Group (2)** *Lin* Student initiated discussions of pharmaceutics concepts in relation to current literature. Preparatory to departmental cumulative examinations. Credit/no credit only.

**PCEUT 586 Pharmaceutical Biotechnology (2/3, max. 3)** *Ho, Hu, Thummel* Current topics in pharmaceuticals and biotechnology focusing on transforming small molecules, proteins, and genes into therapeutic products. Includes new drug therapies, drug design, pharmacogenomics, molecular modeling, high throughput screen, production and stability considerations, and delivery systems of protein and gene

therapeutics in relation to pharmacokinetic and therapeutic responses.

**PCEUT 587 Introduction to Biopharmaceutical Product Development (3)** Provides a framework of the drug development process and its regulation. Prerequisite: ENV H 405 or ENV H 514, ENV H 515, and ENV H 516, or PCEUT 501, PCEUT 502, and PCEUT 503; or equivalent, or instructor permission. Offered: jointly with ENV H 587; even years, A.

**PCEUT 598 Independent Research (\*, max. 24)** Basic and clinical research problems in drug disposition and effect. Prerequisite: 2.5 GPA and permission of instructor.

**PCEUT 599 Cumulative Exams for Pharmaceutics (1)** *Isoherranen* Quarterly cumulative examinations for graduate students. Credit/no credit only.

**PCEUT 600 Independent Study or Research (\*)** Credit/no credit only.

**PCEUT 700 Master's Thesis (\*)** Credit/no credit only.

**PCEUT 800 Doctoral Dissertation (\*)** Credit/no credit only.

## Pharmacy

### GRADUATE PROGRAM

#### Graduate Program Coordinator

H375 Health Sciences, Box 357630

206-616-1383

The Department of Pharmacy offers graduate training leading to either the Master of Science or Doctor of Philosophy degree.

The graduate program in pharmaceutical outcomes research in the Department of Pharmacy provides MS- and PhD-level training with a focus on economic evaluation of pharmaceuticals, biopharmaceuticals and medical technology, pharmacoepidemiology, and pharmaceutical-policy evaluation. Outcomes research is the study of the health and cost consequences of pharmaceuticals and pharmaceutical-related policies on individuals and populations. Graduates of this program are trained to assess the use, outcomes, and cost of pharmaceuticals, biopharmaceuticals, medical technologies, and pharmaceutical policies and practices. Students are prepared for careers in (1) teaching and research in colleges and universities; (2) pre- and post-marketing efficacy and safety; (3) policy analysis for industry, health insurance, and governmental agencies; and (4) drug-use management and evaluation within managed health-care organizations.

### Doctor of Philosophy

#### Admission Requirements

- One copy of official transcripts from each college attended outside the United States. Transcripts from U.S. institutions are required by the department only.
- Microeconomics (a 5-credit quarter or 3- or 4-credit semester course).
- Official GRE Scores, unless the applicant has a terminal doctoral degree and the requirement is waived by the Chair of the Admission Committee.
- International students for whom English is not the native language, TOEFL and TSE scores.
- Statement of personal goals describing the student's background, academic interests, and career objectives in the field of outcomes research and policy.
- A resume or curriculum vitae listing educational and employment history.
- Three letters of recommendation from persons in a position to evaluate the applicant's potential for graduate

school. At least one recommendation must be from a person at the last school attended for full-time study, unless the applicant has been out of school for five years or longer. Due to the online application procedures of the Graduate School, referees will receive an e-mail directly from the Graduate School. Instructions should be followed so letters will be uploaded, and available only to the admissions committee of the department to which the student is applying.

#### Degree Requirements

90 credits, as follows:

- *Core courses:* Epidemiology - EPI 512 (4), EPI 513 (4), BIOST 511 (4), BIOST 512 (4), BIOST 513 (4), PHARM 532 (4), PHARM 533 (3), PHARM 534 (3), PHARM 535 (3), PHARM 597 (9)
- *Electives:* A sufficient number of electives to meet program credit requirements, determined in consultation with adviser to meet the student's interests and focus
- General examination
- Dissertation and final examination

## PROFESSIONAL PROGRAM

### Doctor of Pharmacy

A four-year professional program leading to the Doctor of Pharmacy (Pharm.D.) degree, the curriculum is designed to provide students the scientific background and clinical skills necessary to render pharmaceutical care in various health care settings. Individuals who wish to practice pharmacy in the United States must earn a Doctor of Pharmacy (Pharm.D.) degree from an accredited college or school of pharmacy, complete required internship hours, pass licensing examinations, and meet other state-specific licensing requirements.

#### Admission Requirements

Consideration for admission to the professional program requires a minimum three years of pre-pharmacy training. An applicant who is admissible to the University is not assured admission to the School of Pharmacy. Admission is competitive, based on a number of factors. Academic preparedness, motivation, oral and written communication skills, critical-thinking ability, and decision-making skills are among the criteria used to determine a candidate's aptitude for the program. Following a preliminary assessment of the applicant pool, the most qualified applicants are selected for an interview in Seattle. A writing assessment is also conducted at that time. Further details on admission requirements, application procedures, and program content are available from the School's Office of Academic and Student Programs or its website.

- Applicants to the UW School of Pharmacy Pharm.D. program must complete both an on-line PharmCAS Application and submit a Supplemental Application to the UW School of Pharmacy, Office of Academic and Student Programs. Potential applicants should consult the School of Pharmacy website, [www.pharmacy.washington.edu/students](http://www.pharmacy.washington.edu/students) for additional admission requirements and the most current information regarding the Pharm.D. program.
- Prerequisite undergraduate coursework may be completed at any accredited community college, college, or university, to include the following (given as quarter credits): general biology with labs (15), general chemistry with labs (15), organic chemistry with labs (15), biochemistry (6), microbiology with labs (5), calculus (5), statistics (4-5), English composition (10), microeconomics (5), Individuals & Societies - I&S (Social Sciences) (5), public speaking or interpersonal communication (3-5), Visual, Literary, & Performing Arts - VLPA (Humanities) (5-7). All prerequisites must meet required course

content and must be completed by the end of spring term prior to matriculation to the School of Pharmacy.

- Pharmacy College Admission Test (PCAT) must be taken within two years of application. The UW School of Pharmacy accepts no other admission test (e.g., MCAT, GRE) in place of the PCAT.
- Applicants who have completed all prerequisite (pre-pharm) coursework prior to application and those who have earned a prior bachelor's degree or higher are given preference in the process of screening for offer of interview. The Admissions Committee has established minimum cumulative and prerequisite (pre-pharm) GPA thresholds and PCAT scores for screening for offer of interview. Applicants who meet or exceed these minimums are not guaranteed an interview. Offers of interview are dependent on the size and competitiveness of the applicant pool.
- Interview is required as part of the UW School's Pharm.D. admission process. After a preliminary assessment of the applicant pool, the most-qualified applicants are invited for an interview in Seattle with members of the Pharm.D. admissions committee. Admission preference is given to residents of Washington State and residents from states participating in the Western Interstate Commission for Higher Education (WICHE).
- It is important for applicants to research carefully the pharmacy profession and the attributes, skills, and abilities essential for pharmacists in the provision of care. Although relevant experience is not required, applicants are strongly encouraged to gain pharmacy experience, either as a volunteer or employee.
- Non-U.S. Citizens: Applicants who hold "Permanent Resident" or "Refugee/Asylee" visa status are eligible to apply. TOEFL scores are not required.
- International Transcripts: All transcripts for coursework completed at foreign colleges or universities must be translated and evaluated course-by-course by one of the following certified agencies: the Education Credential Evaluators, World Education Services, Inc, or Educational-Perspectives.

### Degree Requirements

197 credits, as follows:

- *Theory and methods (118 credits)*: CONJ 401 (4), CONJ 402 (4), CONJ 403 (4), MEDCH 561 (4), MEDCH 562 (3), MEDCH 563 (3), MEDCH 564 (3), MEDCH 570 (3), MEDCH 571 (3), PCEUT 510 (3), PCEUT 531 (4), PCEUT 532 (5), PCEUT 533 (3), PHARM 500 (2), PHARM 501 (3), PHARM 504 (3), PHARM 508 (4), PHARM 509 (2), PHARM 511 (2), PHARM 512 (3), PHARM 537 (2), PHARM 539 (3), PHARM 541 (3), PHARM 543 (4), PHARM 546 (3), PHARM 560 (9), PHARM 561 (9), PHARM 562 (7), PHARM 563 (2), PHARM 564 (2), PHARM 565 (2), PHARM 587 (1), PHCOL 401(3), PHCOL 402 (3)
- *Electives (26 credits)*: Refer to the School of Pharmacy's website for a list of professional electives
- *Practicum (53 credits)*: Introductory Pharmacy Practice Experience (8 credits) and Advanced Pharmacy Practice Experience (45 credits) to be completed in the last year of the program.

The program of study listed above is current for students who enter the program in 2009. The curriculum is currently being revised. Refer to the School website for current information.

### Pharm.D./PhD Concurrent Program

Pharm.D./PhD Program Coordinator

H272 Health Sciences, Box 357610

206-543-3796

The accelerated dual-degree program is intended for outstanding students committed to earning the Pharm.D. de-

gree and a PhD degree in either Pharmaceuticals or Medicinal Chemistry. Students are equipped to enter academic careers that require competence in both teaching and research. Graduates of this program possess the breadth and depth of knowledge necessary to work with colleagues across multiple disciplines essential to performing integrated and translational medical and pharmaceutical research. Many applicants have worked in research and developed an interest in public health and pharmaceutical sciences through that experience.

Students admitted to the concurrent degree program are able to complete the requirements for both degrees in about seven academic years, rather than the nine academic years normally required to receive both degrees.

Applicants must meet competitive admission requirements of both the Pharm.D. and PhD programs. Admission to the Pharm.D./PhD program is based on the recommendation of the admission committees of the professional degree program, the graduate program, and the Pharm.D./PhD program. For additional admission criteria, see respective programs.

### Admission Requirements

Applicants must complete admission requirements of both the Pharm.D. and PhD programs. Consideration for the Pharm.D./PhD program is contingent upon completion of a Pharm.D. application, Graduate School application, and Pharm.D./PhD application (available online at: [depts.washington.edu/pha/students/applying.html](https://depts.washington.edu/pha/students/applying.html)).

- Pharm.D. program application is composed of (1) verified completion of all application materials by the stated January 4 deadline, (2) PCAT scores, (3) prerequisite and cumulative GPA, (4) ability to complete prerequisite courses by the end of spring term prior to School of Pharmacy matriculation. For details, see Pharm.D. admission requirements.
- Graduate School application for medicinal chemistry or pharmaceuticals includes (1) undergraduate degree in chemistry, biochemistry, pharmacy, biology, or a closely related field, (2) statement of purpose, (3) GRE scores, (4) prior research experience, (5) 3 letters of recommendation. Graduate School application deadline is January 15.
- In addition, applicants are required to submit information requested in the Pharm.D./PhD concurrent program application checklist, available on the above stated website.

### Financial Aid

Financial support in the form of research assistantships, teaching assistantships, and fellowships may be available to prospective and continuing students. Availability of financial aid is limited, typically to the first and second academic year. Prospective students should contact the Graduate Program Coordinator for more information on financial support.

## COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at [www.uw.edu/students/crscat/](http://www.uw.edu/students/crscat/)

**PHARM 301 Self-Care Products and Practices (2)** Dawson, Murphy Addresses a broad range of health concerns including how to identify common conditions amenable to self-care, select appropriate treatment options ranging from non-prescription to non-drug therapies, prevent adverse effects from the use of medications, adopt strategies encouraging healthier lifestyle habits, and learn the rationale behind conventional and alternative/complementary therapies.

**PHARM 493 Medical Literature Evaluation (2)** O'Sullivan Introduction to steps involved in the assessment of primary

and other literature sources. Students required to read and critique medical literature. Classes conducted in journal club format.

**PHARM 494 Principles of Pharmacokinetics (2)** Bauer Reviews basic pharmacokinetic concepts relevant to the clinical application of drug dosing in patients and master the therapeutic drug monitoring techniques used to determine doses of drugs with narrow therapeutic indices.

**PHARM 497 Drug Therapy for the Elderly (3)** Christianson, Gray, Odegard Clinical application of drug knowledge in the treatment of disease in older adults with multiple comorbidities. Application of age-related changes in pharmacokinetics and pharmacodynamics in the selection and monitoring of drug regimens of older adults. Emphasis on problem solving, using case examples. Prerequisite: nurse practitioner students or permission of instructor.

**PHARM 500P-Principles of Evidence Based Medicine I: The Design and Conduct of Clinical Research (2)** O'Sullivan Provides instruction in approaches to and sources for identifying information on the benefits and risks of pharmaceuticals in humans. Additionally, discusses the science of conducting clinical research, including methods, study design, and interpreting study findings for clinical practices. Offered: A.

**PHARM 501 P-Profession of Pharmacy (3)** Somani Overview of the profession of pharmacy emphasizing practice opportunities and specialization. Introduction to clinical and ethics case evaluation techniques using the Pharmacist's Workup of Drug Therapy format. Off-site pharmacy visitation required. Credit/no credit only.

**PHARM 502 Neonatal Drug Therapy (3)** Blackburn Clinical applications of drugs used with acute and chronically ill preterm and term neonates. Review of neonatal pharmacotherapeutics. Examination of selected therapeutic agents in relation to indications, efficacy, therapeutic and adverse effects, monitoring parameters, and dosing principles in the neonate.

**PHARM 503 Senior Care Introductory Pharmacy Practice Experience (2)** Dawson, Gray, Lakey, Lam, Morrissey, Murphy, Odegard, Plein Under faculty supervision, provides clinical services for senior patients in various settings. Includes reviewing charts, interviewing patients, conferring with other health care providers, and making recommendations on medication therapies to providers and patients. Prerequisite: Successful completion of the first five quarters of Pharm. D. curriculum; permission. Credit/no credit only. Offered: Sp.

**PHARM 504 P-Pharmacy Practice (3)** Hammer Introduces students to principles of contemporary pharmacy practice and pharmaceutical care. Lecture topics include pharmacy practice issues and general knowledge of common medications. Laboratory activities include prescription processing and problem solving, patient education, sterile products preparation, physical assessment, and other patient care activities. Prerequisite: PHARM 500, PCEUT 531.

**PHARM 508 P-Principles of Evidence Based Medicine II: Applying and Interpreting Biostatistics in Clinical Research (4)** Blough Introduction to basic biostatistical concepts in the field of pharmacy. Prerequisite: PHARM 500.

**PHARM 509 Medical Literature Evaluation (2)** O'Sullivan Provides an introduction to the process of critically evaluating medical literature. Offered: A

**PHARM 510 Contemporary Concepts in Clinical Nutrition Support (1)** Chan Addresses current topics and concepts in clinical nutrition support. Topics include assessment and management of patients requiring specialized nutrition support, enteral nutrition, and parental nutrition. Prerequisite: biochemistry, anatomy and physiology, or permission of instructor; taken concurrently with NUTR 511. Offered: A.

**PHARM 511 P-Community Outreach Service (2)** Dawson Work in assigned community services setting for a minimum of two hours per week to explore root causes of disability, cultural differences, professional values, community resources, and quality of life issues. Weekly seminars assist students in applying observations and experiences to pharmaceutical care. Credit/no credit only.

**PHARM 512 P-Human Behavior and Communication in Pharmacy (3)** *Dawson* Focuses on how human behavior and communication influence the pharmacist's activities in designing, delivering, and managing patient-focused care in pharmacy. Emphasizes listening, interviewing, writing, teaching, and critical thinking as applied to pharmacy practice. Prerequisite: PHARM 511.

**PHARM 513 P-Medical Devices for Home Health Care (3)** *Downing*, Study of medical devices commonly provided by pharmacists to their patients, including their selection and adaptation for specific patient needs. Lectures include display and demonstration of actual devices.

**PHARM 514 Pharmacotherapeutics for Advanced Nursing-Practice (1-6, max. 6)** *Acker, Landis* Explores pharmacogenetics, pharmacokinetics, pharmacodynamics, pharmacotherapeutic issues, evidence-based efficacy studies, clinical case applications, and patient related factors such as age, socioeconomic status, and behavioral aspects that support the selection of commonly used drugs for patients of all ages across settings. Includes web-based pediatric component and specialty components.

**PHARM 515 Pharmacotherapeutics for Acute/Critical Illness (3)** *Coyne* Analysis of issues that impact the assessment, prescription, and evaluation of pharmacotherapeutic regimens for patients who are acutely or critically ill. Current research, clinical contextual considerations, and pharmacotherapeutic principles are emphasized as the basis for decisions relevant to the management of pharmacotherapy in acute care clinical practice.

**PHARM 516 Introduction to Biomedical Regulatory Affairs (3)** *Hazlet* Surveys government oversight of drugs, devices, and biotechnology derived products; laws and regulations that apply to development, testing, and production; and responsibilities of a regulatory affairs specialist in the regulatory setting.

**PHARM 517 Product Development and Manufacturing Systems (3)** *Hazlet* Surveys government oversight of drugs, devices, and biotechnology derived products; laws and regulations that apply to development, testing, and production.

**PHARM 518 Product Testing, Evaluation, and Post-Market Issues (3)** *Hazlet* Medical product post-marketing requirements; reporting and enforcement actions; inspections (internal and by regulators) preparation, conduct and follow-up actions; surveillance and studies, reimbursement, and economics.

**PHARM 519 Pharmacotherapeutics for Infectious Disease and Infection (2)** *Black* Analysis of pharmacotherapeutics to control infection and manage infectious disease through seminar discussion of cases, critical analysis of a pharmacotherapeutic regimen, and development of references to enhance students' clinical expertise. Emphasis on principles of anti-infective therapy, problem solving clinical cases with complex medication regimens, and identifying judicious pharmacotherapeutic plans.

**PHARM 520 P-Introduction to Pharmacoeconomics and Outcomes Research (2)** *Ramsey, Veenstra* Provides an introduction to economic evaluation and outcomes research related to pharmaceuticals and other healthcare technologies. Covers the methods of cost-effectiveness analysis and quality of life evaluation, and their use in real-world decision-making.

**PHARM 521 P-Pharmacy Teaching Practicum (1-3, max. 6)** *Dawson, Hammer* Allows students the opportunity to apply learning about education in a mentored experiences. Students serve as assistant instructors in existing pharmacy courses or engage in other approved educational experiences. Prerequisite: PHARM 505. Offered: AWSps.

**PHARM 522 P-The Nature of Scientific Truth (2)** *Hansten* Drawing on the wisdom of scientists and philosophers, discussion of the nature and limitations of scientific truth, using examples from the practice of pharmacy whenever possible. Emphasizes reasoning errors that are common in science, particularly those that involve the application of scientific information to clinical practice. Credit/no credit only.

**PHARM 523 Survey of Biomedical Regulatory Affairs (3)** *Hazlet* Overview of the knowledge, terminology, and skills necessary to be an effective regulatory affairs or compliance specialist in the design, development, testing and production of drugs, biotechnology-derived therapeutics, and medical devices.

**PHARM 524 P-Institutional and Healthcare Systems Pharmacy Practice (2)** *Somani* Presentation of topics regarding current contemporary institutions pharmacy practice. Discussion of new systems technology, home care programs, managed care, computer applications, budgeting, formulary systems, drug information services, intravenous admixture programs, quality assurance process, and patient oriented services.

**PHARM 525 P-Advanced Compounding Skills (1)** *Needham* Prepares the student to create unique, patient-specific pharmaceutical dosage forms used in contemporary pharmacy practice. Includes pre-readings and assignments, a didactic session and a laboratory session, and is offered over a weekend. Credit/no credit only. Prerequisite: PCEUT 531.

**PHARM 527 P-Introductory Community Pharmacy Experience (4)** Under faculty supervision, students gain experience working in the community pharmacy setting. Credit/no credit only. Prerequisite: PHARM 504.

**PHARM 528 P-Introductory Institutional Pharmacy Experience (3)** Under faculty supervision students gain experience working in the institutional setting. Prerequisite: PHARM 504.

**PHARM 529 P-Experiential Learning (1-6, max. 12)** *Danielson, O'Sullivan* Under faculty supervision, pharmacy students gain experience working on advanced practice projects, in a pharmacy practice setting, prior to the final year of the pharmacy program. Credit/no credit only. Prerequisite: satisfactory completion of the first quarter of pharmacy school.

**PHARM 530 P-Pharmacy and Women's Health (2)** *Anderson, Gardner* Participants gain an overview of the specific up-to-date knowledge of gender-based medicine; an understanding of the implications of gender-based biology and the opportunity to evaluate new research that has implications for the prevention and management of diseases and conditions in women. Credit/no credit only.

**PHARM 531 P-Pharmacy-Based Screening and Immunization Programs (1)** *Carpinito, Downing* Practical training in cholesterol, hypertension, bone density, and wellness assessment techniques, vaccine administration and management, and implementation of community-based public health programs. Following didactic and laboratory sessions students conduct screening and administer vaccines at community locations. Offered following the first professional year. Credit/no credit only. Prerequisite: MEDCH 561.

**PHARM 532 Methods in Pharmaceutical Policy Analysis (4)** *Hazlet* Introduction to the tools used in and the framework and dominant contexts for pharmaceuticals policy development and analysis. Methods reviewed in a series of sessions presenting a specific method and case analyses involving pharmaceuticals development. Project and in-class presentation required.

**PHARM 533 Pharmacoepidemiology (3)** *Boudreau, Heckbert* Overview of pharmacoepidemiology including drug development and approval; application of epidemiologic methods to study drug safety and effectiveness; exploration of the interplay between research and public policy; introduction to resources for information about drugs; introduction to pharmacology principles pertinent to pharmacoepidemiology. Prerequisite: Graduate student or with permission. Offered: jointly with EPI 533; even years.

**PHARM 534 Economic Evaluation in Health and Medicine (3)** *Garrison, Veenstra* Methods and techniques for evaluating costs and cost-effectiveness of health, medical, and pharmaceutical interventions. Emphasis on economic evaluation, decision analysis, and modeling techniques for resource allocation and decision making. Applications to technology assessment, health policy, clinical practice, and

resource allocation. Prerequisite: permission of instructor. Offered: jointly with HSERV 583.

**PHARM 535 Assessing Outcomes in Health and Medicine (3)** *Patrick* Concepts and methods for developing and using patient-reported outcomes in health and medicine. Emphasis on patient self-reported health status and quality of life. Qualitative research and psychometric methods applied to health outcomes assessment and all applications. Prerequisite: permission of instructor. Offered: jointly with HSERV 584.

**PHARM 536 Principles of Publishing Clinical Evidence (2)** *Johnson, Olson* Explains advanced methodologic principles for improving the clarity of published clinical evidence. Students prepare and revise a 1000-word research letter for *The Lancet* using their own clinical evidence. Credit/no credit only. Prerequisite: permission of instructor. Offered: jointly with EPI 534.

**PHARM 537 P-Chemical Dependency Concepts (2)** *Kedzierski* Examines the development of therapeutic frame. Includes the genesis of addiction harm reduction strategies, legal and ethical considerations, medication management in the substance-abusing population, impaired pharmacist rehabilitation, detection and dealing with substance abuse issues in pharmacy practice, community resources. Course offered to Professional Pharm.D., Class 2. Credit/no credit only.

**PHARM 538 P-Chemical Dependency Issues in Practice (3)** *Kedzierski* Emphasis on drug classes, pharmacologic management of abstinence and withdrawal, drug testing, drug use in pregnancy, treatment options and recovery, codependency and legal and ethical considerations. Credit/no credit only. Prerequisite: PHARM 537.

**PHARM 539 P-Principles of Professional Practice Management (3)** *Downing* Emphasizes the major issues and barriers of providing pharmaceutical care in institutional and community pharmacies. Topics include evaluating workflow and facility design, complying with legal and safety standards, managing drug distribution services, payment for pharmacist services, human resource management and marketing pharmaceutical care services.

**PHARM 540 P-Pharmacy Ownership and Entrepreneurship (2)** *Gardner, Odegaard* Discusses barriers to and benefits of independent pharmacy ownership. Describes the role, responsibilities and different management styles of the pharmacy owner. Evaluates differences with regard to purchasing an existing practice vs. starting a new practice. Explains legal considerations of ownership. Discusses how to create and the importance of a business plan.

**PHARM 541 Pharmacy, Health Care and Society (3)** *Sullivan* Introduction to health services and pharmacy practice designed for future health-care practitioners. Examines the history, organization, and effectiveness of the U.S. health-care system. Stresses the student's ability to adopt a broad perspective across health-care disciplines and traditional boundaries.

**PHARM 542 P-Managed Care Pharmacy: Principles and Practice (3)** *Fullerton, Penna* Surveys the activities, tactics, and strategies used by managed care to deliver pharmacy services to their members. Includes: formulary development, clinical improvement programs, quality improvement measures, regulatory activities, contracting with pharmaceutical manufacturers, network management, financial issues, sales and marketing, and provider relations. Class 2, 3, and 4 Pharm.D. students.

**PHARM 543 Pharmacy Laws and Ethics (4)** *Hazlet* Studies the laws and regulations governing the practice of pharmacy, approaches to ethical dilemmas in the delivery of pharmaceutical care, and methods of regulatory and statutory reform.

**PHARM 544 Survey of Pharmacy Laws (1)** *Hazlet* Prepare, discuss, and present responses to assigned questions developed by faculty regarding laws governing pharmacy practice in the course of reviewing for the Multistate Pharmacy Jurisprudence Examination. Class meets for two consecutive Saturdays in February and March. E-mail and

web-access required. Open to 4th-year Pharm.D. students; non-matriculated students by permission only. Credit /no credit only.

**PHARM 545 P-Pharmacy Business Plan Development (1)** *Downing, Gardner* Develops a business plan for purchasing an independent pharmacy. Credit/no credit only. Prerequisite: PHARM 540.

**PHARM 546 P-Nonprescription Drug Therapeutics (3)** *Capoccia, Ellsworth* Overview of common classes of non-prescription drug therapeutics with an emphasis on case examples, patient assessment, non-drug adjunct therapy, product selection, and patient advice. Oral presentation required. Computer (internet) case discussion mandatory. Enrollment restricted to 2nd Pharm.D. students.

**PHARM 547 P-Gerontological Communication Skills Seminar (2)** *Dawson* Addresses special communication needs of the elderly, ranging from individualized patient counseling to patient advocacy through development and provision of pharmacy services. Communication techniques applicable to teaching, developing innovative services, supervising, motivating, conflict resolution, and interdisciplinary interactions are explored in lecture and laboratory. Credit/no credit only.

**PHARM 548 P-Pharmaceutical Services for Older Adults (2)** *Lam* Scope of pharmaceutical services across care settings, including long term care, ambulatory, community pharmacies, and home health agencies. Responsibilities and role of pharmacist for distributive, administrative, and clinical services at the different care settings. Economic considerations in provision of pharmaceutical services in long term care and the community setting.

**PHARM 549 Pharmacotherapeutics for Older Adults (4)** *Gray, Odegard* Applies pharmacologic knowledge to the assessment, individualized selection of therapy, and monitoring of treatment in older adults with multiple comorbidities; and age-related changes in pharmacokinetics and pharmacodynamics with emphasis on problem solving, using case examples. Prerequisite: PHARM 560; PHARM 561 or permission of instructor. Recommended: MEDCH 535.

**PHARM 550 Current Topics in Geriatric Pharmacotherapy (1)** *Gray* Review primary medical literature to discuss contemporary issues related to geriatric pharmacotherapy. Credit/no credit only. Prerequisite: PHARM 509 or permission of instructor.

**PHARM 551 Infectious Disease Pharmacotherapy Module (1-2, max. 2)** *Black* Advanced concepts in infectious disease pharmacotherapy in a self-study and workshop format. Credit/no credit only.

**PHARM 552 Cardiovascular Disease Pharmacotherapy Module (1-2, max. 2)** *James* Advanced concepts in cardiovascular disease pharmacotherapy in a self-study and workshop format. Credit/no credit only.

**PHARM 553 Pulmonary Disease Pharmacotherapy Module (1-2, max. 2)** *Blanchard* Advanced concepts in pulmonary disease pharmacotherapy in a self-study and workshop format. Credit/no credit only.

**PHARM 554 Gastrointestinal Disease Pharmacotherapy Module (1-2, max. 2)** *Albertson* Advanced concepts in gastrointestinal disease pharmacotherapy in a self-study and workshop format. Credit/no credit only.

**PHARM 555 Neurological and Psychiatric Disease Pharmacotherapy Module (1-2, max. 2)** *Weber* Advanced concepts in neurological and psychiatric disease pharmacotherapy in a self-study and workshop format. Credit/no credit only.

**PHARM 556 Renal Disease Pharmacotherapy Module (1-2, max. 2)** *O'Sullivan* Advanced concepts in renal disease pharmacotherapy in a self-study and workshop format. Credit/no credit only.

**PHARM 557 Endocrine Disease Pharmacotherapy Module (1-2, max. 2)** *Wong* Advanced concepts in endocrine disease pharmacotherapy in a self-study and workshop format. Credit/no credit only.

**PHARM 558 Hematologic and Oncologic Disease Pharmacotherapy Module (1-2, max. 2)** *Kwok* Advanced concepts in hematologic and oncologic disease pharmacotherapy in a self-study and workshop format. Credit/no credit only.

**PHARM 559 Arthritic Disease Pharmacotherapy Module (1-2, max. 2)** *Setter* Advanced concepts in arthritic disease pharmacotherapy in a self-study and workshop format. Credit/no credit only.

**PHARM 560 Pharmacotherapeutics I (9)** *Black, McCune* Clinical application of drug knowledge in the treatment of disease. Emphasis on problem-solving, using case examples. Prerequisite: a minimum grade of 0.7 in all required MEDCH and PCEUT courses, a minimum grade of 1.7 in all numerically graded required PHARM courses except for PHARM 500, 504 and 512 which require a 2.7 minimum grade, a minimum score of 85% on each pharmacy calculations exam (PHARM 587); corequisite: PHARM 563

**PHARM 561 Pharmacotherapeutics II (9)** *Bauer, Horn* Clinical application of drug knowledge in the treatment of disease. Emphasis on problem-solving, using case examples. Prerequisite: a minimum grade of 1.7 in PHARM 560; corequisite: PHARM 564.

**PHARM 562 Pharmacotherapeutics III (7)** *Gray, Wittkowsky* Clinical application of drug knowledge in the treatment of disease. Emphasis on problem-solving, using case examples. Prerequisite: a minimum grade of 1.7 in PHARM 561; corequisite: PHARM 565.

**PHARM 563 Applied Pharmacotherapeutics I (2)** *Catalano* Develops a foundation of skills that enables a pharmacist to practice collaborative patient-specific care. Corequisite: PHARM 560.

**PHARM 564 Applied Pharmacotherapeutics II (2)** *Catalano* Develops a foundation of skills that enables a pharmacist to practice collaborative patient-specific care. Prerequisite: PHARM 563; corequisite: PHARM 561.

**PHARM 565 Applied Pharmacotherapeutics III (2)** *Catalano* Develops a foundation of skills that enables a pharmacist to practice collaborative patient-specific care. Prerequisite: PHARM 564; corequisite: PHARM 562.

**PHARM 566 P-Applied Pharmacokinetics (2)** *Bauer* Pharmacokinetics of specific drugs. Influence of age, weight, sex, and disease states on patient-specific dosage regimens emphasized. Advanced kinetic concepts are discussed and put into applied context. Prerequisite: PCEUT 532.

**PHARM 567 P-Cancer Pharmacotherapeutics (2)** *Kwok* Pharmacotherapy of cancer, covering supportive care (antibiotics, antiemetics, analgesics, nutrition) to the antineoplastic agents themselves. Specialists in each area serve as guest lecturers.

**PHARM 569 P-Fluid and Electrolytes and Parenteral Nutrition (2)** *Chan* Focuses on the principles of fluid electrolyte and nutritional management in patients requiring parenteral nutrition (PN) and infusion therapy. Topics include acid-base balance, macro and micronutrient requirements, nutritional assessment, complications of PN and compounding and compatibility of PN solutions. Discusses consideration in special population (e.g., ICU).

**PHARM 570 P-Critical Care Pharmacotherapeutics (2)** *Mike* Overviews pharmacotherapeutic topics for patients in the critical care setting. Discusses principles in hemodynamic monitoring, respiratory management, concepts in pathophysiology related to critical illnesses, and other timely topics reflecting current clinical practice. Prerequisite: 3rd-year PharmD student, or approval by instructor.

**PHARM 571 P-Current Topics in Acute Care Pharmacotherapy (1)** *Chan* Increases understanding and stimulates discussion in the current topics related to acute care pharmacotherapy. Reviews the management of patients in the acute care setting through current cases presented by the instructors. May be taken alone or concurrently with PHARM 570.

**PHARM 574 Clinical Introductory Practicum (1)** *O'Sullivan* Students spend three days in a patient care setting, under the guidance of preceptors or advanced students, as an

introduction to the practicum experience. Credit/no credit only.

**PHARM 575 Institutional Clinical Practicum (5, max. 15)** *O'Sullivan* Under faculty supervision, fourth-year students provide pharmaceutical care in an inpatient environment. Credit/no credit only.

**PHARM 576 Ambulatory Care Clinical Practicum (5, max. 15)** *O'Sullivan* Under faculty supervision, fourth-year students provide pharmaceutical care in an outpatient environment. Credit/no credit only.

**PHARM 577 Advanced Practicum (5, max. 40)** *O'Sullivan* Under faculty supervision, fourth-year students gain experience in practice settings of their choice. Credit/no credit only.

**PHARM 578 Advanced Elective Practicum (1-10, max. 20)** *O'Sullivan* Faculty-supervised practicums either in areas of traditional practice or in innovative practice plans designed by faculty and student. Objectives, activities, schedules, and lengths are site- and preceptor-specific. Credit/no credit only.

**PHARM 579 Senior Care Practicum (1-6, max. 12)** Under faculty supervision, fourth-year pharmacy students gain experience working with drug therapy regimens in the elderly. Prerequisite: acceptance to the pharmacy school's Geriatric Certificate program.

**PHARM 580 P-Cases in Pharmaceutical Care (3, max. 9)** *Dawson* Small groups of students work with an instructor to review cases illustrating various aspects of specific diseases: pathophysiology, clinical features, psychosocial factors, therapeutic interventions with emphasis on drug therapies, and community resources. Analytic reasoning, self-study skills, and knowledge are emphasized.

**PHARM 581 P-Global Health Pharmacy: Medicines, Practice, and Policy (2)** *Garrison, Stergachis* Introduces the critical role of pharmaceutical in addressing the major diseases, such as HIV/AIDS, malaria, tuberculosis, affecting persons in resource-limited settings. Addresses the wide range of relevant issues, including burden of disease, human resource capacity, regulation, drug safety/pharmacovigilance, drug distribution, pharmacoconomics, financing, intellectual property, and drug trade policies. Prerequisite: two credit enrollment requires satisfactory completion of the 1 credit lecture/discussion component.

**PHARM 582 P-Special Topics in Global Health Pharmacy and Medical Products (1-3, max. 6)** *Garrison, Hazlet, Stergachis* Provides in-depth instruction on selected special topics relating to the use, access to, and impact of pharmaceuticals, vaccines, and diagnostics/medical devices in global health. Credit/no credit only.

**PHARM 583 P-Overview of Contraceptive Management (2)** *Gardner* Didactic overview of contraceptive methods, fertility interventions, and medical abortions. Establishes forum for interactive discussion. Includes patient screening criteria and selection and monitoring outcomes of currently available barrier and hormonal methods of contraception and medical abortions. Open to all Pharm.D. students, as well as other health science professional students.

**PHARM 584 Pharmacy Practice I - Introduction to Community Pharmacy Practice I (3)** *Hammer* Introduction to, development and practice of skills in drug information resources; prescription processing and problem solving; pharmaceutical calculations and compounding; patient information and counseling on over-the-counter and compounded medications. Offered: A.

**PHARM 585 Pharmacy Practice II (3)** *O'Sullivan* Continued development and practice of skills in drug information resources; prescription problem solving; pharmaceutical calculations; and patient information and counseling. Emphasizes use of commonly prescribed prescription medication as well as patient-specific characteristics that impact their care. Prerequisite: PHARM 584. Offered: W.

**PHARM 586 Pharmacy Practice III: Applications of Public Health Practice (3)** *Downing* Develops skills that enable public health screening and health promotion in community-

based settings; administration of vaccines to adults and adolescents; practical application of community based health screenings, counseling and referral; and teaching self-monitoring techniques to patients. Emphasizes communication with members of special populations. Includes hands-on practice in clinics at community locations. Offered: Sp.

**PHARM 587 P-Pharmacy Calculations (1)** *O'Sullivan* Covers basic calculations used in pharmacy practice. Offered: A.

**PHARM 588 Diabetes Care (2)** *Odegard* Further develops foundations in the principles of diabetes management and provides practice in application of diabetes care principles. Develops knowledge and ability to assess, manage, educate, and monitor patients with diabetes. Credit/no credit only.

**PHARM 590 Medication Safety in Patient Care (2)** *Devine, Soman* Teaches how to identify high-risk areas within the medication use system; assess working conditions and factors contributing to errors/adverse events; analyze specific incidents; and propose changes to prevent future errors and adverse events and measure results by identifying specific indicators. Prerequisite: PHARM 504; PHARM 527. Offered: Sp.

**PHARM 591 Community Collaborations in Healthcare Practicum (2, max. 8)** *Kedzierski* Faculty and students collaborate with representatives from the Salvation Army ARC and other community sites to improve health literacy and health outcomes of men and women residents/patients in addiction recovery. Credit/no credit only. Offered: ASP.

**PHARM 595 Special Studies in Pharmacy (1-6, max. 24)** Special studies of professional topics in pharmacy. An opportunity to expand the breadth and depth of understanding in specific pharmaceutical areas. Students may undertake independent study under the individual direction of a faculty member.

**PHARM 596 Seminars in Pediatric Pharmacotherapy (2)** *Harvey, Weber* Explores therapeutic topics pertinent in the pediatric population. Emphasized ambulatory pediatrics. Prerequisite: third-year Pharm.D. student or permission of instructor.

**PHARM 597 Graduate Seminar (1)** *Blough, Gardner, Garrison, Hazlet, Sullivan, Veenstra* Interactive discussion of topical issues, methods, or analytic techniques. Topics vary. Credit/no credit only. Prerequisite: graduate program student.

**PHARM 598 Case Conference: Geriatrics (1)** Students taking geriatric pharmacy clerkships in various clinical settings meet with faculty to present case studies of elderly patients requiring complex drug therapies. Credit/no credit only. Prerequisite: Pharm.D. fourth-year practicum in geriatrics or general medicine.

**PHARM 599 Independent Study/Research (1-6, max. 24)** Applied pharmaceutical research problems. Credit/no credit only.

**PHARM 600 Independent Study or Research (\*)** Credit/no credit only.

**PHARM 700 Master's Thesis (\*)** Credit/no credit only.

**PHARM 800 Doctoral Dissertation (\*)** Credit/no credit only.

## Pharmacy Practice

**PHARMP 511 Introductory Pharmacy Practice Experience in Community Psychology I (1)** Introduces student to community pharmacy practice. Students process prescriptions, begin to manage drug therapy, communicate with patients, and provide public health activities in the patient care setting. Seminars allow for orientation, discussion/reflection, and progress assessment. Orients students to community practice, fulfills requirements for entering patient care, and sets expectations for the course series. Credit/no credit only. First in a series of four. Prerequisite: PHARM 584. Offered: W.

**PHARMP 512 Introductory Pharmacy Practice Experience in Community Psychology II (1)** Introduces student to community pharmacy practice. Students process prescriptions, begin to manage drug therapy, communicate with patients,

and provide public health activities in the patient care setting. Seminars allow for orientation, discussion/reflection, and progress assessment. Emphasizes legal requirements for practice, fulfills requirements for entering patient care, and exposes student to leaders in community pharmacy practice. Credit/no credit only. Second in a series of four. Prerequisite: PHARMP 511. Offered: Sp.

**PHARMP 513 Introductory Pharmacy Practice Experience in Community Psychology III (1)** Introduces student to community pharmacy practice. Students process prescriptions, begin to manage drug therapy, communicate with patients, and provide public health activities in the patient care setting. Seminars allow for orientation, discussion/reflection, and progress assessment. Emphasizes patient safety, involvement in health/wellness screening, and exposes students to leaders in community pharmacy. Credit/no credit only. Third in a series of four. Prerequisite: PHARMP 512. Offered: A.

**PHARMP 514 Introductory Pharmacy Practice Experience in Community Psychology IV (1)** Introduces student to community pharmacy practice. Students process prescriptions, begin to manage drug therapy, communicate with patients, and provide public health activities in the patient care setting. Seminars allow for orientation, discussion/reflection, and progress assessment. Emphasizes reflection on and documentations of professional competency. Credit/no credit only. Fourth in a series of four. Prerequisite: PHARMP 513. Offered: W.

**PHARMP 531 Introductory Pharmacy Practice Experience in Institutional Pharmacy I (1)** Introduces students to institutional pharmacy practice. Students learn about the role of pharmacists in the inpatient settings, participate in product distribution, provide drug information, and gain exposure to quality assurance activities in hospitals. Seminars allow for orientation, discussion/reflection, and progress assessment. Orients students to institutional practice, exposes student to leaders in hospital practice, and introduces expectations for quality assurance activities. Credit/no credit only. First in a series of three. Prerequisite: PHARMP 514. Offered: AWSpS.

**PHARMP 532 Introductory Pharmacy Practice Experience in Institutional Pharmacy II (1)** Introduces students to institutional pharmacy practice. Students learn about the role of pharmacists in the inpatient settings, participate in product distribution, provide drug information, and gain exposure to quality assurance activities in hospitals. Seminars allow for orientation, discussion/reflection, and progress assessment. Emphasizes quality assurance in hospital practice, reflects on medication reconciliation, and orients students to subsequent IPPE coursework. Credit/no credit only. Second in a series of three. Prerequisite: PHARMP 531. Offered: AWSpS.

**PHARMP 533 Introductory Pharmacy Practice Experience in Institutional Pharmacy III (1)** Introduces students to institutional pharmacy practice. Students learn about the role of pharmacists in the inpatient settings, participate in product distribution, provide drug information, and gain exposure to quality assurance activities in hospitals. Seminars allow for orientation, discussion/reflection, and progress assessment. Emphasizes reflection on providing drug information, documenting professional competency, and orienting students to subsequent IPPE and APPE coursework. Credit/no credit only. Third in a series of three. Prerequisite: PHARMP 532. Offered: AWSpS.

**PHARMP 541 Introductory Pharmacy Practice Experience in Clinical Skills (1)** *O'Sullivan* Students interview and assess a patient in the practice setting, present the patient case and an oral seminar in a small group setting, and complete other requirements for beginning advanced pharmacy practice experience. Credit/no credit only. Offered: Sp.

**PHARMP 571 Advanced Pharmacy Practice Experience in Inpatient/Acute Care General Medicine (6)** *O'Sullivan* Advanced pharmacy practice experience focusing on providing patient-centered care to patients in a general medicine care setting. Applies therapeutic knowledge to assess and develop therapeutic plans in collaboration with other health-

care professionals, taking medication histories, monitoring patient progress, and provide drug information to professionals and patients. Credit/no credit only. Offered: AWSpS.

**PHARMP 572 Advanced Pharmacy Practice Experience in Hospital or Health-System Pharmacy (6)** *O'Sullivan* Advanced pharmacy practice experience focusing on providing patient-centered care to patients in an acute care or other inpatient setting. Applies therapeutic knowledge to assess and develop therapeutic plans in collaboration with other healthcare professionals, taking medication histories, monitoring patient progress, and provide drug information to professionals and patients. Credit/no credit only. Offered: AWSpS.

**PHARMP 573 Advanced Pharmacy Practice Experience in Ambulatory Care (6)** *O'Sullivan* Advanced pharmacy practice experience focusing on providing patient-centered care to patients in a clinic-based setting. Applies therapeutic knowledge to assess and develop therapeutic plans in collaboration with other healthcare professionals, taking medication histories, monitoring patient progress, and provide drug information to professionals and patients. Credit/no credit only. Offered: AWSpS.

**PHARMP 574 Advanced Pharmacy Practice Experience in Community Pharmacy (6)** *O'Sullivan* Advanced pharmacy practice experience focusing on providing patient-centered care to patients in a community-based setting. Applies therapeutic knowledge to assess and develop therapeutic plans in collaboration with other healthcare professionals, taking medication histories, monitoring patient progress, and provide drug information to professionals and patients. Credit/no credit only. Offered: AWSpS.

**PHARMP 575 Advanced Pharmacy Practice Experience in Patient Care (6)** *O'Sullivan* Advanced pharmacy practice experience focusing on providing patient-centered care to patients in a non-required setting. Applies therapeutic knowledge to assess and develop therapeutic plans in collaboration with other healthcare professionals, taking medication histories, monitoring patient progress, and provide drug information to professionals and patients. Credit/no credit only. Offered: AWSpS.

**PHARMP 576 Advanced Pharmacy Practice Experience in Non-Patient Care (6)** *O'Sullivan* Advanced pharmacy practice experience focusing on providing pharmacy services in a variety of non-patient care settings. Credit/no credit only. Offered: AWSpS.

**PHARMP 577 Advanced Pharmacy Practice Experience in Senior Care (6)** *O'Sullivan* Advanced pharmacy practice experience focusing on providing patient-centered care to patients in a senior or geriatric care setting. Applies therapeutic knowledge to assess and develop therapeutic plans in collaboration with other healthcare professionals, taking medication histories, monitoring patient progress, and providing drug information to professionals and patients. Credit/no credit only. Offered: AWSpS.

**PHARMP 578 Advanced Pharmacy Practice Experience Elective (1-6, max. 12)** *O'Sullivan* Advanced pharmacy practice experience in patient or non-patient care settings. Credit/no credit only. Offered: AWSpS.

## Regulatory Affairs

**PHARMRA 524 Introduction to Clinical Trials (3)** *Jonlin, Hazlet, Hoffman* Introduces the major concepts under which clinical trials are designed to run. Focuses on the phases of clinical trials, the role of the Food and Drug Administration, Institutional Review Boards, the Code of Federal Regulations and ethical principles. Addresses study design and statistical concepts. Offered: A.

**PHARMRA 525 Implementation and Conduct of Clinical Trials (3)** *Jonlin, Hazlet, Hoffman* Outlines the work of carrying out a clinical trial including, the complex work of study initiation, the issues of site and data managements, the preparation of the final report and study close out, as well as the details that control the study conduct. Offered: W.

**PHARMRA 526 Project Management and the Business of Clinical Trials (3)** *Jonlin, Hazlet, Hoffman* Address the busi-

ness dimension of clinical trials. Addressed the principles of project management, planning, analysis, contingency and follow-up within the context of clinical trials that involve a large number of tasks and people responsible for parts of the overall study. Offered: Sp.

**PHRMRA 527 International Regulatory Affairs (3)** *Hazlet* Develops an understanding of international differences in the regulation of design, manufacture and post-marketing surveillance of medical products relative to US Food and Drug Administration Requirements. Prerequisite: PHARM 504. Offered: W.

**PHRMRA 528 Medical Risk Analysis and Management (3)** *Hazlet* Examines the principles and application of risk management methods in the design, manufacturing and marketing of medical products. Offered: Sp.

**PHRMRA 536 Skills for the Regulatory Affairs Professional (2)** Covers essential skills in regulatory affairs and includes an overview of local medical products companies. Offered: AWSpS.

**PHRMRA 545 Statistical Basis of Quality Assurance (3)** *Hazlet* Applies statistical methods to medical products design, clinical evaluation, manufacturing and post-marketing surveillance. Prerequisite: introductory statistics. Offered: A.

**PHRMA 546 Technical Writing for the Medical Products Industries (3)** *Hazlet* Presents up-to-date information and strategies for effective technical communication within the medical product industries. Addressed the appropriate and correct use of the English language, information design, and the use of computer technology in producing professional documents. Emphasizes communicating technical information to a variety of stakeholders. Offered: A.

**PHRMRA 547 Advanced Topics in Medical Products Regulation (2, max. 6)** *Hazlet* Addresses essential topics in medical products regulation. Employs a combination of lecture presentations, case studies, and participants' small group discussion to achieve practical outcomes for regulatory professionals. Offered: AWSp.

**PHRMRA 548 Biomedical Regulatory Affairs Practicum (1-9, max. 9)** *Hazlet* Provides a practical experience to ensure that participants are able to shepherd new medical products (drug, device, biologic) through regulator, clinical and quality assurance aspects. Includes a project and final report. Offered: AWSp.

**PHRMRA 550 Advanced Technical Writing for Biomedical Regulatory Affairs (2)** *Teal* Further examines communications with attention to best written practices. Provides an intensive review of common editing and advanced strategies for crafting highly reliable and effective documentation. Credit/no credit only. Prerequisite: PHRMRA 546 or permission of instructor. Offered: Sp.

**PHRMRA 560 Short Course in Multinational Biomedical Regulatory Affairs (2, max, 30)** *Hazlet* Presents three medical products registration countries or groupings (for instance, European Union, World Health Organization). Locale based on program impact, unique features, or recent or controversial regulatory issues.

**PHRMRA 595 Special Topics in Regulation (1-6, max. 24)** Offered: AWSpS.

# Evans School of Public Affairs

## SCHOOL OVERVIEW

### Dean

Sandra O. Archibald  
208E Parrington Hall

### Associate Deans

Ann Bostrom  
327 Parrington Hall  
Alison Cullen  
331 Parrington Hall

The Daniel J. Evans School of Public Affairs is a graduate professional school providing education and research for current and future leaders in pursuing challenging public-service careers in government, nonprofit, or private-sector organizations. To address the educational needs and professional interests of individuals at different stages of their careers, the school offers the Master of Public Administration (MPA), the Executive Master of Public Administration (Executive MPA), Peace Corps Master's International, and the PhD in Public Policy and Management.

Master's-level programs enable students to acquire the policy analysis techniques, management knowledge, problem-solving skills, and political acumen required for effective leadership across sector boundaries and in regional, national, and international policy. MPA graduates hold leadership positions such as mayors and city managers; local and regional government administrators; foreign service officers; senior military and public safety positions; assistants to elected officials; analysts with budget offices, legislative staff units, and city councils; directors of social service agencies; leaders and managers of nonprofit organizations; and administrators of arts organizations. In addition, a number of alumni are employed in private sector positions involving substantial contact with public agencies.

The PhD program focuses on research that prepares students with a strong interdisciplinary perspective and a solid foundation of theory and methodology in policy analysis and management. The PhD program prepares students for successful careers as faculty in university programs in public policy and management, and in research positions in the public and nonprofit sectors.

## Master of Public Administration

### Evans School MPA Program

Evans School MPA is designed for present and future leaders of the public, private, and nonprofit sectors, emphasizing broad-based public policy analysis and management knowledge. Degree requirements for our program are flexible and can be tailored for students who are early in their careers, as well as those who have additional years of progressively responsible work experience. While most students enroll full-time and generally take two years to complete their degree, flexible evening and part-time options are also available.

### Degree Requirements

72 credits, with a minimum 60 credits from within the Evans School, as follows:

- **Core Curriculum (36 credits):**
  - Managing Politics and the Policy Process (PB AF 511)
  - Managing Organizational Performance (PB AF 512)
  - Public Policy Analysis (PB AF 513)
  - Microeconomics (PB AF 516, PB AF 517)
  - Public Budgeting and Financial Management (PB AF 522)
  - Program Evaluation (PB AF 526)
  - Quantitative Analysis (PB AF 527, PB AF 528)
- Concentrated study in a field of specialization, three courses minimum (12 credits)
- Public affairs electives, two-course minimum (8 credits)
- An internship (minimum 400 non-credit work hours)
- 8-credit degree project (PB AF 608) or Public Service Clinics (PB AF 606, PB AF 607)

For full program details, visit [evans.washington.edu/degree/mpa/](http://evans.washington.edu/degree/mpa/)

### Executive MPA Program

The Executive MPA program is a cohort-based, modular program designed to meet the needs of senior-level managers and executives with 10 or more years of progressively responsible, professional experience (typically directors, senior managers in or near leadership positions, and high-level technical staff). Students must successfully complete 45 credits of coursework within a specially designed curriculum combining one intensive week, several weekend modules and numerous online assignments. Intensive learning emphasizes a variety of critical concepts in executive leadership, including: performance management and accountability; change management; communication skills; ethics and leadership; executive decision-making; human resource management; strategic financial management; and strategic leadership. Emphasis is on decision making, practical application, and integration of learning with experience. The program relies on a cohort model, so entering students must begin their studies with a seven-day residential retreat. Students complete the program in approximately 18 months.

### Degree Requirements

45 credits, as follows:

- One "Foundation Week" in Strategic Leadership and Performance Challenges: PA EX 501
- Twelve three-day weekend core modules in Executive Decision Making (PA EX 502), Strategic Financial Management (PA EX 503, PA EX 505), Executive Economics (PA EX 504), Mission Integrity (PA EX 506), Values and Personal Integrity (PA EX 507), Leading for Human Development (PA EX 508), Leading Across Boundaries (PA EX 509), Negotiation and Mediation (PA EX 510), and Strategic Communication (PA EX 511), Strategic Policy Making (PA EX 512), and Leading for a Legacy (PA EX 513)
- Online assignments
- Degree project not required

For full program details, visit [evans.washington.edu/executive-education/mpa](http://evans.washington.edu/executive-education/mpa).

### Peace Corps Master's International

Peace Corps Master's International (PCMI) students must successfully complete 51 credits of coursework along with two years of Peace Corps service in international nongovernmental organization development and a degree project. PCMI students generally complete all core courses in three quarters prior to leaving for Peace Corps service; upon re-

turning to UW, students complete their coursework and a final degree project in one or two quarters. While on assignment overseas, students remain in touch with their faculty adviser and a returned volunteer from the Evans School. PCMI students generally create a Plan of Study focused on international nongovernmental management or other international management and policy issues, such as environmental or health policy. Students complete the program in approximately three to three-and-a-half years.

### Degree Requirements

51 credits, as follows:

- **Core curriculum:**
  - Managing Politics and the Policy Process (PB AF 511)
  - Managing Organizational Performance (PB AF 512)
  - Public Policy Analysis (PB AF 513)
  - Microeconomics (PB AF 516, PB AF 517)
  - Public Budgeting and Financial Management (PB AF 522)
  - Program Evaluation (PB AF 526 or PB AF 536)
  - Quantitative Analysis (PB AF 527, PB AF 528)
- Electives (including 9 credits of restricted electives: 3 credits each in economics, analysis, and values) (17 credits)
- Two years of Peace Corps service
- 6-credit degree project related to Peace Corps fieldwork

For full program details, visit [evans.washington.edu/courses-degrees/mpa/peace-corps](http://evans.washington.edu/courses-degrees/mpa/peace-corps).

### Doctor of Philosophy

The PhD in Public Policy and Management is a research program that prepares its graduates for careers as faculty in university programs in public policy and management, and for research positions in the public and non-profit sectors. The interdisciplinary curriculum draws broadly on theoretical and methodological foundations in policy analysis and management. Substantive policy areas reflect such diverse faculty research agendas as education and social policy, environmental policy, international development, nonprofit management, and urban policy.

This highly competitive and selective program admits three to five excellent applicants each year, and provides funding and mentoring to help them succeed. The program aims to be one of the top programs in the field of public policy and management, serving not only the Pacific Northwest, but the national and the global market for scholars in this field.

### Degree Requirements

90 credits, as follows:

The program consists of two years, or six full-time academic quarters, of coursework and examinations, research, and the writing of a dissertation beyond the two years.

The first-year core curriculum prepares doctoral students to undertake independent scholarship in public policy and management: Research Design (PPM 502), Institutional Perspectives on Management and Leadership (PPM 504), Microeconomics (PPM 506), Public Policy Processes (PPM 508), Policy Analysis and Evaluation (PPM 510), Quantitative Methods Sequence (SOC 505 and SOC 506 or ECON 580 and ECON 581), and a qualifying examination.

In the second year, doctoral students increase their analytic and methodological skills. Requirements include Data Analysis Practicum (PPM 512) at least one qualitative methods and one additional quantitative methods course, proposed by the student and approved by the PhD Program Coordinator. Students are encouraged to consider obtaining a statistics certificate from CSSS. At least three courses in a substantive policy field or in management studies are required in this year as well.

Beyond the second year, requirements include: a general examination/dissertation proposal (advancing to candidacy), preparation of a dissertation of original research, and a final examination (dissertation defense).

Students are expected to complete the degree in four to five years, depending on the individual student. Prior coursework in calculus is expected before matriculation.

For full program details, visit: [evans.washington.edu/courses-degrees/phd](http://evans.washington.edu/courses-degrees/phd)

## Concurrent Degree Programs

The Evans School offers the MPA degree concurrently with the following five programs: Master of Urban Planning (MUP), Master of Arts in International Studies (MAIS), Master of Public Health (MPH), Master of Science in Forest Resources (MS), Juris Doctor (JD). Concurrent degree applicants must apply through, and be accepted into, both programs. Admission criteria are those of each individual program.

## Admission Requirements

Admission to the Evans School is highly competitive and selective, and is based primarily on the applicant's demonstrated ability to complete the graduate program while sustaining a high level of achievement. The school's Admissions Committee reviews previous undergraduate or graduate (if applicable) coursework, grades and GRE test scores, and gives considerable weight to professional experience, previous academic awards or scholarships, volunteer work, letters of recommendation, and the applicant's writing skills as demonstrated in a personal essay. The school admits students annually for autumn quarter.

### General Requirements

Applicants must hold a baccalaureate degree from an accredited college or university in the United States, or its equivalent from a foreign institution, and have achieved a minimum grade point average of 3.0 on the last 90-quarter (or 60 semester) credits of undergraduate work.

Graduate Record Examination (GRE) general test scores are required for admission to all programs except the Executive Master of Public Administration. TOEFL scores are required for international students only.

Visit [www.evans.washington.edu/degree](http://www.evans.washington.edu/degree) for specific requirements of each program.

### Application Deadlines

Due to class-size limitations in our competitive programs, applicants are encouraged to submit their applications as early as possible.

Application materials to the MPA program and to the Peace Corps Master's International program must be received online and postmarked by January 15 for priority consideration. Applications received after this date will be accepted for review on a space available basis until March 1.

Application materials for the Executive MPA degree program must be received online and postmarked by May 1. Applications received after this date will be accepted for review on a space-available basis until July 1.

Application materials for the PhD program in public policy and management must be submitted and postmarked by February 1. Applications postmarked after February 1st will not be reviewed.

Applicants to all programs must also apply to the UW Graduate Admissions Office by the specific program deadlines above.

## Financial Aid

For further information, visit: [evans.washington.edu/prospective-students/financial-aid](http://evans.washington.edu/prospective-students/financial-aid).

## Evans School Fellowships

The Evans School offers several fellowships to entering students each year from the school's endowed fellowship funds. These typically consist of \$4000-\$5000 stipends awarded primarily on the basis of academic achievement and/or excellence in public service. Applicants interested in school fellowships must submit the Evans School Financial Aid Form with their Evans School application.

- *Daniel J. Evans Endowment for Excellence in Public Service:* Fellowships support students aspiring to excellence in public service.
- *Nancy Bell Evans Endowment for Excellence in Nonprofit Service:* Fellowships support students who aspire to excellence in nonprofit service and philanthropy.
- *Jon Brock Endowed Fellowship:* Supports outstanding master's students studying conflict resolution and management in public and nonprofit sectors.
- *Elaine Chang Endowed Fellowship:* Provides support to outstanding students pursuing studies in international peace and development.
- *Brewster C. Denny Endowed Fellowship:* Supports students committed to excellence in public service.
- *Robert J. and Micki E. Flowers Endowed Fellowship:* Provides support to outstanding students from diverse backgrounds pursuing careers in public and nonprofit service.
- *Margaret T. Gordon Endowed Fellowship:* Supports outstanding Evans School students.
- *Henry M. Jackson Endowed Fellowship:* Supports students pursuing careers in environmental policy and natural resources management.
- *Morton Kroll Endowed Fellowship:* Provides support to top students pursuing arts management internships.
- *Robert J. Lavoie Fellowship:* Provides funds to outstanding students preparing to work in public service.
- *Governor Gary Locke Endowed Fellowship:* Supports Asian/Pacific Islander students pursuing studies in public service and politics.
- *Hubert G. Locke Endowed Fellowship:* Provides support for students pursuing internships in nonprofit organizations devoted to social justice issues.
- *George A. Shipman Endowed Fellowship:* Supports outstanding students pursuing careers in public service.
- *Evans School Alumni Endowed Fellowship:* Supports recruiting of outstanding students.
- *Home Street Bank Fellowship:* Supports an outstanding graduate student pursuing a career in public affairs.
- *Scottish Rite Scholarship Foundation of Washington PCMI Fellowship:* Provides a stipend to an entering student accepted to the Peace Corps Master's International degree program.
- *William Shelton Fellowships:* Funded by the Scottish Rite Scholarship Foundation of Washington to promote better government through education.

## Assistantships

The Evans School offers many research, teaching, and staff assistantship positions each year. Typically 10 to 20 hours per week, these positions include a monthly stipend, benefits, paid tuition, and health insurance. Hiring is competitive. Most announcements are posted in the spring, or as positions become available, on the Evans School Intranet.

Research assistantships are open to first- and second-year MPA students and to PhD students. First-year MPA students are eligible to apply upon acceptance. Students typically work on grant-funded studies, special conferences, and public policy colloquia series sponsored by the school's research centers. Research assistants are exposed to a wide range of policy issues, including regional growth management, international trade, state and fed-

eral entitlement programs, health-and-human-services delivery, and education reform. In addition, some research fellowships are offered each year to highly qualified applicants during the admission process. These fellowships guarantee a paid research assistantship for the first year of study and tuition support.

Teaching and staff assistantships are reserved for second year students and PhD students. Teaching assistants are hired for most core courses. Staff assistantships include such positions as coordinators for international programs, peer advisers, public service clinic/career services coordinators, and computer lab managers.

### Work-Study Status

When hiring for hourly positions, the school often gives preference to students possessing work-study status. Work-study positions have included research assistance for faculty and grants, and staff support for the school's centers. Work-study status is one of several forms of aid granted by the University of Washington Financial Aid Office.

## FACILITIES

### Research Facilities

The school promotes the application of research to real-world policy contexts and its integration with the teaching enterprise. In addition to supporting the independent research of faculty members, the school houses several research and policy centers focusing on regional development, family and child welfare, poverty alleviation, nonprofit management and leadership, international development, consensus building and conflict resolution, and education reform.

These centers shape students' educational experiences by offering research assistantships, special events, career networking, degree-project advising, teaching, and guest lecturing in classes taught by center faculty. The availability of research assistantships is based on current projects.

### Human Services Policy Center (HSPC)

The center pairs applied analytic research, preventive approaches, and promotion of comprehensive policies to improve the lives of children, families, and communities, especially those who are disadvantaged. Public communications and strategic partnerships ensure that the HSPC's research affects policy. Core programs include educating and caring for young children; communicating about policies for children and families; and profiling child well being (Washington Kids Count).

### Marc Lindenberg Center for Humanitarian Action, International Development, and Global Citizenship

The Lindenberg Center prepares students and faculty for life and work in a global society through partnerships that expand teaching, research, and service opportunities in humanitarian action, international development, and global citizenship. The center's programs enable students to understand connections between poverty, hunger, health, and human security, and equip them with the skills and knowledge to create a better, more humane world. In partnership with international organizations, the center conducts research and multi-disciplinary academic training programs that prepare students for work in emergency and humanitarian relief and international development. The center also promotes responsible global citizenship through exchanges with developing countries, internationalization of curriculum, and collaboration with K-12 schools to change the way students see the world and think about global issues.

### ***Nancy Bell Evans Center on Nonprofit Leadership and Philanthropy***

The center enhances the understanding and vitality of the nonprofit sector through research, education, and community engagement. The center conducts research of importance to scholars, policy-makers, and practitioners. It also strives to connect scholars doing research with practitioners in the field. A special research focus is the changing service and policy roles of nonprofit organizations, particularly in the context of devolution, privatization, and globalization. The center serves as the hub of nonprofit studies across the UW campus and, in conjunction with the Cascade Center for Public Service, provides growth and learning opportunities for senior-level nonprofit professionals in the Pacific Northwest.

**The William D. Ruckelshaus Center** The William D. Ruckelshaus Center, formerly known as the Policy Consensus Center, is a joint venture between the UW and WSU. The center draws together representatives from a wide network of agencies, advocacy groups, businesses, agribusiness, tribal governments, university researchers, and others to find long-term solutions to policy conflicts in Washington State, enhancing the region's capacity for effective, sustainable policy making and problem solving. Policy areas range from natural resources and economic development to labor issues in the business community and elsewhere. The center's activities focus on four major areas: providing an objective forum for conflict resolution or policy enhancement; building capacities through assessment, training, and consulting to broaden stakeholders' perspectives and improve collaboration; researching and disseminating best practices in conflict resolution and policy problem solving; and closing the gap between science and policy.

### ***West Coast Poverty Center***

This center serves as a regional hub for research, education, and policy analysis on the causes and consequences of poverty in the west coast states. At the UW, the center is a collaborative venture of the Evans School, the School of Social Work, and the College of Arts and Sciences, and is the newest of three regional poverty centers funded by the U.S. Department of Health and Human Services. The center fosters opportunities for cross-disciplinary exchanges and collaboration among poverty researchers and practitioners. It supports research on a broad range of poverty-related topics, such as labor market changes and consequences for economic security and social well-being; new patterns of work and family life, including transformations in family formation, employment, and care-giving arrangements for parents and children; and demographic trends and implications for poverty and public policy. Key activities include awarding grants to established and emerging poverty scholars and doctoral students; hosting seminars and research conferences on poverty and public policy; conducting outreach, dissemination, and dialogue with policymakers and practitioners; and mentoring the next generation of poverty scholars and practitioners.

### ***Executive Training, Civic Engagement, and Outreach***

#### ***Cascade Center for Public Service and Leadership***

The Cascade Center, a public and nonprofit leadership training unit, provides executive and mid-level public and nonprofit sector leaders professional development opportunities to strengthen their management skills. A diverse complement of two-day, three-day, and five-day management courses, as well as a two-week executive program, helps meet a wide range of management training needs in the Northwest and the U.S.

Cascade Center courses are offered at the UW campus in Seattle. With prior permission, traditional and mid-career MPA students may apply for a maximum of 12 elective

credits to be waived from their degree requirements upon completion of Cascade courses, with approval from their adviser. Executive MPA students may apply for up to nine elective credits to be waived from their degree program, with approval from their adviser. Cascade courses are not graded and participants do not earn academic credits. Rather, the Evans School may accept completed Cascade coursework in lieu of required elective credit hours.

### ***Civic Engagement***

An important convener of public policy deliberations in the Puget Sound region, the Evans School provides a neutral forum in which leading scholars and practitioners can talk about practical solutions to emerging policy issues. Groups wanting a university partner in public events often turn to the Evans School. Through strategic alliances, the school attracts many people to engage in dialogue with faculty, students, and the greater policy community. Public lectures, conference, symposia, and panel discussions help students enrich their policy studies beyond the classroom. These include the Daniel J. Evans Lessons in Leadership Seminars, the Dael L. Wolfe Memorial Lecture in Science and Public Policy, the Betty Jane Narver Lecture on Women in Public Policy, the Civic Engagement for the 21st Century Seminar Series, the Forum at the Evans School, and the quarterly Dean's Forum.

In addition, through service on commissions, organizational boards, and other means, Evans School professors and students actively assist governments, NGOs, nonprofits, community organizations, and companies to improve society in the U.S. and abroad. Whether through public service clinics or internships, trainings, or volunteer service projects, students can actively engage their knowledge in serving the public good.

### ***Electronic Hallway***

The Electronic Hallway, [www.hallway.org](http://www.hallway.org), is an internationally recognized, online resource for public affairs teaching and curriculum development. It supports the Evans School teaching mission and distributes cases and skill exercises to educators in public policy and management.

## **COURSE DESCRIPTIONS**

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at [www.uw.edu/students/crscat/](http://www.uw.edu/students/crscat/)

**PB AF 403 Professional Leadership (4)** Cultivates practical skills required to lead within various organizational contexts: managerial strategies for public, nonprofit, and business organizations are developed through case studies and guest speakers. Focuses on analytical and ethical approaches to problem solving and the communication skills needed for effective leadership in any career.

**PB AF 499 Topics in Public Policy (3–5, max. 6) I&S** Examines selected issues of importance in all areas of public policy. Focus on in-depth analysis of vital public policy issues and the integration of economic, political, and administrative perspectives on them. Offered: jointly with POL S 404.

**PB AF 501 Legislative Relations (3/4)** Studies role of legislative bodies in American public policy making. Builds on case studies and focuses on tactics, constraints, and options involved in working within a legislative process to achieve public policy goals.

**PB AF 503 Executive Leadership (3/4)** Nature of executive life in the public sector, the function of leadership in implementing, making, and changing policy. Leadership styles, the relation of leadership to its constituencies and communities.

**PB AF 504 Leadership Ethics in the Public Interest (3/4)** Addresses the moral challenges facing leaders in the public and nonprofit sectors. Examines the values and virtues important to sustained ethical leadership as well as strategies

to build strong institutional cultures and support ethical practices in institutions.

**PB AF 505 The Law of Public Administration (3)** Legal framework of public administrative action in the United States, emphasizing constitutional requirements; operation of the administrative process; management of personnel, funds, and contracts; and judicial review of administrative activity.

**PB AF 506 Ethics and Public Policy (3/4)** Teaches students to identify moral issues in public life. Special focus on the integration of moral concerns into public discussion in a manner which contributes to good policy and does not polarize issues. Discusses moral and political theory by focusing on contemporary cases and issues.

**PB AF 507 Mediation and Negotiation as Instruments of Public Management and Policy-Making (3/4)** Possibilities offered by mediation and negotiation methods using a mixture of cases, readings, discussions, lectures, and guest speakers. Use of negotiation and mediation techniques to resolve disputes and disagreements over public-policy issues.

**PB AF 509 Managing People in Public and Nonprofit Agencies (3/4)** Emphasizes the role of the program manager rather than that of the personnel officer. Managing people within a variety of programmatic, bureaucratic, and political settings. Case studies form basis of class discussion, assignments.

**PB AF 510 Foundations of Public Service in American Democracy (1)** Discusses the role of public service in the United States through examination of historical and institutional foundations of the U.S. political regime. Pays special attention to the structures of government and constitutional values and conflicts at the heart of the political system.

**PB AF 511 Managing Politics and the Policy Process (4)** Examines broad aspects of organizational life and orients students to key internal and external challenges and opportunities of managing public and nonprofit organizations. Main topics include organizational mission, values, communication, culture, organizational environment and the policy process, legislative-executive relations, interest group advocacy, and media relations.

**PB AF 512 Managing Organizational Performance (4)** Addresses questions of organizational design, personnel, and operations management to equip students with skills to perform effectively in mission-driven organizations. Core topics include organizational design, inter-organizational networks, human resources and staff management, improving service delivery and production flows, measuring and managing for performance, and ethical leadership.

**PB AF 513 Public Policy Analysis (4)** Production and use of analysis to support public policy decisions. Defining problems, devising alternative solutions, clarifying stakes in choices, predicting impacts of choices. Skills developed by working on specific policy problems. Assumes familiarity with statistics, microeconomic theory, and institutions and processes of American government. Prerequisite: PB AF 516 or permission of instructor.

**PB AF 514 Psychology for Policy Analysis (3/4)** Examines basic concepts in social psychology, judgment and decision making, and behavioral economics. Explores how these concepts can be applied to the design, implementation, and evaluation of successful policy.

**PB AF 515 Decision Making for Public Managers (3)** Considers decision making from normative, prescriptive, and descriptive perspectives. Emphasizes individual decision making, with some discussion of organizational decision practice. Focuses on decision analysis; presents tools for structuring decisions; and considers the role of analysis as a basis for negotiation.

**PB AF 516 Microeconomic Policy Analysis (4)** Ways in which microeconomic analysis can contribute to the analysis of public sector issues. Supply and demand, consumer and firm behavior, competitive and monopoly markets, income distribution, market failure, government intervention. Policy applications of theory. Prerequisite: elementary economics.

**PB AF 517 Economics of the Public Sector (3/4)** Methods of analyzing effects of public expenditures and taxes on behavior of individuals and firms, on economic efficiency, and on equity and distribution of income. Theory and practice of intergovernmental fiscal relations. Application of theory to formulation of public policy. Prerequisite: PB AF 516.

**PB AF 518 Applied Cost Benefit Analysis (3/4)** Develops familiarity through problems and applications. Stresses techniques of use.

**PB AF 519 Law and Economics (3–4, max. 4)** Offered: jointly with LAW A 561.

**PB AF 520 Intergovernmental Relations (3)** Comparative study of the issues involved in implementing government programs across multiple jurisdictions. Issues of accountability, feasibility, politics, and constitutional limits are examined by focusing upon various methods used to implement programs across federal, state, regional, and international jurisdictions.

**PB AF 521 Water Center Seminar (1, max. 6)** *Steinmann* Weekly seminars covering water resources and watershed topics with lectures from scientists on and off campus. Credit/no credit only. Offered: jointly with CFR 529/FISH 529; AWSp.

**PB AF 522 Financial Management and Budgeting (4)** An introduction to financial and management accounting, and an overview of public and nonprofit budgeting systems. Covers tools and techniques for budget analysis and the use of financial information in managerial decision making.

**PB AF 523 Advanced Budgeting in the Public Sector (3)** Covers more advanced topics in governmental budgeting. Provides an overview of the functions, expenditures, and revenues of federal, state, and local governments. Prerequisite: PB AF 522.

**PB AF 524 Public Sector Financing (3)** *Dively* Covers financial management in public agencies, with the primary focus on state and local government. Prerequisite: PB AF 522.

**PB AF 525 Qualitative Methods for Policy Analysis (3/4)** Reviews qualitative research methods developed in the social sciences, exposure to writings from the field, opportunities to practice fieldwork, and feedback on a proposed study that employs qualitative methods.

**PB AF 526 Program Evaluation (3/4)** Theory, practice, and politics of evaluation, from simple feedback mechanisms to evaluation of large-scale ongoing programs and social experiments. Emphasis on applications of experimental and quasi-experimental evaluation. Case studies illustrate various types of evaluation. Prerequisite: PB AF 527

**PB AF 527 Quantitative Analysis I (4)** Two-quarter sequence explores how to formulate research questions, gain experience with conducting research, and learn how to assess which statistical tools or research methods are appropriate to answer different types of policy or management questions. Covers probability, descriptive statistics, hypothesis testing, and confidence intervals. Prerequisite: graduate status in School of Public Affairs or permission of instructor.

**PB AF 528 Quantitative Analysis II (4)** Second quarter of a two-quarter sequence aimed at helping students become informed users and critical consumers of research and statistical analysis. Combines material on research design and data collection methods with tools for multivariate analysis. The multivariate analysis methods include correlation and an introduction to multivariate regression. Prerequisite: PB AF 527.

**PB AF 529 Advanced Multivariate Analysis (3/4)** *Klawitter* Prepares students for advanced work with multivariate methods in program evaluation and policy analysis. Includes a data project what results in a professional quality product; reading examples of professional work and presentations of methods and results. Prerequisite: PB AF 528.

**PB AF 530 International Affairs (3)** Provides a broad understanding of international issues and United States policy. Students explore U.S. foreign policy and theories of major international actors in international trade, security, and strategic concerns, refugee policy, conflict resolution, develop-

ment assistance, and the environment. Offered: jointly with POL S/SIS 534.

**PB AF 531 Development Management in the 21st Century (3/4)** Addresses organization, administration and evaluation in governmental and non-governmental agencies involved in development efforts. Students examine development strategies, alternative management approaches, and management skills such as budgeting, finance, human resource development and program evaluation. Other topics include communication, expatriate/local power imbalances, decentralization, community involvement, culture, and personnel issues.

**PB AF 532 Managing Policy in a Global Context (3/4)** Examines different policy environments leaders must address to achieve policy in comparative and international settings. Includes strategies, tactics, and frameworks needed to initiate and sustain policy dealing with authoritarian, democratic, liberal, and one-party states. Focuses on pressures from the international system and issues such as globalization.

**PB AF 533 Economics of International Development (3/4)** Introduction to sustainable international development and its physical, human, social, and natural capital components. Students examine the new growth theories and evidence, and their relationship to democracy, trade, and other policies and institutions. Topics include income distribution, poverty, and the environment.

**PB AF 534 Rural Development: Economics and Policy (3/4)** Survey of current microeconomic questions related to well-being of rural people in developing countries. Strengthens the ability to design appropriate policy tools for rural development by enhancing understanding of economic theory and its applications to rural households and by reviewing findings.

**PB AF 535 Seminar in American Foreign Policy (3)** Examines how the U.S. foreign policy process works, emphasizing formation, content and implementation of post-Cold War U.S. foreign and national security policy, with emphasis on current foreign and national security policy.

**PB AF 536 Program Evaluation in the Developing World (3/4)** *Gugerty* Provides an overview of issues in the analysis and evaluation of development projects focusing on the developing world with three themes: understanding and analyzing development programs, understanding and using the logic of impact assessment; identifying practical, field-based tools for monitoring and evaluation in low resource environments.

**PB AF 537 Topics in International Affairs (3–5, max. 12)** Examines topics of interest and import in foreign policy and international affairs. Focuses on the in-depth analysis of issues and the integration of economic, institutional, and political dimensions.

**PB AF 538 International Organizations and Ocean Management (3)** Survey of the manner in which international regimes and organizations attempt to manage and regulate the uses of the ocean. Primary emphasis is on the analysis of the effectiveness of regimes and of processes that support or constrain these organizations. Prerequisite: SMA 500 or permission of instructor. Offered: jointly with SMA 507.

**PB AF 539 Values in International Development (3)** Examines and clarifies international development values, including underlying theories of justice on which they seem to be built, the ways in which they are justified to stakeholders, the general public, and impacts they have upon people, especially the poorest and most vulnerable.

**PB AF 540 African Development Challenges (3)** Provides an introduction to the political economy of development in sub-Saharan Africa. Focuses on understanding various theories about the underlying causes of current African development challenges and on analyzing and evaluating various proposals and policies for addressing these challenges.

**PB AF 541 The Role of Nongovernmental Organizations in International Development (3)** Explores some of the major issues faced by nongovernmental organizations (NGOs) working on development issues worldwide. Examines organi-

zational forms, NGO-state relationships, inter-organizational relationships, and the relationship of NGOs to beneficiaries.

**PB AF 542 The Law and Economics of Regulation (3/4)** Examines the principles and practices of regulatory environments.

**PB AF 544 Land Use and Transportation Policy (3/4)** Provides an historical and theoretical context for a fuller understanding of federal and local policies regarding land use and transportation as well as a range of public policy options which influence how metropolitan areas grow and how people move around.

**PB AF 545 Public Leadership Seminars (3)** Provides a forum to reflect on the major dimensions of modern managerial leadership. Includes a team project working with outside clients or organizations.

**PB AF 546 Professional Development: Hubert H. Humphrey Seminar (1, max. 3)** Engages students as global citizens, discussing global issues affecting students' home environments. Utilizes the diversity in professional backgrounds and regional experiences of participants. Provides an introduction to US government at the Federal, State, and Local levels designed to enhance students' ability to participate and to create appropriate professional affiliations. Credit/no credit only.

**PB AF 547 Water Resource Economics (4)** Explores the economics of water resources, including static and dynamic efficiency for consumers and producers and other topics concerned with water quality. Explores effects of climate change on water resources, and economic approaches to mitigate these effects.

**PB AF 548 Management and Public Capital Markets (4)** Explores the new debt management environment for financial managers of public organizations, and the meaning and value of active public debt management, including the analytical tools and accountability issues that characterize responsible management.

**PB AF 550 Management of Nonprofit Organizations (3/4)** Focuses upon the roles played by nonprofit organizations in meeting the public good. Examines internal management issues such as structure, budget, and operations; and external issues such as board functions, legal status, marketing, media relations, and fund-raising.

**PB AF 551 Program Development and Strategy for Nonprofit Organizations (3/4)** Explores the means through which nonprofit organizations establish strategies to expand their impact, sustain their organizations, and shape the future, and the steps through which they develop effective new programs to implement those strategies.

**PB AF 552 Public Arts Policy and Management (3)** Role of government in arts. Range of public support at federal, state, and local levels; reasons for its development and viability. Nature, evolution, functions of public arts agencies in implementing arts policy; relation of such agencies to their constituencies. Seattle, King County, and Washington State serve as case studies.

**PB AF 553 Nonprofit Financial Management (3/4)** Provides an understanding of the financial framework on nonprofit organizations. Focuses on the financial principles of management of nonprofits, with an emphasis on financial reporting, strategic financial planning, managerial decision-making and budgeting.

**PB AF 554 Nonprofit Organizations and Public Policy (3)** Examines the changing role of nonprofit organizations in American society. Selected policy topics include privatization, for-profit/nonprofit competition, public-private partnerships, tax policy, and new sources of revenues.

**PB AF 555 Topics in Nonprofit Management (3–5, max. 12)** Examines various topics of public importance in nonprofit management. Integrates the political, managerial, and economic dimensions of these issues.

**PB AF 556 Public-Private Partnerships (3)** Provides a comprehensive overview and examination of partnerships and their implications for public policy and nonprofit and public management. Examines the diverse array of partnerships

in the UW and abroad and the management challenges involved in the development and implementation of different partnership strategies.

**PB AF 560 Inequality, Governance, and Policy in the Metropolitan Region (3/4)** Explores national/local urban policy concerning the major problems confronting cities and metropolitan regions today. Economic globalization, income inequality, and metropolitan decentralization shape the urban agenda, the context for urban policy, and the analytic focus of the course. A project allows the exploration of strategies for intervention. Offered: jointly with URBDP 560.

**PB AF 561 Urban Economics and Public Policy (3/4)** Examines the rationale for and consequences of public intervention in urban land, housing, and transportation markets through land use regulations such as zoning and urban growth boundaries, infrastructure investments, and fiscal policies to manage urban development and traffic. Prerequisite: PB AF 516 or equivalent. Offered: jointly with URBDP 561.

**PB AF 562 Introduction to Neighborhood Planning and Community Development (3)** Provides introduction to basic practices in neighborhood planning and community development, including theoretical/historical bases; developing neighborhood plans/projects; indicators and evaluation of neighborhood quality; community participation; institutional framework, ethical dilemmas, and professional roles. Addresses current issues, including Seattle's experience, NIMBYism, security, neighborhood character, housing segregation, environmental racism. Offered: jointly with URBDP 562.

**PB AF 564 Housing and Social Policy (3)** Focuses on the problem of affordable housing and its interrelationships with social problems in the United States.

**PB AF 565 Topics in Urban Affairs (3-5, max. 12)** Examines various topics of public importance in urban policy. Integrates the political, managerial, and economic dimensions of these issues.

**PB AF 566 Community Economic Development (3/4)** Explores the relationship between local community economic development, environmental sustainability, cultural vitality, and trend in regional and national economics, with specific focus on how to make community and economic investments that yield development outcomes that contribute to economic, equitable, environmental, and cultural vitality.

**PB AF 567 Community Engagement and Urban Governance (3/4)** Investigates interactions between citizen participation and efforts to measure and improve policy and program performance in large cities. Develops analytic frameworks and practical strategies for sustaining and enhancing participation and performance.

**PB AF 568 Social Justice and Public Policy (3/4)** Examines the values of social justice that motivate action in the public arena; thinks about how those values create concerns and solutions; and explores issues of equity and liberty, of balancing the rights of the individual, the common good, and redistribution.

**PB AF 569 Race and Public Policy (3)** Analyzes the way in which the persistent problem of race is expressed in the formation and implementation of social and public policy.

**PB AF 570 Foundations of Social Policy (3)** Examines major institutions and programs in social policy including: income maintenance, social services, education, and health care. Focuses on American social policy with some attention to comparative welfare state development. Includes extensive discussion of different policy strategies to address social policy problems.

**PB AF 571 Education, The Workforce, and Public Policy (3, max. 6)** Examination of policy issues involving education, training, the economy, and the development of the nation's human resources. Relationship between education, training, and work, underutilized workers, race and gender discrimination issues, and the role of education and training in economic development. Offered: jointly with EDLPS 563.

**PB AF 572 Higher Education and Public Policy (3)** Explores the nature of public policies affecting higher education, how these policies are made and influenced at both the federal and state levels, and the role of policy research and analysis, and several of the major current public policy problems and policy responses.

**PB AF 573 Topics in Education and Social Policy (3-5, max. 12)** Examines various issues of public importance in the areas of education and social policy. Focuses on in-depth analysis of relevant issues and the integration of the economic, administrative, and political dimensions of these issues.

**PB AF 574 Economics of Race and Inequality in the U.S. (3/4)** Covers the history of racial inequality over the past century, theories of the causes, wage determination and discrimination in employment and pay, inequalities in education and human capital development, and residential segregation and its consequences. Discusses the effectiveness and limitations of policy response to racial inequality.

**PB AF 576 Poverty and Anti-Poverty in the United States (3/4)** Examines the nature and extent of poverty in the U.S., its causes and consequences, and the antipoverty effects of public policies.

**PB AF 577 Topics in Microfinance (3)** Provides an overview of the basic issues and debates around microfinance. Students gain an analytical understanding of the opportunities and motivation for small scale financial services, and the limitations.

**PB AF 578 Asset Building for Low Income Families (3/4)** Explores assets and finances for low income families primarily in the U.S. Identifies programs and policies targeted toward asset building and looks at evidence of their efficacy. Uses a multi-disciplinary perspective to examine the economic, social, and political contexts for these policies.

**PB AF 581 Information Technology and the Policy-Making Process (3)** Demystifies information base for policy making in democracies. Examines theoretical and practical issues associated with information processing in the public sector. Considers role of new technologies in collecting, analyzing, and disseminating information with special attention to the relationship between these technologies and effective government service, public participation, and organizational accountability.

**PB AF 582 News Media and Public Policy (3)** Explores impacts of news coverage on public policy. Exposure to journalists' approaches to coverage of public affairs, as well as to strategies used by leaders of public/nonprofit agencies to attract favorable coverage and minimize damaging coverage. Students learn techniques for assessing impacts of news coverage.

**PB AF 583 Science, Technology, and Public Policy (4)** Examines the relationship between the advancement of technical knowledge, the pace of technological change, and public policies designed to induce or respond to these development. Issues of policy formulation, administrative design, and future trends; applications include biotechnology, energy, information technology, global warming, robotics, national security, homeland security, and space exploration.

**PB AF 585 Topics in Science, Technology, and Public Policy (3-5, max. 12)** Examines relationship between advancement of technical knowledge and pace of technological change, and public policies to induce or respond to these trends. Generic issues of government research, development, and personnel training programs are addressed. Applications of policy issues involving biomedical, communications, energy, environmental, transportation, and weapons technologies.

**PB AF 586 International Science and Technology Policy (3)** Seminar is designed: first, to analyze the relationships between research and development policy, capabilities, and national technological strategies for advanced industrial and less-developed countries; second, to deal with the international implications of particular technologies as countries try to make policy for them in regional and global organizations. Examples of specific technologies are chosen

from such fields as space telecommunication, weather and climate modification, airline transportation, nuclear energy, and seabed exploitation.

**PB AF 587 Water and Sanitation Policy in Economically Developing Countries (3/4)** Examines the policy dimensions of providing water supply and sanitation services in developing countries.

**PB AF 588 Environmental Risk Analysis (4)** Examines a variety of frameworks and models of risk with respect to regulation, policy, and decision-making.

**PB AF 589 Risk Assessment for Environmental Health Hazards (3/4)** Context, methodologies, types of data, uncertainties and institutional arrangements for risk assessment. Both qualitative and quantitative approaches to the identification, characterization, and control of environmental hazards to health emphasized through didactic and case studies. Offered: jointly with CEE 560/ENV H 577.

**PB AF 590 Environmental Policy Processes (3/4)** Presents background to establish the need for environmental policy. Explores in a comparative manner, examining both successes and failures, various strategies that have been used or proposed to protect the environment. Offered: jointly with CFR 592.

**PB AF 591 Seminar in Resource Policy and Management (1)** Introduction and orientation for concurrent degree program between the Evans School of Public Affairs and the College of Forest Resources. Examines research and literature on contemporary issues related to the integration of natural resource science, policy, and management, through discussion among faculty, students, and invited speakers. Offered: jointly with CFR 591.

**PB AF 592 Resource Policy and Administration (5)** Study based on understanding of the actors, arenas, issues, and policy communities that form the context for policy development and implementation. Exploration of approaches to policy inquiry. Consideration of implications for both policy and management. Students develop a study design for course project. Offered: jointly with CFR 571.

**PB AF 593 Climate Change and Energy Policy (3)** Energy policy formulation and implementation with emphasis on post-1973 developments. Energy conservation programs; changing roles of oil, coal, gas, nuclear, and solar energy; institutional, environmental and equity considerations; government research and development programs.

**PB AF 594 Economic Approaches to Environmental Management (3/4)** Layton Examines the economic tools relevant to natural resource and environmental management. Tools are developed in the context of a series of resource problems, with an eye towards building intuition useful for addressing complex policy problems that do not fit neatly into textbook examples.

**PB AF 595 Topics in Environmental Policy and Management (3-5, max. 12)** Examines various topics of public importance in environmental policy and management. Integrates the political, managerial, and economic dimensions of these issues.

**PB AF 596 Ethics and Values in Environmental and Natural Resource Policy (3)** Explores environmental values and ethics and their relationship to the policy process. Includes content on value foundation of economic efficiency and its relationship to fairness, legal entitlements, duty to other creatures, and incommensurabilities in valuing goods. Current policy controversies are addressed.

**PB AF 597 Role of Scientific Information in Environmental Decisions (3/4)** Cullen Examines how science contributes to decisions that involve the natural environment; how science and scientists help frame debates and decisions; how scientific findings are incorporated into decision-making processes; how scientists and non-scientists deal with uncertainty about scientific questions.

**PB AF 598 Administrative and Policy Skills Workshop (1-3, max.6)** Teaches practical administrative, leadership, and analytic skills commonly required of managers and analysts in the public and nonprofit sectors. The workshops empha-

size hands-on problem resolution, simulations, and actual practice.

**PB AF 599 Special Topics (1–6, max. 15)** Study and analysis of special topics in public affairs. Topics vary each quarter depending on curricular needs and interests of students and faculty.

**PB AF 600 Independent Study or Research (\*)**

**PB AF 605 Degree Project ([1–8]-, max. 8)**

**PB AF 606 Public Service Clinic ([3/4]-) *Carlson*** Serves to meet the degree project requirement as part of the Evans School curriculum. Students work in a supportive environment facilitated by peer and faculty to connect the research, organizational change, and capacity-building needs of community organizations and public agencies.

**PB AF 607 Public Service Clinic (-[3/4]) *Carlson*** Serves to meet the degree project requirement as part of the Evans School curriculum. Students work in a supportive environment facilitated by peer and faculty to connect the research, organizational change, and capacity-building needs of community organizations and public agencies.

**PB AF 608 Degree Project Seminar (3/4, max. 8)** Meets the degree project requirements as part of the Evans School curriculum. Students work in a supportive environment facilitated by peer and faculty to complete individual degree projects.

## Public Affairs Executive MPA

**PA EX 502 Executive Decision Making (3)** Examines multiple ways in which analysis can support good decision making by leaders. Examines the normal heuristics managers and leaders use and looks at the role of data analysis, modeling, and expert judgment in reefing judgment and leadership.

**PA EX 503 Strategic Financial Management I (4)** Introduction to state and local public finance and nonprofit financial management and analysis; political context and economic forces causing fundamental shift in resources and types of financing for public service; fundamental concepts of financial statements - their nature and use in the public and nonprofit sectors.

**PA EX 504 Executive Economics (3)** Explores basic principles of economics needed by executives to become critical consumers of economic analysis, recognizing when and how it is pertinent to decision-making.

**PA EX 505 Strategic Financial Management II (4)** Focuses on strategic financial management; alternative forms of organizational financial structure; analytic skills and managerial applications of financial accounting and budgeting, techniques of financial analysis, performance budgeting, and debt management; strategic finance linked to contracting, multiple forms of privatization, social enterprise, and managing multiple revenue streams.

**PA EX 506 Mission Integrity (3)** Integrates organizational mission with the culture using effective communications, outcomes assessments, and other tools for a citizen-oriented approach that relies on modern marketing methods.

**PA EX 507 Values and Integrity (3)** Provides a personal and value context from which to use the framework and methods to sustain a personal and institutional mission. Examines ranges of intelligence and learning styles to create a foundation of self understanding for leadership strength and integrity.

**PA EX 508 Leading for Human Development (3)** Focuses on how to build a humane and fair workplace consistent with the laws that govern modern employment. Examines critical moments of building a strong culture through evaluation, promoting, firing, discrimination, work force succession, and intergenerational leadership.

**PA EX 509 Leading Across Boundaries (3)** Examines the modern challenges of leading across complex networks of institutions and stakeholders, examining institutional, national, sectoral, and cultural boundaries. Examines these challenges in the context of globalization and the

emergence of multi-sectoral and multi-cultural networks of governance.

**PA EX 510 Negotiation and Mediation (4)** Explores a theoretical framework for negotiations with an equal emphasis on developing negotiation skills through role-plays. Focuses on techniques and nuances of negotiation that are most useful for a manager working in a complex, dynamic environment with multiple stakeholders.

**PA EX 511 Strategic Communication (3)** Focuses on effective communication, highlighting the advocacy and motivation facet of leadership. In order to understand elements of persuasive communication, emphasizes concepts of negotiation analysis; power and dependence, perceptions of conflict, and finding mutual gains.

**PA EX 512 Strategic Policy-Making (3)** Examines how managers can expertly function at the intersection of politics, policy, and the wishes of the public.

**PA EX 513 Leading for a Legacy (3)** Explores the nature of human culture and values and how they relate to human legacy by impacting the quality of humans in an organization and how legacy grows from the values of the trusteeship and stewardship.

## Public Policy Management

**PPM 500 Proseminar in Public Policy and Management (1)** Engages students with faculty to discuss research in public policy and management. Provides an effective means to become familiar with research agendas and opportunities in this field, and other aspects of socialization into the academic process, including teaching, grant writing, and publishing. Credit/no credit only. Offered: AWSp.

**PPM 502 Research Design (3/4) *Khagram, Thomas*** Provides a rigorous foundation for interdisciplinary research design. Introduces iconic types of theory (predictive, interpretive, and explanatory) and the philosophical foundations underlying these. Reviews a range of methodological approaches to research: experimental and quasi-experimental, statistical and quasi-statistical, comparative case-study, ethnographic, and triangulation. Offered: A.

**PPM 504 Institutional Perspectives on Management (4)** Prepares doctoral students for careers in research and teaching public policy, management, and leadership. Examines essential responsibilities that policy makers, managers, and other kinds of leaders must address to succeed in public service through competing theories of institutional design and action. Offered: A.

**PPM 506 Advanced Microeconomics for Policy Analysis (4)** Reviews standard individual choice models and newer perspectives from behavioral and institutional economics that inform public policy analysis. Topics include: models of individual choice, constrained and unconstrained optimization, information and uncertainty, intertemporal decision making, transaction costs and property rights, externalities, and public goods. Prerequisite: multivariate calculus; intermediate microeconomic theory. Offered: A.

**PPM 508 Public Policy Processes (5)** Political science frameworks, approaches, and theories concerning development and implementation of public policies within American political systems. Governmental behaviors and processes, including rational, political, and bureaucratic models of governmental decision making; agenda-building processes; and normative perspectives concerning role of governmental entities.

**PPM 510 Public Policy Analysis (4) *Zumeta*** Reviews public policy analysis and evaluation building on prior study of microeconomics, policy processes, research design, and statistics. Covers theoretical and interdisciplinary frameworks and applications of empirical methods to policy problems and solutions, and considers regularities in incidence, and effects of the use of alternative policy tools. Offered: S.

**PPM 512 Data Analysis Practicum (4) *Long*** Develops the methodological capacity to undertake independent research. Includes reading, critiquing, and replicating portions of selected empirical papers from a range of scholarly

areas. Provides opportunities to deal with issues of research design, data limitations, measurement, model specification, and interpretation. Offered: A.

**PPM 599 Topics in Public Policy and Management (1–6, max. 16)** Examines various research topics of importance in public policy and management.

**PPM 600 Independent Study or Research (\*)**

**PPM 601 Teaching Mentorship (2)**

**PPM 800 Doctoral Dissertation (\*)**

# School of Public Health

## SCHOOL OVERVIEW

### Dean

Patricia W. Wahl

F350 Health Sciences

The School of Public Health (SPH) is composed of five departments: Biostatistics, Environmental and Occupational Health Sciences, Epidemiology, Global Health (administered jointly with the School of Medicine), and Health Services.

## UNDERGRADUATE PROGRAM

A Bachelor of Science degree and an undergraduate minor are offered in the Department of Environmental and Occupational Health Sciences. The Department of Health Services offers a Bachelor of Science degree in health informatics and health information management through the UW Evening Degree Program. A Public Health major is offered through the College of Arts & Sciences in the Individualized Studies Program. See their website for additional information on the major and suggested public health coursework: [depts.washington.edu/genstudy](https://depts.washington.edu/genstudy).

## GRADUATE PROGRAM

The SPH offers graduate programs leading to the degrees of Master of Public Health (M.P.H.), Master of Health Administration (M.H.A.), Master of Science (M.S.), and Doctor of Philosophy (Ph.D.). Admission requirements vary by degree and field and are described in the sections for each department.

**Master of Public Health Degree:** The M.P.H. is a professional degree that provides broad training in public health. Each track or program provides additional training in a particular area. Graduates pursue careers in public health practice settings, academia, or research. The M.P.H. degree is offered in all SPH departments. Students earning the M.P.H. may choose from several areas including biostatistics, community oriented public health practice, environmental and occupational health, epidemiology, health care and population research, health policy analysis and process, global health (in Epidemiology or Global Health), maternal and child health (in Epidemiology or Health Services), occupational and environmental medicine, public health genetics, public health nutrition, or social and behavioral sciences. The M.P.H. degree in public health nutrition is offered through the Nutritional Sciences Interdisciplinary Graduate Program and the M.P.H. in public health genetics is a multidisciplinary program that involves faculty from throughout the University. The Extended M.P.H. program is a three-year, part-time program that allows mid-career public health professionals to pursue the M.P.H. degree in community practice, health education, maternal and child health, or oral health while continuing their employment.

**Master of Health Administration Degree:** The M.H.A. degree is offered by the interdisciplinary Graduate Programs in Health Services Administration in the Department of Health Services under the auspices of the Graduate School. The M.H.A. program prepares students for careers in management, planning, and policy analysis in a variety of settings in the health care field. The purpose of the curriculum is to integrate the knowledge, skills, and experience that encompass health services management, planning, and policy analysis. Students develop knowledge and skills that enable them to better understand and manage change, analyze information and make decisions, and manage organizations and the people in them. The Executive M.H.A. program is a part-time program designed for mid-career health services professionals, including physi-

cians and other experienced clinicians, who wish to continue their employment while pursuing the M.H.A. degree. Both programs provide a balance of theory and practical management skills.

**Master of Science and Doctor of Philosophy Degrees:** The M.S. and Ph.D. programs in the departments of Biostatistics, Environmental and Occupational Health Sciences, Epidemiology, and Health Services prepare students for academic or research careers. The M.S. and Ph.D. programs in the Nutritional Sciences program and the Pathobiology program, and the Ph.D. program in the Institute for Public Health Genetics are administered in SPH, although the degrees are awarded through the Graduate School's interdisciplinary group structure.

The M.S. programs in biostatistics, environmental health, epidemiology (general or clinical research track), genetic epidemiology, health care and population research, exposure sciences, nutritional sciences, pathobiology, statistical genetics, and toxicology offer focused research training in specific disciplines. Graduates of these programs often assume positions as senior technical staff in laboratories or other organizations and as research project coordinators, or pursue further graduate training. The M.S. program differs from the Ph.D. program in that more of the courses emphasize the concepts underlying methodological approaches rather than the ability to independently design a major research program.

The Ph.D. programs in biostatistics, environmental and occupational hygiene, epidemiology, health services, statistical genetics, toxicology, and the interdisciplinary Ph.D. programs in nutritional sciences, pathobiology, and public health genetics, train future academicians as highly qualified independent investigators and teachers, and as well-trained practitioners. The doctoral programs are distinct from the M.S. programs by the addition of advanced coursework and the nature and scope of the dissertation research project.

**Concurrent Degree Programs:** The SPH has concurrent degree programs with the Foster School of Business and the Daniel J. Evans School of Public Affairs, which lead to concurrent M.H.A.-M.B.A. and M.H.A.-M.P.A. degrees, respectively. The SPH, the Foster School of Business, and School of Public Affairs offer these degree programs during both day and evening times. The SPH has concurrent degree programs with the Henry M. Jackson School of International Studies, the School of Social Work, the School of Nursing, and the School of Public Affairs that lead to the M.P.H.-M.A.I.S., M.P.H.-M.S.W., M.P.H.-M.N., and M.P.H.-M.P.A. and M.S.-M.P.A. degrees, respectively. The M.P.H.-M.N. concurrent degree program provides students opportunities to study the areas of community health care nursing and child nursing. The School of Medicine and SPH have concurrent degree programs that lead to the M.P.H.-M.D., M.H.A.-M.D. and Ph.D.-M.D. degrees. The School of Dentistry and SPH offer a concurrent degree that leads to the M.P.H.-M.S.D. degree. Concurrent M.P.H.-J.D. and M.H.A.-J.D. degree programs are offered with the School of Law. The SPH also offers a concurrent M.P.H.-Ph.D. with the Department of Anthropology in the College of Arts and Sciences.

**Residency Programs:** The SPH offers a residency in occupational and environmental medicine. Physicians are also welcome to apply to any of the School's graduate programs.

**Certificate and Graduate Certificate Programs:** The SPH offers several graduate certificate programs. The Department of Biostatistics offers a graduate certificate program in statistical genetics; the Department of Epidemiology in basic or advanced clinical research methods, and HIV and Sexually Transmitted Infections (STIs); the Department of Global Health in global health; the Department of Health Services in community practice, emergency preparedness and response, health behavior and health promotion, health policy, and maternal and child health; the Extended Degree Program in public health; and the Institute of Public

Health Genetics in public health genetics. The Department of Health Services also offers certificate programs in community health leadership, health informatics and health information management (HIHM), and medical management. The School also offers a joint program with the School of Medicine in biomedical and health informatics.

## Biostatistics

## GRADUATE PROGRAM

### Graduate Program Coordinator

F600 Health Sciences, Box 357232

206-543-1044

[bioadmit@uw.edu](mailto:bioadmit@uw.edu)

The Department of Biostatistics offers Master of Science, Master of Public Health, and Doctor of Philosophy degrees in quantitative methods applied to the medical and biological sciences. Biology, medicine, and health services are undergoing major changes in their development as quantitative sciences. As technological advances find expression in new research tools, new theoretical concepts are being employed in the analysis of quantitative data. The techniques and viewpoints of mathematics and statistics, traditionally peripheral to biology and medicine, are now woven into the fabric of the life sciences, thereby providing exciting new opportunities in research and teaching.

Many universities have instituted programs relating mathematics or statistics to one particular biological field. The goal of the biostatistics graduate program is to equip students to develop and apply the quantitative techniques of mathematics, statistics, and computing appropriate to medicine, biology, and health services.

Because of the quality of the faculty and their involvement in a diversity of statistical applications, as well as the quality of the students, students receive an excellent education. Students are recruited from undergraduate programs in mathematics, statistics, and biology and are selected on the basis of outstanding quantitative ability.

## Master of Public Health

### Admission Requirements

Applicants to Biostatistics graduate programs are formally applying to the Graduate School of the University of Washington. Although all acceptance decisions are made within the Biostatistics Department, the Graduate School imposes certain minimum admission requirements. Applicants must therefore submit both a general application directly to the Graduate School and a specific application to the Biostatistics Department.

To be considered for admission to the Biostatistics MPH pathway, a candidate must hold a doctoral-level degree in another field (e.g., M.D., Ph.D., JD) or be currently working on such a doctoral degree. Candidates who have not yet been awarded a doctoral degree will not be awarded the Biostatistics-pathway MPH until they are awarded their doctoral degree. All other prerequisites and required materials are the same for MS, MPH, and PhD applicants.

### Degree Requirements

In addition to meeting the minimum Graduate School requirements, students must also obtain a minimum GPA of 3.00 in each of the biostatistics core courses (BIOST 514, BIOST 515, BIOST 524, BIOST 536, BIOST 537), a minimum cumulative GPA of 3.00 in non-biostatistics core courses (EPI 512, EPI 513, HSERV 511, ENV H 511, P BIO 511, and HSERV 510), and earn a minimum GPA of 2.70 in each non-biostatistics core course

63 credits minimum, as follows:

- Biostatistics core courses: BIOST 514, BIOST 515 (8); BIOST 524 (3); BIOST 536, BIOST 537 (8); BIOST 580 (3); BIOST 590 (3); BIOST 700 (9). (Note: BIOST 514, BIOST 515, BIOST 524, BIOST 536, and BIOST 537 must be taken for a numerical grade.)
- Non-biostatistics core courses: EPI 512, EPI 513 (8); HSERV 511 (3); HSERV 510 (3–4); ENV H 511 (3); P BIO 511 (3). All non-biostatistics core courses must be taken for a numerical grade.
- Biostatistics elective courses: 6 credits of any approved biostatistics MS elective, or STAT 512 or STAT 513
- Biostatistics MPH practicum: MPH students must also complete a practicum experience for 3 credits in an organization or agency that provides planning or services relevant to public health.

## Master of Science

### Admission Requirements

Applicants to Biostatistics graduate programs are formally applying to the Graduate School of the University of Washington. Although all acceptance decisions are made within the Biostatistics Department, the Graduate School imposes certain minimum admission requirements. Applicants must therefore submit both a general application directly to the Graduate School and a specific application to the Biostatistics Department.

Potential MS students may enter the graduate program in biostatistics from an undergraduate major in mathematics, statistics, or a biological field. Students are occasionally admitted with backgrounds in other fields; however, all applicants must have 30 or more quarter credits in mathematics and statistics to include two years of calculus (to include multivariate calculus), one course in linear algebra, and one course in probability theory.

### Degree Requirements

73 credits minimum, as follows:

- **Required Courses:** BIOST 514 (4), BIOST 515 (4), BIOST 536 (4), BIOST 537 (4), BIOST 580 (1, max. 9), STAT 512 (4), STAT 513 (4)
- **Elective credits:** 12 required elective credits must be taken, with at least 6 credits of elective courses with a methodology emphasis, and 6 credits of electives with a biology or public health emphasis (list provided).
- **Biostatistical consulting:** BIOST 590 (3).
- **Master's thesis:** 18 credits of BIOST 700
- **Computer proficiency:** The department requires a basic level of computing proficiency from all graduates, but encourages them to take the opportunity to gain greater expertise with a variety of computing tools. The computing proficiency requirement is met when a student writes and documents a computer program sophisticated enough to demonstrate the necessary basic competence in programming, or completes an approved programming course. The student's faculty adviser can approve the proficiency requirement or refer the matter to an ad hoc faculty committee for approval. Approved courses include STAT/BIOST 534, STAT/BIOST 535, and CSE 142.

## Doctor of Philosophy

### Admission Requirements

Applicants to Biostatistics graduate programs are formally applying to the Graduate School of the University of Washington. Although all acceptance decisions are made within the Biostatistics Department, the Graduate School imposes certain minimum admission requirements. Applicants must therefore submit both a general application directly to the Graduate School and a specific application to the Biostatistics Department.

Potential PhD students may enter the graduate program in biostatistics from an undergraduate major in mathematics, statistics, or a biological field. Students are occasionally admitted with backgrounds in other fields; however, all applicants must have 30 or more quarter credits in mathematics and statistics to include two years of calculus (to include multivariate calculus), one course in linear algebra, and one course in probability theory.

### Degree Requirements

Minimum 100 credits, as follows:

- **Required courses:** BIOST 514 (4); BIOST 515 (4); BIOST 533 (3); BIOST 570 (3); BIOST 571 (3); BIOST 572 (3); BIOST 580 (1, max. 9); MATH 574, MATH 575, MATH 576 (3, 3, 3) or equivalent; STAT 512, STAT 513 (4, 4); STAT 581, STAT 582, STAT 583 (3, 3, 3).
- Students must earn a minimum 3.0 grade in each of the required courses. At the faculty's discretion, qualifying exam performance may outweigh a course grade below the minimum. (Note: The minimum grade requirement for elective courses is 2.7.)
- **Elective credits:** 15 elective credits must be taken, consisting of at least 6 credits of elective courses with a methodology emphasis and 9 credits of elective with a biology or public health emphasis (list provided).
- In addition to the above courses, students in the PhD program must complete 36 credits of BIOST 800, write a dissertation, complete a consulting class, and demonstrate proficiency in a computer language.
- If a PhD student enrolls in STAT 512 and STAT 513, he or she must take the MS theory examination the following June for advisory purposes. PhD students must also take the PhD statistical theory examination during the summer following enrollment in STAT 581, STAT 582, STAT 533 and the PhD applied examination during the summer following enrollment in BIOST 570, BIOST 571, and BIOST 572; or, if both STAT 581, STAT 582, STAT 583 and BIOST 570, BIOST 571, and BIOST 572 are taken in the same year, the student may elect to delay the PhD applied examination by one year. If either examination is failed, it must be passed the following year.
- Students in the PhD program must also complete a biology project, and pass the general and final examinations.
- **Computer Proficiency:** The department requires a basic level of computing proficiency from all graduates, but encourages them to take the opportunity to gain greater expertise with a variety of computing tools. The computing proficiency requirement is met when a student writes and documents a computer program sophisticated enough to demonstrate the necessary basic competence in programming, or completes an approved programming course. Approved courses include: STAT/BIOST 534, STAT/BIOST 535; and CSE 142.

## COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at [www.uw.edu/students/crscat/](http://www.uw.edu/students/crscat/)

**BIOST 499 Undergraduate Research (\*)** Supervised reading programs; library and field research; special projects. Credit/no credit only.

**BIOST 502 Introduction to Statistics in Health Sciences (4)** Description and examples of common concepts in biostatistics. Probability, point and confidence interval estimation, hypothesis testing including two-sample and paired t and chi-square tests, introduction to simple linear regression. Examples in health sciences stressed. Offered: S.

**BIOST 503 Application of Statistics to Health Sciences (4)** Standard statistical techniques presented with examples drawn from the health sciences literature. Critical interpreta-

tion of research results, and introduction to the computer for data processing and statistical analysis. Prerequisite: BIOST 502 or equivalent. Offered: S.

**BIOST 505 Biostatistics I (3)** Presents the principles and methods of data description and elementary parametric and nonparametric statistical analysis. Draws examples from the biomedical literature, and real data sets are analyzed after a brief introduction to the use of standard statistical computer packages. Covers statistical techniques including description of samples, comparison of two sample means and proportions, simple linear regression, and correlation.

**BIOST 508 Biostatistical Reasoning for the Health Sciences (4)** Provides a broad overview of biostatistical methods, emphasizing interpretation and concepts rather than computation or mathematical details. Introduces basic concepts of study design, data summaries and presentation, statistical inference (including hypothesis testing, p-values, and confidence intervals) and modeling approaches such as regression analysis. No hands-on analysis, nor use of statistical packages.

**BIOST 510 Biostatistics in Dentistry (3)** Introduction to concepts and methods of descriptive and inferential statistics with applications in dentistry emphasized. Topics include comparison of means and proportions, hypothesis testing, confidence intervals, non-parametric methods, linear regression, and correlation. Prerequisite: enrollment in School of Dentistry or permission of instructor. Offered: jointly with DPHS 568.

**BIOST 511 Medical Biometry I (4)** Presentation of the principles and methods of data description and elementary parametric and nonparametric statistical analysis. Examples are drawn from the biomedical literature, and real data sets are analyzed by the students after a brief introduction to the use of standard statistical computer packages. Statistical techniques covered include description of samples, comparison of two sample means and proportions, simple linear regression and correlation. Offered: A.

**BIOST 512 Medical Biometry II (4)** Multiple regression, analysis of covariance, and an introduction to one-way and two-way analyses of variance: including assumptions, transformations, outlier detection, dummy variables, and variable selection procedures. Examples drawn from the biomedical literature with computer assignments using standard statistical computer packages. Prerequisite: either BIOST 511 or BIOST 517, or equivalent. Offered: W.

**BIOST 513 Medical Biometry III (4)** Analysis of categorical data including two sample methods, sets of 2 x 2 tables, R x C tables, and logistic regression. Classification and discrimination techniques. Survival analysis including product limit estimates and the Cox proportional hazards model. Prerequisite: BIOST 512 or permission of instructor. Offered: Sp.

**BIOST 514 Biostatistics I (4)** Mathematically sophisticated presentation of principles and methods of data description; graphics; point, confidence interval estimation; hypothesis testing; relative risk; odds ratio; Mantel-Haenszel; chi-square test (matrix algebra required). Examples drawn from biomedical literature; real-data sets analyzed using statistical computer packages. Prerequisite: biostatistics majors or permission of instructor. Offered: A.

**BIOST 515 Biostatistics II (4)** Mathematically sophisticated introduction to linear models; multiple regression, correlation; residual analysis; dummy variables; analysis of covariance; one-, two-way analysis of variance; randomized blocks; fixed, random effects (repeated measure, factorial designs); multiple comparisons (matrix algebra required). Real biomedical data sets analyzed. Prerequisite: BIOST 514, biostatistics major, or permission of instructor. Offered: W.

**BIOST 516 Statistical Methods in Genetic Epidemiology (3)** Theory and application of statistical techniques used in genetic epidemiology. Includes discussion of association studies, linkages and segregation analyses. Examples stressed with reference to assumptions and limitations. Prerequisite: either BIOST 513 or BIOST 518; PHG 511/EPI 517, or permission of instructor. Offered: jointly with EPI 516/PHG 519.

**BIOST 517 Applied Biostatistics I (4)** Introduction to the analysis of biomedical data. Descriptive and inferential statistical analysis for discrete, continuous, and right censored random variables. Analytic methods based on elementary parametric and non-parametric models for one sample; two sample (independent and paired), stratified sample, and simple regression problems. Offered: A.

**BIOST 518 Applied Biostatistics II (4)** Multiple regression for continuous, discrete, and right censored response variables, including dummy variables, transformations, and interactions. Introduction to regression with correlated outcome data. Model and case diagnostics. Computer assignments using real data and standard statistical computer packages. Prerequisite: BIOST 517 or permission of instructor. Offered: W.

**BIOST 519 Advanced Epidemiologic Methods (4)** DeRoos, Starr Introduces advanced epidemiologic methods, including causal modeling, inverse probability weighting, propensity scores, sensitivity analysis, imputation for missing data, approaches to multiple comparisons, Bayesian adjustment of risk estimates, recursive partitioning, and modeling for prediction. Prerequisite: EPI 512; EPI 513; EPI 514; EPI/BIOST 536. Offered: jointly with EPI 515; A.

**BIOST 521 Biostatistics for Experimentalists (4)** Statistical aspects of design, data analytical models appropriate to classes of experiments most commonly employed in biomedical sciences. One-, two-way analyses of variance; factorial, crossed, nested, repeated measures designs. Clean, messy real-data sets analyzed using standard statistical computer packages. Prerequisite: either BIOST 511 and BIOST 512, or BIOST 517 and BIOST 518, or equivalent. Offered: alternate years; Sp.

**BIOST 524 Design of Medical Studies (3)** Design of medical studies, with emphasis on randomized controlled clinical trials. Bias elimination, controls, treatment assignment and randomization, precision, replication, power and sample size calculations, stratification, and ethics. Suitable for graduate students in biostatistics and for research-oriented graduate students in other scientific fields. Prerequisite: BIOST 511 or equivalent, and one of BIOST 513, BIOST 518, STAT 421, STAT 423, STAT 512, or EPI 512; or permission of instructor. Offered: jointly with STAT 524; Sp.

**BIOST 527 Nonparametric Regression and Classification (3)** Minin, Raftery, Richardson, Wakefield Covers techniques for smoothing and classification including spline models, kernel methods, generalized additive models, and the averaging of multiple models. Describes measures of predictive performance, along with methods for balancing bias and variance. Prerequisite: either STAT 502 and STAT 504 or BIOST 514 and BIOST 515. Offered: jointly with STAT 527; Sp.

**BIOST 529 Sample Survey Techniques (3)** Design and implementation of selection and estimation procedures. Emphasis on human populations. Simple, stratified, and cluster sampling; multistage and two-phase procedures; optimal allocation of resources; estimation theory; replicated designs; variance estimation; national samples and census materials. Prerequisite: either STAT 421, STAT 423, STAT 504, QMETH 500, BIOST 511, or BIOST 517, or equivalent or permission of instructor. Offered: jointly with CS&SS 529/STAT 529.

**BIOST 533 Theory of Linear Models (3)** Examines model structure; least squares estimation; Gauss-Markov theorem; central limit theorems for linear regression; weighted and generalized least squares; fixed and random effects; analysis of variance; blocking and stratification; and applications in experimental design. Prerequisite: STAT 421 or STAT 423; and STAT 513, BIOST 515, and a course in matrix algebra. Offered: jointly with STAT 533; Sp.

**BIOST 534 Statistical Computing (3)** Introduction to scientific computing. Includes programming tools, modern programming methodologies, (modularization, object oriented design), design of data structures and algorithms, numerical computing and graphics. Uses C++ for several substantial scientific programming projects. Prerequisite:

experience with programming in a high level language. Offered: jointly with STAT 534; Sp.

**BIOST 535 Statistical Computing (3)** Introduction to scientific computing. Includes programming tools, modern programming methodologies, (modularization, object oriented design), design of data structures and algorithms, numerical computing and graphics. Uses C++ for several substantial scientific programming projects. Prerequisite: experience with programming in a high level language. Offered: jointly with STAT 535; A.

**BIOST 536 Categorical Data Analysis in Epidemiology (4)** Summary of univariate categorical data analysis; introduction to multivariate analysis of categorical epidemiologic data using multiplicative models. Experience at interpretation; familiarity with available programs gained by analysis of bona fide data, critiques of analyses appearing in literature. Prerequisite: BIOST 515; EPI 513 and either BIOST 513 or BIOST 518; or permission of instructor. Offered: jointly with EPI 536; A.

**BIOST 537 Survival Data Analysis in Epidemiology (4)** Introduction to multivariate analysis of survival data using multiplicative models. Application to epidemiologic studies. Familiarity with interpretation and available computer programs gained by analysis of bona fide sets of data and critiques of analyses appearing in the literature. Prerequisite: BIOST 536 or permission of instructor. Offered: jointly with EPI 537; W.

**BIOST 538 Statistical Computing (3)** Introduction to scientific computing. Includes programming tools, modern programming methodologies, (modularization, object oriented design), design of data structures and algorithms, numerical computing and graphics. Uses C++ for several substantial scientific programming projects. Prerequisite: experience with programming in a high level language. Offered: jointly with STAT 538; W.

**BIOST 540 Correlated Data Regression (3)** Introduction to regression modeling of longitudinal and clustered data from epidemiology and health sciences. Interpretation and familiarity with available programs gained by analysis of *bona fide* data; critiques of analyses appearing in literature. Prerequisite: Either BIOST 513, BIOST 515, BIOST 518, BIOST 536, or permission of instructor. Offered: Sp.

**BIOST 550 Statistical Genetics I: Mendelian Traits (3)** Thompson Mendelian genetic traits. Population genetics; Hardy-Weinberg, allelic variation, subdivision. Likelihood inference, information and power; latent variables and EM algorithm. Pedigree relationships and gene identity. Meiosis and recombination. Linkage detection. Multipoint linkage analysis. Prerequisite: STAT 390 and STAT 394, or permission of instructor. Offered: jointly with STAT 550; Sp.

**BIOST 551 Statistical Genetics II: Quantitative Traits (3)** Monks Statistical basis for describing variation in quantitative traits. Decomposition of trait variation into components representing genes, environment and gene-environment interaction. Methods of mapping and characterizing quantitative trait loci. Prerequisite: STAT/BIOST 550; STAT 423 or BIOST 515; or permission of instructor. Offered: jointly with STAT 551; A.

**BIOST 552 Statistical Genetics III: Design and Analysis (3)** Wijsman Overview of probability models, inheritance models, penetrance. Association and linkage. The lod score method. Affected sib method. Fitting complex inheritance models. Design mapping studies; multipoint, disequilibrium, and fine-scale mapping. Ascertainment. Prerequisite: STAT/BIOST 551; GENET 371; or permission of instructor. Offered: jointly with STAT 552; W.

**BIOST 555 Statistical Methods for Spatial Epidemiology (3)** Wakefield Motivates the need for, and describes methods for the analysis of spatially indexed epidemiological data. Covers four major topics: clustering and cluster detection, disease mapping, spatial regression, and an introduction to geographical information systems. Considers both point-references and spatially aggregated data. Offered: jointly with EPI 555.

**BIOST 570 Advanced Applied Statistics and Linear Models (3)** Generalized linear models, REML in mixed models for randomized blocks, split plots, longitudinal data. Generalized estimating equations, empirical model building, cross validation, recursive partitioning, generalized additive models, projection pursuit. Prerequisite: STAT 512, 513; BIOST/STAT 533 or STAT 421 and STAT 423, and a course in matrix algebra. Offered: jointly with STAT 570.

**BIOST 571 Advanced Applied Statistics and Linear Models (3)** Generalized linear models, REML in mixed models for randomized blocks, split plots, longitudinal data. Generalized estimating equations, empirical model building, cross validation, recursive partitioning, generalized additive models, projection pursuit. Prerequisite: BIOST 570. Offered: jointly with STAT 571.

**BIOST 572 Advanced Applied Statistics and Linear Models (3)** Student presentations and discussion on selected methodological research articles focusing on regression modeling. Prerequisite: STAT 571. Offered: jointly with STAT 572; Sp.

**BIOST 573 Statistical Methods for Categorical Data (3)** Advanced topics in generalized linear models and the analysis of categorical data: overdispersion, quasilielihood, parameters in link and variance functions, exact conditional inference, random effects, saddlepoint approximations. Credit/no credit only. Prerequisite: BIOST 571 and STAT 582. Offered: jointly with STAT 573; alternate years; Sp.

**BIOST 576 Statistical Methods for Survival Data (3)** Statistical methods for censored survival data arising from follow-up studies on human or animal populations. Parametric and nonparametric methods, Kaplan-Meier survival curve estimator, comparison of survival curves, log-rank test, regression models including the Cox proportional hazards model, competing risks. Prerequisite: STAT 581 and either BIOST 515, STAT 473, or equivalent. Offered: jointly with STAT 576.

**BIOST 577 Advanced Design and Analysis of Experiments (3)** Concepts important in experimental design and analyzing data from planned experiments. Multi-way layouts, randomized block designs, incomplete block designs, Lating and Graeco-Latin squares, factorial and fractional designs, split-plot designs, optimal design theory, response surface experiments. Prerequisite: either BIOST 515, BIOSTAT 533, STAT 502, STAT 504, STAT 533, or permission of instructor. Offered: jointly with STAT 577.

**BIOST 578 Special Topics in Advanced Biostatistics (\*, max. 30)** Advanced-level topics in biostatistics offered by regular and visiting faculty. Prerequisite: permission of instructor. Offered: jointly with STAT 578; AWSpS.

**BIOST 579 Data Analysis and Reporting (2)** Analysis of real data to answer scientific questions. Common data-analytic problems. Sensible approaches to complex data. Graphical and tabular presentation of results. Writing reports for scientific journals, research collaborators, consulting clients. Graduate standing in statistics or biostatistics or permission of instructor. Offered: jointly with STAT 579; AWSp.

**BIOST 580 Seminar in Biostatistics (\*, max. 30)** Presentation and discussion of special topics and research results in biostatistics. Speakers include resident faculty, visiting scientists, and advanced graduate students. Offered: AWSp.

**BIOST 581 Statistical Genetics Seminar (1, max. 30)** Thompson, Weir, Wijsman Presentations and discussion of special topics and research results in statistical genetics. Students, postdocs, and faculty present their work and papers from the literature. Credit/no credit only. Offered: AWSp.

**BIOST 582 Student Seminar (1, max. 30)** Student seminar series for collaboration, exchange of ideas, and exposure to different stages of performing independent research. Encourages both students and faculty to give presentations including RA work, extended class projects, Master's theses, dissertation progress, data analysis, practice talks, and journal articles. Credit/no credit only. Offered: AWSpS.

**BIOST 590 Biostatistical Consulting (\*)** Training in consulting on the biostatistical aspect of research problems arising in the biomedical field. Students, initially under the close supervision of a faculty member, participate in discussions

with investigators leading to the design and/or the analysis of a quantitative investigation of a problem. With experience, independent associations of student and research worker are encouraged, with subsequent review by faculty of resulting design and analysis. Prerequisite: permission of instructor. Offered: AWSpS.

**BIOST 595 Biostatistics Master's Practicum (1-12, max. 12)** Supervised practice experience providing students an opportunity to learn how biostatistics is applied in a public health setting and in the formation of public health policy. Prerequisite: 514; 515; 536; 537.

**BIOST 600 Independent Study or Research (\*)** Offered: AWSpS.

**BIOST 700 Master's Thesis (\*)** Offered: AWSpS.

**BIOST 800 Doctoral Dissertation (\*)** Offered: AWSpS.

## Environmental and Occupational Health Sciences

### DEPARTMENT OVERVIEW

F461 Health Sciences

Environmental health focuses on identifying, evaluating, and controlling environmental conditions that may have an adverse impact on human health. Examples of problem areas requiring environmental health expertise are assuring adequate quality and quantity of food and drinking water, safe treatment and disposal of domestic and industrial waste materials, limiting or reducing air and noise pollution, limiting occupational exposure to hazardous substances and unsafe conditions, assuring safe and healthful housing, controlling the spread of insect- and rodent-borne illness, proper selection and use of pesticides, and understanding the effects of global changes in climate and the atmosphere on human health.

### UNDERGRADUATE PROGRAM

#### Adviser

F461D Health Sciences, Box 357234

206-543-4207

[ehug@uw.edu](mailto:ehug@uw.edu)

The Department of Environmental and Occupational Health Sciences offers the following programs of study:

- The Bachelor of Science degree with a major in environmental health
- A minor in environmental health

### Bachelor of Science

*Suggested First- and Second-Year College Courses:* ECON 200; POL S 202; COM 220; STAT 220 or STAT 311.

#### Department Admission Requirements

- Admission to the major is competitive. Applicants must complete substantial prerequisite coursework (see below) and an application to be considered. Admission is competitive. Completing the prerequisites and submitting an application do not guarantee admission.
- Applications are due the third Friday of autumn, winter, spring, and summer quarters. Applications can be downloaded from the Environmental Health undergraduate program website at [depts.washington.edu/ehug](http://depts.washington.edu/ehug). Prospective students should apply one quarter before they wish to enter the major; ideally, students enter the major by or before the beginning of their junior year.

- Applicants must complete the following, with a minimum grade of 2.0 in each course, to be considered for admission:
  - Minimum cumulative GPA of 2.50
  - 5 credits of English composition
  - BIOL 180, BIOL 200, BIOL 220
  - CHEM 142, CHEM 152, CHEM 162 (or CHEM 144, CHEM 154, CHEM 164)
  - CHEM 237, CHEM 238, CHEM 239 (or CHEM 223, CHEM 224)
  - Either MATH 124 or MATH 144 or Q SCI 291 (MATH 112 does not satisfy this requirement)
- The program manager, department advisers, and the chair evaluate applications based on overall GPA, grades in math, science, and composition courses; demonstrated writing ability; and stated reasons for applying to the major. Grades in chemistry, biology, math, and ENV H courses weigh heavily in the admission process.
- Applicants are strongly encouraged to meet with the program manager before submitting an application.
- Transfer students may use any transferable equivalent course(s) for prerequisite coursework. Please consult the UW Equivalency Guide or a UW adviser to verify transferability of coursework.

#### Major Requirements

85-98 credits, as follows:

- *General Education and Basic Skills:* Completion of 10 credits in VLP-designated courses and 10 credits in I&S-designated courses (of which 6 credits are specified under requirement 3), plus 7 credits in W-designated courses (of which 4 credits are specified under requirement 4).
- PHYS 114, PHYS 115, PHYS 117, PHYS 118 (or PHYS 121 and PHYS 122). Completion of these courses prior to entering the program is recommended.
- ENV H 311, ENV H 405, ENV H 431, ENV H 432, ENV H 433, ENV H 472, ENV H 482 (2 credits minimum), and two of the following: ENV H 440, ENV H 441, ENV H 445 (or ENV H 446), ENV H 490.
- EPI 420, STAT 311 (or STAT 220 or Q SCI 381), HCDE 333, MICROM 301, MICROM 302.
- 30 additional credits of approved electives.
- Sufficient elective credits to reach a total of 180 credits.
- Minimum 2.0 grade in each course required for the major.

#### Minor

*Minor Requirements:* 29 credits as follows:

- *Core Courses:* 17 credits of the following: ENV H 311, ENV H 405, ENV H 431, EPI 420; STAT 220 or STAT 311.
- *Approved Electives:* 12 credits of electives from the approved departmental list. See [website](http://depts.washington.edu/ehug) or adviser for details.

### Student Outcomes and Opportunities

- *Instructional and Research Facilities:* The department houses thirteen centers and institutes and twenty labs.
- *Honors Options Available:* For Interdisciplinary Honors, see University Honors Program.
- *Research, Internships, and Service Learning:* The department operates an internship program in cooperation with government agencies and private employers throughout the state. Each student intern works under the supervision of an experienced employee, with guidance from a faculty member. Internship placements are available throughout the year for variable amounts of academic credit.

- *Department Scholarships:* None offered.
- *Student Organizations/Associations:* UW Student Environmental Health Association

## GRADUATE PROGRAM

### Graduate Program Coordinator

F461 Health Sciences, Box 357234

206-543-3199

The Department of Environmental & Occupational Health Sciences offers three graduate degrees: Master of Science, Master of Public Health, and Doctor of Philosophy. The areas of emphasis are environmental and occupational hygiene (PhD) industrial hygiene and safety (MS), toxicology (PhD/MS), environmental health (MS), and occupational and environmental medicine or environmental and occupational health (MPH).

*The PhD in Environmental and Occupational Hygiene option* focuses on the assessment of exposures, health effects, and control strategies in community and work environments. The program emphasizes expertise in exposure assessment to evaluate human health risks from chemical, physical, and biological agents. Research opportunities include: laboratory and field investigations of environmental exposures and health outcomes; air, soil and water pollution monitoring; ambient, indoor, and personal exposure modeling; evaluation of biomechanical stress factors and organization of the work environment; development of new instruments, biomarkers, and novel methods for assessing human exposures; and evaluation of effective control strategies for the prevention or reduction of illness and injury.

*The MPH in Environmental and Occupational Health* provides an opportunity for students to focus on the recognition, assessment, and control of environmental and occupational hazards, the impact of these hazards on health and society, and approaches to regulations, enforcement, and policy development. It emphasizes development of skills essential to science-based public health practice. In addition to coursework, students complete a field practicum and research in any of the department's research facilities or in a field setting.

*The MPH in Occupational and Environmental Medicine* is for individuals with an earned doctorate. The goal of the program is to provide training in the public health sciences with a focus on occupational and environmental health. The program provides didactic instruction and participation in field studies. Research efforts focus on understanding, preventing, and managing environmental and occupational disease, injury, and disability. Physicians also have the option of applying for a concurrent fellowship or residency in occupational and environmental medicine.

*The concurrent MPH/MPA or MS/MPA degree programs with the Daniel J. Evans School of Public Affairs* seek to educate students who bring substantive public health knowledge and a strong policy and management orientation to their professional careers. . . With several courses that satisfy degree requirements in both programs, students are able to earn the two degrees in a shorter period of time than if the degrees were taken separately. Applicants must apply to both programs.

### Admission Requirements

Prerequisites for admission to the MS industrial hygiene and safety, toxicology, and environmental health programs and the MPH environmental and occupational health program include a bachelor's degree in science or engineering with coursework in biology, chemistry, calculus, and physics. Applicants with non-science majors are considered if the prerequisite courses have been completed. Competitive applicants typically have strong grades and Graduate Record Examination scores, a statement of personal goals consistent with the program, and supportive letters of reference.

Prerequisites for admission to the MPH Occupational and Environmental Medicine program include a doctoral degree (M.D., D.O. or equivalent) with prior coursework in physics, chemistry, calculus, and biology. Concurrent residency applicants must satisfy additional prerequisites including graduation from a Class A medical school (United States, Canada, or equivalent) and completion of one year of approved internship. Three years in primary care specialty is also encouraged.

Prerequisites for admission to the PhD environmental and occupational hygiene and toxicology programs include a bachelor's degree in science or engineering with coursework in biology, chemistry, calculus, and physics. A master's degree in a related field is recommended for PhD environmental and occupational hygiene applicants. Selection of an applicant is also based upon an honors-level GPA, a statement of personal goals consistent with the program, supportive letters of reference, and high scores on the Graduate Record Examination.

International applicants are also required to submit official scores for the Test of English as a Foreign Language (TOEFL). TOEFL scores of 580 (237 computer) or higher are required for admission to the MS, MPH, and PhD programs.

## Master of Public Health

### Degree Requirements

63 credits, as follows:

- **Core Requirements:** EPI 511 (or EPI 512, EPI 513), BIOST 511 (or BIOST 517). MPH/MPA students are also required to take BIOST 512 (or BIOST 518), HSERV 510, and HSERV 511.
- **Required Courses:** ENV H 405 (or ENV H 514, ENV H 515, and ENV H 516), ENV H 453 (or ENV H 553 or ENV H 564), ENV H 570, ENV H 577 (or ENV H 472 or ENV H 543), ENV H 446 (or ENV H 490, or ENV H 541, or ENV H 545, or ENV H 552). Courses in environmental health not chosen can be taken as electives.
- **Electives**
  - **Thesis Track:** At least two additional 400- or 500-level departmental courses (minimum 6 credits).
  - **Project Track:** At least four additional 400- or 500-level departmental courses (minimum 9 credits).
- **Practicum:** ENV H 599
- **Degree Project:**
  - **Thesis Track:** ENV H 700
  - **Project Track:** ENV H 598

## Master of Science, Environmental Health

### Degree Requirements

64 credits, as follows:

- **Core Courses:** ENV H 580, ENV H 581, ENV H 583, ENV H 700, BIOST 511 (or BIOST 517 or higher), EPI 511
- **Required Courses:** ENV H 405, ENV H 445 (or ENV H 446), ENV H 453, ENV H 490, ENV H 541, ENV H 543 (or ENV H 577), ENV H 545, ENV H 552, ENV H 594
- **Representative Electives:** 9 graded elective credits, approved by the student's academic adviser.

## Master of Science, Industrial Hygiene

### Degree Requirements

62 credits, as follows:

- **Core Courses:** ENV H 580, ENV H 581, ENV H 583, ENV H 700, BIOST 511 (or BIOST 517, or higher), EPI 511. Higher level biostatistics and epidemiology courses can be substituted for BIOST 511 or BIOST 517, and for EPI 511.

- **Required Courses:** ENV H 405, ENV H 552 (or ENV H 570), ENV H 553, ENV H 555, ENV H 557, ENV H 560, ENV H 564, BIOST 512 (or BIOST 518, or higher level). If both ENV H 557 and ENV H 570 are taken, one can be used toward the 12 elective credits (see below).
- **Electives:** 12 or more credits from the list below, in consultation with the program director or adviser. If both ENV H 552 and ENV H 570 (above) are taken, one may count toward required elective credits. Courses include ENV H 417, ENV H 446, ENV H 457, ENV H 556, ENV H 559, ENV H 562, ENV H 566, ENV H 584, ENV H 596 (taken winter quarter).

## Master of Science, Safety and Ergonomics

### Degree Requirements

62 credits, as follows:

- **Core Courses:** ENV H 580, ENV H 581, ENV H 583, ENV H 700, BIOST 511 (or BIOST 517, or higher), EPI 511. (Higher level biostatistics and epidemiology courses can be substituted for BIOST 511 or BIOST 517, and for EPI 511.)
- **Required Courses:** ENV H 405, ENV H 553, ENV H 560, ENV H 562, ENV H 564, ENV H 566, ENV H 596, BIOST 512 (or BIOST 518). (Higher level biostatistics courses can be substituted for BIOST 512 or BIOST 518). IND E/ ENV H 537, MGMT 300.
- **Representative Electives:** ENV H 457, ENV H 512, ENV H 555, ENV H 557, ENV H 559, ENV H 569, ENV H 570, ENV H 572, ENV H 584, HCDE 517, UCONJ 420.

## Master of Science, Toxicology

### Degree Requirements

63 credits, as follows:

- **Core Courses:** ENV H 580, ENV H 581, ENV H 583, ENV H 700, BIOST 511 (or BIOST 517, or higher), EPI 511.
- **Required Courses:** ENV H 514, ENV H 515, ENV H 516, ENV H 552, ENV H 577, BIOC 405, BIOC 406 (or BIOC 440, BIOC 441, BIOC 442), ENV H course in industrial hygiene or occupational medicine.
- **Representative Electives:** Toxicology students who take the two-quarter biochemistry series (BIOC 405, BIOC 406) must have an additional 9 graded elective credits. Students who choose the three-quarter biochemistry series (BIOC 440, BIOC 441, BIOC 442) must have an additional 3 graded elective credits. Electives must be approved by the student's academic adviser. Electives may include ENV H 511, ENV H 512, ENV H 531, ENV H 532, ENV H 533, ENV H 535, ENV H 550, ENV H 553, ENV H 555, ENV H 567, ENV H 570, ENV H 582, ENV H 584, ENV H 591, BIOL 403, BIOL 411, BIOST 521, C MED 407, MICROM 441, MICROM 442, MICROM 518, PATH 444, PATH 555, P BIO 500-level courses, P BIO 405, P BIO 406, P BIO 507, PEDS 512, PHCOL 401, PHCOL 402, PHCOL 403, PHCOL 527.

## Doctor of Philosophy, Environmental and Occupational Hygiene

### Degree Requirements

92 credits minimum, as follows:

- **Core Sciences (11–12 credits):** Sequence of three courses in one area, to be approved by adviser.
- **Biostatistics (3 credits):** BIOST 512 (or BIOST518 or higher)
- **Epidemiology (4 credits):** EPI 511 (or higher)
- **Environmental and Occupational Health Seminar (6 credits):** ENV H 580
- **Dissertation (27 credits):** ENV H 800

- **Lab Rotations (6–9 credits):** ENV H 595
- **Required courses:**
  - **Industrial Hygiene (6 credits):** ENV H 553 and ENV H 555
  - **Toxicology (3 credits):** ENV H 405 (or more advanced)
  - **Environmental Chemistry (3 credits):** ENV H 552
  - **Occupational and Environmental Epidemiology (3 credits):** ENV H 570
  - **Electives (20 credits):** 10 elective credits are unspecified and 10 must be in courses taught by Industrial Hygiene or Environmental Health program faculty.

## Doctor of Philosophy, Toxicology

### Degree Requirements

104 credits minimum, as follows:

- **Core Sciences (11–12 credits):** Sequence of three courses in one area, to be approved by adviser.
- **Biostatistics (3 credits):** BIOST 512 (or BIOST518 or higher)
- **Epidemiology (4 credits):** EPI 511 (or higher)
- **Environmental and Occupational Health Seminar (6 credits):** ENV H 580
- **Dissertation (27 credits):** ENV H 800
- **Lab Rotations (6–9 credits):** ENV H 595
- **Required courses:**
  - **Toxicology (9 credits):** ENV H 514, ENV H 515, ENV H 516
  - **Toxicology Seminar (9 credits):** Of the 9 credits (minimum) of current topics courses, at least six credits must be in ENV H 591. The other credits can be chosen among other current topics courses offered by the Department of Environmental Health or other departments, with approval of student's advisory committee.
  - **Advanced Toxicology:** 6 credits from approved list
  - **Physiology:** 3 credits from approved list
  - **Electives (20 credits):** 10 elective credits are unspecified and 10 must be in courses taught by Industrial Hygiene or Environmental Health program faculty.

## Financial Aid

Support is available for many students in the form of traineeships or research assistantships, which include tuition. This support comes from federal and private sources awarded to the department or School.

## Research Facilities

Specialized laboratories exist for research in industrial hygiene chemistry, optical remote sensing of chemicals, industrial ventilation, ergonomics, trace organics and heavy metals, environmental microbiology, electron microscopy, controlled exposure to environmental agents, and toxicology (including toxicogenomics and analytical cytology). Field research is facilitated through an extensive consultation-service program conducted by this department for labor and industry in Washington state.

## COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at [www.uw.edu/students/crsca/](http://uw.edu/students/crsca/)

**ENV H 111 Exploring Environment and Health Connections (3) I&S** Keifer Introduction to environmental health concepts. Examines current events to illustrate and better appreciate the relationship between environment and health and to explore whether an environmental condition is or is

not an important threat to health. Emphasizes the roles of environmental scientists and related professionals. Offered: A.

**ENV H 205 Environmental Health in Film (2) I&S** *Luchtel* Viewing and discussion of popular films that explore issues in environmental health. After viewing films, a discussion follows focusing on the ethical, legal, social, and scientific issues raised by the films. Intended for UW freshmen and sophomores from all backgrounds who may have an interest in majoring in Environmental Health. Offered: W.

**ENV H 311 Introduction to Environmental Health (3) I&S/NW** *Treser* Relationship of people to their environment, how it affects their physical well-being and what they can do to influence the quality of the environment and to enhance the protection of their health. Emphasis on environmental factors involved in transmission of communicable diseases and hazards due to exposure to chemical and physical materials in our environment. Offered: ASp.

**ENV H 405 Toxic Chemicals and Human Health ([0-3]-, max. 3)** *Gallagher, Kavanagh* Examines the basic principles of toxicology and the effects of chemicals on human health. Includes mechanisms; dose/response relationships; toxicity testing; disposition in the body; modifiers of response; chemicals and cancer; birth defects; exposures in the home, workplace, and environment; and risk assessment and government regulation. Prerequisite: 2.0 in BIOL 220; either 2.0 in CHEM 224, 2.0 in CHEM 239, or 2.0 in CHEM 337. Offered: Sp.

**ENV H 417 Non-Ionizing Radiation and Electrical Safety (2)** *Yost* Introduction to health hazards from UV, optical laser hazards, infrared radiation, radio-frequency radiation, heat stress, electrical shock, electric and magnetic fields. Application of current standards for these physical agents. Emphasis on occupational hazards with additional discussion of environmental exposures where appropriate. Offered: odd years; W.

**ENV H 431 Environmental and Occupational Sampling and Analysis I (3) NW** *Fenske* Laboratory and lecture on sampling. Field and laboratory analysis of chemical and physical agents found in the occupational and ambient environments. Prerequisite: either a CHEM 162 or CHEM 164; PHYS 116/119; ENV H 311. Offered: A.

**ENV H 432 Environmental and Occupational Sampling and Analysis II (4) NW** *Simpson* Laboratory and lecture on sampling. Field and laboratory analysis of chemical and physical agents found in the occupational and ambient environments. Prerequisite: ENV H 431. Offered: W.

**ENV H 433 Environmental and Occupational Sampling and Analysis III (4) NW** *Meschke, Roberts, Shin* Laboratory and lecture related to the evaluation of water quality. The identification and analysis of microorganisms in water, food, and air. Prerequisite: ENV H 431; MICROM 301; MICROM 302. Offered: Sp.

**ENV H 440 Water, Wastewater and Health (3) Meschke, Shin** Review of water supply, water quality, and water/wastewater treatment as they relate to human health. Includes water law and regulations, source water protection, basic treatment technologies for water and waste, chemical and microbial contaminants, and recreational water. Prerequisite: ENV H 311. Offered: A.

**ENV H 441 Food Protection (3) Easterberg** Study of identification and characteristics of chemicals and biological agents implicated in foodborne disease outbreaks and conditions or circumstances by which food contamination occurs. Examination of food protection activities conducted by local and state government at the retail level. Prerequisite: either 2.0 in CHEM 155, or 2.0, 2.0 in CHEM 162, or a 2.0 in CHEM 164; 2.0 in MICROM 302. Offered: W.

**ENV H 442 Vector Control (3) Treser** Study of the impact and control of rodents and arthropod vectors of disease, including consideration of economic poisons used, their regulation, and safety measures. Prerequisite: 2.0 in BIOL 220. Offered: W.

**ENV H 445 Solid Waste Management (3)** Examination of the public health, environmental, economic, and materials con-

servation aspects of solid wastes management; amounts and sources of solid wastes, waste reduction and recycling, methods of storage, transportation and disposal, integrated waste management, identification of present problems and future needs. Prerequisite: 2.0 in CHEM 155, 2.0 in CHEM 162, or a 2.0 in CHEM 164; either 2.0 in MATH 124, 2.0 in MATH 127, 2.0 in MATH 134, or 2.0 in MATH 144; recommended: PHYS 115. Offered: Sp.

**ENV H 446 Hazardous Waste Management (3) Kissel** Characterization of hazardous wastes and introduction to pertinent federal and state regulations. Discussion of exposure pathways and description of management options at pre-generation, pre-release, and post-release stages. Emphasis on public health significance. Supplemented with case studies. Prerequisite: either 2.0 in CHEM 155, 2.0 in CHEM 162, or a 2.0 in CHEM 164; either 2.0 in MATH 112, 2.0 in MATH 124, 2.0 in MATH 127, 2.0 in MATH 234, or 2.0 in MATH 144; recommended: MATH 125, CHEM 224, PHYS 115. Offered: W.

**ENV H 448 Community Air Pollution (3) Vedal** Offers a comprehensive overview of community air pollution including: air pollution sources, chemistry, and meteorology; human health and environmental effects; global warming; air quality standards, monitoring, control, and management; indoor air; and local air quality management. Offered: Sp.

**ENV H 449 Health Effects of Air Pollution (2) Koenig** Structure and function of the respiratory system and the changes that may be produced by specific air pollutants, such as ozone, SO<sub>2</sub> and fine particles. Air quality criteria and the economic costs of disease are discussed. Several classroom demonstrations. Offered: even years; W.

**ENV H 451 Ecology of Environmentally Transmitted Microbiological Hazards (3) Meschke, Shin** Focuses on the transmission of infectious microorganisms by air, food, water, and other environmental media. Provides an introduction to environmentally transmitted pathogens, and discusses factors affecting their environmental fate, transport, and persistence. Offered: A.

**ENV H 452 Detection and Control of Environmentally Transmitted Microbiological Hazards (3) Meschke, Shin** Focuses on the detection and control of infectious microorganisms in air, food, water, and other environmental media. Provides a discussion on sample collection, processing and detection for infectious microorganisms. Provide coverage of engineered controls and disinfection/decontamination processes for infectious microorganisms. Recommended: ENV H 451. Offered: W.

**ENV H 453 Industrial Hygiene (3) Morgan** Introduction to the principles and scientific foundation of industrial hygiene. Examines the anticipation, recognition, evaluation, and control of work place hazards to health and safety. Focuses on the first three functions, but includes some consideration of control methods. Prerequisite: BIOL 200; CHEM 224; either PHYS 116 or PHYS 123. Offered: A.

**ENV H 457 Industrial and Environmental Noise (3) Seixas** Survey of industrial and community noise problems, including sources, effects, measurement, control, and legislation. Prerequisite: 2.0 in PHYS 115. Offered: even years; Sp.

**ENV H 460 Occupational Safety Management (3) Gleason** Explores industrial organization and methods of integrating safety and industrial hygiene programs with industrial operations. Investigates issues related to industrial safety and health such as responsibility for safety, dependency on safe practice, and hierarchy of prevention. Offered: Sp. **ENV H 461 Air Pollution Control (4) Pilat** Fundamental concepts of air pollution. Emission sources, atmospheric dispersion, ambient concentrations, adverse effects, governmental regulations, emission standards, air-quality standards, processes and equipment for controlling emissions. Offered: jointly with CEE 490; Sp.

**ENV H 462 Technical Aspects of Occupational Safety (3) Gleason** Reviews federal OSHA (Occupational Safety and Health Administration) and state WISHA (Washington Industrial Safety and Health Act) standards. Explores the impact of these regulations on industry, particularly construction. Upon completion of the course, students receive an OSHA

510 30-hour Construction Safety and Health certification. Offered: W.

**ENV H 472 Environmental Risk and Society (3) I&S Fenske** Examines scientific determinations of environmental risks and explores how such determinations are evaluated by affected communities and society. Employs risk analysis to integrate technical knowledge in hazard identification and exposure assessment to provide a more rational basis for environmental policies. Role of public participation in risk-based decision making discussed. Offered: A.

**ENV H 473 Community Responses to Environmental Health Hazards (5) I&S/NW** *Osaki, Treser* Explores the way various government programs are established, organized and operated to control environmental health risks in the United States. Discusses aspects of the law that impact regulation of environmental health hazards. Offered: Sp.

**ENV H 480 Environmental Health Problems (\*, max. 6) Treser** Individual projects involving library, laboratory, or field study of a specific environmental health problem. Offered: AWSpS.

**ENV H 482 Environmental Health Internship (2-15, max. 15) Treser** Assignment to an environmental health or environmental protection agency for supervised observation and experience in environmental health technology, program planning and utilization of community resources. Prerequisite: 2.5 in ENV H 311. Credit/no credit only. Offered: AWSpS.

**ENV H 490 Selected Topics in Environmental Health (1-6, max. 20)** In-depth study of a current environmental health topic.

**ENV H 497 Environmental Health Special Electives (\*)** Offered: AWSpS.

**ENV H 499 Undergraduate Research (\*)** Individual research on a specific topic in environmental health upon which specific conclusions, judgments, or evaluation can be made or upon which facts can be presented. Offered: AWSpS.

**ENV H 511 Environmental and Occupational Health (1-3, max. 3) Daniell** Effects of exposure to chemical, physical, and biological agents, embracing the community and workplace environments. Current issues, using specific cases from recent literature as basis for classroom discussion and written assignments. Offered: W.

**ENV H 513 Basic Concepts in Pharmacogenetics and Toxicogenomics (3) Eaton, Thummel** Addresses current DNA sequencing and genotyping approaches, and basic concepts of pharmacogenetics and toxicogenomics. Emphasis placed on applications of genomic technologies to the understanding of "gene-environment interactions" that cause diseases of public health importance, including cancer, chronic neurological diseases, and adverse drug reactions. Prerequisite: GENET 372 or equivalent. Offered: jointly with PGH/PCEUT 513.

**ENV H 514 Environmental and Occupational Toxicology I (3) Xia** Major topical areas in human and environmental toxicology, including the biochemical, cellular, and physiological mechanisms by which chemicals produce toxic responses; the toxicology of the major classes of chemicals; principles of toxicity testing; interpretation of toxicological data. Prerequisite: BIOL 212, BIOC 440, or permission of instructor. Offered: A.

**ENV H 515 Environmental and Occupational Toxicology II (3) Kavanagh** Major topical areas in human and environmental toxicology, including the biochemical, cellular, and physiological mechanisms by which chemicals produce toxic responses; the toxicology of the major classes of chemicals; principles of toxicity testing; interpretation of toxicological data. Prerequisite: BIOL 212, BIOC 440, or permission of instructor. Offered: W.

**ENV H 516 Environmental and Occupational Toxicology III (3) Costa** Major topical areas in human and environmental toxicology, including the biochemical, cellular, and physiological mechanisms by which chemicals produce toxic responses; the toxicology of the major classes of chemicals; principles of toxicity testing; interpretation of toxicological

data. Prerequisite: BIOL 212, BIOC 440, or permission of instructor. Offered: Sp.

**ENV H 517 Children's Environmental Health (3)** *Burbacher* Discussion of environmental health issues as they pertain to children's health. Includes historical perspective of public health research and policies directed at protecting children's health and emerging scientific and public health issues such as childhood exposure to mercury and pesticides, childhood asthma, cancer, and environmental justice. Offered: Sp.

**ENV H 518 Environmental Health Regulation I (0/2, max. 2)** *Treser* Introduction to administrative regulation and process. Examines authority, jurisdiction, and structure of environmental control programs and agencies; the regulatory process; agency acquisition and retention of information; administrative actions; enforcement of environmental health laws; major statutes and cases affecting programs. Offered: A/WSp.

**ENV H 519 Environmental Health Regulation II (0/2, max. 2)** *Treser* Introduction to administrative regulation and process. Examines authority, jurisdiction, and structure of environmental control programs and agencies; the regulatory process; agency acquisition and retention of information; administrative actions; enforcement of environmental health laws; major statutes and cases affecting programs. Offered: A/WSp.

**ENV H 531 Neurotoxicology (3)** *Costa* Advanced discussions of the principles and methodological approaches to neurotoxicology (including behavioral toxicology), classes of neurotoxic agents, types and mechanisms of neurotoxic effects, as well as the role of neurotoxicology in toxicology and public health. Prerequisite: ENV H 514, ENV H 515, ENV H 516 or ENV H 405 or permission of instructor. Offered: even years; W.

**ENV H 532 Reproductive and Developmental Toxicology (2)** *Faustman* Investigates chemicals that can induce adverse reproductive and developmental outcomes. Discussion topics include identification and characterization of specific classes of toxic agents, mechanisms of action of these agents at the molecular and cellular level, and risk assessment and regulatory issues. Prerequisite: ENV H 514 and ENV H 515 or ENV H 405 or permission of instructor. Offered: even years; S.

**ENV H 533 Molecular Toxicology (2)** *Gallagher* Advanced discussion of molecular mechanisms whereby chemical, physical, and biological agents produce their harmful effects on biological tissues. Prerequisite: permission of instructor. Offered: jointly with PHCOL 533; odd years; W.

**ENV H 537 Introduction to Manufacturing Systems (3)** *Storch* Description of manufacturing systems. Includes discussion of current trends in manufacturing, especially lean principles. Introduces process flow analysis, manufacturing organizations including job-shop, assembly lines, and group technology, manufacturing inventory philosophies (just-in-time, MRP, OPT), work environment, and work simplification. Offered: jointly with IND E 537; A.

**ENV H 541 Ecology of Environmentally Transmitted Microbial Hazards (3)** *Meschke, Shin* Focuses on the transmission of infectious microorganisms by air, food, water, and other environmental media. Provides an introduction to environmentally transmitted pathogens, and discusses factors affecting their environmental fate, transport, and persistence. Offered: A.

**ENV H 542 Detection and Control of Environmentally Transmitted Microbial Hazards (3)** *Meschke, Shin* Focuses on the detection and control of infectious microorganisms in air, food, water, and other environmental media. Provides a discussion on sample collection, processing, and diction for infectious microorganisms. Provides coverage of engineered controls and disinfection/decontamination processes for infectious organisms. Offered: W.

**ENV H 543 Quantitative Microbial Risk Assessment (3)** *Kissel, Meschke, Shin* Focuses on the principles of quantitative risk assessment as applied to infectious microorganisms. Covers hazard identification, exposure assessment, health

effects assessment, risk characterization, and risk communication. Offered: Sp; even years.

**ENV H 545 Water, Wastewater and Health (4)** *Meschke, Shin* Review of water supply water quality, and water/wastewater treatment as they related to human health. Includes water law and regulations, source water protection, basic treatment technologies for water and waste, chemical and microbial contaminants, and recreational water. Offered: A.

**ENV H 546 Pesticides and Public Health (3)** *Fenske, Keifer* Examines health risks and benefits associated with pesticide use in the United States and internationally; reviews exposure, toxicity, epidemiology, and regulation of pesticides, focusing on populations such as workers and children; discusses benefits derived from vector control, food production, and food preservation. Offered: odd years; W.

**ENV H 548 Community Air Pollution (3)** *Vedal* Offers a comprehensive overview of community air pollution including: air pollution sources, chemistry, and meteorology; human health and environmental effects; global warming; air quality standards, monitoring, control, and management; indoor air; and local air quality management. Prerequisite: SPH graduate student or permission. Offered: Sp.

**ENV H 549 Human Factors in Engineering Design (3)** *Johnson* Engineering considerations of the abilities and limitations of the human aspect in the design of operational systems and components. Functional, psychological, physiological, and environmental considerations. Covers traditional human factors material with a project-based focus/emphasis. Offered: jointly with IND E 549; Sp.

**ENV H 551 Principles of Human Exposure Science (3)** *Yost* Examination of the scientific principles and methods used to characterize human exposures to environmental disease agents, discuss sources and pathways of exposure, use of standard factors, analytical approaches for exposure data, exposure biomarkers, and the energetics of physical agents and injuries. Prerequisite: CHEM 162; MATH 124. Offered: A.

**ENV H 552 Environmental Chemistry of Pollution (4)** *Kalman* Chemical and physical processes determining distribution and fate of chemical hazards, detection of low levels of hazardous compounds, and environmental evaluation and prediction. Fundamental chemical concepts and measurable properties of individual compounds to interpret and relate measurements. Prerequisite: admission to graduate program or permission of instructor. Offered: W.

**ENV H 553 Environmental Exposure Monitoring Methods (4)** *Morgan* Provides an in-depth understanding of current monitoring methods for occupational, residential, and community exposures to hazardous chemical agents. Examines the technical basis for sampling strategies and sampling and analytical methods for chemicals in air, water, food, soil and food, and for biological markers of exposure and effect in humans and other biota. Prerequisite: ENV H 453 or permission of instructor. Offered: W.

**ENV H 554 Biological Monitoring for Chemical Exposure (2)** *Morgan, Simpson* Advanced seminar on biological monitoring for assessment of chemical exposure and health risks from environmental agents. Considers applications and interpretation of results from analysis of biological specimens taken from persons exposed to chemicals in the work place and the general environment. Prerequisite: ENV H 551 or permission of instructor. Offered: Sp; odd years.

**ENV H 555 Instrumental Methods for Industrial Hygiene Measurement: Laboratory (3)** *Morgan, Simpson* Utilizes typical instrumental techniques and analytical methods for the evaluation of potential occupational exposures. Prerequisite: ENV H 453 and ENV H 553 or permission of instructor. Offered: Sp.

**ENV H 556 Quantitative Occupational Exposure Analysis (3)** *Morgan, Seixas* Exploration of industrial hygiene data to understand nature of airborne exposures in the occupational environment, and their interpretation for human health. Focus on reading and discussion of primary exposure assessment literature and statistical analysis of *real* dataset. Prerequisite: one quarter of statistics or biostatistics and basic industrial hygiene. Offered: odd years; W.

**ENV H 557 Exposure Controls (3/4)** *Yost* Presents engineering concepts for selecting exposure controls for chemical, physical, and biological agents. Topics include regulatory mandates, hazard rating strategies, protective clothing, respiratory protection, chemical safety management, building ventilation, local exhaust ventilation, chemical and biohazards controls, airflow measurements, and ventilation troubleshooting. Offered: W.

**ENV H 559 Applied Occupational Health and Safety (3)** *Camp, Gleason, Johnson* Application of occupational safety and health principles. Student teams perform evaluations, assess production methods/processes and exposures, health and safety procedures and programs, and develop engineering and administrative controls. Students perform on a consulting project with a local company including budgeting, project reporting, and presentation. Offered jointly with IND E 567 and NSG 505. Offered: W.

**ENV H 560 Occupational Safety Management (4)** *Gleason* Explores industrial organization and methods of integrating safety and industrial hygiene programs with industrial operations. Investigates philosophic issues related to industrial safety and health such as responsibility for safety, dependency on safe practice, and hierarchy of prevention. Contains numerous case problems and student involvement opportunities. Offered: jointly with NSG 506; Sp.

**ENV H 562 Technical Aspects of Occupational Safety (3)** *Gleason* Reviews federal OSHA (Occupational Safety and Health Administration) and state WISHA (Washington Industrial Safety and Health Act) standards. Explores the impact of these regulations on industry, particularly construction. Upon completion of the course, student receive an OSHA 510 30-hour Construction Safety and Health certificate. Offered: jointly with NSG 507; W.

**ENV H 564 Recognition of Health and Safety Problems in Industry (2)** *Camp, Seixas* Develops skills in occupational health and safety hazard recognition in a variety of important northwest industries. Focuses on process understanding and hazard recognition skills during walk-through inspections of several local facilities, stressing a multidisciplinary approach. Offered: jointly with IND E 564.

**ENV H 566 Introduction to Ergonomics (3)** *Johnson, Stewart* Basic principles of ergonomics in work environment applied to problems of worker and management. Topics include measurement of physical work capacity, problems of fatigue and heat stress, applied biomechanics, worker-machine interactions and communication, design of displays and controls. Prerequisite: basic human physiology or permission of instructor. Offered: jointly with IND E 566/NSG 508; W.

**ENV H 567 Mechanisms of Carcinogenesis (2)** *Xia* Lectures/presentations of biochemical and molecular basis of carcinogenesis induced by environmental agents, including approaches to identification of carcinogens. Role of cell proliferation and cell death (apoptosis) in cancer formation and cancer treatment. Molecular mechanisms that regulate proliferation and apoptosis. Prerequisite: ENV H 516, ENV H 405, or permission of instructor. Offered: jointly with PHCOL 567; even years, A.

**ENV H 568 Molecular Epidemiology of Infectious Diseases (2)** *Di Giacomo, Roberts* Application of molecular typing techniques to study of microbial pathogens to increase understanding of epidemiology of infectious diseases. Brief review of molecular biology. Evaluation of methods used in outbreaks and epidemics reported in literature. Prerequisite: ENV H 511 or ENV H 512 or permission of instructor. Offered: jointly with EPI 568/PABIO 568; W.

**ENV H 569 Occupational Biomechanics (4)** *Johnson* Lectures and laboratories address human occupational biomechanical and physiological limits and measurement, analysis, and modeling techniques that are used by ergonomists for design of safe, healthful, and productive physical work. Prerequisite: ENV H 566 or permission of instructor. Offered: jointly with IND E 569; even years, Sp.

**ENV H 570 Occupational and Environmental Epidemiology (3)** *Checkoway* Research in occupational and environmental determinants of disease. Defining exposed populations, characterizing exposure levels, estimating disease risks

relative to exposure. Cohort, case-control, cross-sectional designs for various health outcomes. Applications to exposure standard setting and risk assessment. Prerequisite: EPI 511 or EPI 512, EPI 513 or permission of instructor. Offered: jointly with EPI 570; Sp.

**ENV H 571 Neuroepidemiology and Environmental Risk Factors (3)** *Kukull* Focus on neurologic diseases and etiology. Presentation of descriptive epidemiology, clinical features, and risk factors, including stroke, Parkinson's disease, Alzheimer's disease, multiple sclerosis, and other disorders. Discussion of NIH grantsmanship. Guest experts present some topics. Recommended: EPI 511 or equivalent. Offered: jointly with EPI 571; odd years; W.

**ENV H 572 Environmental Risk and Society (3)** *Fenske* Examines environmental health risk assessments and explores how such assessments are viewed by affected communities. Reviews scientific risk assessment methods, risk perception, risk communication, and public participation processes. Examines the influence of advocacy and special-interest publications on risk assessment debates. Offered: W.

**ENV H 573 Methods and Issues in Using Biological Measurements in Epidemiologic Research (3)** *Schwartz* Introduction to use of measurements from biological specimens in epidemiologic studies. Prepares epidemiology and laboratory science students for conduct of interdisciplinary human studies. Evaluation of biomarkers, preliminary studies, methodologic issues, quality control. Brief review of molecular biology. Applications and current literature discussed. Prerequisite: EPI 511 or EPI 512. Offered: jointly with EPI 573; W.

**ENV H 574 Probabilistic Exposure Analysis (3)** *Kissel* Examination of probabilistic (in contrast to deterministic) approaches to prediction of human exposure to environmental contaminants including explicit separation of population variability from uncertainty due to ignorance. Discussion of data needs, pitfalls, policy ramifications, and current state of development and regulatory acceptance. Examples from real world. Student project required. Offered: odd years; Sp.

**ENV H 576 Clinical Occupational Medicine (2)** *Van Hee* For clinicians in training, comprehensive overview of occupational disease principles, occupational history-taking, and the provider's role in workers' compensation. Epidemiologic evidence and pathophysiologic basis for occupational diseases reviewed, emphasizing organ system approach to diagnosis and management. Prerequisite: occupational medicine or preventive medicine residents/fellows, nursing students, or permission of instructor. Offered: S.

**ENV H 577 Risk Assessment for Environmental Health Hazards (3/4)** *Faustman* Examines context, methodologies, data, uncertainties, and institutional arrangements for risk assessment. Qualitative and quantitative approaches to identification, characterization, and control of environmental hazards to health emphasized through didactic and case studies. Offered: jointly with CEE 560/PB AF 589; A.

**ENV H 580 Environmental and Occupational Health Sciences Seminar (1, max 6)** Presentation of current environmental and occupational health research and issues. Credit/no credit only. Offered: AWSp.

**ENV H 581 Environmental Health Reading (1)** Critical reading of selected basic and applied research publications on environmental health problems and programs.

**ENV H 583 Environmental Health Reading (1)** Critical reading of selected basic and applied research publications on environmental health problems and programs.

**ENV H 584 Occupational and Environmental Health: Policy and Politics (3)** *Camp, Silverstein* Provides an understanding of the policy process and policy issues in occupational and environmental health and safety, including exploring the relationships between science, values, and politics in the process of setting public policy. Offered: W.

**ENV H 587 Introduction to Biopharmaceutical Product Development (3)** Provides a framework of the drug development process and its regulation. Credit/no credit only. Prerequisite: ENV H 405 or ENV H 514, ENV H 515, and

ENV H 516, or PCEUT 501, PCEUT 502, and PCEUT 503; or equivalent, or instructor permission. Offered: jointly with PCEUT 587; even years, A.

**ENV H 590 Selected Topics (1-6, max. 20)** In-depth study of an current environmental health topic.

**ENV H 591 Current Topics in Toxicology (1, max. 6)** Provides in-depth examination of current topics in environmental and occupational toxicology taken from journal articles and seminars. Consists of presentations led by outside speakers, students, post-doctoral fellows, and faculty. Students expected to participate actively in discussion. Assigned weekly readings given according to the schedule of seminar speakers and topics.

**ENV H 592 Current topics in Occupational Health Sciences (1/3)** *Yost* Weekly discussion of current research on a broad range of topics relevant to occupational and environmental health including exposure assessment, occupational epidemiology, occupational hygiene, and control of environmental hazards. Presentations and discussion sessions designed to help students organize and prepare a critical analysis of research findings. Credit/no credit only. Offered: A.

**ENV H 593 Current Topics in Risk Assessment (1, max. 6)** *Faustman* Examines current topics in risk assessment and risk communication with a focus on issues in environmental health. Consists of presentations led by students, postdoctoral fellows, and faculty. Students expected to participate actively in discussion. Credit/no credit only. Offered: AWSp.

**ENV H 594 Current Topics in Environmental Health (1, max. 2)** Critical review and discussion of current scientific literature of particular relevance to the Environmental Health program. Primary presentations rotate among faculty and students. Credit/no credit only. Offered: W.

**ENV H 595 Research Rotation (3, max. 9)** Research laboratory rotation for pre-doctoral graduate students. Students commit at least 10 hours per week to a laboratory research project aimed at introducing the student to current methods of laboratory research, and to familiarize the student with specific faculty research interests. Prerequisite: graduate standing and permission of program director.

**ENV H 596 Current Issues in Occupational and Environmental Medicine (2, max. 12)** *Firestone, Johnson, Kaufman, Van Hee, Vedal* Interdisciplinary seminar on current and emerging topics in the practice of environmental and occupational health. Faculty- and student-led presentations with an interdisciplinary focus, including occupational hygiene, nursing, and medical issues. Prerequisite: environmental health graduate student, occupational health nursing student, or permission of instructor. Offered: jointly with NURS 580; AWSp.

**ENV H 597 Case Studies in Environmental and Occupational Health (1)** *Van Hee* Discusses clinical cases, recent journal articles, and global environmental health scenarios relevant to the clinical practice of environmental and occupational health. Explores collaborative management of environmental and occupational health related illnesses and navigation of complex environmental health scenarios through real-world cases and critical analysis of published literature. Offered: AWSp.

**ENV H 598 Degree Program Project/Portfolio (1-9, max. 18)** Supervised project work on a topic related to student's concentration in graduate study that results in a paper. Offered: AWSpS.

**ENV H 599 Field Studies (2-6, max. 6)** Assignment to an environmental research or service program to develop field research and evaluation skills. Credit/no credit only. Offered: AWSpS.

**ENV H 600 Independent Study or Research (\*)** Prerequisite: permission of departmental adviser. Offered: AWSpS.

**ENV H 700 Master's Thesis (\*)** Prerequisite: permission of departmental adviser. Offered: AWSpS.

**ENV H 800 Doctoral Dissertation (\*)** Credit/no credit only. Prerequisite: permission of departmental adviser. Offered: AWSpS.

## Epidemiology

### GRADUATE PROGRAM

Epidemiology Program Office

F262 Health Sciences, Box 357236

206-685-1762 or 206-543-8226

[epi@uw.edu](mailto:epi@uw.edu)

[depts.washington.edu/epidem](https://depts.washington.edu/epidem)

The Department of Epidemiology offers the following three graduate degrees: Doctor of Philosophy, Master of Science, and Master of Public Health, for individuals intending to become academicians, highly qualified research specialists, or well-trained public health practitioners, respectively. The department also offers a number of degree tracks within the degree programs, as well as several graduate certificates.

The Master of Public Health degree requires coursework in health services and environmental health, in addition to epidemiology and biostatistics, as well as a thesis and a practicum as preparation for a career in public health practice or as a prelude to the PhD program. Three tracks are available: the General Track, which is selected by most students; the Maternal and Child Health Track (MCH); and the Global Health Track (GH). The MCH and GH tracks require coursework in the respective specialty areas in addition to the requirements of the General Track. (The Epidemiology Global Health Track is not the same as the MPH in Global Health through the Global Health Department, but incorporates some of the same classes.)

Formal concurrent degree programs involving the MPH (Epidemiology) include the following: Doctor of Medicine (M.D.), Doctor of Philosophy (PhD) in Anthropology, Master of Arts in International Studies (MAIS), and Master of Public Affairs (MPA).

The Master of Science degree requires concentration on courses and research in epidemiology and biostatistics as preparation for a research specialization or as a prelude to the PhD program. It also requires electives from the School of Public Health. Two tracks are available, the General Track and the Clinical Research Track. A formal concurrent degree program combines the Epidemiology General Track MS with the PhD in Molecular and Cellular Biology. Applicants interested in an MS in Genetic Epidemiology, administered by the Institute for Public Health Genetics, should visit [depts.washington.edu/phgen/degreeprograms/MSGE\\_degree.shtml](https://depts.washington.edu/phgen/degreeprograms/MSGE_degree.shtml).

The PhD requirements differ from the MS program requirements primarily in the scope and complexity of research for the dissertation. Coursework includes a core series in epidemiology and biostatistics. Electives in substantive disease and exposure areas, as well as research methods, are required. Requisite general electives from the School of Public Health are also part of the curriculum. M.D. students at the UW may apply for formal concurrent M.D. and PhD degrees.

An informal concurrent degree program involving the MPH, MS, or PhD in Epidemiology and another graduate or professional degree at the U.W. may be pursued with the permission of both departments.

The Epidemiology Department and other School of Public Health departments offer several graduate certificate programs open to any qualified graduate student at the University. Some certificate programs are open to Graduate Non-Matriculated students, if indicated on the certificate websites. They offer specialization in the following specific areas:

- *Advanced Clinical Research Methods:* [depts.washington.edu/epidem/Certificates/acrc.shtml](https://depts.washington.edu/epidem/Certificates/acrc.shtml)

- *Basic Clinical Research Methods*: [depts.washington.edu/epidem/Certificates/bcrrc.shtml](https://depts.washington.edu/epidem/Certificates/bcrrc.shtml)
- *Global Health*: [depts.washington.edu/deptgh/students\\_programs/cert\\_grad.php](https://depts.washington.edu/deptgh/students_programs/cert_grad.php) (Offered by the Global Health department)
- *HIV and Sexually Transmitted Infections*: [depts.washington.edu/cfas/training/grad\\_cert](https://depts.washington.edu/cfas/training/grad_cert) (Offered by the Global Health department)
- *Maternal and Child Health*: [depts.washington.edu/mch-prog/certificate/](https://depts.washington.edu/mch-prog/certificate/)
- *Public Health Genetics*: [depts.washington.edu/phgen/certificateprogram/Certificate.shtml](https://depts.washington.edu/phgen/certificateprogram/Certificate.shtml)
- *Statistical Genetics*: [www.stat.washington.edu/stat-gen/index.php?page=certificate](https://www.stat.washington.edu/stat-gen/index.php?page=certificate) (Offered by the Biostatistics department)
- A complete list of School of Public Health certificates is available at [sph.washington.edu/prospective/edprograms.asp#cert](https://sph.washington.edu/prospective/edprograms.asp#cert)

### Admission Requirements for All Degrees

Admission to all graduate programs is highly competitive and is based on the following:

- Background in epidemiology or other health-related fields (such as medicine, health or biological sciences, mathematics, quantitative social sciences), including prior areas of study and work experience, especially quantitative public health research
- Undergraduate and graduate grades (if applicable)
- GRE scores (except for master's degree applicants with a prior doctorate from a U.S. university, M.D./MPH applicants at UW, and M.D./PhD applicants funded by the Medical Scientist Training Program at UW)
- TOEFL or IELTS score from international applicants unless bachelor's degree taught entirely in English or successful petition on the basis of a two-year master's degree or a PhD entirely in English
- Letters of reference

## Master of Public Health

### Degree Requirements

Minimum 63 credits, as follows:

- 45 to 49 course credits
- *Core Courses*: 33 graded credits, including EPI 512 (4), EPI 513 (4), BIOST 511 (4), BIOST 512 (4), BIOST 513 (4), HSERV 510 (3), HSERV 511 (3), EPI 514 (4)
- EPI 510 (2), a prerequisite for EPI 514, is required for students without substantial SAS/Stata programming experience
- *Electives*: 6 credits of EPI course electives of 2 or more credits each (see acceptable electives in the appropriate degree checklist at [depts.washington.edu/epidem/CurrentStudents/](https://depts.washington.edu/epidem/CurrentStudents/))
- 3 to 6 credits (120 to 240 hours) in a field-based practicum (EPI 595)
- 9 to 18 thesis (EPI 700) credits
- Students may enroll in additional elective courses in epidemiology and other relevant departments, and for independent study (EPI 600) to bring the total to 63 credits. Public health-related 400-level coursework taken as a graduate student at the University of Washington may count toward total credits with departmental approval. Coursework unrelated to public health and at the 300-level or below does not count toward the degree.

**MPH Specialized Program Options:** The MPH degree offers specialized tracks as listed below. They have additional admission and course requirements detailed at the program websites.

- *Global Health*: Requires two years prior health science work experience in a developing country to be eligible. Applicants without this experience may apply to the General Track and the Global Health Certificate listed above.
- *Maternal and Child Health*: Requires approximately two years prior U.S. MCH experience to be eligible. Applicants without this experience may apply to the General Track and the MCH Certificate listed above.

## Master of Science

### Degree Requirements

60 credits, to include:

- 36 to 40 course credits
- *Core Courses*: 24 graded credits, including EPI 512 (4), EPI 513 (4), EPI 514 (4), BIOST 511 (4), BIOST 512 (4), BIOST 513 (4)
- EPI 510 (2), a prerequisite for EPI 514, is required for students without substantial SAS/Stata programming experience.
- *Electives*: 6 credits of EPI course electives of 2 or more credits each (see acceptable electives in the appropriate degree checklist at [depts.washington.edu/epidem/CurrentStudents/](https://depts.washington.edu/epidem/CurrentStudents/))
- *School of Public Health Electives*: Two additional courses (2 or more credits each) in any department of the School of Public Health (including Epidemiology) or other University of Washington courses with significant public-health content. (See acceptable electives in the appropriate degree checklist at [depts.washington.edu/epidem/CurrentStudents/](https://depts.washington.edu/epidem/CurrentStudents/).)
- Contact program for acceptable elective courses.
- 9 to 18 thesis credits (EPI 700)
- Students may enroll in additional elective courses in epidemiology and other relevant departments, and for independent study (EPI 600) to bring the total to 60 credits. Public health-related 400-level coursework taken as a graduate student at the University of Washington may count toward total credits with departmental approval. Coursework unrelated to public health and at the 300-level or below does not count toward the degree.

### MS Specialized Program Options:

- The MS Clinical Research track is chiefly intended for professionals who have already completed clinical training and who plan to conduct research with patients in health care settings as a significant part of their future career. For specific coursework requirements, visit the program website at [depts.washington.edu/epidem/cr.html](https://depts.washington.edu/epidem/cr.html).
- The MS in Genetic Epidemiology track is officially housed in the Epidemiology Department, but has different application procedures and requirements. See the following website: [depts.washington.edu/phgen/degreeprograms/MSGE\\_degree.shtml](https://depts.washington.edu/phgen/degreeprograms/MSGE_degree.shtml).

## Doctor of Philosophy

### Admission Requirements Specific to the PhD

- Admission requirements listed here are in addition to the admission requirements for all degrees listed above.
- Master's degree in epidemiology or other health-related field, including mathematics and quantitative social sciences.
- GRE from all applicants, including those who hold a U.S. doctorate, except MSTP M.D. students at UW.
- An applicant should research the interest areas of appropriate Epidemiology Department faculty, but does not need to locate a faculty mentor in advance.

## Degree Requirements

Minimum 90 total credits, to include:

- Reduced minimum to 60 credits for students with a prior relevant master's degree (All course requirements must be satisfied even if more than 60 credits are necessary to do so.)
- 54 to 66 course credits
- *Core Courses*: 32 graded credits including EPI 512 (4), EPI 513 (4), EPI 514 (4), EPI 515 (4), EPI 536 (4), EPI 537 (4), BIOST 517 (4), BIOST 518 (4)
- EPI 510 (2), a prerequisite for EPI 514, is required for students without substantial SAS/Stata programming experience
- *Required Non-graded Courses*: EPI 528 (3), three quarters of EPI 584 (1 credit each), EPI 588 (2)
- Minimum three required Epidemiology electives (minimum 2 credits each). (See acceptable electives in the appropriate degree checklist at [depts.washington.edu/epidem/CurrentStudents/](https://depts.washington.edu/epidem/CurrentStudents/).)
- Three additional electives (minimum 2 credits each) from any department of the School of Public Health (including Epidemiology) or other University courses with significant public health content
- Students are encouraged to take EPI 583 (1) each quarter of the first year and EPI 591 (1) each quarter after the first year.
- *Dissertation*: 27 credits of EPI 800
- The Supervisory Committee may require additional courses to ensure that the student has adequate training in the area of epidemiology he or she is pursuing.
- Additional epidemiology courses and EPI 800 credits, independent study (EPI 600), and relevant courses offered by other departments or schools (with permission), may be applied to the total PhD credits. Public health-related, 400-level coursework taken as a graduate student at the University of Washington may count toward total credits with departmental approval. Coursework unrelated to public health, and at the 300-level or below does not count toward the degree.

## Financial Aid

Research assistantships for work on various projects provide salary and tuition waivers for students working 20 hours/week. (Although funding is not guaranteed with admission, the majority of students find a research assistantship before the start of autumn quarter.) Research training stipends with partial tuition support are available on a limited basis, especially for more advanced doctoral students. Teaching assistantships are available competitively for second-year and higher-level students.

## Research Facilities

University facilities include an excellent library system and access to computers. Many, varied opportunities for field research and practica are provided in Seattle and elsewhere in the state and nation, at institutions such as Seattle Children's Hospital, Fred Hutchinson Cancer Research Center, Group Health Research Institute, Harborview Medical Center, the Center for AIDS and STD, Public Health: Seattle-King County, Washington State Department of Health, VA Puget Sound Health Care Systems, and many other local health institutions. Cooperating organizations focusing on global health also are available in Seattle and internationally. Additional, but not exhaustive, lists are at [depts.washington.edu/epidem/research/Other\\_Institutions.shtml](https://depts.washington.edu/epidem/research/Other_Institutions.shtml), [globalhealth.washington.edu/resource-center/fund-field.php](https://globalhealth.washington.edu/resource-center/fund-field.php), and [sph.washington.edu/practicum/resource.asp](https://sph.washington.edu/practicum/resource.asp).

## COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at [uw.edu/students/crscat/](http://uw.edu/students/crscat/).

**EPI 405 Phys Activity in Health and Disease (3)** *Duncan* Impact of physical activity on individual and public health. Overview of physiological adaptations to activity, exercise prescription, exercise epidemiology, and prevention of chronic diseases. Public health recommendations for activity in the U.S. population, and the effects of the built environment on activity. Prerequisite: either BIOL 118 or BIOL 180. Offered: jointly with NUTR 405; Sp.

**EPI 420 Introduction to Epidemiology (3)** *NW Goldberg* For the undergraduate student wishing to devote only one quarter to a course in epidemiologic methods. Description of ways in which variation in disease occurrence is documented and how that variation is studied to understand causes of disease. Offered: Sp.

**EPI 497 Epidemiology Special Electives (\*)** Off-campus course for medical students. Offered: AWSpS.

**EPI 499 Undergraduate Research (\*)** Offered: AWSpS.

**EPI 502 Phys Activity in Health and Disease (3)** *Duncan* Impact of physical activity on individual and public health. Overview of physiological adaptations to activity, exercise prescription, exercise epidemiology, and prevention of chronic diseases. Public health recommendations for activity in the U.S. population, and the effects of the built environment on activity. Prerequisite: either BIOL 118 or BIOL 180. Offered: jointly with NUTR 505; Sp.

**EPI 503 Public Health Informatics and Surveillance (3)** Covers collection and use of public health surveillance data in formulating policy and managing programs through lectures and real-world interactive exercises. Discusses surveillance for birth defects, environmental exposures, and hospital-acquired infections, and use of tools such as small area analysis and geographic information systems. Offered: jointly with HSERV 503.

**EPI 507 HIV and STIs in Women and Children (3)** *Stewart* Examines the emerging global public health crisis and the plight of women and children with HIV/STIs. Reviews targeted approaches pertaining to women and children and their vulnerability to HIV/STIs. Prerequisite: EPI 511 or EPI 512–513. Offered: jointly with OB GYN 590; Sp.

**EPI 510 Epidemiologic Data Analysis (3)** *Hawes, Winer* Intended for students planning to take 514. Introduces concepts and programming skills necessary to analyze data sets for case-control and cohort studies. Provides students hands-on experience in using epidemiologic data sets for stratified analyses with SAS and Stata. Credit/no credit only. Prerequisite: EPI 511 or EPI 512. Offered: W.

**EPI 511 Introduction to Epidemiology (4)** *Kukull* Epidemiologic methods for non-epidemiology majors. Focuses on research designs and methods to describe disease occurrence and risk factor associations; uses quantitative and biomedical information to infer whether causal relationships exist between potential causes and disease in populations. Offered: A.

**EPI 512 Epidemiologic Methods I (4)** *Holt, Koepsell, Weiss* Principles and methods of epidemiology. Covers measures of disease frequency, measures of effect, causal inferences, descriptive epidemiology, study types, misclassification, and effect modification. Designed for students who want to take 513. Prerequisite: prior or concurrent enrollment in BIOST 511 or equivalent. Offered: A.

**EPI 513 Epidemiologic Methods II (4)** *Holt, Koepsell, Weiss* Continuation of 512. Considers how designs of epidemiologic studies may be constructed to maximize etiologic inferences. Covers confounding, randomized trials, cohort studies, case-control studies, and selected topics. Prerequisite: EPI 512. Offered: W.

**EPI 514 Application of Epidemiologic Methods (4)** *Hawes, Mueller* Practical experience in analysis of data. Students

analyze data sets currently on file using contemporary epidemiologic methods as taught in 512 and 513. Prerequisite: EPI 510 or experience in statistical programming; EPI 512, EPI 513 and epidemiology major. Offered: Sp.

**EPI 515 Advanced Epidemiologic Methods (4)** *DeRoos, Starr* Introduces advanced epidemiologic methods, including causal modeling, inverse probability weighting, propensity scores, sensitivity analysis, imputation for missing data, approaches to multiple comparisons, Bayesian adjustment of risk estimates, recursive partitioning, and modeling for prediction. Prerequisite: EPI 512; EPI 513; EPI 514; EPI/BIOST 536. Offered: jointly with BIOST 519; Sp.

**EPI 516 Statistical Methods in Genetic Epidemiology (3)** Theory and application of statistical techniques used in genetic epidemiology. Includes discussion of association studies, linkages and segregation analyses. Examples stressed with reference to assumptions and limitations. Prerequisite: either BIOST 513 or BIOST 518; PHG 511/EPI 517; or permission of instructor. Offered: jointly with BIOST 516/PHG 519.

**EPI 517 Genetic Epidemiology (3)** *Austin* Research methods for evaluating genetic influences on disease and risk factors and genetic-environmental interactions. Study designs and statistical methods include twin studies, family studies, population-based association studies, segregation analysis, and linkage analysis. Prerequisite: EPI 511, BIOST 511, and GENET 371, or equivalent. Offered: jointly with PHG 511; Sp.

**EPI 518 Computer Demonstrations in Genetic Epidemiology (2–4, max. 4)** *Edwards* Demonstrations and use of computer programs designed specifically for analysis of genetic epidemiologic data, including heritability, segregation, and sib-pair linkage analysis. Discussions focus on interpretation of results. Laboratory sections apply methods to data provided by instructor. Corequisite: EPI 517/PHG 511 or permission of instructor. Offered: jointly with PHG 518.

**EPI 519 Epidemiology of Cardiovascular Disease (3)** *Psaty, Siscovick* Principles, methods, and issues in the epidemiology of cardiovascular disease. Focuses on coronary heart disease and its major risk factors; also covers other topics such as stroke and sudden death. The format includes informal lectures and discussions of the current literature. Prerequisite: EPI 511 or EPI 512, EPI 513. Offered: A.

**EPI 520 Epidemiology of Infectious Diseases (3)** *Manhart* Infectious diseases from a public health perspective. Topics include analytic methods, study design, outbreak investigations, surveillance, vaccine evaluations, global eradication, screening, modeling, and infectious causes of chronic diseases. Homework and discussion based on current examples from the published literature. Prerequisite: EPI 511, EPI 512, or permission of instructor. Offered: W.

**EPI 521 Epidemiology of Maternal and Child Health Problems (3–4), max. 4** *Williams* Contributions to understanding and prevention of major maternal and child health problems, including pregnancy outcome, infant and child morbidity and mortality, maternal morbidity and mortality, abnormal child growth and development, and early-life factors in adult health problems. Prerequisite: graduate, medical, or dental school standing and EPI 511 or EPI 512 or permission of instructor. Offered: jointly with HSERV 542; W.

**EPI 522 Reproductive Epidemiology (3)** *Holt* Focuses on female reproductive system conditions and diseases, non-birth pregnancy outcomes, and impact of pregnancy on later health. Presentation of current epidemiologic knowledge and discussion of methodologic issues on topics including the menstrual cycle; contraception; infertility; spontaneous and induced abortion; and uterine and ovarian disease. Prerequisite: either EPI 511, both EPI 512 and EPI 513, or permission of instructor. Offered: even years; Sp.

**EPI 524 Epidemiologic Studies of Cancer Etiology and Prevention (3/4)** *Li, Rossing* Current knowledge of the role of environmental/lifestyle factors and genetic susceptibility in the etiology of several cancers with an emphasis on study design. Prerequisite: either EPI 511 or EPI 512; concurrent enrollment in EPI 513. Offered: W.

**EPI 526 Epidemiology of Diseases Communicable from Nature (3)** *DiGiacomo, Rausch, Weigler* Explores the public health aspects of zoonotic diseases, their epidemiology and approaches to control. Focuses on the major viral, rickettsial, bacterial, protozoal, helminthic, and fungal diseases transmitted from wild and domesticated animals to humans. Prerequisite: EPI 511, EPI 512, or EPI 520 or permission of instructor. Offered: jointly with C MED 526; Sp.

**EPI 527 Vaccines (3)** *Wald* Overview of issues in vaccine development, clinical trials, implementation of vaccination programs, and the role of vaccines in the control of infectious diseases. Emphasizes current issues and real-world challenges in the vaccine field and features critical reading of the literature. Prerequisite: either EPI 511, EPI 512, or EPI 513. Offered: A.

**EPI 528 Exposure Measurement in Epidemiology (3)** *White* Principles and methods of measuring exposures (risk factors) in epidemiological studies. Questionnaire design; quality-control procedures for interviews, record abstraction, and lab methods; validity and reliability of measures; effects of measurement error; maximizing response rates; measurement of specific exposures. Credit/no credit only. Prerequisite: EPI 513. Offered: Sp.

**EPI 529 Emerging Infections of International Public Health Importance (3-, max. 3)** *Kimball* Focuses on the nexus between emerging infections and increasing globalization of the world due to the mobility of people and goods. Examines emergent events through risk factors and associated macro changes implicated in their genesis. Reviews microbial evolutionary strategies and factors of emergence. Prerequisite: graduate standing. Offered: jointly with HSERV 536.

**EPI 530 AIDS: A Multidisciplinary Approach (2)** *Farquhar* Comprehensive overview of the public health, clinical, and laboratory aspects of human immunodeficiency virus (HIV) infection and disease. Topics include the pathogenesis, natural history, and management of HIV infections. The impact of HIV/AIDS on community and global health care and prospects for prevention and control. Credit/no credit only. Offered: jointly with MED 530/G H 562; A.

**EPI 532 Epidemiology of Infectious Diseases in Resource-Limited Countries (3)** *McClelland* A review of major infectious disease problems of the developing world, including AIDS, malaria, tuberculosis, measles, and diarrhea, with an emphasis on public health control strategies. Offered: odd years.

**EPI 533 Pharmacoepidemiology (3)** *Heckbert, Johnson* Overview of pharmacoepidemiology including drug development and approval; application of epidemiologic methods to study drug safety and effectiveness; exploration of the interplay between research and public policy; introduction to resources for information about drugs; introduction to pharmacology principles pertinent to pharmacoepidemiology. Prerequisite: health sciences graduate student or with permission. Offered: jointly with PHARM 533; even years; Sp.

**EPI 534 Principles of Publishing Clinical Evidence (2)** *Johnson, Olson* Explains advanced methodologic principles for improving the clarity of published clinical evidence. Students prepare and revise a 1000-word research letter for *The Lancet* using their own clinical evidence. Credit/no credit only. Prerequisite: permission of instructor. Offered: jointly with PHARM 536; Sp.

**EPI 536 Categorical Data Analysis in Epidemiology (4)** Summary of univariate categorical data analysis; introduction to multivariate analysis of categorical epidemiologic data using multiplicative models. Experience at interpretation; familiarity with available programs gained by analysis of bona fide data, critiques of analyses appearing in literature. Prerequisite: BIOST 515; EPI 513 and either BIOST 513 or BIOST 518; or permission of instructor. Offered: jointly with BIOST 536; A.

**EPI 537 Survival Data Analysis in Epidemiology (4)** Introduction to the multivariate analysis of survival data using multiplicative models. Application to epidemiologic studies. Familiarity with interpretation and available computer programs gained by analysis of bona fide sets of data and critiques of analyses appearing in the literature. Prerequisite: EPI 513 or permission of instructor. Offered: W.

site: EPI 536 or permission of instructor. Offered: jointly with BIOST 537;W.

**EPI 538 Nutritional Epidemiology (3)** *Beresford* Application of epidemiological methods to current studies of diet, nutrition, and chronic disease. A discussion of current issues and controversies enable students to plan studies in nutritional epidemiology and disease prevention. Prerequisite: EPI 511 or EPI 512 or permission of instructor. Offered: jointly with NUTR 538; A.

**EPI 539 Research Methods in Developing Countries (3/4)** *Gloyd, Mock* Simple, practical methodologies to obtain and validate information regarding health status and health services in developing countries. Usefulness, validity, limitation of vital records, health reports, household (and cluster) surveys, nutritional anthropometry, and qualitative methods discussed. Lectures, computer lab, and student participation in community-based survey. Prerequisite: graduate standing. Offered: jointly with G H 531; W.

**EPI 540 Introduction to Cancer Biology (3)** *Madeleine* Provides a general understanding of cancer biology, covering the carcinogenic process and various biological causes of cancer. Integrates knowledge from different fields of cancer research, guiding students through diverse literature on cancer and carcinogenesis. Prerequisite: GENOME 371, BIOL 355, or permission of instructor. Offered: even years; Sp.

**EPI 541 Introduction to Systematic Reviews and Meta-analysis of Evidence (3)** *Wolf* Conceptual understanding of the quantitative methods used to synthesize evidence. Methods for pooling evidence across independent studies, pooling binary/continuous outcomes, differences between fixed and random effects models, and guidelines for appraising published systematic reviews/meta-analyses. Prerequisite: introductory-level courses in statistics, epidemiology, or biostatistics. Offered: jointly with MEBI 541/HSERV 529; Sp.

**EPI 542 Clinical Epidemiology (2)** *Weiss* Principles and methods involved in studying the outcome of illness. Prerequisite: EPI 511, or EPI 512 and EPI 513. Offered: S.

**EPI 546 Psychiatric Epidemiology (3)** *Vander Stoep* Applies epidemiological methods to the study of mental illnesses. Topics include occurrence and distribution of mental illness, classification of psychiatric disorders; treatment-based vs. community-based studies; epidemiology of depression and schizophrenia; familial transmission; developmental epidemiology; mental illness and violence. Credit/no credit only. Prerequisite: either EPI 511, EPI 512, HSERV 591, or permission of instructor. Offered: jointly with PBSCI 546; Sp.

**EPI 547 U.S. Health and Health Care: Population Health, Social Determinants, and Health Disparities (3)** Explores the elements and actions of a population health approach, including conceptualizing the determinants of health, synthesizing knowledge about major social determinants, and applying knowledge to improve population health and reduce health disparities. Enrollment priority for Health Services PhD students. Prerequisite: HSERV 511, and permission of instructor; recommended: HSERV 512. Offered: jointly with HSERV 513; Sp.

**EPI 548 Social Determinants of Health Research Methods (3)** *Beresford, Smith* Explores study design, measurement and analytic issues applicable to research into the social determinants of health. Semi-weekly graduate-level seminar offered to students with a basic knowledge of epidemiological and biostatistical principles. Prerequisite: either EPI 511 or EPI 512/EPI 513; BIOST 511/BIOST 512 or BIOST 517/BIOST 518. Offered: jointly with HSERV 548; W.

**EPI 549 HIV/STI Prevention Research Methods (3)** Focuses on current research and implementation of HIV/STI prevention (biomedical, behavioral, and public health interventions). Includes analyzing strength of research evidence to support candidate interviews, understanding key features of clinical trial design, and applying appropriate/feasible interventions for specific settings and populations. Offered: jointly with G H 563; Sp.

**EPI 555 Statistical Methods for Spatial Epidemiology (3)** *Wakefield* Motivates the need for, and describes methods

for the analysis of spatially indexed epidemiological data. Covers four major topics: clustering and cluster detection, disease mapping, spatial regression, and an introduction to geographical information systems. Considers both point-references and spatially aggregated data. Offered: jointly with BIOST 555.

**EPI 568 Molecular Epidemiology of Infectious Diseases (2)** *DiGiacomo, Roberts* Application of molecular typing techniques to study of microbial pathogens to increase understanding of epidemiology of infectious diseases. Brief review of molecular biology. Evaluation of methods used in outbreaks and epidemics reported in literature. Prerequisite: EPI 511 or EPI 512 or permission of instructor. Offered: jointly with ENV H 568/PABIO 568. Offered: W.

**EPI 570 Occupational and Environmental Epidemiology (3)** *Checkoway* Research methods for studying occupational and environmental determinants of disease. Defining exposed populations, characterizing exposure levels, estimating disease risks relative to exposure. Cohort, case-control, cross-sectional designs for various health outcomes. Applications to exposure standard setting and risk assessment. Prerequisite: EPI 511 or EPI 512, EPI 513 or permission of instructor. Offered: jointly with ENV H 570; Sp.

**EPI 571 Neuroepidemiology and Environmental Risk Factors (3)** *Kukull* Focus on neurologic diseases and etiology. Presentation of descriptive epidemiology, clinical features, and risk factors, including stroke, Parkinson's disease, Alzheimer's disease, multiple sclerosis, and other disorders. Discussion of NIH grantsmanship. Guest experts present some topics. Recommended: EPI 511 or equivalent. Offered: jointly with ENV H 571; odd years; W.

**EPI 573 Methods and Issues in Using Biological Measurements in Epidemiologic Research (3)** *Schwartz* Introduction to use of measurements from biological specimens in epidemiologic studies. Prepares epidemiology and laboratory science students for conduct of interdisciplinary human studies. Evaluation of biomarkers, preliminary studies, methodologic issues, quality control. Brief review of molecular biology. Applications and current literature discussed. Prerequisite: EPI 511 or EPI 512. Offered: jointly with ENV H 573.

**EPI 582 Design and Analytic Strategies to Enhance the Validity of Epidemiologic Studies (1)** *Weiss* Discusses the issues that led to specific methodologic developments during the past 30 years, along with a characterization of these developments and the consequences of their application. Credit/no credit only. Prerequisite: EPI 512; EPI 513. Offered: W.

**EPI 583 Epidemiology Seminar (1, max. 12)** *Vander Stoep* Presentation of current epidemiologic research and application of epidemiologic research in the practice of public health. Offered: AWSp.

**EPI 584 Doctoral Dissertation Seminar (1)** *Davis* Forum for Epidemiology doctoral students to obtain information for doctoral research, including: project ideas; forming a committee; developing a proposal; conducting the project; and presenting results. Prerequisite: Epidemiology 512 and 513, admitted to the PhD program, passed the Preliminary Examination or 2nd year status. Offered: AWSp.

**EPI 585 Principles of Injury Research and Prevention (3)** *Schiff* Focuses on broad concepts including a conceptual model, surveillance, research methods, control and prevention of injuries. Topics include unintentional injuries from motor vehicle crashes, falls, drowning, sports injuries and intentional injuries from youth violence, intimate partner violence, homicide and suicide. Recommended: EPI 511. Offered: A.

**EPI 586 Responsible Conduct of International Research (3)** *Farquhar* Prepares international and U.S. students to develop research proposals, conduct international field research, and present scholarly work. Topics include proposal writing, human subjects protection, data management, peer review, scholarly integrity, responsible authorship, and grants and budget management. Open to graduate and non-matriculated students. Credit/no credit only. Offered: jointly with G H 532; A.

**EPI 587 Practical Aspects of Research Operations (2)** *Fitzpatrick* Provides the basics necessary to plan, implement, and manage a research study. Topics include human subjects applications, data collection, hiring and training of staff, participant recruitment and retention, data management, quality assurance and control, results reporting, communications, and budgeting. Prerequisite: K12 Clinical Scholar or one course in EPI/BIOST. Credit/no credit only. Offered: A.

**EPI 588 Preparing and Writing Research Proposals (2)** *Kristal, Reiber* Experience in preparing, organizing, and writing research proposals, following NIH and AHRQ guidelines. Includes weekly assignments and didactic exercises, leading to final research proposal. All students participate in mock study section to review and critique proposals. Credit/no credit only. Prerequisite: second-year graduate student (PhD recommended), or PhD or MD in health-related field. Offered: A.

**EPI 590 Selected Topics in Epidemiology or International Health (1-6, max. 6)** Tutorials are arranged for a small number of students for in-depth examination of an area of epidemiology or international health, usually of current nature. Seminar format. Prerequisite: EPI 511. Also a special summer format presenting introductory material. May be offered with ENV H 590 and/or HSERV 590. For more information and permission, consult the department program adviser. Offered: AWSpS.

**EPI 591 Current Literature in Epidemiology (1, max. 15)** Articles pertaining to epidemiology and related subjects selected from the current literature to be distributed and read by all participants. Faculty members and enrolled students alternate being responsible for conducting sessions and choosing articles to read. Credit/no credit only. Prerequisite: EPI 513. Offered: AWSp.

**EPI 592 Program Seminars (1-6, max. 6)** Graduate seminars organized to address specific educational needs of students in various specialized programs within the Department of Epidemiology (i.e., Maternal and Child Health). Prerequisite: permission of instructor. Offered: AWSpS.

**EPI 593 Cancer Prevention Research Laboratory (3)** *White* Research experience for pre- and postdoctoral students working on cancer prevention projects at the Fred Hutchinson Cancer Research Center. Credit/no credit only. AWSpS.

**EPI 595 Epidemiology Master's Practicum (1-6, max. 6)** Supervised practice experience providing students an opportunity to learn how epidemiology is applied in a public health setting and in the formulation and application of public health policy. Credit/no credit only. Prerequisite: EPI 512 and BIOST 511 or equivalent and permission of instructor. Offered: AWSpS.

**EPI 600 Independent Study or Research (\*)** Credit/no credit only. Prerequisite: permission of departmental adviser and independent study supervisor. Offered: AWSpS.

**EPI 700 Master's Thesis (\*)** Credit/no credit only. Prerequisite: permission of thesis chair. Offered: AWSpS.

**EPI 800 Doctoral Dissertation (\*)** Credit/no credit only. Prerequisite: permission of dissertation chair. Offered: AWSpS.

## Public Health Genetics

### PROGRAM OVERVIEW

Health Sciences Building

Public health genetics is an emerging field that applies advances in human genetics, genomics, and molecular biotechnology to improve public health and prevent disease.

Founded in 1997, the University of Washington's Institute for Public Health Genetics (IPHG) is a leader in the emerging field of public health genetics. Alone among U.S. universities, the UW, through IPHG, offers graduate degrees at both the master's and Ph.D. levels.

The mission of the IPHG is to provide broad, interdisciplinary training for future public health professionals, to facilitate research in public health genetics, and to serve as a resource for continuing professional education.

## GRADUATE PROGRAM

Graduate Program Coordinator

F363 Health Sciences Building, Box 357236

206-616-9286

[phgen@uw.edu](mailto:phgen@uw.edu)

## Master of Science, Genetic Epidemiology

### Admission Requirements

- Statement of purpose
- Official sealed transcripts, including courses, grades, and degrees from all institutions attended after secondary school
- Official Graduate Record Examination (GRE) scores. Required for all applicants, except those who hold a U.S. doctorate (neither the MCAT nor ECFMG are acceptable substitutes for the GRE).
- International applicants: Official TOEFL scores
- Three letters of recommendation from professors, supervisors, or others who know the student's work reasonably well. At least two letters should be academic references.
- Recent copy of resume or curriculum vitae

### Degree Requirements

68 credits minimum, to include:

- **Required Courses:** PHG 511/EPI 517 (3), PHG 518/EPI 518 (4), PHG 519/BIOST 516/EPI 516 (3), EPI 573/ENV H 573 (3), PHG 512/LAW H 504/B H 514 (3); EPI 512 (4), EPI 513 (4); BIOST 517 (4), BIOST 518 (4); PHG 536/MEBI 536/PABIO 536 (3), GENOME 552 (1.5)
- **Elective Courses:** The remaining elective courses (excluding independent study and thesis credits) must be in epidemiology, biostatistics, genetics, public health genetics, or be related to the biological, physical, or social/behavioral factors which affect health, in particular ethical, legal and social issues related to genetic epidemiology.
- **Thesis:** PHG 700 (9 credits minimum)

## Master of Public Health, Public Health Genetics

### Admission Requirements

- Statement of purpose.
- Official sealed transcripts, including courses, grades and degrees from all institutions attended after secondary school
- Official Graduate Record Examination (GRE) scores. Required for all applicants, except those who hold a U.S. doctorate (neither the MCAT nor ECFMG are acceptable substitutes for the GRE).
- International applicants: Official TOEFL scores
- Three letters of recommendation from professors, supervisors, or others who know the applicant's work reasonably well. At least two letters should be academic references.
- A recent copy of the applicant's resume or curriculum vitae

### Degree Requirements

63 credits, as follows:

- **Required Courses:** 53 credits as follows: EPI 511 (4), BIOST 511 (4), HSERV 511 (3), ENV H 511 (3), HSERV 510 (3); PHG 511 (3), PHG 512 (3), PHG 513 (3), three of PHG 521 (3), PHG 522 (3), PHG 523 (3), PHG 525 (3), and PHG 542 (3); PHG 580 (6); PHG 595(3); at least 9 credits of PHG 700
- **Electives:** Remaining 10 credits may combine approved elective courses, PHG 600 credits, and PHG 700 credits

## Doctor of Philosophy

### Admission Requirements

- Statement of purpose.
- Official sealed transcripts, including courses, grades, and degrees from all institutions attended after secondary school.
- Official Graduate Record Examination (GRE) scores. Required for all applicants, except those who hold a U.S. doctorate (neither the MCAT nor ECFMG are acceptable substitutes for the GRE).
- International applicants: Official TOEFL scores
- Three letters of recommendation from professors, supervisors, or others who know the applicant's work reasonably well. At least two letters should be academic references.
- A recent copy of the applicant's resume or curriculum vitae.

### Degree Requirements

90 credits minimum, to include:

- Additional writing courses may be required. Students should consult their faculty adviser.
- **Human Genetics:** Required—PHG 551 or GENOME 565 (4); Highly recommended—GENOME 552 (1.5), PHG 536 (3)
- **Public Health:** Required—EPI 511 (4); BIOST 511 (4) or BIOST 517 (4); ENV H 511 (3); HSERV 511 (3)
- **Core Knowledge Areas**
  - **Genomics in Public Health:** PHG 511 (3), PHG 513 (3), PHG 542 (3), PHG 580 (1)
  - **Implications of Genetics for Society:** PHG 512 (3), PHG 521 (3), PHG 522 (3) or PHG 523 (3), PHG 525 (3)
- PHG 580 is required each quarter for all Ph.D. students until they pass the preliminary examination.
- **Preliminary Examination:** Following completion of required courses, usually taken at the end of the second year of study.
- **Selective Courses for Core Knowledge Areas and Development of Dissertation Topic:** : Once students begin to develop their dissertation project, they are expected to take at least nine additional units related to that project. Students need to work with their supervisory committee to identify selectives that are most useful in completing their dissertation. A list of example selective courses is available on the program website.
- General examination
- Dissertation
- Final examination/dissertation defense

## COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at [www.uw.edu/students/crscat/](http://www.uw.edu/students/crscat/)

**PHG 511 Genetic Epidemiology (3)** *Austin* Research methods for evaluating genetic influences on disease and risk factors and genetic-environmental interactions. Study designs and statistical methods include twin studies, family

studies, population-based association studies, segregation analysis, and linkage analysis. Prerequisite: EPI 511, BIOST 511, and GENET 371, or equivalent. Offered: jointly with EPI 517; Sp.

**PHG 512 Legal, Ethical, and Social Issues in Public Health Genetics (3)** *Kuszler, Mastroianni* Equips the student to anticipate and assess potential legal, ethical, and social barriers complicating the incursion of new genetic advances, information, and technologies into public and private health care delivery efforts. Prerequisite: GENET 371 or equivalent. Offered: jointly with LAW H 504/B H 514; A.

**PHG 513 Basic Concepts in Pharmacogenetics and Toxicogenomics (3)** *Eaton, Thummel* Addresses current DNA sequencing and genotyping approaches, and basic concepts of pharmacogenetics and toxicogenomics. Emphasis placed on applications of genomic technologies to the understanding of "gene-environment interactions" that cause diseases of public health importance, including cancer, chronic neurological diseases, and adverse drug reactions. Prerequisite: GENET 372 or equivalent. Offered: jointly with ENV H 513/PCEUT 513; W.

**PHG 518 Computer Demonstrations in Genetic Epidemiology (2-4, max. 4)** *Karen Edwards* Demonstrations and use of computer programs designed specifically for analysis of genetic epidemiologic data, including heritability, segregation, and sib-pair linkage analysis. Discussions focus on interpretation of results. Laboratory sections apply methods to data provided by instructor. Corequisite: EPI 517/PHG 511 or permission of instructor. Offered: jointly with EPI 518; Sp.

**PHG 519 Statistical Methods in Genetic Epidemiology (3)** *Thorton* Theory and application of statistical techniques used in genetic epidemiology. Includes discussion of association studies, linkages and segregation analyses. Examples stressed with reference to assumptions and limitations. Prerequisite: either BIOST 513 or BIOST 518; PHG 511/EPI 517; or permission of instructor. Offered: jointly with BIOST/EPI 516.

**PHG 521 Culture, Society, and Genomics (3)** *McGrath* Examines social and cultural issues of human genome sequencing and control of genetic expression. Attitudes and behaviors toward health, illness, and disability are studied using historical, contemporary, and cross-cultural case study material. Offered: jointly with NURS 582/ANTH 574; Sp.

**PHG 522 Ethical Frameworks for Public Health Genetics (3)** *Mastroianni* Application of ethical principles to problems in genetics practice, policy, and research. Includes: historical experiences with genetic screening and genetic engineering; application of ethical frameworks to emerging problems in public health genetics. Prerequisite: LAW H 514/B H 514/PHG 512 or permission of instructor. Prerequisite: LAW H 504/B H 514/PHG 512 or permission of instructor. Offered: jointly with B H 516; W, every other year.

**PHG 523 Genetics and the Law (3)** *Kuszler, Mastroianni* Explores and analyzes legal issues arising from genetic technologies and information. Statutes, regulations, and cases demonstrate the constitutional, contract, tort, criminal, and family law use of genetic science to determine rights, disputes, and controversies. Prerequisite: LAW H 504/B H 514/PHG 512 or permission of instructor. Offered: jointly with LAW H 520; A.

**PHG 525 Public Commentary on Ethical Issues in Health Genetics (3)** *Kelly-Edwards* Explores issues in public health genetics through academic commentary, personal narratives, science fiction, and film using ethical frameworks from narrative ethics, feminist ethics, and principlism. Includes cloning, assisted reproduction, prenatal genetic testing, presymptomatic genetic testing, gene therapies, scientific responsibility, and GMOs. Graduate students only. Offered: jointly with B H 515; Sp.

**PHG 536 Bioinformatics and Gene Sequence Analysis (3)** *Rose* Nature and relevance of molecular sequence information, computer-based protein, and DNA sequence analysis, molecular sequence and genomic databases, and methods for database accession and interrogation. Prerequisite: background in molecular biology and permission of instructor. Offered: jointly with PABIO 536/MEBI 536; Sp.

**PHG 542 Genetic Discovery in Medicine and Public Health (3)** *Burke* Addresses the implications of genetic science for clinical and public health practice, with an emphasis on health policy and ethics. Offered: jointly with B H 530; W.

**PHG 551 Human Genomics: Science, Ethics, and Society (3)** *Fullerton* Explores the ethical and social implications of human molecular genetics and genomics investigation. Recent research is critically evaluated for its potential impact on scientific practice, research participation, and societal understandings. Prerequisite: LAW H 504/B H 514/ PHG 512 or permission of instructor. Offered: jointly with B H 551/ GENOME 573; A.

**PHG 580 Interactive Seminar (1, max. 30)** *Austin, Fullerton* Seminar series on topics related to public health genetics, including current bioethical, legal, medical, biotechnology, and public policy issues. Offered: jointly with LAW H 579.

**PHG 590 Selected Topics in Public Health Genetics (1-6, max. 6)** Tutorials are arranged for a small number of students for in-depth examination of an area of public health genetics, usually of a current nature.

**PHG 591 Public Health Genetics Journal Club (1, max. 6)** Provides an interdisciplinary forum for the critique of current literature public health genetics and related disciplines. Credit/no credit only. Offered: AWSp.

**PHG 595 Master's Practicum (1-12, max. 12)** Supervised practice experience providing students an opportunity to learn how genetics is applied in a public health setting and in the formulation and application of public health policy. Prerequisite: EPI 517/PHG 511, LAW H 504/B H 514/PHG 512, ENV H/PABIO/PCEUT/PHG 513, or permission of instructor.

**PHG 600 Independent Study or Research (\*)** Credit/no credit only.

**PHG 700 Master's Thesis (\*)** Credit/no credit only.

**PHG 800 Doctoral Dissertation (\*)** Credit/no credit only.

## Health Services

### DEPARTMENT OVERVIEW

H668 Health Sciences

The mission of the Department of Health Services is to work with partners in public health and health care to prepare leaders, design solutions, and conduct innovative research that is translated into practice and policy. The department offers innovative and rigorous academic preparation that integrates learning, service, and research opportunities. We emphasize practical experience and student-faculty collaboration. Through this approach, our students master the competencies they need for success.

### UNDERGRADUATE PROGRAM

Adviser

1100 NE 45th Street, Suite 405, Box 354943

206-543-8810

[hihim@uw.edu](mailto:hihim@uw.edu)

The program in Health Informatics and Health Information Management (HIHIM) offers both a postbaccalaureate certificate and a Bachelor of Science degree (Evening Degree Program).

The program is accredited by the Commission on Accreditation for Health Informatics and Information Management Education, in cooperation with the American Health Information Management Association (AHIMA). Students acquire a sound background in health data systems, organizational theory, computer systems in health care, health information systems analysis, management theory and application, quality assurance theory and application, and

finance and legal issues. Upon completion of this program, students are eligible to take the national certification examination for Registered Health Information Administrator.

### Health Informatics and Health Information Management Postbaccalaureate Certificate

#### Admission Requirements

Applicants must hold a baccalaureate degree from an accredited college or university with a minimum GPA of 2.50. They must also have taken courses in, or have the requisite knowledge and skills pertaining to, the following: human anatomy and physiology (laboratory course); patho-physiology; introduction to basic computer applications such as spreadsheets, data bases, or word processing, or introductory programming; principles of management; statistics (any discipline); and medical terminology.

#### Certificate Requirements

55 credits as follows:

- HIHIM 409 (4, 4), HIHIM 410 (6), HIHIM 412 (5), HIHIM 420 (5), HIHIM 421 (5), HIHIM 450 (3), HIHIM 454 (4), HIHIM 455 (5), HIHIM 456 (5), HIHIM 460 (3), HIHIM 462 (3), HIHIM 470 (3), HIHIM 480 (4).
- The program may be completed in either one or two academic years.

For current information, please visit the [Health Informatics and Health Information Management website](#).

### Bachelor of Science

#### Health Informatics and Health Information Management Major

*Suggested First- and Second-Year College Courses:* Human anatomy and physiology (laboratory course); patho-physiology; introduction to basic computer applications such as spreadsheets, data bases, or word processing, or introductory programming; principles of management; statistics (any discipline); English composition; and medical terminology.

#### Department Admission Requirements

- Admission to UW Evening Degree Program for summer quarter of planned entry to Health Informatics and Health Information Management (HIHIM)
- Minimum 90 transferable credits.
- Completion of the following prerequisites (With the exception of medical terminology, prerequisite courses may be taken at the UW or elsewhere):
  - Statistics (one of the following): STAT 220, STAT 311, QMETH 201, PSYCH 315, EDPsy 490, or equivalent. (4-5 credits)
  - Anatomy and physiology with laboratory: BIOL 118 and BIOL 119, or equivalent (6 credits)
  - Medical terminology: Not offered at UW. Available at various community colleges (3-5 credits)
- Grades: Minimum cumulative GPA of 2.50. Minimum cumulative GPA of 2.50 in prerequisite coursework. Minimum 2.0 grade in each prerequisite course.
- Prerequisites must be completed prior to admission, with the following exception: A maximum of one (1) prerequisite course may be in progress during summer quarter. Applicant must include written petition with HIHIM application. Applicant may be considered for conditional admission. Offer of admission to HIHIM is withdrawn if prerequisite is not completed by the end of summer quarter or if prerequisite grade requirement is not met.
- Admission is once a year, for summer quarter. Admission is competitive; completion of admission require-

ments guarantees consideration but not acceptance. Application deadline for each year is April 15. The academic summer schedule begins with an introductory course and an optional independent study course.

#### Program Requirements

- General Education Requirements
  - English Composition and Additional Writing (15 credits): English composition (5 credits); additional writing (W courses) (10 credits)
  - Quantitative & Symbolic Reasoning (4-5 credits): Depending on course taken, may be satisfied by the statistics prerequisite requirement.
  - Areas of Knowledge (60 credits): Minimum 20 credits each in Visual, Literary, & Performing Arts (VLPA), Individuals & Societies (I&S), and Natural World (NW). (BIOL 118 and BIOL 119 may count toward both the prerequisite and NW requirements.)
- Program Requirements (57 credits)
  - Disease concepts (4 credits): HIHIM 409
  - Information systems (16 credits): HIHIM 410, HIHIM 420, HIHIM 421
  - Coding and vocabulary (5 credits): HIHIM 412
  - Management (25 credits): HIHIM 450, HIHIM 454, HIHIM 455, HIHIM 456, HIHIM 470, HIHIM 480
  - Internships and projects (7 credits): HIHIM 460, HIHIM 462, HIHIM 499
- Additional electives to complete minimum of 180 credits required for a degree.
- Minimum cumulative 2.00 GPA in core courses and minimum 2.0 grade in individual courses.

For current information, visit the [Health Informatics and Health Information Management website](#).

### Individualized Studies Major

An undergraduate major in public health is housed administratively within individualized studies. This major introduces undergraduates to public health issues such as emerging infectious diseases, chronic diseases, access to healthcare and modes of healthcare delivery, the geography of health, and the effects of environment on health and disease. Students also learn about the tools medical researchers use to understand the biological mechanism of disease and the modes of disease spread, prevention, and cure. The major was designed by, and is supported by, faculty from the School of Public Health. A complete description of the individualized studies major can be found in the Arts and Sciences section of this catalog.

### Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:* The bachelor's degree program is designed to prepare individuals for careers in the management and use of health care information, and prepares students for the Registered Health Information Administrator (R.H.I.A.) national certifying examination of the American Health Information Management Association. The program gives students the tools to work in a wide variety of health care positions upon graduation, including health information management, health informatics with emphasis on electronic health records, health care quality improvement, decision support analysis, research, health insurance, and consulting. Graduates pass a national credential examination, with a majority working within the health information management field.
- *Instructional and Research Facilities:* None.
- *Honors Options Available:* For Interdisciplinary Honors, see University Honors Program.

- *Research, Internships, and Service Learning:* Students complete two internships, one of which is the capstone project.
- *Department Scholarships:* None.
- *Student Organizations/Associations:* Students are invited to join the health information management professional association at reduced rates.

## GRADUATE PROGRAM

Graduate Program Coordinator

H673 Health Sciences, Box 357660

206-616-2926

[hservmph@uw.edu](mailto:hservmph@uw.edu)

The Department of Health Services offers a two-year graduate program in health services leading to the Master of Public Health or Master of Science degree. The MPH degree prepares future health practitioners, managers, and researchers to conduct the unfinished work of improving the well-being of communities in the United States and throughout the world. Graduates take jobs in health system management, health program design and evaluation, health promotion, public health practice, and policy analysis. Among other options, the department offers an MPH in community-oriented public health practice (C-O.P.H.P.) This program uses problem-based learning methods, and integrates classroom instruction and experiential fieldwork to prepare students to work in community and public health practice settings. Students may also pursue any of the MPH specialty options. The department also offers a three-year extended degree program in community-health management, leading to the MPH degree for employed professionals working full-time.

The department also maintains primary responsibility for the graduate program in Health Services Administration (an interdisciplinary degree-granting program of the Graduate School described in the Interdisciplinary Graduate Degree Programs section of this catalog). In addition, an executive version of the traditional MHA degree, designed for mid-career health care professionals, is offered. The MHA degree provides full academic preparation for careers in management and policy positions in health systems, hospitals, medical groups, health plans and other types of health care organizations.

The department offers a Ph.D. in health services and participates in the training of doctoral fellows.

## Master of Public Health

For current listings of MPH options and their requirements, please visit the [program website](#).

### Admission Requirements

- One set of official transcripts from all institutions of higher learning attended
- Official scores from the general Graduate Record Examination (GRE) (required for applicants who have not already earned a doctoral-level degree (e.g., M.D., Ph.D., J.D.) from a U.S. institution of higher learning)
- Test of English as a Foreign Language (TOEFL) scores, if applicable.
- Admission application
- Applicant's statement, including a description of the applicant's professional background, career goals, and the educational objectives which the applicant expects to meet while completing the program
- Three recent letters of recommendation, preferably from former supervisors and teachers.
- An in-person or telephone interview with a Health Services faculty person is highly recommended, but not required

### Degree Requirements

63 credits for each track/option listed below. For detailed requirements, see program website at: [depts.washington.edu/hserv/curriculum/](http://depts.washington.edu/hserv/curriculum/)

### Community-Oriented Public Health Practice Track

63 credits, to include:

- Problem-based learning (PBL) core curriculum - 36 credits
- Integrated fieldwork - 6 credits (first year)
- Seminars - 6 credits
- Capstone project - 9 credits (second year)
- Electives - 6 credits from School of Public Health and Community Medicine and other schools/colleges at the UW, as appropriate

### Health Care and Population Research Option

63 credits, to include:

- At least 30 credits from graduate-level-in-classroom courses, of which at least 18 credits must be from Health Services courses.
- 3 credits: practicum
- 9 credits: thesis

### Maternal and Child Health Option

63 credits, to include:

- At least 30 credits from graduate-level-in-classroom courses, of which at least 18 credits must be from Health Services courses.
- 3 credits: practicum
- 9 credits: thesis

### Social and Behavioral Sciences Option

63 credits, to include:

- At least 30 credits from graduate-level-in-classroom courses of which at least 18 credits must be from Health Services courses.
- 3 credits: practicum
- 9 credits: capstone project or thesis

## Master of Health Administration

For current information, please visit the [MHA program website](#).

### Admission Requirements

- A baccalaureate degree from an accredited university
- Minimum GPA of 3.00 in the last 90 graded credits
- GRE scores

### Degree Requirements

79 credits, as follows:

- *Year One Required Courses:* ACCTG 503 (4); HSERV 511 (4); either HSERV 587 (3) or HSMGMT 514 (4), HSMGMT 501 (3); HSMGMT 513 (4); HSMGMT 523 (3); HSMGMT 560 (3); HSMGMT 571 (4); 12 credits of HSMGMT 590 (1-6, max. 12); 4 credits of HSMGMT 592 (2, 2)
- *Year Two Required Courses:* Either HSERV 551 (3), HSERV 552 (3), or HSERV 553 (2-3); HSMGMT 500 (3), HSMGMT 502 (3), HSMGMT 545 (4), HSMGMT 562 (4), and MHE 523 (3).

## Master of Science, Health Care and Population Health

### Admission Requirements

For current information, please visit the [MS program website](#).

- One set of official transcripts from all institutions of higher learning

- Official scores from the general Graduate Record Examination (GRE) (required for applicants who have not already earned a doctoral-level degree from a U.S. institution of higher learning)
- Test of English as a Foreign Language (TOEFL) scores, if applicable.
- Admission application
- Applicant's statement, including a description of the applicant's professional background, career goals, and the educational objectives which the applicant expects to meet while completing the program
- Three recent letters of recommendation, preferably from former supervisors and teachers.
- An in-person or telephone interview with a Health Services faculty person is highly recommended

### Degree Requirements

Minimum 63 credits, to include:

- Either HSERV 511 (3/4) or HSERV 512 (3)
- Either HSERV 587 (3), HSMGMT 513 (4), or HSMGMT 514 (3)
- EPI 512 (4), EPI 513 (4)
- Either BIOST 511, BIOST 512, BIOST 513 (4, 4, 4), or BIOST 517, BIOST 518 (4, 4)
- Two of the following: HSERV 522 (4), HSERV 523 (4), HSERV 524 (4), HSERV 525 (4), HSERV 526 (4), HSERV 527 (4), HSERV 539 (3/4), HSERV 583 (3), HSERV 584 (3), or HSERV 586 (3)
- Three quarters of HSERV 592 (1-6, max. 6)
- 9 credits of HSERV 700

## Doctor of Philosophy

For the most current information, please visit the [Ph.D. program website](#).

### Admission Requirements

Admission priority is given to applicants who have graduated from a master's program with high academic standing. Students with only a bachelor's degree with health services research experience are occasionally admitted. Generally these students are admitted to the master of science program and then may be admitted to the doctoral program.

Applicants who have a bachelor's, master's, or professional degree in a field related to health services are given preference over applicants who do not have such experience.

Applicants with research experience and publications are typically rated more highly.

Students admitted to the program generally have GRE scores in or above the 80th percentile.

International applicants must submit the results of the Test of English as a Foreign Language (TOEFL), unless they are a citizen of Australia, Canada, Ireland, New Zealand, or the United Kingdom, or have earned a bachelor's or higher degree from the United States or one of the countries listed above. A minimum score of 580 (paper based) or 237 (computer based) on the TOEFL is required to be considered for admission to the UW.

### Degree Requirements

100 credits minimum, as follows:

- *Required core competencies (35 credits):* HSERV 512 (3), HSERV 513 (3), HSERV 514 (3); HSERV 523 (4), HSERV 524 (4), HSERV 525 (4); one of the following: HSMGMT 514 (3), HSERV 587 (3), or ECON 500 (3); HSERV 522 (3); BIOST 517 (4), BIOST 518 (4) (or BIOST 511, BIOST 512, BIOST 513 (4, 4, 4) or BIOST 514, BIOST 515 (4, 4); EPI 512 (4), EPI 513 (4)

- **Area of emphasis:** Five courses or 15 credits in an area of emphasis. Suggested areas of emphasis are as follows:
  - Economics or Finance
  - Health Behavior and Health Promotion
  - Occupational Health
  - Cancer Prevention and Control
  - Evaluation Sciences
  - Population Health and Social Determinants
  - Global Health
  - Maternal and Child Health
  - Sociology/Demography
  - Bioinformatics
  - Customized area of emphasis: The specific courses to be taken are selected by the student and the adviser based on the student's past coursework, experience, proposed dissertation topic, and future career goals.
- Doctoral courses in advanced theory and methods in health services (50 credits including a minimum of 30 dissertation credits)
- Written preliminary examination
- Written and oral general examinations
- Dissertation
- Dissertation defense (final examination)

## Financial Aid

Every attempt is made to ensure that students admitted are not prevented from pursuing graduate studies due to inadequate finances. Some fellowships, assistantships, scholarships, and loans are available each year.

## Research Facilities

In addition to using University facilities, the program has extensive links with community health-care delivery systems and agencies for research and training.

## EXTENDED MPH

Graduate Program Coordinator

H674 Health Sciences, Box 357660

206-685-7580

For current information, visit the [Extended MPH program website](#).

The Extended MPH degree program is a part-time, partial distance learning program delivered through a combination of intensive four-week summer sessions on the University campus, directed independent study, and four intensive weekend seminars during the academic year. The program is designed for mid-career public and community health professionals with three or more years of experience related to public health. The program provides knowledge and skills required at mid- and upper-level practice and management positions for health professionals. In addition to the core courses in health services, epidemiology, biostatistics, and environmental health, the prescribed coursework includes a broad exposure to the health-care system plus specific management training in budgets, finance, personnel management, economics, organization theory, and program planning and evaluation. Pathways are available in health education, maternal and child health, public health practice, and oral health.

The Extended MPH degree program provides training in developing skills in the scientific base of public health, analytic methods, management and communication, and policy and advocacy, as well as training in cross-cutting issues. Graduates apply their skills directly to their careers.

## Admission Requirements

- Current employment in a public health related agency preferred
- Minimum three years experience in community, public, or environmental health-related field
- Baccalaureate degree from an accredited college or university
- Minimum 3.00 GPA in the last graded 90 quarter/60 semester hours
- Graduate Record Examination (GRE) scores, taken within 6 years. (Applicants with M.D., D.O., or Ph.D. degrees from an accredited U.S. college or university may waive the GRE requirement.)

## Degree Requirements

63 credits minimum, as follows:

- **Year 1 Required Courses:** BIOST 502 (4), EPI 511 (3/4), HSERV 501 (3), HSERV 516 (4), HSERV 520 (1-3, max. 3), HSMGMT 560 (1-4, max. 4)
- **Year 2 Required Courses:** BIOST 503 (4), ENV H 511 (1-3, max. 3), HSERV 504 (1-3, max. 3), HSERV 522 (1-4, max. 4), HSMGMT 514 (3/4), HSMGMT 563 (3)
- **Year 3 Required Courses:** HSMGMT 566 (3), HSMGMT 572 (3)
- **Thesis or Project Option:** HSERV 700 (master's thesis) or HSERV 598 (project); EPI 600/ENV H 600
- **Practicum (required):** focus based on pathway choice
- **Elective or Pathway Credits (required):** pathway courses may be spread out over two years. Electives may be taken at any time.

## COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at [www.uw.edu/students/crsat/](http://uw.edu/students/crsat/)

## Health Informatics and Information Management

**HIHIM 409 Disease Concepts for Managers (4)** Develops a methodology for understanding and communicating dimensions of disease states as all health state that a person might experience. Presents clear, effective ways to describe the diversity of health conditions and focuses on disease from a health information systems perspective.

**HIHIM 410 Introduction to Health Care Systems and Health Data Systems (6)** Covers current issues in health care; relationship of the health care system to health data systems; accreditation, licensure and professional standards; health records analysis, statistics, data linkage, application of professional standards to health records and record management systems; retrieval, tracking and retention systems.

**HIHIM 412 Healthcare Coding, Vocabulary and Revenue Cycle Management (5)** Overview of clinical vocabularies and classifications, detailed instruction on International Classification of Diseases, ninth revision, clinical modification (ICD-9-CM) and Current Procedural Terminology (CPT) coding principles, and revenue cycle management. Prerequisite: HIHIM 409.

**HIHIM 420 Health Care Computer Systems and Electronic Health Records (5)** Current health information systems and the role of health informatics; technology infrastructure and health informatics standards, electronic health records, definitions, functions, issues, and barriers; hospitals, ambulatory care, home health and long-term care and computer applications. Prerequisite: HIHIM 410; HIHIM 411.

**HIHIM 421 Health Information Systems Analysis (5)** Examines lifestyle systems development process and tools, project management and team coordination, analysis of health

information systems, and user requirements. Prerequisite: HIHIM 420.

**HIHIM 450 Organizational Theory in Health Facilities and Healthcare Delivery (3)** Addresses the organization of healthcare services across the spectrum of healthcare delivery systems—both governmental (federal, state, local) and private. Financing of healthcare services and related policy issues are explored.

**HIHIM 454 Finance Concepts for Health Care Managers (6)** Covers financial concepts and revenue cycle management applied to today's healthcare environment, financial management tools and budgeting.

**HIHIM 455 Professionalism and Leadership (4)** Professional development, leadership assessment and ethics, interpersonal skills and effective communication and human resource management requirements.

**HIHIM 456 Quality Assurance and Research in Healthcare (5)** Quality improvement, risk management and utilization management in health care, design and analysis of quality improvement systems, including use of data systems in quality assurance and research; health data retrieval, analysis and presentation, and review of relevant healthcare informatics research. Prerequisite: Statistics; Medical Terminology.

**HIHIM 460 Management Project I (3)** Explores the development of management skills and competencies, and a seminar through site experience in health care facilities with campus and clinical faculty. Prerequisite: HIHIM 410

**HIHIM 462 Management Project II (3)** Explores applied management using a formal capstone project in a health-care setting. Prerequisite: HIHIM 460.

**HIHIM 470 Legal Concepts for Health Fields (3)** Examines principles of law as applied to the health field, with reference to health information management.

**HIHIM 480 Management, Problem-Solving and Decision-Making (4)** Provides the tools and experiences useful at a management level for problem-solving and decision-making in health information administration.

**HIHIM 490 Special Topics (1-5, max. 15)**

**HIHIM 499 Independent Study (1-5, max. 5)**

## Health Services

**HSERV 100 Personal and Public Health (3) I&S** Provides an overview of the key components of health and wellness. Presents a balance between individual responsibility and social determinants of public health, emphasizing a holistic preventative model. Incorporates self-assessment and considers the impact of personal, family, social, cultural, and environmental factors on health.

**HSERV 475 Perspectives in Medical Anthropology (5) I&S** Introduction to medical anthropology. Explores the relationship among culture, society, and medicine. Examples from Western medicine as well as from other medical systems, incorporating both interpretive and critical approaches. Offered: jointly with ANTH 475.

**HSERV 480 Issues in Public Health (1-3, max. 6)** Problems and issues in epidemiology, health services delivery and administration, environmental health, pathobiology, biostatistics, and related fields.

**HSERV 481 Issues in Public Health (3)** Introduces public health by taking an in-depth look at local public health practice. Focuses on practical solutions for real life problems in local public health settings. Incorporates speakers from the local practice community.

**HSERV 482 The Health of Populations (3)** Explores what makes a population healthy or unhealthy. Examines why the USA is less healthy than all the other rich countries, despite being one of the healthiest fifty years ago.

**HSERV 490 Undergraduate Special Topics (1-6, max. 12)** Collect and analyze literature related to historical and current public health issues, problems and programs; analyze information and develop written summaries to demonstrate

increased knowledge and competencies as applied to public health. Prerequisite: HSERV 480.

**HSERV 499 Independent Study in Health Services (1-12, max. 12)** Individual library or field study project selected in consultation with a faculty adviser.

**HSERV 501 Public Health Practice at the Local Level (3)** Basic overview of state and local public health practice with leaders in the field and case studies focusing on rural and urban public health challenges. Offers preparation for practice in public health agencies. Prerequisite: HSERV 511 or permission of instructor. Offered: jointly with EPI 501.

**HSERV 503 Public Health Informatics and Surveillance (3)** Covers collection and use of public health surveillance data in formulating policy and managing programs through lectures and real-world interactive exercises. Discusses surveillance for birth defects, environmental exposures, and hospital-acquired infections, and use of tools such as small area analysis and geographic information systems. Offered: jointly with EPI 503.

**HSERV 504 Health Communication ([1-3]-, max. 3)** Overview of the theory and practice of designing, producing, and evaluating public health communication campaigns, including the use of mass media. Develops greater capacity for critical judgment about the use of communication strategies for achieving public health goals.

**HSERV 507 Communication for Health Promotion: Theory and Application (3)** Discuss and evaluate health communications theories and applications at the individual level (i.e., persuasion), interpersonal level (i.e., doctor/patient communication), and societal level (i.e., mass media). Investigate intercultural communication cutting across all levels of health communication. Examines the steps involved in the design of a health communication intervention.

**HSERV 508 Dynamics of Community Health Practice (3)** Analysis of principles of community health as applied to the delivery of clinical services in order to improve public health, reduce disparities, provide leadership in delivery of care, and synthesize one's clinical role with public health. Examines environmental, social, cultural, and behavioral determinants of health. Includes family, aggregates, and populations. Offered: jointly with NURS 560.

**HSERV 509 Public Health and Informatics (3)** Introduction to the emerging field of public health informatics. Covers general public health topics as well as key public health informatics issues and applications. Evaluates a public health information system. Prerequisite: either MEBI 530 or permission of instructor. Offered: jointly with MEBI 533; Sp.

**HSERV 510 Society and Health (3)** Provides an overview of three core areas in the social and behavioral sciences of public health practice and research: social determinants of individual and population health, health promotion and disease prevention, and cultural competency and community collaboration. Prerequisite: HSERV 511 or equivalent or permission of instructor.

**HSERV 511 Introduction to Health Services and Public Health (3-4)** History, organization, and effectiveness of United States health care and public health systems. Determinants of health, need, and utilization. Public and private financing. Supply and provision of personal and public health services. Managed care. Government and private sector roles. Prerequisite: graduate standing or permission of instructor.

**HSERV 512 U.S. Health and Health Care: Organization, Financing, and Delivery (3)** Students review and examine selected topics from literature. Includes: need and access to care; theory and effects of health insurance; private and public insurance programs; managed care; costs/expenditures; availability and organization of health resources; and quality assessment and improvement. Enrollment priority for Health Services PhD students. Prerequisite: HSERV 511.

**HSERV 513 U.S. Health and Health Care: Population Health, Social Determinants, and Health Disparities (3)** Explores the elements and actions of a population health approach, including conceptualizing the determinants of health, synthesizing knowledge about major social determinants,

and applying knowledge to improve population health and reduce health disparities. Enrollment priority for Health Services PhD students. Prerequisite: HSERV 511, and permission of instructor; recommended: HSERV 512. Offered: jointly with EPI 547; Sp.

**HSERV 514 U.S. Health and Health Care: Health Policy Research (3)** Extends students' understanding of the nature of health policy and health policy development in the context of a market-based economy. Enrollment priority for Health Services PhD students. Prerequisite: HSERV 511, and permission of instructor; recommended: HSERV 512/513.

**HSERV 516 Introduction to Health Services—Extended Degree (4)** Provides overview of health care system, exposes students to current issues and developments affecting organization and delivery of health services, helps students develop ability to frame and analyze questions and issues related to health services. Prerequisite: registration in Extended MPH Degree program.

**HSERV 517 Provision of Health Services—Extended Degree (2)** Builds on material covered in 516 and provides students with tools used to evaluate alternative health delivery systems; exposes students to various international health delivery systems; encourages students to decide how to organize such a system. Prerequisite: HSERV 516, registration in Extended MPH Degree program.

**HSERV 518 Social and Ethical Issues (2-4, max. 4)** Presents introduction to ethical issues in public health policy and practice. Additional one credit option focuses on health administration/managed care. Coursework designed to train students in basic skills of ethical analysis and increase competency in recognizing, researching, and analyzing issues arising in public health and health services delivery.

**HSERV 520 Methods in Applied Community Research ([0-4]-, max. 4)** Skills/knowledge necessary to conduct orderly investigation of specific problems in preparation for MPH thesis or project. Includes problem identification, posing research questions, literature review, consideration of theoretical/practical context, choosing study design, data collection, protection of human subjects, and recognizing potential errors. Credit/no credit only. Prerequisite: registration in Extended MPH Degree program.

**HSERV 521 Qualitative Methods in Health Services Research (3)** Provides theoretical training in qualitative research and in depth training in qualitative data management, analysis, interpretation, and presentation. Focuses on how to frame qualitative research questions, design appropriate research strategies, and integrate qualitative and quantitative methods in research designs in public health. Offered: jointly with G H 538.

**HSERV 522 Health Program Evaluation ([1-5]-, max. 5)** Politics, theory, methods of evaluation, from simple health programs to evaluation of large-scale interventions. Emphasizes experimental and quasi-experimental designs to estimate program impacts, as well as evaluation of program implementation. Case studies drawn from health field illustrate various types of evaluations. Prerequisite: background in introductory statistics.

**HSERV 523 Advanced Health Services Research Methods I (4)** Examines how to apply research methods and addresses recurring issues in health services research. Covers statistical theory that motivates the methods and empirical work that demonstrates a method's use. Enrollment priority for Health Services PhD students. Prerequisite: either HSERV 511, BIOST 511/512/513, BIOST 517/518, or EPI 511/512, and permission of instructor.

**HSERV 524 Advanced Health Services Research Methods II (4)** Emphasizes the application of advanced biostatistical/econometric techniques in applied research. Examines a wide variety of posed research questions and demonstrates how to best obtain answers. Enrollment priority for Health Services PhD students. Prerequisite: either HSERV 511, BIOST 511/512/513, BIOST 517/518, or EPI 511/512, and permission of instructor.

**HSERV 525 Advanced Health Services Research Methods III (4)** Introduction to methods of handling data and conduct-

ing basic analyses in the broad and heterogeneous field of health services research. Examine concepts and conduct hands-on research using data sets selected by students. Enrollment priority for Health Services PhD students. Prerequisite: either HSERV 511, BIOST 511/512/513, BIOST 517/518, or EPI 511/512, and permission of instructor.

**HSERV 526 Qualitative Research Methods for Public Health (4)** Covers a range of qualitative, ethnographic tools for practical applications in public health. Methods covered include direct observation, informant interviews, focus groups, and formal methods. Covers Rapid Assessment Procedures and Participatory Action Research. Student teams investigate research questions using these techniques. Offered: jointly with G H 537.

**HSERV 527 Survey Research Methods (4)** Provides students with skills in questionnaire development and survey methods. Develop a questionnaire and design a survey research proposal on a health-related or social topic. Prerequisite: either HSERV 511-513; BIOST 517-518; or EPI 512-513, which may be taken concurrently or permission of instructor is required, and students should have a survey project in mind. Offered: jointly with CS&SS 527.

**HSERV 528 Critically Appraising and Applying Evidence in Health Care (3)** Literature appraisal skills for various articles (therapy effectiveness, diagnostic tests, literature reviews, clinical measurement, prognosis, quality of care, decision analysis, causation/etiology, guidelines, and economic evaluation). Appraisal of clinical information from literature, strengths/weaknesses of data, analyses, study design/applicability to a current patient's problem. Prerequisite: permission of instructor. Offered: jointly with MEBI 540.

**HSERV 529 Introduction to Systematic Reviews and Meta-analysis of Evidence (3)** Conceptual understanding of the quantitative methods used to synthesize evidence. Methods for pooling evidence across independent studies, pooling binary/continuous outcomes, differences between fixed and random effects models, and guidelines for appraising published systematic reviews/meta-analyses. Prerequisite: introductory-level courses in statistics, epidemiology, or biostatistics. Offered: jointly with MEBI 541/EPI 541.

**HSERV 530 Health Needs Assessment (3)** *Bell, Huebner* Covers key methods and principles for needs assessment and is recommended for students who will monitor and measure the health of populations, plan health services, or make decisions about health resource distribution. Offered: Sp.

**HSERV 532 International Health-Introduction and Topics (4-, max. 8)** Encourages students to demonstrate their facility with concepts and readings by creating short essays on selected topics. Overview emphasizing assessment, assurance, policy development, and the future of global health.

**HSERV 536 Emerging Infections of International Public Health Importance (3-, max. 3)** Focuses on the nexus between emerging infections and increasing globalization of the world due to the mobility of people and goods. Examines emergent events through risk factors and associated macro changes implicated in their genesis. Reviews microbial evolutionary strategies and factors of emergence. Offered: jointly with EPI 529.

**HSERV 537 Economic Development and Health (1, max. 3)** Discusses issues of broad interest in the areas of economics, development, and health. Credit/no credit only.

**HSERV 541 Topics in Maternal and Child Health I (3-, max. 3)** Historic, legislative, organizational, and financial basis of health and social services for families and children in United States. Effects of changing family structure and norms; factors affecting health care needs of specific populations, including racially and ethnically diverse groups; impact of policies/programs on health and well-being of families and children.

**HSERV 542 Epidemiology of Maternal and Child Health Problems ([3-4]-, max. 4)** Contributions to understanding and prevention of major maternal and child health problems, including pregnancy outcome, infant and child morbidity and mortality, maternal morbidity and mortality, abnormal

child growth and development, and early-life factors in adult health problems. Prerequisite: graduate, medical, or dental school standing and 511 or 512 or permission of instructor. Offered: jointly with EPI 521.

**HSERV 543 Topics in Maternal and Child Health III (3)** Provides an overview of contextually based frameworks for understanding growth and development. Identifies and describes the conceptual basis and theory of change that underlie successful preventive intervention efforts to promote the well being of children and reduce common MCH problems.

**HSERV 544 Maternal and Child Health in Developing Countries (3)** Mercer Emphasizes critical health problems of women and children in developing countries in social, economic, and cultural contexts. Practical approaches to developing MCH programs shared via lecture/discussions, exercises, and small group work. Students acquire skills in baseline assessment, setting objectives, planning and evaluating interventions, and involving communities.

**HSERV 548 Social Determinants of Health Research Methods (3)** Explores study design, measurement and analytic issues applicable to research into the social determinants of health. Semi-weekly graduate-level seminar offered to students with a basic knowledge of epidemiologica and biostatistical principles. Prerequisite: either EPI 511 or EPI 512/EPI 513; BIOST 511/BIOST 512 or BIOST 517/BIOST 518. Offered: jointly with EPI 548.

**HSERV 551 Health Law (2)** Analysis of law, the legal system and current legal problems as they relate to the financing and delivery of health care services. Offered: jointly with LAW H 512.

**HSERV 552 Health Policy Development (3-, max. 3)** Focuses on development of public policy concerning medical care and public health and the relationship between public decisions and the market place. Using contemporary policy issues as case studies, examines the role science, ideology, culture, and history play in influencing the structure of and changes to a nation's health system.

**HSERV 553 Politics of Health Care (3)** Understanding of health policy making within the context of American politics. Health policy making is examined in light of political leadership, the legislature, the initiative process, rule making, interest groups, and lobbying. Prerequisite: HSERV 551, a basic understanding of the American health care system, or permission of instructor.

**HSERV 554 Health Legislation Seminar (1)** Discussion of current state of health policy, topics with legislative staff and others involved with state health policy. In addition to four sessions on campus, course meets once in Olympia during legislative session. Credit/no credit only.

**HSERV 555 Public Policy Workshop ([0-3]-, max. 3)** Watts Demonstrates how to apply a set of policy tools, ideas, and framework to policy problems from work setting or elsewhere. Uses a policy white paper to create and analyze solutions to policy problems. Offered: Sp.

**HSERV 558 Tobacco and Public Health: Impact, Prevention, Treatment, and Policy (2-3)** Halperin Integrates multiple disciplinary perspectives to provide a comprehensive overview of the history, health effects, policy, prevention, and treatment of tobacco use. Utilized readings, stimulates discussions, and hosts renowned experts to provide students with the foundation to understand and address the local, national, and global epidemic of tobacco use. Offered: Sp.

**HSERV 559 Public Policy and the Public's Health ([0-3]-, max. 3)** Watts Explores the factors that affect health policy and the interaction of policy, markets, and the legal system through public health examples. Examines how science and community values intertwine in policy development, and how context influences the structure of and changes to a nation's health system. Offered: A.

**HSERV 560 Adult Learning: Theory and Practice (3)** Designed to help students apply Popular Education theory and practice to preparation, presentation, and evaluation of health education. Students design, teach, and evaluate four separate teaching sessions (one between each seminar)

using theory and principles of Popular Education learned to date. Prerequisite: graduate standing or permission of instructor.

**HSERV 561 Introduction to Health Promotion and Planning ([0-3]-, max. 3)** Overview of behavior change theory and comprehensive approach to planning, implementing, and evaluating health promotion interventions. Links theory to practice. Uses PRECEDE/PROCEED planning model by Green and Kreuter as framework.

**HSERV 571 Cultural Competency for Public Health Practice ([1-4]-, max. 4)** Application of cultural competency to clinical practice, health care management, and health services research when working with culturally diverse populations. Methodological orientation is qualitative, historical, and ethnographic. Lecture, narratives, discussions, guest presentations, film, video. Interdisciplinary perspective appropriate for graduate students in public health, health administration, nursing, social work, and anthropology. Offered: Sp.

**HSERV 572 Community Development for Health (2-) Hagopian, House** Develops knowledge and builds skills in community development theory and techniques while carrying out a group community organizing project with an interdisciplinary team of faculty. Offered: W.

**HSERV 573 Community Development for Health (-2) Hagopian, House** Develops knowledge and builds skills in community development theory and techniques while carrying out a group community organizing project with an interdisciplinary team of faculty. Prerequisite: HSERV 572. Offered: Sp.

**HSERV 575 Cancer Prevention and Control (3)** Provides an overview of research in cancer prevention and control for students training for a career in this field. Students identify major areas of prevention and control research, conduct an analysis of data in cancer prevention and control, and learn to prepare a research project grant. Prerequisite: permission of instructor.

**HSERV 576 Health, Culture, and Community (3)** Chrisman A multidisciplinary approach to the development of leadership in personal and organizational cultural competence in community-based participatory research. Emphasizes understanding collaborative assessment, planning, and evaluation of health promotion and disease prevention programs to address the social determinants of health at the population level. Offered: jointly with NURS 557; W.

**HSERV 577 Health Behavior and Preventative Medicine ([2/4]-, max. 4)** Focuses on psychosocial and cultural factors related to health, preventive health behavior, illness perception, and behavior; theoretical basis for prevention; the interaction of consumers and providers in the delivery of health care services; and clinic and community based applications.

**HSERV 580 Society, Chronic Illness, and Disability (3)** Definition and assessment of chronic illness, disability, and health status. Analysis of chronic illness and disability using frameworks from social sciences and public health. Dimensions of disablement as they affect provision of health services. Research on effectiveness of services and approaches to improvement. Prerequisite: HSERV 511 or permission of instructor.

**HSERV 581 Strategies of Health Promotion (4)** Assessment of health promotion planning, implementation, and evaluation strategies for their strengths, weaknesses, and effectiveness. Students critique strategies to modify behavioral factors that influence lifestyles of individuals, including decisions influencing their reciprocal relationship with environmental factors affecting the health of individuals, organizations, and communities. Prerequisite: HSERV 511.

**HSERV 582 Theoretical Perspectives on Health Behavior Change ([3-4, max. 4]-) Meischke** Overview of theoretical perspectives in health behavior at the individual, interpersonal, and community level. Focuses on increasing skills in describing, applying, and integrating these frameworks in the design and evaluation of health promotion interventions. Prerequisite: HSERV 511 or permission of instructor.

**HSERV 583 Economic Evaluation in Health and Medicine (3)** Methods and techniques for evaluating costs and

cost-effectiveness of health, medical, and pharmaceutical interventions. Emphasis on economic evaluation, decision analysis, and modeling techniques for resource allocation and decision making. Applications to technology assessment, health policy, clinical practice, and resource allocation. Prerequisite: permission of instructor. Offered: jointly with PHARM 534.

**HSERV 584 Assessing Outcomes in Health and Medicine (3)** Concepts and methods for developing and using patient-reported outcomes in health and medicine. Emphasis on patient self-reported health status and quality of life. Qualitative research and psychometric methods applied to health outcomes assessment and all applications. Prerequisite: permission of instructor. Offered: jointly with PHARM 535.

**HSERV 585 Seminar in Medical Geography (5, max. 10)** Intensive research seminar dealing with new and promising research themes in medical geography and public health. Offered: jointly with GEOG 581.

**HSERV 586 Medical Geography (3)** Geography of disease, consideration to health systems planning. Distributions, diffusion models, migration studies. Application of distance, optimal location models to health systems planning; emergency medical services, distribution of health professionals; cultural variations in health behavior. Prerequisite: familiarity with social science research, health-related issues. Offered: jointly with GEOG 580.

**HSERV 587 Health Policy Economics (3)** Applies economic theory to selected topics in health care, including information, risk and insurance, industry organization, government regulation, and public health issues. Emphasizes policy implications of these applications.

**HSERV 588 Community Approaches to Health Promotion (3)** Provides opportunities to critically examine community-based health promotion interventions and the design, evaluation, and implementation issues they raise. A wide range of disciplinary perspectives is presented. Case studies and class projects are designed to give students the skills needed to critically assess community projects around health promotion.

**HSERV 590 Selected Topics in Health Services (\*-) By individual arrangement, the student and faculty member(s) develop a program of reading and conference appropriate to the topic selected by the student. The topic chosen will be within the special competence of the faculty participating in the course, in the areas of health-care delivery and health-care administration. Also special summer format presenting introductory material may be taken with ENV H 590 and/or EPI 590. For more information and permission, consult department program adviser.**

**HSERV 591 Community Oriented Public Health Practice (1-6, max. 42)** Seven-quarter integrated sequence covers public health aspects of community assessment, biostatistics, epidemiology, health promotion/disease prevention, behavior change, environmental health, community development, policy development and analysis, and program planning and management. It is taught in a problem-based format. Prerequisite: enrollment in the COPHP program.

**HSERV 592 Program Seminars (1-6, max. 20)** Graduate seminars organized to address specific educational needs of students in various fellowships, residencies, and other specialized programs within the Department of Health Sciences (i.e., maternal and child health, international health, preventive medicine, social and behavioral sciences). Prerequisite: permission of instructor.

**HSERV 595 Practicum/Field Work in Community Medicine (1-12-, max. 12)** Experience in variable time blocks in community health activities in agencies delivering and planning health services. Sites include neighborhood clinics, health planning bodies, medical practice settings, public health agencies, special problem clinics and facilities, environmental programs and services. Prerequisite: master's student in health services and permission of instructor.

**HSERV 598 Extended Degree Program Project Option (\*, max. 9)** Supervised project work on a selected topic related to student's concentration in graduate study. Includes

survey of literature, development of approach, and written paper on conclusions. Prerequisite: registration in extended MPH degree program and satisfactory completion of the first summer's course work.

**HSERV 599 Community Oriented Public Health Practice Capstone Masters Project ([1-9], max. 9)** Applies and extends the public health skills learned to other settings, develops new skills, expands a professional network, and provides specialized knowledge that can be used to advance the student's future career and effectiveness in public health.

**HSERV 600 Independent Study or Research (\*)** Prerequisite: permission of instructor.

**HSERV 700 Master's Thesis (\*)** Prerequisite: permission of instructor.

**HSERV 800 Doctoral Dissertation (\*)**

## Health Services Management

**HSMGMT 500 Risk and Insurance Seminar (3)** Presents the principles and practices of health insurance and risk. Emphasizes health care financing arrangements in the United States, including both private and government-sponsored (public) programs. Discusses comparisons with other developed countries. HSERV 511 is strongly recommended, but not required as a prerequisite.

**HSMGMT 501 Epidemiology/Critical Evidence Appraisal (3-4)** Basic knowledge about methods used in epidemiology and their application to critical appraisal of clinical, epidemiological, and health administration literature for evidence-based management of healthcare organizations, improvement of delivery of health services, and for creating health policies.

**HSMGMT 502 Evidence-Based Health Care Planning (3-4)** Applies the techniques of statistics, epidemiology, and critical evidence appraisal to the design and evaluation of population-based health care programs. It is the third course in a three-course sequence.

**HSMGMT 505 Managing Health Care Organizations (2-4)** Introduces healthcare organizations and organizational management concepts. Develops a broad perspective by integrating conceptual, strategic, and systemic frameworks using four knowledge themes; the management role, organizational theory, management economics, and theory and practice of systemic organizational change within overall strategic management and systemic contexts.

**HSMGMT 506 Introduction to Clinical Care (2)** Introduces the world of clinical care. Discovers through readings, discussion, and direct experience, the people and processes of clinical care and how they relate to health care administration.

**HSMGMT 507 Group Dynamics and Team Leadership (2-, max. 4)** Focuses on theories and observations of team behaviors and techniques with emphasis on the individual as a team member; introduces team management/leadership models, theories, and skills. Students develop self-awareness, knowledge, and skills associated with building interpersonal relationships. Credit/no credit only.

**HSMGMT 509 Negotiation Skills (1)** Explores the literature and assesses values, knowledge, and skills associated with teamwork and the development of collaborative negotiation skills. Blends cognitive theory, behavioral learning, and project team experience into holistic learning experiences. Credit/no credit only.

**HSMGMT 510 Organizational Behavior and Human Resource Management (4)** Application of organizational behavior theory to explore the factors that affect behavior, performance, and job satisfaction of people working in organizations. Provides a body of knowledge and skills needed to successfully manage and lead health care organizations. Focuses on "best practices" for managing individuals, teams, and organizations.

**HSMGMT 512 Introduction to Management in Health Services (3)** Overview of managerial roles, such as supervising and motivating, approaches to organizational and environmental assessment and change, and development

of systems analysis skills. For students pursuing careers in research and teaching who are likely to have management responsibilities.

**HSMGMT 513 Seminar in Healthcare Finance(4)** Focuses on case studies and modern theory in managerial finance relevant to health services. Students prepare group presentations and individual case study analyses of health services finance problems. Builds on accounting and finance principles ACCTG 503 and HSMGMT 571, or the equivalent, are recommended prerequisites, but not required.

**HSMGMT 514 Health Economics (3/4)** Uses economic concepts and tools to examine range of issues pertaining to health care, delivery of health care services. Includes demand analysis, production of health services, expenditure growth, markets for hospital and physician services, externalities. Emphasis on using economics to examine issues and solve problems. Prior economics courses not required.

**HSMGMT 515 Advanced Economics—Decision Analysis (1-3, max. 3)** Develops skills to become informed consumers of economic evaluations of health programs. Develops skills necessary to conduct economic analyses of public health and health service programs.

**HSMGMT 518 Ethical Issues in Health Services (2)** Presents an introduction to ethical issues that arise in management of health services organizations. Covers clinical and organizational ethics.

**HSMGMT 523 Informatics in Health Care Management (3)** Medical informatics concerns the representation, organization, and manipulation of biomedical information and knowledge. Exposes students to a high-level understanding of informatics and its health care applications. Discussion of successes and failures in implementing information technology focuses on gaining leadership and management knowledge that embraces informatics.

**HSMGMT 543 Social and Behavioral Strategies for Improving Health (3)** Explores social dimensions of health and medical care. Learn to identify key social and cultural principles that guide appropriateness in health care. Introduced to tools used to influence social expectations and personal behavior in relation to illness, health, and demand for medical treatments.

**HSMGMT 544 Capstone Project Planning (1)** Organizes teams to consult with a local healthcare organization on a specific management project. Reviews critical elements of the project planning and management process and oversee the development of a project plan. Credit/no credit only.

**HSMGMT 545 Capstone Integrative Seminar (2-4)** Designed to assist students in the transition from theory to practice. Emphasis on sharpening analytical and intuitive leadership practices through the use of interactive case studies and team building exercises and field projects. Prerequisite: second-year MHA students.

**HSMGMT 546 Long-Term Care (3)** Learning experience for graduate students in health services administration, planning, other graduate students to increase their ability to identify and solve problems related to long-term care they confront in their employment. Students are exposed to available knowledge in the field; effective problem-solving attitudes and techniques for organizing information and/or developing strategies, and agencies in the field. Prerequisite: HSERV 511 or permission of instructor.

**HSMGMT 550 Medical Practice Quality Measurement and Management (3)** Provides an overview of healthcare industry themes regarding cost, access, and quality. Concentrates on definition, measurement, and improvement of quality. Shows how quality measurements and specifications; the concept of value, guidelines and pathway; and the evidence-based medicine movement interconnect. Utilized examples of cutting edge programs to apply and promote improvement.

**HSMGMT 552 Health Administration and Business Law (4)** Studies numerous interrelated legal topics pertinent to health care organizations, typically including contracts, medical malpractice, legal and ethical obligations to provide healthcare, privileging, medical decision-making, tax-exemp-

tion, antitrust, fraud, and health information management. Encourages discussion of how the law supports or hinders current efforts to improve healthcare delivery systems.

**HSMGMT 553 Marketing Health Services and Health Services Organizations (2)** Provides an understanding of wholesale and retail markets in the health care sector. Examines market research and the application of marketing strategies and tactics to support an organization's core strategies. Applies the concepts of market segmentation, targeting, and positioning to decisions about design, distribution, pricing, and promotion of health services.

**HSMGMT 554 Entrepreneurship (2)** Focuses on developing students' resourcefulness, know how, and decision support skills needed to critically identify, evaluate, and develop new healthcare ventures. Topics include anatomy of startup ventures; new venture creation and innovation, business plan development and assessment, financing, marketing and growth strategies; and corporate venturing.

**HSMGMT 560 Management Practice in Health Care and Public Health Organizations (1-4, max. 4)** Introduction to leadership and management, focusing on effective strategies for creating a productive work environment. Organizational structure and strategy introduced. Case studies and other problem-solving methods, using health services applications are utilized in order to apply theoretical material. Prerequisite: graduate student.

**HSMGMT 562 Strategic Management of Health Care Organizations (3-4, max. 4)** Management of goals, strategy, and structure in health care organizations. Design of external relationships and internal structures, strategy-formulation, decision-making, and change. Integration of professional, social, and organizational values. Theory, student and practitioner experience, and case studies used to enhance repertoire of management approaches and skills. Prerequisite: HSERV 511 and HSMGMT 560 or equivalent.

**HSMGMT 563 Personnel Management for Health Professionals ([1-3], max. 3)** Designed for midcareer health services professionals developing strategies and skills in human resource management. Focuses on policy and practice issues important to handling day-to-day personnel problems-selection, promotion, performance appraisal, discipline, grievances. Prerequisite: registration in Extended MPH Degree program or permission of instructor; non-business majors.

**HSMGMT 565 Quantitative Decision Making for Health Services Management (3)** Applications of various quantitative techniques for problem solving, monitoring, controlling, decision making in health services. Identifying problem area, communications with consultant, evaluation to the quality and applicability of analyst's work. Statistical, mathematical, operations research, industrial engineering techniques. Prerequisite: QMETH 500 or BIOST 509 or permission of instructor.

**HSMGMT 566 Decision Support Models for Health Services (3)** Management science and approaches developed as applied to problems in public health. Emphasizes conceptual understanding of processes/application of systematic, and rational approach to managerial problem solving, including cost-benefit, cost effectiveness analysis. Prerequisite: BIOST 502 and 503, or BIOST 511; registration in Extended MPH Degree program; non-business majors.

**HSMGMT 567 Clinical Systems Management (3)** Introduces the management of clinical systems and their underlying cultures. Focuses on quality improvement, change management, governance and clinical leadership development of physician-administrator partnerships in complex medical care settings.

**HSMGMT 568 Quality Process Management (3-4)** Provides a thorough understanding of the main concepts of operations management with a focus on total quality management techniques, along with key integrative frameworks that provide the foundation for successful applications of these approaches, as applied to health care organizations.

**HSMGMT 570 Quantitative Methods (3-4)** Concentrates on fundamental concepts of statistics and their application to

health care management. Approaches statistics from two different perspectives that benefit leaders in health care: that of biostatistics and evidence based medicine, and that of management statistics for process improvement.

**HSMGMT 571 Health Care Financial Management (4)** Third course in a three-course sequence dealing with the management of health services institutions and programs. Topics covered are: health services law, hospital and program policy decisions, financial planning, and hospital design and architecture; and the presentation of hospital survey and health services research project reports. Prerequisite: HSERV 511 and ACCTG 500 or ACCTG 501 or permission of instructor.

**HSMGMT 572 Financial Management for Health Professionals (3)** Intensive review of basic accounting principles/terminology and an introduction to financial management/managerial accounting, including budgeting for managerial control, planning, cost accounting, financing health programs. Managerial accounting, program costing, rate setting, budget preparation. Prerequisite: BIOST 502 and BIOST 503, or BIOST 511; registration in Extended MPH Degree program or permission of instructor; non-business majors.

**HSMGMT 573 Seminar in Health-Care Finance (3)** Practical applications of corporate finance principles. Applies theoretical framework to health-care financial problems, including capital investment analysis, leasing vs. borrow-to-buy, debt capacity analysis, bond refunding, control of capital, joint venture. Prerequisite: either HSMGMT 514, HSMGMT 587; ECON 400, or ECON 500; ACCTG 503 (or equivalent); HSMGMT 571; or permission of instructor.

**HSMGMT 574 Financial Management I (3-4)** Prepares clinical professionals for participating intelligently in, and contributing to, financial decisions of health care organizations. Learn the language and fundamental concepts of accounting and finance, and become comfortable with what is required in formal financial analysis.

**HSMGMT 575 Financial Management II (4)** Second in a two part series, the emphasis of this financial management course is on preparing medical executives for managerial and leadership roles in health care organizations. Focus is on tools and analytic frameworks that health care managers use to make forward-looking decisions, including capital budgeting and risk analysis.

**HSMGMT 576 Capital Planning (2)** Third in a sequence of health services financial management courses. Emphasizes preparing clinical executives for managerial and leadership roles in healthcare organizations. Key concepts include capital cycle, creditworthiness, financial planning, cost of capital, capital structure, and capital allocation.

**HSMGMT 577 Environment of Care (2)** Addresses the basic issues of the "environment of care." Explores the physical environments in which care is provided to patients, JCAHO standards provide the core structure. Uses real world experiences and examples.

**HSMGMT 578 Project Management (2)** *faculty* Introduces need for, concepts of, and tools and techniques used in contemporary project management. Builds upon prior courses and experience in leadership, management, planning, and team development. Focuses on difference between management of ongoing operations and of projects, and the need for a disciplined approach when planning and executing projects.

**HSMGMT 590 Select Topics (1-6, max. 12)** By arrangement, students and faculty members develop a program of reading and conference appropriate to the selected topic. The topic chosen is within the special competence of the faculty member participating in the course in the area of health services management.

**HSMGMT 592 Health Management Program Seminar (1-6, max. 6)**

## Pathobiology

### GRADUATE PROGRAM

Graduate Program Coordinator

F161F Health Sciences, Box 357230

206-543-4338

[pathobio@uw.edu](mailto:pathobio@uw.edu)

The Pathobiology graduate program offers graduate training in the application of basic biomedical research to diseases of public health interest. The program of study involves core courses to develop a fundamental understanding of basic cellular and molecular processes and techniques important in the application of basic biomedical research to diseases; laboratory experience to learn how to collect, analyze, interpret, and use data for solving problems; and opportunities to develop skills in communicating research findings through oral and written presentations.

### Master of Science

The master's program is designed for students to develop an understanding of the applications of molecular biology to public health, epidemiology, and cellular or antigenic analysis, and microbiology or immunology. The focus in this two-year program is developing basic research skills and understanding the scientific method. Students are expected to fulfill their course requirements during the first year. Under the guidance of a faculty research mentor, students propose and complete a thesis that includes an original research project.

#### Admission Requirements

- *Personal Statement:* The personal statement is a series of six short-answer questions. This statement plays an important role in admissions by providing the reviewers with a representation of the student's background and readiness for graduate studies in pathobiology.
- One official set of transcripts from all collegiate institutions attended.
- Three letters of recommendation.
- Curriculum vitae
- Official Graduate Record Examination (GRE) scores
- International applicants are in addition required to submit official Test of English as a Foreign Language (TOEFL) Scores. The Pathobiology program does not admit international applicants who have a TOEFL score of less than 600 on the paper-based test or 250 on the computerized test. The department must receive an official score report from the Educational Testing Service. TOEFL scores cannot be more than two years old.

#### Degree Requirements

A minimum of 60 credits as follows:

- 21.5 credits of required courses: PABIO 550 (3), PABIO 551 (4), PABIO 552 (4), PABIO 553 (2), EPI 511 (4), PABIO 580 (1), PABIO 581 (1), PABIO 582 (1.5), PABIO 590 (1)
- *Research Credits:* Sufficient credits of PABIO 600 and PABIO 700 to complete a research project.
- *Electives:* Additional courses in pathobiology or the biomedical sciences may be taken to fulfill the graded course requirement, to encompass the interests of the student, or to fulfill any additional requirements set forth by the student's committee.

*M.S. Thesis Research Proposal:* The M.S. thesis research proposal should be done by the end of the fourth quarter of the first year. The proposal should contain the following, in this order:

- A brief synopsis of background relevant to the project.
- A summary of preliminary experiments.
- A description of experiments planned for the next year.

*M.S. Thesis:* The thesis must be provided to the M.S. advisory committee two weeks prior to the oral presentation. Corrections should be made following their review before submission of the document to the Graduate School.

*M.S. Oral Presentation and Defense:* All students are required to give a formal seminar prior to the completion of the master's program.

### Doctor of Philosophy

The doctoral program lasts four to five years and is designed for students to become capable of conducting independent research leading to the expansion of knowledge by developing skills to approach unfamiliar experimental systems and identify and explore important questions concerning pathogenesis and infection. Students develop familiarity with the paradigms for control, prevention, and treatment; develop an understanding of epidemiology and disease processes; learn basic methodologies used in this research including relevant areas of molecular biology, bacteriology, cell biology, virology, epidemiology, and biostatistics; and develop familiarity with the major classes of pathogens.

#### Admission Requirements

- *Personal Statement:* The personal statement is a series of six short-answer questions. This statement plays an important role in admissions by providing the reviewers with a representation of the student's background and readiness for graduate studies in pathobiology.
- One official set of transcripts from all collegiate institutions attended.
- Three letters of recommendation.
- Curriculum vitae
- Official Graduate Record Examination (GRE) scores
- International applicants are in addition required to submit official Test of English as a Foreign Language (TOEFL) scores. The Pathobiology program does not admit international applicants who have a TOEFL score of less than 600 on the paper-based test or 250 on the computerized test. The department must receive an official score report from the Educational Testing Service. TOEFL scores cannot be more than two years old.

#### Degree Requirements

90 credits minimum, as follows:

- *Required Courses:* PABIO 550 (3), PABIO 551 (4), PABIO 552 (4), PABIO 553 (2), EPI 511 (4), PABIO 580 (1), PABIO 581 (1), PABIO 582 (1.5), PABIO 590 (1), PABIO 598 (2), PABIO 500 (variable), PABIO 600 (variable), PABIO 800 (27); either IMMUN 441 (4) or IMMUN 532 (3).
- Students are required to attend Seminar (PABIO 580) and Journal Club (PABIO 581) every quarter of the academic year while enrolled. Students may be excused for up to two quarters while writing the dissertation. Students give research presentations in the Graduate Research Symposium annually after the first year. 3 credits each of Seminar and Journal Club may be counted towards the degree.
- *Electives:* The following are recommended tracks for elective credits:
  - *Eukaryotic Pathogens:* PABIO 536, PABIO 548, CONJ 531 through CONJ 544, EPI 532, MICROM 444
  - *Bacterial Pathogens:* PABIO 540, PABIO 568, EPI 520, EPI 529, MICROM 552, MICROM 555. (Students without a background in bacteriology are required to take MICROM 442 or an equivalent course as a prerequisite for entry into the Bacterial Pathogens track.)

- *Viral Pathogens*: Two or more of the following are strongly recommended: CONJ 531-CONJ 544, EPI 520, EPI 524, EPI 530, IMMUN 532, MICROM 540

## Research Facilities

Research facilities are geographically dispersed and located in the Health Science Center of the School of Medicine, Fred Hutchinson Cancer Research Center, and Seattle Biomedical Research Institute. External support includes computer facilities and the Health Sciences Library with access to more than 345,000 volumes, 4,000 periodicals, and online bibliographic services for all national libraries of medicine and most commercial databases.

The Fred Hutchinson Cancer Research Center is a world-renowned research institution. Its mission for more than 20 years has been to eliminate cancer. Shared facilities are available, including electron microscopy, flow cytometry, tissue culture, image analysis, biotechnology center for DNA and protein synthesis and sequencing, animal facilities, biological production facility focused on monoclonal antibody production, extensive libraries, and a biocomputing center.

The Seattle Biomedical Research Institute is an independent nonprofit organization studying causes of and interventions to infectious diseases of worldwide impact, including targeted research producing leading-edge findings and applied research creating diagnostic tests and treatments.

## Financial Aid

The department offers a twelve-month competitive salary, as well as paying tuition and health insurance, which includes medical, dental, and vision benefits. Students with satisfactory academic progress can anticipate funding for the duration of their studies.

## COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at [www.uw.edu/students/crscat/](http://www.uw.edu/students/crscat/)

**UCONJ 420 Biological Safety Practices (1)** See University Conjoint courses.

**PABIO 498 Undergraduate Thesis (\*)**

**PABIO 499 Undergraduate Research (\*, max. 12)**

**PABIO 500 Introduction to Pathobiology Research (3-9, max. 15)** Rotation through research laboratory. Credit/no credit only. Offered: AWSpS.

**PABIO 511 Pathobiological Frontiers (2)** Molecular and immunological concepts of infectious and noninfectious diseases presented in format suitable for graduate students knowledgeable in health-related areas who are not in biology-oriented programs. Allergy, immune responses, nature of infectious agents, prevention of disease with emphasis on newly defined diseases and disease agents. Prerequisite: permission of instructor.

**PABIO 536 Bioinformatics and Gene Sequence Analysis (3)** Rose Nature and relevance of molecular sequence information, computer-based protein, and DNA sequence analysis, molecular sequence and genomic databases, and methods for database accession and interrogation. Prerequisite: background in molecular biology and permission of instructor. Offered: jointly with MEBI 536/PHG 536; Sp.

**PABIO 540 Antibiotic Resistance Mechanisms and Their Impact on Public Health (3)** Lectures covering resistance mechanisms against bacterial antibiotics, antiviral, antiparasitic, and cancer drugs. Topics also include the effects that resistant microorganisms have on therapy and cancer treatment and their impact on public health. Prerequisite: permission of instructor.

**PABIO 548 Molecular and Cellular Parasitology (3)** *Feagin* Molecular and cellular biology of parasites of health-related significance, emphasizing current research topics unique to parasites, particularly well-suited for study in parasites, and especially important to study in host-parasite systems. Prerequisite: familiarity with molecular and cellular biology and permission of instructor.

**PABIO 550 Diseases of Public Health Importance and Strategies for their Control (3)** Public Health perspective of major disease of national and global importance. Discussion of origins, establishment, progression, and pathogenesis of diseases. Importance of immunological, intercellular and external factors, and strategies of disease prevention. Requires a grounding in cellular and molecular biology, microbiology, and immunology. Prerequisite: permission of instructor. Offered: jointly with G H 565; Sp.

**PABIO 551 Biochemistry and Genetics of Pathogens and Their Hosts (4)** . Provides a strong foundation in biochemistry, molecular biology, and genetics for students interested in disease. Principles will be illustrated through examples focusing on pathogens, and infectious and non-infectious disease. Prerequisite: undergraduate level course work in molecular biology or biochemistry or permission of instructor. Offered: jointly with G H 566; A.

**PABIO 552 Cell Biology of Human Pathogens and Disease (4)** Cell biology and immunology explored through diseases of public health importance with examples of pathogen interaction with host cell biology and immune systems, unique aspects of the cell biology of pathogens, perturbations of these systems in non-infectious diseases and design of therapeutics and vaccines to combat diseases of public health importance. Prerequisite: undergraduate level coursework in biology or molecular biology or permission of instructor. Offered: W.

**PABIO 553 Survival Skills for Scientific Research (2)** Focuses on skills needed for scientific career: writing abstracts, curriculum vitae, research proposals; preparing for oral presentations; lab management skills; discussion of mentorship/trainee relationships; case-based discussions of various topics in ethics and scientific misconduct. Credit/no credit only. Offered: Sp.

**PABIO 568 Molecular Epidemiology of Infectious Diseases (2)** *Roberts* Application of molecular typing techniques to study of microbial pathogens to increase understanding of epidemiology of infectious diseases. Brief review of molecular biology. Evaluation of methods used in outbreaks and epidemics reported in literature. Prerequisite: PABIO 511 or PABIO 512 or permission of instructor. Offered: jointly with ENV H 568/EPI 568; W.

**PABIO 580 Pathobiology Seminar (1, max. 21)** Research from students, faculty members, and invited speakers is presented and discussed. Topics include immunochemistry, viruses, membranes, infectious diseases, immune response and other related topics. Offered: AWSp.

**PABIO 581 Current Literature in Pathobiology (1, max. 15)** Develops skills in analyzing data and assessing conclusions through an analysis of current literature in Pathobiology. Focuses on breadth and analytical skills. Prerequisite: enrollment in the pathobiology graduate program.

**PABIO 582 Critical Thinking and Research Design in Pathobiology (1.5)** *Lingappa* Analysis of issues, hypothesis and experimental design and testing. Credit/no credit only. Prerequisite: graduate standing in pathobiology. Offered: W.

**PABIO 590 Selected Topics (1-20, max. 20)** Individual offerings focusing on topics such as pathogenesis, immunology, virology, disease agents, bioinformatics and grant writing. Small lecture format. Credit/no credit only. Prerequisite: permission of instructor.

**PABIO 598 Didactic Pathobiology (\*, max. 12)** Supervised teaching experience in pathobiology courses for PhD candidates. Prerequisite: permission of instructor.

**PABIO 600 Independent Study or Research (\*)** Credit/no credit only. Prerequisite: permission of graduate program adviser.

**PABIO 700 Master's Thesis (\*)** Credit/no credit only. Prerequisite: permission of graduate program adviser.

**PABIO 800 Doctoral Dissertation (\*)** Credit/no credit only. Prerequisite: permission of graduate program adviser.

# Reserve Officers Training Corps Programs

## Aerospace Studies

### DEPARTMENT OVERVIEW

Condon Hall, Room 711A

The Air Force Reserve Officer Training Corps program (AF-ROTC) is designed to motivate, educate, and commission highly qualified students for active duty as officers in the U.S. Air Force. The curriculum provides the opportunity for students in any major to gain military knowledge and to become effective Air Force officers and leaders in the aerospace environment.

### UNDERGRADUATE PROGRAM

Adviser

1100 NE Campus Parkway, 711A Condon Hall, Box 353830  
206-543-2360

[afrotc@uw.edu](mailto:afrotc@uw.edu)

### General Program Requirements

All aerospace studies courses are open to all University students. Additionally, any student may join the AFROTC program as a cadet and enroll in the 100- and 200-level general military courses. AFROTC 100- and 200-level courses count as credit toward graduation beginning autumn, 2007. Entry into the professional officer courses (300- and 400-level courses) as a cadet seeking a commission in the Air Force is on a controlled, selective basis.

### Commissioning Requirements

Students who successfully complete the AFROTC program and receive an academic degree from the University are offered commissions as second lieutenants in the Air Force.

### General Military Courses

The 100- and 200-level courses for AFROTC cadets consist of one classroom hour, one-and-a-half hours of leadership laboratory, and two hours of physical fitness per week during the freshman and sophomore years. Uniforms and textbooks are provided. Students may enter the freshman class at the start of autumn, winter, or spring quarter. Sophomore students may enter at the start of autumn or winter quarter and take the freshman- and sophomore-level courses concurrently. A four-week field-training course, taken during the summer between the sophomore and junior years, is required for entry into the professional officer courses. Students receive pay and travel costs for field training.

Except for sophomore cadets on AFROTC scholarship, students incur no active-duty service commitment by taking general military courses and may drop the courses at any time within the limits of University course-drop policies. Non-ROTC students take the AS 100- and 200-level classes without any additional requirements for leadership laboratory or physical fitness.

### Professional Officer Courses

Cadets selected for enrollment in professional officer courses are enlisted in the Air Force Reserve and receive a tax-free monthly subsistence stipend. They are furnished texts and uniforms. Junior- and senior-level classes consist of three hours of academic classes, three hours of leader-

ship-laboratory and two hours of physical fitness per week. Non-ROTC students take AS classes without any additional requirements to attend leadership laboratory or physical fitness. Non-ROTC students earn academic credits for 300- and 400-level courses, but do not earn an Air Force commission.

### Financial Assistance

The Air Force offers one-, two-, and three-year scholarships to college students. AFROTC scholarships pay tuition, certain fees, and textbook reimbursement. In addition, scholarship winners receive a monthly subsistence allowance. To apply for one of these scholarships, students should contact the Unit Admissions Officer in the Department of Aerospace Studies (AFROTC), 206-543-2360 or at [afrotc@uw.edu](mailto:afrotc@uw.edu).

### Two-Year Program

To provide for those students wishing to join AFROTC but unable to take the general military courses, a two-year professional officer course is available on a competitive basis. This program is open to graduate students and full-time undergraduate students in select majors who will complete a bachelor's degree in two years.

Students in this program are required to attend a six-week field-training course at an Air Force base during the summer preceding program entry. The student is paid during the six-week period. Upon return to the campus, students enter the professional officer course. Uniform, texts, and a monthly subsistence are provided. Students interested in this program should contact the AFROTC department by February prior to the autumn quarter they desire to enter, at 206-543-2360 or at [afrotc@uw.edu](mailto:afrotc@uw.edu).

### Minor

#### Minor Requirements:

29 credits, to include the following:

- 24 credits of Air and Space Studies coursework
- 5 credits in a foreign language beyond the first-year level
- Minimum 18 upper-division credits in Air and Space Studies coursework
- Minimum 24 credits in residence at the UW
- Minimum 2.5 grade in each course presented for the minor.

## COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at [www.uw.edu/students/crscat/](http://www.uw.edu/students/crscat/)

**A S 101 Foundations of the United States Air Force I (1)** Focuses on the basic characteristics of air doctrine; US Air Force mission and organization; functions of United States strategic offensive and defensive, general-purpose, and aerospace support forces; officership/professionalism and an introduction to communicative skills. Additional one-hour leadership laboratory is mandatory for cadets, but not special students. Offered: A.

**A S 102 Foundations in the United States Air Force II (1)** Focuses on the basic characteristics of air doctrine; US Air Force mission and organization; functions of United States strategic offensive and defensive, general-purpose, and aerospace support forces; officership/professionalism and an introduction to communicative skills. Additional one-hour leadership laboratory is mandatory for cadets, but not special students. Offered: W.

**A S 103 Foundations in the United States Air Force III (1)** Focuses on the basic characteristics of air doctrine; US Air Force mission and organization; functions of United States strategic offensive and defensive, general-purpose, and aerospace support forces; officership/professionalism and

an introduction to communicative skills. Additional one-hour leadership laboratory is mandatory for cadets, but not special students. Offered: Sp.

**A S 211 The Evolution of Air and Space Power I (1)** Factors contributing to the development of air power from its beginnings to the present, and the evolution of air power concepts and doctrine. History of air power employment in military and nonmilitary operations in support of national objectives. Assessment of communicative skills. Additional one-hour leadership laboratory is mandatory for cadets, but not special students. Offered: A.

**A S 212 The Evolution of Air and Space Power II (1)** Factors contributing to the development of air power from its beginnings to the present, and the evolution of air power concepts and doctrine. History of air power employment in military and nonmilitary operations in support of national objectives. Assessment of communicative skills. Additional one-hour leadership laboratory is mandatory for cadets, but not special students. Offered: W.

**A S 213 The Evolution of Air and Space Power III (1)** Factors contributing to the development of air power from its beginnings to the present, and the evolution of air power concepts and doctrine. History of air power employment in military and nonmilitary operations in support of national objectives. Assessment of communicative skills. Additional one-hour leadership laboratory is mandatory for cadets, but not special students. Offered: Sp.

**A S 250 Aerospace Studies Leadership Laboratory (0)** Evaluates the challenges of team leadership in complex contemporary environments. Students apply critical thinking skills using scenarios that emulate real-life Air Force issues and environments. Evaluates Air Force leadership attributes, skills, and activities. Focuses on advanced leadership development. Credit/no credit only. Prerequisite: AFROTC cadets only. Offered: AWSp.

**A S 331 Aerospace Studies 300 (3)** Emphasis on basic leadership and management fundamentals, professional knowledge, and communicative skills required of an Air Force officer. Case studies used to examine leadership and management situations. An additional leadership laboratory (mandatory for cadets but not special students) provides leadership experiences, giving students the opportunity to apply learned principles. Offered: A.

**A S 332 Aerospace Studies 300 (3)** Emphasis on basic leadership and management fundamentals, professional knowledge, and communicative skills required of an Air Force officer. Case studies used to examine leadership and management situations. An additional leadership laboratory (mandatory for cadets but not special students) provides leadership experiences, giving students the opportunity to apply learned principles. Offered: W.

**A S 333 Aerospace Studies 300 (3)** Emphasis on basic leadership and management fundamentals, professional knowledge, and communicative skills required of an Air Force officer. Case studies used to examine leadership and management situations. An additional leadership laboratory (mandatory for cadets but not special students) provides leadership experiences, giving students the opportunity to apply learned principles. Offered: Sp.

**A S 431 Aerospace Studies 400 (3) I&S** Needs for national security, evolution of American defense strategy, policy, and organization; methods for managing conflict, alliances and regional security to preserve American interests. Arms control, terrorism, and current military issues; refinement of communicative skills. A one-hour leadership laboratory is also required for cadets, but not special students. Offered: A.

**A S 432 Aerospace Studies 400 (3) I&S** Needs for national security, evolution of American defense strategy, policy, and organization; methods for managing conflict, alliances and regional security to preserve American interests. Arms control, terrorism, and current military issues; refinement of communicative skills. A one-hour leadership laboratory is also required for cadets, but not special students. Offered: W.

**A S 433 Aerospace Studies 400 (3) I&S** Needs for national security, evolution of American defense strategy, policy, and organization; methods for managing conflict, alliances and regional security to preserve American interests. Arms control, terrorism, and current military issues; refinement of communicative skills. A one-hour leadership laboratory is also required for cadets, but not special students. Offered: Sp.

## Military Science

### DEPARTMENT OVERVIEW

104 Clark Hall

The ROTC program provides students an opportunity to learn and practice the art of leading people. Recognizing there is a great difference between cognition and volition, the program is structured to give the student practical experience in leading and managing resources.

The Army ROTC (AROTC) program enables the student to learn about the military profession and the role it plays in our democratic system of government. Courses enable such knowledge to be acquired on campus without serving in the military forces.

Army ROTC electives enrich the student's course of study. Such courses also open up an additional career option, enabling the student to earn a commission and to serve in the Army as an officer, or in the Reserves or National Guard while pursuing a civilian career. Officers serve in a wide variety of career paths, including infantry, human resources, aviation, intelligence, automation, and hospital administration.

Army ROTC provides the student membership in a close-knit fraternal organization.

ROTC programs on college campuses ensure that the influences of higher education are transferred into the military services - a mandatory requirement in a democracy.

A minor in military science and leadership is available to any student at the UW. Requirements are shown below.

For information on the programs described below, contact the following:

#### Enrollment and Scholarship Officer

105 Clark, Box 353820

206-543-9010

### Traditional Four-Year Program

Open to freshman and sophomore men and women. Academic studies include courses in military history, principles of leadership, techniques of instruction, management and staff procedures, logistics, physical conditioning, and military law. Extracurricular activities include such options as Ranger Company, color guard, training exercises, field trips, and related activities. A non-scholarship student incurs no obligation of any kind during the first two years of the four-year AROTC program.

Placement credit toward completion of AROTC courses may be given for prior ROTC or military training. Veterans routinely receive full credit for the first two years of AROTC and may enter the advanced course when they are academic juniors. All military textbooks and uniform items are furnished without charge. Students in the advanced course receive tax-free monthly subsistence of \$350 per month as an academic junior and \$400 per month as an academic senior. In the advanced course, cadets are required to participate in the leadership-development program, which is a practicum of skills and principles taught during the previous two years. Between their junior and senior years, cadets attend a five-week summer camp during which they receive varied and challenging training and for which they

are paid both for the time at camp and for travel expenses to and from the camp location. Upon entering the advanced course, students agree to complete the program, accept a commission upon graduation, and serve a minimum of four years if scholarship (three years if non-scholarship) and be on active-duty commitment. If the cadet chooses to go into the Reserves or National Guard, then he or she serves a minimum of eight years.

### Four-Year Scholarship Program

Application to this program should be made while the student is still in high school. Selection of students is made on a nationwide competitive basis. This program may lead to a commission in the Active Army, the Army Reserve, or the Army National Guard. All tuition, a flat rate for books and laboratory expenses, and uniform items, plus monthly tax-free stipends, are provided by the Army. The program requires four years of academic study on campus, as well as a five-week advanced camp training period between the junior and senior years, for which the cadet is paid for both time and travel expense to and from the camp location. Academic studies are identical to those of the traditional four-year program. The student must sign a contract wherein the student agrees to complete this program, along with a chosen academic program, to accept a commission, and to serve on active duty or in the reserve forces after commissioning.

### Three-Year Scholarship Program

Open to qualified students already on campus. The scholarship provides financial assistance during the remaining years of the student's enrollment. Each scholarship pays for tuition and a flat rate for books and laboratory expenses and provides tax-free monthly stipends of \$350 for academic juniors and \$400 for academic seniors. All other advantages and obligations are the same as those of the four-year scholarship program.

### Two-Year or Lateral Entry Program

Open to qualified undergraduate and graduate students who have at least two years remaining in school and who have completed at least 81 credits. Students may qualify for entrance into the advanced course under this program in two ways.

- They may participate as qualified veterans who receive placement credit for the first two years of AROTC. Veterans are also eligible to compete for two- and three-year scholarships while receiving their educational benefits. Members of the Reserves and National Guard may also be eligible to participate in AROTC and receive their commission upon graduation.
- Requires attendance at the Leader's Trainers Course for five weeks at Fort Knox, Kentucky. Completion of this training also qualifies students for direct entry into the advanced course. While at camp, students receive pay plus travel expenses to and from the camp location, and they may compete for two-year scholarships, provided scholarships are available.

## UNDERGRADUATE PROGRAM

#### Enrollment and Scholarship Officer

105 Clark, Box 353820

206-543-9010

The Army ROTC program offers a minor in military science and leadership.

### Minor

#### Minor requirements:

27 credits, to include the following:

- M SCI 401, M SCI 402, M SCI 403 (9 credits)

- Additional military science coursework (18 credits)
- Minimum 18 credits of military science completed at the upper-division level.
- Minimum 18 credits of military science completed in residence at the UW.
- Minimum 2.5 grade in each course presented for the minor.

## COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at [www.uw.edu/students/crscat/](http://www.uw.edu/students/crscat/)

**M SCI 101 Military Science and Leadership Development (3)** Introduction to challenges and competencies critical for effective leadership. Examines how critical thinking, goal setting, time management, and stress relate to leadership. Develops knowledge and comprehension of leadership dimensions. Lessons include history and mission of the Army and leadership, personal development, values and ethics, and tactics and techniques discussions. Offered: A.

**M SCI 102 Military Science and Introduction to Tactical Leadership (3)** Overview leadership fundamentals of problem solving, listening skills, briefings, providing feedback, and effective writing. Explores dimensions of leadership values, attributes, skills, and actions in the context of practical, hands-on, and interactive exercises. Introduction of effective oral communication. Develops skills in map reading, land navigation, and tactical maneuvering at team levels. Offered: W.

**M SCI 103 Military Science and Introduction to Applied Basic Leadership (3)** Final introductory series on leadership. Applies leadership fundamentals emphasizing attributes, skills, and actions. Students assess capabilities simultaneously considering their personal leadership. Lessons apply leadership to military tasks of map reading, navigation, and tactics. Offered: Sp.

**M SCI 110 Military Science Leadership Laboratory (.5, max. 3)** Evaluates the challenges of leading teams in complex contemporary environments. Students apply critical thinking skills using challenging scenarios related to small unit operations. Provides feedback on the 16 Army leadership attributes, skills, and actions. Focuses on leadership development. Credit/no credit only. Credits do not count towards graduation. Offered: AWSp.

**M SCI 201 Military Science and Innovative Team Leadership (3)** Explores dimensions of innovative tactical leadership strategies and styles. Practices personal motivation and team building through planning, preparing, and executing group exercises. Develops knowledge of leadership values and attributes through an understanding of Army leadership examples. Lessons include leadership, personal development, values and ethics, officership, and tactics and techniques. Offered: A.

**M SCI 202 Military Science and Foundations of Tactical Leadership (3)** Explores creative and innovative tactical leadership strategies and styles by examining team dynamics and leadership theories. Examines challenges of leading teams in complex contemporary environments. Practical exercises focus on dimensions of terrain analysis, patrolling, operation orders and cultural awareness. Lessons include fundamental of leadership, personal development, and tactics and techniques. Offered: W.

**M SCI 203 Military Science and Transformational Leadership (3)** Continues study of the theoretical basis of Army leadership and framework and dynamics of transformational leadership in the context of military operations. Develops greater self-awareness by assessing leadership styles and practices oral and written communication skills. Enables progress to applied and advanced tactical leadership study. Offered: Sp.

**M SCI 301 Military Science and Tactical Leadership (3)** Studies, practices, and evaluates adaptive leadership skills.

Develops self-awareness and critical thinking skills using challenging scenarios related to small unit operations. Analyzes and evaluates leadership values, attributes, skills, and actions. Lessons focuses on leadership, land navigation, oral and written presentations, tactics, and physical fitness. Prerequisite: M SCI 101; M SCI 102; M SCI 103; M SCI 201; M SCI 202; M SCI 203; may not be repeated if received a grade of 2.0 or higher. Offered: A.

**M SCI 302 Military Science and Applied Leadership (3)** Continues adaptive approach to leadership applying situations necessary to build skills required in complex scenarios. Develops proficiency in evaluating, decision-making, persuading, and motivating peers through practical exercises. Students evaluate individual leadership values, attributes, skills, and actions, and receive specific feedback on their leadership abilities based on written and oral presentations. Prerequisite: M SCI 101; M SCI 102; M SCI 103; M SCI 201; M SCI 202; M SCI 203; may not be repeated if received a grade of 2.0 or higher. Offered: W.

**M SCI 303 Military Science and Advanced Tactical Leadership (3)** Finalizes M SCI 301 and M SCI 302 leadership skills that are necessary to successfully lead others while solving complex problems. Explores, evaluates, and develops decision-making skills required in contemporary environments. Reviews critical aspects of combat, specifically stability and support operations. Provides specific leadership feedback and prepares for advanced leadership and management. Prerequisite: M SCI 101; M SCI 102; M SCI 103; M SCI 201; M SCI 202; M SCI 203; may not be repeated if received a grade of 2.0 or higher. Offered: AWSp.

**M SCI 305 Practicum-Techniques of Military Instructions (1-3, max. 3)** Analysis, review of techniques used in military training and instructions. Students plan, rehearse, deliver, provide written critique on block of military instruction from the Military Qualification Skills Manual. Prerequisite: M SCI 101; M SCI 102; M SCI 103; M SCI 201; M SCI 202; M SCI 203; may not be repeated if received a grade of 2.0 or higher.

**M SCI 310 Military Science Advanced Leadership Laboratory (1, max. 6)** Evaluates the challenges of leading teams in complex contemporary environments. Students apply critical thinking skills using challenging scenarios related to small unit operations. Provides feedback on the 16 Army leadership attributes, skills, and actions. Focuses on advanced leadership development. Credit/no credit only. Prerequisite: M SCI 110. Offered: AWSp.

**M SCI 401 Military Science and Developmental Leadership(3) I&S** Develops proficiency in planning, executing, and assessing complex problems, functioning as a staff member, and providing leadership-performance feedback. Explores situational opportunities assessing values, risk, and ethical decisions. Performance measured by abilities to give and receive systematic, specified feedback on 16 leadership attributes, skills, and actions focusing advanced leadership development. Prerequisite: M SCI 301; M SCI 302; M SCI 303; may not be repeated if received a grade of 2.0 or higher. Offered: A.

**M SCI 402 Military Science IV: Advanced (3) I&S** Explores dynamics of leading in complex situations of contemporary environments. Examines differences in customs and courtesies, military law, principles of war, and rules of engagement. Lessons review aspects of interacting with nongovernmental organizations, civilians, and host nation support with case studies examining complex ethical and practical demands of leadership. Prerequisite: M SCI 301; M SCI 302; M SCI 303; may not be repeated if received a grade of 2.0 or higher. Offered: W.

**M SCI 403 Military Science and Advanced Leadership (3) I&S** Completes fundamental learning of advanced leadership attributes, skills, and actions that effectively prepare students for careers in military or civilian leadership. Examines Army modularity, unit organization, joint operations, and the role of junior leaders. Focuses on case studies, situational exercises, student presentations, and battlefield analysis to develop insights on leadership. Prerequisite: M

SCI 301; M SCI 302; M SCI 303; may not be repeated if received a grade of 2.0 or higher. Offered: Sp.

## Naval Science

### DEPARTMENT OVERVIEW

202 Clark

The Department of Naval Science offers University students an opportunity to engage in study that leads to a commission in the U.S. Navy or Marine Corps while working toward a baccalaureate degree. The Naval Reserve Officer Training Corps (NROTC) Unit functions in conjunction with the Department of Naval Science. An NROTC student may select an academic major within certain limitations (e.g., some programs that normally lead to immediate graduate education, such as architecture, are not consistent with the mission of the NROTC program).

In addition to their University curricula, NROTC students take naval science courses in history and customs, naval engineering/weapons systems, navigation, naval operations, and leadership/management. In addition, each student must attend one naval science laboratory session and one physical training session per week. During the summer, students may have a four-to-six-week training cruise to put into practice their earlier classroom training.

Two NROTC programs are offered, as outlined below. In addition, any University student may take a naval science course without enrolling in the NROTC program, or may complete a minor in naval science, requirements for which are shown below.

### Navy Marine Scholarship Program

Each year students are accepted for scholarship status in the four-year, three-year alternate, and two-year NROTC scholarship programs. Eligibility for the three- and four-year programs is based upon nationwide competition and selection by a central selection committee. Application must be made by December 1 of the academic year preceding appointment as a midshipman. Those selected are provided educational benefits, including subsidy by the Navy of all tuition, fees, and uniforms. In addition, there is a textbook stipend each quarter and a monthly subsistence pay which ranges between \$250 and \$400.

For the two-year scholarship program, applications from current sophomores, or juniors enrolled in five-year programs of study, must be received by March. Those chosen by a central selection committee attend a six-week course of instruction at the Naval Science Institute (NSI) at Newport, Rhode Island, during the summer prior to their junior year. Successful completion of NSI instruction qualifies these students for enrollment in the advanced courses in the NROTC program. All scholarship students are appointed as midshipmen, USNR-R, and upon graduation are commissioned as officers in the Navy or Marine Corps Reserve, after which they serve on active duty for a minimum of four years.

### Navy-Marine College Program

Each year, men and women are accepted for four- and two-year non-scholarship college programs. Applications for the two-year program are accepted from current sophomores in community colleges or four-year colleges and must be received prior to March of their sophomore year (or third year, if in a five-year program).

Those students selected for the two-year program attend a six-week course of instruction at NSI during the summer prior to their junior year. Successful completion of NSI instruction qualifies students for enrollment in the advanced course in the NROTC program. Students in the NROTC college program pay their own college expenses but receive

monthly subsistence pay during their junior and senior years. The Navy furnishes all uniforms and textbooks used in naval science courses.

All college-program students are eligible for a scholarship after completing one academic term, with scholarship awards based on academic grades and participation within the midshipman battalion. The two-year college-program students also may win a scholarship for superior performance at NSI. Upon graduation, college-program students are commissioned in the Navy Reserve or Marine Corps Reserve and serve on active duty for three years.

## UNDERGRADUATE PROGRAM

### Adviser

202 Clark, Box 353840

206-543-0170

[nrotc@uw.edu](mailto:nrotc@uw.edu)

### Minor

*Minor requirements:*

25 credits, to include the following:

- N SCI 201; N SCI 402 (6 credits)
- Additional naval science coursework (19 credits)
- Minimum 12 naval science credits completed at the upper-division level.
- Minimum 12 naval science credits completed in residence at the UW.
- Minimum 2.5 grade in each course presented for the minor.

## COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at [www.uw.edu/students/crscat/](http://www.uw.edu/students/crscat/).

**N SCI 101 The Naval Service (3)** Henderson General introduction to the Navy, its organization, missions, roles, tasks, and operating methods. The relationship to the other services within the Department of Defense is emphasized. Offered: A.

**N SCI 102 History of U.S. Sea Power I (3) I&S** Pescador A comprehensive study of the role of sea power in the history of the United States, the current status of the various elements of the nation's sea power as they influence the development and implementation of national security policy. Focuses on ancient navies of the Mediterranean, to the U.S. Navy just prior to World War II. Offered: W.

**N SCI 103 History of U.S. Sea Power II (3) I&S** Pescador A comprehensive study of the role of sea power in the history of the United States, the current status of the various elements of the nation's sea power as they influence the development and implementation of national security policy. Focuses on the U.S. Navy from World War II to current times. Prerequisite: N SCI 102. Offered: Sp.

**N SCI 201 Naval Leadership and Management (3) I&S** Holman Introduction of the theory and techniques of naval leadership based on those principles of behavioral science that are pertinent to understanding individual and group behavior of adults. Introduces the management process and the relationship of management functions to leadership. Stresses acceptance of a traditional deep sense of moral responsibility on the part of the aspiring leader. Offered: A.

**N SCI 202 Navigation I (3) NW** Williams The science and practice of maritime coastal navigation, including visual fixing, dead reckoning, and piloting methods. Computation of tides and currents and nautical rules of the road. Offered: W.

**N SCI 203 Navigation II (3) NW** Williams Basic theory and practice of celestial and electronic navigation. Relative mo-

tion theory and contact coordination practice in a multiple ship environment. Prerequisite: N SCI 202. Offered: Sp.

**N SCI 301 Naval Ship Systems I (3)** *McCright* Study of fundamental principles of energy transfer and thermodynamics. An introduction to nuclear propulsion, gas turbines, and auxiliary power systems. Offered: A.

**N SCI 302 Naval Ship Systems II (3)** *McCright* Study of ship characteristics, ship design, hydrodynamic forces, stability, damage control, and shipboard electrical systems. Includes introduction to engineering documentation, electrical safety, preventative maintenance, and personnel qualifications. Offered: W.

**N SCI 303 Naval Weapon Systems (3)** *McCright* Study of fundamental principles of sensor, tracking, weapon delivery subsystems, and current naval weapons. Includes techniques of linear analysis of ballistics and weapons, and dynamics of basic components of weapon-control systems. Offered: Sp.

**N SCI 321 Evolution of Warfare I (3) I&S** *Crowe* Introduction to the art of war, the evolution of warfare from the earliest recorded battles to the present day. Offered: A; odd years.

**N SCI 322 Evolution of Warfare II (3) I&S** *Crowe* Introduction to the art of war, the evolution of warfare from the earliest recorded battles to the present day. Prerequisite: N SCI 321. Offered: W; even years.

**N SCI 323 USMC Leadership and Administration of Justice I (3)** *Crowe* Concepts, objectives, characteristic qualities, and practical techniques of leadership as exercised by the Marine Corps officer. Emphasizes leadership and management role of the junior officer in the Fleet Marine Forces. Intensive physical activities and outdoor projects to test an individual's physical and mental endurance. Prerequisite: either N SCI 321 or N SCI 421. Offered: Sp.

**N SCI 401 Naval Operations (3)** *Williams* Introduction to naval operations, the employment of naval forces, naval tactics, formulation of operations plans and orders, employment of detection equipment, and meteorology. Offered: A.

**N SCI 402 Naval Leadership and Ethics (3) I&S** *Crowe, Holman* Study of leadership and ethics within a military context using applicable case studies. Examines the Law of Armed Conflict and Code of Conduct; the importance of integrity, moral courage, and ethical behavior to effective leadership; and the interrelationship between authority, responsibility, and accountability. Offered: A.

**N SCI 403 Naval Organization and Management (3)** *Henderson* Study of organization, systems, and techniques employed in the Navy for management of its human, material, and financial resources. Some of the work relates to the administration of discipline in the Navy under the Uniform Code of Military Justice. Emphasis is placed on the leadership and management role of the junior officer in the fleet. Offered: Sp.

**N SCI 421 Amphibious Warfare (3) I&S** *Crowe* Provide basic knowledge of evolution of amphibious warfare from premodern era to present. Strategic and tactical considerations in planning specific operations and amphibious landings. Offered: A; even years.

**N SCI 423 USMC Leadership and Administration of Justice II (3)** *Crowe* Concepts, objectives, characteristic qualities, and practical techniques of leadership as exercised by the Marine Corps officer. Emphasizes the leadership and management role of the junior officer in the Fleet Marine Forces. Intensive physical activities and outdoor projects to test an individual's physical and mental endurance. Offered: Sp.

# School of Social Work

## SCHOOL OVERVIEW

### Dean

Edwina Uehara

210 Social Work/Speech and Hearing Sciences

The School of Social Work offers two professional programs, one at the undergraduate level and one at the graduate level, as well as a PhD program. The Bachelor of Arts in Social Welfare (BASW) program prepares students for entry-level generalist practice. The graduate professional program prepares students for advanced practice within a field of concentration; students earn a Master of Social Work degree. Both the BASW and MSW programs are accredited by the Council on Social Work Education. The School also offers a Doctor of Philosophy degree in social welfare that prepares students for careers in research and education. Consistent with University policy, no credit is granted on the basis of life experience or previous employment. All three programs are housed in the Social Work/Speech and Hearing Sciences Building, 4101 Fifteenth Avenue Northeast, Seattle, WA 98105-6299.

In addition, the School offers two concurrent degree programs: one with the School of Public Health and Community Medicine leading to the MSW and MPH degrees, and a second with the Evans School of Public Affairs, leading to MSW and MPA degrees.

## UNDERGRADUATE PROGRAM

### Adviser

23D Social Work, Box 354900

206-543-8617

[sswstsr@uw.edu](mailto:sswstsr@uw.edu)

The School of Social Work offers the following program of study:

- The Bachelor of Arts degree with a major in social welfare

The program includes upper-division courses in social welfare, with prerequisites in human biology, economics, psychology, statistics, and sociology. Students enter at the start of their junior year after completing most of the liberal arts requirements established by the College of Arts and Sciences. Social welfare courses include content on social welfare history, policy and services, human behavior and the social environment, social welfare research, and cultural diversity. These academic courses prepare students for the senior year three-quarter practicum experience, which involves a total of 480 hours of direct social services under the supervision of a practicum instructor approved by the School.

### Bachelor of Arts Program

*Suggested First- and Second-Year College Courses:*

SOC WF 101, SOC WF 200; SOC WF 201; PSYCH 101; SOC 110; BIOL 100 or BIOL 118; ECON 200 or ECON 201; also courses in American ethnic studies, sociology, psychology, and women studies.

### Department Admission Requirements

Approximately 40 juniors are admitted each year. Admission, which is for autumn quarter only, is competitive and completion of the requirements listed below does not guarantee acceptance. May 1 is the application deadline. To be considered for admission, applicants must meet the following criteria by the time of application:

- Completion of a minimum of 65 credits.

- Completion of the following courses: PSYCH 101 (or PSYCH 102); introductory sociology; ECON 100, ECON 200, or ECON 201; and BIOL 100 or BIOL 118, with a minimum grade of 2.0 in each course.
- A minimum 2.00 cumulative GPA.
- Have some paid or volunteer social service experience.
- Applicants must submit a completed application, admission essay, résumé, and provide copies of their college transcripts.

Application forms and a detailed description of the social welfare major are available at the School's admissions office, 23C Social Work/Speech and Hearing Sciences (SWS), or are mailed upon request, 206-543-5676. A student may discuss the program in person by contacting the Director of Admissions, 206-543-5676, [sswadmis@uw.edu](mailto:sswadmis@uw.edu). Students accepted to the major complete a change-of-college form and transfer their academic file to the School's Student Services Office. Students not accepted may contact the Director of Admissions to discuss alternatives to the social welfare major, or the appeal process.

### Major Requirements

63 credits as follows:

- Junior year (34 credits)—SOC WF 200 (5); SOC WF 310 (3); SOC WF 315 (2, 2, 2); SOC WF 320 (5); SOC WF 402 (5); SOC WF 403 (5); and SOC WF 404 (5).
- Senior year (29 credits)—SOC WF 311 (3); SOC WF 312 (3); SOC WF 390 (5); SOC WF 405 (3); SOC WF 415 (12); SOC WF 445 (3).

## Student Outcomes and Opportunities

- *Learning Objectives and Expected Outcomes:* The BASW program produces beginning-level social work practitioners and is accredited by the Council on Social Work Education. Students become generalist social work professionals able to work with individuals, families, groups, communities, and organizations in enhancing the health, well being, and empowerment of disadvantaged communities across the lifespan. Graduates may pursue social work practice jobs, or graduate education in social work, or a range of other fields (e.g., law, medicine, public policy, international development). Students receive an interdisciplinary liberal arts education, drawing on a range of social science courses which prepare them to promote human welfare and deal with complex social problems. Students are involved in both academic coursework (gaining intellectual knowledge and critical thinking skills) and a field placement experience ("lived" or "on the ground" experience).

The following outcomes define the BASW program:

- Preparation of entry-level baccalaureate social workers for generalist practice in a multicultural context.
- Education and training of generalist social workers who are informed, engaged, and responsive practitioners, able to understand and take action in enhancing human welfare and in promoting social and economic justice.
- Education of students within the context of an interdisciplinary liberal arts education, to foster a comparative and critical examination of social welfare and social work through the study of its history, policies, research, and practice interventions.
- Preparation for graduate education.
- In addition, the School of Social Work houses a number of centers and projects. For more information on these research activities, visit [depts.washington.edu/ssweb/research/centers\\_proj.html](http://depts.washington.edu/ssweb/research/centers_proj.html).
- *Honors Options Available:* For Interdisciplinary Honors, see University Honors Program.
- *Research, Internships, and Service Learning:* Contact the adviser for information.

- *Department Scholarships:* A limited number of financial-aid opportunities are available to students. Applicants are urged to apply for assistance through the Office of Student Financial Aid by February 15. Completion of the Free Application for Federal Student Aid (FAFSA) is required for consideration for any departmental funding. Inquiries may be directed to the Chair of the Scholarship Committee, School of Social Work.
- *Student Organizations/Associations:* Organization of Student Social Workers (OSSW).

## GRADUATE PROGRAM

Graduate Program Coordinator

Box 354900

206-543-8617

[sswstsr@uw.edu](mailto:sswstsr@uw.edu)

### Master of Social Work

The School of Social Work offers a Master of Social Work degree with four options for completion: a two-year full-time program; a one-year advanced-standing program for qualified students with a degree in social work/social welfare from an accredited undergraduate program; a three-year Evening Degree program; and a three-year MSW weekend program.

All program options prepare students for advanced professional practice with a culturally diverse range of at-risk populations in publicly funded social services. The curriculum encompasses two distinct but interconnected areas: the beginning content or professional foundation, and opportunities for advanced content in areas of policy, services, and methods.

The professional foundation provides instruction in the basic knowledge and skills required for effective, generalist social work practice, as well as socialization to the profession, its value orientation, ethics, and history.

The advanced curriculum provides in-depth knowledge and skills needed for advanced practice in the social work profession. The advanced curriculum is being revised. Please check the School's eb site, [depts.washington.edu/ssweb/](http://depts.washington.edu/ssweb/) for current information.

Students in the Evening Degree and weekend options may also select from courses in advanced policy services and methods. Elective offerings are determined by a vote of students in the cohort.

### Admission Requirements

Admission to the MSW program requires formal admission to the Graduate School as well as to the School of Social Work. Applicants must have a bachelor's degree, a strong academic background, and social-service experience. Applicants submit official transcripts from all colleges and universities attended, references, application forms, Graduate Record Examination scores, résumé, and an admission essay to be considered for autumn-quarter entry. January 15 is the closing date for receipt of applications and materials. Admission is competitive and selection is based on a review of the applicant's submitted materials. Current application materials can be obtained from the School's Admissions Office, 23 Social Work/Speech and Hearing Sciences Building, or by calling 206-543-5676 in Seattle or 1-800-558-8703.

### Degree Requirements

Minimum 46 credits (advanced standing program); 75 credits (day and evening degree programs), as follows:

- MSW program requirements include completion of required professional foundation and advanced curriculum credits and demonstrated competence in both academic and field practicum work.

- *Human Biology Requirements:* BIOL 100, BIOL 101-, BIOL 118, BIOL 161, NUTR 300, or GENOME 261 (or equivalent), taken within ten years before or during the MSW program. Course must be completed before beginning the advanced year (including practicum). Credit may not be applied to the MSW degree. Courses in nutrition, psychobiology of women, and biology of aging also fulfill this requirement.
  - *Basic Statistics Requirement:* An introductory course in statistics (any discipline) is a prerequisite for SOC W 505.
  - *Professional Foundation Courses Required for the Day and Evening Degree Program:* SOC W 500 (3), SOC W 501 (3), SOC W 504 (1–3), SOC W 505 (3), SOC W 506 (3), SOC W 510 (3), SOC W 511 (3), SOC W 512 (3), SOC W 513 (3), SOC W 514 (3), SOC W 523 (1), SOC W 524 (8). All foundation courses must be completed before beginning the advanced curriculum.
  - *Advanced Curriculum for the MSW Day Program:* Specialization in an advanced methods area in combination with a particular population or problem focus. Areas of concentration might include policy practice in health care, clinical practice in transnational communities, administration in mental health settings, or clinical and contextual practice with a focus on low-income children and families. Students enter the second year with an individualized learning plan (developed by winter quarter of their foundation year) that sets out a coherent program of advanced study. Identified in the learning plan is a policy/services course, an advanced methods area, an advanced field practicum, and proposed choices for methods and elective courses that support the student's overall area of concentration.
- A minimum program of study includes:
- One policy/services course (3 credits), consistent with the student's second year specialization.
  - Two advanced methods (6 credits) in the student's primary method area or across methods with the approval of the faculty adviser and practicum coordinator.
  - Elective course offerings (9 credits) to include courses related to the policy/services areas, and advanced HBSE and theory courses, with the primary focus on development of knowledge and skills in intervention. Students are encouraged to take one elective course from outside the school. Elective courses range from 1 to 3 credits.
  - Advanced practicum (SOC W 525, 18 credits) aligns with the student's policy/services course and with the student's primary intervention method area.
  - *Advanced Curriculum for the MSW Evening Degree Program:* Consists of an advanced generalist policy/services course, a two-quarter advanced generalist practice sequence, 9 credits of electives, and a 720-hour advanced generalist practicum. Students consult with their adviser and practicum coordinator to determine electives and a practicum appropriate to the student's career goals. Students graduate with theory, knowledge, and skills to assess, intervene, and evaluate across levels of social work practice—from micro to mezzo to macro—and across client populations and practice settings.
  - *MSW Electives:* Courses may be selected from curriculum offerings related to particular fields of practice, intervention theories, intervention modalities, social problems, populations, and research methods. Students may take advanced methods courses in areas other than the student's primary methods area and relevant courses in other graduate programs and professional schools of the University. Three credits of external coursework may be included.

## Financial Aid

A limited number of financial-aid opportunities are available. Applicants to the MSW program are urged to apply for assistance through the Office of Student Financial Aid by February 15. Completion of the Free Application for Federal Student Aid (FAFSA) is required for consideration for any departmental funding. Departmental funding is limited. Inquiries may be directed to the Chair of the Scholarship Committee, School of Social Work.

## Master of Social Work/Master of Public Health Concurrent Degrees

The concurrent degrees prepare professionals who function at the interface of both fields in practice, research, planning, administration, and policy development. Students develop (1) competence in social work practice in community health; (2) understanding of the organization and functioning of the health and social service delivery systems; and (3) basic analytical skills necessary to conduct research and to perform competently in a variety of public health social work roles. Students also have an opportunity for in-depth study of particular issues related to their special interests and career goals.

## Application

Students who matriculate into the full time program in either Social Work or Public Health are eligible. Students admitted to Social Work with advanced standing should apply for both programs simultaneously. Students in the part-time evening degree program in either Social Work or Public Health are not eligible for the program.

- Students must apply to and be accepted by both schools.
- Students are strongly encouraged to complete up to one year of studies in Social Work before entering the Public Health program. Applications for entry are due in both schools by January 15. Typically students apply to Social Work in January and enter the MSW program in September. They then apply to Public Health the following January and begin the MPH program the next September. Staggered entry permits students to complete all requirements of both degrees within three years.

## Degree Requirements

115–125 credits (depending on number of electives taken)

- Two separate sets of at least 36 credits each.
- At least 18 numerically graded credits for each degree in courses numbered 500 through 599. All required courses in the MPH program must be taken for a grade.
- Up to 12 credits taken in one school may be counted toward the other school's total credit requirements, if approved by both programs. Electives for each department can be fulfilled by taking the required courses of the other department.
- The MPH requires a thesis.

## Master of Social Work/Master of Public Affairs Concurrent Degrees

The University of Washington Evans School of Public Affairs and School of Social Work concurrent degree option offers interdisciplinary preparation in the fields of social work and public affairs, leading to the Master of Social Work and Master of Public Administration. Earning degrees in both areas prepares students to be professionals who work at the interface of the two fields in practice, research, planning, administration, and policy development.

Students are able to combine their studies at the Schools of Social Work and Public Affairs to meet the requirements for both degrees in approximately three years.

## Admission

Students must apply to and be accepted by both schools. Application decisions are made independently by both schools although students interested in the concurrent degree should indicate that interest in their admission materials.

Current students in either Public Affairs or Social Work who decide in the fall of their first year that they wish to apply to the other school may request a courtesy transfer of some application materials from their current school to the other school's admissions office. Students are responsible for monitoring the completeness of their own admissions materials.

The concurrent degree option is available only for students in the School of Social Work Policy Practice concentration (day program). Course sequencing and quarters-to-completion information given assumes students pursue the Public Affairs traditional day program.

## Program entry and foundation preparation

Given the integrated first-year curriculum in both programs, students complete the first year of foundation study in each program largely without substitution.

The concurrent degree option is flexible enough to allow students who begin in either program to decide during the first year to pursue the concurrent degree. However, students who know at the point of initial application that they wish to pursue the concurrent option are strongly advised to complete the Social Work foundation in year 1 and the Public Affairs foundation year 2. This allows greater flexibility in scheduling electives and provides a marginally more coherent sequencing of theoretical and research methods content.

## Advanced specializations

Students in both programs choose an area of specialization for advanced work and work with an adviser to plan an individual advanced curriculum. Public Affairs students choose one of five gateway areas and outline their advanced work in a plan of study. Advanced concentrations in Social Work consist of a methodological area and practice, or topical, area. The MSW/MPA option described here is available to social work students in the policy practice methods concentration. MSW/MPA students can pursue any of the social work 'practice field' specializations. Social Work students combine their advanced concentration elements into one learning plan.

## Doctor of Philosophy

The PhD program in social welfare prepares students to contribute to the advancement of knowledge and practice in the field of social welfare and the profession of social work for the promotion of social justice. Students are expected to acquire both the substantive and methodological competence to contribute theoretical formulations and empirical research that inform effective social work practice and advance scholarship in social welfare.

After the first year of required courses, each student's program of study is individually designed and focuses on well-defined substantive and interventive areas of research relevant to the field of social welfare. In the basic core of required courses, which includes teaching and research practice, students have an opportunity to pursue their particular interests with faculty members in the School of Social Work and in other schools and departments.

During the first two years, students define and develop the specialized areas that will be the focus of their general examination and, typically, their subsequent dissertation research. Selected areas must have clear significance for the development of practice, programs, or policies in social work and social welfare.

The general examination for advancement to candidacy generally occurs at the end of the second year or during the third year. After advancement to candidacy, students devote themselves full time to completion of their dissertation research. The last step before the degree is the final examination, defense of the dissertation. Students are strongly encouraged to remain in residence at the University until the dissertation is accepted. The PhD program takes approximately four years, although academic excellence in learning and performance is always the first criterion for degree progress.

**Admission Requirements** Admission is highly selective and students are admitted for autumn-quarter entry only. Applicants must have a master's degree in social work or a closely related field.

The Council on Social Work Education requires that faculty who teach practice courses in accredited programs have two years of supervised practice experience. Thus, obtaining such experience is highly important for those who seek academic positions following graduation.

Applicants selected for admission are those whose scholastic achievements, previous experience, and aptitude for social welfare research, scholarship, and teaching indicate the greatest promise for achieving the objectives of the program. In addition, an effort is made to maintain a balanced student group reflecting the range of concerns in social welfare and of faculty resources. The deadline for receipt of admission material is December 15. For more information, call 206-685-1680, or e-mail [phdmhpr@uw.edu](mailto:phdmhpr@uw.edu).

### Degree Requirements

90 credits minimum, to include:

- **Required Courses:** All required PhD courses must include content on diverse populations, including the disadvantaged and oppressed. This includes content on people of color, women, gay men and lesbians, and persons with disabilities. The specific type or nature of the content (e.g., readings, exemplars, exercises) and how it is introduced and integrated likely differs across courses. In all cases, content on diversity must be in accord with course objectives and be visibly present in the course syllabus.

All required coursework (with the exception of the 800 tutorials) must be completed before or during the quarter in which the oral section of the general examination takes place.

The following courses are required of all students in the program and must be taken on a graded basis unless offered credit/no-credit only (i.e., they cannot be taken on a satisfactory/not-satisfactory basis).

- Introduction to Advanced Research Methods and Design. Two quarters during first year.
- Fundamentals of Statistics. Two quarters during the first year through other departments (primarily Sociology or Biostatistics).
- Research Issues and Priorities in Social Welfare. Two quarters during the first year.
- Social Welfare Policy. Two quarters during the first year (contemporary policy and international and global policy).
- Research Practicum. Two quarters; to be completed by the end of the second year. (credit/no-credit only.)
- Teaching Practicum. One quarter; to be taken after successful completion of first year. (credit/no-credit only)
- Career Planning Seminar. One-credit seminar offered quarterly (credit/no-credit only). These focus on professional development issues and skills with emphasis on academic and research careers.
- Teaching Preparation. One quarter in the second year.

- A minimum of two (3+ credit) courses in advanced graduate research methods (typically 500-level courses offered in other departments) relevant to the student's anticipated research in a substantive or interventive area. Coursework beyond the minimum is encouraged.
- A minimum of two (3+ credit) graduate social science theory courses (500 level or above), designed to provide strong theoretical foundations. Students often use these courses to develop a "minor" in one of the social sciences. Offered in the College of Arts and Sciences or one of the professional schools, they are related to the substantive or interventive content of the student's program. Coursework beyond the minimum is encouraged for greater depth of interdisciplinary theoretical training.
- Dissertation Tutorials (SOC WL 800). Taken after the student has successfully completed the oral general examination and has been advanced to candidacy for the PhD Students must complete a total of 27 credit hours over at least three quarters to satisfy the Graduate School requirement
- **Elective Courses in the School of Social Work**
  - Qualitative Methods in Social Work Research. One or two quarters, offered alternate years.
  - Analytical Perspectives on Social Welfare Policy. One quarter, offered annually.
  - Advanced Topics in Data Analysis. One quarter, offered annually, covering advanced quantitative methods.
  - Social Movements and Participatory Action Research Methods. One quarter, offered alternate years.
  - Psychosocial scale construction and measurement. One quarter, offered alternate years.
  - Interdisciplinary Prevention Science: Children and Adolescents. Overview of developmental perspective examining factors that promote or inhibit health development at different stages and during transitions (focus on birth through age 21), 3-credit course (credit/no-credit only).
  - Promoting Well-Being among At-Risk Groups. Guidance for Health Promotion/Prevention Research.
- **Additional Course Expectations:** Students may take tutorials (SOC WL 600) with faculty members while completing advanced coursework and writing the integrative paper (prior to the oral general examination). These tutorials should include one or more written products. Students are also encouraged to take additional courses that bear on their substantive areas of interest. Courses may be taken in any department or school of the University but should ordinarily be at the 500 level or above.

- **Prevention Research Training Program Courses:** (Trainee requirements in addition to all PhD program courses)
  - Seminar in Prevention Science. One-credit seminars taken autumn, winter, and spring quarters each year of the traineeship. Credit/no-credit only.
  - Promoting Well-Being among At-Risk Groups: Interdisciplinary Guidance for Health Promotion/Prevention Research. One quarter, 3 credits, introduction to prevention research.
  - Two additional graduate level (500+) courses, one social science theory and one research methods, related to the prevention research area of study.

### Financial Aid

The School of Social Work ensures that all students have some means of financial support during the nine-month school year for the first three years in the program and is frequently able to continue support beyond this point. In each of the first three years, the PhD program director as-

sists students in obtaining funding from the School, other UW sources, or external federal and private granting agencies. Each year, awards of stipends, fellowships, and research and teaching assistantships are made on the basis of resources available and match with areas of student interest. An award of a particular stipend or assistantship in one academic year does not carry a commitment for that same award in another year because both the grant situation and the applicant pool change. Advanced teaching and research positions are available on a competitive basis. Students are encouraged to begin their efforts to secure dissertation research support early and to stay in communication with the PhD program directors and associate deans, who oversee assistantship assignments in consultation with the School administration.

## COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations. For complete undergraduate course descriptions, see the online course catalog at [www.uw.edu/students/crsctat/](http://www.uw.edu/students/crsctat/)

### Social Welfare (BASW)

**SOC WF 101 Social Work in Action: Bridging the Gap From Science to Service (5) I&S** Explores current social work practice and research applied to major societal problems. Lectures and discussions by leading faculty introduce students to the evidence-based perspective underlying program planning and practice innovation. Topics include: juvenile delinquency, child maltreatment, domestic violence, foster care reform, mental health, school violence, substance abuse, and poverty. Offered: A.

**SOC WF 120 International Responses to Human Needs: Social Welfare Policies and Services (5)** Focuses on major global social services such as poverty, immigration, and health that are reshaping social welfare policies and services throughout the world. Provides a comparative overview of social welfare policies and programs in the United States and selected other countries.

**SOC WF 200 Introduction to Social Welfare Practice (5) I&S** Introduction to the field of social work, including the theoretical concepts and institutional framework that guide practice. Overview of social work profession and social welfare system within which it operates. Lectures supplemented by exercises, films, guest lectures, and class discussions. Offered: A.

**SOC WF 201 Advances in Prevention Science: Bridging the Gap from Science to Service (5) I&S** Investigates the potential for preventing major social problems (child abuse and neglect, alcohol misuse, and interpersonal violence). Critically examines the state of prevention science, dialogue about ways to enhance the exchange of ideas between research and practice communities, and explore implications for social policy.

**SOC WF 215 Intergroup Dialogues (3)** Explores issues of social identities, differences, and inequalities to build understanding, skills, and values for bringing about greater social justice using dialogic communication.

**SOC WF 250 Writing for Social Welfare (2)** Focuses on producing short essays, paragraphs, and individual sentences. Discusses writing conventions and students' questions and challenges; analyzes writing samples; and practices short writing to develop greater ease with writing well and writing frequently.

**SOC WF 310 Social Welfare Practice I (3)** Provides an introduction to the roles, tasks, and functions of the social welfare practitioner and to theories and methods of intervention; a conceptual framework for social work practice with individuals, families, and small groups; and an opportunity to develop skills in problem assessment, intervention, termination, and evaluation. Offered: A.

**SOC WF 311 Social Welfare Practice II (3)** Provides an introduction to the roles, tasks, and functions of the social welfare practitioner and to theories and methods of inter-

vention; a conceptual framework for social work practice with individuals, families, and small groups; and an opportunity to develop skills in problem assessment, intervention, termination, and evaluation. Prerequisite: SOC WF 310. Offered: W.

**SOC WF 312 Social Welfare Practice III (3)** Focus on macro systems in a diverse society using the generalist perspective. The implications of system resources and configurations for meeting human needs are considered. The role and function of generalist social workers to understand and advocate for system development and change is emphasized. Prerequisite: SOC WF 311. Offered: Sp.

**SOC WF 315 Community Service Learning (1-5, max. 6)** Opportunity for students to apply social work theory to practice, to advocate for social justice, and to be involved in community service. Students learn by connecting classroom theory and community-based experience through the completion of community-based projects in social work-type agencies. Majors only.

**SOC WF 320 Social Welfare Policy (5) I&S** Emphasizes policy and program development in social welfare with emphasis on the context, making, and unmaking of social policy. Covers policy formulation as well as current and emerging policies in social welfare. Prerequisite: SOC WF 200. Offered: WSp.

**SOC WF 390 Introduction to Social Welfare Research (5)** Introduction to the logic of the scientific method as applied to social work and social welfare practice, to the design and conduct of a research study, and to data collection and summarization. Skill development in critical consumption of social welfare research. Prerequisite: either STAT 220 or QMETH 201. Offered: A.

**SOC WF 402 Human Behavior and Social Environment I (5) I&S** First of two-quarter sequence focusing on understanding human development across the lifespan. Integrates biological, psychological, structural, environmental, political, global, and socio-cultural perspectives. Explores relationship between the person and the environment including families, groups, organizations, communities, and institutions.

**SOC WF 403 Human Behavior and Social Environment II (5) I&S** Continuation of SOC WF 402. Prerequisite: SOC WF 402.

**SOC WF 404 Cultural Diversity and Justice (5) I&S** History and culture of disadvantaged and oppressed groups served by Social Welfare generalist practitioners. Offered: Sp

**SOC WF 405 Fieldwork Seminar (1-4, max. 9)** Integrates social work practicum experiences with prior and concurrent course work in social sciences, social work, and research. Includes discussion of class presentations and simulations or practice situations that combine knowledge and skill utilization. Student logs provide a basis for individual goal identification and achievement. Required of social welfare seniors. Offered: AWSp.

**SOC WF 409 Readings in Social Welfare (1-5, max. 15)**

**SOC WF 415 Beginning Field Instruction (4-6, max. 12)** Students are placed in selected social service agencies and accept beginning social service assignments under the supervision of competent agency personnel. Credit/no credit only. Offered: AWSp.

**SOC WF 442 Building Competencies for Intergroup Dialogue Facilitation (5) VLPA/I&S** Focuses on both knowledge and skills development for peer facilitators. Topics include philosophy and principles of dialogic education and dialogic communication; intergroup communication; social identity development; principles of working with conflict; group dynamics, observation, and facilitation; team building among co-facilitators; and creating a support system among instructors and facilitators.

**SOC WF 443 Facilitating Intergroup Dialogue (5) VLPA/I&S** Practicum seminar providing instruction, consultation, and supervision of peer group facilitators. Focuses on comparison of facilitation experiences and consultations, troubleshooting with other facilitators, co-facilitator team building,

and planning for dialogues. Exploration of specific, current intergroup issues, such as affirmative action and immigration. Continuation of team-building work begun in 442.

**SOC WF 445 Special Topics in Social Work Practice Methods (3, max. 6)** Examines roles, skills, and methods in designated areas of social work practice. Content builds on foundation practice methods.

**SOC WF 450 Integrative Seminar: Poverty Analysis (5)** Critical analysis of poverty in both the United States and from a global perspective. Analytical and descriptive focus on measurement, processes of production and perpetuation, and theoretical perspectives that lead to different social and economic policy responses.

**SOC WF 490 Research in Social Welfare (1-3, max. 10)** Individual work with faculty member to assist with current research project (s). Students trained and supervised in some or all of the following research tasks: literature review, data analysis, record-keeping, interviewing, report writing, data entry and coding, data collection, and other tasks commonly found in research problems in social welfare. Credit/no credit only.

**SOC WF 495 Special Topics in Generalist Social Welfare (1-5, max. 15)** Readings, lectures, and discussions pertaining to significant topics of special and current interest to social workers.

## Social Welfare

**SOC WL 552 Seminar in Contemporary Social Welfare Policy (3)** Critical review of contemporary American income maintenance and related social welfare policies, and the economic, political, and social factors that affect their development, implementation, and effectiveness. Evaluation of their effects on poverty, income inequality, and related social outcomes, including international comparisons. Assessment of proposals for reform. Closely linked to 553.

**SOC WL 553 Globalization and International and National Social Welfare Issues and Politics (3)** Critical examination of globalization and its implications for the historic and contemporary development, formulation, and adoption of policies related to international and national social welfare. Emphasizes the development of conceptual frameworks that further understanding of the complex interplay of international and national issues and social welfare policies.

**SOC WL 554 Analytical Perspectives on Social Welfare Policy (3)** Broad overview of the social welfare policy process, including epistemological issues, content on social problem construction and definition, policy agendas and case study methodology. Introduction to analytical tools and concepts needed to take a proactive role in policy development, advocacy, implementation, and policy research.

**SOC WL 559 Preparing to Teach: Instructional Theory and Practice (3)** Teaching conceptualized as professional practice. Focuses on the integration of theory, research and educational strategies, techniques, and skills into students' practice as educators. Classroom discussions and activities promote reflection, exploration, critical analysis and experimentation.

**SOC WL 577 Promoting Well-Being among At-Risk Groups through Prevention Research (3) Nuris** Interdisciplinary overview of major concepts and methods in health promotion and prevention research, with emphasis on at-risk populations. Attentive to health disparities, collaboration with diverse communities and biobehavioral advances in addition to application of theory and prevention-science framework. Encourages interdisciplinary participation and supporting students in articulating their research perspectives.

**SOC WL 578 Seminar in Special Topics for Prevention Research (1, max. 30)** Interdisciplinary overview of major concepts in promotion of mental health and prevention of mental distress with prevention science as framework. Provides conceptual foundations for advanced study in specialized aspects of mental health prevention research.

**SOC WL 579 Interdisciplinary Approaches to Prevention Science: Children and Adolescents (3)** Overview of theory, research, and practice in prevention science. Developmental perspective examining factors that promote or inhibit health development at different stages and during transitions (focus on birth through age 21). Designed for interdisciplinary dialogue, and includes guest faculty from around the University who are specialists in course topics. Credit/no credit only.

**SOC WL 580 Quantitative research methods and design (3)** Logic, terminology, and methods of quantitative social science approaches to correlational, experimental, quasi-experimental, survey, and program evaluation research. Components of the research process (problem definition, concept explication, ethical evaluating and designing defensible quantitative research studies.

**SOC WL 581 Qualitative research methods and design (3)** Theoretical and methodological foundations of a range of qualitative methods relevant to social welfare and social science research. Fundamentals of qualitative research design and implementation, including framing research questions, sampling, data collection, analytical methods, and quality criteria. Focus on ethics, cultural sensitivity, and community-based research with vulnerable populations.

**SOC WL 582 Research Practicum (3-)** Development of specific methodological skills in social welfare research through participation in an ongoing research project. Learning contract used to target specific research competencies. Credit/no credit only. Offered: ASpS.

**SOC WL 583 Research Practicum (3)** Development of specific methodological skills in social welfare research through participation in an ongoing research project. Learning contract used to target specific research competencies. Credit/no credit only. Offered: ASpS.

**SOC WL 584 Teaching Practicum (3)** Supervised teaching of a required course or teaching as a co-instructor with a faculty member. Learning contract used to target specific teaching competencies, e.g., assessing and evaluating student outcomes, identifying class session goals and objectives, tailoring instruction methods to diverse learning styles. Offered: AWSpS.

**SOC WL 585 Qualitative Methods in Social Work Research I (3)** The first in a two-quarter sequence offering intensive experience in the theory and application of qualitative and ethnographic research methods. Prepares students for conducting qualitative studies and for combining qualitative and quantitative research methods. Focuses on applications especially relevant to social welfare.

**SOC WL 586 Qualitative Methods in Social Work Research II (3)** The second in a two-quarter sequence offering intensive experience in the theory and application of qualitative and ethnographic research methods. Prepares students for conducting qualitative studies and for combining qualitative and quantitative research methods. Focuses on applications especially relevant to social welfare.

**SOC WL 589 Multivariate Data Analysis for the Social Sciences (4, max. 8) Erosheva** Provides social scientists with an introduction to multivariate analysis techniques and the knowledge to carry them out. Focuses on statistical methods that explore relationships between observed variables. Topics include principal components, cluster, factor, latent class analysis. Prerequisite: SOC WL 587, 588, or equivalent. Offered: jointly with CS&SS 589; A.

**SOC WL 590 Topics in Advanced Research Methods (3)** Special topics in social and behavioral research design for advanced graduate students. Topics vary and focus on community-based research methods and measurement construction for culturally diverse populations. Prerequisite: doctoral student in social welfare or related discipline; advanced master's level students by permission of instructor.

**SOC WL 591 Seminar on Topics in Social Welfare (1-3)** Focuses on special topics in social welfare and social welfare research relevant to students across a range of research and disciplines. Prerequisites: Doctoral student in social

welfare or allied discipline; master's student by permission of instructor. Offered: AWSp.

**SOC WL 598 Issues and Priorities in Social Welfare Research (3)** Foundations in the definitions of theory; the socially constructed nature of theory and definitions of social "problems"; conceptual and theoretical perspectives on human society, interaction, and change; and analysis of the theoretical foundations of social science research paradigms.

**SOC WL 599 Research Problems and Priorities in Social Work and Social Welfare (3)** Assists students in applying theory in building an original conceptual model. Emphasizes critical thinking, including ideological, political, methodological, and ethical contexts/implications of ideas, theories, and models that shape social welfare scholarship and its application to social practice. Prerequisite: admission to social welfare PhD program or permission of instructor.

**SOC WL 600 Independent Study or Research (\*)** Prerequisite: approval of a well-specified plan by the instructor and program director. Includes a written product. Offered: AWSpS.

**SOC WL 800 Doctoral Dissertation (\*)** Offered: AWSpS.

## Social Work (MSW)

**SOC W 500 Intellectual and Historical Foundations of Professional Social Work Practice (3)** Intellectual, historical, and ethical foundations of the social work profession. Engagement with crucial aspects of the profession's history; contemporary issues, problematics, and directions; and key concepts and theoretical frameworks. Students develop personal, professional, and intellectual foundations for practicing social work built on the central values of plurality and social justice.

**SOC W 501 Poverty and Inequality (3)** Analysis of poverty and inequality in United States. Analytic and descriptive focus on measurement, processes of production and perpetuation, and public policy responses. Examines causes of poverty, the role of policy, and socioeconomic dimensions of stratification, including race, ethnicity, class, gender, immigration status, disability, age, sexual orientation, and family structure.

**SOC W 504 Social Work for Social Justice: Developing a Personal-Professional Stance (3)** Focuses on personal and professional development toward social work practice for social justice. Employs critically self-reflective, experiential, and dialogic learning processes to engage students to explore personal meaning systems and narratives in the context of professional values of social justice, multiculturalism, empowerment, and globalization.

**SOC W 505 Foundations of Social Welfare Research (3)** *Almgren, Balassone, Erera, Roffman* Overview of research process/methods in social work, with focus on consuming and performing practice-related research and evaluating one's own practice. Emphasis on critical understanding of empirical literature, development of useful and appropriate questions about social work practice, and strategies and techniques for doing research and applying findings to practice. Offered: Sp.

**SOC W 506 Social Welfare Research and Evaluation (3)** Second of a two-quarter research sequence. Introduces a range of methods for informing evidenced-based social work practice. Emphasizes critical appraisal of the literature, development of research questions, and strategies and techniques for conducting practice-relevant research, including data collection and analysis.

**SOC W 510 Practice I: Introduction to Social Work Practice (3)** Foundation knowledge and skills for direct practice with individuals, families, and groups. Assists students toward mastery of interviewing and relationship building skills and knowledge of cross-cultural communication and practice issues and of social work values and ethics. Provides opportunity to develop beginning level skills in assessment. Offered: ASP.

**SOC W 511 Practice II: Intermediate Direct Service Practice (3)** Foundation knowledge and skills for direct practice with individuals, families, and groups. Course assists students toward mastery in assessment, development of treatment plans based on theory and assessment information, goal-setting skills, and selection of appropriate interventions. Offered: AW.

**SOC W 512 Practice III: Organizational Practice (3)** Focuses on ways in which management activities contribute to service effectiveness for clients and quality of conditions for staff. Various managerial roles, functions, and skills examined. Impact of agency structure, culture, and mission on staff, clients, and organizational outcomes discussed with emphasis on ways social work managers influence change. Offered: W.

**SOC W 513 Practice IV: Community Change Practice (3)** Provides frame of reference and skills for community-based social work practice. Theories of social change are examined with examples drawn from community organizing and policy advocacy. Offered: Sp.

**SOC W 520 EDP Policy/Services (3)** Investigates how social and economic inequality in America is established, manifested, and maintained. Also examines interventions that purportedly address inequality. Provides analytic tools to help with critical thinking about competing views of inequality and the interventions that address it.

**SOC W 521 Child and Family Inequalities: Policy/Services Platform (3)** Advanced study of policy and services relevant to practice with children, adolescents, and families. Applies social justice framework to understanding policy context and organization of services responses to child and family inequalities, especially for historically oppressed and marginalized populations. Examines social construction of policies in historical, political, and comparative context.

**SOC W 522 Introduction to Practicum: Advanced Standing (2)** Orients advanced standing students towards their practicum. Covers critical issues related to the advanced standing practicum and prepares students for successful practice in their chosen agencies. Incorporates and builds upon content and skills acquired through a generalist (micro, mezzo, and macro levels of practice) undergraduate social work education.

**SOC W 523 Introduction to Practicum (0-1)** Workshops for preparation for agency-based placement Interviewing and orientations occur at agencies. Credit/no credit only.

**SOC W 524 Foundation Practicum (1-8, max. 12)** Agency-based practicum with emphasis on development of knowledge, perspectives, and skills needed for practice with individuals, families, groups, organizations, and communities. Credit/no credit only. Prerequisite: social work major. Offered: AWSpS.

**SOC W 525 Advanced Practicum (1-10, max. 24)** Agency-based advanced practicum. Credit/no credit only. Prerequisite: SOC W 515 and foundation courses. Offered: AWSpS.

**SOC W 526 Multigenerational Policy-Services Platform: A Feminist, Multicultural Lens (3)** Builds social workers' competencies to analyze, critique, and advocate for policies and processes that will support growing numbers of multigenerational families. Presents a feminist, multicultural and multigenerational perspective to analyze how historical and current service structures, policies, and regulations support or undermine families across the lifespan.

**SOC W 527 Global and Local Inequalities: Critical Analyses of the Processes and Policies of Globalization (3)** Discussion of the health of the planet, economic and cultural globalization, the enduring legacies of imperialism and colonialism in this global era and their local impacts. Foci include international agreements, UN conventions, immigration and refugee policies.

**SOC W 528 Health Care Inequalities: Policy/Services Platform (3)** Examines the organization, policies, and services of U.S. health care system from a social justice framework. Topics include the U.S. health care system's historical development, differential access to health and health care,

health care system reform, and the analysis of health care policy from contrasting ideological perspectives.

**SOC W 529 Mental Health Inequalities: Policy/Services Platform (3)** Mental health policy trends and organization of services at national, state, and local levels reflected in legislative, regulatory, and institutional policies. Provides historical perspective on the development of U.S. mental health policies and services. Discusses specific areas of intersystem linkages in terms of equitable access and empowerment.

**SOC W 530 Advanced Practice with Diverse Children and Families (3)** Builds on foundation frameworks and competencies to develop specialized knowledge and skills for working with vulnerable children and families. An ecological framework informs family- and community-centered assessment and intervention that is empowering, culturally responsive, and clinically relevant. Foci include resilience, violence, attachment, loss, substance abuse, and disability.

**SOC W 531 Advanced Practice with Diverse Children and Families: Focus on Child Mental Health (3)** Develops specialized knowledge and skills for practice with children with mental health concerns and their families. Emphasis on child and family mental health assessment and interventions that are culturally relevant, collaborative, and strength-promoting. Topics include culture and mental health, system of care, psychotropic medication, ADHD, and depression.

**SOC W 532 Advanced Practice with Diverse Children and Families: Focus on Child Welfare (3)** Develops advanced knowledge and skills for culturally relevant child welfare practice across a range of settings including child protection, foster care, and adoption. Topics include family dynamics around child maltreatment; trauma and its impact on children; separation, loss, and identity development; and self-care in child welfare practice.

**SOC W 533 Multigenerational Advanced Practice with Older Adults (3)** Emphasizes a multigenerational, culturally competent empowerment approach and in-depth knowledge on "best practices" related to assessment, diagnosis, and clinical interventions with older adults and their families. Builds on other multigenerational classes.

**SOC W 534 Praxis of Intergroup Dialogue (3)** Students design, plan, implement, and evaluate intergroup dialogue sessions as peer facilitators. Students facilitate intergroup dialogue in conjunction with SOC W 504. Focuses on intensive in-vivo instruction, consultation, and supervision of facilitators.

**SOC W 535 Special Topics in Interpersonal/Direct Practice (2/3)** Examines current substantive topics in direct/interpersonal practice.

**SOC W 536 Social Movements and Organizing: People, Power, and Praxis (3)** Focuses on social, economic, and political problems form an organizer's perspective, and strategies, tactics, and skills necessary to engage in organizing activities. Emphasizes principles common to community, electoral, union, and issue organizing. Addresses why people organize, how organizing works, and what it takes to be a good organizer.

**SOC W 537 Empowerment Practice with Refugees (3)** Empowerment practice with refugees and immigrants across a transnational continuum of forced migration, including flight, internal displacement, asylum seeking, repatriation, and resettlement. Instruction includes classroom activities, workshops with local service providers, and agency-based projects. Addresses implications for strengths-based social services, policy, and practice skills.

**SOC W 538 Critical Empowerment Practice with Multi-ethnic Communities (3)** Principles of Empowering practice, critical analyses of models of multiculturalism and paradigms of knowledge and practice proven problematic in our increasingly diverse society. Assists students in developing empowering practice values, knowledge, and skills for work in multi-ethnic communities.

**SOC W 539 Ethnographic Interviewing (3)** Facilitates empowering and culturally sensitive practice, while providing an understanding of the other from his/her own perspec-

tive. Addresses power in worker-client relationships, clients as experts, communication across cultures, the uses and presentation of data to effect social change, ethical issues, and specific ethnographic interviewing techniques.

**SOC W 540 Advanced Social Work Practice in Health Settings I (3)** Teaches theory and strengths-based practice within interprofessional health care settings from biopsychosocial, family systems, multi-cultural, contextual, and lifespan perspectives. Advances skills in conducting assessments and interventions to support individuals and families experiencing pain and loss associated with trauma and acute or chronic illness.

**SOC W 541 Advanced Social Work Practice in Health Settings II (3)** Teaches health care theory and practice skills relevant to working with adults and children in a variety of health care settings, using biopsychosocial, contextual, multicultural, interdisciplinary, and lifespan perspectives. Advances skills in adherence assessment, ethical decision-making, discharge planning, cross-cultural and cross-professional practice, and counseling regarding life-threatening illness.

**SOC W 542 Social Work Practice in Community Mental Health I (3)** Emphasizes recovery-oriented practice with adults with severe and persistent mental illness and persons with co-occurring mental illness and substance disorders. Trains for generalist social work practice in most community mental health settings: community mental health centers, psychiatric hospitals, residential programs, jails, homeless shelters, on-the-streets, client's homes, etc.

**SOC W 543 Social Work Practice in Community Mental Health II (3)** Focuses on social work practice with persons with severe mental illness. Emphasizes recovery, supported housing, supported employment, integrated treatment of co-occurring disorders. Covers practice with diverse populations: multicultural, developmentally disabled, geriatric, and gay/lesbian. Examines partnering with family members and working with Social Security. Complements SOC W 542, but may be taken free-standing.

**SOC W 544 Clinical Social Work with Individuals I: Theory and Practice (3)** First quarter of a two-quarter sequence on the theory and practice of clinical social work. Focuses on key concepts underlying direct practice. Topics include the therapeutic relationship, therapeutic listening, the ground rules, transference, counter transference, psychological defenses, resistance, phases of treatment, transference, countertransference, and vicarious trauma.

**SOC W 545 Clinical Social Work With Individuals II: Theory and Practice (3)** Second of a two-quarter sequence on the theory and practice of clinical social work. Focuses on the use of interpretation, obstacles to treatment, intervention techniques, case formulations that link assessment and intervention, monitoring client progress, and on selected theories of therapy.

**SOC W 546 Addressing Trauma and Recovery in Multi-Generational Advanced Practice: (3)** Multigenerational perspective on clinical interventions for various traumas: childhood sexual abuse, battering at any age, chemically dependent parents, elders with abusive adult children, and a range of losses throughout the lifespan. Recovery process explicated in terms of family strengths across the generations and through state-of-the art techniques for healing trauma.

**SOC W 548 EDP Advanced Practice I (3)** First quarter of a two-quarter sequence. Emphasizes preparation of practitioners with capacity to move flexibly among a variety of professional roles, including the provision of direct services, program planning, supervision, and community practice. Emphasizes contextual assessment from micro to macro levels.

**SOC W 550 Strategic Program Management and Change Leadership in Human Services (3)** Examines tools and techniques required for leadership, program planning, implementation, and program change. Topics include strategic planning, logic modeling, agency-bound relations, work-group facilitation, and diversity-promoting management. Lecture, discussion, and exercises. Required for SSW

administration concentrators; open to others with permission of instructor.

**SOC W 551 Human Resource Management in the Human Services (3)** Theories and techniques for 1) designing human services workplaces that support employees' performance and well-being, and 2) managing diverse, satisfied, and high-performing human service staffs. Topics include job quality analyses; job descriptions; employee interviewing, supervision and performance evaluation; models of negotiation and conflict resolution; and strategies for working with volunteers.

**SOC W 555 Special Topics in Administration (2/3)** Examination of current substantive topics in administration and management. Content varies according to recent developments in the field and the interests of the instructor.

**SOC W 556 Family Healing: A Cross-Generational Approach (3)** *Lustbader* Explores how to respond to multi-generational dynamics within the entire extended family and examines how difficulties and strengths are passed from one generation to another. Emphasizes cultural differences as well as issues pertaining to the impact of chemical dependency, mental illness, and disability across generations.

**SOC W 557 Caring for Persons with Life-Limiting Illness: A Lifespan Approach (3)** Focuses on multi-systemic social work practice with seriously ill people with a life-limiting condition. Examines how families care for a critically ill loved one, and the differences that occur when the seriously ill person is a child, adolescent, a mid-aged adult, or an elder at the end of life.

**SOC W 558 Gender, Gender Identity, and Sexuality (3)** Anti-oppression focus on social work practice with lesbian, gay, bisexual, transgender, two-spirit, intersexed, and queer communities. Emphasizes cultural, social, and political context within which such practice occurs as well as an examination of the diversity and heterogeneity within these communities. Enhances students' micro and macro practice skills.

**SOC W 560 Policy Processes, Institutions, and Influences (3)** Focuses on the process and institutions through which social policies are developed, adopted, and implemented, with special attention to the implications of these processes for social justice. Develops practice skills in analyzing and influencing the policy process, including social problem definition, policy design, policy adaptation, and policy implementation.

**SOC W 561 Concepts and Methods of Policy Analysis (3)** Engages students in the concepts and applied practice of policy analysis and evaluation. Prepares students to address two generic policy questions: Given an identified problem, what policy or program should be selected? Given a particular policy or program, how do we evaluate effectiveness? Particular attention paid to social justice implications.

**SOC W 565 Special Topics in Policy Practice (2/3)** Examination of current substantive topics in policy practice. Content varies according to recent developments in the field and the interests of the instructor.

**SOC W 570 Anti-racist Organizing for Social and Economic Change (3)** Applies an institutional analysis of racism and white privilege to the strategies of community organizing by communities of color and indigenous peoples. Examines anti-racist organizational transformation, intersectionality of oppressions and privileges, white allies in anti-racist struggles, and the role of social workers in maintaining and combating institutional racism.

**SOC W 571 Assessment of Mental Disorders (3)** Provides basic knowledge and skills to assess mental disorders and improve critical thinking concerning assessment and diagnosis. Emphasizes the Diagnostic and Statistical Manual of Mental Disorders (DSM-IV) for its system of symptom description and classification. Examines challenges of methodological implications of mental health assessment across race, gender, and ethnicity.

**SOC W 572 Chemical Dependency—Drug Effects, Assessment, and Treatment Referral Issues (3)** Provides students with the knowledge and basic skills to recognize and understand the dynamics of chemical dependency in the lives of

individuals, how to assess the presence of this disorder, and what the issues are in referring individuals to treatment for this disorder.

**SOC W 573 Child Welfare and Permanency Planning (3)** Focuses on social work interventions within the public child welfare system for children who have been abused and neglected. Includes practice models to ensure safety and permanency for children, federal and state mandates for permanency, cultural determinants, juvenile court dependency system, and research findings pertaining to permanency planning outcomes.

**SOC W 574 Collaborative Community-Based Program Evaluation (3)** Focuses on carrying out a formative and process evaluation of a community program in conjunction with program staff and clients. In addition to learning about program theory, measurement construction, study design, and data analysis, students develop consultative and presentation skills needed in utilization-focused evaluation.

**SOC W 575 Domestic Violence Policy and Intervention (3)** Examines policy, theory, research, and intervention in field of intimate partner violence with emphasis on historical, cultural, and political contexts. Advanced study of structural contributors, policy parameters, and service delivery and cross-systems necessary to effective practice and leadership in the field locally, nationally, and globally.

**SOC W 576 Empowerment Practice with Persons with Disabilities (3)** Provides background in theories and models of disability that contribute to empowerment-oriented intervention techniques. Emphasizes direct practice skills for working with people with disabilities and their families. Emphasizes understanding how disability studies and the disability movement influence social work practice.

**SOC W 577 Maintaining Quality Social Work Practice: Ethics, Self-care, and Risk Management (2/3)** Develops models for managing ethical and legal obligations to clients and others; managing risk; and maintaining ethical, responsible, and self-sustaining practice over a professional career. Examines competing ethical frameworks and material on essential values underlying ethical principles and the basis for ethical and legal regulation of practice.

**SOC W 578 Evidence-Based Practice in Child Mental Health (3)** Critically examines the program components and empirical research base of selected child mental health treatment program models designed to serve children and youth who present with severe emotional or behavioral disorders. Focuses on treatment models that reflect a "systems care philosophy" and which offer alternatives to traditional services.

**SOC W 579 Faith Matters and Mental Health Practice: Conflict vs Integration (3)** Examines the complex interrelation between faith matters and the practice of mental health professions, including approaches to definitions and assessments.

**SOC W 580 Grant Writing and Fund Development (3)** Prepares students to participate and provide leadership in grant writing and fundraising for community-based human services. Opportunity to practice skills required for developing a successful grant proposal and planning a successful fundraising program. Identify, cultivate, and develop sources of funding. Students assist in writing a complete grant proposal as final project.

**SOC W 581 Historical Trauma and Healing (3)** Provides specialized knowledge and skills for practice with communities experiencing historical trauma. Covers emerging theories of historical trauma, impact of historical trauma on families and communities, and culturally relevant interventions to promote healing. Builds upon the concepts of empowerment practice and indigenous models of social work.

**SOC W 582 Interpersonal Violence and Trauma (3)** Examines trauma theory, nature of interpersonal violence, psychodynamic concepts, cognitive behavioral theory, treatment of victims and offenders. Topics include psychological trauma, abuse-specific psychotherapy, multidisciplinary and cognitive behavioral interventions with victims and offenders, effects of interpersonal violence, and counter-transference

reactions. Format includes lecture, discussion, case presentations, and presentations by community experts.

**SOC W 583 Multicultural and Multigenerational Approaches to Healing Grief and Loss (3)** Uses critical analysis to expand Western symptom-oriented grief and loss theory to include multicultural approaches, exploring new constructionist models of meaning-making, narrative biography, and cultural tradition through case studies. Assessment and intervention exercises include journaling, art, and ritual, allowing students to explore how their own grief affects practice.

**SOC W 584 Multicultural Mental Health Practice (3)** Advanced-practice course that builds upon foundation content in HUB, micro- and macro-practice/HBSE sequences, policy, diversity, and research. Grapples with complex mental health service design and delivery issues often informed by ethnocentric paradigms of knowledge and practice that have proven problematic in their general application in our increasingly diverse society.

**SOC W 585 Advanced Group Work (3)** Overview of group work and major theorist in the field. Examines differential applicability of methods across diverse populations. Emphasis on developing powers of observation of group process (as opposed to content) and on ability to intervene at the group level (as opposed to individual level). Prerequisite: Group work experience.

**SOC W 586 Policy Advocacy (1, max. 3)** Focuses on involvement in the policy-making process. Students design projects to influence public policy: local level in the fall, state level in the winter, and federal level in the spring. Readings based on policy materials (proposed and final laws, regulations, budgets, advocacy documents). Credit/no credit only.

**SOC W 587 Spirituality in Health Care (2)** *Carrigan, McCormick* Examination of the beliefs, values, meanings, and spirituality of health professionals for the well-being of their patients as well as for themselves. Offered: jointly with FAMED 547/B H 518; Sp.

**SOC W 588 School Social Work (3)** Required for School Social Worker certification. Explores theoretical frameworks, current issues in education, individual, group and family practice; organizational context; and systems change. Also covers legal issues, racism and educational outcomes, special education, culturally sensitive practice, advocacy, family involvement, child abuse mandated reporting, collaboration, and ethics.

**SOC W 589 Social Work Practice with Families (3)** Philosophical, theoretical, and practice issues relevant to family-centered social work. Presents family systems theory and a generalized model of engagement, assessment, and treatment. Clinical applications with particular client populations and their presenting problems, such as couples, family crisis, child behavioral problems, and affective disorders.

**SOC W 590 Social Work Supervision and Consultation (3)** Provides knowledge and skills involved in the role of social worker as supervisor and team leader; supervision as a leadership function, power and authority, professional boundaries, staff recruitment, selection, performance evaluation, and addressing staff-related performance problems.

**SOC W 591 Social Work Practice in Long-Term Care Across the Lifespan (3)** Applies a multigenerational framework to introduce values, skills, and knowledge necessary for social work practice in long-term care settings across all age groups. Meets at a nearby continuing care community and provides regular opportunities to interact with persons requiring long-term care, their families, and formal caregivers.

**SOC W 592 Social Work Practice with African-American Families (3)** Introduces the study of African-American families from a historical, socio-cultural, and political perspective. Presents various theories for understanding African-American families and addresses an Afrocentric framework for intervention.

**SOC W 593 Social Work Practice with Chemically Dependent Adults: Cognitive Behavioral Approaches (3)** Teaches skills in four contexts: (1) incorporating questions concerning alcohol/drug use in an assessment of new clients, (2) conducting a comprehensive alcohol/drug assessment when

a problem has been identified, (3) offering a brief motivational enhancement intervention to ambivalent clients, and (4) delivering cognitive-behavioral counseling focusing on overcoming dependence.

**SOC W 594 Gender and Inequalities in the Global Context (3)** Examines issues of gender, globalization, and inequality through a gender lens. Topics include global movements of capital (the global factory) and labor (migration, trafficking, etc.), disruption/creation of family forms and gender roles (domestic violence), social welfare, private/public policies, international frames (human rights), resistance, and response.

**SOC W 596 Statistics in Social Work (1–3max. 3)** Introductory foundation in descriptive statistics, probability theory, statistical inference, and bivariate statistics commonly used in evaluations of social program and clinical practice. Conceptual emphasis on understanding the logic of measurement and statistical inference. Understanding reinforced by hand calculations involving high school algebra. Fulfills SOC W 505 prerequisite.

**SOC W 598 Integrative Seminar (1–5, max. 12)** Integrates specialized knowledge in social work settings. Offered: AWSp.

**SOC W 599 Readings in Social Work (\*)** Independent Studies. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSp.

**SOC W 600 Independent Study or Research (\*)**

**SOC W 700 Master's Thesis (\*)**

CHERNIAVSKY, EVA, Adjunct Professor, 2005; PhD, 1990, University of California (Berkeley)

CHRISMAN, LAURA H, Adjunct Professor, 2005; DPhil, 1992, University of Oxford (UK)

CICHOWSKI, RACHEL A, Adjunct Associate Professor, 2001; MA, 1997, University of California (Irvine); PhD, 2001, University of California (Irvine)

CLATTERBAUGH, KENNETH C. \* Adjunct Professor, 1966; PhD, 1966, Indiana University

CONNORS, CATHERINE M. \* Adjunct Associate Professor, 1990; MA, 1986, University of Michigan; PhD, 1989, University of Michigan

COOKE, CHERYL L., Adjunct Assistant Professor, 2004; MSN, 1999, University of Washington; PhD, 2002, University of Washington

CUMMINGS, KATHERINE \* Adjunct Associate Professor, 1985; MA, 1979, Montclair State University; PhD, 1985, University of Wisconsin (Madison)

DANBY, COLIN, Adjunct Professor, 1998; MA, 1992, University of Massachusetts; PhD, 1997, University of Massachusetts

DI STEFANO, CHRISTINE \* Adjunct Associate Professor, 1985; PhD, 1984, University of Massachusetts; MA, 1984, University of Massachusetts

DONG, YUE, Adjunct Associate Professor, 1996; MA, 1989, Beijing University, China; MA, 1991, University of Oregon; PhD, 1996, University of California (San Diego)

ENGLAND, KIM V.L., Adjunct Professor, 1999; MA, 1984, Ohio State University; PhD, 1988, Ohio State University

ENSIGN, B. JOSEPHINE \* Adjunct Associate Professor, 1995; MS, 1986, Virginia College of Medicine; MPH, 1992, Johns Hopkins University; 1994, Johns Hopkins University

FRIEDMAN, KATHIE, Adjunct Associate Professor, 1990; MA, 1979, State University of New York (Binghamton); PhD, 1992, State University of New York (Binghamton)

GARCIA, MARIA E, Adjunct Assistant Professor, 2008; MA, 1996, Brown University; PhD, 2001, Brown University

GAVEL ADAMS, ANN-CHARLOTTE \* Adjunct Professor, 1990; MA, 1968, University of Uppsala (Sweden); MA, 1975, Linköping University (Sweden); PhD, 1990, University of Washington

GILLESPIE, DIANE, Adjunct Professor, 1998; MA, 1971, Southern Illinois University; PhD, 1982, University of Nebraska

GINORIO, ANGELA B \* Associate Professor, 1993; MA, 1971, University of Puerto Rico; PhD, 1979, Fordham University

GLENN, SUSAN A \* Adjunct Professor, 1993; MA, 1975, University of California (San Diego); PhD, 1983, University of California (Berkeley)

GOLDSMITH, LAYNE \* Adjunct Professor, 1983; MA, 1975, San Jose State University; MFA, 1979, Cranbrook Academy of Art

GORBMAN, CLAUDIA L. \* Adjunct Professor, 1990; MA, 1971, University of Washington; PhD, 1978, University of Washington

HABELL-PALLAN, MICHELLE, Associate Professor, 2001; MA, 1993, University of California (San Diego); MA, 1994, University of California (San Diego); PhD, 1997, University of California (Santa Cruz)

HARKINS, GILLIAN H, Adjunct Associate Professor, 2002; PhD, 2002, University of California (Berkeley)

HEUVING, JEANNE D. \* Adjunct Professor, 1990; MA, 1982, University of Washington; PhD, 1988, University of Washington

HOWARD, JUDITH A \* Adjunct Professor, 1982; MA, 1977, University of Oregon; PhD, 1982, University of Wisconsin (Madison)

INGEBRITSEN, CHRISTINE, Adjunct Professor, 1993; MA, 1986, Columbia University; PhD, 1993, Cornell University

JACOBS, SUE-ELLEN \* Emeritus Professor, 1974; MA, 1966, University of Colorado (campus unspecified); PhD, 1970, University of Colorado (campus unspecified)

JAROSZ, LUCY A. \* Adjunct Associate Professor, 1990; MA, 1979, University of Wisconsin; PhD, 1990, University of California (Berkeley)

JEFFORDS, SUSAN E. \* Professor, 1985; MA, 1977, University of Pennsylvania; PhD, 1981, University of Pennsylvania

JOSEPH, RALINA L, Adjunct Assistant Professor, 2005; MA, 2001, University of California (San Diego); PhD, 2005, University of California (San Diego)

KAPLAN, SYDNEY J \* Adjunct Professor, 1971; MA, 1966, University of California (Los Angeles); PhD, 1971, University of California (Los Angeles)

KEMP, SUSAN, Adjunct Associate Professor, 1997; MA, 1981, University of Auckland (New Zealand); PhD, 1994, Columbia University

KENNEY, NANCY J \* Associate Professor, 1976; MA, 1972, University of Virginia; PhD, 1974, University of Virginia

KILLIEN, MARCIA G \* Adjunct Professor, 1977; MN, 1974, University of Washington; PhD, 1982, University of Washington

KLAWITTER, MARIEKA \* Adjunct Professor, 1992; MPP, 1983, University of Michigan; MS, 1986, University of Wisconsin; PhD, 1992, University of Wisconsin

LANG, SABINE, Adjunct Assistant Professor, 2005; MA, 1985, Free University Berlin; PhD, 1997, Free University Berlin

LAWSON, VICTORIA A. \* Adjunct Professor, 1986; MA, 1982, Ohio State University; PhD, 1986, Ohio State University

LERUM, KARI A, Adjunct Assistant Professor, 2002; MA, 1993, University of Washington; PhD, 2000, University of Washington

LOWE, CELIA, Adjunct Associate Professor, 1999; MPhil, 1996, Yale University; PhD, 2000, Yale University

LUNDBERG, SHELLY J \* Adjunct Professor, 1984; PhD, 1981, Northwestern University

MACK, EDWARD T, Adjunct Associate Professor, 2002; MA, 1996, Columbia University; PhD, 2002, Harvard University

MCGRATH, BARBARA B. \* Adjunct Research Associate Professor, 1995; MA, 1981, University of Washington; PhD, 1993, University of Washington

MITCHELL, KATHARYNE, Adjunct Professor, 1993; MA, 1989, University of California (Berkeley); PhD, 1993, University of California (Berkeley)

MURAKAWA, NAOMI D, Adjunct Assistant Professor, 2004; MSc, 1997, London School of Economics (UK); PhD, 2004, Yale University

NISHIME, LEILANI, Adjunct Assistant Professor, 2008; MA, 1991, University of Michigan; PhD, 1997, University of Michigan

NOBLE, KATHLEEN D. \* Professor, 1990; MEd, 1978, University of Washington; PhD, 1984, University of Washington

NOMURA, GAIL M., Adjunct Associate Professor, 1999; MA, 1971, University of California (Berkeley); PhD, 1978, University of Hawaii

OSANLOO, ARZOO, Adjunct Associate Professor, 2002; JD, 1993, American University; PhD, 2002, Stanford University  
PENA, DEVON G, Adjunct Professor, 2000; MA, 1978, University of Texas (Austin); PhD, 1983, University of Texas (Austin)

POIGER, UTA G. \* Adjunct Associate Professor, 1995; MA, 1990, Brown University; MA, 1990, University of Massachusetts; PhD, 1995, Brown University

RAMAMURTHY, PRITI, Associate Professor, 1997; MBA, 1978, Indian Institute of Management, India; MRP, 1982, Syracuse University; PhD, 1995, Syracuse University

RESKIN, BARBARA F, Adjunct Professor, 2002; MA, 1970, University of Washington; PhD, 1973, University of Washington

RETMAN, SONNET H., Adjunct Assistant Professor, 2002; PhD, 1997, University of California (Los Angeles)

ROBERTS, JEAN VALERIE \* Adjunct Associate Professor, 1992; MA, 1978, University of Pittsburgh; PhD, 1982, University of Pittsburgh

ROSE, ELAINA, Adjunct Associate Professor, 1994; MA, 1988, University of Pennsylvania; PhD, 1993, University of Pennsylvania

ROSS, LUANA K., Associate Professor, 1999; MSW, 1981, Portland State University; PhD, 1992, University of Oregon  
SALAS, ELIZABETH, Adjunct Associate Professor, 1987; MA, 1977, California State University, Los Angeles; PhD, 1987, University of California (Los Angeles)

SCHROEDER, CAROLE A. \* Adjunct Associate Professor, 1994; MSN, 1985, University of Nevada; PhD, 1993, University of Colorado (Denver)

SCHWARTZ, PEPPER J \* Adjunct Professor, 1974; MA, 1968, Washington University; MPhil, 1970, Yale University; PhD, 1974, Yale University

SEARS, LAURIE J \* Adjunct Professor, 1989; MA, 1977, University of Arizona; PhD, 1986, University of Wisconsin (Madison)

SILBERSTEIN, SANDRA V \* Adjunct Professor, 1982; MA, 1971, University of Michigan; PhD, 1982, University of Michigan

SIMONI, JANE M, Adjunct Professor, 2001; MA, 1988, University of California (Los Angeles); PhD, 1990, University of California (Los Angeles)

SIMPSON, CAROLINE CHUNG \* Adjunct Associate Professor, 1994; MA, 1989, University of Houston; PhD, 1994, University of Texas (Austin)

SOHNG, SUE \* Adjunct Associate Professor, 1990; MSW, 1979, Wayne State University; PhD, 1989, University of Pittsburgh

SOKOLOFF, NAOMI B. \* Adjunct Professor, 1985; MA, 1979, Princeton University; PhD, 1980, Princeton University

SORENSEN, CLARK W. \* Adjunct Associate Professor, 1989; MA, 1974, University of Washington; PhD, 1981, University of Washington

STACEY, ROBIN C \* Adjunct Professor, 1988; MA, 1979, Yale University; 1982, Oxford University (UK); MPhil, 1983, Yale University; PhD, 1986, Yale University

STECHER HANSEN, MARIANNE T \* Adjunct Associate Professor, 1991; MA, 1981, University of Washington; PhD, 1990, University of California (Berkeley)

STEELE, CYNTHIA, Adjunct Professor, 1986; MA, 1979, University of California (San Diego); PhD, 1980, University of California (San Diego)

STYGALL, GAIL \* Adjunct Professor, 1990; PhD, 1989, Indiana University

SWARR, AMANDA L, Assistant Professor, 2005; MA, 1998, University of Minnesota; PhD, 2003, University of Minnesota

TAYLOR, JANELLE S, Adjunct Associate Professor, 1999; MA, 1990, University of Chicago; PhD, 1999, University of Chicago

THOMAS, LYNN M., Adjunct Associate Professor, 1997; MA, 1989, Johns Hopkins University; MA, 1993, Northwestern University; PhD, 1997, University of Michigan

WEINBAUM, ALYS E., Adjunct Associate Professor, 1998; MA, 1990, University of Sussex (UK); MA, 1992, Columbia University; PhD, 1998, Columbia University

WELLAND, SASHA, Assistant Professor, 2004; MA, 1998, University of California (Santa Cruz); PhD, 2005, University of California (Santa Cruz)

WEST, CAROLYN M., Adjunct Associate Professor, 1997; MA, 1988, University of Missouri; PhD, 1994, University of Missouri

WOODS, NANCY \* Adjunct Professor, 1978; MN, 1969, University of Washington; PhD, 1978, University of North Carolina

WOODY, ANDREA I., Adjunct Associate Professor, 1997; PhD, 1996, University of Pittsburgh; PhD, 1997, University of Pittsburgh

WYLIE, MARGARET ALISON, Adjunct Professor, 2005; MA, 1979, State University of New York (Binghamton); PhD, 1982, State University of New York (Binghamton)

YEE, SHIRLEY J. \* Associate Professor, 1988; MA, 1983, Ohio State University; PhD, 1987, Ohio State University

SPRATLEN, THADDEUS H \* Emeritus Professor, 1972; MA, 1957, Ohio State University; PhD, 1962, Ohio State University

STEARNS, ELIZABETH P., Senior Lecturer, 1998; MBA, 1978, New York University

SULLIVAN, JEREMIAH J \* Emeritus Professor, 1978; MA, 1967, New York University; PhD, 1970, New York University; MBA, 1975, University of Washington

TURNER, DANIEL J., Senior Lecturer, 2001; MBA, 1993, Washington University; PhD, 2001, Northwestern University

WHEATLEY, JOHN J \* Emeritus Professor, 1960; MBA, 1954, State University of New York (Buffalo); PhD, 1959, State University of New York (Buffalo)

WHELAN, JOHN F., Lecturer, 2001; MA, 1977, Yale University

YALCH, RICHARD F \* Professor, 1974; MS, 1970, Carnegie Mellon University; PhD, 1974, Northwestern University

## School of Dentistry

## Dental Public Health Sciences

### Chair

Douglas S. Ramsay

AW, TAR C., Adjunct Associate Professor, 1995; DDS, 1990, Northwestern University; MS, 1995, University of Michigan  
CAMERON, CHERYL A, Professor, 1979; MEd, 1978, University of Kentucky; PhD, 1986, University of Washington; JD, 1994, Seattle University

CHAPKO, MICHAEL K \* Adjunct Research Professor, 1978; MA, 1970, Hunter College; PhD, 1972, City University of New York

COLDWELL, SUSAN E., Associate Professor, 1998; MA, 1990, University of Pennsylvania; PhD, 1994, University of Pennsylvania

CONRAD, DOUGLAS A, Professor, 1979; MHA, 1973, University of Washington; MBA, 1977, University of Chicago; PhD, 1978, University of Chicago

DE ROUEN, TIMOTHY, Professor, 1975; MS, 1969, Virginia Polytechnic Institute and State University; PhD, 1971, Virginia Polytechnic Institute and State University

DRANGSHOLT, MARK T., Associate Professor, 2002; DDS, 1984, University of Washington

FALES, MARTHA H \* Emeritus Professor, 1961; MA, 1968, University of Michigan; PhD, 1975, University of Michigan

GREMBOWSKI, DAVID, Professor, 1984; MA, 1975, Washington State University; PhD, 1982, University of Washington

HUANG, GREG J., Adjunct Associate Professor, 2002; DMD, 1987, University of Florida; MSD, 1989, University of Washington

HUJOEL, PHILIPPE P, Professor, 1993; DDS, 1984, University of Brussels (Belgium); MSD, 1986, University of Washington; PhD, 1993, University of Washington

LEROUX, BRIAN \* Professor, 1991; MSc, 1985, University of British Columbia (Canada); PhD, 1989, University of British Columbia (Canada)

MARTIN, MICHAEL D., Adjunct Professor, 1994; DMD, 1979, University of Kentucky; MPH, 1989, University of Washington; PhD, 1993, University of Washington; MSD, 1994, University of Washington

MILGROM, PETER M, Professor, 1974; DDS, 1972, University of California (San Francisco)

MOURADIAN, WENDY ELYSE, Adjunct Professor, 2000; MS, 1973, Massachusetts Institute of Technology; MD, 1977, Columbia University

RAMSAY, DOUGLAS S, Professor, 1990; DMD, 1983, University of Pennsylvania; PhD, 1988, University of Washington; MSW, 1990, University of Washington

WEINSTEIN, PHILIP \* Professor, 1974; MA, 1968, University of Kentucky; PhD, 1971, University of Kentucky

WELLS, NORMA J., Associate Professor, 1970; MPH, 1966, University of California (Los Angeles)

## Endodontics

### Chair

James D. Johnson

COHENCA, NESTOR, Associate Professor, 2008; DDS, 1990, National University of Asuncion (Paraguay)

FLAKE, NATASHA M., Assistant Professor, 2008; PhD, 2005, University of Maryland; DDS, 2005, University of Maryland; MSD, 2007, University of Washington

GUILD, ROBERT E, Emeritus Professor, 1963; PhD, 1955, University of Washington

HARRINGTON, GERALD W \* Emeritus Professor, 1970; DDS, 1959, St Louis University; MSD, 1969, University of Washington

NATKIN, EUGENE \* Emeritus Professor, 1964; DDS, 1957, New York University; MSD, 1962, University of Washington

PARANJPE, AVINA, Assistant Professor, 2009; MS, 2004, University of California (Los Angeles); PhD, 2007, University of California (Los Angeles); MSD, 2009, University of Washington

PITTS, DAVID LEROY \* Emeritus Associate Professor, 1977; DDS, 1972, Indiana University; MSD, 1977, University of Washington

## Oral and Maxillofacial Surgery

### Acting Chair

Dale S. Bloomquist

BEIRNE, OWEN ROSS \* Professor, 1985; DMD, 1972, Harvard University; PhD, 1976, University of California (San Francisco)

BLOOMQUIST, DALE S \* Emeritus Associate Professor, 1972; DDS, 1969, University of Washington; MS, 1972, Georgetown University

EGBERT, MARK A, Associate Professor, 1989; DDS, 1981, University of Washington

GEHRIG, JOHN D \* Emeritus Professor, 1954; DDS, 1946, University of Minnesota; MSD, 1951, University of Minnesota

HOHL, THOMAS H \* Clinical Associate Professor, 1976; DDS, 1971, Loyola University (Chicago)

KINNEY, LISA A, Associate Professor, 1996; DDS, 1982, Case Western Reserve University

KIYAK, H ASUMAN \* Professor, 1979; MA, 1974, Wayne State University; PhD, 1977, Wayne State University

MYALL, ROBERT W. \* Affiliate Professor, 1979; BDentS, 1964, London Hospital Medical College (UK); MD, 1975, University of British Columbia (Canada)

ODA, DOLPHINE \* Professor, 1985; BDentS, 1975, University of Baghdad (Iraq); MSc, 1980, University of Manitoba (Canada)

WORTHINGTON, PHILIP, Emeritus Professor, 1976; MBChB, 1956, University of Liverpool (UK); BDentS, 1959, University of Liverpool (UK)

## Oral Biology

### Acting Chair

Thomas H. Morton, Jr.

BORDIN, SANDRA \* Adjunct Research Professor, 1991; PhD, 1966, University of Ferrara (Italy)

BYERS, PETER H, Adjunct Professor, 1979; MD, 1969, Case Western Reserve University

CUNNINGHAM, MICHAEL L., Adjunct Professor, 1995; MD, 1988, University of Vermont; PhD, 1996, University of Washington

DALE-CRUNK, BEVERLY, Emeritus Professor, 1972; PhD, 1968, University of Michigan

DARVEAU, RICHARD P. \* Professor, 1989; MS, 1977, Northern Illinois University; PhD, 1981, Washington State University

EYRE, DAVID R., Adjunct Professor, 1985; PhD, 1969, University of Leeds (UK)

FOLCH, ALBERT, Adjunct Associate Professor, 2000; PhD, 1994, University of Barcelona (Spain)

GIACHELLI, CECILIA, Adjunct Professor, 1992; PhD, 1987, University of Washington

HERRING, SUSAN W., Professor, 1990; PhD, 1971, University of Chicago

IZUTSU, KENNETH \* Emeritus Professor, 1973; PhD, 1970, University of Washington

KING, GREGORY J., Adjunct Professor, 1996; DMD, 1969, Tufts University; MDSc, 1976, Harvard University

LE RESCHE, LINDA A \* Adjunct Professor, 1989; ScD, 1977, Johns Hopkins University

LUKEHART, SHEILA A, Adjunct Professor, 1980; PhD, 1978, University of California (Los Angeles)

MORTON, THOMAS H \* Professor, 1975; DDS, 1972, Creighton University; MSD, 1975, University of Washington

MUTHUKURU, MANOJ, Adjunct Assistant Professor, 2008; PhD, 2005, Stony Brook University; MMSc, 2008, Harvard School of Dental Medicine

NARAYANAN, A SAMPATH \* Adjunct Professor, 1975; MSc, 1963, University of Madras (India); PhD, 1967, University of Madras (India)

POPOWICS, TRACY, Associate Professor, 2001; PhD, 1997, Brown University

PRESLAND, RICHARD B \* Associate Professor, 1994; MSc, 1982, University of Otago (New Zealand); PhD, 1987, University of Adelaide (Australia)

RAMSAY, DOUGLAS S, Adjunct Professor, 1990; DMD, 1983, University of Pennsylvania; PhD, 1988, University of Washington; MSW, 1990, University of Washington

REYES, MORAYMA, Adjunct Assistant Professor, 2006; DPhil, 2001, University of Minnesota; MD, 2003, University of Minnesota

ROBERTS, FRANK A., Adjunct Associate Professor, 1996; DDS, 1990, University of Tennessee; PhD, 1996, University of Alabama

ROSE, TIMOTHY M, Adjunct Professor, 1991; PhD, 1981, University of Geneva (Switzerland)

SAMUDRALA, VAIKUNTANATH V, Adjunct Associate Professor, 2001; PhD, 1997, University of Maryland

SOMERMAN, MARTHA J, Adjunct Professor, 2002; MS, 1972, Hunter College; DDS, 1975, New York University; PhD, 1980, University of Rochester

STAYTON, PATRICK, Adjunct Professor, 1992; PhD, 1989, University of Illinois; MS, 1989, University of Illinois

WATAHA, JOHN C., Adjunct Professor, 2008; DMD, 1982, Oregon Health Sciences University; PhD, 1992, University of Michigan, Ann Arbor

WATSON, EILEEN L, Professor, 1974; PhD, 1970, University of Utah

WELLS, NORMA J., Adjunct Associate Professor, 1970; MPH, 1966, University of California (Los Angeles)

WHITE, THEODORE C \* Affiliate Professor, 1996; PhD, 1984, University of Michigan

YAGER, PAUL, Adjunct Professor, 1987; PhD, 1980, University of Oregon

## Oral Medicine

### Chair

Edmond L. Truelove

CHASTEEN, JOSEPH E, Emeritus Associate Professor, 1989; DDS, 1967, University of Michigan; MA, 1976, University of Michigan

CHEN, SSU-KUANG, Professor, 2006; DDS, 1986, National Taiwan University; MSD, 1989, University of Washington; PhD, 1993, University of Washington

DRANGSHOLT, MARK T., Associate Professor, 2002; DDS, 1984, University of Washington

DWORKIN, SAMUEL F \* Emeritus Professor, 1974; DDS, 1958, New York University; PhD, 1969, New York University

GOVIN, GLENN M., Lecturer, 1999; DDS, 1985, University of Texas (San Antonio); MPH, 1992, University of Texas (Houston)

HOLLENDER, LARS GOSTA \* Emeritus Professor, 1986; DDS, 1958, University of Lund (Sweden)

IZUTSU, KENNETH \* Professor, 1973; PhD, 1970, University of Washington

JURKOVIC, DAMIR, Lecturer, 2009; DDS, 1979, University of Zagreb (Yugoslavia)

KANAL, KALPANA M., Adjunct Assistant Professor, 2003; MS, 1991, University of Texas (unspecified); PhD, 1996, University of Texas (unspecified)

LE RESCHE, LINDA A \* Professor, 1989; ScD, 1977, Johns Hopkins University

MARTIN, MICHAEL D., Professor, 1994; DMD, 1979, University of Kentucky; MPH, 1989, University of Washington; PhD, 1993, University of Washington; MSD, 1994, University of Washington

MIDDGAUGH, DAN, Emeritus Assistant Professor, 1974; DDS, 1961, University of Minnesota; MPH, 1972, University of Washington

MORTON, THOMAS H \* Professor, 1975; DDS, 1972, Creighton University; MSD, 1975, University of Washington

OMNELL, KARL-AKE \* Emeritus Professor, 1981; DDS, 1950, Royal Dental School (Sweden); DO, 1957, University of Lund (Sweden)

PERSSON, GOSTA RUTGER \* Adjunct Research Professor, 1986; DDS, 1967, University of Lund (Sweden); PhD, 1978, University of Lund (Sweden)

SCHUBERT, MARK M \* Professor, 1985; DDS, 1974, University of Washington; MSD, 1981, University of Washington

TRUELOVE, EDMOND L \* Professor, 1972; DDS, 1967, Indiana University; MSD, 1971, Indiana University

## Orthodontics

### Chair

Greg J. Huang

BOLLEN, ANNE-MARIE, Professor, 1992; DDS, 1984, University of Brussels (Belgium); MSD, 1986, University of Michigan; PhD, 1990, University of Michigan

HALL, STANTON H \* Affiliate Professor, 1980; MS, 1967, Northwestern University; DDS, 1967, Northwestern University; PhD, 1974, University of Washington

HERRING, SUSAN W., Professor, 1990; PhD, 1971, University of Chicago

HUANG, GREG J., Associate Professor, 2002; DMD, 1987, University of Florida; MSD, 1989, University of Washington

JOONDEPH, DONALD R \* Emeritus Associate Professor, 1971; DDS, 1967, Northwestern University; MS, 1969, Northwestern University

KING, GREGORY J., Professor, 1996; DMD, 1969, Tufts University; MDS, 1976, Harvard University

KOKICH, VINCENT G \* Affiliate Professor, 1977; DDS, 1971, University of Washington; MSD, 1974, University of Washington

LITTLE, ROBERT M \* Emeritus Professor, 1974; DDS, 1966, Northwestern University; MSD, 1970, University of Washington; PhD, 1974, University of Washington

RAFFERTY, KATHERINE L., Assistant Professor, 2006; MA, 1990, New York University; PhD, 1996, Johns Hopkins University

RAMSAY, DOUGLAS S, Professor, 1990; DMD, 1983, University of Pennsylvania; PhD, 1988, University of Washington; MSW, 1990, University of Washington

## Pediatric Dentistry

### Chair

Joel H. Berg

BERG, JOEL H., Professor, 2001; DDS, 1983, University of Iowa; MS, 1985, University of Iowa

CHIGURUPATI, KAVITA, Adjunct Assistant Professor, 2009; MSD, 2001, University of Washington

COLDWELL, SUSAN E., Adjunct Associate Professor, 1998; MA, 1990, University of Pennsylvania; PhD, 1994, University of Pennsylvania

CUNNINGHAM, MICHAEL L., Adjunct Professor, 1995; MD, 1988, University of Vermont; PhD, 1996, University of Washington

DAVIS, JOHN M \* Emeritus Associate Professor, 1969; DDS, 1961, University of Washington; MSD, 1967, University of Washington

DOMOTO, PETER K \* Emeritus Professor, 1975; DDS, 1964, University of California (San Francisco); MPH, 1975, University of Washington

HUEBNER, COLLEEN ELLEN, Adjunct Associate Professor, 1996; PhD, 1991, University of Washington; MPH, 1994, University of Washington

KIM, SARA, Adjunct Associate Professor, 2000; MA, 1990, George Washington University; PhD, 1999, University of Washington

LEGGOTT, PENELOPE J \* Professor, 1993; BDentS, 1969, University of Bristol (UK); MSc, 1980, University of Illinois

LEWIS, CHARLOTTE, Adjunct Associate Professor, 2001; 1989, Cornell University; MD, 1994, University of California (San Francisco)

LIN, JENN-YIH, Assistant Professor, 2007; DDS, 1995, National Yang-Ming University (Taiwan); MS, 2003, Tufts University

MILGROM, PETER M, Adjunct Professor, 1974; DDS, 1972, University of California (San Francisco)

MOURAD, PIERRE, Adjunct Associate Professor, 2004; MS, 1982, University of Washington; PhD, 1987, University of Washington

MOURADIAN, WENDY ELYSE, Professor, 2000; MS, 1973, Massachusetts Institute of Technology; MD, 1977, Columbia University

PETERSON, DEVEREAUX \* Emeritus Associate Professor, 1982; MEd, 1975, University of Pittsburgh; DMD, 1975, University of Pittsburgh; MSD, 1977, University of Pittsburgh; PhD, 1980, University of Pittsburgh

RAMSAY, DOUGLAS S, Professor, 1990; DMD, 1983, University of Pennsylvania; PhD, 1988, University of Washington; MSW, 1990, University of Washington

RIVARA, FREDERICK P. \* Adjunct Professor, 1984; MD, 1974, University of Pennsylvania; MPH, 1980, University of Washington

ROBERTS, MARILYN C, Adjunct Professor, 1981; MS, 1977, University of Washington; PhD, 1978, University of Washington

ROBINS, LYNNE S \* Adjunct Professor, 1999; PhD, 1990, University of Michigan

SCHAAD, DOUGLAS C. \* Adjunct Associate Professor, 1986; MEd, 1974, University of Washington; PhD, 1986, University of Washington

WEINSTEIN, PHILIP \* Adjunct Professor, 1974; MA, 1968, University of Kentucky; PhD, 1971, University of Kentucky

WRIGHT, JEFFREY A., Adjunct Associate Professor, 1992; MD, 1978, University of Missouri (Kansas City)

## Periodontics

### Acting Chair

Richard P. Darveau

BORDIN, SANDRA \* Research Professor, 1991; PhD, 1966, University of Ferrara (Italy)

DARVEAU, RICHARD P. \* Professor, 1989; MS, 1977, Northern Illinois University; PhD, 1981, Washington State University

FLEMMIG, THOMAS F., Professor, 2005; DMD, 1985, Albert Ludwig Universität (Germany); PhD, 1992, Julius Maximilians University (Germany); MBA, 2005, Duke University

HONG, SUL KI, Assistant Professor, 2009; DDS, 1993, University of San Paulo (Brazil)

HUJOEL, PHILIPPE P, Adjunct Professor, 1993; DDS, 1984, University of Brussels (Belgium); MSD, 1986, University of Washington; PhD, 1993, University of Washington

JOHNSON, ROBERT H \* Emeritus Professor, 1981; DDS, 1962, McGill University (Canada); MSD, 1964, Indiana University

MUTHUKURU, MANOJ, Assistant Professor, 2008; PhD, 2005, Stony Brook University; MMSc, 2008, Harvard School of Dental Medicine

O'NEAL, ROBERT B. \* Associate Professor, 1995; DMD, 1971, University of South Carolina; MEd, 1974, Wayne State University; MS, 1977, Walter Reed Army Medical Center

PAGE, ROY C \* Emeritus Professor, 1967; DDS, 1957, University of Maryland; PhD, 1967, University of Washington

PERSSON, GOSTA RUTGER \* Research Professor, 1986; DDS, 1967, University of Lund (Sweden); PhD, 1978, University of Lund (Sweden)

ROBERTS, FRANK A., Associate Professor, 1996; DDS, 1990, University of Tennessee; PhD, 1996, University of Alabama

ROBINOVITCH, MURRAY \* Emeritus Professor, 1968; DDS, 1961, University of Minnesota; PhD, 1967, University of Washington

SELIPSKY, HERBERT \* Affiliate Professor, 1974; MSD, 1973, University of Washington

SOMERMAN, MARTHA J, Professor, 2002; MS, 1972, Hunter College; DDS, 1975, New York University; PhD, 1980, University of Rochester

## Restorative Dentistry

### Chair

John C. Wataha

AW, TAR C., Associate Professor, 1995; DDS, 1990, Northwestern University; MS, 1995, University of Michigan

BALES, DAVID J, Emeritus Associate Professor, 1983; DDS, 1957, University of Washington; MSD, 1972, Indiana University

FREDERIKSEN, JOHN R, Professor, 2001; PhD, 1966, Princeton University; MA, 1966, Princeton University

FREEHILL, MAURICE F \* Emeritus Professor, 1962; MA, 1947, Stanford University; EdD, 1948, Stanford University

GAY, GENEVA, Professor, 1991; MA, 1969, University of Akron; PhD, 1972, University of Texas (Austin)

GEHRKE, NATHALIE J, Professor, 1979; MA, 1972, Northwestern University; PhD, 1976, Arizona State University

GINSBERG, MARGERIE, Associate Professor, 2004; MA, 1983, Colorado State University; PhD, 1989, University of Colorado (Boulder)

GLENN, ALLEN D., Emeritus Professor, 1989; MS, 1968, Kansas State Teacher's College; PhD, 1970, University of Michigan; MA, 1970, University of Michigan

GOODLAD, JOHN I \* Emeritus Professor, 1991; MA, 1946, University of British Columbia (Canada); PhD, 1949, University of Chicago; EdD, 1982, Eastern Michigan University

GRAY, CAROL A \* Emeritus Associate Professor, 1971; MEd, 1968, Western Washington State College; PhD, 1971, University of Washington

HANSEN-KRENING, NANCY M \* Emeritus Associate Professor, 1974; MEd, 1973, University of Oregon; PhD, 1974, University of Oregon

HARING, NORRIS GROVER \* Emeritus Professor, 1965; MA, 1950, University of Nebraska, campus unspecified; EdD, 1956, Syracuse University

HAWKINS, JOHN D, Adjunct Professor, 1976; MA, 1969, Northwestern University; PhD, 1975, Northwestern University

HERRENKOHL, LESLIE R., Associate Professor, 1996; MA, 1991, Clark University; PhD, 1995, Clark University

HONIG, MEREDITH I., Associate Professor, 2006; PhD, 2001, Stanford University

HUDSON, ROXANNE, Assistant Professor, 2006; MEd, 1994, Western Washington University; PhD, 2002, University of Florida

HUNE, SHIRLEY, Professor, 2007; PhD, 1979, George Washington University

HUNKINS, FRANCIS PETER \* Emeritus Professor, 1966; MEd, 1963, Boston University; PhD, 1966, Kent State University

JAROLIMEK, JOHN \* Emeritus Professor, 1962; MA, 1949, University of Minnesota; PhD, 1955, University of Minnesota

JEGATHEESAN, BRINDA I., Assistant Professor, 2006; MEd, 2000, University of Hawaii; PhD, 2005, University of Illinois

JENKINS, JOSEPH R, Professor, 1978; PhD, 1967, University of Minnesota

JILK, LISA, Senior Lecturer, 2009; MS, 1999, California State University, Hayward; PhD, 2007, Michigan State University

JONES, DIANE CARLSON, Professor, 1996; MA, 1969, University of Texas (unspecified); MA, 1977, Wayne State University; PhD, 1980, Wayne State University

JONES, JANINE, Assistant Professor, 2005; MA, 1994, University of Southern California; PhD, 1999, University of Texas (unspecified)

JOSEPH, GAIL, Assistant Professor, 2007; MEd, 1995, Western Washington University; PhD, 2001, University of Washington

KALTSOUNIS, THEODORE \* Emeritus Professor, 1968; MA, 1959, University of Wichita; PhD, 1961, University of Illinois

KAZEMI, ELHAM, Associate Professor, 1999; MA, 1997, University of California (Los Angeles); PhD, 1999, University of California (Los Angeles)

KERDEMAN, DEBORAH, Associate Professor, 1991; MEd, 1981, University of Southern California; MA, 1981, Hebrew Union College; MA, 1988, Stanford University; PhD, 1991, Stanford University

KERR, DONNA H, Professor, 1978; PhD, 1973, Columbia University

KERR, STEPHEN T, Professor, 1985; MA, 1969, Columbia University; PhD, 1975, University of Washington

KIMBALL, KATHLEEN L., Senior Lecturer, 1998; MEd, 1972, University of Utah; EdD, 1993, University of Washington

KLOCKARS, ALAN J, Emeritus Professor, 1968; MA, 1963, Oregon State University; PhD, 1967, University of Washington

KNAPP, MICHAEL S., Professor, 1990; MEd, 1976, Harvard University; MA, 1979, Stanford University; PhD, 1981, Stanford University

KUHL, PATRICIA K, Adjunct Professor, 1977; MA, 1971, University of Minnesota; PhD, 1973, University of Minnesota

LI, MIN, Associate Professor, 2002; MA, 1997, Beijing Normal University (China); PhD, 2002, Stanford University

LOTT, JOE, Assistant Professor, 2007; MPA, 2000, Louisiana State University; PhD, 2005, Louisiana State University

LOVITT, THOMAS C \* Emeritus Professor, 1966; MM, 1960, University of Kansas; EdD, 1966, University of Kansas

LOWENBRAUN, SHEILA \* Emeritus Professor, 1969; MA, 1962, Columbia University; PhD, 1969, Columbia University

MADSEN, DAVID L \* Emeritus Professor, 1962; MA, 1954, University of Chicago; PhD, 1961, University of Chicago

MAZZA, JAMES J., Professor, 1996; MS, 1990, University of Wisconsin (Madison); PhD, 1993, University of Wisconsin (Madison)

MC CARTIN, ROSEMARIE E \* Emeritus Professor, 1969; MA, 1960, Immaculate Heart College, Ca; PhD, 1964, University of Southern California

MCCUTCHEN, DEBORAH ELAINE, Professor, 1986; MA, 1978, University of Pittsburgh; PhD, 1985, University of Pittsburgh

MCDONALD, MORVA A., Assistant Professor, 2006; MA, 1999, Stanford University; PhD, 2003, Stanford University

MELTZOFF, ANDREW N, Adjunct Professor, 1980; PhD, 1976, Oxford University (UK)

MIZOKAWA, DONALD T, Emeritus Professor, 1975; MEd, 1969, University of Hawaii; PhD, 1974, Indiana University  
MORISHIMA, JAMES K \* Emeritus Professor, 1972; PhD, 1967, University of Washington

NERAD, MARESI, Associate Professor, 2001; MA, 1973, Darmstadt University of Tech, Germany; PhD, 1988, University of California (Berkeley)

NOLEN, SUSAN B., Professor, 1990; MEd, 1976, Lewis and Clark College; PhD, 1986, Purdue University

OLSWANG, STEVEN G, Emeritus Professor, 1984; JD, 1971, University of Illinois; PhD, 1977, University of Washington

PARKER, WALTER C, Professor, 1985; MA, 1978, University of Colorado (Denver); PhD, 1982, University of Washington

PECK, CHARLES A, Professor, 2003; MA, 1976, Sonoma State University; PhD, 1984, University of California (Santa Barbara)

PECKHAM, PERCY D \* Emeritus Professor, 1968; MA, 1955, University of Denver; PhD, 1968, University of Colorado (Denver)

PLECKI, MARGARET L, Associate Professor, 1994; MS, 1976, University of Illinois; PhD, 1991, University of California (Berkeley)

PORTIN, BRADLEY S, Adjunct Professor, 1995; MEd, 1987, Seattle Pacific University; DPhil, 1995, Oxford University (UK)

RYCKMAN, DAVID B \* Emeritus Professor, 1969; EdD, 1966, University of Illinois

SANDALL, SUSAN R., Associate Professor, 1999; MS, 1977, University of Oregon; PhD, 1986, University of Washington

SCHWARTZ, ILENE SHARON, Professor, 1991; MA, 1986, University of Kansas; PhD, 1989, University of Kansas

SEBESTA, SAM L \* Emeritus Professor, 1963; MA, 1960, Northwestern University; EdD, 1963, Stanford University

SMITH, JOHN P \* Emeritus Associate Professor, 1969; MEd, 1963, University of Missouri; EdD, 1969, Stanford University

STANDAL, TIMOTHY, Emeritus Professor, 1976; MEd, 1974, Western Washington College; PhD, 1976, University of Minnesota

STRITIKUS, TOM, Associate Professor, 2000; MA, 1997, University of California (Berkeley); PhD, 2000, University of California (Berkeley)

TAYLOR, CATHERINE S., Associate Professor, 1991; MSE, 1978, University of Kansas; PhD, 1986, University of Kansas

TAYLOR, EDWARD, Associate Professor, 1995; MA, 1983, Gonzaga University; PhD, 1994, University of Washington

THALBERG, STANTON P \* Emeritus Associate Professor, 1965; MA, 1959, University of Iowa; PhD, 1964, University of Iowa

THOMPSON, MARIE D, Emeritus Professor, 1971; MA, 1968, University of Washington; PhD, 1970, University of Washington

TOSTBERG, ROBERT E \* Emeritus Professor, 1962; MA, 1958, University of Wisconsin; PhD, 1960, University of Wisconsin (Madison)

VALENCIA, SHEILA DENISE W, Professor, 1989; MEd, 1976, State University of New York (Buffalo); PhD, 1978, University of Colorado (Boulder)

VARGHESE, MANKA M., Assistant Professor, 2004; MS, 1994, University of Pennsylvania; PhD, 2000, University of Pennsylvania

VASQUEZ, JAMES A \* Emeritus Associate Professor, 1980; MA, 1971, University of California (Los Angeles); PhD, 1973, University of California (Los Angeles)

WASLEY, PATRICIA A, Professor, 2000; MA, 1982, Western Washington University; EdD, 1989, University of Washington

WEST, ELIZABETH A., Assistant Professor, 2006; MEd, 1994, University of Washington; PhD, 2003, University of Washington

WHITE, OWEN R, Professor, 1981; MA, 1970, University of Oregon; PhD, 1971, University of Oregon

WILLIAMS, DONALD T \* Emeritus Professor, 1969; MA, 1957, Stanford University; PhD, 1963, Stanford University

WILLIAMS, RICHARD C. \* Emeritus Professor, 1998; MA, 1963, University of Minnesota; PhD, 1966, University of Minnesota

WILLIAMSON-LOTT, JOY ANN, Associate Professor, 2007; MA, 1995, University of Illinois (Urbana); PhD, 1998, University of Illinois (Urbana)

WINDSCHITL, MARK A, Associate Professor, 1996; MS, 1993, Iowa State University; PhD, 1995, Iowa State University

ZEICHNER, KENNETH, Professor, 2009; MA, 1970, Syracuse University; PhD, 1976, Syracuse University

ZUMETA, WILLIAM M. \* Professor, 1985; MPP, 1973, University of California (Berkeley); PhD, 1978, University of California (Berkeley)

MONTGOMERY, DAVID R \* Adjunct Professor, 1991; PhD, 1991, University of California (Berkeley)

MORGAN, MICHAEL S, Adjunct Professor, 1974; DSc, 1972, Massachusetts Institute of Technology

MUENCH, STEPHEN T, Assistant Professor, 2004; MSCE, 1998, University of Washington; PhD, 2004, University of Washington

NECE, RONALD E \* Emeritus Professor, 1959; MS, 1951, Lehigh University; DSc, 1958, Massachusetts Institute of Technology

NEMATI, KAMRAN M., Adjunct Associate Professor, 1998; MS, 1982, University of California (Irvine); MEng, 1985, University of California (Berkeley); MCP, 1989, University of California (Berkeley); PhD, 1994, University of California (Berkeley)

NIHAN, NANCY L \* Professor, 1973; MSCE, 1967, Northwestern University; PhD, 1970, Northwestern University

PALMER, RICHARD \* Affiliate Professor, 1979; MS, 1973, Stanford University; PhD, 1979, Johns Hopkins University  
PARSONS, JEFFREY D \* Affiliate Assistant Professor, 2000; MSCE, 1995, University of Illinois (Urbana); PhD, 1998, University of Illinois (Urbana)

PETROFF, CATHERINE \* Affiliate Assistant Professor, 1993; MS, 1983, Stanford University; PhD, 1993, California Institute of Technology

PILAT, MICHAEL J \* Emeritus Professor, 1967; MS, 1963, University of Washington; PhD, 1967, University of Washington

REED, DOROTHY \* Professor, 1983; MSE, 1977, Princeton University; PhD, 1980, Princeton University

RICHEY, JEFFREY E \* Adjunct Professor, 1976; 1970, University of North Carolina; PhD, 1973, University of California (Davis)

ROEDER, CHARLES W. \* Professor, 1977; MS, 1971, University of Illinois; PhD, 1977, University of California (Berkeley)

RUTHERFORD, G SCOTT, Professor, 1980; MSCE, 1968, Washington State University; PhD, 1974, Northwestern University

SAWHILL, ROY, Emeritus Professor, 1956; MEng, 1952, University of California (Berkeley)

SCHNEIDER, JERRY \* Emeritus Professor, 1968; MCP, 1961, University of California (campus unspecified); PhD, 1966, University of Pennsylvania

SPYRIDAKIS, DIMITRIS \* Emeritus Associate Professor, 1973; MS, 1959, University of Wisconsin; PhD, 1965, University of Wisconsin (Madison)

STAHL, DAVID A, Professor, 2000; MS, 1975, University of Illinois (Urbana); PhD, 1978, University of Illinois (Urbana)

STANTON, JOHN F, Professor, 1978; MSCE, 1975, Cornell University; PhD, 1978, University of California (Berkeley)

STEINEMANN, ANNE, Professor, 2004; MS, 1985, University of California (Los Angeles); PhD, 1993, Stanford University

STENSEL, H. DAVID \* Professor, 1983; 1968, Cornell University; PhD, 1971, Cornell University

STRAUSSER, HOWARD \* Emeritus Associate Professor, 1955; MSCE, 1950, Johns Hopkins University

SYLVESTER, ROBERT O, Emeritus Professor, 1947; MS, 1941, Harvard University

TERREL, RONALD L, Emeritus Professor, 1967; MSCE, 1961, Purdue University; PhD, 1967, University of California (Berkeley)

TURKIYYAH, GEORGE \* Associate Professor, 1991; MS, 1986, Carnegie Mellon University; PhD, 1990, Carnegie Mellon University

VERNEZ-MOUDON, ANNE \* Adjunct Professor, 1982; DSc, 1987, Ecole Polytechnique Federale De Lausanne

WANG, YINHAI, Associate Professor, 2002; MSCE, 1991, Tsinghua University (China); PhD, 1998, University of Tokyo (Japan)

WELCH, EUGENE B \* Emeritus Professor, 1968; MS, 1959, Michigan State University; PhD, 1967, University of Washington

WENK, EDWARD, Emeritus Professor, 1970; MS, 1947, Harvard University; PhD, 1950, Johns Hopkins University

WILSON, DENISE M \* Adjunct Associate Professor, 1991; MSEE, 1989, Georgia Institute of Technology; PhD, 1995, Georgia Institute of Technology

YEH, HARRY H \* Affiliate Professor, 1983; MS, 1977, Washington State University; PhD, 1983, University of California (Berkeley)

ZABINSKY, ZELDA \* Adjunct Professor, 1985; MS, 1984, University of Michigan; PhD, 1985, University of Michigan

## Oceanography

### Director

Russell E. McDuff

AAGAARD, KNUT \* Emeritus Professor, 1968; MS, 1964, University of Washington; PhD, 1966, University of Washington

ANDERSON, GEORGE C, Emeritus Professor, 1958; MA, 1949, University of British Columbia (Canada); PhD, 1954, University of Washington

ARMBRUST, E. VIRGINIA, Professor, 1996; PhD, 1990, Massachusetts Institute of Technology

BANSE, KARL \* Emeritus Professor, 1960; Doct, 1955, University of Kiel (Germany)

BAROSS, JOHN A \* Professor, 1984; MA, 1966, San Francisco State; PhD, 1973, University of Washington

CANNON, GLENN A. \* Affiliate Professor, 1969; MA, 1965, Johns Hopkins University; PhD, 1969, Johns Hopkins University

CARPENTER, ROY \* Emeritus Professor, 1968; PhD, 1968, University of California (San Diego)

CATTOLICO, ROSE A., Adjunct Professor, 1975; MA, 1968, Temple University; PhD, 1973, State University of New York (Stony Brook)

CREAGER, JOE S \* Emeritus Professor, 1958; MS, 1953, Texas A&M University; PhD, 1958, Texas A&M University

DELANEY, JOHN R. \* Professor, 1980; MA, 1967, University of Virginia; PhD, 1977, University of Arizona

DEMING, JODY W \* Professor, 1988; PhD, 1981, University of Maryland

DEVOL, ALLAN H \* Professor, 1979; PhD, 1975, University of Washington

DUXBURY, ALYN C \* Emeritus Associate Professor, 1963; MS, 1956, University of Washington; PhD, 1963, Texas A&M University

EMERSON, STEVEN R. \* Professor, 1976; MPhil, 1973, Columbia University; PhD, 1974, Columbia University

ERIKSEN, CHARLES C \* Professor, 1986; PhD, 1977, Massachusetts Institute of Technology

EWART, TERRY E \* Emeritus Professor, 1997; PhD, 1965, University of Washington

FEELY, RICHARD A \* Affiliate Professor, 1986; MS, 1971, Texas A&M University; PhD, 1974, Texas A&M University

FROST, BRUCE W \* Emeritus Professor, 1969; PhD, 1969, University of California (San Diego)

GAMMON, RICHARD H \* Emeritus Professor, 1977; MA, 1966, Harvard University; PhD, 1970, Harvard University

GREGG, MICHAEL C \* Professor, 1977; PhD, 1971, Scripps Institute of Technology

GRUNBAUM, DANIEL, Associate Professor, 1998; MSME, 1987, University of Washington; PhD, 1991, Cornell University

HARRISON, DON EDMUNDS \* Affiliate Professor, 1985; MS, 1973, Harvard University; PhD, 1977, Harvard University

HAUTALA, SUSAN L, Associate Professor, 1995; PhD, 1992, University of Washington

HEATH, G ROSS \* Emeritus Professor, 1984; PhD, 1968, Scripps Oceanographic Institution

HICKEY, BARBARA M \* Professor, 1973; MS, 1969, University of California (San Diego); PhD, 1975, University of California (San Diego)

HORNER-DEVINE, ALEXANDER, Adjunct Assistant Professor, 2004; MEng, 1998, Stanford University; DPhil, 2003, Stanford University

INGALLS, ANITRA E., Assistant Professor, 2004; MS, 1998, State University of New York (Stony Brook); PhD, 2002, State University of New York (Stony Brook)

JOHNSON, GREGORY C \* Affiliate Professor, 1997; PhD, 1990, Massachusetts Institute of Technology

JOHNSON, HARLAN PAUL \* Professor, 1978; MS, 1966, Southern Illinois University; PhD, 1972, University of Washington

KAWASE, MITSUHIRO, Associate Professor, 1990; MA, 1983, Princeton University; PhD, 1986, Princeton University

KEIL, RICHARD G \* Associate Professor, 1995; PhD, 1991, University of Delaware

KEISTER, JULIE E, Assistant Professor, 2008; MS, 1996, University of Maryland; PhD, 2008, Oregon State University

KELLEY, DEBORAH S. \* Professor, 1999; MSc, 1987, University of Washington; PhD, 1990, Dalhousie University (Canada)

KESSLER, WILLIAM S \* Affiliate Professor, 1997; PhD, 1989, University of Washington

KUNZE, ERIC L \* Affiliate Professor, 1987; MS, 1982, University of Washington; PhD, 1985, University of Washington

LESSARD, EVELYN J. \* Associate Professor, 1989; MS, 1979, University of Rhode Island; PhD, 1984, University of Rhode Island

LEWIS, BRIAN T \* Emeritus Professor, 1973; PhD, 1970, University of Wisconsin (Madison)

LILLEY, MARVIN D. \* Professor, 1986; MS, 1970, University of Arkansas; PhD, 1983, Oregon State University

LOGSDON, MILES G., Senior Lecturer, 2000; MS, 1978, Oklahoma State University; PhD, 1997, University of Washington

MAC CREADY, PARKER \* Professor, 1994; MS, 1986, California Institute of Technology; PhD, 1991, University of Washington

MARTIN, SEELYE \* Professor, 1968; PhD, 1967, Johns Hopkins University

MC DUFF, RUSSELL E \* Professor, 1981; PhD, 1978, University of California (San Diego)

MC MANUS, DEAN A \* Emeritus Professor, 1963; PhD, 1959, University of Kansas

MC PHADEN, MICHAEL J \* Affiliate Professor, 1984; PhD, 1980, Scripps Oceanographic Institution

MORISON, JAMES H \* Affiliate Professor, 1972; MS, 1972, University of California (Davis); PhD, 1980, University of Washington

MORRIS, ROBERT, Assistant Professor, 2007; PhD, 2004, Oregon State University

MURRAY, JAMES W \* Professor, 1974; PhD, 1973, Massachusetts Institute of Technology

NELSON, BRUCE K., Adjunct Professor, 1986; MS, 1980, University of Kansas; PhD, 1985, University of California (Los Angeles)

NITTROUER, CHARLES \* Professor, 1998; MS, 1974, University of Washington; PhD, 1978, University of Washington

NOWELL, ARTHUR R \* Professor, 1978; MA, 1971, University of British Columbia (Canada); PhD, 1975, University of British Columbia (Canada)

OGSTON, ANDREA S, Associate Professor, 2000; MS, 1993, University of Washington; PhD, 1997, University of Washington

PARSONS, JEFFREY D \* Affiliate Assistant Professor, 2000; MSCE, 1995, University of Illinois (Urbana); PhD, 1998, University of Illinois (Urbana)

## FACULTY LISTING: THE INFORMATION SCHOOL 575

PERRY, MARY J. \* Affiliate Professor, 1976; PhD, 1974, University of California (San Diego)

QUAY, PAUL D \* Professor, 1981; MPhil, 1975, Columbia University; PhD, 1977, Columbia University

RATTRAY, MAURICE \* Emeritus Professor, 1950; MS, 1947, California Institute of Technology; PhD, 1951, California Institute of Technology

RHINES, PETER B. \* Professor, 1984; MS, 1964, Massachusetts Institute of Technology; PhD, 1967, Cambridge University (UK)

RICHEY, JEFFREY E \* Professor, 1976; 1970, University of North Carolina; PhD, 1973, University of California (Davis)

RISER, STEPHEN C, Professor, 1982; MS, 1974, Massachusetts Institute of Technology; PhD, 1980, University of Rhode Island

ROCAP, GABRIELLE L., Associate Professor, 2001; PhD, 2000, Massachusetts Institute of Technology

SACHS, JULIAN P., Associate Professor, 2006; PhD, 1997, Massachusetts Institute of Technology

SHEETS, BENJAMIN A, Assistant Professor, 2008; PhD, 2004, University of Minnesota

SOLOMON, EVAN A, Assistant Professor, 2009; PhD, 2007, Scripps Oceanographic Institution

STERNBERG, RICHARD \* Emeritus Professor, 1965; MS, 1961, University of Washington; PhD, 1965, University of Washington

THOMPSON, LUANNE, Associate Professor, 1993; MA, 1986, Harvard University; PhD, 1990, Woods Hole Oceanographic Institution

WARNER, MARK J \* Associate Professor, 1992; PhD, 1988, University of California (San Diego)

WILCOCK, WILLIAM S D, Professor, 1993; MSc, 1986, Imperial College; PhD, 1992, Massachusetts Institute of Technology

## The Information School

BARKER, SCOTT F, Senior Lecturer, 1999; MS, 1987, Syracuse University

BARZILAI-NAHON, KARINE, Assistant Professor, 2004; MSc, 2000, Tel Aviv University (Israel); PhD, 2001, Tel Aviv University (Israel)

BENNE, MAE M \* Emeritus Professor, 1965; MS, 1955, University of Illinois

BOIKO, ROBERT B., Senior Lecturer, 2001; MS, 1985, University of Utah

BORNING, ALAN H \* Adjunct Professor, 1980; MS, 1974, Stanford University; PhD, 1979, Stanford University

BORRIELLO, GAETANO, Adjunct Professor, 1988; MS, 1980, Stanford University; PhD, 1988, Stanford University

BROOKS, TERRENCE A \* Associate Professor, 1986; MLS, 1971, McGill University (Canada); MBA, 1975, York University (Canada); PhD, 1981, University of Texas (Austin)

BRUCE, HARRY, Professor, 1998; MLibr, 1993, University of New S. Wales (Australia); PhD, 1996, University of New South Wales (Australia)

CARLYLE, ALLYSON, Associate Professor, 1996; MLS, 1986, University of California (Los Angeles); PhD, 1994, University of California (Los Angeles)

CLEMENTS, DARLEEN A., Lecturer, 2007; MLIS, 2006, University of Washington

CRANDALL, MICHAEL D., Senior Lecturer, 2005; MLS, 1986, University of Washington

DESOUZA, KEVIN C, Assistant Professor, 2005; MBA, 2001, Illinois Institute of Technology; PhD, 2006, University of Illinois

DRESANG, ELIZA T, Professor, 2009; MLS, 1966, University of California (Los Angeles); PhD, 1981, University of Wisconsin (Madison)

## 576 FACULTY LISTING: INTERDISCIPLINARY GRADUATE PROGRAMS

EFTHIMIADIS, EFTHIMIS \* Associate Professor, 1999; MSc, 1984, City University, London (England); PhD, 1992, City University, London (England)

EISENBERG, MICHAEL., Professor, 1998; MLS, 1973, State University of New York (Albany); PhD, 1986, Syracuse University

ENDICOTT, BARBARA E., Senior Lecturer, 2005; MB, 1985, University of Washington; MS, 1987, Seattle Pacific University; PhD, 2005, University of Idaho

FIDEL, RAYA \* Professor, 1982; MLS, 1976, Hebrew University (Israel); PhD, 1982, University of Maryland

FISHER, KAREN E, Professor, 2000; MLIS, 1991, University of Western Ontario (Canada); PhD, 1997, University of Western Ontario (Canada)

FOOT, KIRSTEN A, Adjunct Associate Professor, 2001; MA, 1990, Wheaton College; PhD, 1999, University of California (San Diego)

FRIEDMAN, BATYA \* Professor, 1999; PhD, 1988, University of California (Berkeley)

FULLER, SHERRILYNNE \* Professor, 1996; MLS, 1968, Indiana University; PhD, 1984, University of Southern California

FUSCO, LISA M., Lecturer, 2004; MLS, 1997, Kent State University

GOMEZ, RICARDO J, Assistant Professor, 2008; MA, 1992, Université du Québec; PhD, 1997, Cornell University

HAZELTON, PENELOPE A \* Adjunct Professor, 1985; JD, 1975, Lewis And Clark College; MLL, 1976, University of Washington

HENDRY, DAVID, Associate Professor, 2002; MSc, 1989, University of Guelph (Canada); PhD, 1996, The Robert Gordon University (Scotland)

HIATT, PETER \* Emeritus Professor, 1974; MLS, 1957, Rutgers University; PhD, 1963, Rutgers University

HILL, TRENT G., Senior Lecturer, 2005; MA, 1988, Duke University; PhD, 1994, Duke University; MLIS, 2002, University of Washington

JANES, JOSEPH W., Associate Professor, 1999; MLS, 1983, Syracuse University; PhD, 1989, Syracuse University

JOHNSON, RONALD A., Associate Professor, 1995; MA, 1972, University of Chicago; MS, 1975, University of Southern California

KAHN, PETER H., Adjunct Associate Professor, 2000; MA, 1984, University of California (Berkeley); PhD, 1988, University of California (Berkeley)

KIENTZ, JULIE A, Assistant Professor, 2008; PhD, 2008, Georgia Institute of Technology

KLEIT, RACHEL G., Adjunct Associate Professor, 1999; MA, 1993, Tufts University; PhD, 1999, University of North Carolina, Chapel Hill

KO, ANDREW J, Assistant Professor, 2008; PhD, 2008, Carnegie Mellon University

KOLKO, BETH E, Adjunct Associate Professor, 2000; MA, 1991, University of Texas (Austin); PhD, 1994, University of Texas (Austin)

LANDAY, JAMES A, Adjunct Associate Professor, 2003; MS, 1993, Carnegie Mellon University; PhD, 1996, Carnegie Mellon University

LEE, CHARLOTTE P, Adjunct Assistant Professor, 2008; MA, 1997, San Jose State University; PhD, 2004, University of California (Los Angeles)

LEE, JIN HA, Assistant Professor, 2009; MS, 2002, University of Illinois; PhD, 2008, University of Illinois

LEVY, DAVID M, Professor, 2001; MS, 1974, Stanford University; PhD, 1979, Stanford University

MASON, ROBERT M, Professor, 2005; MS, 1965, Massachusetts Institute of Technology; PhD, 1973, Georgia Institute of Technology

MCDONALD, DAVID W, Associate Professor, 2002; MS, 1992, California State University, Hayward; MS, 1995,

University of California (Irvine); PhD, 2000, University of California (Irvine)

METOYER, CHERYL, Associate Professor, 2003; MA, 1969, Immaculate Heart College, Ca; PhD, 1976, Indiana University

MIGNON, EDMOND \* Emeritus Associate Professor, 1970; MA, 1952, Syracuse University; MLS, 1959, University of Washington; PhD, 1976, University of California (Berkeley)

MOORE, ADAM DANIEL, Associate Professor, 2003; MA, 1993, Ohio State University; PhD, 1997, Ohio State University

NELSON, JEROLD A \* Emeritus Assistant Professor, 1971; MA, 1964, University of Minnesota; PhD, 1971, University of California (Berkeley)

PRATT, WANDA, Associate Professor, 2002; MS, 1991, University of Texas (Austin); PhD, 1999, Stanford University

RAMEY, JUDITH A \* Adjunct Professor, 1983; MA, 1971, University of Texas (unspecified); PhD, 1983, University of Texas (unspecified)

SAXTON, MATTHEW, Senior Lecturer, 2000; MLS, 1994, University of California (Los Angeles); PhD, 2000, University of California (Los Angeles)

SCHOLL, HANS JOCHEN, Associate Professor, 2003; MBA, 1997, Grad Sch of Business Admin Zurich Switze; PhD, 2002, State University of New York (Albany)

SOPER, MARY E \* Emeritus Assistant Professor, 1972; MS, 1963, University of Illinois; PhD, 1972, University of Illinois

SUTTON, STUART A \* Emeritus Associate Professor, 1999; MA, 1968, San Francisco State; JD, 1981, Golden Gate University; LLM, 1982, University of California (Berkeley); MLS, 1987, University of California (Berkeley); PhD, 1991, University of California (Berkeley)

TAYLOR, HAZEL A, Assistant Professor, 2005; MSc, 1978, University of Otago (New Zealand); PhD, 2004, Queensland University of Technology(Australia)

TENNIS, JOSEPH T., Assistant Professor, 2007; MLIS, 1999, Indiana University; PhD, 2005, University of Washington

WOBBEROCK, JACOB O, Assistant Professor, 2006; MS, 2000, Stanford University; PhD, 2006, Carnegie Mellon University

## Biomolecular Structure and Design

### Director

Valerie Daggett

ANDERSEN, NIELS \* Professor, 1968; PhD, 1967, Northwestern University

BAKER, DAVID \* Professor, 1993; PhD, 1989, University of California (Berkeley)

BRYERS, JAMES D, Professor, 2009; MSc, 1976, University of Idaho; PhD, 1980, Rice University

CATALANO, CARLOS E., Professor, 2006; PharmD, 1983, University of California (San Francisco); PhD, 1987, University of California (San Francisco)

CLARK, JOHN I, Professor, 1982; PhD, 1974, University of Washington

DAGGETT, VALERIE D., Professor, 1993; PhD, 1990, University of California (San Francisco)

GELB, MICHAEL H. \* Professor, 1985; PhD, 1982, Yale University

GONEN, TAMIR, Assistant Professor, 2005; PhD, 2002, University of Auckland (New Zealand)

HAHN, STEVEN M. \* Affiliate Professor, 1996; PhD, 1984, Brandeis University

HOL, WILHELMUS G.J., Professor, 1992; MS, 1966, Technical University (Eindhoven); PhD, 1971, University of Groningen (Netherlands)

KLEVIT, RACHEL E, Professor, 1986; DPhil, 1981, Oxford University (UK)

LEE, KELLY K., Assistant Professor, 2009; PhD, 2001, Johns Hopkins University

MALY, DUSTIN JAMES, Assistant Professor, 2006; PhD, 2002, University of California (Berkeley)

PARSON, WILLIAM W \* Professor, 1967; PhD, 1965, Case Western Reserve University

REGNIER, MICHAEL, Professor, 1997; MS, 1983, Portland State University; PhD, 1991, University of Southern California

SIMON, JULIAN A. \* Affiliate Associate Professor, 2003; MA, 1984, Columbia University; MPhil, 1986, Columbia University; PhD, 1991, Columbia University

STAYTON, PATRICK, Professor, 1992; PhD, 1989, University of Illinois; MS, 1989, University of Illinois

STENKAMP, RONALD E, Professor, 1981; MS, 1971, University of Washington; PhD, 1975, University of Washington

STODDARD, BARRY L. \* Affiliate Professor, 1999; PhD, 1990, Massachusetts Institute of Technology

STRONG, ROLAND K \* Affiliate Professor, 2002; PhD, 1990, Harvard University

THOMAS, WENDY, Assistant Professor, 2004; PhD, 2003, University of Washington; MS, 2003, University of Washington

VARANI, GABRIELE, Professor, 2001; PhD, 1987, University of Milan (Italy)

VERLINDE, CHRISTOPHE, Associate Professor, 1995; PhD, 1988, Catholic University of Leuven (Belgium)

XU, WENQING, Professor, 1999; MS, 1988, Chinese Academy of Sciences (China); PhD, 1995, Massachusetts Institute of Technology

ZHENG, NING, Associate Professor, 2002; PhD, 1997, University of Texas (Southwestern)

## Biology Teaching

### Chair

Douglas Sprugel

AMMIRATI, JOSEPH F, Professor, 1979; MA, 1967, San Francisco State; PhD, 1972, University of Michigan

BOERSMA, P DEE \* Professor, 1974; PhD, 1974, Ohio State University

CONQUEST, LOVEDAY L \* Professor, 1978; MS, 1972, Stanford University; PhD, 1975, University of Washington

EATON, DAVID L, Professor, 1979; PhD, 1978, University of Kansas

ETTL, GREGORY J, Associate Professor, 2006; MAT, 1989, University of Washington; PhD, 1995, University of Washington

HILLE RIS LAMBERS, JANNEKE, Assistant Professor, 2006; PhD, 2001, Duke University

HINCKLEY, THOMAS M \* Professor, 1980; PhD, 1971, University of Washington

LAIRD, CHARLES D \* Professor, 1971; PhD, 1966, Stanford University

MARZLUFF, JOHN M., Professor, 1997; MSc, 1983, Northern Arizona University; PhD, 1987, Northern Arizona University

NICKERSON, DEBORAH A, Professor, 1992; PhD, 1978, University of Tennessee

OTT, SUSAN M, Associate Professor, 1983; MD, 1974, University of Washington

SIBLEY, CAROL HOPKINS, Professor, 1976; MA, 1966, University of Rochester; MS, 1970, University of Rochester; PhD, 1974, University of California (San Francisco)

SPRUGEL, DOUGLAS GEORGE \* Professor, 1987; PhD, 1974, Yale University; MPhil, 1974, Yale University

SWALLA, BILLIE J., Professor, 1999; MS, 1983, University of Iowa; PhD, 1988, University of Iowa

TRAXLER, BETH A \* Associate Professor, 1992; PhD, 1987, Carnegie Mellon University

VAN VOLKENBURGH, ELIZABETH, Professor, 1986; PhD, 1980, University of Washington

WAKIMOTO, BARBARA T, Professor, 1984; PhD, 1981, Indiana University

WINDSCHITL, MARK A, Associate Professor, 1996; MS, 1993, Iowa State University; PhD, 1995, Iowa State University

## Global Trade, Transportation, and Logistics Studies

### Director

Thomas Schmitt

BAE, CHRISTINE, Associate Professor, 1996; MRP, 1986, State University of New York (Albany); PhD, 1994, University of Southern California

CURRAN, SARA R, Associate Professor, 2005; MS, 1990, North Carolina State University; PhD, 1994, University of North Carolina

GOODCHILD, ANNE V., Assistant Professor, 2005; MS, 2002, University of California (Berkeley); PhD, 2005, University of California (Berkeley)

HANSON, STEPHEN E \* Professor, 1991; MA, 1986, University of California (Berkeley); PhD, 1991, University of California (Berkeley)

HARRINGTON, JAMES W. \* Professor, 1997; MA, 1980, University of Washington; PhD, 1983, University of Washington

JAIN, APURVA, Associate Professor, 1999; MS, 1989, National Inst Training Engin (Bombay); PhD, 1999, Purdue University

MACLACHLAN, DOUGLAS \* Professor, 1971; MBA, 1965, University of California (Berkeley); MA, 1970, University of California (Berkeley); PhD, 1971, University of California (Berkeley)

MAHONEY, JOE PAUL \* Professor, 1978; MSCE, 1970, Texas A&M University; PhD, 1979, Texas A&M University

RUTHERFORD, G SCOTT, Professor, 1980; MSCE, 1968, Washington State University; PhD, 1974, Northwestern University

SCHMITT, THOMAS G \* Associate Professor, 1979; MBA, 1974, University of Cincinnati; DBA, 1979, Indiana University

STORCH, RICHARD \* Professor, 1978; MS, 1968, Massachusetts Institute of Technology; PhD, 1978, University of Washington

## Health Services Administration

### Director

William E. Welton

CONRAD, DOUGLAS A, Professor, 1979; MHA, 1973, University of Washington; MBA, 1977, University of Chicago; PhD, 1978, University of Chicago

DOWLING, WILLIAM L, Professor, 1974; MBA, 1961, University of Chicago; MA, 1970, University of Michigan; PhD, 1971, University of Michigan

GREMBOWSKI, DAVID, Professor, 1984; MA, 1975, Washington State University; PhD, 1982, University of Washington

KOPIAR, BRANKO, Associate Professor, 2000; MD, 1987, University of Zagreb (Yugoslavia); MSc, 1991, University

of Zagreb (Yugoslavia); PhD, 1996, University of Oslo (Norway)

KUSZLER, PATRICIA CAROL, Professor, 1994; MD, 1978, Mayo Medical School/Graduate School; JD, 1991, Yale University

MASTROIANNI, ANNA C., Associate Professor, 1998; JD, 1986, University of Pennsylvania; MPH, 1997, University of Washington

MASUDA, DAVID, Lecturer, 2005; MD, 1980, University of North Dakota; MS, 1996, University of Wisconsin (Madison)

NORRIS, THOMAS E., Professor, 1992; MD, 1973, University of Texas (Galveston)

STILLMAN, DENNIS, Senior Lecturer, 2000; MHA, 1979, University of Washington

WALKER, EDWARD A., Professor, 1993; MM, 1979, Catholic University of America; MD, 1983, University of Washington

WATTS, CAROLYN A., Professor, 1976; MA, 1974, Johns Hopkins University; PhD, 1976, Johns Hopkins University

WELTON, WILLIAM E., Senior Lecturer, 2005; MHA, 1972, University of Michigan; DPH, 1999, University of Michigan

ZIERLER, BRENDA, Associate Professor, 1996; PhD, 1996, University of Washington

## Molecular and Cellular Biology

### Director

David Raible

ADEREM, ALAN A. \* Affiliate Professor, 1996; PhD, 1979, University of Capetown (South Africa)

ASBURY, CHARLES L, Assistant Professor, 2004; MS, 1993, Tulane University; PhD, 1999, University of Washington

BAJJALIEH, SANDRA M., Professor, 1995; MS, 1983, University of Illinois; PhD, 1989, University of Wisconsin (Madison)

BAKER, DAVID \* Professor, 1993; PhD, 1989, University of California (Berkeley)

BEAVO, JOSEPH A, Professor, 1977; PhD, 1970, Vanderbilt University

BEDALOV, ANTONIO, Assistant Professor, 2004; MD, 1989, University of Zagreb (Yugoslavia); DSc, 1998, University of Zagreb (Yugoslavia)

BENDICH, ARNOLD J, Professor Emeritus, 1970; PhD, 1969, University of Washington

BERG, CELESTE A, Professor, 1990; MS, 1981, Yale University; PhD, 1986, Yale University

BERMINGHAM-MCDONOGH, O, Associate Professor, 2001; PhD, 1987, University of California (Los Angeles)

BEVAN, MICHAEL J. \* Professor, 1990; MSc, 1968, University of London, UK; PhD, 1972, National Inst for Medical Research (UK)

BLAU, CARL A., Professor, 1997; MD, 1986, Ohio State University

BOMSZTYK, KAROL, Professor, 1984; MD, 1977, University of Rochester

BORNFELDT, KARIN E \* Professor, 1995; PhD, 1991, Linkoping University (Sweden)

BOTHWELL, MARK ALLEN, Professor, 1985; PhD, 1975, University of California (Berkeley)

BOWEN-POPE, DANIEL \* Professor, 1982; PhD, 1979, University of California (Berkeley)

BRENOWITZ, ELIOT A. \* Professor, 1987; PhD, 1982, Cornell University

BREWER, BONITA J, Professor, 1989; PhD, 1979, University of Washington

## 578 FACULTY LISTING: INTERDISCIPLINARY GRADUATE PROGRAMS

BROCKERHOFF, SUSAN E., Associate Professor, 1997; PhD, 1993, University of Washington

BUMGARNER, ROGER E., Associate Professor, 1998; MS, 1983, Eastern Illinois University; PhD, 1988, University of Arizona

BYERS, PETER H., Professor, 1979; MD, 1969, Case Western Reserve University

CAMPBELL, LEE ANN, Professor, 1985; MS, 1979, Pennsylvania State University; PhD, 1982, Pennsylvania State University

CARLSON, STEVEN S., Professor, 1985; PhD, 1975, University of California (Berkeley)

CARTER, WILLIAM G \* Affiliate Professor, 1981; PhD, 1974, University of California (Davis)

CATTERALL, WILLIAM A \* Professor, 1977; PhD, 1972, Johns Hopkins University

CATTOLICO, ROSE A., Professor, 1975; MA, 1968, Temple University; PhD, 1973, State Univ of New York (Stony Brook)

CHAMBERLAIN, JEFFREY S., Professor, 2000; PhD, 1985, University of Washington

CHAMPOUX, JAMES J., Professor, 1972; PhD, 1970, Stanford University

CHAVKIN, CHARLES, Professor, 1984; PhD, 1982, Stanford University

CHIN, MICHAEL T, Associate Professor, 2006; PhD, 1988, University of Rochester; MD, 1991, University of Rochester

CLARK, EDWARD A \* Professor, 1979; PhD, 1977, University of California (Los Angeles)

CLARK, JOHN I., Professor, 1982; PhD, 1974, University of Washington

CLURMAN, BRUCE E., Professor, 1998; PhD, 1988, Cornell University; MD, 1989, Cornell University

COLLINS, STEVEN J \* Professor, 1980; MD, 1973, Columbia University

COOKSON, BRAD T, Professor, 1996; PhD, 1991, Washington University; MD, 1991, Washington University

COOPER, JONATHAN A. \* Affiliate Professor, 1993; MA, 1973, University of Cambridge (UK); PhD, 1976, University of Warwick (UK)

COREY, LAWRENCE \* Professor, 1977; MD, 1971, University of Michigan

CUNNINGHAM, MICHAEL L., Professor, 1995; MD, 1988, University of Vermont; PhD, 1996, University of Washington

DARVEAU, RICHARD P. \* Professor, 1989; MS, 1977, Northern Illinois University; PhD, 1981, Washington State University

DAVIS, TRISHA NELL, Professor, 1987; PhD, 1983, Yale University

DE LA IGLESIA, HORACIO O., Associate Professor, 2003; MA, 1991, University of Buenos Aires (Argentina); PhD, 1997, University of Massachusetts

DHAKA, AJAY K, Assistant Professor, 2009; PhD, 2002, University of California (Los Angeles)

DISTECHE, CHRISTINE M \* Professor, 1983; PhD, 1976, University of Liege (Belgium)

DOTY, SHARON L, Associate Professor, 2003; PhD, 1995, University of Washington

DUNHAM, MAITREYA J, Assistant Professor, 2008; PhD, 2003, Stanford University

EISENMAN, ROBERT M \* Affiliate Professor, 1976; PhD, 1971, University of Chicago

ELKON, KEITH B, Professor, 2001; MD, 1974, University of Witwatersrand (S. Africa)

FANG, FERRIC C., Professor, 2001; MD, 1983, Harvard University

FARR, ANDREW G \* Professor, 1982; PhD, 1975, University of Chicago

FAUSTMAN, ELAINE M., Professor, 1983; PhD, 1981, Michigan State University

FAUSTO, NELSON \* Professor, 1994; MD, 1960, Universidade de Sao Paulo

FERO, MATTHEW L., Associate Professor, 2000; MD, 1990, University of California (Irvine)

FIELDS, STANLEY, Professor, 1995; MA, 1978, Cambridge University (UK); PhD, 1981, Cambridge University (UK)

FINK, PAMELA J., Professor, 1990; PhD, 1981, Massachusetts Institute of Technology

FROEHNER, STANLEY C, Professor, 2000; PhD, 1973, California Institute of Technology

FURLONG, CLEMENT E. \* Research Professor, 1977; PhD, 1968, University of California (Davis)

GALE, MICHAEL J, Associate Professor, 1999; PhD, 1994, University of Washington

GALLOWAY, DENISE A \* Research Professor, 1982; PhD, 1976, City University of New York

GARDNER, RICHARD G., Assistant Professor, 2006; PhD, 2000, University of California (San Diego)

GEBALLE, ADAM PHILIP \* Professor, 1994; MD, 1978, Duke University

GELB, MICHAEL H. \* Professor, 1985; PhD, 1982, Yale University

GIACHELLI, CECILIA, Professor, 1992; PhD, 1987, University of Washington

GONEN, TAMIR, Assistant Professor, 2005; PhD, 2002, University of Auckland (New Zealand)

GOODLETT, DAVID R., Professor, 2004; MS, 1988, Auburn University; PhD, 1991, Auburn University

GORDON, SHARONA E., Associate Professor, 1999; PhD, 1993, Brown University

GOTTSCHLING, DANIEL E \* Affiliate Professor, 1996; MS, 1980, University of Colorado (campus unspecified); PhD, 1984, University of Colorado (campus unspecified)

GOVERMAN, JOAN M, Professor, 1992; PhD, 1981, University of California (Los Angeles)

GRADY, WILLIAM M., Associate Professor, 2004; MD, 1990, University of Michigan

GREENBERG, E. PETER, Professor, 2005; MS, 1972, University of Iowa; PhD, 1977, Harvard University

GROSS, TED S, Professor, 2000; MS, 1985, Pennsylvania State University; PhD, 1993, State Univ of New York (Stony Brook)

GROUDINE, MARK \* Professor, 1979; MD, 1975, University of Pennsylvania; PhD, 1976, University of Pennsylvania

HAGUE, CHRIS, Assistant Professor, 2005; PhD, 2002, Creighton University

HAHN, STEVEN M. \* Affiliate Professor, 1996; PhD, 1984, Brandeis University

HALL, BENJAMIN D, Professor Emeritus, 1963; MA, 1956, Harvard University; PhD, 1959, Harvard University

HARWOOD, CAROLINE, Professor, 2005; MA, 1976, Boston University; PhD, 1982, University of Massachusetts

HEINECKE, JAY W, Professor, 2004; MD, 1981, Washington University

HEVNER, ROBERT F, Professor, 2000; PhD, 1992, University of Michigan; MD, 1992, University of Michigan

HILLE, BERTIL, Professor, 1968; PhD, 1967, Rockefeller University

HILLE, MERRILL \* Professor, 1976; PhD, 1965, Rockefeller University

HOCKENBERY, DAVID M. \* Professor, 1994; MD, 1982, Washington University

HOL, WILHELMUS G.J., Professor, 1992; MS, 1966, Technical University (Eindhoven); PhD, 1971, University of Groningen (Netherlands)

HOOD, LEROY E. \* Affiliate Professor, 1992; MD, 1964, Johns Hopkins University; PhD, 1968, California Institute of Technology

HORWITZ, MARSHALL S, Professor, 1995; PhD, 1988, University of Washington; MD, 1990, University of Washington

HURLEY, JAMES BRYANT, Professor, 1985; PhD, 1979, University of Illinois

IMAIZUMI, TAKATO, Assistant Professor, 2008; MS, 1998, Tokyo Metropolitan University; PhD, 2001, Tokyo Metropolitan University

IRITANI, BRIAN M, Associate Professor, 1999; DVM, 1988, Washington State University; PhD, 1997, University of Washington

JEROME, KEITH R, Associate Professor, 2001; PhD, 1992, Duke University; MD, 1993, Duke University

KAEBERLEIN, MATT R, Assistant Professor, 2006; PhD, 2002, Massachusetts Institute of Technology

KAJA, MURALI KRISHNA, Associate Professor, 2001; MSc, 1988, University of Hyderabad (India); PhD, 1995, Indian Institute of Technology (India)

KATZE, MICHAEL GERALD \* Professor, 1987; MS, 1978, Hahnemann Medical College; PhD, 1980, Hahnemann Medical College

KENNEDY, BRIAN K., Associate Professor, 2001; PhD, 1996, Massachusetts Institute of Technology

KIEM, HANS-PETER, Professor, 1998; MD, 1987, University of Ulm (Germany)

KIMELMAN, DAVID, Professor, 1989; PhD, 1985, Harvard University

KING, MARY-CLAIRE \* Professor, 1995; PhD, 1973, University of California (Berkeley)

KLEVIT, RACHEL E, Professor, 1986; DPhil, 1981, Oxford University (UK)

LAFLAMME, MICHAEL A., Assistant Professor, 2006; PhD, 1998, Emory University; MD, 1999, Emory University

LAGUNOFF, MICHAEL, Associate Professor, 2001; PhD, 1995, University of Chicago

LAIRD, CHARLES D \* Professor, 1971; PhD, 1966, Stanford University

LAMPE, PAUL D, Professor, 1996; PhD, 1984, University of Minnesota

LEIGH, JOHN A., Professor, 1985; MS, 1979, University of Illinois; PhD, 1983, University of Illinois

LI, WEIQING, Assistant Professor, 2005; MS, 1989, Shanghai University (China); PhD, 1998, University of Colorado (Boulder)

LIDSTROM, MARY E., Professor, 1977; MS, 1975, University of Wisconsin (Madison); PhD, 1977, University of Wisconsin (Madison)

LINGAPPA, JAISRI \* Associate Professor, 1999; PhD, 1985, Harvard University; MD, 1987, University of Massachusetts

LOEB, LAWRENCE A, Professor, 1978; MD, 1961, New York University; PhD, 1967, University of California (Berkeley)

MACCOSS, MICHAEL, Associate Professor, 2004; PhD, 2001, University of Vermont

MAIZELS, NANCY, Professor, 2000; PhD, 1974, Harvard University

MANOIL, COLIN C., Professor, 1986; PhD, 1979, Stanford University

MCELRAITH, MARGARET JULIANA, Professor, 1990; PhD, 1978, Medical University of South Carolina; MD, 1980, Medical University of South Carolina

MERZ, ALEXEY, Assistant Professor, 2004; PhD, 2000, Oregon Health Sciences University

MILLER, SAMUEL I \* Professor, 1995; MD, 1979, Baylor College of Medicine

MOENS, CECILIA B \* Affiliate Associate Professor, 2004; PhD, 1993, University of Toronto (Canada)

MONNAT, RAYMOND J \* Professor, 1985; MD, 1976, University of Chicago

MOODY, WILLIAM J \* Professor, 1982; PhD, 1977, Stanford University

MOON, RANDALL T. \* Professor, 1985; PhD, 1982, University of Washington

MORRIS, DAVID R, Professor, 1966; PhD, 1964, University of Illinois

MOSELEY, STEPHEN L. \* Professor, 1985; MS, 1978, Catholic University of America; PhD, 1981, University of Washington

MOUGOUS, JOSEPH D, Assistant Professor, 2008; PhD, 2004, University of California (Berkeley)

## Urban Design and Planning

### Director

Marina Alberti

ABRAMSON, DANIEL B, Associate Professor, 2001; MArch, 1992, Massachusetts Institute of Technology; MCP, 1992, Massachusetts Institute of Technology; PhD, 1998, Tsinghua University (China)

ALBERTI, MARINA \* Professor, 1996; PhD, 1992, Massachusetts Institute of Technology

BAE, CHRISTINE, Associate Professor, 1996; MRP, 1986, State University of New York (Albany); PhD, 1994, University of Southern California

BEYERS, WILLIAM B \* Professor, 1968; PhD, 1967, University of Washington

BLANCO, HILDA J. \* Professor Emeritus, 1996; MRP, 1984, University of California (Berkeley); PhD, 1989, University of California (Berkeley)

BORN, BRANDEN M, Assistant Professor, 2003; MS, 1998, University of Wisconsin (Madison); PhD, 2003, University of Wisconsin (Madison)

BORNING, ALAN H \* Professor, 1980; MS, 1974, Stanford University; PhD, 1979, Stanford University

BORRIELLO, GAETANO, Professor, 1988; MS, 1980, Stanford University; PhD, 1988, Stanford University

BOSTROM, ANN, Professor, 2007; MBA, 1986, Western Washington University; PhD, 1990, Carnegie Mellon University

BRADLEY, GORDON A, Professor, 1973; MLA, 1972, University of California (Berkeley); PhD, 1986, University of Michigan

CHEN, QIUZI, Associate Professor, 2009; MS, 1995, New Jersey Institute of Technology; PhD, 2001, University of California (Davis)

CULLEN, ALISON \* Professor, 1995; MS, 1989, Harvard University; DSc, 1992, Harvard University

DELISLE, JAMES R, Associate Professor, 2002; MS, 1976, University of Wisconsin (Madison); PhD, 1981, University of Wisconsin (Madison)

DUNCAN, GLEN E, Associate Professor, 2003; MS, 1994, Ball State University; PhD, 1997, University of Tennessee

DREWNOWSKI, ADAM, Professor, 1998; MA, 1971, Oxford University (UK); PhD, 1977, Rockefeller University

ELLIS, JOHN MARK, Professor, 1999; MA, 1984, Indiana University; PhD, 1988, Indiana University

ELWOOD-FAUSTINO, SARAH A., Associate Professor, 2006; MA, 1996, University of Minnesota; PhD, 2000, University of Minnesota

FAUSTMAN, ELAINE M., Professor, 1983; PhD, 1981, Michigan State University

GOODCHILD, ANNE V., Assistant Professor, 2005; MS, 2002, University of California (Berkeley); PhD, 2005, University of California (Berkeley)

GUTTORG, PETER \* Professor, 1980; MA, 1976, University of California (Berkeley); PhD, 1980, University of California (Berkeley)

HARRINGTON, JAMES W. \* Professor, 1997; MA, 1980, University of Washington; PhD, 1983, University of Washington

HOU, JEFFREY, Associate Professor, 2001; MArch, 1993, University of Pennsylvania; MArch, 1994, University of California (Berkeley); PhD, 2001, University of California (Berkeley)

KAHN, MIRIAM \* Professor, 1986; MA, 1974, Bryn Mawr College; PhD, 1980, Bryn Mawr College

KLEIT, RACHEL G., Associate Professor, 1999; MA, 1993, Tufts University; PhD, 1999, University of North Carolina, Chapel Hill

LARSON, TIMOTHY \* Professor, 1983; MS, 1972, University of Washington; PhD, 1976, University of Washington

LAWLER, JOSHUA J, Assistant Professor, 2007; MS, 1997, Utah State University; PhD, 2000, Utah State University

LAYTON, DAVID F, Professor, 2001; MA, 1993, University of Washington; PhD, 1995, University of Washington

LEE, ROBERT G, Professor Emeritus, 1978; 1969, Yale University; PhD, 1973, University of California (Berkeley)

LOGSDON, MILES G., Senior Lecturer, 2000; MS, 1978, Oklahoma State University; PhD, 1997, University of Washington

LUMLEY, THOMAS S., Associate Professor, 1998; MSc, 1994, University of Oxford (UK); PhD, 1998, University of Washington

MANZO, LYNNE C, Associate Professor, 2001; MA, 1988, City University of New York; PhD, 1994, City University of New York

MARZLUFF, JOHN M., Professor, 1997; MSc, 1983, Northern Arizona University; PhD, 1987, Northern Arizona University

MILLER, DONALD H \* Professor, 1973; MCP, 1960, University of California (Berkeley); PhD, 1972, University of California (Berkeley)

MONTGOMERY, DAVID R \* Professor, 1991; PhD, 1991, University of California (Berkeley)

VERNEZ-MOUDON, ANNE \* Professor, 1982; DSc, 1987, Ecole Polytechnique Federale De Lausanne

MUGERAUER, ROBERT, Professor, 2000; PhD, 1973, University of Texas (Austin)

NAIMAN, ROBERT J, Professor, 1993; MA, 1971, University of California (Los Angeles); PhD, 1974, Arizona State University

NYERGES, TIMOTHY L. \* Professor, 1985; MA, 1976, Ohio State University; PhD, 1980, Ohio State University

PRAKASH, VIKRAMADITYA \* Professor, 1996; MA, 1989, Cornell University; PhD, 1994, Cornell University

PURCELL, MARK H., Associate Professor, 2000; MA, 1995, University of California (Los Angeles); PhD, 1998, University of California (Los Angeles)

RYAN, CLARE, Professor, 1997; MS, 1990, University of Michigan, Ann Arbor; PhD, 1996, University of Michigan, Ann Arbor

SHEN, QING, Professor, 2009; MA, 1986, University of British Columbia (Canada); PhD, 1993, University of California (Berkeley)

TEWKSBURY, JOSHUA J, Associate Professor, 2003; PhD, 2000, University of Montana

WHITTINGTON, JANICE M, Assistant Professor, 2008; MA, 1993, Calif Polytechnic State (San Luis Obis); PhD, 2008, University of California (Berkeley)

WITHERS, SUZANNE D, Associate Professor, 1997; MA, 1988, Queen's University At Kingston (Canada); PhD, 1992, University of California (Los Angeles)

ZERBE, RICHARD O., Professor, 1975; PhD, 1969, Duke University

## Interschool and Intercollege Programs

### Bioengineering

#### Chair

Paul Yager

AEBERSOLD, RUDOLF HANS \* Affiliate Professor, 1993; PhD, 1983, University of Basel (Switzerland)

ALLAN, CHRISTOPHER H, Adjunct Associate Professor, 1998; MD, 1992, Northwestern University

AUTH, DAVID C \* Affiliate Professor, 1969; MS, 1966, Georgetown University; PhD, 1969, Georgetown University

BAKER, DAVID \* Adjunct Professor, 1993; PhD, 1989, University of California (Berkeley)

BANEYX, FRANCOIS \* Adjunct Professor, 1992; PhD, 1991, University of Texas (Austin)

BARRETT, PETER HUGH RUSSEL \* Affiliate Professor, 1991; PhD, 1989, University of Adelaide (Australia)

BASHEIN, GERARD \* Adjunct Professor, 1980; MS, 1964, Carnegie Mellon University; PhD, 1969, Carnegie Mellon University; MD, 1974, University of New Mexico

BASSINGTHWAIGHTE, JAMES, Professor, 1975; MD, 1955, University of Toronto (Canada); PhD, 1964, Mayo Medical School/Graduate School

BOHRINGER, KARL F., Professor, 1998; MS, 1992, Cornell University; PhD, 1997, Cornell University

BRYERS, JAMES D, Professor, 2009; MSc, 1976, University of Idaho; PhD, 1980, Rice University

BURKE, JAMES V. \* Adjunct Professor, 1985; PhD, 1983, University of Illinois

CALDWELL, JAMES H, Adjunct Professor, 1979; MD, 1970, University of Missouri

CASTNER, DAVID G. \* Professor, 1990; PhD, 1979, University of California (Berkeley)

CAVANAGH, PETER R, Adjunct Professor, 2008; PhD, 1972, University of London, UK; DSc, 2004, University of London, UK

CHIZECK, HOWARD JAY \* Adjunct Professor, 1998; MS, 1976, Case Western Reserve University; ScD, 1982, Massachusetts Institute of Technology

CONLEY, KEVIN E \* Adjunct Professor, 1988; PhD, 1983, University of Wisconsin (Madison); MS, 1983, University of Wisconsin

CRUM, LAWRENCE A. \* Research Professor, 1992; MS, 1965, Ohio University; PhD, 1967, Ohio University

DAGER, STEPHEN R \* Adjunct Professor, 1986; MD, 1978, University of Nebraska

DAGGETT, VALERIE D., Professor, 1993; PhD, 1990, University of California (San Francisco)

DANIEL, THOMAS L. \* Adjunct Professor, 1984; MS, 1978, University of Wisconsin; PhD, 1982, Duke University

FOLCH, ALBERT, Associate Professor, 2000; PhD, 1994, University of Barcelona (Spain)

GAO, DAYONG, Adjunct Professor, 2004; PhD, 1991, Concordia College

GAO, XIAOHU, Assistant Professor, 2005; PhD, 2004, Indiana University

GIACHELLI, CECILIA, Professor, 1992; PhD, 1987, University of Washington

GREEN, PHILIP \* Adjunct Professor, 1994; PhD, 1976, University of California (Berkeley)

GROSS, TED S, Adjunct Professor, 2000; MS, 1985, Pennsylvania State University; PhD, 1993, State University of New York (Stony Brook)

GUY, ARTHUR W \* Emeritus Professor, 1966; MSEE, 1957, University of Washington; PhD, 1966, University of Washington

HANNAFORD, BLAKE \* Adjunct Professor, 1989; MS, 1982, University of California (Berkeley); PhD, 1985, University of California (Berkeley)

HAUSCHKA, STEPHEN D, Adjunct Professor, 1967; PhD, 1966, Johns Hopkins University

HAYNOR, DAVID R \* Adjunct Professor, 1987; PhD, 1971, University of California (Berkeley); MD, 1979, Harvard University

HLASTALA, MICHAEL P, Emeritus Professor, 1973; PhD, 1969, State University of New York (Buffalo)

HOFFMAN, ALLAN S \* Emeritus Professor, 1973; MS, 1955, Massachusetts Institute of Technology; DSc, 1957, Massachusetts Institute of Technology

HOOD, LEROY E. \* Affiliate Professor, 1992; MD, 1964, Johns Hopkins University; PhD, 1968, California Institute of Technology

HORBETT, THOMAS A \* Professor, 1975; PhD, 1970, University of Washington

HORBETT, THOMAS A \* Professor, 1975; PhD, 1970, University of Washington

HUNTSMAN, LEE L \* Professor, 1968; PhD, 1968, University of Pennsylvania

HWANG, JOO HA, Adjunct Assistant Professor, 2006; MD, 1997, University of Chicago

JIANG, SHAOYI, Adjunct Professor, 1999; MS, 1988, Nanjing University of Technology (China); PhD, 1993, Cornell University

KATZE, MICHAEL GERALD \* Adjunct Professor, 1987; MS, 1978, Hahnemann Medical College; PhD, 1980, Hahnemann Medical College

KIM, YONGMIN, Professor, 1982; MS, 1979, University of Wisconsin (Madison); PhD, 1982, University of Wisconsin (Madison)

KINAHAN, PAUL E., Adjunct Professor, 2001; MS, 1988, University of British Columbia (Canada); PhD, 1994, University of Pennsylvania

LAFLAMME, MICHAEL A., Adjunct Assistant Professor, 2006; PhD, 1998, Emory University; MD, 1999, Emory University

LINKER, DAVID T., Adjunct Associate Professor, 1993; MD, 1976, Stanford University; MSE, 1982, University of Washington

MANKOFF, DAVID A., Adjunct Professor, 1997; PhD, 1988, University of Pennsylvania; MD, 1988, University of Pennsylvania

MATSEN, FREDERICK A \* Adjunct Professor, 1975; MD, 1968, Baylor College of Medicine

MATSUOKA, YOKY, Adjunct Associate Professor, 2006; MS, 1995, Massachusetts Institute of Technology; PhD, 1998, Massachusetts Institute of Technology

MINOSHIMA, SATOSHI, Adjunct Professor, 2000; MD, 1987, Chiba University (Japan); PhD, 1994, Chiba University (Japan)

MOURAD, PIERRE, Adjunct Associate Professor, 2004; MS, 1982, University of Washington; PhD, 1987, University of Washington

MURRY, CHARLES E. \* Professor, 1996; PhD, 1989, Duke University; MD, 1989, Duke University

NICKERSON, DEBORAH A, Adjunct Professor, 1992; PhD, 1978, University of Tennessee

O'DONNELL, MATTHEW, Professor, 2006; PhD, 1976, University of Notre Dame

POLLACK, GERALD H, Professor, 1970; PhD, 1968, University of Pennsylvania

PUN, SUZIE H, Associate Professor, 2003; MS, 1998, California Institute of Technology; PhD, 2000, California Institute of Technology

QIAN, HONG, Adjunct Professor, 1999; PhD, 1989, Washington University

RAO, RAJESH P.N., Adjunct Associate Professor, 2000; MS, 1994, University of Rochester; PhD, 1998, University of Rochester

RAO, RAJESH P.N., Adjunct Associate Professor, 2000; MS, 1994, University of Rochester; PhD, 1998, University of Rochester

RATNER, BUDDY D, Professor, 1975; PhD, 1972, Polytechnic Institute of Brooklyn

RATNER, DANIEL M., Assistant Professor, 2007; PhD, 2004, Massachusetts Institute of Technology

REGNIER, MICHAEL, Professor, 1997; MS, 1983, Portland State University; PhD, 1991, University of Southern California

REH, THOMAS A., Adjunct Professor, 1989; PhD, 1981, University of Wisconsin

RUBINSTEIN, JAY T., Professor, 2004; MS, 1983, Brown University; MD, 1987, University of Washington; PhD, 1988, University of Washington

SANDERS, JOAN ELIZABETH \* Associate Professor, 1992; MSME, 1985, Northwestern University; PhD, 1991, University of Washington

SAURO, HERBERT M, Associate Professor, 2007; MSc, 1982, University of York (UK); PhD, 1986, Oxford University (UK)

SCHENKMAN, KENNETH A., Adjunct Associate Professor, 1998; MD, 1986, Indiana University

SCHWARTZ, STEPHEN MARK, Adjunct Professor, 1976; MD, 1967, Boston University; PhD, 1973, University of Washington

SEELIG, GEORG, Adjunct Assistant Professor, 2009; PhD, 2003, University of Geneva (Switzerland)

SHEN, TUENG T, Adjunct Associate Professor, 2003; PhD, 1994, Massachusetts Institute of Technology; MD, 1997, Harvard University

SNIADACKI, NATHAN JOHN, Adjunct Assistant Professor, 2007; PhD, 2003, University of Maryland; MS, 2003, University of Maryland

SOMA, MANI \* Adjunct Professor, 1982; MSEE, 1977, Stanford University; PhD, 1980, Stanford University

SPELMAN, FRANCIS A \* Emeritus Professor, 1977; MSEE, 1968, University of Washington; PhD, 1975, University of Washington

STAYTON, PATRICK, Professor, 1992; PhD, 1989, University of Illinois; MS, 1989, University of Illinois

TENCER, ALLAN FRED \* Adjunct Professor, 1988; MEng, 1973, McGill University (Canada); PhD, 1981, McGill University (Canada)

THOMAS, WENDY, Assistant Professor, 2004; PhD, 2003, University of Washington; MS, 2003, University of Washington

TIAN, RONG, Professor, 2009; PhD, 1992, University of Aarhus (Denmark)

VERDUGO, PEDRO \* Emeritus Professor, 1975; MD, 1965, University of Chile

VESSELLE, HUBERT J., Adjunct Associate Professor, 1999; MS, 1986, Case Western Reserve University; PhD, 1990, Case Western Reserve University; MD, 1991, Case Western Reserve University

VINEY, CHRISTOPHER \* Affiliate Professor, 1987; PhD, 1983, Cambridge University (UK); MA, 1984, Cambridge University (UK)

WARREN, C GERALD \* Clinical Professor, 1972; MPH, 1971, University of Washington

WOODROW, KIM A., Assistant Professor, 2010; MS, 2001, Stanford University; PhD, 2006, Stanford University

YAGER, PAUL, Professor, 1987; PhD, 1980, University of Oregon

YUAN, CHUN, Adjunct Professor, 1991; PhD, 1988, University of Utah

## Global Health

## Immunology

### Acting Chair

Joan M. Goverman

ADEREM, ALAN A. \* Affiliate Professor, 1996; PhD, 1979, University of Capetown (South Africa)

BEVAN, MICHAEL J. \* Professor, 1990; MSc, 1968, University of London, UK; PhD, 1972, National Inst for Medical Research (UK)

CLARK, EDWARD A \* Professor, 1979; PhD, 1977, University of California (Los Angeles)

ELKON, KEITH B, Adjunct Professor, 2001; MD, 1974, University of Witwatersrand (S. Africa)

FARR, ANDREW G \* Professor, 1982; PhD, 1975, University of Chicago

FINK, PAMELA J., Professor, 1990; PhD, 1981, Massachusetts Institute of Technology

GALE, MICHAEL J, Associate Professor, 1999; PhD, 1994, University of Washington

GOVERMAN, JOAN M, Professor, 1992; PhD, 1981, University of California (Los Angeles)

GREENBERG, PHILIP D \* Professor, 1978; MD, 1971, St University of New York (Downstate Med Ctr)

HOOD, LEROY E. \* Affiliate Professor, 1992; MD, 1964, Johns Hopkins University; PhD, 1968, California Institute of Technology

KAJA, MURALI KRISHNA, Associate Professor, 2001; MSc, 1988, University of Hyderabad (India); PhD, 1995, Indian Institute of Technology (India)

LAGUNOFF, MICHAEL, Adjunct Associate Professor, 2001; PhD, 1995, University of Chicago

LATCHMAN, YVETTE, Adjunct Assistant Professor, 2003; MS, 1987, University of London: King's College (UK); PhD, 1996, University College, London (UK)

MAIZELS, NANCY, Professor, 2000; PhD, 1974, Harvard University

MILLER, SAMUEL I \* Adjunct Professor, 1995; MD, 1979, Baylor College of Medicine

NEPOM, GERALD T \* Affiliate Professor, 1988; PhD, 1977, University of Washington; MD, 1978, University of Washington

OUKKA, MOHAMED, Adjunct Assistant Professor, 2009; MS, 1991, Universite of Paris VII; PhD, 1996, Universite of Paris VII

PERLMUTTER, ROGER M. \* Affiliate Professor, 1984; PhD, 1979, Washington University; MD, 1979, Washington University

RAMAKRISHNAN, LALITA, Adjunct Associate Professor, 2001; MD, 1983, Baroda Medical College (India); PhD, 1990, Tufts University

RAWLINGS, DAVID J, Adjunct Professor, 2001; MD, 1984, University of North Carolina

RUDENSKY, ALEXANDER Y. \* Affiliate Professor, 1992; MS, 1979, Second Moscow State Medical Institute; PhD, 1986, Gabrichevsky Institute for Epidemiology and Microbiology

SCHARENBERG, ANDREW M., Adjunct Professor, 2000; MD, 1990, University of North Carolina

STETSON, DANIEL B, Assistant Professor, 2008; PhD, 2002, University of California (San Francisco)

STRONG, ROLAND K \* Affiliate Professor, 2002; PhD, 1990, Harvard University

URDAHL, KEVIN B., Adjunct Assistant Professor, 2005; PhD, 1993, University of Minnesota; MD, 1995, University of Minnesota

WEINMANN, AMY S, Associate Professor, 2003; PhD, 2000, University of California (Los Angeles)

ZIEGLER, STEVEN F. \* Affiliate Professor, 1997; PhD, 1984, University of California (Los Angeles)

---

## Laboratory Medicine

### Chair

James Fine

ASHLEY MORROW, RHODA \* Professor, 1982; PhD, 1977, University of California (Davis)

ASTION, MICHAEL L. \* Professor, 1994; PhD, 1989, University of Pennsylvania; MD, 1989, University of Pennsylvania

AUBUCHON, JAMES P., Professor, 2008; MD, 1978, University of Michigan, Ann Arbor

BAIRD, GEOFFREY S., Assistant Professor, 2010; PhD, 2001, University of California (San Diego); MD, 2003, University of California (San Diego)

BANKSON, DANIEL D., Associate Professor, 2002; MS, 1981, Massachusetts Institute of Technology; PhD, 1985, Massachusetts Institute of Technology

BAUER, LARRY \* Adjunct Professor, 1980; PharmD, 1980, University of Kentucky

CHANDLER, WAYNE L. \* Professor, 1987; MD, 1982, St Louis University

CHATRIAN, GIAN E., Emeritus Professor, 1959; MD, 1951, University of Naples (Italy)

CHERIAN, SINDHU, Assistant Professor, 2008; MD, 2000, Emory University

CHOU, DAVID \* Professor, 1998; MD, 1974, University of Pittsburgh; MS, 1979, University of Minnesota

CLARRIDGE, JILL E., Professor, 2002; MS, 1962, University of Michigan; PhD, 1973, Purdue University

COOKSON, BRAD T., Professor, 1996; PhD, 1991, Washington University; MD, 1991, Washington University

COOMBS, ROBERT W. \* Professor, 1990; PhD, 1977, Dalhousie University (Canada); MD, 1981, Dalhousie University (Canada)

COREY, LAWRENCE \* Professor, 1977; MD, 1971, University of Michigan

COYLE, MARIE B. \* Emeritus Professor, 1973; MS, 1963, St. Louis University; PhD, 1965, Kansas State University

DELANEY, COLLENE J. \* Associate Professor, 1975; MS, 1967, University of Illinois; PhD, 1972, University of Illinois

DETTET, JAMES C. \* Emeritus Professor, 1971; MD, 1962, University of Kansas

DONG, ZHAO-MING DAVID, Adjunct Assistant Professor, 2004; MD, 1983, Wannan Medical College (China); MS, 1986, Shandong University (China); PhD, 1995, University of Oklahoma

FANG, FERRIC C., Professor, 2001; MD, 1983, Harvard University

FINE, JAMES \* Professor, 1981; MD, 1972, University of Minnesota; MS, 1977, University of Minnesota

FLIGNER, CORINNE L., Adjunct Associate Professor, 1986; MD, 1976, University of New Mexico

FRENKEL, LISA M., Professor, 1994; MD, 1987, University of Kansas

FROMM, JONATHAN R., Assistant Professor, 2008; PhD, 1997, University of Iowa; MD, 1997, University of Iowa

GERNSHEIMER, TERRY B., Adjunct Professor, 1996; MD, 1979, State University of New York (Stony Brook)

GREISMAN, HARVEY A., Assistant Professor, 2005; PhD, 1997, Massachusetts Institute of Technology; MD, 1998, Harvard University

GRETCH, DAVID R. \* Associate Professor, 1994; PhD, 1990, University of Iowa; MD, 1990, University of Iowa

HACKMAN, ROBERT C., Associate Professor, 1985; MD, 1971, Stanford University

HAYER, VIRGINIA MARY \* Clinical Assistant Professor, 1986; PhD, 1980, University of Virginia

HOFFMAN, NOAH G., Assistant Professor, 2010; PhD, 2003, University of North Carolina; MD, 2005, University of North Carolina

HOOFNAGLE, ANDREW N., Assistant Professor, 2007; PhD, 2002, University of Colorado (Boulder); MD, 2004, University of Colorado (Denver)

JEROME, KEITH R., Associate Professor, 2001; PhD, 1992, Duke University; MD, 1993, Duke University

KENNY, MARGARET \* Emeritus Professor, 1972; PhD, 1968, University of Illinois

KOELLE, DAVID, Adjunct Professor, 1997; MD, 1985, University of Washington

LABBE, ROBERT F. \* Emeritus Professor, 1957; MS, 1949, Oregon State University; PhD, 1951, Oregon State University

LAMPE, MARY F. \* Associate Professor, 1989; MS, 1976, University of Washington; PhD, 1984, University of North Carolina

LE CRONE, CAROL N. \* Emeritus Assistant Professor, 1972; MS, 1966, Colorado State University

LIMAYE, ABHIJIT P., Associate Professor, 2001; MD, 1992, University of Washington

LOEB, KEITH, Adjunct Assistant Professor, 2007; PhD, 1993, Medical College of Wisconsin; MD, 1995, Medical College of Wisconsin

MC GONAGLE, LEE ANNE, Emeritus Assistant Professor, 1974; MPH, 1969, University of Michigan

MCELARTH, MARGARET JULIANA, Adjunct Professor, 1990; PhD, 1978, Medical University of South Carolina; MD, 1980, Medical University of South Carolina

MULLINS, JAMES I., Adjunct Professor, 1994; PhD, 1978, University of Minnesota

NESTER, THERESA, Associate Professor, 2001; MD, 1994, University of Rochester

OPHEIM, KENT E. \* Associate Professor, 1981; PhD, 1972, Cornell University

PEREIRA, SHALINI, Assistant Professor, 2008; MS, 1989, University of Bombay; MS, 1991, University of Rochester; PhD, 1996, University of Rochester

PLORDE, JAMES J. \* Emeritus Professor, 1967; MD, 1959, University of Minnesota

QIN, XUAN, Assistant Professor, 2005; 1982, Nanjing University (China); PhD, 1995, State University of New York (Albany)

HEVNER, ROBERT F, Professor, 2000; PhD, 1992, University of Michigan; MD, 1992, University of Michigan

HOCH, BENJAMIN, Associate Professor, 2008; MD, 1999, Thomas Jefferson University

HORWITZ, MARSHALL S, Professor, 1995; PhD, 1988, University of Washington; MD, 1990, University of Washington

JORDAN, C. DIANA, Assistant Professor, 2008; MD, 1991, Oregon Health Sciences University

KAEBERLEIN, MATT R, Assistant Professor, 2006; PhD, 2002, Massachusetts Institute of Technology

KAPUR, RAJ P., Professor, 1992; PhD, 1986, University of Southern California; MD, 1988, University of Southern California

KEENE, CHRISTOPHER D, Assistant Professor, 2009; PhD, 2003, University of Minnesota; MD, 2005, University of Minnesota

KIEM, HANS-PETER, Adjunct Professor, 1998; MD, 1987, University of Ulm (Germany)

KIVIAT, NANCY C \* Professor, 1984; MA, 1969, University of Washington; MD, 1975, University of Washington

KOWALEWSKA, JOLANTA, Assistant Professor, 2007; MD, 1995, University of Warsaw (Poland)

LAFLAMME, MICHAEL A., Assistant Professor, 2006; PhD, 1998, Emory University; MD, 1999, Emory University

LIU, YAJUAN, Assistant Professor, 2009; PhD, 1995, State University of New York (Syracuse)

LOEB, KEITH, Assistant Professor, 2007; PhD, 1993, Medical College of Wisconsin; MD, 1995, Medical College of Wisconsin

LOEB, LAWRENCE A, Professor, 1978; MD, 1961, New York University; PhD, 1967, University of California (Berkeley)

MAHONEY, WILLIAM, Assistant Professor, 2008; PhD, 2004, University of Maryland

MARTIN, GEORGE, Emeritus Professor, 1960; MD, 1953, University of Washington

MILLER, ARTHUR D. \* Affiliate Professor, 1989; PhD, 1982, Stanford University

MONNAT, RAYMOND J \* Professor, 1985; MD, 1976, University of Chicago

MONTINE, THOMAS J, Professor, 2002; PhD, 1988, University of Rochester; MD, 1991, McGill University (Canada)

MURRY, CHARLES E. \* Professor, 1996; PhD, 1989, Duke University; MD, 1989, Duke University

MYERSON, DAVID \* Associate Professor, 1985; PhD, 1979, Albert Einstein College of Medicine; MD, 1979, Albert Einstein College of Medicine

NARAYANAN, A SAMPATH \* Professor, 1975; MSc, 1963, University of Madras (India); PhD, 1967, University of Madras (India)

NELSON, PETER S., Adjunct Professor, 1998; MD, 1986, University of Kansas

NGHIEM, PAUL, Adjunct Associate Professor, 2006; PhD, 1994, Stanford University; MD, 1994, Stanford University

NICOSIA, ROBERTO F, Professor, 1999; MD, 1976, University of Rome (Italy); PhD, 1984, Medical College of Pennsylvania

NORWOOD, THOMAS H \* Professor, 1974; MD, 1968, University of Maryland

OLSON, JAMES M., Adjunct Professor, 2000; MD, 1991, University of Michigan

OTT, SUSAN M, Adjunct Associate Professor, 1983; MD, 1974, University of Washington

PAGE, ROY C \* Emeritus Professor, 1967; DDS, 1957, University of Maryland; PhD, 1967, University of Washington

PATTERSON, KATHLEEN, Associate Professor, 1992; MD, 1976, University of Iowa

PENDERGRASS, WILLIAM R, Lecturer, 1991; PhD, 1977, University of Washington

PORTER, PEGGY L., Professor, 1993; MD, 1987, University of New Mexico

PRESTON, BRADLEY D, Professor, 2002; PhD, 1983, University of Wisconsin

RABINOVITCH, PETER S. \* Professor, 1983; MD, 1979, University of Washington; PhD, 1980, University of Washington

RAINES, ELAINE W \* Research Professor, 1975; MS, 1975, University of California (San Francisco)

REAY, DONALD T, Emeritus Professor, 1977; MD, 1963, University of Utah; MPA, 1978, Seattle University

REICHENBACH, DENNIS D, Emeritus Professor, 1966; MD, 1958, University of Washington

REIDY, MICHAEL A \* Professor, 1980; MSc, 1972, University of Guelph (Canada); PhD, 1976, University of Cambridge (UK)

REYES, MORAYMA, Assistant Professor, 2006; DPhil, 2001, University of Minnesota; MD, 2003, University of Minnesota

RHIM, JONATHAN A. \* Clinical Associate Professor, 1995; MD, 1989, George Washington University

ROHRSCHEIDER, LARRY R \* Affiliate Professor, 1978; PhD, 1973, University of Wisconsin (Madison)

ROSENFELD, MICHAEL E., Professor, 1992; MS, 1978, University of Vermont; PhD, 1981, University of Wisconsin (Madison)

RUDZINSKI, ERIN R, Assistant Professor, 2009; MD, 2003, Medical College of Georgia

SALE, GEORGE E, Professor, 1978; MD, 1968, Stanford University

SCHMIDT, RODNEY, Professor, 1988; PhD, 1984, University of Washington; MD, 1984, University of Washington

SCHWARTZ, STEPHEN MARK, Professor, 1976; MD, 1967, Boston University; PhD, 1973, University of Washington

SCHWARTZ, STEPHEN MARK, Professor, 1976; MD, 1967, Boston University; PhD, 1973, University of Washington

SCHWARZE, ULRIKE, Associate Professor, 2001; MD, 1992, Technische Universität (Germany)

SHAW, CHENG-MEI, Emeritus Professor, 1961; MD, 1950, National Taiwan University

SHULMAN, HOWARD M, Professor, 1979; MD, 1971, University of California (Los Angeles)

SIEBERT, JOSEPH ROBERT, Professor, 1986; MS, 1975, University of Pittsburgh; MA, 1984, University of Washington; PhD, 1985, University of Washington

SILBERGELD, DANIEL L, Adjunct Professor, 1997; MD, 1984, University of Cincinnati

SMITH, GERALD R \* Affiliate Professor, 1983; PhD, 1970, Massachusetts Institute of Technology

SMITH, KELLY D., Associate Professor, 2003; PhD, 1996, University of Iowa; MD, 1996, University of Iowa

SONNEN, JOSHUA A, Assistant Professor, 2009; MD, 2002, University of Southern California

STAMATOYANNOPOULOS, G, Adjunct Professor, 1966; MD, 1958, University of Athens (Greece); Dr, 1960, University of Athens (Greece)

STEPHENS, KAREN G. \* Adjunct Research Professor, 1989; MA, 1978, Indiana University; PhD, 1982, Indiana University

SUMI, SHUZO MARK, Emeritus Professor, 1968; MD, 1956, University of Toronto (Canada)

SWANSON, PAUL E, Professor, 2001; MD, 1984, Oregon Health Sciences University

SWISSELM, KAREN \* Clinical Associate Professor, 1993; PhD, 1989, University of Washington

TAIT, JONATHAN F \* Adjunct Professor, 1987; PhD, 1983, Washington University; MD, 1983, Washington University

TAPSCOTT, STEPHEN J., Adjunct Professor, 1994; PhD, 1982, University of Pennsylvania; MD, 1982, University of Pennsylvania

THORNING, DAVID R, Associate Professor, 1976; MD, 1965, University of Kansas

TRUE, LAWRENCE DASHIELL \* Professor, 1990; MD, 1971, Tulane University

UPTON, MELISSA P, Associate Professor, 2002; MD, 1978, Northwestern University

VESSELLA, ROBERT, Adjunct Professor, 1989; PhD, 1974, University of Mississippi

WIGHT, THOMAS \* Affiliate Professor, 1978; MS, 1968, University of New Hampshire; PhD, 1972, University of New Hampshire

WOLF, NORMAN S \* Professor, 1968; DVM, 1953, Kansas State University; PhD, 1960, Northwestern University

YEH, MENG-CHE, Associate Professor, 2002; PhD, 1997, University of Pennsylvania

YEUNG, RAYMOND S., Adjunct Professor, 1997; MD, 1982, University of Toronto (Canada)

ZHANG, JING, Associate Professor, 2002; MS, 1987, Second Military Medical University, China; PhD, 1995, Duke University

PEARLMAN, ROBERT A \* Adjunct Professor, 1983; MD, 1975, Boston University; MPH, 1980, University of Washington

PERRIN, EDWARD \* Emeritus Professor, 1962; MA, 1956, Columbia University; PhD, 1960, Stanford University

PETERSON, KATHLEEN, Senior Lecturer, 2008; MS, 1994, Central Michigan University

PFEIFFER, JAMES T., Associate Professor, 2004; MA, 1989, University of California (Los Angeles); PhD, 1997, University of California (Los Angeles); MPH, 1997, University of California (Los Angeles)

PHELAN, ELIZABETH A., Adjunct Associate Professor, 2004; MD, 1992, Tufts University; MS, 1998, University of Washington

PLOUGH, ALONZO L. \* Professor, 1996; MA, 1975, Cornell University; MPH, 1977, Yale University; PhD, 1978, Cornell University

PRAGER, SARAH W, Adjunct Assistant Professor, 2006; MD, 2000, University of Texas (Southwestern); MS, 2006, University of California (San Francisco)

PSATY, BRUCE M. \* Adjunct Professor, 1988; MA, 1975, Indiana University; PhD, 1979, Indiana University; MD, 1981, Indiana University

REIBER, GAYLE \* Professor, 1991; MPH, 1975, Johns Hopkins University; PhD, 1989, University of Washington

RICHARDSON, MARY L. \* Emeritus Professor, 1991; MHA, 1978, University of Washington; PhD, 1984, University of Washington

ROSENBLATT, ROGER A \* Adjunct Professor, 1977; MPH, 1971, Harvard University; MD, 1971, Harvard University

ROSS, AUSTIN, Emeritus Professor, 1977; MPH, 1955, University of California (Berkeley)

RUTTER, CAROLYN \* Affiliate Professor, 2004; MS, 1988, University of California (Los Angeles); PhD, 1991, University of California (Los Angeles)

SAELENS, BRIAN E, Adjunct Associate Professor, 2006; MA, 1996, State University of New York (Buffalo)

SAPPINGTON, JEREMY L., Senior Lecturer, 2003; MPH, 1964, University of North Carolina

SENTURIA, KIRSTEN D. \* Clinical Assistant Professor, 1997; MA, 1990, University of California (Los Angeles); PhD, 1995, University of California (Los Angeles)

SOLORIO, MARIA ROSA, Assistant Professor, 2008; MD, 1989, University of California (San Diego); MPH, 1999, University of Washington

SPIGNER, CLARENCE \* Associate Professor, 1994; MPH, 1982, University of California (Berkeley); DPH, 1987, University of California (Berkeley)

STARKS, HELENE, Adjunct Assistant Professor, 2005; MPH, 1989, University of California (Berkeley); PhD, 2004, University of Washington

STERGACHIS, ANDREAS S, Adjunct Professor, 1989; MS, 1976, University of Minnesota; PhD, 1979, University of Minnesota

STILLMAN, DENNIS, Senior Lecturer, 2000; MHA, 1979, University of Washington

STOUT, JAMES W. \* Adjunct Professor, 1994; MAT, 1981, Duke University; MD, 1986, Wake Forest University  
SULLIVAN, SEAN \* Professor, 1993; MS, 1984, University of Texas (unspecified); PhD, 1992, University of California (Berkeley)

TAYLOR, VICTORIA M. \* Research Professor, 1996; MD, 1978, Nottingham University; MPH, 1989, University of Washington

THOMPSON, ENGELBERTA, Professor, 1989; MA, 1978, Western Michigan University; PhD, 1981, Western Michigan University

THOMPSON, FRANCES ELAINE A \* Adjunct Professor, 1991; MA, 1972, University of Washington; PhD, 1990, University of Washington

THOMPSON, JOHN R., Senior Lecturer, 1997; MSW, 1976, University of Washington

TU, SHIN-PING, Adjunct Associate Professor, 2000; MD, 1989, University of Cincinnati; MPH, 1996, University of Washington

TURNER, ANNE M., Assistant Professor, 2008; MD, 1985, Brown University

ULRICH, CORNELIA M., Adjunct Professor, 2000; MS, 1992, Oregon State University; PhD, 1998, University of Washington

UNUTZER, JURGEN, Adjunct Professor, 2003; MA, 1988, University of Chicago; MD, 1990, Vanderbilt University; MPH, 1996, University of Washington

URBAN, NICOLE D. \* Research Professor, 1993; MS, 1973, Harvard University; DSc, 1978, Harvard University

VITALIANO, PETER P \* Adjunct Professor, 1979; MS, 1973, Syracuse University; PhD, 1975, Syracuse University

WAGNER, EDWARD H \* Professor, 1984; MD, 1965, State University of New York (Buffalo); MPH, 1972, University of North Carolina

WALKER, EDWARD A., Professor, 1993; MM, 1979, Catholic University of America; MD, 1983, University of Washington  
WATTS, CAROLYN A., Professor, 1976; MA, 1974, Johns Hopkins University; PhD, 1976, Johns Hopkins University

WELTON, WILLIAM E., Senior Lecturer, 2005; MHA, 1972, University of Michigan; DPH, 1999, University of Michigan

WICKIZER, THOMAS M., Professor, 1989; MSW, 1974, University of Washington; MPH, 1979, Northwestern University; MA, 1987, University of Michigan; PhD, 1989, University of Michigan

WILLIAMS, MICHELLE A. \* Adjunct Professor, 1992; MS, 1986, Tufts University; MS, 1988, Harvard University; ScD, 1991, Harvard University

WOLF, FREDRIC M, Adjunct Professor, 1997; MEd, 1977, Kent State University; PhD, 1980, Kent State University

ZIERLER, BRENDA, Adjunct Associate Professor, 1996; PhD, 1996, University of Washington

## Reserve Officer Training Corps

## Air and Space Studies

CUNNINGHAM, JAMES A., Assistant Professor, 2009; MBA, 2003, Western New England College

GUSTAFSON, JEFFREY H., Professor, 2009; MS, 1997, Embury Riddle Aeronautical University

UM, TAE HAN, Assistant Professor, 2007; MA, 2006, University of Maryland

## Military Science

DANIELS, MICHAEL, Professor, 2009; MS, 2005, Air University

JEANPIERRE, AMY, Assistant Professor, 2008; MA, 2007, University of Oklahoma

## Naval Science

CROWE, ARTHUR A. III, Assistant Professor, 2007; MS, 2006, Boston University

HENDERSON, MARK D., Associate Professor, 2007; MA, 1999, Naval War College

## School of Social Work

AISENBERG, EUGENE, Associate Professor, 2002; MA, 1984, St. John's Seminary; MSW, 1994, University of Southern California; PhD, 2001, University of Southern California

ALLEN, ALLETHIA LEE \* Emeritus Assistant Professor, 1966; MSW, 1950, Boston University; PhD, 1986, Walden University

ALMGREN, GUNNAR R., Associate Professor, 1992; MA, 1975, Pacific Lutheran University; MSW, 1979, Portland State University; PhD, 1990, University of Washington

ANDERSON, JAMES R \* Emeritus Associate Professor, 1968; MA, 1954, Indiana University

ARTHUR, MICHAEL \* Research Associate Professor, 1991; MA, 1987, University of Virginia; PhD, 1990, University of Virginia

BAGSHAW, MICHELLE, Lecturer, 2009; MEd, 1996, Western Washington University; MSW, 2004, University of Washington

BALASSONE, MARY LOU \* Associate Professor, 1987; MSW, 1980, Syracuse University; DSW, 1987, University of California (Berkeley)

BERLEMAN, WILLIAM C \* Emeritus Associate Professor, 1966; MSW, 1960, University of Washington

CASEY, ERIN, Adjunct Assistant Professor, 2006; MSW, 1997, University of Washington; PhD, 2006, University of Washington

CATALANO, RICHARD F, Professor, 1982; MA, 1976, University of Washington; PhD, 1982, University of Washington

CONTE, JON \* Professor, 1990; MSW, 1974, University of Washington; PhD, 1979, University of Washington

COURTNEY, MARK, Professor, 2007; MA, 1987, John F. Kennedy University; PhD, 1992, University of California (Berkeley); MSW, 1992, University of California (Berkeley)

DEAR, RONALD BRUCE \* Emeritus Associate Professor, 1970; MSW, 1957, University of Pittsburgh; DSW, 1972, Columbia University

DUPLICA, MOYA M \* Emeritus Associate Professor, 1964; MSW, 1956, St Louis University

DURAN, BONNIE M, Adjunct Associate Professor, 2007; MPH, 1989, University of California (Berkeley); DPH, 1997, University of California (Berkeley)

ELLIS, JACK A N \* Emeritus Associate Professor, 1966; MSW, 1955, University of British Columbia (Canada)

EMLET, CHARLES, Adjunct Associate Professor, 1999; MSW, 1979, California State University, Fresno; PhD, 1998, Case Western Reserve University

ERERA, PAULINE \* Associate Professor, 1996; MSW, 1981, University of Haifa, Israel; PhD, 1983, Cornell University

EROSHEVA, ELENA A., Assistant Professor, 2003; MS, 1998, Utah State University; PhD, 2002, Carnegie Mellon University

EVANS-CAMPBELL, TERESA A, Associate Professor, 2000; MSW, 1994, University of California (Los Angeles); PhD, 2000, University of California (Los Angeles)

FARWELL, NANCY, Associate Professor, 1998; MSW, 1989, University of California (Berkeley); PhD, 1998, University of California (Berkeley)

FINN, JERRY, Adjunct Professor, 2005; MSW, 1974, University of Hawaii; PhD, 1980, University of Wisconsin (Madison)

FREDRIKSEN GOLDSSEN, KAREN \* Associate Professor, 1993; MSW, 1986, University of Washington; PhD, 1993, University of California (Berkeley)

FURMAN, RICHARD, Adjunct Associate Professor, 2008; MSN, 1993, University of Pennsylvania; PhD, 2001, Yeshiva University

GARNER, MICHELLE D., Adjunct Assistant Professor, 2006; MSW, 1998, University of Washington; PhD, 2007, University of Washington

GAVIN, AMELIA, Assistant Professor, 2004; MSW, 2000, University of Michigan; PhD, 2004, University of Michigan

GILCHRIST, LEWAYNE D, Emeritus Professor, 1986; MA, 1967, Stanford University; MSW, 1977, University of Washington; PhD, 1981, University of Washington

GILLMORE, MARY LOUISE, Emeritus Professor, 1986; MS, 1970, University of Michigan; MA, 1977, University of Washington; PhD, 1983, University of Washington

GONZALES, ROBERTO, Assistant Professor, 2009; MA, 2004, University of California (Irvine); PhD, 2008, University of California (Irvine)

HAGGERTY, KEVIN P., Lecturer, 1990; MSW, 1989, University of Washington

HARACHI, TRACY \* Associate Professor, 1992; MSW, 1988, University of Washington; PhD, 1991, University of Washington

HARRIS, MARIAN, Adjunct Associate Professor, 2002; MSW, 1977, Florida State University; PhD, 1997, Smith College

HAWKINS, JOHN D, Professor, 1976; MA, 1969, Northwestern University; PhD, 1975, Northwestern University

HERRENKOHL, TODD, Associate Professor, 1999; MSW, 1993, Simmons College; PhD, 1998, University of Washington

HERRICK, JAMES E \* Emeritus Associate Professor, 1966; MSW, 1958, University of California (campus unspecified); DSW, 1966, University of Southern California

HETHERINGTON, ZYNOVIA, Lecturer, 2002; MSW, 1995, Eastern Michigan University

HOOYMAN, NANCY \* Professor, 1979; MSW, 1970, University of Michigan; PhD, 1974, University of Michigan

ISHISAKA, ANTHONY H, Emeritus Associate Professor, 1971; MSW, 1968, University of California (Berkeley); DSW, 1978, University of California (Berkeley)

KELLEY, JERRY LEE \* Emeritus Associate Professor, 1961; MA, 1949, University of Chicago

KEMP, SUSAN, Associate Professor, 1997; MA, 1981, University of Auckland (New Zealand); PhD, 1994, Columbia University

KRUZICH, JEAN \* Associate Professor, 1991; MSW, 1975, University of Minnesota; MA, 1976, University of Minnesota; PhD, 1982, University of Washington

LAAKSO, JANICE, Adjunct Associate Professor, 1999; MS, 1973, University of Texas (Austin); PhD, 1999, University of Texas (Austin)

LAZZARI, MARCELINE \* Adjunct Professor, 1998; MSW, 1971, St Louis University; PhD, 1990, University of Denver

LEVY, RONA L, Professor, 1975; MSW, 1972, University of Michigan; PhD, 1974, University of Michigan; MPH, 1975, University of Michigan

## 622 FACULTY LISTING: SCHOOL OF SOCIAL WORK

LINDHORST, TARYN, Associate Professor, 2001; MSW, 1988, Southern University At New Orleans; PhD, 2001, Louisiana State University

LONGRES, JOHN F. \* Emeritus Professor, 1993; MSW, 1966, University of California (Los Angeles); PhD, 1970, University of Michigan

MARCENKO, MAUREEN \* Associate Professor, 1997; MSW, 1978, Wayne State University; PhD, 1988, McGill University (Canada)

MEYERS, MARCIA, Professor, 2001; MPA, 1987, Harvard University; PhD, 1992, University of California (Berkeley); MSW, 1992, University of California (Berkeley)

MILLER, SIDNEY \* Emeritus Associate Professor, 1965; MS, 1953, Columbia University

MORRISON, DIANE M \* Professor, 1988; MS, 1979, University of Washington; PhD, 1982, University of Washington

NAGDA, BIREN A, Associate Professor, 1996; MSW, 1989, University of Michigan; PhD, 1996, University of Michigan; MA, 1996, University of Michigan

NURIUS, PAULA S. \* Professor, 1984; MSW, 1980, University of Hawaii; MA, 1983, University of Michigan; PhD, 1984, University of Michigan

PECORA, PETER \* Professor, 1990; MSW, 1977, University of Wisconsin (Milwaukee); PhD, 1982, University of Washington

PRESTON, LEON T, Lecturer, 2009; MSW, 1973, University of Washington

RESNICK, HERMAN \* Emeritus Professor, 1967; PhD, 1970, Bryn Mawr College

RICHEY, CHERYL A \* Emeritus Professor, 1971; MSW, 1971, University of California (Berkeley); DSW, 1974, University of California (Berkeley)

RIVARA, J'MAY B, Lecturer, 1997; MSS, 1975, Bryn Mawr College

ROFFMAN, ROGER ALAN, Professor, 1972; MSW, 1965, University of Michigan; DSW, 1983, University of California (Berkeley)

ROMICH, JENNIFER, Associate Professor, 2002; MA, 2000, Northwestern University; PhD, 2002, Northwestern University

SOHNG, SUE \* Associate Professor, 1990; MSW, 1979, Wayne State University; PhD, 1989, University of Pittsburgh

SPEARMON, MARGARET L, Senior Lecturer, 2003; MSW, 1975, Washington University; PhD, 1999, University of Washington

SPIEKER, SUSAN J \* Adjunct Professor, 1986; PhD, 1982, Cornell University

STIER, FLORENCE E \* Emeritus Professor, 1964; MSSA, 1941, University of Pittsburgh; DSW, 1973, Columbia University

STUBER, JENNIFER, Assistant Professor, 2006; PhD, 2002, Yale University

SUTTON, SHARON E. \* Adjunct Professor, 1998; MArch, 1973, Columbia University; MPhil, 1981, City University

of New York; PhD, 1982, City University of New York; MA, 1982, City University of New York

TAJIMA, EMIKO A., Associate Professor, 1999; MS, 1987, University of Pennsylvania; PhD, 1999, Bryn Mawr College  
TAKEUCHI, DAVID, Professor, 2002; MA, 1974, University of Hawaii; PhD, 1986, University of Hawaii

TEATHER, EDWARD CHARLES \* Emeritus Associate Professor, 1966; MSW, 1962, University of British Columbia (Canada)

UEHARA, EDWINA \* Professor, 1990; MSW, 1977, University of Michigan; PhD, 1987, University of Chicago

VAN SOEST, DOROTHY, Professor, 2002; MSW, 1975, University of Minnesota; DSW, 1994, Catholic University

WALTERS, KARINA, Associate Professor, 2001; MSW, 1990, University of California (Los Angeles); PhD, 1995, University of California (Los Angeles)

WEATHERLEY, RICHARD A \* Emeritus Professor, 1975; MA, 1963, University of Chicago; PhD, 1975, Massachusetts Institute of Technology

WEST, MARGARET A \* Affiliate Assistant Professor, 1982; MSW, 1968, University of Washington; PhD, 1984, University of Washington

WHITTAKER, JAMES \* Emeritus Professor, 1970; MSW, 1966, University of Michigan; PhD, 1970, University of Minnesota

YOUNG, DIANE, Adjunct Associate Professor, 2009; MSW, 1993, University of Washington; PhD, 1997, University of Washington
