ESS 576 Space and Laboratory Plasma Physics (3) Discussion of waves, equilibrium and stability, diffusion and resistivity, basic plasma kinetic theory, and wave-particle interactions. Prerequisite: ESS 415, or equivalent, or permission of instructor. Offered: jointly with A A 556.
ESS 577 Advanced Space Plasma Physics (3) Formation by the interaction of solar wind with geomagnetic field. Trapped particles. Electromagnetic waves in anisotropic plasma. Dynamic disturbances and plasma instabilities. Prerequisite: ESS 415, or permission of instructor.

ESS 578 Kinetic Theory and Simulation of Space Plasmas (3) Wave-particle interactions in space plasmas. Generation of different wave modes, electrostatic and electromagnetic, Langmuir waves to Alfven waves. Beam, Weibel, and masers instabilities, heavy ion interactions. Particle simulations, electrostatic and electromagnetic, for non-linear wave evolution and particle heating.

ESS 579 Computational Methods and Modeling in Geophysics I (3) Solution of complex dispersion equations including multiple root finding. Data analysis, fitting, smoothing, fast integration. Ray tracing and particle tracking in 2-D and 3-D. Computer simulation of fluid interactions, unmagnetized and magnetized, compressible and incompressible, and flow around objects
ESS 580 Advanced Methods in Isotope Geochemistry (3, max. 18) Huntington, Steig Studies new developments in isotope geochemistry. Topics vary by quarter and may include clumped isotopes, triple-oxygen isotopes, rate isotopes, mass-independent fractionation, and their incorporation into Earth system models. Introduces theory, measurement, and applications to processes in Earth, ocean, atmospheric, planetary, and climate science. Prerequisite: one of ESS 312, ESS 424, ESS 457, ESS 459, ESS 501, ESS 554, OCEAN 583, or permission of instructor.

ESS 581 Planetary Atmospheres (3) Problems of origin, evolution, and structure of planetary atmospheres, emphasizing elements common to all planetary atmospheres; roles of radiation, chemistry, and dynamic processes; new results on the atmospheres of Venus, Mars, Jupiter, and other solar-system objects
in the context of comparative planetology. Offered: jointly with ASTR 555/ATM S 555.
ESS 583 Origin of the Solar System (3) Nebular and nonnebular theories of the origin of the solar system; collapse from the interstellar medium, grain growth in the solar nebula, formation of planetesimals and planets, early evolution of the planets and other possible planetary systems; examination of the physical and chemical evidence upon which the ideas concerning the origin of the solar system are based. Offered: jointly with ASTR 557.
ESS 585 Climate Impacts on the Pacific Northwest (4) Knowledge of past/future patterns of climate to improve Pacific Northwest resource management. Topics include the predictability of natural/humancaused climate changes; past societal reactions to climate impacts on water, fish, forest, and coastal resources; how climate and public policies interact to affect ecosystems and society. Offered: jointly with ATM S 585/ENVIR 585/SMEA 585.

ESS 586 Current Research in Climate Change (2, max. 20) Weekly lectures focusing on a particular aspect of climate (topic to change each year) from invited speakers (both UW and outside), plus one or two keynote speakers, followed by class discussion. Offered: jointly with ATM S 586/OCEAN 586.
ESS 587 Climate Dynamics (3) Examines Earth's climate system; distribution of temperature, precipitation, wind ice, salinity, and ocean currents; fundamental processes determining Earth's climate; energy and constituent transport mechanisms; climate sensitivity; natural climate variability on interannual to decadal time scales; global climate models; predicting future climate. Offered: jointly with ATM S 587/ OCEAN 587.

ESS 588 The Global Carbon Cycle and Climate (3) Oceanic and terrestrial biogeochemical processes controlling atmospheric CO2 and other greenhouse gases. Records of past changes in the earth's carbon cycle from geological, oceanographic, and terrestrial archives. Anthropogenic perturbations to cycles. Develop simple box models, discuss results of complex models. Offered: jointly with ATM S 588/OCEAN 588.
ESS 589 Paleoclimatology: Data, Modeling, and Theory (3) Evidence for past changes in land and sea surface temperature, in precipitation and atmospheric dynamics, and in ocean circulation: both long and interannual timescales. Paleoclimate modeling and theory. Time series analysis and climate noise. Rapid climate change. Statistical reconstruction of interannual variability. Offered: jointly with ATM S 589/ OCEAN 589.

## ESS 590 Special Topics (2-10, max. 20)

ESS 592 Professional Practice in Applied Geosciences
(1, max. 3) Covers major issues and current topics in the practice of Geosciences: professional licensing, ethics, business trends, environmental regulation, emerging technologies. Includes internships and career guidance, as well as weekly guest speakers. Offered: AWSp.
ESS 593 Climate Science Seminar (1) Mote Focuses on how to communicate climate science to many different audiences through careful construction of figures and through written and oral communication. Cred-it/no-credit only. Offered: jointly with ATM S 593/ OCEAN 593; W.

ESS 594 Introduction to Earth and Space Sciences Research (1-2, max. 4) Introduces research of faculty and advanced graduate students to first-year graduate students and provides experience for the formulation, oral presentation, and defense of research proposals and results.

ESS 595 Earth and Space Sciences Research Methods (2, max. 30) Current research methodology and results based on recent literature and on faculty and student research. Designed to develop student perspective on observational and theoretical methods and on relation of specific research to broader developments in geophysics and interdisciplinary aspects of geophysics through faculty-guided presentations and discussion by students. Credit/no credit only.

ESS 596 Climate Science Capstone Project (1-5, max. 5) Mote Climate capstone directed by a mentor, may be a group effort, and may encompass curriculum development, internships, workshop organization, etc., capturing interdisciplinary aspects of climate science and effective communication of climate science. Of fered: jointly with ATM S 596/OCEAN 596; AWSpS.
ESS 599 Seminar (1, max. 24) Review of current literature in geophysics and graduate student research with faculty participation. Credit/no-credit only.
ESS 600 Independent Study or Research (*)
ESS 700 Master's Thesis (*)
ESS 800 Doctoral Dissertation (*)

## Program on the Environment

12 Wallace Hall

The Program on the Environment ( PoE ) fosters and promotes interdisciplinary environmental education at the UW. As an interdisciplinary program merging multiple fields of study, PoE draws faculty from a wide array of disciplines, providing a unique opportunity for students and faculty to explore complex environmental issues from multiple perspectives.

## UNDERGRADUATE PROGRAM

Adviser
12 Wallace Hall, Box 355679
(206) 616-2461 or (206) 616-1208
poeadv@uw.edu
The Program on the Environment offers the following programs of study:

- The Bachelor of Arts degree with a major in environmental studies
- A minor in environmental studies

## Bachelor of Arts

Suggested First and Second-Year College Courses: ENVIR 100, ENVIR 200, ENVIR 250, and all foundational courses listed below.

## Program Admission Requirements

Students in good academic standing can declare this major at any time.

## General Education Requirements

All majors must satisfy the College of the Environment general education requirements.

## Major Requirements

110 credits, as follows:

1. Core Courses ( 20 credits): ENVIR 100, ENVIR 200, ENVIR 250, ENVIR 300
2. Foundational Courses (50 credits)
a. Biology ( 10 credits): BIOL 180 and one course (or sequence) from among BIOL 200, BIOL 118/BIOL 119, BIOL 250/FISH 250/OCEAN 250, ENVIR 280
b. Chemistry ( 5 credits): CHEM 120
c. Earth Systems Literacy (10 credits): Climate - either ATM S 211 or ESS 201; Land, Water, or Atmosphere: one course from ATM S 212, ESS 210, ESS 230/ OCEAN 230, GEOG 205, OCEAN 200
d. Quantitative Methods (10 credits): One course from among Q SCI 381, STAT 220, STAT 311; and one course from approved list (see department website or advising office for list)
e. Values and Cultures ( 15 credits): Three courses from among ECON 235/ENVIR 235/ESRM 235, HSTAA 221/ENVIR 221, and ENVIR 243/PHIL 243. With adviser approval, students may substitute related courses.
3. Environmental Perspectives and Experiences (30 credits): Minimum 30 credits from the list of approved courses (see department website or advising office for list). Minimum 3 credits in each of the six following categories: Perspectives - human and social dimensions; natural sciences, and policy and decision making; Experiences - bioregional; international; and fieldwork. At least 25 of the 30 credits must be at the 300 or 400 level. Courses listed under both perspectives and experiences may count toward either, but not both. Environmentally related independent study courses, study abroad programs, and other courses not on the approved list may count toward this requirement if approved in advance by the PoE adviser.
4. Capstone Experience (10 credits): ENVIR 490, ENVIR 491, ENVIR 492
5. GPA Requirements: Minimum 2.0 grade in each course presented for the major.

## Minor

## Minor Requirements

30 credits, including ENVIR 100 and either ENVIR 200 or ENVIR 250. Five (5) credits from among ECON 235/ENVIR 235/ESRM 235, HSTAA 221/ENVIR 221, and PHIL 243/ ENVIR 243. Remaining 15 credits drawn from the environmental perspectives course list (see program website or adviser for list). At least one course (minimum 3 credits) in each environmental perspectives course category, i.e., natural sciences, human and social dimensions, and policy and decision making. Ten (10) of these 15 credits must be at the 300 or 400 level. Minimum 2.0 for each course presented for the minor.

## Continuation Policy

While the UW has general regulations governing scholastic eligibility for continuance, the Program on the Environment (PoE) has adopted additional requirements in order to make the best use of the limited facilities and resources available and to provide reasonable assurance of academic success. The following criteria and procedures are applied to all undergraduate students for determining continuance in the major program.

1. All Environmental Studies majors must create an academic plan with a PoE academic adviser. The academic plan maps which quarter students take courses to ensure timely completion of degree requirements. A copy of the approved academic plan is kept on file at the PoE offices.
2. Students must communicate with a PoE academic adviser to approve a revised and updated academic plan when:
a. The planned quarter for taking Environmental Studies Core or Capstone courses changes.
b. Declaring additional majors or minors.
c. Withdrawing from courses required for the degree.
3. Students must review their academic plan with a PoE academic adviser for approval at least once per academic year.
4. Students are required to maintain a quarterly cumulative 2.00 GPA.
5. Environmental Studies majors must earn a 2.0 or better grade in all courses used to satisfy major requirements. A course may be repeated to satisfy this requirement. Courses may not be taken on Satisfactory/ Not-Satisfactory grading.
6. Student records are reviewed quarterly. If a student's performance fails to meet the standards outlined above, the student is issued a one-time warning letter. The letter details how the criteria are not being met and suggests resources and actions the student can take. If a student fails to meet the standards outlined above in any subsequent quarter, the student is placed on probation. The student is notified in writing of the probationary status and what must be done to remove it. If a student on probation fails to meet the criteria listed above, the student is notified in writing, dropped from the major, and coded as a premajor in the College of the Environment.
The Program on the Environment recognizes that inequities can result from any continuation policy. If students are placed on probation or dismissed and believe their record has been misunderstood, the may request reconsideration of the probation or dismissal by writing a letter to the Undergraduate Program Coordinator. The letter should include any additional supporting or relevant material. The letter and supporting material are transmitted to the Program on the Environment Director, who reviews all available information and then decides whether or not academic probation should be continued for another quarter or whether the dismissal was appropriate and valid. Any student appeal must be made within 30 days of the notification of placement on probation or dismissal. The Director responds to the student appeal within 30 days.

## Student Outcomes and Opportunities

- Learning Objectives and Expected Outcomes: The environmental studies major offers a rigorous, interdisciplinary, experiential curriculum designed to prepare future environmental leaders to respond to bioregional and global environmental opportunities and challenges. It takes advantage of the extraordinary environmental research at the UW, and makes that social, scientific, humanistic, and professional expertise accessible to students in innovative ways.
Students completing the BA in environmental studies have developed skills in the following:
- Earth Systems Knowledge: Understand the structure, function, and integration of the Earth, its inhabitants, and its four major spheres: land, water, living things, and air.
- Interdisciplinary Approach: Apply an interdisciplinary approach to the study of the environment, integrating multiple kinds of information, tools, methods, and scholarship from a variety of disciplines, in order to analyze and construct arguments about complex environmental issues.
- Experiential Learning: Understand the connections between classroom and experiential learning and successfully practice multiple forms of hands-on, real world applications.
- Communication: Demonstrate proficiency in multiple modes of communication (writing for different audiences and purposes, using a range of disciplinary norms; oral presentations and public speaking; online publishing; and visual display of environmental information).
- Public Policy and Decision Making: Understand how uncertainty, risk, law, politics, ethics, economics, and culture interact with environmental public policy and decision making.
- Teamwork: Collaborate as members of teams, effectively working with multiple stakeholders from various backgrounds to address environmental issues.
History of Environmental Inquiry: Understand and reflect critically on the intellectual and cultural history of environmental studies including the history of environmental preservation and conservation.
- Temporal Scales: Understand various temporal scales inherent in environmental studies and situate themselves on the continuum of geologic time, evolutionary history, human environment history, and decision making for future generations.
- Spatial Scales: Understand various spatial scales inherent in environmental studies spanning the continuum from the local/bioregional to the international/ global.
- Diversity: Understand how environmental perspectives, policies, and decisions are related to issues of diversity, privilege, and power.
- Technical Knowledge: Be familiar with some of the technological tools commonly used to address environmental challenges.
- Professional Development: Understand how their education will serve them as environmental professionals.
- Instructional and Research Facilities: The Program on the Environment office in Wallace Hall Suite 12 includes a commons area for student and faculty events and presentations, four study areas, and a computer lab. Because PoE is an interdisciplinary program, its students access resources, laboratories, and field stations across a range of UW departments, colleges, and schools.
- Honors Options Available: With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- Research, Internships, and Service Learning: All environmental studies majors complete a senior capstone experience, which includes an internship with a com-munity-based organization or government agency, an undergraduate research project, and/or international fieldwork or study abroad.
- Student Organizations/Associations: SAGE (Student Association for Green Environments) is a club to spread awareness for environmental issues on and off campus and to promote events for a greener, sustainable environment. SAGE is committee to community engagement and education and creating professional development opportunities for environmental studies students.

## COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations.

ENVIR 100 Environmental Studies: Interdisciplinary Foundations (5) I\&S/NW Introduces environmental studies through interdisciplinary examination of the ethical, political, social, and scientific dimensions of current and historical environmental issues. Integrates material from different disciplines, and applies insights and methods to actual problems and situations at scales from the local to the global. Offered: AWSp.
ENVIR 103 Society and the Oceans (5) I\&S/NW Explores the social and policy dimensions of the ocean environment and ocean management policy. Attention to how human values, institutions, culture, and history
shape environmental issues and policy responses. Examines case studies and influential frameworks, such as the ocean as "tragedy of the commons". Offered: jointly with JSIS B 103/SMEA 103.
ENVIR 200 Environmental Studies: Communication and Information (5) VLPA/I\&S A practical course for developing the skills necessary to engage, analyze, write, and speak about complex environmental issues in a variety of disciplinary contexts with particular values and emphases. Focus on reading, writing, presentation, and critical analysis of written material. Prerequisite: minimum grade of 2.0 in ENVIR 100; minimum grade of 2.0 in one of C LIT 240, ENGL 109 and ENGL 110; ENGL 111, ENGL 121, ENGL 131, ENGL 197, ENGL 198, ENGL 199, ENGL 281, ENGL 297, ENGL 298, or ENGL 299. Offered: AWSp.
ENVIR 210 Introduction to Environmental Modeling (4) NW, QSR Explores strengths and limitations of diverse modeling approaches, and strategies for using models in quantitative critical analysis of past, current and future conditions in terrestrial and marine environments. Focus on active learning use of models to ask and answer questions about biotic and abiotic environmental processes, management strategies and policy decision-making. Offered: jointly with Q SCI 210.
ENVIR 211 Environmental Justice (5) I\&S Pena Examines introductory studies of environmental racism and ecological injustice in the USA and select areas of the world. Reviews environmental justice theories and methods applied to risk science, ecosystem management, biodiversity conservation, and sustainable development. Includes comparative studies of social movements for "eco-justice." Offered: jointly with AES 211/ANTH 211.
ENVIR 221 Environmental History of the United States (5) I\&S Nash Surveys the relationship between nature and human history, including the impact of the nonhuman environment on American history and the environmental effects of colonization, urbanization, and consumerism; the cultural construction of nature in different eras and its social implications; the sources and limits of modern environmental politics. Offered: jointly with HSTAA 221; A.

ENVIR 235 Introduction to Environmental Economics (5) I\&S/NW Rabotyagov Introduces non-economics majors to environmental and natural resource economics. Discussion of fundamental economic concepts, including markets and private property. Students learn basic tools used in the economic assessment of environmental problems and apply these methods to key environmental issues. Offered: jointly with ECON 235/ESRM 235.
ENVIR 243 Environmental Ethics (5) I\&S Hartzell, Nichols Focuses on some of the philosophical questions that arise in connection with environmental studies. Topics to be considered include: the ideological roots of current issues, values and the natural world, public policy and risk assessment, intergenerational justice, and social change. Offered: jointly with PHIL 243.

ENVIR 250 Environmental Studies: Data Types and Collection Methods (5) NW, QSR Introduction to the diversity of methods for collecting and analyzing data used to understand complex environmental issues. Case studies help to illustrate research design processes, and introduce key methods of data collection and analysis relevant to the problem. Prerequisite: minimum grade of 2.0 in ENVIR 100. Offered: AW.
ENVIR 280 Natural History: Knowing Our Non-Human Neighbors (5) NW Tewksbury Introduces natural history, the observation and representation of nature, at biological scales from organisms to landscapes.

Emphasizes the natural history of the Pacific Northwest. Offered: Sp.
ENVIR 296 Study Abroad - Environmental Studies (1-15, max. 15) Environmental studies course taken through an approved study abroad program, for which there are no direct UW equivalents. Credit does not apply to major requirements without approval.
ENVIR 300 Environmental Studies: Synthesis and Application (5) I\&S/NW Synthesis and application of natural and social science disciplines to environmental issues in specific, place-based case studies. Cases illustrate design of environmental policies, analysis of complex environmental problems, and the entanglement of facts and values in environmental decisionmaking. Prerequisite: minimum grade of 2.0 in ENVIR 200 and ENVIR 250; recommended: ENVIR major foundational courses. Offered: WSp.
ENVIR 313 Environmental Earth Science (5) NW Swanson Analysis of geologic constraints upon human activity and the environmental consequences of such activity. Topics include hillslope processes, fluvial and groundwater processes, earthquake and volcanic hazards, and environmental aspects of deforestation and atmospheric pollution. Prerequisite: either ESS 101, ESS 210, ESS 211, GEOL 101, GEOL 201, or GEOL 205. Offered: jointly with ESS 315; A.
ENVIR 320 Changing Rivers of Puget Sound (5) NW Explores the physical and ecological evolution of Puget Sound rivers, their geologic origins, hydro-geomorphic processes, and associated ecosystems. Uses methods for detecting and evaluating natural and anthropogenic environmental change, and the historical context of resource management and restoration, including Native American treaty rights and impacts of population growth and climate change. Offered: jointly with ESS 320/AIS 320; Sp.
ENVIR 330 Climate Change Impacts on Marine Ecosystems (5) NW Links the physics of climate to marine ecosystem processes, exploring both observed climate impacts from the past and projected ecosystem changes due to human-caused climate change in the future. Case studies include polar, sub-arctic, temperate, tropical, and upwelling ecosystems, and ocean-acidification and its projected impacts. Required: high school or college physics and algebra with a basic understanding of Newton's Laws and the ability to comprehend and construct vector diagrams. Offered: jointly with FISH 330.
ENVIR 341 Energy and Environment (3) NW Malte Energy use. Fossil energy conversion. Oil, gas, coal resources. Air impacts. Nuclear energy principles, reactors, fuel cycle. Prerequisite: either MATH 112, MATH 124, or Q SCI 291; either CHEM 120, CHEM 142, CHEM 144, PHYS 114, or PHYS 121. Offered: jointly with M E 341/CHEM E 341; A.
ENVIR 350 Internship (1-5, max. 15) Fieldwork, coursework, or other learning experience conducted offcampus, but supervised by UW faculty. Credit/nocredit only.
ENVIR 360 Environmental Norms in International Politics
(5) I\&S Ingebritsen Surveys development of international environmental consciousness from 1960s to present. Models of "green development"; ways in which norms for resource use have entered global politics. Patterns of state compliance with international environmental agreements, and why states fall short of meeting their international obligations. Offered: jointly with SCAND 350/JSIS B 350.
ENVIR 362 Introduction to Restoration Ecology (5) I\&S/ NW Bakker An introduction to ecological restoration of damaged ecosystems. Examines the philosophical base of restoration as well as the social, biological, and political forces that impact the success of any
restoration project. Includes lectures, readings, case studies, and field trips. Offered: jointly with ESRM 362; A.
ENVIR 371 Anthropology of Development (5) I\&S Development refers to social, economic, cultural, political transformations viewed as progress. Studied from anthropological perspectives. Historical, social context for emergence of ideas of development. Role of development in promoting national cultures. Impact of development on individual citizenship, families, ru-ral-urban relations, workers, business, environment. Prerequisite: one 200-level ANTH course. Offered: jointly with ANTH 371.
ENVIR 379 Environmental Sociology (5) I\&S/NW Asah Social processes by which environmental conditions are transformed into environmental problems; scientific claims, popularization of science, issueframing, problem-amplification, economic opportunism, and institutional sponsorship. Examination of social constructs such as ecosystem, community, and free-market economy. Use of human ecology to assess whether the current framing of environmental problems promotes ecological adaptability. Offered: jointly with ESRM 371/SOC 379; A.
ENVIR 384 Global Environmental Politics (5) I\&S Litfin Ex amines the globalization of environmental problems, including climate change, ozone depletion, and loss of biodiversity, as well as the globalization of political responses to these problems within the framework of globalization as set of interlinked economic, technological, cultural, and political processes. Offered: jointly with POL S 384.

ENVIR 415 Sustainability and Design for Environment (3) Cooper Analysis and design of technology systems within the context of the environment, economy, and society. Applies the concepts of resource conservation, pollution prevention, life cycle assessment, and extended product responsibility. Examines the practice, opportunities, and role of engineering, management, and public policy. Offered: jointly with CEE 495/M E 415; S.
ENVIR 416 Ethics and Climate Change (5) I\&S Hartzell, Nichols Critical examination of the ethical issues surrounding climate change. Prerequisite: either one philosophy or one environmental studies course. Offered: jointly with PHIL 416.
ENVIR 417 Advanced Topics in Environmental Philosophy
(5) I\&S Critical examination of issues in environmental philosophy. Topics vary. Prerequisite: one philosophy course. Offered: jointly with PHIL 417.

ENVIR 418 Communications and the Environment (5) I\&S Examines the role of mass media in the resolution of environmental problems. Topics include strengths and weaknesses of media coverage, use of media by environmental groups and government agencies, media effects on public opinion, and mass communication and social movements. Offered: jointly with COM 418.

ENVIR 433 Environmental Degradation in the Tropics (5) I\&S/NW Christie Considers theories and controversies of environmental degradation in the tropics, ecological and social case studies of Central American rain forests and Southeast Asian coral reefs, and implications of environmental management techniques. Of fered: jointly with JSIS B 433/SMEA 433.
ENVIR 439 Attaining a Sustainable Society (1/3, max. 3) I\&S/NW Discusses diverse environmental issues, the importance of all areas of scholarship to evaluating environmental challenges, and the connections between the past and the future, to reveal integrative approaches to protect the long-term interests of human society. Offered: jointly with FISH 439; A.

ENVIR 442 Renewable Energy (4) NW Malte Introduction to renewable energy. Principles and practices: solar, wind, water, and biomass energy conversion. Prerequisite: either MATH 112, MATH 124, or Q SCI 291; either CHEM 120, CHEM 142, CHEM 144, PHYS 115, or PHYS 122. Offered: jointly with CHEM E 442/M E 442.

ENVIR 459 Culture, Ecology, and Politics (5) I\&S Pena Critical studies of class, gender, and race differences in environmental politics. The political-economic dimensions of ecological change. Contemporary environmental movements including the varieties of bioregionalism, deep ecology, ecofeminism, ecosocialism, environmental justice, and social ecology. Offered: jointly with ANTH 459.
ENVIR 476 Introduction to Environmental Law and Process (3) I\&S Bryant Use and application of key statutes in marine living resources management. Overview of administrative law and process. Basic legal research, reading, and briefing selected judicial opinions. Participatory case study component. Designed for nonlaw graduate and advanced undergraduate students. Offered: jointly with SMA 476; A.
ENVIR 478 Topics in Sustainable Fisheries (3, max. 9) Parrish Seminar series featuring local, national, and internationally known speakers in fisheries management and conservation. Case studies. Conservation/ restoration in practice. Pre-seminar discussion section focusing on select readings. Final paper. Topics may include harvest management, whaling, by-catch, salmon, marine protected areas, introduced species, citizen action, co-management, and marine ethics. Offered: jointly with FISH 478/BIOL 478; W, odd years.
ENVIR 480 Sustainability Studio (5, max. 10) Exploration of definitions and critical concepts of sustainability and analysis of sustainability practices on the UW campus. Student research teams analyze specific sustainability practices related to food, water, energy, and climate, among other topics. Sustainability project topic focus is different each quarter. Offered: AWSp.
ENVIR 490 Pre-Capstone Seminar (2) Critique readings on environmental education and applied environmental work. Define a capstone experience based on personal interests and skills and complete a learning contract and a contextual bibliography for ENVIR 491. Prerequisite: minimum grade of 2.0 in ENVIR 300. Offered: ASp.

ENVIR 491 Capstone Experience ([1-12]-, max. 12) Capstone experiences, arranged during ENVIR 490, may include internships and other applied environmental work, directed research on environmental topics, or team efforts. Prerequisite: ENVIR 490. Offered: AWSpS.
ENVIR 492 Post-Capstone Seminar (-3) Build writing skills around course readings and discussion. Complete three final products: a capstone analysis paper summarizing and contextualizing work in ENVIR 491; an integrative essay reflecting on personal education; and a formal capstone presentation. Prerequisite: ENVIR 491. Offered: ASp.
ENVIR 495 Advanced Topics in Environmental Studies (15, max. 15) Advanced topics in environmental studies. Offered: AWSpS.
ENVIR 496 Study Abroad - Advanced Environmental Studies (1-15, max. 15) Environmental studies course taken through an approved study abroad program for which there are no direct UW equivalents. Credit does not apply to major requirements without approval.
ENVIR 497 Seminar in Environmental Studies (1-3, max. 6) Intensive and advanced reading and discussion
of selected works in interdisciplinary environmental studies. Topics vary. Credit/no-credit only.
ENVIR 498 Independent Study (1-5, max. 15) Independent reading and/or research. Limited to majors and minors in Environmental Studies.
ENVIR 499 Undergraduate Research (1-15, max. 15) Undergraduate research in environmental studies. Offered: AWSpS.
ENVIR 500 Graduate Seminar in Environmental Studies (15, max. 15) Exploration of interdisciplinary themes in environmental science communication. Topics vary.
ENVIR 501 Graduate Seminar in Environmental Management (1-5, max. 15) Addresses a contemporary interdisciplinary issue in environmental management by integrating the perspectives and theories of science/ technology, public policy, and business. Format emphasizes interactive, hands-on approaches to problem solving, with visiting lectures by academic and/ or external practitioners.
ENVIR 502 Business Strategy and the Natural Environment (4) Applies economic and business principles (marketing, accounting, operations) to understand interactions between business and the natural environment and how environmental issues influence business strategy. Theory and case studies explore strategies that both respond to and seek competitive advantage from firms' interactions with the environment.
ENVIR 503 Role of Scientific Information in Environmental Decisions (3) Bostrom, Cullen Examines how science contributes to decisions that affect the natural environment: how science and scientists help frame debates and decisions; how scientific findings are incorporated into decision making processes; and how scientists and nonscientists deal with uncertainty.
ENVIR 511 Environmental Management - Keystone Project I (4) First in a two-quarter, project-base course in which graduate students in the Environmental Management Certificate work in teams of an environmental problem for a government, business, or non-profit organization. Keystone projects address a range of issues in environmental management, and integrate aspects of science, policy, and business. Offered: A.
ENVIR 512 Environmental Management - Keystone Project II (4) Second in a two-quarter, project-base course in which graduate students in the Environmental Management Certificate work in teams of an environmental problem for a government, business, or non-profit organization. Keystone projects address a range of issues in environmental management, and integrate aspects of science, policy, and business. Prerequisite: ENVIR 511. Offered: W.
ENVIR 585 Climate Impacts on the Pacific Northwest (4) Mantua, Snover Knowledge of past/future patterns of climate to improve Pacific Northwest resource management. Topics include: the predictability of natu-ral/human-caused climate changes; past societal reactions to climate impacts on water, fish, forest, and coastal resources; how climate and public policies interact to affect ecosystems and society. Offered: jointly with ATM S 585/ESS 585/SMEA 585; Sp.
ENVIR 600 Independent Study or Research (1-5) Independent reading and research. Limited to students enrolled in the Program on the Environment's graduate certificate programs.

## Environmental and Forest Sciences

107 Anderson

The School of Environmental and Forest Sciences, through teaching, research, and outreach, generates and disseminates knowledge for the stewardship of natural and managed environments and the sustainable use of their products and services. Its vision is to provide internationally recognized knowledge and leadership for environmental and natural resource issues.
Founded in 1907, the school holds a position of national and international leadership in instruction and research. Its location in one of the world's largest forested regions provides students access to a unique urban-to-wildland world-class laboratory in which to study. Approximately 400 undergraduate and 175 graduate students are enrolled, taught by more than 50 faculty members. Students enjoy small classes and close association with faculty, as well as the diversity and superior facilities of a large research university.
The school's programs focus on the sustainability and functionality of complex natural resource and environmental systems, using an integrated, interdisciplinary approach across multiple scales involving the urban-to-wildland gradient. Its programs serve society generally, and natural resource professions in particular, with graduates well equipped to contribute to discussions and solutions to resource problems facing the region and the world. Interdisciplinary research and outreach centers and cooperatives include the Center for International Trade in Forest Products (CINTRAFOR), the Water Center, the UW Botanic Gardens, which include the Center for Urban Horticulture and the Washington Park Arboretum, the Olympic National Resources Center (ONRC), the Stand Management Cooperative (SMC), and the Precision Forestry Cooperative. For current information on these centers and cooperatives, visit www.sefs.washington.edu/centersPrograms/.

## Office of Student and Academic Services

## Director, Student and Academic Services 130 Anderson <br> cfradv@uw.edu

The Office of Student and Academic Services in the School of Environmental and Forest Sciences assists prospective students with admission to the school and advises current students, including interpretation of school and University requirements and assistance in course planning. At the graduate level, faculty advisers assist students in choosing a course plan to help build an appropriate academic background for their research areas.

The office also helps to sponsor a career fair Winter quarter. Students are strongly urged to seek summer employment and internship positions relevant to their career goals.

## Research Programs

Areas of research are closely tied to the school's graduate program research areas. These include bioresource science and engineering; forest ecology; forest soils; forest systems and bioenergy; restoration ecology and environmental horticulture; social sciences; sustainable resource management; and wildlife science.

## Outreach Programs

The school, through its interdisciplinary centers and through collaboration with UW and external partners, undertakes and promotes continuing public and professional education for citizens of the state.

## FACILITIES

The school occupies three central Seattle campus buildings: Alfred H. Anderson Hall, the Hugo Winkenwerder Forest Sciences Laboratory, and Julius H. Bloedel Hall. In addition, the Center for Urban Horticulture, a part of the UW Botanic Gardens, is located near the Union Bay natural area on the east side of the Seattle Campus. The center maintains a library that serves students, faculty, landscape professionals, and the public. The center's herbarium supports fieldwork in environmental horticulture, restoration ecology, and dendrology. Containing representative plant material from all parts of the United States, the collection includes dried, mounted specimens of shrubs, hardwood trees, and conifers. Another herbarium, complete in plants native to the Pacific Northwest and maintained by the Burke Museum and Department of Biology, is available for use by the school's students.
The school's laboratory facilities represent an extensive array of modern equipment for research, including optical equipment, electronic instrumentation for a wide variety of uses, gas chromatographs, spectrophotometers, and physical-test equipment. Specific laboratories are designed to study soil chemistry and soil physics, hydrology, polymer chemistry, tree physiology, genetics, wood and extractives chemistry, physics of fibrous composites, applied mechanics, wood process technology, silviculture, ecology, paleoecology, pathology, entomology, wildlife, landscape management systems, horticultural physiology, and horticultural plant materials.
The school computing facilities include computer systems and staff dedicated to specific research areas, a computer student laboratory, and a local area network with several servers offering access to the Internet and local printers.

## Field Facilities

School field facilities include two major forested areas covering more than 4,000 acres, an arboretum, a natural area, and several cooperative research centers and stations. These lands offer a wide variety of terrestrial and aquatic characteristics favorable to a full range of scientific investigations. They also provide a natural-science laboratory for the many disciplines in the school concerned with the research and teaching of natural resources science and management.
The 4,200-acre Charles Lathrop Pack Experimental Forest is located 65 miles south of the University, near Eatonville, Washington, and is home to the Center for Sustainable Forestry at Pack Forest. Broad forest and soil diversity in this area has led to extensive biological, management, and engineering research. A full-time resident staff manages the facility, harmonizing its public-education objectives with academic and research objectives. Rustic but comfortable facilities which provide housing and support to research programs are also used extensively for conferences both within and outside the University. The Center for Sustainable Forestry is charged with discovering, teaching, and demonstrating the concepts of sustainable forestry, with special emphasis on the school's strategic themes of sustainable forest enterprise and sustainable land and ecosystem management in an urbanizing world.

The Olympic Natural Resources Center (ONRC) is a 19,000-square-foot research and education facility located on the west side of the Olympic Peninsula. The mission of the center is to conduct research and education on natural-resources management practices that integrate ecological and economic values. Innovative management methods that integrate environmental and economic interests into pragmatic management of forest and ocean resources are demonstrated. Both a forest management program and a marine program are in place to study the relationship between the terrestrial and marine environment.
The Lee Memorial Forest, approximately 160 acres, is located about 22 miles northeast of the University, near

Maltby. This forested property provides valuable academic and research opportunities near the campus. Characterized by forest types and soils common to Western Washington lowlands, Lee Forest is used extensively for short field trips and for long-term research and demonstration projects especially related to changing land uses.
The Allan E. Thompson Research Center and the Joe E. Monahan Findley Lake Reserve and Research Area in the Cedar River watershed are used by the school in cooperation with Seattle Public Utilities for studies in forest ecology and soil science in representative low and high elevation forest ecosystems.
The UW Botanic Gardens include the Center for Urban Horticulture, which has offices, laboratories, public-education resources, and field sites for teaching and research along the shore of Union Bay. Its 10-acre Union Bay Gardens emphasize unusual ornamental and native woody landscape plants. The 60-acre Union Bay Natural Area, a former landfill, now a naturalized habitat, is used by University classes and the public to study principles and practices of restoration ecology. The Douglas Research Conservatory is a modern plant-growing facility with greenhouses, growth chambers, nursery, and classrooms. The Otis Douglas Hyde Herbarium is dedicated to plants of urban and environmental horticultural significance. The Miller Seed Vault stores seeds of Washington's rare and endangered native plants in support of restoration and research projects. The Elisabeth C. Miller Library is the Northwest's foremost public horticultural library, with books, journals, and other materials available to the gardening public, students, and professional horticulturists. The Center for Urban Horticulture also conducts courses, lectures, and special events for the public and professionals as part of the school's outreach program. Cooperative programs are in place with Washington State University/King County Cooperative Extension, whose horticulture program is housed at the center.
The UW Botanic Gardens' largest facility is the Washington Park Arboretum, a 230-acre collection of trees and shrubs in a naturalistic setting on the south shore of Lake Washington. Managed in cooperation with the City of Seattle Department of Parks and Recreation, the arboretum contains some 5,200 different kinds of woody plants that are available for research and academic study, making it the third most diverse arboretum in the United States. Displays and programs educate students and visitors about woody plants' diversity, natural ecology, and urban landscape use, as well as conserving endangered natural and cultivated plants. Classes in botany, dendrology, horticulture, wildlife, and landscape architecture make use of the collections, while the grounds are used for studies in soil science, ecology, and other research projects, including many independent student projects. The arboretum, established in 1934, offers numerous formal and informal classes for the general public and, in addition, serves the community as a public park and open space.

## UNDERGRADUATE PROGRAM

Adviser
116 Anderson
(206) 543-3077
cfradv@uw.edu
The School of Environmental and Forest Sciences offers the following programs of study:

- The Bachelor of Science degree with a major in environmental science and resource management. Within this major, options in landscape ecology and conservation, restoration ecology and environmental horticulture, sustainable forest management, and wildlife conservation are offered.
- The Bachelor of Science degree with a major in bioresource science and engineering. Bioresource science and engineering has ABET accreditation which is recognized by the Council on Postsecondary Accreditation
and the U.S. Department of Education as the accrediting agency for engineering in the United States.
- Minors in ecological restoration, and environmental science and resource management.

## Bachelor of Science

Suggested First- and Second-Year School Courses:

- Environmental Science and Resource Management: HCDE 231, ENGL 131 (or other 5-credit English composition course); COM 220; BIOL 180, BIOL 200, BIOL 220; CHEM 120, CHEM 220; any 5-credit VLPA course; MATH 120 or Q SCI 291; ESRM 210.
- Bioresource Science and Engineering: CHEM 142 (or CHEM 144), CHEM 152 (or CHEM 154), CHEM 162 (or CHEM 164), CHEM 237, CHEM 238; ECON 200; ENGL 131 (or other 5-credit English composition course); HCDE 231; CHEM E 260; MATH 124, MATH 125, MATH 126, MATH 307; PHYS 121, PHYS 122, PHYS 123; Q SCI 381; BSE 150; BSE 201, BSE 202, BSE 248, and BSE 450.

## Department Admission Requirements

## Environmental Science and Resource Management

Students in good academic standing may declare this major at any time.

## Bioresource Science and Engineering

Students may apply for freshman admission or upper-division admission. Applications are available in Student and Academic Services, 116 Anderson, or through the College of Engineering, 356 Loew, or by visiting the school website. Prospective upper-division BSE applicants should have most pre-engineering coursework completed before applying (see suggested sequencing at: www.sefs.washington. edu/academicPrograms/undergrad/bse/BSEflier.pdf ), especially MATH 126 and CHEM 238. See adviser for further information. Admission is competitive; completion of requirements does not guarantee admission. Students may also apply to the chemical engineering degree program through the College of Engineering advanced admission program (see College of Engineering section for advanced admission entrance and continuation requirements).

## Graduation Requirements

## Environmental Science and Resource Management

180 credits, to include:

1. General Education Requirements ( $72-73$ credits)
a. Written Communication (12 credits): 5 credits English composition (ENGL 131 preferred); HCDE 231; and four additional credits, which are satisfied by core courses shown below.
b. Quantitative and Symbolic Reasoning (20 credits): Q SCl 291, Q SCl 292, Q SCl 381; ESRM 250.
c. Natural World (29-30 credits): BIOL 180, BIOL 200, and BIOL 220; CHEM 120 and CHEM 220, or CHEM 142 (or CHEM 144) and CHEM 152 (or CHEM 154); ESRM 210 or ESS 210 or ESS 230/OCEAN 230 (5 credits only) or ESS 201 or ATM S 211.
d. Visual, Literary, \& Performing Arts (VLPA) (10 credits): COM 202 or COM 220; five additional credits from the University VLPA list.
e. Individuals \& Societies (I\&S) (10 credits): ENVIR/ ECON 235 or ECON 200 or ECON 201; and five additional credits, which are satisfied by core courses shown below.
2. Major Requirements ( 62 credits for the major):
a. Core Courses (17 credits): ESRM 200, ESRM 201, ESRM 300, ESRM 304.
b. Restricted Electives: Minimum 35 credits of 300 - or 400-level courses from within the School of Environmental and Forest Sciences for the major; 29 to 36
such credits may come from one of the specified option course lists described below; 15 of the credits must be at the 400 level.
c. Capstone ( 10 credits): ESRM 462 and ESRM 463 and ESRM 464; or ESRM 494 and ESRM 496; or ESRM 494 and ESRM 495
d. All ESRM courses must be completed with at least a 2.0 grade to count toward major requirements.
3. Free electives: As needed to bring minimum total to 180 credits.
Environmental Science and Resource Management voluntary program options:
All requirements for any of the four voluntary options are the same as for the major shown directly above.
4. Landscape Ecology and Conservation Option: At least 35 credits from the following list: ESRM 350, ESRM 425, ESRM 427, ESRM 430, ESRM 441, ESRM 465, ESRM 470, Q SCI 482.
5. Restoration Ecology and Environmental Horticulture Option: 35 credits from the following list: ESRM 331, ESRM 362, ESRM 415, ESRM 473 (or ESRM 479), ESRM 478, ESRM 480; two from ESRM 411, ESRM 412, ESRM 444, or ESRM 451.
6. Sustainable Forest Management Option: At least 35 credits from the following list: ESRM 323; ESRM 368; ESRM 430; ESRM 461; ESRM 470; ESRM 328 or ESRM 350 or ESRM 409 or ESRM 410 or ESRM 414 or ESRM 425 or ESRM 426 or ESRM 428; ESRM 315 or ESRM 381 or ESRM 420 or ESRM 425 or ESRM 435 or ESRM 444 or ESRM 468 or ESRM 490 (section by approval); ESRM 320 or ESRM 321 or ESRM 400 or ESRM 403 or ESRM 427 or ESRM 465.
7. Wildlife Conservation Option: 35 credits from the following list: ESRM 350, ESRM 351, ESRM 441, ESRM 450, ESRM 455 (to be taken at least twice), ESRM 458, Q SCI 482.

## Bioresource Science and Engineering

1. General Education Requirements (101 credits)
a. Written Communication (12 credits): 5 credits English composition (ENGL 131 preferred); HCDE 231 (3 credits). (Additional 4 credits satisfied by BSE courses shown below.)
b. Natural World (NW) ( 64 credits): MATH 125, MATH 126, MATH 307, MATH 308; Q SCI 381 or IND E 315 or STAT 390. CHEM 152 (or CHEM 154), CHEM 162 (or CHEM 164); CHEM 237, CHEM 238; PHYS 121, PHYS 122, PHYS 123; 10 credits from the University NW list (outside the major).
c. Visual, Literary, \& Performing Arts (VLPA) (10 credits): Chosen from the University VLPA list.
d. Individuals \& Societies (I\&S) (20 credits): ECON 200; 10 credits chosen from the University I\&S list (outside the major). ( 5 additional credits satisfied by required BSE courses.)
2. Major Requirements ( 74 credits)
a. Chemical Engineering (17 credits): CHEM E 310, CHEM E 325, CHEM E 330, CHEM E 340.
b. Bioresource Science (49 credits): BSE 150, BSE 201, BSE 202, BSE 248, BSE 406, BSE 420, BSE 421, BSE 422, BSE 426, BSE 430, BSE 436, BSE 480, BSE 481, BSE 497. All required BSE courses must be completed with at least a 2.0 grade.
c. Technical Electives (8 credits minimum): Taken from a list of approved engineering electives.
d. Business Option (12 credits minimum): ESRM 320 (5), ESRM 321 (5), and one course from approved list.
3. Free Electives: To bring minimum total to 180 credits.

## Minors

## Ecological Restoration

## Minor Requirements

25 credits as follows:

1. Introduction to Restoration Ecology (5 credits): Either ESRM 362/ENVIR 362, BES 362, or TESC 362.
2. Capstone ( 10 credits): One of the following sequences: ESRM 462/ENVIR 462, ESRM 463/ENVIR 463, ESRM 464/ENVIR 464; or BES 462, BES 463, BES 464; or TESC 462, TESC 463, TESC 464.
3. Electives: 10 credits from approved list of electives maintained by each campus.
4. Minimum 2.00 cumulative GPA for courses presented for the minor.
5. Minimum 15 credits from outside the student's major.
6. Minimum 15 credits completed at the UW.

## Environmental Science and Resource Management

## Minor Requirements

Minimum 25 ESRM credits, 20 of which must be upper division. A maximum of 5 credits from BSE courses allowed.

## Student Outcomes and Opportunities

- Learning Objectives and Expected Outcomes: Forest resources emphasizes interactions between biotic and human systems at landscape to regional scales. It also provides a knowledge base to answer critical questions about how individual organisms and biotic systems respond to perturbations and stresses imposed by human activities, as well as how the environment affects human behavior and institutions. This knowledge enables the design of methods for the conservation, restoration, and sustainable use of biotic systems, and is critical for environmental decision making.
The goal of the bioresource science and engineering curriculum is to provide students with the training, tools, and experiences needed to be successful professionals in the paper and allied industries. At the same time, it provides a comprehensive education so graduates can effectively work and live in the world's complex society.
The goal of the environmental science and resource management curriculum is to present fundamental knowledge and problem-solving experiences that enable students to understand the interdisciplinary dimensions of natural resource and environmental sciences and management. The structure of this curriculum provides great flexibility for students to pursue specialized fields through the formal program options, which include: landscape ecology and conservation; restoration ecology and environmental horticulture; sustainable forest management; and wildlife conservation; or to construct individual coursework to fit their educational goals.
Career opportunities abound in the area of environmental science and resource management in both private and public sectors. One example is the projected need in the U.S. Forest Service, where it is estimated that one-third of the workforce will be retiring within the next five years.
- Instructional and Research Facilities: See above for details.
- Honors Options Available: With College Honors (Completion of Honors Core Curriculum and Departmental Honors). With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements or visit www.sefs.washington.edu/academicPrograms/undergrad/honors.shtml.
- Research, Internships, and Service Learning: The Office of Student and Academic Services regularly receives internship announcements, which are forwarded to all SEFS students via email and placed in the office's Career Corner. Students are strongly encouraged to pursue these opportunities, which include work experience with federal, state, and private organizations in environmental science, forestry, engineering, conservation, wildlife, horticulture, and other related fields.
Undergraduate research opportunities are available. Students should contact faculty members in their areas of interest. There are also foreign study and field opportunities within the College. Some are formal study with faculty members, others are through other agencies. Contact the Office of Student and Academic Services for more information.
- Department Scholarships: For majors, the School of Environmental and Forest Sciences has a strong scholarship program that provides in-state tuition to students, based on merit or need. Application information can be found at www.sefs.washington.edu/academicPrograms/scholarship/index.shtml.
The Washington Pulp and Paper Foundation provides scholarships for students enrolled in the bioresource science and engineering curriculum. For information, contact Professor Rick Gustafson in Bloedel 364 or visit the foundation website at: depts.washington.edu/ wppf/.
- Student Organizations/Associations: The School has student organizations which organize student symposia, field trips, parties, slide shows and talks, public service projects, and other social activities. Current SEFS student organizations can be found at www.sefs.washington.edu/people/organizations.shtml.
Of Special Note: Some classes include field trips or require laboratory supplies or material duplication at student expense.

## GRADUATE PROGRAM

Graduate Program Adviser
116 Anderson, Box 352100
(206) 543-7081
cfradv@uw.edu
Graduate programs in forest resources are designed to accommodate a wide range of education and career objectives. A student may concentrate on development of advanced professional skills and knowledge or on exploration of forest-related science.
Graduate programs offered in forest resources lead to the degrees of Master of Environmental Horticulture, Master of Forest Resources in Sustainable Forest Management, Master of Science, and Doctor of Philosophy. Graduate students may center their study in one of the special fields within the school's divisions.

## Master of Environmental Horticulture

## Admission Requirements

1. Evidence of academic readiness for the program.
a. Minimum 3.00 GPA in last 60 semester or last 90 quarter hours.
b. Type and level of courses completed (generally, students are not admitted if their academic performance has been below average or they do not have sufficient course background in their intended program of study).
c. Adequate scores on the GRE (550-Verbal, 600-Quantitative, 5.0-Writing, or 156-Verbal, 148- Quantitative, 5.0-Writing for tests after August 2011 recommended).
d. International Applicants Only: Minimum TOEFL score of 580 (237 for computer-based test, 92 for internetbased, and 7 for IELTS tests).
2. Evidence of knowledge of intended area of study.
a. Clearly written statement of objectives in pursuing further education.
b. Ideally, work or field experience in the planned area of study.
3. Supporting evidence from reference persons (three recommendations total).
a. Recommendations from references familiar with applicant's academic ability and potential.
b. Letters of recommendation from employers in field related to applicant's educational goals.

## Degree Requirements

45 credits, as follows:

1. SEFS 500 (1), SEFS 503 (6), SEFS 549 (2), SEFS 561 (2), ESRM 411 (3), ESRM 451 (5), ESRM 480 (5), ESRM 481 (2); and 13 credits of restricted electives.
2. Internship/Independent Research: A formal public presentation and written professional paper are required. A member of the EHUF faculty will advise the student on his/her project, which is completed as SEFS 601 (9 credits minimum)
3. Electives (7 credits)

## Master of Forestry - Sustainable Forest Management

## Admission Requirements

1. Evidence of academic readiness for the program.
a. Minimum 3.00 GPA in last 60 semester or last 90 quarter hours.
b. Type and level of courses completed (generally, students are not admitted if their academic performance has been below average or they do not have sufficient course background in their intended program of study).
c. Adequate scores on the GRE (550-Verbal, 600-Quantitative, 5.0-Writing, or 156-Verbal, 148- Quantitative, 5.0-Writing for tests after August 2011 recommended).
d. International Applicants Only: Minimum TOEFL score of 580 ( 237 for computer-based test, 92 for internetbased, and 7 for IELTS tests).
2. Evidence of knowledge of intended area of study.
a. Clearly written statement of objectives in pursuing further education.
b. Ideally, work or field experience in the planned area of study.
3. Supporting evidence from reference persons (3 recommendations total)
a. Recommendations from references familiar with applicant's academic ability and potential.
b. Letters of recommendation from employers in field related to applicant's educational goals.

## Degree Requirements

45 credits, as follows:

1. SEFS 500 (1), SEFS 509 (3), SEFS 526 (3)
2. Directed Electives: 24 credits distributed among the following four areas, with at least two classes required in each area: forest biology/ecology, forest management, forest measurements, forest policy and administration. See adviser for list of approved courses for each area.
3. Unrestricted Electives: 9 credits
4. Capstone Project: SEFS 600 (5) or SEFS 601 (5)

## Master of Science

## Admission Requirements

1. Evidence of academic readiness for the program.
a. Minimum 3.00 GPA in last 60 semester or last 90 quarter hours.
b. Type and level of courses completed (generally, students are not admitted if their academic performance has been below average or they do not have sufficient course background in their intended program of study).
c. Adequate scores on the GRE (550-Verbal, 600-Quantitative, 5.0-Writing, or 156-Verbal, 148- Quantitative, 5.0-Writing for tests after August 2011 recommended).
d. International Applicants Only: Minimum TOEFL score of 580 (237 for computer-based test, 92 for internetbased, and 7 for IELTS tests).
2. Evidence of knowledge of intended area of study.
a. Clearly written statement of objectives in pursuing further education.
b. Ideally, work or field experience in the planned area of study.
3. Supporting evidence from reference persons (3 recommendations total).
a. Recommendation from references familiar with applicant's academic ability and potential.
b. Letters of recommendation from employers in field related to applicant's educational goals.

## Degree Requirements

Minimum 45 credits, to include:

1. Orientation: SEFS 500 (1)
2. Social and Natural Sciences Applied to Natural Resource and Environmental Issues: SEFS 509 (3)
3. Disciplinary Knowledge: Minimum 10 credits from list of approved courses according to interest area
4. Research Design and Quantitative Analysis: Minimum 8 credits from list of approved courses according to interest area
5. Current Topics: 2 credits ( 500 level), topics vary from year to year
6. Thesis Research: SEFS 700 ( 9 credits minimum)

Current interest groups are:

- Forest ecology
- Forest soils
- Bioresource science and engineering
- Restoration ecology and environmental horticulture
- Social sciences
- Sustainable resource management
- Wildlife science

## Doctor of Philosophy

## Admission Requirements

1. Evidence of academic readiness for the program.
a. Minimum 3.00 GPA in last 60 semester or last 90 quarter hours.
b. Type and level of courses completed (generally, students are not admitted if their academic performance has been below average or they do not have sufficient course background in their intended program of study).
c. Adequate scores on the GRE (550-Verbal, 600-Quantitative, 5.0-Writing, or 156-Verbal, 148- Quantitative, 5.0-Writing for tests after August 2011 recommended).
d. International Applicants Only: Minimum TOEFL score of 580 (237 for computer-based test, 92 for internetbased, and 7 for IELTS tests).
2. Evidence of knowledge of intended area of study.
a. Clearly written statement of objectives in pursuing further education. PhD applicants should have earned a master's degree; most apply for the master's and then continue on to the PhD.
b. Ideally, work or field experience in the planned area of study.
c. Publications written by the student related to the planned area of study.
3. Supporting evidence from reference persons (3 recommendations total).
a. Recommendations from references familiar with applicant's academic ability and potential.
b. Letters of recommendation from employers in field related to applicant's educational goals.

## Degree Requirements

90 credits, to include:

1. Same as for Master of Science degree (above) with one additional course in each of the categories:
a. Disciplinary knowledge
b. Research design and quantitative analysis
c. Current topics
2. Qualifying examination
3. General examination
4. Dissertation Research: SEFS 800 ( 27 credits minimum)
5. Final examination

## Financial Assistance

The school has a limited number of appointments for teaching and research assistantships that provide a stipend, tuition waiver, and benefits. Teaching and research assistant responsibilities are half-time, allowing time to pursue a full academic load. Students may contact faculty directly about available research assistantships.
Fellowships without teaching or research obligations are also available. Requests for consideration must be submitted by December 31 for the following academic year. Applications are in the school's admissions packet, available on the school's website at: www.sefs.washington.edu/ academicPrograms/graduate/applicant.shtml.

## COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations.

## School of Environment and Forest Resources

SEFS 500 Graduate Orientation Seminar (1) Introduction to graduate study at the School, student resources and services, and current research. Offered: A.
SEFS 501 Forest Ecosystems - Community Ecology (5) Community ecology of forest ecosystems. Quantitative methods of community description. Role of limiting factors, competition, and disturbance in determining community composition, structure, and stability. Introduction to forest ecosystem productivity. History and application of successional theory. Prerequisite: basic ecology course or permission of instructor. Offered: A.
SEFS 502 Analytical Techniques for Community Ecology (4) Bakker Analysis of ecological data, focusing on community-level data. Topics include distance measures, group comparison methods (Mantel test, permutational MANOVA), ordinations (PCA, DCA, NMS),
methods of identifying groups (cluster analysis, classification trees), as well as Indicator Species Analysis, diversity measures, and related topics. Prerequisite: Q SCI 482, which may be taken concurrently. Offered: W.

SEFS 503 Current Issues in Restoration Ecology and Environmental Horticulture (1, max. 10) Critical evaluation and discussion of published research in urban horticulture and restoration. Students and faculty present and discuss research methods and questions from current literature. Credit/no-credit only. Offered: AWSp.

SEFS 504 Research Processes in Forest Resources (4) Comprehensive survey of research processes for entering graduate students. Diagnostic and prescriptive evaluation of student research capabilities. Problem and hypothesis formulation, study design, multi-method strategies for gathering and analyzing data, and interpretation and presentation of results.
SEFS 505 Introduction to Pulp, Paper, and Bioproducts (3) Gustafson Introduction to pulp and paper technology for BSE graduate students who do not have a prior background in pulp and paper. Broad overview of pulp and paper technology and the pulp and paper industry. Offered: A.
SEFS 507 Soils and Land Use Problems (4) Harrison Environmental concerns of soils; how soil properties control potential and reasonable possibilities of land use. Includes factors controlling soil stability, hydrology, fertility, and movement of pollutants. Field trip oriented with weekly activity summaries. Students also conduct field trips to soil-use problem sites. Offered: W.
SEFS 509 Analysis of Research Problems (3) Natural resource issues emerge from interactions between humans and their biophysical world. Understanding resource problems and solutions requires integration of numerous areas of knowledge and methods of discovery. Objectives include exposure to, and development of, fundamental issues and skills essential for natural resource professionals, including development of a research plan. Offered: W.

SEFS 510 Graduate Studies in Forest Soils (1-5, max. 15) Offered: AWSpS.

SEFS 512 Biogeochemical Cycling in Soils and Forest Eco-
systems (3) Zabowski Elemental cycles in forests and soils. Fundamentals of processes involved in cycling are addressed along with alterations resulting from environment, vegetation, and soil types. Consideration of cycles of nutrients, metals, and other elements. Weekly discussion section reviews literature on biogeochemical cycling. Prerequisite: one soils course or permission of instructor. Offered: W, even years.
SEFS 513 Advanced Soil Genesis and Classification (5) Zabowski Soil formation, morphology, classification, and relationship to the environment. Labs and field trips illustrate properties and processes of forest and grassland soils in Washington. Requires two weekend field trips and a graduate project. Prerequisite: CFR 510 or permission of instructor. Offered: Sp, even years.
SEFS 514 Advanced Forest Soil Fertility and Chemistry (4) Harrison Chemical properties of soil, nutrient, and toxic elements; supply, retention, and loss of nutrients in soils; utilization of geochemical and ecosystem models such as GEOCHEM, MAGIC, TRICLE-DOWN, and ILWAS in developing a quantitative understanding of the chemical function of forest ecosystems. Prerequisite: general chemistry and geology of soils. Offered: Sp, odd years.
SEFS 515 Advanced Soil and Plant Analysis (3) Harrison Plants and animals must acquire nutrient elements
from their environment. Quantifying the composi tion of samples is the first step in understanding the processes in natural and manmade systems. Sampling, handling, preparation, storage, and analysis stressed. Prerequisite: one botany or plant science course, instrumental analysis, soils. Offered: Sp, even years.

SEFS 519 Conducting Financial, Environmental, and Social Responsibility Performance Research (3, max. 12) Paun Focuses on the concepts of accounting, finance, and financial statement analysis; techniques for analyzing firm performance; and conducting competitor analyses. Conduct in-depth, comparative performance analyses of U.S. and Canadian paper firms and publish the findings as a peer-reviewed manuscript in a journal. Offered: WSp.
SEFS 520 Geographic Information Systems in Forest Resources (5) Applications of GIS technology to forest science and management. Fundamentals of GIS systems: data sources, preprocessing, map analysis, output; remote sensing as a source of GIS data, image analysis, and classification. Emphasis on GIS as a source of management and technical information requests. Offered: AWSp.

SEFS 521 Current Topics in Forest Resources (2-5, max. 10) Critical evaluation and discussion of published research in the broad field of forest resources. Topics and requirements vary. Offered: AWSp.
SEFS 522 Plant-Microbe Interactions (1, max. 3) Doty Discusses current research related to forest treemicrobe interactions. Credit/no-credit only. Offered: W, odd years.
SEFS 523 Environmental Applications of Plants: Bioenergy and Bioremediation (3) Doty Covers phytoremediation (removing pollutants using plants), biofuel production, and carbon sequestration. Focuses on the biology rather than the chemistry. Emphasizes the latest research on how current practices in these areas are being improved. Offered: A.
SEFS 525 Advanced Wildland Hydrology (4) Bolton Advanced treatment of hydrologic cycle and basic hydrologic methods as applied to wildlands. Effects of forest management activities on hydrologic processes. Graduate focus on a detailed field or modeling hydrologic analysis. Offered: W.
SEFS 526 Seminar in Advanced Silviculture (3) Ford Seminar on current and emerging silvicultural issues and underlying biological principles. Topics include: stand management to enhance wildlife, biodiversity, and high productivity in sub-tropical and tropical regions; computer simulation of stand growth; adaptation to changes in management objectives; soil conditions and productivity during stand rotation; and minimizing effects of catastrophic disruption. Prerequisite: ESRM 428. Offered: W.

SEFS 527 Ecosystems Seminar (1) Discussion by invited speakers on current research related to ecosystems. Credit/no-credit only.
SEFS 528 International Forestry (3) Greulich Discussion on biological, social, and economic basis linked with forest practices in the world. Focuses on examples of how forests and renewable resources are both exploited and managed, with thoughts on how these resources can be sustainability managed. Emphasizes group presentations and seminar style discussion.
SEFS 529 Water Seminar (1, max. 6) Weekly seminars covering water resources and watershed topics with lectures from scientists on and off campus. Credit/ no-credit only. Offered: jointly with FISH 529/PB AF 521; AWSp.
SEFS 535 Fire Ecology (3) Fire regime concept as applied to fire ecology. Methodology for fire history research. History and function of forest fire in Western

United States with emphasis on Pacific Northwest. One weekend field trip. Offered: A.
SEFS 540 Optimization Techniques for Natural Resources (5) Studies optimization techniques for natural resources managers including spatial optimization; linear, integer, and multi-objective programming; and stochastic and combinatorial optimization. Emphasizes model building rather than on algorithmic concepts. Prerequisite: MATH 308 or permission of instructor. Offered: Sp.

SEFS 541 Advanced Landscape Ecology (5) Lawler Hands-on, applied, project-based research class. Students work in a team in conjunction with one or more outside partners to address real landscapescale conservation problems. Covers scaling, landscape processes, pattern measurement, connectivity, landscape modeling, and conservation planning. Prerequisite: SEFS 501. Offered: W, odd years.

SEFS 549 Urban Horticulture Seminar (1, max. 6) Discussion by invited speakers on current topics in urban horticulture. Credit/no-credit only. Offered: A.

SEFS 550 Graduate Seminar (2-5, max. 10) Graduate seminar to evaluate and discuss current research topics. Topics and requirements vary. Offered: AWSp.

SEFS 554 Wildlife Seminar (1-2, max. 10) West Discussion of current research and application in wildlife biology and conservation. Credit/no-credit only. Of fered: AWSp.
SEFS 561 Public Presentation in Urban Horticulture (2) Students learn to make public presentations in scientific, professional, and popular contexts and to interpret technical information for professional and lay audiences. Support materials, such as audiovisuals and graphics, are discussed. Offered: Sp.
SEFS 564 Advanced Forest Biometry (3/5) Turnblom Classical problems in analysis of forest populations and growth theory, and principles of parametric analysis and estimation processes in forest biometry. Of fered: A, odd years.
SEFS 567 Topics in Advanced Ecology (3, max. 6) Discusses literature on active research areas or controversies in different branches of ecology. Offered: jointly with BIOL 567/FISH 567; W.
SEFS 571 Resource Policy and Administration (5) Study based on understanding of the actors, arenas, issues, and policy communities that form the context for policy development and implementation. Exploration of approaches to policy inquiry. Consideration of implications for both policy and management. Students develop a study design for course project. Offered: jointly with PB AF 592.

SEFS 580 Advanced Urban Ecology (5) Alberti, Bradley, Hill, Marzluff, Paun, ZumBrunnen Discussion of current and important theoretical and empirical papers in urban ecology. Students continue to research interdisciplinary urban ecology projects while developing publishable manuscripts and oral presentations. Of fered: jointly with GEOG 588, URBDP 548. Offered: AWSp.
SEFS 590 Graduate Studies (1-5, max. 10) Study of emerging scientific developments in forest resources that may develop into regular course offerings. Offered: AWSpS.
SEFS 591 Seminar in Resource Policy and Management (1) Introduction and orientation for concurrent degree program between the Evans School of Public Affairs and the School of Environmental and Forest Sciences. Examines research and literature on contemporary issues related to the integration of natural resource science, policy, and management, through discussion among faculty, students, and invited speakers. Offered: jointly with PB AF 591; A.
sEFS 592 Environmental Policy Processes (3) Presents background to establish the need for environmental policy. Explores in a comparative manner, examining both successes and failures, various strategies that have been used or proposed to protect the environment. Offered: jointly with PB AF 590.
SEFS 595 Graduate Teaching Practicum (1-5, max. 5) Principles of teaching and learning applied to undergraduate instruction in the School of Environmental and Forest Sciences. Development, delivery, and evaluation of lectures and homework assignments. Graduate teaching experience for SEFS students only. Credit/no-credit only. Offered: AWSp.
SEFS 600 Independent Study or Research (*) Offered: AWSpS.
SEFS 601 Internship (3-9, max. 9) Graduate internship under the supervision of a faculty member. Offered: AWSpS.
SEFS 700 Master's Thesis (*) Offered: AWSpS.
SEFS 800 Doctoral Dissertation (*) Offered: AWSpS.

## Bioresource Science and Engineering

BSE 104 Products and Energy from Renewable Resources (5) I\&S/NW Introduction to the structure, composition, and availability of renewable resources. Conversion of these materials into solid products, energy, and useful chemicals. Particular attention to the production of fiber (paper/board), fuels (ethanol/ aromatics), and specialty chemicals (biopolymers, medicines, etc.). Comparison of renewable energy sources: biomass, water, geothermal, wind, and solar. Includes weekly laboratory session.
BSE 150 Bioresource Science and Engineering Seminar (1) Gustafson Introduces the science and technology of bioresources, including paper. Faculty, advisers, and guest lectures present on topics throughout the quarter. Credit/no-credit only. Offered: A.
BSE 190 Special Topics (1-5, max. 10) NW Introduces current topics or courses under development to address the latest issues in bioresource science and engineering.
BSE 201 Introduction to Pulp, Paper, and Bioproducts (3) NW Broad overview of the science and technology of producing pulp and paper. Introduction of the BSE major course sequence and various career options. Examination of Pacific Northwest pulp and paper production facilities. Offered: W.

BSE 202 Pulp and Paper Lab and Field Studies (1) NW Laboratory and field trip studies in pulp and paper technology. Visits to local forest product manufacturing facilities. Required for BSE majors. Credit/no-credit only. Offered: W.

BSE 211 Creativity and Society (5) I\&S/VLPA Allan Explores the nature of creativity and innovation in U.S. and other societies. Investigates the processes of thinking and techniques of idea generation in fields such as art, music, science, engineering and medicine. Offered: AWS.

BSE 248 Paper Properties (4) NW Acquaints students with raw material characteristics, physical and mechanical concepts, nomenclature, and procedures related to evaluating paper and paperboard product properties. Emphasizes structural, optical, mechanical, and moisture related properties. Offered: A.
BSE 309 Creativity and Innovation (2) VLPA Allan Understanding creativity and creative thinking; its challenges and dynamics through knowledge, judgment, planning, and observation. Techniques of creative thinking. Design and development of creative games. Computer-aided creative thinking. Creation, protection, and exploitation of a useful idea, including bar-
gaining and negotiations. Offered: jointly with CHEM E 309; Sp.
BSE 399 Undergraduate Internship (1-5, max. 15) Internship experience with a public agency or private company, supervised and approved by a faculty member. Preparation of professional report reflecting on the experience is required. Credit/no-credit only. Offered: AWSpS.

BSE 406 Natural Products Chemistry (5) NW Bura Provides knowledge of chemistry of aqueous and sol-vent-rich systems, natural and synthetic polymers, and of interactions with inorganic materials and trace substances present in biomass processing systems. Covers the chemistry of lignocellulosic biomass components: cellulose, hemicellulose, lignin, and extractives. Presents the fundamental chemistry of biomass conversion process. Prerequisite: either CHEM 237 or CHEM 335. Offered: A.
BSE 420 Bioresource Engineering I (4) Covers chemistry and reaction kinetics of conversion of biomass into molecules and fibers for use in making fuels and high value products. Includes chemical, biological, and thermal conversion of biomass. Develops applications of reaction kinetics to design reactor configurations. Prerequisite: BSE 406. Offered: W.

BSE 421 Bioresource Engineering II (4) Gustafson Introduces basic mass transfer processes and physical basis: diffusion, convection, and mass transfer coefficients. Analyzes separation processes used in forest products and bioresources industries: membrane separations, flow through porous media, leaching and extraction, and evaporation. Includes industrial processes: dialysis, reverse osmosis, fiber web formation, pulp washing, and black liquor evaporation. Prerequisite: minimum grade of 2.0 in BSE 420. Offered: Sp.

BSE 422 Bioresource Engineering III (4) Gustafson Introduces process simulators and their application to model unit operations and large scale integrated facilities such as biorefineries and pulp and paper mills. Covers applications to optimize processes for production and environmental impact, basic control equipment, process models used in control, types of controllers, and simple controller tuning. Prerequisite: minimum grade of 2.0 in BSE 421. Offered: A.
BSE 426 Bioresource Laboratory (4) Bura Covers bioconversion laboratory techniques, focusing on design and operation of conversion processes to produce high value biorenewable products based on chemistry of biomass. Products include ethanol, pulp, glycols, and sugar streams. Includes significant product design component, and hands-on laboratory creation of products based on design. Prerequisite: BSE 420; Q SCI 381. Offered: Sp.

BSE 430 Papermaking Processes (5) Examines stock preparation operations (refining, screening, and cleaning) for papermaking and sheet forming as a unit of operations. Considers related unit operations of fluid dynamics and heat transfer as they apply to the commercial process. Covers sheet finishing operations of surface sizing, calendaring, and rewinding. Analyzes physics of fiber webs. Prerequisite: CHEM E 340. Offered: A.

BSE 436 Pulp and Paper Laboratory II (4) Paper testing, paper additives, flocculation, drainage, retention, heat transfer, and fluid dynamics in papermaking from virgin and recycled raw materials. Prerequisite: BSE 430. Offered: W.
BSE 480 Bioresource Design I (4) I\&S/NW Gustafson Design and production of biomass derived products meeting given specifications and financial constraints, integrating coursework knowledge to solve complex, open-ended design problems. Specific con-
siderations in design include: economic, marketability, environmental, sustainability, ethical, health and safety, social, and political. Prerequisite: 2.0 in BSE 406; 2.0 in BSE 420; 2.0 in BSE 430. Offered: W.
BSE 481 Bioresource Design II (5) I\&S/NW Comprehensive design of pulp and paper processes, including: economic feasibility studies; process equipment design, optimization, and control; and overall process integration and layout. Safety and ethics in the design process. Prerequisite: BSE 480. Offered: Sp.

BSE 489 Foreign Study (1-5, max. 15) Individual foreign study of topics for which there is not sufficient demand to warrant the organization of regular classes. Offered: AWSpS.
BSE 490 Special Topics (1-5, max. 15) Individual tutorial study of topics or courses under development to address the latest scientific developments in forest resources. Offered: AWSp.
BSE 497 Pulp and Paper Internship (1, max. 3) Technical and economic analysis of commercial pulp and paper installations. Structured visits to industrial operations to observe technical aspects of pulp and paper curriculum in practice. Preparation of visitation reports and analysis in seminar setting. Offered: AWSpS.
BSE 499 Undergraduate Research (1-5, max. 15) Individual research supervised by a faculty member. For advanced students desiring to extend their educational experience. Offered: AWSpS.

## Environmental Science and Resource Management

ESRM 100 Introduction to Environmental Science (5) I\&S/NW Covers the importance of the environment in society with particular emphasis on worldwide distribution and uses of resources, the role of natural and man-made environments, and causes of environmental degradation. Introduces ethics of conservation and recycling. Cannot be taken for credit if ESC 110 already taken. Offered: AWSpS.
ESRM 101 Forests and Society (5) I\&S/NW Survey course covering forest ecosystems of the world, history of forestry and forest conservation, how forest ecosystems function, wildlife in forests, environmental issues in forestry, forest management, economics and products, and new approaches to forest management. Open to majors and nonmajors. Cannot be taken for credit if CFR 101 already taken.
ESRM 150 Wildlife in the Modern World (5) I\&S/NW Covers major wildlife conservation issues in North America. Some global issues are also treated. Examples of topics include the conservation of large predators, effects of toxic chemicals on wildlife, old-growth wildlife, conservation of marine wildlife, recovery of the bald eagle, and gray wolf.
ESRM 190 Special Topics (1-5, max. 10) NW Introduces current topics or courses under development to address the latest issues in environmental science and resource management.

ESRM 200 Society and Sustainable Environments (5) I\&S/NW Introduces the application of social concepts and theories to understanding and managing urban, urbanizing, and wildland landscapes in a sustainable manner. Of particular interest are factors that shape patterns on the landscape and resulting social and economic benefits. Explores landscapes across the urban to wildland gradient. Offered: WSp.
ESRM 201 Sustaining Pacific Northwest Ecosystems (5) I\&S/NW Introduces the principles of ecology across an urban to wildland gradient and discusses how these landscapes can be sustainably managed. Explores basic ecological theories, plant communi-
ties, soil, climate, pollution, hydrology, and wildlife in classroom, labs, and field trips. Offered: ASpS.
ESRM 210 Introductory Soils (5) NW Zabowski Physical, chemical, and biological properties that affect distribution and use patterns of this important ecosystem component. Includes soil morphology and genesis, plant nutrition and nutrient cycling, soil water, microbiology, and application of soil properties to environmental concerns. One Saturday field trip. Offered: A.
ESRM 235 Introduction to Environmental Economics (5) NW Rabotyagov Introduces environmental and natural resource economics. Discusses fundamental economic concepts, including markets and private property. Includes basic tools used in the economic assessment of environmental problems and applies these methods to key environmental issues. Offered: Sp.
ESRM 250 Introduction to Geographic Information Systems in Forest Resources (5) NW, QSR Applications of GIS technology to forest science and management. Fundamentals of GIS systems: data sources, preprocessing, map analysis, output; remote sensing as a source of GIS data, image analysis, and classification. Emphasis on GIS as a source of management and technical information requests. Offered: AWSpS.

ESRM 300 Principles of Sustainability (2) I\&S/NW Overview of principles of sustainability, including discussion of current literature, presentation, and discussion with practitioners, and methods for balancing social, economic, and ecological consequences of proposed policies and actions. Students develop a plan to further their studies in natural resources and environmental sustainability. Recommended: ESRM 200; ESRM 201. Offered: W.
ESRM 304 Environmental and Resource Assessment (5) I\&S/NW, QSR The processes of measuring, monitoring, and assessment; illustrated in diverse environmental and resource case studies. Explores the scientific method, hypothesis testing, sampling, and experimental designs, the role of questionnaires and polling techniques, remote sensing techniques, and population measurements. Offered: ASp.
ESRM 311 Soils and Land Use (3) NW Harrison Intended for students concerned with environmental problems in the Puget Sound basin; also for those who intend to become professionally involved in land-planning decisions. Focus is on the significance of soils in understanding environmental problems and in promoting intelligent land-use decisions. Basic concepts of soil systems are presented, stressing those aspects important in making land-planning decisions. Offered: W.

ESRM 315 Natural Resource Issues: Old-Growth and Forest Management (5) I\&S/NW Franklin Biological and social elements of current conflicts, especially those associated with old-growth and its disposition. Ecology of Pacific Northwest forests and landscapes, history of forest practices, application of emerging science, proposed alternative practices and policies, including analysis of current proposal and its predecessors and successors. Open to majors and nonmajors. Offered: Sp.
ESRM 320 Marketing and Management from a Sustainability Perspective (5) I\&S/NW Paun Introduction to business concepts relating to marketing, human resource management, small businesses and entrepreneurship, and economics in the context of environmental resource management. Offered: AS.
ESRM 321 Finance and Accounting from a Sustainability Perspective (5) I\&S/NW Paun Introduction to business concepts relating to finance, accounting, and international business in the context of environmental resource management. Offered: WS.

ESRM 323 Silviculture (5) NW Turnblom Silviculture techniques, including nursery practices, clear-cutting, seed trees, shelterwood, selection cutting, site preparation, regeneration methods, thinning, fertilization, chemicals, and regional silviculture in the Northeast, Southeast, Midwest, Rocky Mountains, California, Pacific Northwest, and Alaska. Multiple-use field trips. Offered: Sp.
ESRM 325 Environmental Applications of Plants: Bioenergy and Bioremediation (3) NW Doty Explores current topics in forest bioresources with an emphasis on bioenergy, remediation of pollutants, and carbon sequestration. . Recommended: a college-level course in either biology or chemistry. Offered: A.
ESRM 331 Landscape Plant Recognition (3) NW Reichard Field recognition of important groups of woody landscape plants, emphasizing diversity at the genus and family levels. Cultivated plant nomenclature. Plant descriptive characters evident in the field with eye and hand lens. Hardiness and landscape applications. Recommended: either BIOL 117 or BOTANY 113. Offered: jointly with BIOL 331; Sp.

ESRM 350 Wildlife Biology and Conservation (5) NW Wirsing Wildlife ecology and population biology, and interrelationships between wild animals and humans, including encouragement of wildlife population growth and productivity, control of pest populations, and preservation of endangered species with emphasis on forest environments and forest faunas. Open to nonmajors. Prerequisite: either BIOL 162, BIOL 180, BIOL 220, or ESRM 162, any of which may be taken concurrently. Offered: A.
ESRM 351 Wildlife Research Techniques (8) NW West Scientific approaches to the field study of wildlife populations and habitat, including species identification and natural history, experimental design, and report writing. Emphasis on direct experience with current field techniques used in the study of vertebrate populations and habitat. Prerequisite: either BIOL 162, BIOL 180, ESRM 162, or ESRM 350; recommended Q SCI 381. Offered: Sp.
ESRM 362 Introduction to Restoration Ecology (5) I\&S/ NW Bakker An introduction to ecological restoration of damaged ecosystems. Examines the philosophical base of restoration as well as the social, biological, and political forces that impact the success of any restoration project. Includes lectures, readings, case studies, and field trips. Offered: jointly with ENVIR 362; A.
ESRM 368 Natural Resource Measurements (4) NW Turnblom Introduction to principles of measurement, basic field measurement skills, measurement of vegetation, including stand examination, timber cruising, size, weight, volume and biomass of trees, and stream flow. Laboratories include field exercises on sampling techniques for trees and lesser vegetation and linear regression modeling to predict quantities from basic measurements. Prerequisite: either IND E 315 , Q SCI 381, STAT 220, or STAT 311; recommended ESRM 304. Offered: W.
ESRM 371 Environmental Sociology (5) I\&S/NW Social processes by which environmental conditions are transformed into environmental problems; scientific claims, popularization of science, issue-framing, problem-amplification, economic opportunism, and institutional sponsorship. Examination of social constructs such as ecosystem, community, and free-market economy. Use of human ecology to assess whether the current framing of environmental problems promotes ecological adaptability. Offered: jointly with SOC 379/ENVIR 379; A.
ESRM 381 Management of Wildland Recreation and Amenities (3) NW Bradley Introduction and overview of wildland recreation and amenities management. Agency
history and objectives explored along with integration of recreation with other land uses. Water, forestry, wildlife, and wilderness resources for recreational uses discussed along with role of private enterprise in recreation and amenities. Topics of current and local interest. Offered: A.
ESRM 399 Field or Teaching Internship (1-5, max. 15) Internship experience in undergraduate teaching or in the environmental field, supervised and approved by a faculty member. Preparation of professional report reflecting on the experience is required. Credit/nocredit only. Offered: AWSpS.
ESRM 400 Natural Resource Conflict Management (3) I\&S/NW Ryan Introduction to the causes, dynamics, and consequences of natural resource conflicts as well as the range of procedural interventions used to manage conflict. Specific cases of environmental conflict and alternative dispute resolution procedures are examined. Emphasis on developing skills to effectively analyze, manage, and resolve natural resource conflicts. Offered: W.
ESRM 401 Spring Comes to the Cascades (3) NW Examines the interaction between forests, environment, and growth at three locations in the Cascades, from lowlands to alpine. Field trips and associate observations are linked to classroom or group project activities and are used to understand a number of ecological, physiological, and meteorological concepts. Offered: Sp.
ESRM 403 Forest and Economic Development in the Developing World (4) NW Eastin Examines the relationship between forests and economic development in tropical countries. Topics include the role of population growth, poverty, land tenure, and international trade on forest use as well as theories of economic development. Case examples of forest-based economic development in different countries and regions. Offered: A.
ESRM 409 Soil Ecology (5) NW Soil organisms in forest and other ecosystems, decomposition, nutrient cycling. Nitrogen transformation, mycorrhizae, effects of forest management.
ESRM 410 Forest Soils and Site Productivity (5) NW Harrison Considers unique properties and processes occurring in forest soils throughout the world with emphasis on soils of Pacific Northwest and aspects of forest soils that affect productivity. Two all-day Saturday field trips and one Saturday-Sunday field trip required. Recommended: ESRM 210. Offered: A, odd years.
ESRM 411 Plant Propagation: Principles and Practice (3) NW Kim Science and practice of plant propagation including sexual (seed) and asexual (cutting, layering, grafting) propagation. Includes discussion of physiological effects, methodology and laboratory exercises. Wide variety of plants covered. Intended for majors in urban horticulture and urban forestry and others interested in reproducing landscape plants. Recommended: 10 credits of introductory biology or botany, or equivalent. Offered: Sp.
ESRM 412 Native Plant Production (3) NW Bakker Advanced plant propagation techniques, emphasizing native plants, propagation for restoration projects, and unique problems associated with providing appropriate plant material for restoration or conservation purposes. Emphasizes greenhouse and fieldwork, and includes lectures, field trips, and a class project. Recommended: ESRM 411, which may be taken concurrently. Offered: Sp.
ESRM 413 Soil Genesis and Classification (5) NW Zabowski Soil formation, morphology, classification, and relationship to the environment. Labs and weekend field trips illustrate properties and processes of forest
and grassland soils in Washington. Recommended: ESRM 210. Offered: Sp, even years.
ESRM 414 Forest Soil Fertility and Chemistry (3) NW Harrison Tree growth depends, in part, on the interaction between chemical and biological activities within a given soil: the biological and chemical parameters that influence the growth; soil solution chemistry and surface reactions; reactions and processes that control essential plant nutrient levels and forms in soil solutions. Recommended: ESRM 210. Offered: Sp, odd years.
ESRM 415 Biology, Ecology, and Management of Plant Invasions (5) NW Reichard Explores how biological invasions are one of the most serious threats to the preservation of biodiversity worldwide. Explores the vectors which move plants and their pests, the biology and impacts of the invasive species, and management and policy approaches. Prerequisite: one of the following: BIOL 162, BIOL 220, BIOL 333, BIOL 471, BIOL 472, ESRM 201, ESRM 401, ESRM 472, or ESRM 473. Offered: A, even years.
ESRM 416 Field Survey of Wildland Soils (3) NW Harrison, Zabowski Study of soils in remote sites about which little information is available. Focus is field trip in Cascade Mountains just north of Glacier Peak with prior study of hiking area, soil and ecosystem changes, and wilderness use. Offered: S, odd years.
ESRM 420 Wildland Fire Management (5) NW Principles of wildland fire behavior, ecology, and management. Weather, fuels, and topography effects on fire behavior. Forest structure influence on historical and current fire ecology. Principles of firesafe forests. Management issues of fire control and use in wilderness, multiple-use forest, and the wildland-urban interface. Offered: A.

ESRM 423 International Trade, Marketing, and the Environment (3) I\&S/NW Introduction to international trade, marketing, and environmental business. Concepts include plan writing, exporting and importing, carbon credits, green marketing, and how global exchange rates affect environmental assets such as forests.
ESRM 425 Ecosystem Management (5) NW Franklin Scientific and social basis for ecological forestry. Forest practices to achieve integrated environmental and economic goals based upon material models of disturbance and stand development including alternative harvesting methods; adaptive management and monitoring; certification and global issues. Offered: A.

ESRM 426 Wildland Hydrology (4) NW Bolton Introduction to the hydrologic cycle and basic hydrologic methods as applied to wildlands. Effects of forest management activities on hydrologic processes. Offered: W.
ESRM 428 Principles of Silviculture and Their Application
(5) NW Ford Focuses on the biology of major tree species in the PNW and their use in silviculture, stand development in plantation forest systems and its relationship to forest yield, the advantages and limitations of plantation silviculture relating to specific biotic, abiotic, and economic conditions, and management for objectives other than time yield. Prerequisite: ESRM 323. Offered: A.

ESRM 429 Environmental Science and Resource Management Seminar (1, max. 6) NW Weekly seminars covering water resources and watershed topics with lectures from scientists on and off campus. Credit/ no-credit only. Offered: AWSp.
ESRM 430 Hyperspatial Remote Sensing in Natural Resource Management (5) NW Moskal Focuses on hyperspatial remote sensing fundamentals, interpretation and manipulation of aerial photography, satellite imagery, and Light Detection and Ranging (LiDAR).

Uses traditional and 'state of the art' image processing techniques. Students learn to evaluate available hyperspatial remote sensing data sources and design simple projects related to environmental applications. Offered: Sp.
ESRM 441 Landscape Ecology (5) NW Lawler Basic landscape ecology concepts, including patches, corridors, networks, spatial dynamics; island biogeographic principles; landscape analysis methods; landscape models. Applications of landscape ecology in resources management (e.g., cumulative effects, cutting, patterns, anadromous fisheries, management of wildlife populations, and open-space planning). Recommended: either ESRM 201 or ESRM 250. Offered: A.

ESRM 450 Wildlife Ecology and Conservation (5) NW Wirsing Covers principles of wildlife ecology such as habitat use and selection, population and metapopulation dynamics, and predator-prey interactions, and illustrates how they apply to wildlife conservation problems with terrestrial, aquatic, and marine wildlife. Prerequisite: ESRM 350; recommended: introductory statistics. Offered: W.
ESRM 451 Urban Plant Protection (5) NW Working knowledge on insects and diseases of plants growing in the urban environment. Emphasis placed on pest and damage recognition, control methods, and integrated pest management systems.
ESRM 452 Field Ornithology (3) NW Marzluff Students learn field identification skills and are introduced to field methodologies through required indoor labs, field trips, and field exercises. Exercises include study of survey techniques, feeding ecology, and behavior. Students are required to share field trip costs. Prerequisite: ESRM 456 which may be taken concurrently; either BIOL 162, BIOL 180, or BIOL 220, any of which may be taken concurrently. Offered: A.
ESRM 455 Wildlife Seminar (1, max. 8) NW West Discussion of current research and application in wildlife biology and conservation. Credit/no-credit only. Offered: AWSp.
ESRM 456 Biology and Conservation of Birds (3) NW Marzluff Major principles of natural history, avian reproductive biology, population ecology, and national and international conservation strategies for both hunted and unhunted birds. Emphasis on western United States. Prerequisite: either BIOL 162, BIOL 180, or BIOL 220, ESRM 162, any of which may be taken concurrently. Offered: A.
ESRM 457 Fish and Wildlife Toxicology (3/5) NW Grue Overview of fish/wildlife toxicology: history of the field; regulations; methods used to assesses risks contaminants pose to fish/wildlife; classes of contaminants and their direct, sublethal, and indirect effects; and contemporary threats of contaminants to fish/wildlife, their habitats, and prey. Includes laboratory. Offered: jointly with FISH 455; W.
ESRM 458 Management of Endangered, Threatened, and Sensitive Species (5) NW Marzluff Biological underpinnings and political realities of endangered species management, including: legal issues, recovery teams, citizen rights, extinction, rarity, proactive management, captive propagation, reintroduction, species endangered in the Pacific Northwest. Students revise endangered species recovery plans. Offered: W.
ESRM 459 Wildlife Conservation in Northwest Ecosystems (3) NW Manuwal, West Extended field course offers wildlife science students personal interactions with wildlife managers and wildlife populations in strategic public and private lands in the northwestern United States and southern Canada. Students share costs of trip. Offered when there is sufficient student
demand. Prerequisite: ESRM 350; may not be repeat ed. Offered: Sp.
ESRM 461 Forest Management and Economics (5) I\&S/ NW Greulich Presents important contemporary decision tools, especially how they are used by forest managers to interpret, critique, and develop their basic applications in forestry. Topics include optimization techniques, including linear and nonlinear programming, concepts in interest and time evaluation of alternatives, marginal cost analysis, and computer spreadsheet assisted analysis. Prerequisite: Q SCI 381 or STAT 311; Q SCI 291 or MATH 124. Offered: W.

ESRM 462 Restoration Ecology Capstone: Introduction (2-) NW Ewing, Fridley First of a three-course capstone sequence in restoration ecology. Students review and assess project plans and installations. Class meets with members of previous capstone classes to review their projects. Recommended: ESRM 362 and ESRM 479. Offered: jointly with TESC 462/BES 462; A.
ESRM 463 Restoration Ecology Capstone: Proposal and Plan (-3-) NW Ewing, Fridley Student teams prepare proposals in response to requests for proposals (RFPs) from actual clients. Clients may be governments, non-profit organizations, and others. Upon acceptance of the proposal, teams prepare restoration plans. Prerequisite: ESRM 462. Offered: jointly with TESC 463/BES 463. Offered: W.
ESRM 464 Restoration Ecology Capstone: Field Site Restoration (-5) NW Ewing, Fridley Teams take a restoration plan developed in ESRM 463 and complete the installation. Team participation may include supervision of volunteers. Teams prepare management guidelines for the client and conduct a training class for their use. Prerequisite: ESRM 463. Offered: jointly with TESC 464/BES 464. Offered: Sp.
ESRM 465 Economics of Conservation (3) I\&S/NW PerezGarcia Economic principles and their use in the analysis of contemporary conservation problems. Particular emphasis directed toward the conservation of forest resources in the Pacific Northwest and related policy issues. Offered: Sp.
ESRM 468 Forest Operations (5) Examines forest land surveying, low volume road access planning, and timber harvesting concepts. Low volume road design principles and practical application of field road location. Overview of road drainage design, construction techniques and maintenance. Reviews basic harvest systems and setting design processes, including cost, production control, environmental and safety considerations. Prerequisite: ESRM 250; ESRM 368; ESRM 323 which may be taken concurrenlty. Offered: Sp .
ESRM 470 Natural Resource Policy and Planning (5) I\&S/ NW Bradley, Ryan Introduction to and analysis of environmental policy-making processes, with a focus on forest and land policy and law. Use of policy models to examine the interaction of agencies, interest groups, Congress, and the courts in the legislative process. Policy implementation, evaluation, and change are also addressed. Offered: A.
ESRM 471 Urban Forest Landscapes (5) NW Bradley Comprehensive view of urban forest and urban forest landscapes. Includes close examination of factors that differentiate urban forest landscapes along the urban to wildland gradient. Compare legal, social, political, administrative, physical, and biological variations. Offered: Sp.
ESRM 472 Wetland Ecology and Management (5) NW Ewing Wetland types and functions, global and North American distribution, wetland plant types, soil chemistry. The influence of stresses on wetland composition and form. Autecology of wetland plants;
response to and detection of stresses. Impacts of urbanization; management techniques. Recommended: coursework in biology or ecology. Offered: A.

ESRM 473 Restoration in North America (5) NW Ewing Investigates the vegetation and climate of North American ecosystems. Includes an ecosystem by ecosystem review of how restoration is done in each system, including some tropical ecosystems. Recommended: plant ecology, plant identification, horticulture, landscape ecology coursework. Offered: W.

ESRM 478 Plant Ecophysiology (5) NW Kim Explores physiological mechanisms that underlie ecological observations, including how above- and belowground microclimates develop and affect plant physiological processes. Discusses acclimation to environmental change along with species differences in physiological processes and plant's occupation of heterogeneous environments. Laboratories emphasize field measurement techniques. Prerequisite: either BIOL 162, BIOL 180, ESRM 201, or ESRM 162. Offered: jointly with BIOL 424; W.
ESRM 479 Restoration Design (5) I\&S/NW Erving, Fridley Covers the design process in ecosystem restoration by presenting a series of weekly design problems that students solve as teams. Categorizes problems by disturbance type, including restoration necessitated by agriculture, urbanization, salt-marsh filling or diking, construction of transport corridors, etc. Includes a team design portfolio. Offered: Sp.
ESRM 480 Landscape Plant Science and Sustainable Management (5) NW Kim Principles and practices of plant management in urban and modified landscapes. Physiological basis for plant management and selection; site analysis and preparation; plant installation and aftercare; plant performance evaluation; long-term sustainable management and plant health care. Recommended: either ESRM 210 or ERSM 311; either BIOL 116 or BIOL 117. Offered: A.
ESRM 489 Foreign Study (1-5, max. 15) Individual foreign study of topics for which there is not sufficient demand to warrant the organization of regular classes. Offered: AWSpS.

ESRM 490 Special Topics (1-5, max. 15) Individual tutorial study of topics or courses under development to address the latest scientific developments in forest resources. Offered: AWSpS.

ESRM 491 Field Studies (1-5, max. 10) Independent field study or one time organized field courses with emphasis outside the traditional classroom. Offered: AWSpS.
ESRM 494 Senior Capstone Proposal (5-) Selection of a capstone topic and type, either thesis or project. Students select a faculty adviser to assist them in the proposal writing process. Regular or Honors credit. Prerequisite: ESRM 200; ESRM 201; ESRM 300; ESRM 304. Offered: AWSpS.

ESRM 495 Senior Project (-5) Individual study of an environmental science and resource management problem under direction of a faculty member. Requires a written project report. Generally taken in last year of residence. Prerequisite: ESRM 494, which may be taken concurrently. Offered: AWSpS.

ESRM 496 Senior Thesis (-5) Statistical analysis and presentation of research results and discussion of results in a thesis paper. Students work with faculty advisers to complete field or laboratory research and then prepare the senior thesis. Prerequisite: ESRM 494, which may be taken concurrently. Offered: AWSpS.

ESRM 499 Undergraduate Research (1-5, max. 15) Individual research supervised by a faculty member. For advanced students desiring to extend their educational experience. Offered: AWSpS.

## Marine and Environmental Affairs

3707 Brooklyn Avenue Northeast

The School of Marine and Environmental Affairs offers an interdisciplinary program of study leading to the Master of Marine Affairs degree. Marine affairs concerns management and policy questions on the uses of the coastal and offshore regions of the ocean and their resources. The core curriculum includes courses in marine affairs, economics, law, marine sciences, and public affairs, with emphasis on human dimensions of the environment.

## GRADUATE PROGRAM

Graduate Program Coordinator 3707 Brooklyn NE, Box 355685 (206) 543-4326, (206) 543-7004
uwsmea@uw.edu

## Master of Marine Affairs

The School of Marine and Environmental Affairs offers an internationally recognized master's degree program for launching careers in marine policy and administration. Students learn creative approaches to resolving marine problems and conflicts, charting rational use of living and non-living marine resources, and managing human activities on the coasts, at sea, and in estuaries, wetlands, and large inland bodies of water.

A major program objective is to prepare students for professional careers in policy making, management, teaching, and research. Breadth of study is emphasized, and all students are expected to gain familiarity with relevant aspects of the social, technological, and environmental sciences. In addition, each student is expected to develop a professional and scholarly proficiency in a particular aspect of marine affairs.

Completion of the MMA program normally requires two academic years for students who have received a baccalaureate degree. During the first year, students develop a comprehensive understanding of the marine affairs field and acquire analytic skills. During the second year, a special competence is developed in a topical area of interest (e.g., ocean and coastal management, ports and marine transportation, marine environmental protection, marine resources management, ocean and coastal tourism and recreation), and a thesis is prepared and presented under the guidance of a faculty supervisory committee. Individual courses of study may be adjusted to accommodate prior experience and academic background. Mid-career and other qualifying students can apply to follow a non-thesis track emphasizing additional coursework and a degree project.

## Admission Requirements

Admission to the School of Marine Environmental Affairs is based on evaluation of required application materials in competition with other applicants. Required materials include Graduate Record Examination general-test scores, completed departmental supplementary information form, three letters of recommendation, official academic transcripts, and a statement of career objectives. Applicants must apply directly to, and be accepted by, the University's Graduate School. Course sequences begin each autumn quarter, and new students normally are admitted only at that time.

## Degree Requirements

59 credits as follows:

1. Core Curriculum (29 credits minimum)
a. Introduction to Marine Affairs: SMEA 500 (5), SMEA 501 (3)
b. Economics: SMEA 536 (3). (The Graduate Program Coordinator may waive SMEA 536 for students with adequate undergraduate training, but students must take at least one economics course at the 400 or 500 level. The following courses are suggested: SMEA 537 (3), SMEA 538 (3), ECON 435 (5), ECON 436 (5).)
c. Marine Law: SMEA 506/LAW 561 (3) or SMEA 515/ LAW 565(3)
d. Policy Analysis: SMEA 519 (3) or PB AF 513 (3)
e. Policy Processes: One of the following: SMEA 507 (3), SMEA 508 (3), SMEA 521 (3), SMEA 523 (3), PB AF 590/CFR 592 (3) (when course content appropriate; check with Graduate Program Coordinator); PB AF 592/FM 571 (5)
f. Marine Science: SMEA 591 (3). (The Graduate Program Coordinator may waive from SMEA 591, but students must take at least one 400- or 500-level science course. The following courses are suggested: SMEA 510 (3); FISH 450 (4); FISH 454 (3); BIOL 472 (5); or BIOL 473 (3).)
g. Quantitative Skills: One of the following: The required skill level is equivalent to intermediate statistics, including an understanding of point estimates, confidence intervals and regression equations. Students not meeting this requirement through undergraduate classes or experience should take one appropriate course while at SMEA. Recommended courses include: Q SCI 381 (5), STAT 301 (5), or STAT 311 (5). (Although 300-level courses do not qualify for graduation credits, the school waives 3 credits of the 59-credit SMEA graduation requirement for students completing one of these courses.)
h. Social Science Data Collection and Analysis: One of the following: SMEA 476 (3), SMEA 512 (3), PB AF 507 (3), GEOG 425 (5), or CRF 400 (3)
i. Marine Affairs Seminar: SMEA 550 (3)
2. Electives ( 20 credits minimum - or 10 additional elec tive credits for non-thesis track): Elective credits must qualify as graduate credit (typically 400- or 500-leve courses) offered in any UW department or school. Students should consult their advisor or thesis committee chair in choosing a set of elective courses. At least 6 credits, and two courses must come from the following list of SMEA courses: SMEA 433 (5), SMEA 480 (3), SMEA 485 (3), SMEA 499 (var.) (when subject is African Population, Development and Marine Enviroment), SMEA 509 (3), SMEA 510 (3), SMEA 514 (3), SMEA 516 (3), SMEA 517 (3), SMEA 540 (3), SMEA 555 (3), SMEA 581 (3), SMEA 550 (1-3) (cannot simultaneously be used to meet core requirements).
3. The Thesis and Thesis Presentation (10 credits minimum - for thesis track students): SMEA 700 (minimum 9 credits); SMEA 570 (1).
4. Career Skills (non-credit requirement): First year: One career counseling appointment during fall quarter. One resume review session during winter quarter. Second year: One career counseling appointment during fall quarter. One resume review session during winter quarter.

## Financial Aid

The School of Marine Affairs has a limited number of positions for graduate student appointments as research assistants. Applicants in need of support are urged to investigate outside sources of funding.

## COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, sym bols, and abbreviations.

SMEA 103 Society and the Oceans (5) I\&S/NW Explores the social and policy dimensions of the ocean environment and ocean management policy. Pays attention to how human values, institutions, culture, and history shape environmental issues and policy responses. Examines case studies and influential frameworks, such as the ocean as "tragedy of the commons." Offered: jointly with JSIS B 103/ENVIR 103.

SMEA 430 Development and the Environment (3) Dolsak Examines two intertwined concepts that are frequently in conflict, economic development and the environment. Examines sustainable development, growth management, sustainable yield, and corporate social responsibility; the emergence, effectiveness, and their relationships with democracy and equity. Offered: A.

SMEA 433 Environmental Degradation in the Tropics (5) I\&S/NW Considers theories and controversies of environmental degradation in the tropics, ecological and social case studies of Central American rain forests and Southeast Asian coral reefs, and implications of environmental management techniques. Offered: jointly with JSIS B 433/ENVIR 433.

SMEA 476 Introduction to Environmental Law and Process
(3) I\&S Bryant Use and application of key statutes in marine living resources management. Overview of administrative law and process. Basic legal research, reading, and briefing selected judicial opinions. Participatory case study component. Designed for nonlaw graduate and advanced undergraduate students. Offered: jointly with ENVIR 476; A.

SMEA 480 Human Dimensions of Fishery Management (3) I\&S/NW Gallucci, Miller Techniques and philosophy for conservation, management, and development of harvested marine populations. Emphasis on integration of ecological, sociological, and economic dimensions of institutional decision making for policy formation in uncertain environments. Offered: jointly with FISH 480.

SMEA 485 Pacific Recreation and Tourism Issues (3) I\&S/ NW Miller Examines how marine tourism links people to one another and to the environment. Utilizes concepts from cultural anthropology, sociology, political science, geography, ecology, conservation biology, and planning. Topics include: ecotourism, ethnic tourism, marine parks and protected area, fisheries, sustainable development, tourism ethics, and marine environmental education.

SMEA 499 Undergraduate Research (1-15, max. 15) Research on assigned topics under the supervision of faculty members.

SMEA 500 Introduction to the Human Dimensions of Global Change (3) Klinger Introduces students to human dimensions of global change in the marine environment. Examines how changes are physical, social, and institutional; and how global climate change affects the ability of ecosystems to provide services that support humankind. Explores changes the use of costal and ocean resources. Offered: A.

SMEA 501 Integrated Marine Affairs Practice (3) Leschine Survey of tools used in integrated assessment of contemporary problems in marine affairs explored through evaluation and comparison of theory and practical application. Prerequisite: SMEA 500 plus two of the following: SMEA 519, SMEA 536, SMEA 591, or permission of instructor. Offered: W.

SMEA 502 Decision Making and Action Taking in Marine Affairs (3) Christie, Fluharty Focuses on the dynamic interaction between human- and natural-world marine environmental systems and the policy- and decisionmaking, implementation, evaluation, and adjustment that must follow for effective response to problems
that emerge within the human dimensions of global change in the marine environments framework. Prerequisite: SMEA 500; SMEA 501.

SMEA 506 International Law of the Sea (3) Offered: jointly with LAW B 561.
SMEA 507 International Organizations and Ocean Management (3) Dolsak Survey of the manner in which international regimes and organizations attempt to manage and regulate the uses of the ocean. Primary emphasis is on the analysis of the effectiveness of regimes and of processes that support or constrain these organizations. Prerequisite: SMEA 500 or permission of instructor. Offered: jointly with PB AF 538.
SMEA 508 National Marine Policy Processes (3) Dolsak Comparative institutional dimensions of marine policy processes. Marine policy context at the national level and the dynamics that drive policy formulation and policy implementation.
SMEA 509 Integrated Coastal Management (3) Christie Managing multiple uses of coastal waters and the adjacent land; conflicts arising from competition for space and resources; organization, scientific, and economic problems associated with coastal management; planning and management experience in the United States and Southeast Asia. Prerequisite: SMEA 500 or permission of instructor.

SMEA 510 Topics in Marine Ecology (3) Klinger Study of ecological principles as they apply to marine species, populations, and ecosystems, using current examples from the primary literature, including contemporary issues such s species declines, species additions, pollution, and global change. Offered: W.

SMEA 511 Coastal Environment Management (3) Evaluation of human uses of the coastal and upland areas in the context of coupled social-ecological systems. Concepts and techniques for evaluation and practical application..

SMEA 512 Interviewing Methods and Environmental Topics (3) Miller Focuses on qualitative techniques employed by social scientists and other researchers (e.g., sociologists, cultural anthropologists, political scientists, journalists, reporters) in interview situations. Students conduct interviews and limited participant observation with people in public, private, and activist sectors. Relevant to students with interests in marine affairs, forestry, fisheries, and environmental studies.

SMEA 514 Marine Pollution Management Issues (3) Leschine Management and policy aspects of marine environmental protection, emphasizing the two-way interaction between environmental managers and environmental and policy scientists which shapes policy.
SMEA 515 U.S. Coastal and Ocean Law (3-5, max. 5) Study of the legal framework in the United States controlling allocation and use of coastal and marine resources. Topics include coastal zone management, fisheries management, protection of marine mammals and endangered species, marine pollution, offshore oil and gas development, and marine transportation. Offered: jointly with LAW B 565.
SMEA 517 Marine Uses: Transportation and Commerce (3) Hershman Role of the oceans in the transportation of people and materials, character and trends in vessel design and terminal facilities, pattern and nature of industry organization, regulations, economics of the shipping industry, management of fleets and vessels, individuals at sea and ashore, national policies affecting the merchant marine and port facilities. Prerequisite: SMEA 500 or permission of instructor.
SMEA 519 Marine Policy Analysis (3) Leschine Goal is appreciation for and basic working knowledge of techniques used in policy analysis. Techniques are
explored in both quasi-realistic settings and in appli cation to real world problems of marine policy.
SMEA 521 Governmental Responses to Global Climate Change (3) Dolsak Exploration of major scientific, policy, and legal issues pertaining to problems of global climate change including regime design, use of climate models, impact on hydrology water resources, and forests.

SMEA 523 International Science and Technology Policy (3) Dolsak Analyzes the relationships between research and development policy, capabilities, and national technological strategies for advanced industrial and less-developed countries. Deals with international implications as countries make policies in regional and global organizations. Examples chosen from space telecommunication, weather and climate modification, airline transportation, nuclear energy, and seabed exploration.

SMEA 525 Marine Protected Area Management and Science (3) Fluharty Examines management and scientific issues involved with the design, establishment, operation, and maintenance of MPAs. Offered: Sp.
SMEA 530 Development and the Environment (3) Dolsak Examines two intertwined concepts that are frequently in conflict, economic development and the environment. Examines sustainable development, growth management, sustainable yield, and corporate social responsibility; the emergence, effectiveness, and their relationships with democracy and equity. Offered: A.
SMEA 536 Applied Microeconomics for Marine Affairs (3) Acquaints students with microeconomic tools commonly employed in policy analysis. Emphasis is placed on mastery of basic concepts, definitions, and models useful to marine policy, including determinants of price and outputs in competitive markets, effects of other market structures, market failure and applied welfare economics.

SMEA 537 Economic Aspects of Marine Policy (3) Development of pertinent economic concepts and their application to selected topics in marine policy decision making, including maritime policy, OCS oil and gas development, and wetlands management. Prerequisite: SMEA 500 or permission of instructor. Offered: jointly with ECON 537; W.
SMEA 538 Economics of Living Marine Resources (3) Develops pertinent economic concepts and applications for conservation, regulation, and restoration of fisheries and other living resources. Gives special attention to fishery management, including harvest regulation and enforcement, recreational fisheries evaluation, property rights regimes, contemporary issues, and marine protected area management. Of fered: jointly with ECON 538; Sp.
SMEA 540 International Strategic Planning for Marine Resources (3) Kaczynski Marine economies are af fected by declining resources, population pressure, and economic globalization. International examples and case studies are used to explore opportunities for strategic planning. Prerequisite: SMEA 500 or permission of instructor. Offered: A.

SMEA 550 Special Topics in Marine Studies (1-3, max. 18) Examination of various aspects of marine studies. Content varies, depending upon the interests of the faculty and students. Intended for the joint participation by the faculty and advanced students in the investigation of selected topics. One or more groups are organized each quarter.

SMEA 570 Thesis Presentation (1) Fluharty Completion of the thesis requirement for SMEA. Prepare a professional presentation to a peer audience. Offered: AWSpS.

SMEA 571 Non-Thesis Seminar (1) Leschine Capstone course for students enrolled in non-thesis track to synthesize and integrate their learning into concrete products. Offered: AWSpS.
SMEA 581 Case Study Method: Living Marine Resource Management (3) Introduces living marine resource management. Presents the case study method of research. Faculty presentations occupy first half of quarter, student presentations the second half. Offered: jointly with FISH 581.

SMEA 585 Climate Impacts on the Pacific Northwest (4) Mantua, Snover Knowledge of past/future patterns of climate to improve Pacific Northwest resource management. Topics include the predictability of natural/ human-caused climate changes; past societal reactions to climate impacts on water, fish, forest, and coastal resources; how climate and public policies interact to affect ecosystems and society. Offered: jointly with ATM S 585/ESS 585/ENVIR 585; Sp.
SMEA 591 Marine Science in the Coastal Zone (3) Klinger Presentation and analysis of the marine science of estuarine, coastal, and open ocean systems, including evaluation and interpretation of scientific information necessary for management. Lectures, discussions, and readings emphasize the relevance of natural processes to marine environmental management and decision-making. Offered: jointly with OCEAN 591; A.
SMEA 600 Independent Study or Research (*)
SMEA $\mathbf{7 0 0}$ Master's Thesis (*)

## Oceanography

## 108 Oceanography Teaching Building

Oceanography - study of the marine environment and its interactions with the earth, the biosphere, and the atmosphere - is prompted both by the intellectual desire to understand how the oceans move and how life develops in a salty, cold environment, and the need to use wisely the ocean's resources for the benefit of humanity. As an interdisciplinary science, oceanography integrates the basic principles of biology, chemistry, geology, physics, geophysics, mathematics, botany, zoology, meteorology, and geography. Applications of high technology to oceanographic instrumentation and vessels, increasingly sophisticated computers, satellite remote sensing, and innovative methodologies are rapidly opening new possibilities for exploration and study. Oceanography is divided into four areas of emphasis:

- Biological Oceanography examines the processes governing the distribution, abundances, and production of plants, animals, and nutrients in the oceanic ecosystem. Emphasis is on investigations of bacteria, phytoplankton, zooplankton, and benthic organisms.
- Chemical Oceanography investigates the complex chemistry, distribution, and cycling of dissolved substances, nutrients, and gases in seawater, the mechanisms controlling them, and their origins and fates.
- Marine Geology and Geophysics studies marine sediments (their formation, transport, and deposition); ocean basin formation (plate tectonics); processes governing shoreline formation; and the origin, structure, and history of the oceanic crust and upper mantle.
- Physical Oceanography endeavors to understand and predict motions in the sea from millimeters through tidal and current scales to the great ocean gyres, the distribution of physical properties (temperature, salinity, sea ice), and air-sea interaction and its implications for climate.

## UNDERGRADUATE PROGRAM

Adviser
108 Oceanography Teaching Building, Box 357940
(206) 543-5039
student@ocean.washington.edu
The School of Oceanography offers the following programs of study:

- The Bachelor of Science degree with a major in oceanography
- The Bachelor of Arts degree with a major in oceanography (specializations include biological, chemical, or physical oceanography, or marine geology and geophysics)
- A minor in oceanography
- A minor in climate science (offered jointly with the Departments of Atmospheric Sciences and Earth and Space Sciences)

## Bachelor of Arts

Suggested Pre-College Courses: Interest in natural sciences and a good record in high school science courses, particularly mathematics. One year each of biology, chemistry, and physics recommended.
Suggested First- and Second-Year College Courses: MATH 124, MATH 125, MATH 126 (or Q SCl 291, Q SCI 292, Q SCI 381); CHEM 142, CHEM 152 (or CHEM 144, CHEM 154); BIOL 180, BIOL 200; one of ESS 210, ESS 211, or ESS 212; PHYS 121, PHYS 122, PHYS 123 (or PHYS 114, PHYS 115, PHYS 116); OCEAN 220; and English composition.

## Department Admission Requirements

Students in good academic standing may declare this major at any time.

## General Education Requirements

1. English composition ( 5 credits), with a minimum grade of 2.0
2. Writing courses ( 10 credits), including OCEAN 220 (3 credits) and OCEAN 444 ( 5 credits)
3. Quantitative and Symbolic Reasoning ( 10 credits), met by departmental requirements below
4. Individuals \& Societies ( 20 credits). 10 of these credits must be taken out of major, defined as courses that neither count toward major requirements below nor have the prefix of the department from which the student is earning a degree (includes co-listed courses).
5. Visual, Literary, \& Performing Arts ( 10 credits)
6. Natural World ( 20 credits). 10 credits must be taken out of major, defined as courses that neither count toward major requirements below nor have the prefix of the department from which the student is earning a degree (includes co-listed courses).

## Major Requirements

Same as for the Bachelor of Science degree (see below), except only 10 credits of upper-division science, mathematics, or engineering courses are required.

## Bachelor of Science

Suggested Pre-College and First- and Second-Year College Courses: Same as for Bachelor of Arts degree (shown above).

## Department Admission Requirements

Students in good academic standing may declare this major at any time.

## General Education Requirements

Same as for the Bachelor of Arts degree (shown above).

## Major Requirements

Minimum 116 credits, to include the following:

1. Foundational Courses (55 credits): PHYS 121, PHYS 122, PHYS 123 (or PHYS 114, PHYS 115, PHYS 116); MATH 124, MATH 125, MATH 126 (or Q SCI 291, Q SCI 292, Q SCI 381); CHEM 142, CHEM 152; BIOL 180, BIOL 200; one of ESS 210, ESS 211, ESS 212 ; and BIOL 161BIOL 162 or BIOL 180, BIOL 200, BIOL 220
2. OCEAN 200, OCEAN 201, OCEAN 210, OCEAN 220, OCEAN 400, OCEAN 410, OCEAN 420, OCEAN 430, OCEAN 443, OCEAN 444, OCEAN 445 ( 35 credits)
3. 400-level oceanography coursework selected in the student's area of specialization, in consultation with a faculty adviser (6 credits)
4. Upper-division science, mathematics, or engineering, selected in the student's area of specialization, in consultation with a faculty adviser ( 20 credits)
5. Minimum 2.0 grade in all required oceanography courses.

## Minor

## Minor Requirements

25 credits as follows:

1. OCEAN 200, OCEAN 210, OCEAN 220
2. One of the following: OCEAN 400, OCEAN 410, OCEAN 420, or OCEAN 430
3. 12 credits of OCEAN electives, chosen from 300- and 400-level oceanography courses

## Minor in Marine Biology

See the entry for Marine Biology in the Interdisciplinary Undergraduate Programs section of the General Catalog.

## Climate Science

25 credits as follows:

1. One of ESS 201, ATM S 211, or ATM S 321 (3-5 credits)
2. One of OCEAN 452/FISH 452, AMATH 301, Q SCI 381, or STAT 311 (3-5 credits)
3. Integrated Capstone Experience: ATM S 475/ESS 475/OCEAN 475 ( 3 credits)
4. Science Electives: At least one course from each focus area to include at least one course each from ATM S, ESS, and OCEAN. See adviser for list of approved courses (minimum 12 credits)
5. Policy Elective: One social science, policy, or energy course from an approved list of electives, to reach 25 credits
6. Minimum 2.00 cumulative GPA in courses applied to the minor
7. Minimum 15 UW credits
8. Minimum 18 credits outside student's major
9. Minimum 15 upper division credits
10. Note: Students are encouraged to take MATH 124, MATH 125, MATH 126, PHYS 121, PHYS 122, and PHYS 123, or see adviser to complete requirements for the minor.

## Student Outcomes and Opportunities

- Learning Objectives and Expected Outcomes: The degree offers students a solid foundation in biological, chemical, geological, and physical oceanography, together with more specialized expertise in one of those options. Expertise is gained through team-based field and laboratory research during the sophomore and junior years, then by independent research on a thesis topic during the senior year. Emphasis is on building skills with the tools and techniques of shipboard ocean-
ographic research and data analysis and interpretation. Students engage in fieldwork and data collection, learn to analyze and interpret that data, and prepare scientific reports. Additionally students acquire familiarity with the specialized instruments of oceanographic research.
The program prepares students to enter the profession directly or to pursue graduate studies. Oceanographers seek to produce a new understanding of an ocean system and to explore the potential consequences to the marine environment of human activities. They collect samples and data, analyze and interpret them, and prepare and disseminate the results. They work at sea, on land, in laboratories, and with computers. Most are employed in education and research institutions and federal, state and local government agencies. Other employers include environmental consulting firms and private companies extracting and harvesting marine products. A degree can also serve as a background for a career in teaching, administration, marine affairs, computing, or environmental studies.
- Instructional and Research Facilities: The school has extensive laboratory facilities equipped with highly specialized instruments and computers for teaching and research. The school operates two research vessels: the 274 foot R/V Thomas G. Thompson, used chiefly for open ocean research throughout the world, and the 65 foot R/V Clifford A. Barnes, used for research in coastal waters and estuaries of Washington. Undergraduate students have ample opportunities to gain research experience in the laboratories of faculty and to do oceanographic research in Puget Sound.
- Honors Options Available: With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- Research, Internships, and Service Learning: Special opportunities for oceanography majors are provided by involving students in undergraduate research projects and part-time employment.
- Department Scholarships: See adviser for availability.
- Student Organizations/Associations: The Student Oceanographic Society (SOS) provides peer advice, organizes field trips, sponsors alumni career panels, and holds social gatherings.

## GRADUATE PROGRAM

Graduate Student Services
108 Ocean Teaching, Box 357940
(206) 543-5039
student@ocean.washington.edu
The School of Oceanography provides instruction and research opportunities at the graduate level in all areas: biological, chemical, and physical oceanography, and marine geology and geophysics. The program of study emphasizes independent research in conjunction with basic and specialized courses. Interdisciplinary research is encouraged, and students enjoy the opportunity to work across the usual scientific boundaries. Coursework during the first two years is required in each option; specialized coursework is structured to fit the student's background and objectives. Foreign-language proficiency is required only when deemed crucial to scholarly research.

## Master of Science

The program of study includes coursework in the student's area of interest and the other oceanography options, as well as completion of an approved research project and oral presentation of the results. Thesis and non-thesis programs are offered; most students select the non-thesis option.

## Admission Requirements

1. One official copy of transcript(s) from all colleges or universities attended
2. Minimum 3.00 GPA or B for last 90 quarter ( 60 semester) credits
3. GRE scores
4. TOEFL scores for international students
5. Statement of goals and objectives (to be defined in online application), which may include any or all of the following: How or why applicant became interested in oceanography, significant accomplishments, summary of research experience, research area(s) of special interest, ultimate goals, extracurricular activities and interests.
6. Three letters of recommendation on School of Oceanography forms (included in online application). Recommendations should be from faculty or scientists familiar with the applicant's academic achievements and research experience. Applicants who have been out of school for some time may include recommendations from employer(s), but all efforts should be made to include at least one letter from academic faculty.

## Degree Requirements

36-45 credits, as follows:
Thesis Program: Minimum 36 quarter credits ( 27 course credits and minimum 9 credits of thesis).
Non-thesis Program: Minimum 36 quarter credits of coursework.

1. At least 18 of the minimum 36 quarter credits must be numbered 500 and above. (In a thesis program, 9 of the 18 credits must be course credits and 9 may be OCEAN 700.)
2. Numerical grades in at least 18 quarter credits of coursework taken at the UW. The Graduate School accepts numerical grades (a) in approved 400-level courses accepted as part of the major, and (b) in all 500-level courses. A minimum cumulative GPA of 3.00 is required for a graduate degree at the University.
3. Minimum three full-time quarters of residence credit. Part-time quarters may be accumulated to meet this requirement.
4. In the thesis degree program, a thesis, approved by the Supervisory Committee, must be submitted to the Graduate School. A student must register for a minimum of 9 credits of thesis (OCEAN 700). With the exception of summer quarter, students are limited to a maximum of 9 credits per quarter of thesis (OCEAN 700). A final master's examination, either oral or written, as determined by the student's Supervisory Committee, must be passed.
5. A final master's examination, either oral or written, as determined by the student's supervisory committee.

Biological Oceanography Option: The core curriculum consists of OCEAN 530 (3), OCEAN 531 (3), OCEAN 532 (3), OCEAN 533 (3). Master's level students must take a minimum of 3 credits of advanced biological oceanography courses.
Chemical Oceanography Option: The core curriculum consists of OCEAN 520 (3). Master's level students must take a minimum of three advanced chemical oceanography courses.
Marine Geology and Geophysics Option: The core curriculum consists of OCEAN 540 (3), OCEAN 541 (3), OCEAN 545 (3).
Physical Oceanography Option: The core curriculum consists of OCEAN 500 (1), OCEAN 510 (3), OCEAN 511 (3), OCEAN 512 (3), OCEAN 513 (3), OCEAN 514 (3), OCEAN

515 (3), OCEAN 517 (2). Physical oceanography students take a sequence of three courses in applied mathematics.
Out-of-Option Requirement: All graduate students are required to take a minimum of one 3 -credit, numerically graded, 500-level course from each option outside their own for a total of three courses and 9 credits. Each option provides a list of courses that can be taken to fulfill this requirement. See department website or adviser for a list of suitable courses. Students are expected to complete this breadth requirement prior to receiving an MS degree. A graduate student affairs committee, chaired by the Graduate Program Coordinator, addresses any requests for waivers.

## Doctor of Philosophy

The degree program places a strong emphasis on research following completion of course requirements and the general examination. Upon successful completion of the general examination, the student undertakes an original research investigation, which is described in the dissertation and defended during the final examination.

## Admission Requirements

1. One official copy of transcript(s) from all colleges or universities attended
2. Minimum 3.00 GPA or B for last 90 quarter ( 60 semester) credits
3. GRE scores
4. TOEFL scores for international students
5. Statement of goals and objectives (to be defined in online application), which may include any or all of the following: How or why applicant became interested in oceanography, significant accomplishments, summary of research experience, research area(s) of special interest, ultimate goals, extracurricular activities and interests.
6. Three letters of recommendation on School of Oceanography forms (available in online application). Recommendations should be from faculty or scientists familiar with the applicant's academic achievements and research experience. Applicants who have been out of school for some time may include recommendations from employer(s), but all efforts should be made to include at least one letter from academic faculty.

## Degree Requirements

Minimum 90 credits, as follows:

1. Completion of a program of study and research as planned by the Graduate Program Coordinator in the student's major department or college and the Supervisory Committee. Half the total program, including dissertation credits, must be in courses numbered 500 and above. At least 18 credits of coursework at the 500 level and above must be completed prior to scheduling the general examination.
2. Presentation of a minimum three years (nine full-time quarters) of resident study, two being at the UW with at least one year in continuous full-time residence. The year of full-time residence may be satisfied by completing any three full-time quarters (not necessarily continuous) at the University of Washington and must be completed prior to the general examination. Residence requirement for the doctoral degree cannot be met solely by part-time study. A minimum of two academic years of resident study must be completed prior to scheduling the general examination.
3. With the approval of the degree-granting unit, an appropriate master's degree from an accredited institution may be applied toward one year of resident study at the UW.
4. Numerical grades must be received in at least 18 quarter credits of coursework taken at the UW. The

Graduate School accepts numerical grades (a) in approved 400 -level courses accepted as part of the major, and (b) in all 500-level courses. A minimum cumulative GPA of 3.00 is required for a graduate degree at the University.
5. Creditable passage of the general examination. Registration as a graduate student is required the quarter the examination is taken and candidacy is conferred.
6. Preparation and acceptance by the Dean of the Graduate School of a dissertation that is a significant contribution to knowledge and clearly indicates training in research. Credit for the dissertation ordinarily should be at least one-third of the total credits. The candidate must register for a minimum of 27 credits of dissertation over a period of at least three quarters. At least one quarter must come after the student passes the general examination. With the exception of summer quarter, students are limited to a maximum of 10 credits per quarter of dissertation (OCEAN 800).
7. Creditable passage of a final examination, usually devoted to defense of the dissertation and the field with which it is concerned. The general and final examinations cannot be scheduled during the same quarter. Registration as a graduate student is required the quarter the examination is taken and the degree is conferred.
8. Completion of all work for the doctoral degree within ten years. This includes quarters spent on leave or out of status as well as applicable work from the master's degree from the UW or a master's degree from another institution, if applied toward one year of resident study.
Biological Oceanography Option: The core curriculum consists of OCEAN 530 (3), OCEAN 531 (3), OCEAN 532 (3), OCEAN 533 (3). Doctoral level students must take a minimum of 9 credits of advance biological oceanography courses.
Chemical Oceanography Option: The core curriculum consists of OCEAN 520 (3). Doctoral level students must take a minimum of six advanced chemical oceanography courses.
Marine Geology and Geophysics Option: The core curriculum consists of OCEAN 540 (3), OCEAN 541 (3), OCEAN 545 (3).
Physical Oceanography Option: The core curriculum consists of OCEAN 500 (1), OCEAN 510 (3), OCEAN 511 (3), OCEAN 512 (3), OCEAN 513 (3), OCEAN 514 (3), OCEAN 515 (3), OCEAN 517 (2). Physical oceanography students are also expected to take a sequence of three courses in applied mathematics.
Out-of-Option Requirement: All graduate students are required to take a minimum of one 3-credit, numerically graded, 500-level course from each option outside their own for a total of three courses and 9 credits. Each option provides a list of courses that can be taken to fulfill this requirement. See department website or adviser for list of suitable courses. Students are expected to complete this breadth requirement prior to receiving an MS degree. A graduate student affairs committee, chaired by the Graduate Program Coordinator, addresses any requests for waivers.

## Financial Aid

Normally all students pursuing a graduate degree are supported by research or teaching assistantships, or by fellowships and scholarships from national or private sources. Most appointments continue through the summer when students are engaged in research.

## COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations.

OCEAN 100 Explore Oceanography at UW (1) Explores the research and experiences of the Oceanography school's faculty, graduate students, and undergraduate students. Intended for freshmen, new transfer students, and other considering oceanography as a major. Credit/no-credit only. Offered: A.
OCEAN 101 Survey of Washington Waters (5) NW Introduces the fundamental principle of oceanography by focusing on the waters that surround us - the Washington coast and Puget Sound. Investigates the geologic history of the Pacific Northwest, and the physics, chemistry, and biology of coastal waters using case studies. Intended for nonmajors. Offered: ASp.
OCEAN 102 The Changing Oceans (5) I\&S/NW Historical case studies of research on the ancient oceans, deep-sea exploration, climate change and the oceans, and human impacts on marine life. Students consider societal factors affecting progress in marine science, changing popular attitudes toward the oceans, and key current policy implications of marine science. Intended for nonmajors. Offered: W.
OCEAN 115 Astrobiology: Life in the Universe (5) NW Introduction to the new science of astrobiology, study of the origin and evolution of life on Earth, and the search for microbial and intelligent life elsewhere in the Universe. Designed for non-science, liberal arts majors. Offered: jointly with ASTBIO 115/ASTR 115/ ESS 115/BIOL 114.
OCEAN 121 Deep Sea Exploration: Submarine Volcanoes and Novel Life Forms (2) NW Examines the dynamic marine processes that shape the planet and cuttingedge oceanographic technologies used to explore the deepest oceans. Includes imagery of rarely seen submarine volcanic eruptions, hot springs, and novel life forms highlighting the interconnected geologicalbiological processes creating the most extreme environments on Earth. Offered: W.

OCEAN 122 Arctic Change (2) I\&S/NW Woodgate Investigates the Arctic system of ocean, ice, atmosphere, and sea-floor; how humans interact with it, and what the future of the Arctic means to the world. Includes sea-ice loss, climate impacts, and Arctic resource exploitation. Offered: Sp.
OCEAN 200 Introduction to Oceanography (3) NW Description of the oceans. Emphasis on relations of biology, chemistry, geology, and physics in marine environments. Examination of relationships and interactions at macro-, meso-, and microscales in the ocean. Intended for science majors. Offered: Sp.
OCEAN 201 Introduction to Oceanography Lab (2) NW Ingalls Provides opportunities to experiment with oceanographic concepts through laboratory and field experiences, and learn about the scientific method of inquiry as it applies to the study of geology, physics, chemistry, and biology of the ocean. Emphasizes topics that explore current challenges faced by the ocean and its ecosystem. Co-requisite: OCEAN 200. Offered: Sp.
OCEAN 210 Ocean Circulation (3) NW The large-scale circulation of the ocean. Topics include temperaturesalinity analysis; water mass identification; water, salt, and heat budgets; chemical tracer distributions; advection and diffusion. Prerequisite: either OCEAN 200, or OCEAN 250/BIOL 250/FISH 250; recommended: either PHYS 114 or PHYS 121. Offered: A.
OCEAN 220 Introduction to Field Oceanography (3/5) NW Design and conduct a field study in oceanography. Focuses on active learning, deployment of instruments, data collection, interpretation, and presentation. Required field trip during spring break. Prerequisite: either OCEAN 200, or OCEAN 250/BIOL 250/ FISH/250; recommended: OCEAN 210. Offered: Sp.

OCEAN 230 Rivers and Beaches (3/5) NW Montgomery, Nittrouer Introduction to Earth surface environments, the processes that shape them, how humans affect them and are affected by them. Weekend field trips examine mountains, rivers, deltas/estuaries, beaches, and environments beyond. Focus on linkages between these environments to illustrate coupling between landscapes and seascapes. Offered: jointly with ESS 230.

OCEAN 240 Contemporary Issues in Oceanography (1-5, max. 9) NW Selected topics of contemporary interest in oceanography such as hydrothermal vents, planetary volcanism, biogeochemical cycling, the ecology of Puget Sound, and the ocean's role in climate.
OCEAN $\mathbf{2 5 0}$ Marine Biology (3/5) I\&S/NW Lecture-laboratory course in marine biology focusing on physical, biological, and social aspects of the marine environment. Topics include oceanography, ecology, physiology, behavior, conservation, fisheries, exploration, and activism. Evening marine biology movies and weekend field trip. Honors section research project. Offered: jointly with BIOL 250/FISH 250.
OCEAN 355 From Big Bang to the Blue Planet (3) NW Sachs Explores the origin and evolution of the Earth, ocean, atmosphere, and life, with an emphasis on climate as the integrator of changes in the biosphere, cryosphere, hydrosphere, atmosphere, and lithosphere. Prerequisite: either CHEM 120 or CHEM 142; either PHYS 114 or PHYS 121; either BIOL 161, or BIOL 180.

OCEAN 365 Practicing Sustainability Science (8) I\&S/ NW S. Veirs, V. Veirs Intensive off-campus experience. Studies sustainability science, marine policy, and "clean" technologies. Includes interaction with community stakeholders for five weeks and experimentation with sustainable technologies and practices in the marine environment during a five-week cruise aboard an energy-efficient sailing catamaran. Offered: ASp.
OCEAN 400 Chemical Oceanography (4) NW Physical and chemical properties of seawater and marine products; processes determining the chemical makeup of the oceans. Prerequisite: either CHEM 152 or CHEM 155; OCEAN 210. Offered: W.
OCEAN 401 Special Topics in Chemical Oceanography (3) NW
OCEAN 410 Marine Geology and Geophysics (4) NW Explores the geological and geophysical processes that form and shape the ocean basins and continental margins. Prerequisite: either ESS 210, ESS 211, or ESS 212. Offered: jointly with ESS 410; A.
OCEAN 411 Special Topics in Marine Geology and Geophysics (3) NW, QSR
OCEAN 412 Seismic Exploration and Stratigraphy (5) Pratt, Sheets Introduction to theory and practice of seismic exploration. Application of seismic techniques to understanding and constraining subsurface geology and structure, as well as to problems in natural resource exploration. Prerequisite: either ESS 213 or OCEAN 410; either MATH 126, MATH 129, or MATH 136; PHYS 123. Offered: jointly with ESS 467; W, even years.
OCEAN 420 Physical Processes in the Ocean (4) NW Physical properties and processes of the ocean: methods of describing ocean currents, waves, tides, and mixing and their effect on movement of water parcels. Prerequisite: either PHYS 116 or PHYS 123; either MATH 126, MATH 129, MATH 146, or Q SCI 381; OCEAN 210. Offered: W.

OCEAN 421 Special Topics in Physical Oceanography (3) NW

OCEAN 423 Ocean Circulation and Climate (3) NW Quantitative treatment of ocean basin to global scale ocean circulation systems and their interaction with climate variability. Prerequisite: PHYS 123; MATH 125; recommended: OCEAN 210.
OCEAN 430 Biological Oceanography (4) NW Examines marine organisms, their quantitative distribution in time and space, and their interactions with the ocean. Emphasizes dominant pelagic forms of phytoplankton, bacterioplankton, and archaeoplankton; and their predators, viruses, and zooplankton. Case studies explore extreme environments, coral reefs, influence of climate change on oceanic ecosystems, and the coastal ocean. Prerequisite: BIOL 200; OCEAN 210; recommended BIOL 220. Offered: A.
OCEAN 431 Special Topics in Biological Oceanography (3) NW Reviews current research. Topics include global change effects on marine organisms, marine pathogens and emerging diseases, introduced species, marine viruses, astrobiology, hydrothermal vents, symbiosis, animal physiology, larval forms and dispersal, biogeography, and environmental ethics. Prerequisite: either OCEAN 430 or any 400 -level BIOL, FISH, or MICROM course.

OCEAN 443 Design of Oceanographic Field Experiments (3) NW Case histories, presentations, and class exercises used to teach methods of formulating a research problem and proposal writing. Methods of data analysis, presentation, error estimation, library resource and data base use; web page implementation and design. Principles of cruise planning. Prerequisite: OCEAN 400; OCEAN 410; OCEAN 420; OCEAN 430. Offered: W.

OCEAN 444 Undergraduate Thesis: Research (2) Work closely with faculty mentors to conduct thesis research as designed in OCEAN 443 in a field, laboratory, or other guided research setting. Prerequisite: OCEAN 443. Offered: W
OCEAN 445 Undergraduate Thesis: Data Analysis and Writing (3) NW Analyze results from senior thesis experiments and present results in a series of drafts and a final paper. Results are presented at a twoday long public research symposium and on the students; individual web sites. Prerequisite: OCEAN 444. Offered: Sp.

OCEAN 450 Climatic Extremes (4) NW Course examines Earth history for extreme climatic conditions to predict future climate changes. Numerical climate models use PC-based computer programs to identify processes and feedbacks that control climate. Offered: W
OCEAN 452 Spatial Information Technology in Ecosystem Sciences (3) Logsdon Introduces the use of Geographic Information Systems (GIS), remote sensing, and spatial analysis in the ecosystem sciences. Emphasizes sampling and analysis of spatially-referenced data about the coastal and marine environments, integrating these technologies in an applied research setting. Offered: jointly with FISH 452; A.
OCEAN 453 Geospatial Pattern Analysis and Geostatistics (3) Logsdon Focuses on the application of geospatial pattern analysis and geostatistics in earth science research. Develops understanding in detecting, describing, and estimating spatial pattern and trends. Prerequisite: either Q SCI 381 or Q SCI 482; OCEAN 452. Offered: jointly with FISH 453; W.

OCEAN 454 Hydrothermal Systems: An Interdisciplinary View (3) NW Lilley Provides a general, interdisciplinary overview of seafloor hydrothermal systems including important geological, chemical, and biological processes. Topics include tectonic and volcanic controls on hydrothermal systems, water/rock reactions,
phase separation, temporal variability, fluxes to the deep sea, micro- and macro biology. Offered: W.
OCEAN 455 Introduction to Modeling in Oceanography (3) NW, QSR Grunbaum Explores roles of ocean models in understanding past, current, and future conditions in marine environments. Focuses on active learning using models to ask and answer questions about biotic and abiotic processes in marine environments. Prerequisite: either OCEAN 200, FISH 250, OCEAN 250, BIOL 250, or ATM S 211. Offered: A.
OCEAN 460 Marine Field Research (10) NW, QSR S. Veirs, $V$. Veirs Intensive off-campus marine research experience. Includes five weeks designing a field experiment and a five-week cruise aboard a sailing research vessel to implement it. Offered: jointly with OCEAN 365; ASp.
OCEAN 475 Current Research in Climate Science Seminar (3, max. 6) Weekly lectures focusing on a particular aspect of climate from invited speakers, complemented by class discussion, readings, and final paper. Promotes interdisciplinary understanding of climate concepts. Prerequisite: either ESS 201, ATM S 211, or ATM S 321. Offered: jointly with ESS 475/ ATM S 475; A.
ocean 477 Seminar in Marine Biology (3) Roccap Reviews current research in marine biology. Emphasizes critical readings and discussion of primary literature. Prerequisite: FISH 250, OCEAN 250, or BIOL 250; Q SCI 381, STAT 220, or STAT 311. Offered: jointly with BIOL 477/FISH 477; W.
OCEAN 479 Research in Marine Biology (1-15, max. 15) Individual research on topics in marine biology. Research projects supervised by an individual faculty member. Projects may include laboratory work, fieldwork, and literature surveys. Prerequisite: BIOL 250/ FISH 250/OCEAN 250; Q SCI 381. Offered: jointly with BIOL 479/FISH 479; AWSpS.
OCEAN 481 Puget Sound and Estuarine Oceanography (3) NW Keister, MacCready Explores fundamental physi-cal-biological processes in estuarine systems, using Puget Sound as a primary example. Topics include effects of circulation and mixing on residence time, nutrients, phytoplankton, zooplankton, and fish. Also covers hypoxia, the estuarine turbidity maximum, the intertidal zone, harmful algal blooms, and effects of climate change. Offered: W.
OCEAN 482 The Changing Arctic Ocean (3) NW Deming, Woodgate Investigates the interacting physical, chemical, and biological components of the Arctic ocean-ice-atmosphere system, including the most recent advances and considering the impacts of Arctic Change on Arctic and global climate, marine organisms and ecosystems, native communities, and future exploitation of an ice-free summer ocean. Offered: Sp .

OCEAN 492 Friday Harbor Apprenticeship (9/15) NW Intensive, full-time research training experience where teams of students work on focused research problems guided by a group of faculty, postdoctoral, and graduate student mentors. Research questions vary.
OCEAN 494 Field Experiences in Marine Science (1-15, max. 30) NW For participants in oceanography field work. Specific content varies and is individually evaluated. Credit does not apply to major requirements without approval.
OCEAN 496 Study Abroad: Oceanography (1-15, max. 30) NW For participants in UW study abroad program. Specific content varies and is individually evaluated. Credit does not apply to major requirements without approval.
OCEAN 497 Advanced Special Topics in Oceanography (115, max. 15)

OCEAN 499 Undergraduate Research (1-15, max. 24) Individual research supervised by a faculty member. May involve laboratory work, fieldwork, or literature surveys. Offered: AWSpS.
OCEAN 500 Current Problems in Oceanography (1) Discussion of research topics that are currently being investigated within the school. Credit/no-credit only. Prerequisite: permission of instructor. Offered: AW.
OCEAN 502 Spatial Information Technology in Ecosystem Sciences (3) Logsdon Introduces the use of Geographic Information Systems (GIS), remote sensing, and spatial analysis in the ecosystem sciences. Emphasizes sampling and analysis of spatially-referenced data about the coastal and marine environments, in tegrating these technologies in an applied research setting. Offered: jointly with FISH 502; A.
OCEAN 503 Geospatial Pattern Analysis and Geostatistics (3) Logsdon Focuses on the application of geospatial pattern analysis and geostatistics in earth science research. Develops understanding in detecting, describing, and estimating spatial pattern and trends. Recommended: introductory statistics or permission of instructor. Offered: jointly with FISH 503; W.
OCEAN 506 Interdisciplinary Seminar in Oceanography (1-3, max. 12) Lectures, discussions, and work on selected problems of an interdisciplinary nature. Prerequisite: permission of instructor.
OCEAN 507 Puget Sound and Estuarine Oceanography (3) Keister, MacCready Explores fundamental physicalbiological processes in estuarine systems, using Puget Sound as a primary example. Topics include effects of circulation and mixing on residence time, nutrients, phytoplankton, zooplankton, and fish. Also covers hypoxia, the estuarine turbidity maximum, the intertidal zone, harmful algal blooms, and effects of climate change. Offered: W.
OCEAN 508 The Changing Arctic Ocean (3) NW Deming, Woodgate Investigates the interacting physical, chemical, and biological components of the Arctic ocean-ice-atmosphere system, including the most recent advances and considering the impacts of Arctic Change on Arctic and global climate, marine organisms and ecosystems, native communities, and future exploitation of an ice-free summer ocean. Offered: Sp.
OCEAN 509 Seminar (1) Introduction to current research topics for beginning graduate students. Cred-it/no- credit only. Offered: AWSp.
OCEAN 510 Physics of Ocean Circulation (3) Structure of ocean basins; physical properties of seawater and the equation of state; heat, salt, fresh water budgets; tidal potential; Coriolis effect and geostrophic balance; major current systems and water masses; mixing, stirring in the ocean; simple waves; modern experimental methods in physical oceanography. Prerequisite: permission of instructor. Offered: A.
OCEAN 511 Introduction to Fluid Dynamics (4) Eulerian equations for mass-motion; Navier-Stokes equation for viscous fluids, Cartesian tensors, stress-strain relations; Kelvin's theorem, vortex dynamics; potential flows, flows with high-low Reynolds numbers; boundary layers, introduction to singular perturbation techniques; water waves; linear instability theory. Prerequisite: AMATH 403 or permission of instructor. Offered: jointly with AMATH 505/ATM S 505; A.
OCEAN 512 Geophysical Fluid Dynamics I (4) Dynamics of rotating stratified fluid flow in the atmosphere/ ocean and laboratory analogues. Equations of state, compressibility, Boussinesq approximation. Geostrophic balance, Rossby number. Poincare, Kelvin, Rossby waves, geostrophic adjustment. Ekman layers. Continuously stratified dynamics: Inertia-gravity waves, potential vorticity, quasigeostrophy. Prerequi-
site: OCEAN 511 or ATM S 505/AMATH 505. Offered: jointly with ATM S 509; W.
OCEAN 513 Geophysical Fluid Dynamics II (3) Theories, models of large-scale dynamics of oceans, atmospheres. Potential vorticity, Q principles; Rossby waves, ray tracing, Green's function, setup of general circulation; atmospheric "channels" versus ocean "basins"; wave-mean flow interaction, mountain drag, internal momentum flux; "Lagrangian" motion of particles, tracers; cascades, eddy flux of heat, moisture, Q. Prerequisite: OCEAN 512. Offered: Sp.
OCEAN 514 Waves (3) Application of marine hydrodynamics principles to wave motion in oceans. Offered: W.

OCEAN 515 Ocean Circulation: Observations (3) Modern large- and mesoscale ocean observations, interpreted in terms of contemporary circulation theories. Spectrum of temporal variability; eddies and eddy fluxes; ventilation; advection and diffusion in the abyss; transports of heat and salt; climatic scale of variability; modern methods for determining circulation. Prerequisite: OCEAN 510 or permission of instructor. Offered: Sp.
OCEAN 517 Methods and Measurements in Physical Oceanography (3) Principal instruments and experimental methods of physical oceanography. Devices and systems that measure pressure, temperature, electrical conductivity, sea state, and velocity. Prerequisite: permission of instructor.
OCEAN 520 Marine Chemistry (3) Processes controlling the chemical composition of seawater. Chemical distributions in the ocean, marine physical chemistry, chemical equilibrium, and concepts of mass balance. Mechanisms and models used to explain distributions of stable and radioactive isotopes, gases, trace metals, and biochemicals in the world's oceans. Offered: A.
OCEAN 521 Aquatic Chemistry (3) Application of physical chemistry and thermodynamics to processes that control chemical composition of natural waters. Equilibrium approach. Acid/base chemistry, the carbonate system, dissolution and precipitation, metal ions in solution, oxidation-reduction chemistry, silicate mineral reactions. Prerequisite: OCEAN 520 or permission of instructor. Offered: A.
OCEAN 522 Marine Organic Geochemistry (3) Sources, reactions, and fates of organic molecules in the marine environment along with the stable isotope geochemistry of marine organic substances. Prerequisite: CHEM 237 and CHEM 239 or permission of instructor.

OCEAN 523 Geochemical Cycles (4) Descriptive, quantitative aspects of earth as biogeochemical system. Study of equilibria, transport processes, chemical kinetics, biological processes; their application to carbon, sulfur, nitrogen, phosphorus, other elemental cycles. Stability of biogeochemical systems; nature of human perturbations of their dynamics. Prerequisite: permission of instructor. Offered: jointly with CHEM 523 and ATM S 508.
OCEAN 529 Seminar on Chemical Oceanography (*, max. 30) Lectures, discussions, and readings on selected problems of current interest. Prerequisite: permission of instructor. Offered: AWSp.

OCEAN 530 Marine Bacteria, Archaea, and Viruses (3) Explores the role of marine microorganisms in transformations of dissolved and particulate organic matter. Covers the functional and phylogenetic diversity of bacteria, archaea, and viruses in the marine environment; the fate of organic carbon in the microbial loop; and the interrelationship of the carbon cycle with other biogeochemical cycles. Prerequisite: permission of instructor. Offered: W, odd years.

OCEAN 531 Marine Phytoplankton and Biogeochemistry (3) Covers phytoplankton in the marine environment: evolution, ecology, primary productivity, and physiology, emphasizing their role in the global carbon cycle; spatial and temporal distributions of phytoplankton and how these patterns may change as ocean conditions change; and methods for determining distributions and rates in different ocean ecosystems. Prerequisite: permission of instructor. Offered: W, even years.
OCEAN 532 Marine Zooplankton Ecology (3) Examines the roll of zooplankton in ecosystems and biogeochemical cycles. Covers the distribution and abundance of zooplankton in space and time; small-scale distributions; morphology and behavior; population dynamic, energetics, and secondary production; trophic structure and dynamics; biogeography; impacts of climate change; and models of populations and food chains.
OCEAN 533 Marine Benthic Ecology (3) Analyzes marine communities associated with the porous boundaries of the ocean, from sedimented seafloor and hydrothermal vents to sea ice (inverted benthos); emphasizing nutrition to these communities, including sinking organic aggregates, themselves porous habitats, and the role of symbiosis. Prerequisite: permission of instructor. Offered: W, even years.
OCEAN 535 Biological Oceanography (3) Examines major patterns and processes in upper ocean pelagic ecosystems, emphasizing quantitative analysis of mechanisms controlling production and abundances of organisms, from plankton to fish. Introduces interdisciplinary study of effects of anthrogenically induced changes in climate and ocean chemistry on organisms, ecosystem processes, and biogeochemical cycles. Offered: A.
OCEAN 539 Seminar in Biological Oceanography (*, max. 30) Lectures, discussions, and work on selected problems of current interest. Prerequisite: permission of instructor. Offered: AWSp.
OCEAN 540 Marine Geology and Geophysics Processes (3)
Nittrouer, Solomon Synthesis of processes that form ocean basins and fill them with sediment, including: plate tectonics and the creation, evolution, and subduction of ocean crust; accumulation of terrestrial, biogenic, and authigenic sediments; and the history of paleoceanographic events recorded in the seafloor. Offered: W.
OCEAN 541 Marine Sedimentary Processes (3) Investigates fundamental process of marine sedimentation, including equations characterizing boundaryshear flows, initiation of grain motion, bedload and suspended-load transport, and sediment accumulation. Applies concepts to sediment dispersal in rivers, deltas, estuaries, beaches, continental shelves, slopes, and rises, with emphasis on the relationships between active processes and resulting deposits.
OCEAN 544 Subseafloor Hydrogeology and Geochemistry (3) Soloman Introduces the occurrence, composition, and movement of groundwater in the ocean crust and its role in a wide range of geologic and biogeochemical processes. Includes basic theories of groundwater motion, heat transport, solute transport, and hydromechanics with applications to diverse subseafloor environments ranging from mid-ocean ridges to subduction zones. Offered: Sp.
OCEAN 545 Oceanic Lithosphere (3) Basic principles of elasticity, fluid flow, and heat transport with specific applications to the formation and evolution of the oceanic lithosphere. Includes deformation of the earth, flow in porous media, heat transport, and marine seismological and potential field techniques. Prerequisite: OCEAN 540. Offered: jointly with ESS 568.

OCEAN 546 Continental-Margin Sedimentation (3) Detailed evaluation of recent studies into processes forming strata on continental margins, including the diverse time scales ranging from sediment transport to sequence stratigraphy. Highlights the linkages with physical oceanographic processes, the fates of geochemical components, and the relationship to biological communities. Offered: jointly with ESS 527.
OCEAN 549 Seminar in Geological and Geophysical Oceanography ( ${ }^{*}$, max. 30) Lectures, discussions, and field and laboratory work on selected problems of current interest. Prerequisite: permission of instructor. Offered: AWSp.
OCEAN 550 Geochemistry and Geophysics of Melt Generation (3) Mantle flow beneath mid-ocean ridges and hotspots, major element systematics, constraints from trace elements and isotopes on melting and mantle reservoirs, melt extraction, and crustal thickness and axial topography. Prerequisite: OCEAN 544 or permission of instructor.
OCEAN 552 Seminar in Geophysics and Geological Data Analysis (1) Practical geophysical data analysis, map projections, gridding multibeam bathymetry processing, gravity and magnetic anomalies, downward continuation, magnetic inversion, seismic refraction and reflection, and microearthquake locations. Prerequisite: permission of instructor.
OCEAN 554 Paleoclimate Proxies (3) Alexander, Sachs Provides a critical evaluation of the most commonly applied paleoclimate proxies from the ocean, land, and ice sheets. Offered: jointly with ATM S 554/ESS 554.

OCEAN 558 Climate Modeling (3) Bitz, Thompson Principles of Earth system modeling. Emphasis on atmosphere, ocean sea ice, and land-surface components. Climate forcing. Appropriate use of models. Topics of current interest including carbon cycle, atmosphere chemistry, and biogeochemistry. Prerequisite: either ATM S 587/OCEAN 587/ESS 587, ATM S 504 or ATM S 505. Offered: jointly with ATM S 559/ ESS 559; Sp.
OCEAN 559 Advanced Seminar on Mid-Ocean Ridge Processes (*, max. 9) Lectures, discussions, and practical work on selected topics of current interest in midocean ridge research. Prerequisite: permission of instructor.
OCEAN 560 Atmosphere/Ocean Interactions (3) Observations and theory of phenomena of the coupled atmosphere-ocean system. El Nino/Southern Oscillation; decadal tropical variability; atmospheric teleconnections; midlatitude atmosphere-ocean variability. Overview of essential ocean and atmospheric dynamics, where appropriate. Credit/no credit only. Prerequisite: ATM S 509 or OCEAN 512. Offered: jointly with ATM S 560; Sp.
OCEAN 569 Topics in Physical Oceanography (1-4, max. 30) Lecture series on topics of major importance in physical oceanography. Offered: AWSp.
OCEAN 570 Marine Microbial Interactions (1-3, max. 9)
OCEAN 572 Marine Protist Ecology (1-3, max. 9) Examines the phagotrophic (protozoa) and mixotrophic (both photosynthetic and phagotropic) protists, including: interactions with predators and prey; and adaptations to changing environments, evolutionary, and ecological implications of mixotrophy. Prerequisite: OCEAN 532 or permission of instructor. Offered: Sp.
OCEAN 578 Advanced Topics in Biological Oceanography (*, max. 18) Specialized research areas. Topic varies each year. Offered at Friday Harbor Laboratories. Prerequisite: permission of director of Friday Harbor Laboratories. Offered: S.

OCEAN 580 Aquatic Kinetics (3) Reaction rates and mass transport in water. Theories of chemical kinetics; experimental results from: CO2 hydrolysis, Fe, Mn , and H 2 S oxidation, stable isotope fractionation, mineral dissolution; homogeneous, heterogeneous, microbial catalysis; reaction and transport at air-water, sediment-water, and 02/H2S interfaces. Prerequisite: permission of instructor.
OCEAN 582 River Basin Biogeochemistry (3) The function of rivers and river basins in transporting materials to the oceans and their importance in biogeochemical cycles. Origin of water and water routing within drainage basins, sources and modification of dissolved and particulate materials in transport, ecological theory, and estuarine mixing zone transformations. Prerequisite: permission of instructor.

OCEAN 583 Isotope Biogeochemistry (3) The use of stable isotopes to study biogeochemical cycles in the oceans and atmosphere; specifically carbon, nitrogen, and sulfur cycles. Isotopic effects during photosynthesis, respiration, organic matter degradation. CaCO3 dissolution, methanogenesis, nitrification/ denitrification, and sulfate reduction. Prerequisite: permission of instructor.

OCEAN 584 Ocean Tracers and Mixing (3) The applications of tracers to studies of ocean circulation and ventilation. Processes within the ocean for which tracers have provided important information include gas exchange, mixed layer dynamics, thermocline ventilation, deep water formation and spreading, and mixing. Knowledge of partial differential equations suggested.

OCEAN 586 Current Research in Climate Change (2, max. 20) Weekly lectures focusing on a particular aspect of climate (topic to change each year) from invited speakers (both UW and outside), plus one or two keynote speakers, followed by class discussion. Offered: jointly with ATM S 586/ESS 586.
OCEAN 587 Climate Dynamics (3) Hartman, Thompson Examines Earth's climate system; distribution of temperature, precipitation, wind ice, salinity, and ocean currents; fundamental processes determining Earth's climate; energy and constituent transport mechanisms; climate sensitivity; natural climate variability on interannual to decadal time scales; global climate models; predicting future climate. Offered: jointly with ATM S 587/ESS 587. Offered: A.

OCEAN 588 The Global Carbon Cycle and Climate (3) Emerson Oceanic and terrestrial biogeochemical processes controlling atmospheric CO2 and other greenhouse gases. Records of past changes in the earth's carbon cycle from geological, oceanographic, and terrestrial archives. Anthropogenic perturbations to cycles. Develop simple box models, discuss results of complex models. Offered: jointly with ATM S 588/ ESS 588. Offered: W.

OCEAN 589 Paleoclimatology: Data, Modeling and Theory (3) Battisti, Emerson, Steig Evidence for past changes in land and seasurface temperature, in precipitation and atmospheric dynamics, and in ocean circulation: both long and interannual timescales. Paleoclimate modeling and theory. Time series analysis and climate noise. Rapid climate change. Statistical reconstruction of interannual variability. Offered: jointly with ATM S 589/ESS 589. Offered: Sp
OCEAN 590 Advanced Topics in Oceanography (9-18, max. 18) Advanced topics examining specialized and interdisciplinary areas of oceanographic research. Offered at Friday Harbor Laboratories. Prerequisite: permission of Director of Friday Harbor Laboratories. Offered: S.

OCEAN 591 Marine Science in the Coastal Zone (3) Klinger Presentation and analysis of the marine science
of estuarine, coastal, and open ocean systems, in cluding evaluation and interpretation of scientific information necessary for management. Lectures, discussions, and readings emphasize the relevance of natural processes to marine environmental management and decision-making. Offered: jointly with SMEA 591; A.

OCEAN 592 Communicating Ocean Sciences (4) Robigou Explores improving communicating scientific knowledge through instruction of inquiry-based science in school classrooms. Students practice communicat ing science, and receive mentoring on how to improve their presentations. Prerequisite: Marine sciences studies background. Offered: Sp.
OCEAN 593 Climate Science Seminar (1) Mote Focuses on how to communicate climate science to many different audiences through careful construction of figures and through written and oral communication. Credit/no-credit only. Offered: jointly with ATM S 593/ESS 593; W.

OCEAN 596 Climate Science Capstone Project (1-5, max. 5) Mote Climate capstone directed by a mentor, may be a group effort, and may encompass curriculum development, internships, workshop organization, etc., capturing interdisciplinary aspects of climate science and effective communication of climate science. Offered: jointly with ATM S 596/ESS 596; AWSpS.

OCEAN 600 Independent Study or Research (*) Offered: AWSpS.
OCEAN 700 Master's Thesis (*) Offered: AWSpS.
OCEAN 800 Doctoral Dissertation (*) Offered: AWSpS.

## Quantitative Science

The Center for Quantitative Science is an interdisciplinary program administered jointly by the School of Aquatic and Fishery Sciences and the School of Forest Resources. It provides high-quality instruction in mathematical and applied statistical methods for undergraduate students who major in the biological and ecological sciences, renewable resources management, and environmental studies. The center provides instruction in an atmosphere that emphasizes the use of quantitative methods to better understand a variety of scientific phenomena. Faculty represent various applied scientific disciplines within the School of Forest Resources and the School of Aquatic and Fishery Sciences.

## UNDERGRADUATE PROGRAM

Adviser
005 Anderson Hall, Box 352100
206-543-1191
cqs@uw.edu
Students in environmental, biological, ecological, and resource management majors may wish to complete a minor in quantitative science to document their understanding of the mathematical and statistical methods used in these competitive and increasingly quantitative fields.

## Minor

## Minor Requirements

A minimum of 26 credits, as follows:

1. Core Courses (20 credits): Q SCI 291, Q SCI 292 (or MATH 124, MATH 125); Q SCI 381, Q SCl 482
2. Electives ( $6-10$ credits): Two Q SCI courses at the 300 or 400 level to include one course from Q SCI 480, Q SCl 483, Q SCI 486
3. A minimum grade of 2.0 is required in each course taken as part of the minor.

## COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations.

Q SCI 190 Quantitative Analysis for Environmental Science (5) NW, QSR Bare Covers applications of precalculus techniques and concepts to environmental, ecological, biological, and natural resource problems stress ing the formulation, solution, and interpretation of mathematical procedures. Prerequisite: minimum grade of 2.0 in MATH 098 or MATH 103, a score of 151-169 on the MPT-GS test, or a score of 145-163 on the MPT-AS test. Offered: AWSp.
Q SCI 210 Introduction to Environmental Modeling (4) NW, QSR Explores strengths and limitations of diverse modeling approaches, and strategies for using models in quantitative critical analysis of past, current and future conditions in terrestrial and marine environments. Focus on active learning use of models to ask and answer questions about biotic and abiotic environmental processes, management strategies and policy decision-making. Offered: jointly with EN VIR 210.

Q SCI 291 Analysis for Biologists I (5) NW, QSR Johnson Introduction to differential calculus, emphasizing development of basic skills. Examples promote understanding of mathematics and applications to modeling and solving biological problems. Topics include optimization and curve analysis. Prerequisite: either MATH 120, Q SCI 190, a minimum score of 2 on advanced placement test, or a score of 153-163 on MPT-AS placement test. Not available for credit to students who have completed MATH 124 with a 2.0 or higher. Offered: AWS.
Q SCI 292 Analysis for Biologists II (5) NW, QSR Gallucci, Johnson Introduction to integral calculus, emphasizing development of basic skills. Examples promote understanding of mathematics and applications to modeling and solving biological problems. Topics in clude areas under curves, volumes, and differential equations. Prerequisite: minimum grade of. 7 in either Q SCI 291 or MATH 124. Not available for credit to students who have completed MATH 125 with a 2.0 or higher Offered: WSpS
Q SCI 381 Introduction to Probability and Statistics (5) NW, QSR Bare, Gallucci, Greulich, Punt Applications to biological and natural resource problems stressing the formulation and interpretation of statistical tests Random variables, expectations, variances, binomial, hypergeometric, Poisson, normal, chi-square, " t " and " F " distributions. Prerequisite: either MATH 120, MATH 124, MATH 125, MATH 126, Q SCI 190, or Q SCI 291, or a minimum score of 2 on advanced placement test, or a score of 153-163 on the MPT-AS placement test. Offered: AWSpS.
Q SCI 403 Introduction to Resampling Inference (4) NW Introduction to computer-intensive data analysis for experimental and observational studies in empirical sciences. Students design, program, carry out, and report applications of bootstrap resampling, rerandomization, and subsampling of cases. Experience programming in R is beneficial. Credit allowed for 403 or 503 but not both. Prerequisite: either STAT 311/ECON 311, STAT 341, STAT 390/MATH 390, STAT 481/ECON 481, or Q SCI 381 and Q SCI 482; recommended: Q SCI 483 which may be taken concurrently. Offered: jointly with STAT 403; Sp.

## Q SCI 454 Ecological Modeling (5) NW Essington Exam

 ines concepts in ecological modeling focusing on the rational, interpretation, and motivation for modeling in ecological sciences. Explores individual, popula tion, and ecosystem-based models. Excel-based computer exercises, model building and interpretation, readings. Recommended: prior coursework inecology and statistics. Offered: jointly with FISH 454; W.

Q SCI 458 Modeling and Estimation in Conservation and Resource Management (4) NW Branch Explores the use of models in the evaluation of alternative management polices for natural resources, including modeling approaches, fitting models to data, and evaluating alternative management polices. Emphasizes calculating risk of extinction, and design of biological reserves. Recommended: either Q SCI 454 or FISH 454. Offered: jointly with FISH 458; Sp.

Q SCI 480 Sampling Theory for Biologists (3) NW Skalski Theory and applications of sampling finite populations including: simple random sampling, stratified random sampling, ratio estimates, regression estimates, systematic sampling, cluster sampling, sample size determinations, applications in fisheries and forestry. Other topics include sampling plant and animal populations, sampling distributions, estimation of parameters and statistical treatment of data. Prerequisite: Q SCI 482; recommended: Q SCI 483. Offered: jointly with STAT 480; W, odd years.
Q SCI 482 Statistical Inference in Applied Research I: Hypothesis Testing and Estimation for Ecologists and Resource Managers (5) NW Conquest, Turnblom Analysis of variance and covariance; chi square tests; nonparametric procedures multiple and curvilinear regression; experimental design and power of tests. Application to biological problems. Use of computer programs in standard statistical problems. Prerequisite: either STAT 311 or Q SCI 381. Offered: AW.
Q SCI 483 Statistical Inference in Applied Research II: Regression Analysis for Ecologists and Resource Managers (5) NW Skalski Analysis of linear regression models and introduction to nonlinear models. Model selection using generalized F-tests; residual analysis. Application to categorical, count, binomial, transformed variables. Introduction to matrix formation of regression models and applications. Prerequisite: Q SCI 381; Q SCI 482. Offered: Sp.
Q SCI 486 Experimental Design (4) NW Conquest Emphasizes data modeling using structured means resulting from choice of experimental and treatment design. Examines experimental designs, including crossed, nested designs; block; split-plot designs; and covariance analysis. Also covers multiple comparisons, efficiency, power, sample size, and pseudo-replication. Prerequisite: Q SCI 482; recommended: Q SCI 483. Offered: jointly with STAT 486; W, even years.
Q SCI 497 Special Topics in Quantitative Science (1-15, max. 15) NW Topics not normally offered in regular curriculum. Format ranges from seminar/discussion, formal lectures, laboratory or modeling work. Offered: AWSpS.
Q SCI 498 Internship (1-15, max. 15) Internship experience with a public agency or private company, supervised and approved by a faculty member. Preparation of professional report reflecting on the experience is required. Credit/no credit only. Offered: AWSpS.
Q SCI 499 Research Experience (1-15, max. 15) Special studies in quantitative ecology and resource management for which there is not sufficient demand to warrant the organization of regular courses. Credit/ no credit only.

## Quaternary Research Center

19 Johnson

Quaternary studies focus on the processes that presently shape the natural environment and have operated over approximately the past two and a half million years (Quaternary period). A knowledge of Quaternary events facilitates an understanding of earth history in relation to the modern environment and has predictive value with regard to pres-ent-day and future environmental changes.
Quaternary research is typically interdisciplinary, and thus it commonly involves related interests of two or more academic units. The Quaternary Research Center was established in 1967 to foster such interdisciplinary studies on a cooperative basis.
The center has the following goals:

- To understand environments and climate changes of the past two and a half million years in the context of modern surface processes, which include historical changes, prehistoric postglacial environments, and Ice Age events.
- To serve as a catalyst in fostering interdisciplinary studies in the fields of atmospheric sciences, archaeology/ anthropology, botany, engineering, fisheries, forestry, geology, geophysics, oceanography, pedology, and zoology.
- To provide a scientific perspective on the scale of modern and man-made environmental changes, including climate changes, in the context of recent earth history.
- To conduct a curriculum jointly with other disciplines in the training of graduate students in Quaternary-oriented studies.
- To seek applications of Quaternary studies to modern environmental problems that will help predict consequences of policy decisions.

## Graduate Program

Students associated with the center obtain their degrees through cooperating departments. Students interested in graduate work at the center should apply to the department of their choice but plan to do their research in a Qua-ternary-related subject.

## Research Facilities

The research laboratories of the center provide an array of modern facilities for investigation of Quaternary problems.

## QRC Resource Center

This specialized collection, dealing with a wide range of Quaternary topics, is among the most extensive in North America. It includes books, monographs, theses, journals, and maps, and houses a large, diverse reprint collection. Searches for library material can be conducted via the QRC web page.

## Cosmogenic Nuclide Laboratory

John Stone, Director
The UW Cosmogenic Nuclide Laboratory analyses rare radionuclides produced by cosmic ray bombardment of the Earth's surface. These nuclides are useful for surface exposure dating and the study of geomorphic rates and processes. Current projects include work on Quaternary glaciations of Antarctica, Europe, and North America; dating of landslides and volcanic eruptions; and studies of erosion in both tectonically active and ancient, stable landscapes. The laboratory has sample preparation facilities and clean labs for extraction of AI-26, $\mathrm{Be}-10$, and $\mathrm{Cl}-36$. For additional information, visit the laboratory's website.

## Geochemistry Library

Ronald S. Sletten, Director
The Geochemistry Library conducts analyses of natural waters, soil, and sediment. Instrumentation includes ICPOES, ICP-MS, laser diffraction particle size analyzer, and total organic/inorganic carbon analyzer for water samples. The library also conducts C-13 CP-MAS-NMR for natural or-
ganic and pulsed field gradient PFG-NMR for diffusion studies of water in porous media. The primary research foci are weathering, elemental cycling, and studies of permafrost soils. Current projects include investigation of biocomplexity of carbon cycling in Arctic soils in Greenland and physicochemical soil processes in Antarctica and Alaska.

## Periglacial Laboratory

Bernard Hallet, Director
Research in the Periglacial Laboratory focuses on diverse processes at the interface between glaciology and geomorphology that are fundamental to understanding landscapes and soils in alpine and polar regions. Founded by Link Washburn, the laboratory has a long history of experimental research on periglacial processes with special attention given to the complex phenomena associated with freezing soils and rocks. Recently the lab has also served as a base of support for extensive field work involving electronic instrumentation to monitor surface processes in the Arctic, Antarctica, the Himalayas, southeast Tibet, and other regions across the globe.

## Stable Isotope Laboratory

Eric J. Steig, Director
The Stable Isotope Laboratory is the main center for stable isotope studies for the QRC. The current emphasis in the laboratory is the development of high-resolution climate records covering the last ten millennia, from ice cores in the Canadian Arctic, Greenland, and Antarctica. Facilities in the laboratory include off-line and online preparation systems for D/H and 18)/160 on water 13C12C on carbonates and organic materials, and $15 \mathrm{~N} / 14 \mathrm{~N}$ on nitrate and organics. Additional information, data, and other resources are available via the laboratory's website.

## COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations.
QUAT 501 Seminar/Conference in Quaternary Environments (1, max. 6) Interdisciplinary seminar or conference in the changing natural environments of the Quaternary Period, with emphasis on climatic changes and their effects. Speakers from the University and elsewhere present lectures on their specialties, followed by discussion. Credit/no credit only.
QUAT 502 Interdisciplinary Quaternary Investigations (2, max. 6) Research course for interdisciplinary investigation of Quaternary problems. Student attends sessions of QUAT 501 and pursues a problem- oriented case study concurrently under faculty direction. Required paper on case study. Credit/no credit only. Prerequisite: graduate standing.
QUAT 504 Special Topics in Quaternary Sciences (1-3, max. 3) Environments and climate changes of past two million years (Quaternary Period) in context of modern surface processes, including historical changes, prehistorical environments of postglacial period, and Ice Age events. Provides scientific perspective on scale of modern and man-made environmental changes, including those of climate, in context of recent earth history. Credit/no credit only. Prerequisite: background courses in earth sciences and ecology.

# The Information School 

370 Mary Gates Hall

Box 352840

## Dean

Harry Bruce

## Associate Deans

Cheryl Metover, Research
Matthew Saxton, Academics

Never in our society's history has there been such a great need to manage so much information quickly and efficiently. The Information School is dedicated to preparing a rising generation of information leaders to embrace the challenges associated with the way we create, find, store, manipulate, and share information.
The School offers four degree programs, leading to the Bachelor of Science in Informatics, Master of Library and Information Science, Master of Science in Information Management, and PhD in Information Science. The School also offers certificate programs, continuing education opportunities for professionals, and service courses for undergraduates in information fluency, research strategies, and technology. Graduates of the School assume a variety of professional roles in the public, private and non-profit sectors, with positions that span from information architects to children's librarians, from web developers to information technology (IT) managers, from network and information assurance professionals to researchers and faculty in the information field.

The community is interdisciplinary, bringing together a variety of social science traditions, including: library and information science, computer science, sociology, communication, philosophy, and engineering. Most research addresses topics in the following broad categories:

- Ethics and Information
- Personal Information Management
- Human-Computer Interaction and Design
- Information Management
- Knowledge Organization
- Information Literacy
- Access to Information
- Information in Everyday Life

The School's work remains focused on the human impact of information. The research and curriculum of the school examines information systems and technology from a usercentered perspective. By retaining a focus on the human impact of information systems and technology, we build on our community values of trust, transparency, and mutual respect.

## History

Originally established in 1911, the Information School has the oldest library and information science program west of the Mississippi, and continues to offer the most extensive American Library Association-accredited library and information science degree in the Northwest region of the United States.
In 1998, the University set out to transform the School by charging it with a new mission, to become what it is today: a broad-based information school that meets the challenges and opportunities of the information age. With the addition of three new degree programs, a new dean, faculty, and state of the art facilities, the Information School became
the University's sixteenth independently organized school/ college in 2001.
The School seeks to explore the theoretical and applied cutting edges of the information field and to nurture the best of both worlds: traditional library values and everchanging information frontiers.

## Passion

The School is inspired by information, wanting everyone to know how vital information is in all aspects of life.

## Vision

The School envisions a world where more effective use of information helps everyone discover, learn, innovate, solve problems, have fun, and make a better world. Information changes lives.

## Mission

The School prepares information leaders through researching the problems and opportunities of information, designing solutions to information challenges, and making information work.

## UNDERGRADUATE PROGRAM

Informatics students design, build, implement, and secure information systems that meet human, organizational, and societal needs.

Students have a strong people focus and they excel as user experience designers, business analysts, data managers, information architects, web developers, and information assurance professionals.

## Adviser

470 Mary Gates Hall
Box 352840
(206) 543-1794
informatics@.uw.edu
The Information School offers a Bachelor of Science in Informatics degree, with options in human-computer interaction and information architecture.

## Bachelor of Science

Suggested First- and Second-Year College Courses: INFO 100, INFO 200, an English composition course (selected from the University list), CSE 142, CSE 143, and STAT 311 or Q METH 201; courses that develop strong analytical, qualitative, and quantitative reasoning skills; courses that develop strong written and oral communication skills; courses that provide exposure to a variety of social science fields such as psychology, sociology, anthropology, or philosophy.

## Program Admission Requirements

## Regular Admission

1. INFO 100 (5 credits); INFO 200 (5); CSE 142 (4); STAT 311 (5) or QMETH 201 (4); one English composition course selected from the University list (5), with a minimum grade of 2.0 in each course. Departmentally approved transfer equivalents may be used to substitute for prerequisite courses. Students with a previous technology background may request that INFO 100 be waived. If INFO 100 is waived, students must take an additional 5 elective credits in INFO-prefix courses or other electives approved by the adviser.
2. Minimum 2.00 cumulative college GPA.
3. Admission is competitive, based on the following criteria:
a. Overall academic performance
b. Grades in courses required for admission to the major
c. Personal statement reflecting an interest in and com mitment to becoming a major in this field
d. Other evidence of interest in and commitment to the field (e.g., work experience, internships).

Meeting the above criteria does not guarantee admission.
4. Application deadline is June 15. Students apply online at www.ischool.uw.edu. Admission is for autumn quarter only.
5. Admission is done annually and new students enter the program autumn quarter. Most students apply spring of their sophomore year and begin the program the following autumn quarter as a junior.
6. Transfer students should contact the Information School as soon as they become interested in the informatics major. The School considers courses equivalent to INFO 100 and INFO 200 and may allow a student to be admitted provisionally on condition that she or he completes those courses or equivalents with a minimum grade of 2.0 early in the program.

## Freshman Direct Admission Program (FDAP)

1. Designed to recruit top high school students to the program and to the UW. Students who indicate an interest in the Informatics program are automatically considered for FDAP participation upon application to the UW. They are evaluated based on careful review of qualitative and quantitative factors, including high school GPA, SAT scores, personal statement, and any additional information provided in their application file. Students selected for FDAP are involved in the academic and social life of the Information School, participating in courses, activities, and research opportunities as appropriate during their freshman and sophomore years.
2. The number of early admission (FDAP) students does not exceed $10 \%$ of the number of majors admitted each year.

## Major Requirements

94-98 credits as follows:

1. Courses required for admission to the program ( 23 credits, as shown above)
2. Core courses (55 credits): INFO 330 (5), INFO 340 (5), INFO 343 (5), INFO 360 (5), INFO 380 (5), INFO 450 (5), INFO 470 (5), INFO 481 (4), INFO 490 (8), CSE 143 (5), CSE 373 (3)
3. Areas of study (16-20 credits): Students may choose a transcriptable option in either human-computer interaction ( HCl ) or information architecture (IA). (See below.) Alternatively students may work with their adviser to select a minimum of four classes (16-20 credits) to create a customized program aligned with their personal interests or career goals. For example, networking and information assurance, as well as social computing/social informatics, are additional areas of strength within the School.

## General Education and Areas of Knowledge:

1. English composition (5 credits)
2. Quantitative/Symbolic Reasoning ( 5 credits)
3. Writing courses (10 credits)
4. Natural World ( 20 credits)
5. Individuals \& Societies ( 20 credits)
6. Visual, Literary, \& Performing Arts ( 20 credits)

Up to 15 credits of INFO-prefix courses from the University Areas of Knowledge list may be counted toward the UW Areas of Knowledge requirement (Natural World; Individuals \& Societies; Visual, Literary, \& Performing Arts).

Students must earn a minimum 180 credits to graduate.

## Options

## Human-Computer Interaction (HCI) Option (16-20 credits)

The notation "Human Computer Interaction" is transcripted as an option for a student who graduates with a Bachelor of Science in Informatics degree and who completes the following:

Minimum four courses, totaling at least 16 credits, from the areas listed below, with the following distribution:

1. At least one course in two of the areas listed below, other than foundations: user interface software and technology; design; usability and user research; social and ethical dimensions. (INFO 360, the Information School HCl foundations course, is a requirement for all informatics majors. Students can take additional HCl foundations courses that do count toward the four-class HCl requirement from the list below.)
2. At least one course from the list below from a participating department outside the Information School (art, computer science, or technical communication).
3. Special topics courses such as INFO 498, HCDE 490, and HCDE 496 may be approved within any of the course areas below on an individual, per-course basis, depending on subject matter.

## Course areas:

- Foundations: ART 383 (5), CSE 440 (5), HCDE 319 (5)
- User Interface Software and Technology: CSE 441 (5), INFO 344 (5), HCDE 438 (5)
- Design: ART 483 (5), ART 484 (5), INFO 424 (5), HCDE 455 (4)
- Usability and User Research: INFO 310 (5), HCDE 317 (5), HCDE 318 (5)
- Social and Ethical Dimensions: INFO 444 (5), INFO 447 (5)

## Information Architecture (IA) Option (16-20 credits)

The notation "Information Architecture" is transcripted as an option for a student who graduates with a Bachelor of Science in Informatics degree and who completes four courses from the following list: INFO 320 (5), INFO 344 (5), INFO 431 (3), INFO 432 (3), INFO 445 (5), INFO 446 (5).

The courses in the Information Architecture option build upon INFO 330, INFO 340, and INFO 343, all courses required for the major.

## Continuation Policy

Students are expected to make satisfactory progress towards attainment of the Bachelor of Science degree. Under normal circumstances, an informatics major attending fulltime makes satisfactory progress by completing the major requirements in approximately two years after admission to the major, or within three years for students admitted to the major as sophomores. Lack of academic progress may be evidenced by low scholarship as well as excessive course repeats, course drops, or University withdrawals and cancellations. For more details, see adviser.

## Student Outcomes

- Learning Objectives and Expected Outcomes: The informatics program prepares students for a wide range of endeavors in the information field including information management and technology, research and information services, interactive system design, human-computer interaction, and information science.
Graduates of the informatics program are qualified for jobs in the information and technology industry and in business, public service, and other professions. Possible job titles include user experience designer, business analyst, consultant, usability engineer, data manager, information architect, Web developer, network manag-
er, project manager, and information assurance professional.

The program also provides strong preparation for graduate studies. Graduates are successfully placed in prestigious graduate schools and pursue a variety of programs, including information and management science, information science, biomedical informatics, business and accounting, and information technology.

Informatics student-learning outcomes include the ability to assess people's information needs and behavior; ability to design information systems to meet people's information needs; ability to work with information technologies (e.g., database, networks, Internet-based, interface design); ability to evaluate the impact of information technologies on people; ability to communicate effectively; ability to manage projects; ability to build working systems; ability to organize and manage information; ability to work effectively individually and as part of a team; and ability to understand the research process and its implication for information systems design and use. All informatics courses are designed to produce these outcomes through a rigorous experiential learning approach that emphasizes group work, research, writing, oral presentations, and technology.

- Instructional and Research Facilities: Located on the third and fourth floors of Mary Gates Hall, the School offers an extensive software collection, a state-of-the-art computer classroom, an innovative Technology Exploration (TE) Lab, and excellent network connectivity. Students have access to software applications including titles for database and text management, programming, graphics, multimedia production, web development, Internet exploration and collaboration, and office productivity. Students also have access to a large number of bibliographic databases and commercial information services.

The School also has a dedicated information science research facility at the Roosevelt Commons Building. The research space comprises 7,000 square feet of offices, workstations, research labs, and meeting spaces.

- Honors Options Available: With College Honors; With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). Distinction (Departmental Honors). See adviser for requirements.
- Research, Internships, and Service Learning: Internships are encouraged, but not required. Students participate in a variety of internships, paid and non-paid. A significant number of students also work part-time in Informatics or technology-related positions, and participate in public service.

Informatics students are extensively engaged in faculty research and internships. A significant percentage of informatics students participates in the University's Undergraduate Research Symposium each year. Students have co-authored publications with faculty, had their research accepted for presentation at national conference poster sessions, and been recognized with various awards, including the Mary Gates Research Training Endowment for three consecutive years (2001-03).

- School Scholarships: The Henry Scholarships, in the amount of approximately $\$ 1500$ each, are awarded to three second-year majors in recognition for academic achievement, leadership, and service to the School and in professional/student activities. Students to be considered for the award are nominated by the Information School faculty and Undergraduate Program Committee members. The merit-based awards, named after the founder of the school and first director, William Henry, are intended to recognize and honor student achievement.
- Student Organizations/Associations: Undergraduates participate in a number of the School's many student or ganizations, including the UW Informatics Undergraduate Association (IUGA) and the student chapter of the American Society of Information Scientists and Technology (ASIST).

## Of Special Note:

Capstone Projects: Students often use their capstone projects to identify interest areas, develop skills, and prepare for future pursuits. Through capstone projects, students demonstrate the skills, understanding, and competencies they can successfully use to prepare for employment and graduate studies.

Information Sessions: Prospective students are encouraged to attend an Informatics information session. For a schedule of information sessions, visit the School website at ischool.uw.edu/informatics/prospective/more_info.

## GRADUATE PROGRAMS

The School offers graduate programs leading to the Master of Library and Information Science (MLIS), the Master of Science in Information Management (MSIM), and the Doctor of Philosophy (PhD) in Information Science

## Master of Library and Information Science

mlis@uw.edu

## Admission Requirements

The MLIS program is offered in two delivery modes: residential (on-campus, two-year program) and distance (online with quarterly residencies, three-year program). When applying, applicants must indicate for which program they are applying. Applications should also include:

1. A current resume highlighting any relevant work experience, volunteer activities, and honors, awards, and presentations
2. Three letters of recommendation
3. Personal statement of educational and professiona goals and responses to two supplemental questions
4. Official transcript from each relevant institution at tended
5. GRE Scores. Applicants with an earned doctorate (PhD, MD, JD) are not required to submit GRE scores.
6. TOEFL score (for international students)

## Degree Requirements

63 credits, as follows:

1. Core curriculum (34 credits): LIS 500 (2), LIS 510 (4), LIS 520 (4), LIS 530 (4), LIS 540 (5), LIS 550 (4), LIS 560 (3), LIS 570 (4), LIS 580 (4)
2. Electives ( 29 credits)
3. Portfolio or Thesis Option: MLIS students must complete either a portfolio or thesis in order to graduate.
4. Directed Fieldwork: LIS 590 (2-4, max. 8) is an elective course designed to provide students an opportunity to work in an information environment under the supervision of an experienced professional mentor.

## Master of Library and Information Science, Law Librarianship

The Law MLIS program is designed to prepare lawyers with an existing JD degree to serve as law librarians in courts, federal and state units of government, law schools, corporations, and law firms.

## Admission Requirements

1. A current resume highlighting any relevant work experience, volunteer activities, and honors, awards, and presentations
2. Three letters of recommendation
3. Personal statement of educational and professional goals and responses to two supplemental questions
4. Official transcript from each relevant institution attended
5. Earned JD prior to enrollment in the MLIS program
6. TOEFL score (for international students)

## Degree Requirements

44 credits, as follows:

1. Core curriculum (23 credits): LIS 500 (2), LIS 510 (4), LIS 520 (4), LIS 530 (4), LIS 540 (5), LIS 550 (4)
2. Law librarianship courses (17 credits): LIS 591 (3), LIS 592 (3), LIS 593 (3), LIS 594 (4), LIS 595 (4)
3. Directed fieldwork: LIS 590 (4)

## Master of Science in Information Management

MSIM Adviser
470 Mary Gates Hall, Box 352840
(206) 543-1794
msim@uw.edu

## Admission Requirements

1. A current resume highlighting any relevant work experience, volunteer activities, and honors, awards, and presentations
2. Three letters of recommendation
3. Personal statement of educational and professional goals
4. Official transcript from each relevant institution attended
5. GRE or GMAT scores. Applicants with an earned doctorate (PhD, MD, JD) are not required to submit GRE or GMAT scores.
6. TOEFL score (for international students)

## Degree Requirements, Day Option

65-71 credits, to include:

## 1. Core curriculum:

a. Foundational core courses: IMT 480 (4), IMT 440 (15, max. 5), IMT 500 (1)
b. Technology core courses: IMT 540 (4), IMT 541 (5), IMT 542 (3)
c. Management core courses: IMT 580 (4), IMT 581 (3), IMT 582 (4)
d. Integrating core courses: IMT 598 (3), IMT 595 (3-5)
2. Electives ( 24 credits): Beyond the required core courses, students have the option of crafting a program of study, in collaboration with their faculty adviser, specific to their interests and career goals. MSI.M. course electives include, among others, principles of information retrieval systems, strategic planning and evaluation, and marketing foundations for information professionals.
3. Internship: MSIM internships are structured around a course (IMT 590) and are designed to provide students an opportunity to work in an information environment under the supervision of an experienced professional mentor. During the internship placement (lasting a minimum of two academic quarters), the student works to meet meaningful learning objectives that have been mutually defined by student and internship supervisor.

## Degree Requirements, Executive Option

47-53 credits, to include:

1. Core curriculum:
a. Foundational core courses: IMT 480 (4), IMT 440 (15, max. 5), IMT 500 (1)
b. Technology core courses: IMT 540 (4), IMT 541 (5), IMT 542 (3)
c. Management core courses: IMT 580 (4), IMT 581 (3), IMT 582 (4)
d. Integrating core courses: IMT 598 (3), IMT 595 (3-5)
2. Electives: Students complete a minimum of 11 credits of electives, which includes advanced MSIM courses, relevant upper-level coursework in other academic disciplines, or an independent study (IMT 600).

## Doctor of Philosophy in Information <br> Science

PhD Adviser
470 Mary Gates Hall, Box 352840
(206) 543-1794
ischoolphd@uw.edu

## Admission Requirements

90 credits minimum, to include:

1. Current curriculum vitae highlighting any academic and/ or work experience, honors, publications, presentations, and research experience
2. Three letters of recommendation
3. Personal statement of educational and professional goals
4. Official transcript from each relevant institution attended
5. GRE Scores. Applicants with an earned doctorate (PhD, MD, JD) are not required to submit GRE scores.
6. TOEFL score (for international students)

## Degree Requirements

90 credits minimum, to include:

1. Required courses: INSC 501 (3), INSC 570 (4), INSC 572 (5), INSC 500 (2); two research practica; two teaching practica; at least one of the following quantitative methods courses: BIOST 502 (4), BIOST 517 (4), COM 520 (5), CS\&SS 507 (3), PSYCH 524 (4)
2. Additional elective coursework selected in consultation with faculty advisers
3. 18 graded credits in courses at the 500 level and above (taken prior to general examination)
4. 60 credits taken prior to general examination
5. 27 dissertation credits (INSC 800)
6. Preliminary review determined by a Schoolbased advisory committee at the end of the required first-year of full-time study
7. General examination upon completion of coursework and practica components to attain formal candidacy for the PhD program (candidate's certificate)
8. Successfully defend a dissertation before a Supervisory Committee (final examination)

## Financial Aid

The University of Washington Financial Aid Office administers a variety of government and University funded financial aid programs for which applicants must submit the Free Application for Federal Student Aid form (FAFSA). For more information, contact the UW Financial Aid Office, 105 Schmitz Hall. Information on the FAFSA is also available online.

## Graduate Assistantships and Scholarships

Financial aid options for full-time students may include graduate assistantships and scholarships. Graduate assistants generally work 220 hours per quarter, and receive a tuition waiver as well as a monthly salary and medical benefits. Prospective MLIS and MSI.M. students are encouraged to apply during the admission process and throughout the year as other positions become available. Visit the Student Employment Opportunities page at ischool. uw.edu/jobs/students to apply for open positions. PhD students are automatically considered for graduate student service appointments.
MLIS scholarships are awarded on a basis of financial need, based on information from the Free Application for Federal Student Aid (FAFSA), and academic merit.
Information regarding additional sources of financial aid, from sources outside the Information School, is available at the Information School Financial Aid Resources web page.

## Special Research Facilities

Located on the third and fourth floors of Mary Gates Hall, one of the University's high-technology buildings, the School offers an extensive software collection, a state-of-the-art computer classroom, an innovative Technology Exploration (TE) Lab, and excellent network connectivity. Students have access to software applications including titles for database and text management, programming, graphics, multimedia, Web development, Internet exploration and collaboration, and office productivity. Students also have access to a large number of bibliographic databases and commercial information services.

The School also has a dedicated information science research facility at the Roosevelt Commons Building. The research space comprises 7,000 square feet of offices, workstations, research labs, and meeting spaces.
For more information, please visit the School's website at www.ischool.uw.edu/resources/technology/help.

## Continuing and Professional Education

The Information School works with University of Wash ington Educational Outreach to offer classes, workshops, and certificate programs for continuing education and professional development. Current certificate programs include web technology solutions; information assurance and cybersecurity; and school library professional. Those interested in continuing education or certificate programs should contact UW Professional \& Continuing Education, 4311 11th Avenue NE, Box 354978, University of Washington, Seattle, WA 98105. Phone: (206) 543-2320 or see www.pce.uw.edu/.

## COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations.

## Informatics

INFO 100 Fluency in Information Technology (5) QSR Introduces skills, concepts, and capabilities necessary to effectively use information technology. Includes logical reasoning, managing complexity, operation of computers and networks, and contemporary applications such as effective web searching and database manipulation, ethical aspects, and social impacts of information technology. May not be taken for credit if credit earned in CSE 120. Offered: jointly with CSE 100.

INFO 101 Social Networking Technologies (5) I\&S/NW Explores today's most popular social networks, gaming applications, and messaging applications. Examines
echnologies, social implications, and information structure. Focuses on logic, databases, networked delivery, identity, access privacy, ecommerce, organization, and retrieval.
INFO 200 Intellectual Foundations of Informatics (5) I\&S Information as an object of study, including theories, concepts, and principles of information, information seeking, cognitive processing, knowledge representation and restructuring, and their relationships to physical and intellectual access to information. Development of information systems for storage, organization, and retrieval. Experience in the application of theories, concepts, and principles.

INFO 320 Information Needs, Searching, and Presentation (5) Introduction to information needs, database and information organization and structure, web and database searching and browsing, and information presentation. Examination of underlying principles in knowledge representation, indexing, record structures, online search process, search strategies and tactics, assessment of user needs, reference interviewing, post-processing, organization and presentation of information.
INFO 330 Information Structures (5) Introduction to the concepts and methods used to analyze, store, manage, and present information and navigation. Equal weight is given to understanding structures and implementing them. Topics include information analysis and organization methods, XML, and metadata concepts and application.

INFO 340 Database Management and Information Retrieval (5) NW Theories and models in system-centered approaches to information retrieval and database management. Information retrieval and database management systems include text and multimedia databases, web search engines, and digital libraries. Issues in system design, development and evaluation, and tools for searching, retrieval, user interfaces, and usability.

INFO 341 Computer Networks and Distributed Applications (5) NW Basic concepts of local and wide-area computer networking including an overview of services provided by networks, network topologies and hardware, packet switching, client/server architectures, network protocols, and network servers and applications. Also addresses management, security, authentication, and policy issues associated with distributed systems. Prerequisite: CSE 142.
INFO 343 Web Technologies (5) Explores the best practices of usability and accessibility of design, styling of visual content and scripting to support interactivity including client-side protocols, markup, technologies and algorithms for building effective pages, sites, and web presentations. Prerequisite: CSE 142.

INFO 344 Web Tools and Development (5) Introduction to fundamental web technologies with an emphasis on scripting and programming. Includes both client and server technologies. Examines effective information architecture for websites, information presentation on web pages, privacy policies, and web security. Prerequisite: CSE 142; INFO 343.
INFO $\mathbf{3 6 0}$ Design Thinking (5) I\&S Introduces design methods for identifying user needs, devising new design concepts, prototyping these concepts, and evaluating their utility and usability. Introduces the theory and practice of user-centered design. Examines methods for identifying users' needs, understanding users' behaviors, envisioning and prototyping new systems, and evaluating the usability of systems. Emphasis on incorporating people in the design process from initial field observations to summative usability testing.

INFO 380 Information Systems Analysis and Management (5) Examines the evolution of how information is defined and managed in order to add value to organizations. Views information management and the CIO as key facilitators in creating or improving relationships, processes, competitiveness, products, and services.
INFO 424 Information Visualization and Aesthetics (5) VLPA Examines the visualization of information: the effects of human perception, the aesthetics of information design, the mechanics of visual display, and the semiotics of iconography. Examples may include census, epidemiological, crime, earth satellite, and medical data in the contexts of special computer applications, user populations, and cultures. Prerequisite: CSE 143.

INFO 430 Knowledge Organization and Representation (5) Advanced study of knowledge organization using classificatory structures and creation of metadata element sets for representation. Conceptual and practical foundations for creating systems for information organization and representation. The creation, application, and use of a variety of systems and techniques for information organization and representation. Prerequisite: INFO 200; INFO 330.

INFO 431 Metadata Design (3) Explores principles of metadata schema and application profile design and implementation using XML technologies. Examines syntactic and semantic interoperability among diverse schemas and application profiles. Prerequisite: INFO 330; INFO 340.
INFO 432 Ontology Design (3) Covers concepts and technologies supporting semantic interoperability among different metadata and ontologies including topic maps, RDF, schema, and Web Ontology Language (OWL). Includes advanced semantic modeling of complex data. Prerequisite: INFO 431.
INFO 444 Value-Sensitive Design (5) Introduction to value-sensitive design (VSD), information system design that accounts for human values in a principled and comprehensive manner. Examination of existing systems from a VSD perspective. Explores VSD research methods including conceptual, technical, empirical investigations. Key values include accountability, autonomy, consent, privacy, property, trust, sustainability. Prerequisite: CSE 373.
INFO 445 Advanced Database Design, Management, and Maintenance (5) Advanced perspectives on DBMS theory, architecture, and implementation. Conceptual, logical, physical modeling. Index structures, query optimization and performance tuning, relational algebra, transaction processing, and concurrency control. Operational databases, decision support systems, and data warehousing. Projects in database implementation and integration. Social implications of large distributed database systems. Prerequisite: INFO 340.

INFO 446 Advanced Search Engine Systems (5) Focus on design, development, and evaluation of search engines. Theories and models in information retrieval for text and multimedia databases, web search engines, recommendation systems, and digital libraries. Topics include language issues, data-mining, machine learning, user-profiling, visualization, user interfaces, usability. Coursework involves analytical comparisons of search engines. Prerequisite INFO 340.

INFO 447 Computer Supported Cooperative Work (5) I\&S Focuses on design and use of collaboration technologies to communicate, share information, and coordinate activity. Emphasis on behavioral and social aspects of adopting and using these technologies. Topics include the history of work in this and related fields, collaboration support for teams, organizations, and communities.

INFO 450 Information Ethics and Policy (5) I\&S Provides a framework for analyzing the ethical, legal, economic, and socio-political issues surrounding information, information technologies, and the information industries. Explores policy and ethical issues of information access and control including; intellectual property, file sharing, free speech, privacy, and national security.
INFO 454 Information Policy: Domestic and Global (5) I\&S National and international information policy: public and private sector policy in terms of privacy, access, and exploitation; technology infrastructures and policies supporting the information industries; digital convergence and the emerging mega-industries.
INFO 461 Cooperative Software Design (5) Introduces the theory and practice of cooperative user-centered software design, applying fundamental theories and techniques from social psychology, computer-supported collaborative work, and software engineering. Prerequisite: INFO 360.

INFO 463 Input and Interaction (5) Introduces input and interaction techniques for desktop, mobile, and other computing environments. Combines motor and perceptual psychology, interaction design, and input devices and software in the study of human-computer systems. Emphasizes using human performance models in inform the design of new interaction techniques. Prerequisite: INFO 360.
INFO 470 Research Methods in Informatics (5) Introduction to the research methods used in informatics for understanding technology, information, and human behavior. Methods incorporate those from design, engineering, and social science. Topics include science and invention, research contribution types, research through design, theory, ethics, and quali tative/quantitative empirical methods. Prerequisite: either STAT 220, STAT 311, or QMETH 201.

INFO 481 Project Management in Informatics (4) Introduces project management principles within the context of Informatics. Provides knowledge that manag ers need to implement information systems on time and within budget. Concentrates on methods and issues in organizing, planning, and controlling projects, and the use of computer-based project management tools.
INFO 490 Project Capstone I (4) Student-driven team project including definition of an information problem, a method of investigation, creating of a project proposal, and completion of project deliverables. Prerequisite: INFO 360; INFO 470; INFO 481.

INFO 491 Project Capstone II (4) Includes design and implementation of a system or development of a research question intended to solve an information problem. Incorporates stakeholder and peer feedback, creation of project deliverables, presentation of the project in a public forum, and final assess ment. Prerequisite: INFO 490.
INFO 495 Internship in Informatics (1-5, max. 12) Internship in the private or public sector, as approved by faculty member. Work jointly supervised by faculty member (or approved academic sponsor) and an onsite work supervisor.
INFO 498 Special Topics in Informatics (1-5, max. 15) Various topics in informatics.

INFO 499 Independent Study (1-5, max. 15) Readings, design projects, or research under faculty supervision.

## Information Management and Technology

IMT 500 The Information Management Framework (1) Overview of the major concepts in the MSIM cur-
riculum. Includes an introduction to the concept of information as well as its relation to organizational management, technology, and design and culture.

IMT 501 Teamwork for Information Professionals (1) Introduces the theory and skills that support functional working groups, preparing students to work together effectively in the classroom and the workforce. Major topics include: theoretical perspectives on teams; processes and structural characteristics that influence team effectiveness; dynamics of individual behavior and interpersonal relationships in team interactions; and team leadership.

IMT 502 Effective Written Communications for Information Professionals (1) Provides the theory and skills necessary to communicate in writing in a manner that will accomplish the writer's goals. Major topics include: basic communication theory; effective organization; use of visuals; making writing accessible; managing tone; and writing online.
IMT 503 Effective Oral Communications for Information Professionals (1) Provides the theory and skills necessary to make effective oral presentations that will accomplish the presenter's goals. Major topics include: basic communication theory; preparing effective presentations; presentation best practices; and nonverbal communication cues.
IMT 510 Human Aspects of Information Systems (4) Social, organizational, cognitive, behavioral, and contextual aspects of information, including basic concepts in human information behavior, conceptual and practical frameworks used to study human-information interaction, and social responses to information technology. User-based and work-based evaluation and design of information systems. Exposure to experimental and interview methodologies.

IMT 520 Information Services and Resources (4) Concepts, processes, and skills of information involving creation, production, distribution, selection, collection, and services to facilitate access. Analysis of the information mediation process, including determining information needs; searching for, evaluation, and presentation of appropriate results; and modalities for delivery of services.

IMT 525 Information Management and Technology in Sports (3) Explores the information perspective, including the role and the use of information, information management, and information technologies applied to the sports context. Examines modern and emerging information management and technology systems and their design and use in administering intercollegiate athletic functions.
IMT 530 Organization of Information Resources (4) Introduction to issues in organization of information and information objects including analysis of intellectual and physical characteristics of information objects; use of metadata and metadata standards for information systems; theory of classification, including semantic relationships and facet analysis; creation of controlled vocabularies; and display and arrangement.

IMT 540 Design Methods for Interaction and Systems (4) Introduction to the theory and practice of user-centered design. Examines design methods for identifying and describing user needs, specifying and prototyping new systems, and evaluating the usability of systems. Examines design methodologies such as contextual design and value-sensitive design, giving specific emphasis to human-information interaction. Prerequisite: permission of instructor.

IMT 541 Enterprise Information Systems Analysis and Design (4) Theoretical and practical examination of information systems analysis and design processes as they apply in the workplace. Explores techniques for
assessing system and technology needs, defining in formation and work specifications, process and data modeling, and stakeholder analysis process; and input and output design, database design, test plans and implantation strategies in the design process.

IMT 550 Policy, Law, and Ethics in Information Management (3) Select concepts, processes, and issues related to the organizational contexts within which information professionals practice. Topics include information as public/private good, intellectual property, privacy, confidentiality, information liability, and information policy. Focus on contemporary issues affecting the role of the information manager.
IMT 551 Foundations of Organizational Information Assurance (3) Examines concepts, elements, strategies, skills related to the life cycle of information assurance - involving policies, practices, mechanisms, dissemination, and validation - that ensure the confidentiality, integrity, and availability of information and information systems. Analysis of the information assurance planning process, including determination and analysis of information assurance organization goals, the threat spectrum, risk, and legal and ethical issues.

IMT 552 Information Assurance Risk Assessment and Management (3) Examines the concepts, processes, and skills related to risk management in information assurance involving risk assessment, risk analysis, and mitigation planning. Analysis of the risk management process through several structured approaches that facilitate information assurance decisionmaking. Prerequisite: IMT 551.

IMT 553 Establishing and Managing Information Assurance Strategies (3-5) Applies and combines information assurance concepts, processes, and skills to solve case studies from practitioner experiences and explore the role of policy in creating a successful information assurance program. Prerequisite: IMT 551, IMT 552.

IMT 554 Information Economics (3) Theoretical and practical examination of how information economics impacts design decision in the context of information systems and information organizations. Explores issues of how information is priced, commoditized, exchanged, and preserved in economic transactions. Exposes students to how strategic decisions within organizations are made through concepts such as information and strategic games, information signaling, information strategies, information-based network economics, and information incentives.
IMT 570 Analytic Methods for Information Professionals
(4) Sharpens critical thinking processes by studying and applying scientific methods to problem solving in the information management area. Provides a framework to resolve information management research problems, interpret research findings, and to understand the interaction among the various parts of the research process.
IMT 580 Management of Information Organizations (4) Introduction to internal and external management issues and practices in information organizations. Examines key topics drawn from the fields of organizational theory and behavior, including planning and decision-making, organizational structure, leadership, and motivation. Reviews strategic and operational issues including human and organizational issues related to technology introduction, use, and management.

IMT 581 Information and the Management of Change (3) Practical application of the critical roles and aspects of information and information processes in the management of organizational change. Topics include organization learning, knowledge management as a process, business process change, change project
management, business/competitive intelligence benchmarking, and best practices. Prerequisite: IMT 580.

IMT 582 Strategic Information Initiatives (4) Studies and applies strategic information initiatives within an or ganization, including: readiness assessment, organizational mandates, information inventories, content management, information audits, and information architecture initiatives. Focuses on building business cases for and leading information initiatives in organizations.
IMT 583 Finance and Accounting Foundations for Information Professionals (3) Introduction to financial accounting, including the principles of double-entry accounting, balance sheets, income, and cash flow statements. Covers key financial ratios and their use for various analytical purposes, along with the elements of a financial plan or budget.

IMT 584 Marketing Foundations for Information Professionals (3) Introduction to the principles of marketing. Looks at how to assess an environment from a marketing perspective, consumer and business behavior, market segmentation, product/service strategies, new product development processes, pricing channels, retail/wholesale, marketing communication, and direct selling.
IMT 585 Human Resource Management Foundations for Information Professionals (3) Introduction to human resource management for information professionals. Covers the principles of job analysis, employee selection, interviewing, training, and appraisal.

IMT 586 Information Dynamics I (4) Introduction to the concepts and methods of information feedback, systems thinking, soft systems methodology (SSM), and "soft operations research," as well as the quantitative modeling of complex dynamic systems by means of differential and integral equations (system dynamics). Offered: jointly with INSC 586.

IMT 587 Principles of Information Project Management (4) Introduces project management principles within information-related business contexts. Provides knowledge that managers need to implement information systems on time and within budget. Concentrates on methods and issues in organizing, planning, and controlling projects, and their use of computer-based project management tools.

IMT 588 Enterprise Project Management in Information Organizations (4) Explores roles, responsibilities, and methods of managing enterprise projects. Analyzes critical issues such as the relationship between project management and organizational culture, struc ture, and processes; cross-functional and globally distributed teams; project governance, metric, and risk and performance management; communication, decision-making, and conflict resolution; and organizational learning, change, and knowledge management. Prerequisite: introductory coursework in project management or permission of instructor. Offered: jointly with INSC 588.
IMT 589 Special Topics in Information Management (1-4, max. 12) Special study and research in topics of current concern to faculty and students.
IMT 590 Internship in Information Management (1-4, max.
12) Supervised internship. May be taken in as many as six consecutive quarters. Prerequisite: enrollment in the MSIM program

IMT 598 Emerging Trends in Information Management and Technology (3) Focus on emerging trends in information management and information technology. Atten tion given to their impact on the functions of the chief information officer and others managing the acquisition, retention, use, and disposition of information and the enabling technologies. Exploration of meth-
ods and resources for trend discovery and tracking. Prerequisite: permission of instructor.
IMT 600 Independent Study or Research in Information Management (1-4) Supervised independent study or research. May be taken in as many as six consecutive quarters. Prerequisite: enrollment in the MSIM program.

## Information School Interdisciplinary

INFX 501 Concepts in Algorithmic Thinking for Information
(1) Presents programming concepts in the context of information science including the concepts of the algorithm, data storage, expressions, syntax, logic, objects, commands, and events. Introduces the algorithmic manipulation of information objects, and the mindset and methods of computer programming and application development. Credit/no-credit only.
INFX 502 Database Concepts for Information Professionals (1) Introduces the terminology and concepts of working with relational database management systems. Emphasizes working with tables and extracting information from data using Structures Query Language (SQL) commands and tools. Credit/no-credit only.
INFX 503 Website Design Concepts for information Professionals (1) Introduces the context and construction of websites presenting an integrated understanding of web design principles, information behavior, and technical skills. Emphasizes the roll of markup in information display and organization, the development of large sites, web strategy, and site construction. Credit/no-credit only.
INFX 504 Networking and Network Applications for Information Professionals (1) Introduces the concepts, terminology, and technologies of digital networks, including how networks operate and the influence networks have on the workplace and society. Includes preparation to think critically about the impacts of networking technologies on organizations, work groups, and information systems. Credit/no-credit only.
INFX 505 Project Management Basics for Information Professionals (1) Introduces the terminology, concepts, and skills used in working with project management and project management software. Emphasizes developing, refining, and monitoring work schedules using software tools.
INFX 508 Reading Seminar (2) Discusses theoretical works and contemporary research in areas related to information science, information management, or information technology and design. Introduces students to the intellectual traditions that underlie the field. Credit/no-credit only.
INFX 531 Metadata Design (3) Design principles of metadata schemas and application profiles - implementation of interoperable application profiles using XML technology. Focuses on achieving syntactic and semantic interoperability among diverse metadata schemas and application profiles. Prerequisite: either LIS 530 or IMT 530; INFX 542; or permission of instructor.

NFX 532 Ontology Design (3) Studies semantic interoperability among different metadata schemas and ontologies. Elaborates on concepts and technology related to Topic Maps, RDF Schema, and Web Ontology Language (OWL) to achieve advanced and semantic data modeling of complex data that exist in the real world. Prerequisite: INFX 531 or permission of instructor.

INFX 538 Metadata Design Studio (4) Principles, skills and practices in the conceptualization and implementation of metadata systems with a focus on semantic web. Project-based exploration of domain and
abstract data modeling, attribute/value space definition, and machine encoding decision. Prerequisite: either LIS 530 or IMT 530; INFX 542; or permission of instructor.
INFX 542 Information Structures Using XML (4) Introduces the concepts and methods used to analyze, store, manage, and present information and navigation. Equal weight given to understanding structures and implementing them. Topics include information analysis and organizational methods as well as XML and metadata concepts and application. Prerequisite: INFX 503.

INFX 543 Relational Database Management Systems (4) Introduction to relational database design and development theory, concepts, and skills, including traditional transactional database theory, architecture, and implementation in a user-centered systems context using SQL. Introduces database modeling, security, and privacy issues. Prerequisite: INFX 502 or permission of instructor.

INFX 544 Information Retrieval Systems (3) Introduction to theory and models in information retrieval and the systems for storage and retrieval of unstructured information. Examines information retrieval architectures, processes, retrieval models, query languages, and methods of system evaluation, methods and tools for document analysis, interfaces, and usability.
INFX 546 Data Communications and Networking (4) Covers local and wide-area computer networking including topologies and hardware, packet switching, client/server architectures, network protocols, and network servers and applications. Also addresses server operating systems, management, security, authentication, and policy issues associated with distributed networks.
INFX 563 Advanced Relational Database Management Systems (4) Advanced relational database design and development theory using SQL, concepts, and skills. Topics include advanced T-SQL; backup and recovery; and triggers and reporting services. Prerequisite: INFX 501; INFX 543.
INFX 571 Research Seminar (2-4, max. 10) Students work in teams under the supervision of individual faculty members to engage in research or design activities and learn through hands-on participation and study. Learning activities include data collection, data analysis, building prototypes, testing or evaluation, or dissemination activities.
INFX 594 Degree Research Project (3) Includes analysis, design, completion, documentation, and presentation of a faculty-defined individual or group research project demonstrating professional-level knowledge and skills. Meets culminating experience master's degree requirement. Credit/no-credit only. Prerequisite: completion of 30 credits and adviser approval of an MLIS degree plan or completion of 38 MSIM core credits.
INFX 595 Capstone I - Project Planning (2) Analysis and preliminary design of an approved individual or group research or implementation project demonstrating professional-level knowledge and skills. Credit/ no- credit only. Prerequisite: either completion of all MSIM core courses or completion of 30 credit hours and advisor approval of an MLIS degree plan.

INFX 596 Capstone II - Project Implementation (3) Implementation of a project demonstrating professionallevel knowledge and skills based on a project plan developed in INFX 595. Prerequisite: INFX 595.
INFX 598 Special Topics (1-4, max. 30) Introduces innovation and specialized topics relating to the study of information in any context.

## Information Science

INSC 500 Faculty Seminar (2) Presentations by faculty concerning research projects in which they are involved.
INSC 501 Theoretical Foundations for Information Science (3) In-depth exploration of the philosophical, theoretical, methodological, and historical foundation of information science and the study of information.

INSC 512 Community Analysis (4) Explores key concepts of community in its broadest sense, methodological approaches for analyzing information needs and available resources, how to design information services in response to identified needs, and service evaluation. Facilitating the information behavior of all groups within a community and identifying how their needs interconnect. Prerequisite: LIS 510. Offered: jointly with LIS 512.
INSC 518 Seminar in Human Information Interaction (4) Investigates conceptual frameworks, assumptions, analytical tools, concepts, models, and theories in human information interaction (HII). Topics may include theories of information behavior, information behavior in everyday life, social informatics, HII in organizations, or personal information management. Previous readings in HII preferred. Prerequisite: permission of instructor.
INSC 535 Classification Theory (3) Survey of classificatory principles from bibliographic, philosophical, so-cio-cognitive, and linguistic perspectives. Overview of history of bibliographic classification and exploration of some existing bibliographic classification systems. Ramification of theoretical approach for classification practice. Prerequisite: LIS 530. Offered: jointly with LIS 535.
INSC 538 Seminar in Information Organization (4) Seminar on information organization, focusing on any area of information organization, including classification theory, metadata, document theory, information organization in information systems; social and political aspects of classification, controlled vocabularies, and cataloging history.
INSC 541 HCI Design Foundations for Interactive Systems (4) Develops knowledge and skills for design-based inquiry of interactive systems. Students practice user-centered design methods and study theories of human-computer interaction, including but not limited to: goal-based design and task analysis, scenar-io-based design, soft systems methodology, value sensitive design, universal design, and participatory design.
INSC 542 HCI Design Studio for Interactive Systems (4) Develops knowledge and skills for design-based inquiry of interactive systems. Includes a quarter-long project using appropriate methods and iteratively engages research, design, prototyping, and evaluation activities. Opportunity to reflect upon practice and receive critical review of work throughout the quarter.
INSC 543 Value Sensitive Design (4) Develops knowledge and skills to account for human values in design, development, and deployment of information systems. In-depth examination of value sensitive design theory, methods, and practice, including stakeholder project. Prerequisite: permission of instructor.

INSC 544 Information Retrieval System (3) Covers theories and models in information retrieval (IR) and reviews user-centered and system-centered approaches. Issues involved in the design, development, and evaluation of IR systems are examined including: methods and tools for document analysis, retrieval techniques, search engines, interfaces, usability, evaluation. Offered: jointly with LIS 544.

INSC 546 Assistive Technology and Inclusive Design (4) Examines interactive technologies for users with alternative skills or in alternative contexts. Covers universal design, inclusive design, and assistive technologies. Addresses needs of users with physical limitations, children/elders, users in developing nations, and mobile users.

INSC 547 Collaborative and Social Computing (4) Seminar on the design of collaborative and social computing systems. Introduces theories for analyzing collaborative on-line and face-to-face. Student apply a theoretical perspective through the design of a social or collaborative application. Application domains include blogging, tagging, on-line communities, social recommending, ubiquitous computing, and collaboration in domestic settings.
INSC 555 Information and Values (4, max. 12) Explores value systems within a range of different social and technological environments.
INSC 557 Cultural and Ethnic Dimensions in Information Science (4) Examines ethnic and cultural dimensions of information storage and transfer, knowledge creation and exchange, and information-related values in an increasingly global world. Readings from anthropology, cultural learning, cross-cultural communications, and ethnic traditions provide the basis for discussions about conducting research across culturally distinct communities. Prerequisite: permission of instructor.
INSC 561 PhD Colloquium on Professional Issue (1, max. 12) Covers topics relating to the professional concerns of doctoral students and their future lives as academics and researchers. Credit/no credit only.

INSC 565 Teaching Practicum I (3) Doctoral student participation in teaching in a faculty-taught course. Credit/no-credit only.

INSC 566 Teaching Practicum II (3) Doctoral student takes primary teaching responsibility for a course under supervision of a faculty liaison. Credit/no-credit only. Prerequisite: INSC 565.
INSC 570 Research Design (4) Introduction to empirical research, basics of theory construction and research design, types of research, ethical issues, instruments and techniques for descriptive research, measures of association. Employs an integrated (qualitative and quantitative) and focused approach.
INSC 571 Quantitative Methods in Information Science (5) Describes uses, characteristics, and theoretical bases of research methods and data analysis techniques used in quantitative research, emphasizing uses in information and library science. Topics include experimental design, descriptive and inferential statistics, the normal distribution, elementary probability, nonparametric statistics, and exploratory data analysis techniques. Prerequisite: INSC 570.

INSC 572 Qualitative Methods in Information Science (5) Principles and approaches to conducting qualitative research in information science, including how to design a qualitative study, role of context, methods of data collection and analysis, increasing the trustworthiness of data, minimizing observer effect, how to incorporate and build theory. Exposure to field research and data analysis. Prerequisite: INSC 570.
INSC 573 Design Inquiry and Methods in Information Science (5) Acquire theory, methods, and skills for design-based inquiry, focusing on making artifacts technical, informational, managerial, or organizational - and devising courses of action that enable people to mobilize. Students develop knowledge for design in Information Science through practical application of design methods and scholarly investigation of selected literatures.

INSC 575 Research Practicum I (3) Students work with a researcher from the Information School as an active member of a research team. Credit/no-credit only.

INSC 576 Research Practicum II (3) Students work with an approved researcher as an active member of a research team. Credit/no-credit only. Prerequisite: INSC 575 or permission of instructor.
INSC 578 Research Seminar (1-2, max. 15) Research presentations on a wide variety of topics in information science.
INSC 579 Research Colloquium in Information Science (2, max. 30) Research colloquium on various research topics in information science. Faculty, visitors, and students present current research. Credit/no-credit only. Prerequisite: permission of instructor.

INSC 581 Organizational Theories of Information Systems (4) Surveys major strands of management of information systems research. Covers the behavioral, economic, strategic, and technical research perspectives of MIS research.

INSC 586 Information Dynamics I (4) Introduction to the concepts and methods of information feedback, systems thinking, soft systems methodology (SSM), and "soft operations research," as well as the quantitative modeling of complex dynamic systems by means of differential and integral equations (system dynamics). Offered: jointly with IMT 586.
INSC 588 Enterprise Project Management in Information Organizations (4) Explores roles, responsibilities, and methods of managing enterprise projects. Analyzes critical issues such as the relationship between project management and organizational culture, structure, and processes; cross-functional and globally distributed teams; project governance, metric, and risk and performance management; communication, decision-making, and conflict resolution; and organizational learning, change, and knowledge management. Prerequisite: introductory coursework in project management or permission of instructor. Offered: jointly with IMT 588.
INSC 598 Special Topics in Information Science (1-5, max. 12)

INSC 599 Independent Study in Information Science (1-5, max. 15) Readings, design projects, or research under faculty supervision. Prerequisite: permission of instructor and Ph.D. program chair.

INSC 600 Independent Study or Research (*) Individual readings or study, including independent study in preparation for doctoral examinations, research, etc. Prerequisite: permission of Supervisory Committee or graduate program adviser.
INSC 800 Doctoral Dissertation (*)

## INFORMATION TECHNOLOGY APPLICATIONS

ITA 340 Introduction to Web Publishing (3) Introduction to markup languages and publishing web content. Students gain understanding of HTML coding and extensions, image manipulation, information architecture, and web site publishing. Other topics include: the Web Accessibility Initiative, survey of Graphical User Interface (GUI) HTML editors, online privacy and security, and eXtensible Markup Language (XML).
ITA 341 Client-side Scripting and Design (3) Introduction to web browser design environment, scripting languages, JavaScript, Document Object Model (DOM), and creation of dynamic HTML web pages (DHTML) in combination with Cascading Style Sheets (CSS). Other topics include: client-server architecture and web design principles in the contexts of technical feasibility, usability, and accessibility. Prerequisite: ITA 340.

ITA 342 Introduction to SQL and Data Storage Technologies (3) Fundamentals of database design in a clientserver architecture useful for web applications. Subsequent topics build upon foundation by introducing the Structured Query Language (SQL), open source tools MySQL and PHP for database processing, security issues in database applications, and XML as a alternate database storage technology. Prerequisite: ITA 341

ITA 343 Server-Side Programming and Web-data Integration (3) Provides framework to integrate server-side programming concepts and techniques, database technologies, and client-side scripting to design and implement dynamic web applications. Examines techniques using PHP, design and implementation of database (MySQL) connections, web application security, and XML data publication. Prerequisite: ITA 342.

## Library and Information Science

LIS 462 Skills Approach to Information, Communications, and Technology (ICT) Literacy (3) Introduction to the Big6 TM Skills approach to information, communications, and technology (ICT) literacy for personal, school, district, or higher education settings. Includes technology within the Big6 framework, connection to standards, instructional design, assessment, curriculum mapping, peer collaboration, the parent connection, program planning, and implementation.

LIS 498 Special Topics (1-5, max. 15) Library service and information science subject matter in seminars, workshops, or other appropriate formats. Topics vary and may be repeated for credit.
LIS 500 The Life Cycle of Information (2) Overview of the major concepts, processes and systems, actors, and operations in the life cycle of information. Introduction to the creation, publishing and distribution, evaluation and selection, organization, access, retrieval, and use of information. Exploration of the social context in which these processes and their stakeholders interact. Credit/no-credit only.
LIS 501 History and Foundations of Libraries and Librarianship (3) Introduces the history of libraries, major issues in contemporary library and information work, and types of libraries. Examines the role of libraries in society, the development of professional librarianship, and the role of librarians.

LIS 505 Archival and Manuscript Services (3) Selection, organization, and uses of archival and manuscript collections. Emphasis on the principles and techniques; some attention to the administration of state archival and historical institutions' collections. Lecture, demonstration, and laboratory.

LIS 507 Preservation and Conservation of Library Materials (3) Consideration of the many factors contributing to the physical vulnerability of library materials of all kinds and an overview of resources and strategies for those who determine preservation policy or manage the application of such policy. No technical back ground necessary.
LIS 508 History of Recorded Information (4) Exploration of the history and ongoing transformation of recorded information within three broad spheres of human life: public communication, administrative and commercial operation, and personal communication.
LIS 510 Information Behavior (4) Introduction to the user-centered approach to information behavior. Theoretical foundations of need, creation, seeking, sharing, assessment, management, and use. Synthesis of information behavior studies, performance of information behavior field research, and application of the results of information behavior studies
to design information systems, services, and policy. Prerequisite: LIS 500.
LIS 511 Systems Analysis (4) Introduction to the systems approach including basic concepts in the approach, dimensions of systems and steps in systems design. Emphasis is on the analysis, evaluation and design of information systems and services. Prerequisite: LIS 500.

LIS 512 Community Analysis (4) Explores key concepts of community in its broadest sense, methodological approaches for analyzing information needs and available resources, how to design information services in response to identified needs, and service evaluation. Facilitating the information behavior of all groups within a community and identifying how their needs interconnect. Prerequisite: LIS 510. Offered: jointly with INSC 512.
LIS 515 Ecological Information Systems (4) Introduction to cognitive work analysis framework. Prepares for active role in design and evaluation of information systems. Familiarization with basic concepts of cognitive systems engineering and practice in field study, data analysis, and transforming field findings into requirements for the design of an information system. Offered: jointly with HCDE 515.

LIS 517 Information Seeking Behavior in Ethnolinguistic Communities (3) Examines the role of culture and language in seeking and processing of information by ethnolinguistic groups. Examines behaviors of gatekeepers including exploration of the Gatekeeper Model and methodological considerations in conducting cross-cultural research into information seeking behavior. Develops appropriate service models for ethnolinguistic groups. Prerequisite: LIS 510.
LIS 520 Information Resources, Services, and Collections (4) Concepts, processes, and skills related to parts of the life cycle of knowledge involving creation, production, distribution, selection, collection, and services to facilitate access. Specific discussion topics include characteristics of recorded knowledge; organizations and services devoted to managing access to recorded knowledge; principles associated with development of recorded knowledge and collections. Prerequisite: LIS 500.
LIS 521 Principles of Information Services (4) Analysis of the information mediation process, including determination and analysis of information needs; searching for, evaluation, and presentation of appropriate results; modalities for delivery of services; and current and future techniques. Prerequisite: LIS 520

LIS 522 Collection Development (3) Access to materials as context for development and management of library collections in academic, public, school libraries. Community analysis, library mission; collection development policies, criteria, levels, responsibilities; aids to selection; collection evaluation, use studies; controversial materials.
LIS 523 Advanced Information Services (4) Investigation of the development, administration, and evaluation of information services for supporting the research process both within and across organizations. Prerequisite: LIS 521 or permission of instructor.
LIS 524 Adult Reader Services in the Public Library (3) Focuses on developing and performing readers' advisory services for contemporary adult fiction and non-fiction. Includes interpersonal and marketing skills necessary to promote reading including reading advocacy, readers' advisory interviewing, writing advisory annotations, presenting book talks, and conducting book discussion groups.
LIS 525 Genres for Adult Readers (3) Reviews characteristics of the most popular genres of fiction, including speculative fiction, mystery/thriller/suspense, ro-
mance, westerns, and graphic fiction/memoir. Helps to develop practice in book talking, preparing annotated booklists, and making reading suggestions to library users.
LIS 526 Government Publications (3) Introduction to government publications of the United States and their acquisition, organization, and use. Other topics covered include the public's right to know, the Federal Depository Library Program, government influences in our daily lives, and future directions in government information. Credit/no-credit only.
LIS 527 Business Information Resources (3) Survey of the extent and nature of business information and its sources, and of business information producers and consumers. Study and use of both print and on-line sources.

LIS 528 Health Sciences Information Needs, Resources, and Environment (3) Characteristics of users of health sciences information; health professionals, researchers, consumers and patients; environments (academic health sciences centers, hospitals, clinics, and public libraries); evaluation of information resources in health care; types and uses of health information management systems; policy issues, professional standards, education, and certification. Offered: jointly with MEBI 570.
LIS 530 Organization of Information and Resources (4) Introduction to issues in organization of information and documents including: analysis of intellectual and physical characteristics of documents; principles and practice in surrogate creation, including standards and selection of metadata elements; theory of classification, including semantic relationships and facet analysis; creation of controlled vocabularies; and display and arrangement. Prerequisite: LIS 500, which may be taken concurrently.
LIS 531 Catalogs, Cataloging, and Classification (4) Develops an understanding of library catalogs as information retrieval systems. Introduces library cataloging and classification. Focus on principles and standards in the creation of catalogs and cataloging records. Includes practice in descriptive and subject cataloging and classification. User perspective emphasized throughout. Prerequisite: LIS 500, LIS 530.
LIS 533 Advanced Cataloging and Classification (4) Indepth theory and practice in library cataloging and classification. Includes introduction to cataloging materials in a variety of formats. Prerequisite: LIS 500, LIS 530, and LIS 531.
LIS 534 Indigenous Systems of Knowledge (3) Conceptual foundations and comparative analysis of indigenous knowledge organization systems. Feasibility and use of contemporary knowledge organization mechanisms including thesauri and ontologies in expressing the cultures and artifacts of indigenous peoples. Prerequisite: LIS 530 or permission of instructor.
LIS 535 Classification Theory (3) Survey of classificatory principles from bibliographic, philosophical, sociocognitive, and linguistic perspectives. Overview of history of bibliographic classification and exploration of some existing bibliographic classification systems. Ramification of theoretical approach for classification practice. Prerequisite: LIS 530. Offered: jointly with INSC 535.
LIS 536 Indexing and Abstracting (3) Exploration of issues in subject representation. Survey of different approaches, techniques, and methods for representing the subject matter of documents, including an evaluation of the role of users and context in subject representation. Formulation of policies for indexing and abstracting services. Prerequisite: LIS 530.

LIS 537 Construction of Indexing Languages (4) Exploration of the design, construction, evaluation, and
maintenance of controlled indexing languages, in cluding studies of how users are integrated into the design process. Through completion of thesaurus construction project, prepares students to design index languages, plan and implement a design project, and evaluate indexing languages. Credit/no-credit only. Prerequisite: LIS 530.

LIS 550 Information and Society (3) Covers concepts, processes, and issues related to the larger social context within which the life cycle of information and knowledge in society are investigated. Discussion topics include codes of ethics, professionalization, privacy, freedom of expression, intellectual property, social inequalities, and quality of life. Prerequisite: LIS 500, which may be taken concurrently.

LIS 551 Intellectual Freedom in Libraries (3) Analysis of issues related to intellectual freedom, particularly to implications for libraries and librarians. Consideration of current legal climate, conformity versus freedom in modern world, librarian as censor, social responsibility and individual freedom, intellectual freedom of children, prospects for future. Credit/nocredit only.
LIS 554 Information Policy: Domestic and Global (5) National and international information policy: public and private sector policy in terms of privacy, access, and exploitation; technology infrastructures and policies supporting the information industries; digital convergence and the emerging mega-industries. Prerequisite: LIS 550 or permission of instructor.

LIS 560 Instructional and Training Strategies for Information Professionals (3) Develops knowledge and skills in instruction and training functions for library and information settings. Issues and strategies for learning and teaching. Design, development, and evaluation of information and technology literacy programs. Ad dresses the needs of users when designing and delivering instruction. Prerequisite: LIS 500, which may be taken concurrently.

LIS 561 Storytelling: Art and Techniques (3) Storytelling, past and present, noting its development as an art form. Analyzing storytellers materials (folk literature and literary forms) throughout historical periods. Essential techniques necessary to this artistic skill. Planning storytelling programs for various ages, interest groups, and situations, utilizing folk, classic, and contemporary literature.

LIS 565 Children's Materials: Evaluation and Use (4) Library materials for children from infancy through elementary grades. Focus on resources in all media that serve informational, educational, cultural, and recreational needs of the young. Focuses on standard bibliographies and other resources designed to meet informational needs of adults serving children Prerequisite: LIS 500, LIS 510, LIS 520, or permis sion of instructor.

LIS 566 Young Adult Materials: Evaluation and Use (4) An overview of materials reflecting adolescents' interest in media and addressing their educational, cultural, and recreational needs. Students evaluate print literature, electronic ad other non-print media for young adults. Content also designed to assist adult caregivers of adolescents. Prerequisite: LIS 500, LIS 510, and LIS 520 or permission of instructor.

LIS 567 Public Library Services for Youth (3) Administration of youth departments in public libraries; planning and promoting programs and services; evaluation of library collections; community and professional roles of the youth librarian. Prerequisite: LIS 500 or permission of instructor.

LIS 568 Information Literacy for Teaching and Learning (3) Explores theories, process, and practical applications of information literacy. Examines the develop-
ment of information literacy programs for libraries, community agencies, business, education or other information settings. Explores integral relationship between technology and information literacy, and continual evaluation

LIS 569 Special Topics in Instructional and Training Strategies for Information Professionals (1-5, max. 18) Introduction to innovative and specialized topics in instructional and training strategies for information professionals. Prerequisite: LIS 560.

LIS 570 Research, Assessment, and Design (4) Students recognize research and design opportunities, translate them into researchable frameworks, and conduct research in libraries and other information agencies. Covers problem definition, data collection and analysis, design and validation of alternative solutions, and reporting of results. Prerequisite: LIS 500, which may be taken concurrently.

LIS 580 Management of Information Organizations (4) Introduction to internal and external management issues and practices in information organizations. Internal issues include organizational behavior, organizational theory, personnel, budgeting, planning. External issues include organizational environments, politics, marketing, strategic planning, funding sources. Prerequisite: LIS 500, which may be taken concurrently

LIS 581 Marketing and Planning for Libraries (3) Approaches to planning and marketing library products/ services. Examines partnerships that can be forged between elements of marketing and appropriate futures strategies for libraries. Discusses marketing and planning as integrated processes with attention to short- and long-term goals and objectives. No particular library institutional setting is assumed. Prerequisite: LIS 500, which may be taken concurrently.
LIS 582 Strategic Planning and Management of Information Technology (3) Exploration of methods of strategic planning for managing information resources and technology to support online information services and the role of the systems librarian and CIO . Topics include mission and goals, strategic planning, the information technology function within organizations, and the desirable abilities of managers and leaders. Prerequisite: LIS 580.

LIS 583 Cross Cultural Approaches to Leadership (3) Explores alternative leadership models as reflected in the literatures of multiple cultures. Examines ethical dimensions of leadership in the context of complex relationships among the peoples and agencies that comprise the global environment. Uses imagination in the application of cross cultural forms of leadership. Prerequisite: permission of instructor.

LIS 584 Knowledge Management (3) Introduction to contemporary topics in management of knowledge creation and use in organizations. Discussion topics include knowledge generation, knowledge taxonomy, knowledge transfer, organizational knowledge management practice, and knowledge management systems. Prerequisite: LIS 500; LIS 580, or permission of instructor

LIS 585 Administration of the School Library Media Program (3) Develops competency in administering materials, equipment, and services of library media program as integral part of educational process of school. Focuses on developing skills in acquiring, organizing, and managing full range of learning resources for access and use, and communicating the program to users. Required for school library media specialists. Prerequisite: LIS 580.

LIS 586 Public Libraries and Advocacy (3) Examines the purpose and role of public libraries in an information society. Includes governance, services, and planning
with special emphasis on advocacy for the library and community.

LIS 587 Library Technology Systems (4) Developing criteria for selection and design of information technology systems for libraries and information centers. Applying criteria in evaluation of hardware and software. Examining related management challenges, such as vendor relations, financing options, personnel requirements, and design of auxiliary activities. Prerequisite: LIS 580.

LIS 588 Special Librarianship (3) Seminar in the practice of special librarianship in business and industrial firms, government agencies, and the free-lance sector. User services and information resources. Credit/ no-credit only. Prerequisite: LIS 580.

LIS 590 Directed Fieldwork (2-5, max. 8) Professional, supervised fieldwork in a library or professional information setting. Credit/no-credit only. Prerequisite: 30 credits in MLIS program

LIS 591 Legal Research I (3) Introduction to legal bibliography and law librarianship. Basic primary and secondary legal bibliographic tools. Integration of manual and computer resources for effective legal research. Emphasis on state materials. Offered: jointly with LAW A 598
LIS 592 Legal Research Methods (3/4) Legal tools that answer more complex legal research problems, such as federal legislative histories, sources of administrative law, specialized subject research. Federal emphasis. Builds on skills and techniques taught in LIS 591/LAW A 598. Extensive work with online resources. Prerequisite: LIS 591 or permission of instructor. Offered: jointly with LAW A 599.
LIS 593 Selection and Processing of Law Library Materials (3) Study of tools for collection development and collection development plans in law libraries. All law library technical processes, including acquisitions, budgeting, cataloging, and serials. Prerequisite: LIS 591 or permission of instructor.

LIS 594 Law Library Administration (4) Administration in law libraries, including organization, personnel, and management issues (e.g., interviewing, hiring, firing), communications, library planning, and bookkeeping. Credit/no-credit only. Prerequisite: LIS 591 or permission of instructor.

LIS 595 Current Issues in Law Librarianship (4-, max. 4) From a list of current topics in law librarianship, students select a topic, research it fully, write a major paper, and present their paper. Topics may include citation reform, ethics, and publisher practices. Credit/no-credit only. Prerequisite: Iaw librarianship majors or permission of instructor.

LIS 596 Professional Portfolio (3) Preparation and presentation of reflective working and presentation portfolios representing the student's goals, achievements, knowledge and skills, experience, and professional objectives. Development of plans for ongoing professional development. Prerequisite: completion of 30 credit hours and adviser approval of MLIS degree plan.

LIS 598 Special Topics in Information and Library Science (1-6, max. 18) Seminar dealing with various topics in information and library science. Offered by visitors or resident faculty. Topics are changed from quarter to quarter. May not be offered every quarter. Prerequisite: determined by specific course.
LIS 600 Independent Study or Research (*)
LIS 700 Master's Thesis (*)

## Interdisciplinary Graduate Degree Programs

These programs are administered by interdisciplinary groups of the Graduate School. Certain courses carrying the particular program prefix appear below; other courses with the same prefix appear elsewhere as indicated. Other courses included in these programs are selected from many disciplines throughout the University and carry the prefix of the respective discipline.

## Astrobiology

C319 Physics-Astronomy Building
Astrobiology -- the study of life in the universe -- investigates the wide range of multidisciplinary factors that may influence the origin and evolution of life on Earth and beyond. Such investigation demands intense interdisciplinarity, for which the astrobiology program at the University of Washington is creating a new community of scholars, investigators, and educators -- a community skilled in multidisciplinary methods and thinking that pushes boundaries beyond the commonplace with intellectual vigor, creativity, and rigorous methodology.

Astrobiology at the University of Washington builds on the strengths of traditional academic structure to transcend the limits of specialization through the synergy of multidisciplinary cooperation in both research and education.
The internationally recognized graduate certificate program offers a rigorous, interdisciplinary curriculum in cooperation with the PhD programs of participating departments. The program's unique features bond students and faculty from widely disparate departments. Participating graduate students gain the personal and professional skills necessary to successfully engage in multidisciplinary collaborations.

The emerging field of astrobiology benefits from and is shaped by the perspectives of multiple disciplines directed at a common problem. It benefits also from the breadth of perspective offered by diversity in culture and race among the program's participants.

## GRADUATE PROGRAM

Graduate Program Coordinator
C304 Physics-Astronomy, Box 351580
(206) 685-2392
office@astro.washington.edu

## Graduate Certificate Program

## Admission Requirements

UW academic departments participating in the Graduate Certificate Program in astrobiology provide expertise in the following primary collaborating disciplines: Aeronautics and Astronautics, Astronomy, Atmospheric Sciences, Biochemistry, Biology, Genome Sciences, Earth and Space Sciences, History (of Science), Microbiology, Oceanography.
Students wishing to participate in the astrobiology Graduate Certificate Program must be accepted for admission by the PhD program of one of these departments. Contact the appropriate participating department for PhD program application requirements and deadlines.

## Certificate Requirements

15 credits minimum, to include:

1. ASTBIO 501 (4), ASTBIO 502 (4)
2. Three astrobiology-only seminar series (1 credit)
3. One cognate course approved by the student's advisory committee to ensure sufficient breadth (see program Website for current list of cognate courses)
4. One quarter of a research rotation in an area outside the student's home discipline (3 to 10 credits)
5. Participation in a minimum of three workshops comprising the capstone experience (non-credit)
6. Astrobiology ethics seminar (variable credits)

Additional credits may be earned through:

- Other approved cognate courses
- Astrobiology public lecture series (1 credit)

Successful completion of the certificate requires a minimum cumulative GPA of 3.00 for all required courses and a grade of 2.7 or higher for each elective course.

## Biology Teaching

The Graduate School Biology Teaching Group offers an interdisciplinary program that leads to the degree of Master of Science in biology for teachers. Although designed specifically for biology teachers in K-12 schools and community colleges, other life science educators, such as those in environmental learning centers, may find the program especially worthwhile. The program emphasizes broadening the student's understanding of the various fields of biological science, with the improvement of the student's effectiveness as a teacher as the primary goal. Opportunities for coursework within the departments of the University in biological science and science education are provided. Each student is asked to perform an in-depth study of a biological science problem in the context of its relevance to the teaching of biological science. Facilities and guidance are provided by a sponsoring professor and advisory committee drawn from the Biology Teaching Group and the several biological science departments of the University.

## GRADUATE PROGRAM

Graduate Program Coordinator
222 Hitchcock, Box 355320
(206) 543-1689

## Master of Science

## Admission Requirements

1. Secondary teaching certificate or evidence of professional involvement in K-12 or public education
2. Bachelor's degree in biology or closely related field. Students in related fields must have adequate preparation in science.
3. Minimum GPA of 3.00 in the most recent 90 graded quarter credits ( 60 semester credits)
4. Graduate Record Examination test scores
5. Two or three letters of recommendation.
6. Statement of professional experience and objectives.

## Degree Requirements

36 credits, to include:

1. Minimum 18 credits at the graduate level: minimum 18 must be graded. These categories are not mutually exclusive.
2. All coursework must be at or above the 400 level.
3. Each student plans a program to meet his or her own educational objectives, selecting at least one course from
each of the following areas: botany, genetics, microbiology, zoology, and from the College of Education. One course in biochemistry is also required unless already completed in prior academic work. Courses in biomedical history, fisheries, forest resources, environmental studies, etc. may be appropriate for the student's interests. The Graduate Program Coordinator assists the student in this planning.

## Biomolecular Structure and Design

N107 Foege, Box 355061

## GRADUATE PROGRAM <br> Graduate Program Coordinator <br> G514 Health Sciences, Box 357420 <br> 206-543-5474

The department's graduate program is directed toward the education of doctoral students who anticipate careers that involve teaching or research in the biomedical sciences. Graduates from the program have a broad knowledge of biological structure at all levels, from the molecular to the human anatomical, with a major emphasis on the cellular level.

Graduate students select research and teaching options in their program. The research options are designed to provide training for a student in one or two of the following areas: cell and developmental biology, neurobiology, quantitative biology, cellular immunology, molecular biology, and macromolecular structure. Teaching options prepare the student to teach in one of the anatomical sub-disciplines: human anatomy, neuroanatomy/neurobiology, histology, embryology/developmental biology, cell biology, and macromolecular structure.

## Master of Science

## Admission Requirements

## 1. A minimum GPA of 3.00

2. A bachelor's degree in one of the following or a related area: chemistry, biology, physics, biochemistry, or biophysics.
3. GRE
4. The minimal course requirements for successful applicants are:
a. Chemistry: general, organic, and physical
b. Physics: one year
c. Mathematics: one year of calculus; multivariable calculus and/or linear algebra are strongly recommended
d. Biology and/or biochemistry: one year general biology plus one advanced course in biology or biochemistry
5. Undergraduate research experience is strongly recommended.
6. International students must have a minimum score on one test as follows: 7.0 IELTS; 92 TOEFL iBT; 237 TOEFLC; 580 TOEFL; 90 MLT.
7. International students hoping to study with BMSD faculty in the Chemistry Department must have a minimum score on one test as follows: 26 on the speaking portion of the TOEFL iBT; 7.0 on the speaking portion of the IELTS; 70 on the Versant English Test; 55 on the TSE; 230 on the SPEAK test administered at the UW

## Degree Requirements

36 credits, to include:

1. Required courses: BIOC 530; BMSD 540, BMSD 541, BMSD 542; BMSD 520 to be taken every quarter
2. 12 graded credits of elective courses covering at least three of the four BMSD categories of topics: biomolecular structure, techniques in biomolecular structure, molecular and cellular biology, and chemistry
3. At least one sequence of Biomedical Research Integrity workshops in the first or second year of the program. The Biomedical Research Integrity (BRI) Series is a sequence of lectures and workshops offered during summer quarter each year.
4. Teaching: In order to gain practical teaching experience, students in the program serve as teaching assistants for two quarters.
5. Research: Students rotate through a minimum of two and a maximum of three participating laboratories during their first year. The opportunity exists for students to do an early rotation during summer quarter.

## COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations.
BMSD 520 Research Seminar (1, max. 9) Group conferences on graduate student research. Prerequisite: BMSD graduate student or permission of instructor. Offered: AWSp.
BMSD 540 Literature Review (2) Emphasizes critical evaluation of original articles in literature from all fields relevant to biomolecular structure and design. Scientific writing and oral presentations emphasized. Concurrent registration in BIOC 530 required. Prerequisite: first-year BMSD student or permission of instructor. Offered: jointly with BIOC 540; A.
BMSD 541 Literature Review in Biomolecular Structure and Design (2) Emphasizes critical evaluation of original articles in literature from all fields relevant to biomolecular structure and design. Scientific writing and oral presentations emphasized. Prerequisite: first-year BMSD student or permission of instructor. Offered: W.

BMSD 542 Literature Review in Biomolecular Structure and Design (2) Emphasizes critical evaluation of original articles in literature from all fields relevant to biomolecular structure and design. Scientific writing and oral presentations emphasized. Prerequisite: first-year BMSD student or permission of instructor. Offered: Sp.

BMSD 599 Introduction to Research in Biomolecular Structure and Design (3-6, max. 24) Student works with one of the research groups within the Biomolecular Structure and Design program for one quarter and then rotates to another laboratory for one additional quarter. Minimum two quarters, maximum four. Prerequisite: BMSD student or permission of instructor. Offered: AWSpS.

## Environmental Management

## 274 Mary Gates Hal

The graduate certificate in Environmental Management (EM) is an interdisciplinary program designed to prepare students to contribute to sustainable utilization and enhancement of the natural and human environment. Through coursework, seminars, and a culminating two-quarters-long keystone project, students acquire the tools to solve real-world environmental problems via the three avenues of science, policy, and business. Keystone projects provide a unique opportunity for graduate students
to gain practical experience working in an interdisciplinary team with students from a variety of disciplines, a faculty mentor, and in collaboration with a community partner. The EM program provides education and training opportunities for a diverse array of graduate students preparing for management careers in the non-profit, for-profit, and public sectors, as well as for those who contribute legal, scientific, and technical expertise to environmental decision making -- locally, nationally, and internationally. Key benefits of the program include:

- Broadening knowledge, perspectives, and skills beyond the academic home discipline through core courses, keystone projects, and participation in a community of faculty and students from various departments that share the common goal of environmental stewardship and sustainability.
- Gaining practical experience crafting interdisciplinary solutions to real-world environmental issues and making connections with community partners outside the University.
- Receiving a printed certificate and record on the transcript from the Graduate School to document completion of the interdisciplinary program in Environmental Management.
The flexible curriculum is suitable for students from many backgrounds, such as engineering, physical and natural sciences, public policy, economics, geography, public health, and political science, to name a few. There is no other comparable interdisciplinary educational experience currently available to graduate students at the University of Washington.

## GRADUATE PROGRAM

Graduate Program Coordinator
274 Mary Gates Hall
Box 352802
(206) 221-6129
envirmgt@uw.edu

## Admission Requirements

1. Enrollment in a graduate and professional degree program in any school of the University of Washington.
2. Completion of a one-quarter upper-level or graduatelevel course in applied quantitative methods (e.g., microeconomics, numerical modeling, applied statistical methods) or pure quantitative methods (e.g., mathematics or statistics); or social or natural science.
3. Facility with written argument and communication. This skill is demonstrated in the letter of application.

The program is governed by the Steering Committee for Environmental Management.
The certificate's courses and projects prepare students to contribute legal, scientific, social science, and technical expertise to environmental decision making at the local, national, and international scales. Students are required to broaden their knowledge and skills base beyond their home discipline; to read material from other fields with critical facility; to understand and appreciate the goals and analysis methods common to other fields; and to appreciate, communicate with, and collaborate with experts from other fields, who have different perspectives and priorities.

## Certificate Requirements

Minimum 20 credits, to include:

1. Three core courses ( $9+$ total credits; courses vary by year)
2. Team-based keystone project (ENVIR 511, ENVIR 512, 4 credits each)
3. $3+$ credits of electives selected in consultation with the Graduate Program Coordinator and approved by the EM director

## Graduate School

## COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations.
GRDSCH 200 Preparing for Graduate Education (2) Explores graduate education and its structure and organization. Students use interactive assignments, individual reflective work, and professional portfolio development to explore their preparation for graduate education, and develop strategies for pursing graduate school. Credit/no-credit only.

GRDSCH 615 Teaching Assistant Preparation (1-6, max. 6) Department or University-wide training for teaching and research assistants. Credit/no-credit only.

GRDSCH 616 Research Assistant Preparation (1-6, max. 6) Department or University-wide training for research assistants. Credit/no-credit only.

## Health Services Administration

## GRADUATE PROGRAM

Graduate Program Coordinator -- In-Residence and Executive Programs
H660 Health Sciences, Box 357660
(206) 543-8778
mhap@uw.edu
The graduate program in Health Services Administration offers two tracks for earning a Master of Health Administration (MHA) degree: a traditional day program (MHA) and an executive program (EMHA).
Accredited by the Commission on Accreditation of Healthcare Management Education (CAHME), the MHA provides the educational foundation for careers in management, planning, consulting, and policy-making in ambulatory care organizations, hospitals, long-term care facilities, mental healthcare organizations, government agencies, planning agencies, and other organizational settings in the healthcare field.
Interdisciplinary by design and innovative in its approach to curriculum delivery, the program develops leaders prepared strategically and effectively to transform healthcare organizations and systems at the local, regional, and national level. The MHA program's interdisciplinary priority is evidenced by faculty that has been assembled from the graduate schools of Public Health, Foster School of Business, Public Affairs, Nursing, Medicine, and Law, as well as from the community of healthcare administration leaders in the Seattle metropolitan area.
Concurrent degree programs combining health administration with business, medicine, law, public health, or public administration are also an option for in-residence students. Many concurrent programs can be completed in three years of intensive academic study.
For in-residence MHA students, the two-year academic experience is augmented by a career development program with opportunities for mentorships with regional health care leaders, an internship experience in a health facility or agency - typically under the preceptorship of the administrator or director of that organization.
The Executive Master of Health Administration (EMHA) is designed primarily for mid-career physicians and other clinical practitioners, as well as experienced health services managers, who have demonstrated interest or competency in administration or management. Best-practice health-
care is a team process, and the team-based learning model, especially emphasized in year one, positions students for leadership roles within such an environment. Executive students build critical competencies while benefiting from the broad expertise already held among the working professionals in the classroom. EMHA classes convene in Bellevue, Washington, for a three-day period (Thursday through Saturday) once each month for 24 months. Additionally, once each week faculty lead students in a webbased session, ideal for practicing professionals who plan to continue their careers while gaining a graduate degree.

Both the MHA and EMHA programs operate under a feebased structure and are administered in collaboration with UW Professional \& Continuing Education. Complete application details can be viewed at depts.washington.edu/ mhap/admissions.

## Financial Aid

Students enrolled in both the MHA and EMHA programs are eligible for federal financial aid, as well as most other types of financial support that are not funded by state tuition revenues. When exploring financial aid options, students should emphasize they are applying for a fee-based program. Financial aid questions should be directed to the UW Office of Student Financial Aid (206) 543-6101, osfa@ uw.edu.

## Molecular and Cellular Biology

## GRADUATE PROGRAM

Graduate Program Coordinator
T466 Health Sciences, Box 357275
206) 543-0253
mcb@uw.edu
The Molecular and Cellular Biology Program (MCB) is a leader in applying the techniques of molecular and cellular biology to advance the understanding of basic biological sciences. The goal of the doctoral program is to broadly train students to think about science in a rigorous and critical manner. Since scientific methods, equipment, and knowledge are changing rapidly, students learn to focus on important issues in an evolving research environment. This program is appropriate for students interested in future careers in research and teaching in academia as well as biotechnology and pharmaceutical companies.
Twelve departments across three schools have faculty members actively pursuing research in molecular and cellular biology. The departments participating in the program include Biochemistry, Bioengineering, Biological Structure, Biology, Environmental Health, Genome Sciences, Immunology, Microbiology, Pathobiology, Pathology, Pharmacology, and Physiology and Biophysics.
At the Fred Hutchinson Cancer Research Center (FHCRC), the divisions of Basic Sciences and Molecular Medicine participate in the joint Molecular and Cellular Biology graduate program. Shared FHCRC facilities are available for electron microscopy, flow cytometry, tissue culture, and image analysis. A biotechnology center for DNA and protein synthesis and sequencing, animal facilities, a biological production facility that focuses on monoclonal antibody production, extensive libraries, and a biocomputing center provide further support for the research effort.
Recently the MCB Program has established relationships with the Institute for Systems Biology as well as Seattle Biomed. These collaborations allow MCB students access to labs conducting research using a systems approach to biology or a global focus on infectious disease.

## Faculty Interests

Over 250 faculty members from the UW, the FHCRC, the ISB, and Seattle Biomed are researching molecular and cellular biology and are skilled in the training of graduate students. Faculty research interests are categorized into eight areas of interest: cancer biology; genetics: genomics and evolution; microbiology, infection and immunity; molecular structure and computational biology; and neuroscience.

## Doctor of Philosophy

## Admission Requirements

1. Applicants must have completed a baccalaureate or advanced degree by the time of matriculation; degrees emphasizing biology, physical or natural sciences, and mathematics are preferred.
2. GRE scores. General Test. A Subject Test (e.g., biology, biochemistry, chemistry) is not required but recommended.
3. Letters of recommendation
4. Statement of purpose
5. Personal resume

## Degree Requirements

90 credits, including:

1. Credit Requirements: MCB students complete 21 graded credits of coursework with 9 credits of the CONJ series and 12 credits of graded elective courses. M.S.T.P. students receiving a Ph.D. through the MCB Program are required to have 18 graded credits, and should petition the MCB directors to accept medical school courses in lieu of the remaining 3 credits.
2. First Year: Students complete most of their formal course requirements, select a permanent adviser, and establish a doctoral Supervisory Committee. A typical first-year class schedule includes six five-week modules of the MCB conjoint series, three lab rotations, three quarters of literature review, and one or more graded elective classes. Following the third rotation, students generally choose a permanent adviser in whose lab they pursue research for the rest of their educational career, generally three to four years. During the summer, students complete the biomedical research integrity lecture series.
3. Second Year: Students form their doctoral Supervisory Committee by the end of December, define their doctoral projects, take additional elective courses, participate as teaching assistants for a minimum of one quarter, complete either a second academic teaching assistantship or an alternative education experience, and hold their first committee meeting.
4. Third Year and Beyond: By the end of spring quarter of the third year, the student completes the general examination and is conferred official Ph.D. candidacy by the Graduate School. The student then focuses on the dissertation research and continues to meet with the Supervisory Committee each spring quarter to report on research progress and plans for the coming year. When the Supervisory Committee agrees that a student is ready, the final examination is scheduled. Upon successful completion of the final examination and acceptance of the completed dissertation by the Graduate School, a student is conferred the degree of Doctor of Philosophy.

## Financial Aid

The MCB Program provides a stipend plus tuition and health benefits for the first year of study. At the end of the first year of study, students choose a doctoral committee, and subsequent years of support are provided by the department of the committee chair. Students maintaining
satisfactory academic progress receive funding for the duration of their graduate training.

## COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, sym bols, and abbreviations.

MCB 511 Cell Cycle Control (3) Breeden, Roberts, Edgar Studies recent advances in understanding cell-cycle control, arising from genetics and biochemical studies of fission and budding yeast, marine invertebrates, Drosophila, amphibians, and cultured cells. Addresses the biochemical processes and molecular interactions and the rate-limiting events in the cell cycle, and the coupling of those events to physiological signals. Offered: A.
MCB 512 Scientific Speaking Seminar (1.5) Biggins, Peichel Teaches how to effectively give a scientific seminar about research. Offered: jointly with CONJ 512; W.

MCB 513 Development Journal Seminar (1, max. 12) Moens, Soriano, Swalla Examines current literature about specific topics in developmental biology. The seminar chooses current monthly topics and the group meets weekly to discuss published research papers. Topics may include: germ cell specification; cell migration and morphogenesis; axis formation; somitogenesis and stem cells. Offered: AWSp.

MCB 514 Molecular and Cellular Biology Literature Review (2) Raible Emphasizes critical evaluation of the original literature orally and in writing. Open only to first-year students in the Molecular and Cellular Biology program.

MCB 515 Molecular and Cellular Biology Literature Review
(2) Emerman Emphasizes critical evaluation of the original literature orally and in writing. Open only to first-year students in the Molecular and Cellular Biol ogy Program. Offered: W.
MCB 516 Molecular and Cellular Biology Literature Review (2) Emerman Emphasizes critical evaluation of the original literature orally and in writing. Open only to first-year students in the Molecular and Cellular Biology Program. Offered: S.
MCB 517 Topics in Molecular and Cellular Biology (1-5, max. 12) Advanced in-depth coverage of specific areas of molecular and cellular biology of current interest. Lectures by University of Washington faculty and invited speakers involved in research in this area. A basic knowledge of principles of molecular and cellular biology assumed.
MCB 519 Topics in Cancer (1, max. 6) Examination of ways to integrate basic, clinical, and public health sciences to increase understanding of human biology and disease. Seminars in introduction to cancer research as viewed by basic, clinical, and public health sciences, origins of cancer, cancer prevention, cancer progression, and therapies for cancer. Credit/ no-credit only.
MCB 520 Tutorial in Molecular and Cellular Biology (1-2, max. 2) Emerman

MCB 529 Cell Migration (1.5) Cooper, Moens Explores mechanisms of cell migration in vivo and in cell culture. Discusses the cell biology of different forms of cell migration, the extracellular cues that direct migration, and how these cues are integrated by the migrating cell. Offered: jointly with CONJ 529; W.

MCB 532 Human Pathogenic Viruses (3) Emerman Replication, regulation, and pathogenesis of several groups of human viruses, including human immunodeficiency virus and papillomaviruses. Emphasis on the unique aspects of the viral-like cycles as they relate to effects on infected cells and organisms. Guest
lecturers focus on viral immunology, measles. herpes simplex virus, and HHV-8. Offered: A.
MCB 533 Evolutionary Genetics and Genomics (3) Malik, Peichel Introduces classic concepts and approaches in evolutionary genetics. Familiarizes students with genomic approaches, tools and resources, and demonstrates how evolutionary approaches and modern genomic tools are brought to bear on important biological questions. Offered: A.
MCB 539 Biological Basis of Neoplasia (3) Kemp, Zarbl Introduces the major themes in research in the biology of neoplastic change. Covers principle molecular mechanisms responsible for tumor initiation and progression, with a specific emphasis on intracellular signaling, DNA repair, cell cycle checkpoints, and loss of normal tissue homeostatis. Offered: Sp.

MCB 540 Nucleic Acid Enzymes (1.5) Stoddard Surveys a wide variety of enzymatic process that control the structure and modification of DNA and RNA, with particular focus on structure, function and mechanism. Unifying features of major reaction types (such as phosphoryl transfers and base modifications) constitute core material. Offered: W.

MCB 560 Biotechnology Externship (2-12, max. 12) Moon Supervised research in a biotechnology company. Prerequisite: permission of instructor and doctoral candidacy. Offered: AWSpS.

MCB 580 Teaching Practicum in Molecular and Cellular Biology (2, max. 4) Supervised training in the teaching of molecular and cellular biology. Credit/no-credit only. Prerequisite: permission of instructor. Offered: AWSpS.

MCB 599 Introduction to Research in Molecular and Cellular Biology (*, max. 20) The student rotates through one research laboratory involved in the Molecular and Cellular Biology Program per quarter. Open only to first-year students in the Molecular and Cellular Biology Program. Credit/no-credit only. Offered: AWSpS.

## MCB 600 Independent Study or Research (*)

MCB 700 Master's Thesis (*) Offered: AWSpS.
MCB 800 Doctoral Dissertation (*)

## Museology

## GRADUATE PROGRAM

Graduate Program Coordinator
Burke Museum, Box 353010
(206) 616-8280

The museology graduate program is designed to provide the generalized training, knowledge, and skills necessary to pursue a professional career in museum work. The program is directed toward the training of a broad range of museum professionals interested in curation and management of collections in anthropology, art, botany, geology, history, and zoology as well as in interpretive programs and museum administration.

Courses include required core museology subjects as well as a range of classes offering students the chance to specialize in interest areas. Coursework is divided between the theoretical and practical aspects of museum operations. Classes take the form of lecture courses, seminars, special lectures by guest speakers, field trips, laboratory and collection management courses, practicums, and internships.
Practical experience, an essential component of the program, is provided by several museological institutions at the University of Washington, including the Thomas Burke Memorial Washington State Museum, the Henry Art Gallery, the Herbarium, the Arboretum, the Fish Collection,
and the University Libraries. The Burke Museum acts as host of the museology program. Located on the campus of the University of Washington, the Burke Museum is Washington state's natural-history and anthropology museum, and is the oldest and largest natural-history museum in the Northwest. It has nationally and internationally ranked collections focusing on the anthropology, geology, and zoology of the Pacific region and Pacific Rim.

## Admission Deadline

The application deadline for autumn quarter admission is February 1. Applications completed and postmarked on or before this date are reviewed by the appropriate admission committee.Late applications may be submitted until April 15 , although consideration is not guaranteed if enrollment targets have been met.

## Program Requirements

The museology graduate program takes two years to complete, consisting of six quarters of academic study and research. During the first year, students carry on average between 10 and 15 credits each quarter; during the second year, the number of credits may vary depending on research, practicum, and internship work. Students may enroll part time with permission from the program director
Requirements for successful completion of the Master of Arts degree include:

1. Completion of a minimum of 36 quarter credits, including 27 course credits and 9 thesis or thesis-project credits, with at least 18 credits of coursework numbered 500 or above, including a thesis or thesis project
2. A minimum of three quarters of full-time residence credit or part-time equivalent
3. Demonstration of reading competence in one foreign language, if required by the student's supervisory committee due to the student's area of specialization
4. Completion of an internship in an off-campus museum or related agency approved by the supervisory committee prior to submission of the student's thesis or thesis project
5. Presentation of a thesis proposal by the beginning of the fourth quarter of study
6. Successful completion of an oral examination, covering both the thesis topic and the field of museology in general, following submission of the thesis or thesis project
7. Completion of all degree requirements within six years.

The following courses are required of all students unless exempted by petition to the program coordinating committee or credited for relevant coursework completed at other universities: MUSEUM 580, MUSEUM 581; MUSEUM 583 or MUSEUM 584 or MUSEUM 585; MUSEUM 582, MUSEUM 598, MUSEUM 590, MUSEUM 593, MUSEUM 594, MUSEUM 595; MUSEUM 700 or MUSEUM 710. In addition, two or more courses are required in an academic discipline relevant to the area of specialization.

The museology program also offers a graduate certificate in museum studies as an option for graduate students in other degree programs at the University. To qualify, students must take a specified minimum set of key courses in areas that emphasize either collection research and management, or museum administration and interpretation, to include hands-on work experience. Information and application materials for the certificate can be obtained from the museology program office.

## COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations.

MUSEUM 580 Introduction to Museology (5) Museum history, philosophy, and basic operations, including organization, income, collection management, conservation, exhibition, security, education, research, and ethics.

MUSEUM 581 Preservation and Management of Collections (5) Lecture and demonstration of fundamental principles of collection management issues, emphasizing collection management needs of museum collection of all types. Application of principles through integrated collection management lab experiences addressing concerns of artifact handling, cataloging, photo-documentation, storage, and registration.

MUSEUM 582 Preservation of Collections II (5) Lecture and demonstrations in the recognition and treatment of museum conservation problems for specimens of all types. Application of basic principles to specific preventive and active conservation and restoration problems encountered by curatorial personnel.
MUSEUM 583 Directed Fieldwork in Museum Operations (1-5, max. 15) Application of general museological training in one or more areas of supervised operation areas, including registration, education, exhibition, development, marketing or public relations. Credit/ no-credit only. Recommended: MUSEUM 580.
MUSEUM 584 Directed Fieldwork in Archaeological Collections (1-5, max. 15) Application of museological training in curation of archeological collections at the Burke Museum. Supervised work ranges from fundamental collection documentation and research to preventive conservation, storage, and other special curation projects. Prerequisite: MUSEUM 581.
MUSEUM 585 Directed Fieldwork in General Collections (1-5, max. 15) Application of museological training in the curation of art, historic, botanical, geological, zoological, or other collections. Supervised work ranges from fundamental collection documentation and research to preventive conservation or storage, and other special curation projects. Credit/no-credit only. Recommended: MUSEUM 581.
MUSEUM 586 Philosophy and Ethics of Museum Collections (3) Clavir Explores ethics and issues related to collections housed in contemporary museums, addressing collections of many types including tangible and intangible aspects. Explores the meaning of "preserving cultural/natural significance": what museums, zoos, aquaria, and botanical gardens preserve, what they do not preserve, for whom, and how. Offered: W, odd years.
MUSEUM 588 Special Topics in Museology (1-5, max. 15) In-depth examination of selected current issues within the field of museology.
MUSEUM 590 Seminar in Museum Theory and Adminis tration (5) Examination of principles of administrative theory and museum operations. Administrative structures and policies, management theory, board issues, organizational conflicts, planning issues, collection concerns, financial constructs, professional standards, and museum/community relations from an organizational and management perspective. Recommended: MUSEUM 580. Offered: jointly with ANTH 590.
MUSEUM 592 Social Issues and Museums (3) Explores the ways museums have engaged in social issues and the implications of that engagement. Through readings and discussions, considers the fragile and interesting boundaries between museums and society and the changing expectations on museums to contribute to the common good of society.

MUSEUM 593 Seminar in Museum Exhibition (5) Theory, methodology, and fundamental principles of museum exhibition process. Exhibition elements include planning, conceptual development, interpretation,
design, production, installation, evaluation, and community impact of museum exhibitions. Application of exhibition principles through term exhibit project. Recommended: MUSEUM 590.
MUSEUM 594 Seminar in Museum Education (5) Focus on museums as educational institutions with consideration of the place of education in the mission of museums, the educational role of museums compared to that of other institutions, the museum's diverse audiences and their needs, and the educational methods and techniques museums may employ in pursuing their goals. Recommended: MUSEUM 580.
MUSEUM 596 Introduction to Audience Research in Informal Learning Settings (3) Provides an introduction to the field of audience research as it relates to museum practice. Basic types, ethics, and practices of audience research introduced and practiced through readings, reflective fieldwork, mentorships, and discussions.
MUSEUM 597 Directed Fieldwork in Audience Research (1-5, max. 15) Morrissey, Satwicz, Visscher Applies museological training in visitor studies gained from audience research coursework. Includes implementation of audience research and evaluation projects within a variety of local museums, zoos, and aquaria. Students develop and practice skills in data collection, analysis, and reporting of results. Credit/ no-credit only. Prerequisite: MUSEUM 596. Offered: AWSp.
MUSEUM 598 Research Design and Museology Practice (4) Morrissey Prepares students to identify, interpret, analyze, and design research that advances the field of museology. Offered: Sp.

MUSEUM 599 Careers and Social Capital (3-5) O'Donnell Prepares students to transition from the academic community of a world-class university to a place of responsibility within a professional community that is committed to stewardship of the vast natural and created resources of our global communities and environments, including our stories, values, knowledge, mistakes, questions, and aspirations. Offered: Sp.
MUSEUM 600 Independent Study or Research (1-10)
MUSEUM 601 Internship (1-15, max. 15) Faculty supervised off-campus internships in museums and allied institutions. Each internship is individually established and provides students with practical experience and the opportunity to apply and learn new professional skills. Prerequisite: permission of instructor. Recommended: MUSEUM 580; MUSEUM 581; MUSEUM 590.
MUSEUM 700 Master's Thesis (1-10)
MUSEUM $\mathbf{7 1 0}$ Master's Project (1-10, max. 10) Credit/ no-credit only.

## Near and Middle <br> Eastern Studies

## GRADUATE PROGRAM

Graduate Program Coordinator
311 Loew Hall, Box 352192
(206) 543-6398

The interdisciplinary PhD program in Near and Middle Eastern Studies is designed for students who wish to pursue research with a comparative perspective in Near Eastern languages and literature: Arabic, Hebrew, Persian (or Dari or Tajik), Turkish and Central Asian Turkic languages; Near Eastern linguistics; Islamic topics, namely, Islamic law, history, institutions, theology, and mysticism; comparative religion: Judaism, Christianity, and Islam; and interdisci-
plinary investigations of modern topics using the social sciences. The program, administered by an interdisciplinary Graduate School faculty group, includes courses offered in the Department of Near Eastern Languages and Civilization, the Jackson School of International Studies, and other departments on campus. Students must take courses in both the humanities and social sciences.

## Doctor of Philosophy

## Admission Requirements

1. MA or equivalent in a discipline or field directly related to the proposed PhD work
2. Third-year competenence in a regional language, and reading knowledge of a second language pertinent to the PhD research
3. Application deadline for autumn quarter admission is February 1. Application procedures are at www. grad.washington.edu/students/interdisciplinary/nme/ application.shtml.

## Degree Requirements and Satisfactory

## Progress

Specific coursework and areas of concentration are determined by the student's interests within the framework of the degree and satisfactory progress requirements listed below.

1. Within 18 months of admission, demonstration of a general knowledge of history and culture in one of the following general fields: Islamic civilization; Arabic, Hebrew, Persian, Turkish, or Central Asian Turkic languages and literature; the modern Middle East; or comparative religion either through previous degree work or through examination administered by the program.
2. Within three years of admission, completion of two advanced courses in the humanities, one of which must be in the Department of Near Eastern Languages and Civilization (NELC), and two advanced courses in the social sciences, one of which must be in the Department of History. These courses are in addition to work the student may have done at the B.A. and M.A. level.
3. Within three years of admission, completion of a graduate seminar. Two graduate seminars are required if none was taken at the M.A. level.
4. A student is expected to have studied three languages, two of which must be regional languages and one of which must be a "Western" European language other than English, such as French, German, Italian, Russian, or Spanish. The student's Supervisory Committee decides whether a fourth language is required and whether the fourth required language is European or regional. Students pursuing language-related work may anticipate a fourth required language, whereas those pursuing social-science-related studies may not. Before the general examination (see below) may be taken, the student must complete the language requirements including the second-year level in a regional language different from the two languages offered at the time of admission if both were not regional languages.
5. Disciplinary method and theory requirements: For all students conducting fieldwork or working with documents, whether social science or humanities focused, and for all social science-oriented students, the following courses are strongly encouraged: (a) ANTH 550; and (b) POL S 491; or (c) their equivalents in appropriate disciplines.
For students doing both humanities-oriented research and not conducting fieldwork, two method and theory courses in the appropriate discipline or disciplines (e.g., comparative literature, philosophy) are required.
6. Disciplinary core courses: Each student is required to take two disciplinary core courses in appropriate fields.

Core courses (or field courses) survey the literature, methods, and theoretical issues involved in a broad field of inquiry, as opposed to elective topical courses, which cover a much smaller area. Core courses should be chosen according to the anticipated research interests and fields for preliminary examination of each student. For example, these core disciplinary courses might focus on comparative politics, comparative religion, feminist theory, ethnicity and nationalism, analysis of linguistic structures, seminar in cognitive anthropology, comparative legal institutions, or international political economy. Courses on a narrow field of inquiry (such as Arab-Israeli conflict) do not constitute field or core courses, though they may contribute to a student's general field.

Annual Review: A subcommittee of the Near and Middle Eastern Studies program faculty meets each spring to review the progress of all students in the PhD program. Either the chair of the student's committee, the program's graduate adviser, or the program's director informs students of the results of this annual review.

## PhD Examinations and Dissertation

1. Preliminary examinations, consisting of three written and an oral. The three written examinations include: area of specialization, theory and discipline, and a selfdesignated field, revolving around the student's interest. The oral examination, following the written examinations, is two hours in length and addresses all these areas.
2. General examination, consisting of a take-home part and an oral part.
3. Final examination, the PhD thesis defense.

Students must meet general University requirements concerning admission to candidacy for the doctoral degree, the dissertation, and final examinations, including an oral examination.

A student's PhD Supervisory Committee consists of no less than three members of the UW's Graduate School faculty as well as a representative of the Graduate School (GSR). The chair of the committee must be an active member of the Graduate School faculty. At least two members of the committee must be members of the Near and Middle Eastern Studies faculty group. Additional members may be asked to join the committee.

Students write a dissertation as the final requirement for the PhD degree. The topic of the dissertation is set in consultation with the PhD candidate's Supervisory Committee.

## Neurobiology and Behavior

## GRADUATE PROGRAM

Graduate Program Coordinator
T471Health Sciences, Box 357270
(206) 685-1647
neubehav@uw.edu
Understanding the brain represents both a major scientific challenge and a wonderful research opportunity. Investigations into the mechanisms of neural function require an interdisciplinary approach using the knowledge base and techniques of anatomy, biochemistry, molecular biology, physiology, pharmacology, and the behavioral sciences. Neuroscientists and their students must use these different approaches in their research and training if they are to make inroads to solving the major questions in neuroscience.

The University of Washington has met this challenge by establishing the interdisciplinary graduate program in neurobiology and behavior. The laboratories of more than 120 faculty members in over 20 departments within the School
of Medicine, College of Arts and Sciences, and College of Engineering have combined efforts to form the doctoral training program, continuing a long history of collaborative efforts that cross University boundaries.
The program is designed to allow students to obtain both broad training in the neurosciences and more intensive coursework in specific areas of interest. The program emphasizes flexibility and encourages students to take responsibility in the design of their own curriculum. Students have the opportunity to work with faculty whose interests span the breadth of neuroscience research. Graduates of the program are well prepared for a variety of careers involving academic, research, industrial, and public policy positions.

## Doctor of Philosophy

## Admission Requirements

1. Applicants must have completed a baccalaureate or advanced degree by the time of matriculation; degrees emphasizing biology, physical or natural sciences, and mathematics are preferred.
2. GRE scores: general test required; subject test not re quired, but recommended
3. Minimum three (3) letters of recommendation
4. Statement of purpose and curriculum vitae
5. All must be submitted online via the Graduate School application process.
Applications received after the deadline are considered at the discretion of the directors.

Students who have emphasized either biological or physical sciences in their undergraduate careers are invited to apply. Applicants are requested to send a copy of their academic record, GRE scores (including, if possible, scores on a subject test such as chemistry, physics, molecular and cellular biology, psychology, or biology), and three letters of recommendation from the persons who can best evaluate their potential for success in graduate study. New students enter the graduate program September 15. Applications received on or before the deadline are given full consideration. Applications received after the deadline are considered at the discretion of the directors.

## Degree Program Requirements

90 credits, to include:

1. Credit Requirements: 20 graded credits of coursework with NEUBEH core curriculum and 10 credits of graded/ ungraded elective courses approved by the curriculum committee chairs and the student's advisers.
2. First Year: Students complete most of their formal course requirements, select a permanent adviser, and establish a doctoral Supervisory Committee. A typical first-year class schedule includes the NEUBEH 501, NEUBEH 502, NEUBEH 503, NEUBEH 504, NEUBEH 532, NEUBEH 559 series, three lab rotations, and three quarters of the seminar series and journal clubs. Following the third rotation, students generally choose a permanent dissertation adviser in whose lab they pursue research for the rest of their educational career, generally four to five years.
3. Second Year: Students form their doctoral Supervisory Committee by the end of winter quarter, define their doctoral projects, take additional elective courses, and participate in a teaching internship for a minimum of two quarters (or equivalent), and hold their first committee meeting.
4. Third Year and Beyond: By the end of autumn quarter of the third year, the student completes the general examination and is conferred official PhD candidacy by the Graduate School. The student then focuses on dissertation research and continues to meet with the Supervisory Committee annually. Annual student evalua-
tions and progress reports are due each spring quarter. When the Supervisory Committee agrees that a student is ready, the final examination is scheduled. Upon successful completion of that examination and acceptance of the completed dissertation by the Graduate School, the student is conferred the PhD degree.

## Admission Process

Students who have emphasized either biological or physical sciences in their undergraduate careers are invited to apply. Applicants are requested to send a copy of their academic record, GRE scores (including, if possible, scores on a subject test such as chemistry, physics, molecular and cellular biology, psychology, or biology), and three letters of recommendation from the persons who can best evaluate their potential for success in graduate study. New students enter the graduate program September 15. Applications received on or before the deadline are given full consideration. Applications received after the deadline are considered at the discretion of the directors.

## Financial Aid

The NEUBEH program provides a salary with benefits (insurance plus tuition) for the first three quarters of study during rotations. Once the student has entered a dissertation laboratory, support is provided by the department of the dissertation adviser. Students maintaining satisfactory academic progress receive funding for the duration of their graduate training.

## COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations.

NEUBEH 501 Introduction to Neurobiology (3) Carlson Survey of molecular, cellular, and developmental neuroscience, including gene regulation, the cytoskeleton, protein sorting in the secretory pathway, growth factors, and neurotransmitter receptors. Includes lecture discussion of original literature. Offered: A.

NEUBEH 502 Introduction to Neurobiology (5) Sherk Systems level survey of vertebrate system, focusing on sensory system, on motor system, and on neuroanatomy. Lectures cover topics in sensory and motor systems. Laboratory includes brain dissection and study of intact, prosected, and sectioned brain and spinal cord. Emphasis is on human nervous system. Offered: W.

NEUBEH 503 Cognitive and Integrative Neurobiology (4) Phillips Survey of all aspects of neuroscience, including a discussion of higher neural processes like motivation, decision making, attention, learning, and memory. Lecture and discussion of original literature. Offered: Sp.
NEUBEH 504 Biophysics of Nerve, Muscle, and Synapse
(3) Sullivan Introduces biophysical properties of nerve and muscle cells. Topics include intrinsic electrical properties of neurons, ion channels, receptor signaling, calcium signaling, contraction of muscles, and synaptic function. Offered: jointly with P BIO 504; A.
NEUBEH 510 Seminar in Neurobiology and Behavior (0.5) Biweekly seminar on current topics. Required for students in the graduate program in neurobiology and behavior and for students supported on Graduate Neuroscience Program Training Grant. Credit/nocredit only. Offered: AWSp.

NEUBEH 511 Seminar in Advanced Neurobiology (1-3, max. 15) Weekly faculty lectures, student presentations, and discussions of past and current scientific literature in neurobiology and behavior. Offered: AWSpS.

NEUBEH 512 Readings in Advanced Neurobiology and Behavior (1-3, max. 15) Guided study of the primary literature of neurobiology and behavior. Emphasizes critical analysis, accuracy of expression, bibliographical technique, and other factors of good scholarship. Credit/no-credit only. Prerequisite: permission of instructor. Offered: AWSpS.

NEUBEH 515 Teaching Practicum in Neurobiology and Behavior (3-6, max. 15) Supervised training in the teaching of neuroscience and related scientific topics. Prerequisite: graduate standing in the neurobiology and behavior graduate program and permission of the instructor. Offered: AWSpS.
NEUBEH 526 Introduction to Laboratory Research in Neurobiology (4) Students become familiar with, and assist in, the performance of research on ongoing projects in designated laboratories. Emphasis on employed methodology and techniques. Credit/nocredit only. Prerequisite: first-year graduate students in neurobiology. Offered: AWSpS.

NEUBEH 527 Current Topics in Neurobiology and Behavior (1) Sullivan Presentation and discussion of current research provides exposure to diverse areas of neurobiology and behavior research. Credit/no-credit only. Prerequisite: graduate student in neurobiology and behavior program or permission of instructor. Offered: AWSp.

NEUBEH 528 Computational Neuroscience (3) Fairhall, Rao Introduction to computational methods for understanding nervous systems and the principles governing their operation. Topics include representation of information by spiking neurons, information processing in neural circuits, and algorithms for adaptation and learning. Prerequisite: elementary calculus, linear algebra, and statistics, or by permission of instructor. Offered: jointly with CSE 528.
NEUBEH 532 Discussion in Cell Signaling and Molecular Physiology (3) Fairhall, Rieke Discusses fundamental issues in cell excitability and molecular and cellular physiology. Focuses on problem solving and reading from original literature. Emphasizes student participation. Prerequisite: first-year graduate students in neurobiology or physiology and biophysics. Offered: jointly with P BIO 532; W.
NEUBEH 541 Neuroendocrinology (3) Steiner Emphasizes the cellular and molecular aspects of several topics in neuroendocrinology, including neuropeptide genes, reproduction, steroid hormone regulation of gene expression, mechanisms of hormone action, endocrine rhythms, and neural oscillations. Prerequisite: either BIOL 201, BIOL 202, and BIOL 203, or BIOL 180, BIOL 200, and BIOL 220; BIOC 440, BIOC 441, BIOC 442 or permission of instructor. Offered: jointly with P BIO 509; W, odd years.
NEUBEH 545 Quantitative Methods in Neuroscience (3) Rieke, Shadlen Discusses quantitative methods applicable to the study of the nervous system. Revolves around computer exercises/discussion of journal papers. May include linear systems theory, Fourier analysis, ordinary differential equations, stochastic processes, signal detection, and information theory. Prerequisite: NEUBEH 501, NEUBEH 502, NEUBEH 503, or permission of instructor. Offered: jointly with P BIO 545; W, odd years.

NEUBEH 549 Molecular Basis of Neurodegenerative Disease (2) Pallanck Introduces a broad range of neurodegenerative diseases, focusing upon the approaches that have led to recent discoveries and emphasizing the elucidation of mechanisms and pathways of disease pathogenesis. Offered: jointly with GENOME 549/PHCOL 549; W.
NEUBEH 550 Biophysics of Calcium Signaling (1) Hille, Santana Introduction to cellular calcium signaling in-
cluding theoretical and technical issues of calcium signal detection and biological conclusions. Prerequisite: CONJ 531. Offered: jointly with PBIO 550; Sp. NEUBEH 552 Synaptic Integration (1) Binder, Powers Discussion of recent papers on how neurons in the central nervous system integrate concurrent synaptic inputs. Includes: effects of driving force on synaptic currents, effects of conductances on dendritic properties, transfer of currents from dendrites to soma, and transformation of currents into spike train outputs. Offered: jointly with P BIO 552.
NEUBEH 554 Motor Learning: Cellular and Network Mechanisms (1) Fetz, Perlmutter Five-week mini-course reviews the current state of research on cellular and network mechanisms of motor learning. After an introductory overview of behavioral and physiological examples of motor learning in various species and systems, students choose specific topics for discussion, using the primary literature as a source. Offered: jointly with P BIO 554.

NEUBEH 555 Sensory Receptors (1) Detwiler, Rieke Fivelecture mini-course examines how different kinds of sensory receptors detect and respond to different modalities of sensory stimuli. Discussion focuses on the cellular and molecular mechanisms of the underlying transduction processes and the experimental evidence that they are based on. Offered: jointly with P BIO 555.

NEUBEH 556 Axon Pathfinding Mechanisms (1) Bothwell Examines mechanisms governing axon growth cone behavior during embryonic development and during regeneration in the injured adult. Discusses approaches employing both invertebrate and vertebrate model systems. Offered: jointly with P BIO 556.
NEUBEH 557 Ion Channel Gating (1) Zagotta Compares and contrasts mechanisms of gating in ligand-gated and voltage-gated ion channels. Covers basics of ligand gating and voltage gating, kinetic schemes, inactivation and desensitization, gating currents and partial agonists, and ion channel structure. Offered: jointly with P BIO 557.
NEUBEH 559 Neurobiology of Disease (3) Garden, Neumaier, Weinstein, Weiss Introduces medically important neurological and psychiatric diseases and experimental approaches to understanding the basis for diseases and their treatments. Covers stroke, epilespsy, autoimmune diseases of the CNS, neurodegenerative diseases, autism, psychosis, anxiety disorders, and mood disorders. Offered: jointly with NEURL 559/P BIO 559.

NEUBEH 561 From Biophysics to Neural Computation (2) Fairhall Introduces the mathematics and methods of neuronal modeling. Develops, compares, and relates dynamical systems approaches and empirical characterizations of neuronal function. Includes lectures, student-led journal paper discussions, biweekly computational workshops on neuronal modeling packages, and a computations project. Recommended: differential equations and linear algebra. Offered: jointly with P BIO 561; Sp.
NEUBEH 600 Independent Study or Research (*) Offered: AWSpS.
NEUBEH 700 Master's Thesis (*) Offered: AWSpS.
NEUBEH $\mathbf{8 0 0}$ Doctoral Dissertation (*) Offered: AWSpS.

## Nutritional Sciences

## GRADUATE PROGRAM

Graduate Program Coordinator

305 Raitt, Box 353410
(206) 543-1730
nutr@uw.edu
The Interdisciplinary Graduate Program in Nutritional Sciences offers programs of study leading to Master of Science (MS), Doctor of Philosophy (PhD), and Master of Public Health Nutrition (MPH) degrees. The program is designed for the needs of students with a strong science background who wish to pursue (1) advanced training in nutritional science or clinical research, (2) advanced training in nutritional epidemiology and diet-disease interactions, or (3) training in public health nutrition practice. The Graduate Coordinated Program in Dietetics (GCPD) combines the MS or MPH programs with a supervised practice experience (internship equivalent), allowing a student eligible to take the national registration examination to become a Registered Dietitian (RD). The GCPD includes additional core coursework and the nine-month practice experience at regional community, clinical, and food service facilities.
Principal areas of study are biochemical and molecular nutrition, community or public health nutrition, food safety, nutrition and chronic disease, and clinical nutrition. Members of the core faculty represent the School of Public Health, the Fred Hutchinson Cancer Research Center, and the UW Medical Center. The program also draws on a larger group of affiliate faculty from the College of Arts and Sciences, Schools of Medicine and Nursing, other units on campus, and from affiliated institutions in the Seattle area.
Each program of study is designed by the student in consultation with, and with the approval of, a Supervisory Committee. All students begin working on a research project under the supervision of an appropriate faculty member in the early stages of their graduate experience. Public health field placements, which follow the first year of required coursework, are an integral part of the MPH curriculum.
The research environment at the UW includes a student computer facility and library in Raitt Hall. Students also have access to faculty mentors and research facilities through the Medical Center, the South Lake Union Research Hub, the Fred Hutchinson Cancer Research Center, the Clinical Research Center, and the Clinical Nutrition Research Unit. Additional clinical facilities include UW Medical Center, Harborview Medical Center, Northwest Kidney Center, Seattle Children's Hospital, Pacific Medical Center, the Cancer Care Alliance, Northwest Hospital and Medical Center, Valley Medical Center, and the Center for Human Development and Disabilities.

Students may apply to the graduate degree program after completing a bachelor's or a master's degree. Prerequisite coursework in nutrition, chemistry, biochemistry, and human physiology is required. Students who wish to supplement their degree program with the Academy of Nutrition and Dietetics (formerly the American Dietetic Association)accredited GCPD must also complete prerequisite coursework in microbiology, psychology, and food science prior to admission. Students who have completed a didactic program in dietetics and have a verification statement may apply to the graduate program and the practice experience portion of the GCPD.

## COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations.
NUTR 300 Nutrition for Today (3) NW Kirk Science of nutrition as it relates to individual food choices, health behaviors, public health. Health topics include wellness, obesity, eating disorders, sports nutrition, prevention of chronic disease. Nutrients and nutritional needs across the lifespan. Issues facing society including food safety, biotechnology, use of supplements and botanicals. Offered: A.
NUTR 302 Food Studies: Harvest to Health (3) I\&S/NW Examines the many facets of the modern food supply
from production and processing to distribution, marketing, and retail. Systems approach to foods studies considers geopolitical, agricultural, environmental, social, and economic factors along the pathway from harvest to health. Prerequisite: NUTR 300. Offered: Sp.
NUTR 303 Neighborhood Nutrition (3) NW Drewnowski Examines the food environment in the local community from the public health perspective. Explores where people get there food, what influences this decision and various aspects of the local food movement including access to healthy food, urban agriculture, farmers markets, and farm-to-school programs. Prerequisite: NUTR 300. Offered: W.
NUTR 405 Physical Activity in Health and Disease (3) Duncan Impact of physical activity on individual and public health. Overview of physiological adaptations to activity, exercise prescription, exercise epidemiology, and prevention of chronic diseases. Public health recommendations for activity in the U.S. population, and the effects of the build environment on activity. Prerequisite: either BIOL 118 or BIOL 180. Offered: Sp.
NUTR 406 Sports Nutrition (3) NW Covers the essentials of human nutrition that improve and sustain optimal performance for sport and exercise. Discusses the effect of eating disorders (in both male and female athletes), weight management, and sport nutrition resources. Prerequisite: NUTR 300.
NUTR 411 Topics in Advanced Nutrition (2) Discusses advanced topics in nutritional sciences. Includes nutrition and health, chronic disease prevention and management, and in depth discussion of dietary patters. Draws on current topics in the media, impacts of public health policy on diet, and the most recent nutrition research. Prerequisite: NUTR 300.
NUTR 446 Food Safety and Health (3) Rosenfeild Presentation of emerging issues in food safety and toxicology, microbiology, sustainable agriculture, and biotechnology. Examines both domestic and global pressures on the food supply. Examines international and national polices that promote regional solutions for a safe food supply and access to nutritious foods. Offered: W
NUTR 490 Special Topics in Nutritional Sciences (1-5, max. 10) Drewnowski, Duncan, Johnson, Lund, Rosenfeld Examines emerging issues in nutrition. Reviews the evidence and potential policy implications. Offered: AWSpS.
NUTR 499 Undergraduate Research (1-5, max. 10) Independent study and research supervised by a faculty member with appropriate academic interest. Credit/ no credit only. Offered: AWSpS.
NUTR $\mathbf{5 0 0}$ Graduate Seminar: Current Issues in Nutrition (1, max. 4) A review of current topics in nutritional science and public health nutrition. Provides a forum for student and faculty presentation, and review of current research efforts. Credit/no credit only. Prerequisite: graduate student in nutrition. Offered: AWSp.
NUTR 505 Phys Activity in Health and Disease (3) Duncan Impact of physical activity on individual and public health. Overview of physiological adaptations to activity, exercise prescription, exercise epidemiology, and prevention of chronic diseases. Public health recommendations for activity in the U.S. population, and the effects of the built environment on activity. Prerequisite: either BIOL 118 or BIOL 180. Offered: jointly with EPI 502; Sp.
NUTR 511 Survey of Advanced Nutrition (2-3) Advanced introduction to nutritional sciences. Topics include macronutrient and micronutrient metabolism, energy balance and obesity, nutrient utilization in physical activity, nutritional needs and recommendations
throughout the lifecycle, and the relationships between nutrition and atherosclerosis, diabetes, and cancer risk. Offered: A.

NUTR 520 Nutrition and Metabolism I (3) Rosenfeld Metabolic/physiologic concepts related to energy balance, carbohydrate, and protein nutrition. Addresses energy producing pathways, as well as food sources, digestion, absorption, and utilization of carbohydrates, protein, and various micronutrients. Additional topics include low carbohydrate diets, vegetarianism, protein deficiency, and inborn errors in carbohydrate, and protein metabolism. Prerequisite: biochemistry. Offered: A.

NUTR 521 Nutrition and Metabolism II (3) Rosenfeld Discussion of normal lipid components of animal tissues, with review of their metabolism and physiological functions. Topics include digestion, absorption, transport, and utilization of dietary fats, cholesterol, and fat-soluble vitamins. Discusses in depth the roles played by lipids and various micronutrients in altering risk of atherosclerosis. Prerequisite: biochemistry. Offered: W.

NUTR 522 Nutrition and Metabolism III (3) Rosenfeld Advanced study of biologically essential minerals and vitamins. To include absorption, transport, function, storage, excretion; imbalance, deficiency and toxicity; dietary structures; role of these nutrients in prevention of diseases directly or indirectly. Offered: Sp.
NUTR 526 Maternal and Infant Nutrition (3) Johnson Influence of maternal and infant nutrition on the health of populations. Nutrition-related physiological, psychological, and social factors in pregnancy, lactation, and infancy. Application of evidence-based approaches to maternal and infant nutrition. Recommendations and interventions for populations and high-risk individuals. Prerequisite: human nutrition and human physiology. Offered: A.
NUTR 527 Pediatric Nutrition (3) Ogata, Trahms Addresses the influence of nourishment on growth, development, and behavior of children, including children with special health care needs, in both individual and population-based environments. Includes principles of nutrition and assessment, critical evaluation of normative data, clinical and community nutritional care, and family-centered care. Prerequisite: coursework in human nutrition and human physiology or permission of instructor. Offered: Sp.
NUTR 529 Nutrition Research Design ([1-3]-, max. 3) Duncan Critical review of selected nutrition literature. Evaluation of experimental design, research protocols, data analyses, and data presentations. Credit/ no-credit only. Prerequisite: BIOST 511. Offered: A.
NUTR 531 Public Health Nutrition (4) Johnson Explores the functions and essential services of public health as they apply to assuring access to a safe and nutritious food supply. Examines the practice of public health nutrition: nutrition environment, program planning, implementation, and evaluation; policy development, implementation and evaluation, and links between basic science and public health nutrition practice. Prerequisite: introductory nutrition. Offered: W.

NUTR 532 Fieldwork in Public Health Nutrition (1-12, max. 12) Lund Experience and service learning in organizations that plan, deliver, and promote populationbased nutrition education and nutrition services. Credit/no-credit only. Prerequisite: nutritional sciences graduate student and permission of instructor. Offered: AWSpS.
NUTR 536 Nutrition Education Principles and Practice (3) Examines theory-based design and delivery of nutrition education including conducting needs assessments, developing lesson plans, activities, vi-
sual aids, and evaluation material. Explores design features of written, oral, and technology-based nutrition education materials and initiatives. Addresses differing learning styles, cultural groups, and literacy levels. Offered: Sp.

NUTR 537 Laboratory Rotation (1-4, max. 6) Exposure to research being conducted in the laboratories of the graduate nutrition faculty. Provides hands-on experience in laboratory research. Introduces the student to on-going research for preparation of dissertation topics. Credit/no-credit only. Prerequisite: permission of instructor. Offered: AWSpS.
NUTR 538 Nutritional Epidemiology (3) Beresford Application of epidemiological methods to current studies of diet, nutrition, and chronic disease. A discussion of current issues and controversies enables students to plan studies in nutritional epidemiology and disease prevention. Prerequisite: EPI 511 or EPI 512 and BIOST 511 or permission of instructors. Offered: jointly with EPI 538; A.

NUTR 545 Food Safety and Health (3) Rosenfeld Presentation of emerging issues in food safety, sustainable agriculture, and biotechnology. Examines both domestic and global pressures on the food supply. Examines international policies that promote regional solutions for a safe food supply and access to nutritious foods. Recommended: course in microbiology. Offered: W.

NUTR 555 Nutrition in Developing Countries (3) Gorstein Introduces issues of nutrition in developing countries, with an emphasis on the control and prevention of under nutrition and micronutrient deficiencies. Offered: jointly with G H 555; Sp.

NUTR 560 Nutritional Counseling for Chronic Disease (13) Examines nutritional intervention strategies and counseling skills that pertain to chronic disease prevention and management. Builds appropriate knowledge base and skills levels needed to create appropriate care plans and counseling strategies designed to meet individual client assessment/counseling situations. Offered: Sp.

NUTR 561 Graduate Coordinated Program in Dietetics (110, max. 30) Lund Focuses on the competencies for entry-level practice in dietetics. Includes supervised practice experience in wellness, public heath, food services, ambulatory care, and clinical care. Credit/ no-credit only. Prerequisite: GCPD students only. Offered: WSpS.

NUTR 562 Nutrition and Chronic Disease (4) Epidemiology/pathophysiology of chronic disease related to nutrition (e.g., obesity, cardiovascular disease, osteoporosis, hypertension, diabetes). Examines nutritional risk/protective factors in relation to public health, individual nutrition, and clinical intervention. Prerequisite: physiology, biochemistry. Offered: Sp.
NUTR 563 Nutrition in Acute Care (4) Assessment of the nutritional demands and hypermetabolic response of trauma, surgery, organ failure, burns, AIDS, and neoplastic disease. Examines specialized nutritional support and substrate requirements in the acute care setting. Prerequisite: NUTR 562, or permission of instructor. Offered: A.
NUTR 564 Management of Nutrition Services (3) Examines healthcare policy and administrative issues that impact delivery of nutritional services in different healthcare settings. Topics include organizational behavior, productivity, project management, financial reporting, and human resources. Offered: S.
NUTR 590 Special Topics in Nutritional Science (1-4, max. 4) Examines emerging issues in nutrition. Reviews the evidence and potential policy implications. Cred-it/no-credit only. Prerequisite: permission of instructor. Offered: AWSpS.

NUTR 595 Nutritional Sciences Master's Practicum (1-12, max. 12) Lund Supervised practice experience providing students an opportunity to learn how nutritional sciences are applied to public health settings and in the formulation and application of public health pol icy. Credit/no-credit only. Prerequisite: HSERV 511; NUTR 531; EPI 511; NUTR 520; NUTR 521; NUTR 522. Offered: AWSpS.

NUTR 600 Independent Study or Research (*) Offered: AWSpS.
NUTR 700 Master's Thesis (*) Offered: AWSpS.
NUTR 800 Doctoral Dissertation (*) Offered: AWSpS.

## Pathobiology

## GRADUATE PROGRAM

Graduate Program Coordinator
310C Harris Hydraulics, Box 357965 (206) 543-4338
pathobio@uw.edu
The Pathobiology graduate program offers graduate training in the application of basic biomedical research to diseases of public health interest. The program of study involves core courses to develop a fundamental understanding of basic cellular and molecular processes and techniques important in the application of basic biomedical research to diseases; laboratory experience to learn how to collect, analyze, interpret, and use data for solving problems; and opportunities to develop skills in communicating research findings through oral and written presentations.

## Master of Science

The master's program is designed for students to develop an understanding of the applications of molecular biology to public health, epidemiology, and cellular or antigenic analysis, and microbiology or immunology. The focus in this two-year program is developing basic research skills and understanding the scientific method. Students are expect ed to fulfill their course requirements during the first year. Under the guidance of a faculty research mentor, students propose and complete a thesis that includes an original research project.

## Admission Requirements

Students are admitted directely into the PhD program. The department does not currently accept applications for the Master of Science.

## Degree Requirements

A minimum of 60 credits as follows:

1. 21.5 credits of required courses: PABIO 550 (3), PABIO 551 (4), PABIO 552 (4), PABIO 553 (2), EPI 511 (4), PABIO 580 (1), PABIO 581 (1), PABIO 582 (1.5), PABIO 590 (1)
2. Research Credits: Sufficient credits of PABIO 600 and PABIO 700 to complete a research project.
3. Electives: Additional courses in pathobiology or the biomedical sciences may be taken to fulfill the graded course requirement, to encompass the interests of the student, or to fulfill any additional requirements set forth by the student's committee.

MS Thesis Research Proposal: The M.S. thesis research proposal should be done by the end of the fourth quarter of the first year and should contain the following, in this order:

1. A brief synopsis of background relevant to the project.
2. A summary of preliminary experiments.
3. A description of experiments planned for the next year.

MS Thesis: The thesis must be provided to the MS advisory committee two weeks prior to the oral presentation. Corrections should be made following their review before submission of the document to the Graduate School.

MS Oral Presentation and Defense: Students give a formal seminar prior to the completion of the master's program.

## Doctor of Philosophy

The doctoral program lasts four to five years and is designed for students to become capable of conducting independent research leading to the expansion of knowledge by developing skills to approach unfamiliar experimental systems and identify and explore important questions concerning pathogenesis and infection. Students develop familiarity with the paradigms for control, prevention, and treatment; develop an understanding of epidemiology and disease processes; learn basic methodologies used in this research including relevant areas of molecular biology, bacteriology, cell biology, virology, epidemiology, and biostatistics; and develop familiarity with the major classes of pathogens.

## Admission Requirements

1. Personal Statement: The personal statement is a series of six short-answer questions. This statement plays an important role in admissions by providing the reviewers with a representation of the student's background and readiness for graduate studies in pathobiology.
2. One official set of transcripts from all collegiate institutions attended.
3. Three letters of recommendation.
4. Curriculum vitae
5. Official Graduate Record Examination (GRE) scores
6. International applicants are in addition required to submit official Test of English as a Foreign Language (TOEFL) scores. The Pathobiology program does not admit international applicants who have a TOEFL score of less than 600 on the paper-based test or 250 on the computerized test. The department must receive an official score report from the Educational Testing Service. TOEFL scores cannot be more than two years old.

## Degree Requirements

90 credits minimum, as follows:

1. Required Courses: PABIO 550 (3), PABIO 551 (4), PABIO 552 (4), PABIO 553 (2), EPI 511 (4), PABIO 580 (1), PABIO 581 (1), PABIO 582 (1.5), PABIO 590 (1), PABIO 598 (2), PABIO 500 (variable), PABIO 600 (variable), PABIO 800 (27); either IMMUN 441 (4) or IMMUN 532 (3),
2. Students are required to attend Seminar (PABIO 580) and Journal Club (PABIO 581) every quarter of the academic year while enrolled, but may be excused for up to two quarters while writing the dissertation. Students give research presentations in the Graduate Research Symposium annually after the first year. 3 credits each of Seminar and Journal Club may be counted towards the degree.
3. Electives: The following are recommended tracks for elective credits:
a. Eukaryotic Pathogens: PABIO 536, PABIO 548, CONJ 531 through CONJ 544, EPI 532, MICROM 444
b. Bacterial Pathogens: PABIO 540, PABIO 568, EPI 520, EPI 529, MICROM 552, MICROM 555. (Students without a background in bacteriology are required to take MICROM 442 or an equivalent course as a prerequisite for entry into the Bacterial Pathogens track.)
c. Viral Pathogens: Two or more of the following are strongly recommended: CONJ 531-CONJ 544, EPI 520, EPI 524, EPI 530, IMMUN 532, MICROM 540

## Research Facilities

Research facilities are geographically dispersed and located in the Health Science Center of the School of Medicine, Fred Hutchinson Cancer Research Center, and Seattle Biomedical Research Institute. External support includes computer facilities and the Health Sciences Library with access to more than 345,000 volumes, 4,000 periodicals, and online bibliographic services for all national libraries of medicine and most commercial databases.

The Fred Hutchinson Cancer Research Center is a worldrenowned research institution. Its mission for more than 20 years has been to eliminate cancer. Shared facilities are available, including electron microscopy, flow cytometry, tissue culture, image analysis, biotechnology center for DNA and protein synthesis and sequencing, animal facilities, biological production facility focused on monoclonal antibody production, extensive libraries, and a biocomputing center.
The Seattle Biomedical Research Institute is an independent nonprofit organization studying causes of and interventions to infectious diseases of worldwide impact, including targeted research producing leading-edge findings and applied research creating diagnostic tests and treatments.

## Financial Aid

The department offers a twelve-month competitive salary, as well as paying tuition and health insurance, which includes medical, dental, and vision benefits. Students with satisfactory academic progress can anticipate funding for the duration of their studies.

## COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations.
PABIO 498 Undergraduate Thesis (*)
PABIO 499 Undergraduate Research (*, max. 12)
PABIO 500 Introduction to Pathobiology Research (3-9, max. 15) Rotation through research laboratory. Cred-it/no-credit only. Offered: AWSpS.
PABIO 511 Pathobiological Frontiers (2) Molecular and immunological concepts of infectious and noninfectious diseases presented in format suitable for graduate students knowledgeable in health-related areas who are not in biology-oriented programs. Allergy, immune responses, nature of infectious agents, prevention of disease with emphasis on newly defined diseases and disease agents. Prerequisite: permission of instructor.

PABIO 536 Bioinformatics and Gene Sequence Analysis (3) Rose Nature and relevance of molecular sequence information, computer-based protein, and DNA sequence analysis, molecular sequence and genomic databases, and methods for database accession and interrogation. Prerequisite: background in molecular biology and permission of instructor. Offered: jointly with MEBI 536/PHG 536; Sp.
PABIO 548 Molecular and Cellular Parasitology (3) Feagin Molecular and cellular biology of parasites of healthrelated significance, emphasizing current research topics unique to parasites, particularly well-suited for study in parasites, and especially important to study in host-parasite systems. Prerequisite: familiarity with molecular and cellular biology and permission of instructor.
PABIO 550 Diseases of Public Health Importance and Strategies for their Control (3) Public Health perspective of major disease of national and global importance. Discussion of origins, establishment, progression, and pathogenesis of diseases. Importance of immunological, intercellular and external factors,
and strategies of disease prevention. Requires a grounding in cellular and molecular biology, microbiology, and immunology. Prerequisite: permission of instructor. Offered: jointly with G H 565; Sp.
PABIO 551 Biochemistry and Genetics of Pathogens and Their Hosts (4) Provides a strong foundation in biochemistry, molecular biology, and genetics for students interested in disease. Principles illustrated through examples focusing on pathogens, and in fectious and non-infectious disease. Prerequisite: undergraduate-level coursework in molecular biology or biochemistry, or permission of instructor. Offered: jointly with G H 566; A.
PABIO 552 Cell Biology of Human Pathogens and Disease (4) Cell biology and immunology explored through diseases of public health importance. Examples of pathogen interaction with host cell biology and immune systems, unique aspects of the cell biology of pathogens, perturbations of these systems in noninfectious diseases, and design of therapeutics and vaccines to combat diseases of public health importance. Prerequisite: undergraduate-level coursework in biology or molecular biology or permission of instructor. Offered: W.

PABIO 553 Survival Skills for Scientific Research (2) Focuses on skills needed for scientific career: writing abstracts, curriculum vitae, research proposals; preparing for oral presentations; lab management skills; discussion of mentorship/trainee relationships; case-based discussions of various topics in ethics and scientific misconduct. Credit/no-credit only. Offered: Sp.

PABIO 568 Molecular Epidemiology of Infectious Diseases (2) Roberts Application of molecular typing techniques to study of microbial pathogens to increase understanding of epidemiology of infectious diseases. Brief review of molecular biology. Evaluation of methods used in outbreaks and epidemics reported in literature. Prerequisite: PABIO 511 or PABIO 512 or permission of instructor. Offered: jointly with ENV H 568/EPI 568; W.

PABIO 580 Pathobiology Seminar (1, max. 21) Research from students, faculty members, and invited speak ers presented and discussed. Topics include immunochemistry, viruses, membranes, infectious diseases, immune response, and other related topics. Offered: W.

PABIO 581 Current Literature in Pathobiology (1, max. 15) Develops skills in analyzing data and assessing conclusions through an analysis of current literature in pathobiology. Focuses on breadth and analytical skills. Prerequisite: enrollment in the pathobiology graduate program.
PABIO 582 Critical Thinking and Research Design in Pathobiology (1.5) Lingappa Analysis of issues, hypothesis and experimental design and testing. Credit/nocredit only. Prerequisite: graduate standing in pathobiology. Offered: W.

PABIO 590 Selected Topics (1-20, max. 20) Individual offerings focusing on topics such as pathogenesis, immunology, virology, disease agents, bioinformat ics and grant writing. Small lecture format. Credit/ no-credit only. Prerequisite: permission of instructor.

PABIO 598 Didactic Pathobiology (*, max. 12) Supervised teaching experience in pathobiology courses for PhD candidates. Prerequisite: permission of instructor.
PABIO 600 Independent Study or Research (*) Prerequisite: permission of Graduate Program Adviser.

PABIO 700 Master's Thesis (*) Prerequisite: permission of Graduate Program Adviser.

PABIO 800 Doctoral Dissertation (*) Prerequisite: permission of Graduate Program Adviser.

## Quantitative Ecology and Resource Management

The Quantitative Ecology and Resource Management (QERM) Interdisciplinary Graduate Program offers students a unique opportunity to apply statistics, mathematics, and decision science to a broad range of problems in terrestrial and marine ecology, natural resource management, biometrics, and mathematical biology. The program attracts mathematically trained students interested in working on these problems, and biologically or environmentally trained students wishing to develop or enhance their quantitative skills.

The QERM program is interdisciplinary, bringing together diverse faculty from a wide range of academic areas such as statistics, applied mathematics, forestry, biology, aquatic and fishery sciences, oceanography, and marine affairs. This diversity provides strength to the program.

## GRADUATE PROGRAM

Graduate Program Coordinator
304 Loew Hall, Box 352182
(206) 616-9571
qerm@uw.edu
depts.washington.edu/qerm
The Quantitative Ecology and Resource Management (QERM) Interdisciplinary Graduate Program offers students a unique opportunity to apply statistics, mathematics, and decision science to a broad range of problems in terrestrial and marine ecology, natural resource management, biometrics, and mathematical biology. The program attracts mathematically trained students interested in working on these problems, and biologically or environmentally trained students wishing to further enhance their quantitative skills.

The QERM program is interdisciplinary, bringing together diverse faculty from a wide range of academic areas such as statistics, sociology, anthropology, applied mathematics, forestry, biology, aquatic and fishery sciences, oceanography, and marine affairs. This diversity provides strength to the program.
Both a Master of Science and Doctor of Philosophy degree are offered; graduates are capable of continuing with the development and extension of biometrical and biomathematical modeling as they enter the educational, research, or private-sector work force.

## Admission Requirements

1. Background in probability and mathematical statistics, linear algebra, and differential equations. Applicants with little or no statistical background are advised to take additional coursework prior to applying. Although not mandatory, this background makes a student's application more competitive.
2. Successful completion of the following coursework (or equivalent) prior to applying: MATH 126 (or equivalent); MATH 308 (or equivalent).
3. Strongly recommended: MATH 394-MATH 395; STAT 341-STAT 342, or STAT 481.
4. Also taken into consideration:
a. Minimum 3.00 GPA in last 60 semester or last 90 quarter credits required.
b. Normally, completion of college-level courses in probability and mathematical statistics, linear algebra, and differential equations.
c. Scores on Graduate Record Examination (GRE). Competitive applicants generally score above the 75th percentile on the verbal and analytic sections, and above the 85th percentile on the quantitative section.
d. Minimum TOEFL score of 580 ( 237 for computerbased tests) - for international students only.
e. Knowledge of the intended area of study, including clearly written statement of objectives.
f. Recommendations from persons familiar with the applicant's academic ability and potential.
g. Admission is also dependent on program resources and fit between student interests and faculty research. Students should explore faculty research interests by reviewing the QERM Website, depts. washington.edu/qerm, to determine if their area of research interest is conducted at the UW. Students are not required to enter the QERM program with a faculty adviser selected in advance. Typically students identify their research and faculty adviser during their first year of study.
5. Application deadline for autumn quarter is January 1st.

## Degree Requirements (for Master of Science and Doctor of Philosophy)

Required coursework reflects the expectation that the student already has a fundamental understanding of the principles of statistical inference and ecological modeling. Required coursework taken during the first year includes:

1. STAT 516 and STAT 517
2. IND E 513 or IND E 599 (offered alternating years)
3. AMATH 523 or AMATH 535 (offered alternating years)
4. QERM 514 and QERM 597
5. SEFS 540
6. BIOL 567/SEFS 567/FISH 567

## 7. Ecology elective

Following the first year of core coursework, students select elective coursework in an area of emphasis ranging from biometry, mathematical modeling, and resource management. Additional elective coursework in basic biology and ecology gives students greater insight into the environmental systems in which they expect to apply their quantitative training.

## Master of Science

36 credits
Requirements for successful completion of the master of science degree include:

1. Successful completion of a minimum 36 quarter credits, including 27 course credits and 9 thesis credits, with at least 18 credits of coursework numbered 500 or above, including a thesis.
2. Receipt of numerical grades in at least 18 quarter credits of coursework taken at the UW.
3. Completion of a seminar on results of the research and oral defense of the thesis.
4. Completion of all University requirements for graduation.

## Doctor of Philosophy

90 credits
Requirements for successful completion of the doctoral degree, minimum of 90 credits, include:

1. Successful completion of the QERM qualifying examinations at the PhD level, following the first year of study.
2. Successful completion of a minimum of 90-quarter credits, including 27 dissertation credits. Completion of an MS degree may be applied toward one year of the PhD program. The core QERM courses must be taken if the student has obtained an MS from a different program.
3. A seminar on results of the research and an oral defense of the dissertation.
4. Completion of all University requirements for graduation.

## Financial Aid

The QERM program offers incoming students a nine month fellowship funded by the Graduate School. Students secure their own funding starting at year two, typically in the form of a teaching or research assistantship. Tuition and health insurance are typically included as part of the financial package. Funding decisions are made annually; attempts are made to continue support for students making satisfactory progress.

## COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations.

QERM 514 Analysis of Ecological and Environmental Data
I (4) Conquest Overview of generalized linear models (GLMs), their use in forestry, fisheries, wildlife ecology, and environmental monitoring. Analysis of the statistical tests that fall under GLMS: chi-square tests on contingency tables, t-tests, analysis of variances, etc. Statistical software S+/R used throughout. Offered: Sp.
QERM 597 Seminar in Quantitative Ecology (2) Current topics in quantitative ecology and resource management. Fisheries, forestry, and marine resources. Of fered: ASp.

QERM 598 Special Topics in Quantitative Resource Management (1-3, max. 12) Population and community ecology, systems ecology, and physical processes in ecosystems. Prerequisite: permission of instructor.
QERM 599 Research in Quantitative Resource Management and Ecology (*, max. 12) Topics can be theoretical in nature or combined theory and experiment. Research might be a prelude to thesis or dissertation research. Credit/no-credit only.

QERM 600 Independent Study or Research (*)
QERM 700 Master's Thesis (*)
QERM 800 Doctoral Dissertation (*)

## Urban Design and Planning

The PhD in Urban Design and Planning at the University of Washington is one of 39 PhD programs in urban and regional planning in North America, and one of the oldest, founded in 1967. This program brings together faculty from disciplines ranging from architecture to sociology to focus on the interdisciplinary study of urban problems and interventions. Covering scales from neighborhoods to metropolitan areas, the program addresses interrelationships between the physical environment, the built environment, and the social, economic, and political institutions and processes that shape urban areas. The breadth of this program permits students to pursue doctoral studies in the various aspects of urban design and planning as well as in a number of related social science, natural resource, and engineering areas.
The program seeks to prepare scholars who can advance the state of research, practice, and education related to
the built environment and its relationship to society and nature in metropolitan regions throughout the world. It provides a strong interdisciplinary educational experience that draws on the resources of the entire University, and on the laboratory provided by the Seattle metropolitan region and the Pacific Northwest. The program emphasizes the educational values of interdisciplinarity, intellectual leadership and integrity, and the social values of equity, democracy, and sustainability. It seeks to promote deeper understanding of the ways in which public decisions shape and are shaped by the urban physical, social, economic, and natural environment. The program envisions its graduates becoming leaders in the international community of researchers, practitioners, and educators who focus on improving the quality of life and environment in metropolitan regions.

## GRADUATE PROGRAM

Graduate Program Coordinator
311 Loew, Box 352192
(206) 543-6398

## Doctor of Philosophy

## Admission Requirements

Admission to the PhD program is based on evidence of promise of high scholarly achievement and research orientation. The applicant's statement of purpose, Graduate Record Examination (GRE) test results, letters of recommendation, and examples of past work constitute the basis for the admission evaluation.

Applicants typically have a master's degree in fields ranging from planning and public affairs to natural and social sciences. Students interested in a professional degree in urban design and planning should apply to the master's program in urban design and planning.
Application Deadline: All application materials are due by February 1. International applicants are encouraged to submit the Graduate School on-line application form by November 1.

For more information, see the program's website

## Degree Requirements

90 credits, divided into three phases.

## Phase I: The Core Curriculum

The core curriculum defines the intellectual foundation of the program. While the program retains considerable flexibility in defining a research agenda within urban and environmental planning and policy, it provides a common foundation for all students to build upon. Students enter the program with a master's degree, in fields ranging from planning and public affairs to natural and social sciences. Depending on the academic preparation of the student, the core requirements can be met within one to two years.
Required Courses: Five courses, normally completed during the first year unless schedule conflicts make this infeasible. Courses from Phase II requirements may also be taken in the first year.

1. Core Sequence: URDBP 591, URBDP 592, URBDP 593
2. Restricted Electives (before completion of Phase I):
a. Qualitative Research Methods: One of the following: URBDP 598, GEOG 425, HIST 598, HSERV 526, POL S 493.
b. Quantitative Research Methods: One of the following: CS\&SS 594, CS\&SS 504, CEE 584

## Phase II: Area of Study

Students develop with their Supervisory Committee a description of their proposed areas of study. These areas of scholarship must demonstrate an interdisciplinary research approach to an application within urban and environmental planning and policy. The description should develop a curriculum proposal approved by the Supervisory

Committee that addresses the following advanced study requirements:
Curriculum Requirements: Seven courses and a teaching seminar, in addition to advanced courses directly related to the area of study selected by the student. Some courses may be taken in the first year.

1. Urban Processes and Patterns: Three courses - For course options, see program website at depts.washington.edu/urbdpphd/Phase_II.shtml.
2. Research Design and Methods: Two courses - For course options, see program Website at depts.washington.edu/urbdpphd/Phase_II.shtml.
3. Urban and Environmental Design and Planning: Two courses - For course options, see program Website at depts.washington.edu/urbdpphd/Phase_II.shtml.
4. Teaching Methods: One teaching seminar and experience as a TA for at least one quarter, before completion of Phase III.

General Examination: A critical review of the literature in the area of study, developed by the student, which integrates interdisciplinary research on that area of study and identifies areas of potential research opportunity that may subsequently form the basis for a dissertation proposal. The review should demonstrate broad familiarity with relevant research in the chosen area, and with the range of theory and methods applied within the reviewed literature.

## Phase III: Dissertation

Once the student passes the general examination, he or she is advanced to the level of doctoral candidate, and is expected to build on the critical review of the literature to develop a dissertation proposal. The dissertation proposal should demonstrate the characteristics of interdisciplinarity, relevance to urban and environmental planning and policy, and potential for contribution to scholarship.

## Financial Aid

The Interdisciplinary PhD program in Urban Design and Planning attempts to provide funding for doctoral program applicants in a way that makes the program attractive to the strongest potential applicants, ensures their effective mentoring while in the program, and actively engages and energizes faculty to improve the program and to bring research funding to support students.

# Interschool or Intercollege Programs 

## Bioengineering

N107 William H. Foege Building

Bioengineering encompasses a wide range of activities in which the disciplines of engineering and biological or medical science intersect. Such multidisciplinary endeavors are yielding new discoveries and major advances that are revolutionizing the healthcare system. The Department of Bioengineering, housed jointly in the School of Medicine and the College of Engineering, provides a comprehensive, multidisciplinary program of education and research and is recognized as a leading bioengineering program in the world. Major areas of research and education include distributed diagnosis and home healthcare (d2h2), molecular bioengineering and nanotechnology, engineered biomaterials and tissue engineering, medical imaging and imageguided therapy, and computational bioengineering.

## UNDERGRADUATE PROGRAM

## Adviser

N107 William H. Foege Building, Box 355061
(206) 685-2000
bioeng@uw.edu
depts.washington.edu/bioe/programs/bachelors/ bs.html

The Bioengineering Program offers the following programs of study:

- The Bachelor of Science in Bioengineering degree
- The Bachelor of Science in Bioengineering degree with an option in nanoscience and molecular engineering
- A five-year BS/MS option (consult website or adviser for details)
- Bachelor of Science in Bioengineering

Suggested First- and Second-Year College Courses: CHEM 142, CHEM 152, and CHEM 162 (or CHEM 144, CHEM 154, and CHEM 164); CSE 142, English composition, MATH 124, MATH 125, MATH 126, PHYS 121.

## Department Admission Requirements

Admission is competitive. Students may be admitted at three different points. Consult the department's website for more information.

1. Direct Admission. The department enrolls up to 35 percent of its incoming class directly from high school. Students accepted to the UW who indicate bioengineering as their preferred major on their freshman application are considered. Strong applicants have completed chemistry, biology, and calculus in high school. Admission is for autumn quarter only.
2. Early Admission. Students enrolled at the UW are eligible to apply at the end of the freshman year if they have completed and earned at least a 2.50 GPA in the following courses: MATH 124, MATH 125, MATH 126; CHEM 142, CHEM 152, CHEM 162 (or CHEM 144, CHEM 154, CHEM 164); and 5 credits of English composition. A 2.50 GPA guarantees consideration but not admission. Application deadline is July 1 for autumn quarter admission.
3. Upper Admission. Requires 59 credits of coursework with at least a 2.50 GPA: MATH 124, MATH 125, and

MATH 126; CHEM 142, CHEM 152, CHEM 162 (or CHEM 144, CHEM 154, and CHEM 164); PHYS 121, PHYS 122; BIOL 180, BIOL 200; AMATH 301; and 5 credits of English composition. Any of BIOL 180, PHYS 122, and AMATH 301 may be in progress at time of application. A 2.50 GPA guarantees consideration but not admission. Application deadlines are February 1 for spring quarter and July 1 for autumn quarter. Consult the department's website or adviser for more details.

Nanoscience and Molecular Engineering Option (NME): Admission to the NME option for bioengineering majors is by self-selection and normally occurs in winter quarter of the junior year, upon completion of all bioengineering prerequisites and formal admission to the BS bioengineering major. Students applying for the NME option should indicate that interest on their bioengineering major application and discuss their interests/background in their application personal statement.

## Graduation Requirements

Students follow requirements in effect at time of entry into the department. 180 credits as follows:

## General Education Requirements (105 credits)

1. Areas of Knowledge: 24 total credits in Visual, Literary, \& Performing Arts (VLPA) and Individuals \& Societies (I\&S), with at least 10 credits in each area.
2. Written and Oral Communication (5 credits): 5 credits of English composition, from the approved University list. Additional writing credits are built into the major core courses
3. Mathematics ( 24 credits): MATH 124, MATH 125, MATH 126; either MATH 307 or AMATH 351; either MATH 308 or AMATH 352; STAT 390 or IND E 315
4. Natural Science (44 credits): CHEM 142, CHEM 152, CHEM 162 (or CHEM 144, CHEM 154, CHEM 164) and CHEM 223 (or CHEM 237); PHYS 121, PHYS 122; BIOL 180, BIOL 200, BIOL 220
5. General Electives (8 credits)

## Major Requirements ( $\mathbf{7 2}$ credits)

1. Engineering Fundamentals ( 4 credits): AMATH 301
2. Bioengineering Core ( 44 credits): BIOEN 215, BIOEN 315, BIOEN 316, BIOEN 317, BIOEN 325, BIOEN 326, BIOEN 327, BIOEN 335, BIOEN 336, BIOEN 337, BIOEN 345, BIOEN 401; either 10 credits of BIOEN 402, or 4 credits of BIOEN 403 plus BIOEN 404 and BIOEN 405.
3. Bioengineering Senior Electives ( 15 credits): Fifteen (15) credits from an approved departmental list, including completion of one of three concentration areas: Molecular and Materials Bioengineering: four courses from approved departmental concentration list. Cells, Tissue, and Systems Bioengineering: four courses from approved departmental concentration list. Diagnostics and Therapeutic Instruments: PHYS 123; four courses from approved departmental concentration list. See department for approved list.
4. Approved Engineering Electives (9 credits): Chosen from a departmentally approved list or from additional bioengineering senior elective credit. See department for approved list.
5. Grade Requirements: Minimum 2.0 grade in each bioengineering course applied to the major

## Nanoscience and Molecular Engineering Option Requirements (74 credits)

1. Engineering Fundamentals (4 credits): AMATH 301
2. Bioengineering Core ( 44 credits): BIOEN 215, BIOEN 315, BIOEN 316, BIOEN 317, BIOEN 325, BIOEN 326, BIOEN 327, BIOEN 335, BIOEN 336, BIOEN 337, BIOEN 345, BIOEN 401; either 10 credits of BIOEN 402 or 4 credits of BIOEN 403 plus BIOEN 404 and BIOEN 405
3. Nanoscience and Molecular Engineering Courses (21 credits): NME 220, NME 321, NME 421; minimum four additional approved nanoscience and molecular engineering electives, to be chosen from an approved departmental list; additional senior elective credits as needed to total 15 . The senior capstone ( $4-10$ credits from BIOEN 402 or BIOEN 403) must be in an NME area.
4. Approved Engineering Electives: 5 credits
5. Minimum 2.0 grade in each bioengineering course applied to the major

## Student Outcomes and Opportunities

- Learning Objectives and Expected Outcomes: Bioengineering students learn to apply engineering synthesis and analysis to biological problems and to glean design principles from nature to solve medical problems and create biomedical devices and materials. A key piece of the degree program is the senior capstone research and design project, through which students develop their knowledge and skills by joining in the department's cutting-edge research. Bioengineering graduates are prepared to enter graduate school, medical school, or the growing biomedical industry. The department's goal is to prepare students to be leaders and innovators in improving human health and healthcare. Bioengineering graduates have the ability to apply knowledge of mathematics, science, and engineering; the ability to design and conduct experiments, as well as to analyze and interpret data; the ability to design a system, component, or process to meet desired needs; the ability to function on multi-disciplinary teams; the ability to identify, formulate, and solve engineering problems; an understanding of professional and ethical responsibility; the ability to communicate effectively; the broad education necessary to understand the impact of engineering solutions in a global and societal context; a recognition of the need for, and an ability to engage in, life-long learning; knowledge of contemporary issues; the ability to use the techniques, skills, and modern engineering tools necessary for engineering practice; an understanding of biology and physiology; the capability to apply advanced mathematics (including differential equations and statistics), science, and engineering to solve the problems at the interface of engineering and biology; the ability to make measurements on and interpret data from living systems, addressing the problems associated with the interactions between living and non-living materials and systems.
- Instructional and Research Facilities: The department is housed in the newly constructed Foege North building. Amenities include instructional laboratories, an advanced computing lab for class instruction and student use, a general computer lab for student use, a student work room, a seminar room, and meeting space. Departmental offices are also located in this building. Other laboratories are located in the College of Engineering and the School of Medicine. The Department of Bioengineering houses UWEB (University of Washington Engineered Biomaterials), participates in the Center for Nanotechnology, and sponsors many other research centers relating to our five thrust areas in computational bioengineering, distributed diagnosis and home healthcare, engineered biomaterials, medical imaging and image-guided therapy, and molecular bioengineering and nanotechnology.
- Honors Options Available: College Honors (Completion of both Interdisciplinary Honors and Departmental Honors requirements). Departmental Honors (see adviser for requirements). For Interdisciplinary Honors, see University Honors Program.
- Research, Internships, and Service Learning: Many un dergraduate bioengineers are involved in internships. The department participates in the College of Engineer-
ing Co-op Program and maintains an internship Website for majors.
- Department Scholarships: Several scholarships are available for majors.
- Student Organizations/Associations: The Biomedical Engineering Society (BMES), the campus chapter of the national professional organization, organizes social events as well as events that support student interest in medical school, graduate school, and industry.

Of Special Note: Courses on technology commercialization are available to seniors.

## GRADUATE PROGRAM

Graduate Program Coordinator
N107 William H. Foege Building, Box 355061
(206) 685-2000
bioeng@uw.edu

The Department of Bioengineering offers programs of study which lead to the Master of Science (MS), the Master of Pharmaceutical Bioengineering (PHARBE), and Doctor of Philosophy (PhD) degrees.

## Master of Science

The Master of Science degree program provides breadth of knowledge of engineering, biology, and medicine, and depth of knowledge in a particular research area. The degree prepares students for careers in academic, industrial, or hospital environments.

## Admission Requirements

All application materials must be received in the appropriate office by the deadline. International applications are due by December 1; domestic applications are due by December 15. Late and/or incomplete applications are not reviewed. Required application items include:

1. Online application: www.grad.washington.edu/applForAdmiss/.
2. Department of Bioengineering Admission Form
3. Statement of Purpose
4. Resume/Curriculum Vitae
5. Three letters of recommendation
6. Unofficial transcripts only (official transcripts are requested once an offer has been made)
7. Official GRE scores (sent to code 4854, and must be sent before the deadline)
8. Official TOEFL scores (from international applicants only, and must be received before the deadline)
More information about the application is online at depts. washington.edu/bioe/education/prospective/educ_prospective.html. Materials sent in addition to those listed above are considered non-essential and do not enhance the application.

Applicants are expected to have the following courses as part of their undergraduate education: ordinary differential equations, linear algebra, signal analysis, probability theory and statistics, programming, electrical engineering and physics, chemistry, materials science, rate processes and mathematics, and cell and molecular biology. Admitted students must be knowledgeable of these topics prior to entrance to the M.S. program.

## Degree Requirements

Course requirements for the MS in Bioengineering are detailed below. All core and elective courses must be taken for a numerical grade. Students must complete a one-quarter teaching assistantship. The timing of the teaching as-
sistantship is decided in consultation with the department and the faculty adviser.
Note: A single course may not count for two separate requirements.

36 credits as follows:

1. Molecular Bioengineering: BIOEN 501 (4)
2. Cellular Bioengineering: BIOEN 502 (4)
3. Systems Bioengineering: BIOEN 503 (4)
4. Biostatistics (4)
5. Bioengineering seminar: BIOEN 510 (1)
6. Bioengineering elective courses, chosen in consultation with faculty adviser: 10 credits
7. Master's thesis: BIOEN 700 ( 9 credits)

## Master of Pharmaceutical Bioengineering

The Master of Pharmaceutical Bioengineering (PHARBE) program is an evening degree program designed to enable working local engineers, scientists, researchers, and professionals in the biotechnology, pharmaceutical, and related industries to explore advanced education in the areas of molecular and cellular biology, drug discovery and design, pharmaceutics, and translational pharmaceutics. Professionals may also complete three certificate programs without applying for degree status.

## Admission Requirements

1. BS degree or equivalent in a relevant science (field/ research), public health (biomedical related) or engineering (field/research) related, or have a BS degree or equivalent in unrelated field and two years' experience working within a scientific or engineering group for a biotechnology or pharmaceutical company or related industry. Clinical degrees are considered.
2. Applicants who have a bachelor's degree other than a BS, professional experience, and completed recommended prerequisite course work are also considered for admission.
3. Minimum 3.00 GPA in the last 90 quarter credit hours (60 semester credit hours). Students who have a BA/BS degree with under a 3.00 GPA and have two years' work experience may be approved for graduate non-matriculated (GNM) status for basic biosciences. Students who receive a 3.0 or above in their basic biosciences courses under GNM status are considered for degree admissions.
4. Official GRE scores
5. One set of official (unopened) transcripts from each non-UW institution attended
6. Prerequisite Course Requirements: The following courses must be completed with a 2.0 or greater in each course before applying to the degree program. Students whose undergraduate degree majors are in engineering, biology, chemistry or pharmacy are exempt from the prerequisite course requirement.
a. Calculus: Minimum of one quarter (or one semester) of college calculus
b. Chemistry: Minimum of two quarters (one semester) of college general chemistry Additional course in organic chemistry recommended.
c. Biology: Minimum of one quarter (semester) of general biology
d. Physics: One quarter (PHYS 114).
7. Applicants are evaluated on professional experience, previous degrees earned, or most recent/undergraduate GPA, basic biosciences courses GPA (if applicable), letters of recommendation, statement of intent, and GRE test scores. Admission to the program is not guaranteed.
8. Applicants who do not qualify for admission to the PHARBE degree program may be admitted to courses and/or to Pharmaceutical Bioengineering Certificate programs.
9. English Proficiency: Students who are non-native Eng lish speakers are expected to have adequate English language proficiency. The Graduate School requires a TOEFL score of at least 580, unless applicants are citizens of Australia, Canada, Ireland, New Zealand, or the United Kingdom; or hold a bachelor's or advanced degree from an accredited institution in any of these countries.

## Degree Requirements

Minimum 40 credits, with a minimum cumulative GPA of 3.00, as follows:

1. Basic Biosciences Curriculum (20 credits): Molecular and Cellular Biology I (4), Molecular and Cellular Biology II (4), Pharmaceutics I (4), Pharmaceutics II (4), Statis tics and Experimental Design (4)
2. Advanced Tracks: Students are required to take 16 credits from one of two advanced tracks in translational pharmaceutics or drug discovery and design. Students must complete 20 credits of the basic biosciences core courses before enrolling in advanced track courses.
3. Translational Pharmaceutics (16 Credits): Preclinical Development (4), Process Development (4), Formulation and Delivery (4), Clinical Development (4)
4. Drug Discovery and Design (16 Credits): Molecular Biotechnology (4), Drug Discovery \& Design (4), Molecular Targets \& Drug Classes (4), Systems Biology and Bioinformatics (4)

## 5. Departmental Seminar (4 Credits)

6. Optional Capstone Project: Students have the option of completing a professional capstone project in either the drug discovery and design orpProcess development courses.

## Doctor of Philosophy

The objective of the PhD program is to train individuals for careers in bioengineering research and teaching. The program has three major objectives: (1) breadth of knowledge about engineering, biology, medicine, and the interdisciplinary interface between these different fields; (2) depth of knowledge and expertise in a particular scientific specialty; (3) demonstrated independence as a bioengineering researcher. These objectives are fulfilled through a combination of educational and research experiences. The program is rigorous but maintains flexibility to accommodate qualified students from diverse academic backgrounds. Entrance to the PhD program does not require prior completion of the M.S. degree and may be made directly after the BS An optional dual PhD degree in bioengineering and nanotechnology is available; see www.nano.washington. edu for more information

## Admission Requirements

See the application process detailed in the MS section.
While it is not required to complete an MS degree before beginning the PhD, every graduate student is expected to have the following courses as part of her or his undergraduate education: ordinary differential equations, linear algebra, signal analysis, probability theory and statistics, programming, electrical engineering and physics, chemistry, materials science, processes and mathematics, and cell and molecular biology. Admitted students must be knowledgeable of these topics prior to entrance to the PhD program.

## Degree Requirements

90 credits, to include:

The PhD program consists of a rigorous set of core cours es, elective courses, and a focused research project. Three major milestones punctuate that work: the qualifying examination, the general examination, and the final examination (dissertation defense). Additionally, students must complete a one-quarter teaching assistantship. The timing of the teaching assistantship is decided in consultation with the department and the faculty adviser.
All core and elective courses must be taken for a numerical grade. A single course may not count for two separate requirements. Required courses include:

1. Molecular Bioengineering: BIOEN 501 (4)
2. Cellular Bioengineering: BIOEN 502 (4)
3. Systems Bioengineering: BIOEN 503 (4)
4. Biostatistics (4)
5. Bioengineering Seminar: BIOEN 510 (1)
6. 16 credits of bioengineering elective courses, chosen in consultation with faculty adviser
7. 27 credits of dissertation writing (BIOEN 800)

Ordinarily, a student progressing well will follow this schedule:

1. First Year: Complete one to three lab rotations and select a thesis adviser no later than the end of spring quarter.
2. Second Year: Pass the qualifying examination and form a Supervisory Committee by the end of that year.
3. Third Year: Pass the general examination.
4. Fourth Year (and subsequent years): Make an annual progress report to, and receive feedback from, the Supervisory Committee.
5. Fifth Year: Defend the dissertation.

## Medical Scientist Program

A Medical Scientist Training Program (MSTP) exists for the support of individuals interested in coordinated graduate school/medical school study leading to both the MD and PhD degrees. Students entering this highly competitive program are given an opportunity to pursue a flexible, combined course of study and research. Early inquiry is essential for this option. Contact the MSTP office at (206) 685-0762.

## Research Facilities

As the Department is established within the College of Engineering and the School of Medicine, bioengineering students have access to all engineering and health science departments and facilities. A wide range of technologies and virtually all aspects of biomedical research tools are available.

## Financial Support

Financial support is available to qualified graduate students in the form of traineeships, fellowships, and teaching and research assistantships. Funding is derived from federal research and training programs, the Graduate School Fund for Excellence and Innovation, and programs sponsored by private agencies. Questions regarding financial support may be directed to the adviser.

## COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations.

## Bioengineering

BIOEN 215 Introduction to Bioengineering Problem Solving (3) Taylor Introduces bioengineering through a problem solving approach. Topics include: creative problem solving techniques, self-directed inquiry, en-
gineering ethics, social constraints, and engineering design process.
BIOEN 290 Guided Independent Studies on Transformative (4) NW Pollack Intensive laboratory experience mixed with lectures, readings, and discussions aimed at achieving deep understanding of scientific approach, particularly the nature of paradigm shifts, role of governmental support and management of science, power of orthodoxy, role of challenger, and fate of unpopular scientific views. Offered: W.

BIOEN 299 Introduction to Bioengineering (1) Verdugo Lectures on the various aspects of bioengineering; orientation in bioengineering studies and practice. Credit/no-credit only. Offered: ASp.
BIOEN 315 Biochemical Molecular Engineering (3) Ratner Introduces the requisite organic, physical, and biochemistry for incoming bioengineers to understand biological systems at the molecular level. Prerequisite: CHEM 223, CHEM 237 or CHEM 335; BIOL 200, which may be taken concurrently. Offered: Sp .
BIOEN 316 Biomedical Signals and Sensors (3) Neils Introduces the sources, detection, and processing of signals in medical instrumentation. Includes analog and digital signal processing in the time and frequency domains. Emphasizes component strengths and limitations, to develop systems that improve safety, accuracy, and reliability. Prerequisite: AMATH 301 and PHYS 122; BIOEN 317, which must be taken concurrently; either MATH 307 or AMATH 351, which may be taken concurrently. Offered: Sp.
BIOEN 317 Biomedical Signals and Sensors Laboratory (2) Curra Uses computational and experimental projects covering methods to acquire, process, and analyze signals from physiological and biochemical origins. Co-requisite: BIOEN 315 and BIOEN 316. Offered: Sp.
BIOEN 325 Biotransport I (3) Lewis Introduces momentum and heat transport in medical and biological systems. Examines how differential and control-volume analyses produce ordinary and partial differential equations; develops analytical and computational solution methods. Prerequisite: AMATH 301; either MATH 136, MATH 307, or AMATH 351; PHYS 122; BIOL 220. Offered: A

BIOEN 326 Solid and Gel Mechanics (3) Thomas Introduces solid mechanics and interactions of biological structures and medical materials. Emphasizes the relationships between composition, structure, properties, and performance of metals and ceramics, synthetic and natural macromolecules, cells, tissues, and self assembling systems. Prerequisite: either CHEM 162, CHEM 164, or CHEM 165; PHYS 122; minimum grade of 2.0 in BIOEN 315. Offered: A.
BIOEN 327 Fluids and Materials Laboratory (2) Neils Practical exploration of the behavior of fluids and soft materials that occur in biological systems and biomedical devices; and the interaction between cells and their environment. Includes methods of measurement, analysis, and design. Co-requisite: BIOEN 325 and BIOEN 326. Offered: A.
BIOEN 335 Biotransport II (3) Woodrow Studies the principles of combined mass transport in homogeneous and heterogeneous reaction systems as applied to biological processes. Introduces chemical and biochemical reaction kinetics, methods of evaluating kinetic parameters for reaction rate data, and prediction of the performance of biological and biochemical processes. Prerequisite: minimum grade of 2.0 in BIOEN 325. Offered: W.

BIOEN 336 Bioengineering Systems and Control (3) Sauro Reviews linear and nonlinear systems analysis and control system design and biological and medical applications. Prerequisite: minimum grade of 2.0 in

BIOEN 327; either MATH 136, MATH 308, or AMATH 352. Offered: W.

BIOEN 337 Mass Transport and Systems Laboratory (2) Taylor Uses computational and experimental laboratory exercises to demonstrate time- and space-dependent linear and nonlinear systems with specific emphasis on bioengineering application. Prerequisite: BIOEN 327; BIOEN 335 and BIOEN 336, which must be taken concurrently; either MATH 390, STAT 390 , or IND E 315, which may be taken concurrently. Offered: W.
bIOEN 345 Failure Analysis and Human Physiology (4) Pun, Regnier, Thomas Applies engineering analysis to understand human physiology and pathology of the engineering of solutions to medical and biological problems. Includes laboratory. Prerequisite:minimum grade of 2.0 in each of BIOEN 215, BIOEN 335, BIOEN 336, and BIOEN 337. Offered: Sp.
bIOEN 401 Bioengineering Capstone Principles (3) Yager Teaches design principles in bioengineering and guides the development of design and researchbased senior capstone projects. Prerequisite: either MATH 390, STAT 390, or IND E 315. Offered: Sp.

BIOEN 402 Bioengineering Capstone Research and Design (2-6, max. 10) Independent senior design project. Prerequisite: BIOEN 401. Offered: AWSpS.

BIOEN 403 Bioengineering Capstone Research (2-, max. 4) Independent senior research project. Prerequisite: BIOEN 401. Offered: AWS.

BIOEN 404 Bioengineering Team Design I (3) Neils First course in team design project course sequence. Prerequisite: BIOEN 401. Offered: W.
BIOEN 405 Bioengineering Team Design II (3) Neils Second course in team design project course sequence. Prerequisite: BIOEN 404. Offered: Sp.
BIOEN 410 Bioengineering Honors Seminar (1) Nichols, Taylor Service-learning for departmental honors students. Credit/no credit only. Offered: A.
BIOEN 420 Medical Imaging (4) Yuan Various medical imaging modalities (x-rays, CT, MRI, ultrasound, PET, SPECT optical imaging, etc.) and their applications in medicine and biology. Extends basic concepts of signal processing (BIOEN 303) to the two and three dimensions relevant to imaging physics, image reconstruction, image processing, and visualization. Prerequisite: either BIOEN 316 or E E 235; either MATH 136, MATH 308, or AMATH 352; either CSE 142 or AMATH 301.
BIOEN 423 Introduction to Synthetic Biology (3) Studies mathematical modeling of transcription, translation, regulation, and metabolism in cell; computer-aided design methods for synthetic biology; implementation of information processing, Boolean logic and feedback control laws with genetic regulatory networks; modularity, impedance matching and isolation in biochemical circuits; and parameter estimation methods. Prerequisite: either MATH 136 or MATH 307, AMATH 351, or CSE 321 and MATH 308 or AMATH 352. Offered: jointly with E E 423/CSE 486.

BIOEN 424 Advanced Systems and Synthetic Biology (3) Covers advanced concepts in system and synthetic biology. Includes kinetics, modeling, stoichiometry, control theory, metabolic systems, signaling, and motifs. All topics are set against problems in synthetic biology. Prerequisite: either BIOEN 401, BIOEN 423, E E 423, or CSE 486. Offered: jointly with E E 424/ CSE 487; W.
BIOEN 425 Laboratory Methods in Synthetic Biology (4) Designs and builds transgenic bacterial using promoters and genes taken from a variety of organisms. Uses construction techniques including recombination, gene synthesis, and gene extraction. Evaluates
designs using sequencing, fluorescence assays, enzyme activity assays, and single cell studies using time-lapse microscopy. Prerequisite: either BIOEN 423, E E 423, or CSE 486; either CHEM 142, CHEM 144, or CHEM 145. Offered: jointly with E E 425/CSE 488.

BIOEN 440 Introduction to Biomechanics (4) Sanders Presents the mechanical behavior of tissues in the body and the application to design of prostheses. Tissues studies include bone, skin, fascia, ligaments, tendons, heart valves, and blood vessels. Discussion of the structure of these tissues and their mechanical response to different loading configurations. An important part of the class is a final project. Offered: jointly with M E 445; Sp.
BIOEN 455 BioMEMS (4) Folch Introduction to BioMEMS. State-of-the-art techniques in patterning biomolecules, machining three-dimensional microstructures and building microfluidic devices. Various biomedical problems that can be addressed with microfabrication technology and the engineering challenges associated with it. Biweekly labs. Prerequisite: BIOEN 316. Offered: W.
BIOEN 457 Advanced Molecular Bioengineering (4) Stayton Fundamentals of molecular recognition: thermodynamics, forces, kinetics. Manipulation of recognition processes for current molecular bioengineering research and development. Fundamental physical chemistry of molecular recognition in the context of biomedicine. Therapeutics based on cells. Prerequisite: either BIOEN BIOEN 315 and BIOEN 335. Offered: Sp.
BIOEN 467 Biochemical Engineering (3) Baneyx Application of basic chemical engineering principles to biochemical and biological process industries such as fermentation, enzyme technology, and biological waste treatment. Rapid overview of relevant microbiology, biochemistry, and molecular genetics. Design and analysis of biological reactors and product recovery operations. Prerequisite: either CHEM 223 with CHEM E 340 or either CHEM 237 or CHEM 335; recommended: CHEM E 465. Offered: jointly with CHEM E 467; Sp.
BIOEN 485 Computational Bioengineering (4) Thomas, Vicini Introduction to computational, mathematical, and statistical approaches to the analysis of biological systems, including systems and control theory, molecular models, and bioinformatics. Lectures and laboratory sessions emphasize practical problems in kinetics, metabolism and genomics. Prerequisite: CSE 142; BIOEN 315; either MATH 126, MATH 308 or AMATH 352. Offered: A.
BIOEN 487 Bioengineering and Nanotechnology (4) Explores basic concepts of nanoscience and the current literature, focusing on practical applications for nanotechnology in biology and medicine. Prerequisite: CHEM 142, CHEM 144, or CHEM 145; BIOL 180.
BIOEN 488 Computational Protein Design (4) Daggett Explores methods in protein engineering, emphasizing biomedical and biotechnological applications. Includes molecular visualization, homology modeling, molecular dynamics, computational protein design, and evaluation of designs. Introduces current research in subject area. Students learn to use and apply computational tools to investigate design problems. Prerequisite: BIOEN 315.

BIOEN 490 Engineering Materials for Biomedical Applications (3) Horbett Combined application of principles of physical chemistry and biochemistry, materials engineering, to biomedical problems and products. Applications include implants and medical devices, drug delivery systems, cell culture processes, diagnostics, and bioseparations. Offered: jointly with CHEM E 490; A.

BIOEN 491 Controlled-Release Systems: Principles and Applications (3) Pun Mechanisms for controlled release of active agents and the development of useful drug delivery systems for this purpose. Release mechanisms considered include diffusive, convective, and erosive driving forces. Delivery routes include topical, oral, and in vivo. Some special case studies covered in detail. Offered: jointly with CHEM E 491; W.
BIOEN 492 Surface Analysis (3) B. Ratner Understanding of solid surfaces for research and development in microelectronics, catalysis, adhesion, biomaterials, science wear, and corrosion science. Newer methods available to study surfaces of materials. Electron emission spectroscopies (ESCA, Auger): ion scattering, ion spectroscopic, photon spectroscopic, and thermodynamic methods. Offered: jointly with CHEM E 458; Sp.
BIOEN 493 Advanced Surface Analysis (3) Caster Covers the latest advanced in surface analysis instrumentation and methodology, including advanced methods of biorecognition AFM, surface Plasmon resonance, $x$-ray photoelectron spectroscopy, sum frequency generation spectroscopy, time-of-flight secondary ion mass spectrometry, and multivariate analysis. Prerequisite: either CHEM E 458 or BIOEN 492. Offered: jointly with CHEM E 493; W.
BIOEN 497 Bioengineering Education Outreach (1-2, max. 6) Work with $\mathrm{K}-12$ schools or community organizations. Current science education research and instructional techniques. May involve presentations or instruction in hands-on activities.
BIOEN 498 Special Topics (1-6, max. 15) Topics of current interest in the field, offered as lectures, conferences, or laboratory. Offered: AWSpS.
BIOEN 499 Special Projects (1-6, max. 24) Individual undergraduate bioengineering projects (research or independent study) under the supervision of an instructor. Credit/no-credit only. Offered: AWSpS.
BIOEN 501 Molecular Bioengineering (4) Bryers Examines advanced topics in molecular diffusion, reaction kinetics, and convective transport modeling as applied to biological systems. Includes mathematical analysis and numerical simulation techniques applied to: Non-Fickian diffusion, rotational versus translational diffusion, immobilized enzyme kinetics, drug release, and gene delivery. Offered: A.
bIOEN 502 Cellular Bioengineering (4) Giachelli Covers basic principles of cell biology (including cell structure, function, and signaling), recombinant RNA/DNA technology, and specific examples of cellular bioengineering applications including gene delivery, RNA silencing, and tissue engineering. Prerequisite: BIOEN 501. Offered: W.

BIOEN 503 Systems Bioengineering (4) Regnier, Vicini Explores whole-body or organ physiology topics from an engineering perspective. Uses various model systems to elucidate engineering principles such as feedback control and homeostatic regulation. Includes real-world examples, computer modeling, and research design approaches. Prerequisite: BIOEN 502. Offered: Sp.

BIOEN 504 Introduction to Technology Commercialization (4) Explores essential business, legal, engineering, and other skills necessary to take new technology from research to market. Covers intellectual property, market analysis, licensing, funding mechanisms such as venture capital, and product marketing.
BIOEN 505 Biomedical Entrepreneurship (4) Explores essential business, legal, engineering, and other skills necessary to take new technology from research to market. Covers intellectual property, market analysis, licensing, funding mechanisms such as venture
capital, and product marketing; introduces strategic planning, management of commercialization effort. Recommended: BIOEN 504.
BIOEN 506 Applying Technology Commercialization (1) Focuses knowledge of entrepreneurship within the spaces of medical devices, hardware/software, and energy, into a practical description of a potential start-up company. Credit/no credit only. Corequisite: ENTRE 540.
BIOEN 508 Career Pathways in Academia (1.5) Stayton Overviews academic career options and job search preparation. Evaluates academic institutions and faculty appointments, identifies components of the academic curriculum vitae, teaching and research statements, and introduces tenure and faculty issues. Offered: A, even years.
BIOEN 509 Bioengineering Departmental Seminar (1, max. 16) Bassingthwaighte Research review and discussions centered on demonstrating approaches and solving scientific problems. Seminar lectures led by faculty and visiting faculty in Bioengineering and related disciplines. Credit/no-credit only. Offered: WSp.
BIOEN 510 Bioengineering Seminars (1) Introductory seminar for new graduate students; review of departmental research.
BIOEN 511 Biomaterials Seminar (1, max. 18) Hoffman, Horbett, Ratner Presentation of student research results. Credit/no-credit only. Prerequisite: permission of instructor. Offered: jointly with CHEM E 511.
bIOEN 513 Current Topics in Cardiac Physiology (1, max. 3) Regnier Current research in cardiac physiology. Student presentation and discussions of current research methodologies.
BIOEN 516 Medical Imaging Seminar (1) Weekly seminars, presented by UW faculty members, researchers and graduate students from UW, other academic institutions, and industry, on image computing and medical imaging. Topics include digital video, image processing, computer graphics, video/image compression, image analysis, algorithms and systems, pattern recognition, multimedia computer architectures, and other applications. Credit/no-credit only.
BIOEN 518 Nanotechnology Seminar (1, max. 18) Emphasizes frontier research in nanoscience and nanotechnology and on intellectual interactions within the nanotechnology community. Presented by experts in the field, with most being from other institutions. Prerequisite: graduate standing and permission of instructor. Credit/no-credit only. Offered: jointly with CHEM 597; AWSp.
BIOEN 520 Orthopedic Biomechanics (4) Ching Mechanical engineering applied to musculoskeletal system with emphasis on techniques in orthopedic surgery. Measurement of mechanical properties of tissues. mechanics of bone, soft tissue, and muscle, mechanics of upper extremity, spine, and lower extremity. Engineering in surgery, gait analysis, joint replacement, fracture fixation. Prerequisite: BIOEN 440.
BIOEN 522 Biomechanics of Soft Tissue (3) Sanders Applies soft tissue biomechanics to medical research. Develops specific biomechanical questions and experiments to address those aims or hypotheses.

BIOEN 523 Introduction to Synthetic Biology (3) Studies mathematical modeling of transcription, translation, regulation, and metabolism in cell; computer aided design methods for synthetic biology; implementation of information processing, Boolean logic and feedback control laws with genetic regulatory networks; modularity, impedance matching and isolation in biochemical circuits; and parameter estimation methods. Prerequisite: either MATH 136 or

MATH 307, AMATH 351, or CSE 321 and MATH 308 or AMATH 352. Offered: jointly with E E 523/CSE 586.
BIOEN 524 Advanced Systems and Synthetic Biology (3) Covers advanced concepts in system and synthetic biology. Includes kinetics, modeling, stoichiometry, control theory, metabolic systems, signaling, and motifs. All topics are set against problems in synthetic biology. Prerequisite: either BIOEN 523, E E 523, or CSE 586. Offered: jointly with E E 524/CSE 587; W.
bIOEN 530 Bioengineering Professional Series I: Literature Analysis (2) Daggett Skills in scientific literature analysis developed through topics in bioengineering. Credit/no credit only. Offered: A
BIOEN 531 Bioengineering Professional Series II: Proposal Writing (2) Regnier Covers grant and fellowship proposal writing. Offered: W.
BIOEN 532 Bioengineering Professional Series III: Professional Skills Development (1) Giachelli Key areas of professional development related to the bioengineering field, including oral communication, management, networking, and interviewing. Credit/no credit only. Offered: Sp

BIOEN 552 Microfabrication and Microfluidics (3) Folch, Yager Studies the use of 2- and 3-dimensional structures in research and biomaterials, cells, and complex liquids. Focuses on micropatterning of surfaces and microfluidic chemical analytical systems. Corequisite: BIOEN 553.

BIOEN 553 Microfabrication and Microfluidics Laboratory (2) Folch, Yager Studies the creation of 2- and 3-dimensional structures for use in research with biomaterials, cells, and complex liquids. Each student will fabricate at least one PDMS device and demonstrate its function. Credit/no-credit only. Co-requisite: BIOEN 552.

BIOEN 555 Water, Nature, and Biological Function (3) Pollack Explores emerging concepts of water at interfaces as a new and simpler way to understand many features of chemistry, physics, and biology. Considers new understanding in cell function, energy transduction, solar energy, flow, transport, weather, green science, and other basics of nature and engineering. Offered: Sp.

BIOEN 565 Nuclear Magnetic Resonance in Biomedicine (2) Basic physics of nuclear magnetic resonance (NMR) imaging and spectroscopy are presented. Research applications of NMR in physiology and biochemistry are reviewed with emphasis on the brain. Grade based on written tests and small research paper. Prerequisite: permission of instructor. Offered: jointly with RADGY 550.
BIOEN 568 Image-Processing Computer Systems (4) Kim Components of digital processing computer systems. Two-dimensional filtering and optimal filter design as well as basic image-processing operations. Selected advanced image-processing topics introduced. Individual student project. Prerequisite: permission of instructor. Offered: jointly with E E 568.

BIOEN 573 Biosensors and Biomedical Sensing (3) Yager In-depth overview of the principal types of biosensors. Topics include: how biological molecules are used in sensing, how the sensors operate, how different sensors compare, under what circumstances sensors can be useful, and the applicability of sensors to biomedical sensing.

BIOEN 576 Laboratory Techniques in Protein Engineering (4) Stayton Practical introduction to fundamentals of recombinant DNA technology and protein engineering. Gene design, bacterial molecular biology, genetic engineering strategy. Laboratory project focused on making site-directed protein mutations. Techniques include the Polymerase Chain Reaction, DNA sequencing, DNA cutting/splicing, protein expression.

Prerequisite: background in biochemistry or molecular biology or permission of instructor.
BIOEN 577 Cell and Protein Reaction with Foreign Materials (3) Horbett Study of ways in which cell and protein interactions with foreign materials affect the biocompatibility of biomaterials. Description of the phenomenology and mechanisms of protein adsorption, mammalian cell adhesion, and cell receptor biology and of methods used to study these phenomena. Surface properties of materials discussed in context of the course. Prerequisite: permission of instructor.
BIOEN 578 Biomembranes (3) Yager Develops an understanding of the molecular principles that underlie the self-assembly of surfactants into natural and model membranes; in particular, on the relationship between the chemical structure of lipid molecules and the three-dimensional aggregates that they form in water.

BIOEN 579 Host Response to Biomaterials (3) Giachelli Basic cell and molecular biology of the pathologies associated with biomaterial implantation that limit bioprosthetic use, including hemostasis, infection, acute and chronic inflammation, wound healing and fibrosis, and structural alterations. Major methods for histological analysis of retrieved implants. Prerequisite: general biology, BIOEN 490 (may be taken concurrently), or permission of instructor.
BIOEN 586 Tissue Engineering (3) Giachelli, Horbett Explores methods to restore or replace function in the cardiovascular, epithelial, urinary, nervous, skeletal, and other systems in the human body by use of constructs that contain living cells. Presents scaffold preparation, angiogenesis, and use of stem cells.

BIOEN 587 Bioengineering and Nanotechnology (4) Explores basic concepts of nanoscience and the current literature, focusing on practical applications for nanotechnology in biology and medicine.
bIOEN 588 Computational Protein Design (4) Daggett Explores methods in protein engineering, emphasizing biomedical and biotechnological applications. Includes molecular visualization, homology modeling, molecular dynamics, computational protein design, and evaluation of designs. Introduces current research in subject area. Students learn to use and apply computational tools to investigate design problems.

BIOEN 590 Advanced Topics in Biomaterials (3) Horbett Major, controversial issues in application of synthetic materials to medical problems. Blood compatibility, bioadhesion, intraocular lenses, contact lenses, polyurethanes, biodegradation, protein adsorption, corrosion, bone fixation, new materials, artificial heart, medical device regulation. Prerequisite: BIOEN 490 or CHEM E 490. Offered: jointly with CHEM E 590.
BIOEN 592 Surface Analysis (3) B. Ratner Understanding of solid surfaces for research and development in microelectronics, catalysis, adhesion, biomaterials science, wear and corrosion science. Newer methods available to study surfaces of materials. Electron emission spectroscopies (ESCA, Auger); ion scattering, ion spectroscopic, photon spectroscopic, and thermodynamic methods. Offered: jointly with CHEM E 558.

BIOEN 593 Advanced Surface Analysis (3) Caster Covers the latest advanced in surface analysis instrumentation and methodology, including advanced methods of biorecognition AFM, surface Plasmon resonance, x-ray photoelectron spectroscopy, sum frequency generation spectroscopy, time-of-flight secondary ion mass spectrometry, and multivariate analysis. Prerequisite: either CHEM E 558 or BIOEN 592. Offered: jointly with CHEM E 593; W.

BIOEN 598 Research Rotation (1-10, max. 30) Research rotation in the laboratories of core or adjunct faculty in the Department of Bioengineering. Credit/no-credit only. Offered: AWSpS.
BIOEN 599 Special Topics in Bioengineering (1-6, max. 30) Offered at a graduate level periodically by faculty members within the Department of Bioengineering; concerns areas of research activities with current and topical interest to bioengineers. Prerequisite: undergraduate or graduate courses (or equivalent) determined individually for each special topic.
BIOEN 600 Independent Study or Research (*) Offered: AWSpS.
BIOEN 700 Master's Thesis (*) Offered: AWSpS.
BIOEN 800 Doctoral Dissertation (*) Offered: AWSpS.

## Medical Engineering

MEDENG 519 Journal Research Seminar (1) Minie Presentation an discussion of topics related to the medical, clinical, and pharmaceutical technology fields. Of fered: jointly with PHARBE 519; AWSpS.
MEDENG 530 Cell Biology (4) Introduces fundamental molecular processes occurring in organisms. Emphasizes structure and organization of prokaryotic and eukaryotic cells, DNA replication, gene expression and regulation, protein biochemistry, signal transduction, and the extracellular matrix. Case studies illustrate concepts and how improper functioning of these systems leads to disease. Corequisite: MEDENG 531
MEDENG 531 Cell Biology Laboratory (2) Introduces basic microbiological and molecular biological techniques as applied to: isolation and identification of non-pathogenic bacteria, gene cloning and transfection, PCR, and bacteriophage genetics. Introduces mammalian cell and tissue culture techniques. Emphasizes lab safety and proper record keeping. Corequisite: MEDENG 530.
MEDENG 532 Medical Device Design (4) Baker Emphasizes human factors in the design and intellectual property of medical devices. Examines the useful and safe design of devices for patients, caregivers, physicians, technicians, and manufactures. Addresses the physical, mental, and environmental constraints which affect fitting a device to the human user. Considers design for the device's life cycle.

MEDENG 533 Regulatory Affairs for the Medical Device Industry (4) Reviews the government oversight of medical device development and those laws and regulations that apply to development, testing, and production of the devices. Examines the responsibilities of a regulatory affairs specialists in companies.

MEDENG 534 Medical Device Commercialization (4) Introduces practical skills and tools for commercializing medical device technologies. Topics include: entrepreneurship, funding models/sources, licens ing options and product portfolio growth models, introduction to developing and delivering a business plan, building teams or integrating teams, market assessment, converting R\&D to sales and distribution, manufacturing start up strategies, and project management.
MEDENG 536 Biosensors (4) Review of biosensors in use and under development, and their application in vivo and in vitro monitoring of humans.
MEDENG 537 Biomaterials and Biocompatibility (4) Covers materials science and biology needed to appreciate the use of materials in medicine and biol ogy. Subjects include an overview of applications, biocompatibility, biomaterials types and properties, bimolecular materials, protein adsorption, cells on biomaterials, diagnostics, smart materials, drug re-
lease, tissues engineering, biomechanics of medical devices, blood compatibility, and biosurfaces
MEDENG 538 Medical Imaging Diagnostics (4) Examines disease presentation and identification as seen in medical images; use of contrast enhancement methods in various image modalities; disease analysis, modern diagnostic imaging methods, and diagnostic indicators using various imaging techniques. Prerequisite: B STR 540; CONJ 585, or equivalent courses.

MEDENG 539 Clinical Diagnostics (4) Covers major diagnostic methods such as physical examination, chemical analysis, and microbiological analysis. Covers diagnostic process; presentation of patient, evaluation, documentation, communication between specialties, diagnosis, therapy choice, and outcome measurements. Prerequisite: P BIO 508; P BIO 520.

## Pharmaceutical Bioengineering

PHARBE 500 Molecular and Cellular Biology for Pharmaceutical Bioengineering I (4) Minie Covers fundamental molecular processes that occur in living organisms; including the structure and organization of prokaryotic and eukaryotic cells. Studies molecular basis of cellular structure and behaviors of cell membranes, environmental sensing and motility, signaling pathways, and differentiation. Integrates online literature/media resources and bioinformatics tools. Offered: W.

PHARBE 501 Molecular and Cellular Biology for Pharmaceutical Bioengineering II (4) Minie Uses a case based approved to examine prokaryotic and eukaryotic gene structure and regulation, viruses, signaling pathways, RNA, DNA, metagenomics, and systems biology. Integrates student presentations of select research topics into curriculum to develop critical thinking approaches to the latest developments in the field. Prerequisite: PHARE 500 or permission of instructor. Offered: Sp.

PHARBE 502 Pharmaceutics I (4) Covers the drug development process for both small molecules and biological form discovery stage through the end of phase 1. Addresses the science, logistics, and regulatory environment of preclinical (pharmacology, PKDM, toxicology, CMC) and early clinical development. Offered: A.
PHARBE 503 Pharmaceutics II (4) Benson Covers phases II and III of the drug development process. Topics include clinical study design, safety, pharmacology, and statistics. Provides an overview of the preparation and filing of the New Drug Application (NDA). Uses case studies to demonstrate key concepts. Prerequisite: PHARBE 502 or permission of instructor. Offered: W.
PHARBE 510 Preclinical Development (4) Covers basic principle of pharmacokinetics and its impact on treatment, including: single-dose intravenous and oral kinetics, multiple dosing, nonlinear pharmacokinetics, metabolite kinetics, pharmacogenetics, the role of disease in drug clearance and dose requirements, and kinetics of drug-drug interactions. Offered: A.
PHARBE 511 Process Development (4) Laursen Examines the principles involved in designed and developing production processes for protein therapeutics. Covers technologies, methods, and unit operations used in the development and GMP manufacture of biopharmaceuticals. Includes interdependencies of upstream, downstream, analytical, formulation and drug delivery technologies, illustrated with key biochemical, chemical, and physical chemical reaction examples. Offered: W.
PHARBE 512 Formulation and Delivery (4) Nehilla Introduces drug delivery and formulation principles, systems, and applications. Reviews administration routes and associated delivery barriers, connection
to drug pharmacokinetics/pharmacodynamics, and drug diffusion and permeation principles. Includes current and developmental biomaterials used for formulation and drug delivery systems. Offered: Sp.
PHARBE 519 Journal Research Seminar (1) Minie Presentation and discussion of topics related to the medical, clinical, and pharmaceutical technology fields. Offered: jointly with MEDENG 519; AWSpS.

PHARBE 520 Molecular Biotechnology (4) To Emphasizes concepts and the techniques/methodologies used in molecular biotechnologies. Uses practiceoriented lectures and laboratories to cover issue culture and assays, recombinant DNA methodologies such as SNA isolation, restriction mapping, cloning, site-directed mutagenesis, DNA sequencing, PCR techniques and applications, protein electrophoresis, ELISA analysis, and Western/Southern blotting methodologies. Offered: A.

PHARBE 521 Drug Discovery and Design (4) Baldwin Explores general principles and current approaches involved in modern drug discovery and development. Includes specific aspects of human biology and disease, case studies in discovery, and the evolution of how these topics have merged. Covers novel drug discovery techniques, emerging non-standard therapeutics, and the history of drugs and drug discovery. Offered: W.
PHARBE 522 Molecular Targets and Drug Classes (4) Wong Discusses select medicinal compounds, emphasizing mechanism of action, biotransformation, and structural and physical properties governing absorption, distribution, and excretion. Design of therapeutics to focus on maximizing efficacy while reducing toxicities. Compounds include classical organic small-molecules, peptides, proteins, nucleic acids, lipids, carbohydrates, and other bioactive chemical classes. Offered: Sp.

## Global Health

The Department of Global Health was established in 2007, bridging the schools of Medicine and Public Health, with a mandate to harness the expertise and interdisciplinary power of all 16 UW schools and colleges. The department is the second largest at the UW in terms of funding for research and training programs. Departmental efforts include 31 centers, programs, initiatives, and the Institute for Health Metrics and Evaluation.
The mission is to close the gap between the world's one billion people who experience relatively good health and the five billion who experience much lower levels of health, through teaching (education, training, and mentoring), research, and service programs.
The department offers an undergraduate minor, a Master of Public Health, and two PhD options: global health, and pathobiology. Four graduate certificate offerings are available for graduate students, as well as a global health pathway for UW medical students. Current and emerging focus areas include health metrics and evaluation, infectious diseases, workforce development, health system strengthening and implementation science, climate change, global trauma and violence, global medicines safety, and a strong cross-cutting focus on social justice and equity.

## UNDERGRADUATE PROGRAM

The Department of Global Health offers the following program:

- A minor in global health

Minor
Minor Requirements (30 credits):

1. Introductory courses (6-7 credits): G H 101 or G H 415; and G H 201
2. Perspectives in global health series (3 credits): G H 401; G H 402; G H 403
3. Electives (to bring total to 30 credits): Minimum of one elective course from each of the five content areas selected from a list of approved courses available from the Department of Global Health website, globalhealth. washington.edu/academics/undergraduate-minor/requirements
4. Minimum 15 credits outside the student's major
5. Minimum 15 credits completed at the UW
6. Minimum 15 upper-division credits
7. Minimum 2.0 grade in courses applied to the minor

## GRADUATE PROGRAM

Graduate Program Coordinator
S432 Foege Building, Box 355065
(206) 897-1804
ghprog@u.washington.edu

## Master of Public Health

The Global Health MPH program emphasizes a social jus tice approach to global health with a focus on the social, economic, and political determinants of health, and the history and context of global responses to health problems. The core curriculum develops competencies in the basic tools of public health, including epidemiology, biostatistics, global health systems, environmental health, and social behavioral sciences. Courses in research methods and management are also required. A practicum provides hand-on experience with local or international agencies engaged in global health activities, and academic coursework culminates with independent scholarship leading to a research or practice thesis. The curriculum is highly interdisciplinary, with faculty and courses from across campus including natural and social sciences and the humanities. Case studies and applied learning are common approaches, and contributions by students provide a major component of the learning environment.
For current listings of MPH program options and their requirements, visit the program website.

## Admission Requirements

Applicants must have completed at least a baccalaureate degree by the time of matriculation, and some tracks require at least two years of relevant post-college work or volunteer experience prior to matriculation as well. Each MPH track has its own admission requirements.

1. Completed Graduate School online application. Deadline midnight, December 1
2. Official scores from the general Graduate Record Examination (GRE), required for applicants who have not already earned a doctoral-level degree (e.g., MD, PhD, JD) from a U.S. institution of higher learning
3. Unofficial transcripts: Applicants upload unofficial transcripts from each college and/or university attended into the online application.
4. Three recent letters of recommendation, preferably from former supervisors and professors
5. Personal statement, including background, goals, and research interests
6. Resume - maximum three pages

## Degree Requirements

63 credits, for all MPH tracks
At least 30 credits must be from graduate-level, in-classroom courses, and at least 18 of these must be from global health in-classroom courses.

All tracks require a foundation course, epidemiology, biostatistics, environmental health, social and behavioral sciences, research methods, a practicum, and a thesis. Beyond these shared requirements, each track also has its own set of requirements. See program website for trackspecific requirements.

## Doctor of Philosophy

Program Manager<br>Institute for Health Metrics and Evaluation<br>2301 5th Avenue, Suite 600, Box 358210<br>(206) 897-2870<br>ghpdh@u.washington.edu

The Department of Global Health, in collaboration with the Institute for Health metrics and Evaluation and Health Alliance International, has developed a unique PhD program, building on faculty expertise in the areas of metrics and implementation science. The program provides students the most innovative tools to advance global health solutions, and includes two emphasis areas:

Metrics: Students translate evidence into useful knowledge by learning and applying advanced quantitative methods, impact evaluation techniques, and analytic tools. Students design and develop new, innovative ways to tackle critical global health measurement challenges
Implementation Science: Students identify and address barriers to effective implementation and scale-up of evi-dence-based interventions by developing and applying cutting-edge methodologies and analytical approaches.

For comprehensive information, see the PhD program website.

## Admission Requirements

The department recruits students who wish to pursue a long-term career in global health, whether in academic institutions, ministries of health, non-governmental organizations, or the private sector. All indicators of future success, including past work, service, and research experience; level of enthusiasm and detail in letters of recommendation; previous academic records and performance on standardized tests; applicant's written statement of purpose; and an ability to discuss research or practice work and future goals are considered. The department reviews all variables without a preset formula.

## Minimum Qualifications

1. Bachelor's degree from an accredited college or university in the United States, or its equivalent from a foreign institution. Strong candidates have prior master-level training or significant experience working in the global health field, ideally in a low-resource setting
2. Demonstrated passion and commitment to the field of global health
3. High academic standing: Minimum cumulative 3.30 GPA in previous undergraduate- and graduate-degree work, though the department expects applicants to have a GPA of 3.70 or higher.
4. Graduate Record Examination (GRE) scores greater than or equal to $120(700)$ on the quantitative section
5. English proficiency: For students who have not completed a degree in an institution where English is the primary language of instruction, results from the Test of English as a Foreign Language (TOEFL) are required.

## Degree Requirements <br> Minimum 96 credits

1. Coursework: Minimum 27 dissertation credits, 37 credits in core requirements, 16 credits in area of emphasis, and remaining credits in electives. See details about curriculum and course paths on program website.
2. Preliminary written examination
3. General examination
4. Research and dissertation
5. Final examination

## COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations.
G H 101 Introduction to Global Health: Disparities, Determinants, Policies and Outcomes (5) I\&S Gloyd, Sparke Provides an introduction to global health, including: the burden and distribution of disease and mortality; the determinants of global health disparities; the making of global health policies; and the outcomes of global health interventions. Offered: jointly with GEOG 180/JSIS B 180; W.
G H 201 Newly Emerging Diseases in Public Health (2) NW Coler Newly recognized and emerging diseases pose a major problem for public health. AIDS, hantavirus and Ebola virus infections, and the role of bacterial infection in the causation of stomach ulcers are examples of problems studied. Other timely diseases presented. Offered: A.
G H 399 Global Health Study Abroad (1-5, max. 15) I\&S For participants in approved study abroad programs. Requires credit evaluation by department or faculty. Does not automatically apply to major or minor requirements. Offered: AWSpS.
G H 401 Core Topics in Global Health (1) Gonzales, Wade Addresses a variety of foundational topics and central themes in global health, including the history and scope of the field, the complexities and contexts for global health problems, and the multidisciplinary nature of global health work. Credit/no-credit only. Offered: A.

G H 402 Contemporary Issues in Global Health (1) Wade Explores contemporary topics in global health. Offered: W.

G H 403 Multidisciplinary Perspectives in Global Health (1) Gonzales, Wade Presenters from a variety of disciplines discuss their experiences working on global health issues in resource-poor settings. Speakers illustrate how their work is influenced by communication, culture, economic and socio-political realities. Credit/no-credit only. Offered: Sp.
G H 415 Global Health Challenges (4) I\&S Murray Introduces principal health problems of the world's populations, and major challenges to improving health globally. Explores interdisciplinary factors accounting for health patterns, ranging from either physiological basis to their economic, social, and political context. Prerequisite: MATH 124; either BIOL 180, STAT 311, or Q SCI 381. Offered: A.

G H 490 Special Topics (1-5, max. 15) Offered: AWSpS.
G H 499 Undergraduate Research (1-15, max. 15) Offered: AWSpS.
G H 500 Global Health Seminar (1, max. 6) Explores issues relevant to global health; themes vary by quarter. Required course for global health MPH and global health certificate students. Credit/no-credit only. Offered: AWSp.
G H 501 Core Topics in Global Health (1) Gonzales, Wade Addresses a variety of foundational topics and central themes in global health, including the history and
scope of the field, the complexities and contexts for global health problems, and the multidisciplinary nature of global health work. Credit/no-credit only. Offered: A.

G H 502 Contemporary Issues in Global Health (1) Wade Explores contemporary topics in global health. Of fered: W.
G H 503 Multidisciplinary Perspectives in Global Health (1) Gonzales, Wade Presenters from a variety of disciplines discuss their experiences working on global health issues in resource-poor settings. Speakers il lustrate how their work is influenced by communica tion, culture, economic, and socio-political realities Offered: Sp.

G H 505 P-Advanced Global Health (2) Prepares health profession students for work in developing countries. Includes healthcare delivery systems, political, social, and economic determinants of health, major global health issues, and personal well-being while abroad. Offered: jointly with MED 560.
G H 511 Problems in Global Health ([0-4]-, max. 4) Gloyd Explores social, political, economic, environmental determinants of developing countries' health; traces development of societal responses to problems. Includes: origins of primary healthcare; child survival traditional systems; population; water; sanitation; international agencies; impact of economic policies Case study formulating pharmaceutical policy in a developing country. Offered: A.

G H 514 Global Societal Determinants of Health (2-3) Bezruchka Examines societal determinants of heath of nations around the globe. Asks why there is an increasing inequity in health outcomes today? Topics include early life, population health biology, medical care, mental health, and the environment.
G H 515 Global Health Challenges (4) Murray Introduces principal health problems of the world's populations, and major challenges to improving health globally. Explores interdisciplinary factors accounting for health patterns, ranging from either physiological basis to their economic, social, and political context. Prereq uisite: either BIOST 511, BIOST 512, and BIOST 513 , or BIOST 517 and BIOST 518, or equivalent; either EPI 511 or both EPI 512 and EPI 513. Offered: A.

G H 516 Health and Human Rights (3) Rivin Examines the basic concepts in the fields of human rights law and public health, and uses those concepts to examine the interdependence and tensions between the two fields. Introduction to the fields of public health and human rights law, examining the impact of health policies and programs on human rights. Offered: jointly with LAW H 540.
G H 521 Global Program Management and Leadership (3) Downer Focuses on management and leadership skills for complex global health settings. Includes personal leadership strengths/values; management dilemmas, data-driven decisions; program planning design and evaluation; and resource management. Offered: Sp.
G H 522 Leadership Development in Global Health (2) Campbell Designed to expand the student's capacity to support individuals, groups, and organizations. Provides students an understanding of their current level of leadership performance and effectiveness, their strengths, and their development needs. Relies heavily on assessment, feedback, and interactive activities. Offered: A.
G H 523 Organizational Management for Global Health (2) Gloyd, Welton Provides a foundation for developing a generic leadership perspective and orientation to the issues associated with the organization, financing, and delivery of healthcare services. Introduces skills in organizing, managing, and leading complex
systems and processes within a variety of local, regional, national, or global contexts. Offered: W.
G H 524 Policy Development and Advocacy for Global Health (2) Katz Explores complex array of factors affecting global health policy by studying contemporary health policy issues affecting developing countries. Examines how context (e.g. ideology, culture, and history) and international institutions affect the provision, financing, structure, and success of a nation's health and health system. Offered: Sp.
G H 531 Research Methods in Developing Countries (3/4) Mock Simple, practical methodologies to obtain and validate information regarding health status and health services in developing countries. Usefulness, validity, limitation of vital records, health reports, household (and cluster) surveys, nutritional anthropometry, and qualitative methods discussed. Offered: jointly with EPI 539; W.
G H 532 Responsible Conduct of International Research (3) Farquhar Prepares international and U.S. students to develop research proposals, conduct international field research, and present scholarly work. Topics include proposal writing, human subjects protection, data management, peer review, scholarly integrity, responsible authorship, and grants and budget management. Open to graduate and non-matriculated students. Credit/no-credit only. Offered: jointly with EPI 586; A.
G H 533 Population Health Measurement (4) Lim Introduces approaches for measuring population health such as burden of disease methods. Provides an understanding of the technical basis, uses, and limitations of these methods, particularly in developing countries. Predominantly quantitative. Recommended: G H 515. Offered: W.

G H 534 Building Better Evidence through Integrated Health Information and Surveillance Systems (3) Lozano, Mokdad Introduces the relationship between health information and surveillance systems and how these fields work together to inform leaders about maximizing limited resources and operating efficient health systems. Prerequisite: EPI 511 or instructor's permission. Offered: A.
G H 537 Qualitative Research Methods for Public Health (4) Bezruchka Covers a range of qualitative, ethnographic tools for practical applications in public health. Methods covered include direct observation, informant interviews, focus groups, and formal methods. Covers rapid assessment procedures and participatory action research. Student teams investigate research questions using these techniques. Offered: jointly with HSERV 526.
G H 538 Qualitative Methods in Health Services Research
(3) Pfeiffer Provides theoretical training in qualitative research and in-depth training in qualitative data management, analysis, interpretation, and presentation. Focuses on how to frame qualitative research questions, design appropriate research strategies, and integrate qualitative and quantitative methods in research designs in public health. Offered: jointly with HSERV 521; Sp.
G H 539 Methods, Tools, and Data in Global Health (2) Gakidou Familiarizes students with current global health issues and their analytical challenges. Introduces analytical methodologies, quantitative concepts, statistical packages applied to global health challenges, and software used in health metrics and evaluations research. (Two weeks). Offered: A.
G H 541 Fundamentals of Implementation Science in Global Health (4-5) Sherr, Wasserheit Provides an introduction to the emerging field of implementation research by outlining various methods that are applied to improving implementation (including applied
engineering, management tools, health systems, and policy research), and using experiential case studies from global health leaders. Addresses barriers to effective replication and scale-up in local settings. Offered: Sp.
G H 543 Global Health Pharmacy: Medicines, Practice, and Policy (2) Garrison, Stergachis Introduces the critical role of pharmaceuticals in addressing the major diseases affecting persons in resource-limited settings, such as HIV/AIDS, malaria, and tuberculosis. Addresses the wide range of relevant issues, including burden of disease, human resource capacity, regulation, drug safety/pharmoacovigilance, drug distribution, pharmaeconomics, financing, intellectual property, and drug trade policies. Credit/no-credit only. Offered: W.
G H 544 Maternal and Child Health in Developing Countries (3) Denno Emphasizes critical health problems of women and children in developing countries in social, economic, and cultural contexts. Practical approaches to developing MCH programs shared via lecture/ discussions, exercises, and small group work. Students acquire skills in baseline assessment, setting objectives, planning and evaluating interventions, and involving communities. Offered: jointly with HSERV 544: W.
G H 545 Child Health in Developing Countries ([0-3]-, max. 3) Denno Provides an understanding of the causes and functional effects of the most prominent child health problems. Examines trends and progress in global child health and explores potential explanations for these trends. Offered: Sp.
G H 553 Reproductive Health, Population and Development (2) Provides students with an introduction to demographic conditions in Third World countries and an understanding of the consequences of rapid population growth on health and the environment. The context and effectiveness of family planning programs is a major focus.
G H 555 Nutrition in Developing Countries (3) Gorstein Introduces issues of nutrition in developing countries, with an emphasis on the control and prevention of under nutrition and micronutrient deficiencies. Offered: jointly with NUTR 555; Sp.
G H 557 War and Mental Health (1) Kanter Examines the impact of war on mental health in both military and civilian populations. Focuses on posttraumatic stress disorder, including assessment, treatment, epidemiology, and neurobiology. Addresses other psychiatric disorders, substance abuse, brain injury, and psychosocial effects. Credit no-credit only. Offered: jointly with PBSCI 515.
G H 560 Principles of STD/HIV Research (3) Graham, Winer Provides MD and PhD fellows and graduate students with a comprehensive overview of the current state of knowledge in specific areas of STD/HIV research, including study design, laboratory methods, production of instruments for data collection, and methods for data analysis. Credit/no-credit only. Offered: S.
G H 561 Tropical Medicine (1) Buckner, Pottinger Intended for professional health science students interested in learning the pathophysiology, epidemiology, and clinical presentation of disease conditions that are more commonly seen in less-developed countries, resource-limited settings, or tropical climates, and how to diagnose, treat, and follow the resolution of these diseases with commonly limited resources. Credit/no-credit only. Offered: jointly with MED 561; Sp.
G H 562 AIDS: A Multidisciplinary Approach (2) Farquhar Comprehensive overview of the public health, clinical, and laboratory aspects of human immunodeficiency virus (HIV) infection and disease. Topics
include the pathogenesis, natural history, and management of HIV infections. The impact of HIV/AIDS on community and global healthcare and prospects for prevention and control. Credit/no-credit only. Offered: jointly with EPI 530/MED 530; A.
G H 563 HIV/STI Prevention Research Methods (3) Baeten, Celum Focuses on current research and implementation of HIV/STI prevention (biomedical, behavioral, and public health interventions). Includes analyzing strength of research evidence to support candidate interviews, understanding key features of clinical trial design, and applying appropriate/feasible interventions for specific settings and populations. Offered: jointly with EPI 549; Sp.
G H 564 HIV and STIs in Women and Children (3) JohnStewart Examines the emerging global public health crisis and the plight of women and children with HIV/ STIs. Reviews targeted approached pertaining to women and children and their vulnerability to HIV/ STIs. Offered: jointly with OB GYN 590/EPI 507; Sp.
G H 565 Diseases of Public Health Importance and Strategies for their Control (3) Cangelosi Public health perspective of major disease of national and global importance. Discussion of origins, establishment, progression, and pathogenesis of diseases. Importance of immunological, intercellular, and external factors, and strategies of disease prevention. Requires a grounding in cellular and molecular biology, microbiology, and immunology. Prerequisite: permission of instructor. Offered: Jointly with PABIO 550; Sp.
G H 566 Biochemistry and Genetics of Pathogens and Their Hosts (4) Campbell Provides a strong foundation in biochemistry, molecular biology, and genetics for students interested in disease. Principles illustrated through examples focusing on pathogens, and infectious and non-infectious disease. Prerequisite: undergraduate level coursework in molecular biology or biochemistry or permission of instructor. Offered: Jointly with PABIO 551; A.
G H 571 Essential of Clinical Care and Capacity Building in Low Income Countries (2) Pak-Gorstein, Zunt An interdisciplinary case-based forum of presentations by local and international lecturers and class discussions on realities of providing healthcare in low-income settings. Covers issues in prevention, socioeconomic underpinnings, management of medical and surgical conditions, and sustainable strategies to build capacity. Credit/no-credit only. Offered: W.
G H 572 Global Health Fieldwork: Preparation, Integration, Reentry (2) Graham Prepares students for communi-ty-based global health experiences, and provides them the opportunity to share, discuss, and reflect on these experiences after returning to the United States. Explores the problems and promise of current global health strategies. Credit/no-credit only. Prerequisite: participation in International Health Opportunities Program or similar experience. Offered: S.
G H 573 Clinical Management of HIV (3) Kim Provides indepth case-based training on the diagnosis and clinical management of HIV and associated conditions. Includes interactive format with speakers who have experience in both resource-rich and resource-limited settings. Offered: jointly with CONJ 553; W.
G H 580 Global Health Doctoral Seminar: Biology, Systems, and Measurement (2, max. 8) Gakidou, Lukehart, Sherr Examines the most critical issues in global health and currently available solutions. Introduces complementary perspectives of pathobiology, metrics, and implementation science to build a multidisciplinary understanding of these issues, including effective and appropriate strategies for their control.

G H 590 Selected Topics in Global Health (1-5, max. 15) Focuses on topics relevant to global health. Offered: AWSpS.
G H 592 Program Seminars (1-6, max. 6) Addresses specific educational needs of students within the Department of Global Health. Prerequisite: permission of instructor. Offered: AWSp.
G H 593 MPH Workshop (1) Pfeiffer Introduces students to the issues involved in conceptualizing and completing thesis projects and the various international health organizations and faculty members available as resources to projects. Prerequisite: first-year Global Health MPH students. Offered: AWSp.

G H 595 Master's Practicum (1-6, max. 6) Supervised practice experience providing an opportunity to apply knowledge and skills in a setting of relevance to global health. Credit/no-credit only. Prerequisite: permission of faculty adviser. Offered: AWSpS.

G H 600 Independent Study or Research (*) Prerequisite: permission of instructor. Offered: AWSpS.

G H 700 Master's Thesis (*) Prerequisite: permission of instructor. Offered: AWSpS.

## University Conjoint

## COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations.
UCONJ 100 Introduction to Health Professions (1) Garcia Opportunities in health professions. Information on educational requirements, professional/patient interaction, licensing, registering for practice in profession, salaries, and career opportunities.

UCONJ 290 Diversity Issues in the Healthcare Environment (1-2, max. 2) I\&S Introduction to the complexity of the issues surrounding culture and health, the interrelatedness of ethic and cultural characteristics and healthcare access, health and healthcare concerns of specific communities, traditional and alternative health-care practices, and community-based promotion and disease prevention programs.
UCONJ 410 Health in the Context of Italian Culture (5) While in Italy, participants study relationship between current health issues, contemporary Italian history, socio-cultural environment, and European Union; health status of vulnerable populations; characteristics of culture and healthcare system that promote healthy outcomes; differences between health behaviors and outcomes in Italy and the United States. Offered: A.

UCONJ 411 Psychology of Aging (3) Kiyak Focuses on developing the skills necessary for critically evaluating current psychological theories of aging, research findings in this area, and the implications of findings on the aging person. Special consideration given to the effects of socioeconomic, sex, and ethnic differences in the psychology of aging. Open to upperdivision undergraduates and beginning graduate students interested in the field of gerontology.
UCONJ 412 The Family in Later Life (3) Focuses on issues affecting older persons and their families. Addresses demographic influences on families; roles, rules for and function of family members; inter-generational relationships; economic, political, and social policy affecting family life; and cultural variations and supportive resources for older persons and their families.

UCONJ 413 Current Issues in Aging (3) Describes the population trends at work in the United States and
other developed nations with significant societal im plications for care and management of elders. Evaluates selected public policies related to aging. Gives students proficiency in using resources related to aging on the Internet. Evaluates alternative Iong-term care models.
UCONJ 420 Biological Safety Practices (1) Kenny General introduction to appropriate laboratory procedures used for handling potentially hazardous biological agents. Particular focus on laboratory safety and appropriate protocols that should be employed by those engaged in infectious disease and recombinant DNA research. Credit/no-credit only.
UCONJ 422 Sexually Transmitted Diseases: An Overview (2) Gardner Clinically oriented course designed to provide a knowledge base for upper-division health science students to participate effectively in community outreach programs for the prevention of sexuallytransmitted diseases. Offered cooperatively by the departments of Pharmacy and Medicine.

UCONJ 440 Biological Aspects of Aging (3) Introductory course on aspects of the biology of human aging and of functional changes associated with normal aging and with those illnesses that may be present in the elderly. Focus on the relationship between changes in physical function, environment, and quality of life. Includes theoretical perspective on aging as well as the aging process in specific physiological systems. Designed for upper-level undergraduate students with an interest in aging.
UCONJ 442 Social and Cultural Aspects of Aging (3) Involves faculty members from the various social science fields examining the range and variation of relationships among age-linked attitudes and cultural values related to aging; the social and economic factors that influence the elderly in contemporary society; the effects of ethnic and sex differences in sociocultural aging. Open to upper-division undergraduates and beginning graduate students interested in gerontology.
UCONJ 443 Interdisciplinary Seminar on Aging (1-6, max. 15) Borgatta Interdisciplinary examination of the contemporary theoretical literature on gerontology and long-term care. For upper-level undergraduate and graduate students with an interest in aging. Quarterly offerings available from the Institute on Aging.
UCONJ 490 Social Sensitivity in Healthcare (3) I\&S Multidisciplinary course for health professions students. Health professionals' roles in dealing with social, cultural, and physical barriers to healthcare of lowincome groups and ethnic people of color. Personal involvement through field experiences and faculty drawn from affected communities as well as health sciences, social work schools. Credit/no-credit only.

UCONJ 497 Healthcare in a Rural Community (3) Critical analysis built upon concepts relative to interdisciplinary healthcare delivery in a rural community. Students develop an organizational model for rural healthcare and study innovative ways of mobilizing community resources and support for a comprehensive rural healthcare system. Pharmacy students, nurses, and other health professionals study application of theory in an appropriate clinical setting within the conceptual framework of each student's professional field.
UCONJ 500 Seminar in Interprofessional Collaboration ([1-3]-, max. 7) Interdisciplinary teams composed of students and community members placed in diverse urban settings to address an identified community need by developing and implementing collaborative, community-based projects. Seminars emphasize interprofessional collaborative practice, intrapersonal understanding, interpersonal group process skills, organizational savvy, community awareness, and
sociocultural sensitivity. Offered through Graduate School of Public Affairs. Offered: AWSp.
UCONJ 501 Interdisciplinary Rural Healthcare Issues (13, max. 6) Emphasizes interdisciplinary solutions to rural health challenges. Addresses rural core competencies for advanced practice, leadership, and practice inquiry. Competencies include definitions, funding, delivery models, demographies, outcomes, disparities, access, farm economics, nutrition, environment, and workforce issues. Reviews populationbased and clinical case studies in rural health. Of fered: S.

UCONJ 504 Advanced Interdisciplinary Case Studies in Global Health (3) Gorstein, Kurth, Shell-Duncan Uses actual multidisciplinary case studies to (1) analyze quantitative parameters of diseases, (2) contrast the descriptive and analytic approaches of health sciences, anthropology, and nutritional sciences, (3) integrate diverse disciplinary perspectives into cohesive information, (4) organize class presentations, and (5) apply critical thinking in approaching complex health issues. Offered: Sp.

UCONJ 510 Introductory Laboratory Based Biostatistics (2.5) Introduces methods of data description and statistical inference for experiments. Covers principles of design and analysis of experiments; descriptive statistics; comparison of group means and proportions; linear regression; and correlation. Emphasizes examples from laboratory-based biomedical sciences, and provides demonstrations using standard statistical programs.
UCONJ 511 Issues in Home Healthcare Delivery (3) Service delivery issues relevant to provision of health care services across the life span in the home set ting. Home healthcare as an important component in healthcare system. Individual and multidisciplinary practice of healthcare disciplines. Emphasis on research literature. Prerequisite: graduate student standing; upper division with permission of instructor.
UCONJ 513 Dynamics of Patient Management: Diabetes Mellitus (2) Analysis of advanced knowledge related to interdisciplinary management of diabetes. Commonalities and differences in provider approaches, recent research and its effect on management practices, collaborative communication, knowledge ap plication. Brief interactive presentations, decisionmaking opportunities, discussion. Credit/no-credit only. Prerequisite: graduate standing in pharmacy, dietetics, nursing; third- or fourth-year medical student; or permission of instructor.

UCONJ 515 Promoting Health Behavior for Individuals and Families (2/4, max. 4) Brandt, Jordan, Kieckhefer, Lewis, Solchany, Spieker Practice-focused, evidence-based, theory-driven intervention strategies to promote healing and health behavior at selected points from birth to death. Relevant for clinicians from diverse health settings. Emphasis on clinical skill development including decision-making and outcome management applicable for individuals and families. Prerequisite: permission of instructor. Offered: Sp .

UCONJ 517 Interdisciplinary Clinical Research Methods Seminar (2) Provides an introduction to clinical/ translational relational research methods, including selection of research questions, study design, measurement, data analysis, and practical aspects of conducting research in clinical settings. Prerequisite: Students from Health Sciences schools conducting research under the Multidisciplinary Predoctoral Clinical Research Training Program. Offered: S.
UCONJ 520 Molecular Biophysics Research Seminar (1) Parson A series of research seminars for faculty and students involved with the molecular biophysics program. Credit/no-credit only.

UCONJ 524 Developmental Neurobiology (3) Raible, Reh Survey of contemporary issues in developmental neurobiology, including neurogenesis and differentiation; electrophysiological, morphological, and neurochemical regulation of cellular phenotype; neuronal pathways and synaptic contacts; cellular and synaptic plasticity; and behavior. Examination of molecular biological, morphological, electrophysiological, and behavioral approaches. Prerequisite: background in neurophysiology, neuroanatomy, molecular neurobiology. Offered: Sp.
UCONJ 525 Overview of Faculty Research in Neurobiology (1) Reviews research topics currently being studied in neurobiology. Student preparation consists of reading pertinent articles published on each topic. Credit/no-credit only. Prerequisite: first-year graduate student in neurobiology.
UCONJ 530 Issues in Indian Health (2) Surveys historical and contemporary issues in Indian health. Covers Indian contributions to health, traditional Indian medicine, current disease epidemiology, development of federal Indian health policy, the Indian Health Service, tribal health programs, and consequences of major legislation on Indian health. Prerequisite: current health science student or permission of instructor.
UCONJ 531 Introduction to Mind Body Medicine-An Experiential Elective (2) Sessions contain a didactic component followed by an experiential component and cover a variety of self-care techniques including meditation, exercise, and nutrition. Goals are to promote personal well being, a healthy lifestyle, reduce burnout, and reduce academic difficulties. Credit/ no-credit only.
UCONJ 540 Environmental Change and Human Health: The Role of the Health Professional (1/2, max. 2) Oberle, Rosenblatt Explores the effect of environmental deterioration on human health, and presents tools to address the problem. Offered: Sp.
UCONJ 545 Emergency Preparedness for Health Professionals (1) Introduces the roles of health professionals in preparing for community-wide disasters. Emergency preparedness content for graduate and professional students in health sciences. First of two interdisciplinary courses focusing on "all-hazards" preparedness. Credit/no-credit only.
UCONJ 546 Emergency Response for Health Professionals (2, max. 6) Focuses on interdisciplinary emergency preparedness and response for graduate students in health professions. Includes system and policy issues with emphasis on clinical relevance for health professionals. Second of two interdisciplinary courses focusing on "all-hazards" preparedness.
UCONJ 548 Current Issues in First Nations Behavioral Health: Mental Health and Substance Abuse (3) Historical and intergenerational antecedents of tribal psychiatric and substance abuse disorders. Oppression, economic circumstances, and family functioning as shaping mechanisms for attachment. Implications of insufficient attachment for neuro-development and developmental psychopathology. Traditional vs. mental health and substance abuse assessment and treatment. Self as provider to tribal clients, communities, systems.

## UCONJ 550 Healthcare in the Underserved Community (1)

UCONJ 584 Plant Tumors (1, max. 9) Gordon Discussion of the literature of plant tumors and current research work being done in this area at the University. Offered cooperatively by the departments of Biochemistry, Biology, and Microbiology and Immunology. Credit/ no-credit only. Prerequisite: offered only to persons actively pursuing work in this area.

UCONJ 599 Selected Readings in Interdisciplinary Clinical Research (1, max. 6) Marshall, Mitchell Analysis and synthesis of selected readings and works in progress related to multidisciplinary and interdisciplinary clinical research. Credit/no-credit only. Prerequisite: UCONJ 517; permission of instructor. Offered: AWSp.

# School of Law

Established in 1889, the School of Law is a member of the Association of American Law Schools and is on the American Bar Association's list of approved law schools. Graduates of the School are prepared to practice law anywhere in the United States. Additional information about the School is contained in the current School of Law catalog.

## Facilities and Services

The School of Law, housed in William Gates Hall since 2003, is equipped with classroom, clinical, library, lounge, and office facilities. Eleven classrooms are equipped for multi-media presentations, wireless internet connection, and assistive-listening systems.

The Marian Gould Gallagher Law Library, one of the finest in the country, is among the largest university law collections on the West Coast. The collection currently contains more than 450,000 bound volumes and volume equivalents of microform. In addition to the extensive main collection, it houses important materials that support the Asian, marine, sustainable international development, and tax law graduate programs and serves as a federal depository for selected United States government documents. The library is equipped with the latest in microreaders and printers in order to make full use of the growing microform collection. The library is a subscriber to LEXIS, WESTLAW, the Western Library Network, and other research databases.

## JURIS DOCTOR PROGRAM

The Juris Doctor (JD) degree is conferred upon a student who has met the residence requirements, consisting of nine quarters of at least 12 credits each, and has earned at least 135 credits satisfactory to the School of Law.
As with most law schools in the United States, the firstyear courses are required and are designed to introduce students to basic legal skills, foundational subject matter, and the variety of public and private processes with which the profession is concerned. Those courses deal with contracts, torts, property, civil procedure, criminal law, constitutional law, and basic legal skills.
Except for a required course in professional responsibility, the public service requirement, and an advanced writing project requirement, courses in the second and third years are elective. Therefore, a student may choose a program designed to suit his or her interests and needs. JD candidates are required to perform 60 hours of public-service legal work during the second or third year.

## Admission

New students may enter the School of Law only in autumn quarter. For first-year students, instruction begins earlier than for upper-class students. Students must have earned a baccalaureate degree from an accredited college or university prior to commencing the study of law.
All applicants are required to take the Law School Admission Test (LSAT) and to register for the Law School Data

Assembly Service (LSDAS). Registration packets and test information are available at most law schools and from Law School Admission Council, Box 2000, , Newtown, PA 18940-0998. www.lsac.org
No specific prelaw course is required or recommended, and the School of Law subscribes to the remarks set forth on prelaw preparation in The Official Guide to U.S. Law Schools (2000 Edition). Applications for admission to the next entering class must be postmarked no later than January 15. To be assured of consideration, an applicant must have complete credentials, including the LSDAS report, filed in the School of Law by February 1. An application fee (at this writing, $\$ 50$ ) also is required.

## Transfer Applicants

Students who have completed at least one year at a member school of the Association of American Law Schools may apply for admission with advanced standing, with credit for no more than one year of such work. A student who has completed or expects to complete at least two years of work at a member school of the Association of American Law Schools and who expects to graduate from that member school may apply to this school for admission as a nondegree candidate.
Applicants should request application forms and instructions from the admissions office in time to permit filing of all application materials by July 10.
Applications are considered only if vacancies exist. Selection is based on evidence either (1) that the candidate can produce above-average work at this law school, or (2) that the candidate will contribute to the diversity of the student body.
Students working on law degrees to be conferred by the University have priority over non-degree candidates in the selection of courses. This policy is in accordance with the general University policy on the registration of nonmatriculated students.

## Financial Aid

Students in need of financial assistance may receive University aid, School of Law aid, federal loans, or aid from all these sources. To be considered for aid, applicants must submit the Free Application for Federal Student Aid (FAFSA) by February 28. FAFSAs are available in December at most college financial aid offices, or may be obtained by writing or calling the Office of Student Financial Aid, 105 Schmitz Hall, Box 355880, University of Washington, Seattle, WA 98195, (206) 543-6101, offa@uw.edu. Applicants for admission should not wait until they have been admitted before applying for financial aid.
School of Law grants are awarded primarily on the basis of financial need, although scholarship or other factors may be considered for certain awards. Inquiries concerning School of Law aid should be addressed to Financial Aid Coordinator, School of Law, William Gates Hall, Box 353020, University of Washington, Seattle, WA 98195-3020; uwlawaid@uw.edu.

## Inquiries

A more detailed statement on admission policy and application procedure is available from the School of Law. Requests for application materials and the University law school bulletin should be addressed to Law School Admissions, William Gates Hall, Box 353020, University of Washington, Seattle, WA 98195-4617; admissions@law. washington.edu; (206) 543-4078.

## GRADUATE PROGRAM

Graduate Program Coordinator
William Gates Hall, Box 353020
(206) 543-4937
gradlaw@uw.edu

In addition to the professional law program leading to the Juris Doctor degree, the law faculty offers graduate programs leading to the Master of Laws (LLM) in Asian and Comparative Law, the law of sustainable international development, intellectual property law and policy, and taxation. The School of Law offers the Doctor of Philosophy (PhD) degree in Asian and Comparative Law only.

## Master of Laws

## Admission Requirements

1. Minimum GPA of 3.00 or $B$ in the most recent two years of study.
2. U.S. applicants must have completed their first degree in law (JD or equivalent) at a school accredited by the American Bar Association.
3. International students must have a first degree in law (LLB, BLaw) or equivalent and a minimum TOEFL score of 580or 237 (TOEFLC).

## Degree Requirements, Asian and Comparative Law

36 credits, as follows:

1. Required courses: LAW B 551 (6), LAW 600 (6), LAW B 550 (3-4); two courses in Asian and comparative law
2. Elective courses: Additional courses, chosen in consultation with adviser, to bring total credits to 36 .

## Degree Requirements, Intellectual Property Law and Policy

40 credits, to include:

1. Required core courses: LAW P 501 (8), LAW P 510 (6)
2. Additional requirement for students not trained in the common law system: LAW P 503 (3)
3. At least 16 additional credits drawn from a list of approved elective courses.
4. Research project and thesis

## Degree Requirements, Law of Sustainable International Development <br> 40 credits, as follows:

1. 15 credits in Law School classes. The remaining 25 credits may be earned in any other departments of the University. Sustainable International Development students are required to take courses in at least three departments other than the Law School.
2. Writing and Research Requirement: Completion of a research paper is required and is generally satisfied by LAW B 578 (6).
3. LAW A 545 (4)

## Degree Requirements, Taxation

36 credits, as follows:

1. Required courses: LAW T 501 (3), LAW T 502 (3), LAW T 503 (2/3), LAW T 504 (3), LAW T 510 (3), LAW T 511 (1-4)
2. Core electives: Two of the following courses: LAW T 515 (3), LAW T 516 (3), LAW T 521 (3), LAW T 530 (3)
3. Electives: Additional courses, chosen in consultation with adviser, to reach 36 credits for degree

## Doctor of Philosophy

## Admission Requirements

Admission to the PhD program is limited to exceptional scholar-lawyers who are fluent in English and in another language. Prospective PhD students must normally complete the LLM program before being accepted as PhD students. The School does, however, welcome applications
from candidates with equivalent academic standing and a demonstrated capacity for advanced research and writing.

## Degree Requirements

90 credits, to include:

1. An LLM degree is counted toward the credit necessary for the PhD program.
2. Doctoral thesis seminar ( 4 credits)
3. Other coursework (26-29 credits): Coursework varies according to student's research interest areas and is determined in consultation with Supervising Committee
4. Doctoral dissertation (27-30 credits)

## Financial Aid

Scholarship funds for graduate students in law are quite limited. Inquiries should be made to Law School Graduate Admissions, William Gates Hall, Box 353020, University of Washington, Seattle, WA 98195, U.S.A.; gradlaw@uw.edu; (206) 543-4937.

## Inquiries

Requests for applications and program brochures for all School of Law LLM programs except the LLM in taxation, as well as information regarding application procedures, should be addressed to Law School Graduate Admissions, William Gates Hall, Box 353020, University of Washington, Seattle, WA 98195, U.S.A.; gradlaw@uw.edu.
Requests for applications and program brochures for the LLM in taxation should be addressed to Law School Graduate Tax Admissions, William Gates Hall, Box 353020, University of Washington, Seattle, WA 98195; gradlaw@ uw.edu.

## COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations.

## Law

LAW 300 Introduction to Law (3-6, max. 6) I\&S Understanding the legal system, its functions in the socialeconomic order, legal reasoning, and the world of legal education and the legal profession. Open to nonlaw students only.

LAW 410 Problems in Professional Responsibility (4) I\&S
LAW 415 Criminal Justice (3) I\&S Examines pre-trial rights of persons suspected or accused of crime, primarily those rights covered by the Fourth, Fifth, Sixth, and Fourteenth Amendments of the U.S. Constitution.

LAW 416 International Contracting: Negotiation and Drafting (3) I\&S Skills course designed to introduce process and problems of negotiating and drafting international agreements. Client interviewing and counseling and negotiation and drafting of a contract between parties in the United States and Japan. Credit/no-credit only. Open to nonlaw students only.

## LAW 422 Copyright (3) I\&S

LAW 429 Public Land Law (3) I\&S
LAW 440 Legal Issues of Internet Law (3) I\&S Introduces the basic legal issues raised by networked digital technologies, such as the Internet. Covers jurisdiction, speech, privacy/access, propriety rights (copyrights, domain names), emerging law, leading policy debates, as well as fundamental Internet technical skills. Offered: S.
LAW 442 Land Law and the Urban Environment (3) I\&S Examination of the major legal tools available to shape the urban environment by controlling the use of land. Considers zoning, subdivision controls, urban renewal, private land-use restrictions, and the rules of
nuisance law. Credit/no-credit only. Open to law and nonlaw students.
LAW 443 The Legal Process I (3/5) I\&S The system of law and its functions rather than substantive law pertaining to any particular subject or discipline. Open only to nonlaw students. Credit/no-credit only.

LAW 444 Constitution and American Public Education (36, max. 6) I\&S Examines the relationships between the Constitution of the United States and the American system of public education, excluding higher education, in areas of constitutional freedom and legal controls, racial desegregation, and equal educational opportunity, including equal financing of the public schools. Credit/no-credit only. Offered: jointly with EDLPS 444.

LAW 445 Major Issues in American Constitutional Law (3) I\&S Significant themes in American constitutional law. Doctrine of judicial review, application of the Bill of Rights to the states, Supreme Court's recognition of fundamental rights, the Equal Protection clause, the Religion clauses, freedom of speech, and presidential powers. Open to law and nonlaw students.
LAW 447 Critical Perspectives in Law (3) I\&S Examination of modern critical legal thought and critics views regarding proposed alternative forms of social ordering.
LAW 467 American Law and the American Indian (3) I\&S Relationship between Indians and the United States from 1789 to the present. Significant constitutional, legislative, and judicial actions. Legal events explored within their political, military, social, and cultural contexts. Comparisons with other minoritygroup experiences. Offered: jointly with HSTAA 416.
LAW 476 International Economic Relations and Trade Policy (3) I\&S Consideration of international control of national trade policies and permissible transnational reach of national trade or other regulation. The General Agreement on Tariffs and Trade (GATT) and the international monetary system examined from legal and economic perspective. Examination and comparison of prescriptive jurisdiction to public international law.

LAW 477 Law, Literature, and Film (2-4, max. 4) I\&S/VLPA An examination of literary and cinematic portrayals of and issues important to law, lawyers, and the legal system. Considers both portrayals purporting to depict the legal system as well as works envisioning lawyers and the legal system in a "better world.".
LAW 481 Land, American Culture, and the Law: Perspectives on the Use and Ownership of the Natural Environment (1-6, max. 6) I\&S
LAW 489 Law and Aging (3) I\&S Survey of principal areas of law of special concern to aging population, considering healthcare and healthcare decisionmaking, public and private income maintenance programs, taxation, guardianships, conservatorships, and other methods of protecting the property of the elderly, counseling, and professional responsibility.
LAW 600 Independent Study or Research (*)
LAW 800 Doctoral Dissertation (*)

## Law A

LAW A 501 Contracts ([2-8]-, max. 8)
LAW A 502 Civil Procedure I ([2-6]-, max. 6)
LAW A 503 Property I ([2-8]-, max. 8)
LAW A 504 Torts ([2-8]-, max. 8)
LAW A 505 Criminal Law ([2-5]-, max. 5)
LAW A 506 Legal Analysis, Research, and Writing ([1-7]-, max. 7)

LAW A 507 Constitutional Law I: Constitutional Structures of Government ([3/6]-, max. 6)
LAW A 508 Comparative and International Law Survey (3) Taylor, Walsh, Winn Survey of basic principles of public international law; comparative and historical overview of various legal traditions (civil law, common law, Islamic law, and mixed systems). Examines sources, subjects, and challenges of international law, and methodology of comparing foreign legal systems, providing perspective on U.S. legal system and rules. Offered: Sp.
LAW A 509 Administrative Law (3-5, max. 5)
LAW A 510 Sales (3-4)
LAW A 511 Payment Systems (3/4)
LAW A 512 Secured Transactions (3-4)
LAW A 513 Creditor-Debtor Law ([2-3]-)
LAW A 514 Publicly Held Corporations (3)
LAW A 515 Business Organizations (4-5)
LAW A 516 Legal Accounting (3)
LAW A 517 Securities Regulations (4) Examines the federal regulations of the offer and sale of securities and the public offering process under the Securities Act of 1933; exemptions from federal registration; the reporting obligations of public companies under the Securities Exchange Act of 1934, and the examination of the impact of the Sarbanes-Oxley Act of 2002.

LAW A 518 Restitution (3)
LAW A 519 Transmission of Wealth (5)
LAW A 520 Property II ([2-8]-, max. 8)
LAW A 521 Community Property (2/3)
LAW A 522 Copyright (3/4)
LAW A 523 Real Estate Transactions (3/4)
LAW A 524 Private Land Development (3)
LAW A 525 Water Law (4)
LAW A 526 Copyrights and Trademarks (5)
LAW A 527 Environmental Law: Pollution Control (4)
LAW A 529 Public Land Law (3)
LAW A 530 Basic Income Tax ([2-6]-, max. 6)
LAW A 531 Death and Gift Taxation (2-5, max. 5)
LAW A 532 Taxation of Business Entities (5)
LAW A 534 Mergers and Acquisitions (4) Deals with tactics, strategy, and state and federal law relating to transactions by means of which corporations and other forms of business entity combine. Emphasizes corporate law with some treatment of federal tax and securities law issues. Prerequisite: either LAW A 515 or LAW A 567.
LAW A 535 Trademarks and Unfair Competition (2)
LAW A 536 Securities and Shareholder Litigation (2) Kkplan Covers securities and shareholder litigation in its broadest sense including federal securities litigation, state securities litigation, SEC enforcement, and state law-based derivative litigation. Offered: Sp.
LAW A 537 Taxation of Corporations, Partnerships, and Limited Liability Companies (4)
LAW A 538 Estate Planning Workshop (3-4)
LAW A 540 Land Use Planning Seminar (3)
LAW A 541 Transnational Tax (5)
LAW A 542 Land Law and the Urban Environment (3)
LAW A 543 Business Reorganization Under the Bankruptcy Code (4)
LAW A 544 Transnational Commercial Law (3-4) Examines the political economy of transnational commercial law, considering its nature and sources, the institutions and methods through which it is develops, and some key problems involved in harmonization of
commercial law. Uses select international harmonization instruments (e.g. Cape Town Convention on International Interests in Mobile Equipment, UNCITRAL Model Law on Cross-Border Insolvency, Vienna Convention on Contracts for the International Sale of Goods) to illustrate and critique different methodological and institutional approaches.
LAW A 545 International Environmental Law (4)
LAW A 546 Patents ([2-4]-, max. 4)
LAW A 547 Critical Perspectives on Law Seminar (2-4, max. 4). Considers law from the point of view of Continental philosophy and critical social theory. Involves close readings and intensive discussion of canonical texts from various critical traditions of thinking about law. Students also write and present papers concerning themes raised by the readings. Offered: A.
LAW A 548 Civil Rights ([2-6]-, max. 6)
LAW A 549 Advanced Legal Research (4)
LAW A 550 Constitutional Law ([2-8]-, max. 8)
LAW A 551 Constitution and American Public Education (3-6)
LAW A 552 Antitrust Law and Policy ([2-5]-, max. 5)
LAW A 553 Feminist Jurisprudence (4) Explores the intersections of law and sex, gender, and sexuality with the aid of various theoretical lenses, prominently feminist legal theory. Focuses on those areas of law where notions of sex, gender, and sexuality seem conflated and confused.
LAW A 554 Labor Relations and the Law ([1-5]-, max. 5)
LAW A 556 Employment Discrimination ([2-4]-, max. 4)
LAW A 558 National Security Law Seminar ([2-6]-, max. 6) Allen Three-quarter seminar that provides an opportunity for study and research in selected legal issues relating to national security law and its processes and institutions. Prerequisite: LAW A 507; recommended: LAW A 574; LAW A 557, either of which may be taken concurrently. Offered: AWSp.
LAW A 560 Employment Issues (2/3) Examination of issues under selected employee protection laws. Analysis of the Fair Labor Standards Act, Workers' Compensation, and Social Security Act (related to retirement, disability, and supplemental income benefits). Includes assessment of public assistance issues for low-wage workers. Prerequisite: LAW A 509, LAW A 562, or permission of instructor.
LAW A 561 Law and Economics (2-4, max. 4) Offered: jointly with PB AF 519.
LAW A 562 Employment Law (3-4) Examines the law governing the employment relationship, including the establishment and termination of employment. Topics include employee duties, prohibited employment practices, regulation of wages, hours, and benefits of employment, workers' compensation, and occupational safety and health.

## LAW A 563 Local Government Law (3)

LAW A 564 American Legal History (1-4, max. 4) Reviews the American legal history from colonial times to the civil rights era. Readings cover early constitutionalism, the republican revolution, the antebellum movement, the end of slavery, the regulatory state, and rights of women and minority groups.
LAW A 565 American Indian Law (4)
LAW A 566 Theories of Justice ([2-4]-, max. 4)
LAW A 567 Closely Held Business Organizations (4) Examines elements of various unincorporated business forms and closely held corporations. Reviews relevant state statutes and case law related to each form relevant to advising small business clients on the choice of business form utilized in their ventures.

Not open to students who have taken LAW A 515. Offered: A.

## LAW A 568 Collective Bargaining and Labor Arbitration

 (2-4)LAW A 569 Investments Funds and Managers Seminar (3) Krug Explores U.S. regulation of investment managers and invest companies, including hedge funds and mutual funds. Topics draw heavily from federal securities laws, particularly the Investment Advisers Act and the Invest Company Act of 1940, and encompass regulatory developments/proposals and policy considerations underpinning investment industry regulation. Offered: Sp .
LAW A 571 International Organizations Seminar (3) Provides a critical introduction to some of the issues that are important to understanding how international organizations function today. Focuses on the role of international organizations in the modern forms of international law-making, regulation, and global governance.
LAW A 574 International Law (2-4)
LAW A 575 Human Rights History: Rights, Revolutions, Republics, 1750-1850 (4) Walsh Comparative constitutional history of rights lawyering. Includes political trials form French Revolution in Europe through postcolonial Jacksonian American Republic. Covers basic rhetoric of early human rights discourse: on treason, seditious libel, racial equality, servitude, labor conspiracy, religious liberty, consumer protection, and codification. Offered: W.
LAW A 576 International Criminal Law (3-4) Allen Examines responses by states and international organizations to international and transnational crimes. Covers substantive and procedural international criminal law, criminal responsibility, defenses and immunities, and the prosecution and punishment of international criminals in both national and in international tribunals. Prerequisite: LAW A 505; recommended: LAW A 574. Offered: W.

## LAW A 577 Immigration Law (3/4)

LAW A 578 International Business Transactions ([1-4]-, max. 4)
LAW A 579 Child Advocacy Seminar (2-4, max. 4) Kelly Includes child abuse and neglect, parental rights termination, paternity, and an overview of other practice areas as they intersect with issues of child abuse and neglect. Focuses on Washington law and practice, covering applicable substantive and procedural law, local practice rules, and professional responsibility. Offered: A.

## LAW A 580 Family Law (3-5, max. 5)

LAW A 581 Washington Constitutional Law Seminar ([1-4], max. 4) Studies the history, structure, content, and role of state constitutions generally, and the development of Washington's constitution in particular. Examines the important distinctions between the federal constitution and state document, and the interplay between them. Covers state declarations of rights and the substantive sections of state constitutions that relate to the structure, role, and constraints. Offered: A.

## LAW A 582 Bankruptcy (3-4)

LAW A 583 Insurance Law (4)
LAW A 584 American Public School Law (3) Constitutional, statutory, and common law principles common to all public education systems within the United States. Applicable law in a variety of substantive legal areas such as torts, property, contracts, administrative law, and fundamental rights. Offered: Sp .

LAW A 585 Admiralty (3-5)

LAW A 586 Advanced Family Law Seminar (2-4) Discusses family law topics previously excluded or covered only minimally including: adoption, paternity, guardianship, third-party custody, parenting plans in the child welfare context, and family law in the intimate partner violence context. Prerequisite: LAW A 580.
LAW A 588 Survey of the American Judiciary (1) Ramasastry Provides a survey of the American Judiciary. Students learn about a variety of proceedings, including innovative drug courts. Students compare their observations of the American Judiciary with their home country's judicial system. Credit/no credit only. Prerequisite: SID LLM students or permission of instructor. Offered: Sp.

## LAW A 589 Elder Law (4)

LAW A 590 Constitutional Law: Equal Protection, Fundamental Rights, and Due Process of Law (4-5)
LAW A 591 Constitutional Law: Freedom of Expression (4. 5)

LAW A 592 Constitutional Law II ([2-8]-, max. 8) Examines individual constitutional rights, primarily involving guarantees of due process and equal protection found in the 5th and 14th Amendments. Focuses on constitutionality of laws that classify people on basis of race, sex, sexual orientation, and other bases, as well as laws that restrict abortion, contraception, sexual activity, and other individual freedoms. Prerequisite: LAW A 507.
LAW A 595 Jurisprudence and Legal Philosophy ([2-4]-, max. 4) Surveys classic jurisprudential questions in the study of the nature, norms, and justifications of legal systems. Focuses on theories of adjudication, and covers the major twentieth and twenty-first century schools of jurisprudential thought, especially American Legal Realism, Natural Law, Legal Positivism, and Critical Legal Theory.
LAW A 597 Intensive Legal Writing Workshop (2-3) Focuses on how the rhetorical situation of legal writing influences choices about grammar, syntax, sentence structure, and paragraph structure. Students learn to use structures that best serve law-trained readers' needs for clear, concise, cohesive writing, and practice critical reading skills and techniques for self- and peer-editings.
LAW A 598 Legal Research I (3) Introduction to legal bibliography and law librarianship. Basic primary and secondary legal bibliographic tools. Integration of manual and computer resources for effective legal research. Emphasis on state materials. Prerequisite: law librarianship major or LIS 503 and LIS 530 which may be taken concurrently. Offered: jointly with LIS 591.

LAW A 599 Legal Research Methods (3/4) Legal tools that answer more complex legal research problems, such as federal legislative histories, sources of administrative law, specialized subject research. Federal emphasis. Builds on skills and techniques taught in LIS 591/LAW A 598. Extensive work with online resources. Prerequisite: LIS 591 or permission of instructor. Offered: jointly with LIS 592.

## Law B

LAW B 500 Civil Procedure II (2-5)
LAW B 503 Evidence ([2-6]-, max. 6)
LAW B 506 Conflicts of Laws ([2-6]-, max. 6)
LAW B 507 Federal Courts and the Federal System (3/4)
LAW B 510 Problems of Professional Responsibility (2-4, max. 4)
LAW B 511 Seminar on Problems in International Environmental Law ([1-4]-, max. 4)

LAW B 512 Legislation and the Formulation of Public Policy (2-3, max. 3)
LAW B 513 Evidence Seminar ([2-4]-, max. 4)
LAW B 514 Street LawClinic ([1-8]-, max. 8)
LAW B 515 Criminal Procedure: Investigation (5)
LAW B 516 International Contracting ([2-4]-, max. 4) Credit/no credit only.

LAW B 517 Juvenile Justice Seminar ([1-6]-, max. 6)
LAW B 518 Appellate Advocacy ([1-3]-, max. 3) Credit/no credit only.
LAW B 519 Pre-Trial Practice (3-4) Offered: A.
LAW B 520 Trial Advocacy ([2-6]-, max. 6) Credit/nocredit only.

LAW B 521 Trial Advocacy II (3-, max. 6) Howard Addresses more advanced trial advocacy issues than are covered in LAW B 520. Includes a civil or criminal track of study and work with trial lawyers who specialize in that area of practice on more sophisticated issues of strategy, evidence, creative use of exhibits at trial, technology in the courtroom, and ethics. Prerequisite: LAW B 520; permission of the Director of the Trial Advocacy Program. Offered: WSp.
LAW B 522 Mediation of Disputes (3) Credit/no-credit only.

LAW B 523 Negotiation (2-4, max. 4) Credit/no-credit only.
LAW B 524 Alternative Dispute Resolution Seminar (2-, max. 4) Provides opportunities for study, research, and writing related to the legal, policy, and ethical issues in the emerging field of alternative dispute resolution (ADR). Research papers satisfy the advanced writing requirement for JD students. Prerequisite: permission of instructor if LAW B 525 already completed.

LAW B 525 Alternative Dispute Resolution (3) Overview of alternative dispute resolution including negotiation, mediation, arbitration, med-arb, early neutral evaluation, mini-trials, summary jury trials, and E-ADR. Critical evaluation of each process occurs through a combination of assigned readings, roleplay exercises, videotapes, guest presentations, and student-designed classes.

LAW B 526 Mediation Clinic ([1-10]-, max. 10) Credit/nocredit only.
LAW B 527 Criminal Law Clinic (8) Credit/no-credit only.
LAW B 528 Workers' Rights Clinic ([2-8]-, max. 8) Provides clinical training in workers' rights and administrative law under the supervision of members of the Law School faculty. Students represent workers in employment law matters such as unemployment compensation benefits or wage claims. Credit/nocredit only.

LAW B 529 Advanced Environmental Law and Practice (14, max. 4)
LAW B 530 Judicial Externship (1-15, max. 15)
LAW B 531 Immigration Law Clinic ([1-8]-, max. 8) Credit/ no-credit only.

LAW B 532 Advanced Clinic (1-4, max. 4) Advanced clinical training under the supervision of a law school faculty member in order to complete a project or case begun by the student during a clinic, or to pursue in more depth the subject of the clinic. Credit/no-credit only. Prerequisite: Clinical basis for continued work.
LAW B 533 Interviewing and Counseling for Lawyers (2/3) Credit/no-credit only.
LAW B 534 Affordable Housing Development Clinic ([1-12]-, max. 12)

LAW B 535 Legislative Externship (1-15, max. 15) Credit/ no-credit only.

LAW B 536 Drafting Business Documents ([1-3]-, max. 3)
LAW B 537 Refugee Advocacy Clinic ([1-12]-, max. 12) Credit/no-credit only.
LAW B 538 Agency Externships (1-15, max. 15) Credit/ no-credit only.

LAW B 539 Public Interest Law Externship ([1-15]-, max. 15) Credit/no-credit only.

LAW B 540 Japanese Law (4) Basic institutions and processes of the Japanese legal system. Historical development and traditional role of law, reception of Western law, and cultural and structural factors that influence the function of law and legal institutions. Offered: jointly with JSIS A 540.
LAW B 541 Chinese Law (4) Introduction to the institu tions and processes of the Chinese legal system. Focuses on the contemporary system and its role in relation to political, economic, and social developments. Examines legal aspects governing foreign trade and investment in China. Offered: jointly with JSIS A 541.

LAW B 542 Comparative Korean Law (2-4) Taylor Introduction to basic institutions and processes of the Korean legal systems. Emphasis on the historical development and traditional roles of law, the reception of Western law, and cultural and structural factors that influence the function of law and legal institutions.

LAW B 544 Civil Litigation in Comparative Context ([2-4]-, max. 4) Covers international jurisdiction, service process abroad, taking evidence abroad, applicable laws and treaties, comparison of trial procedures, enforcement of foreign judgments, and use of arbitration. Uses United States and translated Japanese cases.
LAW B 545 Survey of American Law and Practice (6) Provides an integrated introduction to the U. S. legal system, legal analysis, legal research, and legal writing. Introduces tools and techniques for basic legal research in U. S. materials. Credit/no-credit only.
LAW B 546 Comparative Corporate Relations ([2-4]-, max. 4)

LAW B 548 Forensics (4) Bailey Introduces the world of expert witnesses in both criminal and civil cases, looking at the forms of scientific and technical knowledge commonly involved. Covers not only the standard and rules governing expert testimony, but also provide opportunities for hand on experience. Offered: W.

LAW B 549 Government Regulation of Business in Japan (3) Offered: jointly with JSIS D 549.

LAW B 550 American Legal Systems and Method ([1-6]-, max. 6) Provides an integrated introduction to the basic structure and principles of the U.S. public and private law systems; the sources and techniques for basic legal research; and the analytical and writing skills expected of U.S. trained lawyers.
LAW B 551 Comparative Law Seminar ([2-6]-, max. 6) LAW B 552 Tutorial in Comparative Law ([1-4]-, max. 4)
LAW B 553 Chinese Legal Tradition (3) Offered: jointly with JSIS D 553.

LAW B 554 Research Tutorial ([1-4]-, max. 12) Introduces students to social science research methods that may be applicable to their research agenda. Focuses on reading, discussion, commentary, writing, and especially rewriting under close and targeted supervision by the professor.

## LAW B 555 Roman Law (3)

LAW B 556 Islamic Law (2-5) Selected topics in Islamic law that highlight major aspects of Islamic civilization. Offered: jointly with NEAR E 524.

LAW B 557 LAW B 557 ([2-6]-, max. 6) Through class in struction and individual tutoring, students select research topics, submit periodic writing assignments, and make formal presentations, culminating in the submission of a major research paper.

LAW B 558 Doctoral Thesis Seminar (2-10, max. 10) Students draft thesis abstracts, tables of contents, preliminary chapters, and present arguments orally to identify core theories and applied studies to incorporate in their work. Read a selection of published work and indicative articles drawn from the list of relevant sources for individual thesis-in-development.

LAW B 559 Comparative Law: Europe, Latin America, and East Asia (4)

LAW B 560 Criminal Justice Externship (1-15, max. 15) Credit/no-credit only.
LAW B 561 International Law of the Sea (3) Offered: joint ly with SMEA 506.

LAW B 562 Quantitative Methods (4) Covers logic, applications, and limits of quantitative reasoning in the law. Includes mathematics from areas such as statistics, game theory, and social-choice theory, together with legal examples from areas such as discrimination, torts, and CLS to help (re)consider issues such as proof, deterrence, and identity politics.

LAW B 563 Marine Law and Policy Seminar (3-, max. 6) Study and research in selected legal problems relating to ocean and coastal law, marine trade and transportation, marine resources, and protection of the marine environment. Students prepare and pres ent a research paper and critique papers prepared by other students. Prerequisite: LAW B 561, LAW B 565.
LAW B 565 U.S. Coastal and Ocean Law (3-5, max. 5) AIlen Study of the legal framework in the United States controlling allocation and use of coastal and marine resources. Topics include coastal zone management, fisheries management, protection of marine mam mals and endangered species, marine pollution, off shore oil and gas development, and marine transportation. Offered: jointly with SMEA 515.

LAW B 567 General Externship Perspectives Seminar ([2], max. 6) Credit/no-credit only.
LAW B 573 Supreme Court Decision Making (2-4, max 4) Examines Supreme Court decision making from both a theoretical and practical perspective. Surveys representative cases on the Court's current docket. Extensive preparation required of participants, who play the roles of lawyers, justices, and commentators. Emphasis on developing appellate advocacy skills.
LAW B 576 Climate Justice Seminar ([1-6]-, max. 6)
LAW B 577 Law, Literature and Film ([2-4]-, max. 4) An examination of literary and cinematic portrayals of, and issues important to law, lawyers, and the legal sys tem. Considers both portrayals purporting to depict the legal system as well as works envisioning lawyers and the legal system in a "better world."

LAW B 578 Seminar on Legal Problems of Economic Development ([1-6]-, max. 6)
LAW B 580 Externship Tutorial (2) Credit/no-credit only. LAW B 581 Land, American Culture, and the Law: Perspec tives on the Use and Ownership of the Natural Environment ([1-6]-, max. 6)

LAW B 584 Indian Law Seminar ([2-6]-, max. 6) Covers advanced topics in Indian Law. Prerequisite: LAW A 565 or permission of instructor.

LAW B 585 Natural Resources Law ([1-4]-, max. 4)
LAW B 589 Intellectual Property Law Seminar ([1-4]-, max. 4)

LAW B 590 The United States Constitution: Past, Present, and Future (2)

## LAW B 591 Law and Society in Asia ([2-6]-, max. 6)

LAW B 593 Natural Resources Commons Property (3) A review of the different forms of natural resources and an exploration of the desirability of managing certain resources as commons or private property. Covers a review of the successes and failures by various groups in setting policy in this area.
LAW B 594 Public Land Law Seminar ([2-6]-, max. 6)
LAW B 596 International Protection of Human Rights ([2-4]-, max. 6) Stilt

LAW B 597 History of the Formation of the United States Constitution Seminar ([2-6]-, max. 6)
LAW B 598 Advanced Research and Writing Seminar ([1-6]-, max. 6)

LAW B 599 Special Topics (1-12, max. 12)

## Law E

LAW E 500 Advanced Writing Project (1-3, max. 3) Independent research and writing project supervised by a faculty member. Projects are structured to develop skills in research, analysis, and writing. Offered: AWSpS.
LAW E 502 White Collar Crime (3-4)
LAW E 503 Analytic Writing (3)
LAW E 504 Emerging Issues in Urban Government Seminar (1-2, max. 5) Focuses on currently emerging issues in local government, such as municipal regulation of land use, the initiative process, technology and privacy, governmental responses to urban social problems, and regional challenges. Production of publishable paper by student satisfies the advanced writing project requirement.

## LAW E 505 Frontiers of Tort Law (3)

LAW E 506 Asian Contract Law and Practice (3) Examines how economic deregulation, financial restructuring, and technological change affect contracts in Asia. Topics include licensing, franchise, and e-commerce contract in Japan, China, and Taiwan; contract law and practice in Vietnam and Indonesia; cultural norms in contracting; convergence toward "global standards;" and the role of lawyers and other agents.

LAW E 507 Access to Justice Seminar (2) Explores the legal, ethical, and financial issues involved in providing legal services to moderate income persons. Uses a combination of lectures and interactive discussion. Credit/no-credit only.
LAW E 508 Persuasive Writing (2) Anderson Studies persuasion and rhetoric by practicing legal argument: working with facts, framing issues, constructing legal arguments. Studies examples of good and bad persuasive writing. Students practice written advocacy skills in a number of assignments. Students practice advocacy in the context of pre-trial motions and appeals.

LAW E 509 European Union Law (2-4) Survey of the legal origins of the European Union and the synthesis of the major European legal traditions achieved. Focus on the process of harmonizing national laws of the member states and economic integration in the area of competition law and free movement of goods and services.
LAW E 510 Banking Regulation (2-3) Introduces the basics of banking law and regulation. Topics include separate sections on U.S. regulation of financial services with emphasis on federal regulation of banks, and on international, cross-border, and comparative banking regulatory issues.

LAW E 511 Venture Capital Deals (4) O-Conner Focuses on the legal environment of venture capital (VC) financing of technology start-ups. Analyzes relevant statues and regulations, and the standard set of ne-
gotiated terms in typical VC deals. Students negotiate and draft VC deal documents. Offered: W.
LAW E 512 Law, Globalization, and Multinational Corporations (3) An interdisciplinary workshop that examines the role of multinational corporations in a global society. Topics include the legal construct of the multinational corporation, the multinational and the state, the multinational and human rights, and the multinational in the international arena. Offered: jointly with JSIS D 512.

LAW E 513 Theories and Tools for Combatting Corruption (1-3) Corruption has been identified as an obstacle to development, and a 'cost of doing business' in many countries. Examines theories, causes and consequences of corruption, and select regimes established to combat and measure it, e.g., UNCAC, ORCD Anti-Bribery Convention, U.S. Foreign Corrupt Practices Act, and the Transparency International's Corruption Perceptions Index.
LAW E 514 The Law of Nonprofit Organizations (2-4, max. 4) Examines laws generally applicable to nonprofit corporations and legal issue relating to cooperatives, credit unions, and thrift/mutual associations. Attention given to the Washington Nonprofit Corporations Act with comparable statutes and model legislation.

LAW E 515 Post-Conviction Review (2-4) Anderson, Kaltsounis Covers direct appeals and collateral remedies in state and federal criminal proceedings. Topics include jurisdictional issues, harmless error, exhaustion, time limits, cognizable claims, history of the Great Writ of habeas corpus, and the federal AEDPA statute. Recommended: LAW B 515; LAW E 516. Offered: Sp.

LAW E 516 Criminal Procedure: Adjudication (4) Covers the formal charging, trial, and appellate stages of criminal proceedings, including grand jury proceedings, prosecutorial discretion in charging, pretrial release and detention, charging and venue joinder and severance, double jeopardy assistance of counsel, discovery, and disclosure, criminal trials appeals, and collateral post conviction remedies.
LAW E 517 Foreign Trade and Investment Law of the People's Republic of China (1-4, max. 4) Introduction to the regulatory regime governing foreign trade and investment in China and in-depth coverage of key aspects of the regime, with focus on issues faced by U.S. businesses. Covers specific regulations, their implementation in practice, as well as the political and economic background. Offered: jointly with JSIS D 517.

LAW E 518 Torts II (4) Wolcher Covers advanced topics in tort law, including defamation, invasion of privacy, intentional infliction of mental distress, medical malpractice, misuse of legal proceedings, misrepresentation, interference with prospective advantage, nuisance, products liability, toxic torts, trespass to chattels, conversion, and vicarious liability. Prerequisite: LAW A 504. Offered: Sp.
LAW E 519 Philosophy of Law (4) Explores jurisprudence as "the jurist's quest for a systematic vision that will order and illuminate the realities of the law" and legal philosophy as "the philosopher's effort to understand the legal order and its role in human life." Examines various texts, emphasizing works of one or more proponents and critics of liberalism.

LAW E 520 European Union Constitution (4) Walsh Examines the European Union constitution adopted in the Lisbon Reform Treaty: history, values, and objectives; EU institutions and finances; economies, political, and constitutional competences; citizenship and democracy; human rights and fundamental freedoms; common foreign policy; security and defense; and amending the constitution. Offered: A.

## LAW E 521 Advanced Trial Advocacy (3)

LAW E 522 Advanced Constitutional Law: Sexual Orientation and Gender Identity (1-4, max. 4) Nicolas Examines various constitutional provisions from a gay rights perspective. Topics include the rights of equal protection and substantive due process, as well as the First and Ninth Amendments and the Full Faith and Credit Clause. Offered: A.

LAW E 523 Entrepreneurial Law Clinic ([1-9]-, max. 9) Prerequisite: LAW A 526, LAW E 547, or LAW A 546. Offered: S.

LAW E 524 Child Advocacy Clinic ([3-12]-, max. 12)
LAW E 525 Poverty Law (4) Overview of legal issues affecting poor people, including relevant background readings on poverty and access to justice, and selection problems such as housing and homelessness, education, employment issues of low-wage workers, income support and welfare reform, consumer law, family law, and child care.
LAW E 526 Law Reform in Transition Economies Seminar (2-4, max. 6) Clarke, Ramasastry, Taylor Using interdisciplinary perspectives and case studies, this seminar probes the assumptions, methods and outcomes of commercial law reform in transition economies. Also highlights and critiques the role of international lawyers in this important, emerging area of practice.
LAW E 527 Bankruptcy Client Representation Project (14, max. 4) Kuno Provides an opportunity for students to interview a client, evaluate the appropriateness of different forms on bankruptcy as a solution to their debt problems, and provide representations in obtaining the bankruptcy. Student teams are paired with pro bono attorneys under the supervision of a part-time faculty member. Offered: W.
LAW E 528 Appellate Advocacy Clinic (2-, max. 4) Clinical training in appellate litigation with both seminar and practical components dealing with appellate procedure, strategy, and applicable substantive law. Students represent clients in state appellate court, writing at least one appellate brief and participating in oral argument.
LAW E 529 Tribal Court Public Defense Clinic (4-, max. 12) Offers clinical training in substantive areas of law implicated in representation of Native American tribal court criminal and dependency proceedings. Open to third year students in the JD program. Recommended: LAW A 565; LAW B 503; LAW B 515; LAW B 520, which may be taken concurrently, Offered: AWSp.
LAW E 530 Race and Justice Clinic (3-4, max. 12) Focuses on how lawyers can address racial disparities for youth in the juvenile justice system by advocating in multiple forums. Students participate in direct representation on clients, community education, and coalition building. Topics include the history of race in juvenile justice, past efforts to reduce disproportionate minority contact in juvenile justice, the School to Prison Pipeline, skills training, community lawyering, and systems change.
LAW E 532 Sports Law (3/4) Analyzes sports cases and materials that cover multiple disciplines, including contracts, torts, constitutional, antitrust, labor and employment, intellectual property, and criminal law. Participation in problem solving exercises and drafting and negotiations sessions, which explore areas like player and coaching contracts, investigation of NCAA rules infractions, and possible sanctions against universities.

LAW E 533 Rights in America: Equality, liberty, and Democracy (4) Deep historical exploration of a jurisprudentially revolutionary constitutional conflict that pits courts, local government, and the U.S. Congress in passionate struggles over gay and lesbian antidiscrimination rights; freedoms of speech and religion;
and African-American political equality in the nation's capital. Offered: S.
LAW E 534 Human Rights Law: Philosophy and Practice (4) Explores international human rights law through a rigorous curriculum including both human rights philosophy and practice. Topics include aspects of human rights with various disciplines from environmental law and public health to business. Prerequisite: LAW B 596; LAW A 574, both of which may be taken concurrently.

LAW E 535 Basic Income Tax Concepts (3) Basic federal income tax principles, how the tax law impacts a wide variety of business and personal transactions and decisions, and what a reformed tax law might look like.

LAW E 536 Practical and Professional Responsibility Issues in the Small or Solo Law Practice (3-4, max. 4) Cred-it/no-credit only.
LAW E 537 Refugee Law (2) Examines the processes in the United States for the admission of refugees and for the adjudication of asylum claims. Explores international refugee policy and evolving legal norms concerning asylum, temporary protection, repatriation, resettlement, and internal displacement.

LAW E 538 Transnational Civil Litigation in U.S. Courts (3-4, max. 4) Examines the law governing private civil disputes in U.S. courts arising from transnational transactions, including: jurisdiction; forum selection and choice-of-law clauses; extraterritorial service of process, discovery, and application of U.S. law; parallel proceedings; foreign sovereign immunity; Act of State doctrine; and recognition and enforcement of foreign judgments.
LAW E 539 United States and European Union E-Commerce Law (2/3) Compares the different attitudes to regulation of e-commerce and the information society in the U.S. and the European Union. Topics may include: an introduction to European Union institutions, regulatory, cultural themes in the Internet; e-society and e-commerce in Europe; regulation of illegal, harmful content, and Internet Service Provider liability, etc.

LAW E 540 Legal Issues of Internet Law (3) Introduces the basic legal issues raised by networked digital technologies, such as the Internet. Covers jurisdiction, speech, privacy/access, propriety rights (copyrights, domain names), emerging law, leading policy debates, as well as fundamental Internet technical skills. Offered: S.
LAW E 541 Electronic Commerce and Information Technology (3) Introduction to legal and policy issues raised by electronic commerce and other emerging information technologies. Topics vary and may include intellectual property and contract issues raised by establishing an online commercial presence, rights and obligations of users of network services including constitutional rights, information privacy, electronic contracts, electronic payments, etc.

LAW E 542 Queer Youth Advocacy (2) Addresses the legal needs of lesbian, gay, bi-sexual, and transgendered youth. Topics include educational advocacy; legal consequences within the parent-child relationship, access, consent, and right to refuse physical and mental health services; and accessing services for homeless and foster youth.

LAW E 543 Crime, Privacy, and Accountability on the Internet (2) An exploration of criminal activity on the Internet and issues that arise in investigating it. Examines the tension between privacy rights and the need for accountability. Includes substantive criminal statutes, constitutional rights and procedural laws that implement privacy and protections, and the practicalities of Internet crime investigations.

LAW E 544 Privacy Law (2) Examines the legal doctrines of privacy and confidentiality used to protect personal information. Aims to understand how courts and legislatures seek to protect information as new technologies and institutional practices emerge. Studies scope and implications of federal statues that attempt to establish fair information practices with respect to electronic personal information.
LAW E 545 International Trade Law (2-4) Introduces the legal framework, policies, and jurisprudence of the World Trade Organization (WTO). Provides an overview of the regulation of trade in goods, services, and intellectual property that is necessary for international legal practice, and provides the policy analysis to better understand the trade dimensions of international legal disputes.
LAW E 546 International Commercial Arbitration (2-3, max. 3) Introduces the legal framework of international commercial arbitration (ICA) with a focus on the New York Convention of 1958 and the United States Federal Arbitration Act of 1925.
LAW E 547 Robotics Law and Policy (2) Calo Explores the best policy and legal infrastructure to receive commercial robotic products such as driverless cars, domestic drones, robotic surgery systems, and personal or service robots. Examines the unique legal issues raised by robotics for privacy, intellectual property, tort, and administrative law. Offered: Sp.
LAW E 549 International Investment Law and Practice (4/5) Pekkanen Examines the rise of international investment law and practice, including topics such as Bilateral Investment Treaties (BITs), standards of treatment, investor-state arbitrations, and social and political controversies related to the governance of foreign direct investment (FDI) in developed and developing countries. Offered: jointly with JSIS B 549.
LAW E 551 Law and Entrepreneurship (3/4) Planningoriented course uses the problem method to explore the corporate tax and securities law, general business and financial considerations related to small business formation and financing. Prerequisite: LAW A 515; LAW A 530.

LAW E 553 Technology Law and Public Policy (2) Survey of the domains of public policies that have been affected by the information revolution. Examines issues from Internet taxation, to personal data privacy, information warfare. Discusses the implications of the new public policies and whether it is feasible for states to enact different information policies.
LAW E 554 Technology Law and Public Policy Clinic ([2-4]-, max. 12) Clinical training in legislative and public policy advocacy under supervision of law school faculty. Examines legislative process, drafting, commentary and advocacy, appellate advocacy, and professional responsibility concerns. Supervised practice experience representing public interest with respect to law and technology. Credit/no-credit only. Prerequisite: LAW E 553, which may be taken concurrently.
LAW E 555 Legislation (3-5) Andersen, Vaughn, Watts Studies topics related to legislation and the legislative process. Examines the structure and operation of legislative bodies as well as the contemporary debates and laws that surround the process. Considers the theories and canons of statutory construction and interpretation. Introduces the basic techniques of statutory drafting. Offered: W.
LAW E 556 International Human Rights Clinic (1-4, max. 12) Godoy Interdisciplinary clinical training in international human rights. Includes seminar component on legal issues, practice skills, and reflections on human rights projects. Fieldwork on human rights projects tests, develops, and enhances skills training through real-world human rights practice with cross-
campus, U.S., and international partnerships. Credit/ no credit only. Offered: jointly with JSIS B 556; AWSp.
LAW E 557 Human Rights Advocacy Seminar (2-4) Ramasatry Provides interdisciplinary training in international human rights advocacy. Provides background knowledge and exposure to skills needed to participate effectively in advocacy efforts, including the Interdisciplinary International Human Rights Clinic. Offered: AWSp.
LAW E 558 Law of Democracy: Voting Rights and Election Law (3) Examines the law that governs the American system of democracy and considers the legality and desirability of competing models for structural reform. Considers various methods of voting and representation, the right to vote, and the Voting Rights Act.
LAW E 560 Contemporary Muslim Legal Systems Seminar (2-6, max. 6) Lombardi Provides a forum for in-depth research of legal developments in nations where governments are trying to establish legal systems that ensure economic development and human rights, while at the same time ensuring that their law respects "Islamic norms.' Prerequisite: LAW B 556. Offered: A.

LAW E 566 Innocence Project Northwest Clinic (3-4, max. 12) Offers students clinical training investigating and litigating claims of actual innocence on behalf of prisoners serving lengthy sentences for serious crimes. Open to second- and third-year students in the JD program.
LAW E 567 Technology Transfer Law and Policy Seminar (2) O'Connor Covers the law and policy affecting university and non-profit research commercialization and technology transfer. Focuses on the Bayh-Dole Act, the laws and regulations covering data, copyright able works, materials, tax exempt issues, employee assignments, and other matters. Offered: W.

LAW E 568 Indian Law Clinic (4, max. 12) Supervised practice component on Indian law practice and procedure and advocacy skills. Provide legal advice, brief services, and representation to low income Indian clients under the direct supervision of a practicing attorney. Client counseling research, negotiation, and community education. Offered: AWSp.
LAW E 569 Advanced Mediation Practicum (3) Ewalt Advanced clinical practicum in mediation under the supervision of the faculty and experienced mediators. Students convene and mediate cases referred to the Mediation Clinic from government agencies and other sources. Only for students who have successfully completed the Mediation Clinic LAW B 526, or have other comparable experience. Offered: A.

LAW E 570 International Economic Relations and Comparative Trade Policy (3/4)
LAW E 571 LatCrit Theory, Praxis and Community Seminar (2) Provides an introduction to the history of Latinas/ os and the U.S. legal system and an overview of Lat Crit theory from its origins to its present focus with particular attention on contemporary legal and social issues affecting Latina/o communities.
LAW E 572 Race and the Law (3-4) Evaluates the legal regulation of race in the United States. Addresses the racial and legal history of major groups in the United States, including African-Americans, AsianAmerican, Latinos, Native Americans, and whites, and examines the nexus between law and the construction of race as a concept and locus of identity.
LAW E 575 Telecommunications Law and Policy (2) Surveys basic policy principles underlying our nation's telecommunications laws. Focuses on administrative and statutory law, paying special attention to the design and implementation of the Telecommunications Act of 1996. Addresses the role played by antitrust, economic regulation, and constitutional law (particu-
larly the First Amendment) in shaping our nation's telecommunications landscape.
LAW E 579 International and Foreign Law Research (2) Overview of international law materials. Examines primary materials in the vernacular and in translations: constitutions, charters, codes, administrative rules, cases, treaties, and other international agreements. Focuses on practice tools such as directories, guides, digests, and proceedings. Prerequisite: LAW A 506 or permission of instructor.

LAW E 580 Gender Violence and the Law (3-4) Introduces substantive legal areas including: evidence and rape shield laws; protection orders; civil liability of perpetrators and third-parties, and restorative civil remedies in housing, employment, and education contexts. Looks at national trends and primarily focuses on Washington State Law.
LAW E 581 Reproductive Rights and Justice Seminar (4) Ainsworth Provides students with an in-depth study of the constitutional framework governing reproductive rights, as well as critiques of that framework from feminist theorist, those who oppose abortion and contraception, and those whose reproduction and sexuality have been historically marginalized and regulated. Studies different bases in the law for reproductive rights claims, including privacy, equality, and dignity. Offered: A.

LAW E 582 Information Policy: Domestic and Global (5) National and international information policy: public and private sector policy in terms of privacy, access, and exploitation; technology infrastructures and policies supporting the information industries. Coverage includes freedom of information privacy, copyright, telecommunications, and emerging technologies.
LAW E 588 Trademark and Unfair Competition Law (3) Hoffmann Provides a comprehensive review of issues relating to protection of trademarks and other trade identity symbols under the common law and the Federal Lanham Act. Offered: A

LAW E 592 Federal Appellate Advocacy (1-6, max. 6) Representation of an otherwise pro se litigant in an appeal in the Ninth Circuit. Preparation of the opening and reply brief and conduct the oral argument. Requires substantial research, multiple drafts, and painstaking familiarity with the record. Prerequisite: permission of the instructor. Credit/no-credit only.

LAW E 594 Environmental Law Clinic (4-, max 12) Examines applicable environmental law and procedure, skills training, and professional responsibility concerns. Participation in a carefully supervised practice experience representing clients in cases involving environmental issues. Students must be Rule 9 qualified. Credit/no-credit only. Prerequisite: LAW A 527; LAW E 593, which may be taken concurrently.

LAW E 596 Wildlife Law Seminar (3) Anderson, Knudsen Covers the basic issues involved in the law of fish and wildlife management. Topics include the relationship between property and wildlife, federalism issues, and international regulatory regimes. Recommended: course in administrative law.
LAW E 597 Global Warming and Justice Seminar (4) Rodgers Explores case studies (worldwide but with an emphasis on indigenous peoples) addressing multiple legal responses to the consequences of climate change. Explores remedies under U.S. and international law. Offered: WSp.

LAW E 598 The Law and Climate Change Seminar (4) Rodgers Develops student understanding of the consequences of anticipated climate change across a spectrum of issues that include human health, the Earth, and its oceans. Covers the practice of agriculture, revised energy futures, legislative responses to
climate change, and local, state, regional, and tribal efforts to address it. Offered: Sp.
LAW E 599 Legislative Advocacy Clinic (2-5, max. 15) Clinical training in legislative and public policy advocacy. Topics include the legislative process, drafting commentary, advocacy, building a legislative agenda, working with coalitions, and ethics. Direct work with non-profit and other organizations advocating in the state legislature to develop and move legislation as well as respond to proposed legislation. Prerequisite: LAW A 579. Offered: AWSp.

## Law (Health)

LAW H 501 Fundamentals of Health Law (4) Topics include: healthcare reform; obligations to provide care (including EMTALA); medical decision-making law; private health insurance and managed care (including ERISA, HIPAA, and COBRA); Medicare; Medicaid and SCHIP; regulation of healthcare providers; staff privileges and hospital-physician contracts; tax exemption; antitrust, and fraud and abuse laws.

## LAW H 502 Medical Malpractice (3-4)

LAW H 503 Medical Ethics and Jurisprudence (3-) Dudzinski, Kuzzler Examines the relationship between bioethics and law. Reviews the basic concepts of both disciplines; their theoretical and practical connections. Analysis of principle legal cases and statutes illustrating such issues as informed consent to treatment, foregoing life support, research with human subjects, confidentiality, and allocation of health care resources. Offered: jointly with B H 535.

LAW H 504 Legal, Ethical, and Social Issues in Public Health Genetics (3) Kuszler, Mastroianni Equips the student to anticipate and assess potential legal, ethical, and social barriers complicating the incursion of new genetic advances, information, and technologies into public and private healthcare delivery efforts. Prerequisite: GENOME 361, GENOME 371, or equivalent. Offered: jointly with PHG 512/B H 514; W.
LAW H 506 International Bioethics, Social Justice, and Health Seminar (1, max 3) Kuszler, Rivin Explores case studies of ethical dilemmas in research and medical practice and violations of international human rights norms in the design, implementation, and evaluation of health programs and policies. Bioethics and human rights law are the foundational tools for critically evaluating global health impact. Credit/no-credit only. Offered: AWSp.

LAW H 507 Law, Medicine, and Ethics in the Context of Pain Management (2) Reviews the problem of physicians failing to relieve pain of patients in the dying process and legal and ethical issues they face as well as cultural sources of the problem.
LAW H 508 Beginning of Life: Rights and Choices (2) Addresses the controversial legal issues engendered by our increasing control over the beginning of life. Focuses on the law, regulation, and policy implications of contraception; new reproductive and genetic technologies, including surrogate parenthood, sperm and egg donation, in-vitro fertilization, and other methods of conquering infertility; and abortion.

LAW H 509 End of Life: Rights and Choices (2) Address controversial legal issues engendered by our increasing control over the end of life. Focuses on patient autonomy issues at the end of life including withdrawal of life support, surrogate decision making, advance directives, and patient choice to hasten death with medical assistance (physician aid in dying). Offered: Sp.
LAW H 510 Topics in Law and Medicine ([1-4]-, max. 4)
LAW H 511 International Research Ethics, Law, and Policy (3) Kuszler, Rivin Exploration of legal requirements and ethical principles related to responsible conduct
and research in a variety of different governmen structures, healthcare systems, and research environment. Compares and contrasts law and ethical standards applicable to research enterprises in developing countries, industrialized countries, and ethically distinct communities. Offered: jointly with B H 553; A.

LAW H 512 Public Health Law (2) Kuszler Focuses on the role of law in public health administration and in the increasingly regulated healthcare industry. Provides a foundation in the relevant law for public health officers and healthcare industry administrators. Of fered: jointly with HSERV 551; A.
LAW H 515 Global Health Law (3) Kuszler Provides an examination of the legal, economic, social, ethical, and political aspects of global health. Explores the emergence of global health law as a multilateral tool to address health disparities and improve the health of the vulnerable. Offered: A.
LAW H 516 Study Abroad: Global Health, Human Rights, and the Rights of the Child in Cambodia (10) Study abroad exploring the theoretical underpinnings and practical aspects of the rights of the child in the context of Cambodia's health system, focusing on children with disabilities. Approaches the rights of the child from legal and health services perspectives, combining methodologies of research and analysis for practical application. Offered: S.

LAW H 520 Genetics and the Law (3) Kuszler Explores and analyzes legal issues arising from genetic technologies and information. Statutes, regulations, and cases demonstrate the constitutional, contract, tort, criminal, and family law use of genetic science to determine rights, disputes, and controversies. Prereq uisite: LAW H 504/B H 514/PHG 512 or permission of instructor. Offered: jointly with PHG 523; Sp.
LAW H 524 Forensic Evidence (3) Examines the application of the rules of evidence in cases that involve forensic evidence. Examines paradigmatic cases involving homicide and physical or sexual assault, although the principles examined are applicable generally in civil and criminal cases.
LAW H 525 Criminal Law and Procedure (3) Provides an understanding of U.S. criminal law and criminal procedure. Explores basic principles of liability, defenses, and basic constitutional principles governing interactions between police and suspects. Open to forensic nursing students and graduate law students, but not JD students.
LAW H 528 Health Law Practicum (1-6, max. 6) Provides experience with an approved non-profit organization, judicial or legislative body, or governmental agency on issues related to health law or policy. Students work under the guidance of experienced practitioners. Both student and field supervisor provide the supervising law faculty member with a final written evaluation. Credit/no credit only. Offered: AWSpS.
LAW H 530 Disability Law (3) Considers the definition of disability as defined by statute (ADA, FRA), case law, and social perception. Focuses on education law and entitlements, access to and discrimination in employment, housing, public transportation, and healthcare.

LAW H 531 Disability Clinic (4-, max. 12) Clinical training in disability law issues, including access to Medicaid and other public benefits, assistive technology issues, transit accessibility, and low-wage worker ac commodation issues, among other possible issues. Students represent clients at Columbia Legal Services under supervision of CLS attorneys. Prerequisite: LAW H 530.

LAW H 534 Mental Health and the Law (3) Covers medical and legal definitional issues as well as major civil
and criminal law issues, including standards and procedures for involuntary commitment; consent for, and informed refusal of, treatment; de-institutional-ization/community-based treatment; the insanity defense; competency to stand trial; and punishment of the mentally ill convict.
LAW H 536 Research Ethics and Regulation (3) Mastroianni Explores ethical foundations, principles, and concepts, and U.S. laws, related to the conduct of research with humans subjects and the responsible conduct of research. Required for graduate students in the Department of Bioethics and Humanities, School of Medicine. Offered: jointly with B H 536; W.
LAW H 540 Health and Human Rights (3) Examines the basic concepts in the fields of human rights law and public health, and uses those concepts to examine the interdependence and tensions between the two fields. Introduction to the fields of public health and human rights law, examining the impact of health policies and programs on human rights. Offered: jointly with G H 516.
LAW H 542 International Humanitarian Law (3-5) Lorenz Investigates International Humanitarian Law (sometimes called the Law of Armed Conflict), the field concerned with rules developed by civilized nations to protect victims of armed conflict, including the Geneva Conventions. Case studies include the conflict between Israel and the Palestinians, as well as developments in Afghanistan and Iraq. Offered: Sp.
LAW H 545 FDA Law (3) Kuszler Surveys the scope of regulatory authority accorded to the FDA. Focuses on products used in medical care, notably pharmaceutical drugs, medical devices, and biologics. Considers food safety, regulation of cosmetics, and oversight of carcinogenic substances. Offered: Sp.

LAW H 550 Medical Products Liability Law (3) Focuses on product liability claims arising from defective design/ development, manufacture, marketing, and distribution of medical technologies. Considers the concepts of strict liability, negligence, breach of warrant, and informed consent as well as the relative roles of state and federal law. Offered: W.

LAW H 570 Bio-entrepreneurship and the Law (3) Covers legal issues in bio-entrepreneurship by tracking product development through a VC-backed start-up company.

LAW H 575 Family Law: Selected Topics (2) Mastroianni, Price Covers current cutting-edge and complex areas of family law that challenge traditional definitions of "family." Examines marriage, dissolution, and parenting disputes through the lens of "nontraditional" families and families created through medical intervention. Prerequisite: LAW A 580 or permission of instructor. Offered: A.
LAW H 579 Interactive Seminar (1, max. 30) Austin Seminar series on topics related to public health genetics, including current bioethical, legal, medical, biotechnology
LAW H 580 Competition in Health Care (3) Examines the role competition and its opposite, regulation, play in the healthcare industry in the United States. Recommended: course in health or antitrust law.

LAW H 582 Healthcare Fraud and Abuse (2-3) Considers federal and state laws that impose criminal and civil penalties on healthcare providers for activities ranging from payment for referrals, submissions of false claims, misconduct in medical research, the illegal disclosure of patient information, and the abuse and neglect of patients in long term care settings.

LAW H 590 Advanced Research and Writing Seminar in Health Law (2-, max. 4) Kuszler Dedicated research and writing seminar. Includes a substantial paper on a health law topic. Offered: WSp.

LAW H 594 Animal Law (3) Examines substantive law and procedure, specific cases, legislation, and background societal mores that force an evolution and backlash in the level of jurisprudential and legislative comfort with new ways of seeing and speaking about animals other than humans. Offered: WSp.
LAW H 599 Health Law Tutorial (1-4) Focuses on a specialized area of health law. Prerequisite: limited to students in the graduate program in health law; must be approved by the program director. Offered: AWSp.

## Law (Intellectual Property)

LAW P 501 Intellectual Property Law Core (6-8) Intensive study of intellectual property law core subjects: patents, copyrights, trade secrets, and trademarks. Examines fundamental principles, their underlying policies, and how the laws inter-relate. Not open to students who have taken LAW A 522, LAW A 546, LAW E 567, or LAW E 588.
LAW P 503 Introduction to American Legal Systems and Skills (2-3, max. 3) Introduces the U.S. system of state and federal courts in the context of intellectual property. Discusses how intellectual property laws come from the common law as well as state and federal statutes and regulations. Teaches legal research, writing, case briefing, and analysis skills. Offered: A.

LAW P 504 Economic Analysis of Intellectual Property (2-3) Explores the intersection between intellectual property law and economics from both a macro and micro economic perspective; economic justification of intellectual property law; and portfolio management tools that can evaluate intellectual property protection as an investment. Prerequisite: either LAW P 501 or LAW E 567. Recommended: economics. Offered: W.

LAW P 505 International Intellectual Property Law (2-3) Focuses on international treaties as they relate to protection of trademarks and copyrights. Introduces international aspects of branches of intellectual property, including general principles of comparative and international law, and specific law related to obtaining and enforcing intellectual property rights in foreign countries. Prerequisite: either LAW A 522, LAW E 567, LAW E 588, or LAW P 501.
LAW P 506 Transnational Intellectual Property Law Theory and Practice (3) Takenaka Studies comparative intellectual property law using a series of lectures, license exercises, and a mock trial. Consists of a series of lectures on campus followed by a one-week intensive transnational seminar hosted by a law school in Asia or Europe. Offered: Sp.
LAW P 509 Antitrust and Intellectual Property Rights (2-3) Bangasser Examines in-depth application of competition law and policy to the creation and exploration of intellectual property. Offered: Sp.
LAW P 510 Advanced Research and Writing Seminar (2-, max. 4) Gomulkiewicz Instructs IP LL.M students in the research and writing skills necessary to write a major legal research paper. Offered: A.

LAW P 522 Advanced Copyright Law (2) Advanced, indepth study of copyright law and policy. Explores the boundaries of copyright protection and how copyright law relates to other intellectual property laws. Prerequisite: either LAW A 522, LAW E 567, or LAW P 501.

LAW P 528 LLM Intellectual Property Law Practicum (1-4, max. 6) Experience with an approved non-profit organization, judicial or legislative body, or governmental agency on issues related to intellectual property law and policy. Students work under the guidance of experienced practitioners; both student and field supervisor provide the supervising law faculty member with a final written evaluation. Credit/no-credit only.

LAW P 535 Entertainment Law (3) A primer on the various forms of legal protection (trade secrets, copyright, trademarks, publicity law, and licensing) that form the bases for various types of entertainment. Considers key industries: books, music, movies, television, internet, and computer games. Prerequisite: LAW P 501 or permission of the instructor.

LAW P 539 Law, Technology, and Development (2-3, max. 3) Snyder, Winn Provides an overview of selected principles and theories of development economies, and considers the implications of technological innovation, intellectual property rights, government regulation, trade policy, and technical standards for the achievement of development objectives. Mass media coverage of current developments enriches class discussions.
LAW P 543 Intellectual Property Law in East Asia (2-3)
LAW P 545 Advanced Patent Law Seminar (3) Taylor Studies public policy and practice considerations relating to patenting research results in high technology. Examines the most up-to-date issues in legal protection of technology from the comparative law perspective. Prerequisite: either LAW A 546 or LAW P 501. Offered: W.
LAW P 547 Legal Protection for Computer Software (3) Ad dresses copyright, patent, trademark, trade dress, trade secret, and contract protection for software. Also addresses how the law places boundaries around legal protection through anti-trust law and the doctrines of fair use and preemption.
LAW P 548 Litigation Strategies in Technology Protection (3) Deals with procedural and substantive legal issues in enforcement of patents. Proceeds through a litigation in the order that parties normally would. Teaches substantive legal issues in conjunction with procedural and strategic considerations. Prerequisite: either LAW A 546, LAW P 501, or LAW P 567.
LAW P 550 Patent Prosecution (4) Addresses fundamentals of patent application drafting, through a combination of lectures and assignments. Addresses all aspects of proceedings before the U.S. Patent and Trademark Office, including preparing new applications, and examiner interviews. Recommended: engineering or science background. Prerequisite: either LAW A 546, LAW P 501, or LAW P 567.
LAW P 552 Strategic Intellectual Property Commercialization (3) Comprehensive coverage of issues related to exploitation of intellectual property rights as a business asset for new companies, or as a source of income for existing businesses. Prerequisite: either LAW A 546, LAW P 501, or LAW P 567.

LAW P 567 Survey of Intellectual Property (3-6, max. 6) 0 Connor Intended for both law students who are only interested in a general overview of intellectual property and non-law students who are seeding a certificate in intellectual property law and policy. Designed as an alternative to Patents, Trademark and Unfair Competition Law, and Copyrights. Prerequisite: either LAW A 522, LAW A 546, LAW E 588, or LAW P 501. Offered: W.

LAW P 577 Drafting Technology Contracts (3) Covers ad vanced drafting and negotiating licenses and other technology agreements.
LAW P 589 IP Innovations in Science and Technology (2-, max. 6) Takenaka Covers controversial intellectual property law and policy questions arising from evolving science, technology and e-commerce, and addresses cutting edge issues from a multidisciplinary perspective. Examines the current legal regimes and research environment and explores innovative methods for maximizing the exploitation of advanced science and technology. Offered: AWSp.

LAW P 590 Graduate Intellectual Property Law Tutorial (14, max. 4) Focuses on a specialized area of intellectual property law. Limited to students in the graduate program in intellectual property law and policy. Tutorial must be approved by the program director.

## Law (Taxation)

LAW T 502 Federal Tax Controversies and Procedures (3)
LAW T 503 Problems of Timing (2-3, max. 3)
LAW T 504 Property Dispositions and Transactions (3)
LAW T 505 Introduction to Income Taxation (2) Addresses a number of fundamental income tax concepts, including the computation of individual tax liability, statutory exclusions, deductions, and gains. Also deals with issues related to character and timing.
LAW T 506 Tax Practice and Skills (1) Orientation to core concepts of tax practice, including administrative structure and nature of tax law, nuances of statutory interpretation, and the relative authority of statutory, administrative, and judicial sources. Includes overview of print and online tools for federal tax research

LAW T 507 Federal Tax Policy Seminar (2-4, max. 4) Ex amines the theoretical and policy considerations applied in assessing existing and proposed federal tax regimes. Topics include: the nature of the income tax as a tax on saving and consumption; consumption taxes as alternatives to taxes on income; tax policy and charitable giving; taxes and the poor; and more.
LAW T 510 Estate and Gift Taxation (3)
LAW T 511 Taxation of Partners and Partnerships ([1-4]-, max. 4)

LAW T 512 Exempt Organizations ([2-4]-, max. 4)
LAW T 513 Estate Planning (3)
LAW T 514 Drafting Estate Planning Documents (2) Adams Includes the drafting of several documents used in contemporary estate planning practice, including wills, trusts, client letters, powers of attorney, healthcare directives, gift and estate tax returns, and opinion letters. Prerequisite: LAW T 513, which may be taken concurrently. Offered: Sp.

LAW T 515 International Taxation I (3)
LAW T 516 International Taxation II (3)
LAW T 517 Estate and Gift Taxation II (2)
LAW T 518 Taxation of S Corporations (2)
LAW T 519 Canadian-United States Tax Issues (2) Ko Overview to various cross-border issues, including the Ca nadian income tax (and its GST tax), residency for Canadian tax purposes, principles relating to operation of Canadian business in the United States and profit repatriation, and U.S. investment in Canada and similar repatriation issues.

LAW T 520 Tax Ethics (2) Considers the role of ethics in tax practice and its application to specific problems faced by tax professionals. Explores substantive rules governing tax. Addresses ethical problems of tax professionals in connection with structuring transactions, resolving tax controversies with and presenting cases to the IRS, and representing litigants in tax controversies.
LAW T 521 Compensation and Benefits I (3)
LAW T 522 Compensation and Benefits II (2)
LAW T 523 International Estate Planning (2)
LAW T 524 Transfer Pricing Seminar (2) Andrade Reviews section 482 of U.S. Internal Revenue Code and the Treasury regulations thereunder with a focus on multinational corporations (MNCs) and their related party transactions that are subject to the arm's length standard. Application of U.S. transfer pricing regulations to related party transactions involving MNCs.

LAW T 525 Advising Privately-Owned Businesses (3) Explores the role of the lawyer as an adviser through case studies examining a range of structural planning issues and the practical and analytical challenges of the planning process. Emphasizes tax and business considerations, and creative planning strategies. Prerequisite: LAW A 530; LAW A 515, which may be taken concurrently.
LAW T 526 Federal Tax Clinic (2/3-, max. 9) Clinical training in federal tax litigation under the supervision of members of the law school faculty.
LAW T 527 Taxation of Financial Instruments (2) Examines the classification and tax consequences of various financial instruments including: fixed, variable, and contingent rate debt instruments; secondary market transactions in debt instruments, such as coupon stripping and market discount purchases; and transactions in common stock-equity derivatives, such as notional principal contracts, hedging transactions, and monetization strategies.

LAW T 528 Graduate Tax Practicum (2-4) Field-based experience in a department-approved public or private entity, of eight hours per week minimum under the guidance of experienced practitioners. The student and practitioner produce a final report summarizing the practicum experience to the supervising faculty member, who decides whether to award academic credit. Credit/no-credit only.

LAW T 529 International Tax Practice Seminar (2-3) Kadet Utilizes case studies of real-world, multi-faceted international business transactions to develop the knowledge and skills to apply international tax principles and tools to both inbound and outbound investments. Offered: Sp.
LAW T 530 Corporate Reorganizations and Acquisitions (2-3, max. 3) Examines the federal income taxation of business entities and their owners. Limited to coverage of the fundamental concepts of corporate and partnership taxation.
LAW T 531 Advanced Corporate Tax Problems (2) Examination (through case studies) of consolidated tax returns, limits on the use of tax benefits, carryover of tax attributes, classifications of debt versus equity, and corporate penalty taxes.

LAW T 532 Taxation of Estates, Trusts, and Beneficiaries (2-3, max. 3)
LAW T 533 Tax Crimes: Investigations, Prosecutions, and Penalties (2) Chiconie Focuses on elements of tax and related crimes with a view of the governmental investigative tools and powers, including IRS summonses, search warrants, and Grand Jury investigations. Covers taxpayer's rights and defenses in a criminal case; the IRS voluntary disclosure program; and the elements of civil penalties. Offered: AWSp.

## LAW T 534 State and Local Taxation (2)

LAW T 536 Taxation of Trans-Pacific Transactions (2-3)
LAW T 537 Business Planning ([2-6]-, max. 6)
LAW T 538 Estate Planning for Business Interests (2-3) Business succession and estate planning issues for the owners of closely held business, including shareholder agreements, recapitalizations, family limited partnerships and limited liability companies, taxable acquisitions, split dollar agreements, redemptions to pay death taxes, electing small business trusts and more. Prerequisite: LAW T 510

LAW T 539 Matrimonial Tax (2) Covers tax aspects of married relationships and the tax impact of the dissolution of a marriage. Includes joint returns, the marriage tax penalty, innocent spouse relief from joint return liability, pre-nuptial agreements, transfer tax effects of inter-spousal transfers, alimony, child
support, and marital property transfers incident to divorce.

## LAW T 540 Federal Tax Research and Writing (2-4)

LAW T 541 Limited Liability Companies (2)
LAW T 542 State and Local Tax II: Advanced State Tax Concepts (2) Okimoto Covers the interplay between the federal tax and state tax systems. Covers attributional and economic nexus, unitary business principle, state combined reporting versus federal consolidated filings, expense disallowance, adjustments to the federal tax base, fair appointment, alternative business tax, and state tax implications of mergers and acquisitions. Offered: W.
LAW T 543 Advanced Partnership Tax (2) Builds on the material covered in the basic course, Taxation of Partners and Partnership. Covers more sophisticated aspects of partnership allocations; transactions between partners and partnerships; and sale or exchange of partnership interests. Prerequisite: LAW T 511.

LAW T 544 Tax Aspects of Charitable Giving (2) Examines income, gift, and estate tax consequences of charitable gifts of cash and property. Includes: theoretical and policy bases of charitable deduction; technical requirements; effect of receipt of benefits; percentage limitations based on donee and type of property; application of carryover rules; effect of partial cash or cash equivalent consideration.
LAW T 545 International Taxation of Intellectual Property (2) Smith Overview of the tax consequences of various types of common commercial arrangements that involve the development, ownership, and use of intangible property within multinational groups. Explores tax efficient arrangements such as contract research and licensing arrangement, cost-sharing arrangement, and the use of intangible holding companies.
LAW T 546 Taxation of Real Estate Interests (2) An indepth study and analysis of the tax consequences of acquiring, developing, operating, and disposing of interests in real property. Focuses on practical approaches to structuring sale-leaseback transactions, syndications, installment sales, and like-kind exchanges. Considers the application of the passive activity loss rules in real estate.

LAW T 547 International Taxation of Electronic Commerce (2-, max. 4) Electronic commerce is defined as the exchange of digital information in connection with the purchases and sale of goods and services. Seminar and discussion format. Explores the potential methods and approaches for the taxation of earnings associated with electronic commerce.
LAW T 548 Tax Writing (2) Designed to improve writing skills as they relate to practice of tax law. Students draft many types of tax documents. Also considers professional responsibility aspects of tax practice. Recommended: LAW T 506.
LAW T 549 International Merger and Acquisition Transactions (2) Examines the rules applicable to international merger and acquisition transactions, both tax-deferred and table, including the anti-inversion rules of 7874 and the rules under 367 for a variety for tax-deferred transaction structures. Also covers the unique considerations applicable to taxable acquisitions of foreign target companies.

# School of Medicine 

## Dean

Paul G. Ramsey

C314 Health Sciences

Established in 1946, the School of Medicine is the only medical school directly serving the states of Washington, Wyoming, Alaska, Montana, and Idaho (WWAMI). Located in the Warren G. Magnuson Health Sciences Center, the School operates a decentralized program of medical education (WWAMI) via a regional network of teaching affiliates.

The School's basic-science departments provide educational opportunities for students from all schools and colleges within the University. Clinical teaching programs are conducted at the University of Washington Medical Center, Harborview Medical Center, Seattle Children's, Northwest Hospital \& Medical Center, Valley Medical Center, and the Veterans Affairs Puget Sound Health Care System, as well as at other clinical affiliates in Seattle and throughout the WWAMI states.

The School admits approximately 220 medical students to its first-year class and has a total enrollment of over 800 students pursuing the Doctor of Medicine degree. The fulltime faculty numbers more than 2,100 members and there are more than 4,500 clinical faculty located throughout the WWAMI region. The affiliated University residencytraining network enrolls more than 1,200 house officers. Enrollment in the graduate programs in the basic sciences exceeds 600 students, and approximately 1,000 postdoctoral fellows are enrolled in advanced training programs. The School has baccalaureate and graduate programs in occupational therapy, physical therapy, prosthetics and orthotics, and medical technology. The School participates in training a broad spectrum of other allied health professionals. The School is also home for the Physician Assistant Training Program known as MEDEX.

## WWAMI Program

The WWAMI program was initiated in 1971 as an effort to address the maldistribution and shortage of physicians in the Northwest region, provide a broader range of educational opportunities for students, and address the need for primary-care physicians oriented toward rural practice. It is an integral part of the undergraduate medical curriculum and is a fully accredited program of the School of Medicine. The WWAMI program is named for the five states (Washington, Wyoming, Alaska, Montana, and Idaho) that share resources and responsibilities in the regional educational program. Funds appropriated to the WWAMI program by the Wyoming, Alaska, Montana, and Idaho legislatures assure each state of positions for its students in the entering medical class each year.

## First-Year Training

The University of Washington School of Medicine is nationally recognized for its excellent regional training program (WWAMI). In addition to providing unique clinical learning opportunities, the WWAMI program allows a small group learning experience in the first year at the regional training sites, which many students prefer. Students from Wyoming, Alaska, Montana, and Idaho complete their first year curriculum in small learning groups in their respective home states. The state of Washington provides three sites for medical students to complete their first year curriculum:
Pullman: www.wsu.edu/~wwami
Seattle: uwmedicine.washington.edu/Education/MdProgram

Spokane: medicalsciences.wsu.edu/prospectivestudents/wwamiprograminfo.html
Small group learning experiences are available at Pullman and Spokane. All Washington residents will be required to rank one or more of these three sites in order of preference in their secondary application. Every effort will be made to match accepted Washington students with one of their preferred sites.

More information and video testimonials from first-year Pullman and Spokane medical students are available at: uwmedicine.washington.edu/Education/MD-Program/Ad-missions/WWAMI-First-Year/Pages/default. aspx
All students complete their second year of medical studies at the UW's campus in Seattle. Offers of acceptance are conditional upon agreement to participate in the WWAMI Program.

## Third- and Fourth-Year Training

At the conclusion of the second year, students enter the portion of the curriculum that is predominantly clinical. Required, selective, and elective clerkships are described below. As part of clinical training, students complete clerkships at the UW, at its affiliated hospitals, or at community clinical units located in the five-state region. During thirdand fourth-year clerkships, School of Medicine full-time and clinical faculty members provide supervised clinical training in required as well as elective clerkships through the WWAMI region.

## ACADEMIC PROGRAMS

## Bachelor of Science

A program leading to a baccalaureate degree with a major in microbiology is offered through the College of Arts and Sciences.

## Bachelor of Paramedicine

## Bachelor of Clinical Health Sciences

A program leading to a baccalaureate degree with a major in clinical health services is offered through the MEDEX program.

## Bachelor of Science in Medical Technology

A curriculum in medical technology is offered by the Department of Laboratory Medicine. This program provides study in basic laboratory science that includes clinical laboratory training and is designed to prepare knowledgeable and skilled laboratory scientists for a variety of employment opportunities. Information concerning admission to the medical technology program appears under Laboratory Medicine in this catalog.

## Bachelor of Science in Prosthetics and Orthotics

The Department of Rehabilitation Medicine offers a Bachelor of Science degree in prosthetics and orthotics. The curriculum provides professional training in the basic sciences and the clinical application, design, and fabrication of prostheses and orthoses. Information concerning admission to the curriculum in prosthetics and orthotics may be found under Rehabilitation Medicine in this catalog.

## MEDEX Northwest Physician Assistant Training

MEDEX Northwest, UW School of Medicine, is a program designed to train physician assistants. The program has been in existence since 1978 and is accredited by ARC-PA, the Accreditation Review Commission on Education for the Physician Assistant. MEDEX currently trains approximately

80 students annually in three didactic training sites (Seattle, Yakima, and Spokane). Discussions are currently underway to have a fourth training site in Anchorage, AK. Students return to their home communities in the WWAMI region (Washington, Wyoming, Alaska, Montana, Idaho) plus a variety of sites in Oregon and Nevada for their clinical year of training.

MEDEX Northwest is currently an eight-quarter program. The first four quarters consist of intense clinical and didactic instruction at one of the didactic training sites. The final four quarters are spent in clinical experiences throughout the Northwest region. At the completion of the program, students are eligible to sit for the National Certifying Examination for Physician Assistants.

## Master of Occupational Therapy

The Department of Rehabilitation Medicine offers graduate degrees in occupational therapy. The curriculum provides professional training in the health sciences and in the theory and practice of occupational therapy as it impacts occupational performance across the life span and in the various arenas of practice. Occupational therapy addresses daily living skills including self-care, work, and leisure/play. Information concerning admission to the occupational therapy program appears under Rehabilitation Medicine in this catalog.

## Doctor of Physical Therapy

The Department of Rehabilitation Medicine offers graduate degrees in physical therapy. The curriculum provides professional education in the basic sciences and in the clinical use of physical therapy evaluation and management strategies in the treatment or prevention of neuromusculoskeletal dysfunction. Information concerning admission to the physical therapy program appears under Rehabilitation Medicine in this catalog.

## Master of Science and Doctor of Philosophy

Work leading to master's and doctoral degrees is offered, in accordance with the requirements of the Graduate School, in the departments of Biochemistry, Bioengineering, Biological Structure, Immunology, Microbiology, Pathology, Pharmacology, and Physiology and Biophysics. Master's degree programs are offered by the departments of Laboratory Medicine, Medical History and Ethics, and Rehabilitation Medicine. Students may work toward these degrees concurrently with the MD degree, taking additional years beyond the typical four-year medical curriculum.
Concurrent degrees are possible in many other departments and colleges of the University. Recent graduates have pursued concurrent degrees in the basic sciences of medicine and the School of Public Health. A student who intends to work toward a graduate degree should confer with the chairperson of the department in which graduate study is to be pursued and with the Associate Dean for Academic Affairs of the School of Medicine. Specific requirements for admission to work for advanced degrees appear in the Graduate School section of this catalog. Permission to pursue advanced degrees is granted to medical students only if they are progressing normally in the medical curriculum and show evidence of being able to take on this additional work load.

## DOCTOR OF MEDICINE

Upon completion of the curriculum of the School of Medicine, the MD degree is awarded to those candidates who (1) have given evidence of good moral character, (2) have satisfactorily completed the requirements of the curriculum, (3) have fulfilled all special requirements, and (4) have discharged all indebtedness to the University.

## Admission

(Procedures and policies described are subject to change. Information regarding changes is available from the School of Medicine Admissions Office.)

## Selection Factors

Candidates for admission to the University of Washington School of Medicine are considered comparatively on the basis of academic performance, motivation, maturity, personal integrity, and demonstrated humanitarian qualities. A knowledge of, and exposure to, the needs of individuals and society and an awareness of health-care delivery issues are desired. Extenuating circumstances in an applicant's background are evaluated as they relate to these selection factors.

Applicants must submit scores from the Medical College Admission Test (MCAT). This examination must be taken no later than autumn of the year before matriculation and cannot be more than three years old at the time of matriculation. MCAT registration blanks are available through premedical advisers or through the Office of Admissions. Under exceptional circumstances, to be determined by the Admissions Committee, the GRE may be considered during the admission process; however, if accepted, the applicant is required to take the MCAT prior to matriculation.
The following science course requirements must be completed before matriculation but preferably by the time of application: A total of 32 semester hours or 48 quarter hours of undergraduate courses divided into (a) chemistry, 12 semester/18 quarter hours, which can be satisfied by taking any combination of inorganic or organic chemistry, biochemistry, or molecular biology courses; (b) physics, 4 semester/6 quarter hours; (c) biology, 8 semester/12 quarter hours; and (d) other ("open") science subjects, 8 semester/12 quarter hours, which can be met by taking other courses in any of the three categories above.

Although a biochemistry course is not absolutely required for admission to the medical school, it is very strongly suggested for entering students. The biochemistry course for the first-year medical students focuses on molecular mechanisms central to human health and disease and is taught with the presumption that participants have already mastered the fundamentals of biochemistry, including molecular genetics, structure and activity of proteins, and metabolism. A comprehensive undergraduate biochemistry course is the most expedient way to gain this knowledge.

Under exceptional circumstances certain course requirements may be waived for individuals who present unusual achievements and academic promise. All candidates must demonstrate substantial academic ability in their major field as well as in the required courses. Candidates should be proficient in the use of the English language and basic mathematics and are expected to have a basic understanding of personal computing and information technologies.
Students who entered in the fall of 2003 had a mean GPA of 3.69 and the following mean MCAT scores: Verbal, 10.0; Physical Science, 10.3; Biological Science, 10.8; and a median Writing Sample of P.
Completion of three years of coursework at an accredited college or university is the minimum required before possible matriculation; however, all entrants in recent years have earned bachelor's degrees. No specific major is advised. A broad background in the humanities and liberal arts is encouraged, indeed expected.

## Pre-Medical Requirements

The following pre-medical course requirements must be completed prior to matriculation but preferably by the time of application; undergraduate or post-baccalaureate courses must be completed at a college or university accredited by the appropriate regional accrediting body. All candidates must demonstrate substantial academic ability in their major field as well as in the required science cours-
es. Candidates should be proficient in the use of the English language and basic mathematics, and are expected to have a basic understanding of personal computing and information technology. All entrants in recent years have fulfilled requirements for a bachelor's degree. No specific major is advised. A broad background in the humanities and liberal arts is encouraged and expected.

## Courses must include a minimum of:

1. 4 semesters or 6 quarters of Social Science or Humanities
2. 6 semesters or 9 quarters of Chemistry and Biology. The subject matter in these courses must include general chemistry, general biology, biochemistry, molecular genetics, and cell biology/cell physiology, although applicants are not required to take courses with these specific titles
3. 2 semesters or 3 quarters of Physics; or 1 semester or 2 quarters of Physics plus 1 semester or 2 quarters of calculus or linear algebra
The following courses are recommended, but not required:

- Ethics
- Anatomy or Comparative Anatomy
- Human or Mammalian Physiology
- Embryology
- The biochemistry course for the first-year medical students focuses on molecular mechanisms central to human health and disease and it is taught with the assumption that participants have already mastered the fundamentals of biochemistry, including molecular genetics, structure and activity of proteins, and metabolism.

## For further information, consult:

- UW School of Medicine Admissions website
- The American Association of Medical Colleges' publication, 2012-2013 Medical School Admission Requirements (MSAR)

Under exceptional circumstances certain course requirements may be waived for individuals who present unusual achievements and academic promise.

## Application Procedure

The University of Washington participates in the American Medical College Application Service (AMCAS). The deadline for submitting an application to AMCAS is November 1 and no waivers are granted. After receiving the application from AMCAS, the School of Medicine will ask qualified individuals to submit a $\$ 35$ application fee and supplemental application materials. Every attempt is made to notify applicants of the final action by the middle of April of the year of matriculation.
Residents of the states of Washington, Wyoming, Alaska, Montana, or Idaho are eligible to apply. Candidates from Wyoming, Alaska, Montana, and Idaho are required to submit residency certifications from their respective state certifying officers. Proof of legal residence for Washington residents also may be requested. Determination of state of legal residence is not made by the School of Medicine; specific instructions regarding this requirement are furnished at the time of application.
Applicants from outside this five-state region who come from disadvantaged backgrounds or who have demonstrated a commitment to serving underserved populations are considered. Foreign applicants, in addition to the above requirements, must also have a permanent-resident visa.

Individuals with a demonstrated interest in research may apply for the MD/PhD program (Medical Scientist Training Program, or MSTP) regardless of residency.

Applications are not considered from persons who have failed to meet minimum standards at this or another medical or dental school.

The deadline for submitting additional application materials is January 13, 2012. These supplemental materials include:

1. A supplemental application form. This is sent to quali fied applicants after the School of Medicine has received the AMCAS application.
2. An autobiographical statement in which the candidate describes the origin and development of his or her motivation to be a physician with specific emphasis on steps taken to explore a career in medicine and eventual professional goals. Any other issues of importance to the candidate should also be included. The applicant may request that the Personal Comments section of the AMCAS application be used to fulfill this requirement.
3. Three additional short essays ( 250 word limit each)
a. How have your experiences prepared you to be a physician?
b. How do you imagine your personal and professional lives intersecting10 years from now?
c. What obstacles to your goals have you experienced and how have you dealt with them?
d. For Reapplicants: From your most recent application until now, how have you strengthened your application?
4. A premedical-committee letter of recommendation or three letters from instructors (either sciences or humanities)from whom the candidate has taken courses. These letters should critically evaluate the candidate's academic ability, strengths and weaknesses, the difficulty of coursework undertaken, motivation for medicine, personal maturity, and special attributes and assets. We accept up to 3 additional letters of recommendation. Letters of recommendation from current employers may be advantageous. All letters of recommendation should be submitted via the AMCAS Letters of Evaluation/Recommendation service. We must receive letters from AMCAS by the secondary application deadline (January 13, 2012).
5. A $\$ 35$ non-refundable application fee (check or money order only). This is automatically waived for those who have qualified for AMCAS fee waivers. Others seeking a waiver of this fee should submit their requests directly to the School of Medicine Admissions Office.
6. On-line acknowledgment of having read, understood, and of being able to meet, with or without reasonable accommodation, the Essential Requirements of Medical Education at the University of Washington School of Medicine: Admission, Retention, and Graduation Standards.
7. All acceptances are contingent on a criminal background check. Falsifying information may lead to the withdrawal of an acceptance.

Inquiries, address changes, or other information regarding the application should be transmitted in writing and directed to the Committee on Admissions, Office of Admissions, Box 356340, School of Medicine, University of Washington, Seattle, Washington 98195-6340; or email askuwsom@uw.edu.

## Medical Curriculum

## Basic Science Curriculum (149 credits)

The first two years of the medical-student curriculum are identified as the Basic Science Curriculum. It consists of three phases, or groups, of courses in the human biology series, courses in the sciences basic to medicine, organ systems courses taught by basic and clinical disciplines, and introduction to clinical medicine. The first phase is designed to provide the background in basic disciplines required for the organ-system courses. In the second phase, emphasis is placed on learning the normal and pathophysiologic properties of several human organ systems, and
upon correlating these properties with clinical methods of data collection and problem formulation. Students pursue the introduction to clinical medicine course throughout the first two years, learning to interview patients, obtain a medical history, and perform the physical examination.

The academic demands of the Basic Science Curriculum are scaled so that most students are also able to take elective courses that broaden their background.

## First-Year Required Courses

- Microscopic Anatomy (Histology)
- Gross Anatomy and Embryology (including trunk and head and neck anatomy)
- Mechanisms in Cell Physiology
- Biochemistry
- Systems of Human Behavior I
- Cell and Tissue Response to Injury (Pathology)
- Microbiology and Infectious Disease
- Introduction to Immunology
- Nervous System
- Critical Reading and Evaluation of Medical Literature
- Introduction to Clinical Medicine

Second-Year Required Courses

- Cardiovascular System
- Respiratory System
- Principles of Pharmacology I
- Endocrine System
- Systemic Pathology
- Genetics
- Skin System
- Gastrointestinal System
- Epidemiology
- Hematology
- Musculoskeletal System
- Medicine, Health, and Society
- Urinary System
- Systems of Human Behavior II
- Principles of Pharmacology II
- Reproduction
- Nutrition for Physicians
- Introduction to Clinical Medicine

## Clinical Curriculum (148 credits)

The clinical curriculum is pursed in the third and fourth years of medical school. It includes prescribed clerkships to be completed by all students ( 84 credits or 42 weeks) in family medicine, internal medicine, obstetrics and gynecology, pediatrics, psychiatry, and surgery, plus clinical electives ( 32 credits or 16 weeks) in four clinical areas including clerkships in rehabilitation medicine/chronic care, emergency care/trauma, neurology, and surgery electives. Additional clinical or non-clinical selectives (a minimum of 32 credits or 16 weeks) are also required.
During the clinical curriculum, students gain clinical knowledge and gradually increase their clinical problem-solving abilities while working as junior members of the medicalcare team. Each team is headed by a faculty clinician working in one of the medical school-affiliated hospitals, clinics, or practices.

## Independent Investigative Inquiry

In addition to the basic and clinical curricula, each student must complete 8 credits in independent student and investigation in one or more of the biological, behavioral, sociocultural, or epidemiological sciences basic to medicine, culminating in a scholarly product or written paper. The purpose of this requirement is for the student to gain
an understanding of the philosophy and methods of scientific investigation.

## Student Evaluation and Promotion

The awarding of the Doctor of Medicine degree is contingent upon satisfactory completion of academic and noncognitive requirements. The latter includes the acquisition of behavioral patterns and attitudes consistent with the School's professional standards and the oath that all students take at the time of graduation. As such, student evaluation is based on observations by the faculty and others involved in teaching of the student's behavior and conduct as well as papers and examinations. Every student is required to pass Steps 1 and 2 of the United States Medical Licensing Examination, all University of Washington examinations, and to complete an approved independent investigative inquiry project before receiving the Doctor of Medicine degree. Periodic reviews of student performance are conducted by the School's Student Progress Committee. Students are informed of their deficiencies and the remedial requirements, if any, for these deficiencies. Dismissal from the School may occur if the student fails to maintain an acceptable academic record, fails to follow academic directives provided by the School's committees, or fails to develop attitudes and behavioral patterns appropriate to a career in medicine.
The Faculty Council on Academic Affairs (FCAA) reviews the Student Progress Committee's action, and the Dean of the School of Medicine has final approval of the committee's and council's recommendations. A review mechanism is available within this process. Once dismissal or withdrawal from the School has occurred, the student may petition for reinstatement through the FCAA. Reinstatement is not considered without substantial evidence that the problems causing the dismissal or withdrawal have been resolved. Only one petition through the FCAA is allowed. If more than one year elapses after the withdrawal or dismissal, the individual may be required to apply for readmission through the admission process. If a reinstatement petition is denied by the FCAA, the decision is final with no further avenue for review. Subsequent requests for admission must be directed through standard admission procedures.

## Honor Society

Alpha Omega Alpha (AOA) is a national honor medical society. A charter as Alpha of Washington was granted to the School of Medicine in 1950 by AOA. Members are elected by AOA on the basis of high scholarship and good moral character. The purpose of AOA is to recognize and perpetuate excellence in the medical profession. Its goals are to promote scholarship and research in medical school, encourage high standards and conduct, and recognize high attainment in medical science, practice, and related fields. Its motto is "Worthy to serve the suffering."

## Grading System

Grades awarded in each course in the MD curriculum are Pass or Fail in the first-year basic science curriculum; Honors, Pass, or Fail in the applied-science curriculum; and Honors, High Pass, Pass, or Fail in the clinical curriculum. The School's goal is to provide a curriculum that defines the competencies to be achieved by the student at each level. However, a pattern of documented evaluator concerns about a student's performance may indicate unsatisfactory performance when the record is viewed as a whole, even though passing grades have been assigned. Honors may be awarded in a course on predetermined criteria that may involve additional work in the subject as selected by the student. The grading system precludes the ranking of students and no class standing is assigned.

The School of Medicine reserves the right to revise or modify the curriculum, system of evaluation, or graduation requirements.

## Graduation with Honors

A degree of Doctor of Medicine with Honors may be awarded to students with high achievement who, in addition, have demonstrated initiative and success in clinical and scholarly pursuits related to medicine. Candidates for graduation with honors are nominated by the departments each year and are selected on the basis of a review of their academic records by the Honors and Awards Committee.

## Office of Multicultural Affairs

The Office of Multicultural Affairs assists students from disadvantaged backgrounds who are pursuing MD or MDPhD degrees. The program nurtures interests in medical careers by providing a variety of support services and enrichment activities in the areas of recruitment, education, admission, retention, and professional development. The School considers applicants from disadvantaged backgrounds or those who have a demonstrated commitment to work with underserved populations. Students should contact the Office of Multicultural Affairs for assistance during the application process. The program offers counseling and advocacy, referrals to University and community resources, tutoring, financial-aid information, and numerous opportunities to interact with other minority healthcare professionals within the community. Various student organizations also provide minority medical students a means to interact socially and pursue shared interests, to offer peer support, and to assist with community-outreach activities
U-DOC, a high-school summer-enrichment program offered by the Office of Multicultural Affairs, is a six-week program for students who have completed their junior year in high school. U-DOC's goal is to foster, affirm, and encourage high school students' interest in the medical profession by allowing them to further explore medical careers and to obtain a valuable introduction to college life. U-DOC is offered in each of the five WWAMI states.

The Western Consortium Summer Medical Education Program (SMEP) offers undergraduate and some qualified postbaccalaureate students a six-week summer academicenrichment program that includes biology, chemistry, physics, communications, study skills, and MCAT preparation. Structured clinical and research activities are also offered. Housing, stipends, and travel assistance are available.
A prematriculation program for entering minority or disadvantaged medical students is offered for six weeks during the summer. The program is designed to facilitate students' entry into medical school by providing instruction in histology as well as enrichment activities in areas such as study skills, stress management, test-taking skills, research, clinical practice, and community health. Stipends and travel assistance are available to students who qualify.
During the regular school year, the Office of Multicultural Affairs serves as a support network for both the academic and nonacademic needs of students, and facilitates students' access to the multiple resources in the School of Medicine, the WWAMI region, and the community.
The Native American Center of Excellence was established in 1992 as part of the Office of Multicultural Affairs to encourage Native American students to pursue medicine as a career, to promote research on Native American health issues, and to foster the preparation of Native American students for faculty roles in academic medicine. The Center of Excellence provides educational experiences that integrate Western medicine with the Native American way of life, offers a variety of support services to promote the academic development of students, and sponsors a variety of educational opportunities within the Native American community.
Inquiries and requests for additional information may be obtained from the Office of Multicultural Affairs, Box 357430, School of Medicine, University of Washington, Seattle, Washington 98195-7430; (206) 685-2489.

## Medical Scientist Training (MD-PhD) Program

A limited number of highly qualified candidates who wish to pursue both the MD and PhD degrees are considered annually. MD/PhD students are permitted a wide choice of research specializations from among numerous disciplines and interdisciplinary areas of biomedical sciences. The program emphasizes continuity of both clinical and basic sciences exposure. Among participating graduate departments and interdepartmental disciplines are biochemistry, bioengineering, chemistry, environmental health, epidemiology, genetics, immunology, microbiology, molecular biotechnology, pathology, pharmacology, and physiology and biophysics. The participating interdepartmental and affiliate programs are neurobiology and behavior, molecular and cellular biology. Students can also conduct their research at the Fred Hutchinson Cancer Research Center.

Applicants who wish to be considered for the MD/PhD program must submit the Medical Scientist Training Program application as soon as possible. Both the application and any supplemental material requested must be completed by January 15. Serious consideration is rarely given to applicants with minimal research experience and/or a cumulative GPA of less than 3.50 or MCAT scores of less than 10 in each category.

Applicants should correspond directly with the administrator of the Medical Scientist Training Program:

## MSTP

University of Washington
Health Sciences Building, Room I264
Box 357470
Seattle WA 98195-7470
(206) 685-0762
mstp@pathology.washington.edu
www.pathology.washington.edu/mstp/

## Financial Information

## Fees and Other Charges

All fees and extra service charges are payable in U.S. dollars and due at the time specified for such fees and charges. The University reserves the right to change any of its fees and charges without notice. Resident tuition for 20032004 is $\$ 4,149$ per quarter; nonresident tuition is $\$ 9,796$ per quarter.

## Financial Assistance

Financial aid awards are based on the demonstrated need of the students. All applicants for aid must submit the Free Application for Federal Student Aid (FAFSA). This requires disclosure of financial information from the student and the student's parents. The Federal Direct Stafford Loan (subsidized and unsubsidized), Perkins Loan, and the Primary Care Loan are the primary sources of aid. Institutional loans are also available from the School of Medicine. Limited amounts of grant funds are available to Washington state residents who meet specific funding criteria. Parental information is not required for grant funds, the Stafford Loan, or the Perkins Loan.
Scholarships are available through the School of Medicine scholarship fund. These awards vary in amount and require financial information from the student and the student's parents. There is a separate application for the School of Medicine scholarship, which has a May 31 due date.

Financial aid information is distributed to all accepted applicants. The FAFSA form may be obtained at www.fafsa. ed.gov or from the UW Office of Student Financial Aid or the School of Medicine Financial Aid Office. The deadline for receipt of the financial-aid application by the processor is February 28. Applicants must meet this deadline to be considered for all available aid sources regardless of the status of their admission file. Late applicants are awarded only Stafford and Unsubsidized Stafford Ioans.

Outside employment is discouraged while the student is enrolled in medical-school course work

## Enrichment Opportunities

Students may enhance their medical education through a variety of sponsored activities that offer students an opportunity to explore areas of special interest, such as working in rural or urban clinics that serve medically underserved communities, undertaking medical research projects, or participating in an international exchange program with a developing country. Brief descriptions of two of the more formally structured programs follow.

## Rural/Underserved Opportunities Program (RUOP)

This program exposes students to rural medicine and utilizes clinical training sites in all five states. For one month during the summer between the first and second years, students work with physicians in small communities, offering a chance to better understand the challenges and opportunities in these settings. Students receive a stipend supported by the Family Health Foundation, the Academy of Family Physicians, Area Health Education Centers, and the School of Medicine.

## Medical Student Research Training Program

Summer research opportunities are offered to UW medical students interested in gaining valuable experience from training in medical research. This research is planned and carried out under the supervision of a faculty sponsor and is undertaken during the summer between the first and second years. Student trainees in the program receive a stipend supported largely by gifts given by donors specifically to fund student research. The project is ten weeks, full-time, on a working schedule of forty hours per week, and the student may not be enrolled in courses for credit during this time. At the conclusion of the summer, the students prepare posters that are presented as part of the Medical Student Research Forum.

## GRADUATE MEDICAL EDUCATION AND POSTDOCTORAL TRAINING

The University of Washington School of Medicine offers a broad array of residency and fellowship programs. Training occurs at the University of Washington Medical Center, Harborview Medical Center, Veterans Affairs Puget Sound Health Care System, Seattle Children's, and other affiliated training sites in Seattle and throughout the WWAMI region. Postdoctoral research fellowship opportunities in the basic sciences are also offered.

## CONTINUING MEDICAL EDUCATION

The Office of Continuing Medical Education, School of Medicine, offers a wide variety of courses for physicians and health-care professionals in the Pacific Northwest and throughout the nation.
Offerings include short courses of one to three days, one- to two-week board-review courses, visiting professorships, preceptorships, and mini-residencies. Other offerings include lecture series at hospitals, video-tape presentations, self-directed instructional materials, and other specific courses requested by members of the medical community throughout the WWAMI region. Information on offerings is available from its Website at www.uwcme.org.
All physicians also are invited to participate in continuing medical education programs offered by clinical departments, such as grand rounds and regular conference series.

The University of Washington School of Medicine is accredited by the Accreditation Council for Continuing Medical Education to sponsor continuing medical education for physi-
cians. All programs sponsored by the Office of Continuing Medical Education are applicable to physician relicensure requirements of the Washington Board of Medical Examiners and for Category I credit of the Physician's Recognition Award of the American Medical Association. Prescribed credit for the American Academy of Family Physicians and other types of credit are included in the program offerings when appropriate.

Brochures and calendars for courses are available for more detailed information. For information concerning Continuing Medical Education programs, contact:

## Anesthesiology

BB1459 Health Sciences

The Department of Anesthesiology maintains an active program of teaching and research for both the specialist and nonspecialist. Medical students are introduced to the principles of anesthetic management and the effects of anesthetic agents on circulatory and respiratory physiology. The clinical-clerkship program provides basic training in airway management and care of the unconscious patient. A three-year residency program is available for physicians who desire specialty training in anesthesiology. In addition, advanced clinical and research training is offered in several major subspecialty areas (cardiac anesthesia, neuroanesthesia, pediatric anesthesia, obstetrical anesthesia, pain management, and regional anesthesia). Opportunities for collaborative research are available to undergraduate and graduate students. The department conducts a regular series of clinical conferences, didactic lectures, and research seminars. Questions regarding medical student clerkships may be directed to Dr. John Bramhall at 206 231-2847 or bramhall@uw.edu. Other training questions may be directed to the Residency Coordinator at 206-5432773 or Ifg@uw.edu.

## COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations.
ANEST 498 Undergraduate Thesis (*) Sivarajan By special arrangement. Time and credit to be arranged. Offered: AWSpS.
ANEST 499 Undergraduate Research (*) Specific research problems relating to pulmonary, cardiovascular, renal, obstetric, and central nervous system functions, and their alteration by anesthetic techniques and agents. Offered: AWSpS.
ANEST 501 P-Preceptorship in Anesthesiology (1) An opportunity for first- and second-year medical students to gain experience with medical practice situations by observing clinical faculty members in the operat ing room. Prerequisite: permission of instructor. Offered: AWSpS.
ANEST 650 P-Pain Medicine Clerkship (8) Participation as part of a Pain Medicine team in evaluation and management of patients experiencing short term post injury (surgery, trauma) pain and/or long- term pain. Prerequisite: Third- or fourth-year student. (Four weeks, full-time).

ANEST 665 P-Basic Anesthesia Clerkship - Anchorage (4, max. 8) Introduction to the principles of airway management, ventilatory support, use of local anesthetics, techniques of patient monitoring and fluid therapy. Skills taught include airway management, venipuncture, lumbar puncture, and endotracheal intubation. Prerequisite: third- or fourth-year student. (Two weeks, full-time).

ANEST 667 P-Basic Anesthesia Clerkship - Billings (4, max. 8) Introduction to the principles of airway management, ventilatory support, use of local anesthetics, techniques of patient monitoring, and fluid therapy. Skills taught include airway management, venipuncture, lumbar puncture, and endotracheal intubation. Prerequisite: third- or fourth-year student. (Two weeks, full-time).
ANEST 668 P-Basic Anesthesia Clerkship - Missoula (4, max. 8) Introduction to the principles of airway management, ventilatory support, use of local anesthetics, techniques of patient monitoring and fluid therapy. Skills taught include airway management, venipuncture, lumbar puncture, and endotracheal intubation. Prerequisite: third- or fourth-year student. (Two weeks, full-time).
ANEST 671 P-Basic Anesthesia Clerkship - Boise (4, max. 8) Introduction to the principles of airway management, ventilatory support, use of local anesthetics, techniques of patient monitoring, and fluid therapy. Skills taught include airway management, venipuncture, lumbar puncture, and endotracheal intubation. Prerequisite: third- or fourth-year student. (Two weeks, full-time).
ANEST 674 P-Basic Anesthesia Clerkship - Spokane (4, max. 8) Introduction to the principles of airway management, ventilatory support, use of local anesthetics, techniques of patient monitoring, and fluid therapy. Skills taught include airway management, venipuncture, lumbar puncture, and endotracheal intubation. Prerequisite: third- or fourth-year student. (Two weeks, full-time).
ANEST 677 P-Basic Anesthesia Clerkship - Swedish (4, max. 8) Introduction to the principles of airway management, ventilatory support, use of local anesthetics, techniques of patient monitoring, and fluid therapy. Skills taught include airway management, venipuncture, lumbar puncture, and endotracheal intubation. Prerequisite: third- or fourth-year student. (Two weeks, full-time).
ANEST 678 P-Basic Anesthesia Clerkship - VA (4, max. 8) Introduction to the principles of airway management, ventilatory support, use of local anesthetics, techniques of patient monitoring, and fluid therapy. Skills taught include airway management, venipuncture, lumbar puncture, and endotracheal intubation. Prerequisite: third- or fourth-year student. (Two weeks, full-time).
ANEST 679 P-Basic Anesthesia Clerkship - HMC (4, max. 8) Introduction to the principles of airway management, ventilatory support, use of local anesthetics, techniques of patient monitoring, and fluid therapy. Skills taught include airway management, venipuncture, lumbar puncture, and endotracheal intubation. Prerequisite: third- or fourth-year student. (Two weeks, full-time).
ANEST 680 P-Basic Anesthesia Clerkship - UWMC (4) Introduction to the principles of airway management, ventilatory support, use of local anesthetics, techniques of patient monitoring, and fluid therapy. Skills taught include airway management, venipuncture, lumbar puncture, and endotracheal intubation. Prerequisite: third- or fourth-year student. (Two weeks, full-time).

ANEST 681 P-Advanced Clerkship in Anesthesiology UWMC (8, max. 16) Clerkship for students desiring greater exposure to anesthesiology as a specialty. Individual programs can be arranged in the following areas: surgical anesthesia, obstetrical anesthesia, and pain clinic. Prerequisite: Third- or fourth-year student. (Four weeks, full-time.)
ANEST 682 P-Advanced Clerkship in Anesthesia - HMC (8, max. 16) Clerkship for students desiring greater exposure to anesthesiology as a specialty. Individual programs can be arranged in the following areas: surgical anesthesia, obstetrical anesthesia, and pain clinic. Prerequisite: Third- or fourth-year student.
ANEST 697 P-Anesthesiology Special Electives (*, max. 24) Special clerkships, externships, or research opportunities can at times be made available at institutions other than the University of Washington. Students wishing to elect this course should obtain a special assignment form from the dean's office at least one month before advance registration. Prerequisite: permission of instructor. (Four to twelve weeks, full-time.)
ANEST 699 P-WWAMI Anesthesiology Special Electives (*, max. 24) By special arrangement for qualified students, special clerkships or externships may be available at institutions other than the University of Washington located within the WWAMI region. Prerequisite: permission of department.

## Biochemistry

## COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations.
BIOC 405 Introduction to Biochemistry (3) NW Hol, Hurley Survey of basic principles of biochemistry and molecular biology, emphasizing broad understanding of chemical events in living systems in terms of metabolism and structure-function relationships of biologically important molecules. Suitable for pre-majors, for students interested in careers in medicine, dentistry, pharmacy, medical technology. Prerequisite: BIOL 200; either CHEM 223, CHEM 237, or CHEM 335. Offered: A.

BIOC 406 Introduction to Biochemistry (3) NW Ailion, Brzovic, Campbell Survey of basic principles of biochemistry and molecular biology, emphasizing broad understanding of chemical events in living systems in terms of metabolism and structure-function relationships of biologically important molecules. Suitable for pre-majors, for students interested in careers in medicine, dentistry, pharmacy, medical technology. Prerequisite: BIOC 405. Offered: W.
BIOC 426 Basic Techniques in Biochemistry (4) NW Chung, Lui, Young Introduction to basic biochemistry experiments. Acquaints students (largely biochemistry majors) with basic biochemical laboratory techniques. Prerequisite: BIOC 440, which may be taken concurrently. Offered: ASp.
BIOC 440 Biochemistry (4) NW Brockerhoff, Davis, Klevit Biochemistry and molecular biology for undergraduate students in molecular and cellular biology, for biochemistry majors, and graduate students in other science departments. Prerequisite: 2.5 BIOL 200; 2.5 in either CHEM 224, CHEM 239, or CHEM 337; 2.0 in either MATH 124, MATH 134, or MATH 144. Offered: A.

BIOC 441 Biochemistry (4) NW Merz, Miller, Parson Biochemistry and molecular biology for undergraduate
students in molecular and cellular biology, for biochemistry majors, and graduate students in other science departments. Prerequisite: 2.2 in BIOC 440. Offered: W.
BIOC 442 Biochemistry (4) NW Kimelman, Palmiter Biochemistry and molecular biology for undergraduate students in molecular and cellular biology, for biochemistry majors, and graduate students in other science departments. Prerequisite: either 2.2 in BIOC 406 or 2.2 in BIOC 441 . Offered: Sp.
BIOC 496 Research Seminar for Undergraduates (1, max. 2) NW Formal presentations of student research. One credit applies to research component of a relevant major. Credit/no-credit only. Offered: jointly with CHEM 496; Sp.
BIOC 499 Undergraduate Research (*) Investigative work on enzymes, proteins, lipids, molecular biology, developmental biology, intermediary metabolism, physical biochemistry, and related fields. Credit/nocredit only. Offered: AWSpS.
BIOC 515 Matrix Macromolecules in Morphogenesis and Development (1, max. 30)
BIOC 516 Molecular Mechanisms of Blood Clotting (1, max. 30) Davie Offered: AWSp.
BIOC 517 Protein Structure (1, max. 30) Baker Credit/ no-credit only. Prerequisite: permission of instructor. Offered: AWSpS.
BIOC 518 Signaling in Development (1, max. 30) RuoholaBaker Credit/no-credit only. Prerequisite: permission of instructor. Offered: AWSpS.
BIOC 520 Seminar (1) Seminar dealing with timely topics in the field of biochemistry. Credit/no-credit only. Prerequisite: permission of instructor. Offered: AWSp.
BIOC 525 Phytoremediation (1, max. 4) Literature survey of phytoremediation topics. Discussion of latest techniques for the use of plants to concentrate heavy metals in the soil and of plants and plant-bacteria combinations to detoxify various organic contaminants. Credit/no-credit only.
BIOC 526 Control of Growth and Differentiation During Development (1, max. 30) Hauschka Credit/no- credit only. Offered: AWSpS.
BIOC 528 Signal Transduction (1, max. 30) Hurley Credit/ no-credit only. Offered: AWSp.
BIOC 529 Molecular Biology of Early Development (1, max. 30) Kimelman Offered: AWSpS.

BIOC 530 Introduction to Structural Biology (3) Baker, Gelb, Hol, Klevit, Stenkamp, Stoddard Graduate-level discussion of the structure, function, and chemistry of proteins, control of enzymatic reactions. Prerequisite: a comprehensive course in biochemistry and permission. Offered: A.
BIOC 533 Topics In Biochemistry (1, max. 30) Provides indepth examination of current topics in biochemistry, molecular biology, and structural biology. Designed to help participants in basic science departments become acquainted with latest ideas on selected topics. Emphasis on analysis of key concepts in the field with reference to classical papers and recent literature. Prerequisite: permission of instructor. Offered: AWSp.
BIOC 534 Topics In Molecular Biophysics (1.5) Emphasis on methods used to study macromolecular structure and dynamics, including x-ray crystallography, NMR, optical spectroscopy, computer modeling, protein folding and ligand binding. Two topics covered each quarter; students may register for one or both. Prerequisite: permission of instructor. Offered: AWSp.

BIOC 535 Macromolecular Structure (1, max. 30) Klevit Offered: AWSp.

BIOC 536 Control of Cell Growth (1, max. 30) Morris Offered: AWSp.
BIOC 537 Regulation of Gene Expression (1, max. 30) Palmiter Offered: AWSpS.
BIOC 540 Literature Review (2) Miller, Parson, Varani Emphasizes critical evaluation of original articles in the literature. For first-year graduate students in biochemistry and students of other science departments, with permission of instructor. Offered: jointly with BMSD 540; A.

BIOC 541 Literature Review (2) Loeb, Palmiter Emphasizes critical evaluation of original articles in the literature. For first-year graduate students in biochemistry and students of other science departments, with permission of instructor. Offered: W.

BIOC 542 Literature Review (2) Hauschka Emphasizes critical evaluation of original articles in the literature. For first-year graduate students in biochemistry and students of other science departments, with permission of instructor. Offered: Sp.

BIOC 555 Cell and Molecular Biology of Connective Tissue Proteins (1, max. 30) Bornstein Offered: AWSpS.

BIOC 556 Enzymatic and Genetic Aspects of Blood Clotting (1, max. 30) Davie Offered: AWSp.
BIOC 557 Growth Regulation by Calcium Binding Proteins (1, max. 30) Davis Offered: AWSpS.

BIOC 559 Membrane Biochemistry and Cell Growth (1, max. 30) Glomset Offered: AWSpS.
BIOC 560 Protein Folding (1, max. 30) Baker Credit/nocredit only. Prerequisite: permission of instructor. Offered: AWSpS.
BIOC 561 Origin of Polarity (1, max. 30) Ruohola-Baker Credit/no-credit only. Prerequisite: permission of instructor. Offered: AWSpS.

## BIOC 565 Plant Molecular Genetics (1, max. 30)

BIOC 566 Growth and Differentiation of Skeletal and Cardiac Muscle (1, max. 30) Hauschka Offered: AWSpS.
BIOC 568 Molecular and Genetic Aspects of G Protein Signal Transduction (1, max. 30) Hurley Offered: AWSpS.

BIOC 569 Inductive Events in Early Development (1, max. 30) Kimelman Offered: AWSpS.

BIOC 575 NMR Analysis of Proteins and Nucleic Acids (1, max. 30) Klevit Offered: AWSp.

BIOC 576 Sequential Analysis of Growth Regulation (1, max. 30) Morris Offered: AWSpS.
BIOC 577 Gene Regulation in Transgenic Mice (1, max. 30) Palmiter Offered: AWSpS.

BIOC 578 Electron Transport in Photosynthesis (1, max. 30) Parson Offered: AWSp.

BIOC 581 Introduction to Biochemical Research (4, max. 16) Student works with one of the research groups within the department for one quarter and then rotates to other laboratories for second and third quarters. Credit/no-credit only. Prerequisite: graduate standing in biochemistry or permission of instructor. Offered: AWSpS.

BIOC 588 Molecular Biology of Yeast Gene Regulation (1, max. 30) Young Offered: AWSpS.
BIOC 600 Independent Study or Research (*) Offered: AWSpS.

BIOC 700 Master's Thesis (*) Offered: AWSpS.
BIOC 800 Doctoral Dissertation (*) Offered: AWSpS.

## Bioethics and Humanities

A204 Health Sciences Building

## UNDERGRADUATE PROGRAM

Adviser
A204 Health Sciences Building
Box 357120
(206) 543-5145
bhinfo@uw.edu

The Department of Bioethics and Humanities offers the following programs of study:

- A minor in bioethics and humanities

## Minor

## Minor Requirements

25 credits, as follows:

1. One of the following core courses: B H 411, B H 420, B H 456, B H 474/PHIL 411, or PHIL 242.
2. One of the following core courses: B H 401, B H 481, or B H 485.
3. Electives from an approved list to reach 25 credits. Core courses (listed in items 1 and 2, above) may be used as electives if they are not counted toward the core requirements. If a B H course is cross-listed with another department's course, the course may be counted toward the B H-course minimum even if taken under the other department's prefix.
4. Minimum 15 credits of bioethics and humanities courses.
5. Minimum 2.0 grade in courses presented for the minor.

## GRADUATE PROGRAM

## Graduate Program Advisor <br> (206) 221-6548 <br> gradprog@uw.edu

The department offers a two-year Master of Arts in bioethics, which provides students the foundational knowledge, skills, and experience to enrich their careers and broaden their competency in bioethics. The program offers training in research and clinical aspects of bioethics as well as empirical and normative methods of analysis.

Students have the opportunity to study with diverse and well-respected faculty from the University of Washington, the Treuman Katz Pediatric Bioethics Center, and the Seattle Veteran's Health Administration. The program helps prepar students to teach, publish, and conduct research that incorporates bioethics analysis.

## Master of Arts

## Application and Admission

Qualified candidates include:

1. Practicing clinicians, biomedical scientists, health lawyers, post-doctoral fellows, and physicians accepted into a UW clinical fellowship program or the Treuman Katz Pediatric Bioethics Fellowship program.
2. Students currently enrolled in a professional degree program at the University of Washington (i.e. Law, Nursing, or Medicine).

Candidates should possess strong writing, critical thinking, and verbal communication skills. GRE scores are not required. Application due date is March 1.

## Degree Requirements

40 credits, as follows:

1. Ethical theory ( 10 credits)
2. Empirical research methods (6 credits)
3. Clinical ethics (6 credits)
4. Research ethics (3 credits)
5. Approved electives (6 credits)
6. Practicum (3 credits)
7. Master's project (6 credits)

Students are encouraged to take additional electives based on interest and area of specialty, with guidance from their faculty mentor(s).
Opportunities for in-depth study on a topic of interest are available through elective courses, mentored research, and practicum experiences.

## COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations

B H 401 History of Modern Medicine (3) I\&S Berryman Survey of evolution of medical theory, practice, and institutions in European and American society from the late eighteenth century to the present. Medical background not required. Recommended: prior courses in sciences and/or history.

B H 402 Ethical Theory (5) I\&S Jecker Studies the major normative ethical theories, including both teleological and deontological approaches. Emphasizes moral philosophy during the eighteenth and nineteenth centuries, as well as contemporary commentary. Recommended: one basic course in ethics. Offered: jointly with PHIL 412.
B H $\mathbf{4 0 4}$ Metaethical Theory (5) I\&S Jecker Studies the major metaethical theories, including both cognitivist and noncognitivist approaches. Emphasizes moral philosophy during the twentieth century, as well as contemporary commentary. Recommended: one introductory philosophy course. Offered: jointly with PHIL 413.

B H 411 Introduction to Bioethics (3) I\&S Jecker Casebased approach to major topics in bioethics, such as abortion, genetic testing, physician-assisted suicide, and euthanasia. Emphasizes utilizing ethical principles and methods of case analysis.
B H 420 Philosophical Problems in Bioethics (3) I\&S Jecker Introduces the philosophical concepts and controversies that underlie contemporary bioethical debates. Explores issues using the literature of bioethics and philosophy, contemporary film, works of fiction, and conversations with health professionals. Students learn philosophical methods of analysis and argument, and debate different sides of ethical issues.

B H 421 History of Eugenics (5) I\&S Woiak Examines the history of ideas, policies, and practices associated with eugenics and human genetics from the late nineteenth century to the present in American society and other national contexts. Offered: jointly with DIS ST 421.

B H 440 Philosophy of Medicine (5) I\&S Jecker Familiar izes students with central issues in the philosophy of medicine. Focuses on the nature of medical knowl edge, the connection between theory and observation, the meaning of medical concepts, and the relationship between theories and the world. Recommended: prior courses in philosophy, history of
science, or history of medicine. Offered: jointly with PHIL 459.
B H 456 Social Justice and Health (5) I\&S Blacksher Examines the moral grounds for the view that social inequalities in health are unjust using contemporary literature from moral philosophy and bioethics, case studies, and film. Explores basic questions integral to determinations of social injustice as well as moral constraints on the pursuit of health equity.
B H 460 Responsible Conduct of Research (3) I\&S Explores ethical and policy issues that emergy in the conduct of basic, applied, translational, communitybased, and collaborative research. Addresses the ethical debates that arise in the context of planning, implementing, and disseminating research.
B H 474 Justice in Health Care (5) I\&S/VLPA Jecker Examination of the ethical problem of allocating scarce medical resources. Emphasizes the fundamental principles of justice that support alternative health policies. Recommended: prior courses in philosophy or ethics. Offered: jointly with PHIL 411.

B H 481 The Pursuit of Health in American Society (3) I\&S Whorton Examination of the development of concern for personal health over the past two centuries, and of the evolution of philosophies and practices of health promotion. Emphasis on the influence of both medicine and popular culture on shaping of attitudes toward diet, exercise, alcohol, drugs, sex, and other health behavior.

B H 483 The Rise and Development of Sports Medicine (3) I\&S Berryman Evolution of medical thought related to exercise for good health, training for sport participation, and treatment of sport-related injuries. Begins with ancient period, concludes with present. Development of specialization in sports medicine, sport team physicians, preventive medicine, concepts of fitness and wellness as related to exercise prescription, and exercise science.

B H 485 Concepts of the Body in Nineteenth- and Twenti-eth-Century America (3) I\&S Berryman Investigation of ideas relating to corporeal self in nineteenth- and twentieth-century America. Evolution of physical ideals of manliness/femininity, how ideals related to surrounding culture, how different bodily activities developed to realize ideals. Athleticism, physiognomy, beauty contests, body building, decorations, cosmetics, anthropometry, and phrenology.
B H 497 Bioethics and Humanites Special Electives (*-, max. 30)

B H 499 Undergraduate Research (*, max. 5) Investigative work in biomedical ethics or history of the biomedical sciences.

B H 501 Alternative Approaches to Healing (2) Surveys the different philosophies and practices of the major alternative approaches to healing. Provides a characterization of alternative medicine accompanied by presentations by practitioners of chiropractic, naturopathic, homeopathic, traditional Chinese medicine, energy, and mind-body therapies. Credit/no credit only.

B H 502 Ethical Theory (5) Jecker Studies the major normative ethical theories, including both teleological and deontological approaches. Emphasizes moral philosophy during the eighteenth and nineteenth centuries, as well as contemporary commentary. Recommended: course in ethics or philosophy. Offered: A.

B H 505 Professional Seminar I (3) Methods for identifying a bioethics research question and developing a systematic approach to investigating it, including utilization of bibliographic sources in bioethics, philosophy, history. Prerequisite: permission of instructor.

B H 506 Professional Seminar II (2) Includes conducting research in ethics, writing, giving oral presentations, facilitating seminars, developing curriculum vitae, and career planning.
B H 511 P-Medical Ethics (2) McCormick Studies ethical problems arising in clinical settings of medicine; introduces philosophical analysis and argument in practical contexts. Includes clinician-guest speakers. Credit/no-credit only.
B H 512 P-The Human Face of Medicine (2) McCormick Readings and discussing literature by and about physicians and patients to better understand the human values undergirding medical practice and ethical issues arising in the "doctor-patient" relationship.
B H 513 P-Ethical Responsibilities of Medical Practice (2) Dudzinski, McCormick Provides intensive and practical guidance about management of principal ethical and legal problems that arise in clinical practice: informed consent, confidentiality, decisions regarding life-support, advance directives and surrogate decision-makers, duty to care for indigent and risky patients. One week intensive course. Offered: S.
B H 514 Legal, Ethical, and Social Issues in Public Health Genetics (3) Kuszler, Mastroianni Equips the student to anticipate and assess potential legal, ethical, and social barriers complicating the incursion of new genetic advances, information, and technologies into public and private healthcare delivery efforts. Prerequisite: GENOME 361, GENOME 371, or equivalent. Offered: jointly with LAW H 504/PHG 512; W.
B H 515 Public Commentary on Ethical Issues in Health Genetics (3) Edwards Explores issues in public health genetics through academic commentary, personal narratives, science fiction, and film using ethical frameworks from narrative ethics, feminist ethics, and principalism. Includes cloning, assisted reproduction, prenatal genetic testing, presymptomatic genetic testing, gene therapies, scientific responsibility, and GMOs. Graduate students only. Offered: jointly with PHG 525; Sp.
B H 516 Ethical Frameworks for Public Health Genetics (3) Mastroianni Application of ethical principles to problems in genetics practice, policy, and research. Includes: historical experiences with genetic screening and genetic engineering; application of ethical frameworks to emerging problems in public health genetics. Prerequisite: LAW H 514/B H 514/PHG 512 or permission of instructor. Offered: jointly with PHG 522.
B H 517 Respectful Death: Exploring Interdisciplinary End-of-Life Care (3) Farber, McCormick Explores end-of-life care and develops the skills necessary to provide respectful care in a collaborative, team setting to patients and families living with serious life limiting illness during the last 6-12 months of life. Prerequisite: permission of course coordinator. Offered: jointly with FAMED 546.
B H 518 Spirituality in Healthcare (2) Carrigan, Farber, McCormick Examination of the beliefs, values, meaning, and spirituality of health professionals for the wellbeing of their patients as well as for themselves. Offered: jointly with FAMED 547/SOC W 587.
B H 527 Research Methods in Bioethics (3) Starks Introduces the range of methods available for conducting research in bioethics, including both normative and empirical approaches using quantitative and qualitative methods. Students formulate research questions and explore how the application of these approaches generates different research results and products. Offered: Sp.

B H 530 Genetic Discovery in Medicine and Public Health
(3) Burke Addresses the implications of discoveries in genetic science for clinical and public health prac-
tice, with an emphasis on health policy and ethics. Offered: jointly with PHG 542; W.
B H 535 Medical Ethics and Jurisprudence (3) Dudzinski, Kuzzler Examines the relationship between bioethics and law. Reviews the basic concepts of both disciplines; their theoretical and practical connections. Analysis of principal legal cases and statutes illustrating such issues as informed consent to treat ment, foregoing life support, research with human subjects, confidentiality, and allocation of health care resources. Offered: jointly with LAW H 503.
B H 536 Research Ethics and Regulation (3) Mastroianni Explores the ethical foundations, principles and concepts, and U.S. laws related to the conduct of research with human subjects. Required for graduate students in the Department of Bioethics and Humanities, School of Medicine. Offered: jointly with LAW H 536; W.

B H 548 Methods in Clinical Ethics (3) Schellenberg Introduces the history, practice, and research methods in clinical ethics. Case-based examination of methods including principalism, casuistry, narrative methods, virtue ethics. Prerequisite: permission of instructor. Offered: A
B H 549 Classic Cases in Bioethics (3) Dudzinski Analysis of complex ethical cases from UWSOM clinical departments, case law, literature, and media. Case discussions focus on implications for delivery of medical care. Prerequisite: permission of instructor.
B H 550 Current Topics in Bioethics (3) Edwards Analysis of complex ethical cases from UWSOM clinical departments, literature, and media. Case discussion focuses on public policy implications. Prerequisite: permission of instructor.

B H 551 Human Genomics: Science, Ethics, and Society (3 Fullerton Explores the ethical and social implications of human molecular genetics and genomics investigation. Recent research is critically evaluated for its potential impact on scientific practice, research participation, and societal understandings. Prerequisite: LAW H 504/B H 514/ PHG 512 or permission of instructor. Offered: jointly with PHG 551/GENOME 573; A.

B H 552 Advanced Qualitative Methods (4) Starks Ex amines and compares phenomenology, discourse analysis, and grounded theory. Reviews the history of ideas and critically reads examples of published articles to appreciate how each method frames questions and produces different analyses.
B H 553 International Research Ethics, Law, and Policy (3) Rivin Exploration of legal requirements and ethical principles related to responsible conduct and research in a variety of different government structures, healthcare systems and research environment. Compares and contrasts law and ethical standards applicable to research enterprises in developing countries, industrialized countries, and ethically distinct communities. Offered: jointly with LAW H 511; A.
B H 554 Ethics in Clinical Contexts (2) Cooper, Edwards Introduces the tools of clinical ethics in the context of case studies drawn from specific medical specialties. Focuses on ethical issues in clinical cases; special emphasis on understanding perspectives of clinician, patient, and trainee. Credit/no-credit only.
B H 556 Social Justice and Health (5) Blacksher Examines the moral grounds for the view that social inequalities in health are unjust, using contemporary literature from moral philosophy and bioethics, case studies, and film. Explores basic questions integral to determinations of social injustice as well as moral constraints on the pursuit of health equity.

B H 560 Genomics, Ethics, and Policy (2) Burke, Edwards, Fullerton, Starks Explores the intersection of genomics, ethics, and policy, with a particular focus on examining the benefits of genomics for medically underserved communities. Offered: S.

B H 595 Ethics Practicum (1-6, max. 6) Students participate in clinical ethics rounds, case discussions, review of research protocols, or other professional activities related to bioethics. Credit/no-credit only. Prerequisite: permission of instructor.
B H 596 Master's Research Project ([1-12]-, max. 12) Research project culminating in a scholarly paper suitable for publication in a peer-reviewed journal. Credit/no-credit only. Majors only.

B H 597 Special Topics in Medical Ethics (1-, max 15)
B H 600 Independent Study or Research (*)

## Biological Structure

G514 Health Sciences

The department promotes an understanding of biological processes through the study and analysis of structurefunction relationships. The research problems that interest members of the faculty are diverse, including cellular differentiation and development explored in a variety of biological systems, neuroscience, molecular biophysics, biomolecular structure, and quantitative biology with an emphasis on computer-graphic representations of biological structures. This diversity creates a lively atmosphere in the department that provides a stimulating environment for the training of scientists with a variety of backgrounds.
The Department of Biological Structure recruits students through interdisciplinary Ph.D. programs at the University of Washington. Faculty of the Department of Biological Structure are affiliated with one or more of these programs that provide high quality training in a wide range of scientific research areas. These multidisciplinary programs include faculty from the departments of Biochemistry, Bioengineering, Biological Structure, Biology, Environmental Health, Genetics, Immunology, Microbiology. Molecular Biotechnology, Oceanography, Pathobiology, Pathology, Pharmacology, and Physiology and Biophysics, as well as research groups in the Fred Hutchinson Cancer Research Center.
The department does not offer a specific course of study leading to a Master of Science degree. An M.S. degree may be awarded, however, for students who meet the following requirements: One year of coursework ( 30 credits), concentrating in one or more areas that include neurobiology, cell and molecular biology, or developmental biology. Minimum 30 credits of research. Basic knowledge of statistics. One quarter of teaching as an assistant. A thesis committee approves the course of study, administers a general examination and reviews the research proposal prior to the thesis defense.

## COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations.
B STR 301 General Anatomy (4) NW Pittack Survey of systemic human anatomy, including human skeletal system, muscular system, respiratory system, circulatory system, nervous system, digestive system, endocrine system, urinary system, and reproductive system. For second-, third-, and fourth-year undergraduates. Offered: Sp.
B STR 431 Introduction to Neuroanatomy (4) NW Dhaka, Mulligan, Pasupathy, Pittack Anatomy and functional organization of the human central nervous system,
with clinical applications. Prerequisite: admission to the School of Dentistry. Offered: W.
B STR 498 Undergraduate Thesis (*) Individual research projects under the supervision of an instructor. For senior medical students. Offered: AWSpS.
B STR 499 Undergraduate Research (*) Individual research projects in cellular and developmental biology, experimental immunology, reproductive biology, neurobiology, molecular structure, morphometrics, computer modeling, and related fields under the supervision of an instructor. Offered: AWSpS.
B STR 501 Gross Anatomy and Embryology (1-13, max. 13) Clark Dissection course in regional anatomy: thorax, abdomen, pelvis, perineum. Prerequisite: permission of instructor. Offered: A.

B STR 502 Gross Anatomy (1-5, max. 5) Graney Dissection course in regional anatomy: upper and lower extremities. Prerequisite: permission of instructor. Offered: W.
B STR 510 Seminar in Anatomy (1) Graney Scientific and historical basis of selected studies in biological structure, anatomy, and human development. Original literature used as basis for textbook descriptions. Credit/no-credit only. Prerequisite: permission of instructor. Offered: AWSp.
B STR 512 Human Microanatomy (4) Bermingham-McDonogh Treating the specialized tissues and organs of the body from the microscopic and ultramicroscopic points of view. Prerequisite: permission of instructor. Offered: A.
B STR 515 Biological X-Ray Structure Analysis (3) Stenkamp Theory of x-ray diffraction, with emphasis on applications to biological systems. Prerequisite: permission of instructor. Offered: W.

## B STR 519 Current Problems in Macromolecular Structure

(2, max. 10) Stenkamp Macromolecular structures related to specific areas of biological research. Emphasis on discussion of relevant research papers and use of computer graphics to visualize the molecular structures. Offered: AWSpS.
B STR 520 Structure Based Design of Drugs (3) Hol, Verlinde Research papers illustrating protein-structurebased design of new drugs. Review of methods and extensive discussion of all known mechanisms of drug resistance. Offered: W, even years.
B STR 521 Advanced Biomacromolecular Crystallography (3) Hol, Merritt, Stenkamp Aspects of protein crystallography ranging from crystal growth, phase determination methods, density averaging to refinement, fiber diffraction of DNA and proteins. Offered: W, odd years.
B STR 530 P-Gross Anatomy and Embryology for Dental Students (8/13, max. 13) Clark, Mulligan Normal anatomy of the thorax, abdomen, pelvis, and perineum are discussed and dissected employing cadavers. Development of the organ systems related to definitive adult structure. Developmental anomalies and diagnostic anatomy. Prerequisite: admission to School of Dentistry. Offered: A.
B STR 540 Special Problems in Anatomy (1-6, max. 6) Special projects in anatomy under sponsorship of faculty member. Prerequisite: graduate, medical, or dental student standing and permission of instructor. Offered: AWSpS.
B STR 541 P-Microscopic Anatomy for Dental Students (6) Bermingham-McDonogh Lecture and laboratory work in microscopic anatomy. For dental students taking HUBIO 510; others by permission of instructor. Offered: A.
B STR 555 Laboratory Rotation in Biological Structure (*, max. 5) Introduction to experimental design, research methods, and scientific thought in laboratories of
faculty members. Provides hands-on experience, an entrance into the literature of the field, and opportunities for discussion with all members of the laboratory. First-year dental students only. Prerequisite: permission of instructor. Offered: AWSpS.
B STR 557 Biomolecular Structure Seminar (1) Hol Literature review of key research in biomolecular structure in the form of short presentations by participants followed by discussion. Critical evaluation of methods and results regarding properties and protein structure determination. Credit/no-credit only. Prerequisite: graduate standing in biological structure or biochemistry and permission of instructor. Offered: AWSp.
B STR 580 P-Anatomy Teaching Practicum (*, max. 8) Clark Opportunity for medical student (or other professional student) to gain teaching experience in biological structure and human biology courses, including gross anatomy, histology, and neuroanatomy. May include lecture, laboratory, conference, depending on student interest, experience. Credit based on course credit in which student is assisting. Prerequisite: permission of course chairperson. Offered: AWSp.
B STR 584 Seminar in Neurogenesis (1) Bermingham-McDonogh, Dhaka Current research on process by which neurons are generated in the nervous system. Prerequiste: permission of instructor. Offered: AWSpS.
B STR 590 Electron Cryo-Microscopy of Biological Macromolecules and Complexes (3) Wang Introduces highresolution cryo-electron microscopy (cryoEM); image formation and three-dimensional reconstruction theories and available software. Includes hands-on experience using the cryoEM facility for data collection and analysis; and presentations on student projects. Offered: ASp.
B STR 591 X-Ray and NMR Analysis of Macromolecular Structure (1, max. 9) Hol Current topics in research on molecular structure, usually emphasizing techniques of x-ray crystallography. Credit/no-credit only. Prerequisite: permission of instructor. Offered: AWSpS.
B STR 598 Reading in Biological Structure (2) Critical evaluation of research in biological structure, including current problems, methods, and future directions by reading and discussing research and review papers. Credit/no-credit only. Prerequisite: permission of instructor. Offered: AWSpS.

B STR 600 Independent Study or Research (*) Offered: AWSpS.
B STR $\mathbf{7 0 0}$ Master's Thesis ( ${ }^{*}$ ) Offered: AWSpS.
B STR 800 Doctoral Dissertation (*) Offered: AWSpS.

## Biomedical Informatics and Medical Education

E312 Health Sciences

The Department of Biomedical Informatics and Medical Education is comprised of two units: the Division of Medical Education and Evaluation and 2) the Division of Biomedical and Health Informatics. The Division of Medical Education and Evaluation provides training, research and service in educational areas central to medical education including faculty and course evaluation, construction and scoring exams, curriculum development, implementation of innovative educational methodologies such as standardized patients and web-based simulated patients, faculty development, and research consultation (www.meded. washington.edu). The Division of Biomedical and Health Informatics consists of a research and training program that emphasizes both basic and applied aspects of informatics
with a view toward making a difference in people's lives through interdisciplinary collaboration between faculty and students (www.bhi.washington.edu). BHI houses a National Library of Medicine Training Grant in Biomedical and Health Informatics supporting pre- and postdoctoral fellows.

The Department of Biomedical Informatics and Medical Education offers courses in the theory and application of medical education and biomedical and health informatics. Courses are designed for faculty, graduate and undergraduate students, postgraduates and fellows in the health sciences who desire further training in the methods, issues, research, and technology of medical education and biomedical informatics. BIME offers applied and research master's and doctoral degrees, as well as fellowship training, in biomedical and health informatics.

## GRADUATE PROGRAM

Graduate Training Program Coordinator
I-264 Health Sciences, Box 357240
(206) 616-0369
informat@uw.edu

## Master of Science

## Admission Requirements

1. Possession of a baccalaureate degree from an institution within the United States or an equivalent degree from a recognized college or university from outside the United States.
2. A minimum undergraduate GPA of 3.00 , for the last 90 graded quarter credits or 60 graded semester credits.
3. Prior formal college-level coursework, verified by official transcripts, in mathematics (including statistics), computer programming (at least two quarters), and biology (or zoology), as evidenced by official transcripts.
4. GRE scores are required unless the applicant holds an earned doctorate (such as PhD, DDS, MD, EdD, JD) from an accredited U.S. institution. GRE scores must be from testing within the past five years.
5. GRE scores are required for all international applicants, including holders of foreign doctorates (such as PhD, DDS, MD, EdD, JD).
6. A test of English language proficiency (usually the TOEFL) is also required for most international applicants, unless they have an earned undergraduate or graduate degree from an accredited U.S. institution. For the TOEFL a minimum score of 600 (paper-based) or 250 (computerized) is required, and the scores must be from a test taken within the past two years.

## Degree Requirements

60 credits, as follows:

1. Foundational courses: MEBI 530 (3), MEBI 550 (3), MEBI 552 (3); either LIS 510 (4) or LIS 544 (3); two of the following courses: MEBI 534 (3), MEBI 535 (3), HSERV 503/EPI 503 (3); a graduate-level statistics class
2. Elective courses: Four additional courses to establish depth of knowledge in the student's chosen area of specialization. These must be approved by the student's academic adviser.
3. Research seminars: At least 3 credits of MEBI 590 and at least 3 credits of MEBI 591
4. Thesis and final examination: All students must complete an M.S. thesis and pass a final examination for the master's degree.

## Doctor of Philosophy

## Admission Requirements

1. Possession of a baccalaureate degree from an institution within the United States or an equivalent degree from a recognized college or university from outside the United States.
2. A minimum undergraduate GPA of 3.00 for the last 90 graded quarter credits or 60 graded semester credits.
3. Prior formal college-level coursework, verified by official transcripts, in mathematics (including statistics), computer programming (at least two quarters), and biology (or zoology), as evidenced by official transcripts.
4. GRE scores are required unless the applicant holds an earned doctorate (such as PhD, DDS, MD, EdD, JD) from an accredited U.S. institution. The GRE scores must be from testing within the past five years.
5. GRE scores are required for all international applicants, including holders of foreign doctorates (such as PhD, DDS, MD, EdD, JD).
6. A test of English language proficiency (usually the TOEFL) is also required for most international applicants, unless they have an earned undergraduate or graduate degree from an accredited U.S. institution. For the TOEFL a minimum score of 600 (paper-based) or 250 (computerized) is required, and the scores must be from a test taken within the past two years.

## Degree Requirements

90 credits, to include:

1. Foundational courses: MEBI 520 (2), MEBI 530 (3), MEBI 550 (3), MEBI 552 (3); either LIS 510 (4) or LIS 544 (3); two of the following: MEBI 534 (3), MEBI 535 (3), HSERV 503/EPI 503 (3); a graduate level statistics class
2. Courses for depth of knowledge: Five additional courses to establish the necessary depth of knowledge in the student's chosen area of specialization. These must be approved by the student's academic adviser.
3. Research seminars: 12 credits of research seminars that must include at least 3 credits of MEBI 590 and at least 6 credits of MEBI 591
4. Oral presentations: All students must satisfactorily present material in an oral format. Students should present at least once per year. This requirement is fulfilled by journal club and research seminar (MEBI 590 and MEBI 591) presentations.
5. Formal examinations:
a. The qualifying examination: All students must pass a qualifying examination (oral and written) that covers breadth of knowledge prior to formally creating a PhD Supervisory Committee and proceeding with their dissertation research.
b. The general examination: The general examination includes an oral and written part. The oral portion is a public presentation of the student's area of research, and includes an oral examination covering the student's in-depth knowledge of her or his area.
c. Final examination (dissertation defense): A candidate for the PhD must present a dissertation demonstrating original and independent investigation and significant achievement in the field of biomedical and health informatics.

## COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations.
MEBI 498 Special Topics in Biomedical and Health Informatics (1-4, max. 12) Readings, lectures, and discus-
sions pertaining to significant problems or issues in Biomedical and Health Informatics. Offered: AWSp.
MEBI 499 Undergraduate Research (*, max. 12) Investigative research or directed readings in medical education and in biomedical and health informatics. Prerequisite: permission of instructor. Offered: AWSpS.
MEBI 510 Topics in Medical Education Research (1/3, max. 12) Selected research topics in medical education. Development of skills in critical analysis and production of original research. Optional: 1 additional credit for seminar focusing on application of issues in education practice. Credit/no-credit only.

MEBI 511 Current Issues in Medical Education (2) Addresses current issues in medical education in the context of historic and contemporary developments. Topics include curriculum development, teaching and learning, clinical knowledge and reasoning, assessment, professional development, program evaluation, and certification.

MEBI 512 Leadership in Academic Medicine (1) Explores the theoretical and practical aspects of leadership in academic medicine. Topics include qualities of effective leadership, leadership styles, and impact of institutional organization and culture on leadership. Prerequisite: permission of instructor.
MEBI 520 Teaching Methods in Medical Education (2) Ambrozy Empirical and theoretical merits of different teaching methods as applied to medical education. Structuring and leading group discussions, using questions, organizing and delivering lectures, identifying styles of clinical supervision, providing constructive feedback, and presenting effective clinical demonstrations. Offered: W.
MEBI 521 Evaluation of Learning in the Health Sciences (3) Carline Basic issues and methods for evaluation of learning: cognitive performance, psychomotor skills, and reasoning abilities in classroom, laboratory, and clinical settings. Practical applications of instruments such as multiple-choice questions, essays, oral examinations, checklists, rating scales, simulations, and patient management problems. Recom mended: MEBI 520. Offered: Sp.
MEBI 522 Research in Medical Education (2) Scott Individualized, problem-based overviews of research methods and research design pertinent to research and scholarship in medical education. Development and sequencing of research projects from conceptualization through literature review, including proposal development, project implementation, data management, analysis, and write-up. Assessment and critical reading of related literature stressed. Offered: A.
MEBI 530 Medical Informatics (3) Abernethy Overview of biomedical and health informatics concepts, theories, and applications, including the historical evolution and the current and future research directions within the context of information flow in healthcare settings. Offered: A.

MEBI 531 Life and Death Computing (3) Kalet Computing and programming concepts and methods underlying the solution of safety-critical and complex problems in biology, medicine, and health for both research and practice. Includes an introduction to programming in Common Lisp, network programming, and bioinformatics. Prerequisite: CSE 142 or equivalent. Offered: A.
MEBI 532 Computing Concepts for Medical Informatics II (3) Kalet Continuation of topics begun in MEBI 531: multiprogramming and operating system principles, client-server, network programming with sockets, macros, higher-level languages, software engineering. Prerequisite: MEBI 531 or equivalent.
MEBI 533 Public Health and Informatics (3) Turner Introduction to the emerging field of public health infor-
matics. Covers general public health topics as well as key public health informatics issues and applications. Evaluates a public health information system. Prerequisite: either MEBI 530 or permission of instructor. Offered: jointly with HSERV 509; W.
MEBI 534 Biology and Informaticists (3) Brinkley A computing and information oriented treatment of the core concepts of human biology, addressing structure and function at three levels or organization: organism, cell, and gene. Each level includes examples of key anatomic and physiologic concepts, presented from a computational perspective and with the use of electronic resources. Offered: W.
MEBI 535 Clinical Topics for Informaticists (3) Masuda Builds on Biology for Informaticists and introduces the student to a variety of clinical disciplines, representative clinical problems from these disciplines, and informatics issues and applications within these disciplines. Lecturers include faculty from the Schools of Medicine, Nursing, Pharmacy, and Dentistry. Prerequisite: MEBI 530, MEBI 531, MEBI 534. Offered: A.
MEBI 536 Bioinformatics and Gene Sequence Analysis (3) Rose Nature and relevance of molecular sequence information, computer-based protein, and DNA sequence analysis, molecular sequence and genomic databases, and methods for database accession and interrogation. Prerequisite: background in molecular biology and permission of instructor. Offered: jointly with PABIO 536/PHG 536; Sp.
MEBI 537 Informatics Research and Evaluation Methods (4) Abernethy Introduces the many facets of evaluation and research for biomedical and health informatics projects. Focuses on formal studies of the application of information technology in medicine, conducted while an information resource is under development and after the resource is in routine service. Offered: W.
MEBI 539 Teaching and Learning Communities in Biomedical and Health Informatics (4) Masuda Covers learning theory and teaching/communication skills specific to informatics practitioners and researchers. Reviews current learning theories applicable to undergraduate and graduate education. Helps to develop and practice effective teaching techniques. Offered: Sp.
MEBI 540 Critically Appraising and Applying Evidence in Health Care (3) Wolf Literature appraisal skills for various articles (therapy effectiveness, diagnostic tests, literature reviews, clinical measurement, prognosis, quality of care, decision analysis, causation/etiology, guidelines, and economic evaluation). Appraisal of clinical information from literature, strengths/weaknesses of data, analyses, study design/applicability to a current patient's problem. Prerequisite: permission of instructor. Offered: jointly with HSERV 528; W.
MEBI 541 Introduction to Systematic Reviews and Metaanalysis of Evidence (3) Wolf Conceptual understanding of the quantitative methods used to synthesize evidence. Methods for pooling evidence across independent studies, pooling binary/continuous outcomes, differences between fixed and random effects models, and guidelines for appraising published systematic reviews/meta-analyses. Prerequisite: introductory level courses in statistics, epidemiology or biostatistics. Prerequisite: permission of instructor. Offered: jointly with HSERV 529/EPI 541; Sp.
MEBI 542 Medical Information for Decision Making (1) Introduction to methods for : a) identifying and retrieving high quality, relevant documents for clinical decision making, b) applying rigorous criteria when reading primary research studies or reviews of primary studies or other medical information sources that report on the effectiveness of therapeutic or pre-
ventive interventions. Prerequisite: first-year dental student; graduate student, or other health-science student standing with permission of instructor.
MEBI 550 Knowledge Representation and Applications (3) Gennari A readings class in knowledge representation, as described in the primary artificial intelligence and biomedical informatics literature. Topics may include: frame-based systems, description logics, theorem proving, complexity vs. tractability, ontologies, rule-based systems, and biomedical domain applications. Prerequisite: any artificial intelligence course (e.g., CSE 415 or better), or permission of instructor. Offered: A.
MEBI 552 Clinical Decision Support (3) Provides foundation in clinical decision making and support (including decision analysis, Bayesian analysis, belief networks, artificial intelligence, neural networks) presented in the context of local and national decision support systems and the movement to decrease errors in healthcare. Prerequisite: MED 530, MED 531, MED 535, MED 537, CSE 415 or permission of instructor.
MEBI 554 Biomedical Information Interactions and Design (4) Pratt Introduction to theoretical frameworks and research methodologies that underpin the study of human-information interactions and the design of biomedical information systems to support them. Emphasis on understanding informational needs and specifications that drive the design of health information systems. Offered: Sp.
MEBI 570 Health Sciences Information Needs, Resources, and Environment (3) Fuller Characteristics of users of health sciences information; health professionals, researchers, consumers and patients; environments (academic health sciences centers, hospitals, clinics, and public libraries); evaluation of information resources in healthcare; types and uses of health information management systems; policy issues, professional standards, education, and certification. Offered: jointly with LIS 528.
MEBI 580 Computing Fundamentals for Health Providers (3) Enables health professionals to solve work/practice challenges using existing features of desktop computers. Emphasizes productivity concepts. Introduces extended features of common software packages, as well as basic concepts/methods of small system management and support. Prerequisite: admission to Health Informatics Certificate Program or by instructor permission. Offered: jointly with NURS 521; W.
MEBI 581 Telehealth Systems and Applications (4) Demiris Prepares consumers, managers, and researchers of telehealth systems through guided exploration into the components of such systems. Introduces challenges and opportunities facing designers and managers of telehealth and remote healthcare delivery networks. Offered: jointly with NSG 540.
MEBI 590 Selected Topics in Health Informatics (1-3, max. 12) Computers and information technology are improving and changing healthcare education, research, and clinical practice. Informatics faculty and researchers from the UW and affiliated institutions present their research findings as well as discuss their views of national developments in their respective disciplines. Credit/no-credit only. Prerequisite: permission of instructor. Offered: AWSp.
MEBI 591 Biomedical Health Informatics Research Colloquium (1) Provides forum for extensive interactive research discussions. Format is round table with short presentations and long facilitated discussion amongst students and core BHI faculty. Both students and faculty present. Topics primarily research focused (ongoing and proposed research.), but also
journal articles, current topics of debate, and other. Credit/no-credit only. Offered: AWSp.
MEBI 598 Special Topics in Biomedical and Health Informatics (1-4, max. 12) Readings, lectures, and discussions pertaining to a significant biomedical and health informatics problem or an emerging issue. Topics vary. Offered: AWSpS.
MEBI 599 Independent Study or Research (*, max. 12)
MEBI 600 Independent Study/Research (1-10) Individual readings or study, including independent study in preparation for doctoral examinations, research, etc. Prerequisite: permission of instructor.

MEBI $\mathbf{7 0 0}$ Master's Thesis (1-15) Prerequisite: permission of instructor. Offered: AWSpS.
MEBI 800 Doctoral Dissertation (1-10)

## Comparative Medicine

T142 Health Sciences

The Department of Comparative Medicine provides education and research opportunities in the use of animals in biomedical research, testing, and education. In addition, training is provided for veterinarians in the diagnosis, treatment, and prevention of the diseases of laboratory animals. Current educational programs include scheduled courses in the principles and techniques of animal experimentation (C MED 407) for biomedical graduate students, zoonotic diseases, and training in laboratory-animal medicine for veterinary medical students and veterinarians, combined with a Master of Science degree program in comparative medicine. Areas of current research interests include enteric disease, lympocyte biology, biology of aging, mouse genomics, generation and characterization of transgenic animal models, somatic cell gene transfer, and animal models of gene therapy.

## GRADUATE PROGRAMS

## Graduate Program Coordinator <br> T136 Health Sciences, Box 351790 <br> (206) 685-3261

## Postdoctoral Program

Postdoctoral training in the areas of laboratory animal medicine and comparative pathology is offered to persons with a D.V.M. or equivalent degree. Training consists of a combination of coursework, clinical residency rotations, and research leading to a Master of Science degree in comparative medicine. The program also prepares participants for specialty certification by the American College of Laboratory Animal Medicine. Financial assistance is normally provided. A detailed description of the postdoctoral program is available on the department's website at depts. washington.edu/compmed/.

## Master of Science

The Master of Science degree in comparative medicine provides advanced training in comparative medicine to veterinarians. Admission to the degree program requires acceptance into the department's postdoctoral training program. The degree option involves additional elective courses, the completion of a more-involved research project, and a thesis.

## Predoctoral Program

This program is designed to acquaint veterinary medical students with laboratory-animal medicine as a veterinary specialty. Specific areas covered include control/treat-
ment of the principal diseases of common laboratory ani mals and their role in biomedical research. Blocks of four to eight weeks are available for fourth-year students yearround. Stipend support is normally provided.

## COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations.

C MED 407 Principles of Animal Experimentation: The Mouse (3) Brabb, Iritani, Treuting Focus on biology and care of mice used in medical research, and the experimental design and ethics of animal research. Includes lectures and problem-based learning. For graduate and advanced undergraduate students. Prerequisite: permission of instructor. Offered: AWSp.
C MED 499 Undergraduate Laboratory Research (1-6, max. 12) Iritani, Ladiges, Price, Ruddell Specific problems in comparative medicine. Credit/no-credit only. Offered: AWSpS.

C MED 512 Introduction to the Anatomical Analysis of Animal Disease (2) Brabb, Iritani, Treuting Use of animals in experimental study of disease; techniques of animal necropsy, characterization, interpretation of gross and microscopic lesions, correlation of lesions with altered physiological processes, differentiation between naturally occurring and experimentally induced lesions. Prerequisite: PATH 444, PATH 445, or equivalent, and permission of instructor. Enrollment imited: two students per quarter. Offered: AWSpS.

C MED 514 Comparative Pathology Conference (1, max. 6) Liggit, Treuting Focus on histopathology of naturally occurring and experimentally induced lesions of primates, laboratory and domestic animals, fish, wildlife, and birds. Participants discuss the lesions and the basic pathogenetic mechanisms that underlie them. Prerequisite: PATH 500 or equivalent and permission of instructor. Credit/no-credit only. Offered: AWSpS.
C MED 516 Current Literature in Laboratory Animal Medicine (1, max. 12) Liggitt Critical evaluation of recent articles on laboratory animal medicine and science. Emphasis on literature dealing with spontaneous diseases of laboratory animals, biology and husbandry, zoonotic diseases, and animal models of human disease. Experimental design, use of animals in research, and methods of reviewing manuscripts. Credit/no-credit only. Prerequisite: permission of instructor. Offered: AWSpS.

C MED 518 Clinical Conference Seminar (1, max. 12) Price Clinical reports of cases of spontaneous and induced diseases, animal models of human disease, and zoonotic diseases discussed. Disease prevalence and preventive medicine measures. Diagnostic exercises. Credit/no-credit only. Prerequisite: permission of instructor. Offered: AWSpS.
C MED 520 Biology of Laboratory Animals (1) Brabb, Frevert, Iritani, Treuting Fundamentals of the morphological, functional, and applied aspects of anatomy, physiology, pharmacology, biochemistry, and immunology of the commonly used laboratory animal species. Similarities and differences within, and between, species, including man. Husbandry, genetics, behavior, and nutrition. Prerequisite: permission of instructor. Offered: A.
C MED 521 Biology of Laboratory Animals (1) Brabb, Iritani, Treuting Fundamentals of the morphological, functional, and applied aspects of anatomy, physiology, pharmacology, biochemistry, and immunology of the commonly used laboratory animal species. Similarities and differences within, and between, species, including man. Husbandry, genetics, behavior, and nutrition. Prerequisite: permission of instructor. Offered: W.

C MED 530 Diseases of Laboratory Animals (1) Brabb, Iritani, Treuting Analysis of etiology, pathogenesis, pathology, and disease processes in rodents, lagomorphs, carnivores, and nonhuman primates. Prerequisite: permission of instructor. Offered: A.

C MED 531 Diseases of Laboratory Animals (1) Brabb, Iritani, Treuting Analysis of etiology, pathogenesis, pathology, and disease processes in rodents, lagomorphs, carnivores, and nonhuman primates. Prerequisite: permission of instructor. Offered: W.

C MED 540 Animal Models (1) Brabb, Iritani, Treuting Naturally occurring and experimentally induced analogs of human diseases in animals with emphasis on diseases in search of animal models, and approaches to identifying new models. Animal models of categorical disease (e.g., cancer, atherosclerosis, gerontology) discussed. Prerequisite: permission of instructor. Offered: Sp.

C MED 590 Selected Topics in Animal Medicine (1-5, max. 10) Brabb, Frevert, Iritani, Treuting Radiation biology, genetics, anesthesiology and experimental surgery, preventive medicine, and ethical aspects of use of animals in biomedical teaching and research. Specific topics vary from year to year, depending on the expertise of the annual visiting professor. Prerequisite: permission of instructor. Offered: AWSpS.
C MED 592 Comparative Pathology for the Scientist (3) Introduces the interpretation of pathological changes in animals used for biomedical research, with a focus on the mouse. Covers study design and interpretation, techniques to measure pathological changes in major organ systems plus other topical material related to preclinical drug studies and translational research.
C MED 600 Independent Study or Research (*) Offered: AWSpS.

C MED 601 Internship Rotation - Laboratory Animal Medicine (*) Prerequisite: DVM degree. Offered: AWSpS.
C MED $\mathbf{7 0 0}$ Master's Thesis (*) Offered: AWSpS.

## Family Medicine

C408 Health Sciences

The University of Washington Department of Family Medicine, founded in 1971, improves the health and well-being of individuals, families, and communities through leadership in education, scholarship, and clinical care. With over 800 clinical faculty members located throughout the Washington, Wyoming, Alaska, Montana and Idaho (WWAMI ) region, and approximately 40 regular faculty located at the University site in Seattle, the Department is one of the largest of its kind in the country.

Direct patient care is offered primarily through the clinical operations at the UW Neighborhood Clinic in Northgate and the Family Medicine Clinic at Harborview. The Medical Student Education Section develops and delivers innovative, high-quality training to students who will serve the evolving needs of the diverse individuals, families, and communities of the WWAMI region, with emphasis on rural and urban underserved and other vulnerable populations. The Residency program is known for its full spectrum training of residents that allows its graduates to enter a variety of practice settings, including careers with an academic or health policy focus. The UW Family Medicine Residency Network is a group of 18 family medicine residency programs located within the WWAMI region. The Network exists to promote excellence in family medicine residency education, provide academic leadership, and to respond to societal needs for family physicians. Organized in October 1977, the Research Section's efforts are focused primarily
in four areas -- rural health, the health workforce, chronic disease, and medical education. MEDEX Northwest, established in 1969, joined the Department in 2011. Its mission is to train physician assistants who will primarily practice in medically underserved and rural areas of WWAMI.

## COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, sym bols, and abbreviations.

FAMED 499 Undergraduate Research (*) Phillips Research activities arranged with University or commu-nity-based physicians in diversified areas relating to family medicine. Prerequisite: permission of course coordinator. Offered: AWSpS.

FAMED 501 P-Introduction to Family Medicine: Preceptorship (2) Kost Students spend one morning per week for one or more quarters working with a practicing community family physician. Prerequisite: first- and second-year medical students, permission of course coordinator. Offered: AWSpS.
FAMED 502 P-Preclinical Continuity Preceptorship in Family Medicine (1-8, max. 8) Kost Introduces medical students to continuity of care in family medical set tings, specially regarding what it means to be someone's doctor and what it is like to work with an individ ual to help them achieve optimal health. Prerequisite: first- and second-year medical students; permission of course coordinator. Offered: AWSpS.
FAMED 505 P-Rural/Urban Preceptorship (*, max. 12) Opportunity to work in a variety of underserved medical settings in rural and urban areas of Washington, Wyoming, Alaska, Idaho, and Montana. Prerequisite: permission of course coordinator. Offered: AWSpS.
FAMED 525 African American Health and Health Care Disparity (1) Examines the most pressing health issues facing African Americans. Provides a forum to examine the root causes of health disparity in African descendants. Explores strategies to remedy problems in public health and healthcare delivery systems. Credit/no-credit only. Prerequisite" permission of course coordinator.

FAMED 530 Primary Care (1) Phillips Introduces primary care, the foundation of medical care and cornerstone of healthcare reform. Addresses history, clinical content, practitioner workforce, delivery models, research methods, and policy issues. Explores the role of primary care in personal and population health. Includes lectures, discussions, student presentations and practice observation. Prerequisite: permission of course coordinator.

FAMED 540 Topics in Health and Human Services in Rural Communities (1) Explores topics important to rural clinical practice. Includes rural health research, rural health policy, cultural competency, models of rural health practice, and others. Includes panel discus sions, a case study, and a required field trip to a rural community. Prerequisite: permission of course coordinator. Offered: W.
FAMED 546 Respectful Death: Exploring Interdisciplinary End-of-Life Care (3) Farber, McCormick Explores end-of life care and develops the skills necessary to provide respectful care in a collaborative, team setting to patients and families living with serious life-limiting illness during the last 6-12 months of life. Offered: jointly with B H 517. Prerequisite: permission of course coordinator.
FAMED 547 Spirituality in Health Care (2) Examination of the beliefs, values, meaning, and spirituality of health professionals for the well-being of their patients as well as for themselves. Offered: jointly with B H 518/SOC W 587.

FAMED 556 Spanish for Health Professionals (1) Instruction in interviewing Spanish-speaking patient. Cred-it/no-credit only. Prerequisite: permission of course coordinator.
FAMED 557 Hispanic Health and Healthcare Disparities (1) Acosta Covers Hispanic culture and language, history of Hispanics in the United States, Hispanic health status issues, and effective strategies for working across cultures and linguistic barriers. Designed to help the learner understand and respond better to the healthcare needs of the Hispanic community.
FAMED 560 P-Indian Health Problem-Based Learning Cases (1) Presents common Indian health problems via problem-based learning cases. Prerequisite: permission of course coordinator.

FAMED 561 LGBTQ Health and Health Disparities (1) Covers the history and health status of the Lesbian, Gay, Bisexual, Transgendered, Queer, and Intersex (LGBTQ) community in the United States; effective strategies and skills for working with the LGBTQ community; designed to help the learner understand and respond better to healthcare needs of the LGBTQ community. Prerequisite: permission of course coordinator.
FAMED 630 P-WRITE Family Medicine Clinical Clerkship (*, max. 24) Basic clinical clerkship for students enrolled in the WRITE Program. Prerequisite: permission of course coordinator.

FAMED 632 P-Clinical Clerkship in Family Medicine - Bozeman (12) See FAMED 640.
FAMED 633 P-Clinical Clerkship in Family Medicine (12) See FAMED 640.

FAMED 634 P-Clinical Clerkship in Family Medicine - Sitka (12) For description and prerequisite, see FAMED 636. Offered: AWSpS.

FAMED 635 P-Clinical Clerkship in Family Medicine Cheyenne (12) For description and prerequisite, see FAMED 636. Offered: AWSpS.

FAMED 636 P-Clinical Clerkship in Family Medicine Wenatchee (12) Stresses ambulatory primary care with emphasis on comprehensive, integrated care to patients of both genders and all ages. Student functions as clerk in community or residency site, and participates in care of assigned patients in a variety of settings: office, hospital, home, community resources. Prerequisite: third- or fourth-year medical students. Offered: AWSpS.
FAMED 637 P-Clinical Clerkship in Family Medicine - Spokane GHC (12) For description and prerequisite, see FAMED 636. Offered: AWSpS.

FAMED 638 P-Clinical Clerkship in Family Medicine Othello (12) For description and prerequisite, see FAMED 636. Offered: AWSpS.

FAMED 640 P-Clinical Clerkship in Family Medicine - Boise (12) For description and prerequisite, see FAMED 636. Offered: AWSpS.

FAMED 641 P-Clinical Clerkship in Family Medicine Spokane (12) For description and prerequisite, see FAMED 636. Offered: AWSpS.

FAMED 642 P-Clinical Clerkship in Family Medicine Madigan (12) For description and prerequisite, see FAMED 636. Offered: AWSpS.

FAMED 643 P-Clinical Clerkship in Family Medicine - Tacoma (12) For description and prerequisite, see FAMED 636. Offered: AWSpS.

FAMED 644 P-Clinical Clerkship in Family Medicine - University of Washington Medical Center (12) For description and prerequisite, see FAMED 636. Offered: AWSpS.

FAMED 645 P-Clinical Clerkship in Family Medicine Group Health (12) For description and prerequisite, see FAMED 636. Offered: AWSpS.

FAMED 646 P-Clinical Clerkship in Family Medicine Swedish First Hill (12) For description and prerequisite, see FAMED 636. Offered: AWSpS.

FAMED 647 P-Clinical Clerkship in Family Medicine Swedish Cherry Hill (12) For description and prerequisite, see FAMED 636. Offered: AWSpS.
FAMED 648 P-Clinical Clerkship in Family Medicine Renton Valley (12) For description and prerequisite, see FAMED 636. Offered: AWSpS.
FAMED 649 P-Clinical Clerkship in Family Medicine Olympia (12) For description and prerequisites, see FAMED 636. Offered: AWSpS.
FAMED 650 P-Clinical Clerkship in Family Medicine -
Anacortes (12) For description and prerequisite, see FAMED 636. Offered: AWSpS.
FAMED 651 P-Clinical Clerkship in Family Medicine - Omak
(12) For description and prerequisite, see FAMED 636. Offered: AWSpS.

FAMED 652 P-Clinical Clerkship in Family Medicine - Spokane Valley (12) For description and prerequisite, see FAMED 636. Offered: AWSpS.

FAMED 653 P-Clinical Clerkship in Family Medicine - Anchorage (12) For description and prerequisite, see FAMED 636. Offered: AWSpS.

FAMED 655 P-Clinical Clerkship in Family Medicine - Havre (12) For description and prerequisite, see FAMED 636. Offered: AWSpS.

FAMED 656 P-Clinical Clerkship in Family Medicine Whitefish (12) For description and prerequisite, see FAMED 636. Offered: AWSpS.

FAMED 657 P-Clinical Clerkship in Family Medicine - Pocatello (12) For description and prerequisite, see FAMED 636. Offered: AWSpS.

FAMED 658 P-Clinical Clerkship in Family Medicine - Sea Mar Clinic (12) For description and prerequisite, see FAMED 636. Offered: AWSpS.

FAMED 659 P-Clinical Clerkship in Family Medicine Country Doctor (12) For description and prerequisite, see FAMED 636. Offered: AWSpS.
FAMED 660 P-Clinical Clerkship in Family Medicine - Yakima (12) For description and prerequisite, see FAMED 636. Offered: AWSpS.

FAMED 661 P-Clinical Clerkship in Family Medicine Bremerton (12) For description and prerequisite, see FAMED 636. Offered: AWSpS.
FAMED 662 P-Clinical Clerkship in Family Medicine - Buf-
falo (12) For description and prerequisite, see FAMED 636. Offered: AWSpS.

FAMED 663 P-Clinical Clerkship in Family Medicine - Petersburg (12) For description and prerequisite, see FAMED 636. Offered: AWSpS.
FAMED 664 P-Clinical Clerkship in Family Medicine - Billings (12) For description and prerequisite, see FAMED 636. Offered: AWSpS.

FAMED 665 P-Clinical Clerkship in Family Medicine Missoula (12) For description and prerequisite, see FAMED 636. Offered: AWSpS.

FAMED 666 P-Clinical Clerkship in Family Medicine - Torrington (12) For description and prerequisite, see FAMED 636. Offered: AWSpS.

FAMED 668 P-Clinical Clerkship in Family Medicine - Nome (12) For description and prerequisite, see FAMED 636. Offered: AWSpS.

FAMED 670 P-Advanced Underserved Clerkship (*, max.
24) Students gain experience, knowledge, and skills needed to care for rural, specific ethnic or under-
served populations. Prerequisite: third- or fourth-yea medical students, permission of course coordinator. Offered: AWSpS.

FAMED 672 P-Advanced Preceptorship International (*, max. 24) For medical students desiring primary care experience abroad. Special project deals with influences of social, cultural, educational, and economic forces on health care delivery. Prerequisite: late third- or fourth-year medical students, permission of course coordinator. Offered: AWSpS.
FAMED 674 P-Advanced Interviewing in Primary Care (8) Emphasizes developing competency in patient-centered interviewing, interview organization, and time management. Introduces primary care counseling skills and methods of health behavior change. Prerequisite: permission of course faculty.

FAMED 680 P-Traditional Indian Medicine Clerkship in Primary Care Setting (*, max. 16) Broadens students' knowledge about the traditional Indian perception of health and illness, and expands their experience and skills with Traditional Indian Medicine (TIM) by interacting with a TIM practitioner, Native physician, patients and their families, and the local Native community. Prerequisite: either UCONJ 530, Indian Health Pathway declaration, or permission of course coordinator. Offered: AWSpS.

FAMED 681 P-Indian Healthcare Clerkship (*, max. 16) Examines the health disparities, health systems, and cultural/community strengths associated with American Indian/Alaska Native or other indigenous peoples. Prerequisite: either UCONJ 530, Indian Health Pathway declaration, or permission of course coordinator. Offered: AWSpS.

FAMED 688 P-Family Medicine Subinternship (8) Students serve as interns for family medicine services associated with residency programs under the supervision of family medicine residents and attending physicians. Schedules mix inpatient and ambulatory experiences as determined by the site and the fourth-year student may have the same call as R-1 on service. Prerequisite: permission of course coordinator. Offered: AWSpS.
FAMED 697 P-Family Medicine Special Electives (*, max. 24) Supplemental experience in rural/urban practice or a family medicine department in a setting not already established through the family medicine curriculum. Prerequisite: third- or fourth-year medical students, permission of course coordinator. Offered: AWSpS.
FAMED 698 P-Clinical Clerkship in Family Medicine, Away (12) For description and prerequisite, see FAMED 636. Offered: AWSpS.

FAMED 699 P-WWAMI Family Medicine Special Electives (*, max. 24) By special arrangement for qualified students, special clerkships or externships may be available at institutions other than the University of Washington located within the WWAMI region. Prerequisite: permission of course coordinator. Offered: AWSpS.

## Genome Sciences

## S-250 Foege Building

The Department of Genome Sciences was created in 2001 with the merger of the Department of Genetics and the Department of Molecular Biotechnology.

GRADUATE PROGRAM

Graduate Program Coordinator
S-340 Foege Building, Box 355065
(206) 616-7297
gensci@uw.edu

The Department of Genome Sciences offers a graduate program leading to the doctor of philosophy degree. Students are admitted only to the doctoral program.

The faculty and students of the Department of Genome Sciences study a broad range of topics, including the genetics of E. coli, yeast, C. elegans, Drosophila, and mouse; human and medical genetics; mathematical, statistical, and computer methods for analyzing genomes and theoretical and evolutionary genetics; and genome-wide studies by such approaches as sequencing, transcriptional and translational analysis, polymorphism detection, and identification of protein interactions. Successful completion of the graduate program, generally over a period of five years, leads to the PhD in Genome Sciences.
The department's goal is to address leading edge questions in biology and medicine by developing and applying genetic, genomic, and computational approaches that take advantage of genomic information now available for humans, model organisms, and a host of other species.

## Doctor of Philosophy

## Admission Requirements

1. Baccalaureate or advanced degree, either in a science such as biology, biochemistry, or related field, or in a computational area such as computer science or mathematics. The ideal candidate has experience in both areas. The most competitive applicants have excellent GRE scores as well as extensive laboratory research experience.
2. Personal statement describing the applicant's academic and scientific background, research goals, and motivation for applying
3. Curriculum vitae
4. Unofficial copies of transcripts.
5. Unofficial copies of GRE scores (and TOEFL scores, for international applicants). Applicants who have provided official scores to the UW Graduate School need not send additional copies.
6. Three letters of reference from professors or others who are able to provide insight on the applicant's qualifications. Reference letters may be submitted online or by hard copy.
7. Applicants still in school who will have earned additional courses not yet listed on the transcript should send a list of such additional courses to be taken before graduation.

## Degree Requirements

90 credits, to include:

1. First year: Core courses, covering such topics as gene regulation, genomics, genetic analysis, genomic informatics, computational biology, proteomics, and population genetics, as well as literature review. Students rotate through a minimum of three laboratories before selecting a thesis laboratory at the end of the first year. Actual courses are determined in consultation with adviser.

Electives focused on specific areas of interest. Students have the option of selecting mentors from core faculty members in the Department of Genome Sciences as well as from adjunct and affiliate faculty members from several UW departments and the Fred Hutchinson Cancer Research Center.
2. Second year: Thesis research and additional electives. At the end of the second year, the student takes the general examination for PhD candidacy.
3. Third year: Students serve as teaching assistants for two undergraduate courses.
4. Final years: Most students complete their research and defend their dissertation during their fifth year.
5. During all years, students participate in the departmental Journal Club and Research Reports functions, and attend presentations of well-known researchers via the departmental seminar series.

## Financial Aid

Genome Sciences provides full funding, including a competitive twelve-month salary, tuition waiver, and health insurance. Support is contingent upon satisfactory academic progress.

## Research Facilities

The department is located in the William H. Foege Building. Students are assigned space in the laboratories of faculty members with whom they do their rotations or dissertation research. State-of-the-art research facilities are available in the department for cellular, protein, and DNA analysis. Extensive computer and library resources are available to students.

## COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations.

GENOME 261 Genomes and Society (4) NW Explores current technological advances in genome research and how these advances are impacting society. Topics include sequencing of the human genome, stem cell research, cloning, genetically modified foods, immunizations/public health, and genetic therapy. Appropriate for non-science majors.
GENOME 351 Human Genetics: The Individual and Society (4) NW Principles of Mendelian inheritance as illustrated by human traits and diseases; chromosomes and sex determination; distribution of genes in populations; natural selection and evolution; counseling and genetic engineering; ethical issues. Appropriate for non-science majors.
GENOME 361 Fundamentals of Genetics and Genomics (3) Introduces fundamentals concepts in genetics and genomics including patterns of inheritance, genetic variation, and the relationship between genotype and phenotype. Prerequisite: BIOL 200; may not be taken if GENOME 371 is already taken; may not be repeated. Offered: WSpS.
GENOME 371 Introductory Genetics (5) NW Covers gene transmission, including chromosome mapping, genetic pathways; mutational analysis of biological processes emphasizing mutations affecting chromosome transmission. Introduction to genomics - cloning and sequence analysis of whole genomes. Emphasizes formal genetic mechanisms, molecular techniques. For biological sciences majors. Prerequisite: minimum grade of 1.5 in BIOL 180; minimum grade of 1.5 in BIOL 200; may not be repeated. Offered: A.

GENOME 372 Genomics and Proteomics (5) NW Covers emerging fields of genomics and proteomics. Discusses key technologies and their applications to the study of human and model organism genomes.
GENOME 373 Genomic Informatics (4) NW Focuses on methods for analyzing large genetic data sets and their application to biological problems, including sequence alignment and search methods, gene prediction, phylogenetic trees, and microarray analysis.
GENOME 414 Molecular Evolution (5) NW Survey of empirical approaches to the study of molecular evolution and ecology, drawing on examples from a vari-
ety of taxa and the recent literature. Topics include DNA sequencing and systematics, fingerprinting approaches in behavioral ecology, and adaptive evolution at the molecular level. Prerequisite: BIOL 354. Offered: jointly with BIOL 414.

GENOME 453 Genetics of the Evolutionary Process (3) NW Contributions of genetics to the understanding of evolution. Processes of mutation, selection, and random genetic events as they affect the genetic architecture of natural populations and the process of speciation. Emphasis on experimental data and observation, rather than mathematical theory. Prerequisite: either GENOME 361 or GENOME 371.
GENOME 454 The Origins of Genetics (4) NW Discov ery and eventual triumph of Mendelism in the early twentieth century. Concepts of heredity from ancient times to the nineteenth century. Mendel's work and its rediscovery. Evidence contributing to cornerstone of classical genetics - the chromosome theory of heredity. Prerequisite: either GENOME 351, GENOME 371, or GENOME 372. Offered: A.
GENOME 463 Hands-On Science for Elementary School Teachers (5) Offers prospective and practicing teachers an opportunity to learn science through the hands-on teaching methods recommended for teaching science at the elementary level.
genome 465 Advanced Human Genetics (4) NW Eichler, King Explores genetic analysis of naturally occurring variation in humans; origins and consequences of mutation, as mediated by selection, migration, population structure and drift; approaches to finding human disease genes and characterizing them at the molecular level; relevance of other species to analysis of human genes. Prerequisite: either GENOME 361 or GENOME 371. Offered: W.

GENOME 466 Cancer Genetics (3) NW Focuses on three types of cancer-related genetics. DNA repair, mitotic recombination, chromosome loss and imbalance, and other aspects of genomic instability. Metastatic cancer as an example of natural selection and evolution. Yeast and nematodes as models for the study of cancer genetics. Prerequisite: either GENOME 361, GENOME 371, or GENOME 372.

GENOME 475 Debates in Genetics (3) Utilizes the original scientific literature as the basis for discussion of a range of genetic issues that impact society. Discussions are student-led; evaluations are based both on participation in class and on a research paper. Prerequisite: BIOL 200; either BIOL 355, BIOL 401, BIOL 402, GENOME 361, or GENOME 371.

GENOME 490 Undergraduate Seminar (2, max. 6) NW Seminar for advanced undergraduate students engaged in individual research projects or those who wish to gain an understanding of genetic research by analysis of the primary literature. Assignments emphasize the rationale for research projects and the presentation and interpretation of research findings. Offered: AWSp.
GENOME 496 Peer Teaching Assistants in Genome Sciences (1-5, max. 5) Direct experience in the classroom teaching a discussion section for non-majors in genome sciences courses. Peer teaching assistants attend lectures and weekly preparation meetings and gain in-depth background on the subject material. In addition, peer TAs are given training in teaching techniques and course preparation. Credit/no-credit only. Prerequisite: GENOME 371.

GENOME 499 Undergraduate Research (*, max. 30) Cred-it/no-credit only. Offered: AWSpS.
GENOME 501 Introduction to Research Materials (1-10) The student undertakes a research project in one of the research groups within the department for a quarter at a time. Credit/no-credit only. Prerequisite:
graduate standing in the Department of Genome Sciences or permission of Graduate Program Coordinator. Offered: AWSpS.

GENOME 503 An Inquiry Approach to Teaching Genetics at the Introductory High School Level (2, max. 6) Provides advanced science content on topics in genetics and bioethics that are taught in secondary biology classrooms, as well as pedagogical strategies for conveying concepts to pre-college students. Workshop participation required.
GENOME 504 StarNet: Research Experiences for Students and Teachers (3, max. 9) Explores the scientific knowledge, technical skills, and pedagogical strategies related to teaching DNA sequencing and bioethics in a high school classroom. Workshop participation required.

GENOME 505 StarNet: Teacher Research Experience (9) Participating teachers carry out an independent research project in a University of Washington laboratory. Teachers, scientists, and StarNet staff meet weekly for an informal research talk.

GENOME 506 The Science Education Partnership (5, max. 15) Provides secondary school teachers training in molecular biology, genetics, and biotechnology, as well as resources and ongoing support designed to enhance biology instruction. Workshop participation required. Credit/no-credit only.

GENOME 520 Seminar (1, max. 15) Credit/no-credit only. Prerequisite: graduate standing in the Department of Genome Sciences or permission of Graduate Program Coordinator. Offered: AWSp.
GENOME 522 Journal Club (1, max. 30) Presentation and discussion of current scientific literature. For Genome Sciences graduate students only. Credit/ no-credit only. Offered: AWSp.

GENOME 523 Research Reports (1, max. 30) Thomas Presentation and discussion of current student research. For Genome Sciences graduate students only. Credit/no-credit only. Offered: AWSp.

GENOME 525 Current Literature in Human Genetics (1) Topics from current literature in human genetics. Students and faculty each present one topic per quarter. Credit/no-credit only. Prerequisite: graduate or postdoctoral status. Offered: AWSp.

GENOME 531 Genetics of Human Disease (3) Covers modern approaches to the identification of human disease genes permitted by their isolation. Reviews how functional conservation of proteins throughout eukaryotic evolution is modeled in systems such as somatic cell culture, transgenic mice, menatodes, Drosophila, and yeast.
GENOME 540 Introduction to Computational Molecular Biology: Genome and Protein Sequence Analysis (4) Algorithmic and probabilistic methods for analysis of DNA and protein analysis. Students must be able to write computer programs for data analysis. Prior coursework in biology and probability highly desirable. Prerequisite: permission of instructor. Offered: W.
GENOME 541 Introduction to Computational Molecular Biology: Molecular Evolution (4) Computational methods for studying molecular evolution. Students must be able to write computer programs for data analysis. Prior coursework in biology and probability highly desirable Prerequisite: GENOME 540 or permission of instructor. Offered: Sp.
GENOME 547 Scientific Writing (1.5) For graduate students principally in their second and third year. Focuses on the preparation of research manuscripts for publication. Also considers other scientific writing such as thesis proposals and fellowship and grant applications.

GENOME 549 Molecular Basis of Neurodegenerative Disease (2) La Spada, Muchowski, Pallanck Introduces a broad range of neurodegenerative diseases, focusing upon the approaches that have led to recent discoveries and emphasizing the elucidation of mechanisms and pathways of disease pathogenesis. Offered: jointly with NEUBEH 549/PHCOL 549; W.
GENOME 550 Methods and Logic in Genetics (3) Critical reading and detailed discussion of genetics-related scientific research papers. Material emphasizes methodological and logical themes of importance in modern genetics, for example: origin of mutants, genetic epistasis, pulse labeling, and in vivo gene function. Prerequisite: first-year genetics graduate students only. Offered: A.

GENOME 551 Principles of Gene Regulation (1.5) A detailed examination of the mechanisms of transcription and translation as determined by experimental genetics, molecular biology, and biochemistry.
GENOME 552 Technologies for Genome Analysis (1.5) Discussion of current and newly-emerging technologies in genome analysis with regard to applications in biology and medicine and to potential advantages and limitations. Prerequisite: permission of instructor. Offered: A.
GENOME 553 Advanced Genetic Analysis (1.5) Classical genetic analysis is a powerful approach to dissect complex biological processes. Selective removal, addition, or alteration of specific proteins to identify and order genes in a pathway, define protein function, determine tissue and temporal requirements for gene function, and distinguish among competing hypotheses to explain biological phenomena.

GENOME 554 Genomic Informatics (1.5) Many complete genome sequences are known. Each of these encodes the instructions for making an entire organism, but how can we hope to decipher the code? Focuses on methods for analyzing genome sequences, ranging from large-scale organizational pattern to gene prediction and detailed local alignment methods.
GENOME 555 Protein Technology (1.5) Focuses on current and emerging technologies and approaches in protein analysis, and considers applications of these technologies in biology, biotechnology, and medicine. Prerequisite: BIOC 440; GENOME 551; GENOME 552; GENOME 553; GENOME 554.

GENOME 559 Introduction to Statistical and Computational Genomics (3) Rudiments of statistical and computational genomics. Emphasis on basic probability and statistics, introduction to computer programming, and relevant web databases.
GENOME 560 Introduction to Statistical Genomics (3) Akey An introduction to fundamental concepts necessary for the analysis of genetic and genomic data including, basic elements of probability theory, parameter estimation, and hypothesis testing. Prerequisite: First-year Genome Sciences graduate students or by permission of instructor .Offered: Sp.
GENOME 561 Molecular Population Genetics and Evolu-
tion (1.5) Surveys recent literature to gain an understanding of the basic principles of molecular population genetics and evolution as applied to analysis of genome data. Requires some computer analysis of genome data.
GENOME 562 Population Genetics (4) Felsenstein Mathematical and experimental approaches to the genetics of natural populations, especially as they relate to evolution. Emphasis on theoretical population genetics. Prerequisite: permission of instructor. Offered: W, odd years.
GENOME 565 Advanced Human Genetics (4) NW Eichler, King Explores genetic analysis of naturally occurring variation in humans; origins and consequences of
mutation, as mediated by selection, migration, population structure, and drift; approaches to finding human disease genes and characterizing them at the molecular level; relevance of other species to analy sis of human genes. Prerequisite: either GENOME 361 or GENOME 371. Offered: W.
GENOME 570 Phylogenetic Inference (3) Felsenstein Methods for inferring phylogenies (evolutionary trees) - biological assumptions, statistical foundations, and computational methods. A comprehensive introduction for graduate students in the biological sciences to phylogenetic methods using data from molecular sequences, continuous and discrete characters, and gene frequencies. Prerequisite: introductory courses in evolution and in statistics. Offered: W, even years.

GENOME 573 Human Genomics: Science, Ethics, and So ciety (3) Explores the ethical and social implications of human molecular genetics and genomics investigation. Recent research is critically evaluated for its potential impact on scientific practice, research participation, and societal understandings. Prereq uisite: LAW H 504/B H 514/PHG 512 or permission of instructor. Offered: jointly with B H 551/PHG 551.
GENOME 576 Genetic and Genomic Analysis of Bacteria (1.5) In-depth coverage of genetic and genomic strategies used to analyze complex biological processes in bacteria. Focuses on general approaches, with examples drawn from studies of pathogenic organisms where possible. A combination of lectures and seminar-style discussions of primary literature.

GENOME 580 Ethics in Biomedical Research and Teaching (1) Explores ethical issues in research and teaching and discusses avenues of responsible conduct.

GENOME 581 Seminar in Drosophila Genetics (1) Berg Discussions of contemporary research in and novel methods for genetic, cell biological, and molecular biological analysis of Drosophila development. Credit/ no-credit only. Offered: AWSp.
GENOME 582 Seminar in Mouse Genetics (1) Braun Discussion of contemporary research in and novel methods for genetic, cell biological, and molecular analysis of mammalian development, with utilization of transgenic techniques. Credit/no-credit only.
GENOME 584 Seminar in DNA Replication (1) Brewer, Fangman Discussions of contemporary research in and novel methods for genetic, cell biological, and molecular biological analysis of budding yeast, with emphasis on the mechanisms and control of DNA replication. Credit/no-credit only. Offered: AWSp.
GENOME 585 Seminar in Bacterial Genetics (1) Discus sions of contemporary research in and novel methods for genetic, cell biological, and molecular biological analysis of bacterial assembly mechanisms, with emphasis on the topogenesis of membrane proteins. Credit/no-credit only.

GENOME 586 Seminar in Mammalian Genetics (1) Sibley Discussions of contemporary research in and novel methods for genetic, cell biological, and molecular biological analysis of mammalian genetics, with emphasis on lymphoblast development. Credit/nocredit only.
GENOME 587 Seminar in Nematode Genetics (1) Thomas Discussions of contemporary research in and novel methods for genetic, cell biological, and molecular biological analysis of nematode development, with emphasis on neurogenesis and other developmental processes. Credit/no-credit only.
GENOME 590 Population Genetics Seminar (1) Felsen stein Weekly presentation by participants of current literature and ongoing research in evolution, molecular evolution, evolutionary genetics of natural populations, human population genetics, and quantita tive genetics applied to animal and plant breeding.

Credit/no-credit only. Prerequisite: GENOME 562 or permission of instructor.
GENOME 599 Special Topics in Molecular Biotechnology (*, max. 12) Prerequisite: permission of instructor. Offered: AWSp.
GENOME 600 Independent Study or Research (*) Offered: AWSpS.

GENOME 700 Master's Thesis (*) Offered: AWSpS.
GENOME 800 Doctoral Dissertation (*) Offered: AWSpS

## Human Biology

## COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations.

HUBIO 500 P-Medical Practice Preceptorship at WWAMI Sites (1, max. 3) Personal experience with, and insight into, medical practice situations. Student is stationed with carefully selected clinical faculty members in their offices in accordance with the student's preference of discipline at the WWAMI sites. Registration limited to first-year medical students at WWAMI sites. Offered: AWSpS.

HUBIO 501 P-Human Biology Special Projects (*) Designed for medical students electing a special study project related to the Introduction to Clinical Medicine or other human biology courses, which are offered during the first and second years in the School of Medicine. Primarily intended for students in remedial or extended programs. Prerequisite: permission of assistant dean for curriculum. Offered: AWSpS.

HUBIO 505 P-WWAMI Preceptorship (*, max. 6) Opportunity for first-year medical students at WWAMI sites to gain personal experience with medical practice situations by being assigned to selected clinical faculty members in their offices. Offered: ASp.

HUBIO 510 P-Microscopic Anatomy: Histology (6) Berm-ingham-McDonogh Lectures and laboratories in microscopic anatomy designed to provide the principles and concepts of histology, to define the morphological characteristics of the cells, tissues, and organs of the human body, and to relate this information to functional processes studied in concurrent and subsequent courses. Offered: A.

HUBIO 511 P-Gross Anatomy and Embryology (8/13, max. 13) Clark Structural organization of human body at the macroscopic level to provide a foundation for physical examination and functional assessment of the human organism. Integrates embryological development with study of the cadaver and examination of the normal living body. Concentrates on exploration of the body cavities and the viscera they contain. Offered: A.

HUBIO 512 P-Mechanisms in Cell Physiology (5) Detwiler Physiology of the cell membrane, including ionic and electrical potential gradients; active transport, excitability, and action potentials; biophysics of sensory receptors; neuromuscular transmission; muscle energetics and contractility; spinal reflexes and central synaptic transmission; autonomic nervous system; energy metabolism and temperature regulation; epithelial transport; gastrointestinal motility and secretions. Offered: A.

HUBIO 513 P-Introduction to Clinical Medicine (3-) Issac, Maestas Instruction in communication skills and interview techniques to form the basis for the doctorpatient relationship and for the skills of communicating with patients. The patient profile is obtained.

Attention to developing comfort in the physician role. Offered: A.
HUBIO 514 P-Biochemistry I-A (4-) Maizels Explores molecular biology of the genome. Examines how the genome serves as a source of information, how molecular understanding of gene function identifies new therapeutic targets and provides new therapeutic and diagnostic tools. Assumes familiarity with fundamental principles, at the level tested in the MCATs. Offered: A.

HUBIO 516 P-Systems of Human Behavior (5) Harrington Effects of behavioral factors in major management problems faced in medical practice relating to cultural background, social role, sexual identity, and belief systems. Acquisition of skills in analyzing behavior, defining objectives, and designing precise treatment strategies. Offered: A.
HUBIO 522 P-Introduction to Clinical Medicine (-4-) Isaac, Maestas Medical history is introduced and instruction in data collection is begun. Experience in conducting medical interviews with patients to obtain the medical history and patient profile. Special problems related to interviewing are addressed. Offered: W.

HUBIO 523 P-Introduction to Immunology (2) Gale Topics covered include: basic concepts such as antigens; antibodies; complement; B-and T-lymphocyte function, including interactions with each other and with accessory cells; immunological tolerance; major histocompatibility complex and role of these basic concepts in immunopathology (immunodeficiencies, hypersensitivities, autoimmunity, blood transfusion, and transplantation).
HUBIO 524 P-Biochemistry I-B (-4) Maizels Metabolism as integrated in the organs and tissue of the human body for the purpose of generating energy from food and converting small molecules to essential building block of our cells. Discusses principles of nutrition in the context of human health and disease. Assumes familiarity with fundamental principles, at the level tested in the MCATs. Offered: W

HUBIO 530 P-Clinical Epidemiology and Evidence-Based Medicine (2) Kestenbaum Community health and disease, including assessment of disease risk and mechanisms of epidemic detection, spread, and control; interpretation of research design, data analysis, bias source; and clinical epidemiology, including evaluation and application of diagnostic tests, natural history of disease, and quantitative aids for clinical decision making. Offered: W.
HUBIO 531 P-Head, Neck, Ear, Nose, and Throat (5)
HUBIO 532 P-Nervous System (8) Dacey, Mulligan An integrated approach to the normal structure and function of the nervous system, including the eye. Presents neuropathological examples as well as clinical manifestations of neurological disease.
HUBIO 534 P-Microbiology and Infectious Disease (9) Moseley An introduction to medical microbiology and infectious diseases. Emphasizes the biology of microbial pathogens and the mechanisms of pathogenesis. Covers clinical manifestations, epidemiology, general principles of diagnosis, therapy, and prevention of infectious disease. Offered: Sp.

HUBIO 535 P-Introduction to Clinical Medicine (-4) Isaac, Maestas Adult screening physical examination is taught through the use of lecture, audiovisual aids, and small-group tutorial, where students in supervised setting practice the physical examination on one other. Further practice in the performance and recording of the patient profile and medical history. Offered: Sp.
HUBIO 540 P-Cardiovascular System (6) Feigl Interdisciplinary approach to cardiovascular medicine, including anatomy, physiology, radiology, pathology, medi-
cine, and surgery. Function of the cardiovascular system in health and disease. Offered: A.
HUBIO 541 P-Respiratory System (4) Culver, Luks Interdisciplinary approach to the respiratory system, including anatomy of thorax and lungs, ventilation mechanics, blood-gas transport, gas exchange, acidbase balance, and the physiology and pathology of obstructive, restrictive, and pulmonary-vascular diseases. Offered: A.
HUBIO 542 P-Introduction to Clinical Medicine (4-) McDonough Advanced instruction in interview technique, history taking, and physical examination, with emphasis on detection of abnormalities. Offered: A.

HUBIO 543 P-Principles of Pharmacology I (5) McKnight Includes general principles of pharmacology and the specific pharmacology of major drugs acting on the autonomic and cardiovascular systems. Offered: A.
HUBIO 547 P- Pathology IIA (5) Norwood Examines patterns of cell and tissue response to injury. Covers mechanisms of cell injury, the inflammatory process, thrombosis, normal and abnormal growth, neoplasia, and clinicopathological correlation. Includes a description of the major pathologic changes associated with specific diseases in the different organ systems. Uses a multidisciplinary approach to some diseases which effect more than one organ system including cardiovascular, renal, and respiratory and covers molecular changes in response to environmental exposure to pollution, radiation, and physical injury.
HUBIO 548 P-Cases in Clinical Ethics (1) Edwards, Timberlake Provides exposure to key issues in clinical ethics as well as the tools for ethical reasoning and critical thinking that support the student's current and future work. Prerequisite: second-year medical students.

HUBIO 550 P-Introduction to Clinical Medicine (-4-) McDonough Advanced instruction in interview technique, history taking, and physical examination, with emphasis on identification of problems and correlation of findings with pathophysiological mechanisms. Offered: W.
HUBIO 551 P-Gastro-Intestinal System (4) Silverstein Anatomy of the gastrointestinal system; physiology and pathology of digestion and hepatic function; and physical and laboratory examination. Offered: W.
HUBIO 552 P-Hematology (3) Richard Familiarizes students with the basic pathophysiologic mechanisms leading to disturbances of red cell, white cell, and platelet production, as well as abnormalities of hemostasis presenting clinical problems. Pathophysiology, rather than minute details of individual disease is stressed. Offered: W.
HUBIO 553 P-Musculoskeletal System (4) Schmale Gross, surface, applied, and radiographic anatomy. Clinical manifestations in the musculoskeletal sys tem and pathophysiology of trauma, aging, infection, and inflammation, as well as congenital and metabolic disorders. Dissections, physical examinations, and problem- based learning. Offered: W.
HUBIO 554 P-Genetics (2) Mefford Review of basic genetic principles and their applications in clinical medicine. Includes human chromosomal disorders; patterns of inheritance, genetic counseling, amniocentesis; pathogenesis of hereditary diseases, monogenic and multifactorial; role of genetics in common diseases; behavioral genetics; drug-gene interactions; and prevention and treatment of genetic diseases, including prenatal diagnosis and population screening. Offered: A.
HUBIO 555 P-Medicine, Health, and Society (3) Allan, Chen Interdisciplinary introduction to health services designed for future healthcare practitioners. Exam ines the history, organization, and effectiveness of the U.S. healthcare system. Stresses the student's
ability to adopt a broad perspective across healthcare disciplines and traditional boundaries. Offered: W.

HUBIO 556 P-Hormones and Nutrients (4) DeSantis Introduction to principles of human endocrinology, metabolism, and nutrition; the physiology and pathophysiology of endocrine systems, glucose and lipid metabolism, and fluid and salt balance; and the importance of proper nutrition in certain disease states.

HUBIO 557 P-Pathology IIB (2-) Norwood Examines patterns of cell and tissue response to injury. Covers mechanisms of cell injury, the inflammatory process, thrombosis, normal and abnormal growth, neoplasia, and clinicopathological correlation. Includes a description of the major pathologic changes associated with specific diseases in the different organ systems. Uses a multidisciplinary approach to some diseases which effect more than one organ system including cardiovascular, renal, and respiratory and covers molecular changes in response to environmental exposure to pollution, radiation, and physical injury.

HUBIO 558 P-Rheumatology (1) An intensive immersion course in rheumatology for second year students. Lectures and small group patient demonstrations link concepts of immunology, pathology and pharmacology with inflammatory and autoimmune disease, teach differential diagnosis of symptoms seen in rheumatic disease and use if diagnostic to demonstrate features of common childhood and adult rheumatic diseases and their management.
HUBIO 559 P-Problem Based Learning (3) Scott Teaches students to methodically solve medical problems by gathering, sorting, and interpreting data. Students learn life-long self-education and self-evaluation skills. Provides practice working as a healthcare team by including medical, nursing, and physician assistant students in each group. Offered: W.
HUBIO 560 P-Introduction to Clinical Medicine (-5) McDonough Introduction to clinical and laboratory diagnosis. Offered: Sp.
HUBIO 562 P-Urinary System (4) Jefferson Anatomy, physiology, and pathology of the kidney, ureter, bladder, and prostate; pathophysiology and treatment of common fluid and electrolyte problems; renal pharmacology; major clinical urinary system syndromes, with current diagnostic approaches and therapy. Offered: Sp.

HUBIO 563 P-Brain and Behavior (3) Pascualy Major psychiatric disorders are defined and described, and a systematic approach to differential diagnosis is presented. Conceptual development, pathogenesis, epidemiology, nomenclature, and the terminology used in psychiatry are discussed. Offered: Sp.
HUBIO 564 P-Principles of Pharmacology II (3) Chavkin Lectures and conferences on drugs that act on the central nervous system. Emphasis on physiological and biochemical mechanisms, with consideration of therapeutic and adverse effects. Offered: Sp.
HUBIO 565 P-Reproduction (4) Steiner Normal development of the human reproductive system. Sexual differentiation, puberty, endocrine control of testicular and ovarian function, gamete biology, fertilization, implantation, immunology and endocrinology of pregnancy, labor and delivery, pathology of the male and female reproductive organs, contraception, prolactin and lactation, aging and infertility. Offered: Sp.
HUBIO 566 P-Pathology IIC (-3) Norwood Examines patterns of cell and tissue response to injury. Covers mechanisms of cell injury, the inflammatory process, thrombosis, normal and abnormal growth, neoplasia, and clinicopathological correlation. Includes a description of the major pathologic changes associated
with specific diseases in the different organ systems Uses a multidisciplinary approach to some diseases which effect more than one organ system including cardiovascular, renal, and respiratory and covers molecular changes in response to environmental exposure to pollution, radiation, and physical injury.
HUBIO 567 P-Skin System (2) Colven Gross and microscopic anatomy. Physiology, protection, temperature control, pigmentation, and photosensitivity. Pathology and genetics of skin abnormalities, including tumors. Introduction to clinical evaluation, including physical examination and illustrating examples of inflammatory, vascular, immunological (including drug hypersensitivity), and neoplastic diseases. Offered: A.

HUBIO 590 P-Medical Information for Decision Making (1) Tarczy-Hornoch Introduction to methods for: a) identifying and retrieving high quality, relevant documents for clinical decision making, b) applying rigorous criteria when reading primary research studies, reviews of primary studies, or other medical information sources that report on the effectiveness of therapeutic or preventive interventions. Prerequisite: first-year medical students. Offered: W.

HUBIO 591 P-WWAMI Non-clinical Selectives - Pullman (*, max. 30) Courses offered at WWAMI university site in Pullman designed to satisfy the non-clinical selective graduation requirements for medical students. Offered: AWSp.
HUBIO 592 P-WWAMI Non-clinical Selectives - Spokane (*, max. 30) Courses offered at WWAMI university site in Spokane designed to satisfy the non-clinical selective graduation requirements for medical students. Offered: AWSp.
HUBIO 593 P-WWAMI Non-clinical Selectives - Laramie (*, max. 30) Courses offered at WWAMI university site in Laramie, WY designed to satisfy the non-clinical selective graduation requirements for medical students. Offered: AWSp.
HUBIO 594 P-WWAMI Non-clinical Selectives - Anchorage
(*, max. 30) Courses offered at WWAMI university site in Anchorage, designed to satisfy the non-clinical selective graduation requirements for medical students. Offered: AWSp.
HUBIO 595 P-Independent Investigative Inquiry, IHOP (8) Roesel With faculty mentorship, students investigate a global health issue, work on a community health project, and create an academic poster. Prerequisite: IHOP students only. Offered: S.

HUBIO 596 P-WWAMI Non-Clinical Selectives Bozeman (*, max. 30) Courses offered at WWAMI university site in Bozeman, designed to satisfy the non-clinical selective graduation requirements for medical students. Offered: AWSp.

HUBIO 597 P-Independent investigative Inquiry (8) Independent research with faculty sponsor and completion of paper in fulfillment of the independent investigative inquiry graduation requirement. Offered: Sp .
HUBIO 598 P-WWAMI Non-Clinical Selectives - Moscow (*, max. 30) Courses offered at WWAMI university site in Moscow, ID, designed to satisfy the non-clinical selective graduation requirement for medical students. Offered: AWSp.

HUBIO 599 P-Independent Study in Medical Science (6) Independent research with faculty sponsor and completion of paper as partial fulfillment of non-clinical selective graduation requirement. Offered: Sp.
HUBIO 600 P-Capstone Course: Preparation for Residency
(2, max. 4) A combination of large group lectures and small group discussions and workshops reviewing clinical skills in history-taking and physical examinations, imaging studies, common and emergency
drugs, ACLS, infectious disease control, common clinical problems, and other topics that are encountered in residency training. Offered: Sp.

## Immunology

H564 Health Sciences

For those contemplating careers in biomedical research, immunology provides challenging and exciting intellectual opportunities. Progress in the discipline in the past decade has been extraordinary, a fact nowhere more visible than at the University of Washington. The Department of Immunology, launched in 1989, now includes more than 30 faculty and 200 scientists, students, post-docs and staff, all engaged in elucidating fundamental immunological mechanisms and how these mechanisms impact human health, infectious, autoimmune and allergic diseases, and cancer. Current members of the department have distinguished records in the area of lymphocyte signaling, T and B cell development, macrophage function, antigen processing, immuno-tolerance, and the structure of antigen receptors.
Consider the fundamental processes that underlie immune function. First, millions of potentially injurious macromolecules must be recognized. Second, recognition of these macromolecules, generally structures associated with potential pathogens, must trigger powerful effector mechanisms that permit elimination of the offending microorganisms. Finally, these recognition and effector systems must distinguish the universe of potentially harmful molecules from an equally diverse repertoire of structurally similar 'self' components. How is such specific molecular recognition achieved? How do the cells responsible for mediating host defense develop, and what signaling systems direct their responses? These are questions being addressed by members of the program at the molecular, cellular, and whole organism levels.

## GRADUATE PROGRAM

## Graduate Program Coordinator <br> H564 Health Sciences, Box 357650 <br> immgrad@uw.edu

(206) 685-3955, fax (206) 543-1013

The graduate program, organized through the Department of Immunology, occupies contemporary laboratory and office space in the H and I wings of the Health Sciences complex, where many faculty are based. Other members of the training faculty are based in contiguous wings of the Health Sciences complex or at one of four affiliated institutions: Fred Hutchinson Cancer Research Center, Benaroya Research Center at Virginia Mason, Seattle Children's Hospital, and the Institute for Systems Biology. The University of Washington is a premier institution for biomedical research in the nation, ranking second among all institutions in overall support from the NIH. The research environment is augmented by affiliated institutions, creating an open and collegial partnership for basic, translational, and clinical research in which collaborations and open sharing of ideas and reagents take place. Members of the program have been instrumental in development and application of contemporary technologies, including flow cytometry, confocal microscopy, high-throughput genomic, proteomic, and computational analysis, and generation and analysis of transgenic/knockout/knockin mice to address important immunological and biological questions. Training of students occurs in an open environment which is intellectually stimulating, scientifically diverse, and strongly interactive. All immunology graduate students are assured financial support for the term of their studies.

## Master of Science

Students are not admitted to the department specifically as candidates for a master's degree. A terminal master's degree can be awarded if the faculty deems the student has made some progress in the program but not enough to be consistent with earning the Ph.D.

## Doctor of Philosophy

## Admission Requirements

Students are admitted for autumn quarter; application deadline is January 1 for U.S. citizens and November 1 for international applicants. Requirements for admission are flexible. However, most successful applicants have completed survey courses in biology, chemistry, and physics; one year of organic chemistry; and mathematics through integral calculus. Prior exposure to immunology through formal coursework, or especially through laboratory research, is desirable. A bachelor's degree is required, as is evidence of superior scholarship and above average performance on the GRE General Test. A GRE subject test is not required.
International students must take the Test of English as a Foreign Language (TOEFL); 250 is the minimum acceptable score on computer test.

## Degree Requirements

90 credits, to include:

1. 18 graded credits in the first two years of study. Firstyear coursework consists of consecutive 5-week-long courses taken autumn through spring quarters - two per quarter(for 1.5 to 2 graded credits each); winter quarter, all first year students also take IMMUN 532 (4 graded credits), for a total of 13 or 13.5 graded credits the first year, depending on course choices. In the second year, 4.5 or 5 additional graded credits are required, earned by taking electives winter and/or spring quarters. As part of the first- and second-year coursework, students take two 5 -week courses that specifically focus on cancer immunology.
2. Autumn quarter of the first year, students may take an elective and attend selected lectures of the undergraduate immunology course, IMMUN 441. Students are required to attend the departmental seminar series, Journal Club, and research-in-progress talks beginning the first quarter and continuing throughout enrollment.
3. All elective courses must be relevant to biomedical research, and be rigorous enough to include either a final exam or required written paper for a grade. Elective classes must be at the 500 level, and receive a numerical grade.
4. Each graduate student takes the qualifying examination during July immediately following the second year of classes. (MSTP students take qualifying examinations following the first year of graduate classes.) The qualifying examination is two parts - written and oral.
5. Students who pass the qualifying examination then prepare for the General Examination, which must be taken within 15 months of the qualifying examination.
6. The dissertation must meet all format requirements before being accepted by the Graduate School.

## COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations.
IMMUN 441 Introduction to Immunology (4) NW General properties of immune responses; cells and tissues of immune system; lymphocyte activation and specificity; effector mechanisms; immunity to microbes; immunodeficiency and AIDS; autoimmune diseases; transplantation. Prerequisite: BIOL 220; may not be
repeated; recommended: either GENOME 371, GENOME 372, BIOC 405, or BIOC 440. Offered: A.
IMMUN 499 Undergraduate Research (*, max. 24) Investigative work on a variety of topics, including mechanisms of antigen recognition, T-cell development and differentiation, immunogenetics, lymphocyte activation, MHC gene structure and function, retrovirology, and the pathogenesis of autoimmune diseases, among others. Prerequisite: permission of instructor. Offered: AWSpS.
IMMUN 532 Intersection of Innate and Adaptive Immunity in Disease (4) Examines the molecular and cellular basis of immune function. Topics include: hematopoiesis, innate immunity, antigen receptor structure, lymphocyte development, antigen presentation, effector T-cell functions, and immune-mediated diseases. Prerequisite: coursework in molecular genetics; graduate standing in Immunology; other graduate students with permission of instructor. Offered: W.
IMMUN 533 Host Defense to Cancer (2) Clark Addresses the mechanisms of cellular homeostasis, balancing cells of immune system, programmed cell death, immune surveillance, cancer immunotherapy. Companion course with IMMUN 536. Prerequisite: graduate standing in Immunology; other graduate students with permission of instructor. Offered: Sp, odd years.
IMMUN 534 Central Issues in Immunology (2, max. 4) Presentations by participants of topics relating to the broad study of immunology. Prerequisite: graduate standing in Immunology. Offered: Sp.
IMMUN 536 Host Defense to Infection (2) Clark Addresses the mechanisms protecting against pathogens that infect patients with cancers; immune regulation; new developments in vaccines. Companion course with IMMUN 533. Prerequisite: graduate standing in Immunology; other graduate students with permission of instructor. Offered: Sp, even years.
IMMUN 537 Immunological Methods (1.5) Fink, Weinmann Introduces whole animal, cellular, biochemical, and molecular techniques used in immunological research. Discusses strengths and limitations of each technique and emphasizes caveats in interpreting the resulting data. Offered: A.
IMMUN 550 Selected Topics in Immunology (1, max. 30) Formal seminar-discussion course for advanced students focused on recent developments in the field and consisting of literature research and intensive in-depth study of important and timely topics. Credit/ no-credit only. Prerequisite: graduate standing in Immunology. Offered: AWSp.
IMMUN 551 Research Conference in Regulation of T CellDependent B Cell Maturation (1, max. 30) Clark Weekly group conferences concerning ongoing graduate students and postdoctoral research in immunology. Students may register for more than one conference each quarter. Credit/no-credit only. Prerequisite: graduate standing in Immunology. Offered: AWSpS.
IMMUN 552 Research Conference in Principles of Antiviral Immunity (1, max. 30) Stetson Weekly group conferences concerning ongoing graduate students and postdoctoral research in immunology. Credit/nocredit only. Prerequisite: Immunology graduate student; permission of instructor. Offered: AWSpS.
IMMUN 553 Research Conference in Recombination and Repair in B Cell Development (1, max. 30) Maizels Weekly group conferences concerning ongoing graduate students and postdoctoral research in immunology. Students may register for more than one conference each quarter. Credit/no-credit only. Prerequisite: graduate standing in Immunology. Offered: AWSpS.
IMMUN 554 Research Conference in Immunogenetic Aspects of Human Autoimmunity (1, max. 30) Nepom Weekly group conferences concerning ongoing graduate
students and postdoctoral research in immunology. Students may register for more than one conference each quarter. Credit/no-credit only. Prerequisite: graduate standing in Immunology. Offered: AWSpS.
IMMUN 555 Research Conference in Model of Autoimmune Disease and Their Regulation (1, max. 30) Goverman Weekly group conferences concerning ongoing graduate students and postdoctoral research in immunology. Students may register for more than one conference each quarter. Credit/no-credit only. Prerequisite: graduate standing in Immunology. Offered: AWSpS.
IMMUN 556 Research in Conference in Regulation of Autoimmunity and Allergic Inflammation (1, max. 30) Ziegler Weekly group conferences concerning ongoing graduate student and postdoctoral research in immunology. Students may register for more than one conference each quarter. Credit/no-credit only. Prerequisite: graduate standing in Immunology.
IMMUN 557 Research Conference in the Mechanisms and Consequences of Programmed Cell Death (1, max. 30) Oberst Weekly group conferences concerning ongoing graduate student and postdoctoral research in immunology. Students may register for more than one conference each quarter. Credit/no-credit only. Prerequisite: graduate standing in Immunology or permission of instructor. Offered: AWSpS.
IMMUN 558 Research Conference in Apoptosis and Autoimmunity (1, max. 30) Elkon Weekly group conferences concerning ongoing graduate student and postdoctoral research in immunology. Students may register for more than one conference each quarter. Credit/ no-credit only. Prerequisite: graduate standing in Immunology. Offered: AWSpS.
IMMUN 559 Research Conference in T Cell Responses during Mycobacterium tuberculosis (1, max. 30) Urdahl Weekly group conferences concerning ongoing graduate students and postdoctoral research in immunology. Student may register for more than one conference each quarter. Credit/no-credit. Prereq uisite: Immunology graduate student; permission of instructor. Offered: AWSpS.
IMMUN 560 Research Conference in Progress in T Cell Research (1, max. 30) Bevan, Fink, Goverman, Greenberg, Pepper, Stetson Weekly group conferences concerning ongoing graduate student and postdoctoral research in immunology. Students may register for more than one conference each quarter. Credit/no-credit only. Prerequisite: graduate standing in Immunology. Offered: AWSpS.
IMMUN 561 Research Conference in Mechanisms of Peripheral Tolerance (1, max. 30) Fink Weekly group conferences concerning ongoing graduate student and postdoctoral research in immunology. Students may register for more than one conference each quarter. Credit/no-credit only. Prerequisite: graduate standing in Immunology. Offered: AWSpS.
IMMUN 562 Research Conference in Structural Molecular Immunology and Vaccinology (1, max. 30) Strong Weekly group conferences concerning ongoing graduate students and postdoctoral research in immunology. Student may register for more than one conference each quarter. Credit/no-credit only. Prerequisite: Immunology graduate students; permission of instructor. Offered: AWSpS.
IMMUN 563 Research Conference in Macrophage Biology: Signaling and Phagocytosis (1, max. 30) Aderem Weekly group conferences concerning ongoing graduate student and postdoctoral research in immunology. Students may register for more than one conference each quarter. Credit/no-credit only. Prerequisite: graduate standing in Immunology. Offered: AWSpS.

IMMUN 564 Research Conference in Cellular/Molecular Regulation of T Cell Responses (1, max. 30) Greenberg Weekly group conferences concerning ongoing graduate student and postdoctoral research in immunology. Students may register for more than one conference each quarter. Credit/no-credit only. Prerequisite: graduate standing in Immunology. Offered: AWSpS.
IMMUN 565 Research Conference in Innate Immune Defenses Against Virus Infection (1, max. 30) Gale Weekly group conferences concerning ongoing graduate students and postdoctoral research in immunology, with a major focus placed on understanding virus and host regulation of innate immune processes. Students may register for more than one conference each quarter. Credit/no-credit only. Prerequisite: graduate standing in Immunology. Offered: AWSpS.
IMMUN 566 Research Conference in the Differentiation and Function of CD4+ Memory T cells (1, max. 30) Pepper Weekly group conferences concerning ongoing graduate students and postdoctoral research immunology. Students may register for more than one conference each quarter. Credit/no credit only. Prerequisite: Immunology graduate student and permission of instructor. Offered: AWSpS.
IMMUN 567 Research Conference in the Roll of miRNAs in Modulating the Immune System (1, max. 30) Savan Weekly group conferences concerning ongoing graduate students and postdoctoral research immunology. Students may register for more than one conference each quarter. Credit/no credit only. Prerequisite: Immunology graduate student and permission of instructor Offered: AWSpS.
IMMUN 568 Research Conference in Regulation of the Inflammatory Response of Myeloid Cells (1, max. 30) Hamerman Weekly group conferences concerning ongoing graduate students and postdoctoral research in immunology, with a major focus placed on understanding the regulation of the inflammatory response of myeloid cells. Students may register for more than one conference each quarter. Credit/no-credit only. Prerequisite: graduate standing in Immunology. Offered: AWSpS.
IMMUN 569 Research Conference in T cells in autoimmunity (1, max. 30) Bettelli Weekly group conferences concerning ongoing graduate students and postdoctoral research immunology. Students may register for more than one conference each quarter. Credit/no credit only. Prerequisite: Immunology graduate student and permission of instructor Offered: AWSpS.
IMmuN 570 Research Conference in Mucosal Immunity (1, max. 30) Oukka Weekly group conferences concerning ongoing graduate students and postdoctoral research immunology. Students may register for more than one conference each quarter. Credit/no credit only. Prerequisite: Immunology graduate student and permission of instructor Offered: AWSpS.
IMMUN 571 Research Conference in Development and Activation of BCells (1, max. 30) Rawlings Weekly group conferences concerning ongoing graduate student and postdoctoral research in immunology. Students may register for more than one conference each quarter. Credit/no-credit only. Prerequisite: graduate standing in Immunology.
IMMUN 572 Research Conference in Signal Transduction in B-Cells ( $\mathbf{1}$ max. $\mathbf{3 0}$ ) Scharenberg Weekly group conferences concerning ongoing graduate student and postdoctoral research in immunology. Students may register for more than one conference each quarter. Credit/no-credit only. Prerequisite: graduate standing in Immunology.
IMMUN 573 Immunology Seminar Series (1, max. 30) Weekly discussion in which original research results
are presented and discussed. Emphasis is on new and original contributions to field of immunology and related areas; occasional seminars are concerned with review of important topics. Credit/no-credit only. Prerequisite: graduate standing in Immunology; other graduate students with firm background in immunology and permission of instructor.
IMMUN 574 Research Conference in Kaposi's SarcomaAssociated Herpesvirus: Interactions with B-Cells and Endothelial Cells (1, max. 30) Lagunoff Weekly group conferences concerning ongoing graduate student and postdoctoral research in immunology. Students may register for more than one conference each quarter Credit/no-credit only. Prerequisite: graduate standing in Immunology.
IMMUN 575 Research Conference in Infection and Immunity (1, max. 30) Bevan Weekly group conferences concerning ongoing graduate student and postdoctoral research in immunology. Students may register for more than one conference each quarter. Credit/ no-credit only. Prerequisite: graduate standing in Immunology.
IMMUN 576 Research Conference inTranscriptional Regulation in the Immune System (1, max. 30) Weinmann Weekly group conferences concerning ongoing graduate student and postdoctoral research in immunology. Students may register for more than one conference each quarter. Credit/no-credit only. Prerequisite: graduate standing in Immunology. Offered: AWSpS.
IMMUN 577 Research Conference in Lymphocyte Homing and Function (1, max. 30) Campbell Weekly group conferences concerning ongoing graduate student and postdoctoral research in immunology. Students may register for more than one conference each quarter. Credit/no-credit only. Prerequisite: graduate standing in Immunology. Offered: AWSpS.
IMMUN 578 Research Conference in Immunology and the Pathogenesis of Tuberculosis (1, max. 30) Ramakrishnan Weekly group conferences concerning ongoing graduate student and postdoctoral research in immunology. Students may register for more than one conference each quarter. Credit/no-credit only. Prerequisite: graduate standing in Immunology. Offered: AWSpS.
IMMUN 579 Research Conference in Liver Immunology (1, max. 30) Crispe Weekly group conferences concerning ongoing graduate students and postdoctoral research immunology. Students may register for more than one conference each quarter. Credit/no credit only. Prerequisite: Immunology graduate student and permission of instructor Offered: AWSpS.
IMMUN 599 Introduction to Immunology Research (110, max. 40) Current problems in immunological research. Credit/no-credit only. Prerequisite: graduate standing in Immunology. Offered: AWSpS.
IMMUN 600 Independent Study or Research (*) Prerequisite: graduate standing in Immunology. Offered: AWSpS.
IMMUN $\mathbf{7 0 0}$ Master's Thesis (*) Prerequisite: graduate standing in Immunology. Offered: AWSpS.
IMMUN $\mathbf{8 0 0}$ Doctoral Dissertation (*) Prerequisite: graduate standing in Immunology. Offered: AWSpS.

## Laboratory Medicine

NW 120, UW Medical Center

Medical technology, offered by the Department of Laboratory Medicine, is a profession of highly knowledgeable and
skilled individuals who perform clinical laboratory tests on patient samples. This is a critical part of healthcare, as the results obtained by these laboratory tests are a vital tool for physicians in their diagnosis, treatment, and prevention of disease.

## UNDERGRADUATE PROGRAM

Adviser
NW 120, UW Medical Center
(206) 598-6131
medtech@uw.edu

The Department of Laboratory Medicine offers the following program of study:

- Bachelor of Science in Medical Technology degree

## Bachelor of Science

1. Pre-professional Phase. During the first two years, students enroll as pre-majors in the College of Arts and Sciences, satisfying general education requirements as well as completing prerequisite courses.
2. Professional Phase. The professional phase begins autumn quarter of the third year and continues for seven consecutive quarters at the UW School of Medicine. Courses in the first year of the professional phase provide students an appropriate theoretical background and basic technical skills that enable them to function effectively in the clinical laboratory.

The final year is offered in the clinical laboratories of the UW Medical Center and its principal affiliates. Students in the core clinical laboratories receive on-the-bench training in chemistry, hematology, immunohematology, and microbiology.
Suggested First- and Second-Year College Work: Completion of University writing, reasoning, and general education requirements. Electives, not required for admission or graduation, may include: CHEM 321, MICROM 301, GENOME 351, GENOME 371, B STR 301, PHIL 115, PHIL 241, CLAS 101, CLAS 205, PATH 410, UCONJ 420. Begin taking admission requirements, shown below.

## Department Admission Requirements

1. BIOL 118, BIOL 180, BIOL 200, BIOL 220; CHEM 142, CHEM 152, CHEM 162; CHEM 223, CHEM 224 (or CHEM 237, CHEM 238, CHEM 239); one of STAT 220, STAT 221/SOC 221/CS\&SS 221, STAT 311, or Q SCI 381.
2. Complete all general education requirements including 10 credits of Individuals \& Societies, and 10 credits of Visual, Literary, \& Performing Arts, as well as all required English and writing courses.
3. Students admitted to the medical technology program must be exempt from or have successfully completed any required English as a Second Language (ESL) courses no later than August 31 of the application year or admission is cancelled.
Application Procedure: See program adviser for application form. Application deadline is February 15, to begin the following autumn quarter.

## Major requirements

## 148-151 credits as follows:

1. Courses Required for Admission (48-51 credits): See list above.
2. Didactic Courses (59 credits): IMMUN 441, MICROM 442, MICROM 443, MICROM 444, MICROM 445; LAB M 418, LAB M 419, LAB M 420, LAB M 421, LAB M 426, LAB M 428, LAB M 429, LAB M 430, LAB M 434.
3. Clinical Rotations ( 46 credits): LAB M 423, LAB M 424, LAB M 425, LAB M 431, LAB M 432, LAB M 433.
4. A minimum grade of 2.0 in all LAB $M$ courses and a minimum GPA of 2.00 , both cumulative and in required courses, are required for graduation.

## Student Outcomes and Opportunities

- Learning Objectives and Expected Outcomes: Graduates of the medical technology program are expected to have in-depth knowledge of the relationships between laboratory data and pathologic processes, and how laboratory data relate to clinical medicine. They have experience with the performance and quality control of routine and specialized medical laboratory testing procedures and an understanding of the theoretical basis of these procedures. In addition, they have experience trouble-shooting and resolving typical problems in the clinical laboratory and are familiar with laboratory quality assurance, safety, governmental regulations, information systems, management, research design and practice, educational methodology, continuing education, communication, ethics, professionalism, and concepts and principles of laboratory operations.

Successful medical technologists enjoy studying the biological, chemical, and physical sciences and find personal satisfaction and intellectual reward in applying scientific methods in the diagnosis and evaluation of disease. A medical technologist may practice as a generalist, using knowledge in several of the scientific areas, or may specialize in one scientific area in larger hospitals. Medical technologists may work in a variety of settings, including clinical laboratories in large medical centers, hospitals, and clinics. Others carry out research in industrial, public health, and medical laboratories, or teach in hospitals, colleges, and universities.

- Instructional and Research Facilities: The major training sites are the University of Washington Medical Center and Harborview Medical Center. Affiliate hospitals include Seattle Children’s, Labcorp Dynacare, Group Health Cooperative, MultiCare Health System, Northwest Hospital, Providence Everett Medical Center, Providence St. Peter Hospital, Veterans' Affairs Puget Sound Health Care System, Virginia Mason Medical Center, Evergreen Hospital Medical Center, and Highline Medical Center. The Puget Sound Blood Center is also affiliated with the University of Washington. These laboratories support patient care, and provide training and research in the major clinical divisions of chemistry, hematology, immunohematology (blood banking), and microbiology, including multiple subspecialties in these divisions. In addition, students can either receive training in a variety of clinical laboratory rotations designed to enrich their core clinical experiences or participate in research in collaborative projects supervised by faculty members in the Department of Laboratory Medicine. Enrichment rotations include subspecialty sections in chemistry, hematology, and/or microbiology; molecular diagnostics laboratories; and laboratories where multi-tasking skills are utilized.
- Honors Options Available: For Interdisciplinary Honors, see University Honors Program.
- Internship Opportunities: One or two internships per year in Japan available to graduates of the medical technology program.
- Department Scholarships: Several offered.
- Student Organizations/Associations: None currently active.

Of Special Note: The medical technology program is accredited by the National Accrediting Agency for Clinical Laboratory Sciences, 5600 N. River Road, Suite 720, Rosemont, IL 60018-5119, (847) 939-3597, (773) 714-8880, (773) 714-8886 (fax), info@naacls.org, www.naacls.org. Graduates are eligible for certification by the Board of Registry of the American Society for Clinical Pathology and by the National Credentialing Agency for Laboratory Personnel, Inc.

## GRADUATE PROGRAM

Graduate Program Coordinator
NW 120, Box 357110
(206) 598-2148
hschil@uw.edu
The Department of Laboratory Medicine offers a Master of Science in Laboratory Medicine and prepares the graduate for advanced technical and supervisory positions in the clinical and research laboratories as well as in pharmaceutical and diagnostic industries.

The curriculum is flexible, usually two years for full-time students, and up to six years for part-time students. Students select one of five pathways and work with a mentor on a thesis project. In addition to the 25 credits of required courses, they take courses related to their area of study. The target population is medical technology (MT/MLS) graduates with ASCP certification.

The Department of Laboratory Medicine also offers a combined undergraduate/graduate program (CUG). Students may enter this CUG either as undergraduates or college graduate/postbaccalaureate students. To be admitted to the CUG program, the student must first be accepted into the undergraduate program shown above. Undergraduates or college graduate/postbaccalaureate students may apply simultaneously to the CUG program, or delay application until graduation. Once accepted into the CUG, the student completes the undergraduate program, then immediately enrolls in the Graduate School. Students receive a BS in Medical Technology at the completion of their undergraduate studies and an MS in Laboratory Medicine at the completion of their graduate studies.

## Master of Science

## Admission Requirements

The program accepts mostly ASCP certified medical laboratory scientists (MLS/MT). For medical laboratory scientists (MLS/MT), MLT (medical laboratory technician), students from a four-year program, or laboratorians with significant experience in a clinical laboratory, admission requirements include:

1. Minimum 3.00 GPA in the last 90 graded quarter credits or the last 60 graded semester credits
2. Certification as a medical laboratory scientist (MLS/ MT) or equivalent, or as a medical laboratory technician (MLT) or equivalent, or as a specialist in a clinical laboratory field
3. Completion if the Graduate Record Examination (GRE) Aptitude Test within the last five years
4. Foreign students must have a satisfactory command of the English language. Results of the TOEFL, MLT, or IELTS must be submitted to the Graduate School. These scores are good for only two years.
5. A 200-300 word statement about educational and professional objectives and reasons for taking the Master of Science program
6. Three letters of recommendation
7. A personal interview

For students with an undergraduate degree in a scientific field such as chemistry, microbiology, or biology, without ASCP certification, the program is highly competitive. Admission requirements include:

1. Outstanding academic achievements, including a minimum 3.20 GPA in the last 90 graded quarter credits or the last 60 graded semester credits.
2. Completion of the Graduate Record Examination (GRE) Aptitude Test within the last five years, with excellent scores.
3. Foreign students must have an excellent com mand of the English language. Results of the TOEFL or IELTS must be submitted to the Graduate School. Scores are good for only two years.
4. A 200-300 word statement about educational and professional objectives and reasons for taking the Master of Science program
5. Three letters of recommendation
6. Personal interviews with department faculty

Application deadline is February 15 to begin the following autumn quarter. Application forms and procedures for admission to the Graduate School are available at www.grad. washington.edu/.

## Degree Requirements

Minimum 36 credits, of which nine are thesis credits. Fulltime medical technologists typically complete the program in two years. Students select one of five pathways, as follows:

## 1. Chemistry/Immunology

a. Required: BIOST 511 (4), LAB M 502 (1/3), LAB M 510 (1/3), LAB M 520 (3), LAB M 601 (3), LAB M 700 (9)
b. Recommended: MICRO 441 (3)
c. Electives relevant to thesis, chosen with advice from mentor: BIOC 426 (4), BIOC 440 (4), BIOC 441 (4), BIOC 442 (4), BIOC 540 (2), BIOC 541 (2), BIOC 542 (2), BIOST 512 (4), BIOST 513 (4), CHEM 428 (3), CHEM 429 (3), CHEM 436 (3), CONJ 546 (1.5), IMMUN 532 (4), IMMUN 533 (2) IMMUN 534 (2), IMMUN 535 (2), PATH 500 (3), PATH 502 (1.5), PATH 513 (1.5), PATH 515 (1.5), PATH 516 (3), PATH 517 (3/4), P BIO 505 (4), P BIO 506 (4), P BIO 507 (3), PHCOL 401 (2-4), PHCOL 402 (3/4)

## 2. Hematology/Coagulation

a. Required: BIOC 440 (4), BIOC 441 (4), BIOC 442 (4), BIOST 511 (4), LAB M 502 (1/3), LAB M 510 (1/3), LAB M 520 (3), LAB M 601 (3), LAB M 700 (9)
b. Recommended: PATH 516 (3)
c. Elective relevant to thesis chosen with advice from mentor: BIOST 512 (4), BIOST 513 (4), CHEM 428 (3), CHEM 429 (3), CONJ 546 (1.5), GENOME 465 (4), IM MUN 441 (4), IMMUN 532 (4), P BIO 506 (4), PATH 500 (3), PATH 512 (1.5), PATH 514 (3), PATH 515 (3), PATH 516 (3), PATH 522 (2), PATH 560 (*, max. 10).
3. Microbiology/Virology
a. Required: BIOST 511 (4), LAB M 502 (1/3), LAB M 510 (1/3), LAB M 520 (3), LAB M 601 (3), LAB M 700 (9)
b. Recommended: IMMUN 441 (4), MICRO 442 (3), MICRO 444 (4), MICRO 445 (2), MICRO 555 (2.5)
c. Electives relevant to thesis chosen with advice from mentor: BIOC 440 (4), BIOC 441 (4), BIOC 442 (4), BIOC 541 (2), BIOST 512 (4), BIOST 513 (4), CHEM 428 (3), CHEM 429 (3), CONJ 547 (1.5), CONJ 550 (3), EPI 503 (3), EPI 507 (3), EPI 510 (2), EPI 511 (34), EPI 512 (4), IMMUN 533 (3), MICROM 411 (5), MICROM 431 (3), MICROM 450 (3), MICROM 529 (1), MICROM 530 (3), MICROM 531 (2), MICROM 553 (3), P BIO 505 (4), P BIO 506 (4), PATH 512 (1.5), PATH 513 (1.5), PATH 515 (1.5), PATH 516 (3)
4. Molecular Diagnostics/Genetics
a. Required: BIOST 511 (4), LAB M 502 (1/3), LAB M 510 (1/3), LAB M 520 (3), LAB M 601 (3), LAB M 700 (9)
b. Recommended: BIOC 440 (4) or equivalent, BIOC 441 (4) or equivalent, BIOC 442 (4) or equivalent, GENOME 465 (4)
c. Electives relevant to thesis chosen with advice from mentor: BIOST 512 (4), BIOST 513 (4), BIOST 516 (3),

CHEM 428 (3), CHEM 429 (3), CONJ 546 (1.5), EPI 516 (3), EPI 517 (3), GENOME 411 (5), GENOME 466 (3), GENOME 531 (3), IMMUN 441 (4), IMMUN 532 (4), IMMUN 536 (2), MICROM 450 (3), MICROM 530 (3), P BIO 505 (4), P BIO 506 (4)
5. Management/Medical Informatics
a. Required: BIOST 511 (4), LAB M 502 (1/3), LAB M 510 (1/3), LAB M 520 (3), LAB M 601 (3), LAB M 700 (9)
b. Electives relevant to thesis chosen with advice from mentor
i. Business Administration: B A 470 (3), BA 472 (3)
ii. Business Communications: B CMU 510 (4)
iii. Human Resource Management and Organizational Behavior (HRMOB): HRMOB 410 (4), HRMOB 450 (4), HRMOB 470 (4) MGMT 403 (4), MGMT 404 (4)

## COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations.
LAB M 418 Introductory Clinical Chemistry (6) Bankson Introduces the fundamentals of instrumentation and methodology in the clinical chemistry laboratory. Limited to Medical Technology students.

LAB M 419 Clinical Coagulation (4) Hansen-Suchy Lecture and laboratory coverage of the theory of the hemostatic system, to include tests used in the diagnosis/monitoring of patients with abnormal bleeding and/or thrombosis. Instrumentation as appropriate for testing included. Quality control and quality assurance discussed. Limited to medical technology students. Offered: A.

LAB M 420 Laboratory Analysis of Urine and Body Fluids (3) Hansen-Suchy Lecture and laboratory covering urinalysis testing procedures and associated disease entities. Analysis of other body fluids. Methods of microscopic examination by use of bright-field, phase, and polarizing microscopy. Limited to medical technology students. Offered: A.

LAB M 421 Medical Microbiology (1/6, max. 6) Abbott Lecture and laboratory coverage of human infections and diagnostic procedures used for isolation, identification, and antimicrobial susceptibility testing of the microorganisms associated with disease. Limited to medical technology students. Offered: S.
LAB M 423 Clinical Chemistry (*-, max. 24) Bankson Clinical testing using automated and manual methods. Measurement of pancreatic function and intestinal absorption, renal and liver function, enzymes, electrolytes, blood gases, lipids, toxicology, urinalysis, endocrinology, and immunology. Limited to medical technology students. Offered: AWSp.

LAB M 424 Clinical Microbiology (*-, max. 24) Abbott Techniques used in the diagnostic microbiology laboratory, including quality control, specimen evaluation, identification of pathogenic microorganisms, and antimicrobial susceptibility testing. Limited to medical technology students. Offered: AWSp.
LAB M 425 Clinical Hematology (*-, max. 24) HansenSuchy Clinical study of techniques used in the diagnostic evaluation of blood cells, including production, proliferation, survival, morphologic, and functional features. Assessment of proteins and cells important in hemostasis included. Quality control and quality assurance issues considered. Biomolecular techniques appropriate for evaluation of the hematologic and hemostatic systems discussed. Limited to medical technology students. Offered: AWSp.

LAB M 426 Clinical Immunohematology (1-7, max. 7) Dan-iel-Johnson Lecture and laboratory covering theory of transfusion medicine and serological procedures used in the evaluation of cellular antigen systems. Principles of immunology and genetics included as appropriate for the techniques performed; screening of donor units to provide a safe product discussed. Quality control and quality assurance issues considered. Limited to medical technology students. Offered: SpS.

LAB M 427 Selected Studies in Laboratory Medicine (*-, max. 24) Selected clinical study in the major scientific disciplines of laboratory medicine, to include molecular diagnostics, or pursuance of a clinical research study. Credit/no credit only. Limited to medical technology students. Offered: AWSpS.
LAB M 428 Clinical Biochemistry for Medical Laboratory Scientists (6) Introduces medical applications and the clinically relevant aspects of biochemistry necessary for understanding biochemical diseases. Teaches the structures and human metabolism of proteins, carbohydrates, lipids, and nucleotides in health, along with their roles in disease processes. Stresses normal biochemical pathways and subsequent diseases when the pathways are disrupted or diverted. Offered: A.
LAB M 429 Foundations of Medical Laboratory Science (5) Covers the essential theories, concepts, and practices that define medical laboratory science as a distinctive profession within Laboratory Medicine and which circumscribe its scope of practice. Instructional areas comprise the pre-analytical, analytical, and post-analytical components of contemporary medical lab services. Offered: A.
LAB M 430 Medical Technology: Introductory Clinical Hematology (6) Lecture and laboratory coverage of theoretical and practical aspects important in the evaluation of blood cells, to include their production, morphology, function, and associated pathology. Instrumentation used in testing included, as well as quality control and quality assurance issues. Limited to medical technology students. Prerequisite: LAB M 429. Offered: W.

LAB M 431 Clinical Immunohematology Rotation (3) Practicum emphasizing application of knowledge and skills to perform a wide variety of basic testing routinely performed in contemporary blood laboratory and further develop discipline-specific competencies. Offered: Sp.
LAB M 432 Phlebotomy Rotation (2) Covers the theories, concepts, and practices underlying the safe and reliable collection of blood (phlebotomy) for analysis by medical laboratory techniques. Offered: Sp.

LAB M 433 Enrichment Rotation (9) Selected practical experience emphasizing application of knowledge and skills to perform a wide variety of testing in a clinical setting and further develop discipline-specific competency in the major scientific disciplines of laboratory medicine, including hematology, clinical chemistry, microbiology, and immunohematology or pursuance of a clinical research study. Offered: Sp.
LAB M 434 Virology Laboratory (1) Laboratory coverage of testing procedures and techniques routinely performed in the contemporary virology lab to detect and identify viruses which cause disease in humans and to monitor therapies used to treat human viral infections. Offered: Sp.
LAB M 499 Undergraduate Research (*) Specific project in clinical laboratory investigation. Offered: AWSpS.

LAB M 502 Laboratory Medicine Grand Rounds (1, max. 6) Rainey Grand rounds are concerned with current topics in the field of laboratory medicine. Credit/nocredit only. Offered: AWSp.

LAB M 510 Laboratory Medicine Research Conference (1 max. 6) Hoffman Presentation and discussion of ongoing research and development projects by faculty, residents, fellows, and graduate students. Open to graduate students in laboratory medicine and other medical sciences. Credit/no-credit only. Prerequisite: permission of instructor. Offered: AWSp.
LAB M 520 Seminar in Organization and Management in Laboratory Medicine (3) Schiller Core course for the Master of Science degree in laboratory medicine. Prerequisite: graduate student standing in Laboratory Medicine or permission of instructor. Offered: Sp, odd years.

LAB M 521 Advanced Laboratory Hematology (1, max. 6) Sabath Lectures on diagnostic clinical hematology with emphasis on clinicopathological correlation. For laboratory medicine graduate students with special interest in diagnostic clinical hematology. Prerequisite: graduate standing and permission of instructor. Offered: AWSp.
LAB M 522 Hematopathology Seminar (2) Wood Identification of normal lymphocyte and bone marrow subpopulations, diagnosis of leukemias, lymphomas, and benign conditions that resemble them. Emphasis on histopathology, cytochemical, immunological, and molecular markers. Clinicopathologic correlation. Offered: jointly with PATH 522; W, even years.
LAB M 590 P-Research Projects in Laboratory Medicine (*) Tait Opportunity for laboratory experience on a research problem related to laboratory medicine. Students investigate areas of potential clinical importance. Projects selected from areas such as chemistry, coagulation, hematology, immunology, microbiology, virology, molecular diagnostics, and computer applications. Research goals established by instructor in discussion with student. Prerequisite: permission of instructor. Offered: AWSpS.
LAB M 600 Independent Study or Research (*) Prerequisite: graduate standing in laboratory medicine. Offered: AWSpS.
LAB M 601 Internship (3-9, max. 9) Prerequisite: graduate standing in laboratory medicine. Offered: AWSpS.
LAB M 680 P-Clinical Laboratory Testing: Methods and Interpretation (*) Wener Provides the third- and fourthyear medical student with the opportunity to evaluate clinical laboratory data in the clinical laboratory setting. One-on-one teaching using case material and actual clinical samples. Offered: AWSpS.
LAB M 685 P-Laboratory Case Studies for Clinical Diag nosis (4) Nester Clinical case presentations and discussions aimed at test selection, disease-induced alterations, efficient algorithms, factors confounding interpretation, testing economics. (Four weeks half-time). Prerequisite: completion of required clerk ships. Offered: W.

LAB M 699 P-WWAMI Laboratory Medicine Special Electives (*, max. 24) By special arrangement for qualified students, special clerkships or externships may be available at institutions other than the University of Washington located within the WWAMI region. Prerequisite: permission of department.
LAB M $\mathbf{7 0 0}$ Master's Thesis ( ${ }^{*}$ ) Offered: AWSpS.

## MEDEX

## COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations.

MEDEX 401 Introduction to Paramedicine (8) Introduces the history of paramedicine and role of the paramedic, as well as medical concepts and technical skills relevant to its practice. Prerequisite: Seattle/King County paramedic students only. Offered: A.

MEDEX 402 Airway Management (3) Teaches cognitive and psychomotor skills critical to basic and advanced airway management. Includes enhanced techniques of rapid sequence intubation. Prerequisite: MEDEX 401 which may taken concurrently. Offered: A.
MEDEX 403 Patient Assessment (4) Teaches patient assessment and total patient care management. Provides didactic and laboratory exposure necessary to perform complete and thorough patient exams. Prerequisite: MEDEX 401 which may be taken concurrently. Offered: A.

MEDEX 404 Medical Emergencies I (5) Studies the pathophysiology and treatment of medical emergencies encountered in cardiopulmonary, neurovascular, endocrine, renal, and obstetric patients. Introduces the pharmacology of neurovascular and cardiopulmonary medications. Prerequisite: MEDEX 403. Offered: W.
MEDEX 405 Trauma Emergencies (5) Emphasizes advanced pre-hospital management of the critical trauma patient. Teaches the pathophysiology and treatment of burns and trauma to the head, chest, and abdomen. Includes advanced techniques in surgical airway. Prerequisite: MEDEX 403 which may be taken concurrently. Offered: W.
MEDEX 406 Medical Emergencies II (3) Studies the pathophysiology and treatment of alcoholism, environmental disorders, infections and communicable diseases, hematology, toxicology, and psychiatric emergencies. Prerequisite: MEDEX 405. Offered: Sp.

MEDEX 407 Special Considerations for Paramedicine (4) Emphasizes the care and treatment of pediatric, geriatric, and bariatric patients. Reviews special considerations encountered in scenarios such as multiple casualty, confined space, and extrication incidents. Prerequisite: MEDEX 406 which may be taken concurrently. Offered: Sp.

MEDEX 408 Advanced Certifications (5) Instruction in PEPP, PALS, ACLS, ATLS, and National Registry curricula and certifications. Credit/no-credit only. Prerequisite: MEDEX 407. Offered: S.
MEDEX 414 Paramedic Clinical Practicum I (3) Participation in all aspects of patient care in the HMC-ER and OR with a primary focus on patient assessment and examination, as well as proficiency in IV cannulation and airway management. Credit/no-credit only. Prerequisite: MEDEX 401 which may be taken concurrently; Seattle/King County paramedic students only. Offered: A.
MEDEX 415 Paramedic Field Practicum I (6) Consists of regularly scheduled ride time with Seattle Medic One in which the student is closely mentored and evaluated by Seattle Fire Department paramedics as the student begins actively participating in patient care. Emphasizes aspects of scene management and total patient care competence. Credit/no-credit only. Prerequisite: MEDEX 401 which may be taken concurrently. Offered: A.
MEDEX 424 Paramedic Clinical Practicum II (3) Participation in patient care in the HMC-ER with a focus on patient assessment, examination, IV cannulation, and airway management. Emphasizes the critical care of patients in the cardiovascular intensive care unit. Credit/no-credit only. Prerequisite: MEDEX 414. Offered: W.

MEDEX 425 Paramedic Field Practicum II (7) Consists of regularly scheduled ride time with Seattle Medic One in which the student is closely mentored and evalu-
ated by Seattle Fire Department paramedics as the student begins actively participating in patient care. Emphasizes scene management and total patient care competence. Credit/no-credit only. Prerequisite: MEDEX 415. Offered: W.

MEDEX 434 Paramedic Clinical Practicum III (4) Participation in patient care in the CHRMC-ER and OR with a focus on pediatric patient assessment, examination, and proficiency in IV cannulation and airway management. Emphasizes the care of expectant mother and newborn through rotations in the UW Labor and Delivery department. Credit/no-credit only. Prerequisite: MEDEX 424. Offered: Sp.

MEDEX 435 Paramedic Field Practicum III (8) Consists of regularly scheduled ride time with Seattle Medic One. The student assumes graduated responsibility for patient care and scene management while being closely evaluated by Seattle Fire Department paramedics as the student begins actively participating in patient care. Emphasizes the field care of the pediatric patient and expectant mother. Credit/no-credit only. Prerequisite: MEDEX 425. Offered: Sp.
MEDEX 444 Paramedic Clinical Practicum IV (3) Participation in patient care in the HMC Emergency Department, Neurology Clinic, Pulmonary Clinic, and Cardiology Clinic. Focuses on trauma management, extrication, MCl , and search/rescue. Includes observation of a minimum of three autopsies with the medical examiner. Credit/no-credit only. Prerequisite: MEDEX 434. Offered: S.

MEDEX 445 Paramedic Field Practicum IV (11) Consists of regularly scheduled ride time with Seattle Medic One paramedics. The student assumes all responsibilities for scene management and patient care. Evaluations determine completion of the program. Credit/no-credit only. Prerequisite: MEDEX 435. Offered: S.
MEDEX 450 Basic Science in Clinical Medicine (6) Review of important basic science concepts that include relevant topics for a healthcare clinician. Prerequisite: permission of the MEDEX program. Offered: WS.
MEDEX 451 Anatomy and Physiology in Clinical Medicine (6) Uses an organ system approach to human anatomy and physiology relevant for a healthcare clinician. Offered: AS.
MEDEX 452 Pathophysiology for Primary Care (6) Basic pathological and pathophysiological concepts of diseases commonly encountered in primary-care practice. Pathophysiology studied per organ system. Offered: A.

MEDEX 453 Basic Clinical Skills (5) Provides the student with mastery of a screening history and physical examination and thoroughness in data-collection skills. Offered: ASp.
MEDEX 454 Adult Medicine I (7) Problem-oriented approach to the diagnosis and management of common primary care conditions. Introduction to relevant laboratory and radiological procedures. Organ system approach. Offered: W.
MEDEX 456 Maternal and Child Health for the MEDEX Practitioner I (3) Designed to acquaint students with principles of prenatal care and primary-care pediatrics. Offered: W.

MEDEX 457 Behavioral Medicine I (2) Develops and demonstrates skills needed for assessment, diagnosis, and management of common emotional problems in a clinical setting. Offered: A.
MEDEX 458 Behavioral Medicine (2) Develops and demonstrates skills needed for assessment, diagnosis, and management of common emotional problems in a clinical setting. Offered: W.

MEDEX 459 Behavioral Medicine (2) Develops and demonstrates skills needed for assessment, diagnosis, and management of common emotional problems in a clinical setting. Offered: Sp .
MEDEX 460 Principles of Patient Management (3) Pro vides systematic approach to pharmacological therapies including drug choice, risk factor identification and administration. Includes non-pharmacological therapies and emphasizes health education and health promotion strategies. Offered: W.
MEDEX 461 Principles of Patient Management (3) Provides systematic approach to pharmacological therapies including drug choice, risk factor identification and administration. Includes non-pharmacological therapies and emphasizes health education and health promotion strategies. Offered: Sp.

MEDEX 462 Maternal and Child Health for the MEDEX Practitioner II (3) Continuation of MEDEX 456. Emphasis on diagnosis and treatment of common pediatric problems. Offered: Sp.
MEDEX 463 Clinical Clerkships I (19) Full-time clinical clerkship spent in institution-based or specialty practice settings with the supervision of licensed health care providers. Credit/no-credit only. Offered: AWSpS.

MEDEX 465 Clinical Clerkships II (19) Continuation of clinical clerkships spent in institution-based or specialty practice settings with supervision of licensed healthcare providers. Credit/no-credit only. Offered: AWSpS.

MEDEX 466 Family Practice Clerkship for the MEDEX Practitioner I (19) Ballweg Family practice under the supervision of physicians throughout the Pacific Northwest. Common primary-care problems. Students and preceptors are educated in the utilization and management of the physician assistant in practice. Students keep computerized records of patient encounters and complete a variety of written assignments. Credit/no-credit only. Offered: AWSpS.
MEDEX 467 Family Practice Clerkship for the MEDEX Practitioner II (19) Ballweg Further experience in primarycare practice with emphasis on independent patient management by the student supervised by family practitioners. Credit/no-credit only. Offered: AWSpS.
MEDEX 468 Emergency Medicine I for the MEDEX Practi-
tioner (2) Approach to the diagnosis and management of common emergency conditions for primary-care physician assistants. Organ system approach. Of fered: W.
MEDEX 469 Emergency Medicine II for the MEDEX Practitioner (2) Continuation of MEDEX 468. Approach to diagnosis and management of common emergency conditions for primary-care physician assistant. Organ system approach. Offered: Sp.
MEDEX 470 Professional Role Development (1) Explores professional role development, health access issues, licensing issues, healthcare quality, interdisciplinary relationships, diverse populations, and the healthcare environment. Offered: A.

MEDEX 471 Professional Role Development (1) Explores professional role development, health access issues, licensing issues, healthcare quality, interdis ciplinary relationships, diverse populations, and the healthcare environment. Offered: W.

MEDEX 472 Professional Role Development (1) Explores professional role development, health access is sues, licensing issues, healthcare quality, interdisciplinary relationships, diverse populations, and the healthcare environment. Offered: Sp.
MEDEX 473 Technical Skills (1) Introduces clinical skills and procedures through hands-on experiences. Offered: A.

MEDEX 474 Technical Skills (1) Introduces clinical skills and procedures through hands-on experiences. Offered: W.

MEDEX 475 Technical Skills (1) Introduces clinical skills and procedures through hands-on experiences. Offered: Sp.
MEDEX 499 Special Field Projects/Independent Study (119, max. 19) Clinical clerkships and independent study activities. Credit/no-credit only. Offered: AWSpS.
MEDEX 510 Healthcare for Rural and Medically Underserved Populations (5) Overview of the nature and severity of disparities in healthcare access and delivery to rural and urban underserved populations for practicing clinicians. Prerequisite: EMCHS students only. Offered: S.

MEDEX 511 Healthcare Administration and Public Health
(5) Applies the basic principles of healthcare administration and public health to specific communities and practices. Prerequisite: EMCHS students only. Offered: S.

MEDEX 512 Academic Medicine and Specialty Practice for Practicing Clinicians (5) Overview for practicing clinicians of primary care as well as medical and surgical specialty practice within the academic medicine environment. Prerequisite: admission to the program. Offered: S.

MEDEX 513 Global Health for Practicing Clinicians (5) Overview of global health concerns and solutions including disease processes, health systems, cultural competency, and the impacts of health policies on local populations. Prerequisite: admission to the program. Offered: S.

MEDEX 521 Capstone Project I (3) Includes capstone project introduction, literature review, critical reading, research design and proposals, ethics, IRB, research writing, and results presentation. Credit/nocredit only. (Two weeks on the Seattle campus, six weeks online). Prerequisite: EMCHS students only. Offered: S.

MEDEX 522 Capstone Project II (1) Details students' choice of capstone project and preparation of a detailed proposal including the timeline for completion. Credit/no-credit only. Prerequisite: MEDEX 521. Offered: A.

MEDEX 523 Capstone Project III (1) Students work on capstone projects. Credit/no-credit only. Prerequisite: MEDEX 522. Offered: W.

MEDEX 524 Capstone Project IV (1) Continuation of work on the capstone project. Credit/no-credit only. Prerequisite: MEDEX 523. Offered: Sp.

MEDEX 525 Capstone Project V (5) Completion of the capstone project, preparation of final drafts, submission of finished project to faculty mentors, and presentation of project. Credit/no-credit only. Prerequisite: MEDEX 524. Offered: S.
MEDEX 528 Investigative Skills for Practicing Clinicians (5) Overview of the principles, research methods, and biostatistical and epidemiological techniques necessary to understand and conduct academic and clinical research. Applications critically appraise the public health and biomedical literatures drawing examples from current scientific literature and existing data. Prerequisite: admission to EMCHS program. Offered: S.

MEDEX 531 Clinical Residencies I (3) Clinical residencies spent in community-based or institution-based practice settings with the supervision of licensed healthcare providers. Credit/no-credit only. Prerequisite: EMCHS students only. Offered: AWSpS.

MEDEX 532 Clinical Residencies II (3) Clinical residencies spent in community-based or institution-based practice settings with the supervision of licensed
healthcare providers. Credit/no-credit only. Prerequisite: EMCHS students only. Offered: AWSpS.
MEDEX 533 Clinical Residencies III (3) Clinical residencies spent in community-based or institution-based practice settings with the supervision of licensed healthcare providers. Credit/no-credit only. Prerequisite: EMCHS students only. Offered: AWSpS.

MEDEX 536 Health Policy for Practicing Clinicians (4) Overview of United States health policy issues including payment structures, quality, disparities, workforce and legislative impact. Prerequisite: EMCHS students only. Offered: W.

MEDEX 537 Leadership for Practicing Clinicians (4) Leadership skills for clinical practice, community, the profession, and organizations. Prerequisite: EMCHS students only. Offered: A.
MEDEX 538 The Physician Assistant Profession (4) Overview of the physician assistant profession, focusing on the history of the profession, education, economics, legal, political, and professional aspects of the physician assistant profession, current and future physician assistant roles, and hot topics. Prerequisite: EMCHS students only. Offered: Sp.

MEDEX 540 Healthcare for Rural and Underserved Populations (5) Overview of the nature and severity of disparities in healthcare access and delivery to rural and urban underserved populations. Offered: S.
MEDEX 541 Healthcare Administration and Public Health
(5) Application of the basic principles of healthcare administration and public health to specific communities and practices. Offered: S.

MEDEX 542 Academic Medicine and Specialty Practice (5) Overview of primary care as well as medical and surgical specialty practice within the academic medicine environment. Offered: S.

MEDEX 543 Global Health (5) Overview of global health concerns and solutions including disease processes, health systems, cultural competency, and the impacts of health policies on local populations. Offered: S.

MEDEX 550 Basic Science in Clinical Medicine (6) Intensive review of important basic scientific concepts relevant to clinical medicine. Prerequisite: MEDEX Northwest students only. Offered: S.
MEDEX 551 Anatomy and Physiology (6) Overivew and review of human anatomy and physiology by organ sys tem. Prerequisite: MEDEX students only. Offered: S.

MEDEX 552 Pathophysiology for Primary Care (6) Exam ines pathological and pathophysiological concepts of diseases commonly encountered in primary-care practice. Studies pathophysiology per organ system. Offered: A.

MEDEX 553 Basic Clinical Skills (5) Provides the student with mastery of history-taking and physical examination skills, thoroughness in data collection, medical record-keeping, and verbal presentation skills. Offered: A.

MEDEX 554 Adult Medicine I (7) Problem-oriented, or-gan-system approach to the diagnosis and management of common primary-care conditions. Offered: W.

MEDEX 555 Adults Medicine II (7) Problem-oriented, organ-system approach to the diagnosis and management of common primary-care conditions. Offered: Sp.
MEDEX 556 Maternal Child Health I (3) Examines the principles of prenatal care and primary-care pediatrics. Offered: W.

MEDEX 557 Behavioral Medicine I (2) Helps to develop and demonstrate skills needed for assessment, diag-
nosis, and management of common behavioral and emotional problems in a clinical setting. Offered: A.
MEDEX 558 Behavioral Medicine II (2) Helps to develop and demonstrate skills needed for assessment, diagnosis, and management of common behavioral and emotional problems in a clinical setting. Offered: W.
MEDEX 559 Behavioral Medicine III (2) Helps to develop and demonstrate skills needed for assessment, diag nosis, and management of common behavioral and emotional problems in a clinical setting. Offered: Sp.

MEDEX 560 Principles of Patient Management I (3) Provides systematic approach to pharmacological therapies including drug choice, risk factor identification, and administration. Includes non-pharmacological therapies and emphasizes health education and health promotion. Offered: W.
MEDEX 561 Principles of Patient Management II (3) Provides systematic approach to pharmacological therapies including drug choice, risk factor identification, and administration. Includes non-pharmacological therapies and emphasizes health education and health promotion. Offered: Sp.
MEDEX 562 Maternal Child Health II (3) Emphasizes the diagnosis and treatment of common pediatric problems. Prerequisite: MEDEX 556. Offered: Sp.
MEDEX 563 Clinical Clerkships I (19) Full-time clerk ships spent in institution-based or specialty practice setting with the supervision of licensed healthcare providers. Credit/no-credit only. Offered: AWSpS.

MEDEX 565 Clinical Clerkships II (19) Full-time clerk ships spent in institution-based or specialty practice setting with the supervision of licensed healthcare providers. Credit/no-credit only. Prerequisite: MEDEX 563. Offered: AWSpS.

MEDEX 566 Family Practice Clerkship I (19) Family practice under the supervision of physicians throughout the Pacific Northwest. Common primary-care problems. Students and preceptors are educated in the utilization and management of the physician assistant in practice. Students keep computerized records of encounters and complete a variety of written as signments. Credit/no-credit only. Offered: AWSpS.

MEDEX 567 Family Practice Clerkship II (19) Further experience in primary-care practice with an emphasis on independent patient management by the student supervised by family practitioners. Prerequisite: ME DEX 566. Offered: AWSpS.

MEDEX 568 Emergency Medicine I (2) Diagnosis and management of common emergency conditions for primary-care practitioners. Organ system approach. Offered: W.

MEDEX 569 Emergency Medicine II (2) Diagnosis and management of common emergency conditions for primary-care practitioners. Organ system approach. Offered: Sp.
MEDEX 570 Professional Role Development I (1) Explores professional role development, health access is sues, licensing issues, healthcare quality, interdisciplinary relationships, diverse populations, and the healthcare environment. Offered: A.
MEDEX 571 Professional Role Development II (1) Ex plores professional role development, health access issues, licensing issues, healthcare quality, interdis ciplinary relationships, diverse populations, and the healthcare environment. Offered: W

MEDEX 572 Professional Role Development III (1) Ex plores professional role development, health access issues, licensing issues, healthcare quality, interdisciplinary relationships, diverse populations, and the healthcare environment. Offered: Sp.

MEDEX 573 Technical Skills I (1) Introduces clinical skills and procedures through hands-on experiences. Offered: A.

MEDEX 574 Technical Skills II (1) Introduces clinical skills and procedures through hands-on experiences. Offered: W.

MEDEX 575 Technical Skills III (1) Introduces clinical skills and procedures through hands-on experiences. Offered: Sp.

MEDEX 588 Investigative Skills for Entry-Level Clinicians (5) Overview of the principles, research methods, and biostatistical and epidemiological techniques necessary to understand and conduct academic and clinical research. Application appraise the public health and biomedical literatures drawing on examples from current scientific literature and existing data. Offered: S.

MEDEX 599 Independent Study (1-19, max. 19) Supervised clinical clerkship or independent study activities to meet specific needs. Credit/no-credit only. Prerequisite: permission of the MEDEX program. Offered: AWSpS.

## Medicine

RR512 University of Washington Medical Center domchair@uw.edu

Active programs in teaching, research, and patient care are carried on at the University of Washington Medical Center, Veterans' Administration Puget Sound Health Care System (VAPSHCS), Harborview Medical Center, Pacific Medical Center, the Puget Sound Blood Center, the Northwest Kidney Center, and the Fred Hutchinson Cancer Research Center. Major affiliations for clinical teaching also exist with Providence Medical Center and Swedish Hospital Medical Center. There are many additional affiliations with community hospitals in Seattle, the state of Washington, and the WWAMI region. Medical students, interns, medical residents, and postdoctoral research fellows rotate through these various hospitals and participate in the learning experiences offered at each.

## COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations.

## Medicine

## MED 498 Undergraduate Thesis (*)

MED 499 Undergraduate Research (*) Case studies, with laboratory research. Available to undergraduates and medical students.
MED 505 P-Preceptorship in Medicine (1) To provide opportunity for first- and second-year medical students to gain personal experience with medical practice situations by being stationed with carefully selected clinical faculty members in their offices. Credit/nocredit only. Prerequisite: permission of department.
MED 507 HIV in Latinos (1) Students shadow an attending physician, and participate in routine and acute visits for a primarily Spanish-speaking patient population. Includes Spanish-language health education and rapid HIV testing sessions, and encourages attendance at a community event targeting the Latino HIV community. Credit/no-credit only. Prerequisite: permission of instructor; conversational Spanish proficiency or FAMED 556.
MED 510 Health Issues of Sexual Minorities (1) Introduction to the special healthcare issues and barri-
ers confronting persons identified as bisexual, gay, lesbian, or transgendered. Includes lectures, panels, and case presentations by faculty and community experts.
MED 515 Medicine as Culture (1) McNalley Examines the ways that medical practice, the medical profession, and ideas about sickness and health are embedded in society and culture, as a way of contextualizing biological phenomena and medical knowledge. Credit/ no credit only.

MED 525 Introduction to Gerontology and Geriatric Medicine (1) Bennett, Ong Introduces gerontology and geriatric medicine. Explores topics in geriatric medicine including: multidisciplinary care, dementia and delirium, falls, polypharmacy, urinary incontinence, fragility, and end-of-life care. Employs a combination of lectures, time spent interviewing and observing patients in hospital-based clinics, private homes, long term care and continuing retirement communities, and bedside teaching with a healthcare provider. Credit/no-credit only. Offered: Sp.
MED 530 AIDS: A Multidisciplinary Approach (2) Comprehensive overview of the public health, clinical, and laboratory aspects of human immunodeficiency virus (HIV) infection and disease. Topics include the pathogenesis, natural history, and management of (HIV) infections. The impact of HIV/AIDS on community and global healthcare and prospects for prevention and control. Credit/no-credit only. Offered: jointly with EPI 530/G H 562; A.

MED 531 P-Human Genetics (*) Weekly seminar dealing with a variety of topics in medical genetics given by faculty of the Division of Medical Genetics and related departments and divisions. Open to medical students with a good foundation in genetics.

MED 533 P-Clinical Endocrinology (2) Includes brief lectures followed by instructor-led interviews with patients to illustrate the clinical presentation, diagnosis, and treatment of the major endocrinopathies. Students gain a greater appreciation of the impact these disorders have on patients' lives. Prerequisite: second year medical students. Offered: Sp.
MED 534 Wilderness Medicine (1) Provides training in medical emergencies and clinical situations unique to wilderness settings where access to medical care is limited. Students gain experience in patient assessment, extrication, and the management of common wilderness situations including altitude illness, burns, trauma, diving injuries, hypo- and hyperthermia, and toxin exposures. Offered: Sp.

MED 536 Introduction to Critical Care Medicine (1) Uses a combination of didactics, time spent observing rounds and physicians on-call in the ICU as well as dedicated bedside teaching by a critical care attending physician to teach about core topics in pediatric and adult critical care medicine including shock, respiratory failure, sepsis, mechanical ventilation, and palliative care. Offered: W.

MED 540 Preventing Hospital-Acquired Infections (1) Lynch Multidisciplinary approach to understanding, measuring, and developing policy to prevent healthcare associated infections. Credit/no-credit only. Offered: jointly with EPI 505; W.

MED 546 Clinical Applications of Gene Therapy (2) Overview of the current status of gene therapy. Discusses its role in the future practice of medicine. Lecture and literature reviews.
MED 547 Quantitative Methods in Medical Genetics (2) Computational methods of use for medical genetics. Review of problem sets. Topics range from basic probability to linkage analysis. Prerequisite: genetics and permission of instructor.

MED 549 Clinical Medical Genetics (1) Review of curren clinical advances in medical genetics. Includes lectures and discussion of cases from medical genetics clinic. Prerequisite: genetics or human genetics and permission of instructor. Offered: AWSpS.

MED 555 P-Mind, Body, and Pen: Writing and the Art of Becoming a Physician (1) Provides forum for medical students to write about issues in medicine and medical education. Focuses on writing as a process for giving voice to the conflicting demands and dilemmas of becoming a physician. Explores personal narratives, dreams and disappointments, chronic illness and death, empathy and revulsion, authenticity and power. Offered: W.
MED 556 Visual Thinking: How to Observe in Depth (1) Uses visual thinking strategies to look at art and enhance diagnostic acumen. Expands observational and critical thinking skills, and encourages open-ended discussion. Skills applied in assessing patients. Combination of slide sessions and observation of original objects at Seattle museums. Offered: A.
MED 560 P-Advanced Global Health (2) Prepares health profession students for work in developing countries. Includes healthcare delivery systems, political, social, and economic determinants of health, major global health issues, and personal well-being while abroad. Lecture and seminar format with guest speakers, student presentations, and discussion.
MED 561 Tropical Medicine (1) Intended for professional health science students interested in learning the pathophysiology, epidemiology, and clinical presentation of disease conditions that are more commonly seen in less-developed countries, resource-limited settings, or tropical climates, and how to diagnose, treat, and follow the resolution of these diseases with commonly limited resources. Credit/no-credit only. Offered: jointly with G H 561; Sp.

MED 565 P-The Healer's Art: Awakening the Heart of Medicine (1) Encourages cultivation of human dimensions in practice of medicine while strengthening personal commitment to medicine as a life's work. Facilitates student recognition of commonality of personal concerns among peers and student response to the dimension of mystery in the experience of illness as well as development of the capacity for awe. Offered: Sp.
MED 599 P-Transfusion Machine (3) Group discussions and didactic sessions cover broad category of transfusion medicine. Hands-on laboratory experience in red cell serology/compatibility, coagulation, and histocompatibility with emphasis on diagnosis and management of clinical problems. Based at Puget Sound Blood Center. Prerequisite: fourth-year medical student standing; third-year student standing with permission of instructor.

MED 600 Independent Study or Research (*) Prerequisite: permission of instructor.
MED 630 P-WRITE Medicine Clinical Clerkship (*, max. 24) Basic clinical clerkship for students enrolled in the WRITE Program. Prerequisite: completion of basic curriculum; third- and fourth-year students; acceptance in the WRITE program.
MED 695 P-Clinical Aspects of Aging (4/8) (Harborview Long Term Care Service, HMC, Seattle VA Medical Center, BoiseVA. Medical Center) Work with elderly patients as subintern with senior care program. Inpatient and ambulatory setting in nursing homes and patients' homes. Interdisciplinary approach. Prerequisite: MED 665.

## Conjoint

CONJ 401 Human Anatomy and Physiology (4) Linder, Melby Structure and function of the human body with
aboratory work in gross anatomy, histology, and physiology. Primarily for pharmacy doctoral students. Others by special permission of instructors. Prerequisite: BIOL 220; either CHEM 155 or CHEM 162. Of fered: A.

CONJ 402 Human Anatomy and Physiology (4) Linder, Melby Structure and function of the human body with laboratory work in gross anatomy, histology, and physiology. Primarily for pharmacy doctoral students. Others by special permission of instructors. Prerequisite: CONJ 401. Offered: W.
CONJ 403 Human Anatomy and Physiology (4) Linder, Melby Structure and function of the human body with laboratory work in gross anatomy, histology, and physiology. Primarily for pharmacy doctoral students. Others by special permission of instructors. Prerequisite: CONJ 402. Offered: Sp.

CONJ 475 Alcoholism: A Course for Medical Students and Students in the Allied Health Sciences (2) Kivlahan, Samson For medical students in the allied health sciences in any year that covers an introduction to the epidemiology, diagnostic strategies, natural history, physiologic effects, and treatment of alcohol-related disorders. Offered: Sp.
CONJ 480 Neuroscience for Rehabilitation Professionals (5) Anderson, Mulligan, Slimp Structure and function of the central nervous system, emphasizing sensorimotor systems and higher integrative functions, coupled with clinical correlations. Required for occupational therapy, physical therapy, and prosthetic/orthotic students. Others by permission.

CONJ 504 Topics of Molecular Medicine (1.5) Focuses on an important topic in medicine and science. Lectures introduce clinical and basic science background, followed by a seminar/discussion with speakers. Prerequisite: Graduate standing and permission of instructor. Offered: jointly with MOLMED 504; Sp.
CONJ 505 P-Pain Clinic Preceptorship (1) One morning a week for a total of 30 hours per quarter spent observing patient care in either inpatient or outpatient settings at University of Washington Medical Center; associated readings. Prerequisite: first- or second-year medical student standing. Coordinator: Pain Center.

CONJ 511 Genomic Dissection (1) Clark, Horwitz, Shedure Uses state of the art technology to sequence the genome of a cadaver. Explores the structure of the genome, as well as genetic variants responsible for human individualization and disease. Credit/no credit only. Offered: A.

CONJ 512 Scientific Speaking Seminar (1.5) Biggins, Peichel Teaches how to effectively give a scientific seminar about research. Offered: jointly with MCB 512; W.
CONJ 513 Clinical Medical and Human Genetics (4) Rotations through medical genetics clinics for graduate students enrolled in the molecular medicine pathway. Students review clinical data, identify the molecular basis of genetic disorders, and assess how scientific studies have changed the assessment and natural history of these conditions. Limit of four students per quarter. Offered: jointly with MOLMED 513; AWSpS.
CONJ 514 Molecular Medicine (1.5, max. 3) Eary, Rosen Introduces how basic sciences impact the practice of medicine, using patient case histories to introduce key areas of clinical research and investigative medicine. Topics include cancer biology; drug development; gene- and cell-based therapeutics; inflammation and host response; vascular disease; and obesity and weight regulation. Prerequisite: graduate standing. Offered: jointly with MOLMED 514; W.
CONJ 515 Interdisciplinary Health and Human Services Delivery in Rural Communities (1) House Provides opportunities for students in health and human services
to explore current trends and issues of service delivery in rural communities. Demographics, economics, community structure, culture, and professional/ personal issues are addressed. Field trip fee. Prerequisite: major standing in a health or human services profession. Credit/no-credit only. Offered: Sp.
CONJ 516 What Every Physician Should Know About Oral Health (1) Lewis, Mouradian, Slayton Didactic elective for students interested in understanding oral health and its relationship to systemic health. Special interest to students planning careers in primary care, public health, or who are likely to practice in rural or underserved communities. Includes weekly seminars and clinical demonstrations. Credit/no-credit only. Offered: Sp.
CONJ 524 Structural Basis of Signal Transduction (1.5) $X u$ Focuses on the structure-function relationship of key enzymes in signal transduction (protein/ lipid kinases; phosphatases etc.) and the structural consequences of protein phophorylation. Teaches students to look into critical structural details using PC or Mac. Prerequisite: undergraduate course in biochemistry and basic cell biology, or permission of instructor. Offered: W.

CONJ 526 Introduction to Systems Biology and Quantitative Approaches to Biomedical Sciences (1.5) Aitchison Covers philosophy of systems biology, experimental design, and the linkages between discovery and hypothesis driven science. Reviews quantitative systems biology tools for genomics, proteomics, modeling and data integration, and emerging technologies. Offered: W.
CONJ 529 Cell Migration (1.5) Cooper, Moens Explores mechanisms of cell migration in vivo and in cell culture. Discusses the cell biology of different forms of cell migration, the extracellular cues that direct migration, and how these cues are integrated by the migrating cell. Offered: jointly with MCB 529; W.
CONJ 530 Directing Stem Cells Toward Regenerative Medical (1.5) An introduction to the rapidly developing field of human embryonic stem cells in regenerative medicine crossing all medical disciplines including ethics. A strong background in biological sciences is required. Offered: Sp.
CONJ 531 Signaling Mechanisms in Excitable Cells (1.5) Hille Membrane electricity. Structure and roles of voltage-gated and ligand-gated ion channels in electrical signaling. Calcium as a second messenger. Exocytosis and its regulation. Phototransduction in photoreceptors. Prerequisite: comprehensive undergraduate course in general biochemistry and molecular biology, or permission of instructor. Offered: A.

CONJ 532 Signal Transduction from the Cell Membrane to the Nucleus (1.5) Beavo, Moon, Storm Intracellular signaling pathways leading from cell membrane receptors to nucleus. Pathways activated by seven transmembrane receptors and G-proteins, insulin/ PI3 kinase, nitric oxide and WNTs and mechanisms of signal termination. Cytokine/Jak/Stat signaling and role of subcellular localization in signal transduction. Prerequisite: basic knowledge of biochemistry. Offered: A.

CONJ 533 The Dynamic Chromosome (1.5) Henikoff, Roth The chromosome viewed as the ultimate organelle. How chromosomes are maintained and propagated. Epigenetic regulation of genes. Genetic, biochemical , and cytologic methods for understanding chromosome functions. Prerequisite: cell biology, biochemistry, and genetics. Offered: A.
CONJ 534 Selected Problems in Nervous System Development (1.5) Introduces students to current issues in developmental neurobiology. Topics include regionalization of the neuroectoderm, mechanisms of
neurogenesis, axon patterning and plasticity, and cell death. Not intended to be comprehensive; examines the experimental basis for current views in the field of a few topical issues.
CONJ 536 Experimental Design in Cell Biology (1.5) A topic of current research interest covered in depth in order to follow a line of investigation and critically evaluate the strengths and limitations of various experimental strategies. Offered: jointly with BIOL 546.
CONJ 537 Mechanism of Transcriptional Regulations (1.5) Tsukiyama Biochemical mechanisms of gene transcription covering a broad range of transcriptional regulation, including mechanisms of transcriptional initiation, elongation, and termination. Regulation of transcription by chromatin. Includes a special lecture regarding regulation of transcription in cell growth and differentiation. Offered: A.
CONJ 538 Genetic Instability and Cancer (1/1.5, max. 1.5) Maizels, Monnat Seminar focusing on molecular pathways that maintain genomic stability in all cells and that carry out programmed changes in genomic structure in the immune system. Special attention devoted to understanding how failure in these pathways leads to genomic instability and malignancy. Prerequisite: permission of instructor.

CONJ 540 Basic Science of Urologic Complications (3) Introduction to the multidisciplinary nature of the most common urologic complications ranging from prostate cancer to erectile dysfunction. Covers epidemiology, clinical and surgical treatments, current dogmas and approaches/models in basic study of underlying disease mechanisms, and a journal review of each complication. Prerequisite: biological science course.
CONJ 541 Molecular Biology of Cellular Processes (1.5) Bornstein Translational control; cytoskeleton and molecular motors; protein targeting, sorting and secretion; apoptosis; regulation of cell function by extracellular matrix. Prerequisite: comprehensive undergraduate course in biochemistry and molecular biology or permission of instructor. Offered: Sp.

CONJ 542 Development (1.5) Li Molecular mechanisms of development; molecules and pathways used for the patterning of developing organisms. Similarities and differences in the making of plants, invertebrates, and vertebrates. Prerequisite: comprehensive undergraduate courses in biology, molecular biology, or permission of instructor. Offered: W.
CONJ 544 Protein Structure, Modification and Regulation (1.5) Stoddard, Strong Overview of general principles of protein structure, including forces that contribute to folding and stabilization, followed by an extended coverage of the means by which protein structure and function are modified and regulated. Examples from recent developments in protein folding, processing, and allosteric regulation. Prerequisite: introductory biochemistry and cell biology.
CONJ 545 Molecular Interactions and Medicine (1.5) Verlinde Forces governing molecular interactions in biology; with a focus on medicine. Principles of computer modeling techniques in use for predicting the molecular behavior of proteins, ligands, and their complexes. In computro ligand discovery; drug design, and the understanding at the atomic level of some genetic diseases. Two computer lab sessions. Offered: Sp.
CONJ 546 Survey of Technologies for Molecular Biology (1.5) Bumgarner Broad overview of modern technologies used in molecular biology with particular emphasis on DNA sequencing and gene expression. In addition to methods and applications for the technologies, examines the theoretical basis and underlying instrumentation through which these technologies are implemented. Offered: A.

CONJ 547 Molecular Evolution of Viral-Host Interactions (1.5) Katze Interactions between viruses and the cells they infect, with special emphasis on evolutionary battle that occurs between the invading virus and its host. Examines new technologies being used to molecularly dissect virus-host interactions. Offered: Sp.
CONJ 548 Modeling Proteins and Proteomes (1.5) Samudrala Hands-on experience for modeling protein structures, using the models to predict function, and applying the prediction methods to all proteins encoded by an organismal genome. Provides an overview of protein structure, how it mediates function, and its importance for understanding protein interaction networks. Technologies involved for protein structure modeling. Offered: W.
CONJ 549 Microbial Population Biology (1.5) MIttler Principles of ecology and evolution as they apply to microorganisms. Prerequisite: advanced undergraduates with permission of instructor. Offered: Sp , even years.
CONJ 550 P-Clinical Infectious Diseases (3) Lecture series by faculty members from various departments, authorities in the field of clinically important infectious diseases. Lectures, reading assignments, and handouts emphasize epidemiology, clinical manifestations, laboratory findings, diagnosis, treatment, and prevention. Oriented for second-year medical students. Credit/no-credit only.
CONJ 551 Immunity (1.5) Strong Provides an understanding of the central cellular and molecular players in the mammalian immune system at a level appropriate for the non-specializing graduate student. Selected topics include the molecular basis of $B$ and $T$ cell activation and effector functions and the mechanisms of innate immunity. Offered: Sp.
CONJ 552 Metabolic Flexibility in Biology (1.5) Small molecules and the ways that chemistry of these molecules facilitates life under changing conditions. Includes systems from microbiology to human physiology to understand aspects of cancer, aging, and animation. Explores topics including bioenergetics/ metabolic flux, adaptation, and allometric scaling. Prerequisite: undergraduate organic chemistry and biochemistry.
CONJ 553 Clinical Management of HIV (3) Kim In-depth case-based training on the diagnosis and clinical management of HIV and associated conditions. Includes interactive format with speakers who have experience in both resource-rich and resource-limited settings. Offered: jointly with G H 573; W.
CONJ 554 Fundamentals of Hypnosis (1) McCann, Schneeweiss Examines phenomena associated with hypnosis, as well as its safe use in clinical practice. Offered: Sp .
CONJ 556 Drug Addiction: Mechanisms, Prevention, and Treatment (2) Chavkin Key advances, insights, methods, and challenges for our understanding of drug addiction from psychological, pharmacological, psychiatric, community prevention, legal, and neurodevelopmental perspectives. Enhances familiarity with the multidisciplinary approaches required to understand addiction as a disease. Offered: A.
CONJ 557 Microbial Evolution and Ecology (1.5) Selected topics in microbial evolution including evolution of the main lines of descent, and bacterial and archaeal speciation and co-speciation, and evidence for early microbial live on Earth. Prerequisite: MICROM 412 or general microbiology background. Offered: ASp.
CONJ 558 Fundamentals of Prokaryotic Biology (1.5) Harwood, Leigh Basic principles in prokaryotic cell structure, genomics, and metabolism. Introduction to prokaryotic physiology, bacterial pathogenesis, and microbial ecology.

CONJ 559 Scientific Ideas at Work (1.5) Gray, Maizels Examines how basic biomedical research leads to discovery of new therapeutics and diagnostics for treatment of human disease. Considers disease mechanism and impact, need for a drug, preclinical studies, clinical testing and drug approval, and how technology developed in an academic laboratory is translated into a commercial product. Offered: jointly with MOLMED 559; Sp.
CONJ 583 Molecular Targets in Cancer Therapy (1.5) Maizels, Monnat Examines how molecular targets for cancer therapies are discovered and validated. Covers disease mechanisms, need for new therapeutics, how small molecule and antibody therapeutics are identified and developed, and how preclinical studies are used to establish safety and efficacy. Offered: jointly with MOLMED 583; A.
CONJ 585 Surgical Anatomy (1-3, max. 12) Graney Guided dissection of selected regions, supplemented by conferences. Offered conjointly by the departments of Biological Structure and Surgery. Prerequisite: permission of department. Coordinator: Department of Biological Structure.
CONJ 616 P-Prison/Corrections Medicine Clerkship Washington (*, max. 16) Covers a wide variety of diseases in a variety of outpatient settings, including urgent care, a chronic care clinic, and a long-term care facility for elderly and medically frail inmates in a men's prison setting. Also includes the option to learn common procedures including suturing, joint injections, skin biopsies, and toenail removals. Prerequisite: completion of the medicine and family medicine required clerkships. Offered: AWSpS.
CONJ 617 P-Subinternship in Neurocritical Care Medicine (8) As sub-interns on the Neurocritical Care Service, students learn about critical illness, focusing on neurosurgical critical illness. Through direct patient care responsibilities, students gain experience managing traumatic brain injury, acute spinal cord injury, acute cerebral hemorrhage, and other common criticalcare issues. Offered: AWSpS.
CONJ 625 Global Health Clinical Elective (*, max. 24) Provides a better understanding of the challenges of providing medical care in international resource-limited settings. Students spend a minimum of 5 weeks at a developing county medical center, with the goal of learning more about the local burden of disease and strategies for diagnosis and treatment. Prerequisite: fourth year medical students. Offered: WSp.

CONJ 662 P-Chronic Care/Alaska - Fairbanks APCA (8) Exposure to rehabilitation, geriatrics, palliative care, and pain management through the Chronic Care website and didactics. Students focus their clinical activities on chronic pain management.
CONJ 663 P-Chronic Care/Alaska - Providence Palliative Care (8) Exposure to the areas of rehabilitation, geriatrics, palliative care, and pain management. Includes didactic orientation of the first day, and patient case presentations during didactics on last day.
CONJ 664 P-Chronic Care/Palliative Care - Kline Galland Home (8) Exposure to rehabilitation. Students assigned to a preceptor and clinical site to concentrate their clinical activities. Includes didactic orientation on the first day and patient case presentations during didactic on the last day.
CONJ 665 P-Chronic Care/Palliative Care - PHOS (8) Exposure to rehabilitation, palliative care, and pain management. Students focus on one area and are assigned to a preceptor and clinical site to concentrate clinical activities in that content area. Includes didactic orientation on the first day and patient case presentations during didactic on the last day.

CONJ 666 P-Chronic Care/Spokane - VAMC Geriatrics Unit (8) Exposure to rehabilitation, palliative care, and pain management. Students focus on one area and are assigned to a preceptor and clinical site to concentrate clinical activities in that content area. Includes didactic orientation on the first day and patient case presentations during didactic on the last day.
CONJ 667 P-Chronic Care/Palliative Care - Evergreen Hospice (8) Exposure to rehabilitation, palliative care, and pain management. Students focus on one area and are assigned to a preceptor and clinical site to concentrate clinical activities in that content area. Includes didactic orientation on the first day and patient case presentations during didactic on the last day.
CONJ 668 P-Chronic Care/Spokane - St. Luke's Rehab, Pain Management (8) Exposure to rehabilitation, palliative care, and pain management. Students focus on one area and are assigned to a preceptor and clinical site to concentrate clinical activities in that content area. Includes didactic orientation on the first day and patient case presentations during didactic on the last day.
CONJ 669 P-Chronic Care/Spokane - Deaconess Palliative Care (8) Exposure to rehabilitation, geriatrics, palliative care, and pain management. Students are assigned to a preceptor and clinical site to concentrate clinical activities.
CONJ 670 P-Chronic Care/Billings - St. Vincent Healthcare (8) Exposure to rehabilitation, geriatrics, palliative care, and pain management. Includes didactic orientation of the first day, and patient case presentations during didactics on last day.
CONJ 671 P-Chronic Care/Boise - Saint Alphonsus Palliative Care (8) Exposure to rehabilitation, geriatrics, palliative care, and pain management. Includes didactic orientation of the first day, and patient case presentations during didactics on last day.
CONJ 672 P-Chronic Care/Boise - St. Luke's Palliative Care (8) Exposure to rehabilitation, geriatrics, palliative care, and pain management. Includes didactic orientation of the first day, and patient case presentations during didactics on last day.
CONJ 673 P-Chronic Care/Boise - VAMC (8) Exposure to rehabilitation, geriatrics, palliative care, and pain management. Students are assigned to a preceptor and clinical site to concentrate their clinical activities.
CONJ 674 P-Chronic Care/Alaska - Anchorage APCA (8) Exposure to rehabilitation, geriatrics, and pain management. Students are assigned to a preceptor and clinical site to concentrate their clinical activities.
CONJ 675 P-Chronic Care/Palliative Care - GHHH Tacoma (8) Exposure to rehabilitation, palliative care, and pain management. Students focus on one area and are assigned to a preceptor and clinical site to concentrate their clinical activities in that content area. Includes didactic orientation on the first day and patient case presentations during didactic on the last day.
CONJ 677 P-Clinical Allergy and Immunology (*, max. 12) (Boise Veterans Affairs Hospital), (University of Washington Medical Center) Clinic and office experience in diagnosing and managing allergic disease. Clinical conferences, hospital rounds on clinical immunology and allergy. Student may elect a flexible program, emphasizing adult or pediatric allergy. Prerequisite: MED 665 or basic clerkships in Departments of Family Medicine or Pediatrics. (Four weeks, full-time.)
CONJ 679 P-Chronic Care/Palliative Care - PRMC (8) Exposure to palliative care. Students are assigned to a preceptor and clinical site to concentrate their clini-
cal studies. Includes didactic orientation on the first day and patient case presentations during didactics on last day.

CONJ 680 P-Detoxification and Rehabilitation Program for Alcoholism and Drug Abuse (*, max. 16) Reoux Supervised introduction to alcoholic detoxification and rehabilitation and drug abuse. Supervised clinical experience in a variety of alcoholism and drug abuse treatment programs; accompanied by a core series of lectures and discussions. For medical students only. Prerequisite: PBSCI 664, PBSCI 665, PBSCI 666, PBSCI 667, or PBSCI 668.
CONJ 681 P-Chronic Care/Palliative Care - Children's (8) Exposure to palliative care. Students are assigned to a preceptor and clinical site to concentrate their clinical activities. Includes didactic orientation on the first day and patient case presentations during didactic on the last day.

CONJ 682 P-Chronic Care/Palliative Care - HMC (8) Exposure to palliative care. Students are assigned to a preceptor and clinical site to concentrate their clinical activities. Includes didactic orientation on the first day and patient case presentations during didactic on the last day.

CONJ 683 P-Chronic Care/Palliative Care - UWMC PC Consult (8) Exposure to palliative care. Students are assigned to a preceptor and clinical site to concentrate their clinical activities. Includes didactic orientation on the first day and patient case presentations during didactic on the last day.
CONJ 684 P-Chronic Care/Palliative Care - Multicare Hospice (8) Exposure to palliative care. Students are assigned to a preceptor and clinical site to concentrate their clinical activities. Includes didactic orientation on the first day and patient case presentations during didactic on the last day.
CONJ 685 P-Chronic Care/Palliative Care - Providence Everett (8) Exposure to rehabilitation, palliative care, and pain management. Students focus on one area and are assigned to a preceptor and clinical site to concentrate their clinical activities in that content area. Includes didactic orientation on the first day and patient case presentations during didactic on the last day.

CONJ 686 P-Chronic Care/Rehab - Children's (8) Exposure to rehabilitation. Students focus on one area and are assigned to a preceptor and clinical site to concentrate their clinical activities in that content area. Includes didactic orientation on the first day and patient case presentations during didactic on the last day.
CONJ 687 P-Chronic Care/Rehab - HMC (8) Exposure to rehabilitation. Students focus on one area and are assigned to a preceptor and clinical site to concentrate their clinical activities in that content area. Includes didactic orientation on the first day and patient case presentations during didactic on the last day.

CONJ 688 P-Chronic Care/Rehab - VA RMS (8) Exposure to rehabilitation. Students focus on one area and are assigned to a preceptor and clinical site to concentrate their clinical activities in that content area. Includes didactic orientation on the first day and patient case presentations during didactic on the last day.
CONJ 689 P-Chronic Care/Rehab - VA SCI (8) Exposure to rehabilitation. Students focus on one area and are assigned to a preceptor and clinical site to concentrate their clinical activities in that content area. Includes didactic orientation on the first day and patient case presentations during didactic on the last day.
CONJ 690 P-Chronic Care/Rehab - UWMC (8) Exposure to rehabilitation. Students are assigned to a precep-
tor and clinical site to concentrate their clinical activities. Includes didactic orientation on the first day and patient case presentations during didactic on the last day.
CONJ 691 P-Clerkship in Chronic Care - Boise PMR (8) Required clerkship for fourth year medical students, concentrating on geriatrics, palliative care, and rehab medicine using lectures, group discussions, standardized patients, and case scenarios.

CONJ 692 P-Chronic Care Clerkship - Spokane, St. Luke's Rehab (8) Exposure to geriatrics. Students focus on one area and are assigned to a preceptor and clinical site to concentrate their clinical activities in that content area. Includes didactic orientation on the first day and patient case presentations during didactic on the last day.

CONJ 693 P-Chronic Care/Geriatrics - HMC (8) Exposure to geriatrics. Students focus on one area and are assigned to a preceptor and clinical site to concentrate their clinical activities in that content area. Includes didactic orientation on the first day and patient case presentations during didactic on the last day.

CONJ 694 P-Chronic Care/Geriatrics - VA (8) Exposure to geriatrics. Students focus on one area and are assigned to a preceptor and clinical site to concentrate their clinical activities in that content area. Includes didactic orientation on the first day and patient case presentations during didactic on the last day.
CONJ 695 P-Chronic Care/Pain Management - Roosevelt
(8) Exposure to pain management. Students focus on one area and are assigned to a preceptor and clinical site to concentrate their clinical activities in that content area. Includes didactic orientation on the first day and patient case presentations during didactic on the last day.
CONJ 696 P-WRITE Clinical Electives (*, max. 24) Clinical electives for WRITE program. Offered: AWSpS.
CONJ 697 International Exchange Clerkship (12) Hunt Participation in healthcare delivery systems in developing countries; observation of relationship of host country's traditional medicine with Western medicine. Students live in cross-cultural setting to better understand their own assumptions about healthcare and life styles. Offered: Sp.
CONJ 698 P-Foreign Medical Student Clerkship (*, max. 24) A limited number of students from foreign medical schools are accepted for individually designed clinical clerkships at available sites after all UWMC students are accommodated. Prerequisite: permission of Associate Dean for Academic Affairs, School of Medicine.
CONJ 699 P-Clinical Clerkships (*, max. 32)

## Elective Clerkships

MEDECK 601 P-Ward Medicine Subinternship - Seattle (*, max. 24) Students act in the capacity of interns on the medical wards under supervision of house staff and visiting physicians. They attend all regular medicine rounds and conferences as their schedules permit. Prerequisite: MEDRCK 601. (Four or six weeks.)
MEDECK 602 P-Primary Care - Seattle (8/12) Six-week, full-time ambulatory care block in primary care internal medicine. Students participate in several clinics at University of Washington Medical Center following a panel of patients in medicine, rheumatology, and virology clinics. Prerequisite: MEDRCK 601 and permission of instructor.

MEDECK 603 P-Clinical Cardiology and Electrocardiography - Seattle (8) Clerkship in clinical cardiology-combined inpatient-outpatient assignments, ECG interpretation. Prerequisite: MEDRCK 601. (Four weeks.)

MEDECK 604 P-Clinical Dermatology - Seattle (8) Participation in dermatology clinics and inpatient consultations. Journal club and clinical conferences each week with entire staff. A continuing series of teaching seminars and weekly dermatopathology conferences. Prerequisite: MEDRCK 601. (Four weeks.)
MEDECK 605 P-Clinical Endocrinology and Metabolism Seattle (*, max. 12) (Seattle-based program); (Madigan) Clerkship in clinical endocrinology and metabolism combined inpatient and outpatient assignments at selected hospitals. Prerequisite: MEDRCK 601.

MEDECK 606 P-Clinical Gastroenterology - Seattle (8) Participation in consulting ward rounds, procedures, conferences, and selected clinics with full-time divisional staff at University and Veterans' Administration hospitals, and at Pacific and Harborview medical centers, plus directed tutorial work. Prerequisite: MEDRCK 601. (Four weeks, full-time.)

MEDECK 607 P-Clinical Hematology/Oncology - Seattle (8) Outpatient and inpatient experience with hematologic/oncologic disorders. The elective includes teaching rounds, conferences, and evaluation of laboratory work. Prerequisite: MEDRCK 601. (Four weeks.)
MEDECK 608 P-Clinical Infectious Diseases - Seattle (8) Students participate in the consulting service throughout the hospital, attend daily plate rounds, conferences, and seminars. Participate in consulting service throughout hospital to learn microbiological aspects of infectious diseases through the clinical laboratories. Prerequisite: MEDRCK 601. (Four weeks.)
MEDECK 609 P-Nephrology and Fluid Balance - Seattle (8) Students see clinical nephrologic problems under close supervision, participate in nephrology and transplant rounds, see consults with renal fellow and attending, and work up patients in renal clinics, participate in seminars with clerks from all three hospitals. Prerequisite: MEDRCK 601. (Four weeks.)

MEDECK 610 P-Clinical Respiratory Disease and Critical Care Medicine - Seattle (8) Training in respiratory disease diagnosis and pulmonary therapy, with special emphasis on cardiopulmonary function testing and interpretation. Inpatient and outpatient teaching rounds, conferences, and basic science integration. Prerequisite: MEDECK 610. (Four weeks.)

MEDECK 612 P-Clinical HIV Care - Seattle (8) Full-time outpatient and inpatient elective in HIV care for senior medical students. Students see patients for routine care and acute medical problems that do not require hospitalization, as well as provide inpatient consults. Prerequisite: MEDRCK 601.

MEDECK 613 P-Clinical Nutrition - Seattle (8) Instruction in nutritional assessment and care of both inpatients and outpatients. Students work with preceptors at a variety of hospital and clinic teaching sites, attend nutrition-related seminars, and practice interview skills on standardized patients. Prerequisite: HUBIO 568; MEDRCK 601.

MEDECK 614 P-Clinical Oncology - Seattle (8) Students participate in the oncology service in the inpatient oncology consult service at UWMC hospital, obtain ing exposure to the management of patients with cancer, oncological complications and emergencies, oncological drug mechanisms of action, side effects, and interactions. Obtain basic understanding of principles of oncology care. Prerequisite: MEDRCK 601. (Four weeks.)
MEDECK 615 P-Rheumatology - Seattle (8) Full-time inpatient-outpatient clerkship in rheumatology. Clinical experience provided in diagnosis and treatment of rheumatic diseases, utilizing outpatient clinics and hospitalized patients at the University of Wash-
ington Medical Center, Harborview Medical Center, or VAMC. Emphasis on concepts in pathophysiology, diagnosis, and treatment of these diseases. In addition to patient contact, reading, seminars, and preceptorial sessions are the methods of instruction. Prerequisite: MEDRCK 601.
MEDECK 616 P-Advanced Dermatology Clinic - Seattle (8) Advanced clinical dermatology clerkship at various sites including HMC, UWMC, VA Seattle, and Children's Hospital. Students choose from four tracks within the rotation: dermatopathology, pediatric dermatology, dermatologic surgery, and advanced medical dermatology. Prerequisite: 3rd Year Internal Medicine clerkship; MEDECK 604. Offered: AWSpS
MEDECK 617 P-Harborview Evening Clinic - Seattle (2) A longitudinal elective for senior medical students who assume primary responsibility for a panel of medical patients in an outpatient clinic. Direct care of patients is supplemented by didactic sessions dealing with issues in ambulatory care. Students are strongly encouraged to participate for four quarters. Prerequisite: MEDRCK 601 and permission of instructor.

MEDECK 618 P-Medical Consultation - Seattle (8) Full-time outpatient and inpatient elective in perioperative medical consultation for senior medical students. Students see patients in the medical consultation clinic, then follow them daily when they come in for surgery. Prerequisite: MEDRCK 601.

MEDECK 619 P-Management of Sexually Transmitted Diseases - Seattle (2) Instruction and clinical experience in diagnosis, treatment, management, and patient counseling of sexually transmitted diseases. Instruction in genitourinary physical examination skills; relevant laboratory techniques and management of patients with STDs. Prior to the elective, each student must review a packet of didactic materials. Prerequisite: MEDRCK 601, SURG 665, and OB GYN 665.

MEDECK 620 P-Critical Care Medicine Subinternship
Seattle (8) Participating students function at the sub-intern level on the MICU service at Harborview Medical Center and UWMC. Through direct patient care responsibilities, students learn about various forms of critical care illness and gain experience in the application of mechanical ventilation, arterial blood gas analysis, and palliative care medicine. Offered: AWSp.
MEDECK 626 P-Clinical Cardiology and Electrocardiography - Tacoma (8) Clerkship in clinical cardiology-combined inpatient-outpatient assignments, ECG interpretation. Prerequisite: MEDRCK 601. (Four weeks.)

MEDECK 627 P-Clinical Endocrinology and Metabolism Tacoma (*, max. 12) (Seattle-based program); (Madigan) Clerkship in clinical endocrinology and metabolism. Combined inpatient and outpatient assignments at selected hospitals. Prerequisite: MERCK 601.

MEDECK 628 P-Clinical Infectious Diseases - Tacoma (8) Students participate in the consulting service throughout the hospital, attend daily plate rounds, conferences, and seminars. Participate in consulting service throughout hospital to learn microbiological aspects of infectious diseases through the clinical laboratories. Prerequisite: MEDRCK 601. (Four weeks.)

MEDECK 629 P-Clinical Respiratory Disease and Critical Care - Tacoma (8) Training in respiratory disease diagnosis and pulmonary therapy, with special emphasis on cardiopulmonary function testing and interpretation. Inpatient and outpatient teaching rounds, conferences, and basic science integration. Prerequisite: MEDRCK 601. (Four weeks.)
MEDECK 630 P-Ward Medicine Subinternship - Tacoma (*, max. 24) Students act in the capacity of interns on the medical wards under supervision of house staff and
visiting physicians. They attend all regular medicine rounds and conferences as their schedules permit. Prerequisite: MEDRCK 601. (Four or six weeks.)

MEDECK 633 P-Clinical Cardiology and Electrocardiography - Washington (8) Clerkship in clinical cardiologycombined inpatient-outpatient assignments, ECG interpretation. Prerequisite: MEDRCK 601. (Four weeks.)

MEDECK 634 P-Clinical Dermatology - Washington (8) Participation in dermatology clinics and inpatient consultations. Journal club and clinical conferences each week with entire staff. A continuing series of teaching seminars and weekly dermatopathology conferences. Prerequisite: MEDRCK 601. (Four weeks.)
MEDECK 636 P-Clinical Gastroenterology - Washington (8) (Sacred Heart Spokane) Participation in consulting ward rounds, procedures, conferences, and selected clinics with full-time divisional staff at University and Veterans' Administration hospitals, and at Pacific and Harborview medical centers, plus directed tutorial work. Prerequisite: MEDRCK 601. (Four weeks, full-time.)

MEDECK 638 P-Clinical Infectious Diseases - Washington (8) Students participate in the consulting service throughout the hospital, attend daily plate rounds, conferences, and seminars. Participate in consulting service throughout hospital to learn microbiological aspects of infectious diseases through the clinical laboratories. Prerequisite: MEDRCK 601. (Four weeks.)
MEDECK 639 P-Nephrology and Fluid Balance - Washington (8) Students see clinical nephrologic problems under close supervision, participate in nephrology and transplant rounds, see consults with renal fellow and attending, and work up patients in renal clinics, participate in seminars with clerks from all three hospitals. Prerequisite: MEDRCK 601. (Four weeks.)

MEDECK 640 Critical Care Medicine Subinternship Washington (8) Participating students function at the sub-intern level on the MICU. Through direct patient care responsibilities, students learn about various forms of critical care illness and gain experience in the application of mechanical ventilation, arterial blood gas analysis, and palliative care medicine. Offered: AWSp.
MEDECK 644 P-Clinical Dermatology - Wyoming (8) Participation in dermatology clinics and inpatient consultations. Journal club and clinical conferences each week with entire staff. A continuing series of teaching seminars and weekly dermatopathology conferences. Prerequisite: MEDRCK 601. (Four weeks.)
MEDECK 651 P-Ward Medicine Subinternship - Alaska (*, max. 24) Students act in the capacity of interns on the medical wards under supervision of house staff and visiting physicians. They attend all regular medicine rounds and conferences as their schedules permit. Prerequisite: MEDRCK 601. (Four or six weeks.)
MEDECK 653 P-Clinical Cardiology and Electrocardiography - Alaska (8) Clerkship in clinical cardiology. Combined inpatient-outpatient assignments, ECG interpretation. Prerequisite: MEDRCK 601. (Four weeks.)

MEDECK 654 P-Clinical Dermatology - Alaska (8) Participation in dermatology clinics and inpatient consultations. Journal club and clinical conferences each week with entire staff. A continuing series of teaching seminars and weekly dermatopathology conferences. Prerequisite: MEDRCK 601. (Four weeks.)
MEDECK 664 P-Clinical Dermatology - Montana (8) Participation in dermatology clinics and inpatient consultations. Journal club and clinical conferences each week with entire staff. A continuing series of teach-
ing seminars and weekly dermatopathology conferences. Prerequisite: MEDRCK 601. (Four weeks.)
MEDECK 665 P-Nephrology and Fluid Balance - Montana (8)

MEDECK 671 P-Ward Medicine Subinternship - Idaho (*, max. 24) Students act in the capacity of interns on the medical wards under supervision of house staff and visiting physicians. They attend all regular medicine rounds and conferences as their schedules permit. Prerequisite: MEDRCK 601. (Four or six weeks.)
MEDECK 673 P-Clinical Cardiology and Electrocardiog. raphy - Idaho (8) Clerkship in clinical cardiology-combined inpatient-outpatient assignments, ECG interpretation. Prerequisite: MEDRCK 01. (Four weeks.)
MEDECK 674 P-Clinical Dermatology - Idaho (8) Partici pation in dermatology clinics and inpatient consultations. Journal club and clinical conferences each week with entire staff. A continuing series of teaching seminars and weekly dermatopathology conferences. Prerequisite: MEDRCK 601. (Four weeks.)

MEDECK 677 P-Clinical Hematology/Oncology - Idaho (8) Outpatient and inpatient experience with hematologic/oncologic disorders. The elective includes teaching rounds, conferences, and evaluation of laboratory work. Prerequisite: MEDRCK 601. (Four weeks.)

MEDECK 678 P-Clinical Infectious Diseases - Idaho (8) Students participate in the consulting service throughout the hospital, attend daily plate rounds, conferences, and seminars. Participate in consulting service throughout hospital to learn microbiological aspects of infectious diseases through the clinical laboratories. Prerequisite: MEDRCK 601. (Four weeks.)
MEDECK 679 P-Nephrology and Fluid Balance - Idaho (8) Students see clinical nephrologic problems under close supervision, participate in nephrology and transplant rounds, see consults with renal fellow and attending, and work up patients in renal clinics, participate in seminars with clerks from all three hospitals. Prerequisite: MEDRCK 601. (Four weeks.)

MEDECK 680 P-Clinical Respiratory Disease and Critical Care Medicine - Idaho (8) Training in respiratory disease diagnosis and pulmonary therapy, with special emphasis on cardiopulmonary function testing and interpretation. Inpatient and outpatient teaching rounds, conferences, and basic science integration. Prerequisite: MEDECK 610. (Four weeks.)
MEDECK 681 P-Clinical Aspects of Aging - Idaho (8) Work with elderly patients as subintern with senior care program. Inpatient and ambulatory setting in nursing homes and patients' homes. Interdisciplinary approach. Prerequisite: MEDRCK 601.
MEDECK 690 P-General Internal Medicine - Shiprock (8) Clerkship located at the Northern Navajo Medical Center in Shiprock, New Mexico. Students are involved in all aspects of patient care, including home visits, ambulatory care, and hospital stays. Prereq uisite: MEDRCK required clerkship. Offered: AWSpS.
MEDECK 691 P-Medicine Special Electives - Seattle (*, max. 24) By special arrangement for qualified students, special clerkships or externships. Prerequisite: permission of department.

MEDECK 692 P-Medicine Special Electives - Washington (*, max. 24) By special arrangement for qualified students, special clerkships or externships. Prerequisite: permission of department.
MEDECK 693 P-Medicine Special Electives - Wyoming (*, max. 24) By special arrangement for qualified students, special clerkships or externships. Prerequisite: permission of department.

MEDECK 694 P-Medicine Special Electives - Alaska (*, max. 24) By special arrangement for qualified stu-
dents, special clerkships or externships. Prerequisite: permission of department.
MEDECK 695 P-Medicine Special Electives - Montana (*, max. 24) By special arrangement for qualified students, special clerkships or externships. Prerequisite: permission of department.

MEDECK 696 P-Medicine Special Electives - Idaho (*, max. 24) By special arrangement for qualified students, special clerkships or externships. Prerequisite: permission of department.
MEDECK 697 P-Medicine Special Electives - Away ( ${ }^{*}$, max. 24) Special clerkship, externship, or research opportunities at times made available at institutions other than University of Washington. Faculty advise students of opportunities. Students obtain from Dean's office a special assignment form at least three months before preregistration. Prerequisite: permission of department. (Two, four, six, or twelve weeks.)

## Emergency Medicine

MED EM 501 P-Emergency Medicine Preceptorship (1) Provides opportunities for first- and second-year medical students to gain experience working in an emergency setting. Students shadow faculty in emergency medicine during their shifts. Includes learning about common conditions seen in the emergency department and the opportunity to work on history taking and physical exam skills. Credit/no-credit only. Prerequisite: permission of instructor.
MED EM 550 P-Introduction to Emergency Medicine (1) Presentation of common medical and surgical emergencies and their urgent management, especially within the framework of rapid patient assessment and stabilization. Lecture topics include chest pain and myocardial infarction, basic arrhythmia management, and burn and wound care.

MED EM 605 P-Emergency Medicine - UWMC (*, max. 16) Clerkship emphasizes the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: MED; OB/GYN; PEDS; PBSCI; and SURG required clerkships.
MED EM 606 P-Emergency Medicine - UWMC (*, max. 16) Clerkship emphasizes the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: MED; OB/GYN; PBSCl; and SURG required clerkships.
MED EM 607 P-Emergency Medicine - Madigan ( ${ }^{*}$, max. 16) Clerkship emphasizes the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: FAMED; MED; OB/GYN; PEDS; PBSCI; and SURG required clerkships.
MED EM 625 P-Emergency Medicine - Spokane (*, max. 16) Clerkship emphasizes the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: FAMED; MED; OB/GYN; PEDS; PBSCI; and SURG required clerkships.
MED EM 645 P-Emergency Medicine - Boise, St. Lukes (*, max. 16) Clerkship emphasizes the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: FAMED; MED; OB/GYN; PEDS; PBSCI; and SURG required clerkships.
MED EM 646 P-Emergency Medicine - Boise, Saint Alphonsus (*, max. 16) Clerkship emphasizes the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: FAMED; MED; OB/GYN; PEDS; PBSCI; and SURG required clerkships.
MED EM 657 P-Emergency Medicine - Fairbanks (*, max. 16) Clerkship emphasizes the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: FAMED; MED; OB/GYN; PEDS; PBSCI; and SURG required clerkships.

MED EM 668 P-Emergency Medicine - Casper ( ${ }^{*}$, max. 16) Clerkship emphasizes the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: FAMED; MED; OB/GYN; PEDS; PBSCI; and SURG required clerkships.
MED EM 680 P-Emergency Medicine Subinternship - Madigan (8) Elective clerkship emphasizing the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: All 3rd year required clerkships + required 4th year EM clerkship for UW students only. Prerequisite: Permission of department.
MED EM 681 P-Emergency Medicine Subinternship - HMC (8) Elective clerkship emphasizing the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: All 3rd year required clerkships + required 4th year EM clerkship for UW students only. Prerequisite: Permission of department.
MED EM 682 P-Emergency Medicine Subinternship UWMC (8) Elective clerkship emphasizing the management of ambulatory emergencies, severely injured, and critically ill patients. Prerequisite: All 3rd year required clerkships + required 4th year EM clerkship for UW students only. Prerequisite: Permission of department.
MED EM 697 P-Emergency Medicine Special Electives (*, max. 24) By specific arrangement, for qualified students, special clerkship, externship, or research opportunities at times made available at institutions other than University of Washington. Faculty advise students of opportunities. Students obtain from Dean's office a special assignment form at least one month before preregistration. Prerequisite: required EM clerkship; permission of instructor at away site and department. (Two, four, six, or twelve weeks.) Offered: AWSpS.
MED EM 699 P-WWAMI Emergency Medicine Special Elective ( ${ }^{*}$, max. 24) By special arrangement for qualified students, special clerkships or externships may be available at institutions other than the University of Washington, within the WWAMI region. Prerequisite: permission of department and away site.

## Required Clerkships

MEDRCK 601 P-Clinical Clerkship (*, max. 24) Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (Twelve weeks, full-time.)
MEDRCK 612 P-Clinical Clerkship - Seattle-Madigan (*, max. 24) Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (Twelve weeks, full-time.)
MEDRCK 614 P-Clinical Clerkship - Seattle-Montesano (*, max. 24) Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (Twelve weeks, full-time.)

MEDRCK 616 P-Clinical Clerkship Seattle-Olympia (*, max. 24) Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (Twelve weeks, full-time.)
MEDRCK 621 P-Clinical Clerkship - Spokane (*, max. 24) Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a fourweek outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (Twelve weeks, full-time.)
MEDRCK 624 P-Clinical Clerkship - Seattle-Wenatchee (*, max. 24) Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (Twelve weeks, full-time.)
MEDRCK 630 P-Write Medicine Clinical Clerkship (*, max. 24) Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a fourweek outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (Twelve weeks, full-time.)
MEDRCK 632 P-Clinical Clerkship - Seattle-Jackson (*, max. 24) Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (Twelve weeks, full-time.)
MEDRCK 634 P-Clinical Clerkship - Seattle-Sheridan (*, max. 24) Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (Twelve weeks, full-time.)
MEDRCK 636 P-Clinical Clerkship - Seattle-Douglas (*, max. 24) Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (Twelve weeks, full-time.)
MEDRCK 638 P-Clinical Clerkship - Seattle-Lander (*, max. 24) Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (Twelve weeks, full-time.)
MEDRCK 652 P-Clinical Clerkship - Seattle-Anchorage (*, max. 24) Third-year medical students assume in-
creasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (Twelve weeks, full-time.)

MEDRCK 654 P-Clinical Clerkship - Seattle-Soldotna (*, max. 24) Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (Twelve weeks, full-time.)
MEDRCK 672 P-Clinical Clerkship - Seattle-Billings (*, max. 24) Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (Twelve weeks, full-time.)
MEDRCK 673 P-Clinical Clerkship Seattle-Great Falls (*, max. 24) Paauw Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicans, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (Twelve weeks, full-time). Offered: AWSpS.
MEDRCK 674 P-Clinical Clerkship - Seattle-Dillon (*, max. 24) Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a fourweek outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (Twelve weeks, full-time.)

MEDRCK 676 P-Clinical Clerkship - Seattle-Missoula (*, max. 24) Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (Twelve weeks, full-time.)

MEDRCK 678 P-Clinical Clerkship - Seattle-Bozeman (*, max. 24) Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (Twelve weeks, full-time.)
MEDRCK 691 P-Clinical Clerkship - Boise (*, max. 24) Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a fourweek outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (Twelve weeks, full-time.)

## Microbiology

## K-335A Health Sciences

Microbiology is a natural science that deals with microorganisms such as bacteria, fungi, protozoa, algae, and viruses. It is concerned with the nature and properties of these organisms, their effects on humans and the environment, and how they can be exploited to provide useful products.

## UNDERGRADUATE PROGRAM

See the Microbiology entry in the School of Medicine section elsewhere in the General Catalog.

## GRADUATE PROGRAM

Graduate Program Coordinator
K335A Health Sciences, Box 357242
(206) 543-2572
advmicro@uw.edu

The Department of Microbiology offers a graduate program leading to the Doctor of Philosophy degree. Students interested in graduate work should obtain the necessary application forms from the department.

## Doctor of Philosophy

## Admission Requirements

Students can be admitted to the PhD program with a background in any biological science discipline. Selection is based on the evaluation of a student's undergraduate record for indications of the ability to excel in independent, creative research. The department strongly recommends that undergraduate preparation include courses in biochemistry, physics, general and organic chemistry, microbiology, molecular biology and cell biology. To be competitive with the applicant pool, prospective students are also strongly advised to seek opportunities to carry out undergraduate research.

## Required background courses (generally satisfied prior to entry into the graduate program):

1. A one-year course in biochemistry (equivalent to BIOC 440, BIOC 441, and BIOC 442)
2. A course in classical and molecular genetics (equivalent to GENOME 371 or GENOME 372)
3. A course in general microbiology (equivalent to MICROM 410)
4. A course in medical microbiology and basic immunology is recommended for those considering research in the area of medical microbiology or virology

## Degree Requirements

90 credits minimum, as follows:

1. Conjoint Courses ( 6 credits): 6 credits from the following conjoint courses: CONJ 524, CONJ 531, CONJ 532, CONJ 533, CONJ 534, CONJ 535, CONJ 537, CONJ 538, CONJ 539, CONJ 541, CONJ 543, CONJ 544, CONJ 545, CONJ 546, CONJ 547, CONJ 548, CONJ 549 ( 1.5 credits each). It is recommended that students take additional conjoint courses or choose one or more of the Genome Sciences modules: GENOME 551, GENOME 552, GENOME 553, GENOME 554, GENOME 555, GENOME 556, GENOME 559 ( 1.5 credits each).
2. Virology and Bacteriology Courses (6-7 credits): Three of the following courses; one virology and one bacteriology course must be among those selected: MCB 532 (3), MCB 542 (3), MICROM 441 (4), MICROM 450 (3), MICROM 510 (3), MICROM 530 (3), MICROM 553 (3)
3. Faculty Research Presentations for first-year students: MICROM 599 (2)
4. Lab Rotation: MICROM 500, minimum of three quarters
5. Journal Club: MICROM 522, continuous enrollment
6. Seminar: MICROM 520 seminar series or attendance at Fred Hutchinson seminars. Students at Fred Hutchinson are also encouraged to attend the Microbiology seminars. To be taken every quarter unless a conflict with teaching exists.
7. Research Discussion Groups: To be taken every quarter. Students should register for the appropriate course number for credit.
8. Additional requirements:
a. Teaching assistantship in at least two lab courses for undergraduates (usually satisfied in the first and/or second year).
b. Give at least two formal lectures in an undergraduate course (third or fourth year).
c. Be first author on multiple papers related to thesis research which are published or accepted for publication in refereed journals. Under some circumstances, one first-author publication would satisfy this requirement.
9. General examination, dissertation, final exam

## COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations.
MICROM 101 Microbes and Society (5) NW Intended for liberal arts majors and students not majoring in the biological sciences. Focuses on activities of bacteria, viruses, and other microorganisms, and their influence on humans. Microbe-related topics include disease, bioterrorism, food, biotechnology, and ecology. Examines the nature of scientific inquiry, along with major biological concepts. Offered: W.

MICROM 301 General Microbiology (3) NW Anderson, Mougous Acquaints students with microorganisms and their activities. Topics include microbial cell structure and function, metabolism, microbial genetics, and the role of microorganisms in disease, immunity, and other selected applied areas. Prerequisite: either CHEM 120, CHEM 140, CHEM 142, or CHEM 145; recommended: biology; organic chemistry. Offered: ASpS.
MICROM 302 General Microbiology Laboratory (2) NW Chandler, Gray Laboratory course primarily for students taking MICROM 301. Covers a variety of microbiological techniques, with experiments designed to illustrate major concepts of bacteriology, virology, and immunology. No auditors. Recommended: MICROM 301 which may be taken concurrently. Of fered: ASpS.

MICROM 402 Fundamentals of General Microbiology Laboratory (3) NW Fulton, Gray Isolation of a broad range of nonpathogenic bacteria from natural sources, using selective and enrichment techniques, with microscopic, biochemical, and molecular identification. Related exercises include genetics, physiology, quantitation, and growth energetics. Prerequisite: BIOL 200; recommended: MICROM 410 which may be taken concurrently. Offered: ASp.
MICROM 410 Fundamentals of General Microbiology I (3) NW Parsek Survey of the microbial world, metabolism, biosynthesis, regulation, growth, structure, and function. Required for students majoring in microbiology; recommended for students majoring in biology. Prerequisite: minimum grade of 2.3 in BIOL 200; either CHEM 223, CHEM 237, or CHEM 335. Offered: A.

MICROM 411 Bacterial Genetics (5) NW Gray, Traxler Molecular genetics: description of fundamental genetic processes such as mutation, repair, genetic exchange, recombination, and gene expression. Use of genetic strategies to analyze complex biological processes. Focuses on prokaryotic organisms. Prerequisite: BIOL 200; either CHEM 223, CHEM 237, or CHEM 335. Offered: W.

MICROM 412 Prokaryotic Diversity (3) NW Leigh Structure, biochemical properties, and genetics of the major groups of prokaryotes. Prerequisite: BIOL 200; recommended: either CHEM 223, CHEM 237, or CHEM 335; MICROM 410. Offered: Sp.
MICROM 413 Special Topics in Microbiology (1, max. 3) Examines current subjects in microbiology. Credit/ no-credit only.
MICROM 431 Prokaryotic Recombinant DNA Techniques (3) NW Chandler Laboratory course emphasizing concepts and techniques/methodologies in recombinant DNA research employing bacteria and their viruses. Topics and experiments/demonstrations include genomic and plasmid DNA isolation, restriction mapping, cloning, transposon mutagenesis, sequencing, and Western and Southern blotting. No auditors. Prerequisite: either BIOL 200 or MICROM 301. Offered: W.

MICROM 435 Microbial Ecology (3) NW Consideration of the various roles that microorganisms, particularly bacteria and cyanobacteria, play in environmental processes. The interrelationships among microorganisms and the effects of the physical, chemical, and biological properties of their environment are discussed and assessed. Prerequisite: BIOL 180. Offered: Sp , even years.
MICROM 442 Medical Bacteriology (3) NW Cookson, Fulton Medically important bacterial pathogens are discussed in terms of the clinical, therapeutic, and epidemiological aspects of diseases caused by them, molecular mechanisms of pathogenesis and their identification in the clinical laboratory. Laboratory course, MICROM 443 coordinates. Prerequisite: BIOL 200; recommended: MICROM 410; MICROM 441. Offered: W.

MICROM 443 Medical Bacteriology Laboratory (3) NW Anderson, Chandler, Fulton Required for medical technology students, microbiology majors; elective for medical students. Procedures for isolation and identification of pathogenic bacteria, testing their susceptibility to antibiotics. No auditors. Prerequisite: BIOL 200; recommended: MICROM 410. Offered: AW.

MICROM 444 Medical Mycology and Parasitology (4) NW Anderson, Hohl, Murphy Consideration of medically important fungi and parasites, with emphasis on their biology in relation to disease and its laboratory diagnosis. For medical technology students, microbiology majors, and medical students as an elective. Prerequisite: BIOL 200; recommended: immunology. Offered: Sp.
MICROM 445 Medical Virology (3) NW Lagunoff, Smith Introduces medical virology emphasizing basic understanding of the pathogenesis and replication of medically important viruses including the spread, diagnosis, epidemiology, treatment, and prevention of human viral diseases. Prerequisite: either BIOL 180 or BIOL 200; Sp.

MICROM 450 Molecular Biology of Viruses (3) NW Champoux Introduction to the molecular biology of viruses and virus-host relationships. Designed for advanced undergraduates and graduate students in the biological sciences. Coverage includes bacterial and animal viruses, with an emphasis on the molecular mechanisms of viral gene expression and regulation. Prerequisite: BIOL 200; recommended: either MI-

CROM 410, MICROM 411, GENOME 371, or GENOME 372. Offered: W.

MICROM 482 Peer Teaching Assistants in Microbiology (1-5, max. 10) Direct experience in teaching a microbiology laboratory class. Peer TA's attend concurrent accompanying lecture course, meet weekly to coordinate, give introductory lab remarks, supervise the execution of lab exercises, and assist in preparing/ grading of quizzes/exams. Training in teaching techniques, approaches. Student evaluation provided. Credit/no-credit only. Prerequisite: MICROM 402; MICROM 410. Offered: AWSpS.

MICROM 490 Aquatic Microbiology (3/5) NW Herwig Basic principles of aquatic microbiology and aquatic microbial ecology: role and identity of aquatic microorganisms; introduction to modern methodologies for research. Laboratory work with local freshwater and marine samples for those enrolled in the five-credit section. Recommended: 15 credits of biological science; 10 credits of chemistry. Offered: jointly with FISH 490.
MICROM 495 Honors Undergraduate Research (*-) Leigh Specific problems in microbiology or immunology. Offered: AWSpS.
MICROM 496 Undergraduate Library Research (2) An introduction to library research techniques and to microbiological literature. Staff assign a topic and supervise the project. Offered: AWSpS.

MICROM 499 Undergraduate Laboratory Research (*-) Leigh Specific problems in microbiology or immunology. Credit/no-credit only. Offered: AWSpS.
MICROM 500 Introduction to Research (*, max. 20) Introduction to research areas of the faculty and the techniques employed in their investigations. Credit/ no-credit only. Prerequisite: graduate standing in microbiology or permission of instructor. Offered: AWSpS.
MICROM 520 Seminar (1) Fang Credit/no-credit only. Offered: AWSp.
MICROM 522 Current Research in Microbiology (1) Harwood, Parsek, Traxler Weekly student and faculty seminar presentations based on the current literature. Credit/no-credit only. Prerequisite: graduate standing in microbiology. Offered: AWSp.
MICROM 526 Research of Cell Surface Problems (1) Traxler Weekly research seminar and discussion of scientific literature pertaining to the process of membrane protein biogenesis. Credit/no-credit only. Prerequisite: permission of instructor.
MICROM 529 Mechanisms of Bacterial Pathogenesis (1) Fang Student and faculty seminar presentations based on current research pertaining to mechanisms of bacterial pathogenesis at the molecular and cellular levels. Credit/no-credit only. Prerequisite: graduate standing in microbiology. Offered: AWSp.
MICROM 530 Evolution of Prokaryotic Diversity (3) Leigh Evolution, diversity, and genomics of prokaryotic microorganisms. Lectures, discussions, and reading of current literature. Open to graduate students in the biological sciences and advanced undergraduates with permission of instructor. Offered: W, even years.

MICROM 531 Prokaryotic Diversity and Evolution Laboratory (2) Leigh Enrichment, isolation, and molecular phylogenetic characterization of selected prokaryotic organisms. Prerequisite: permission of instructor. Offered: W, even years.
MICROM 532 Methanogensis Research Meeting (1, max. 15) Leigh Weekly seminar concerning research topics in the genetics and biochemistry of selected bacteria. Credit/no-credit only. Prerequisite: MICROM 410, permission of instructor. Offered: AWSpS.

MICROM 533 Herpesvirus Research Meeting (1) Lagunoff Weekly research seminar and discussion of scientific literature pertaining to the study of molecular virology of Kaposi's Sarcoma-associated herpesvirus. Credit/no-credit only. Prerequisite: permission of instructor. Offered: AWSpS.
MICROM 534 Research Seminar in Salmonella Pathogenesis (1) Fang Provides a formal group setting for discussion and evaluation of a student's research progress. Credit/no-credit only. Offered: AWSpS.

MICROM 540 Virology (3) Katze Introduces new approaches and technologies being used in modern virology laboratories to provide a better understanding of the fields of virology and virus-host interactions. Covers topics in bio-defense, viral genomics and proteomics, and systems biology as it pertains to virus/ host infection. Prerequisite: permission of instructor. Offered: W, even years.
MICROM 553 Molecular Mechanisms of Bacterial Pathogenesis (3) Ramakrishnan, Salama Mechanisms of bacterial pathogenesis explored at the molecular, genetic, and cellular levels through selected models as presented in the current scientific literature. Prerequisite: MICROM 411 or equivalent. Offered: A, odd years.

MICROM 554 Seminar in Molecular and Medical Microbiology (1, max. 15) Cookson Weekly one-hour seminar in which recent advances in molecular biology of microbial pathogenesis or the current research of the participants is presented and discussed critically. Credit/no-credit only. Prerequisite: permission of instructor. Offered: AWSp.
MICROM 555 Advanced Clinical Microbiology (2.5) ButlerWu Attendance at daily plate rounds of the Division of Clinical Microbiology. Designed to increase understanding of clinical microbiological work and its application to the care of the patient. Credit/no-credit only. Prerequisite: MICROM 443 and permission of instructor. Offered: AWSp.
MICROM 560 Research and Journal Club in Retrovirology (1) Linial Weekly research seminar and discussion of literature in areas of retroviral replication and transformation. Prerequisite: graduate standing or permission of instructor. Offered: AWSpS.
MICROM 562 Oncogene and Retrovirus Research Seminar (1) Linial, Overbaugh Weekly discussions of ongoing research related to retroviral replication, retroviral oncogeneses and pathology. Prerequisite: graduate standing or permission of instructor. Offered: AWSpS.
MICROM 563 Research Seminar in Mycobacterial Pathogenesis (1) Ramakrishnan
MICROM 585 Research in Cell and Molecular Biology (1, max. 15) Champoux Weekly research seminar. Credit/ no-credit only. Prerequisite: permission of instructor. Offered: AWSpS.

MICROM 588 Research in Applied Microbiology (1) Lidstrom Weekly research seminar and discussion of scientific literature pertaining to applied microbiology. Credit/no-credit only. Prerequisite: permission of instructor. Offered: jointly with CHEM E 588; AWSpS.

MICROM 599 Research Presentations (2) Current research review. Credit/no-credit only.
MICROM 600 Independent Study or Research (*) Offered: AWSpS.
MICROM 700 Master's Thesis (*)
MICROM 800 Doctoral Dissertation (*) Offered: AWSpS.

## Neurological Surgery

325 9th Avenue, Harborview Medical Center
askuwns@uw.edu

The Department of Neurological Surgery is dedicated to teaching and research in the entire spectrum of diseases of the central and peripheral nervous system. Instruction in this area is provided for medical students and postgraduate physicians.

The department's medical-student instruction includes participation in the human-biology curriculum as well as in elective basic-science and clinical experiences. These are available at Harborview Medical Center, University of Washington Medical Center, Veterans Affairs Puget Sound Health Care Center, and Seattle Children's. The department also has several course offerings correlating research and clinical problems of the nervous system, including the research seminars in neuro-oncology, molecular imaging, stem cell biology, and clinical and basic-science correlates of the epilepsies.
Selected medical students also may elect research experience within the Department of Neurological Surgery. The department research facilities are housed in the Medical Research Tower of the University of Washington Medical Center, at Harborview Research and Training Building, and at Veterans Affairs Puget Sound Health Care System. Investigations are under way at these institutions in many areas of molecular biology, stem cell biology, neurophysiology, brain function and epilepsy research, neuroanatomy, nanotechnology, molecular imaging, behavioral research, outcomes research (cranial and spine), trauma research, and neuro-oncology.
In addition to undergraduate instruction, a fully certified residency program in neurological surgery is available for selected postgraduate physicians. The eight-year program emphasizes preparation for a career in academic neurosurgery.

## COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations.
NEUR S 498 Undergraduate Thesis (*) Bobola, D' Ambrosio, Ellenbogen, Horner, Moroud, Morrison, Rostomily, Silber Offered: AWSpS.
NEUR S 499 Undergraduate Research (*) Bobola, D' Ambrosio, Ellenbogen, Horner, Moroud, Morrison, Ojemann, Rostomily, Silber Investigation of special problems as an intimate member of the research team in the neurological surgery laboratories. Research to lead to a thesis, if desired. List of projects available on request. Prerequisite: permission of instructor. Offered: AWSpS.

NEUR S 505 P-Preceptorship in Academic Neurosurgery (1) Ellenbogen, Kliot, J. Ojemann, Rostomily, Sekar, Silbergeld Opportunity for first- and second-year medical students to observe the research, teaching, and pa-tient-care activities of academic neurosurgery. Prerequisite: permission of instructor. Offered: AWSpS.

NEUR S 542 Clinical and Basic Research Correlates of Epilepsy (2) Avellino, G. Ojemann, J. Ojemann, Silbergeld Clinical symptoms and treatment of epilepsy; related basic research in neuroanatomy, neurophysiology, neuropsychology, and neuropharmacology of epilepsy. Prerequisite: HUBIO 532 for medical students; permission of instructor for others.

NEUR S 680 P-Neurological Surgery Clerkship (*, max. 8) Ellenbogen Student serves clinical clerkship as an intimate member of the staff, participating in inpatient and outpatient care, both preoperative and postoperative, involving neurological surgery patients. University of Washington Medical Center or a University-affiliated hospital may be selected, subject to approval
of the department. (Four weeks). Prerequisite: HUBIO 563. Offered: AWSpS.

NEUR S 697 P-Neurological Surgery Special Electives (*, max. 24) Ellenbogen By specific arrangement, for qualified students, special clerkship, externship, or research opportunities made available at institutions other than the University of Washington. Prospective students obtain from the dean's office a special assignment form at least one month before preregistration. Prerequisite: permission of instructor. Offered: AWSpS.
NEUR S 699 P-WWAMI Neurological Surgery Special Electives (*, max. 24) Ellenbogen By special arrangement for qualified students, special clerkships or externships may be available at institutions other than the University of Washington located within the WWAMI region. Prerequisite: permission of department.

## Neurology

RR650 University of Washington Medical Center neurolog@uw.edu

Neurology, previously a division of the Department of Medicine, became an independent department at the University of Washington School of Medicine in autumn of 1995. The four-year residency program (including an internship) offers superb training in all facets of neurology in a setting of great institutional strength in fundamental neuroscience research. In addition, the Department of Neurology offers exceptional training programs in the Divisions of Neurogenetics and Pediatric Neurology and in the Epilepsy Center. A clinical-clerkship program provides basic training in neurology patient care. The Neurology Department is active in teaching, research, and patient care at the University of Washington Medical Center, Seattle Veterans Affairs Medical Center, Harborview Medical Center, Seattle Children's Hospital, and the Fred Hutchinson Cancer Research Center. Medical students, interns, neurology residents, and postdoctoral research fellows rotate through these various hospitals and participate in the learning experiences offered at each.

## COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations.
NEURL 495 Community Rehabilitation of the Neurologically Impaired: Internship (*, max. 5) Fraser, Clemmons Supervised work with a neurologically disabled vocational rehabilitation population within a multidisciplinary vocational rehabilitation unit. Offered: AWSpS.

NEURL 499 Undergraduate Research (*, max. 25) Provides an opportunity to gain research experience and direct participation in clinical or basic science investigation in neurological topics. Offered: AWSpS.
NEURL 505 P-Preceptorship in Neurology (1) Kraus Provides an opportunity for first and second-year medical students to gain personal experience with neurology practice situations by being stationed with carefully selected clinical faculty members in their offices. Prerequisite: permission of instructor. Offered: Sp.
NEURL 536 Topics in Clinical Neurology (1) Spain Lectures on epilepsy, stroke, coma, drug overdose, dementia, headache, myelopathies, infectious disease. Offered: S.
NEURL 555 Frontiers in Neuroimmunology (1) Moeller Current concepts and developments in neuroimmunol-
ogy. Credit/no-credit only. Prerequisite: either NBIO 301 or IMMUN 441. Offered: AWSpS.
NEURL 559 Neurobiology of Disease (3) Garden, Moeller, Neumaier, Weiss Introduces medically important neurological and psychiatric diseases and experimental approaches to understanding the basis for diseases and their treatments. Covers stroke, epilespsy, autoimmune diseases of the CNS, neurodegenerative diseases, autism, psychosis, anxiety disorders, and mood disorders. Offered: jointly with NEUBEH 559/P BIO 559.
NEURL 633 P-Introduction to Neurology- Anchorage Alaska (8) Kraus Provides the medical student with a general understanding of basic clinical neurology. For third- or fourth-year students. Prerequisite: medicine, or family medicine, or surgery, or pediatrics. Offered: AWSpS.
NEURL 634 P-Introduction to Neurology - Anchorage (8) Provides the medical student with a general understanding of basic clinical neurology at Alaska Native Medical Center in Anchorage, Alaska. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.
NEURL 637 P-Introduction to Neurology-Missoula (8) Provides the medical student with a general understanding of basic clinical neurology at Montana Neurobehavioral Specialist in Missoula, MT. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.
NEURL 638 P-Introduction to Neurology - Great Falls (8) Provides the medical student with a general understanding of basic clinical neurology at Advanced Neurology Specialists in Great Falls, Montana. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.
NEURL 639 P-Introduction to Neurology - Neurology Associates, Billings (8) Provides the medical student with a general understanding of basic clinical neurology at Neurology Associates in Billings, Montana. Prereq uisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

NEURL 640 P-Introduction to Neurology - Billings Clinic (8) Provides the medical student with a general understanding of basic clinical neurology at Billings Clinic in Billings, Montana. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

NEURL 642 P-Introduction to Neurology- St. Lukes Boise (8) Kraus Provides the medical student with a general understanding of basic clinical neurology. For thirdor fourth-year students. Prerequisite: medicine, or family medicine, or surgery, or pediatrics. Offered: AWSpS.
NEURL 643 P-Introduction to Neurology - Dr. Lyons, Boise (8) Provides the medical student with a general understanding of basic clinical neurology at the office of Dr. George Lyons in Boise, Idaho. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.
NEURL 644 P-Introduction to Neurology - Dr. Vincent, Idaho Falls (8) Provides the medical student with a general understanding of basic clinical neurology at the office of Dr. Stephen Vincent in Idaho Falls, Idaho. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

NEURL 645 P-Introduction to Neurology - Dr. Garland, Idaho Falls (8) Provides the medical student with a general understanding of basic clinical neurology at the office of Dr. Erich Garland in Idaho Falls, Idaho. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

NEURL 647 P-Introduction to Neurology - Dr. Lindholm, Boise (8) Provides the medical student with a general understanding of basic clinical neurology at the office of Dr. Karin Lindholm in Boise, Idaho. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics
NEURL 648 P-Introduction to Neurology - Dr. Coats, Coeur d' Alene (8) Provides the medical student with a general understanding of basic clinical neurology at the office of Dr. Michael Coats in Coeur d' Alene, Idaho. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

NEURL 653 P-Introduction to Neurology- Spokane (8) Kraus Provides the medical student with a general understanding of basic clinical neurology. For thirdor fourth-year students. Prerequisite: medicine, or family medicine, or surgery, or pediatrics. Offered: AWSpS.

NEURL 654 P-Introduction to Neurology - Dr. Greeley, Spokane (8) Provides the medical student with a general understanding of basic clinical neurology at the office of Dr. David Greeley in Spokane, Washington. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.
NEURL 655 P-Introduction to Neurology - Dr. Clark, Spokane (8) Provides the medical student with a general understanding of basic clinical neurology at the office of Dr. J. Robert Clark in Spokane, Washington. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.
NEURL 656 P-Introduction to Neurology - Wenatchee (8) Provides the medical student with a general understanding of basic clinical neurology at Wenatchee Valley Medical Center in Wenatchee, Washington. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

NEURL 657 P-Introduction to Neurology - Dr. Sloop, Yakima (8) Provides the medical student with a general understanding of basic clinical neurology at the office of Dr. Richard Sloop in Yakima, Washington. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

NEURL 658 P-Introduction to Neurology - Olympia Neurology (8) Provides the medical student with a general understanding of basic clinical neurology at Olympia Neurology in Olympia, Washington. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.
NEURL 659 P-Introduction to Neurology - NW Neurology, Lakewoood (8) Provides the medical student with a general understanding of basic clinical neurology at Northwest Neurology, a Franciscan Medical Group clinic, in Lakewood, Washington. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.
NEURL 660 P-Introduction to Neurology - Madigan (8) Provides the medical student with a general understanding of basic clinical neurology at Madigan Army Medical Center in Tacoma, Washington. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.
NEURL 661 P-Introduction to Neurology - Neurology and Neurosurgery Associates, Tacoma (8) Provides the medical student with a general understanding of basic clinical neurology at Neurology and Neurosurgery Associates in Tacoma and Puyallup, Washington. Students spend time at both clinics. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

NEURL 662 P-Introduction to Neurology - Group Health, Tacoma (8) Provides the medical student with a general understanding of basic clinical neurology at Group Health Tacoma Medical Center in Tacoma, Washing-
ton. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.
NEURL 663 P-Introduction to Neurology - Group Health, Eastside (8) Provides the medical student with a general understanding of basic clinical neurology at Group Health Eastside Specialty Center in Redmond, Washington. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.
NEURL 664 P-Introduction to Neurology - Burien (8) Provides the medical student with a general understanding of basic clinical neurology at South Seattle Neurology Associates in Burien. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

NEURL 665 P-Introduction to Neurology- UWMC (8) Kraus Provides the medical student with a general understanding of basic clinical neurology, at UWMC. For third- or fourth-year students. Prerequisite: medicine, or family medicine, or surgery, or pediatrics. Offered: AWSpS.
NEURL 666 P-Introduction to Neurology - HMC (8) Provides the medical student with a general understanding of basic clinical neurology at Harborview Medical Center in Seattle, Washington. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.
NEURL 667 P-Introduction to Neurology - VA (8) Provides the medical student with a general understanding of basic clinical neurology at the VA Medical Center in Seattle, Washington. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

NEURL 668 P-Introduction to Neurology - Northwest Hospital (8) Provides the medical student with a general understanding of basic clinical neurology at Northwest Hospital in Seattle, Washington. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.
NEURL 669 P-Introduction to Neurology - Virginia Mason (8) Provides the medical student with a general understanding of basic clinical neurology at Virginia Mason Medical Center in Seattle, Washington. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.
NEURL 670 P-Introduction to Neurology - Minor and James (8) Provides the medical student with a general understanding of basic clinical neurology at Minor and James Medical in Seattle, Washington. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.

NEURL 671 P-Introduction to Neurology - Swedish (8) Provides the medical student with a general understanding of basic clinical neurology at Swedish Medical Center I in Seattle, Washington. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.
NEURL 672 P-Introduction to Neurology - Group Health, Seattle (8) Provides the medical student with a general understanding of basic clinical neurology at Group Health Capitol Hill Campus in Seattle, Washington. Prerequisite: completion of one required clerkship in medicine, family medicine, surgery, or pediatrics.
NEURL 681 P-Seizure Clinic Clerkship (2.5) A. Wilensky Evaluation and follow-up of patients with seizure disorders. Limited contact with inpatients. Prerequisite: MED 665 and permission of instructor. Offered: AWSpS.
NEURL 685 Epilepsy and Clinical Electroencephalography
(*, max. 12) Miller Introduction into epilepsy and the use and interpretation of the electroencephalogram
and other clinical studies used to assess it, under the direct supervision of several of the faculty epileptologists and clinical neurophysiologists. Offered: AWSpS.
NEURL 686 P-Clinical Neurology (8) Swanson Clerkship including both inpatient and outpatient experiences and didactic sessions on neurological subjects. Student assigned to one of the affiliated hospitals and supervised by neurology residents and full-time staff Offered: AWSpS.

NEURL 687 P-Advanced Clinical Clerkship in Child Neurology (*, max. 8) Gospe Advanced course in neurology dealing with neurological disease in children. Supervision by child neurology residents and attending Prerequisite: NEURL 665, third- and fourth-year medical students. (Limit: one student.) Offered: AWSpS.

NEURL 697 P-Neurology Special Electives (*, max. 24) By special arrangement for qualified students, special clerkships or externships may be available at institutions outside the WWAMI region. Students obtain special assignment form from the dean's office at least one month prior to preregistration. Prerequisite. permission of department adviser. Offered: AWSpS.

NEURL 699 P-WWAMI Neurology Special Electives (*, max. 24) By special arrangement for qualified students, special clerkships or externships may be available at institutions other than the University of Washington located within the WWAMI region. Prerequisite. permission of adviser. Offered: AWSpS.

# Obstetrics and Gynecology 

BB667 Health Sciences Building

The Department of Obstetrics and Gynecology is involved with teaching, patient care, and research in the areas of normal and abnormal human reproduction: growth and development of the fetus, normal and complicated obstetrics, and surgical and medical diseases of the female reproduc tive system, including endocrinology, oncology, infectious disease, urogynecology, psychosocial problems, primary and preventive health care, and ethics.

## COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations.
OB GYN 498 Undergraduate Thesis (*) By arrangement. OB GYN 499 Undergraduate Research (*, max. 30)
OB GYN 505 P-OB GYN Preceptorship (1) Provides an opportunity for first- and second-year medical students to gain direct obstetrics and gynecology experience with a variety of clinical faculty members in diverse patient-care settings. Includes opportunities to observe labor and delivery, gynecologic surgery in the operating room, ambulatory obstetrics and gynecology in clinic, and family planning.
OB GYN 550 P-Voluntary Pregnancy Termination: An Overview of Medical and Social Issues (2) Prager A flexible curriculum which allows the medical student to observe in an abortion clinic, read articles and a textbook on abortion. Can be used by medical student as elective credit.

OB GYN 551 Perinatal Care Elective (1) Provide an introduction and overview of perinatal care for first- or second-year medical students with emphasis on late third trimester, labor and delivery, and postpartum. Opportunity to observe the patient-provider relation-
ship. Optional labor and delivery observation. Offered: AWSp.
OB GYN 579 P-Obstetric and Gynecologic Investigation (*) The investigation may cover any one of the following fields: normal and complicated pregnancy, hormone assays in obstetrics and endocrinology, obstetric and gynecologic oncology, genetics. By arrangement.
OB GYN 590 HIV and STIs in Women and Children (3) Hitti, John-Stewart Examines the emerging global public health crisis and the plight of women and children with HIV/STIs. Reviews targeted approaches pertaining to women and children and their vulnerability to HIV/STIs. Offered: jointly with EPI 507/G H 564; Sp.
OB GYN 631 P-Introduction to Obstetrics and Gynecology, NWHMC (*, max. 12) See OB GYN 665. Offered at Northwest Hospital, Seattle, WA. (Six weeks, fulltime). Prerequisite: HUBIO series, 3rd year medical students.
OB GYN 632 P-Introduction to Obstetrics and Gynecology - Bellingham (*, max. 12) See OB GYN 665.

OB GYN 639 P-Introduction to Obstetrics and Gynecology (*, max. 12) See OB GYN 665. Offered at St. Alphonsus, Boise, ID. (Six weeks, full-time). Prerequisite: HUBIO series, 3rd year medical students.
OB GYN 656 P-Introduction to Obstetrics and Gynecology - Wasilla (*, max. 12) Clerkship equivalent to OB GYN 665 offered in Wasilla, AK. Includes experience in several private physicians' offices. (Six weeks). Prerequisite: HUBIO series, third-year medical student status.
OB GYN 657 P-Introduction to Obstetrics and Gynecology - Lander (*, max. 12) Clerkship equivalent to OB GYN 665 offered in Lander, WY. Includes experience in several private physicians' offices. (Six weeks). Prerequisite: HUBIO series, third-year medical student status.
OB GYN 659 P-Introduction to Obstetrics and Gynecology -
Cody (*, max. 12) Clerkship equivalent to OB GYN 665 offered in Cody, WY. Includes experience in several private physicians' offices. (Six weeks). Prerequisite: HUBIO series, third-year medical student status.

OB GYN 660 P-Introduction to Obstetrics and Gynecology - Billings, St. Vincent (*, max. 12) Introductory clerkship providing comprehensive medical care and counseling to female patients. Includes management and delivery of obstetrical patients, diagnosis and management of gynecologic diseases, hospital rounds, outpatient clinics, seminars, tutorial, and community healthcare agencies for women. (Six weeks. Limit: one student). Prerequisite: HUBIO 565.
OB GYN 662 P-Introduction to Obstetrics and Gynecology - Libby (*, max. 12) Clerkship equivalent to OB GYN 665 offered in Libby, Montana. Includes experience in several private physicians' offices. Prerequisite: third- year medical student after completion of HUBIO series.

OB GYN 663 P-Introduction to Obstetrics and Gynecology Wenatchee (*, max. 12) Clerkship equivalent to OB GYN 665 offered in Wenatchee, WA. Includes experience in several private physicians' offices. (Six weeks). Prerequisite: HUBIO series, third-year medical student status.
OB GYN 664 P-Introduction to Obstetrics and Gynecology GH Tacoma (*, max. 12) Clerkship equivalent to OB GYN 665 offered in Tacoma, WA. Includes experience in several private physicians' offices. (six weeks, full time) Prerequisite: HUBIO series; third-year medical student status.
OB GYN 665 P-Introduction to Obstetrics and Gynecology - UH-HMC (*, max. 12) Introductory clerkship providing comprehensive medical care and counseling to female patients. Includes management and delivery
of obstetrical patients, diagnosis and management of gynecologic diseases, hospital rounds, outpatient clinics, seminars, tutorial, and community healthcare agencies for women. Rotations occur at UWMC and Harborview Medical Center. (Six weeks. Limit: four students). Prerequisite: HUBIO 565.
OB GYN 666 P-Introduction to Obstetrics and Gynecology Boise (*, max. 12) Clerkship equivalent to 665 offered in Boise, Idaho (WWAMI). Includes experience in several private physician offices. (Six weeks. Limit: one student. Not offered summer quarter). Prerequisite: HUBIO 565.
OB GYN 667 P-Introduction to Obstetrics and Gynecology - Madigan (*, max. 12) Clerkship equivalent to $O B$ GYN 665 offered at Madigan Army Medical Center, Tacoma. (Six weeks. Limit: three students). Prerequisite: HUBIO 565.
OB GYN 668 P-Introduction to Obstetrics and Gynecology - Spokane (12) Clerkship equivalent to OB GYN 665 offered in Spokane (WWAMI). Includes experience in several private physicians' offices. (Six weeks. Limit: two students). Prerequisite: HUBIO 565.
OB GYN 669 P-Introduction to Obstetrics and Gynecology - Swedish (12) Clerkship equivalent to OB GYN 665 offered at Swedish Hospital Medical Center. (Six weeks. Limit: one student). Prerequisite: HUBIO 565.
OB GYN 670 P-Introduction to Obstetrics and Gynecology - GH-Central (12) Clerkship equivalent to OB GYN 665 offered at the Central facility of Group Health Cooperative of Puget Sound in Seattle. Students spend time in delivery room, surgery, and clinic, and have a specific preceptor assigned. (Six weeks. Limit: two students). Prerequisite: HUBIO 565.
OB GYN 671 P-Introduction to Obstetrics and Gynecology - Anchorage (12) Clerkship equivalent to OB GYN 665 offered at Anchorage, Alaska (WWAMI). Includes experience in several private physicians' offices as well as Providence Hospital. (Six weeks. Limit: four students). Prerequisite: HUBIO 565.
OB GYN 672 P-Introduction to Obstetrics and Gynecology - GH-East (12) Clerkship equivalent to OB GYN 665 offered at the Eastside facility of Group Health Cooperative of Puget Sound in Redmond. Students spend time in delivery room, surgery, and clinic, and have a specific preceptor assigned. (Six weeks. Limit: one student). Prerequisite: HUBIO 565.
OB GYN 676 P-Introduction to Obstetrics and Gynecology - Missoula (12) Clerkship equivalent to OB GYN 665 offered in Missoula, Montana. Students spend time in delivery room, surgery, and clinic, and have a specific preceptor assigned. (Six weeks. Limit: one student). Prerequisite: HUBIO 565.

OB GYN 677 P-Introduction to Obstetrics and Gynecology - Rock Springs (12) Equivalent of OB GYN 665, offered in Rock Springs, Wyoming. Student rotates among outpatient clinic, labor and delivery, operating suites, and medical/surgical inpatient areas. (Limit: two students.) Offered: AS.
OB GYN 678 P-Introduction to Obstetrics and Gynecology - Billings (*, max. 12) Clerkship equivalent to OB GYN 665 offered in Spokane (WWAMI). Includes experience in several private physicians' offices. (Six weeks. Limit: one student). Prerequisite: HUBIO 565.
OB GYN 679 P-Introduction to Obstetrics and Gynecology - Cheyenne (*, max. 12) Clerkship equivalent to OB GYN 665 offered in Cheyenne, WY. Includes experience in several private physicians' offices. (Six weeks. Limit: one student). Prerequisite: HUBIO 565.
OB GYN 681 P-Gynecological Oncology Subspecialty (8) Experience in reproductive tract malignancy, chemotherapy, and radiation therapy. Student follows selected patients through primary surgery, recovery,
and initial adjuvant treatment, as well as continuing treatment in both clinic and inpatient settings. (Limit: two students each four weeks). Prerequisite: basic OB GYN clerkship.
OB GYN 682 P-Antenatal High-Risk Obstetrics (8) Four weeks on high-risk antenatal obstetrics ward and clinic. Students responsible for initial workups, daily laboratory evaluations, continuing care of high-risk antepartum patients. Weekly conference with obstetrics attending; presentation of one or more topics per rotation. Excellent coordination with resident and attending staff required to maintain patient-care continuity. (Limit: two students each four weeks).
OB GYN 683 P-Gynecological Oncology Subspecialty - Boise (8) Experience in reproductive tract malignancy, chemotherapy, and radiation therapy. Student follows selected patients through primary surgery, recovery, and initial adjuvant treatment, as well as continuing treatment in both clinic and inpatient settings. (Four weeks). Prerequisite: basic OB GYN clerkship.
OB GYN 685 P-Subspecialty Gynecology - UWMC (8) Explores specialty areas in gynecology including: urogynecology, family planning, adolescent gynecology, and reproductive endocrinology and infertility. Students see and evaluate patients in both the outpatient and inpatient setting, follow patients to the operating room and fully participate in their hospital care, and consult on inpatients and emergency room visits. Exposes interested students to the breadth and depth of benign gynecologic subspecialty areas, the faculty and resident of the University of Washington, and the OB GYN resident program (Limit: one student every four weeks).
OB GYN 686 P-Introduction to Obstetrics and Gynecology - Yakima (*, max. 12) Clerkship equivalent to OB GYN 665 offered in Yakima (WWAMI). Includes experience in several private physicians' offices. (Six weeks. Limit: one student). Prerequisite: HUBIO 565.
OB GYN 687 P-Introduction to Obstetrics and Gynecology - Fairbanks (*, max. 12) Clerkship equivalent to OB GYN 665 offered in Fairbanks, AK. Includes experience in several private physicians' offices. (Six weeks. Limit: one student). Prerequisite: HUBIO 565.
OB GYN 689 P-Introduction to Obstetrics and Gynecology Havre (*, max. 12) Clerkship equivalent to OB GYN 665 offered in Havre, MT. Includes experience in several private physicians' offices. (Six weeks. Limit: one student). Prerequisite: HUBIO 565.

OB GYN 690 P-Introduction to Obstetrics and Gynecology Sandpoint (*, max. 12) Clerkship equivalent to OB GYN 665 offered in Sandpoint, ID. Includes experience in several private physicians' offices. (Six weeks. Limit: one student). Prerequisite: HUBIO 565.

OB GYN 691 P-Introduction to Obstetrics and Gynecology - Tacoma (*, max. 12) Clerkship equivalent to OB GYN 665 offered in Tacoma. Includes experience in several private physicians' offices. (Six weeks. Limit: one student). Prerequisite: HUBIO 565.
OB GYN 692 P-Introduction to Obstetrics and Gynecology - Bozeman (*, max. 12) Clerkship equivalent to $O B$ GYN 665 offered Bozeman, MT. Includes experience in several private physician offices. (Six weeks. Limit: one student). Prerequisite: HUBIO 565.
OB GYN 693 P-Introduction to Obstetrics and Gynecology - Valley Medical Center (*, max. 12) Clerkship equivalent to OB GYN 665 offered at Valley Medical Center. Includes experience in several private physicians' offices. (Six weeks. Limit one student). Prerequisite: HUBIO 565.
OB GYN 695 P-Introduction to Obstetrics and Gynecology - Tri Cities (*, max. 12) Clerkship equivalent to OB GYN 665 offered in the Tri Cities. Includes experience in
several private physicians' offices. (Six weeks. Limit one student). Prerequisite: HUBIO 565.
OB GYN 697 P-Obstetrics and Gynecology Special Electives (*, max. 24) By arrangement, for qualified students, special clerkship or research opportunities are sometimes made available at other institutions. Prospective students obtain special assignment form one month before preregistration. Department evaluates student performance. Prerequisite: permission of department.

OB GYN 699 P-WWAMI Obstetrics and Gynecology Special Electives (*, max. 24) By special arrangement for qualified students, special clerkships or externships may be available at institutions other than the University of Washington located inside the WWAMI region. A special assignment form must be obtained one month in advance of preregistration. Prerequisite: permission of department.

## Ophthalmology

RR801 University of Washington Medical Center

The Department of Ophthalmology is responsible for the instructional and research programs in diseases of the eye and visual system and its adnexae.
Medical-student instruction is provided, including multiple electives in the clinical years. Graduate physicians are provided with three years of residency training at the affiliated hospitals. An optional internship is available in ophthalmology. A two-year ophthalmic plastics and orbit fellowship, and a two-year surgical retina fellowship, are offered. Patient care is provided under the supervision of full- and part-time faculty physicians at the University of Washington Medical Center, Harborview Medical Center, Veterans Affairs Medical Center, and Seattle Children's Hospital.
Clinical research programs relate to eye diseases. Laboratory research encompasses neurophysiology of vision, morphology of the retina and visual system, corneal wound healing, biochemistry of ocular tissues, and anatomy/ physiology of the orbit. Postdoctoral training is offered in all these disciplines.

For more information on residencies and fellowships, contact Ingrid Noe at ingrid@uw.edu. For more information on medical student clerkships, contact Dorrie Quirante at dorrieq@uw.edu.

## COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations.
OPHTH 498 Undergraduate Thesis (*) Kinyoun (University of Washington Medical Center) Thesis-based research in vision and ophthalmology. Elective. Offered: AWSpS.
OPHTH 499 Undergraduate Research (*) Kinyoun (University of Washington Medical Center) Laboratory or clinical research in morphology, biochemistry, immunology, experimental pathology, or clinical studies of the eye and visual system. Offered: AWSpS.

OPHTH 501 P-Ophthalmology Preceptorship (1) Kinyoun Individualized experiences with one or more of the full-time faculty members of the department covering research, teaching, and patient care. Student observes activities in the clinic, hospital ward, operating room, and research laboratories. Prerequisite: first- and second-year medical student standing and permission of instructor. Offered: AWSpS.
OPHTH 681 P-Ophthalmology Clerkship - HMC/Eye Institute $(4 / 8)$ Students gain experience in the diagnosis and treatment of common ocular disorders. Basic ex-
amination techniques, including tonometry, ophthalmoscopy, and biomicroscopy. Prerequisite: completion of human biology series. Offered: AWSpS.

OPHTH 683 P-Pediatric Ophthalmology Clerkship - Seattle Children's (4) Student examines and observes treatment of children with ocular diseases and learns to differentiate trivial from potentially blinding disorders. Furnishes programmed text in general ophthalmology. Prerequisite: completion of human biology series. Offered: WS.

OPHTH 685 P-Ophthalmology Clerkship - VAPSHCS (4) Participation in diagnosis and treatment of medical and surgical ocular disease. Outpatient examinations, inpatient surgery, as well as neuro-ophthalmologic, retinal, and glaucoma consultations. Basic techniques involved in tonometry, ophthalmoscopy, and biomicroscopy of eye. Prerequisite: completion of human biology series. Offered: AWSpS.

OPHTH 686 P-Ophthalmology Clerkship - GHC Puget Sound (4) Diagnosis and treatment of ocular disease in outpatients. Weekly assignments to Group Health ophthalmologist responsible for the care of walk-in and urgent patients, demonstrating findings pertinent to the future practice of primary-care physicians. Examination techniques, including tonometry, ophthalmoscopy, and biomicroscopy of eye. Prerequisite: completion of human biology series. Offered: AWSpS.
OPHTH 688 P-Ophthalmology Clerkship - Anchorage (8) Four-week externship at Alaska Native Medical Center in Anchorage. Opportunity to learn and practice common eye examination techniques, including slitlamp biomicroscopy, tonometry, and funduscopy. Patients seen three days a week; two days spent in the operating room. Prerequisite: completion of human biology series, MED 665, and SURG 665; fourth-year medical students only. Offered: AWSpS.

OPHTH 689 P-Ophthalmology Clerkship - Spokane (4) Diagnosis and management of commonly seen eye diseases. Subspecialty clinics include cornea, retina, glaucoma, contact lenses, and strabismus. Prerequisite: completion of human biology series. Offered: AWSpS.
OPHTH 690 P-Ophthalmology Clerkship - Missoula (4) Diagnosis and management of commonly seen eye diseases. Subspecialty clinics include cornea, retina, glaucoma, contact lenses, and strabismus. Prerequisite: completion of human biology series. Offered: AWSpS.
OPHTH 691 P-Ophthalmology Clerkship - Nampa (4) Diagnosis and management of commonly seen eye diseases. Subspecialty clinics include cornea, retina, neuro-ophthalmology, glaucoma, contact lenses, and strabismus. Prerequisite: completion of human biology series. Offered: AWSpS.
OPHTH 697 P-Ophthalmology Special Electives (*, max. 24) Kinyoun By specific arrangement, for qualified students, special clerkship, externship, or research opportunities are at times made available at institutions or clinics other than the UW. Prospective students obtain from the dean's office a special assignment form at least one month before preregistration. Prerequisite: permission of instructor. Offered: AWSpS.
OPHTH 699 P-WWAMI Ophthalmology Special Electives (*, max. 24) By special arrangement for qualified students, special clerkships or externships may be available at institutions other than the University of Washington located within the WWAMI region. Prerequisite: permission of department. Offered: AWSpS.

## Orthopaedics

BB1043 University of Washington Medical Center

The Department of Orthopaedics is actively involved in quality patient care, teaching, and research concerning bone and joint problems. Special areas of expertise include foot and ankle, hand and microvascular, hip and knee, arthritis, sports medicine, pediatric orthopaedics, shoulder and elbow, spine, trauma, and tumors.

In addition to providing instruction for medical students, the department provides education at the graduate, residency, and post-residency levels. Selected medical students may elect research experience in the department. A fully approved residency offers opportunities to carry out fundamental and clinical research. Residents may work toward the Master of Science degree by meeting the requirements of the Graduate School and the academic unit offering the degree program.

## COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations.

ORTHP 498 Undergraduate Thesis (*) Eyre Student works directly with a preceptor in selecting a suitable area for laboratory or clinical research in the area of orthopaedics, and develops a thesis for recognition. Offered: AWSpS.

ORTHP 499 Undergraduate Research (*) Eyre Investigation of pertinent musculoskeletal problems in the orthopaedic laboratories as part of the research group. Offered: AWSpS.

ORTHP 505 P-Preceptorship in Orthopaedic Surgery (1) Opportunity for first- and second-year medical students to gain experience with clinical faculty members in the community. Students observe general aspects of private practice from a longitudinal perspective. Prerequisite: permission of department. Offered: AWSpS.

ORTHP 585 P-Sports Medicine (2) O' Kane Lectures, patient problem presentations, and seminar discussions to explore impact of exercise and sport participation on various body systems. Includes nutritional concerns, biomechanics of certain sports injuries, and cardiovascular, pulmonary, and musculoskeletal concerns. Prerequisite: second-year medical student standing. Offered: Sp.

ORTHP 644 P-General Orthopaedic Clerkship - Jackson (*, max. 8) Khoury Provides a basic education in the fundamentals of the musculoskeletal system. Heavy emphasis is placed on the reconstructive alternatives in the treatment of degenerative joint diseases. Prerequisite: completion of HUBIO series; third- and fourth-year students. Enrollment limited to three. Offered: AWSpS.
ORTHP 650 P-General Orthopaedic Clerkship - Billings (*, max. 8) Shenton Provides a basic education in the fundamentals of the musculoskeletal system. Emphasizes reconstructive alternatives in the treatment of degenerative joint diseases. Prerequisite: completion of HUBIO series; third- and fourth-year students. Enrollment limited to three. Offered: AWSpS.
ORTHP 655 P-General Orthopaedic Clerkship - Boise (*, max. 8) Scheffel Provides a basic education in the fundamentals of the musculoskeletal system. Emphasizes reconstructive alternative in the treatment of degenerative joint diseases. Prerequisite: completion of HUBIO series; third- and fourth-year students.
ORTHP 668 P-Pediatric Orthopaedics - Spokane (*, max.
8) Caskey Acquaints students with all aspects of mus-
culoskeletal problems in childhood. Includes didactic conferences and seminars, and opportunities for active participation in both inpatient and outpatient care at Shriners Hospital for Children in Spokane. (Four weeks, full-time). Prerequisite: SURG 665 or HUBIO 553. Offered: AWSpS.
ORTHP 669 P-General Orthopaedic Clerkship - Spokane (*, max. 8) Anderson Provides a basic education in the fundamentals of musculoskeletal system. Heavy emphasis placed on the reconstructive alternatives in the treatment of degenerative joint diseases. Prerequisite: HUBIO series; third- and fourth-year medical students. Offered: AWSpS.
ORTHP 675 P-Preceptorship in Orthopaedics (*, max. 4) Student spends full time with the preceptor during all his or her working day in order to gain a better understanding of the diagnosis and the management of problems of the musculoskeletal system as seen in the private orthopaedic practice. (Two weeks, fulltime). Prerequisite: SURG 665 or HUBIO 553 and permission of department. Offered: AWSpS.
ORTHP 676 P-Pediatric Orthopaedics - Seattle Children's (*, max. 8) Burton, Carter, Dales, Jinguji, Krengel, Mosca, Steinman, White Acquaints students with all aspects of musculoskeletal problems in childhood. Didactic conferences and seminars, and opportunities for active participation in both inpatient and outpatient care at Seattle Children's Hospital, and correlative anatomy and pathology. (Four weeks, full-time). Prerequisite: SURG 665 or HUBIO 553. Offered: AWSpS.
ORTHP 677 P-Musculoskeletal Trauma (*, max. 8) Barei, Beingessner, Bellabarba, Bransford, Chapman, Dunbar, Henley, Krieg, Nork, Routt, Taitsmann Harborview Medical Center. Emergency room, wards, operating room, and outpatient clinics. Instruction in general and special clinics, including hand, hip, foot, and fracture, with emphasis placed on physical examination of the patient. Students take correlative anatomy and pathology. (Four weeks, full-time). Prerequisite: SURG 665, HUBIO 553. Offered: AWSpS.
ORTHP 678 P-Musculoskeletal Oncology (8/12) Conrad, Davidson In-depth experience on musculoskeletal oncology service with primary involvement in initial evaluation, staging, treatment, and postoperative fol-low-up of patients with various musculoskeletal malignancies. Elective involves experience in surgical, oncologic, radiologic, and pathologic principles of managing sarcomas. Prerequisite: basic orthopaedic elective or permission of instructor. Offered: AWSpS.

ORTHP 680 P-General Orthopaedic Clerkship - VAMC (*, max. 8) Chansky, Wilcox Veterans' Administration Hospital: structured to provide a basic education in the fundamentals of the musculoskeletal system. Heavy emphasis is placed on the reconstructive alternatives in the treatment of degenerative joint diseases. Prerequisite: completion of HUBIO series; third- and fourth-year students. Enrollment limited to three. Offered: AWSpS.
ORTHP 681 P- Sports Medicine Orthopaedic Clerkship (8) Green, Larson, O' Kane, Teitz Orthopaedic subspecialty clerkship at University of Washington Medical Center. Preceptor-based outpatient, inpatient, emergency, or operative orthopaedic care. Students work primarily in one subspecialty area and in one general orthopaedic clinic. For students who plan careers in orthopaedic surgery. Prerequisite: completion of HUBIO series, third- and fourth-year medical students. Offered: AWSpS.
ORTHP 682 P-Outpatient Orthopaedics (8) Conrad, Lee, Manner, Matsen, Sack, Tietz, Wagner, Warme Outpatient orthopaedic experience at University of Washington Medical Center. Emphasis on physical exam, diagnosis, radiographic evaluation, and non-operative treatment. Rotation through general orthopaedics as
well as all subspecialty areas. For students who plan careers in primary care. Prerequisite: completion of HUBIO series. Offered: AWSpS.
ORTHP 684 P-Disorders of the Spine (8) Chapman, Lee, Wagner Evaluation and assessment strategies of spinal disorders for patients of all ages and a wide variety of clinical conditions including trauma, deformity, degenerative disorders, metabolic, and inflammatory diagnoses. Opportunities exist to participate in outpatient, surgical, and conference based teaching sessions aimed at all experience levels and individualized for practitioners with interest in medical specialties, emergent care, radiology, physiatry, intervention pain management, and surgical specialties. Offered: AWSpS.

ORTHP 685 P-Adult Reconstruction: Total Joint Service (8) Manner Preceptor-based outpatient, inpatient, emergency, and operative orthopaedic care. Students work with faculty in the Total Joint Service which specializes in lower extremity adult reconstructive surgery, including: complex primary hip/knee arthroplasty; less invasive approaches to hip/knee arthroplasty; revision hip/knee arthroplasty; periacetabular and proximal femoral osteotomy; osteotomy about the knee; and hip arthroscope. Offered: AWSpS.
ORTHP 687 P-Shoulder and Elbow (8) Matsen, Warme Pre-ceptor-based outpatient, inpatient, emergency, and operative orthopaedic care. Work with the faculty in the Shoulder and Elbow Service, which provides comprehensive evaluation and management for a wide range of shoulder and elbow problems, including: arthritis, dislocation or instability, fractures, rotator cuff/tendon tears, joint stiffness, and unsuccessful previous surgery. Offered: AWSpS.
ORTHP 697 P-Orthopaedic External Elective (*, max. 24) Special arrangements can be made for students desiring to take orthopaedic electives at other institutions. Programs generally approved include orthopaedic clerkships at other universities or at large orthopaedic institutes. Prerequisite: HUBIO 553 and permission of department. Offered: AWSpS.
ORTHP 699 P-WWAMI Orthopedics Special Electives (*, max. 24) By special arrangement for qualified students, special clerkships or externships may be available at institutions other than the University of Washington located within the WWAMI region. Prerequisite: permission of department.

## Otolaryngology -- Head and Neck Surgery

BB1165 University of Washington Medical Center

The Department of Otolaryngology -- Head and Neck Surgery provides clinical care for patients with a broad spectrum of disorders affecting the head and neck region, including the ears, nose, and throat. A major portion of departmental effort is directed toward basic research in the areas of sensorineural hearing disorders, physiology of the larynx, and cancer treatment and rehabilitation. The department supports a number of research fellows and advanced degree candidates, and is responsible for a four-year residency program and for the training of medical students in subjects relevant to the specialty.

## COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations.
OTOHN 498 Undergraduate Thesis (*) Rubel, Futran Student works directly with department faculty in select-
ing a suitable area for laboratory or clinical research in the area of otolaryngology, and develops a thesis for recognition. Offered: AWSpS.

OTOHN 499 Undergraduate Research (*) Rubel, Futran Research opportunities offered under direction in the area of otolaryngology. (Twelve weeks.) Offered: AWSpS.
OTOHN 501 P-Preceptorship in Otolaryngology - Head and Neck Surgery (1) Hillel One morning a week for a total of 30 hours per quarter spent observing patient care in either inpatient or outpatient settings at the University of Washington Medical Center; associated readings. Prerequisite: first- or second-year medical student standing. Coordinator: OTOHNS office. Offered: AWSpS.
OTOHN 678 P-Otolaryngology - Head and Neck Surgery Clerkship - Cheyenne (4/8, max. 24) Futran Introduction to surgical subspecialty of otolaryngology-head and neck surgery. Structured to allow broad introduction to breadth of specialty. Students see patients in clinic, join inpatient rounds, have an opportunity to go to operating room. Prerequisite: human biology series; recommended: medicine and surgery required clerk ships. Offered: AWSpS.
OTOHN 679 P-Otolaryngology - Head and Neck Surgery Clerkship - Missoula (4/8, max. 24) Futran, Hillel, Man ning, Whipple Introduction to surgical subspecialty of otolaryngology-head and neck surgery. Students see patients in clinic, join inpatient rounds, have an opportunity to go to operating room. Prerequisite: human biology series; recommended: Medicine and Surgery required clerkships. Offered: AWSpS.
OTOHN 680 P-Otolaryngology - Head and Neck Surgery Clerkship - UWMC (4/8, max. 24) Futran Introduction to surgical subspecialty of otolaryngology-head and neck surgery. Structured to allow broad introduction to breadth of specialty. Students see patients in clinic, join inpatient rounds, have an opportunity to go to operating room. Rotation at UWMC. Prerequisite: human biology series; recommended: medicine and surgery required clerkships. Offered: AWSpS.
OTOHN 681 P-Otolaryngology - Head and Neck Surgery Clerkship - HMC (4/8, max. 24) Whipple Introduction to surgical subspecialty of otolaryngology-head and neck surgery. Structured to allow broad introduction to breadth of specialty. Students see patients in clinic, join impatient rounds, and have an opportunity to go to the operating room. Prerequisite: human biology series; recommended: medicine and surgery required clerkships. Offered: AWSpS.
OTOHN 682 P-Otolaryngology - Head and Neck Surgery Clerkship - VA (4/8, max. 24) Coltrera Introduction to surgical subspecialty of otolaryngology-head and neck surgery. Structured to allow broad introduction to breadth of specialty. Students see patients in clinic, join impatient rounds, and have an opportunity to go to the operating room. Prerequisite: human biology series; recommended: medicine and surgery required clerkships. Offered: AWSpS.
OTOHN 683 P-Otolaryngology - Head and Neck Surgery Clerkship - Madigan (*, max. 8) (Madigan Army Medical Center) Individual externship training at an outpatient clinic, where visits average twelve hundred per month, supplemented by inpatient assignments. Students may reside at the hospital during externship, using facilities of bachelor officer quarters and hospital mess. (Two or four weeks, full-time). Prerequisite: completion of human biology series; recommended: medicine and surgery required clerkships. Offered: AWSpS. Offered: AWSpS.
OTOHN 684 P-Otolaryngology - Head and Neck Surgery Clerkship - Seattle Children's (4/8, max. 24) Manning Introduction to surgical subspecialty of otolaryngology-
head and neck surgery. Structured to allow broad introduction to breadth of specialty. Students see patients in clinic, join impatient rounds, and have an opportunity to go to the operating room. Prerequisite: human biology series; recommended: medicine and surgery required clerkships. Offered: AWSpS.
OTOHN 685 P-Otolaryngology - Head and Neck Surgery Clerkship - Boise (4/8, max. 24) Introduction to surgical subspecialty of otolaryngology-head and neck surgery. Structured to allow broad introduction to breadth of specialty. Students see patients in clinic, join inpatient rounds, have an opportunity to go to operating room. Prerequisite: human biology series; recommended: medicine and surgery required clerkships. Offered: AWSpS.

OTOHN 686 P-Otolaryngology - Head and Neck Surgery Clerkship - Greater Seattle Private Practice (4) Hillel Provides exposure to all aspects of patient care through a private practice setting. The student is exposed to the outpatient clinic and operating room procedures with daily directed contact with one attending faculty member. Contact administrator to arrange rotation. Prerequisite: permission of course director; recommended: medicine and surgery required clerkships. Offered: AWSpS

OTOHN 687 P-Otolaryngology - Head and Neck Surgery Clerkship - Spokane (4/8, max. 24) Introduction to surgical subspecialty of otolaryngology-head and neck surgery. Structured to allow broad introduction to breadth of specialty. Students see patients in clinic, join impatient rounds, and have an opportunity to go to the operating room. Prerequisite: human biology series; recommended: medicine and surgery required clerkships. Offered: AWSpS.

OTOHN 688 P-Otolaryngology - Head and Neck Surgery Clerkship - Anchorage (4/8, max. 24) Introduction to surgical subspecialty of otolaryngology-head and neck surgery. Structured to allow broad introduction to breadth of specialty. Students see patients in clinic, join impatient rounds, and have an opportunity to go to the operating room. Prerequisite: human biology series; recommended: medicine and surgery required clerkships. Offered: AWSpS.
OTOHN 697 P-Otolaryngology - Head and Neck Surgery Away Externship (*, max. 8) Fultran By specific arrangement. Special clerkship, externship, or research opportunities are at times made available at institutions other than the University of Washington. Prospective students obtain a special assignment form from the dean's office at least one month before preregistration. Prerequisite: permission of clerkship director. Offered: AWSpS.

OTOHN 699 P-Otolaryngology - Head and Neck Surgery Clerkship - WWAMI (4/8, max. 8) By special arrangement for qualified students, special clerkships or externships may be available at institutions other than the University of Washington located within the WWAMI region. Prerequisite: permission of department. Offered: AWSpS.

## Pathology

C516 Health Sciences

Pathology is the study of disease; its causes, mechanisms, and effects on the body. Pathology is both a basic biological science and a specialty of medicine. As a medical specialty, practiced by MDs, it includes the laboratory evaluation of organs, tissues and fluids to assist other physicians in reaching a diagnosis. As a basic science, practiced by PhDs, pathology focuses on the experimental investigation
of the molecular processes of disease, using techniques of cell and organ culture, biochemistry, molecular biology, and genetics.

## GRADUATE PROGRAM

Graduate Program Adviser<br>C516 Health Sciences, Box 357470 (206) 616-7551

The Department of Pathology offers graduate training in experimental pathology, with an emphasis on the cellular and molecular biological basis of disease, leading to the Doctor of Philosophy degree in cellular and molecular pathology. The primary goal of the graduate program is to train individuals for careers as practicing scientists in biomedical research, investigating basic disease mechanisms. Emphasis is on development of skills in hypothesis generation and testing, including the design, accomplishment and critical interpretation of experiments. Experimental pathology uses the full range of biomedical research techniques (including biochemistry, molecular biology, cell biology, animal modeling) to attempt to elucidate the mechanisms underlying human disease. Graduates of the program usually continue research careers at biotechnology companies or universities/research institutes.

## Doctor of Philosophy

## Admission Requirements

1. Copy of the Graduate School Application
2. Official transcripts
3. Official GRE scores. The department also recommends that applicants take the Subject Test in Biology or related area.
4. Statement of purpose and research interests
5. Three or more letters of recommendation
6. Personal statement that addresses the relationship between personal background and aspirations

## Special Requirements

Prospective candidates should have taken undergraduate courses in the sciences, and have acceptable scores on the Graduate Record Examination, including advanced biology or chemistry. Some experience in a research laboratory is strongly recommended. Those wishing to matriculate toward both the MD and PhD degrees must gain admission to both the Graduate School and the School of Medicine.

## Degree Requirements

90 credits, to include:

1. Required coursework: PATH 500 (3), PATH 501 (1), PATH 507 (2), PATH 512 (1.5), PATH 513 (1.5), PATH 515 (1.5), PATH 516 (3), PATH 551 (2-5); BIOST 511 (4); CONJ 538 (1/1.5), CONJ 539 (1.5)
2. Research before the general examination: PATH 600
3. Research after the general examination: PATH 800
4. Recommended courses: CONJ 531 (1.5), CONJ 532 (1.5)
5. General examination
6. Dissertation
7. Final examination

## Financial Aid

Funding for students is provided from departmental and University funds, training grants, a variety of institutional fellowships, and research grants of individual faculty members.

## Research Facilities

The department emphasizes the cellular and molecular approach to the investigation of the pathogenesis of disease in mammalian species. Special facilities exist for training in electron microscopy; cell, tissue, and organ culture; recombinant DNA techniques; histochemistry and cytochemistry; analytical biochemistry; immunology; and molecular and cell biology.

## Residency Training Program

The department supervises a residency-training program in anatomic pathology and, jointly with the Department of Laboratory Medicine, in clinical pathology for qualified medical doctors. Subspecialty training is also available through clinical fellowships. Persons who complete the res idency program are eligible for certification by the American Board of Pathology. For additional information, contact the Resident Program Director, Department of Pathology, Box 356100 or visit the residency program website.

## COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, sym bols, and abbreviations.

PATH 450 Cell Biology of Aging (3) Martin, Rabinovitch, Wolf Pathophysiology of aging at cell and tissue levels (cell replication limits, telomere shortening, accrual of oxidative damage, caloric restriction effects, loss of postreplicative cells, longevity assurance genes). Proseminar based on student participation. Undergraduate Honors students, graduate students with biology, zoology, genetics, or medical sciences backgrounds. Prerequisite: permission of instructor. Offered: W.

PATH 498 Undergraduate Thesis (*) Elective.
PATH 499 Undergraduate Research (*) Elective.
PATH 500 Molecular Basis of Disease (3) Parks Designed for first and second-year graduate students to introduce the concepts of general pathology at the celIular and molecular levels. Offered: W.
PATH 501 Pathology Proseminars (1) Small group discussions and presentations by students based on critical reading of original papers, or on concurrent seminars, in many areas of experimental pathology and medicine. Topic varies by quarter. Prerequisite: permission of instructor. Offered: AWSpS.
PATH 502 Inflammation and Repair (2) Lecture-seminar; a seminar course dealing with an in-depth examination of the processes involved in inflammation and repair. Credit/no-credit only. Prerequisite: permission of instructor. Offered: even years.
PATH 507 Introduction to Pathology Research (2) Born feldt, Swisshelm Current developments and approaches to investigation of the molecular and cellular basis of disease. Members of the Pathology faculty present and discuss their own research projects. Credit/ no-credit only. Prerequisite: permission of instructor. Offered: A
PATH 510 Introduction to Pathology Methods (3) BowenPope Laboratory course designed to introduce graduate students to the fundamentals of image analysis, histology, histopathology, post mortem evaluation, surgical pathology, and other methods used to investigate disease etiology, progression, and manifestation in humans and in animal models. Prerequisite: permission of instructor. Offered: Sp.
PATH 511 Topics in Experimental Pathology (1-2, max. 10) Bornfeldt Focus on areas of research relevant to experimental pathology. Prerequisite: permission of instructor. Offered: AWSpS.

PATH 512 Molecular Basis of Disease: Death and Repair (1.5) First in a series designed to introduce students
o medically important diseases and physiologic processes and experimental approaches to elucidating the cellular processes underlying these diseases. Covers basic cell/tissue processes that underlie normal homeostasis and most disease and, including apoptosis, necrosis, stem cells, inflammation, granulation tissue, tissue regeneration, repair and fibrosis.

PATH 513 Mechanisms of Neurodegeneration (1.5) Introduction to the cellular and molecular mechanisms that underlie neurodegenerative diseases, including introduction to the normal development and anatomy of the central nervous system, a review of epidemiologic, genetic, and clinical research tools used in the investigation of these diseases, and a systematic review of the major neurodegenerative diseases.

PATH 516 Molecular Basis of Human Genetic Disease (3) Introduces the underlying mechanisms in human genetic disorders, ranging from the single nucleotide, through genomic instability, and chromosomal rearrangements. Includes tissue and organ specific examples of the manner in which these disorders provide insights into human biology. Offered: $S p$.

PATH 517 The Biology and Pathology of Aging (3/4) Wolf Surveys the biology and pathologies of the aging phenomena in multiple species and at multiple organismal levels from whole animals to molecules. Prerequisite: coursework in biology, biochemistry, molecular biology, and genetics. Offered: Sp.

PATH 520 Experimental Pathology Seminar (1) Review of current research in various areas of experimental pathology by members of the department and visiting scientists. Credit/no-credit only.
PATH 521 Anatomy and Autopsy (1) Fligner Students view an autopsy, and learn how autopsy can diagnose disease, determine cause of death, and improve patient care. Requirements include orientation session, autopsy, and a clinical-autopsy conference. Participants must be free at least one morning per week to attend an autopsy at UWMC. Prerequisite: UW medical students only. Offered: WSp.
PATH 522 Hematopathology Seminar (2) Sabath Identification of normal lymphocyte and bone marrow subpopulations, diagnosis of leukemias, lymphomas, and benign conditions that resemble them. Emphasis on histopathology, cytochemical, immunological, and molecular markers. Clinicopathologic correlation. Offered: jointly with LAB M 522; W, even years.
PATH 530 Human Cytogenetics (*, max. 4) Disteche Sources and methods of preparation and identification of human chromosomes. Molecular structure and mapping of chromosomes. Human cytogenetic pathology: karyotype-phenotype interactions, chromosome breakage, and cancer cytogenetics. Prerequisite: permission of instructor. Offered: Sp.

PATH 540 Translational Research Topics (1) Horwitz First and second year students in the M.D./Ph.D. program present and discuss current papers form the biomedical literature in journal club format, and describe their own research in seminar format. Offered: AWSp.

PATH 544 General and Systemic Pathology ([2-3]-, max. 5) Narayanan Basic pathologic processes that underlie disease, including cell alterations, genetic and developmental pathology, environmental pathology, neoplasia, immunopathology, inflammation, infection, and systemic diseases. Correlates gross, functional, and biochemical alterations. For first-year dental students and graduate students. Requires reasonable grounding in biological and chemical sciences. Prerequisite for nondental students: permission of instructor.
PATH 551 Experimental and Molecular Pathology (2-5, max. 20) Introduction to experimental pathology. A tutorial course designed to introduce a graduate
student (medical, dental) or senior undergraduate to selected methods and problems through literature surveys and/or laboratory experience. Exploration of causes at the cellular and molecular levels in the study of disease is emphasized. Prerequisite: permission of instructor.
PATH 552 Contemporary Anatomic Pathology (2-5, max. 30) Schwartz Study of recent developments in anatomic pathology. Subject includes areas of basic science and review of systemic pathology. Recent developments and interpretation of these findings are stressed. For pathology residents, fellows, and trainees. Credit/no-credit only. Prerequisite: permission of instructor.
PATH 555 Environmental Pathology (3) Monnat, Rhim Modern morphologic, cell biological, and molecular approaches to environmental disease associated with exposure/predisposition. Lectures, seminar discussion, and student presentations. Prerequisite: PATH 410 or PATH 444 or HUBIO 520; recommended: ENV H 514; ENV H 515. Offered: Sp, even years.
PATH 560 Molecular Analysis of Human Disease (*, max. 10) Review and discussion of contemporary research on molecular basis of human disease. Focus on mutational mechanisms, genetic instability, AIDS, and cancer. Students participate in weekly group discussion and work with faculty to select, develop, and present discussion topic. Prerequisite: medical, graduate, or professional standing and permission of instructor. Offered: AWSp.
PATH 562 P-Cardiovascular Pathology Conference (*) Reichenbach Consists of two parts: a laboratory review of gross and microscopic cardiovascular pathology of selected autopsied cases followed by a combined clinical (medical and/or surgical) and pathology conference discussing these cases. Prerequisite: HUBIO 540 and permission of instructor.

PATH 590 Patient-Centered Translation Research (1) Horwitz MSTP students preparing to return to clerkships are partnered with a senior MD/PhD medical student or house office, preview the medical or surgical ward team environment, select a patient-focused translation research topic based on their clinical experience, and prepare a plan for refreshing introductory clinical skills. Offered: WSp.

## PATH 600 Independent Study or Research (*)

PATH 667 P-Renal Pathology Laboratory (*, max. 6) Laboratory elective for third- and fourth-year medical students. Read current literature, review various renal biopsies and urine sediments, and read standard texts prior to a weekly topic-oriented conference. All students earn 1 credit for one-hour seminar per week. May be taken concurrently with MED 693. Prerequisite: permission of instructor.
PATH 677 P-Neuropathology Clerkship - HMC (*, max. 16) Includes participation in dissection and study of neuropathology cases. Students work up cases under senior staff including dissection, microscopic examination, and literature review.

PATH 678 P-Diagnostic Pathology Clerkship - Medical Examiner's Office, Alaska (*, max. 24) Medical student participation in dissection and study of autopsy and forensic pathology cases at the Anchorage Medical Examiner's Office.

PATH 680 P-Diagnostic Pathology Clerkship - University of Washington Medical Center (*, max. 24) Swanson Medical student participation in dissection and study of autopsy and surgical pathology cases. Cases worked up under senior staff, including dissection, microscopic examination, and literature review. Attendance at pathology conferences and seminars expected. Prerequisite: third- or fourth-year medical student standing.

PATH 681 P-Diagnostic Pathology Clerkship - Harborview Medical Center (*, max. 24)
PATH 682 P-Diagnostic Pathology Clerkship - Veterans' Administration Hospital (*, max. 24)

PATH 683 P-Diagnostic Pathology Clerkship - Medical Examiner's Office (*, max. 24) Raven
PATH 687 P-Diagnostic Pathology Clerkship - Seattle Children's Hospital (*, max. 24)

PATH 688 P-Diagnostic Pathology Clerkship - Madigan Army Medical Center (*, max. 24)
PATH 690 P-Diagnostic Pathology Clerkship - Northwest Medical Center (*, max. 24)
PATH 691 P-Diagnostic Pathology Clerkship - General Hos pital of Everett (*, max. 24)
PATH 697 P-Pathology Special Electives (*, max. 24) By specific arrangement, students have clerkships, externships, or research opportunities at institutions other than the University of Washington. Prospective students obtain special assignment forms from the dean's office at least one month before advance reg istration. Prerequisite: permission of instructor

PATH 699 P-WWAMI Pathology Special Electives (*, max. 24) By special arrangement for qualified students, special clerkships or externships may be available at institutions, other than the University of Washington, located within the WWAMI region. Prerequisite: permission of department.
PATH $\mathbf{7 0 0}$ Master's Thesis (*)
PATH 800 Doctoral Dissertation (*)

## Pediatrics

RR314 Health Sciences

Pediatrics involves the study of physical and behavioral development of humans, in health and disease, from conception to adulthood.

Instruction is provided through conjoint courses, lectures, conferences, clerkships, and electives. Faculty members participate in teaching the basic curriculum and offer 20 electives, in addition to the general pediatrics clerkship at multiple WWAMI sites. A residency program is offered with a wide variety of electives as well as the traditional hospital-inpatient and clinic experience. Postdoctoral fellowship training is available in many subspecialty areas of pediatrics. The major teaching hospitals in Seattle are Seattle Children's Hospital, University of Washington Medical Center, and Harborview Medical Center.

## COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations.
PEDS 498 Undergraduate Thesis (*) Bennett For medical students. Offered: AWSpS.

PEDS 499 Undergraduate Research (*) Bennett Participation in various clinical or basic research programs in progress, specifically: child development, develop mental biology, human embryology and teratology, medical genetics, infectious diseases, neonatology, neuroembryology, cardiology, endocrinology and metabolism, immunology, respiratory disease. Offered: AWSpS.
PEDS 505 P-Preceptorship in Pediatrics (1) Bennett To provide opportunity for first- and second-year medical students to gain personal experience with medical practice situations for pediatricians by being stationed with carefully selected clinical faculty members in their offices. Prerequisite: permission of
instructor. Enrollment limited. Coordinator: Department of Pediatrics. Credit/no-credit only. Offered: AWSpS.

PEDS 530 P- Homeless Youth and Their Medical Care (1) Bonnar, Giesel Seminar and interview practice; students learn how to deal with special health problems and other related problems of "street kids" through interviews and observations. Credit/no credit only. Offered: W.
PEDS 611 P-Country Doctor Free Teen Clinic (*, max. 24) Breuner, Giesel Participation in a free clinic for out-of-home youth, either Monday or Tuesday evenings. Clinical services include general medical care, with a focus on reproductive health, STD evaluations/ treatment, and the impact of a homeless lifestyle on general health. (Limit per rotation: two students.) Offered: AWSpS.
PEDS 622 P-Pediatric Child Abuse and Neglect - Boise (4/8, max. 24) Exposes future clinicians to the most common issues relating to child abuse and neglect. Prerequisite: fourth-year medical students; core pediatrics rotation. (Limit: one student, by departmental permission). Offered: AWSpS.

PEDS 624 Pediatric Emergency Medicine - Spokane (8) Rochell Students manage patients with the supervision of a Pediatric Emergency Medicine attending or fellow. Includes the opportunity to manage patients with a wide spectrum of disease processes as well as learn key emergency medicine procedural skills. Prerequisite: PEDS core clerkship; permission of course faculty. Offered: AWSpS.

PEDS 625 Pediatric Emergency Medicine (8) Richling Elective in Pediatric Emergency Department at Seattle Children's Hospital. Students manage patients with the supervision of a Pediatric Emergency Medicine attending or fellow. Includes the opportunity to manage patients with a wide spectrum of disease processes as well as learn key emergency medicine procedural skills. Prerequisite: fourth- year medical students. Offered: AWSpS.
PEDS 630 P-WRITE Pediatrics Clinical Clerkship (*, max. 24) Basic clinical clerkship for students enrolled in the WRITE Program. Prerequisite: PEDS 665, impatient only; acceptance in the WRITE program.
PEDS 636 P-Pediatric Cardiology - Spokane (*, max. 24) Jensen Elective rotation with an emphasis on physical diagnosis, electrocardiography, clinical knowledge of diagnostic techniques and surgical possibilities for inpatients and outpatients with cardiovascular problems. Opportunity to observe catheterizations and cardiovascular operations. Weekly clinics and twice-daily inpatient rounds. Prerequisite: PEDS core clerkship. (Limit per rotation: one student.) Offered: AWSpS.
PEDS 637 P-Pediatric Cardiology - Anchorage (*, max. 24) Wellman Elective rotation with an emphasis on physical diagnosis , electrocardiography , clinical knowledge of diagnostic techniques and surgical possibilities for inpatients and outpatients with cardiovascular problems. Opportunity to observe catheterizations and cardiovascular operations. Weekly clinics and twice-daily inpatient rounds Prerequisite: PEDS core clerkship. (Limit per rotation: one student.) Offered: AWSpS.
PEDS 640 P-Pediatric Gastroenterology - Boise (4/8, max. 24) Elective rotation where students see clinical pediatric gastrointestinal problems, participate in inpatient gastroenterology consultations, outpatient clinic evaluations for new and follow-up patients, and (observe) endoscopic and therapeutic gastrointestinal procedures. Prerequisite: PEDS 665. (Limit: one student). Offered: AWSpS.

PEDS 653 P-Pediatric General Clerkship - Helena, MT (*, max. 24) General introductory impatient and outpatient pediatric clerkship. Provides exposure to diverse settings where children receive health services. The six-week experience takes s place in Helena, MT.

PEDS 654 P-Pediatric General Clerkship - Butte, MT (*, max. 24) General introductory impatient and outpatient pediatric clerkship. Provides exposure to diverse settings where children receive health services. The six-week experience takes s place in Butte, MT.
PEDS 655 P-Pediatric General Clerkship - Jackson, WY (*, max. 24) Riddell General introductory inpatient and outpatient pediatric clerkship. Takes place primarily in an active pediatric group practice with appropriate outpatient and inpatient opportunities, including access to a community hospital with nursery, pediatric beds, and physician-staffed emergency room. (Six weeks, full time. Limit per rotation: one student). Prerequisite: HUBIO 563. Offered: AWSp.
PEDS 656 P-Pediatric General Clerkship - Wenatchee (*, max. 24) Milnes General introductory inpatient and outpatient pediatric clerkship. Open to all third- and fourth-year medical students. (Six weeks, full time. Limit per rotation: one student). Prerequisite: HUBIO 563. Offered: AWSpS.

PEDS 657 P-Pediatric General Clerkship - Missoula (*, max. 24) Carter General introductory inpatient and outpatient pediatric clerkship. Provides exposure to diverse settings where children receive health services. The six-week experience takes place in three active pediatric practices with appropriate outpatient and inpatient opportunities and at Community Medical Center. (Six weeks, full time. Limit per rotation: one ortwo students.) Prerequisite: HUBIO 563. Offered: AWSpS.

PEDS 658 P-Pediatric General Clerkship - Boise (*, max. 24) Brown General introductory inpatient and outpatient pediatric clerkship. Provides exposure to diverse settings where children receive health services. The six-week experience takes place in three active pediatric practices with appropriate outpatient and inpatient opportunities and at St. Luke's Medical Center. (Six weeks, full time. Limit per rotation: one or two students). Prerequisite: HUBIO 563. Offered: AWSp.
PEDS 659 Pediatric General Clerkship - Billings, MT (*, max. 24) Kummer, Starr General introductory inpatient and outpatient pediatric clerkship. Exposes students to diverse settings where children receive health services. The six-week experience takes place primarily in two active pediatric group practices with appropriate outpatient and inpatient opportunities. (Six weeks, full time. Limit: per rotation: one student.) Offered: AWSp.
PEDS 660 Pediatric General Clerkship - Cheyenne, WY (*, max 24) West, Zarzycki Introductory inpatient and outpatient pediatric clerkship that exposes students to environments in settings where children receive medical and health services. The six-week experience takes place primarily in an active pediatric group practice with appropriate outpatient and inpatient opportunities. (Six weeks, full time. Limit per rotation: one student). Prerequisite: HUBIO 563. Offered: AWSpS.
PEDS 661 P-Pediatric General Clerkship - Anchorage (*, max. 24) McArthur General introductory pediatric clerkship. One-half in hospital setting; one-half in outpatient department, clinic, or private office. Open to all third- and fourth-year medical students. (Six weeks, full time. Limit per rotation: three students). Prerequisite: HUBIO 563. Offered: AWSpS.
PEDS 663 P-Pediatric General Clerkship - Mary Bridge (*, max. 24) Fairchok General introductory pediatric clerkship. One-half in hospital setting; one-half in outpa-
tient department, clinic, or private office. Location preferences are considered. Open to all third- and fourth-year medical students. (Six weeks, full time. Limit per rotation: three or four students). Prerequisite: HUBIO 563. Offered: AWSpS.

PEDS 664 P-Pediatric General Clerkship - Pocatello, ID (*, max. 24) Jensen General introductory pediatric clerkship. One-half in hospital setting; one-half in outpatient department, clinic, or private office. Open to all third- and fourth-year medical students. (Six weeks, full time. Limit per rotation: two students). Prerequisite: HUBIO 563. Offered: AWSpS.
PEDS 665 P-Pediatric General Clerkship - Seattle (*, max. 24) Bennett General introductory pediatric clerkship. One-half in hospital setting; one-half in outpatient department or clinic. Open to all third- and fourthyear medical students. (Six weeks, full time. Limit per rotation: ten students). Prerequisite: HUBIO 563. Offered: AWSpS.
PEDS 666 P-Pediatric General Clerkship - Great Falls, MT (*, max. 24) Ruggerie General introductory pediatric clerkship. One-half in hospital setting; one-half in outpatient department, clinic, or private office. Open to all third- and fourth-year medical students. (Six weeks, full time. Limit per rotation: two students). Prerequisite: HUBIO 563. Offered: AWSpS.

PEDS 667 P-Pediatric General Clerkship - Madigan (*, max. 24) Connors General introductory pediatric clerkship. One-half in hospital setting; one-half in outpatient department, clinic, or private office. Open to all third- and fourth-year medical students. (Six weeks, full time. Limit per rotation: two students). Prerequisite: HUBIO 563. Offered: AWSpS.

PEDS 668 P-Pediatric General Clerkship - Spokane (*, max. 24) Maixner General introductory pediatric clerkship. One-half in hospital setting; one-half in outpatient department, clinic, or private office. Open to all third- and fourth-year medical students. (Six weeks, full time. Limit per rotation: two or three students). Prerequisite: HUBIO 563. Offered: AWSpS.
PEDS 669 P-Neonatal Pediatrics - Clerkship (*, max. 24) Strandjord Participation in the activities in the newborn and premature divisions; ward rounds, seminars, conferences, and familiarization with certain laboratory techniques, particularly those relating to acid-base balance. (Limit per rotation: two students). Prerequisite: PEDS and OB GYN core clerkships. Of fered: AWSpS.

PEDS 670 P-Pediatric Infectious Diseases (*, max. 24) Smith Students see and work up clinic consultations and present in detail to attending physician. Daily rounds include problem-solving discussions and didactic presentations in broad category of infectious diseases. Opportunity for experience in clinical research and laboratory techniques. (Limit per rotation: one student). Prerequisite: PEDS and MED core clerkships; fourth-year medical student standing. Offered: AWSpS.
PEDS 671 Pediatric Endocrinology (*, max. 24) Taplin Focuses on the evaluation of the normal progression of hormone mediated processes in children and the recognition, diagnosis, and management of a variety of endocrine problems. Includes participation in clinics, impatient endocrine rounds, and a variety of conferences at Seattle Children's Hospital. (Limit per rotation: one student.) Prerequisite: PEDS core clerk ship. Offered: AWSpS.
PEDS 672 P-Office Practice - Spokane (*, max. 12) Grandinetti, Harper Opportunity to observe and function in the private office settings of a number of clinical pediatric faculty and to accompany pediatricians as they pursue their daily activities in the community.

Limit per rotation: one student). Prerequisite: PEDS core clerkship. Offered: ASWpS.
PEDS 673 P-Office Practice (*, max. 12) Smith Opportunity to observe and function in the private office settings of a number of clinical pediatric faculty and to accompany pediatricians as they pursue their daily activities in the community. (Limit per rotation: one student). Prerequisite: PEDS core clerkship and permission of course faculty. Offered: AWSpS.
PEDS 674 P-Pediatric Genetics - Spokane (*, max. 24) Martin Clinical focus on evaluation and management of children with genetic disorders. Exposure to genetic counseling, the evaluation of children with hereditary structural defects, and diagnosis and management of children with inborn errors of metabolism. Emphasis on genetic mechanisms that cause human disease. (Two or four weeks. Limit per rotation: one student). Prerequisite: PEDS core clerkship. Offered: AWSpS.
PEDS 675 P-Clinical Elective in Complementary and Alternative Medicine (4/8, max. 8) Breuner Clinical elective for students interested in a better understanding of CAM. Includes four different weekly clinical placements with selected CAM providers in the community: naturopathic physician, chiropractor, acupuncturist, and massage therapist. Also includes a weekly two-hour seminar discussing the evidence supporting the use of alternative treatments. (Limit per rotation: one student). Prerequisite: PEDS and permission of course faculty. Offered: AWSpS.

PEDS 677 P-Pediatric Intensive Care (8) Students manage patients with the supervision of the Pediatric Critical Care attending or fellow at Seattle Children's Hospital. Includes the opportunity to manage patients with complex multisystem disease and learn key elements of acute resuscitation in the intensivecare setting. (Limit per rotation: one student). Prerequisite: PEDS core clerkship and permission of course faculty. Offered: AWSpS.
PEDS 678 P-Pediatric Infectious Diseases - Boise (*, max. 24) Rand Students see and work up clinic consultations and present in detail to attending physician. Daily rounds include problem-solving discussions and didactic presentations in broad category of infectious diseases. Opportunity for experience in clinical research and laboratory techniques. (Limit per rotation: one student). Prerequisite: PEDS and MED core clerkships; third- or fourth-year medical student standing. Offered: AWSpS.

PEDS 679 P-Clinical Problems in Developmental Disabili-
ties (*, max. 12) Zinner Experience in multidisciplinary evaluation and management of the handicapped child. Student performs pediatric evaluations, obtains appropriate consultations, observes additional professional assessments (e.g., psychological testing), and plans rehabilitation program. Opportunity to provide parent counseling. (Limit per rotation: one student). Prerequisite: PEDS core clerkship and permission of course faculty. Offered: AWSpS.

PEDS 680 P-Pediatric Clinics (*, max. 24) Bennett One to ten half-day sessions may be elected each week for four weeks in the following areas: general pediatrics, endocrinology, neurology, immunology, arthritis, cardiology, congenital defects and retardation, wellchild, teratology, adolescent medicine, allergy, cystic fibrosis, hematology, prematurity, neonatology, and poison control. Enrollment limited. Prerequisite: PEDS core clerkship.

PEDS 681 P-Pediatric Genetics (*, max. 24) Adam Clinical focus on evaluation and management of children with genetic disorders. Exposure to genetic counseling, the evaluation of children with hereditary structural defects, and diagnosis and management of children with inborn errors of metabolism. Emphasis
on genetic mechanisms that cause human disease (Two or four weeks. Limit per rotation: one student). Prerequisite: PEDS core clerkship. Offered: AWSpS.

PEDS 683 P-Pediatric Nephrology (8) Symons Four-week elective clerkship at Seattle Children's Hospital. Students participate in nephrology and transplant rounds, consult with renal fellows and attendings, and work up patients in renal clinics. Participation in seminars; special course in fluid balance. (Limit per rotation: two students). Prerequisite: third- or fourthyear medical student, PEDS and MED core clerkships and permission of course faculty. Offered: AWSpS.

PEDS 684 P-Pediatric Pulmonary Medicine (8) Redding Respiratory disorders, diagnostic techniques, and treatments unique to children in the inpatient, intensive care, and outpatient settings. Application of principles of pulmonary physiology to clinical problems. Students conduct consultations under the supervision of the attending and present a topic of choice. Inpatient rounds and clinics. (Limit per rotation: one student). Prerequisite: PEDS core clerkship, fourthyear medical student standing. Offered: AWSpS.

PEDS 685 P-Pediatric Hematology and Oncology (*, max. 24) Geyer One-on-one teaching plus four weekly didactic sessions. Specific training in techniques and interpretation of bone marrow aspirations, intravenous chemotherapy, transfusions, and laboratory techniques of hematologic evaluation. Self-learning programs available. (Two or four weeks, full-time. Limit per rotation: one student). Prerequisite: PEDS core clerkship. Offered: AWSpS.
PEDS 686 P-Pediatric Cardiology (*, max. 24) Johnston Emphasis on physical diagnosis and electrocardiography and on clinical knowledge of diagnostic techniques and surgical possibilities for inpatients and outpatients with cardiovascular problems. Opportunity to observe catheterizations and cardiovascular operations. Weekly clinics and twice-daily inpatient rounds. (Limit per rotation: one student). Prerequisite: PEDS core clerkship. Offered: AWSpS.
PEDS 690 P-Advanced Pediatric Clerkship - Boise (*, max. 24) Brown Inpatient and/or outpatient experience with responsibilities comparable to intern for patient workup, diagnosis, and care at St. Lukes Hospital. (Limit per rotation: one student). Prerequisite: PEDS core clerkship. Offered: AWSpS.
PEDS 691 P-Advanced Pediatric Clerkship - Seattle (*, max. 24) Bennett Inpatient and/or outpatient experience with responsibilities comparable to intern for patient workup, diagnosis, and care as Seattle Children's. (Limit per rotation: one student). Prerequisite: PEDS core clerkship. Offered: AWSpS.

PEDS 692 P-Advanced Pediatric Clerkship - Spokane (*, max. 24) Fregeau Inpatient and outpatient experience with responsibilities comparable to intern for patient workup, diagnosis, and care at Sacred Hearth Children's Hospital. (Limit per rotation: one student). Prerequisite: PEDS core clerkship. Offered: AWSpS.
PEDS 693 P-Advanced Pediatric Subinternship - Mary Bridge (*, max. 24) Inpatient and outpatient experience with responsibilities comparable to intern for patient workup, diagnosis, and care. Prerequisite: Core Clerkship in PREDS, OB/GYN, I-Med, Surgery.

PEDS 697 P-Pediatric Special Electives (*, max. 24) Smith By specific arrangement, for qualified students, special clerkship externship or research opportunities at institutions other than University of Washington. The faculty can advise of possible opportunities. Obtain special assignment form from Dean's office at least one month before preregistration. Prerequisite: permission of department and the away site. Offered: AWSpS.

PEDS 699 P-WWAMI Pediatrics Special Electives (*, max. 24) Smith By special arrangement for qualified students, special clerkships or externships may be within the WWAMI region. Prerequisite: permission of department and the away site. Offered: AWSpS.

## Pharmacology

E401 Health Sciences

Pharmacology is the science that deals with the nature of interactions between drugs and biological systems, and with the applications of such interactions to the treatment of disease. Courses in this field are given for medical, dental, pharmacy, nursing, and graduate students.

## GRADUATE PROGRAM

Graduate Program Coordinator
E-417 Health Sciences, Box 357280
(206) 685-9252
phcoladm@uw.edu

The Department of Pharmacology offers the Doctor of Philosophy degree

## Doctor of Philosophy

## Admission Requirement

A baccalaureate degree with a major in any of the sciences, such as biochemistry, chemistry, pharmacy, physics, physiology, psychology, or zoology. Students are selected from the applicant pool based on several criteria, including academic records, recommendations, and previous research experience.

## Graduation Requirements

Minimum 90 credits, to include:

1. PHCOL 510, PHCOL 511, PHCOL 512, and PHCOL 513 ( 2 credits each) with a grade of 2.7 or above for each class. Enrollment in PHCOL 507 throughout graduate school. PHCOL 514 in the first, second, and third years of graduate study.
2. PHCOL 519 (laboratory rotations) for autumn, winter and spring quarters of the first year with the purpose of acquainting the student with various areas of pharmacology and research under investigation within the department. During each quarter, the student carries out a research project in the laboratory of a faculty member. At the end of the quarter, the student gives a presentation on the rotation research project that is evaluated by the faculty, using the criteria of scientific content, delivery, knowledge of the subject, and organization of material. The student receives a grade and academic credit for PHCOL 519. Students entering the Ph.D. program with an M.S. degree or equivalent may petition to enroll in only one quarter of PHCOL 519 before selecting a lab. Rotations may occur outside the department by special permission only.
3. Four advanced 2-3 credit graded elective courses in pharmacology in addition to the PHCOL 510-PHCOL 513 series. Nine graded credits (non-seminar) in graduate-level courses in physiology, biochemistry, molecular biology, immunology, cell biology, or other relevant areas. The courses should strengthen the foundation of the student's thesis proposal.
4. Creditable passage of the general examination consisting of a comprehensive take-home written exam on general pharmacology, taken during summer quarter of the second year, followed by preparation of a grant
proposal on the thesis project, and an oral examination, given by the Supervisory Committee during the first quarter of the third year of study. The student is evaluated on the proposed dissertation research and on his or her knowledge of the major disciplines important to the research. Based on the student's performance, the committee recommends approval and candidacy for the PhD degree, further work and subsequent reexamination, or termination.
5. After successful completion of the general examination, the student devotes most of his or her time to thesis research in the third and subsequent years of study. Students are expected to finish all degree requirements and complete their thesis research within a sixyear time period from matriculation.
6. The research project for the Ph.D. dissertation is chosen by the candidate and faculty sponsor and approved by the candidate's Supervisory Committee. Research must represent a worthy and fundamental contribution showing originality in concept and implementation.
When the candidate has concluded the research project and prepared a complete copy of the dissertation, the sponsor obtains approval of the Graduate School and sets a date for the final examination. The final examination is concerned principally with the subject matter of the dissertation, but may include the background and origins of the dissertation problem as well as its practical applications and extrapolations.

## Financial Aid

Financial support is offered to students who maintain satisfactory academic progress. Tuition and stipends are provided by National Institutes of Health training grants, University of Washington teaching assistantships, individual research grants, and fellowships from private sources.

## COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations.

PHCOL 401 General Pharmacology I (2-4, max. 4) WangPrinciples governing drug-receptor interactions, dose-response relationships, desensitization, and tolerance. Drug toxicity, allergy, mutagenesis, and carcinogensis. Pharmocogenomics and DNA/RNA therapies. General pharmacology of drugs acting on the endocrine and vascular systems. For pharmacy students and other undergraduates. Recommended: background in biology, biochemistry, and introductory physiology. Offered: A.
PHCOL 402 General Pharmacology II (3/4) Storm General pharmacology of drugs acting on the autonomic, cardiovascular, and central nervous systems. For Pharmacy students and other undergraduates. Prerequisite: PHCOL 401. Offered: W.

PHCOL 434 General Pharmacology (2) Grubbs Lectures concerning the action of drugs on physiological and pathological processes with special emphasis on agents of special importance in the practice of dentistry. For dental students. Offered: A.

PHCOL 435 General Pharmacology (2) Grubbs Lectures concerning the action of drugs on physiological and pathological processes with special emphasis on agents of special importance in the practice of dentistry. For dental students. Offered: W.

PHCOL 498 Undergraduate Thesis (*) Offered: A.
PHCOL 499 Undergraduate Research (*) Participation in departmental research projects. Offered: AWSpS.

PHCOL 507 Pharmacology Seminar (1) Presentation of comprehensive reports on recent medical and scientific literature in fields of current importance.

Research progress reports, and reports on results of completed research. Prerequisite: permission of instructor. Offered: AWSp.

PHCOL 510 Drug Discovery and Emerging Therapeutics (2) Zheng Consideration of the general principles and current approaches involved in modern drug discovery and development, with an emphasis on basic concepts in drug action, delivery, and metabolism. Discussion of novel drug discovery techniques and emerging non-standard therapeutics. Prerequisite: organic chemistry, biochemistry, and introductory anatomy and physiology. Offered: W.
PHCOL 511 Autonomic/Cardiovascular Pharmacology (2.5) Nathanson Consideration of the pharmacology of the cardiovascular and autonomic nervous systems. Emphasizes the mechanisms of neurotransmitter, hormone, drug action at autonomic synapses, and the molecular basis for physiology and pathophysiology of the cardiovascular system. Lectures, group discussion, and analysis of recent research. Prerequisite: organic chemistry, biochemistry, and introductory anatomy and physiology. Offered: W.
PHCOL 512 Neuropharmacology (2) Bajjalieh Consideration of the neurobiological basis of drug action on the central nervous system, including mechanism of action and therapeutic use in psychiatric disorders; neurodegeneration/neuroinflammation; control of neuronal excitability and pain; and drug abuse and addition. Lecture, group discussion, and analysis of recent research. Recommended: organic chemistry, biochemistry, and introductory anatomy and physiology. Offered: Sp.

PHCOL 513 Endocrine Pharmacology and Chemotherapuetics (2) McKnight Consideration of the pharmacology of endocrine systems including the hypothalamic/pituitary regulatory peptides, glycoprotein hormones/ growth factors, peptide and steroid hormones. Basic principles of chemotherapy of endocrine and other cancers, as well as viral and microbial diseases. Lecture, group discussion, and analysis of recent research. Prerequisite: organic chemistry, biochemistry, and introductory anatomy and physiology. Offered: Sp.
PHCOL 514 Current Topics in Pharmacology (1) Gardner Current research related to the mechanisms of drug action presented in a seminar format. Presentations include relevant background material as well as detailed experimental results taken from current research articles. Prerequisite: permission of instructor. Offered: AWSp.
PHCOL 515 General Pharmacology Laboratory (*, max. 9) Laboratory course for professional and graduate students who wish to do independent laboratory research under the direction of a specific faculty member. Prerequisite: permission of instructor. Offered: AWSp.
PHCOL 519 Introduction to Laboratory Research in Pharmacology (4) Storm On a rotation basis students carry out individual research projects in the laboratories of different faculty members. At the end of each quarter students make formal presentations of their work. For first-year graduate students in pharmacology. Offered: AWSpS.
PHCOL 529 Ion Channel Pharmacology (2) Catterall, Tempel Current topics in ion channel structure, function, genetics, and pharmacology, including consideration of role in electrical signaling in cell membranes and information transfer and processing in nervous system, inherited diseases of ion channels, and sites and mechanisms of action of drugs and toxins. Prerequisite: CONJ 532 and CONJ 536 or permission of instructor. Offered: A, odd years.

PHCOL 530 Neuronal Signaling Pathways (2) Beavo, Hague, Storm, Xia Advanced consideration of the molecular events between drug or hormone binding to receptors and the resulting responses. Emphasizes roles played by signal transduction pathways in regulation of synaptic plasticity, memory formation, neuronal apoptosis, and developmental neurobiology. Prerequisite: UCONJ 532 or permission of instructor. Offered: W, even years.
PHCOL 531 Genetic Analysis of Signaling Systems (3) McKnight, Moon Current topics involving signal transduction are discussed with an emphasis on genetic analysis of multicellular systems and creative experimental design. Prerequisite: 9 credits of graduatelevel courses in molecular and cellular biology, biochemistry, or genetics, or permission of instructor. Offered: Sp, odd years.

PHCOL 534 Molecular Basis of Addictive Drug Action (2) Chavkin, Phillips, Stella Advanced consideration and discussion of current literature addressing the basis of opiate, psychostimulant, and cannabinoid effects on signal transduction events, electrical activity of neurons, and drip-motivated behaviors in animal models of human drug abuse. Prerequisite: PHCOL 512 or permission of instructor. Offered: A, even years.
PHCOL 535 Transcriptional Control in Human Disease (3) Bomsztyk, Wang Advanced consideration and discussion of the mechanisms regulating transcription/ gene expression and of aberrant transcription factors which disrupt this process found in cancer and other human diseases. Prerequisite: PHCOL 512 or permission of instructor. Offered: Sp , even years.
PHCOL 550 An Overview of Faculty Research (1) Wang Reviews research topics currently being studied in pharmacology. Student reads articles published on each topic. Credit/no-credit only. Prerequisite: first year student standing in pharmacology. Offered: A.
PHCOL 560 Regulation of Cell Function by Cyclic Nucleotide Phosphodiesterases (1) Beavo Discussion of research strategies, methodologies, and literature relating to regulation of cyclic nucleotide levels in the cell. Emphasis on practical problem solving, data analysis, and presentation of methods important to understanding published data and designing new ex periments in this area of research. Credit/no-credit only. Prerequisite: permission of instructor. Offered: AWSpS.
PHCOL 561 Molecular Properties of Ion Channels (1) Catterall Discussion of research strategies, method ologies, and literature concerning the structure, function, and regulation of sodium and calcium channels and the mechanism of action of drugs on them. Emphasis on experimental problem solving, data analysis, and presentation. Credit/no-credit only. Prerequisite: permission of instructor. Offered: AWSpS.
PHCOL 562 Molecular Basis for Motivated Behavior (1) Chavkin Discussion of research strategies and methodologies involved in the regulation of motivated behavior by understanding signal transduction and synaptic physiology. Emphasis on practical problem solving, data analysis, and presentation methods important to modern scientific work. Credit/no-credit only. Prerequisite: permission of instructor. Offered: AWSpS.
PHCOL 563 Signal Transduction Mechanisms in Neuroplasticity and Neuron Growth (1) Storm Discussion of research strategies, methodologies, and literature relating to signal transduction mechanisms important for neuroplasticity and regulation of neuron growth in the central nervous system. Emphasis on practical problem solving, data analysis, and presentation methods important to modern scientific work. Credit/
no-credit only. Prerequisite: permission of instructor. Offered: AWSpS.
PHCOL 564 Cellular Regulation by Protein Kinases (1) McKnight Analysis of research problems, techniques, and emerging concepts in the study of the function of protein kinases. Emphasis on critical evaluation of research and development of presentation skills. Credit/no-credit only. Prerequisite: permission of instructor. Offered: AWSpS.
PHCOL 565 Intercellular Signaling in Development (1) Moon Molecular genetic approaches to dissecting the roles and mechanisms of intracellular signaling during development. Emphasis on vertebrate genes related to Drosophilia segment polarity genes. Credit/ no-credit only. Prerequisite: permission of instructor. Offered: AWSpS.
PHCOL 566 Molecular Pharmacology of Neurotransmitter and Neurokine Receptors (1) Nathanson Discussion of research strategies and methodologies in the areas of molecular neurobiology and signal transduction of muscarinic receptors, G-proteins, and neurokine receptors. Emphasis on practical problem solving, data analysis, and presentation methods important to modern scientific work. Credit/no-credit only. Prerequisite: permission of instructor. Offered: AWSpS.

PHCOL 567 Mechanisms of Carcinogenesis (2) Xia Lectures/presentations of biochemical and molecular basis of carcinogenesis induced by environmental agents, including approaches to identification of carcinogens. Role of cell proliferation and cell death (apoptosis) in cancer formation and cancer treatment. Molecular mechanisms that regulate proliferation and apoptosis. Prerequisite: ENV H 516, ENV H 405, or permission of instructor. Offered: jointly with ENV H 567; A.

PHCOL 569 Molecular Genetics of Potassium Channel Function (1) Tempel Discussion of research strategies, methodologies, and literature concerning the structure, function, and regulation of potassium channel genes and their role in behavior as studied in mutant mice. Emphasis on experimental problem solving, data analysis, and presentation. Credit/no-credit only. Prerequisite: permission of instructor. Offered: AWSpS.

PHCOL 571 Molecular Mechanisms of Neurosecretion (1) Bajjalieh Discussion of research strategies, methodologies, and literature relating to regulation of cyclic nucleotide levels in the cell. Emphasis on experimental problem solving, data analysis, and presentation. Credit/no-credit only. Prerequisite: permission of instructor.
PHCOL 572 Transcriptional Regulation of Growth Control Genes (1) Wang Discussion of research strategies, methodologies, and literature relating to proliferative growth control, cellular differentiation, and gene expression. Emphasis on practical problem solving, data analysis, and presentation. Credit/no-credit only. Prerequisite: permission of instructor.
PHCOL 573 Signaling Systems Linked to Neuroinflammation (1) Stella Discussion of research strategies, methodologies, and literature related to neuroinflammation, microglial cell activation, and the cannabinoid signaling pathway. Emphasis on solving practical problem, data analysis, and presentation. Prerequisite: permission of instructor. Offered: AWSp.S.

PHCOL 575 Structural Biology of Ubiquitination (1) Zheng Discussion of research strategies, methodologies and literature concerning the structure, function, and regulation of ubiquitin-protein ligases and the mechanism underlying ubiquitination and ubiquitindependent proteolysis. Emphasis on experimental problem solving, data analysis, and presentation.

Credit/no-credit only. Prerequisite: permission of instructor. Offered: AWSpS.
PHCOL 576 Pharmacological, Molecular, and Functional Characterization of G-protein Coupled Receptors (1) Hague Discusses research strategies, methodologies, and literature relating to the pharmacological characterization, molecular biology, and functional coupling of GPCRs. Emphasizes practical problem solving, data analysis, and presentation. Prerequisite: permission of instructor. Credit/no-credit only. Offered: AWSpS.
PHCOL 577 Regulatory Roles of Ubiquitin in the Nucleus (1) Gardner Focuses on the design and implementation of research aimed at understanding the nuclear functions of the small protein modifier ubiquitin. Strongly emphasizes the understanding of current literature, experimental design and troubleshooting, data analysis, and presentation of experimental results. Prerequisite: permission of instructor. Credit/ no credit only. Offered: AWSpS.

PHCOL 578 A-Kinase Anchoring Proteins in Cell Signaling Research (1) Scott Focuses on the design and implantation of research A-Kinase anchoring proteins in cell signaling. Emphasizes understanding experimental design and troubleshooting, data analysis, and presentation of experimental results. Credit/no-credit only. Offered: AWSpS.
PHCOL 579 Genetic Regulation of Emotional Behavior (1) Zweifel Provides background in the materials and methods used in the study of the genetic basis of learning and memory and neural circuit function achieved through discussion of current literature, data acquisition and analysis, and experimental design. Offered: AWSpS.
PHCOL 580 Proteomics for Cellular Systems (1) Ong Discusses and reviews literature for proteomics and other genome-wide approaches to study cellular systems. Trains students to integrate knowledge form existing literature with ongoing laboratory research to enhance data analysis and experimental design. Offered: AWSpS.
PHCOL 600 Independent Study or Research (*) Pharmacology graduate students only. Offered: AWSpS.
PHCOL 700 Master's Thesis (*) Pharmacology graduate students only. Offered: AWSpS.
PHCOL 800 Doctoral Dissertation (*) Pharmacology graduate students only. Offered: AWSpS.

## Physiology and Biophysics

G424 Health Sciences

Physiology deals with the processes, activities, and phenomena incidental to, and characteristic of, life and living organisms. Based upon physics, chemistry, and mathematics, physiology interlocks closely with the other basic medical sciences anatomy, molecular biology, immunology, biochemistry, pharmacology, and pathology and with psychology. Research in physiology is accomplished by analyzing the molecular, cellular, and integrative properties of the system under study. For this reason, physiology appeals to students with diverse backgrounds and goals. Courses in this field are given for medical, dental, pharmacy, nursing, and graduate students.

## GRADUATE PROGRAM

Graduate Program Coordinator

G424 Health Sciences, Box 357290
(206) 685-0519
pbio@uw.edu

The Department of Physiology and Biophysics offers advanced instruction and training leading to both the Master of Science and Doctor of Philosophy degrees. Students aspiring only to the M.S. degree are rarely accepted. Students pursuing a PhD degree in physiology and biophysics may emphasize molecular and cellular physiology, biophys ics, neurobiology, respiratory physiology, or endocrinology. Studies leading to the doctoral degree require five to six years to complete. The first year is spent acquiring a broad knowledge of physiology via a sequence of courses and laboratory rotations. After selection of a special area of study, the second year is spent taking advanced seminars in the area of specialization and developing a thesis proposal. After admission to candidacy, the latter years are spent pursuing the area in depth and completing an original-research project.
Individuals with graduate degrees in physiology and biophysics often pursue careers in teaching and research in colleges and universities and in biotech industries. With additional training, graduates have been successful in medicine, law, creative writing, and high-level computer programming.

The department participates in interdisciplinary PhD degree programs in Neurobiology and Behavior, and in Molecular and Cellular Biology.

## Master of Science

The Master of Science degree is normally granted as part of the path of study leading to the Doctor of Philosophy degree. Students are normally admitted only to the Doctor of Philosophy degree.

## Doctor of Philosophy

## Admission Requirements

To apply for admission, a student must provide academic transcripts, Graduate Record Examination (GRE) scores, four letters of recommendation, and a statement of purpose. Because of the broad scope and interdisciplinary nature of the graduate program, there are no specific prerequisites for admission. However, most students have backgrounds in the physical and/or biological sciences. These include majors in biology, physics, mathematics, engineering, computer science, chemistry, and psychology. The most important requirement is a strong motivation and excitement about doing science.

## Degree Requirements

## 90 credits minimum, as follows:

Due to the broad nature of research interests in the depart ment and the diversity of graduate-student backgrounds, formal course requirements are kept to a minimum and are completed in the first year. Students are encouraged to shape their own graduate education, as they choose the majority of their coursework and the scientific direction for their research. Courses available include those offered by other departments, both in the Medical School and elsewhere on campus. Electives may be chosen from a list of mini-courses whose topics reflect the current interests of faculty and students. Students are required to take at least six mini courses.

## Required Courses

1. CONJ 531 (1.5), CONJ 532 (1.5), P BIO 532 (2), NEUBEH 501 (3), NEUBEH 502 (3), P BIO 508 (2-5, max. 5; must be taken three times), P BIO 513 (4), P BIO 519 (1)
2. Six departmental mini-courses, to be completed prior to the general examination, from the following: P BIO 509 (3), P BIO 545 (3), P BIO 550 (1), P BIO 551 (1), P BIO

552 (1), P BIO 553 (2), P BIO 554 (1), P BIO 555 (1), P BIO 556 (1), P BIO 557 (1), P BIO 559 (3).
3. P BIO 600 (before general examination)
4. P BIO 800 (after general examination)
5. Note: P BIO 503 (4) is highly recommended, but not required

## General Examination

The general examination must be taken by the last day of autumn quarter of the third year. After passing the general examination the student is advanced to candidacy for the doctoral degree. The student then registers for P BIO 800 and continues working on thesis research.

## Final Examination

The culmination of the program is the submission of a written doctoral thesis and the presentation of this work in a public lecture attended by members of the department and the University.

## Research Facilities

The department is well equipped to provide instruction and research training in cellular and molecular physiology, neurobiology, membrane biophysics, respiratory physiology, muscle biophysics, endocrinology, reproduction, and physiological psychology. The facilities of the Regional Primate Research Center, adjacent to the department, are available to qualified trainees who need to use primates in their research.

## COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations.

P BIO 498 Undergraduate Thesis (*) Offered: AWSpS.
P BIO 499 Undergraduate Research (*) Offered: AWSpS.
P BIO 504 Biophysics of Nerve, Muscle, and Synapse (3) Sullivan Introduces biophysical properties of nerve and muscle cells. Topics include intrinsic electrical properties of neurons, ion channels, receptor signaling, calcium signaling, contraction of muscles, and synaptic function. Offered: jointly with NEUBEH 504; A.

P BIO 505 Human Physiology (4-) Wordeman Intensive coverage of physiology across the life span through lectures, conference. Includes excitable tissue, neurophysiology, skeletal muscle; spinal reflex; autonomic nervous system; temperature regulation, neuroendocrinology, and reproductive physiology. Required for dental, graduate nursing, and bioengineering students. Also offered for graduate students. Offered: A.

P BIO 506 Human Physiology (4) Berger Intensive coverage of physiology across the life span through lectures, conference. Includes cardiovascular, respiratory physiology, renal, body fluids, gastrointestinal, and acid base balance. Required for dental, graduate nursing, and bioengineering students. Also offered for graduate students. Prerequisite: P BIO 505, or equivalent with permission of instructor. Offered: W.

P BIO 507 Cardiovascular and Respiratory Physiology (3) Cardiovascular physiology: the heart, microcirculation, hemodynamics, regional circulation, and reflex integration. Respiratory physiology: the lung, pulmonary circulation, alveolar ventilation, gas exchange, control of breathing, acid-base regulation, exercise. Offered: W.

P BIO 508 Introduction to Laboratory Research in Physiology (1-5, max. 15) Students participate in the performance of ongoing projects in designated research laboratories. Emphasis is on experimental design, methodology, and techniques. For first- and secondyear graduate students in physiology and biophysics
to provide a basis for future independent research. Offered: AWSpS.
P BIO 509 Neuroendocrinology (3) Steiner Emphasizes the cellular and molecular aspects of several topics in neuroendocrinology, including neuropeptide genes, reproduction, steroid hormone regulation of gene expression, mechanisms of hormone action, endocrine rhythms, and neural oscillations. Prerequisite: either BIOL 201, BIOL 202, and BIOL 203, or BIOL 180, BIOL 200, and BIOL 220; BIOC 440, BIOC 441, BIOC 442 or permission of instructor. Offered: jointly with NEUBEH 541; W, odd years.
P BIO 510 Physiology Survey (2) Reading and discussion of the research literature in cellular, molecular, and systems physiology. Students write a critical evaluation of each paper in the manner of a peer review. All three quarters are required for second-year P BIO students. Prerequisite: completion of one year of $P$ BIO graduate study. Offered: A.
P BIO 511 Physiology Survey (2) Reading and discussion of the research literature in cellular, molecular, and systems physiology. Students write a critical evaluation of each paper in the manner of a peer review. All three quarters are required for second-year P BIO students. Prerequisite: completion of one year of $P$ BIO graduate study. Offered: W.

P BIO 512 Physiology Survey (2) Reading and discussion of the research literature in cellular, molecular, and systems physiology. Students write a critical evaluation of each paper in the manner of a peer review. All three quarters are required for second-year P BIO students. Prerequisite: completion of one year of $P$ BIO graduate study. Offered: Sp.

P BIO 513 Practicum in Teaching Physiology and Biophysics (4) Students undertake instructional material development, presentation of materials, and develop problem-solving techniques. Credit/no-credit only. Offered: AW.

P BIO 516 Physiological Proseminar (7) Hlastala Guided survey of the experimental literature in cardiovascular and respiratory physiology. Course conducted as seminar with oral analysis of assigned papers and topics. Prerequisite: permission of instructor. Offered: A.

P BIO 518 Research Topics in Cardiovascular Physiology (1) Feigl Graduate students and faculty members present and discuss current literature and research. Prerequisite: permission of instructor.
P BIO 519 Membrane and Muscle Biophysics Seminar
(1) Hille Lectures on current research topics in cell membrane function and muscle contraction. Credit/ no-credit only. Prerequisite: permission of instructor. Offered: Sp.

P BIO 520 Physiology Seminar (*) Selected topics in physiology. Prerequisite: permission of instructor.
P BIO 521 Biophysics Seminar (*) Selected topics in biophysics. Prerequisite: permission of instructor.
P BIO 522 Selected Topics in Respiratory Physiology (13, max. 3) Hildebrandt Advanced seminar on selected topics, including pulmonary mechanics, gas exchange, lung fluid balance, regulation of breathing, pulmonary circulation, respiration in the neonate, liquid breathing, airway dynamics, lung structure and development, cardiopulmonary interactions, exercise physiology. Prerequisite: permission of instructor. Offered: AWSpS.

P BIO 523 Heat Transfer and Temperature Regulation (2-5, max. 5) Brengelmann Thermal exchange between the body surface and the environment. Heat production and distribution within the body. Properties of cutaneous and deep temperature receptors. Neural inte-
gration and homeothermy. Prerequisite: permission of instructor.
P BIO 525 Readings in Advanced Physiology and Biophysics (*) Guided study of the experimental literature of physiology and biophysics. Essays are written and discussed with the staff. Emphasis is placed on critical analysis, accuracy of expression, bibliographical technique, and other factors of good scholarship. Prerequisite: permission of instructor. Offered: A.
P BIO 526 Readings in Advanced Physiology and Biophysics (*) Guided study of the experimental literature of physiology and biophysics. Essays are written and discussed with the staff. Emphasis is placed on critical analysis, accuracy of expression, bibliographical technique, and other factors of good scholarship. Prerequisite: permission of instructor. Offered: W.

P BIO 527 Readings in Advanced Physiology and Biophysics (*) Guided study of the experimental literature of physiology and biophysics. Essays are written and discussed with the staff. Emphasis is placed on critical analysis, accuracy of expression, bibliographical technique, and other factors of good scholarship Prerequisite: permission of instructor. Offered: SpS.

P BIO 541 Motor Systems I: Peripheral, Spinal, and Cortical Mechanisms (3) Binder, Fetz Discussion of research papers on the physiology of the motor unit and the spinal and cortical neurons that control motor unit activity. Prerequisite: NEUBEH 501-NEUBEH 503 or permission of instructor.

P BIO 542 Motor Systems II: Brainstem Mechanisms (3) Anderson, Fuchs Critical discussion of research papers and resulting concepts regarding the roles of various brainstem systems in controlling somatic and ocular movements. Each student is responsible for leading the discussion of one topic. Prerequisite: NEUBEH 502 and NEUBEH 503 or equivalent and permission of instructor.
P BIO 545 Quantitative Methods in Neuroscience (3) Rieke, Shadlen Discusses quantitative methods applicable to the study of the nervous system. Revolves around computer exercises/discussion of journal papers. May include linear systems theory, Fourier analysis, ordinary differential equations, stochastic processes, signal detection and information theory. Prerequisite: NEUBEH 501, NEUBEH 502, NEUBEH 503, or permission of instructor. Offered: jointly with NEUBEH 545; W, odd years.
P BIO 547 Readings in Cell Physiology (2/3, max. 15) Hille Reading and discussion of research literature on excitable cells. Emphasis on membrane excitability, transport, contractility, growth factors, and extracellular matrix. Topics vary. Prerequisite: CONJ 501 or equivalent. Offered: W.
P BIO 548 Molecular Mechanisms of Synaptic Plasticity (2) Barria Discusses recent primary literature on the molecular mechanisms underlying structural and functional changes of dendritic spines and synapses in the mammalian brain as result of synaptic activity and experience. Offered: jointly with NEUBEH 548; Sp , odd years.
P BIO 550 Biophysics of Calcium Signaling (1) Hille, Santana Introduction to cellular calcium signaling including theoretical and technical issues of calcium signal detection and biological conclusions. Prerequisite: CONJ 531. Offered: jointly with NEUBEH 550; Sp, odd years.
P BIO 552 Synaptic Integration (1) Binder, Powers Discus sion of recent papers on how neurons in the central nervous system integrate concurrent synaptic inputs. Includes: effects of driving force on synaptic currents, effects of conductances on dendritic properties, transfer of currents from dendrites to soma,
and transformation of currents into spike train outputs. Offered: jointly with NEUBEH 552.
P BIO 553 Learning and Memory: Synapses and Systems (2) Jagadeesh, Sullivan Five-week mini-course evaluates the current state of knowledge on the mechanisms that allow people to learn and remember. After introductory overviews of the cellular and molecular mechanisms underlying long-term synaptic plasticity and the multiple systems existing for learning and memory, students choose specific topics for discussion. Offered: jointly with NEUBEH 553.
P BIO 554 Motor Learning: Cellular and Network Mechanisms (1) Fetz, Perlmutter Five-week mini-course reviews the current state of research on cellular and network mechanisms of motor learning. After an introductory overview of behavioral and physiological examples of motor learning in various species and systems, students choose specific topics for discussion, using the primary literature as a source. Offered: jointly with NEUBEH 554.

P BIO 555 Sensory Receptors (1) Detwiler, Rieke Fivelecture mini-course examines how different kinds of sensory receptors detect and respond to different modalities of sensory stimuli. Discussion focuses on the cellular and molecular mechanisms of the underlying transduction processes and the experimental evidence that they are based on. Offered: jointly with NEUBEH 555.

P BIO 556 Axon Pathfinding Mechanisms (1) Bothwell Examines mechanisms governing axon growth cone behavior during embryonic development and during regeneration in the injured adult. Discusses approaches employing both invertebrate and vertebrate model systems. Offered: jointly with NEUBEH 556.

P BIO 557 Ion Channel Gating (1) Zagotta Compares and contrasts mechanisms of gating in ligand-gated and voltage-gated ion channels. Covers basics of ligand gating and voltage gating, kinetic schemes, inactivation and desensitization, gating currents and partial agonists, and ion channel structure. Offered: jointly with NEUBEH 557.

P BIO 558 Concepts and Mechanisms in Mitosis (2) Ashbury, Wordeman Examines how the miotic spindle organizes and separates duplicated chromosomes during cell division. Overview of spindle components and key mechanistic concepts. Discusses recent or classic papers from the primary literature.

P BIO 559 Neurobiology of Disease (3) Garden, Moeller, Neumaier, Weiss Introduces medically important neurological and psychiatric diseases and experimental approaches to understanding the basis for diseases and their treatments. Covers stroke, epilespsy, autoimmune diseases of the CNS, neurodegenerative diseases, autism, psychosis, anxiety disorders and mood disorders. Offered: jointly with NEURL 559/ NEUBEH 559.

P BIO 561 From Biophysics to Neural Computation (2) Introduces the mathematics and methods of neuronal modeling. Develops, compares, and relates dynamical systems approaches and empirical characterizations of neuronal function. Includes lectures, student-led journal paper discussions, biweekly computational workshops on neuronal modeling packages, and a computations project. Recommended: differential equations and linear algebra. Offered: jointly with NEUBEH 561; Sp.
P BIO 594 Neurological Study Unit (0.5) Faculty and student discussion of neurological topics illustrated with clinical cases or demonstrations include the following: physiology, neuroanatomy, neurology, neuropathology, neurosurgery, and psychiatry. Credit/no-
credit only. Prerequisite for medical students: HUBIO 532. Offered: AW.

P BIO 600 Independent Study or Research (*) Offered: AWSp.
P BIO $\mathbf{7 0 0}$ Master's Thesis (*) Offered: AWSpS.
P BIO 800 Doctoral Dissertation (*) Offered: AWSpS.

## Psychiatry and Behavioral Sciences

BB1644 Health Sciences
pbsci@uw.edu

The department offers coursework, clinical training, and research opportunities for undergraduate students, medical students, graduate physicians, and graduate students in allied health programs such as psychology, social work, and psychiatric nursing.

A biobehavioral approach is emphasized, which incorporates intrapersonal, interpersonal, and sociocultural factors. Intrapersonal factors include emotion, perception, cognition, psychodynamics, neurochemistry, neuroanatomy, neurophysiology, genetics, and the developmental and aging processes. Interpersonal factors focus upon dyadic, familial, and group interactions. Sociocultural factors include the cultural, social, institutional, and community systems as well as the environment and epidemiology of health and disease.

## GRADUATE PROGRAM

The Medical School curriculum is divided into a core (basic) curriculum and an elective curriculum. Within its core curriculum the Department of Psychiatry and Behavioral Sciences offers material covering learning theory, cognition, memory, perception, neuropharmacology, social growth and development, epidemiology of health and disease, psychopathology, psychotherapy, and neuropsychiatry and behavioral medicine, as well as training in interviewing skills and assessment techniques. Its elective program includes a variety of clinical experiences and advanced didactics and seminars designed to further the knowledge and skills developed within the basic curriculum. In addition, the department encourages research and other scholarly pursuits by students in areas of interest to them. Stipends are available for research studies.

## Residency Training in Psychiatry

A four-year residency for medical school graduates and a three-year post-internship residency prepares physicians for Specialty Board Certification in Psychiatry. Clinical rotations on inpatient, outpatient, emergency, and consultation/liaison services are augmented by individual supervision and didactic lectures. With the program's integrative orientation, residents become proficient in psychotherapy, psychopharmacology, and community liaison with patients of all ages. Fellowships in child, geriatric, addiction, community, forensic and consultation-liaison psychiatry, and psychiatric neuroscience are available.

## Clinical Psychology Internship Program

The one-year internship in clinical psychology, accredited by the American Psychological Association, offers advanced clinical training to candidates for the doctorate in clinical psychology from graduate programs accredited by the American Psychological Association. Training tracks with the internship in general adult, general child, rehabilitation and health psychology, and public behavioral health and justice policy (adult and child). Advanced research
skills training is also available as part of an INH-funded training grant for selected internship participants.

## Postdoctoral Fellowship Training

Postdoctoral fellowships for advanced clinical and research training in behavioral medicine, broadly construed, are also offered.

## COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, sym bols, and abbreviations.
PBSCI 498 Undergraduate Thesis (*) Opportunity to complete work on psychiatric research projects or to pursue a specific psychiatric topic in depth, for instance, through library research
PBSCI 499 Undergraduate Research (*, max. 15) Opportunities are available for participation in a wide variety of ongoing research in the behavioral sciences and clinical psychiatry, or for the development of an individual investigative project under the supervision of a faculty sponsor.

PBSCI 505 P-Psychiatry Preceptorship (1) Combs Opportunity for first- and second-year medical students to gain direct experience with clinical faculty members in psychiatry. Includes opportunities to observe different areas of psychiatry including addiction, child, geriatrics, community, crisis, and consultation. Prerequisite: permission of department. Offered: AWSp.
PBSCI 515 War and Mental Health (1) Examines the impact of war on mental health in both military and civilian populations. Focuses on posttraumatic stress disorder, including assessment, treatment, epidemiology, and neurobiology. Addresses other psychiatric disorders, substance abuse, brain injury, and psychosocial effects. Credit/no-credit only. Offered: jointly with G H 557.

PBSCI 525 P-Psychiatry and the Law (3) Goldenberg Concentration on major issues in psychiatry and law. Outside speakers from legal, judicial, and psychiatric communities. Lectures on assessment in forensic settings, competence to stand trial, and criminal responsibility. Discussions on personality disorders and correctional environments. For medical students, psychiatric residents, and graduate psychology, psychosocial nursing, social work, and law students.

PBSCI 530 P-Developmental Psychoanalytic Psychotherapy (2) Schimmelbusch Examines how failures of psychological development lead to disorders of regulation of affects and cognition, and how psychoanalytic treatment reinstitutes normal development. Treat ment process viewed from a psychoanalytic and psychobiological perspective. Clinical case discussion integrates theoretical concepts.
PBSCI 535 Modern Concepts of Psychoanalysis (2) Schimmelbusch Examines childhood developmental stages in light of inborn and environmental determinants. Correlates developmental phases with adult personality functioning. Views emotional development from a psychoanalytic and psychobiological point of view. Clinical case discussion integrates theoretical concepts.
PBSCI 546 Psychiatric Epidemiology (3) Vander Stoep Applies epidemiological methods to the study of mental illnesses. Topics include historical studies; distribution of mental illness, classification and measurement; epidemiology of depression; genetic and environmental etiological factors; developmental epidemiology. Prerequisite: either EPI 511, EPI 512, HSERV 591, or permission of instructor. Offered: Sp.

PBSCI 548 P-Aging and Adult Development (1-3, max. 3) Aging in Western technologically advanced societies
frequently involves losses in status, stamina, and economic and social supports. Consideration given to losses among the aged. Students select projects in the area of aging and work at their own levels of expertise and sophistication. Seminar format with guided reading.
PBSCI 560 P-Psychological Interventions for Primary Care Physicians (1) Kent Focuses on the integration of primary care and mental health issues. Reading, lectures, videos, and role plays are utilized to review evidenced-based psychological interventions which can be employed in an outpatient primary care setting. Emphasizes issues of somatization, depression, anxiety, and health behavior change.
PBSCI 591 P-Seminars and Conferences in Psychiatry: Seminar in Clinical Neuropsychology (*) Introduction to neuropsychological studies of brain-behavior relationships. Exposure to neuropsychological assessment procedures and manifestation of neurocognitive deficits in selected mental and medical disorders, e.g., epilepsy, AIDS, sleep disorders, trauma, toxin exposure, vascular disorders, psychiatric disorders. Develop knowledge of neuropsychological assessment procedures and applications to diverse medical conditions. Prerequisite: psychological assessment experience.
PBSCI 600 Research in Psychiatry (1-15) Independent laboratory research under the guidance and supervision of research scientists in the Psychiatry Department. Faculty permission required.

PBSCI 630 P-WRITE Psychiatry Clinical Clerkship (*, max. 24) Basic clinical clerkship for students enrolled in the WRITE Program. Prerequisite: completion of basic curriculum; third- and fourth-year students; acceptance in the WRITE program.
PBSCI 662 P- Basic Psychiatry Clerkship - Missoula (12) Students work at St. Patrick Hospital with adult and adolescent inpatients and in the emergency room for emergent-care exposure. Students have outpatient experience through the adult intensive outpatient program, Pain Treatment Center, and in faculty outpatient practices. Didactics include psychopharmacology, addiction, psychosis, mood disorders, child and geriatric psychiatry. Prerequisite: completion of the HUBIO series; third and fourth year students.

PBSCI 663 P- Basic Psychiatry Clerkship - Billings (12) Students work at South Center Regional Mental Health Center and Behavioral Sciences Clinic with adult and adolescent inpatients, in the emergency room for emergent care exposure. Outpatient experience including consultations at the community mental heaoth center, Indian reservation, and prison. Didactics include psychopharmacology, addiction, psychosis, mood disorders, child and geriatric psychiatry. A vehicle is needed by students at this site. Prerequisite: completion of the HUBIO series; third and fourth year students.

PBSCI 665 P-Basic Clinical Clerkship (*, max. 24) Inpatient clerkship in psychiatry. Students have primary responsibility under the direction of attending psychiatrists and residents for diagnosis and care of patients at University of Washington Medical Center, Harborview Medical Center, or Veterans Administration Hospital. Emergency room, crisis intervention, consultation to patients with psychiatric dysfunction. Familiarity with psychopharmacology and short-term hospitalization emphasized. (Six weeks, full-time.)
PBSCI 666 P-WWAMI Psychiatry and Behavioral Sciences Clerkship (12) Rotation aims to increase student's skills in basic psychiatry, social psychiatry, transcultural psychiatry, and community psychiatry. Orientation is around the diagnosis, treatment, and clinical management of white, Aleut, Indian, and Eskimo children and adults in outpatient, inpatient, and com-
munity settings. Third-, fourth-year medical students. (Limit: Two or three students). Prerequisite: HUBIO 563.

PBSCI 667 P-Basic Psychiatry Clerkship - Boise (12) Basic psychiatry clerkship at Veterans' Administration Medical Center in Boise, Idaho. Fulfills graduation requirement for clerkship in psychiatry.
PBSCI 668 P-Psychiatry Clerkship - Spokane (12) Students work on adult, geriatric, and adolescent inpatient psychiatric units of Sacred Heart Medical Center, following patients after transfer to partial hospitalization or outpatient clinic. Didactics include basic psychiatric diagnosis, treatment, and pharmacotherapy. (Limit: two or three students). Prerequisite: completion of HUBIO series; third and fourthyear medical students.
PBSCI 669 P-Basic Psychiatry Clerkship - Wyoming (12) Students work in the Wyoming Behavioral Institute with adult, adolescent, and child inpatients. Students have some outpatient experience and emergent care assessment experience at the Wyoming Medical Center. Didactics and discussion include topics such as psychopharmacology, emergent care and assessment, diagnosis, and substance abuse issues.
PBSCI 670 P-Clerkship in Consultation/Liaison Psychiatry - UWMC (*, max. 24) Assessment of patients with major psychosocial problems associated with physical disease, including: problems stemming from the way the illness is perceived and experienced, liaison with other clinical disciplines on complex diagnosis and treatment of problems. (Limit: one student; two or four weeks.) Prerequisite: satisfactory completion of required psychiatry clerkship.

PBSCI 671 P-Clerkship in Consultation/Liaison Psychiatry - HMC (*, max. 24) Students receive organized instruction and supervised clinical experience in the evaluation of psychiatric and/or behavioral problems in patients on medical and surgical services, and in effectively consulting with their health care providers regarding their clinical management. Prerequisite: completion of required 3rd year clerkship. Includes evaluation of (non-financial) decisional competency. (Limit: two students). Prerequisite: satisfactory completion of required psychiatry clerkship.
PBSCI 672 P-Elective Clerkship in Primary Care Psychiatry - Boise, VAMC $\mathbf{( 8 / 1 2 )}$ Assessment and treatment of patients with acute psychiatric problems in a primary care/rural setting. Consultation work on general medicine and surgery; assessment and dealing with outpatient psychiatric problems as they initially present. Evaluations, crisis intervention strategies, and brief therapies stressed. Prerequisite: satisfactory completion of required psychiatry clerkship (Four or six weeks; visiting students interested in the Boise Psych Residency Track allowed.)
PBSCI 673 P-Outpatient Psychiatry Elective (*, max. 24) Offered at Harborview Outpatient Center. Students function as subinterns, conducting diagnostic interviews, initiating and managing pharmacotherapeutic treatment regimens, and providing crisis intervention, under the supervision of the full-time attending at Psychopharmacology Clinic. (Four to six weeks, full-time). Prerequisite: satisfactory completion of required psychiatry clerkship.
PBSCI 676 P-Inpatient Clerkship in Psychiatry - American Lake VA (8/12) Johnston For medical students with a defined interest in psychiatry who wish to develop their knowledge and skills in the evaluation, management, and treatment of a wide range of acute and chronic psychiatric conditions requiring inpatient hospital treatment. (Four or six weeks, full-time). Prerequisite: satisfactory completion of required psychiatry clerkship.

PBSCI 677 P-Alcohol and Drug Treatment Clerkship American Lake VA (8/12) Lim Student assists in every phase of the substance-abuse treatment, including admission interviews, patient evaluation, problem identification, group and individual psychotherapy, assertiveness training, anger control, human sexual ity, medical evaluation and treatment, couples therapy, discharge and aftercare planning. Experience primarily clinical. Prerequisite: satisfactory completion of required psychiatry clerkship. (Four or six weeks, full-time).
PBSCI 678 P-Clerkship in Psychiatric Long-Term Care and Rehabilitation (*, max. 12) Johnston Two- to six-week clerkship provides learning experiences in rehabilitation of long-term psychiatric patients with medical illness. Multidisciplinary team approach, working with homeless mentally ill. Diagnostic skills emphasized. Spectrum of diseases (cardiovascular, Huntington's, organic brain syndrome) is such that physical rehabilitation is not an emphasis. Prerequisite: HUBIO 563; satisfactory completion of required psychiatry clerkship.
PBSCI 680 P-Clerkship in Emergency Psychiatry (*, max. 24) Pasic Emphasis on clinical evaluation, acute management, and treatment planning for individual patients. Experience in coordinating these activities with other emergency room personnel, and various hospital and community resources. Emphasis on skills useful to physicians in any specialty. Third- and fourth-year medical students only. (Four or six weeks, full-time). Prerequisite: satisfactory completion of required psychiatry clerkship.
PBSCI 685 P-Geriatric Psychiatry Clerkship (*, max. 12) Two- to six-week elective (four weeks highly recommended). Participation in the evaluation and care of older persons with psychopathology, such as intellectual impairment and depression, in a variety of settings. Emphasis on improving clinical skills regarding diagnosis and treatment of common behavioral problems in the elderly. Prerequisite: satisfactory completion of required psychiatry clerkship, vehicle required for this rotation.
PBSCI 688 P-Subinternship in General Psychiatry (*, max. 16) Students function as interns under the supervision of house staff and attending psychiatrists. Further development of their diagnostic and therapeutic skills emphasized. Special areas of interest, such as family intervention, substance abuse, psychoses, neuropsychiatry, community psychiatry, administration, research pursued. (Four or six weeks, full-time). Prerequisite: satisfactory completion of required psychiatry clerkship; permission of instructor.
PBSCI 695 P-Advanced Clerkship in Child Psychiatry CSTC (*, max. 24) Provides an opportunity to participate in evaluation and treatment of children and adolescents in Lakewood, WA. Prerequisite: satisfactory completion of required psychiatry clerkship; fourth year medical student status. 2/4/6 weeks.

PBSCI 696 P-Advanced Clerkship in Child Psychiatry (*, max. 24) Provides students an opportunity to participate in evaluation and treatment. Experiences in specialized clinics are also available. (Four or six weeks, full-time. Limit: one student). Prerequisite: satisfactory completion of required psychiatry clerk ship.
PBSCI 697 P-Psychiatry Special Electives (*, max. 24) By special arrangement, clerkships, externships, and research opportunities can be made available at other institutions. Students obtain permission from Dr. Combs before obtaining a special assignment form from the dean's office one month before advance registration. Students contact affiliating institutions. Does not fulfill the requirement for a basic clerkship in psychiatry.

PBSCI 699 P-WWAMI Psychiatry and Behavioral Sciences Special Electives (*, max. 24) By special arrangement for qualified students, special clerkships or externships may be available at institutions other than the University of Washington located within the WWAMI region. Prerequisite: permission of department.

## Radiation Oncology

NN106 University of Washington Medical Center

Radiation oncology is the branch of clinical medicine that utilizes high-energy radiation to treat disease, usually cancer. The department consists of three divisions: clinical radiation oncology, medical radiation physics, and experimental cancer biology. Training programs are offered in all three divisions. Research programs in the Department of Radiation Oncology are aimed at the physical and biological mechanisms of interactions between ionizing radiations, and normal and malignant tissues, with particular emphasis on high linear energy transfer (LET) radiation effects. The department is actively involved in radiation treatment planning work particularly in regard to intensity modulated radiation therapy (IMRT). Other programs involve the application of positron emission tomography (PET) to elucidate differences between cancers and normal tissues, and the development of specialized radiopharmaceuticals.

## COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations.

R ONC 499 Undergraduate Research (*, max. 24) Phillips, Schwartz, Wilbur Opportunities in clinical or laboratory investigation in radiation oncology, radiation physics, or computer-related research. Student participation in ongoing or new projects. Open to students in the biological or physical sciences.
R ONC 505 P-Radiation Oncology Preceptorship (1) Kane, Kelly, Kim, Koh, Laramore, Liao, Patel, Rockhill, Russell Students choose either to follow an attending physician through all aspects of radiation oncology including consults, follow-up, and treatment planning; or to follow a small cohort of patients throughout their treatment course to learn about the experience of a cancer patient undergoing treatment for life-threatening disease. Credit/no-credit only.

R ONC 600 Independent Study or Research (*) Prerequisite: permission of department and faculty sponsor. Offered: AWSpS.

R ONC 694 P-Clinical Cancer Management - SCCA (*, max. 8) Participation in the clinical management of patients with cancer, emphasizing a multi-modality approach. Includes clinical assessment, planning of radiation treatment, and follow-up evaluation of patients. Special procedures include three-dimensional treatment planning, implant brachytherapy, and intraoperative radiation. Daily teaching conferences with faculty and residents. Prerequisite: medicine core clerkship or permission of instructor.

R ONC 695 P-Clinical Cancer Management - UWMC (*, max. 8) Kane Participation in the clinical management of patients with cancer, emphasizing a multi-modality approach. Includes clinical assessment, planning of radiation treatment, and follow-up evaluation of patients. Special procedures include three-dimensional treatment planning, implant brachytherapy, and intraoperative radiation. Daily teaching conferences with faculty and residents. Prerequisite: medicine core clerkship or permission of instructor.

R ONC 697 P-Radiation Oncology Special Elective (*, max 24) Kane By specific arrangement for qualified students, special clerkship, externship, or research opportunities are made available at institutions other than the University of Washington. Students obtain a "special assignment" form from the dean's office at least one month before advance registration. Prerequisite: permission of instructor.
R ONC 699 P-WWAMI Radiation Oncology Special Electives (*, max. 24) Kane By special arrangement for qualified students, special clerkships or externships may be available at institutions located within the WWAMI region, other than the University of Washington. Prerequisite: permission of department.

## Radiology

RR215 University of Washington Medical Center

Diagnostic radiology is that branch of clinical medicine that specializes in the interpretation of various imaging modalities in order to detect, to characterize, and (with increasing frequency) to treat a wide variety of diseases. Historically, x-rays were the first energy source utilized for these purposes, and they continue to be a mainstay of this discipline. More recently, the armamentarium has grown to include ultrasound, computed tomography, magnetic resonance, and positron-emission tomography. In nuclear medicine, one of radiology's major subspecialties, radionuclides are employed for both diagnostic and therapeutic purposes. Another subspecialty is interventional radiology, wherein aspirations and biopsies, as well as therapeutic procedures such as abscess drainage, tumor embolization, and vascular stents are performed percutaneously.

The Department of Radiology consists of two clinical divisions: diagnostic radiology and nuclear medicine. Both divisions are ably supported by technologists and faculty members in the field of radiation physics. Instruction in radiology is provided for medical students, residents, and fellows as well as for other physicians. The faculty and its teaching and research activities are represented in each of the hospitals affiliated with the University.

## COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations.

RADGY 498 Undergraduate Thesis (*) Supervised clinical and/or laboratory research in the broad field of medical imaging, culminating in a thesis. Offered: AWSpS.
RADGY 499 Undergraduate Research (*) Opportunity to gain research experience and direct participation in either clinical or basic sciences investigation in diagnostic and/or nuclear medicine. Offered: AWSpS.

RADGY 505 P-Preceptorship in Nuclear Medicine (1, max. 24) Opportunity for first- and second-year medical students to gain experience with faculty in clinical and academic environments. Students observe general aspects of the Nuclear Medicine Division, including clinical problems, the different relationships in the clinic between physician and patient, and several research aspects of the division. Prerequisite: permission of instructor. Offered: AWSpS.
RADGY 508 Physical Aspects of Medical Imaging (4) Quantitative physical principles of medical imaging are presented for electromagnetic and sonic radiation. Methods of image formation and analysis are discussed for conventional film radiography, CT, DSA, PET, B-mode ultrasound, and Doppler ultrasound.

RADGY 550 Nuclear Magnetic Resonance in Biomedicine
(2) Basic physics of nuclear magnetic resonance (NMR) imaging and spectroscopy are presented. Research applications of NMR in physiology and biochemistry are reviewed with emphasis on the brain. Grade based on written tests and small research paper. Prerequisite: permission of instructor. Offered: jointly with BIOEN 565; Sp, odd years.
RADGY 580 P-Nuclear Medicine Technique, Physics, and Instrumentation (2.5) Provides familiarization with basic nuclear phenomena and with the instrumentation used in the practice of nuclear medicine. Discussions and laboratory exercises. Practical experience in instrument operation and sample counting are provided. Prerequisite: permission of instructor. Offered: S.

RADGY 600 Independent Study or Research (*) Prerequisite: permission faculty sponsor. Offered: AWSpS.

RADGY 687 P-Introduction to Diagnostic Radiology Casper (4) Overview of the subspecialty areas of diagnostic radiology and nuclear medicine. Emphasizes utilization and selection of imaging tests, radiologic anatomy, and interpretation of commonly encountered studies. Offered: AWSpS.
RADGY 688 P-Introduction to Diagnostic Radiology - Boise (4)

RADGY 689 P-Introduction to Diagnostic Radiology - Billings (4) Lectures, case discussions, film reading, and independent study provide an overview of the subspecialty areas of diagnostic radiology and nuclear medicine. Emphasis on utilization and selection of imaging tests, radiologic anatomy, and interpretation of commonly encountered studies. Offered: AWSpS.
RADGY 690 P-Introduction to Diagnostic Radiology - Nampa (4) Half-time clerkship in the field of medical imaging. Lectures, case discussions, film reading, and independent study provide an overview of the subspecialty areas of diagnostic radiology and nuclear medicine. Emphasis on utilization and selection of imaging tests, radiologic anatomy, and interpretation of commonly encountered studies. Offered: AWSpS.

RADGY 691 P-Introduction to Diagnostic Radiology - Alas ka (4) Half-time clerkship in the field of medical im aging. Lectures, case discussions, film reading, and independent study provide an overview of the subspecialty areas of diagnostic radiology and nuclear medicine. Emphasis on utilization and selection of imaging tests, radiologic anatomy, and interpretation of commonly encountered studies. Offered: AWSpS.

RADGY 692 P-Introduction to Diagnostic Radiology - Spokane (4) Half-time clerkship in the field of medical imaging. Lectures, case discussions, film reading, and independent study provide an overview of the subspecialty areas of diagnostic radiology and nuclear medicine. Emphasis on utilization and selection of imaging tests, radiologic anatomy, and interpretation of commonly encountered studies. Offered: AWSpS.
RADGY 694 P-Advanced Clinical Clerkship (8) Full-time clerkship provides a more in depth experience in diagnostic radiology and nuclear medicine. Required rotations in the subspecialty areas of radiology augment the basic lecture series and case discussions of RADGY 693. For those with a special interest in diagnostic radiology. Prerequisite: permission of instructor and departmental education coordinator. Offered: AWSpS.

RADGY 695 P-Radiology Sub-specialty Elective (*, max. 8) Clinical rotation in one of the sub-specialty areas of radiology at the University of Washington and affiliated hospitals. Requires special arrangements and permission from a preceptor and the education coordinator in Radiology. Two or four weeks. Offered: AWSpS.

RADGY 696 P-Nuclear Medicine Clerkship (*, max. 12) Daily participation at University of Washington Medical Center nuclear medicine clinic emphasizing technical performance, diagnostic interpretation, and clinical relevance of nuclear imaging. Daily clinical teaching conferences of the division. Four- and sixweek clerkships can be preplanned in areas such as pulmonary, cardiovascular, renal, bone, computer analysis. Prerequisite: permission of instructor. Offered: AWSpS.
RADGY 697 P-Radiology Special Electives (*, max. 24) Radiologic training in a nonaffiliated institution. Permission and arrangements must be made at the time of registration through direct communication between the student and the education coordinator in Radiology. A written outline from a preceptor at the intended site required. Prerequisite: permission of radiology education coordinator. Offered: AWSpS.
RADGY 699 P-WWAMI Radiology Special Electives ( ${ }^{*}$, max. 24) By special arrangement for qualified students, special clerkships or externships may be available at institutions other than the University of Washington located within the WWAMI region. Prerequisite: permission of department.

## Rehabilitation Medicine

## BB928 Health Sciences

The Department of Rehabilitation Medicine provides education for medical students, interns, residents, and allied health students in occupational therapy, physical therapy, and prosthetics and orthotics in a comprehensive approach to rehabilitation problems. This includes special diagnostic and evaluative procedures; methods and rationale in the application of principles of occupational therapy, physical therapy, prosthetics and orthotics, and other health professions; and advanced investigation of special problems encountered in the field. In addition, the department conducts a residency training program for the specialty of physical medicine and rehabilitation.
The department offers curricula leading to the following degrees: Master of Occupational Therapy, Doctor of Physical Therapy, and a Master of Prosthetics and Orthotics. The department also offers post-professional degrees in rehabilitation science (MS and PhD) with options for individuals with previous rehabilitation-related training to pursue academic or research careers.

## OCCUPATIONAL THERAPY

Head
Janet M. Powell

The profession of occupational therapy appeals to people who enjoy thinking creatively and flexibly to solve problems, and who want to assist people with disabilities perform activities important in their daily lives. Occupational therapists provide services related to occupational performance (activities) in everyday life in the areas of self-care, work, education, or play and leisure. They work with people who have physical illness or injury, social or emotional difficulties, congenital or developmental problems, or who are in need of preventive strategies to enhance health and wellbeing; and with people in all age groups from diverse cultural and ethnic groups and socioeconomic levels.
Occupational therapists help people with impairments or limitations live as productive and quality of life as possible. Services focus on increasing independence, enhancing de-
velopment, providing compensatory strategies, and minimizing or preventing disability. Therapists adapt activities and environments, select therapy activities meaningful to clients, and provide client, family, and caregiver education. For example, an occupational therapist may teach adaptive dressing techniques to a client who has lost use of a hand following a stroke, help a child with autism interact with peers, or modify a computer for a young adult with a spinal cord injury returning to work.
Today's occupational therapists practice in rehabilitation centers, outpatient rehabilitation clinics, schools, hospitals, mental health facilities, private practice, skilled nursing facilities, home healthcare, and community health programs. The most common work settings for occupational therapists are school systems, hospitals, and longterm care facilities. The current and future job outlook for occupational therapists is excellent. The occupational therapy program is accredited by the Accreditation Council for Occupational Therapy Education (ACOTE), which can be contacted at: ACOTE c/o Accreditation Department AOTA, 4720 Montgomery Lane, Suite 200, Bethesda, MD, 20814-3449, phone (301) 652-2682. Standards comply with the U.S. Department of Education criteria for recognition of accrediting agencies. Graduates of the program are eligible to sit for the national certification examination for occupational therapist. The National Board for Certification in Occupational Therapy (NBCOT) is the certifying agency responsible for development and implementation of this examination. Most states, including Washington, require state licensure in order to practice.

## Master of Occupational Therapy

## Admission Requirements

1. Applicants must have completed a bachelor's degree in any major and taken the Graduate Record Exam (GRE) within the past five years. Seven prerequisite courses must be completed prior to admission to the program. In addition, applicants must have volunteer or work experience in at least two practice areas of occupational therapy. The admission process occurs once a year for entry autumn quarter of each year; applications are evaluated starting January 15 of each year.
2. Specific prerequisite courses at the UW include the following. For students who have attended schools other than the UW, comparable courses must be taken:
a. Natural Sciences: BIOL 118; B STR 301; CHEM 120; EDPSY 490
b. Social Sciences: PSYCH 305; PSYCH 306; SOC 110 or ANTH 202
3. To apply, students must have completed five of the prerequisite courses, with three courses in the natural sciences. They must have earned a 3.00 minimum GPA in the prerequisite courses with no single course graded less than 2.7 ; and have a minimum 3.00 GPA on the most recent 60 semester or 90 quarter credits. Admission is based on academic ability, communication skills, and understanding and experience in occupational therapy. Detailed program requirements and selection process information may be obtained by calling 206-5985764 , or by consulting the program's website at rehab. washington.edu/education/degree/ot, or by sending an email to ot@uw.edu.

## Degree Requirements

Courses: The following courses must be completed satisfactorily in the scheduled sequence, beginning autumn quarter only, at the UW: REHAB 510, REHAB 522, REHAB 533, REHAB 541, REHAB 542, REHAB 543, REHAB 544, REHAB 545, REHAB 548, REHAB 551, REHAB 566, REHAB 570, REHAB 571, REHAB 572, REHAB 574, REHAB 575, REHAB 576, REHAB 577, REHAB 578, REHAB 579, REHAB 580, REHAB 581, REHAB 582, REHAB 584, REHAB 585, REHAB 591, and REHAB 594.

Student Evaluation: The University grade-point system is used in student evaluation. A student must maintain a cumulative GPA of 3.0 in all required professional coursework to retain satisfactory standing and to graduate. Detailed scholastic requirements are available on the program's website at rehab.washington.edu/education/degree/ot/.
Continuation Policy: If at any point the OT curriculum cumulative GPA falls below 3.00, the student is placed on academic probation and must raise it to 3.00 by the end of two subsequent quarters. If a student is unable to remove his or her probation status, he or she is subject to dismissal from the program. If a student receives a grade below 2.7 in a required course, continuation in the program is reviewed and determined by the Occupational Therapy Advisory and Evaluation Committee.
Fieldwork Placement: The student must satisfactorily complete all academic coursework before taking the two required Level II Fieldwork placements (REHAB 594). Both fieldwork placements must be satisfactorily completed within 24 months following completion of the academic portion of the program in order to graduate.
For more information on the Master of Occupational Therapy program, visit the department's website at rehab.washington.edu/education/degree/ot/.

## PHYSICAL THERAPY

## Head

Mark Guthrie

Physical therapy is a direct form of professional patient care that can be applied in most disciplines of medicine. The principal objective in physical therapy is to restore or improve motor function in individuals with musculoskeletal or neuromuscular conditions.

Management of problems related to motor function is only part of the work of physical therapy. Equally important is rebuilding self-confidence and creating a desire to return to a normal, active life. Other primary objectives of physical therapy are prevention of disability and pain, and training in mobility skills for those who must adapt to permanent disability.
As a consequence of the scope of the profession, physical therapists function in a variety of settings, the most familiar being the hospital. Physical therapists also plan, provide, evaluate, and direct patient care in outpatient clinics, rehabilitation centers, health maintenance organizations, developmental centers, home-health agencies, schools, extended-care facilities, voluntary health programs, industry, and private practices. The physical therapist may be found anywhere quality health care is needed. Increasingly, physical therapists are becoming involved in basic and clinical research, such as the academic community, either as full-time faculty members or as supervisors of clinical education, and as consultants in local, state, and federal health-planning activities.
Physical therapists function in compliance with the licensing laws and ethical principles that govern the practice of physical therapy. The steps to licensure as a physical therapist vary slightly from state to state, but all physical therapists graduate from an accredited curriculum of physical therapy that includes a specific period of clinical training. As physical therapy relates to the majority of medical specialties, the education program is broad in scope, including an emphasis on physical and social sciences. The physical therapist evaluates the patient's problem by testing such factors as range of joint motion, muscle strength, posture and gait, pulmonary function, sensory perception, orthotic and prosthetic fit, reflexes and muscle tone, and functional skills. Intervention procedures used may include ultrasound, superficial heat and cold, electrical stimulation, massage, traction, joint mobilization, biofeedback, therapeutic exercise, and assisted ambulation training.

As with all professionals in health fields, physical therapists are responsible for subscribing to a program of continuing education. Some therapists also develop the knowledge and skills of a specialist via continuing education and concentrated practice in one area, such as sports or pediatric therapy. A formal mechanism for certifying specialists is implemented by the national professional association, the American Physical Therapy Association.
The University of Washington program in physical therapy is accredited by the American Physical Therapy Association Commission on Accreditation in Physical Therapy Education. For complete program details visit rehab.washington. edu/education/degree/pt.

## Doctor of Physical Therapy

## Admission Requirements

1. Enrollment is limited to 44 students each year and admission is competitive.
2. Application is restricted to those who are U.S. citizens or U.S. permanent residents by the autumn program entrance date.
3. Applicants are required to submit scores from the General Test portion of the Graduate Record Examinations (GRE).
4. Prior to the application deadline of December 15, the student must have met the following academic requirements:
a. Minimum 3.00 GPA on all college-level courses
b. Minimum 3.00 GPA on PT prerequisite courses
c. Minimum 2.0 (C) grade on each PT prerequisite course
d. Half (50\%) of PT prerequisite courses completed.
5. For a list of PT prerequisite course descriptions, see the program Website at depts.washington.edu/rehab/pt/ eligibility.asp\#prereq
6. Minimum requirements above must be maintained until program entrance and all prerequisite courses must be finished at that time. Applicants must complete a bachelor's degree before they start the program.
7. Most clinical internship placement sites require potential trainees to undergo a criminal history background check for crimes against vulnerable populations. To ensure that all students offered positions in the PT program have no such history and therefore will be able to finish the clinical portion of the curriculum, the completion of a criminal background check process is required of applicants accepting admission.

## Degree Requirements

157 credits, as follows:

1. Year One
a. Autumn Quarter: REHAB 504 (2), REHAB 509 (1), REHAB 517 (2), REHAB 521 (3), REHAB 522 (2), REHAB 541 (1), REHAB 544 (4)
b. Winter Quarter: REHAB 506 (2), REHAB 517 (2), REHAB 533 (2), REHAB 542 (1), REHAB 545 (3), REHAB 551 (5)
c. Spring Quarter: REHAB 507 (3), REHAB 517 (2), REHAB 525 (4), REHAB 533 (2), REHAB 536 (1), REHAB 543 (1), REHAB 548(3)
d. Summer Quarter: REHAB 500 (4), REHAB 508 (4), REHAB 517 (2), REHAB 537 (2), REHAB 538 (2), REHAB 540 (2), REHAB 566 (1)
2. Year Two
a. Autumn Quarter: REHAB 510 (2), REHAB 511 (5), REHAB 523 (4), REHAB 547 (3), REHAB 566 (1)
b. Winter Quarter: REHAB 502 (4), REHAB 512 (4), REHAB 527 (3), REHAB 529 (2)
c. Spring Quarter: REHAB 502 (4), REHAB 503 (3), REHAB 513 (2), REHAB 566 (1), REHAB 569 (2)
d. Summer Quarter: REHAB 505 (2), REHAB 514 (3), REHAB 535 (2), REHAB 566 (4), REHAB 567 (1), REHAB 801 (1)
3. Year Three
a. Autumn Quarter: REHAB 595 (10), REHAB 801 (4)
b. Winter Quarter: REHAB 595 (10), REHAB 801 (4)
c. Spring Quarter: REHAB 595 (10), REHAB 801 (3)

## PROSTHETICS AND ORTHOTICS

## Director

Ann Yamane

The prosthetist-orthotist is a member of the rehabilitation health care team, which also includes physicians, surgeons, physical and occupational therapists, psychologists, vocational rehabilitation counselors, and other appropriate specialists. Team members work together with physically challenged individuals to enhance their daily life and increase their functional abilities.

The two groups of prosthetic-orthotic devices which can potentially enter into the rehabilitation of an individual are (1) prosthetic devices, which replace or substitute for a missing limb or part of a limb, and (2) orthotic devices, which help with the control of motion and the support of a weakened body segment.

Prothestics and Orthotics clinicians provide direct patient care and management. Clinicians work in conjunction with physicians, surgeons, and therapists to evaluate the prosthetic or orthotic needs of the patient. They design the appropriate device, supervise technicians who fabricate them, and evaluate the fit and functional use for each patient. To evaluate function, the prosthetist-orthotist must have a detailed knowledge of anatomy and kinesiology, joint range of motion, muscle strength, and human locomotion.
Before designing a prosthesis or orthosis, the prosthetistorthotist examines a patient to find any conditions that might affect the future success of the orthosis or prosthesis. Following the evaluation, the prosthetist-orthotist obtains an impression of the affected segment along with the appropriate measurements. A technician fabricates the prosthesis or orthosis, and the prosthetist-orthotist fits the patient and makes changes as necessary.

Adviser<br>BB808 Health Sciences Center<br>(206) 616-8586<br>pando96@uw.edu

The prosthetics and orthotics division offers the following program of study:

- The Bachelor of Science degree with a major in prosthetics and orthotics
- The Master of Prosthetics and Orthotics degree

## Bachelor of Science

(Not currently accepting new students)
Suggested First- and Second-Year Courses: Courses fulfilling the general education requirements including proficiency and areas of knowledge ( 20 credits of VLPA, 20 credits of I\&S) should be completed during the first two years prior to entry into the program. Prerequisite coursework (general biology, general physics, human anatomy and physiology, general chemistry, psychology) is also completed during this time. Suggested courses include: SOC 110, COM 201, COM 220, PSYCH 203, PSYCH 306, and courses using computer applications.

## Admission Requirements

1. Minimum 2.70 cumulative GPA
2. Prior to admission, students must complete the following prerequisites with a minimum combined GPA of 2.70: BIOL 161-BIOL 162 or MICROM 301, MICROM 302, PHYS 114, PHYS 117, PHYS 115, PHYS 118, PSYCH 101, CHEM 120,B STR 301, BIOL 118, STAT 220.
3. Completion of the University writing and reasoning requirements (5 credits of English composition and 5 credits of quantitative and symbolic reasoning with a minimum grade of 2.0 ; two additional writing courses totaling a minimum of 10 credits with a minimum grade of 0.7; and the College of Arts and Sciences Areas of Knowledge requirements (20 credits in Visual, Literary \& Performing Arts, 20 credits in Individuals \& Societies, and 20 credits in the Natural World). Courses listed above may apply to Areas of Knowledge requirements. Postbaccalaureate (fifth-year) students are exempt from the writing and reasoning requirements but not from the Areas of Knowledge requirements.
4. Admission to the program is competitive based on scholastic achievement, written skills, references, and involvement in activities or work related to the health professions.
5. Departmental Application Deadline: January 15 for entry autumn quarter.

## Major Requirements

90 credits as follows:

1. Courses: The following courses must be taken in the scheduled sequence beginning autumn quarter only at the University of Washington: REHAB 340, REHAB 341, REHAB 342, REHAB 343, REHAB 400, REHAB 401, REHAB 402, REHAB 403, REHAB 414, REHAB 420, REHAB 421, REHAB 423, REHAB 424, REHAB 427, REHAB 428, REHAB 430, REHAB 442, REHAB 444, REHAB 445, REHAB 451, REHAB 452, REHAB 448, REHAB 499, REHAB 504, REHAB 506, REHAB 509; CONJ 480.
2. Grade Requirements: A student must maintain a minimum cumulative program GPA of 2.50 , and "credit" grades in all courses that are graded credit/no credit, to maintain good standing in the program and be eligible for graduation. A 2.0 minimum grade is required in each course. A grade below 2.0 in a required course must be repeated at the next offering with a minimum grade of 2.0 received in the repeated course.
3. Continuation Policy: If at any point the cumulative GPA in the curriculum courses falls below 2.50, the student is placed on academic probation. In order to be removed from probation, the student must achieve a cumulative GPA of 2.50 by the end of two consecutive quarters, or within a time frame designated by the Advisory and Evaluation Committee. If a student is unable to remove his or her probation status, he or she is subject to dismissal from the program.

## Master of Prosthetics and Orthotics

## Admission Requirements

1. Bachelor's degree in any major from a regionally accredited U.S. college or university
2. Minimum 3.00 cumulative GPA
3. Prior to the start of the program, all prerequisites must be completed. These include one course each in the areas of life science, statistics, and chemistry; and a two-course series in the areas of anatomy \& physiology and physics, and two courses in psychology (to include a general psych course as well as either a developmental or abnormal psych course). Labs must be taken with all appropriate courses.
4. Minimum cumulative prerequisite GPA of 3.0. No single course can be graded less than 2.0. Grades lower than 2.0 are not accepted.
5. GRE general test scores. Test must be taken within the past five years.
6. Volunteer or work experience in a prosthetics-orthotics clinic is strongly encouraged
Admission to the program is competitive based on scholastic achievement, written skills, references, and involvement in activities or work related to the health professions.
See program website for complete details on admissions requirements.

International applicants must also meet several requirements in addition to those required of U.S. applicants in order to be admitted to the University of Washington Graduate School. Consult the FAQs on the UW Graduate School website for more information.

## Major Requirements

112 credits as follows:

1. Courses: The following courses must be satisfactorily completed in a specific sequence beginning autumn quarter of entry year and only at the University of Washington: REHAB 522, REHAB 544, REHAB 541, REHAB 504, REHAB 509, RHB PO 511, RHB PO 501, REHAB 533, REHAB 545, REHAB 542, REHAB 551, REHAB 506, RHB PO 515, REHAB 534, REHAB 548, REHAB 543, RHB PO 512, RHB PO 581, RHB PO 541, RHB PO 502, RHB PO 521, RHB PO 522, RHB PO 523, REHAB 580, RHB PO 561, REHAB 510, RHB PO 524, RHB PO 525, RHB PO 526, RHB PO 527, RHB PO 582, RHB PO 562, RHB PO 528, RHB PO 529, RHB PO 583, RHB PO 563, RHB PO 530, RHB PO 531, RHB PO 532, RHB PO 584, RHB PO 564.
2. Grade Requirements: A student must maintain a minimum cumulative program GPA of 3.00 , and "credit" grades in all courses that are graded credit/no credit, to maintain good standing in the program and be eligible for graduation.
3. Continuation Policy: If at any point the cumulative GPA in the curriculum courses falls below 2.70, the student is placed on academic probation. In order to be removed from probation, the student must achieve a cumulative GPA of 3.00 by the end of two consecutive quarters, or within a time frame designated by the Advisory and Evaluation Committee. If a student is unable to remove his or her probation status, he or she is subject to dismissal from the program.

## Student Outcomes and Opportunities

- Learning Objectives and Expected Outcomes: The prosthetics-orthotics degree is recognized as a broad, undifferentiated degree requiring the acquisition of general knowledge and basic skills in applicable domains of medicine. The educational process of a prosthetistorthotist includes the assimilation of knowledge, acquisition of technical skills, and development of judgment through patient care experiences in preparation for independent analysis and problem solving required in clinical practice. Prosthetists and orthotists are employed in private practices and hospitals. There are also a limited number of opportunities in research positions throughout the country.

Upon successful completion of the prosthetics and orthotics program, the student has learned the skills necessary to function as an entry-level resident in prosthetics-orthotics, and is awarded a Master of Prosthetics and Orthotics degree by the University of Washington School of Medicine. The practitioner program is accredited through the Commission on Accreditation of Allied Health Education Programs (CAAHEP), 1361 Park Street, Clearwater FL 33756, (727) 210-2350 (phone), (727) 210-2354 (fax), www.caahep.org.

The degree in prosthetics-orthotics gives the student eligibility to enter a one-year clinical residency for each discipline at a National Commission on Orthotics and Prosthetics Education (NCOPE) approved site. This residency requirement must be completed for eligibility to apply for the National Certification Boards administered by the American Board for Certification in Orthotics and Prosthetics, Inc. (ABCOP).
National Commission on Orthotic and Prosthetic Education
330 John Carlyle Street, Suite 200
Alexandria, VA 22314
phone: (703) 836-7114
www.ncope.org
American Board for Certification in Orthotics and Prosthetics, Inc.
330 John Carlyle Street, Suite 210
Alexandria, VA 22314
phone: (703) 836-7114
fax: (703) 836-0838
www.abcop.com

- Instructional and Research Facilities: Didactic and patient clinical instruction occurs in the eighth-floor classroom areas in the "BB" wing of the Health Sciences Building. A fabrication laboratory is located on the eighth floor and accommodates the technical laboratory components of the curriculum.

Students are placed throughout the curriculum in eighteen facilities in the surrounding Seattle area for their required hours of clinical experience.

## POST-PROFESSIONAL PROGRAMS

## Master of Science in Rehabilitation Science

The Master of Science (MS) in Rehabilitation Science program is dedicated to educating rehabilitation professionals to assume leadership roles as advanced clinicians, clinical researchers, educators, and/or administrators. We foster the development of critical thinking and problem solving related to rehabilitation science and we are committed to educational excellence, high ethical standards, and respect for diversity. This is intended to be a small program designed to address individual needs, thus, no recruitment targets have been set. The program is designed for rehabilitation professionals who 1) wish to pursue advanced graduate studies to enhance their professional growth but do not wish to pursue a PhD or 2) are in the PhD Program in Rehabilitation Science and for some reason are unable to complete the PhD program.

## MS Program Purpose and Goals

The overall program outcome of the Master of Science degree is to prepare rehabilitation professionals to serve as advanced clinicians, clinical researchers, educators, and/ or administrators. In order to accomplish this outcome, there are four major program goals:

1. Discuss models of disability and theories and frameworks relating to rehabilitation science.
2. Design and conduct research related to rehabilitation science, and report the results in written and oral form appropriate for dissemination to other professionals and consumers.
3. Design, conduct, and evaluate instruction as it pertains to classroom teaching and continuing education.
4. Exhibit the capacity to assume leadership roles in the student's area of expertise in rehabilitation.

## Doctor of Philosophy in Rehabilitation Science

Director

## Deborah Kartin

Rehabilitation science is an interdisciplinary field that focuses on human function and disability. Basic and applied research from health sciences, social sciences, engineering, and related fields is directed toward (1) enhancing physical and psychosocial functioning, participation in life situations, and quality of life of people with disabilities; and (2) informing relevant social and healthcare policy.

The program targets students from diverse backgrounds in rehabilitation-related fields including occupational therapy, physical therapy, speech and language pathology, rehabilitation counseling, medicine, nursing, prosthetics and orthotics, and engineering.
The goal of the PhD program in rehabilitation science is to prepare researchers, educators, and leaders in the area of rehabilitation science to contribute to the development of rehabilitation practice, research, and policy. Graduates of the PhD program are prepared as researchers, educators, and leaders in the field of rehabilitation science, who may work in academic institutions, service delivery systems (e.g., hospitals, public schools), government agencies, and the private sector. These individuals are prepared to address research, education, service delivery, and policy issues from an interdisciplinary perspective. Following are three overarching outcomes for graduates of this program.

1. Demonstrate advanced knowledge and productivity in rehabilitation science specific to research, education, service delivery, and/or policy.
2. Demonstrate leadership in interdisciplinary collaboration for the purpose of optimizing research, education, service delivery, and/or policy.
3. Generate and extend knowledge that is innovative and rigorously tested within a focused area of rehabilitation science.

## Admission Requirements

1. Baccalaureate degree from a college or university of recognized rank.
2. Official Graduate Record Examination (GRE) General Test Scores.
3. Copy of current professional certification/licensure to practice (as appropriate).
4. Recent sample of scholarly writing. This may include a published or unpublished manuscript such as in-depth literature review in a focused area; a research report; or a concept analysis.
5. Letters of recommendation from three persons knowledgeable about the individual's potential for doctorallevel work in rehabilitation science
6. Letter of application in response to specific questions listed on the application related to the pursuit of doctoral studies.
7. Resume/CV.

## Degree Requirements

## 100 credits minimum, as follows:

Courses: Core course series ( 21 credits), coursework and practicum experiences in teaching (minimum of 5 credits), and coursework in research methods (minimum of 18 cred its). Relative to the latter, credit requirements may be partially met through independent study. In addition, each student must complete three cognates (minimum of 6 credits each) specific to the student's goals. The student's committee and the core faculty in the rehabilitation science doctoral program must approve the entire course of study.
General requirements: In addition to meeting all requirements of the UW Graduate School, all students are expect ed to meet the following general requirements.

1. Minimum 3.00 cumulative and quarterly GPA.
2. 100 credits minimum, of which 30 are dissertation credits.
3. Completion of at least one teaching practicum (3-credit minimum).
4. Satisfactory completion of a Research and Scientific Inquiry Day manuscript and presentation.
5. Satisfactory completion of general examinations.
6. Dissertation.
7. Final examination.

For more information on the PhD program in Rehabilitation Science, visit the program's website at rehab.washington. edu/education/degree/rehabsci/.

## COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations.

## Rehabilitation Medicine

REHAB 300 Introduction to Occupational Therapy (1) Introduction to occupational therapy profession. Provides historical perspectives, theoretical foundations, and clinical case studies in various practice arenas. Credit/no-credit only. Offered: ASp.
REHAB 496 Special Topics in Rehabilitation (1-9, max. 14) Guided opportunity for in-depth study in specific areas of rehabilitation. Topics vary.

## REHAB 498 Undergraduate Thesis (*)

REHAB 499 Undergraduate Research (*) Opportunity to design, perform, and analyze research investigation in problem areas in rehabilitation medicine. These include clinical and basic research problems in, for example, head and spinal injury, chronic disease, pain neurophysiology, electrodiagnosis, communication, and bioengineering.
REHAB 500 Clinical Clerkship in Physical Therapy (4) Robinson Observation, instruction, and supervised practice in treatment of patients in diverse clinical settings. Emphasis is given to the application of previously learned material and skills to specific clinical problems. Required for physical therapy students. Credit/no-credit only.

REHAB 502 Pediatric Physical Therapy (4-, max. 8) McCoy Provides foundational knowledge in development and an overview of pediatric physical therapy practice for children with atypical development. Presents examination, evaluation, and development of physical therapy plans of care for children with various disabilities within the frameworks of family-centered care and disablement models.
REHAB 503 Lifespan III: Geriatric Physical Therapy (3) Matsuda Theory and principles of exercise procedures used when treating the geriatric patient. Includes a discussion of age related changes in the systems essential to movement control; factors contributing to physical disability and frailty with aging; adaptation of assessment and treatment procedures to the geriatric patient. Lectures and laboratories.
REHAB 504 Procedures I: Basic Physical Examination of the Extremities (2) Maitland Develops technical skills and theoretical foundations in the examination of patients from a neuromusculoskeletal perspective. Special emphasis on examination of the extremities, including applied anatomy, posture, screening tests, special tests, and scanning exams.

REHAB 505 Introduction to Pharmacology (2) Guthrie Pharmacological survey of drugs commonly prescribed for clients seen in a physical therapy practice setting. Presentations on basic principles. Additional
data search and group reports. Overview of medical emergencies. Credit/no-credit only.
REHAB 506 Procedures II: Basic Physical Examination of the Spine (2) Bennett Develops technical skills and theoretical foundations in the examination of patients from a neuromusculoskeletal perspective. Emphasizes examination of the spine including applied anatomy, posture, screening tests, special tests, and scanning exams.
REHAB 507 Physical Therapy Procedures III: Modalities (3-4) McGough Principles and practice of physical therapy clinical treatment procedures utilizing therapeutic modalities. Lecture and laboratory format.
REHAB 508 Principles of Therapeutic Exercise (4) McQuade Theory, principles, and practice of exercise procedures used for treatment purposes in physical therapy, including motor learning, variables of motor performance, and exercise prescription. Lectures and laboratories. Simulated patient problems.

REHAB 509 Physical Therapy Procedures: Functional Skills Assessment (1) Robinson Development of clinical competence in assessment and training of basic patient functional skills, including handling techniques, transfers, and assisted ambulation.

REHAB 510 Rehabilitation Psychology (2) Patterson, Pepping Focuses on understanding assimilation of disability, participation in rehabilitation, management of behavior, and maintenance of performance from both the practitioner and patient perspective. Focuses on the role of the psychologist in the rehabilitation team. Includes case study and case conference materials.
REHAB 511 Musculoskeletal IV: Clinical Management (5) Bennett Physical therapy clinical evaluation and management of patients with musculoskeletal dysfunction. Special emphasis on upper quadrant anatomy. Lecture and laboratory format.

REHAB 512 Musculoskeletal V: Clinical Management (4) Maitland Physical therapy clinical evaluation and management of patients with musculoskeletal dysfunction. Special emphasis on lower quadrant anatomy. Lecture and laboratory format.
REHAB 513 Special Studies in Physical Therapy (1-5, max. 15) Theory and practice in specialized areas of physical therapy. Includes organization and administration of specialized programs, advanced evaluation and treatment techniques, role of the consultant. Credit/ no-credit only.

REHAB 514 Systems Review for Physical Therapists (3) Maitland Development of advanced physical assessment skills to provide students with the ability to determine if a patient's disorder is within the scope of practice for physical therapy or requires referral to another healthcare provider. Lectures and laboratory format, with an emphasis on the lab component. Credit/no-credit only.
REHAB 515 Advanced Neuromusculoskeletal Interventions in Physical Therapy (3) Bennett Advanced neuromusculoskeletal treatment techniques. Emphasis on review of manual therapy, exerciser and modality interventions in case studies across lifespan and continuum of care. Credit/no credit only.
REHAB 516 Medical Information for Rehabilitation Counselors (3) Johnson Lectures in medical science field regarding the etiology, prognosis, and physical restoration of common disabling conditions. Case studies are used extensively, and major emphasis is placed on vocational implications of physical disability. Prerequisite: permission of instructor.
REHAB 517 Physical Therapy Seminar (2-, max. 12) Kartin Focuses on physical therapy topics pertaining to transcurricular and professional practice issues.

REHAB 519 P-Preceptorship in Rehab Medicine (1) McNal ley Explores the field of physical medicine and rehabilitation. Students observe a physiatrist one half day each week, and gain understanding of the management of acute injuries, chronic disease, and disabilities. Offered: AWSpS.
REHAB 520 Seminar (1-5, max. 12) Conferences, seminars, discussions of advanced physical medicine and rehabilitation topics for graduate students, residents, and postdoctoral fellows in rehabilitation medicine. Lectures, discussion, and laboratory work in selected aspects appropriate to elected area of study for applicants for master-level degree.
Rehab 521 Survey of Pathophysiology for Rehabilitation (3) Kerfeld Uses a systems approach overview of the disease process and the impact it has on the rehabilitation process. Provides a foundation for understanding how dysfunction of major systems can influence a person's ability to move. Discusses risk reduction and prevention strategies surrounding diseases.
REHAB 522 Neurophysiological Topics in Rehabilitation Medicine (2) Kinney, Slimp Reviews traditional neurophysiological concepts related to the nervous, musculoskeletal, and cardiopulmonary systems as a foundations for rehabilitation practice. Includes recent advances in research and applicable case studies.
REHAB 523 Neuroscience III: Applied Neurology (4) Matsuda Theory and principles of advanced exercise procedures used when treating patients with neurologic pathology. Includes the application of principles of motor learning and control; facilitation and inhibition of variables affecting functional motor performance; adaptation of assessment and treatment procedures to patients with different types of neurologic impairments. Lectures and laboratories.

REHAB 525 Exercise Physiology for Rehabilitation (4) Moritz Provides systems approach to exercise physiology, including cardiovascular and musculoskeletal response to exercise training, and the impact it has on the rehabilitation process. Reviews common disease processes that effect ability and tolerance, and may benefit from rehabilitation interventions.
REHAB 527 Neuroscience IV: Special Topics in Neurologic Rehabilitation (3) Kelly Critical analysis and application of physical therapy assessment and treatment techniques to problems related to specific adult neurological disorders. Neurological disorders to be covered include stroke, spinal cord injury, traumatic brain injury, and multiple sclerosis.
REHAB 528 International Clinical Clerkship (2) Robinson Short-term clinical education experience outside the United States. Participants work in a mentored relationship as part of a multi-disciplinary rehabilitation team providing direct clinical services and consultation to patients and their care-givers. Sponsored sites selected and screened by clinical coordinator. Students may choose area of clinical focus. Credit/ no-credit only.
REHAB 529 Professional and Practice Issues in Physical Therapy (2) Guthrie Augments the student's understanding of the profession and current issues in healthcare. Includes healthcare delivery, scope of practice, professional organization, political activism, specialist certification, licensure, collaboration, therapeutic relationships, disclosure, privacy, and informed consent. Credit/no-credit only.
REHAB 530 Medical Aspects of Vocational Counseling (23) Johnson Introduction to vocational implications of physical and emotional disabilities. Methods, counseling techniques, therapeutic modalities, community resources used in producing vocational assistance
for persons with disabilities. Prerequisite: resident standing in rehabilitation medicine or permission of instructor.

REHAB 531 Critical Thinking Skills in Physical Therapy (2)
McQuade Introduces students to structured critical thinking for discussion and analysis of selected musculoskeletal approaches. Interactive small groups explore key papers with controversial or novel assertions, or that address commonly used treatment techniques. Credit/no credit only.

REHAB 532 Clinical Affiliation for Rehabilitation Counselors (5-6) Johnson Under preceptorship of rehabilitation counseling staff, students counsel and evaluate patients with severe physical, emotional, or social problems; administer vocational testing; obtain placement on job stations; work with community resources for vocational/educational placement; and develop activity-oriented schedules. Prerequisite: permission of instructor.
REHAB 533 Diseases and Diagnosis in Rehabilitation (2-, max. 4) Powell Provides an introduction to medical diagnoses and diseases having high rates of referral to rehabilitation services in order to promote comprehensive patient care. Credit/no-credit only.
REHAB 535 Physical Therapy Administration Issues (2) Guthrie In-depth discussion of administrative issues overarching physical therapy practice, including economic trends, operational policy, budgeting, reimbursement, staffing, business structure, and entrepreneurship. Required for physical therapy students. Credit/no-credit only.

REHAB 536 Patient Evaluation and Clinical Decision Making (1-2, max 8) Robinson General principles and practice of physical therapy patient evaluation and use of the clinical decision-making models. The application of patient management principles through examination techniques and documentation strategies. Lecture and laboratory format.

REHAB 537 Functional Mobility Skills (2) Pradhan Principles and practice of physical therapy interventions related to functional mobility skills, including transfer training, wheelchair fitting, wheelchair mobility, gait training, and caregiver training. Lecture and laboratory format.

REHAB 538 Integumentary, Edema Management, and Circulatory Screening for PT (2) Robinson Principles and practice of physical therapy evaluation and interventions related to wound care, burn care, edema management, circulatory screening, and splinting applications. Lecture and laboratory format
REHAB 539 Communication Disorders in Rehabilitation Medicine (1) Yorkston Overview of communication disorders secondary to central and peripheral nervous system impairment. Emphasis on facilitating identification of speech/language disorders with discussion of implications for rehabilitation.

REHAB 540 Acute Care Practice in Physical Therapy (2) Robinson Principles and practice of physical therapy evaluation and interventions related to individuals with diagnoses in the recent onset (or acute) stage of development.

REHAB 541 Gross Anatomy Laboratory - Extremities (1) Guthrie, Rollinger Uses cadavers to study the musculoskeletal, peripheral-vascular, and peripheral-nervous systems. Focuses on the extremities. Uses primarily prospected material, but provides some opportunity for independent dissection.

REHAB 542 Gross Anatomy Laboratory - Spine (1) Guthrie, Rollinger Studies the musculoskeletal, peripheralvascular, and peripheral-nervous systems from cadavers. Focuses on the spine. Uses primarily prospected material, but includes some opportunity for independent dissection. Credit/no-credit only.

REHAB 544 Functional Anatomy for Rehabilitation of the Extremities (4) Goldstein, Guthrie Covers the functions of the musculoskeletal system as applied by professionals in the practice of clinical rehabilitation. Focuses on anatomy and of the upper and lower extremities, including associated peripheral-vascular and peripheral-nervous systems. Intended to en hance functional assessment and to improve diagno sis and treatment through greater understanding of underlying anatomy.
REHAB 545 Functional Anatomy for Rehabilitation of the Spine (3) Goldstein, Guthrie Covers functions of the musculoskeletal system as applied by professionals in the practice of clinical rehabilitation. Focuses on the anatomy of the spine, including associated vascular and nervous systems. Enhances functional assessments and the improvement of diagnosis and treatment through greater understanding of underly ing anatomy.

REHAB 546 Teaching Practicum in Rehabilitation (1-3, max. 15) Integration of knowledge and skills in teaching through teaching in the classroom or presentation of a minicourse, workshop, or in-service training series. Prerequisite: MEBI 520 and permission of instructor

REHAB 547 Biomechanics Basis of Exercise (3) McQuade Provides an in-depth exploration of the neuromechanical basis of exercise. Focuses on the applications of biomechanical principles to exercise, including: exercise equipment analysis; neuromuscular basis of strength, power and flexibility; and joint kinematics and stability. Prerequisite: knowledge of basic kinesiology and biomechanics or permission of instructor.

REHAB 550 Neuropsychology in Rehabilitation (2) Pep ping Examination and management of patients with brain lesions, as well as an understanding of the consequences of such conditions. Prerequisite: graduate standing in rehabilitation medicine.

REHAB 551 Neurobiology for Rehabilitation (5) Kinney, Pradhan, Slimp In-depth analysis of human neuroanatomical structure and neurophysiological function as a basis for rehabilitation practice.

REHAB 555 P-Neuromuscular Electrodiagnosis (2.5) Kraft Demonstration of fundamentals of electromyography and peripheral nerve stimulation followed by participation in clinical electrodiagnosis examinations. Develops awareness of knowing when such procedures are indicated for patients and interpreting results rather than developing proficiency in performing these examinations. Prerequisite: HUBIO 560 and permission of instructor.

REHAB 556 Foundations of Rehabilitation Science (3) Johnson, Yorkston Overview of rehabilitation science and social constructs of disability emphasizing bio-psycho-social-environmental models of the enablingdisabling process across the lifespan. Lays the philosophical and theoretical foundations for the study of rehabilitation as a science and is designed to promote interdisciplinary thinking. Prerequiste: instructor permission.
REHAB 557 Evidence-Based Rehabilitation (3) Kartin, Yorkston Addresses frameworks for evaluating the evidence in rehabilitation science; asking answer able questions, using advanced search strategies critically appraising literature; understanding the systematic review process; conducting and interpreting meta-analyses; developing evidence-based practice guidelines; communicating the evidence to stakeholders; and translating evidence into rehabilitation practice. Prerequisite: permission of instructor.
REHAB 558 Qualitative and Quantitative Research in Rehabilitation (3) Ciol, Dudgeon Provides an orientation
and critical analysis of current practices in disability and rehabilitation research by appraising methodologies and strategies used to investigate consequences of human function, activity performance, and social participation. Topics include introduction to qualitative and quantitative methodologies with respect to rehabilitation research. Prerequisite: permission of instructor.
REHAB 560 Defining and Measuring Outcomes in Rehabilitation Research (3) Amtmann Introduces the importance, methods, and challenges of outcomes research in rehabilitation. Addresses definitions and importance of outcomes research; behaviors measurement, functional abilities, quality of life, and consumer satisfaction; outcomes measurement for diverse populations across lifespan; research outcomes design; and challenges specific to outcomes research. Prerequisite: permission of instructor.
REHAB 561 Epidemiological and Health Services Approaches to Rehabilitation Research (3) Ciol, Hoffman Introduces the application of principles and methods from the fields of epidemiology and health services to rehabilitation research. Provides an overview of epidemiological research methods applicable to rehabilitation research, health services approaches, ethics, and use of research to inform disability policy. Prerequisite: permission of instructor.

REHAB 562 Neuroscience in Rehabilitation (3) Kelly, Yorkston Develops knowledge related to neural control of movement; movement dysfunction from neurologic pathology; and methodological approaches to investigating neural control of movement. Includes concepts in motor control; motor learning; and neural plasticity relating to movement dysfunction in people with neurologic pathology and to rehabilitation science. Prerequisite: permission of instructor

REHAB 566 Special Topics in Rehabilitation (1-9, max. 14) Philosophy and concepts in the interdisciplinary rehabilitation of persons with major disabilities, including advanced content in the rehabilitation theory and process of selected categories.

REHAB 567 Practicum in Rehabilitation (1-12, max. 24) Specialized practicum experience in environment providing rehabilitation services. Practicum arrangements and permission by instructor.

REHAB 568 Biophysics as Applied to Physical Medicine (2) Esselman Propagation and absorption characteristics of physical forms of energy used for treatment in physical medicine. Physiologic effects basic to prescription of the physical therapy modalities. Prerequisite: resident standing in rehabilitation medicine; others by permission of instructor.

REHAB 570 Foundations of Occupational Therapy (5) Powell An overview of the practice of occupationa therapy, emphasizing the role of occupational performance in context, frames of reference, clinical reasoning, and purposeful activity. Introduces the diversity of occupational therapy practice environments through didactic and clinical experiences.
REHAB 571 Occupational Performance through the Life Span (4) Fogelberg Overview of human development as it relates to occupational performance and functional adaptation in the ages and stages of life from infancy through old-old age. Emphasis on environmental influences, activity, and occupational roles, tasks, and component behaviors as they relate to individuals in different ages and stages.

REHAB 572 Occupational Therapy Theory and Practice in Psychosocial Dysfunction I (1-7, max. 7) Fogelberg An overview of bodies of knowledge in psychosocial practice as related to occupational performance. Learning topics include major frames of reference, effects of psychosocial disorders on occupational
performance (life activities), and occupational therapy evaluation and intervention skills. Lectures, reading, class discussions, role-playing, problem-based learning, and fieldwork comprise the learning experiences.

REHAB 574 Occupational Therapy Theory and Practice in Physical Disabilities I (6) Dudgeon Provides theoretical bases and clinical practice skills used in evaluation and intervention of occupational performance (life activities). Focus is on individuals with sensorimotor (physical) and/or cognitive impairments. Practical applications of theory occur through lecture, laboratory, and problem-based learning approaches.

REHAB 575 Occupational Therapy Theory and Practice in Physical Disabilities II (5) Powell Provides theoretical bases and clinical practice skills used in evaluation and intervention of occupational performance (life activities). Focus is on individuals with sensorimotor (physical) and/or cognitive impairments. Practical applications of theory occur through lecture, laboratory, and problem-based learning approaches.
REHAB 576 Occupational Therapy Theory and Practice in Pediatrics (1-7, max. 7) Jirikowic Provides knowledge and skills necessary for providing occupational therapy evaluation, intervention, and transition services focused on occupational performance (life activities) for children and teens with disabilities and their families.

REHAB 577 Occupational Therapy Theory and Practice in Geriatrics (5) Powell Occupational therapy evaluation and intervention with older adults. Covers psychology, physiology, and socio-demographics of aging. Emphasis on interaction skills with the elderly and occupational performance (life activities). Laboratory experiences and fieldwork in the practice setting enhance didactic coursework.
REHAB 578 Occupational Performance Analysis (3) Rollinger Skills in the analysis, adaptation, and sequencing of therapeutic and functional activities as they apply to occupational performance. Analysis focuses on performance components (sensorimotor, cognitive, psychosocial, psychosocial, psychological), temporal aspects (chronological, developmental), and environmental aspects (physical, social, cultural).
REHAB 579 Therapeutic Communication (3) Fogelberg Introduces basic principles and skills of effective interpersonal communication in dyadic interactions and in groups. Emphasis on effective listening, interviewing, and principles and concepts of occupational therapy groups. Lectures, readings, class discussions, role playing, and in-class exercises comprise the learning experiences.

REHAB 580 Introduction to Research in Rehabilitation
(3) Dudgeon Evaluation of rehabilitation research literature and design of research studies relevant to rehabilitation.
REHAB 581 Application of Measurement Systems (3) Jirikowic Provides basis for critically evaluating and using tests and measurements in occupational therapy evaluation. Focus on reliability, validity, norms, test development process, statistics relevant to tests and measurement, and ethical implications of testing. Critical evaluation of selected standardized test used in occupational therapy.
REHAB 582 Assistive Technology in Rehabilitation (3) Dudgeon Overview of the field of assistive technology as it impacts occupational performance in self-care, work, and leisure activities. Covers interface devices, computer applications, environmental controls, augmentative communications, power mobility, seating and positioning systems, and sensory enhancements.

REHAB 583 Exploring Disability (1) Explores multiple as pects of disability including social, mental, physical, and financial factors. Provides skills for working with people with disabilities and exposure to a multidisciplinary team approach to overcoming healthcare barriers. Utilizes interactive didactic with patient participation and introduction to community resources for people with disabilities.
REHAB 585 Leadership and Management in Occupational Therapy (5) Kanny Focuses on occupational therapy leadership and management in healthcare delivery systems. Includes theoretical and professional competencies focuses on healthcare access, health policy laws, service delivery settings, reimbursement, regulation, political advocacy. Management topics include leadership, program planning, budgeting, personnel, and outcome measurement.

REHAB 588 Fieldwork II Seminar (1) Rollinger Supports a successful transition from academic work to the fulltime Fieldwork II clinical experiences by reinforcing he integration and application of acquired technical and professional competencies needed for REHAB 594, Fieldwork II. Credit/no credit only. Offered: Sp.
REHAB 591 Graduate Project (1-4, max. 7) Graduate project focused on research, administration, education, practice, policy, or other scholarly or creative work. Required of graduate, entry-level occupational therapy and physical therapy students.
REHAB 592 Principles of Orthotic Use in Rehabilitation (2) Crane General principles and clinical applications of orthoses in patient management, with exposure to research issues in orthotic design.
REHAB 593 Principles of Prosthetic Use in Rehabilitation (2) Morgenroth General principles of prevention of amputation, prosthetic design, biomechanics, and clinical applications of upper and lower extremity prostheses
REHAB 594 Clinical Fieldwork in Occupational Therapy (10, max. 30) Rollinger 12-week, full-time fieldwork, delivering occupational therapy services to clients focusing on application of meaningful occupation under direct supervision. Exposure to varied clients across the lifespan and in various settings reflective of current practice. Students must complete a minimum of two 12-week placements. Credit/no-credit only.

REHAB 595 Clinical Affiliation in Physical Therapy ([2-10]-, max. 30) Robinson Clinical practice of physical therapy techniques under supervision in communitybased clinics. Credit/no-credit only.
REHAB 596 Electromyography and Clinical Neurophysiology (4) Kraft Didactic course covering electromyography and clinical neurophysiology. First part covers basic neurophysiology and second covers electromyography, nerve conduction studies, somatosensoryevoked potentials, residual- and auditory-evoked potentials, single fiber EMG, late response, quantitative analysis, and macro EMG. Prerequisite: resident standing in rehabilitation medicine; others by permission of instructor.
REHAB 597 Electromyography and Electrodiagnosis Laboratory (1-) Kraft Elective work in clinical electromyography and other electrodiagnostic methods. Prerequisite: resident standing in rehabilitation medicine; others by permission of instructor.
REHAB 598 Electromyography and Electrodiagnosis Laboratory (1-) Kraft Elective work in clinical electromyography and other electrodiagnostic methods. Prerequisite: resident standing in rehabilitation medicine; others by permission of instructor.
REHAB 599 Electromyography and Electrodiagnosis Laboratory (1) Kraft Elective work in clinical electromyography and other electrodiagnostic methods. Prereq-
uisite: resident standing in rehabilitation medicine; others by permission of instructor.
REHAB 600 Independent Study or Research (*)
REHAB 685 P-Chronic Disease and Disability (4) McNalley Meets chronic-care requirement for medical students. Structured clinical experience on rehabilitation medicine services. Differences between acute and chronic medicine, identification of disability problems, and therapeutic techniques for removing disability. Hospitals are within University system, local area, and WWAMI area. Prerequisite: third-year medical student standing.
REHAB 686 P-Rehabilitation Medicine Clerkship - Pediat rics $(8 / 12)$ McNalley Meets chronic-care requirement for medical students. Incorporates material of RE HAB 685 and expands into disabling pediatric disease. School planning, family counseling, community support services included. Four- or six-week package permits inpatient, outpatient, and consultation experience. Recommended for students contemplating pediatrics. Prerequisite: third-year medical student standing.
REHAB 687 P-Rehabilitation Medicine Clerkship (8/12) McNalley Meets chronic-care requirement for medical students. Incorporates material of REHAB 685 and expands into disability problems. Four- or six-week package permits inpatient, outpatient, and consultation experience. Recommended for careers in family medicine, internal medicine, rheumatology, cardiol ogy, neurology, geriatrics, orthopedic surgery, neurosurgery, and cardiovascular surgery. Prerequisite: third-year medical student standing.
REHAB 689 P-Spinal Cord Injury (8/12) McNalley Introduction to diagnosis, management, rehabilitation of patients with spinal-cord injuries. Interaction with rehabilitation team, psychiatrists, and subspecialists in urology, neurosurgery, and plastic surgery. Performance at subintern level expected. Veterans' Administration Medical Center only. Prerequisite: MED 665, SURG 665.

REHAB 697 P-Rehabilitation Medicine Special Elective (*, max. 24) McNalley Equivalent to REHAB 686, REHAB 687, or REHAB 688. Satisfies requirements in rehabilitation medicine/chronic care. Student arranges with another university, using the "special assignment form." Students qualify after review, similar ex perience at another university. Prerequisite: permis sion of instructor.

REHAB 699 P-WWAMI Rehabilitation Medicine Special Electives (*, max. 24) By special arrangement for qualified students, special clerkships or externships may be available at institutions other than the University of Washington located within the WWAMI region. Prerequisite: permission of department.

## REHAB $\mathbf{7 0 0}$ Master's Thesis (*)

## REHAB 800 Doctoral Dissertation in (*)

REHAB 801 Practice Doctorate Project/Capstone ([1-4]max. 12) Credit/no-credit only. Offered: AWSpS.

## Prosthetics And Orthotics

RHB PO 501 Prosthetics and Orthotics Skills (1) Cooper, Spaulding Emphasizes the development of psychomotor skills for the application of contemporary technology uses. Practice and discussion of material and design theories related to durability, weight, and ease of fabrication to encourage problem-solving skills for independent practice. Offered: A.
RHB PO 502 Professional and Practice Issues (1) Cooper, Spaulding Provides an overview of professional and practice issues in prosthetics and orthotics. Includes discussion of healthcare, policy, and systems; introduction to reimbursement, Medicare and Medicaid
ules and regulations; practice management; bioethics; professional organizations; legislative issues; and medical ethics and compliance. Offered: Sp.

RHB PO 511 Upper Limb Prosthetics I (4) Spaulding Covers upper limb prosthetics providing students with background knowledge of rehabilitation planning and principles of below elbow prosthetic management and prescription consideration. With direct patient contact, students assess and then formulate, implement, and evaluate a prosthetic treatment plan. Offered: A.
RHB PO 512 Upper Limb Prosthetics II (4) Spaulding Integrates principles from upper limb prosthetics I, focusing on above-elbow prosthetic management. Encourages critical thinking and appropriate clinical decision-making through discussions and case study exercises that include body-powered, externally-powered, and hybrid systems. Offered: Sp.

RHB PO 521 Lower Limb Prosthetics and Orthotics I: Theory and Application (5) Cooper, Yamane Integrates prior core foundational knowledge (anatomy, kinesiology, medical science, gait analysis, patient evaluation procedures, and functional skills) with new knowledge of prosthetic and orthotic theory, patient evaluation, and clinical practice. Analyzes, evaluates, and synthesizes principles and theories in developing intervention plans for individuals with lower limb dysfunction or amputation. Offered: S.

RHB PO 522 Lower Limb Prosthetics I: Clinical Practice (4) Cooper Explains and applies biomechanical principles of prosthetic gait and alignment to treatment of individuals with amputations below the knee. Students develop individualized treatment plans that demonstrate analysis of client needs, application of transtibial socket design, prescription principles, and components. Integrates knowledge of available research and protocols into the planning process. Offered: S.
RHB PO 523 Lower Limb Orthotics I: Clinical Practice (4) Yamane Utilizes patient evaluation skills and applies knowledge of pathology, anatomy, biomechanics, and orthotic theory and principles to evaluate and provide orthotic treatment plans for individuals with lower extremity dysfunction. Students refine professional skills and behavior and develop psychomotor and cognitive skills required for patient care. Offered: S.

RHB PO 524 Lower Limb Prosthetics and Orthotics II: Theory and Application (6) Cooper, Yamane Integrates prior foundational knowledge acquired with new knowledge and skills of prosthetic and orthotic theory and clinical practice. Analyzes, evaluates, and synthesizes principles and theories in the development of prosthetics/orthotics intervention plans for individuals with lower limb dysfunction or amputation. Prerequisite: RHB PO 521. Offered: A.
RHB PO 525 Lower Limb Prosthetics II: Clinical Practice (4) Cooper Includes advanced instruction in concepts and skills developed in Lower Limb Prosthetics I. Offered: A.

RHB PO 526 Lower Limb Orthotics II: Clinical Practice (3) Yamane Utilizes patient evaluation skills and applies knowledge of pathology, anatomy, biomechanics, and orthotic theory and principles to evaluate, develop, and provide orthotic treatment plans for individuals with lower extremity dysfunction. Students refine professional skills and behavior and develop psychomotor and cognitive skills required for patient care. Offered: A.

RHB PO 527 Pediatric Prosthetics and Orthotics (1) Okumura, Yamane Integrates biomechanics, pathomechanics, and development to discuss pathology/ pathophysiology, etiology, clinical course, prognosis,
and surgical and medical management of specific pediatric medical conditions and interventions. Discusses implications of various medical interventions and their functional considerations. Offered: A.
RHB PO 528 Lower Limb Prosthetics III: Theory and Application (5) Cooper Develops individualized prosthetic treatment plans based on a comprehensive knowledge of prosthetic gait, alignment, transfemoral socket design, and component principles. Develops support treatment plans by integrating knowledge of available research and treatment protocols into the decision-making process. Offered: W
RHB PO 529 Lower Limb Prosthetics III: Clinical Practice (6) Cooper Advanced instruction in application of biomechanical principles of prosthetic gait and alignment to treatment of individuals with amputations above the knee. Includes obtaining histories, assessing physical function, and taking residual limb impressions and measurements to prove prosthetic care. Offered: W.

RHB PO 541 Engineering Concepts (2) Price, Spaulding Solves problems based on principles of mechanics, strength of materials, force analyses, and fatigue that are related to prosthetic and orthotic design. Applies basic science to component failure. Discusses fiber reinforced materials, thermoforming plastics and hydraulic knee units. Offered: Sp.
RHB PO 561 Clinical Rotation I (2) Students actively observe patient care, perform patient histories and evaluation procedures, and develop clinical patient care psychomotor skills under the guidance and mentorship of clinical preceptors. Offered: S.
RHB PO 562 Clinical Rotation II (1) Students actively observe patient care, perform patient histories and evaluation procedures, and develop clinical patient care psychomotor skills under the guidance and mentorship of clinical preceptors. Offered: A.
RHB PO $\mathbf{5 6 3}$ Clinical Rotation III (1) Students actively participate in the provision of prosthetics and orthotics treatment services and develop clinical patient care skills under the mentorship of clinical preceptors. Credit/no credit only. Offered: W.
RHB PO 564 Clinical Rotation IV (1) Students actively participate in the provision of prosthetics and orthotics treatment services and refine clinical patient care, decision-making, and problem-solving skills under the mentorship of clinical preceptors. Credit/no credit only. Offered: Sp.
RHB PO 581 Outcome Measures for the Prosthetics and Orthotics Clinic (2) Hafner, Spaulding Examines development and use of health-related outcome measures. Focuses on the relationship between measurement constructs and patient populations as well as psychometric properties. Students select, implement, and critically evaluate patient outcome measures. Offered: Sp.

RHB PO 582 Critical Evaluation of the Prosthetics and Orthotics Literature (1) Hafner Examines and applies appropriate methods of analyzing prosthetics/orthotics literature. Offered: A.

RHB PO 583 Evidence Based Practice I (3) Hafner Focuses on the use and critical evaluation of evidence to answer clinical problems. Encourages students to become consumer of evidence by developing an understanding of how to acquire and incorporate evidence into routine clinical practice. Credit/no credit only. Offered: W.

## Surgery

BB487 University of Washington Medical Center

The Department of Surgery carries out instruction dur ing all four years of School of Medicine attendance. The third-year six-week clerkship constitutes the core of student exposure to general surgery and is required of all students. The fourth-year emergency-room clerkship is also a required part of the curriculum. The department offers a variety of fourth-year elective clerkships in a number of the specialty aspects of the department's clinical activities, in cluding but not limited to trauma, cardiothoracic surgery, plastic surgery, vascular surgery, transplantation, surgical critical care, pediatric surgery, and the management of burn patients

## COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations.
SURG 498 Undergraduate Thesis (*) Offered to those students who have engaged in undergraduate research in general surgery. (Full- or part-time.)
SURG 499 Undergraduate Research (*) Provides an opportunity to participate in ongoing research projects or carry out an independent research project under supervision of Department of Surgery faculty. Practical experience in experimental design and execution is provided under direct supervision of selected faculty members. (Full- or part-time.)

SURG 505 P-Preceptorship in Surgery (1) Opportunity for first- and second-year medical students to gain personal experience with clinical faculty members in the community. Students observe general aspects of private practice, including clinical problems seen; practice limitation; doctor-doctor, doctor-patient, and doctor-nurse relationships in the office and hospital. Prerequisite: permission of department.

## SURG 600 Independent Study or Research (*)

SURG 630 P-WRITE Surgery Clinical Clerkship (*, max. 24) Basic clinical clerkship for students enrolled in the WRITEpProgram. Prerequisite: completion of basic curriculum; third- and fourth-year students; acceptance in the WRITE program.

SURG 642 P-Rural Surgery Clerkship - Pullman, WA (8) Designed to supplement basics learned in surgery required clerkship. Excellent opportunity to participate in general surgery and various other subspecialties in a smaller city. Highly suggested for student entering primary care. Prerequisite: required surgery clerkship; medicine clerkship; recommended: threequarters of required clerkships competed.
SURG 644 P-Rural Surgery Clerkship - Lewiston, ID (8) Designed to supplement basics learned in surgery required clerkship. Excellent opportunity to participate in general surgery and various other subspecialties in a smaller city. Highly suggested for student entering primary care. Prerequisite: required surgery clerkship; medicine clerkship; recommended: threequarters of required clerkships competed.
SURG 646 P-Rural Surgery Clerkship - Gillette (8) Designed to supplement basics learned in surgery required clerkship. Provides an excellent opportunity to participate in general surgery and various other subspecialties in a smaller city. Recommended for students entering primary care. Prerequisite: surgery clerkship; medicine clerkship; permission of the department.
SURG 647 P-Rural Surgery Clerkship - Powell (8) Designed to supplement basics learned in SURG 665. Opportunity to participate in general surgery and various other subspecialties in a smaller city. Recommended for students entering primary care. Prerequisite: surgery required clerkship and permission of department.

SURG 648 P-Rural Surgery Clerkship - Libby (8) Designed to supplement basics learned in SURG 665. Opportunity to participate in general surgery and various other subspecialties in a smaller city. Recommended for students entering primary care. Prerequisite: surgery required clerkship and permission of department.
SURG 649 P-Rural Surgery Clerkship - Lewistown (8) Designed to supplement basics learned in SURG 665. Opportunity to participate in general surgery and various other subspecialties in a smaller city. Recommended for students entering primary care. Prerequisite: surgery required clerkship and permission of department.
SURG 650 P-Rural Surgery Clerkship - Twin Falls (8) Designed to supplement basics learned in SURG 665. Opportunity to participate in general surgery and various other subspecialties in a smaller city. Recommended for students entering primary care. Prerequisite: surgery required clerkship and permission of department.

SURG 652 P-Plastic Surgery - Spokane (8) Introduces fundamental techniques and enhances knowledge of plastic surgery, wounds, trauma, burns, cancers, and pediatric and adult cosmetic and reconstructive surgery. Participate in all surgery-related activities. Prerequisite: surgery and medicine required clerkships.
SURG 653 P-Pediatric Surgery - Spokane (8) Student functions as a subintern directly assisting on the services and is an integral part of the team. Prerequisite: surgery required clerkship.
SURG 654 P-Cardiothoracic Surgery - Spokane (4/8) The student functions as a subintern and directly assists on the service and is an integral part of the team. Prerequisite: surgery required clerkship.

SURG 656 P-Trauma/Acute Care Surgery - Boise (8) The student functions as a subintern and directly assists on the service and is an integral part of the team at St. Alphonous Trauma Services. (Four weeks).
SURG 657 P-Vascular Surgery - Spokane (4/8) Student spends two or four weeks at the Vascular Institute in Spokane. The student functions as a subintern and directly assists on the service and is an integral part of the team.
SURG 658 P-Ambulatory Surgery Clerkship - Mary Bridge (4) Rotation focuses on increasing the student's ability as a primary care physician to recognize and form an initial plan of management for common surgical problems seen in the outpatient setting. Offered: AWSpS.
SURG 659 P-Ambulatory Surgery Clerkship - Madigan (4/8, max. 8) Rotation focuses on increasing the student's ability as a primary care physician to recognize and form an initial plan of management for common surgical problems seen in the outpatient setting. Offered: AWSpS.

SURG 660 P-Ambulatory Surgery Clerkship - Group Health (4) Rotation focuses on increasing the student's ability as a primary care physician to recognize and form an initial plan of management for common surgical problems seen in the outpatient setting. Offered: AWSpS.

SURG 661 P-Surgical Intensive Care Unit Sub-Internship - VA (8) Designed to augment experience gained in SURG 665. Excellent opportunity to participate in the management of critically ill patients under the close supervision of the staff/house staff. Recommended for students entering surgery or primary care. Prerequisite: surgery required clerkship

SURG 662 P-Community Surgery Clerkship - Longview (8) Designed to supplement basics learned in SURG 665. Excellent opportunity to participate in general, thoracic, vascular, and plastic surgery in a group
practice in a smaller city. Recommended for students entering primary care. Prerequisite: surgery required clerkship and permission of department.

SURG 663 P-Subinternship in General Surgery - Virginia Mason (*, max. 16) Diagnosis, preoperative care, and postoperative care; management of surgical emergencies, the ICU patient, and outpatient follow-up of discharged patients. Students function at the intern level under close supervision of the staff and house staff. Prerequisite: surgery required clerkship.

SURG 664 P-Subinternship in General Surgery - VAMC (*, max. 16) Diagnosis, preoperative care, and postoperative care; management of surgical emergencies, the ICU patient, and outpatient follow-up of discharged patients. Students function at the intern level under close supervision of the staff and house staff. Prerequisite: surgery required clerkship.
SURG 665 P-Clinical Clerkship - UWMC (*, max. 24) Diagnosis and management of problems amenable to surgical therapy. Physiological basis of surgical care, differential diagnosis and decision making, and the basic principles of surgical management. Care of inpatients and outpatients, including participation in the operating rooms.
SURG 666 P-Clinical Clerkship - Boise (12) Diagnosis and management of surgical problems. Physiological basis of surgical care, differential diagnosis and decision making, and basic principles of surgical management. Care of inpatients and outpatients, including participation in the operating rooms. Fulfills graduation requirement for surgery.
SURG 667 P-Clinical Clerkship - Spokane (12) Diagnosis and management of surgical problems. Physiological basis of surgical care, differential diagnosis and decision-making, and basic principles of surgical management. Care of inpatients and outpatients, including participation in the operating rooms. Fulfills graduation requirement for surgery.
SURG 668 P-Clinical Clerkship - Casper (12) Diagnosis and management of problems amenable to surgical therapy. Physiological basis of surgical care, differential diagnosis and decision making, and the basic principles of surgical management. Care of inpatients and outpatients, including participation in the operating rooms. Fulfills graduation requirement for surgery.
SURG 669 P-Clinical Clerkship - Billings (12) Diagnosis and management of problems amenable to surgical therapy. Physiological basis of surgical care, differential diagnosis and decision making, and the basic principles of surgical management. Care of inpatients and outpatients, including participation in the operating rooms. Fulfills graduation requirement for surgery.
SURG 670 P-Clinical Clerkship - Missoula (12) Diagnosis and management of problems amenable to surgical therapy. Physiological basis of surgical care, differential diagnosis and decision making, and the basic principles of surgical management. Care of inpatients and outpatients, including participation in the operating rooms. Fulfills graduation requirement for surgery.
SURG 671 P-Clinical Clerkship - Madigan (12) Diagnosis and management of problems amenable to surgical therapy. Physiological basis of surgical care, differential diagnosis and decision-making, and the basic principles of surgical management. Care of inpatients and outpatients, including participation in the operating rooms. Fulfills graduation requirement for surgery.
SURG 672 P-Clinical Clerkship - HMC (*, max. 12) Diagnosis and management of problems amenable to surgical therapy. Physiological basis of surgical care,
differential diagnosis and decision making, and the basic principles of surgical management. Care of inpatients and outpatients, including participation in the operating rooms. Fulfills graduation requirement for surgery. Prerequisite: HUBIO 563.
SURG 673 P-Clinical Clerkship - VA (*, max. 12) Diagnosis and management of problems amenable to surgical therapy. Physiological basis of surgical care, differential diagnosis and decision making, and the basic principles of surgical management. Care of inpatients and outpatients, including participation in the operating rooms. Fulfills graduation requirement for surgery. Prerequisite: HUBIO 563.
SURG 674 P-Clinical Clerkship - Virginia Mason (*, max. 12) Diagnosis and management of problems amenable to surgical therapy. Physiological basis of surgical care, differential diagnosis and decision making, and the basic principles of surgical management. Care of inpatients and outpatients, including participation in the operating rooms. Fulfills graduation requirement for surgery. Prerequisite: HUBIO 563.
SURG 675 P-Clinical Clerkship - Caldwell, ID (*, max. 12) Diagnosis and management of problems amenable to surgical therapy. Physiological basis of surgical care, differential diagnosis and decision making, and the basic principles of surgical management. Care of inpatients and outpatients, including participation in the operating rooms.
SURG 677 P-Clinical Clerkship - Sheridan, WY (12) Diagnosis and management of problems amenable to surgical therapy. Physiological basis of surgical care, differential diagnosis and decision making, and the basic principles of surgical management. Care of inpatients and outpatients, including participation in the operating rooms.

SURG 678 P-Clinical Clerkship - Kalispell, MT (12) Diag nosis and management of problems amenable to surgical therapy. Physiological basis of surgical care, differential diagnosis and decision making, and the basic principles of surgical management. Care of inpatients and outpatients, including participation in the operating rooms.
SURG 679 P-Clinical Clerkship - Wenatchee, WA (12) Diagnosis and management of problems amenable to surgical therapy. Physiological basis of surgical care, differential diagnosis and decision making, and the basic principles of surgical management. Care of inpatients and outpatients, including participation in the operating rooms.
SURG 681 P-Peripheral Vascular Disease (4/8, max. 8) Peripheral arterial and venous problems, including methods of clinical evaluation; new diagnostic procedures; and the available methods of treatment Patient workup, performance of diagnostic studies, and presentation of case material to the staff. Prerequisite: surgery required clerkship.
SURG 682 P-Clinical Burn Care ( ${ }^{*}$, max. 12) Offered on the burn unit of Harborview Medical Center. Exposure to the care of patients with thermal injury, including management of severe metabolic and septic problems and opportunity to participate in surgical procedures. Exposure to plastic and reconstructive surgery. Prerequisite: surgery required clerkship.
SURG 683 P-Pediatric Surgery Externship (8/12) Surgical conditions peculiar to the particular age group with a preponderance of congenital and neoplastic conditions that are amenable to surgical treatment. Prerequisite: surgery required clerkship; recommended: background in human embryology and genetics.
SURG 685 P-Cardiothoracic Surgery Externship (*, max. 12) Serve as subintern, participate in patient care while learning cardiopulmonary hemodynamics of cardiac and thoracic surgery. Observe a wide variety
of both cardiac and thoracic disease entities. Participate in the open-heart procedures in the operating room. Opportunity to gain additional understanding of physiology of cardiopulmonary bypass.
SURG 686 P-Plastic Surgery Clerkship and Preceptorship (*, max. 12) Introduces fundamental techniques and enhances knowledge of plastic surgery, wounds, trauma, burns, cancers, and pediatric and adult cosmetic and reconstructive surgery. Participate in all surgery-related activities. Prerequisite: surgery and medicine required clerkships.

SURG 687 P-Transplantation Surgery Clerkship (8) Clerkship is in the University regional multi-organ transplantation center. Student participates fully in the care of all transplant patients, on twice daily multidisciplinary rounds, in pre-operative conference, and in the operating room and on the donor harvest team. Weekly didactic teaching sessions. Prerequisite: surgery and medicine required clerkships.
SURG 688 P-Subinternship in General Surgery (*, max. 12) Offered on the general surgery wards of the Universi-ty-affiliated hospitals. Diagnosis, preoperative care, and postoperative care; management of surgical emergencies, the ICU patient, and outpatient followup of discharged patients. Students function at the intern level under close supervision of the staff and house staff. Prerequisite: surgery required clerkship.
SURG 689 P-Community Surgery Clerkship - Coeur d' Alene (8) Designed to supplement basics learned in SURG 665. Excellent opportunity to participate in general, thoracic, vascular, and plastic surgery in a group practice in a smaller city. Recommended for students entering primary care. Prerequisite: SURG 665 and permission of department.
SURG 690 P-Alaska Native Medical Center Surgery SubInternship (8/12) Designed to supplement basics learned in SURG 665. Excellent opportunity to participate in general, thoracic, vascular, and plastic surgery in a specialized population of patients. Recommended for students entering primary care. Prerequisite: SURG 665 and permission of department.

SURG 691 P-Surgical Intensive Care Unit Sub-Internship - HMC (8) Designed to augment experience gained in SURG 665. Excellent opportunity to participate in the management of critically ill patients under the close supervision of the staff/house staff. Recommended for students entering surgery or primary care. Prerequisite: surgery required clerkship.

SURG 692 P-Ambulatory Surgery Clerkship - Seattle Children's (4) Rotation focuses on increasing the student's ability as a primary care physician to recognize and form an initial plan of management for common surgical problems seen in the outpatient setting. Offered: AWSpS.

SURG 693 P-Rural Surgery Clerkship - Buffalo (8) Designed to supplement basics learned in SURG 665. Opportunity to participate in general surgery and various other subspecialties in a smaller city. Recommended for students entering primary care. Prerequisite: surgery required clerkship and permission of department.

SURG 694 P-Rural Surgery Clerkship - Riverton (8) Designed to supplement basics learned in SURG 665. Opportunity to participate in general surgery and various other subspecialties in a smaller city. Recommended for students entering primary care. Prerequisite: surgery required clerkship and permission of department.

SURG 695 P-Vascular Thoracic Surgery (8/12) The student spends two weeks on the vascular and two weeks on the thoracic surgery services at Harborview Medical Center. The student functions as a subintern
and directly helps the residents manage all patients on the service and is an integral part of the OR team.
SURG 696 P-Breast Surgery - Spokane (4/8) Two or four weeks at the Breast Center in Spokane. Student functions as a subintern directly assisting on the service and is an integral part of the team.

SURG 697 P-Surgery Special Electives (*, max. 24) Special clerkship, externship, or research opportunities may be available at institutions other than the University of Washington. Prospective students obtain from the dean's office a special assignment form at least one month before preregistration. Prerequisite: surgery required clerkship and permission of department.

SURG 698 P-Clinical Clerkship - Fairbanks (*, max. 24) Includes the diagnosis and management of surgical problems. Focuses on the physiological basis of surgical care, differential diagnosis and decision making, and basic principles of surgical management. Care of inpatients and outpatients, including participation in the operating rooms. Fulfills graduation requirement for surgery.
SURG 699 P-WWAMI Surgery Special Electives (*, max. 24) By special arrangement for qualified students, special clerkships or externships may be available at institutions, other than the University of Washington, located within the WWAMI region. Prerequisite: permission of department.

## Urology

BB1115 Health Sciences

Urology is the surgical discipline concerned with diseases of the urinary tract in males and females, and the genital system in the male. The science is broadly based: major areas of practical and investigative concern include congenital defects, cancer, renal diseases, reproductive biology, neuropathology, renal stone formation, and transplantation.

Clinically, the field encompasses a large variety of technical skills including real-time imaging and manipulation, endoscopy, laparoscopy and robotics, and open surgery. Medical diagnosis and treatment are a large part of the discipline.
The department is actively involved in patient care, instruc tion, and research concerning the problems of urology. Training for medical students starts in the second year and continues through the third and fourth years. Training is also provided for residents, fellows, nurses and applied specialists. The department is responsible for a fully approved urology residency program. Contact the Urology Clerkship Coordinator at 206-731-3205 for further information.

## COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations.

UROL 498 Undergraduate Thesis (*) Provides an opportunity for medical students to write in the area of urology.
UROL 499 Undergraduate Research (*) The student participates in current urologic research projects under supervision of full-time staff. Certain specific problems may be elected by the student. Elective for medical students.

UROL 501 P-Urology Preceptorship (1) Individual experiences with one or more of the full-time department faculty members covering research, teaching, and patient care. Students observe activities in the clinic,
hospital ward, operating room, and research labora tories. Prerequisite: first- or second-year medical student standing; permission of instructor.

UROL 675 P-Urology Preceptorship (*, max. 8) Student follows a private practice preceptor in all of his or her work. Becomes acquainted with the office management of urological problems. Prerequisite: UROL 680, HUBIO 562. (Two or four weeks.)

UROL 679 P-Urology Clerkship - Boise VA (*, max. 8) Two or four week rotation. Full activities of clinical service. Emphasizes basic principles of urology. Prereq uisite: HUBIO 562.

UROL 680 P-Urology Clerkship (*, max. 8) Dalkin, Grady, Krieger, Lendvay, Porter, Voelzke, Wessells, Yang Full activities of clinical service. Basic principles of urology emphasized. Prerequisite: HUBIO 562. (Two or four weeks.)

UROL 681 P-Female Urology (4) J. Miller Observation of cases of lower urinary tract disorders specific to women, emphasizing behavioral management and multidisciplinary care. Ninety-five percent of cases observed are women. Not intended as the only ex posure to urology for students considering urology as career choice. Prerequisite: third- or fourth-year standing and permission of instructor.
UROL 682 P-Urology Clerkship - Spokane (*, max. 8) Full activities of clinical service. Basic principles of urology emphasized. Prerequisite: HUBIO 562. (Two or four weeks.)
UROL 683 P-Urology Clerkship - Boise (*, max. 8) Full ac tivities of clinical service. Basic principles of urology emphasized. Prerequisite: HUBIO 562. (Two or four weeks.)

UROL 684 P-Urology Clerkship - Billings (*, max. 8) Two or four week rotation. Includes full activities of clinical service. Emphasizes basic principles of urology. Prerequisite: HUBIO 562.
UROL 685 P-Urology Sub-Internship (*, max. 12) Dalkin, Grady, Krieger, Lendvay, Porter, Voelzke, Wessells, Yang Subintern is responsible for patient workups and for preoperative and postoperative care and participates in the operating room. Prerequisite: MED 665 or pediatrics basic clerkship, or permission of instructor.

UROL 690 P-Urology Specialties (*, max. 8) For those who wish further exposure to a specific aspect of urology. Students spend time with one attending at University of Washington Medical Center, Harborview Medical Center, Seattle Children's Hospital, or Veterans' Administration Hospital studying oncology, infections, infertility, stone disease, impotence, or other aspects of urology. Prerequisite: UROL 680 and permission of instructor.

UROL 697 P-Urology Special Electives (*, max. 24) Special clerkship, externship, or research opportunities may be available at institutions other than the University of Washington. Prospective students obtain from the dean's office a special assignment form at least one month before preregistration. Prerequisite: permission of instructor.
UROL 699 P-WWAMI Urology Special Electives (*, max. 24) By special arrangement for qualified students, special clerkships or externships may be available at institutions, other than the University of Washington, located within the WWAMI region. Prerequisite: permission of department.

# School of Nursing 

T301 Health Sciences

## Interim Dean

Pamela Mitchell

## Associate Deans

Joie Whitney, Acting Associate Dean, Research
Betty Gallucci, Interim Associate Dean, Academic Services Maggie Baker, Vice Associate Dean for Nursing Graduate Programs

Nurse professionals are members of interdisciplinary teams in clinics, hospitals, and community settings, and work with people of all ages, cultural backgrounds, and lifestyles to help them achieve the highest level of wellness possible. Nurse practitioners fill critical healthcare needs in both urban and rural settings, often for portions of the population who have not received adequate health care. Nurse scientists conduct important research about a variety of health problems and how best to promote health, prevent disease, and care for people who are ill. Nurses also teach in colleges and universities throughout the world.

## UNDERGRADUATE PROGRAM

## Adviser

T301 Health Sciences, Box 357260
(206) 543-8736
sonas@uw.edu

The School of Nursing offers the following programs of study:

- Bachelor of Science in Nursing degree with eligibility to take the licensure examination to become a registered nurse.
- An accelerated Bachelor of Science in Nursing option for candidates with an existing bachelor's degree. This option provides eligibility to take the licensure examination to become a registered nurse.
- A four-quarter modification of the basic curriculum is available for the registered nurse. This BSN Completion (RN to BSN) program is available at UW Bothell and UW Tacoma, and prepares graduates go on for advanced degrees in nursing.

## Bachelor of Science in Nursing

Suggested First- and Second-Year College Courses: See below, under Admission Requirements.

## Admission Requirements

Admission to the nursing major occurs once a year, for autumn quarter, with an application deadline of January 15. Selection is competitive.

## Application

## 1. Cumulative 2.00 GPA or higher

2. To be considered for admission, applicants must satisfy one of the following requirements at time of application.
a. Three out of the total prerequisite science courses completed with a minimum 3.00 GPA.
b. Four out of the total prerequisite science courses with a minimum 2.80 GPA.

The science prerequisite courses are CHEM 120, CHEM 220, CHEM 221 (three-quarter chemistry series for UW students, two quarter sequence - one general chemistry and one organic - for non-UW applicants); BIOL 118/ BIOL 119; B STR 301; MICROM 301 (plus MICROM 302 for UW students; non-UW applicants must take a separate microbiology lab if lab is not included in the general microbiology course); NUTR 300.
3. Together with the application and college transcript(s), applicants submit a personal statement; a resume outlining volunteer/paid health-care experience, community service, and cultural awareness; and a recommendation from a health care provider (employer or volunteer coordinator).
4. Applicants are expected to have 100 hours of health care experience in a paid or volunteer position in one setting for three months or more, completed within 12 months preceding submission of the application. The majority of applicants present health care experiences of several hundred hours for nine months or more.
5. After an initial review of all applications, some applicants are asked to attend a proctored essay session. The proctored essay dates are published in the admissions publication. Eligible applicants are invited via email.

Entrance Requirements: Prior to beginning the nursing program in the autumn, students must meet the following requirements:

1. A minimum of 90 credits to include the following courses:
a. Written communication (10 credits): English composition and W-courses
b. Problem-solving (8 credits): one QSR course, chosen from MATH 107, MATH 111, MATH 112, MATH 120, MATH 124, MATH 134, MATH 144, PHIL 115, PHIL 120, PHIL 470, or Q SCI 291. One statistics course, such as STAT 220, STAT 311, Q SCI 381, QMETH 201, or EDPSY 490
c. Visual, Literary, \& Performing Arts (VLPA) (15 credits)
d. Individuals \& Societies (I\&S) (15 credits): to include NURS 201 or equivalent
e. Natural World (NW) (26-33 credits): to include CHEM 120, CHEM 220, CHEM 221 (three quarter chemistry series for UW students; two-quarter sequence - one general chemistry and one organic - for non-UW applicants); BIOL 118, BIOL 119; B STR 301; MICROM 301 (plus MICROM 302 for UW students; non-UW applicants must take a separate microbiology lab if lab not included in general microbiology course); NUTR 300
f. Electives to complete 90 credits
2. A minimum 2.00 cumulative GPA is required, and a minimum grade of 2.0 for each prerequisite course. Because admission is competitive, the GPA for admission is usually significantly higher.
3. All applicants must be exempted from all English language proficiency requirements at UW in order to start the program. If offered admission the applicant is required to pay for a background check to be run by a company specified by the School of Nursing.

For additional information on admission criteria, specific prerequisites, and deadlines, as well as application forms, visit the School of Nursing website, nursing.uw.edu. To contact the School of Nursing Office of Academic Services, call (206) 543-8736 or 1-800-759-NURS or email sonas@ uw.edu. Information sessions are offered periodically in the School of Nursing, Health Sciences Building T301, and an information session podcast is available. For a schedule of sessions or to listen to podcast, visit nursing.uw.edu/ admissions/info-sessions/.

## Major Requirements

Students need a minimum of 180 credits to graduate with a bachelor's degree from the University of Washington. The required credits in the nursing curriculum total 95 ; thus 85 credits must be earned through general education, nursing prerequisites, and elective courses.

95 credits as follows:

1. Nursing Foundations (52 credits): NURS 301, NURS 303, NURS 304, NURS 308, NURS 309, NURS 310, NURS 401, NURS 404, NURS 405, NURS 407, NURS 410, NURS 411, NURS 412, NURS 415, NURS 417, NURS 419, NURS 420
2. Clinical Nursing ( 40 credits): NCLIN 302, NCLIN 306, NCLIN 402, NCLIN 406, NCLIN 409, NCLIN 411, NCLIN 416, NCLIN 418
3. Nursing Research and Methods (3 credits): NMETH 403

Equivalent or higher-level coursework may be substituted with the approval of the academic adviser.

## Accelerated Bachelor of Science in Nursing option

## Admission Requirements

Admission occurs once a year, for summer quarter, with an application deadline in preceding autumn quarter. Selec tion is competitive.

## Application Requirements

1. Cumulative college-level GPA of 2.80 or higher.
2. At least four of the total prerequisite science courses completed with a minimum grade of 3.0 in each course, and a cumulative GPA in these courses of 3.30 or higher. Science prerequisite courses are CHEM 120, CHEM 220, CHEM 221 (three-quarter chemistry series for UW students; two quarter sequence -- one general chemistry and one organic -- for non-UW applicants); BIOL 118/ BIOL 119; B STR 301; MICROM 301 plus MICROM 302 for UW students. (Non-UW applicants must take a separate microbiology lab if lab is not included in the general microbiology course); NUTR 300.
3. Together with the application and college transcript(s), applicant submits a series of personal statements; a resume outlining volunteer/paid healthcare experience, community service, and cultural awareness; and a recommendation from a healthcare provider (employer or volunteer coordinator).
4. Applicants are expected to have 100 hours of health care experience in a paid or volunteer position in one setting for three months or more, completed within 12 months preceding submission of the application. The majority of applicants present healthcare experiences of several hundred hours for nine months or more.
5. All applicants are asked to attend a proctored essay session.

## Entrance Requirements:

Prior to beginning the nursing program in summer, students must meet the following requirements:

1. Bachelor's degree in a non-nursing field.
2. Completion of a lifespan growth and development course -- NURS 201 or equivalent.
3. Completion of one statistics course, such as STAT 220, STAT 311, Q SCI 381, QMETH 201, or EDPSY 490.
4. Completion of all Natural World courses: CHEM 120, CHEM 220, CHEM 221 (three-quarter chemistry series for UW students; two-quarter sequence -- one general chemistry and one organic -- for non UW applicants); BIOL 118, BIOL 119; B STR 301; MICROM 301 plus MICROM 302 for UW students. (Non UW applicants must take a separate microbiology lab if lab not included in
general microbiology course.); NUTR 300. Minimum cumulative 3.30 GPA in these courses.
5. Minimum 3.00 cumulative GPA, and minimum 3.0 grade for each prerequisite course.
6. All applicants must be exempted from all English Ianguage proficiency requirements at UW in order to start the program. If offered admission the applicant is required to pay for a background check to be run by a company specified by the School of Nursing,
For additional information on admission criteria, specific prerequisites, and deadlines, as well as application forms, visit the School of Nursing website, nursing.uw.edu. To contact the School of Nursing Office of Academic Services, call (206) 543-8736 or 1-800-759-NURS or email sonas@ uw.edu. Information sessions are offered periodically in the School of Nursing, Health Sciences Building T301, and an information session podcast is available. For a schedule of sessions or to listen to podcast, visit nursing.uw.edu/ admissions/info-sessions/.

## Major Requirements

95 credits, as follows:

1. Nursing Foundations (52 credits): NURS 301, NURS 303, NURS 304, NURS 308, NURS 309, NURS 310, NURS 401, NURS 404, NURS 405, NURS 407, NURS 410, NURS 411, NURS 412, NURS 415, NURS 417, NURS 419, NURS 420
2. Clinical Nursing (40 credits): NCLIN 302, NCLIN 306, NCLIN 402, NCLIN 406, NCLIN 409, NCLIN 411, NCLIN 416, NCLIN 418
3. Nursing Research and Methods (3 credits): NMETH 403

Equivalent or higher-level coursework may be substituted with the approval of the academic adviser.

## Student Outcomes and Opportunities

- Learning Objectives and Expected Outcomes: The School of Nursing prepares its graduates to function as generalists in professional nursing practice and to collaborate with other health-care providers. The BSN/ ABSN undergraduate curriculum emphasizes theory and clinical practice to ensure critical thinking, human caring, and clinical expertise. Clinical experiences are provided in institutional and community settings for preventive and acute care. For the ten goals of the BSN degree program, visit nursing.uw.edu/admissions/bsn/ curriculum/.
- Instructional and Research Facilities: Learning Laboratory
- Honors Options Available: With College Honors (Completion of Honors core curriculum and Departmental Honors). With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- Research Internships and Service Learning: Students complete eight clinical courses during the BSN program beginning with the first quarter of the program. Each student experiences placements in medical-surgical nursing, pediatric, family nursing, psychosocial mental health, and community-based nursing. Clinical hours per course range from six hours/week during the first quarter to 24 hours/week during the final quarter.
- Department Scholarships: Limited scholarships based on student need established by FAFSA. Students are invited to apply after they have been admitted to the program by completing the School of Nursing Financial Aid application.
- Student Organizations/Associations: Students may join the Professional Organization of Nursing Students (PONS) after admission to the program. PONS' involvement spans all aspects of the undergraduate program: recruitment, orientation, education, fund raising, and social events.

## GRADUATE PROGRAM

Graduate Program Coordinator
T301 Health Sciences, Box 357260
(206) 543-8736
sonas@uw.edu

The School of Nursing offers graduate study leading to the degrees of Master of Nursing (MN), Master of Science (MS), Doctor of Nursing Practice (DNP) and Doctor of Philosophy in nursing science (PhD). The MN and DNP programs admit RNs interested in advanced clinical practice. The MS program trains beginning level nurse investigators involved in the testing of knowledge relevant to research and nursing science. The PhD program prepares students for roles as scientists, scholars and educators. Neither the MS nor the PhD program requires RN licensure for admission.
The Master of Nursing program develops increased competence in selected areas of clinical nursing. The following specialties are available (subject to change; visit School of Nursing website): adult clinical nurse specialist, adult nurse practitioner (generalist, adult acute care, adult/older adult, infectious disease, rural adult), advanced practice community-health systems nursing (cross-cultural nursing and global health, occupational and environmental health nursing, healthy aging, communities for youth, rural health), neonatal clinical nurse specialist, neonatal nurse practitioner, nurse midwifery, perinatal nurse specialist, psychiatric mental health nurse practitioner, and an independent MN . A thesis or non-thesis project is required for the MN degree. A concurrent MN/MPH degree is also available.

MS students have the option of creating their own research program, each student working closely with a faculty member who shares his/her research interest, or applying to the Clinical Informatics and Patient-Centered Technologies (CIPCT) specialty. A thesis or non-thesis project is required for the MS degree.

The Doctor of Nursing Practice (DNP) program admits both licensed RNs and ARNPs and prepares the graduate for a tripartite role in advanced practice nursing, leadership, and practice inquiry. The following specialties are available (subject to change; please visit School of Nursing website): adult clinical nurse specialist, adult nurse practitioner (generalist, adult acute care, adult/older adult, infectious disease, rural adult), advanced practice community-health systems nursing (cross-cultural nursing and global health, occupational and environmental health nursing, healthy aging, communities for youth, rural health), family nurse practitioner, neonatal clinical nurse specialist, neonatal nurse practitioner, nurse midwifery, perinatal nurse specialist, and psychiatric mental health nurse practitioner. Applicants who already have a MN degree may apply to earn a DNP degree in their same specialty or choose a different one. The DNP program of study culminates in a capstone clinical investigative project.

The PhD in Nursing Science program is a research-based degree program that trains students to create knowledge that influences and alters the health of individuals, groups, and populations, using current theories of nursing science. PhD students work closely with faculty to create their own research-based programs of study. These programs of study are based on applicants' research interests as they intersect with the current research interests of School of Nursing faculty. The PhD in Nursing Science program also offers an optional concentration in statistics in partnership with the Center for Statistics and the Social Sciences. All PhD students must submit a dissertation at the end of their program of study.
The School of Nursing also offers a Graduate Certificate Program in Advanced Practice Nursing (GCPAPN), with subspecialties as follows: Adult Clinical Nurse Specialist; Adult Nurse Practitioner; Adult Psychiatric Mental Health NP;

Complementary and Alternative Medicine; Environmental Health; Forensic Nurse Specialist; Infant Mental Health; Infectious Disease and Infection Control; Leadership; Nurse Educator; Nurse Midwifery; Rural Adult Nurse Practitioner. Admission criteria vary slightly based on focus of the certificate. Some certificate program options require an RN Iicense and a graduate degree in nursing. All options require completion or concurrent enrollment in a graduate degree and a minimum 3.00 GPA in the last 90 quarter ( 60 semes ter) graded credits. Admission and program requirements for these certificates are the same as requirements for the umbrella degree in which the student is enrolled.

Part-time study is available for graduate degree programs. Coursework may be started prior to formal admission to a program as a graduate nonmatriculated student (GNM). GNM status allows the student to take non-clinical courses and to earn up to 12 graduate-level credits which may be applied to a graduate program if the student is later admitted. Time limits for acceptance of courses taken as a GNM student are six years for a master's degree and ten years for a doctoral degree from the first course to completion of the degree

## Master of Nursing

## Admission Requirements

1. Baccalaureate degree from a nationally accredited nursing program with a minimum GPA of 3.00 on a 4.00 scale for the last 90 graded quarter credits, or
2. Associate of arts degree or diploma from a nationally accredited RN program, in combination with a baccalaureate degree in a field other than nursing, acceptable to the UW. In addition, RNs with non-nursing baccalaureate degrees are required to demonstrate competencies in community health and professional leadership equivalent to those of baccalaureate degree nursing graduates, and are required to submit nursing equivalency essays.
3. A 3-credit basic course in descriptive and inferentia statistics with a grade of at least 2.0.
4. An active, unrestricted United States RN license at the time of application. If the applicant does not have a Washington State license, the applicant must obtain one prior to beginning the UW Master of Nursing program.
5. Proof of English Language Proficiency. All applicants to the MN program whose native language is not English must demonstrate English language proficiency Unless the applicant received a degree from an institution in an English-speaking country, or can provide official evidence that their previous degree instruc tion was in English, the applicant should submit one of the following minimum test scores (applicants with scores below the minimum are unfortunately not eligible to apply to the MN program): IELTS, 7.0; TOEFLiBT, 92; TOEFLC, 237; TOEFL, 580; MLT, 90.
In addition, because the School of Nursing wants to assure success in clinical placements during their programs of study, all MN applicants whose native language is not English must submit a minimum score for spoken English. The following are acceptable tests and minimum scores (applicants with scores below the minimum are unfortunately not eligible to apply to the MN program): IELTS (speaking portion only), 7.0; TOEFLiBT (speaking portion only), 26; Versant English Test, 70; TSE, 55; SPEAK, 230.

Applicants who do not have the applicable minimum required scores are ineligible to apply to the UW MN program. Test scores must be from within the last two years. For questions about proof of English language proficiency, contact the School of Nursing.
6. Applications to both the School of Nursing and to the UW Graduate School via the Graduate School online admissions process.
7. Resume describing relevant work, professional, and volunteer experiences.
8. Three letters of recommendation, one academic, one clinical, and one additional recommendation of either type. Recommendations may be submitted online through the Graduate School
9. Admission essay relevant to the focal area objectives. (If applying to two focal areas, a separate goal statement must be submitted for each.)
10. One official transcript from each collegiate institution attended, mailed to the School of Nursing along with other application materials.
11. If admitted to the MN program, the applicant is required at that time to obtain criminal history/background check clearances via a service designated by the School of Nursing. All applicants pay a fee for this service.

## Degree Requirements

37-40 credits, as follows:
Nursing science and professional foundations (15 credits); clinical practice ( 6 credits); scholarly inquiry (10 credits with scholarly project or 13 credits with thesis); related coursework ( 6 credits). Specific courses determined in consultation with adviser according to the student's specific background and needs.

## Master of Nursing/Master of Public <br> Health Concurrent Degree Program (MN/ MPH)

## Admission Requirements

See admission requirements for MN and MPH individual degrees. Students must apply separately to, and be accepted by, each school. Students already enrolled in one school may apply for admission to the other and to the concurrent degree track. Students are encouraged to complete up to one year of study in one school before entering the other.

## Degree Requirements

See MN and MPH individual degree requirements; differences are as follows:

At least 18 quarter credits for the master's degree in each program must be numbered 500 and above. Numerical grades must be received in at least 18 quarter credits of coursework for each degree and all required courses must be taken graded. Up to 12 credits taken in one school can be counted toward the other school's total credit requirements, if approved by both programs. Electives for each department can be fulfilled by taking the required courses of the other department.

One thesis is required. The 9 required thesis credits can be taken in either school, which then becomes the "home" school and the source of the thesis committee chair as well as the program authorized to approve the thesis. Each school agrees to accept the other school's thesis as meeting its thesis requirement. Faculty from each school should be involved in development of the thesis and sit on the thesis committee.

## Master of Science

## Admission Requirements

A baccalaureate degree in any discipline from a regionally accredited institution of higher learning with a minimum GPA of 3.00 on a 4.00 scale for the last 90 graded quarter credits by date of enrollment. Applicants to the Master of Science need not have a previous degree in nursing.

1. A 3-credit basic course in descriptive and inferential statistics with a grade of at least 2.0. Visit the School of Nursing website for a list of approved statistics courses.
2. Proof of English Language Proficiency. All applicants to the MS program whose native language is not English must demonstrate English language proficiency. Unless, the applicant received a degree from an institution in an English-speaking country, or can provide official evidence that the previous degree instruction was in English, the applicant should submit one of the following minimum test scores: IELTS, 7.0; TOEFLiBT, 92; TOEFLC, 237; TOEFL, 580; MLT, 90.

An MS applicant with any of the range of scores listed below, might be admitted to the MS program but would be required upon matriculation to take designated Academic English Program (AEP) courses through UW English Language Programs: IELTS, 6.0-6.9; TOEFLiBT, 61-91; TOEFLC, 173-236; TOEFL, 500-579; MLT, 80-89.

MS applicants are not required to submit minimum spoken English scores. Test scores must be from within the last two years.
3. Three letters of recommendation, two from persons qualified to comment on the applicant's academic abilities and one from a person who can provide work-related (practice) information.
4. Applications to both the School of Nursing and to the UW Graduate School via the Graduate School online admissions process.
5. Resume describing relevant work, professional, and volunteer experiences.
6. Admission essay relevant to the focal area objectives. (If applying to both focal areas, a separate goal statement must be submitted for each. The application is reviewed for the second choice after a decision has been made on the application to the first choice, and after the application deadline.)
7. If admitted to the MS program, the applicant is required at that time to obtain criminal history/background check clearances via a service designated by the School of Nursing. All applicants pay a fee for this service.
8. For students planning to take clinical nursing courses as part of their program of study, an active, unrestricted Washington RN license is required. Other applicants to the Master of Science program are not required to have an active RN license or to have a previous degree in nursing.

## Degree Requirements

46-49 credits, as follows:
Nursing science (15 credits); professional foundations (3 credits); theory development (5 credits); modes of inquiry (11 credits); scholarly project (6 credits) or thesis (9 credits); related coursework (6 credits). Specific courses determined in consultation with adviser according to the student's specific background and needs.

## Doctor of Nursing Practice

## Admission Requirements

1. Baccalaureate degree from a nationally accredited nursing program with a minimum GPA of 3.00 on a 4.00 scale for the last 90 graded quarter credits. Applicants with a master's degree from a nationally accredited nursing program are also welcome to apply and must have a minimum GPA of 3.00 on a 4.00 scale for the last 90 graded credits of the master's degree.

- OR -

Associate of Arts degree or diploma from a nationally accredited RN program, in combination with a baccalaureate degree in a field other than nursing, is accept-
able. In addition, RNs with non-nursing baccalaureate degrees are required to demonstrate competencies in community health and professional leadership equivalent to those of baccalaureate degree nursing graduates, and are required to submit nursing equivalency essays.
2. If an applicant has not completed a master's degree, a 3-credit basic course in descriptive and inferential statistics with a grade of at least 2.0.
3. Proof of English Language Proficiency. All applicants to the DNP program whose native language is not Eng lish must demonstrate English language proficiency. Unless, the applicant received a degree from an institution in an English-speaking country, or can provide official evidence that their previous degree instruction was in English, he/she should submit one of the following minimum test scores (applicants with scores below the minimum are unfortunately not eligible to apply to the DNP program): IELTS, 7.0; TOEFLiBT, 92; TOEFLC, 237; TOEFL, 580; MLT, 90.

In addition, because the School of Nursing wants to assure success in clinical placements during their programs of study, all DNP applicants whose native language is not English must submit a minimum score for spoken English. The following are acceptable tests and minimum scores (applicants with scores below the minimum are unfortunately not eligible to apply to the DNP program): IELTS (speaking portion only), 7.0; TOEFLiBT (speaking portion only), 26; Versant English Test, 70; TSE, 55; SPEAK, 230.

Applicants who do not have the applicable minimum required scores are ineligible to apply to the UW DNP program. Test scores must be from within the last two years. For questions about proof of English language proficiency, contact the School of Nursing.
4. Applications to both the School of Nursing and to the UW Graduate School via the Graduate School online admissions process.
5. Three letters of recommendation, one academic, one clinical, and one additional recommendation of either type. Recommendations may be submitted online through the Graduate School.
6. Admission essay relevant to the specialty's objectives. (If applying to two specialties, a separate goal statement must be submitted for each.)
7. Resume describing relevant work, professional, and volunteer experiences.
8. An example of applicant's scholarly writing. This paper must analyze a current clinical problem or professional issue, using appropriate references to make the argument and support the applicant's position. The paper must be written solely by the applicant and be a maximum of 5 double-spaced pages (excluding references).
9. One official transcript from each collegiate institution attended, mailed to the School of Nursing along with other application materials.
10. All applicants to the Doctor of Nursing Practice program must have an active, unrestricted United States RN license at the time of application. If the applicant does not have a Washington State RN license, the applicant must obtain one prior to beginning the UW Doctor of Nursing Practice program.
11. If admitted to the DNP program the applicant is required at that time to obtain criminal history/back ground check clearances via a service designated by the School of Nursing. All applicants pay a fee for this service.

## Degree Requirements

90 credits minimum, as follows:

1. Advanced Practice (minimum 45 credits)
2. Leadership (minimum 15 credits)
3. Practice Inquiry (minimum 30 credits)

## Doctor of Philosophy

## Admission Requirements

1. A baccalaureate degree from a college or university of recognized rank. Although the majority of applicants have a master's degree in nursing, neither a nursing background nor RN licensure is required for admission.
2. Applications to both the School of Nursing and to the UW Graduate School via the Graduate School online admissions process.
3. Proof of English Language Proficiency. All applicants to the PhD program whose native language is not English must demonstrate English language proficiency. Unless, the applicant received a degree from an institution in an English-speaking country, or can provide official evidence that their previous degree instruction was in English, the applicant should submit one of the following minimum test scores: IELTS, 7.0; TOEFLiBT, 92; TOEFLC, 237; TOEFL, 580; MLT, 90.

A PhD applicant with any of the range of scores listed below, might be admitted to the PhD program but would be required upon matriculation to take designated Academic English Program (AEP) courses through UW English Language Programs: IELTS, 6.0-6.9; TOEFLiBT, 61-91; TOEFLC, 173-236; TOEFL, 500-579; MLT, 80-89.
PhD applicants are not required to submit minimum spoken English scores. Test scores must be from within the last two years.
4. An example of applicant's scholarly writing ( 25 pages or less). Examples are a published or unpublished manuscript illustrative of concept analysis, an in-depth literature review in a focused area, or a research report. Theses are not accepted. The paper is reviewed for clarity and thoroughness, its articulation with relevant published literature, and the degree to which it raises important issues for the development of nursing science. (International students whose original scholarly writing is not in English should submit a copy of the writing translated into English).
5. Letters of recommendation from three persons knowledgeable about the individual's potential for a research career in nursing.
6. Personal statement in response to specific questions listed on the application related to the pursuit of doctoral studies. The statement is used to evaluate the applicant's ability in written self-expression and the congruency of goals and research interests with the program objectives.
7. If admitted to the PhD program the applicant will be required at that time to obtain criminal history/ background check clearances via a service designated by the School of Nursing. All applicants pay a fee for this service.

## Degree Requirements

93 credits minimum, as follows:

1. Theory and Domain of Knowledge (minimum 41 credits): Coursework in this category provides grounding in science and nursing science fundamental to examination of more specific issues in the relationship of human health and nursing.
2. Scholarly Inquiry (minimum 52 credits): Coursework deals with means of developing knowledge. Exposure to variety of approaches with encouragement to develop advanced skills is at least one methodology. Includes 27 dissertation credits.

## Financial Aid

A limited number of nurse traineeships are available for pre-master's study. Other financial aid is available on a limited basis. Teaching assistantships and research assistantships are available to a limited number of students. Priority for these appointments is given to pre-doctoral students.

## Additional Information

For additional information on current graduate program content, admission criteria, deadlines, as well as application forms, visit the School of Nursing website at www. son.washington.edu. To contact the Office of Academic Services, School of Nursing, call (206) 543-8736 or 1-800-759-NURS or email sonas@uw.edu. Information sessions for the MN and DNP degree programs only are offered periodically in the School of Nursing, Health Sciences Building T301, and an Information Session podcast is available.

## COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations.

## Nursing (NSG)

NSG 501 Teacher Practice Essentials-Models of Teaching and Learning (3) Integrative approach to understanding teaching learning that explores how various educational models and principles frame the processes of teaching and learning. Focus toward advanced practice nurses interested in teaching. Prerequisite: permission of instructor and graduate student status.

NSG 502 Advanced Teacher Practice Essentials-Expertise in Teaching (3) Critical analysis of how educational models and principles frame teaching to promote expertise in practice. Aimed toward advance practice nurses interested in teaching. Builds and expands content of NSG 501. Prerequisite: NSG 501 and graduate student status.
NSG 503 Advanced Teacher Practice Essentials-Diverse Learners (3) Focus on relevance and inclusiveness of addressing diversity of learners within teaching and learning activities. Aimed toward advance practice nurses interested in teaching. Further expands content of NSG 501 and NSG 502. Prerequisite: NURS 501 and graduate student status.
NSG 504 Advanced Teacher Practice-Challenges in Teaching (3) Focus on challenges facing educator during teaching encounters. Addresses influence of belief structures on learner's motivation for change. For advance practice nurses interested in teaching. Prerequisite: NSG 501 and graduate student status.
NSG 505 Applied Occupational Health and Safety (3) Camp, Johnson Application of occupational safety and health principles. Student teams perform evaluations, assess production methods/processes and exposures, health and safety procedures and programs, and develop engineering and administrative controls. Students perform on a consulting project with a local company including budgeting, project reporting, and presentation. Offered jointly with ENVH 559/IND E 567. Offered: Sp.
NSG 506 Occupational Safety Management (4) Explores industrial organization and methods of integrating safety and industrial hygiene programs with industrial operations. Investigates philosophic issues related to industrial safety and health such as responsibility for safety, dependency on safe practice, and hierarchy of prevention. Contains numerous case problems and student involvement opportunities. Offered: jointly with ENV H 560; Sp.

NSG 507 Technical Aspects of Occupational Safety (3) Explores specific hazards associated with major industries, as well as hazards common to all industries. Covers machine guarding, electrical safety, systems safety analysis, materials handling, and working at heights. Offered: jointly with ENV H 562; W.
NSG 508 Introduction to Ergonomics (3) Basic principles of ergonomics in work environment applied to problems of worker and management. Topics include measurement of physical work capacity, problems of fatigue and heat stress, applied biomechanics, work-er-machine interactions and communication, design of displays and controls. Prerequisite: basic human physiology or permission of instructor. Offered: jointly with ENV H 566/IND E 566; W.

NSG 509 Pathophysiology for Advanced Practice Nursing (1) Synchronous web pathophysiology course addresses immune and inflammatory responses with related content on infections and atherosclerosis. Focus on understanding the physiologic/pathophysiologic basis for disease processes and the relationship of various treatment modalities to these concepts. Prerequisite: Recent (within 5 years) upper division anatomy/physiology course or permission of instructor.
NSG 510 Assessment and Management of Neonatal Problems (5) Focus on pathophysiology of disease processes, assessment, diagnosis, and management of common health problems experienced by term and preterm neonates in neonatal intensive care settings. Includes foundations for clinical decision making for neonatal nurse practitioners and examination of interdisciplinary roles. Prerequisite: NURS 514.
NSG 511 Prevention Issues in Community Health (3) An interdisciplinary overview of community health prevention approaches focusing on the social determinants of health and health disparity reduction among vulnerable populations. Analysis of community and population preventive strategies across the life course. Roles of advanced community health nurses as prevention leaders and consumers of prevention information are emphasized. Offered: Sp.
NSG 512 Prevention Critique in Community Health (3) Critical examination of community health prevention programs that build community health capacity and show promise in facilitating long-term health equity among vulnerable populations. Focuses on the leading health disparities among U.S. racial and ethnic people of color, and how to be a critical program consumer, adopter, and adapter. Offered: A.
NSG 513 Psychopharmacology for Children and Adolescents (1) Tyson, Walsh Reviews pertinent issues in prescribing psychoactive medications to children and adolescents. Emphasizes empirical neuroendocrine bases, and nursing management relevant to these interventions. Examines legal and ethical issues pertaining to prescribing for children and adolescents. Offered: S.
NSG 514 Integrating Healthcare and Culture (2-3, max. 3) Lenart Prepares clinicians to integrate experience and knowledge with creative approaches and evidence-based strategies to improve cross-cultural healthcare, including complementary and alternative medicine/healthcare (CAM) practices. Focuses on relationships between clinicians, clients, and families, emphasizing discovery of commonalities among cultures to enhance collaboration. Offered: Sp.
NSG 515 Issues in Men's Health (2) Berry Studies selected issues in men's health. Focuses on significant issues particular to men's health. Includes discussion of basic management of selected men's health issues. Credit/no-credit only. Offered: S.

NSG 517 Integrating Assessment and Knowledge of CAM into Allopathic Care (3) Schwenka Explores strategies to assess and evaluate CAM use into conventional healthcare across the lifespan. Cultural, ethical, legal, and professional issues related to referral and collaboration within an integrative healthcare system. Challenges healthcare specialists to incorporate integrative principles into their practices. Offered: Sp.
NSG 518 Botanical Medicines and Dietary Supplements (2-3) Kiefer, De Pasquale Exploration of commonly used herbs and evaluation of their evidence base, treating frequently occurring acute and chronic health conditions. Optional laboratory experiences at Bastyr University herb garden and medicine-making laboratory. Field trip to identify Pacific Northwest botanicals.
NSG 519 Qi Gong and Reflexology (1) Marazita Focuses on history, evidence, and self-practice of traditional Chinese medicine's Qi gong and reflexology. Examines how Qi gong combines movement, meditation, and breathing regulation to enhance qi energy flow. Explores how foot reflexology re-education re-patterns and re-conditions neurological reflexes in the soles of the feet to maximize health. Offered: S.

NSG 521 Infectious Disease and Infection Control (2) Critical analysis of factors that influence infectious disease control including delivery of therapeutics, and the role of nursing and other health disciplines in healthcare and public health system responses, with a population-based perspective of infectious disease prevention, control, and management.
NSG 522 Life Span Physiology and Pathophysiology for Advanced Practice (3) Analysis of normal and abnormal human responses in major organ systems in individuals across the life span. Examination of normal physiology, evidence based and selected disorders pertaining to each system.
NSG 525 Privilege, Oppression, and Social Justice in Healthcare (3-4, max. 4) Allen, Schroeder, Ward Focuses on professional development skills that challenge white privilege, racism, and other oppressions in healthcare. Analysis of racism and privilege, application of that analysis to other oppressions such as gender, class, heterosexism, ableism, etc. Overall goal to enable healthcare professionals to create more socially just healthcare system. Credit/nocredit only.

NSG 530 Professional Identity and Leadership (4/5) Analysis of professional identity and effective leadership processes. Clarification and advancement of professional identity; analysis of self as leader; critical examination of perspectives of leadership and change; development and application of skills in leadership, conflict management, and collaboration to advance the profession and improve health outcomes. Prerequisite: permission of Instructor. Offered: AS.
NSG 531 Evidence-Based Management of Common Health Concerns: Episodic/Acute Emphasis (1-3, max. 3) Evidence-based clinical decision making and management of common health problems, emphasizing episodic/acute concerns. Critical appraisal of data to determine diagnosis and comprehensive plan of care within scope of advanced practice nursing. One in a series of advanced patient care management courses. Prerequisite: permission of instructor; recommended: NCLIN 501, which may be taken concurrently.
NSG 532 Evidence-Based Management of Gender-Related Health Concerns (1-3, max. 3) Evidence-based clinical decision making and management of common gen-der-related health concerns for non-pregnant adults. Critical appraisal of data to determine appropriate diagnosis and plan of care within scope of advanced practice nursing. One in a series of advanced patient
care management courses. Prerequisite: permission of instructor; recommended: NCLIN 501, which may be taken concurrently.

NSG 533 Evidence-Based Management of Common Health Concerns: Chronic Emphasis (1-3, max. 3) Evidencebased clinical decision making and management of common health problems, emphasizing chronic health concerns. Critical appraisal of data to determine diagnosis and comprehensive plan of care within scope of advanced practice nursing. One in a series of advanced patient care management courses. Prerequisite: permission of instructor; recommended: NCLIN 501, which may be taken concurrently.
NSG 534 Evidence-Based Management of Common Mental Health Concerns (1-3, max. 3) Evidence-based clinical decision making and management of common mental health problems. Critical appraisal of data to determine diagnosis, comprehensive plan of care , and need for referral within scope of advanced practice nursing. One in a series of advanced patient care management courses. Prerequisite: permission of instructor; recommended: NCLIN 501, which may be taken concurrently.
NSG 537 Development and Psychopathology: Parents and Infants (3) Spieker Provides an overview of typical social and emotional development and psychopathology in children ages three and younger. Demonstrates attachment relationships with parents and family to infant's development and psychopathology. Core course of Infant Mental Health Certificate program. 0 ffered: W.
NSG 538 Using Infant Mental Health Approaches in Practice Settings (3) Kelly Examines attachment-theorybased approaches to intervening with caregivers and young children in variety of settings. Curricular material supports any caregiver who has a significant relationship with a young child or children typically developing, at risk for delay, or diagnosed with special needs. Infant Mental Health Certificate program core course. Prerequisite: permission of instructor. Offered: Sp.

NSG 539 Assessment and Management of Common Psychosocial and Biophysical Conditions in the Perinatal Period (1-3, max. 3) Focuses on integrating three areas of knowledge specific to nurse-midwifery and advanced neonatal and perinatal nursing practice: psychosocial adaptations during the perinatal period; management of the childbearing woman; and fetus and neonate at risk for commonly occurring health problems during the perinatal period.
NSG 540 Telehealth Systems and Applications (4) Demiris Prepares consumers, managers, and researchers of telehealth systems through guided exploration into the components of such systems. Introduces challenges and opportunities facing designers and managers of telehealth and remote healthcare delivery networks. Offered: jointly with MEBI 581.
NSG 545 Pedagogical Frameworks for a Practice-Based Discipline (3) Altman, Simpson Analyses pedagogical frameworks that educators employ to coach, transform, and mentor learners in developing knowledge, skills, and affective dimensions within a practicebased context. Applies pedagogies that engage learners in higher order thought. Assesses the impact of pedagogies on learner outcomes in academic or clinical settings. Offered: A.

NSG 546 Instructional Technology (3) Altman, Simpson Develops expertise in the theoretical foundations and proposal of instructional design, technology, and analysis for a focused population of learners. Offered: W.
NSG 547 Capstone Teaching Seminar (3-6, max. 10) Altman, Simpson Includes the planning, completion,
analysis, and presentation of a project that reflects a synthesis of coursework completed for the Nurse Educator Tri-Campus Certificate program. Prerequisite: Core didactic and seminar courses for students in the NET graduate certificate program. Offered: jointly with B NURS 547/T NURS 547; Sp.
NSG 548 Basic Arrhythmia, Conduction Disturbance, and 12-Lead Electrocardiography Interpretation (2) Covers the theory and practice of basic arrhythmia, conduction disturbance, and 12-lead electrocardiography (ECG) interpretation, as well as selected pharmacologic and electrical management. Content is appropriate for primary care, and provides foundation for advanced interpretation for students in acute/critical care.

NSG 549 Complex Arrhythmia, Conduction Disturbance, and 12-Lead Electrocardiography Interpretation (2) Covers the theory and practice of complex arrhythmia, conduction disturbance, and 12-lead electrocardiog raphy (ECG) interpretation, as well as selected pharmacologic and electrical management. Appropriate for acute/critical care. Prerequisite: NSG 548, or satisfactory pretest of basic ECG interpretation.
NSG 550 Seminar on Professional Issues in Nursing Education (3) Seminar on role and related professional issues in nursing education. Prerequisite: either NSG 545, B NURS 513, or T NURS 513; either NSG 546, B NURS 511, or T NURS 511. Offered: jointly with B NURS 550/T NURS 550.
NSG 554 Occupational Health Nursing: Practice Issues (3) Examination of current, emerging occupational health and safety topics affecting worker populations. Includes discussion of workforce groups, work environments, and socio-political contexts; introduces prevalent health matters resulting from occupational exposures; applies theoretical concepts to the prevention of work-related injuries and illnesses; and identifies issues affecting advanced professional practice and leadership roles.

NSG 557 Physiology and Pathophysiology Across the Life Span (5) Analyzes disordered physiologic responses in individuals within the context of lifespan physiology. Examines pathophysiologic principles and responses, using case studies as exemplars for selected concepts, and the relationship between physiologic and pathophysiologic principles and the evidence basis for current practice.

NSG 558 Occupational Health Nursing: Advanced Practice and Leadership in Program Development (3) Examination of advanced professional practice and leadership in the context of occupational health and safety programs. Focuses on assessment, development, implementation, and evaluation of programs involv ing workplace health surveillance, case management, workers' compensation, and health promotion in consideration of political, economic, legal, ethical issues, and application of current research.
NSG 561 Community Health Systems for Equity (3) Defines, evaluates, and synthesizes how community health systems promote health equity. Emphasizes how various systems, such as care, public health, governmental, tribal, family, and social-kin, nonprofit, faith-based, and business, inhibit or promote communal health. Highlights advanced practice, practice inquiry, and leadership implications. Offered: A.
NSG 597 Synthesis of Advanced Practice Nursing (3) Synthesize new or higher levels of knowledge and skills of advanced practice nursing specialty, practice inquiry, and leadership to demonstrate competency of doctoral essentials and program objectives. Prerequisite: doctoral candidacy or Supervisory Committee permission; recommended: clinical practicum, which may be taken concurrently.

## Nursing (NURS)

NURS 200 Critical Approach to Women's Health (3) Interdisciplinary examination of women's health from a critical social-political approach. Discusses issues of gender, race, class, heterosexism, etc. in relation to women's health policies.
NURS 201 Growth and Development Through the Life Span (5-6, max. 6) I\&S Focuses on human growth and development throughout the life span. Emphasizes influence of growth and development theory and research on achievement of health and health promotional efforts directed toward persons of various ages and life styles. Optional service learning component. Open to nonmajors
NURS 202 Difference and Identity on University Campus (5) Allen Novels, autobiographies, films, and music are used to explore how Americans who are seen as white are characterized by people who are seen as non-white. Since many freshmen find campus life more socially diverse than their home communities, the focus is on young adults and college environments.

NURS 203 Health Care Terminology for Nursing (2) Designed to improve reading, writing, listening, and comprehension skills with respect to healthcare terminology. Offered: SpS.
NURS 204 Learning Wellness: Healthy Ways to Respond to Stressful Student Life (3) Booth-LaForce, Brandt, Cornman, Kim Examines the intimate connections of body, mind, spirit, as well as how stress challenges personal health. Provides overview of methods that respond to stress in health-producing ways, including time management, making healthy choices, and practicing wellness. Discusses evidence for each method and provides experiential components. Credit/nocredit only.
NURS 205 Nursing as a Career in Contemporary Society (1) Introduces an accurate description of nursing career, educational requirements and rationale, including advanced degree career possibilities. Explores breadth of nursing roles in promoting health to individuals, groups, and populations. Links historical development with contemporary practice. Explores factors that promote student and professional success in nursing. Credit/no- credit only.
NURS 301 Clinical Applications of Anatomy and Physiology (3) Application of anatomic and physiologic concepts to selected clinical phenomena. Focuses on integrated responses and functional health patterns. Exemplars of developmental and lifespan factors are identified. Includes experiential activities to enhance integration of content. Offered: AS

NURS 303 Foundations of Professional Nursing (2-3) Exploration of the profession of nursing, including past and present work of nurses, the experience of being ill and seeking healthcare, and the U.S. healthcare system. Offered: Sp

NURS 304 Human Responses I (3) Examines normal and pathophysiological responses to states of health and illness. Examines internal and external defense systems, balance and regulation of body systems, and integration of these concepts in the assessment and management of patient problems. Offered: A.

NURS 308 Human Responses II (3) Examines normal and pathophysiological responses to states of health and illness. Examines internal and external defense systems, balance and regulation of body systems, and integration of these concepts in the assessment and management of patient problems. Offered: W.
NURS 309 Pharmacotherapeutics in Nursing Practice I (2-) Emphasizes the principles of pharmacology, drug therapy, pharmacologic-therapeutic classes
of drugs, clinically important prototype drugs, and drug information resources. Nursing issues related to drug administration are also discussed. First of a two-quarter sequence. Offered: A
NURS 310 Pharmacotherapeutics in Nursing Practice II (2-3) Emphasizes the principles of pharmacology, drug therapy, pharmacologic-therapeutic classes of drugs, clinically important prototype drugs, and drug information resources. Nursing issues related to drug administration are also discussed. Second of a two-quarter sequence. Offered: W.
NURS 401 Care in IIIness I (5) Introduces major concepts relevant to the experience of acute and chronic illness, including physiological, pathophysiological, behavioral and experimental human responses, assessment of functional health status and interdisciplinary therapeutics in common alteration across the lifespan. First of a two-quarter sequence. Offered: W.

NURS 404 Gerontological Nursing (2) Focuses on concepts and issues relevant to the nursing care of older adults across the care continuum. Major course themes include nursing assessment of the older adult, health promotion, patient safety, geriatric syndromes, gerontechnology and influence of payer systems on care for older adults.. Prerequisite: NURS 310.

NURS 405 Care in IIIness II (5) Continuation of NURS 401, further examining selected psychopathologic and pathophysiologic alterations in health of individuals in context of families across life span. Emphasizes assessing functioning in psychosocial, cultural, person-environment relationships, and healthcare resources to plan nursing strategies for acutely/ chronically ill individuals of all ages.
NURS 407 Culture, Diversity, and Nursing Practice (3) Analyzes the impact of cultural, social, and global factors on the health of multicultural and diverse groups at the individual, population, and systems levels. Students gain knowledge and skills to effectively respond to the healthcare needs of multicultural societies through non-discriminatory and culturally appropriate nursing care practice. Offered: Sp.
NURS 410 Legal and Ethical Issues in Clinical Practice (3) Identification of ethical and legal issues and the ensuing dilemmas relevant to the profession of nursing and nurses as health professionals and citizens. Selected problems and dilemmas affecting nurses, nursing, and the delivery of healthcare analyzed using specific moral-ethical perspectives. Offered: AW.
NURS 412 Healthcare Systems (3) Introduction to analysis of healthcare systems with emphasis on political economy of health, access and utilization, disparities in health, public and private health insurance and reimbursement issues. Comparison of U.S. and other national healthcare systems. Offered: Sp.
NURS 413 Health in the Context of Culture (5-6, max. 24) Provides basic overview of health and healthcare challenges and opportunities in other countries. Examines socio-cultural, environmental, economic, political, and ecological factors that influence, health, health promotion, illness, disability, and death. Address responses to health issues both within and outside the health sector. May include study abroad.

NURS 415 Nursing of Families: Childbearing and Childrearing (5) Applies family concepts to nursing of childbearing and childrearing families. Focuses on family as context for care of individuals. Emphasizes use of physiological, psychological, developmental, cultural, and environmental theories for health promotion, disease prevention, and nursing therapeutics. Offered: AW.
NURS 417 Psychosocial Nursing in Health and Illness (3) Examines psychosocial disorders/issues of life
transitions from integrated perspective of biological, social sciences, nursing, and humanities. Emphasizes utilizing psychosocial nursing and interpersonal therapeutics for assessment, intervention, health promotion with individuals/families/groups at risk for experiencing psychosocial disorders. Prerequisite: NCLIN 418, which may be taken concurrently. Offered: AW.
NURS 419 Transition to Professional Practice (3) Focuses on critical examination, synthesis, and evaluation of professional nursing care. Emphasizes mastery, synthesis, and application of theory, research, and practice in relation to nursing management, leadership, and nursing care of individual clients or groups of clients and populations. Offered: SpS.
NURS 445 Topics in Nursing (1-10, max. 10) Guided survey and discussion of current literature on major topics in physiological nursing. Seminar/lecture with analysis and discussion of selected topics and readings. May have clinical component. Implications for nursing practice and healthcare emphasized.
NURS 450 Study Abroad Preparation: International Nursing in Context (1-, max 4) Carr, Kennedy, Lindenberg, Muecke Introduction to the language (if other than English), history, and culture of the host country, and examination of international health issues pertinent to the country. Required course for students taking a study abroad quarter. May be taken as distance learning. Offered: AWSpS.
NURS 466 Continuing Education in Nursing (3) Planning, developing, and evaluating continuing education programs in various institutions and agencies. Includes the application of adult learning principles to a variety of situations, such as workshops, in-service and staff development programs.

NURS 488 Youth at High Risk for Drug Abuse, Suicide Behaviors, Aggression, and Depression (3) Study of adolescent problem behaviors: causes, connections, and contexts. Two central themes are understanding vulnerability to drug abuse, suicide behaviors, and other related behaviors within social network contexts and exploring implications for prevention and early intervention programming.
NURS 489 Alcohol Problems in Family and Society (3) Analysis of family problems associated with alcoholism. Emphasis on psychological, cultural, and social implications; examination of various counseling practices employed and theories of prevention.

NURS 492 Anthropology of Refugees (3) I\&S The refugee phenomenon, its emergence in postcolonial world, and structure of life history of refugees. Ethnic change, involuntary deculturation, and acculturation as they occur in refugee life histories. Prerequisite: one 200-level ANTH course or LING 203. Offered: jointly with ANTH 492.
NURS 499 Special Electives (1-4, max. 15) Seminars on selected nursing issues of clinical problems, with independent study option, under supervision of nurs ing faculty. Offered: AWSpS.
NURS 500 Children and Adolescents with Special Health Needs, Their Families and Communities (3/4, max. 4) Acker, Brandt, Kieckhefer, Jolley, Magyary Includes advanced healthcare approached for providers of children and adolescents with chronic physical, neurobiological, developmental, or psychosocial problems. Emphasizes evidence-based, culturally-competent, and comprehensive assessment, referral, and management strategies. Describes exemplars of leadership processes related to policy, care coordination, family centered, and multidisciplinary approaches
NURS 501 Advanced Mental Health Interventions with Children (3) Developmentally based assessment and therapeutic approaches relevant for children
with psychosocial health problems. Consideration to matching therapeutic approaches with specific nature of symptomatology and other child, family, cultural, and environmental characteristics, including social and educational systems. Individual and group evaluation research emphasized.
NURS 502 Human Responses in Health and IIIness I (3) Survey of selected human responses to environmental demands in health and illness as expressed at physiologic, pathophysiologic, experiential, and behavioral levels. Such concepts as host defenses, ventilation, circulation, elimination, and nutrition are discussed. Prerequisite: graduate standing.
NURS 503 Human Responses in Health and IIIness II (3) Survey of selected human responses to environmental demands in health and illness at physiologic, pathophysiologic, experiential, and behavioral levels. Such concepts as immune response, stress response, circadian rhythms, pain, sleep, cognition, and consciousness. Prerequisite: graduate standing.

NURS 504 Clinical Nursing Therapeutics (1-6, max. 6) Critical analysis of therapeutic modalities to assist patients with a variety of responses to health problems. Includes selected therapies such as suction/ drainage, positioning to address responses in critical, life threatening, and chronic/continuing health states. Varying credits assigned for modules covering particular therapies. Prerequisite: NURS 502, NURS 503, or permission of instructor.
NURS 505 Selected Topics in Psychosocial and Community Health Nursing (2-10, max. 10) In-depth exploration of the major theoretical issues in psychosocial nursing. Seminar with analysis and discussion of selected topics and readings and implications for research and healthcare.

NURS 506 Role and Context of Advanced Practice Psychiatric Mental Health Nursing (3) Introduction to advanced practice roles in psychiatric mental health nursing. Diverse populations, practice settings, healthcare systems, standards of practice, certification, and licensing criteria relevant to the advanced practice role examined within the context of a broad range of ethical, clinical, and educational issues. Examines future directions. Credit/no-credit only.
NURS 507 Mental Health of Older Adults (3) Examines the dynamics of mental health research and practice in normal, optimal, and pathological aging. Focuses on psychosocial and environmental influences on mental health of older adults. Topics include: models of aging, cognitive impairment, depression, severe mental illness, and successful strategies to enhance mental health in older adults.

NURS 508 Seminar in Group Treatment (2) Seminar on the theoretical basis for working with various treatment groups. Analysis of selected approaches to group treatment. Analysis of leader responsibilities and functions in the development of therapeutic group experiences.

NURS 509 Issues in Violence and Aggression for Health Professionals (3) Focuses on research and theory of violent/aggressive behavior. Perspectives of victim, offender, family, community, society examined. Focus is recognition of violence against women. Designed to challenge students to clarify beliefs, values related to topics such as rape, homicide, domestic violence. Prerequisite: graduate nursing student or permission of instructor.

NURS 511 Seminar in Neonatal Nursing (3) Neonatal neurobehavioral and physiologic adaptation within context of physical and social environment. Neonatal responses to alterations in growth and illness. Assessment modalities and therapeutic strategies
used during the neonatal period. Prerequisite: NURS 514 or permission of instructor.
NURS 512 Critical and Interdisciplinary Approaches to Women's Health (3) Critical examination of the historical, socio-political, and scientific influences on women's health. Issues of sexism, racism, and heterosexism discussed from the perspective of different disciplines. Offered: jointly with GWSS 512.

NURS 514 Physiologic Adaptations in Women and Children: Physiologic Adaptations During Pregnancy and Postpartum (1-6, max. 6) Blackburn Analyzes the developmental physiologic adaptations in four units: women/reproductive processes, pregnancy/postpartum, fetus/neonate, and infancy through adolescence. Emphasis on implications for nursing practice. Examination of evidence-base for selected intervention strategies.
NURS 515 Common Adolescent Health Problems (3) Focuses on assessment, clinical decision making, and management of common adolescent problems. Concepts and theories of health promotion, adolescent development, and intervention strategies are explored to provide a broad framework for caring for adolescents in primary settings.
NURS 516 Pediatric Pulmonary Anatomy and Physiology: Clinical Applications (2) Examines evidenced-based approach to pediatric pulmonary conditions. Includes lung structure and function from infancy through adolescence with detailed analysis of the components parts of the pulmonary system, i.e., neurological control, upper and lower airways, parenchyma, and chest wall.

NURS 517 Pediatric Pulmonary Pathophysiology: Clinical Applications (2) Evidence-based approach to pediatric pulmonary pathophysiology and current treatment. Critical analysis and application of interdisciplinary management and long-term follow-up for children with pulmonary special healthcare needs Emphasizes family-centered care and professional leadership role of the advanced practice nurse. Prerequisite: permission of instructor.
NURS 518 Advanced Practice Pediatric Primary Care Management (3) Focuses on use of clinical decision making framework to develop theoretically and empirically sound individualized management plans for the young child, with physical and behavioral symptoms of common pediatric illness, in the primary care setting. Prerequisite: PNP or FNP specialty, or permission of instructor.
NURS 519 Curriculum Development in Nursing Education
(3) Theoretical rationale for curriculum development, study of curricular problems in nursing in relation to the elements of the curriculum as described in a curricular design. Prerequisite: graduate standing.
NURS 520 Evaluation of Clinical Performance in Nursing
(3) For graduate students preparing for faculty or staff development positions in nursing. Theory and principles of evaluation. Instruments to appraise clinical nursing performance developed as part of course requirements. Prerequisite: graduate standing or permission of instructor.

NURS 521 Computing Fundamentals for Health Providers (3) Enables health professionals to solve work/practice challenges using existing features of desktop computers. Emphasizes productivity concepts. Introduces extended features of common software packages, as well as basic concepts/methods of small system management and support. Prerequisite: admission to Health Informatics Certificate Program or by instructor permission. Offered: jointly with MEDED 580; W.

NURS 522 Legal and Ethical Issues in Advanced Practice Nursing (3) Shannon Reviews selected ethical issues
in healthcare and legal guidelines relevant to health care decision-making. Explores bioethics as a type of applied ethics. Focuses on preparing students for ethical challenges in advanced nursing roles. Offered: Sp.

NURS 523 Communities, Populations, and Systems: Theoretical Foundations (3) Focus on construction and analysis of research-based philosophies and theories related to nursing practice at the community, population, and systems levels. Synthesize and apply knowledge about social and environmental justice, determinants of health, and human health responses to populations and communities. Examine and evaluate leadership roles for nurses in community settings.

NURS 524 Conceptual Foundations for Care Systems Management (3) Critical analysis of nature and theoretical bases of care systems management practice. Concepts of nursing and organization science foundations to person-provider transaction management and leadership in context of economic, political, and social environments and health outcomes. Prerequisite: graduate standing.
NURS 525 Managing Clinical Effectiveness Within Care Systems (3) Optimizing person-provider clinical therapeutic transactions at multiple levels of care systems, complexity, and population aggregation. Emphasis on designing, managing and evaluating clinical effectiveness and efficiency within care systems.
NURS 526 Managing Organizational Effectiveness Within Care Systems (3) Analysis of management strategies for attaining effective and efficient organizational structures and processes within healthcare systems. Prerequisite: NURS 524 or permission of instructor.
NURS 527 Managing Effective Access and Utilization Within Care Systems (3-4) In-depth inquiry into healthcare access and resource utilization patterns among diverse populations, with emphasis on management strategies for establishing effective population-sys tem fit. Additional credit for exploring access and uti lization patterns within specific populations.
NURS 528 Implications of Human Embryology and Genet ics for Clinical Practice (3) Normal development of the human embryo and fetus and principles of human genetics. Alterations in development leading to common anomalies and implications for clinical practice. Prerequisite: graduate standing or permission of instructor.

NURS 529 Childhood Common Developmental and Behavior Issues (2) Focus on common developmental and behavioral issues presented by children and their families in primary care setting. Emphasis on the developmental, family, and cultural aspects of assessment and management of the common issues.
NURS 530 Conceptual Frameworks for Parent-Child Nursing (3) Designed to assist graduate students in exploration, criticism, and analysis of selected concepts, frameworks, and models relevant to parentchild nursing practice. Group seminar work focuses on the discussion of issues influencing the roles and practice of clinical nurse specialists in parent-child nursing. Skills necessary for developing a conceptual framework for practice.

NURS 531 Selected Topics in Family and Child Nursing (1-6, max. 12) In-depth examination of the literature pertinent to major theoretical issues in parent and child nursing. Seminar with analysis and discussion of selected topics and readings. Implications for research, prevention, and healthcare stressed. Prereq uisite: permission of instructor.
NURS 532 Professional Issues in Advanced Parent and Child Nursing (2-5, max. 5) History and current issues in advanced parent and child nursing practice and in-
terface with healthcare systems. Advanced practice roles in provision, implementation, and evaluation of healthcare services for women, children, and families. Opportunity for application to specific advanced practice roles. Prerequisite: permission of instructor.

NURS 533 Healthcare of Cancer Survivors (2) Focuses on teaching the health science graduate students about cancer survivorship issues. Discusses the health concerns of those who have been cured of their initial malignancy but are still at risk of long-term effects of chemotherapy, radiation, and surgery.
NURS 534 Aging and Health in Contemporary Society (3) Explores demographic, cultural, psychological, theoretical, political, and ethical context of aging and health in contemporary society. Content is based on empirical data and policy statements on aging. Analyzes healthcare delivery at an individual, community, and systems level to support optimal functioning across the health continuum for older adults. Offered: Sp.

NURS 536 Biological Aspects of Cancer: Implications for Care (3) Survey of major concepts from tumor biology and implications for advanced oncology nursing practice. Areas covered include carcinogenesis, cancer epidemiology, pathology, metastasis, treatments (chemotherapy, radiation, surgery, immunotherapy), and cancer detection and prevention. Discussion of role of advance nurse clinician and complex patient responses are incorporated into discussion of basic biological concepts.

NURS 537 Symptom Management in Cancer Care and Serious Illness (3) Berry, Nguyen Focuses on assessment, integration of research findings into clinical decisionmaking, diagnostic reasoning, and management of common symptoms experienced by adult patients with cancer and/or serious illness. Explores individual and family responses to serious illness and malignant processes. Emphasizes concepts of prevention, tailored patient/family education, management and evaluation strategies. Offered: Sp.
NURS 538 Management of Adults with Respiratory Dysfunction (3) In-depth examination of problems such as abnormal secretions and shortness of breath associated with respiratory dysfunction due to pulmonary diseases and other pathophysiological states.

NURS 539 Seminar in Critical-Care Nursing (3, max. 9) Systematic inquiry into pathophysiology, initial nursing management, and systems of care for the critically ill adult or child.
NURS 540 Special Topics in Biobehavioral Nursing and Health Systems (3-6, max. 9) Guided survey of the experimental literature of major topics in physiological nursing, including cardiopulmonary, biology of aging, neuromuscular, cancer, and endocrine. Conducted as a seminar with analysis and discussion of selected topics and readings. Implications for future research and healthcare emphasized.
NURS 541 Women's Healthcare: Diagnosis and Management (1-6, max. 6) Examines advanced practice women's healthcare issues including unique health issues for women, health maintenance, contraceptive care, diagnosis, and treatment of women's health problems across the lifespan. Prerequisite: permission of instructor.
NURS 542 Theoretical Foundations of Advanced Practice Nursing: Childbearing I (1-4, max. 4) Analyzes and applies concepts of advanced practice nursing/nursemidwifery care, specific to the normal childbearing woman, during preconception, antepartum, intrapartum, and postpartum. Examines primary care management of pregnant client within the context of the individual, family, socio-cultural environment, and healthcare system.

NURS 543 Theoretical Foundations of Advanced Practice Nursing: Childbearing II (1-4, max. 4) Analyzes and applies concepts of advanced practice nursing/ nurse-midwifery care, specific to at-risk childbearing woman, during preconception, antepartum, intrapartum, and postpartum. Examines primary care management of at-risk pregnant client within the context of the individual, family, socio-cultural environment, and healthcare system. Offered: W.

NURS 546 Interpersonal Aspects of Behavior (3) Selected theories in relation to psychosocial development and adaptation across life span for individuals, families, and small groups and as explanatory models of major psychosocial disabilities. General and psychosocial nursing models evaluated for heuristic value for research and practice. Prerequisite: graduate standing or permission of instructor.

NURS 547 Biologic Aspects of Psychosocial Disabilities (3) Analysis of biological processes influencing psychosocial behavior in response to internal and external stimuli. Research and theory of neuroendocrine mechanisms in psychosocial disabilities. Analysis of nursing management and evaluation of biopsychosocial modalities used in modification of behavior. Prerequisite: graduate standing in nursing or permission of instructor.

NURS 548 Frameworks in Infant Mental Health (3) Spieker Review infant mental health (IMH) and early development from a developmental interdisciplinary perspective. Pays special attention to brain development, sensory integration, early communication, and emotion regulation.
NURS 549 Assessment in Psychosocial Nursing (3) Conceptual and clinical approaches to advanced-level data collection and diagnostic reasoning in psychiatric/psychosocial disorders. Synthesizes knowledge from psychosocial nursing and multiple allied fields to enhance learners' cognizance of principles for establishing accurate and comprehensive data bases and sound multifaceted diagnostic formulations. Emphasizes DSM diagnostic scheme.
NURS 550 White Privilege and Racism in Health and Human Services (3) Explores relationships among the psychosocial health of people of color, American cultural patterns of intersecting forms of oppression (e.g., gender, race, and class) and the role of health professionals in defining, ameliorating, and/or aggravating psychosocial distress. Credit/no-credit only. Offered: jointly with GWSS 550.

NURS 551 Theoretical Foundations of Primary Care (1-3, max. 4) Presentation and interpretation of theoretical basis of advanced nursing practice in primary care. Provides students with conceptual foundation upon which to base their development as nurse practitioners. Prerequisite: graduate standing; permission of instructor.

NURS 552 Health Promotion (2-3) Emphasis on evidence for health promotion, risk reduction, screening, and disease prevention through the lifespan in primary care. Examines issues, including cultural diversity, impacting individual, family, and population health; evidence supporting risk assessment and behavior change; factors contributing to health disparities; and barriers to health at micro and macro levels. Prerequisite: permission of instructor; recommended: nurse practitioner students take fieldwork concurrently.
NURS 553 The Mentally III Offender in Correctional and Community Settings (3) Survey of social, political, economic, legal, and moral problems posed by individuals with mental disorders who commit crimes. Covers historical antecedents and current responses of correctional and mental health systems to mentally ill offenders, prevalence and correlates of incarcera-
tion, and roles of professionals in correctional men tal health field. Credit/no-credit only. Offered: W.
NURS 554 Management of Psychiatric Disorders (3-4) Focuses on advanced nursing management strategies for psychiatric disorders and primary mental health conditions. Emphasizes the synthesis and integration of scientific evidence to formulate psychiatric diagnoses, and select appropriate interventions for individuals, families, and communities. Measures outcomes through practice inquiry at both system and policy levels. Prerequisite: NURS 549.
NURS 555 Relationship Based Mental Health Assess ment of Infant and Toddlers (3) Dillon Focuses on multidisciplinary, diagnostic mental health assessments of infants and toddlers within the context of their primary relationships. Core course of Infant Mental Health Certificate Program. Prerequisite: permission of instructor. Offered: Sp.

NURS 556 Addictions and Substance Abuse: Biopsychosocial Perspectives (3) Psychosocial and pathophysiological aspects of substance use examined for their effects on individuals and families throughout life span. Theories and empirical findings serve as basis for evaluating preventive and therapeutic nursing approaches to substance use disorders, including those related to target populations. Prerequisite: basic course in biological sciences.

NURS 557 Health, Culture, and Community (3) Chrisman A multidisciplinary approach to the development of leadership in personal and organizational cultural competence in community-based participatory research. Emphasizes understanding collaborative as sessment, planning, and evaluation of health promotion and disease prevention programs to address the social determinants of health at the population level. Offered: jointly with HSERV 576; W.
NURS 558 Infancy: The Context of Relationships (3) Overview of the parent-child relationship from an ecological framework. Topics include infant regulatory behaviors, parent-child interaction, attachment theory, and prevention in primary care.
NURS 559 Theories of Psychiatric Disabilities (3) Theories from psychosocial nursing, psychiatry, and behavioral sciences explanatory of psychiatric disabilities provide basis for identifying psychosocial problems. Structure and functions of mental health organizations and social networks analyzed. Prereq uisite: NURS 547 or permission of instructor.

NURS 560 Dynamics of Community Health Practice (3) Analysis of principles of community health as applied to the delivery of clinical services in order to improve public health, reduce disparities, provide leadership in delivery of care, and synthesize one's clinical role with public health. Examines environmental, social, cultural, and behavioral determinants of health. In cludes family, aggregates, and populations. Offered: jointly with HSERV 508

NURS 561 Selected Topics in Comparative Nursing Care Systems (2/3, max. 10) In-depth examination of the literature pertinent to major theoretical issues in cross-cultural nursing and healthcare systems. Seminar with analysis and discussion of selected topics and readings. Implications for research and healthcare stressed.
NURS 562 Clinically Applied Anthropology (3) Anthropology as it relates to interdisciplinary delivery of culturally relevant healthcare. Cultural variation in illness beliefs and behavior, types of healing practices, illness prevention, social support networks. Prerequisite: graduate standing, permission of instructor. Of fered: jointly with ANTH 562.

NURS 563 Advanced Community Health Nursing (3) Systematic inquiry into the nature and foundations of
community health nursing. Analytic and theoretica perspectives on health risk assessment and nursing interventions in the community. Implications for community health nursing services. Prerequisite: permission of instructor and graduate standing.

NURS 564 Biopharmacological Management in Psychosocial Nursing (3-4) Biological and pharmacological interventions pertinent to practice of psychosocial nursing, including psychopharmacology, electroconvulsive therapy, and phototherapy. Emphasis on empirical neuroendocrine bases and then nursing management issues pertaining to these interventions. Legal and ethical issues pertaining to advanced practice and putative neurological mechanism are examined. Prerequisite: NURS 547 or permission of instructor.
NURS 565 Self-Management Strategies and Techniques in Patient Care (3) Theories underlying cognitive/behavioral self-management strategies and techniques in patient care. Evaluation of the clinical appropriateness and utility for nursing. Application to such clinical problems as abstinence in the recovering alcoholic, depression, and eating disorders. Prerequisite: graduate standing or permission of faculty.
NURS 566 Work Stress and Health (3) Delineates our understanding of the relationship between work-related stressors and worker health. Theoretical models of job-stress are considered and methodological issues examined. Uses social justice framework to explore worker stress and health disparities in immigrants and other disadvantaged populations. Offered: Sp.
NURS 567 Theoretical Basis of Management of Stress Response (3) Theories of physiologic responses linked to theories of cognitive/affective and behavioral responses to stressors. Conceptual basis of selfmanagement techniques. Research findings relevant to these theories and techniques examined and analyzed. Prerequisite: course in human physiology or physiologic psychology, permission of instructor.
NURS 568 Health Politics and Policy (3) Analyzes the formal and informal political context of healthcare delivery, professionals, and institutions in the United States. Addresses medical coverage and public persuasion, as well as policy analysis. Special attention is paid to women's political resources and participation. Credit/no- credit only.
NURS 569 Observation and Assessment of Relationships (3) Spieker Recognizing patterns of behavior in interactions between young children and their caregivers. Assessment of relationships in the early years. Students learn to incorporate an attachment theory approach and observation tools from research into the work of their own discipline or field. Offered: Sp.

NURS 570 Family Concepts: Health and IIIness (3) Emphasizes the family as unit of care across the life span. Predominant themes: factors influencing family health promotion, including resilience, vulnerability, risk reduction, and health policy; continuity, change and transition; and promotion of family health during acute and chronic illness episodes.

NURS 573 Professional Issues for Nurse Practitioners (2) Presentation and analysis of current healthcare trends and key professional issues influencing nurse practitioner practice. The NP's leadership role, role in influencing health policy, accountability to the profession/public, marketability, and legal dimensions of practice are stressed. Credit/no-credit only. Prerequisite: NP student nearing program completion or permission.
NURS 574 Family Interpretation and Management of Disordered Behavior across Cultures (3) Examines interpretation and management of disordered behavior from the perspective of families - intergenerational and
across cultures. Critically reviews selected theoreti cal frameworks for understanding families. Emphasizes theory, cultural perspective, and family assessment skills to plan relevant family interventions to assist families in managing disordered behaviors of family members.
NURS 575 Grief and Loss in Clinical Practice (2-4, max. 4) Analysis and study of social, cultural, and psychological conditions that influence human loss, grief, and death in modern society. Research findings, selected readings, and direct experience provide direction for examination of philosophic, theoretical, and pragmatic issues underlying choices and decisions in clinical practice. Open to graduate students with permission of instructor. (Limit: sixteen students.)

NURS 576 Assessment and Collaboration with Communities and Systems (3) Examines, critiques, and applies theory in assessing communities, populations, and systems cross-culturally. Focuses on advanced practice, executive leadership/policy, and practice inquiry; broad definition of community includes organizations. Emphasizes team work in assessment implementation, i.e., survey, interview, focus groups, observation/participant observation to advance understanding of social determinants of health.
NURS 577 Seminar in Infant Mental Health Intervention Models, Consultation, and Leadership (1-, max. 3) Capstone course in Infant Mental Health Certificate Program. Explores intervention models, role of consultation and leadership in the field. Field work in Infant Mental Health Program serves as context for exploring consultation and leadership roles. Synthesis and reflection of personal preparation and role encouraged. Offered: AWS.

NURS 578 Social Justice and Determinants of Health (3) Uses multiple data sources to critically analyze social justice and determinants of health in populations and communities. Critiques preventive theories related to the reduction of health disparities in complex systems. Examines theories related to the development, implementation, and evaluation of health policies and other systems' level approaches.
NURS 579 Transcultural Nursing Practices (3) Seminars examine four decades of nursing practice literature and other disciplines related to appropriate and competent care of diverse and multicultural populations. Concepts and methods from anthropology and other behavior sciences are considered in relationship with current health practice guidelines. Graduate standing or instructor permission.
NURS 580 Current Issues in Occupational and Environmental Medicine (2, max. 12) Kaufman Interdisciplinary seminar on current and emerging topics in the practice of environmental and occupational health. Faculty- and student-led presentations with an interdisciplinary focus, including occupational hygiene, nursing, and medical issues. Prerequisite: environmental health graduate student, occupational health nursing student, or permission of instructor. Offered: jointly with ENV H 596; AWSp.
NURS 581 Study of International Health (2-3) International health based on the concept of health ecology. Assigned readings, discussions, and analysis of different perspectives, strategies, systems, and the wide range of conditions and forces affecting global and local health and illness. Emphasizes roles of healthcare providers.
NURS 582 Culture, Society, and Genomics (3) Examines social and cultural issues of human genome sequencing and control of genetic expression. Attitudes and behaviors toward health, illness, and disability are studied using historical, contemporary, and cross-cultural case study material. Offered: jointly with ANTH 574/PHG 521.

NURS 583 Emotions and Mental Health: From Adversity to Adaptation (3-4) Betrus, Elmore Provides an understanding of nature and function of emotions as well as relationship of emotion to mental health/illness. Emphasizes adversity arising from individual and community sources and its impact on emotional health. Addresses implications for interpersonal and social policy interventions.
NURS 584 Critical and Interdisciplinary Approach to Health Policy (3) Advanced seminar to critically analyze various public health policies from a social justice framework.

NURS 585 Introduction to Forensic Nursing and Health care (3) Baker Examination of the practice, roles, functions, and evolution of the forensic nurse specialty; its relationship to other disciplines and professions; its roles working with victims of crime, violence, and abuse, along with offender populations. Introduction to ethical issues in forensic health services.
NURS 586 Forensic Nursing and Healthcare for Vulnerable Populations (3) Baker Focuses on the roles of forensic nurses and others working with populations at risk for violence, assault, and abuse; emphasizing issues related to age, race/ethnicity, and gender. Examines concepts of vulnerability, dependence, and victimization; interactions with criminal justice and healthcare systems.
NURS 587 Role Transition Seminar (2) Emphasizes the transition to doctoral study and eventual post-graduate roles. Includes information to clarify expectations and skills to facilitate success: various forms of scholarly and interpersonal communication, principles of scholarly collaboration, giving and receiving critiques, development of a program of study, and other topics developed by participants. Prerequisite: Enrolled in PhD program in Nursing Science. Credit/ no-credit only.

NURS 588 Philosophical Basis of Nursing Inquiry (3) Overview and critical analysis of historical and contemporary views of knowledge development and of science, with particular emphasis on the ways these views influence approaches to nursing inquiry. Emphasis on analyzing the underlying epistemological and ontological assumptions and implications of diverse ap proaches to knowledge generation in nursing.

NURS 589 Theoretical Perspectives in Nursing (3) Critical analysis of theory development, including evaluation of relationships among theories, evidence, and explanation. Diverse approaches used to appraise historical and contemporary milestones in the development and evaluation of nursing knowledge. Emphasis on process and implications of theory development for nursing research, practice, education, and systems Prerequisite: NURS 588. Offered: W.

NURS 590 Ecology of Human Health (5) Provides concep tual foundation for the study of human health ecol ogy within nursing science. Frameworks for understanding human health as an outcome of individual, family, and group interactions and transactions with environments are applied. Provides the basis for evaluation and developing therapeutic approaches to improve health.

NURS 591 Advanced Seminar in Nursing Science (3, max 15) In-depth analysis and evaluation of literature in focused areas of research. Synthesis of literature related to selected fields of nursing science. Oral analysis of assigned papers and topics. Prerequisite: graduate standing or permission of instructor.
NURS 592 The Science of Therapeutics: Theoretical Foundations (4) Addresses the state of the science of nursing therapeutics. Students examine the practices of nursing to promote, maintain, and restore human health from an ecological perspective. Therapeutics
considered from the perspectives of the individual, family, and community systems. Prerequisite: NURS 590 or equivalent with permission of instructor.

NURS 593 Preventive Therapeutics (3) Examines literature in the field of health promotion and illness prevention with the purpose of students developing their individual model of health promotion and illness prevention in their own foci of interest considering the social and political forces prevailing. Credit/no-credit only.

NURS 594 Advanced Seminar on Healing (3) Advanced seminar to critically analyze current thinking and practice applications that fall under the heading of "healing."

NURS 595 Synthesis of Nursing Science (3) Advanced seminar for critical analysis, integration, and synthesis of material for a research proposal. Focus includes discussion of research integrity and ethics, including scientific conduct, risk management related to scientific misconduct and negligence. Prerequisite: NURS 587; NURS 588; NURS 589; NURS 590; NURS 592; NMETH 579; NMETH 580; and NMETH 591. Credit/no- credit only.

NURS 596 Colloquium, Scientific Conduct, and Dissertation Seminar (2, max. 12) Focuses on group discussion of issues pertinent to research conduct. Scientific conduct issues include guidelines relevant to designing, conducting, and disseminating research; risk management in reference to scientific misconduct and negligence; and collaborative and peer-review skills relevant to intra- and interdisciplinary research.

NURS 597 Health in the Context of Culture (5-6, max. 24)
Provides basic overview of health and healthcare challenges and opportunities in other countries. Examines socio-cultural, environmental, economic, political, and ecological factors that influence, health, health promotion, illness, disability, and death. Address responses to health issues both within and outside the health sector. May include study abroad.
NURS 599 Selected Readings in Nursing Science (1-3, max. 18) Analysis of synthesis of selected readings with faculty mentor. Credit/no-credit only. Prerequisite: permission of instructor.

## Nursing Clinical

NCLIN 302 Practicum: Health Assessment (1-5, max. 5) Lecture and lab emphasize nursing skills in communication, interviewing, functional and physical health assessment. Includes: basic communication skills, beginning physical and psychosocial assessment of the individual across the lifespan, and family assessment. Credit/no-credit only. Offered: AS.
NCLIN 306 Practicum: Basic Skills of Nursing Practice (4) Practicum in communication, interviewing, health assessment, identification of threats to health in clinical settings. Explores risk, vulnerability identification, communication, physical/psychosocial assessment of individuals across lifespan, nursing care planning, documentation, psychomotor skills development. Credit/no-credit only. Prerequisite: NCLIN 302, which may be taken concurrently.

NCLIN 402 Practicum: Care in IIIness I (5) Provides supervised nursing care to individuals/families with acute/ chronic illness across the lifespan. Emphasizes beginning skills in systematic assessment, including person/environment fit, developing competency in selected nursing therapies, and developing role as care agent for persons of all ages. Credit/no-credit only. Prerequisite: NURS 401, which may be taken concurrently
NCLIN 403 Practicum: Pediatric Nursing (4) Provides supervised acute/chronic illness nursing care to pediatrics clients. Emphasizes beginning skills in
systematic health and developmental assessment including person/environment fit, basic competency in selected nursing therapies, and developing role as care agent for pediatrics clients and their families. Credit/no credit only. Prerequisite: NURS 401, may be taken concurrently. Offered: WSp.
NCLIN 406 Practicum: Care in IIIness II (1-10, max. 10) Provides supervised nursing care to individuals and families with acute and chronic illness. Emphasis on increasing skill in systematic assessment, developing competency in selected nursing therapies, and developing role as caring agent for persons of all ages. Credit/no- credit only.
NCLIN 407 Practicum: Nursing Care of III Adults (5) Provides supervised nursing care to ill adults and their families. Emphasizes systematic assessment, including person/environment fit, developing competency in selected nursing therapies, and developing a role as a professional nurse. Credit/no credit only. Prerequisite: NURS 401, which may be taken concurrently.
NCLIN 409 Partnerships in Community Health (4) Analysis, application, and evaluation of community partnership process for health. Analysis of nursing role in community/public health, including community building, collaboration, policy. Development and formulation of community interventions to maintain/promote biopsychosocial health, and to promote health/prevention of injury and disease.
NCLIN 411 Transition to Clinical Practice (9) Focuses on critical examination, synthesis, and evaluation of professional nursing care with individual clients or groups reflecting diverse settings, ages, and ethic communities. Emphasizes mastering theoretical concepts, applying research finding, improving skill competency, and developing clinical leadership capabilities. Credit/no-credit. Recommended: completion of first five quarters in the BSN program.
NCLIN 416 Practicum: Nursing of Families: Childbearing and Childrearing (4) Provides the opportunity for supervised nursing of childbearing and childrearing families and individuals. Emphasizes expanding nursing process skills, especially health promotion, with individuals and families during childbearing and childrearing. Credit/no-credit only. Prerequisite: NURS 415, which may be taken concurrently. Offered: AW.
NCLIN 418 Practicum: Psychosocial Nursing (4) Provides supervised psychosocial nursing care to individuals/ families/groups/communities with threats to or alterations in psychosocial health. Emphasizes increasing skill in systematic assessment, developing competency in selected psychosocial nursing interventions, and evaluation of treatment outcomes. Credit/nocredit only. Prerequisite: NURS 417, which may be taken concurrently. Offered: AW.
NCLIN 490 Special Laboratory Elective (1-4, max. 4) Provides supervised laboratory experience to enhance and document clinical skills and decision making. Prerequisite: permission of instructor.
NCLIN 499 Clinical Practicum Elective (1-5) Provides opportunities to develop nursing skills in the care of individuals, groups, communities, or care-systems. Individually arranged with faculty member for application of theory and principles to direct care, consultation, education, or care coordinator roles. Prerequisite: NCLIN 302; NCLIN 306; NCLIN 402; NCLIN 406.
NCLIN 500 Comprehensive Health Assessment (3) Uses didactic and experimental learning to develop evi-dence-informed advanced assessment skills including systematic collection, organization, interpretation, and communication of data reflecting the health status of adolescents/adults/older adults. Emphasizes a holistic analysis of developmental, familial,
physiological, psychosocial, occupational, environ mental, functional, nutritional, and cultural aspects of health. Credit/no-credit only. Prerequisite: permis sion of instructor. Offered: AWS.
NCLIN 501 Diagnostic Health Assessment (1-5, max. 5) Examines evidence-informed clinical decision-mak ing in the advanced assessment of symptoms ex perienced by adolescents/adults/older adults. Uses didactic and experimental learning in the systematic collection, integration, analysis, interpretation, and communication of focuses subjective and objective data, including formulation of diagnostic hypotheses. Credit/no-credit only. Prerequisite: NCLIN 500, which may be taken concurrently. Offered: AWS.
NCLIN 502 Pediatric Health Assessment and Promotion ([1-2]-, max. 2) Uses didactic and experimental learning to develop evidence informed advanced assess ment skills including systematic collection, organization, interpretation, integration, and communication of data reflecting health status of children from birth to adolescence. Emphasizes holistic analysis of development, familial, physiological, psychosocial, environmental, functional, nutritional, and cultural as pects of health. Credit/no-credit only. Prerequisite: permission of instructor. Offered: A.
NCLIN 503 Advanced Fieldwork Community Health Nursing (2-6, max. 12) Guided experience in delineating nursing roles in community settings. Development of a philosophy of community health nursing. Ap plication of core concepts pertaining to health, ethics, care, and community. A minimum of four hours of guided experience weekly. Prerequisite: graduate standing and permission of instructor
NCLIN 505 Diagnostic Testing and Monitoring in Serious Illness (2) Lecture, discussion, and laboratory sessions to develop students' assessment, diagnostic, and monitoring expertise in the care of acutely ill individuals. Students refine clinical decision-making skills, apply specialized assessments, gain insight into clinical experts' critical thinking, and refine assessment knowledge for a specific patient population. Prerequisite: NCLIN 501 or equivalent
NCLIN 508 Seminar in Group Treatment (1) Seminar on the theoretical basis for working with various treat ment groups. Analysis of selected approaches to group treatment. Analysis of leader responsibilities and functions in the development of therapeutic group experiences.
NCLIN 509 Teaching Methods and Practicum in Nursing Education (2-10, max. 10) Guided experience in selected teaching-learning situations in nursing, in both classroom and clinical situations. Identification, analysis, and solution of teaching-learning problems in clinical nursing. Minimum of seven hours of guided experience weekly.
NCLIN 510 Group Work with High-Risk Youth (3-6, max. 6) Theory and application course in group counseling for high-risk youth. Central theme is group leader effectiveness in helping young people increase school performance, decrease drug involvement, and increase emotional well-being. Open to graduate students in nursing, education, and related human services professions.
NCLIN 512 Advanced Practicum in Family and Child Nursing I (2-12, max. 35) Clinical seminar and practicum provide opportunities to develop advanced nursing practice competencies in the care of women, families, children, and/or adolescents. Focuses on the application of theory and principles when providing direct patient care, patient education, and the col laboration of care with individuals and/or groups.
NCLIN 514 Seminar in Home Care for Chronic Illness (3) Home-care services as component of community
health nursing. Understanding effects of direct nursing functions on care of chronically ill persons and their families. Selected field study experiences in community health settings. Prerequisite: NURS 563, graduate standing, and permission of instructor.
NCLIN 515 Health Assessment for Advanced Practice Neonatal Nursing ( $\mathbf{1 / 3}$ ) Develops knowledge and skills to obtain and evaluate health histories and perform systematic physical assessment on newborns and young infants using a diagnosis reasoning process and evidence-based approach. Analyzes data to develop differential diagnoses and management plans. Prerequisite: required for NNP, NCNS, NM students; others with permission of instructor. Credit/no-credit only.
NCLIN 526 Managing Organizational Effectiveness Within Care Systems (1) Analysis of management strategies for attaining effective and efficient organizational structures and processes within healthcare systems. Prerequisite: NURS 524 or permission of instructor.
NCLIN 531 Nursing Process in Parent-Child Nursing (4) Includes lecture, seminar, and laboratory instruction designed to assist the student with knowledge and skill acquisition related to nursing care of individuals and families with regard to childbearing and childrearing. Prerequisite: NURS 530.
NCLIN 532 Advanced Practice in Community Health Systems Nursing: Overview (3) Seminar and practicum focusing on evidence-based approaches to community health systems nursing, integration and application of theories, and content related to social determinants of health and social justice. Emphasizes the development of advanced practice, leadership, and practice inquiry competence. Credit/no-credit only. Offered: A.

NCLIN 533 Advanced Practice in Community Health Systems Nursing: Culture (3) Seminar and practicum focusing on evidence-based approaches to community health systems nursing, integration and application of theories, and content related to cultural issues affecting the health of individuals, populations, and communities. Emphasizes the development of advanced practice, leadership, and practice inquiry competence. Credit/no-credit only. Offered: W.
NCLIN 534 Advanced Practice in Community Health Systems Nursing: Assessment (3) Seminar and practicum focusing on evidence-based approaches to community health-systems nursing. Includes integration and application of theories and content related to the assessment and appraisal of communities and populations. Emphasizes the development of advanced practice, leadership, and practice inquiry competence. Credit/no-credit only. Offered: Sp.
NCLIN 535 Advanced Practice in Community Health Systems Nursing: Policy (4) Seminar and practicum focusing on evidence-based approaches to community health-systems nursing. Includes integration and application of theories and content related to healthrelated organizational and public policy that promotes health equity. Emphasizes the development of advanced practice, leadership, and practice inquiry competence. Credit/no-credit only. Offered: A.
NCLIN 536 Advanced Practice in Community Health Systems Nursing: Health Systems (4) Seminar and practicum focusing on evidence-based approaches to community health-systems nursing. Includes integration and application of theories and content related to systems-level models of practice to service delivery among communities and populations. Emphasizes the development of advanced practice, leadership, and practice inquiry competence. Credit/no-credit only. Offered: W.

NCLIN 540 Infant Mental Health Practice: Parent Child Relationships and Intervention (3-6, max. 18) Focuses on reflective practice, relationship-based consultation, and therapeutic interventions with infants/toddlers and caregivers. Students complete required clinical practicum at assigned community sites for three quarters. Credit/no-credit only. Prerequisite: admission to Infant Mental Health certificate program. Offered: AWSpS.
NCLIN 541 Advanced Practice Specialist Clinical Practicum (1-10, max. 10) Apply, synthesize, evaluate, and communicate knowledge about a specific domain of advanced medical/surgical or forensics nursing practice. Emphasis is on specialization and role development. Prerequisite: Related sciences (CNS, NE, APGN, ID-CNS, IC-APN), or NURS 509 and NURS 585; or permission of instructor.
NCLIN 542 Advanced Practice Specialist Clinical Practicum II (1-10, max. 10) Apply, synthesize, evaluate, and communicate knowledge about a specific domain of advanced medical/surgical or forensics nursing practice. Fieldwork emphasizes greater depth/complexity/independence in specialization and role development. Seminars emphasize critical analysis of role-related issues. Capstone experience for clinical practicum. Credit/no-credit only. Prerequisite: NCLIN 541.

NCLIN 543 Advanced Practice Specialist Clinical Practi-
cum III (1-10, max. 10) Apply, synthesize, evaluate, and communicate knowledge about a specific domain of advanced medical/surgical or forensics nursing practice. Role development within specialty context. Emphasis is on critical analysis of leadership-related issues. For students in final clinical, serves as capstone. Credit/no-credit only. Prerequisite: NCLIN 542.

NCLIN 544 Advanced Practice Specialist Clinical Practicum IV (1-10, max. 20) Apply, synthesize, evaluate, and communicate knowledge about a specific domain of advanced medical/surgical or forensics nursing practice. Fieldwork serves as capstone experience. Seminar emphasis is on consultation and collaboration. Credit/no-credit only. Prerequisite: NCLIN 543.
NCLIN 546 Management of Acute and Chronic Wounds (2-3) Evaluation and treatment of acute and chronic wounds. Includes wound healing physiology, pathophysiology, patient evaluation, evaluation of environmental and systemic factors related to risk of impaired healing, methods for assessing wound progress, and evidenced-based treatment options. Optional 1credit clinical and lab experience.
NCLIN 549 Nurse Practitioner Clinical Practicum I: Adults/Older Adults (1-10, max. 10) Clinical fieldwork and seminar in advanced nursing practice with individual/groups. Students practice under clinical preceptor supervision. Focuses on data collection/ critical thinking related to health status and threats to health, incorporating knowledge from the biological, behavioral, and social sciences. Credit/no-credit only. Prerequisite: permission of instructor, or NCLIN 501 or equivalent.
NCLIN 550 Nurse Practitioner Clinical Practicum II: Adults/Older Adults (1-10, max. 10) Clinical fieldwork and seminar in advanced practice nursing. Builds on NCLIN 549, emphasizing critical thinking related to the differential diagnosis/management of health problems and human responses. Students practice under clinical preceptor supervision. Addresses selected role issues in advanced practice nursing. Credit/no- credit only. Prerequisite: NCLIN 549 or permission of instructor.
NCLIN 551 Advanced Practice Nursing Clinical Practicum III: Adults/Older Adults (1-10, max. 10) Clinical fieldwork and seminar in advanced practice nursing. Builds on

NCLIN 550, emphasizing the integration and application of previous learning in the care of people with multiple health problems. Students practice under preceptor supervision. Addresses selected role issues in advanced practice nursing. Credit/no-credit only. Prerequisite: NCLIN 550 or permission of instructor.
NCLIN 552 Nurse Practitioner Clinical Practicum IV: Adults/Older Adults (1-10, max. 10) Intensive clinical experience in which students integrate previous learning to assume responsibility for care of older adults and/or adults with multiple health problems. Students practice as an advanced practice nurse supervised by a preceptor, assuming increasing responsibility for planning/implementing therapies and for documenting/evaluating outcomes. Credit/ no-credit only. Prerequisite: NCLIN 551.
NCLIN 553 Seminar in Primary Care I: Health Promotion (2/3, max. 3) Clinical application of major theories of health promotion, risk assessment, health behavior change, and disease prevention across the age span. Emphasizes an evidence-based approach, with consideration of cultural, socio-economic, and diversity factors. Includes clinical practicum. Prerequisite: NURS 552 , which may be taken concurrently; permission of instructor.
NCLIN 556 Seminar in Primary Care II: Evidence-Based Management of Common Health Concerns (3-5) Examines clinical application of theories of illness management across the age span. Emphasizes an evi-dence-based approach to assessment, differential diagnosis, and management with consideration of cultural, socio-economic, and diversity factors. Utilizes technology to support clinical decision-making. Includes clinical practicum. Taught in conjunction with NURS 518. Credit/no-credit only. Prerequisite: graduate standing and permission of instructor.
NCLIN 557 Seminar in Primary Care III: Evidence Based Management of Common Health Concerns (3-4) Examines clinical application of theories of illness management across the age span. Emphasizes an evi-dence-based approach to assessment, differential diagnosis, and management with consideration of cultural, socio-economic, and diversity factors. Utilizes technology to support clinical decision-making. Identifies opportunities for leadership and inquiry in clinical practice. Credit/no-credit only. Prerequisite: graduate standing and permission of instructor.
NCLIN 559 Seminar in Primary Care IV: Management of Common Health Concerns (4-6, max. 6) Examines clinical application of theories of chronic illness management across the age span. Emphasizes evidence based approach to assessment, differential diagnosis, skill development, and management considering cultural, socio-economic, and diversity factors. Focuses on chronic care model, coordination of care, poly drug therapy, and technology support for clinical decisions. Includes clinical practicum. Credit/nocredit only. Prerequisite: permission of instructor.
NCLIN 560 Seminar in Primary Care V: Complex Clinical Decision Making ([1-11]-, max. 11) Clinical practicum and primary care seminar focuses on evidence based approach to assessment and management of complex, multi-problem patient/family situations across the age span. Special attention to synthesizing practice, leadership, and inquiry in advanced practice. Credit/no-credit only. Prerequisite: NCLIN 553; NCLIN 556; NCLIN 557; and NCLIN 559 or permission of instructor.
NCLIN 562 Professional Interpersonal Styles of Communication with Families to Enhance Health Outcomes (3) Complex communication processes evaluated and applied to the family as unit of interaction within interdisciplinary context. Empirical based communica-
tion practices analyzed considering family variables adherence, satisfaction, health outcomes, and cost effectiveness. Engagement in experiential learning through challenging clinical scenarios. Emphasizes cultural competencies. Prerequisite: DNP nursing student or permission of instructor.
NCLIN 566 Advanced Clinical Practicum in Psychosocial Nursing (1-9, max. 20) Seminar and practicum focus on development of advanced clinical and role-function skills. Practicum in settings with select populations under supervision of expert clinicians. Seminars use evidenced-based practice criteria to integrate cases into discussion. Credit/no-credit only. Prerequisite: NURS 570, NURS 564, one theory course, or permission of instructor.

NCLIN 567 Advanced Practice Clinical Practicum (2-6, max. 22) Practicum used to expand, deepen, or enrich advanced practice skills relevant to area of specialty preparation. Uses clinical activities to reflect an integration of advanced practice, leadership, and practice inquiry. Emphasizes self-directed learning, in-depth clinical skill building and decision-making, continuity of care, and inter professional collaboration. Prerequisite: permission of instructor.

NCLIN 570 Practicum in Adult Psychosocial Assessment (2) Under supervision of faculty/preceptors from clinical agencies, students use evidence-based practice criteria to assess individuals, groups, and families. Students gain skills in psychosocial interviewing, mental status examinations, and assessing psychosocial variables by standardized instruments and clinical interview. Credit/no-credit only. Prerequisite: NURS 549 or permission of instructor.
NCLIN 572 Practicum in Physical Assessment (2) Physical health assessment in practicum with the opportunity to refine skills in taking a complete health history and in performing physical examinations in a clinical setting. Credit/no-credit only Prerequisite: either NCLIN 500, NCLIN501, or permission of instructor.

NCLIN 599 Independent Study Clinical Practicum (1-12, max. 25) Clinical practicum to develop advancedpractice nursing skills in care of individuals, groups, communities, or care systems. Individually arranged with faculty member for application of theory and principles to direct care, consultation, education, or care coordinator roles. Prerequisite: matriculated MN, DNP students, or post-master's student, and permission of academic adviser and instructor. Offered: AWSpS.

NCLIN 798 Tripartite Immersion Practicum (1-5, max. 5) Practicum to synthesize and expand knowledge and skills in application of tripartite role of advanced practice, inquiry, and leadership. Analysis of practice issues including reflective practice, collaboration, health systems, technology, ethics, and policy. Cred-it/no- credit only. Prerequisite: permission of instructor and Supervisory Committee. Offered: AWSpS.

## Nursing Methods

NMETH 403 Introduction to Research in Nursing (3) Organization of the structure of nursing knowledge through research. Concepts and processes of research utilized in the investigation of nursing science.
NMETH 499 Undergraduate Research (1-5, max. 12) Supervised individual scholarly inquiry on a specific nursing problem.
NMETH 520 Scholarly Inquiry for Nursing Practice (5) Analyzes conceptual, theoretical, ethical, and empirical knowledge as a basis for posing nursing research questions, identifying research designs, selecting sampling and data collection strategies, and proposing analytic methods to answer a research question,
and evaluate completed research for its scientific adequacy and applicability to practice. Offered: AWSpS.
NMETH 521 Methods of Research in Nursing (2) Continuation of NMETH 520, with emphasis on methods of research applied to the solution of problems in all fields of nursing.

NMETH 522 Data Management for Research Professionals (4) Surveys industrial strength data management, using techniques applicable to multi-center, longitudinal research trials with survey instruments. Involves challenges research professionals face as they graduate from a student project to a study with hundreds of cases, variables, multiple survey instruments and a staggered, repeated sampling protocol. Credit/nocredit only.
NMETH 523 Project Management and System Analysis for Health Informatics (3) Masuda

Overview of information technology project management principles as contained within the Project Management Body of Knowledge (PMBOK) and the Systems Development Life Cycle within formal Systems Analysis. Offered: A.

NMETH 524 Healthcare Information Systems and the Electronic Health Records (3) Masuda, Murphy Overview and analysis of healthcare informatics issues, including patient safety and Information Technology (IT), infrastructure, clinical systems, definitions and functions of EHR systems, IT leadership in healthcare organizations, informatics change management, including key user roles evaluating EHR and workflow changes. Offered: W.

NMETH 526 Patient-Centered Interactive Health Communication Technologies (3) Overview of current and emerging consumer-centric eHealth tools and technologies. Researchers and practitioners from multiple disciplines present theories, concepts, and principles from health, information, cognition, and human-factors sciences as they relate to the development and use of these tools and technologies.

NMETH 527 Introduction to Health Informatics and Systems Thinking (3) Masuda, Oyler Examines how informatics aids in the transformation of healthcare delivery and how to most effectively use the theories and best practices in informatics toward building and deploying informatics solutions. Offered: A.

NMETH 528 Computing Concepts: From Theory to Application (3) Johnson Survey of conceptual and applied computing concepts. Conceptual topics include a global survey of hard/software, networking, information systems analysis/design, and programming. The applied component emphasizes desktop system management skills and the creative use of spreadsheets to enhance personal productivity. Offered: W.
NMETH 529 Database Concepts and Applications in Clini-
cal Informatics (3) Oyler Introduction to relational database theory and technology from a health informatics perspective. Focuses on transactional database theory, architecture, and implementation in a sociotechnical context. Analyzes database applications used in clinical environments. Introduces knowledge bases and data warehouses. Prerequisite: NMETH 528. Offered: Sp.

NMETH 530 Proposal and Project Development (3/5) Jarret, Killien, Schepp, Simpson Focuses on the application of methods of inquiry to develop a scholarly proposal through faculty-guided small group discussion and individual composition. Students select project option to complete the conceptual phase and most activities to fulfill their plan. Prerequisite: NMETH 520. Offered: AWSpS.

NMETH 532 Developing an Evidence Base for Complementary and Alternative Medicine Practices (2/3) Berry, Booth-LaForce, Brandt, Magyary Focuses on skill en-
hancement for evaluating CAM-related evidence and the implications for translating evidence to practice. Examines the challenges of CAM studies and describes strategies for improvement. Examines factors such as environment, culture, provider-patient relationship, and personal characteristics influencing research. Prerequisite: NMETH 520 or equivalent. Offered: WSpS.
NMETH 533 Appraising Evidence for Clinical Practice (4) Teaches skills for evaluating and appraising healthrelated evidence for clinical practice. Develops ad vanced competency in searching and evaluating literature. Examines the merits of different types and levels of evidence; analyzing the generalizability and implications for clinical practice. Prerequisite: basic statistics course, NMETH 520, or equivalent. Offered: AWSpS.

NMETH 534 Translating Evidence to Clinical Practice: Conceptual, Methodological, and Clinical Issues (4) Examines conceptual, methodological, clinical, and policy issues associated with translating evidence to practice. Translation of best evidence, including clinical guidelines, evaluated for impact on quality improvement, safety, accessibility, cost effectiveness, health status, and quality of life. Addresses contextual challenges. Prerequisite: a basic statistics course; NMETH 520; NMETH 533, or permission of instructor.
NMETH 570 Seminar in Clinical Research in Nursing (3) Philosophy, problems of design; use of criterion measures in terms of patient care.
NMETH 575 Methodological Issues in Family Research (3) Emphasizes research with the family as unit of analysis. Examines patterns of family functioning in relation to responses to heal situations. Reviews family units from generational and intergenerational perspectives. Critiques methods assessing dyadic and triadic relationships and therapeutic interventions on family outcomes. Prerequisite: permission of instructor.
NMETH 579 Research Design and Methods in Nursing Science (4) Focuses on elements of rigorous research designs and methods commonly used in nursing science; including descriptive, explanatory, predictive, and experimental and quasi-experimental designs, concepts of validity and reliability, and integration of design with analytical approaches for clinical research.
NMETH 580 Methodological Perspectives in Nursing Inquiry (3) Allows students to translate philosophical and theoretical perspectives into research methodologies. Foci include the relationship of theoretical perspectives to methodologies; the methodological issues among and between varying schools of thought such as interpretive/postmodern, critical/ feminist, and contemporary empiricist; and how the methodologies influence choices of research design and methods. Prerequisite: NURS 588 or permission of instructor.

NMETH 581 Observational Research Methods (2-6, max. 6) Examines observational methods for conducting verbal and nonverbal behavioral research. Emphasizes critical analysis and rigor in research ques tion formulation, measurement decisions, coding scheme development, data collection, and analysis and interpretation of data. In-depth application of observational method optional. Prerequisite: graduate standing and basic research methods course or permission of instructor. Offered: W.
NMETH 582 Interpretative Methods in Nursing Research (4-) Seminar and field practicum for interpretative research methods. Study on health-related issues using a selected tradition in interpretative methods. Prerequisite: permission of Instructor.

## 536 SCHOOL OF NURSING

NMETH 583 Interpretative Methods in Nursing Research (4) Seminar and field practicum for interpretative research methods. Study on health-related issues using a selected tradition in interpretative methods. Prerequisite: permission of instructor.

NMETH 584 Methods: Physiologic Measures (4) Exploration of the measurement of physiologic functioning in human and animal models. Examples include biochemical and biophysical measure. Students develop beginning skills with one physiologic measure. Prerequisite: physiology and chemistry and permission of instructor.

NMETH 585 Meta-Analysis (4) Meta-analysis examined as a method to synthesize research. Overview of meta-analytic methods; description of the collection, analysis, synthesis, and reporting of studies; explanation of statistical calculations; and discussion of reliability and validity measures incorporated into meta-analytic design. Prerequisite: permission of instructor.

NMETH 586 Instrument Development and Testing (4) Includes measurement theory, reliability, validity, level of measurement, and the process of scale development, modification, or translation. Students learn to evaluate, develop, modify, translate, and test instruments for use in research. Prerequisite: student in health science discipline and permission of instructor.
NMETH 587 Methods of Theory Testing: Causal Modeling with Path Analysis and Structural Equation Modeling (4) Includes causal inferencing and theory testing through causal modeling with path analysis and structural equations modeling. Students learn to evaluate theory models and to apply the content by developing and testing models. Prerequisite: student in health science discipline and permission of instructor.

NMETH 590 Special Topics in Nursing Research (2-5, max. 9) Examination of a specific research method, with evaluation of appropriateness, efficiency, rigor of measurement, and potential for inference for nursing research. Prerequisite: minimum of 5 credits of basic nursing research methodology at graduate level and permission of instructor.
NMETH 591 The Science of Therapeutics: Design and Outcomes (4) Synthesizes advanced strategies to evaluate the short- and long-term outcomes of clinical therapeutics with special emphasis on feasibility, pilot studies, and randomized control trials. Includes analysis of completed studies as well as the design of a randomized control trial of a clinical therapeutic. Prerequisite: NMETH 579, NURS 592, or permission of instructor.
NMETH 592 Clinical Outcome Research II (2-4, max. 4) Application and evaluation of philosophical, methodological, and analytical concepts and issues examined in NMETH 591. Two modules are offered: a)case study and small-n studies and b) large-n studies. Students demonstrate application of decision-making process involved in development of clinical outcome study. Prerequisite: permission of instructor.
NMETH 593 Time Series and Sequential Analysis (4) Basic introduction to terminology and methods of time series and sequential analysis as applicable to nursing-relevant processes in the form of samples of interval and categorical data collected over time; autocorrelation, autoregression, spectrum, socinor, Markovian, lag sequential, and log-linear analyses. Development of practical analysis skills on real data sets. Prerequisite: permission of instructor. Credit/ no-credit only.
NMETH 598 Special Projects ([1-12]-, max. 12) Fulfills the requirements of the non-thesis option for Mas-
ter's students in nursing. Projects involve scholarly inquiry with in-depth focused analysis, culminating in a written product/report for dissemination. Credit/ no-credit only. Prerequisite: NMETH 520 or permission of instructor.

## NMETH 600 Independent Study or Research (*)

NMETH $\mathbf{7 0 0}$ Master's Thesis (*)
NMETH 800 Doctoral Dissertation (*) Prerequisite: permission of Supervisory Committee chairperson or Graduate Program Coordinator.
NMETH 801 Practice Doctorate Project/Capstone ([1-12], max. 28) Capstone project reflects culmination practice inquiry knowledge and competencies. Students collaborate with clinicians, consumers, faculty or fellow students to examine clinical questions which involve translating evidence to practice, and ultimately informs and influences care and enhances health outcomes. Credit/no-credit only. Prerequisite: permission of Supervisory Committee. Offered: AWSpS.

# School of Pharmacy 

## Dean

Thomas A. Baillie

## Associate Deans

Nanci L. Murphy
Stanley S. Weber

Established in 1894, the UW School of Pharmacy is proud of its strong commitment to excellence and the recognition given to its faculty, students, and graduates for their outstanding educational, research, and service activities. The School's Dean's Office and three departments - Medicinal Chemistry, Pharmaceutics, and Pharmacy - are located in the H -Wing of the Health Sciences Building and the South Campus Center. The School is a member of the American Association of Colleges of Pharmacy and its programs are accredited by the Accreditation Council on Pharmacy Education.

## DOCTOR OF PHARMACY PROGRAM

The School of Pharmacy offers a four-year program leading to the Doctor of Pharmacy (PharmD) degree. The curriculum of the PharmD program is designed to provide students the scientific background and clinical skills necessary to take the North American Pharmacist Licensure Examination (NAPLEX) and the Multistate Pharmacy Jurisprudence Examination (MPJE) to enter professional practice.
Limited class enrollment allows for individualized attention from instructors while students still enjoy the benefits of attending a large university. Instructional methods emphasize the critical thinking, problem-solving, and clinical skills necessary to provide rational drug therapy, reduce medi-cation-related problems, promote healthy lifestyles and disease prevention, optimize health outcomes, enhance patient adherence, and render care in a changing healthcare system. The School fosters a commitment to life-long learning and provides an environment where students develop the knowledge, attitudes, and skills consistent with the profession's high standards.

## Admission

Admission is for autumn quarter only. Applicants who are current UW students or who are considered admissible to UW are not assured admission. Admission is competitive, based on a number of factors including cumulative and prerequisite GPA's, PCAT scores, written communication skills as demonstrated in application essays, interview results, and review of all application materials. Competitiveness varies from year to year, depending on size and strength of the applicant pool.

Because of limits on enrollment, the School cannot admit all qualified applicants. On average, over 600 students apply each year for 100 generally available positions. Admission is contingent upon satisfactory completion of all prerequisites, eligibility to obtain a Washington State Pharmacy Intern Certificate, and satisfactory results on the Criminal Background Check and Conviction/Criminal History Information Form. Accepted students are required to meet the University and Health Sciences immunization requirements.
After a preliminary assessment of the applicant pool, based on completeness of the application, review of all application materials, prerequisite and cumulative GPA thresholds and PCAT score thresholds, the most qualified applicants are invited for an interview in Seattle with members of the PharmD Admissions Committee. Residents from state participating in the Western Interstate Commission for Higher Education (WICHE) Pharmacy Student Exchange Program

Alaska and Nevada) are encouraged to apply. Applicants who meet or exceed GPA and PCAT minimum thresholds are not guaranteed an interview. Offers of interview are dependent on the size and competitiveness of the applicant pool during each annual admissions cycle.

Further information on admission requirements, application procedures, and program content is available from the School of Pharmacy Office of Academic and Student Programs or at sop.washington.edu/school-of-pharmacy/ pharmd-admissions/applications-to-pharmd-program. html.

## GRADUATE PROGRAMS

Graduate Program Coordinator
H375 Health Sciences, Box 357630
(206) 616-1383

The Department of Pharmacy offers graduate study leading to a PhD degree in pharmaceutical outcomes research and policy. Emphasis of this program is on the health and cost outcomes of pharmaceuticals and pharmaceutical services and policies. Graduate training in this program prepares students for career opportunities in teaching and research in universities, safety and economic evaluation of products in the pharmaceutical industry, policy analysis of governmental agencies, and drug use management within healthcare delivery and financing organizations.
Also offered is a track in the PharmD/MS program in pharmaceutical outcomes research and policy, which provides an opportunity for one-to-two students currently completing their PharmD training at the UW to enter the graduate program in their fourth year of training. The program requires completion of 64 credit hours, a written thesis, and a quarter of practicum in a managed care, government, industry, or other appropriate setting. At the end of this training, students may elect to receive a master's degree, or continue on toward a PhD degree.
The UW's biomedical regulatory affairs Master of Science program, offered by the UW School of Pharmacy in partnership with UW Educational Outreach, addresses a growing need for well-trained professionals in the regulatory field. The degree serves those who wish to advance their careers in the medical products industry or those entering the field from related areas.
Deadline for application for the PhD and the PharmD/MS programs is December 31. Applicants are notified of acceptance or rejection by March 30. Refer to the application deadline for the biomedical regulatory affairs master-ofscience program posted at: www.biomedreg.uw.edu/admissions/deadlines.asp.
Application materials and additional information are available in the Department of Pharmacy or at program websites listed below:

- sop.washington.edu/porpp/graduate-program/phdprogram27.html.
- sop.washington.edu/porpp/graduate-program/concur-rent-pharmdms-degree-in-pharmaceutical-outcomes-research-a-policy.html.
- www.biomedreg.uw.edu.

## Residency and Fellowship Programs

The Department of Pharmacy offers several postdoctoral fellowships in pharmacotherapeutics and pharmaceutical outcomes, and advanced community residency programs, primarily intended for PharmD graduates. Addition information is available on the department's website: sop. washington.edu/pharmacy/about/fellowship-a-residencyopportunities.html.

## Clinical and Affiliate Faculty

In addition to the School of Pharmacy's full- and part-time faculty listed above, a large number of practicing pharmacists contribute to the School's academic programs. Over 500 pharmacists throughout the Pacific Northwest are members of the clinical and affiliate faculty, representing a variety of pharmacy practice settings such as community, hospital, nursing home, government, and industry. Information on the names, addresses and practice settings of these faculty members is available from the Office of Professional Pharmacy Education.

## Medicinal Chemistry

The Department of Medicinal Chemistry offers programs of graduate study leading to the degrees of Master of Science and Doctor of Philosophy. The primary mission of the program is to train versatile scientists for careers in the pharmaceutical and medical sciences. To this end, graduates of the program acquire a broad knowledge base in medicinal chemistry, pharmacology, and biochemistry, which is important in the rapidly evolving, multidisciplinary biomedical arena. The department further offers diverse opportunities for research at the interface between biology and chemistry, with emphasis on issues of biomedical importance.

Graduates of the program acquire the skills necessary to develop quantitative and qualitative methodologies necessary for the study of biochemical processes that occur at the cellular and subcellular levels. These include the elucidation of biochemical transformations and interactions using techniques such as protein engineering, and a broad array of supportive spectroscopic techniques including mass spectrometry and NMR.
One major area of research interest is the role of biotrans formation processes in the toxification and detoxification of drugs and environmental contaminants. A second area of interest is the determination of protein and small ligand structure and function using, NMR, mass spectroscopy, and other biophysical techniques. Issues of biomedical importance include elucidation of mechanisms of drug-induced cell toxicity, drug-drug and drug-herbal interactions, identification of enzyme attributes that dictate substrate specificity and catalytic mechanism, pharmacogenetics, proteomics and mechanisms of viral assembly.

Most students proceed directly to the doctoral degree program. Successful completion of a series of cumulative examinations and at least two quarters of teaching experience are among the requirements for completion of the doctoral program.

## GRADUATE PROGRAM

Graduate Program Coordinator
H164 Health Sciences, Box 357610
(206) 543-2224
medchem@uw.edu

## Admission Requirements

Students with undergraduate degrees in pharmacy or in the biological or physical sciences are accepted for graduate study in medicinal chemistry. Undergraduates who plan to pursue graduate study are encouraged to expedite their programs by selection of pertinent electives. Although the choice of electives varies with the student's ultimate goals, graduate study in medicinal chemistry requires an adequate background in biological and physical sciences.

## Degree Requirements

## Master of Science

At least 27 credits of coursework, inclusive of thesis and non-thesis research, including a research project, prepara-
tion of an acceptable thesis, and passing a final examination.

## Doctor of Philosophy

90 credits minimum, to include:
Achieve a level of proficiency in organic, medicinal and physical chemistry, pharmacology, biochemistry, and molecular biology. Most coursework is completed in the first two to two-and-a-half years. The program is flexible and easily adaptable to meet individual interests and needs.
In the first year, students rotate through the laboratories of at least two faculty members. At the end of the first year, the student chooses a faculty sponsor and a dissertation research project.

1. First year: CHEM 530, CHEM 531, CHEM 532 (3, 3, 3); MEDCH 501, MEDCH 502, MEDCH 503 (4, 4, 4); MEDCH 520 (1 credit each quarter); MEDCH 582 (1 credit each quarter); MEDCH 600
2. Second year: BIOC 530 (3); MEDCH 527 (3) MEDCH 541 (3); PHCOL 510, (2) PHCOL 511 (2); MEDCH 520 (1 credit each quarter); MEDCH 582 (1 credit each quarter); MEDCH 600
3. Third year: MEDCH 520 (1 credit each quarter); MEDCH 582 (1 credit each quarter); MEDCH 600 (7 credits each quarter)
4. Fourth year: MEDCH 700 or MEDCH 800

## Financial Aid

Financial support in the form of research assistantships and fellowships may be available to students in good standing throughout their graduate careers. Availability of financial support varies from year to year, and prospective applicants should contact the graduate program coordinator for additional information.

## COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations.
MEDCH $\mathbf{4 0 0}$ Fundamental Concepts in Medicinal Chemis-
try (3) Nelson Principles of physical organic chemistry; chemical bonding, stereochemistry, acids/bases, and reaction mechanisms relevant to processes such as drug distribution, specificity, and metabolism. Prerequisite: either CHEM 239 or CHEM 337. Offered: A.
MEDCH 495 Special Studies in Medicinal Chemistry (*, max. 6) Opportunity to expand the breadth and depth of understanding in specific areas. Credit/no-credit only. Prerequisite: permission of instructor. Offered: AWSpS.

MEDCH 499 Independent Study/Research (*, max. 24) Research problems in medicinal chemistry. Prerequisite: cumulative GPA of 2.50 and permission of instructor. Offered: AWSpS.
MEDCH 520 Seminar (1, max. 30) Graduate students attend seminars and make one formal presentation per year while in residence; maximum of three presentations. Credit/no-credit only. Offered: jointly with PCEUT 520; AWSp.
MEDCH 521 Advanced Medicinal Chemistry (3) Atkins, Nelson Application of integrated data from the physical and biological sciences to problems of chemotherapy, including transport of drugs to site of action, biotransformation of drugs, interaction of drugs with enzyme systems, and recent advances in drug design. Prerequisite: CHEM 457, CHEM 531, and BIOC 442, or permission of instructor. Offered: Sp.
MEDCH 527 Drug Metabolism (4) Rettie, Thummel Considerations of the biochemical mechanisms for the biotransformation of drugs and foreign compounds. Includes reaction mechanisms, ultrastructural con-
siderations, induction mechanisms, methodology, kinetics of inhibition and activation, steroid and amine metabolism. Offered: jointly with PHCOL 527; W, odd years.
MEDCH 528 Biophysical Enzymology and Biopharmaceuticals (3) Atkins, Catalano Covers in-depth treatment of chemical catalysis and transition state theory as related to enzyme mechanisms; thermodynamics and kinetics of protein-ligand interactions, protein-pro-tein-interactions and protein-lipid interactions, and methods for their study. Discusses therapeutically relevant examples, including viruses, therapeutic antibodies, and drug targets. Offered: W, even years.
MEDCH 529 Advanced Medicinal Chemistry (4) Atkins, Kunze, Nelson, Rettie, Totah Covers the fundamental aspects of contemporary medicinal chemistry. Discusses the chemical characteristics of drugs and drug targets, pharmaceutical properties of drugs, drug metabolism, toxicology, and pharmacogenetics. Focuses on various drug classes; their biochemistry, pharmacology, mechanism of action, and toxicology. Offered: W.

MEDCH 530 Integrated Pharmacology (1) Atkins, Beavo, Rettie Students present and discuss primary literature that integrates aspects of medicinal chemistry and pharmacokinetics with the physiology, pharmacology, and genetics of therapeutic drug targets. Examples of targets discussed include ion channels and enzymes relevant to cardiovascular disease, and neurodegenerative disease. Offered: Sp.

MEDCH 535 P-Diagnostic Medicinal Chemistry (3) Kunze Examination of clinical diagnostic tests with regard to the chemical or biochemical rationale of the testing method, interpretation of test results, and major factors influencing test values with special emphasis on the effects of medications. Clinical laboratory data from patients considered in light of these factors. Offered: W.
MEDCH 541 Biological Mass Spectrometry (3) Goodlett Covers the basics of modern ionization methods and mass analyzers; small molecule structure assignment, quantitative assay development by LC-MS and metabolomics; quantitative discovery-based proteomics and validation methods; and peptide sequence determination, post-translational modification mapping, and protein structure determination methods. Prerequisite: permission of instructor. Offered: Sp.
MEDCH 551 Flavin and Heme-Containing Monooxygenases (1) Rettie Discussion of research strategies and methodologies concerning the structure, function, and polymorphic expression of human monooxygenases, especially the cytochrome P450s and flavincontaining monooxygenases. Emphasis placed on experimental problem solving, data analysis, and presentation. Credit/no-credit only. Prerequisite: permission of instructor. Offered: AWSpS.
MEDCH 552 Medicinal Chemistry Aspects of Drug Action and Drug Metabolism (1) Nelson Discussion of research strategies, methodologies, and literature concerning the mechanisms of drug action and drug metabolism, particularly as these apply to opiate drugs and beta blockers. Emphases placed on problem solving, data analysis, and presentation. Credit/no-credit only. Prerequisite: permission of instructor. Offered: AWSpS.

MEDCH 553 Structure and Function of Macromolecular Protein Assemblies (1) Atkins Discussion of research strategies, methods, and current literature concerning macromolecular self-assembly processes and protein-protein interactions as they relate to biological specificity. Emphasis on experimental approaches used in current literature. Credit/no-credit
only. Prerequisite: permission of instructor. Offered: AWSpS.
MEDCH 554 Biophysical and Structural Virology (1) Lee Discusses current topics in virus research and literature. Weekly sessions led by all participating members of the research group. Credit/no-credit only. Offered: AWSpS.
MEDCH 555 Current Topics in Biological Mass Spectrometry (1) Goodlett Emphasis on applications in the area of protein toxins, bioactive peptides, and microbial diseases and on current developments in the use of small scale separations with mass spectrometry. Credit/no-credit only. Prerequisite: permission of instructor. Offered: AWSpS.
MEDCH 556 Clinical and Mechanistic Aspects of Drug Metabolism (1) Totah Discussion of research methodologies and new approaches to elucidatate chemical mechanisms and enzymology of reactions catalyzed by cytochrome P-450. Emphasis on clinical applications and predicting in vivo drug behavior and toxicity. Credit/no-credit only. Prerequisite: permission of instructor. Offered: AWSpS.
MEDCH 558 Human Cytochrome P-450 Biochemistry (1) Kunze Presentation and discussion of research strategies and methodologies related to current problems in human drug metabolism by cytochrome P-450 enzymes. Emphasis on hypothesis testing and ex perimental problem solving in the areas of enzyme kinetics and mechanism. Credit/no-credit only. Prerequisite: permission of instructor. Offered: AWSpS, even years.

MEDCH 559 Molecular Motors (1) Catalano Discussion of molecular motors, particularly those associated with virus assembly pathways. Emphasizes kinetic, biochemical, and biophysical approaches to dissect the molecular mechanisms of motor function. Offered: AWSpS.
MEDCH 561 P-Immunizing and Antimicrobial Agents (4) Lee, Totah Chemical and biologic properties of agents used to prevent or treat infectious diseases, including diagnostic, prophylactic, and therapeutic uses of immunizing biologicals and spectrum, action mechanisms, resistance patterns, toxicity, and therapeutic applications of antibiotics, antifungals, and antivirals. Prerequisite: MICROM 301, MICROM 302, MEDCH 570, or equivalent, PharmD major, or permission of instructor. Offered: Sp.
MEDCH 562 P-Medicinal Chemistry (3) Atkins, Kunze, Rettie Study of the various classes of medicinal compounds with particular emphasis on biological activity, mechanism of action, biotransformation, and the structural and physical properties governing absorption, distribution, and excretion. Prerequisite: MEDCH 400 or satisfactory completion of qualifying exam. Offered: A.

MEDCH 563 P-Medicinal Chemistry (3) Nelson, Rettie Study of the various classes of medicinal compounds with particular emphasis on biological activity, mechanism of action, biotransformation, and the structural and physical properties governing absorption, distribution, and excretion. Prerequisite: MEDCH 400 or satisfactory completion of qualifying exam. Offered: W.

MEDCH 564 P-Medicinal Chemistry (3) Atkins, Nelson Study of the various classes of medicinal compounds with particular emphasis on biological activity, mechanism of action, biotransformation, and the structural and physical properties governing absorption, distribution, and excretion. Prerequisite: MEDCH 400 or satisfactory completion of qualifying exam. Offered: Sp.
MEDCH 570 P-Medicinal Biochemistry (4) Catalano, Kun ze Covers advanced topics in medical biochemistry
directly related to understanding disease and drug therapy in pharmacy practice. Areas of study include enzymes of drug metabolism, metabolic control of disease states, signal transduction, virology, coagulation and complement cascades, cellular transport, and DNA replication/transcription. Offered: W
MEDCH 582 Topics in Medicinal Chemistry (1, max. 30) Discussion of pertinent articles from current literature. Credit/no-credit only. Offered: AWSp.
MEDCH 599 Cumulative Exams for Medicinal Chemistry (1) Quarterly cumulative examinations for graduate students. Credit/no-credit only. Offered: AWSp.

MEDCH 600 Independent Study or Research (*) Offered: AWSpS.
MEDCH 700 Master's Thesis (*) Offered: AWSpS.
MEDCH $\mathbf{8 0 0}$ Doctoral Dissertation (*) Offered: AWSpS.

## Pharmaceutics

The Department of Pharmaceutics offers a program of study leading to the Doctor of Philosophy degree.
The doctoral degree program in pharmaceutics trains research scholars in the fundamental aspects of drug delivery, drug disposition, and drug action in animals and man. Drug disposition includes the facets of drug absorption, distribution, and elimination. Pharmacokinetics is the study of the time course of these processes and the time course of pharmacological effects. Drug delivery includes targeting of drugs and modulation of xenobiotic and drug transporters to tissues or specific cell types to improve their therapeutic effect. For further information, visit: sop. washington.edu/pharmaceutics/about/what-is-pharmaceutics.html.

Typically graduates interact with clinicians, medicinal chemists, biochemists, pharmacologists, analytical chemists, and physiologists.This is possible because their training is highly interdisciplinary at the didactic and research levels.

A wide range of career paths is available to graduates. Opportunities include research in the pharmaceutical industry; research in hospitals, institutes, and foundations; teaching and research in academic institutions; and positions with government regulatory agencies.

## GRADUATE PROGRAM

Graduate Program Coordinator
H272 Health Sciences, Box 357610
(206) 543-9434
pceut@uw.edu

## Doctor of Philosophy

## Admission Requirements

1. One copy of official transcripts in a sealed envelope from each college attended
2. Official GRE score report
3. All foreign students must take the TOEFL and TSE test and send in the official score report
4. Statement of personal goals describing applicant's background, academic interests, and career objectives
5. A resume; or curriculum vitae listing educational and employment history
6. Three letters of recommendation from persons in a position to evaluate the applicant's potential for graduate school.

## Degree Requirements

Minimum 90 credits of coursework, to include:

1. Credits and Scholarship: Minimum 41 credits of coursework, exclusive of thesis and non thesis research.3.00 GPA in all numerically graded courses numbered 400 and 500. Minimum passing grade in any given course is 2.7, except required pharmaceutics courses (PCEUT 501, PCEUT 502, PCEUT 503, PCEUT 506) in which a passing grade is 3.0.Credits earned for a master's degree may apply towards the doctoral degree.
2. Teaching Experience: Minimum two quarters of teaching assistant experience.Students are not asked to assist more than one class an academic quarter (less than 12 contact hours/week). Most students complete this requirement during the first three years in the program.
3. Examinations and Progress Evaluation: A series of preliminary, cumulative (written) examinations; a general examination (oral) for advancement to PhD candidacy; a final examination (defense of the thesis).See Appendix A, "Progression Steps in Relation to the Doctoral Degree," for an overview. Appendix B describes the cumulative examination, which precedes the general exam. Appendix C provides details about formation of a doctoral Supervisory Committee and its role in the general exam and thesis defense. Appendix D provides details about the structure and conduct of the general exam.
4. Master's Degree Bypass: Students who qualify for continuation to the PhD degree may be allowed to bypass the M.S. degree. See Appendix A for petition procedure.
5. Seminars: All students must present a minimum of two and a maximum of four seminars while in the doctoral program (PCEUT 520). In addition, a presentation of papers from current literature is required twice a year, starting at the beginning of the second year until defense of the thesis (PCEUT 583). See Appendix E, "Training in Oral Communication through Seminars and Journal Club" for additional details.
6. Didactic: Coursework for the doctoral program is divided into four components: (a) prerequisites which define the level of entry into the program; (b) a required core program which is analogous to the major; (c) elective courses, which are not required but are encouraged; (d) seminars and literature review.
a. Prerequisites:

- MATH 124 (5 credits)
- MEDCH 400 (3 credits)

Applicants with a PharmD degree should have fulfilled the medicinal chemistry requirement. MEDCH 400 can be taken in autumn quarter of the first year. Candidates are accepted on condition that any deficiencies in course requirements are rectified by the end of the first academic year.
b. Core Program:

- PCEUT 506 (6 credits)
- PCEUT 501 (5 credits)
- PCEUT 502 (4 credits)
- PCEUT 503 (5 credits)
- PCEUT 510, PHCOL 511, PHCOL 512, PHCOL 513, (2 credits each)
- BIOST 511 (4 credits)
- BIOST 512 (4 credits)
- HCDE 509 (3 credits)
- PCEUT 600, PCEUT 800 (variable credit)

Students entering with previous graduate-level course work in the required areas may have some of the above courses waived. In addition, all students must attend the following training sessions, preferably during the first academic year: chemical safety, biological safety, and bioethics training. Radiation safety and animal care may also be required, if relevant to the student's thesis research.
c. Directed Electives: Electives are not required. How ever, students are encouraged to take elective courses that might benefit their thesis project and career goals. Courses that might be of interest can be found in the disciplines of biotransformation/biochemistry, biologics/drug delivery, pharmacology/cell biology, and physiological modeling/biostatistics.
d. Seminars and Literature Review:

- PCEUT 520 (1 credit/quarter; 3 quarters/year until graduation)
Beginning the second year, students make one presentation each year, with a maximum of four presentations. A general topic seminar is presented in the second year; research presentations in subsequent years.
- PCEUT 583 (1 credit/quarter; 3 quarters/year until graduation)
Beginning the second year, students make two presentations each year until graduation. Journal club presentation is waived in the quarter during which the student is scheduled to make a PCEUT 520 seminar presentation.

7. Research:

- PCEUT 600, PCEUT 800 (variable credit)

Students complete three research laboratory rotations (PCEUT 600, 2 credits), one per quarter, starting autumn quarter of their first year. A student may opt to complete a rotation in summer quarter, before the initiation of classes. This involves an early appointment in the department and, thus, decisions must be made at the time they accept the offer to enroll. Matching of available labs with each incoming student is facilitated by the first year graduate adviser. Student preferences are given due consideration.
Students must choose a thesis adviser by the end of spring quarter in their first academic year (See Appendix A for additional details).
Students must begin research in the lab of their adviser by summer quarter at the end of their first academic year (PCEUT 600, variable credit). Most students may find that after-class and off-hours are the best and most productive time for laboratory research (See Appendix A1b for additional details).
After successful completion of the master's bypass requirements (see Appendix A for details), students sign up for PCEUT 800 (variable credit), until the defense of their thesis.
8. Cumulative Examination: Students begin taking cumulative exams in autumn quarter of their second academic year, and continue taking them at every offering unti completion of pass requirements or until they take the maximum of eight exams. A total of eight exams are of fered, two each in autumn, winter, spring, and summer quarters. For each exam, there two questions. Students must pass four of eight exams to complete the cumulative requirement. Students who do not achieve this goal are given the option of completing requirements for a terminal master's degree or withdrawal from the program.

## Financial Aid

All students in the program receive financial support in the form of research assistantships, Public Health Service predoctoral training fellowships, and other fellowships such as the William E. Bradley Graduate Fellowship or those from the American Foundation for Pharmaceutical Education or from several pharmaceutical companies.

## COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations

PCEUT 499 Undergraduate Research (1-6, max. 12) Research problems in drug disposition, drug targeting, and drug development. Prerequisite: cumulative GPA of 2.50 and permission of instructor.
PCEUT 501 Advanced Pharmacokinetics I (5) Lin, Unadkat Drug absorption, distribution, excretion, metabolism, and effects in mammalian systems. Compartmental and physiologically-based pharmacokinetic models as well as non-compartmental approaches examined. Drug disposition studied in a physiologically realistic context taking nonlinear events into account. Aimed at development of innovative methods for data analysis (including population pharmacokinetic and pharmacodynamic models) and evaluation in biological systems. Prerequisite: PCEUT 506 or permission of instructor.
PCEUT 502 Pharmacokinetics of Drug Metabolism (4) Kunze, Levy, Thummel Advanced study of drug metabolism pharmacokinetics. Topics emphasize linear and nonlinear metabolic clearance kinetics, metabolite kinetics, in vitro-in vivo predictions, and drug-drug interaction kinetics. Prerequisite: PCEUT 506 or permission of instructor.
PCEUT 503 Drug Transport and Delivery (5) Ho, Hu, Mao, Shen, Unadkat, Wang Provides advance knowledge of the physico-chemical and biological concepts underlying in vivo transport and delivery of drugs. Prerequisite: PCEUT 506.

PCEUT 506 Pharmacokinetic Principles (6) Isoherranen Covers the fundamentals of pharmacokinetics. Includes lectures and laboratory exercises on the key concepts in pharmacokinetics, including compartmental kinetics, clearance, protein binding, bioavailability, pharmacodynamics, clinical pharmacokinentics, and Michaelis-Menten kinetics.

PCEUT 510 Drug Interactions (3) Collins, Horn, Shen, Thummel Covers common pharmacokinetic mechanisms underlying clinically important interactions between drugs, and patient- and drug-related factors that predispose a patient to adverse drug effects. Includes case-based discussion of approaches to identification, clinical evaluation, and clinical management of drug-drug interaction risk. Prerequisite: PHARM 560; PHARM 561; PHARM 563; and PHARM 564.

PCEUT 513 Basic Concepts in Pharmacogenetics and Toxicogenomics (3) Eaton, Thummel Addresses current DNA sequencing and genotyping approaches, and basic concepts of pharmacogenetics and toxicogenomics. Emphasis placed on applications of genomic technologies to the understanding of "gene-environment interactions" that cause diseases of public health importance, including cancer, chronic neurological diseases, and adverse drug reactions. Offered: jointly with ENV H 513/PHG 513
PCEUT 520 Seminar (1, max. 30) Kelly Graduate students attend seminars and make one formal presentation per year while in residence; maximum of three presentations. Credit/no-credit only. Offered: jointly with MEDCH 520.

PCEUT 531 P-Pharmaceutical Formulation: Principles and Dosage Forms (4) Lee, Mao, Shen Physiochemical principles involved in formulating stable dosage forms suitable for human administration. Hands-on laboratory experience with formulating extemporaneous preparations routinely encountered in community and hospital pharmacies. Routes of drug administration.

PCEUT 532 P-Clinical Pharmacokinetics (4) Anderson, Isoherranen, Unadkat, Wang Covers basic principles of pharmacokinetics and their application to the clinical setting, including: single-dose intravenous and oral kinetics, multiple dosing, nonlinear pharmacokinetics, metabolite kinetics, pharmacogenetics, and the
role of disease in drug clearance and dose requirements, and kinetics of drug-drug interactions. Prerequisite: PCEUT 531.

PCEUT 533 P-Biopharmaceutics, Drug Delivery and Therapeutic Resonse (4) Ho Covers basic principles of biopharmaceutics drug delivery, and therapeutic response and their application to traditional and biotherapeutics, including oral and non-oral route of drug administration. Includes fundamental principles related to assessment of bioavailability and bioequivalence, drug-drug, and food-drug interactions and genetic basis for oral or parenteral drugs. Prerequisite: PCEUT 532. Offered: Sp.
PCEUT 570 Advanced Research Topics (1, max. 15) Combines a discussion of the practical aspects and experimental techniques used to address the questions relating to drug disposition with comprehensive theoretical treatment of pharmacokinetic principles. Prerequisite: permission of the instructor.
PCEUT 583 Topics in Pharmaceutics (1, max. 30) Isoherranen Discussion of pertinent articles from current literature and recent laboratory results. Credit/nocredit only.

PCEUT 584 Pharmacokinetic Discussion Group (2) Lin Student initiated discussions of pharmaceutics concepts in relation to current literature. Preparatory to departmental cumulative examinations. Credit/nocredit only.
PCEUT 586 Biotechnology and Biopharmaceutics (2-3, max. 3) Ho, Hu, Kelly, Thummel Current topics in pharmaceuticals and biotechnology focusing on transforming small molecules, proteins, and genes into therapeutic products. Includes new drug therapies, drug design, pharmacogenomics, molecular modeling, high throughput screen, production and stability considerations, and delivery systems of protein and gene therapeutics in relation to pharmacokinetic and therapeutic responses.

PCEUT 587 Introduction to Biopharmaceutical Product Development (3) Provides a framework of the drug development process and its regulation. Prerequisite: ENV H 405 or ENV H 514, ENV H 515, and ENV H 516, or PCEUT 501, PCEUT 502, and PCEUT 503; or equivalent, or instructor permission. Offered: jointly with ENV H 587; A, even years.
PCEUT 598 Independent Research (*, max. 24) Basic and clinical research problems in drug disposition and effect. Prerequisite: 2.50 GPA and permission of instructor.

PCEUT 599 Cumulative Exams for Pharmaceutics (1) Isoherranen Quarterly cumulative examinations for graduate students

PCEUT 600 Independent Study or Research (*)
PCEUT 700 Master's Thesis (*)
PCEUT 800 Doctoral Dissertation (*)

## Pharmacy

## GRADUATE PROGRAM

Graduate Program Coordinator
H375 Health Sciences, Box 357630
(206) 616-1383

The Department of Pharmacy offers graduate study leading to a PhD degree in pharmaceutical outcomes research and policy. Emphasis of this program is on the health and cost outcomes of pharmaceuticals and pharmaceutical services and policies. Graduate training in this program
prepares students for career opportunities in teaching and research in universities, safety and economic evaluation of products in the pharmaceutical industry, policy analysis of governmental agencies, and drug use management within healthcare delivery and financing organizations.

Also offered is a track in the PharmD/MS program in pharmaceutical outcomes research and policy, which provides an opportunity for one-to-two students currently completing their PharmD training at the UW to enter the graduate program in their fourth year of training. The program requires completion of 64 credit hours, a written thesis, and a quarter of practicum in a managed care, government, industry, or other appropriate setting. At the end of this training, students may elect to receive a master's degree, or continue on toward a PhD degree.

The UW's biomedical regulatory affairs Master of Science program, offered by the UW School of Pharmacy in partnership with UW Educational Outreach, addresses a growing need for well-trained professionals in the regulatory field. The degree serves those who wish to advance their careers in the medical products industry or those entering the field from related areas.

Deadline for application for the PhD and the PharmD/MS programs is December 31. Applicants are notified of ac ceptance or rejection by March 30. Refer to the application deadline for the biomedical regulatory affairs master-of science program posted at: www.biomedreg.uw.edu/admissions/deadlines.asp.

Application materials and additional information are available in the Department of Pharmacy or at program websites listed below:
sop.washington.edu/porpp/graduate-program/phd-program27.html.
sop.washington.edu/porpp/graduate-program/concur-rent-pharmdms-degree-in-pharmaceutical-outcomes-research-a-policy.html.
www.biomedreg.uw.edu.

## Residency and Fellowship Programs

The Department of Pharmacy offers several postdoctoral fellowships in pharmacotherapeutics and pharmaceutical outcomes, and advanced community residency programs, primarily intended for PharmD graduates. Addition in formation is available on the department's website: sop. washington.edu/pharmacy/about/fellowship-a-residencyopportunities.html.

## Clinical and Affiliate Faculty

In addition to the School of Pharmacy's full- and part-time faculty listed above, a large number of practicing pharmacists contribute to the School's academic programs. Over 500 pharmacists throughout the Pacific Northwest are members of the clinical and affiliate faculty, representing a variety of pharmacy practice settings such as community, hospital, nursing home, government, and industry. Information on the names, addresses and practice settings of these faculty members is available from the Office of Professional Pharmacy Education.

## PROFESSIONAL PROGRAM

## Doctor of Pharmacy

A four-year professional program leading to the Doctor of Pharmacy (PharmD) degree, the curriculum is designed to provide students the scientific background and clinical skills necessary to render pharmaceutical care in various health care settings. Individuals who wish to practice pharmacy in the United States must earn a Doctor of Pharmacy (PharmD) degree from an accredited college or school of pharmacy, complete required internship hours, pass licensing examinations, and meet other state-specific licensing requirements.

## Admission Requirements

Consideration for admission to the professional program requires a minimum three years of pre-pharmacy training. An applicant who is admissible to the University is not assured admission to the School of Pharmacy. Admission is competitive, based on a number of factors. Academic preparedness, motivation, oral and written communication skills, critical-thinking ability, and decision-making skills are among the criteria used to determine a candidate's aptitude for the program. Following a preliminary assessment of the applicant pool, the most qualified applicants are selected for an interview in Seattle. A writing assessment is also conducted at that time. Further details on admission requirements, application procedures, and program content are available from the School's Office of Academic and Student Programs or its website.

1. Applicants to the UW School of Pharmacy PharmD program must both complete an on-line PharmCAS Application and submit a supplemental application to the UW School of Pharmacy, Office of Academic and Student Programs. Potential applicants should consult the School of Pharmacy website, sop.washington.edu/ students for additional admission requirements and the most current information regarding the PharmD program.
2. Please refer to the School's website for current entrylevel Doctor of Pharmacy program information at sop. washington.edu/students/.
3. Pharmacy College Admission Test (PCAT) must be taken within two years of application. The UW School of Pharmacy accepts no other admission test (e.g., MCAT, GRE) in place of the PCAT.
4. Applicants who have completed all prerequisite (pre-pharmacy) coursework prior to application and those who have earned a prior bachelor's degree or higher are given preference in the process of screening for offer of interview. The admissions committee has established minimum cumulative and prerequisite (prepharmacy) GPA thresholds and PCAT scores for screening for offer of interview. Applicants who meet or exceed these minimums are not guaranteed an interview. Offers of interview are dependent on the size and competitiveness of the applicant pool.
5. Interview is required as part of the UW School's PharmD admission process. After a preliminary assessment of the applicant pool, the most-qualified applicants are invited for an interview in Seattle with members of the PharmD admissions committee. Admission preference is given to residents of Washington State and residents from states participating in the Western Interstate Commission for Higher Education (WICHE).
6. It is important for applicants to research carefully the pharmacy profession and the attributes, skills, and abilities essential for pharmacists in the provision of care. Although relevant experience is not required, applicants are strongly encouraged to gain pharmacy experience, either as a volunteer or employee.
7. Non-U.S. Citizens: Applicants who hold "Permanent Resident" or "Refugee/Asylee" visa status are eligible to apply. TOEFL scores are not required.
8. International Transcripts: All transcripts for coursework completed at foreign colleges or universities must be translated and evaluated course-by-course by one of the following certified agencies: the Education Credential Evaluators, World Education Services, Inc, or Educa-tional-Perspectives.

## Degree Requirements

Recently revised. Current degree requirements for entering classes are reflected in the graduating class of 2015 and later. (Graduating classes of 2014 and earlier have different course sequences as a result of this revision.) Below are the current degree requirements:

1. Year 1 (47 core, 5 elective credits): CONJ 401, CONJ 402, CONJ 403 (4,4,4); MEDCH 561 (4), MEDCH 570 (4); PCEUT 531, PCEUT 532, PCEUT 533 (4,4,4); PHARM 500 (1); PHARM 558 (3); PHARM 584, PHARM 585, PHARM 586 (3,3,3); PHARMP 511, PHARMP 512, (1,1); 5 electives; MEDCH 400 ( 3 credits) is required for students who do not pass the MEDCH qualifying exam, which if taken, can be credited as a professional elective.
2. Year 2 (46 core, 5 elective credits): MEDCH 562, MEDCH 563, MEDCH 564 (3,3,3); PHCOL 401, PHCOL 402 (3,3); PHARM 509 (1); PHARM 537 (2); PHARM 539 (3); PHARM 543, PHARM 543 (2,3); PHARM 559 (6); PHARM 563 (2); PHARM 592, PHARM 593, PHARM 594 (3,3,2); PHARMP 513, PHARMP 514 (1,2); PHARMP 531 (1); 5 elective credits
3. Year 3 (33 core, 18 elective credits): PCEUT 510 (3); PHARM 541 (3); PHARM 560; PHARM 561, PHARM 562 (6,7,6); PHARM 564, PHARM 565 (2,2); PHARMP 532, PHARMP 533, PHARM 541 (1,2,1); 18 elective credits
4. Year 4: Nine required clinical rotations (6 credits each) for a total of 54 credits

## PharmD/PhD Concurrent Program <br> PharmD/PhD Program Coordinator H272 Health Sciences, Box 357610 (206) 543-3796

The accelerated dual-degree program is intended for outstanding students committed to earning the PharmD degree and a PhD degree in either Pharmaceutics or Medicinal Chemistry. Students are equipped to enter academic careers that require competence in both teaching and research. Graduates of this program possess the breadth and depth of knowledge necessary to work with colleagues across multiple disciplines essential to performing integrated and translational medical and pharmaceutical research. Many applicants have worked in research and developed an interest in public health and pharmaceutical sciences through that experience.
Students admitted to the concurrent degree program are able to complete the requirements for both degrees in about seven academic years, rather than the nine academic years normally required to receive both degrees.

Applicants must meet competitive admission requirements of both the PharmD and PhD programs. Admission to the PharmD/PhD program is based on the recommendation of the admission committees of the professional degree program, the graduate program, and the PharmD/PhD program. For additional admission criteria, see respective programs.

## Admission Requirements

Applicants must complete admission requirements of both the PharmD and PhD programs. Consideration for the PharmD/PhD program is contingent upon completion of a PharmD application, Graduate School application, and PharmD/PhD application (available online at: sop. washington.edu/school-of-pharmacy/degree-programs/ concurrent-degree-opportunities.html).

1. PharmD program application is composed of (a) verified completion of all application materials by the deadline as stated on the school website, (b) PCAT scores, (c) prerequisite and cumulative GPA, (d) ability to complete prerequisite courses by the end of spring term prior to School of Pharmacy matriculation. For details, see PharmD admission requirements.
2. Graduate School application for medicinal chemistry or pharmaceutics includes (a) undergraduate degree in chemistry, biochemistry, pharmacy, biology, or a closely related field, (b) statement of purpose, (c) GRE scores, (d) prior research experience, (e) Three letters of recom-
mendation. Graduate School application deadline as stated on the school website.
3. In addition, applicants are required to submit information requested in the PharmD/PhD concurrent program application checklist, available on the above stated website.

## Financial Aid

Financial support in the form of research assistantships, teaching assistantships, and fellowships may be avail able to prospective and continuing students. Availability of financial aid is limited, typically to the first and second academic year. Prospective students should contact the Graduate Program Coordinator for more information on financial support.

## COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations.

## Pharmacy

PHARM 301 Medications and Health: It's Not All About Drugs (3) I\&S Dawson, Odegard, Weber Covers personal health promotion, treatment of illness, and health care. Explores several medication-related topics, provides insight on drug development and efficacy, and serves as introduction to students contemplating careers in health sciences, especially in pharmacy.
PHARM 494 Principles of Pharmacokinetics (2) Bauer Reviews basic pharmacokinetic concepts relevant to the clinical application of drug dosing in patients and to mastering the therapeutic drug monitoring techniques used to determine doses of drugs with narrow therapeutic indices.

PHARM 497 Drug Therapy for the Elderly (3) Christianson Clinical application of drug knowledge in the treatment of disease in older adults with multiple comorbidities. Application of age-related changes in pharmacokinetics and pharmacodynamics in the selection and monitoring of drug regimes of older adults. Emphasis on problem solving, using case ex amples. Prerequisite: nurse practitioner students or permission of instructor.
PHARM 500 Profession of Pharmacy (1) Kedzierski, Weber Introduces the new student to the profession of pharmacy. Provides both an historical and a modern context that assists student pharmacists begin to participate in the profession. Provides an overview of career opportunities. Credit/no-credit only. Offered: A.

PHARM 501 Alternative and Complementary Medicines
(2) Anderson Studies popular alternative and complementary medicines used in the United States. Focuses on herbal products with some coverage of other non-nutritional dietary supplements. Open to professional and graduate students in the Schools of Pharmacy, Nursing, Medicine, Dentistry, and Public Health, or by permission of instructor. Credit/nocredit only. Offered: AW.

PHARM 502 Neonatal Drug Therapy (3) Blackburn Clinical applications of drugs used with acute and chronically ill preterm and term neonates. Review of neonatal pharmacotherapeutics. Examination of selected therapeutic agents in relation to indications, efficacy, therapeutic and adverse effects, monitoring param eters, and dosing principles in the neonate.
PHARM 503 Senior Care Introductory Pharmacy Practice Experience (2) Lakey, Morrissey, Murphy, Odegard, Plein Under faculty supervision, provides clinical services for senior patients in various settings. Includes reviewing charts, interviewing patients, conferring with
other health care providers, and making recommendations on medication therapies to providers and patients. All students participate in an orientation/ seminar workshop and in a weekly (for five weeks) clinical pearls workshop. Credit/no-credit only. Prerequisite: Successful completion of the first five quarters of PharmD curriculum; permission of instructor. Offered: Sp .
PHARM 509 P-Principles of Evidence Based Medicine III: Critical Evaluation of Published Evidence (1) O'Sullivan Provides a critical evaluation of medical literature. Prerequisite: permission of School of Pharmacy.
PHARM 510 Contemporary Concepts in Clinical Nutrition Support (1) Chan Addresses current topics and concepts in clinical nutrition support. Topics include assessment and management of patients requiring specialized nutrition support, enteral nutrition, and parental nutrition. Prerequisite: biochemistry, anatomy and physiology, or permission of instructor; taken concurrently with NUTR 511. Offered: A.
PHARM 513 P-Medical Devices for Home Healthcare (3) Downing Study of medical devices commonly provided by pharmacists to their patients, including their selection and adaptation for specific patient needs. Lectures include display and demonstration of actual devices.
PHARM 514 Pharmacotherapeutics for Advanced NursingPractice (1-6, max. 6) Acker, Landis Explores pharmacogenetics, pharmacokinetics, pharmacodynamics, pharmacotherapeutic issues, evidence-based efficacy studies, clinical case applications, and patient related factors such as age, socioeconomic status, and behavioral aspects that support the selection of commonly used drugs for patients of all ages across settings. Includes web-based pediatric component and specialty components.
PHARM 515 Pharmacotherapeutics for Acute/Critical Illness (3) Coyne Analysis of issues that impact the assessment, prescription, and evaluation of pharmacotherapeutic regimes for patients who are acutely or critically ill. Current research, clinical contextual considerations, and pharmacotherapeutic principles are emphasized as the basis for decisions relevant to the management of pharmacotherapy in acute care clinical practice.
PHARM 516 Introduction to Biomedical Regulatory Affairs (3) Hazlet Surveys government oversight of drugs, devices, and biotechnology derived products; laws and regulations that apply to development, testing, and production; and responsibilities of a regulatory affairs specialist in the regulatory setting.
PHARM 517 Product Development and Manufacturing Systems (3) Hazlet Surveys government oversight of drugs, devices, and biotechnology derived products; laws and regulations that apply to development, testing, and production.
PHARM 518 Product Testing, Evaluation, and Post-Market Issues (3) Hazlet Medical product post-marketing requirements; reporting and enforcement actions; inspections (internal and by regulators) preparation, conduct, and follow-up actions; surveillance and studies, reimbursement, and economics.
PHARM 519 Pharmacotherapeutics for Infectious Disease and Infection (2) Black Analysis of pharmacotherapeutics to control infection and manage infectious disease through seminar discussion of cases, critical analysis of a pharmacotherapeutic regimen, and development of references to enhance students' clinical expertise. Emphasis on principles of antiinfective therapy, problem solving clinical cases with complex medication regimes, and identifying judicious pharmacotherapeutic plans.

PHARM 520 P-Introduction to Pharmacoeconomics and Outcomes Research (2) Ramsey, Veenstra Provides an introduction to economic evaluation and outcomes research related to pharmaceuticals and other healthcare technologies. Covers the methods of cost-effectiveness analysis and quality of life evaluation, and their use in real-world decision-making.
PHARM 521 P-Pharmacy Teaching Practicum (1-3, max. 6) Allen, Dawson, Hammer Allows students the opportunity to apply learning about education in a mentored experiences. Students serve as assistant instructors in existing pharmacy courses or engage in other approved educational experiences. Prerequisite: PHARM 586, instructors permission. Offered: AWSp.
PHARM 522 P-The Nature of Scientific Truth (2) Hansten Drawing on the wisdom of scientists and philosophers, discussion of the nature and limitations of scientific truth, using examples from the practice of pharmacy whenever possible. Emphasizes reasoning errors that are common in science, particularly those that involve the application of scientific information to clinical practice. Credit/no-credit only.
PHARM 523 Survey of Biomedical Regulatory Affairs (3) Hazlet Overview of the knowledge, terminology, and skills necessary to be an effective regulatory affairs or compliance specialist in the design, development, testing and production of drugs, biotechnology-derived therapeutics, and medical devices
PHARM 525 P-Advanced Compounding Skills (1) Lawhorn, Needham Prepares the student to create unique, patient-specific pharmaceutical dosage forms used in contemporary pharmacy practice. Includes prereadings and assignments, a didactic session and a laboratory session, and is offered over a weekend. Credit/no-credit only. Prerequisite: PCEUT 531.
PHARM 528 P-Introductory Institutional Pharmacy Experience (3) Under faculty supervision students gain experience working in the institutional setting. Prerequisite: PHARM 504.
PHARM 530 P-Pharmacy and Women's Health (2) Anderson Participants gain an overview of the specific up-to-date knowledge of gender-based medicine; an understanding of the implications of gender-based biology and the opportunity to evaluate new research that has implications for the prevention and management of diseases and conditions in women. Credit/ no-credit only.
PHARM 532 Methods in Pharmaceutical Policy Analysis (4) Garrison, Hazlet Introduction to the tools used in and the framework and dominant contexts for pharmaceuticals policy development and analysis. Methods reviewed in a series of sessions presenting a specific method and case analyses involving pharmaceuticals development. Project and in-class presentation required.
PHARM 533 Pharmacoepidemiology (3) Boudreau, Heckbert Overview of pharmacoepidemiology including drug development and approval; application of epidemiologic methods to study drug safety and effectiveness; exploration of the interplay between research and public policy; introduction to resources for information about drugs; introduction to pharmacology principles pertinent to pharmacoepidemiology. Prerequisite: Health Sciences graduate student; either EPI 511 or both EPI 512 and EPI 513; or permission of instructor. Offered: jointly with EPI 533; Sp, even years.
PHARM 534 Economic Evaluation in Health and Medicine (3) Garrison, Veenstra Methods and techniques for evaluating costs and cost-effectiveness of health, medical, and pharmaceutical interventions. Emphasis on economic evaluation, decision analysis, and modeling techniques for resource allocation and
decision making. Applications to technology assessment, health policy, clinical practice, and resource allocation. Prerequisite: permission of instructor. Offered: jointly with HSERV 583.
PHARM 535 Assessing Outcomes in Health and Medicine
(3) Sullivan Concepts and methods for developing and using patient-reported outcomes in health and medicine. Emphasis on patient self-reported health status and quality of life. Qualitative research and psychometric methods applied to health outcomes assessment and all applications. Prerequisite: permission of instructor. Offered: jointly with HSERV 584.
PHARM 537 P-Chemical Dependency Concepts (2) Kedzierski Examines the development of therapeutic frame. Includes the genesis of addiction harm reduction strategies, legal and ethical considerations, medication management in the substance-abusing population, impaired pharmacist rehabilitation, detection and dealing with substance abuse issues in pharmacy practice, community resources. Course offered to professional PharmD, class 2. Credit/nocredit only.
PHARM 538 P-Chemical Dependency Issues in Practice (3) Kedzierski Emphasis on drug classes, pharmacologic management of abstinence and withdrawal, drug testing, drug use in pregnancy, treatment options and recovery, codependency and legal and ethical considerations. Credit/no-credit only. Prerequisite: PHARM 537.
PHARM 541 Pharmacy, Healthcare, and Society (3) Sullivan Introduction to health services and pharmacy practice designed for future healthcare practitioners. Examines the history, organization, and effectiveness of the U.S. healthcare system. Stresses the student's ability to adopt a broad perspective across healthcare disciplines and traditional boundaries.
PHARM 542 P-Managed Care Pharmacy: Principles and Practice (3) Fullerton, Penna Surveys the activities, tactics, and strategies used by managed care to deliver pharmacy services to their members. Includes: formulary development, clinical improvement programs, quality improvement measures, regulatory activities, contracting with pharmaceutical manufacturers, network management, financial issues, sales and marketing, and provider relations. class 2,3 , and 4 PharmD students.
PHARM 543 Pharmacy Laws and Ethics ([2-3]-, max. 5) Hazlet Studies the laws governing the practice of pharmacy, approaches to legal, and ethical dilemmas in the delivery of pharmaceutical care, and methods of statutory and regulatory reform.
PHARM 544 Survey of Pharmacy Laws (1) Hazlet Prepare, discuss, and present responses to assigned questions developed by faculty regarding laws governing pharmacy practice in the course of reviewing for the Multistate Pharmacy Jurisprudence Examination. Class meets for two consecutive Saturdays in February and March. Email and web access required. Credit/no-credit only. Open to fourth-year PharmD students; non-matriculated students by permission only.
PHARM 549 Pharmacotherapeutics for Older Adults (4) Gray, Odegard Applies pharmacologic knowledge to the assessment, individualized selection of therapy, and monitoring of treatment in older adults with multiple comorbidities; and age-related changes in pharmacokinetics and pharmacodynamics with emphasis on problem solving, using case examples. Prerequisite: PHARM 560; PHARM 561 or permission of instructor. Recommended: MEDCH 535.
PHARM 550 Current Topics in Geriatric Pharmacotherapy (1) Gray Review primary medical literature to discuss contemporary issues related to geriatric pharmaco-
therapy. Credit/no-credit only. Prerequisite: PHARM 509 or permission of instructor.
PHARM 558 Pharmacotherapeutics I - Pharmacotherapy with Non-prescription (OTC) Drugs (3) Ellsworth Overview of common classes of nonprescription drug therapeutics with an emphasis on case examples, patient assessment, non-drug adjunct therapy, product selection, and patient advice. Oral presentation required. Computer (Internet) case discussion mandatory. Enrollment restricted to first-year PharmD students.
PHARM 559 Pharmacotherapeutics II (6) Black Discusses the integration and applies epidemiology, pathophysiology, clinical diagnostics, and drug-related knowledge toward the management of common diseases. Emphasizes problem-solving through the use of case examples. Prerequisite: permission of School of Pharmacy. Offered: Sp.

PHARM 560 Pharmacotherapeutics III (6) Bauer, Horn Discusses the integration of and applies epidemiology, pathophysiology, clinical diagnostics, and drugrelated knowledge toward the management of common diseases. Emphasizes problem-solving through the use of case examples. Prerequisite: permission of School of Pharmacy. Offered: A.

PHARM 561 Pharmacotherapeutics IV (7) Gray, Odegard Discusses the integration of and applies epidemiology, pathophysiology, clinical diagnostics, and drugrelated knowledge toward the management of common diseases. Emphasizes problem-solving through the use of case examples. Prerequisite: permission of School of Pharmacy. Offered: W.
PHARM 562 Pharmacotherapeutics V (6) Chan, McCune Discusses the integration of and applies epidemiology, pathophysiology, clinical diagnostics, and drugrelated knowledge toward the management of common diseases. Emphasizes problem-solving through the use of case examples. Prerequisite: permission of School of Pharmacy. Offered: Sp.
PHARM 563 Applied Pharmacotherapeutics I (2) Catalano Develops a foundation of skills that enables a pharmacist to practice collaborative patient-specific care. Prerequisite: permission of School of Pharmacy. Offered: Sp.

PHARM 564 Applied Pharmacotherapeutics II (2) Catalano Develops a foundation of skills that enables a pharmacist to practice col permission of School of Pharmacy laborative patient-specific care. Prerequisite: permission of School of Pharmacy. Offered: A.

PHARM 565 Applied Pharmacotherapeutics III (2) Catalano Develops a foundation of skills that enables a pharmacist to practice collaborative patient-specific care. Prerequisite: permission of School of Pharmacy. Offered: W.

PHARM 566 P-Applied Pharmacokinetics (2) Bauer Pharmacokinetics of specific drugs. Influence of age, weight, sex, and disease states on patient-specific dosage regimens emphasized. Advanced kinetic concepts are discussed and put into applied context. Prerequisite: PCEUT 532.

PHARM 567 P-Cancer Pharmacotherapeutics (2) Kwok Pharmacotherapy of cancer, covering supportive care (antibiotics, antiemetics, analgesics, nutrition) to the antineoplastic agents themselves. Specialists in each area serve as guest lecturers. Offered: Sp.

PHARM 568 Health Economics (3/4) Garrison Applies microeconomics principles and models to understand the nature of healthcare markets and systems. Includes a wide range of health sector activities and policy issues studied by applying rigorous economic analytical tools coupled with review of key econometric and empirical analysis. Prerequisite: introductory
coursework in microeconomic principles and basic statistics. Offered: W.
PHARM 569 P-Fluid and Electrolytes and Parenteral Nutrition (2) Chan Focuses on the principles of fluid electrolyte and nutritional management in patients requiring parenteral nutrition (PN) and infusion therapy. Topics include acid-base balance, macro- and micronutrient requirements, nutritional assessment, complications of PN and compounding and compatibility of PN solutions. Discusses consideration in special populations (e.g., ICU).
PHARM 570 P-Critical Care Pharmacotherapeutics (2) Mike Overviews pharmacotherapeutic topics for patients in the critical care setting. Discusses principles in hemodynamic monitoring, respiratory management, concepts in pathophysiology related to critical illnesses, and other timely topics reflecting current clinical practice. Prerequisite: thrd-year PharmD student, or approval of instructor.
PHARM 571 P-Current Topics in Acute Care Pharmacotherapy (1) Chan Increases understanding and stimulates discussion in current topics related to acute care pharmacotherapy. Reviews the management of patients in the acute care setting through current cases presented by instructors. May be taken alone or concurrently with PHARM 570.
PHARM 572 Pharmacist Advocacy I: Legislative and Grassroots Affairs (1) Downing Increases student awareness and knowledge of local, state, and national healthcare issues that affect pharmacists and their patients. Prepares pharmacy students to knowledgably represent their school, profession, and their patients during individual and organized-group pharmacy legislative and other advocacy activities. Offered: A.
PHARM 573 Pharmacist Advocacy II: Legislative and Grassroots Affairs (1) Downing Prepares pharmacy students to knowledgably represent their school, profession, and their patients during individual and organized-group pharmacy legislative and other advocacy activities. Students actively participate in offcampus legislative and advocacy activities while the Washington State legislature is in session. Offered: W.

PHARM 581 P-Global Health Pharmacy: Medicines, Practice, and Policy (2) Garrison, Hazlet, Stergachis Introduces the critical role of pharmaceutical in addressing major diseases (such as HIV/AIDS, malaria, tuberculosis) affecting persons in resource-limited settings. Addresses the wide range of relevant issues, including burden of disease, human resource capacity, regulation, drug safety/pharmoacovigilance, drug distribution, pharmaeconomics, financing, intellectual property, and drug trade polices. Prerequisite: satisfactory completion of the 1-credit lecture/discussion component.
PHARM 582 P-Special Topics in Global Health Pharmacy and Medical Products (1-3, max. 6) Babigmira, Garrison Provides in-depth instruction on selected special topics relating to the use, access to, and impact of pharmaceuticals, vaccines, and diagnostics/medical devices in global health. Credit/no-credit only.
PHARM 584 Pharmacy Practice I - Introduction to Community Pharmacy Practice I (3) Hammer Introduction to development and practice of skills in drug information resources; prescription processing and problem solving; pharmaceutical calculations and compounding; patient information and counseling on over-thecounter and compounded medications. Offered: A.
PHARM 585 Pharmacy Practice II (3) Hammer Continued development and practice of skills in drug information resources; prescription problem solving; pharmaceutical calculations; and patient information and counseling. Emphasizes use of commonly prescribed
prescription medication as well as patient-specific characteristics that impact their care. Prerequisite: PHARM 584. Offered: W.

PHARM 586 Pharmacy Practice III: Applications of Public Health Practice (3) Hammer Develops skills that enable public health screening and health promotion in com-munity-based settings: administration of vaccines to adults and adolescents; practical application of com-munity-based health screenings, counseling, and referral; and teaching self-monitoring techniques to patients. Emphasizes communication with members of special populations. Offered: Sp.

PHARM 588 Diabetes Care (2) Danielson, Odegard Further develops foundations in the principles of diabetes management and provides practice in application of diabetes-care principles. Develops knowledge and abilty to assess, manage, educate, and monitor patients with diabetes. Credit/no-credit only.

PHARM 591 Community Collaborations in Healthcare Practicum (2, max. 8) Kedzierski Faculty and students collaborate with representatives from the Salvation Army ARC and other community sites to improve health literacy and health outcomes of men and women residents/patients in addiction recovery. Credit/no-credit only. Offered: ASp.

PHARM 592 Pharmacy Practice IV: Design and Analysis of Medical Studies (3) Devine Introduces the basic biostatistical concepts used in the medical literature, and the various study designs. Develops students' skills in critically evaluating the medical literature, with the goal of applying these skills to clinical practice. Prerequisite: PHARM 584; PHARM 585; PHARM 586. Offered: A.

PHARM 593 Pharmacy Practice V: Institutional Pharmacy Practice (3) Somani Includes discussion and skill development related to contemporary institutional pharmacy practice. Focuses on health information technology, the quality improvement process, MUE and cost management, medication order process ing, counseling and medication reconciliation, inter personal teamwork, and patient-oriented services. Students create and present mock proposals for new guidelines and practice protocols. Prerequisite: PHARM 592. Offered: W.

PHARM 594 Pharmacy Practice VI: Medication Quality and Safety (2) Devine, Somani Introduces topics related to medication safety and quality improvement. Describes the role of information technology and the importance of organizational leadership and teamwork in improving safety. Introduces topics of col laborative drug therapy management and managed care pharmacy practice. Prerequisite: PHARM 593 Offered: Sp.
PHARM 595 Special Studies in Pharmacy (1-6, max. 24) Special studies of professional topics in pharmacy An opportunity to expand the breadth and depth of understanding in specific pharmaceutical areas. Students may undertake independent study under the individual direction of a faculty member.
PHARM 596 Seminars in Pediatric Pharmacotherapy (2) Harvey Explores therapeutic topics pertinent to the pediatric population. Emphasizes ambulatory pediat rics. Prerequisite: third-year PharmD student or permission of instructor.
PHARM 597 Graduate Seminar (1) Gray Interactive dis cussion of topical issues, methods, or analytic techniques. Topics vary. Credit/no-credit only. Prerequisite: graduate program student.

PHARM 599 Independent Study/Research (1-6, max. 24) Applied pharmaceutical research problems. Credit/ no-credit only.

PHARM 600 Independent Study or Research (*)

PHARM 700 Master's Thesis (*)
PHARM 800 Doctoral Dissertation (*)

## Pharmacy Practice

PHARMP 511 Introductory Pharmacy Practice Experience in Community Pharmacy I (1) Introduces student to community pharmacy practice. Students process prescriptions, begin to manage drug therapy, communicate with patients, and provide public health activities in the patient care setting. Seminars allow for orientation, discussion/reflection, and progress assessment. Orients students to community practice, fulfills requirements for entering patient care, and sets expectations for the course series. Credit/ no-credit only. First in a series of four. Prerequisite: PHARM 584. Offered: W.

PHARMP 512 Introductory Pharmacy Practice Experience in Community Pharmacy II (1) Introduces student to community pharmacy practice. Students process prescriptions, begin to manage drug therapy, communicate with patients, and provide public health activities in the patient care setting. Seminars allow for orientation, discussion/reflection, and progress assessment. Emphasizes legal requirements for practice, fulfills requirements for entering patient care, and exposes student to leaders in community pharmacy practice. Credit/no-credit only. Second in a series of four. Prerequisite: PHARMP 511. Offered: Sp.
PHARMP 513 Introductory Pharmacy Practice Experience in Community Pharmacy III (1) Introduces student to community pharmacy practice. Students process prescriptions, begin to manage drug therapy, communicate with patients, and provide public health activities in the patient care setting. Seminars allow for orientation, discussion/reflection, and progress assessment. Emphasizes patient safety, involvement in health/wellness screening, and exposes students to leaders in community pharmacy. Credit/no-credit only. Third in a series of four. Prerequisite: PHARMP 512. Offered: A.

PHARMP 514 Introductory Pharmacy Practice Experience in Community Pharmacy IV (2) Introduces student to community pharmacy practice. Students process prescriptions, begin to manage drug therapy, communicate with patients, and provide public health activities in the patient care setting. Seminars allow for orientation, discussion/reflection, and progress assessment. Emphasizes reflection on and documentations of professional competency. Credit/no-credit only. Fourth in a series of four. Prerequisite: PHARMP 513. Offered: W.

PHARMP 531 Introductory Pharmacy Practice Experience in Institutional Pharmacy I (1) Introduces students to institutional pharmacy practice. Students learn about the role of pharmacists in the inpatient settings, participate in product distribution, provide drug information, and gain exposure to quality assurance activities in hospitals. Seminars allow for orientation, discussion/reflection, and progress assessment. Orients students to institutional practice, exposes student to leaders in hospital practice, and introduces expectations for quality assurance activities. Credit/ no-credit only. First in a series of three. Prerequisite: PHARMP 514. Offered: AWSpS.
PHARMP 532 Introductory Pharmacy Practice Experience in Institutional Pharmacy II (1) Introduces students to institutional pharmacy practice. Students learn about the role of pharmacists in the inpatient settings, participate in product distribution, provide drug information, and gain exposure to quality assurance activities in hospitals. Seminars allow for orientation, discussion/reflection, and progress assessment. Emphasizes quality assurance in hospital practice,
reflects on medication reconciliation, and orients students to subsequent IPPE coursework. Credit/nocredit only. Second in a series of three. Prerequisite: PHARMP 531. Offered: AWSpS.
PHARMP 533 Introductory Pharmacy Practice Experience in Institutional Pharmacy III (2) Introduces students to institutional pharmacy practice. Students learn about the role of pharmacists in the inpatient settings, participate in product distribution, provide drug information, and gain exposure to quality assurance activities in hospitals. Seminars allow for orientation, discussion/reflection, and progress assessment. Emphasizes reflection on providing drug information, documenting professional competency, and orienting students to subsequent IPPE and APPE coursework. Credit/no-credit only. Third in a series of three. Prerequisite: PHARMP 532. Offered: AWSpS.
PHARMP 541 Introductory Pharmacy Practice Experience in Clinical Skills (1) O'Sullivan Students interview and assess a patient in the practice setting, present the patient case and an oral seminar in a small group setting, and complete other requirements for beginning advanced pharmacy practice experience. Credit/no- credit only. Offered: Sp.
PHARMP 571 Advanced Pharmacy Practice Experience in Inpatient/Acute Care General Medicine (6, max. 36) O'Sullivan Advanced pharmacy practice experience focusing on providing patient-centered care to patients in a general medicine care setting. Applies therapeutic knowledge to assess and develop therapeutic plans in collaboration with other healthcare professionals, taking medication histories, monitoring patient progress, and providing drug information to professionals and patients. Credit/no-credit only. Offered: AWSpS.
PHARMP 572 Advanced Pharmacy Practice Experience in Hospital or Health-System Pharmacy (6, max. 36) O'Sullivan Advanced pharmacy practice experience focusing on providing patient-centered care to patients in an acute care or other inpatient setting. Applies therapeutic knowledge to assess and develop therapeutic plans in collaboration with other healthcare professionals, taking medication histories, monitoring patient progress, and providing drug information to professionals and patients. Credit/no-credit only. Offered: AWSpS.
PHARMP 573 Advanced Pharmacy Practice Experience in Ambulatory Care (6, max. 36) O'Sullivan Advanced pharmacy practice experience focusing on providing pa-tient-centered care to patients in a clinic-based setting. Applies therapeutic knowledge to assess and develop therapeutic plans in collaboration with other healthcare professionals, taking medication histories, monitoring patient progress, and provide drug information to professionals and patients. Credit/nocredit only. Offered: AWSpS.
PHARMP 574 Advanced Pharmacy Practice Experience in Community Pharmacy (6, max. 36) O'Sullivan Advanced pharmacy practice experience focusing on providing patient-centered care to patients in a communitybased setting. Applies therapeutic knowledge to assess and develop therapeutic plans in collaboration with other healthcare professionals, taking medication histories, monitoring patient progress, and providing drug information to professionals and patients. Credit/no-credit only. Offered: AWSpS.
PHARMP 575 Advanced Pharmacy Practice Experience in Patient Care (6, max. 30) O'Sullivan Advanced pharmacy practice experience focusing on providing patientcentered care to patients in a non-required setting. Applies therapeutic knowledge to assess and develop therapeutic plans in collaboration with other healthcare professionals, taking medication histories, monitoring patient progress, and providing drug
information to professionals and patients. Credit/ no-credit only. Offered: AWSpS.
PHARMP 576 Advanced Pharmacy Practice Experience in Non-Patient Care (6, max. 24) O'Sullivan Advanced pharmacy practice experience focusing on providing pharmacy services in a variety of non-patient care settings. Credit/no-credit only. Offered: AWSpS.
PHARMP 577 Advanced Pharmacy Practice Experience in Senior Care (6, max. 12) O'Sullivan Advanced pharmacy practice experience focusing on providing patientcentered care to patients in a senior or geriatric care setting. Applies therapeutic knowledge to assess and develop therapeutic plans in collaboration with other healthcare professionals, taking medication histories, monitoring patient progress, and providing drug information to professionals and patients. Offered: AWSpS.
PHARMP 578 Advanced Pharmacy Practice Experience Elective (1-6, max. 12) O'Sullivan Advanced pharmacy practice experience in patient or non-patient care settings. Credit/no-credit only. Offered: AWSpS.

PHARMP 581 Advanced Pharmacy Practice Experience in Inpatient/Acute Care General Medicine (9, max. 36) O'Sullivan Six week advanced pharmacy practice experience focusing on providing patient-centered care to patients in a general medicine care setting. Ap plies therapeutic knowledge to assess and develop therapeutic plans in collaboration with other healthcare professionals, taking medication histories, monitoring patient progress, and providing drug information to professionals and patients. Offered: AWSpS.
PHARMP 582 Advanced Pharmacy Practice Experience in Hospital or Health-System Pharmacy (9, max. 36) O'Sullivan Six week advanced pharmacy practice experience focusing on providing patient-centered care to patients in an acute care or other inpatient set ting. Applies therapeutic knowledge to assess and develop therapeutic plans in collaboration with other healthcare professionals, taking medication histories, monitoring patient progress, and providing drug information to professionals and patients. Offered: AWSpS.
PHARMP 583 Advanced Pharmacy Practice Experience in Ambulatory Care (9, max. 36) O'Sullivan Six week advanced pharmacy practice experience focusing on providing patient-centered care in a clinic-based setting. Applies therapeutic knowledge to assess and develop therapeutic plans in collaboration with other healthcare professionals, taking medication histories, monitoring patient progress, and providing drug information to professionals and patients. Offered: AWSpS.
PHARMP 584 Advanced Pharmacy Practice Experience in Community Pharmacy (9, max. 36) O'Sullivan Six week advanced pharmacy practice experience focusing on providing patient-centered care to patients in community-based setting. Applies therapeutic knowledge to assess and develop therapeutic plans in collaboration with other healthcare professionals, taking medication histories, monitoring patient progress, and providing drug information to professionals and patients. Offered: AWSpS.
PHARMP 585 Advanced Pharmacy Practice Experience in Patient Care (9, max. 27) O'Sullivan Six week advanced pharmacy practice experience focusing on providing patient-centered care to patients in a non-required setting. Applies therapeutic knowledge to assess and develop therapeutic plans in collaboration with other healthcare professionals, taking medication histories, monitoring patient progress, and providing drug information to professionals and patients. Offered: AWSpS.

PHARMP 586 Advanced Pharmacy Practice Experience in Non-Patient Care Settings (9, max. 18) O'Sullivan Six week advanced pharmacy practice experience focusing on providing pharmacy services in a variety of non-patient care settings. Offered: AWSpS.

PHARMP 587 Advanced Pharmacy Practice Experience in Senior Care (9, max. 18) O'Sullivan Six week advanced pharmacy practice experience focusing on providing patient-centered care to patients in a senior or geriatric care setting. Applies therapeutic knowledge to assess and develop therapeutic plans in collaboration with other healthcare professionals, taking medication histories, monitoring patient progress, and providing drug information to professionals and patients. Offered: AWSpS.

## Pharmacy Regulatory Affairs

PHRMRA 524 Introduction to Clinical Trials (3) Jonlin Introduces the major concepts under which clinical trials are designed to run. Focuses on the phases of clinical trials, the role of the Food and Drug Administration, Institutional Review Boards, the Code of Federal Regulations and ethical principles. Addresses study design and statistical concepts. Offered: A.
PHRMRA 525 Implementation and Conduct of Clinical Trials (3) Hammond Outlines the work of carrying out a clinical trial including the complex work of study initiation, issues of site and data managements, preparation of the final report and study close out, as well as the details that control the study conduct. Offered: W.
PHRMRA 526 Project Management and the Business of Clinical Trials (3) Hammon, Hayashi Addresses the business dimension of clinical trials. Addresses the principles of project management, planning, analysis, contingency and follow-up within the context of clinical trials that involve a large number of tasks and people responsible for parts of the overall study. Offered: Sp.

PHRMRA 527 International Regulatory Affairs (3) Hammond Develops an understanding of international differences in the regulation of design, manufacture, and post-marketing surveillance of medical products relative to U.S. Food and Drug Administration requirements. Prerequisite: PHARM 504. Offered: A.

PHRMRA 528 Medical Risk Analysis and Management (3) Loboda Examines the principles and application of risk management methods in the design, manufacture, and marketing of medical products. Offered: W.
PHRMRA 536 Skills for the Regulatory Affairs Professional (2) Feagin Covers essential skills in regulatory affairs and includes an overview of local medical products companies. Offered: A.
PHRMRA 545 Statistical Basis of Quality Assurance (3) Magee Applies statistical methods to medical products design, clinical evaluation, manufacturing, and post-marketing surveillance. Prerequisite: introductory statistics. Offered: Sp.
PHRMRA 546 Technical Writing for the Medical Products Industries (3) Hazlet Presents up-to-date information and strategies for effective technical communication within the medical product industries. Addresses the appropriate and correct use of the English language, information design, and the use of computer technology in producing professional documents. Emphasizes communicating technical information to a variety of stakeholders. Offered: A.
PHRMRA 547 Advanced Topics in Medical Products Regulation (2, max. 6) Feagin Addresses essential topics in medical products regulation. Employs a combination of lecture presentations, case studies, and participants' small group discussion to achieve practical outcomes for regulatory professionals. Offered: W.

PHRMRA 548 Biomedical Regulatory Affairs Practicum (1-9, max. 9) Feagin Provides a practical experience to ensure that participants are able to shepherd new medical products (drug, device, biologic) through regulatory, clinical, and quality assurance aspects. Includes a project and final report. Offered: AWSpS.
PHRMRA 550 Advanced Technical Writing for Biomedical Regulatory Affairs (2) Teal Further examines communications with attention to best written practices. Provides an intensive review of common editing and advanced strategies for crafting highly reliable and effective documentation. Credit/no-credit only. Prerequisite: PHRMRA 546 or permission of instructor. Offered: Sp.
PHRMRA 554 Advanced Medical Products Regulation I (2)
Feagin Provides an in-depth exploration of regulatory issues primarily related to non-clinical and clinical aspects of medical product development. Offered: A.

## PHRMRA 555 Advanced Medical Products Regulation II

 (2) Feagin Provides an in-depth exploration of regulatory issues primarily related to manufacturing, postmarketing concerns, and FDA interactions. Offered: W.PHRMRA 560 Short Course in Multinational Biomedical Regulatory Affairs (2, max. 30) Hazlet Presents three medical products registration countries or groupings (for instance, European Union, World Health Organization). Locale based on program impact, unique features, or recent or controversial regulatory issues.
PHRMRA 561 Biotech Project Management - Project Planning and Organization (3-) Schuelein Focuses on management of the discovery, testing, and manufacturing processes in highly regulated environments, emphasizing the unique project manage challenges of the medical products industry. Credit/no-credit only. First in a sequence of two. Offered: ASp.

PHRMRA 562 Biotech Project Management - Project Execution, Monitoring, and Control (-3) Schuelein Focuses on management of the discovery, testing, and manufacturing processes in highly regulated environments, emphasizing the unique project manage challenges of the medical products industry. Credit/ no- credit only. Second in a sequence of two. Offered: ASp.
PHRMRA 595 Special Topics in Regulation (1-6, max. 24) Offered: AWSpS.

The Daniel J. Evans School of Public Affairs is a graduate professional school providing education and research for current and future leaders in pursuing challenging publicservice careers in government, nonprofit, or private-sector organizations. To address the educational needs and professional interests of individuals at different stages of their careers, the school offers the Master of Public Administration (MPA), the Executive Master of Public Administration (Executive MPA), Peace Corps Master's International, and the PhD in Public Policy and Management.
Master's-level programs enable students to acquire the policy analysis techniques, management knowledge, problem-solving skills, and political acumen required for effective leadership across sector boundaries and in regional, national, and international policy. MPA graduates hold leadership positions such as mayors and city managers; local and regional government administrators; foreign service officers; senior military and public safety positions; assistants to elected officials; analysts with budget offices, legislative staff units, and city councils; directors of social service agencies; leaders and managers of nonprofit organizations; and administrators of arts organizations. In addition, a number of alumni are employed in private sector positions involving substantial contact with public agencies.

## The PhD program focuses on research

 that prepares students with a strong interdisciplinary perspective and a solidfoundation of theory and methodology in policy analysis and management. The PhD program prepares students for successful careers as faculty in university programs in public policy and management, and in research positions in the public and nonprofit sectors.

## Master of Public Administration

## Evans School MPA Program

Evans School MPA is designed for present and future leaders of the public, private, and nonprofit sectors, emphasizing broad-based public policy analysis and management knowledge. Degree requirements for our program are flexible and can be tailored for students who are early in their careers, as well as those who have additional years of progressively responsible work experience. While most students enroll full-time and generally take two years to
complete their degree, flexible evening and part-time options are also available.

## Degree Requirements

72 credits, with a minimum 60 credits from within the Evans School, as follows:

1. Core Curriculum (36 credits):
a. Managing Politics and the Policy Process (PB AF 511)
b. Managing Organizational Performance (PB AF 512)
c. Public Policy Analysis (PB AF 513)
d. Microeconomics (PB AF 516, PB AF 517)
e. Public Budgeting and Financial Management (PB AF 522)
f. Program Evaluation (PB AF 526)
g. Quantitative Analisys (PB AF 527, PB AF 528)
2. Concentrated study in a field of specialization, three courses minimum (12 credits)
3. Public affairs electives, two-course minimum (8 credits)
4. An internship (minimum 400 non-credit work hours)
5. 8-credit degree project (PB AF 608) or Public Service Clinics (PB AF 606, PB AF 607)

For full program details, visit evans.washington.edu/cours-es-degrees/mpa/

## Executive MPA Program

The Executive MPA program is a cohort-based, modular program designed to meet the needs of senior-level managers and executives with 10 or more years of progressively responsible, professional experience (typically directors, senior managers in or near leadership positions, and highlevel technical staff). Students must successfully complete 45 credits of coursework within a specially designed curriculum combining one intensive week, several weekend modules and numerous online assignments. Intensive learning emphasizes a variety of critical concepts in executive leadership, including: performance management and accountability; change management; communication skills; ethics and leadership; executive decision-making; human resource management; strategic financial management; and strategic leadership. Emphasis is on decision making, practical application, and integration of learning with experience. The program relies on a cohort model, so entering students must begin their studies with a sevenday residential retreat. Students complete the program in approximately 18 months.

## Degree Requirements

45 credits, as follows:

1. One "Foundation Week" in Strategic Leadership and Performance Challenges: PA EX 501
2. Twelve three-day weekend core modules in Executive Decision Making (PA EX 502), Strategic Financial Management (PA EX 503, PA EX 505), Executive Economics (PA EX 504), Mission Integrity (PA EX 506), Values and Personal Integrity (PA EX 507), Leading for Human Development (PA EX 508), Leading Across Boundaries (PA EX 509), Negotiation and Mediation (PA EX 510), and Strategic Communication (PA EX 511), Strategic Policy Making (PA EX 512), and Leading for a Legacy (PA EX 513)
3. Online assignments
4. Degree project not required

For full program details, visit evans.washington.edu/exec-utive-education/mpa.

## Peace Corps Master's International

Peace Corps Master's International (PCMI) students must successfully complete 51 credits of coursework along with two years of Peace Corps service in international nongov-
ernmental organization development and a degree project. PCMI students generally complete all core courses in three quarters prior to leaving for Peace Corps service; upon returning to UW, students complete their coursework and a final degree project in one or two quarters. While on assignment overseas, students remain in touch with their faculty adviser and a returned volunteer from the Evans School. PCMI students generally create a plan of study focused on international nongovernmental management or other international management and policy issues, such as environmental or health policy. Students complete the program in approximately three to three-and-a-half years.

## Degree Requirements

51 credits, as follows:

1. Core curriculum:
a. Managing Politics and the Policy Process (PB AF 511)
b. Managing Organizational Performance (PB AF 512)
c. Public Policy Analysis (PB AF 513)
d. Microeconomics (PB AF 516, PB AF 517)
e. Public Budgeting and Financial Management (PB AF 522)
f. Program Evaluation (PB AF 526 or PB AF 536)
g. Quantitative Analysis (PB AF 527, PB AF 528)
2. Electives (including 9 credits of restricted electives: 3 credits each in economics, analysis, and values) (17 credits)
3. Two years of Peace Corps service
4. 6-credit degree project related to Peace Corps fieldwork

For full program details, visit evans.washington.edu/cours-es-degrees/mpa/peace-corps.

## Doctor of Philosophy

The PhD in Public Policy and Management is a research program that prepares its graduates for careers as faculty in university programs in public policy and management, and for research positions in the public and non-profit sectors. The interdisciplinary curriculum draws broadly on theoretical and methodological foundations in policy analysis and management. Substantive policy areas reflect such diverse faculty research agendas as education and social policy, environmental policy, international development, nonprofit management, and urban policy.
This highly competitive and selective program admits three to five excellent applicants each year, and provides funding and mentoring to help them succeed. The program aims to be one of the top programs in the field of public policy and management, serving not only the Pacific Northwest, but the national and the global market for scholars in this field.

## Degree Requirements

90 credits, as follows:
The program consists of two years, or six full-time academic quarters, of coursework and examinations, research, and the writing of a dissertation beyond the two years.
The first-year core curriculum prepares doctoral students to undertake independent scholarship in public policy and management: Research Design (PPM 502), Institutional Perspectives on Management and Leadership (PPM 504), Microeconomics (PPM 506), Public Policy Processes (PPM 508), Policy Analysis and Evaluation (PPM 510), Quantitative Methods Sequence (SOC 505 and SOC 506 or ECON 580 and ECON 581), and a qualifying examination.
In the second year, doctoral students increase their analytic and methodological skills. Requirements include Data Analysis Practicum (PPM 512) at least one qualitative methods and one additional quantitative methods course, proposed by the student and approved by the PhD Program Coordinator. Students are encouraged to consider obtaining a statistics certificate from CSSS. At least three cours
es in a substantive policy field or in management studies are required in this year as well.
Beyond the second year, requirements include: a general examination/dissertation proposal (advancing to candidacy), preparation of a dissertation of original research, and a final examination (dissertation defense).

Students are expected to complete the degree in four to five years, depending on the individual student. Prior coursework in calculus is expected before matriculation.

For full program details, visit: evans.washington.edu/ courses-degrees/phd

## Concurrent Degree Programs

The Evans School offers the MPA degree concurrently with the following five programs: Master of Urban Planning (MUP), Master of Arts in International Studies (MAIS), Master of Public Health (MPH), Master of Science in Forest Resources (MS), Juris Doctor (JD). Concurrent degree applicants must apply through, and be accepted into, both programs. Admission criteria are those of each individual program.

## Admission Requirements

Admission to the Evans School is highly competitive and selective, and is based primarily on the applicant's demonstrated ability to complete the graduate program while sustaining a high level of achievement. The School's Admissions Committee reviews previous undergraduate or graduate (if applicable) coursework, grades and GRE test scores, and gives considerable weight to professional experience, previous academic awards or scholarships, volunteer work, letters of recommendation, and the applicant's writing skills as demonstrated in a personal essay. The School admits students annually for autumn quarter.

## General Requirements

Applicants must hold a baccalaureate degree from an accredited college or university in the United States, or its equivalent from a foreign institution, and have achieved a minimum grade point average of 3.0 on the last 90 -quarter (or 60 semester) credits of undergraduate work.
Graduate Record Examination (GRE) general test scores are required for admission to all programs except the Executive Master of Public Administration. TOEFL scores are required for international students only.
Visit evans.washington.edu/courses-degrees/mpa/concurrent for specific requirements of each program.

## Application Deadlines

Because of class-size limitations in our competitive programs, applicants are encouraged to submit their applications as early as possible.
Application materials to the MPA program and to the Peace Corps Master's International program must be received online and postmarked by January 15 for priority consideration. Applications received after this date are accepted for review on a space available basis until March 1.
Application materials for the Executive MPA degree program must be received online and postmarked by May 1. Applications received after this date are accepted for review on a space-available basis until July 1.

Application materials for the PhD program in public policy and management must be submitted and postmarked by February 1. Applications postmarked after February 1st are not reviewed.
Applicants to all programs must also apply to the UW Graduate Admissions Office by the specific program deadlines above.

## Financial Aid

For further information, visit: evans.washington.edu/pro-spective-students/financial-aid.

## Evans School Fellowships

The Evans School offers several fellowships to entering students each year from the School's endowed fellowship funds. These typically consist of $\$ 4000-\$ 5000$ stipends awarded primarily on the basis of academic achievement and/or excellence in public service. Applicants interested in school fellowships must submit the Evans School Financial Aid Form with their Evans School application.

- Daniel J. Evans Endowment for Excellence in Public Service: Fellowships support students aspiring to excellence in public service.
- Nancy Bell Evans Endowment for Excellence in Nonprofit Service: Fellowships support students who aspire to excellence in nonprofit service and philanthropy.
- Jon Brock Endowed Fellowship: Supports outstanding master's students studying conflict resolution and management in public and nonprofit sectors.
- Elaine Chang Endowed Fellowship: Provides support to outstanding students pursuing studies in international peace and development.
- Brewster C. Denny Endowed Fellowship: Supports students committed to excellence in public service.
- Robert J. and Micki E. Flowers Endowed Fellowship: Provides support to outstanding students from diverse backgrounds pursuing careers in public and nonprofit service.
- Margaret T. Gordon Endowed Fellowship: Supports outstanding Evans School students.
- Henry M. Jackson Endowed Fellowship: Supports students pursuing careers in environmental policy and natural resources management.
- Morton Kroll Endowed Fellowship: Provides support to top students pursuing arts management internships.
- Robert J. Lavoie Fellowship: Provides funds to outstanding students preparing to work in public service.
- Governor Gary Locke Endowed Fellowship: Supports Asian/Pacific Islander students pursuing studies in public service and politics.
- Hubert G. Locke Endowed Fellowship: Provides support for students pursuing internships in nonprofit organizations devoted to social justice issues.
- George A. Shipman Endowed Fellowship: Supports outstanding students pursuing careers in public service.
- Evans School Alumni Endowed Fellowship: Supports recruiting of outstanding students.
- Home Street Bank Fellowship: Supports an outstanding graduate student pursuing a career in public affairs.
- Scottish Rite Scholarship Foundation of Washington PCMI Fellowship: Provides a stipend to an entering student accepted to the Peace Corps Master's International degree program.
- William Shelton Fellowships: Funded by the Scottish Rite Scholarship Foundation of Washington to promote better government through education.

## Assistantships

The Evans School offers many research, teaching, and staff assistantship positions each year. Typically 10 to 20 hours per week, these positions include a monthly stipend, benefits, paid tuition, and health insurance. Hiring is competitive. Most announcements are posted in the spring, or as positions become available, on the Evans School Intranet.
Research assistantships are open to first- and secondyear MPA students and to PhD students. First-year MPA students are eligible to apply upon acceptance. Students typically work on grant-funded studies, special conferences, and public policy colloquia series sponsored by the school's research centers. Research assistants are exposed to a wide range of policy issues, including regional growth management, international trade, state and fed-
eral entitlement programs, health-and-human-services delivery, and education reform. In addition, some research fellowships are offered each year to highly qualified applicants during the admission process. These fellowships guarantee a paid research assistantship for the first year of study and tuition support.
Teaching and staff assistantships are reserved for second year students and PhD students. Teaching assistants are hired for most core courses. Staff assistantships include such positions as coordinators for international programs, peer advisers, public service clinic/career services coordinators, and computer lab managers.

## Work-Study Status

When hiring for hourly positions, the school often gives preference to students possessing work-study status. Work-study positions have included research assistance for faculty and grants, and staff support for the school's centers. Work-study status is one of several forms of aid granted by the University of Washington Financial Aid Office.

## FACILITIES

## Research Facilities

The school promotes the application of research to realworld policy contexts and its integration with the teaching enterprise. In addition to supporting the independent research of faculty members, the school houses several research and policy centers focusing on regional development, family and child welfare, poverty alleviation, nonprofit management and leadership, international development, consensus building and conflict resolution, and education reform.
These centers shape students' educational experiences by offering research assistantships, special events, career networking, degree-project advising, teaching, and guest lecturing in classes taught by center faculty. The availability of research assistantships is based on current projects.

## Human Services Policy Center (HSPC)

The center pairs applied analytic research, preventive approaches, and promotion of comprehensive policies to improve the lives of children, families, and communities, especially those who are disadvantaged. Public communications and strategic partnerships ensure that the HSPC's research affects policy. Core programs include educating and caring for young children; communicating about policies for children and families; and profiling child well being (Washington Kids Count).

## Marc Lindenberg Center for Humanitarian <br> Action, International Development, and Global Citizenship

The Lindenberg Center prepares students and faculty for life and work in a global society through partnerships that expand teaching, research, and service opportunities in humanitarian action, international development, and global citizenship. The center's programs enable students to understand connections between poverty, hunger, health, and human security, and equip them with the skills and knowledge to create a better, more humane world. In partnership with international organizations, the center conducts research and multi-disciplinary academic training programs that prepare students for work in emergency and humanitarian relief and international development. The center also promotes responsible global citizenship through exchanges with developing countries, internationalization of curriculum, and collaboration with K-12 schools to change the way students see the world and think about global issues.

## Nancy Bell Evans Center on Nonprofit Leadership and Philanthropy

The center enhances the understanding and vitality of the nonprofit sector through research, education, and community engagement. The center conducts research of importance to scholars, policy-makers, and practitioners. It also strives to connect scholars doing research with practitioners in the field. A special research focus is the changing service and policy roles of nonprofit organizations, particularly in the context of devolution, privatization, and globalization. The center serves as the hub of nonprofit studies across the UW campus and, in conjunction with the Cascade Center for Public Service, provides growth and learning opportunities for senior-level nonprofit professionals in the Pacific Northwest.

## The William D. Ruckelshaus Center

The William D. Ruckelshaus Center, formerly known as the Policy Consensus Center, is a joint venture between the UW and WSU. The center draws together representatives from a wide network of agencies, advocacy groups, businesses, agribusiness, tribal governments, university researchers, and others to find long-term solutions to policy conflicts in Washington State, enhancing the region's capacity for effective, sustainable policy making and problem solving. Policy areas range from natural resources and economic development to labor issues in the business community and elsewhere. The center's activities focus on four major areas: providing an objective forum for conflict resolution or policy enhancement; building capacities through assessment, training, and consulting to broaden stakeholders' perspectives and improve collaboration; researching and disseminating best practices in conflict resolution and policy problem solving; and closing the gap between science and policy.

## West Coast Poverty Center

This center serves as a regional hub for research, education, and policy analysis on the causes and consequences of poverty in the west coast states. At the UW, the center is a collaborative venture of the Evans School, the School of Social Work, and the College of Arts and Sciences, and is the newest of three regional poverty centers funded by the U.S. Department of Health and Human Services. The center fosters opportunities for cross-disciplinary exchanges and collaboration among poverty researchers and practitioners. It supports research on a broad range of povertyrelated topics, such as labor market changes and consequences for economic security and social well-being; new patterns of work and family life, including transformations in family formation, employment, and care-giving arrangements for parents and children; and demographic trends and implications for poverty and public policy. Key activities include awarding grants to established and emerging poverty scholars and doctoral students; hosting seminars and research conferences on poverty and public policy; conducting outreach, dissemination, and dialogue with policymakers and practitioners; and mentoring the next generation of poverty scholars and practitioners.

## Executive Training, Civic Engagement, and Outreach

## Cascade Center for Public Service and Leadership

The Cascade Center, a public and nonprofit leadership training unit, provides executive and mid-level public and nonprofit sector leaders professional development opportunities to strengthen their management skills. A diverse complement of two-day, three-day, and five-day management courses, as well as a two-week executive program, helps meet a wide range of management training needs in the Northwest and the United States.

Cascade Center courses are offered at the UW campus in Seattle. With prior permission, traditional and mid-career MPA students may apply for a maximum of 12 elective credits to be waived from their degree requirements upon completion of Cascade courses, with approval from their adviser. Executive MPA students may apply for up to nine elective credits to be waived from their degree program, with approval from their adviser. Cascade courses are not graded and participants do not earn academic credits. Rather, the Evans School may accept completed Cascade coursework in lieu of required elective credit hours.

## Civic Engagement

An important convener of public policy deliberations in the Puget Sound region, the Evans School provides a neutral forum in which leading scholars and practitioners can talk about practical solutions to emerging policy issues. Groups wanting a university partner in public events often turn to the Evans School. Through strategic alliances, the school attracts many people to engage in dialogue with faculty, students, and the greater policy community. Public lectures, conference, symposia, and panel discussions help students enrich their policy studies beyond the classroom. These include the Daniel J. Evans Lessons in Leadership Seminars, the Dael L. Wolfle Memorial Lecture in Science and Public Policy, the Betty Jane Narver Lecture on Women in Public Policy, the Civic Engagement for the Twenty-First Century Seminar Series, the Forum at the Evans School, and the quarterly Dean's Forum.
In addition, through service on commissions, organizational boards, and other means, Evans School professors and students actively assist governments, NGOs, nonprofits, community organizations, and companies to improve society in the United States and abroad. Whether through public service clinics or internships, trainings, or volunteer service projects, students can actively engage their knowledge in serving the public good.

## Electronic Hallway

The Electronic Hallway, hallway.evans.washington.edu, is an internationally recognized, online resource for public affairs teaching and curriculum development. It supports the Evans School teaching mission and distributes cases and skill exercises to educators in public policy and management.

## COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations.
PB AF 355 Special Topics in Nonprofits (3-4, max. 12) Covers various topics regarding nonprofit essentials.
PB AF 403 Professional Leadership (4) Cultivates practical skills required to lead within various organizational contexts: managerial strategies for public, nonprofit, and business organizations are developed through case studies and guest speakers. Focuses on analytical and ethical approaches to problem solving and the communication skills needed for effective leadership in any career.
PB AF 499 Topics in Public Policy (3-5, max. 6) I\&S Examines selected issues of importance in all areas of public policy. Focus on in-depth analysis of vital public policy issues and the integration of economic, political, and administrative perspectives on them. Offered: jointly with POL S 404.
PB AF 501 Legislative Relations (3/4) Studies role of legislative bodies in American public policy making. Builds on case studies and focuses on tactics, constraints, and options involved in working within a legislative process to achieve public policy goals.
PB AF 503 Executive Leadership (3/4) Nature of executive life in the public sector, the function of leadership in implementing, making, and changing policy.

Leadership styles, the relation of leadership to its constituencies and communities.
PB AF 504 Leadership Ethics in the Public Interest (3/4) Addresses the moral challenges facing leaders in the public and nonprofit sectors. Examines the values and virtues important to sustained ethical leadership as well as strategies to build strong institutional cultures and support ethical practices in institutions.
PB AF 505 The Law of Public Administration (3) Legal framework of public administrative action in the United States, emphasizing constitutional requirements; operation of the administrative process; management of personnel, funds, and contracts; and judicial review of administrative activity.
PB AF 506 Ethics and Public Policy (3/4) Teaches students to identify moral issues in public life. Special focus on the integration of moral concerns into public discussion in a manner which contributes to good policy and does not polarize issues. Discusses moral and political theory by focusing on contemporary cases and issues.
PB AF 507 Mediation and Negotiation as Instruments of Public Management and Policy-Making (3/4) Possibilities offered by mediation and negotiation methods using a mixture of cases, readings, discussions, lectures, and guest speakers. Use of negotiation and mediation techniques to resolve disputes and disagreements over public-policy issues.
PB AF 508 Management Approaches to Service Delivery (3-4)
PB AF 509 Managing People in Public and Nonprofit Agencies (3/4) Emphasizes the role of the program manager rather than that of the personnel officer. Managing people within a variety of programmatic, bureaucratic, and political settings. Case studies form basis of class discussion, assignments.
PB AF 510 Foundations of Public Service in American Democracy (1) Discusses the role of public service in the United States through examination of historical and institutional foundations of the U.S. political regime. Pays special attention to the structures of government and constitutional values and conflicts at the heart of the political system.
PB AF 511 Managing Politics and the Policy Process (4) Examines broad aspects of organizational life and orients students to key internal and external challenges and opportunities of managing public and nonprofit organizations. Main topics include organizational mission, values, communication, culture, organizational environment and the policy process, legislative-executive relations, interest group advocacy, and media relations.
PB AF 512 Managing Organizational Performance (4) Addresses questions of organizational design, personnel, and operations management to equip students with skills to perform effectively in mission-driven organizations. Core topics include organizational design, inter-organizational networks, human resources and staff management, improving service delivery and production flows, measuring and managing for performance, and ethical leadership.
PB AF 513 Public Policy Analysis (4) Production and use of analysis to support public policy decisions. Defining problems, devising alternative solutions, clarifying stakes in choices, predicting impacts of choices. Skills developed by working on specific policy problems. Assumes familiarity with statistics, microeconomic theory, and institutions and processes of American government. Prerequisite: PB AF 516 or permission of instructor.
PB AF 514 Psychology for Policy Analysis (3/4) Examines basic concepts in social psychology, judgment and decision making, and behavioral economics.

Explores how these concepts can be applied to the design, implementation, and evaluation of successful policy.

PB AF 515 Decision Making for Public Managers (3) Considers decision making from normative, prescriptive, and descriptive perspectives. Emphasizes individual decision making, with some discussion of organizational decision practice. Focuses on decision analysis; presents tools for structuring decisions; and considers the role of analysis as a basis for negotiation.

PB AF 516 Economics for Policy Analysis and Management I (4) Ways in which microeconomic analysis can contribute to the analysis of public sector issues. Supply and demand, consumer and firm behavior, competitive and monopoly markets, income distribution, market failure, government intervention. Policy applications of theory. Prerequisite: elementary economics.

PB AF 517 Economics for Policy Analysis and Management II (4) Serves to deepen student understanding of microeconomic theory and develop skills in applying it to public policy and management issues. Prerequisite: PB AF 516.

PB AF 518 Applied Cost Benefit Analysis (3/4) Develops familiarity through problems and applications. Stresses techniques of use.

PB AF 519 Law and Economics (2-4, max. 4) Offered: jointly with LAW A 561.
PB AF 520 Intergovernmental Relations (3) Comparative study of the issues involved in implementing government programs across multiple jurisdictions. Issues of accountability, feasibility, politics, and constitutional limits are examined by focusing upon various methods used to implement programs across federal, state, regional, and international jurisdictions.

PB AF 521 Water Seminar (1, max. 6) Steinmann Weekly seminars covering water resources and watershed topics with lectures from scientists on and off campus. Credit/no-credit only. Offered: jointly with SEFS 529/FISH 529; AWSp.

PB AF 522 Financial Management and Budgeting (4) An introduction to financial and management accouting, and an overview of public and nonprofit budgeting systems. Covers tools and techniques for budget analysis and the use of financial information in managerial decision making.

PB AF 523 Advanced Budgeting in the Public Sector (3-4) Covers more advanced topics in governmental budgeting. Provides an overview of the functions, expenditures, and revenues of federal, state, and local governments. Prerequisite: PB AF 522.

PB AF 524 Public Sector Financing (3-4) Dively Covers financial management in public agencies, with the primary focus on state and local government. Prerequisite: PB AF 522.
PB AF 525 Qualitative Methods for Policy Analysis (3/4) Reviews qualitative research methods developed in the social sciences, exposure to writings from the field, opportunities to practice fieldwork, and feedback on a proposed study that employs qualitative methods.
PB AF 526 Program Evaluation (3/4) Theory, practice, and politics of evaluation, from simple feedback mechanisms to evaluation of large-scale ongoing programs and social experiments. Emphasis on applications of experimental and quasi-experimental evaluation. Case studies illustrate various types of evaluation. Prerequisite: PB AF 527
PB AF 527 Quantitative Analysis I (4) Two-quarter sequence explores how to formulate research questions, gain experience with conducting research, and learn how to assess which statistical tools or
research methods are appropriate to answer different types of policy or management questions. Covers probability, descriptive statistics, hypothesis testing, and confidence intervals. Prerequisite: graduate status in School of Public Affairs or permission of instructor
PB AF 528 Quantitative Analysis II (4) Second quarter of a two-quarter sequence aimed at helping students become informed users and critical consumers of research and statistical analysis. Combines material on research design and data collection methods with tools for multivariate analysis. The multivariate analysis methods include correlation and an introduction to multivariate regression. Prerequisite: PB AF 527.
PB AF 529 Advanced Multivariate Analysis (3/4) Klawitter Prepares students for advanced work with multivariate methods in program evaluation and policy analysis. Includes a data project that results in a professional quality product; reading examples of professional work and presentations of methods and results. Prerequisite; PB AF 528.
PB AF 530 International Affairs (3) Provides a broad understanding of international issues and United States policy. Students explore U.S. foreign policy and theories of major international actors in international trade, security, and strategic concerns, refugee policy, conflict resolution, development assistance, and the environment. Offered: jointly with POL S 534/JSIS B 534.
PB AF 531 Development Management in the Twenty-First Century (3/4) Addresses organization, administration and evaluation in governmental and non-governmental agencies involved in development efforts. Students examine development strategies, alternative management approaches, and management skills such as budgeting, finance, human resource development and program evaluation. Other topics include communication, expatriate/local power imbalances, decentralization, community involvement, culture, and personnel issues.
PB AF 532 International Development Capstone (3/4) Examines different policy environments leaders must address to achieve policy in comparative and international settings. Includes strategies, tactics, and frameworks needed to initiate and sustain policy dealing with authoritarian, democratic, liberal, and one-party states. Focuses on pressures from the international system and issues such as globalization.
PB AF 533 Economics of International Development (3/4) Introduction to sustainable international development and its physical, human, social, and natural capital components. Students examine the new growth theories and evidence, and their relationship to democracy, trade, and other policies and institutions. Topics include income distribution, poverty, and the environment.

PB AF 534 Rural Development: Economics and Policy (3/4) Survey of current microeconomic questions related to well-being of rural people in developing countries. Strengthens the ability to design appropriate policy tools for rural development by enhancing understanding of economic theory and its applications to rural households and by reviewing findings.
PB AF 535 Seminar in American Foreign Policy (3) Examines how the U.S. foreign policy process works, emphasizing formation, content, and implementation of post-Cold War U.S. foreign and national security policy, with emphasis on current foreign and national security policy.
PB AF 536 Program Evaluation in the Developing World (3/4) Gugerty Provides an overview of issues in the analysis and evaluation of development projects focusing on the developing world with three themes:
understanding and analyzing development pro grams; understanding and using the logic of impact assessment; identifying practical, field-based tools for monitoring and evaluation in low resource environments.

PB AF 537 Topics in International Affairs (3-5, max. 12) Examines topics of interest and import in foreign policy and international affairs. Focuses on the in-depth analysis of issues and the integration of economic, institutional, and political dimensions

PB AF 538 International Organizations and Ocean Management (3) Survey of the manner in which international regimes and organizations attempt to manage and regulate the uses of the ocean. Primary emphasis is on the analysis of the effectiveness of regimes and of processes that support or constrain these organizations. Prerequisite: SMEA 500 or permission of instructor. Offered: jointly with SMEA 507.

PB AF 539 Values in International Development (3) Examines and clarifies international development values, including underlying theories of justice on which they seem to be built, the ways in which they are justified to stakeholders, the general public, and impacts they have upon people, especially the poorest and most vulnerable.

PB AF 540 African Development Challenges (3) Provides an introduction to the political economy of develop ment in sub-Saharan Africa. Focuses on understanding various theories about the underlying causes of current African development challenges and on analyzing and evaluating various proposals and policies for addressing these challenges.
PB AF 541 The Role of Nongovernmental Organizations in International Development (3) Explores some of the major issues faced by nongovernmental organizations (NGOs) working on development issues worldwide. Examines organizational forms, NGO-state relationships, inter-organizational relationships, and the relationship of NGOs to beneficiaries.
PB AF 542 The Law and Economics of Regulation (3/4) Examines the principles and practices of regulatory environments
PB AF 544 Land Use and Transportation Policy (3/4) Provides an historical and theoretical context for a fuller understanding of federal and local policies regarding land use and transportation as well as a range of public policy options which influence how metropolitan areas grow and how people move around.
PB AF 545 Public Leadership Seminars (3) Provides a forum to reflect on the major dimensions of modern managerial leadership. Includes a team project work ing with outside clients or organizations.

PB AF 546 Professional Development: Hubert H. Humphrey Seminar (1, max. 3) Engages students as global citizens, discussing global issues affecting students' home environments. Utilizes the diversity in professional backgrounds and regional experiences of participants. Provides an introduction to U.S. government at the federal, state, and local levels, designed to enhance students' ability to participate and to create appropriate professional affiliations. Credit/ no-credit only.

PB AF 547 Water Resource Economics (4) Explores the economics of water resources, including static and dynamic efficiency for consumers and producers and other topics concerned with water quality. Explores effects of climate change on water resources, and economic approaches to mitigate these effects.
PB AF 548 Management and Public Capital Markets (4) Explores the new debt management environment for financial managers of public organizations, and the meaning and value of active public debt manage-
ment, including the analytical tools and accountability issues that characterize responsible management.
PB AF 550 Management of Nonprofit Organizations (3/4) Focuses upon the roles played by nonprofit organizations in meeting the public good. Examines internal management issues such as structure, budget, and operations; and external issues such as board functions, legal status, marketing, media relations, and fund-raising.
PB AF 551 Nonprofit Management Capstone (3/4) Explores the means through which nonprofit organizations establish strategies to expand their impact, sustain their organizations, and shape the future, and the steps through which they develop effective new programs to implement those strategies.
PB AF 552 Public Arts Policy and Management (3) Role of government in arts. Range of public support at federal, state, and local levels; reasons for its development and viability. Nature, evolution, functions of public arts agencies in implementing arts policy; relation of such agencies to their constituencies. Seattle, King County, and Washington state serve as case studies.

PB AF 553 Nonprofit Financial Management (3/4) Provides an understanding of the financial framework on nonprofit organizations. Focuses on the financial principles of management of nonprofits, with an emphasis on financial reporting, strategic financial planning, managerial decision-making and budgeting.
PB AF 554 Nonprofit Organizations and Public Policy (3) Examines the changing role of nonprofit organizations in American society. Selected policy topics include privatization, for-profit/nonprofit competition, public-private partnerships, tax policy, and new sources of revenues.
PB AF 555 Topics in Nonprofit Management (3-5, max. 12) Examines various topics of public importance in nonprofit management. Integrates the political, managerial, and economic dimensions of these issues.
PB AF 556 Public-Private Partnerships (3-4) Provides a comprehensive overview and examination of partnerships and their implications for public policy and nonprofit and public management. Examines the diverse array of partnerships in the UW and abroad and the management challenges involved in the development and implementation of different partnership strategies.

PB AF 557 Management and Public Capital Markets (4) Marlowe Covers the institutions and dynamics of the public capital market; how the structure of that market shapes managers' choices about how to design, sell, and manage debt obligations; and the analytical tools managers and investors use to evaluate those choices and their potential consequences.
PB AF 560 Inequality, Governance, and Policy in the Metropolitan Region (3/4) Explores national/local urban policy concerning the major problems confronting cities and metropolitan regions today. Economic globalization, income inequality, and metropolitan decentralization shape the urban agenda, the context for urban policy, and the analytic focus of the course. A project allows the exploration of strategies for intervention. Offered: jointly with URBDP 560.
PB AF 561 Urban Economics and Public Policy (3/4) Examines the rationale for and consequences of public intervention in urban land, housing, and transportation markets through land use regulations such as zoning and urban growth boundaries, infrastructure investments, and fiscal policies to manage urban development and traffic. Prerequisite: PB AF 516 or equivalent. Offered: jointly with URBDP 561.
PB AF 562 Introduction to Neighborhood Planning and Community Development (3) Provides introduction to
basic practices in neighborhood planning and community development, including theoretical/historical bases; developing neighborhood plans/projects; indicators and evaluation of neighborhood quality; community participation; institutional framework, ethical dilemmas, and professional roles. Addresses current issues, including Seattle's experience, NIMBYism, security, neighborhood character, housing segregation, environmental racism. Offered: jointly with URBDP 562.
PB AF 564 Housing and Social Policy (3) Focuses on the problem of affordable housing and its interrelationships with social problems in the United States.
PB AF 565 Topics in Urban Affairs (3-5, max. 12) Examines various topics of public importance in urban policy. Integrates the political, managerial, and economic dimensions of these issues.
PB AF 566 Community Economic Development (3/4) Explores the relationship between local community economic development, environmental sustainability, cultural vitality, and trend in regional and national economics, with specific focus on how to make community and economic investments that yield development outcomes that contribute to economic, equitable, environmental, and cultural vitality.
PB AF 567 Community Engagement and Urban Governance (3/4) Investigates interactions between citizen participation and efforts to measure and improve policy and program performance in large cities. Develops analytic frameworks and practical strategies for sustaining and enhancing participation and performance.
PB AF 568 Social Justice and Public Policy (3/4) Examines the values of social justice that motivate action in the public arena; thinks about how those values create concerns and solutions; and explores issues of equity and liberty, of balancing the rights of the individual, the common good, and redistribution.
PB AF 569 Race and Public Policy (3-4) Analyzes the way in which the persistent problem of race is expressed in the formation and implementation of social and public policy.
PB AF 570 Foundations of Social Policy (3) Examines major institutions and programs in social policy including: income maintenance, social services, education, and healthcare. Focuses on American social policy with some attention to comparative welfare state development. Includes extensive discussion of different policy strategies to address social policy problems.
PB AF 571 Education, The Workforce, and Public Policy (3, max. 6) Examination of policy issues involving education, training, the economy, and the development of the nation's human resources. Relationship between education, training, and work, underutilized workers, race and gender discrimination issues, and the role of education and training in economic development. Offered: jointly with EDLPS 563.
PB AF 572 Higher Education and Public Policy (3) Explores the nature of public polices affecting higher education, how these policies are made and influenced at both the federal and state levels, and the role of policy research and analysis, and several of the major current public policy problems and policy responses.
PB AF 573 Topics in Education and Social Policy (3-5, max. 12) Examines various issues of public importance in the areas of education and social policy. Focuses on in-depth analysis of relevant issues and the integration of the economic, administrative, and political dimensions of these issues.
PB AF 574 Economics of Race and Inequality in the United States (3/4) Covers the history of racial inequality
over the past century, theories of the causes, wage determination and discrimination in employment and pay, inequalities in education and human capital development, and residential segregation and its consequences. Discusses the effectiveness and limitations of policy response to racial inequality.
PB AF 576 Poverty and Anti-Poverty in the United States (3/4) Examines the nature and extent of poverty in the United States, its causes and consequences, and the antipoverty effects of public policies.
PB AF 577 Topics in Microfinance (3) Provides an overview of the basic issues and debates around microfinance. Students gain an analytical understanding of the opportunities and motivation for small scale financial services, and the limitations.
PB AF 578 Asset Building for Low Income Families (3/4) Explores assets and finances for low income families primarily in the United States. Identifies programs and policies targeted toward asset building and looks at evidence of their efficacy. Uses a multi-disciplinary perspective to examine the economic, social, and political contexts for these policies.
PB AF 579 Topics in Health Policy (4) McCann Introduces students to the ways in which the public health and healthcare systems are organized, financed, and delivered in the U.S. in concert with how national and state political institutions influence and reflect these systems leveraging current challenges to analyze past, present, and potential policy solutions. Offered: AWS.
PB AF 581 Information Technology and the Policy-Making Process (3) Demystifies information base for policy making in democracies. Examines theoretical and practical issues associated with information processing in the public sector. Considers role of new technologies in collecting, analyzing, and disseminating information with special attention to the relationship between these technologies and effective government service, public participation, and organizational accountability.
PB AF 582 News Media and Public Policy (3) Explores impacts of news coverage on public policy. Exposure to journalists' approaches to coverage of public affairs, as well as to strategies used by leaders of public/ nonprofit agencies to attract favorable coverage and minimize damaging coverage. Students learn techniques for assessing impacts of news coverage.
PB AF 583 Science, Technology, and Public Policy (4) Examines the relationship between the advancement of technical knowledge, the pace of technological change, and public policies designed to induce or respond to these development. Issues of policy formulation, administrative design, and future trends; applications include biotechnology, energy, information technology, global warming, robotics, national security, homeland security, and space exploration.
PB AF 585 Topics in Science, Technology, and Public Policy (3-5, max. 12) Examines relationship between advancement of technical knowledge and pace of technological change, and public policies to induce or respond to these trends. Generic issues of government research, development, and personnel training programs are addressed. Applications of policy issues involving biomedical, communications, energy, environmental, transportation, and weapons technologies.
PB AF 586 International Science and Technology Policy (3) Seminar is designed: first, to analyze the relationships between research and development policy, capabilities, and national technological strategies for advanced industrial and less-developed countries; second, to deal with the international implications of particular technologies as countries try to make
policy for them in regional and global organizations. Examples of specific technologies are chosen from such fields as space telecommunication, weather and climate modification, airline transportation, nuclear energy, and seabed exploitation.

PB AF 587 Water and Sanitation Policy in Economically Developing Countries (3/4) Examines the policy dimensions of providing water supply and sanitation services in developing countries.

PB AF 588 Environmental Risk Analysis (4) Examines a variety of frameworks and models of risk with respect to regulation, policy, and decision-making.

PB AF 589 Risk Assessment for Environmental Health Hazards (3/4) Context, methodologies, types of data, uncertainties and institutional arrangements for risk assessment. Both qualitative and quantitative approaches to the identification, characterization, and control of environmental hazards to health emphasized through didactic and case studies. Offered: jointly with CEE 560/ENV H 577.
PB AF 590 Environmental Policy Processes (3-4) Presents background to establish the need for environmental policy. Explores in a comparative manner, examining both successes and failures, various strategies that have been used or proposed to protect the environment. Offered: jointly with SEFS 592.
PB AF 591 Seminar in Resource Policy and Management (1) Introduction and orientation for concurrent degree program between the Evans School of Public Affairs and the School of Environmental and Forest Sciences. Examines research and literature on contemporary issues related to the integration of natural resource science, policy, and management, through discussion among faculty, students, and invited speakers. Offered: jointly with SEFS 591.
PB AF 592 Resource Policy and Administration (5) Study based on understanding of the actors, arenas, issues, and policy communities that form the context for policy development and implementation. Exploration of approaches to policy inquiry. Consideration of implications for both policy and management. Students develop a study design for course project. Offered: jointly with SEFS 571.
PB AF 593 Climate Change and Energy Policy (3-4) Energy policy formulation and implementation with emphasis on post-1973 developments. Energy conservation programs; changing roles of oil, coal, gas, nuclear, and solar energy; institutional, environmental, and equity considerations; government research and development programs.
PB AF 594 Economic Approaches to Environmental Management (3/4) Layton Examines the economic tools relevant to natural resource and environmental management. Tools are developed in the context of a series of resource problems, with an eye towards building intuition useful for addressing complex policy problems that do not fit neatly into textbook examples.
PB AF 595 Topics in Environmental Policy and Management (3-5, max. 12) Examines various topics of public importance in environmental policy and management. Integrates the political, managerial, and economic dimensions of these issues.
PB AF 596 Ethics and Values in Environmental and Natural Resource Policy (3) Explores environmental values and ethics and their relationship to the policy process. Includes content on value foundation of economic efficiency and its relationship to fairness, legal entitlements, duty to other creatures, and incommensurabilities in valuing goods. Current policy controversies are addressed.

PB AF 597 Role of Scientific Information in Environmental Decisions (3/4) Cullen Examines how science contrib-
utes to decisions that involve the natural environment; how science and scientists help frame debates and decisions; how scientific findings are incorporated into decision-making processes; how scientists and non-scientists deal with uncertainty about scientific questions.
PB AF 598 Administrative and Policy Skills Workshop (1-3, max.6) Teaches practical administrative, leadership, and analytic skills commonly required of managers and analysts in the public and nonprofit sectors. The workshops emphasize hands-on problem resolution, simulations, and actual practice.
PB AF 599 Special Topics (1-6, max. 15) Study and analysis of special topics in public affairs. Topics vary each quarter depending on curricular needs and interests of students and faculty.

PB AF 600 Independent Study or Research (*)
PB AF 605 Degree Project ([1-8]-, max. 8)
PB AF 606 Public Service Clinic ([3/4]-) Carlson Serves to meet the degree project requirement as part of the Evans School curriculum. Students work in a supportive environment facilitated by peer and faculty to connect the research, organizational change, and capacity-building needs of community organizations and public agencies.
PB AF 607 Public Service Clinic (-[3/4]) Carlson Serves to meet the degree project requirement as part of the Evans School curriculum. Students work in a supportive environment facilitated by peer and faculty to connect the research, organizational change, and capacity-building needs of community organizations and public agencies.
PB AF 608 Degree Project Seminar ([3-4]-, max. 8) Meets the degree project requirements as part of the Evans School curriculum. Students work in a supportive environment facilitated by peer and faculty to complete individual degree projects

# School of Public Health 

## Dean

Howard Frumkin

## F350 Health Sciences

The UW School of Public Health is dedicated to education to prepare outstanding, innovative, and diverse public health leaders and scientists; research to advance public health science and policies; and service to promote the health and well-being of communities locally, nationally, and globally. The School of Public Health emphasizes strong discipline-oriented academic programs, as well as programs that emphasize interdisciplinary collaboration.
The school has five departments: Biostatistics, Environmental and Occupational Health Sciences, Epidemiology, Global Health, and Health Services -- plus interdisciplinary programs that include health services administration, maternal and child health, nutritional sciences, pathobiology, and public health genetics.
Within these departments and program, the school offers the following degrees: Master of Public Health (MPH); Master of Science (MS); Master of Health Administration (MHA); Doctor of Philosophy (PhD); and bachelor's degrees in public health, environmental health (also a minor), and health informatics and health information management (HIHIM).

Concurrent degree programs with Anthropology, Dentistry, Foster School of Business, International Studies, Law, Medicine, Molecular and Cellular Biology, Nursing, Public Administration, and Social Work are also available.
Graduate certificate programs are offered in basic or advanced clinical research methods (Epidemiology), emergency preparedness and response (Health Services), global health (Global Health), health management (Health Services), health policy (Health Services), HIV and STIs (Global Health), maternal and child health (Health Services), public health practice (Health Services Executive MPH program), public health genetics (Public Health Genetics), and statistical genetics (Biostatistics).

For more information, see the school's academic catalog at sph.washington.edu/publications/catalog.asp or visit the homepage at sph.washington.edu.

## UNDERGRADUATE PROGRAM

A Bachelor of Science or a Bachelor of Arts in public health is administered by the Dean's Office in the School of Public Health. A Bachelor of Science degree and an undergraduate minor are offered in the Department of Environmental and Occupational Health Sciences. A minor in global health is offered by the Department of Global Health. The Department of Health Services offers a Bachelor of Science degree in health informatics and health information management, as well as a baccalaureate certificate, through the UW Evening Degree Program.

## General Education

The School of Public Health general education requirements, which apply to all degree programs mentioned above, are as follows:

## Basic Skills

1. English Composition (C) - 5 credits
2. Additional Writing (W) - 10 credits
3. Quantitative and Symbolic Reasoning (QSR) - One course (minimum 4 credits)

## Areas of Knowledge

1. Visual, Literary, and Performing Arts (VLPA) - 10 credits*
2. Individuals and Societies (I\&S) - 10 credits
3. Natural World (NW) - 20 credits
4. Additional Areas of Knowledge - 25 credits
*Although School of Public Health students are not required to study a foreign language, they are encouraged to do so by substituting first-year language courses for the VLPA requirement. Completion through the third quarter is required for VLPA credit.

Suggested First- and Second-Year Courses: Anthropology, political science, psychology, sociology; distribution of general education and Areas of Knowledge courses as well as coursework that develops critical and analytical thinking, communication skills, and an understanding of public health.

## Admission Requirements

1. Admission to the major is competitive. Applicants must complete prerequisite coursework (see below) and an application to be considered. Completing the prerequisites and submitting an application do not guarantee admission.
2. Admission is offered twice a year for autumn and winter quarters. Applications for autumn are due the third Friday of spring quarter and applications for winter are due the third Friday of autumn quarter. Applications can be downloaded from the Public Health undergraduate program website at sph.washington.edu/uph. (Transfer students are encouraged to apply for admission to the UW for autumn or winter quarter, following the admission process and policies found at admit.washington.edu. The application deadline for the UW for autumn quarter is February 15 and winter quarter is September 15.)
3. Applicants must complete the following by the application deadline to be considered for admission:
a. Minimum 45 credits.
b. Minimum 2.50 cumulative GPA.
c. Minimum 2.0 grade in one of the following: ENV H 111, G H 101, HSERV 100, or one 5-credit course from anthropology (ANTH only), political science, psychology, or sociology (200 level or above recommended).
d. Minimum grade of 2.0 in one of BIOL 118, BIOL 180, CHEM 120, CHEM 142, CHEM 145, or PHYS 114/ PHYS 117.
4. The program evaluates applications based on overall academic record, grades in relevant coursework, demonstrated writing ability, stated reasons for applying to the major, and ability to make satisfactory progress toward the degree.
5. Applicants are strongly encouraged to attend an information session before submitting an application.
6. Transfer students may use any transferable equivalent course(s) for prerequisite coursework. Consult the UW Equivalency Guide or a UW adviser to verify transferability of coursework.

## Bachelor of Arts

## Major Requirements

78-79 credits, as follows:

1. Public Health Foundation (24 credits): Minimum 2.00 cumulative GPA in ENV H 311, EPI 420, G H 101, GEOG 280, HSERV 480, HSERV 481, and NUTR 300.
2. Statistics Course (4-5 credits): From among BIOST 310 (preferred), Q METH 201, STAT 220, STAT 221, STAT 311, or Q SCI 381
3. Social and Behavioral Sciences (20 credits): One 5-credit course from each of the following departments: Anthropology (ANTH only), Political Science, Psychology, and Sociology; minimum 15 credits at the 200 level or above.

## 4. Science Coursework (10 credits):

a. 5 credits biology from BIOL 118, BIOL 180, MICROM 301/MICROM 302.
b. 5 credits chemistry from CHEM 120, CHEM 142, CHEM 145
c. Public Health Capstone ( 5 credits): SPH 493 (minimum 2.0 grade)
5. Public Health Electives (15 credits): See website or adviser for approved list. Any course not on the list must be approved by the public health adviser.
6. Minimum 2.00 cumulative GPA for courses applied to the major
In addition to the major requirements shown above, students must also complete the general education requirements for the School of Public Health.

## Bachelor of Science

## Major Requirements

## 98-99 credits, as follows:

1. Public Health Foundation (24 credits): Minimum 2.00 cumulative GPA in ENV H 311, EPI 420, G H 101, GEOG 280, HSERV 480, HSERV 481, and NUTR 300.
2. Statistics Course ( $4-5$ credits): From among BIOST 310 (preferred), Q METH 201, STAT 220, STAT 221, STAT 311, or Q SCI 381
3. Social and Behavioral Sciences (20 credits): One 5-credit course from each of the following departments: Anthropology (ANTH only), Political Science, Psychology, and Sociology; minimum 15 credits at the 200 level or above.

## 4. Science Coursework (30 credits):

a. At least one year-long sequence ( 15 credits) of introductory science with laboratories: biology (BIOL 180, BIOL 200, BIOL 220), chemistry (CHEM 120, CHEM 220, and CHEM 221; or CHEM 142, CHEM 152, CHEM 162), or physics (PHYS 114/PHYS 117, PHYS 115/PHYS 118, PHYS 116/ PHYS 119; or PHYS 121, PHYS 122, PHYS 123).
b. At least 5 credits from among biology, chemistry, physics, microbiology, biological structure, neurobiology, or biochemistry B STR, NBIO, or BIOC.
c. At least one course each from CHEM, and BIOL or MICROM.
5. Public Health Capstone (5 credits): SPH 493 (minimum 2.0 grade)
6. Public Health Electives ( 15 credits): See website or adviser for approved list. Any course not on the list must be approved by the Public Health adviser.
7. Minimum 2.00 cumulative GPA for courses ap plied to the major

In addition to the major requirements shown above, students must complete the general education requirements for the School of Public Health

## Continuation Policy

While the University has general regulations governing scholastic eligibility and satisfactory progress, the undergraduate program in public health has adopted additional requirements to make the best use of facilities and resources and to provide reasonable assurance of a student's academic success. The following criteria and procedures are applied to determine continuation in the public health major. Students are encouraged to review their academic progress and be proactive about seeking
advice for problems affecting performance or participation in the program.

## Basic Criteria for Continuation Applicable to All Students in the Public Health Major

1. Full-time students must complete 9 or more credits hours per academic quarter (except summer) applicable to their degree(s).
2. Part-time attendance is possible and part-time students must complete at least one course each quarter applicable to their degree(s).
3. Students must earn a 2.00 cumulative GPA in all public health foundation courses as well as in the public health capstone.
4. Courses used to satisfy degree requirements cannot be taken on a satisfactory/not-satisfactory basis.
5. All students must maintain both an overall and public health GPA of 2.00 or higher. If either GPA falls below 2.00, students are placed on academic probation. Students cannot be on probation more than two consecutive quarters.
6. Students must take courses in the appropriate sequence. All prerequisites must be completed before registering for a course, unless permission is obtained from the instructor.
7. Students must file a graduation application with the undergraduate program adviser(s) in accordance with University regulations, to ensure graduation once all requirements have been satisfied.
8. Students receiving satisfactory progress registration holds should immediately contact the undergraduate program adviser(s) to file a graduation application.

## Procedures

1. The program recognizes that exceptional circumstances (e.g., death in the family, serious illness) may delay degree progress. In addition, educational opportunities such as study abroad or internship opportunities may warrant extension of a student's program.
2. Students who do not meet basic criteria for continuation in the public health major are first placed on School probation. Students on probation who do not meet minimum expectations by the end of the following quarter are dropped from the major.
3. The undergraduate program adviser(s) monitors progress for undergraduate students each quarter and students are notified of academic probation or drop by email as soon as practical after receiving the previous quarter's grade reports.
4. Students on probation are expected to meet with the undergraduate program advisers(s) to determine a plan for successful completion of program requirements, which may include repeating or replacing a course. Students who meet expectations by the end of the quarter (longer if deemed necessary for courses taught only once a year) are removed from probation.

## Appealing a Drop

A student who is dropped under the continuation policy may file a written appeal with the public health major program office. The appeal must be submitted within fifteen working days after the drop letter was dated. The appeal should state all the facts the student believes justify reconsideration. The public health major program director reviews the facts and renders a decision within fifteen working days after the appeal is received.

## Student Outcomes and Opportunities

- Learning Objectives and Expected Outcomes: The public health major introduces the foundations of public
health, including determinants of health, emerging infectious diseases, chronic diseases, access to healthcare and modes of healthcare delivery, the geography of health, and the effects of environment on health and disease. Students learn to apply the scientific method, use evidence-based decision making, and identify the impact of policy on health. Students also learn about the tools public health professionals use to analyze and understand causes/risk factors of disease, the modes of disease spread, and evaluation of prevention and healthcare programs, so they may work collaboratively to address health problems faced by human populations. Students are prepared for entry-level jobs in local and state health departments as well as for continued graduate education. Competencies for the major are organized around eight domains: Health, Ethics and Social Justice, Social Science, Natural Science, Policy and Politics, Environment, Communication, and Tools.
- Instructional and Research Facilities: The School of Public Health has five departments - Biostatistics, Environmental and Occupational Health Sciences, Epidemiology, Global Health, and Health Services - as well as interdisciplinary programs such as the Public Health major, Maternal and Child Health, Nutritional Sciences, Pathobiology, and Public Health Genetics. The School has over 30 research centers, including Institute for Public Health Genetics, Northwest Center for Public Health Practice, Center for Public Health Nutrition, Institute for Health Metrics and Evaluation, and the Health Promotion Research Center. Administration and teaching are primarily in the Magnuson Health Sciences Center.
- Honors Options Available: With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- Research, Internships, and Service Learning: Majors are encouraged to engage in experiential learning. See adviser for details.
- Department Scholarships: See adviser for details.
- Student Organizations/Associations: Undergraduate Student Public Health Association (USPHA).

## GRADUATE PROGRAM

The School of Public Health (SPH) offers graduate programs leading to the degrees of Master of Public Health (MPH), Master of Health Administration (MHA), Master of Science (MS), and Doctor of Philosophy (PhD). Admission requirements vary by degree and field and are described in the sections for each department.

Master of Public Health Degree: The MPH is a professional degree that provides broad training in public health. Each program provides additional training in a particular area. Graduates pursue careers in public health practice settings, academia, or research. The MPH degree is offered in all SPH departments. Students earning the MPH may choose from several areas including biostatistics; community-oriented public health practice; environmental and occupational health; epidemiology; Executive MPH Program; health metrics and evaluation; health services; health systems and policy; global health (in Epidemiology or Global Health); leadership, policy, and management; maternal and child health (in Epidemiology or Health Services); nutritional sciences; occupational and environmental medicine; public health genetics; or Peace Corps Master's International. The Executive MPH degree program is a three-year, part-time program that allows mid-career public health professionals to pursue the MPH degree in community practice, environmental health, global health, health education, or maternal and child health while continuing their employment.

Master of Health Administration Degree: The MHA de gree is offered by the interdisciplinary Graduate Programs in Health Services Administration in the Department of Health Services under the auspices of the Graduate School, either as a full-time, in-residence program or a part-time executive program. The MHA program prepares students for careers in management, planning, and policy analysis in a variety of settings in the healthcare field. The purpose of the curriculum is to integrate the knowledge, skills, and experience that encompass health services management, planning, and policy analysis. Students develop knowledge and skills that enable them to better understand and manage change, analyze information and make decisions, and manage organizations and the people in them. The Executive MHA program is a part-time program designed for mid-career health services professionals, including physicians and other experienced clinicians, who wish to continue their employment while pursuing the MHA degree. Both programs provide a balance of theory and practical management skills.
Master of Science and Doctor of Philosophy Degrees: The MS and PhD programs in the departments of Biostatistics, Environmental and Occupational Health Sciences, Epidemiology, and Health Services prepare students for academic or research careers. The MS and PhD programs in the Nutritional Sciences and the Pathobiology programs, and the PhD program in the Institute for Public Health Genetics are administered in the school, although the degrees are awarded through the Graduate School's interdis ciplinary group structure.

The MS programs in biostatistics, environmental health (general, occupational and environmental exposure sciences, and toxicology tracks), epidemiology (general, global, or clinical research tracks), health services (healthcare and population health), nutrition, pathobiology, and genetic epidemiology offer focused research training in specific disciplines. Graduates of these programs often assume positions as senior technical staff in laboratories or other organizations and as research project coordinators, or pursue further graduate training. The MS program differs from the PhD program in that more of the courses emphasize the concepts underlying methodological approaches rather than the ability to independently design a major research program.

The PhD programs in biostatistics (general or statistical genetics tracks), environmental and occupational health sciences (environmental \& occupational hygiene and toxicology tracks), epidemiology, health services, nutritional sciences, pathobiology, and public health genetics, train future academicians as highly qualified independent inves tigators and teachers, and as well-trained practitioners. The doctoral programs are distinct from the MS programs by the addition of advanced coursework and the nature and scope of the dissertation research project.

Concurrent Degree Programs: The School of Public Health MPH program encourages students to take full advantage of the University's unique position as a leading education, research, and service institution and to consider one of the many concurrent degree programs available with the MPH. Enrollment in a concurrent degree program at the University permits a student to proceed in a coordinated way towards sequential completion of both degrees in a shortened period of time. Some of the options available are not formal concurrent programs, but the degrees listed can be pursued in parallel with the Global Health MPH. In some cases, agreements are reached between the two programs to allow for sharing of some credits and/or projects. Most concurrent degrees begin with a successful application to the other school, followed by an application to the MPH during the first year of study in the first program.

Residency Programs: The SPH offers a residency in occupational and environmental medicine (MPH). Physicians may apply to any of the school's other graduate programs.

Certificate and Graduate Certificate Programs: The SPH offers several graduate certificate programs, including: Basic or Advanced Clinical Research Methods (Epidemiology); Emergency Preparedness and Response (Health Services); Global Health (Global Health); Global Health of Women, Adolescents, and Children (Global Health); Global Injury and Violence Prevention (Global Health); Health Economics and Outcomes Research (with the School of Pharmacy); Health Management (Health Services); Health Policy (Health Services); HIV and STIs (Global Health); Maternal and Child Health (Health Services); Public Health Practice (Health Services Executive MPH Program); Public Health Genetics (Public Health Genetics) and Statistical Genetics (Biostatistics).

## COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations.
SPH 490 Selected Topics in Pubic Health (1-5, max. 15) In depth study of current public health topics. Offered: AWSpS.
SPH 491 Public Health Capstone I (2-) Part one of integrative experience bringing together students' knowledge and skills acquired in the public health major.

SPH 492 Public Health Capstone II (-3) Part two of integrative experience bringing together students' knowledge and skills acquired in the public health major. Prerequisite: SPH 491.
SPH 493 Public Health Capstone (5) Students complete a final self-directed paper on public health topic of interest integrating the knowledge and skills acquired during their time in the public health major. Offered: AWSpS.
SPH 495 Public Health Internship (1-5, max. 15) Internship in public health related area. Credit/no credit only.
SPH 497 Public Health Special Electives (1-5, max. 15) Independent study of a current public health topic. Credit/no credit only.
SPH 499 Undergraduate Research (1-5, max. 15) Individual research on a specific topic in public health. Offered: AWSpS.

## Biostatistics

Founded in 1970, the Department of Biostatistics is a leader in statistical sciences. Its 78 faculty include a member of the United States National Academy of Sciences, two members of the Institute of Medicine, and 20 fellows of the American Statistical Association. Four hundred eightyeight alumni hold leadership roles in academia, government, and industry worldwide. The department is a center for development and application of statistical methodology across the health sciences, and has collaborative partnerships with Fred Hutchinson Cancer Research Center, Seattle Children's Hospital Research Institute, Group Health Cooperative, and the Veteran's Administration. To complement research, the department recently established the Center for Biomedical Statistics to provide consulting and collaborative services.

## GRADUATE PROGRAM

Graduate Program Coordinator
H655 Health Sciences, Box 357232
(206) 543-1044
bioadmit@uw.edu

The Department of Biostatistics offers Master of Science, Master of Public Health, and Doctor of Philosophy degrees
in quantitative methods applied to the medical and biological sciences. Biology, medicine, and health sciences are undergoing major changes in their development as quantitative sciences. As technological advances generate huge quantities of information, biostatistical tools and concepts are critical for the analysis of these data. The techniques and viewpoints of mathematics and statistics, traditionally peripheral to biology and medicine, are now woven into the fabric of the life sciences, thereby providing new opportunities in research and teaching.
Many universities have instituted programs relating mathematics or statistics to one particular biological field. The goal of the biostatistics graduate program is to equip students to develop and apply the quantitative techniques of mathematics, statistics, and computing appropriate to medicine, biology, and other health science disciplines.
Because of faculty involvement in diverse statistical applications, the department produces graduates at all levels. Students are recruited from programs in mathematics, statistics, and biology and are selected on the basis of quantitative ability.

## Master of Public Health

This track combines broad training in public health with specific training in biostatistics. The track includes core courses in biostatistics, environmental health, epidemiology, health services, and social and behavioral sciences. In addition, successful candidates are required to complete a public health practicum and write a research-based master's thesis. The degree is designed for individuals who anticipate careers as data analysts in public health research or practice and for individuals who plan doctoral work in public health or biomedical field, but who want more methodological training than those PhD programs offer.

## Admission Requirements

Applicants to Biostatistics graduate programs are formally applying to the Graduate School of the University of Washington. Although all acceptance decisions are made within the Biostatistics Department, the Graduate School imposes certain minimum admission requirements. Applicants must therefore submit both a general application directly to the Graduate School and a specific application to the Biostatistics Department.

To be considered for admission to the Biostatistics MPH pathway, a candidate must hold a doctoral-level degree in another field (e.g., MD, PhD, JD) or be currently working on such a doctoral degree. Candidates who have not yet been awarded a doctoral degree are not awarded the Biostatis-tics-pathway MPH until they are awarded their doctoral degree. All other prerequisites and required materials are the same for MS, MPH, and PhD applicants.

## Degree Requirements

In addition to meeting the minimum Graduate School requirements, students must also obtain a minimum of 64 credits minimum, as follows:

## 63 credits minimum, as follows:

1. Biostatistics Core Courses: A minimum grade of 3.0 in each of BIOST 514 (4), BIOST 515 (4); BIOST 524 (3); BIOST 536 (4), BIOST 537 (4); BIOST 580 (3); BIOST 590 (3)
2. Non-biostatistics Core Courses: EPI 512 (4), EPI 513 (4); HSERV 510 (3); HSERV 511 (3); ENV H 511 (3); G H 515 (4). All non-biostatistics core courses must be taken for a numerical grade and earn a minimum grade of 2.7 in each non-biostatistics core course with a minimum cumulative GPA of 3.00.
3. Biostatistics Elective Courses: 6 credits of any approved biostatistics MS elective, or STAT 512 or STAT 513
4. Biostatistics MPH Practicum: BIOST 595 (3). MPH students must also complete a practicum experience for 3
credits in an organization or agency that provides planning or services relevant to public health.

## 5. Master's Thesis: 9 credits of BIOST 700

Visit department website, www.biostat.washington.edu/ grad, for the most up-to-date information on degree requirements.

## Master of Science

The Master of Science program offers advanced training in biostatistics. The program includes coursework in biostatistics, statistics, and one or more biomedical fields. In addition, successful candidates are required to pass a master's theory examination and write a research-based master's thesis. The degree is designed for individuals who anticipate a career as a data analyst in public health or biomedical research or practice and for individuals who plan doctoral work in a public health or biomedical field, but want more methodological training than those PhD programs offer.

## Admission Requirements

Applicants to Biostatistics graduate programs are formally applying to the Graduate School of the University of Washington. Although all acceptance decisions are made within the Biostatistics Department, the Graduate School imposes certain minimum admission requirements. Applicants must therefore submit both a general application directly to the Graduate School and a specific application to the Biostatistics Department.

Potential MS students may enter the graduate program in biostatistics from an undergraduate major in mathematics, statistics, or a biological field. Students are occasionally admitted with backgrounds in other fields; however, all applicants must have 30 or more quarter credits in mathematics and statistics to include two years of calculus (to include multivariate calculus), one course in linear algebra, and one course in probability theory.

## Degree Requirements

63 credits minimum, as follows:

1. Required Courses: BIOST 514 (4), BIOST 515 (4), BIOST 536 (4), BIOST 537 (4), BIOST 580 (1, max. 9), STAT 512 (4), STAT 513 (4)
2. Elective Credits: 12 required elective credits must be taken, with at least 6 credits of elective courses with a methodology emphasis, and 6 credits of electives with a biology or public health emphasis (list provided).
3. Biostatistical Consulting: BIOST 590 (3).
4. Master's Thesis: 18 credits of BIOST 700
5. Computer Proficiency: The department requires a basic level of computing proficiency from all graduates, but encourages them to take the opportunity to gain greater expertise with a variety of computing tools. The computing proficiency requirement is met when a student writes and documents a computer program sophisticated enough to demonstrate the necessary basic competence in programming, or completes an approved programming course. The student's faculty adviser can approve the proficiency requirement or refer the matter to an ad hoc faculty committee for approval. Approved courses include STAT 534/BIOST 534, STAT 535/BIOST 535, and CSE 142

## Doctor of Philosophy

## Admission Requirements

Applicants to Biostatistics graduate programs are formally applying to the Graduate School of the University of Washington. Although all acceptance decisions are made within the Biostatistics Department, the Graduate School imposes certain minimum admission requirements. Applicants must therefore submit both a general application directly
to the Graduate School and a specific application to the Biostatistics Department.
Potential PhD students may enter the graduate program in biostatistics from an undergraduate major in mathematics, statistics, or a biological field. Students are occasionally admitted with backgrounds in other fields; however, all applicants must have 30 or more quarter credits in mathematics and statistics to include two years of calculus (to include multivariate calculus), one course in linear algebra, and one course in probability theory.

## Degree Requirements

Minimum 100 credits, as follows:

1. Required Courses: BIOST 514 (4); BIOST 515 (4); BIOST 533 (3); BIOST 570 (3); BIOST 571 (3); BIOST 572 (3); BIOST 580 (1, max. 9); MATH 574, MATH 575, MATH 576 $(3,3,3)$ or equivalent.; STAT 512, STAT $513(4,4)$; STAT 581, STAT 582, STAT $583(3,3,3)$.
2. Students must earn a minimum 3.0 grade in each of the required courses. At the faculty's discretion, qualifying exam performance may outweigh a course grade below the minimum. (Note: The minimum grade requirement for elective courses is 2.7.)
3. Elective Credits: 15 elective credits must be taken, consisting of at least 6 credits of elective courses with a methodology emphasis and 9 credits of elective with a biology or public health emphasis (list provided).
4. In addition to the above courses, students in the PhD program must complete 36 credits of BIOST 800 , write a dissertation, complete a consulting class, and demonstrate proficiency in a computer language.
5. If a PhD student enrolls in STAT 512 and STAT 513 , he or she must take the MS theory examination the following June for advisory purposes. PhD students must also take the PhD statistical theory examination during the summer following enrollment in STAT 581, STAT 582, STAT 533 and the PhD applied examination during the summer following enrollment in BIOST 570, BIOST 571, and BIOST 572; or, if both STAT 581, STAT 582, STAT 583 and BIOST 570, BIOST 571, and BIOST 572 are taken in the same year, the student may elect to delay the PhD applied examination by one year. If either examination is failed, it must be passed the following year.
6. Students in the PhD program must also complete a biology project, and pass the general and final examinations
7. Computer Proficiency: The department requires a basic level of computing proficiency from all graduates, but encourages them to take the opportunity to gain greater expertise with a variety of computing tools. The computing proficiency requirement is met when a student writes and documents a computer program sophisticated enough to demonstrate the necessary basic competence in programming, or completes an approved programming course. Approved courses include: STAT/ BIOST 534, STAT/BIOST 535; and CSE 142.

## COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations.

BIOST 111 Lectures in Applied Statistics (1) NW Weekly lectures illustrating the importance of statisticians in a variety of fields, including medicine and the biological, physical, and social sciences. Credit/no credit only. Offered: jointly with STAT 111; Sp.
BIOST 310 Biostatistics for the Health Sciences (4) QSR Hughes Introduction to statistical methods for students panning on majoring in health sciences. Uses case studies and examples from popular and scientific literature to introduce topics such as data description, study design, screening, estimation hypothesis
testing, categorical data analysis, and regression. Emphasizes concepts and interpretation rather than computation or theory. Offered: W.

BIOST 499 Undergraduate Research (*) Supervised reading programs; library and field research; special projects. Credit/no-credit only.

BIOST 502 Introduction to Statistics in Health Sciences (4) Description and examples of common concepts in biostatistics. Probability, point and confidence interval estimation, hypothesis testing including two-sample and paired $t$ and chi-square tests, introduction to simple linear regression. Emphasizes applications in health sciences. Offered: S.
BIOST 503 Application of Statistics to Health Sciences ([0-3]-, max. 3) Standard statistical techniques presented with examples drawn from the health sciences literature. Critical interpretation of research results, and introduction to the computer for data processing and statistical analysis. Prerequisite: BIOST 502 or equivalent. Offered: S.
BIOST 508 Biostatistical Reasoning for the Health Sciences (4) Provides a broad overview of biostatistical methods, emphasizing interpretation and concepts rather than computation or mathematical details. Introduces basic concepts of study design, data summaries and presentation, statistical inference (including hypothesis testing, p-values, and confidence intervals) and modeling approaches such as regression analysis. No hands-on analysis, nor use of statistical packages.
BIOST 510 Biostatistics in Dentistry (3) Introduction to concepts and methods of descriptive and inferential statistics with applications in dentistry emphasized. Topics include comparison of means and proportions, hypothesis testing, confidence intervals, nonparametric methods, linear regression, and correlation. Prerequisite: enrollment in School of Dentistry or permission of instructor. Offered: jointly with DPHS 568.

BIOST 511 Medical Biometry I (4) Presentation of the principles and methods of data description and elementary parametric and nonparametric statistical analysis. Examples are drawn from the biomedical literature, and real data sets are analyzed by the students after a brief introduction to the use of standard statistical computer packages. Statistical techniques covered include description of samples, comparison of two sample means and proportions, simple linear regression and correlation. Offered: A.
BIOST 512 Medical Biometry II (4) Multiple regression, analysis of covariance, and an introduction to oneway and two-way analyses of variance: including assumptions, transformations, outlier detection, dummy variables, and variable selection procedures. Examples drawn from the biomedical literature with computer assignments using standard statistical computer packages. Prerequisite: either BIOST 511 or BIOST 517, or equivalent. Offered: W.

BIOST 513 Medical Biometry III (4) Analysis of categorical data including two sample methods, sets of 2 x 2 tables, R x C tables, and logistic regression. Classification and discrimination techniques. Survival analysis including product limit estimates and the Cox proportional hazards model. Prerequisite: BIOST 512 or permission of instructor. Offered: Sp.

BIOST 514 Biostatistics I (4) Presentation of principles and methods of data description; graphics; point, confidence interval estimation; hypothesis testing; relative risk; odds ratio; Mantel-Haenszel; chi-square test. Examples drawn from biomedical literature; real-data sets analyzed using statistical computer packages. Prerequisite: biostatistics majors or permission of instructor. Offered: A.

BIOST 515 Biostatistics II (4) Introduction to linea models; multiple regression, correlation; residual analysis; dummy variables; analysis of covariance; one-, two-way analysis of variance; randomized blocks; fixed, random effects (repeated measure, factorial designs); multiple comparisons. Real biomedical data sets analyzed. Prerequisite: BIOST 514, biostatistics major, or permission of instructor. Of fered: W.

BIOST 516 Statistical Methods in Genetic Epidemiology (3) Theory and application of statistical techniques used in genetic epidemiology. Includes discussion of association studies, linkages, and segregation analyses. Examples stressed with reference to as sumptions and limitations. Prerequisite: either BIOST 513 or BIOST 518; PHG 511/EPI 517, or permission of instructor. Offered: jointly with EPI 516/PHG 519.

BIOST 517 Applied Biostatistics I (4) Introduction to the analysis of biomedical data. Descriptive and inferential statistical analysis for discrete, continuous, and right-censored random variables. Analytic methods based on elementary parametric and non-parametric models for one sample; two sample (independent and paired), stratified sample, and simple regression problems. Offered: A.
BIOST 518 Applied Biostatistics II (4) Multiple regression for continuous, discrete, and right-censored response variables, including dummy variables, transformations, and interactions. Introduction to regression with correlated outcome data. Model and case diagnostics. Computer assignments using real data and standard statistical computer packages. Prerequisite: BIOST 517 or permission of instructor. Offered: W.

BIOST 519 Advanced Epidemiologic Methods (4) Introduces advanced epidemiologic methods, including casual modeling, inverse probability weighting, propensity scores, sensitivity analysis, imputation for missing data, approaches to multiple comparisons, Bayesian adjustment of risk estimates, recursive portioning, and modeling for prediction. Prerequisite: EPI 512; EPI 513; EPI 514; EPI/BIOST 536. Offered: jointly with EPI 515; A.
BIOST 524 Design of Medical Studies (3) Design of medical studies, with emphasis on randomized controlled clinical trials. Bias elimination, controls, treatment assignment and randomization, precision, replication, power and sample size calculations, stratifica tion, and ethics. Suitable for graduate students in biostatistics and for research-oriented graduate students in other scientific fields. Prerequisite: BIOST 511 or equivalent, and one of BIOST 513, BIOST 518, STAT 421, STAT 423, STAT 512, or EPI 512; or permission of instructor. Offered: jointly with STAT 524; Sp.

BIOST 527 Nonparametric Regression and Classification (3) Covers techniques for smoothing and classification including spline models, kernel methods, generalized additive models, and the averaging of multiple models. Describes measures of predictive performance, along with methods for balancing bias and variance. Prerequisite: either STAT 502 and STAT 504 or BIOST 514 and BIOST 515. Offered: jointly with STAT 527; Sp.

BIOST 529 Sample Survey Techniques (3) Design and implementation of selection and estimation procedures. Emphasis on human populations. Simple, stratified, and cluster sampling; multistage and twophase procedures; optimal allocation of resources; estimation theory; replicated designs; variance es timation; national samples and census materials. Prerequisite: either STAT 421, STAT 423, STAT 504, QMETH 500, BIOST 511, or BIOST 517, or equivalent or permission of instructor. Offered: jointly with CS\&SS 529/STAT 529.

BIOST 531 Statistical Methods for Analysis with Missing Data (3) Chan Covers statistical methods for the analysis of missing data, including likelihood-based, weighted GEE, multiple imputation, and Bayesian approaches. Uses computational tools such as EM algorithm and Gibbs' sampler. Covers both ignorable and non-ignorable missing-data mechanisms as well as cross-sectional and longitudinal study designs. Primarily uses data arising from epidemiologic studies. Offered: jointly with EPI 531; W.
BIOST 533 Theory of Linear Models (3) Examines model structure; least squares estimation; Gauss-Markov theorem; central limit theorems for linear regression; weighted and generalized least squares; fixed and random effects; analysis of variance; blocking and stratification; and applications in experimental design. Prerequisite: STAT 421 or STAT 423; and STAT 513, BIOST 515, and a course in matrix algebra. Offered: jointly with STAT 533; Sp.

BIOST 534 Statistical Computing (3) Introduction to scientific computing. Includes programming tools, modern programming methodologies, (modularization, object oriented design), design of data structures and algorithms, numerical computing and graphics. Uses C++ for several substantial scientific programming projects. Prerequisite: experience with programming in a high level language. Offered: jointly with STAT 534; Sp.
BIOST 536 Categorical Data Analysis in Epidemiology (4) Summary of univariate categorical data analysis; ilntroduction to multivariate analysis of categorical epidemiologic and health sciences data using multiplicative models. Experience at interpretation; familiarity with available softwareprograms gained by analysis of bona fide data and critiques of published analyses appearing in literature. Prerequisite: BIOST 515; EPI 513 and either BIOST 513 or BIOST 518; or permission of instructor. Offered: jointly with EPI 536; A.

BIOST 537 Survival Data Analysis in Epidemiology (4) Introduction to multivariate analysis of survival data using multiplicative models. Application to epidemiologic and health sciences studies. Familiarity with interpretation and available softwarecomputer programs gained by analysis of bona fide sets of data and critiques of published analyses appearing in the literature. Prerequisite: BIOST 536 or permission of instructor. Offered: jointly with EPI 537; W.

BIOST 540 Correlated Data Regression (3) Introduction to regression modeling of longitudinal and clustered data from epidemiology and health sciences. Interpretation and familiarity with software gained by analysis of data and critiques of published analyses. Prerequisite: Either BIOST 513, BIOST 515, BIOST 518, BIOST 536, or permission of instructor. Offered: Sp.
BIOST 550 Statistical Genetics I: Mendelian Traits (3) Mendelian genetic traits. Population genetics; HardyWeinberg, allelic variation, subdivision. Likelihood inference, information and power; latent variables and EM algorithm. Pedigree relationships and gene identity. Meiosis and recombination. Linkage detection. Multipoint linkage analysis. Prerequisite: STAT 390 and STAT 394, or permission of instructor. Offered: jointly with STAT 550; Sp.
BIOST 551 Statistical Genetics II: Quantitative Traits (3) Statistical basis for describing variation in quantitative traits. Decomposition of trait variation into components representing genes, environment and geneenvironment interaction. Methods of mapping and characterizing quantitative trait loci. Prerequisite: STAT/BIOST 550; STAT 423 or BIOST 515; or permission of instructor. Offered: jointly with STAT 551; A.

BIOST 552 Statistical Genetics III: Design and Analysis (3) Overview of probability models, inheritance models, penetrance. Association and linkage. The lod score method. Affected sib method. Fitting complex inheritance models. Design mapping studies; multipoint, disequilibrium, and fine-scale mapping. Ascertainment. Prerequisite: STAT/BIOST 551; GENOME 371; or permission of instructor. Offered: jointly with STAT 552; W.

BIOST 555 Statistical Methods for Spatial Epidemiology (3) Motivates the need for, and describes methods for the analysis of spatially indexed epidemiological data. Covers four major topics: clustering and cluster detection, disease mapping, spatial regression, and an introduction to geographical information systems. Considers both point-references and spatially aggregated data. Offered: jointly with EPI 555; W.

BIOST 570 Advanced Regression Methods for Independent Data (3) Covers linear models, generalized linear and non-linear regression, and models. Includes interpretation of parameters, including collapsibility and non-collapsibility, estimating equations; likelinood; sandwich estimations; the bootstrap; Bayesian inference: prior specification, hypothesis testing, and computation; comparison of approaches; and diagnostics. Prerequisite: STAT 512 and STAT 513;BIOST/ STAT 533 or STAT 421/STAT 502 and STAT 423/STAT 504; a course in matrix algebra. Offered: jointly with STAT 570; A.
BIOST 571 Advanced Regression Methods for Dependent Data (3) Covers longitudinal data models, generalized linear and non-linear mixed models; marginal versus conditional models; generalized estimating equations, likelihood-based inference, REML, BLUP, and computation of integrals; Bayesian inference: Markov chain Monte Carlo; covariance models, including models for split plot designs; comparison of approaches; and diagnostics. Prerequisite: BIOST570/ STAT 570. Offered: jointly with STAT 571; W.
BIOST 572 Advanced Regression Methods: Project (3) Student presentations and discussion on selected methodological research articles focusing on regression modeling. Prerequisite: STAT 571. Offered: jointly with STAT 572; Sp.

BIOST 573 Statistical Methods for Categorical Data (3) Advanced topics in generalized linear models and the analysis of categorical data: overdispersion, quasilikelihood, parameters in link and variance functions, exact conditional inference, random effects, saddlepoint approximations. Credit/no-credit only. Prerequisite: BIOST 571 and STAT 582. Offered: jointly with STAT 573; Sp.
BIOST 574 Multivariate Statistical Methods (3) Use of multivariate normal sampling theory, linear transformations of random variables, one- and two-sample tests, profile analysis, partial and multiple correlation, multivariate ANOVA and least squares, discriminant analysis, principal components, factor analysis, robustness, and some special topics. Some computer use included. Prerequisite: BIOST 570 or permission of instructor. Offered: jointly with STAT 574.
BIOST 576 Statistical Methods for Survival Data (3) Statistical methods for censored survival data arising from follow-up studies on human or animal populations. Parametric and nonparametric methods, Kaplan-Meier survival curve estimator, comparison of survival curves, log-rank test, regression models including the Cox proportional hazards model, competing risks. Prerequisite: STAT 581 and either BIOST 515, STAT 473, or equivalent. Offered: jointly with STAT 576.

BIOST 577 Advanced Design and Analysis of Experiments (3) Concepts important in experimental design and analyzing data from planned experiments. Multi-way
layouts, randomized block designs, incomplete block designs, Lating and Graeco-Latin squares, factorial and fractional designs, split-plot designs, optimal design theory, response surface experiments. Prerequisite: either BIOST 515, BIOSTAT 533, STAT 502, STAT 504, STAT 533, or permission of instructor. Offered: jointly with STAT 577.

BIOST 578 Special Topics in Advanced Biostatistics (*, max. 30) Advanced-level topics in biostatistics of fered by regular and visiting faculty. Prerequisite: permission of instructor. Offered: jointly with STAT 578; AWSpS.
BIOST 579 Data Analysis and Reporting (2) Analysis of real data to answer scientific questions. Common da-ta-analytic problems. Sensible approaches to complex data. Graphical and tabular presentation of results. Writing reports for scientific journals, research collaborators, consulting clients. Graduate standing in statistics or biostatistics or permission of instructor. Offered: jointly with STAT 579; AWSp.

BIOST 580 Seminar in Biostatistics (*, max. 30) Presentation and discussion of special topics and research results in biostatistics. Speakers include resident faculty, visiting scientists, and advanced graduate students. Offered: AWSp.
BIOST 581 Statistical Genetics Seminar (1, max. 30) Presentations and discussion of special topics and research results in statistical genetics. Students, posdocs, and faculty present their work and papers from the literature. Credit/no-credit only. Offered: AWSp.
BIOST 582 Student Seminar (1, max. 30) Student seminar series for collaboration, exchange of ideas, and exposure to different stages of performing independent research. Encourages both students and faculty to give presentations including RA work, extended class projects, master's theses, dissertation progress, data analysis, practice talks, and journal articles. Credit/no-credit only. Offered: AWSpS.
BIOST 590 Biostatistical Consulting (*) Training in consulting on the biostatistical aspect of research problems arising in the biomedical field. Students, initially under the close supervision of a faculty member, participate in discussions with investigators leading to the design and/or the analysis of a quantitative investigation of a problem. With experience, independent associations of student and research worker are encouraged, with subsequent review by faculty of resulting design and analysis. Prerequisite: permis sion of instructor. Offered: AWSpS.
BIOST 595 Biostatistics Master's Practicum (1-12, max. 12) Supervised practice experience providing students an opportunity to learn how biostatistics is applied in a public health setting and in the formation of public health policy. Prerequisite: BIOST 514; BIOST 515; BIOST 536; BIOST 537.
BIOST 600 Independent Study or Research (*) Offered: AWSpS.
BIOST 700 Master's Thesis (*) Offered: AWSpS.
BIOST 800 Doctoral Dissertation (*) Offered: AWSpS.

## Environmental and Occupational Health Sciences

F461 Health Sciences

Environmental health focuses on identifying, evaluating, and controlling environmental conditions that may have an adverse impact on human health. Examples of prob-
em areas requiring environmental health expertise are assuring adequate quality and quantity of food and drinking water, safe treatment and disposal of domestic and industrial waste materials, limiting or reducing air and noise pollution, limiting occupational exposure to hazardous substances and unsafe conditions, assuring safe and healthful housing, controlling the spread of insect- and rodentborne illness, proper selection and use of pesticides, and understanding the effects of global changes in climate and the atmosphere on human health.

## UNDERGRADUATE PROGRAM

Adviser
F461D Health Sciences, Box 357234
(206) 543-4207
ehug@uw.edu

The Department of Environmental and Occupational Health Sciences offers the following programs of study:

- The Bachelor of Science degree with a major in environmental health
- A minor in environmental health

## Bachelor of Science

Suggested First- and Second-Year College Courses: Chemistry, organic chemistry, biology, calculus, statistics, English composition

## Department Admission Requirements

1. Admission to the major is competitive. Applicants must complete prerequisite coursework and an application to be considered. Completing the prerequisites and submitting an application do not guarantee admission. Applicants are admitted in two groups: Early Admission and Upper Division Admission.
2. Applications are due the third Friday of autumn, winter, spring, and summer quarters. Applications can be downloaded from the Environmental Health undergraduate program website at depts.washington.edu/ehug.
3. Prospective students should apply during the quarter they plan to complete prerequisites for entry the following quarter. Ideally, students enter the major by or before the beginning of their junior year.
4. Applications are evaluated on overall grades; performance in math, science, and composition courses; demonstrated writing ability; and understanding of and potential fit with the major.
5. Applicants are strongly encouraged to meet with the program manager before submitting an application.
6. Transfer students may use any transferable equivalent course(s) for prerequisite coursework. Consult UW Equivalency Guide or UW adviser to verity transferability of coursework.

## Early Admission

Applicants must complete the following, with a minimum 2.0 grade in each course, to be considered for early admission:

1. Minimum cumulative 3.00 GPA
2. Minimum 30 college credits
3. 5 credits of English composition
4. CHEM 142, CHEM 152, CHEM 162
5. Either MATH 124 or MATH 144 or Q SCI 291 (MATH 112 does not satisfy this requirement)

## Upper-Division Admission

Applicants must complete the following, with a minimum grade of 2.0 in each course, to be considered for admission:
2. 5 credits of English composition
3. BIOL 180, BIOL 200, BIOL 220
4. CHEM 142, CHEM 152, CHEM 162; CHEM 237, CHEM 238, CHEM 239 or CHEM 223, CHEM 224
5. Either MATH 124 or MATH 144 or Q SCl 291 (MATH 112 does not satisfy this requirement)

## Degree Requirements

180 credits, as follows:

## General Education and Basic Skills

93 credits as follows. Many of these courses overlap with major requirements shown below.

1. Written and Oral Communications (12 credits): One fivecredit English composition course from the University list; HCDE 333; 3 credits of additional W-designated coursework.
2. Quantitative and Symbolic Reasoning (QSR) (10 credits): Either MATH 124, MATH 144, or Q SCI 291 (MATH 112 does not satisfy this requirement); either STAT 311 (recommended), STAT 220, or Q SCI 381
3. Visual, Literary, and Performing Arts (VLPA) and Individuals \& Societies (I\&S) (20 credits): Minimum 10 credits required in each area
4. Natural World (NW) (51 credits)
a. Biology ( 15 credits): BIOL 180, BIOL 200, BIOL 220
b. Chemistry ( 26 credits): CHEM 142, CHEM 152, CHEM 162, and CHEM 237, CHEM 238, CHEM 239 (or CHEM 223, CHEM 224)
c. Physics (10 credits): PHYS 114, PHYS 115, PHYS 117, PHYS 118 (or PHYS 121 and PHYS 122

## Major Requirements

72-74 credits, as follows:

1. Environmental Health Core (minimum 36 credits): ENV H 311, ENV H 405, ENV H 431, ENV H 432, ENV H 433, ENV H 472, ENV H 482 (2 credits minimum), EPI 420, MICROM 301, MICROM 302.
2. Environmental Health Electives (9-11 credits): Minimum three courses chosen from ENV H 440, ENV H 441, ENV H 442, ENV H 445 (or ENV H 446), ENV H 448, ENV H 453, ENV H 460, and ENV H 473.

## 3. 27 additional credits of approved electives

4. Minimum 2.0 grade in each course required for the major
5. Sufficient elective credits to reach total of 180 credits.

## Minor

## Minor Requirements

29 credits as follows:

1. Core Courses: 17 credits of the following: ENV H 311, ENV H 405, ENV H 431, EPI 420; STAT 220 or STAT 311.
2. Approved Electives: 12 credits of electives from the approved departmental list. See website or adviser for details.

## Student Outcomes and Opportunities

- Learning Objectives and Expected Outcomes: Learning Objectives and Expected Outcomes: In the Bachelor of Science program in Environmental Health, students learn to utilize tools of scientific inquiry to identify, prevent, and control environmental factors that can damage human health. As part of their training, students are introduced to basic principles of risk assessment, microbiology, epidemiology, sampling, and toxicology, and can choose to focus in one of three interest areas: biomedical sciences, health and environmental science, and environmental public health practice.
- Instructional and Research Facilities: The department houses thirteen centers and institutes and twenty labs.
- Honors Options Available: With College Honors (Completion of Honors Core Curriculum and Departmental Honors); With Honors (Completion of Departmental Honors requirements in the major). See adviser for requirements.
- Research, Internships, and Service Learning: The department operates an internship program in cooperation with government agencies and private employers throughout the state. Each student intern works under the supervision of an experienced employee, with guidance from a faculty member. Internship placements are available throughout the year for variable amounts of academic credit.
- Department Scholarships: None offered.
- Student Organizations/Associations: UW Student Environmental Health Association

## GRADUATE PROGRAM

Graduate Program Coordinator
F461 Health Sciences, Box 357234
(206) 543-3199

The Department of Environmental and Occupational Health Sciences offers three graduate degrees: Master of Science, Master of Public Health, and Doctor of Philosophy. The areas of emphasis are environmental and occupational hygiene (PhD) industrial hygiene and safety (MS), toxicology (PhD/MS), environmental health (MS), and occupational and environmental medicine or environmental and occupational health (MPH).
The PhD in Environmental and Occupational Hygiene op tion focuses on the assessment of exposures, health ef fects, and control strategies in community and work environments. The program emphasizes expertise in exposure assessment to evaluate human health risks from chemical, physical, and biological agents. Research opportunities include: laboratory and field investigations of environmental exposures and health outcomes; air, soil and water pollution monitoring; ambient, indoor, and personal exposure modeling; evaluation of biomechanical stress factors and organization of the work environment; development of new instruments, biomarkers, and novel methods for assessing human exposures; and evaluation of effective control strategies for the prevention or reduction of illness and injury.
The MPH in Environmental and Occupational Health provides an opportunity for students to focus on the recognition, assessment, and control of environmental and occupational hazards, the impact of these hazards on health and society, and approaches to regulations, enforcement, and policy development. It emphasizes development of skills essential to science-based public health practice. In addition to coursework, students complete a field practicum and research in any of the department's research facilities or in a field setting.
The MPH in Occupational and Environmental Medicine is for individuals with an earned doctorate. The goal of the program is to provide training in the public health sciences with a focus on occupational and environmental health. The program provides didactic instruction and participation in field studies. Research efforts focus on understanding, preventing, and managing environmental and occupational disease, injury, and disability. Physicians also have the option of applying for a concurrent fellowship or residency in occupational and environmental medicine.
The concurrent MPH/MPA or MS/MPA degree programs with the Daniel J. Evans School of Public Affairs seek to educate students who bring substantive public health knowledge and a strong policy and management orientation to their professional careers. With several courses that satisfy degree requirements in both programs, students
are able to earn the two degrees in a shorter period of time than if the degrees were taken separately. Applicants must apply to both programs.

## Admission Requirements for All Degrees

Prerequisites for admission to the MS occupational and environmental exposure sciences, toxicology, and environmental health programs and the MPH environmental and occupational health program include a bachelor's degree in science or engineering with coursework in biology, chemistry, calculus, and physics. Applicants with non-science majors are considered if the prerequisite courses have been completed. Competitive applicants typically have strong grades and Graduate Record Examination scores, a statement of personal goals consistent with the program, and supportive letters of reference.
Prerequisites for admission to the MPH Occupational and Environmental Medicine program include a doctoral degree (MD, DO or equivalent) with prior coursework in physics, chemistry, calculus, and biology. Concurrent residency applicants must satisfy additional prerequisites including graduation from a Class A medical school (United States, Canada, or equivalent) and completion of one year of approved internship. Three years in primary care specialty is also encouraged.

Prerequisites for admission to the PhD environmental and occupational hygiene and toxicology programs include a bachelor's degree in science or engineering with coursework in biology, chemistry, calculus, and physics. A master's degree in a related field is recommended for Ph.D. environmental and occupational hygiene applicants. Selection of an applicant is also based upon an honors-level GPA, a statement of personal goals consistent with the program, supportive letters of reference, and high scores on the Graduate Record Examination.

International applicants are also required to submit official scores for the Test of English as a Foreign Language (TOEFL). TOEFL scores of 580 (237 computer) or higher are required for admission to the MS, MPH, and PhD programs.

## Master of Public Health

Focuses on the recognition, assessment, and control of environmental and occupational hazards; the impact of these hazards on public health and society; and approaches to regulations, enforcement, and policy development.

## Degree Requirements

63 credits, as follows:

1. Core Requirements: EPI 511 (or EPI 512, EPI 513), BIOST 511 (or BIOST 517). MPH/MPA students are also required to take BIOST 512 (or BIOST 518), HSERV 510, and HSERV 511.
2. Required Courses: ENV H 405 (or ENV H 514, ENV H 515, and ENV H 516), ENV H 453 (or ENV H 553 or ENV H 551), ENV H 570, ENV H 577 (or ENV H 572 or ENV H 543), ENV H 446 (or ENV H 490, or ENV H 541, or ENV H 545, or ENV H 552, or ENV H 548). Courses in environmental health not chosen can be taken as electives.
3. Electives
a. Thesis Track: At least two additional 400- or 500-level departmental courses (minimum 6 credits).
b. Project Track: At least four additional 400- or 500-level departmental courses (minimum 9 credits).
4. Practicum: ENV H 599
5. Degree Project:
a. Thesis Track: ENV H 700
b. Project Track: ENV H 598

## Master of Science, Environmental Health

Students learn to identify sources of contamination in air, water, food, and soil, and on surfaces; how contamination
is spread; strategies to prevent or control effects on human health or environmental quality; and the means of communicating risk information to the public and health professionals.

## Degree Requirements

64 credits, as follows:

1. Core Courses: ENV H 580, ENV H 581, ENV H 583, ENV H 700, BIOST 511 (or BIOST 517 or higher), EPI 511
2. Required Courses: ENV H 405, ENV H 453, ENV H 541, ENV H 543 (or ENV H 577), ENV H 552, ENV H 594, ENV H 445 (or ENV H 446), ENV H 548, ENV H 545
3. Representative Electives: 9 graded elective credits, approved by the student's academic adviser.

## Master of Science, Occupational and Environmental Exposure Sciences

Students learn to quantify and manage human exposures to chemicals, air pollutants, aerosols, and physical agents found in a wide variety of community and occupational settings. The program emphasizes rigorous academic training, internships, career guidance, and practical skills needed for graduates to establish long-term careers as environmental health and safety professionals. A flexible curriculum offers options for either a thesis or professional portfolio alternative.

## Degree Requirements

63 credits, as follows:

1. Core Courses: ENV H 580, ENV H 581, ENV H 583, ENV H 700 (or appropriate section of ENV H 598, and ENV H 559, and appropriate section of ENV H 599) BIOST 512 (or BIOST 518, or higher), EPI 511. Higher level biostatistics and epidemiology courses can be substituted for BIOST 511 or BIOST 517, and for EPI 511.
2. Required Courses: ENV H 551, ENV H 553, ENV H 557
3. Learning Emphasis Required Courses:
a. Occupational Hygiene: ENV H 405, ENV H 555, ENV H 557, ENV H 560, ENV H 570
b. Ergonomics and Human Factors: ENV H 537, ENV H 549, ENV H 560, ENV H 566, ENV H 596
c. Health and Safety Management and Policy: ENV H 560, ENV H 577, ENV H 584, ENV H 599
d. Exposure Biomarkers: ENV H 405, ENV H 554, ENV H 570, ENV H 506, P BIO 506
4. Electives: Electives must be taken to satisfy the degree requirement of 63 total credits.

## Master of Science, Toxicology

Focuses on understanding the mechanisms of action of environmental chemicals and their effects on human health and in the environment. Research areas include chemical effects on organ systems (neurological, hepatic, renal, cardiovascular, reproductive, and respiratory) and also developmental toxicology, environmental carcinogenesis, and dietary chemoprotection. The program also offers a strong focus on human risk assessment as well as in toxicological issues that cross ecological and human health disciplines.

## Degree Requirements

63 credits, as follows:

1. Core Courses: ENV H 580, ENV H 581, EHV H 583, ENV H 700, BIOST 511 (or BIOST 517, or higher), EPI 511.
2. Required Courses: ENV H 514, ENV H 515, ENV H 516, ENV H 552, ENV H 577, BIOC 405, BIOC 406 (or BIOC 440, BIOC 441, BIOC 442), ENV H course in industrial hygiene or occupational medicine.
3. Representative Electives: Toxicology students who take the two-quarter biochemistry series (BIOC 405, BIOC 406) must have an additional 9 graded elective credits.

Students who choose the three-quarter biochemistry series (BIOC 440, BIOC 441, BIOC 442) must have an additional 3 graded elective credits. Electives must be approved by the student's academic adviser. Electives may include ENV H 511, ENV H 512, ENV H 531, ENV H 532, ENV H 533, ENV H 535, ENV H 550, ENV H 553, ENV H 555, ENV H 567, ENV H 570, ENV H 582, ENV H 584, ENV H 591, BIOL 403, BIOL 411, BIOST 521, C MED 407, MICROM 441, MICROM 442, MICROM 518, PATH 444, PATH 555, P BIO 500-level courses, P BIO 405, P BIO 406, P BIO 507, PEDS 512, PHCOL 401, PHCOL 402, PHCOL 403, PHCOL 527.

## Doctor of Philosophy, Environmental and Occupational Hygiene

Students in this program learn to identify, evaluate, and manage health risks found in a wide variety of community and occupational settings, obtaining advanced research training in exposure assessment and control methods.

## Degree Requirements

92 credits minimum, as follows:

1. Core Sciences (11-12 credits): Sequence of three cours es in one area, to be approved by adviser
2. Biostatistics (3 credits): BIOST 512 (or BIOST 518 or higher)
3. Epidemiology (4 credits): EPI 511 (or higher)
4. Environmental and Occupational Health Seminar (6 credits): ENV H 580
5. Dissertation (27 credits): ENV H 800
6. Lab Rotations (6-9 credits): ENV H 595
7. Required Courses:
a. Industrial Hygiene (6 credits): ENV H 553 and ENV H 555
b. Toxicology (3 credits): ENV H 405 (or more advanced)
c. Environmental Chemistry (3 credits): ENV H 552
d. Occupational and Environmental Epidemiology (3 credits): ENV H 570
e. Electives ( 20 credits): 10 elective credits are unspec ified and 10 must be in courses taught by Industrial Hygiene or Environmental Health program faculty.

## Doctor of Philosophy, Toxicology

Focuses on understanding the mechanisms of the action of environmental chemicals and their effects on human health and in the environment. Research areas include chemical effects on organ systems (neurological, hepatic, renal, cardiovascular, reproductive, and respiratory) as well as developmental toxicology, environmental carcinogenesis, and dietary chemoprotection The program also offers a strong focus on human risk assessment and toxicological issues that cross ecological and human health disciplines.

## Degree Requirements

104 credits minimum, as follows:

1. Core Sciences (11-12 credits): Sequence of three courses in one area, to be approved by adviser.
2. Biostatistics (3 credits): BIOST 512 (or BIOST518 or higher)
3. Epidemiology (4 credits): EPI 511 (or higher)
4. Environmental and Occupational Health Seminar (6 credits): ENV H 580
5. Dissertation ( 27 credits): ENV H 800
6. Lab Rotations (6-9 credits): ENV H 595
7. Required Courses:
a. Toxicology (9 credits): ENV H 514, ENV H 515, ENV H 516
b. Toxicology Seminar (9 credits): Of the 9 credits (minimum) of current topics courses, at least six credits must be in ENV H 591. The other credits can be chosen among other current topics courses offered by the Department of Environmental Health or other departments, with approval of student's advisory committee.
c. Advanced Toxicology: 6 credits from approved list
d. Physiology: 3 credits from approved list
e. Electives ( 20 credits): 10 elective credits are unspecified and 10 must be in courses taught by Industrial Hygiene or Environmental Health program faculty.

## Financial Aid

Support is available for many students in the form of traineeships or research assistantships, which include tuition. This support comes from federal and private sources awarded to the department or School.

## Research Facilities

Specialized laboratories exist for research in industrial hygiene chemistry, optical remote sensing of chemicals, industrial ventilation, ergonomics, trace organics and heavy metals, environmental microbiology, electron microscopy, controlled exposure to environmental agents, and toxicology (including toxicogenomics and analytical cytology). Field research is facilitated through an extensive consultationservice program conducted by this department for labor and industry in Washington state.

## COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations.
ENV H 111 Exploring Environment and Health Connections (3) I\&S Introduction to environmental health concepts. Examines current events to illustrate and better appreciate the relationship between environment and health and to explore whether an environmental condition is or is not an important threat to health. Emphasizes the roles of environmental scientists and related professionals. Offered: A.
ENV H 205 Environmental Health in Media (2) I\&S Explores how the perspective of filmmakers and documentaries can influence the public's interpretation of environmental health issues, and examines the science and cultural norms that support both sides of the argument. Offered: Sp.

ENV H 311 Introduction to Environmental Health (3) I\&S/ NW Relationship of people to their environment, how it affects their physical well-being and what they can do to influence the quality of the environment and to enhance the protection of their health. Emphasis on environmental factors involved in transmission of communicable diseases and hazards due to exposure to chemical and physical materials in our environment. Offered: ASp.
ENV H 405 Toxic Chemicals and Human Health ([0-3]-, max. 3) Examines the basic principles of toxicology and the effects of chemicals on human health. Includes mechanisms; dose/response relationships; toxicity testing, disposition in the body; modifiers of response; chemicals and cancer; birth defects; exposures in the home, workplace, and environment; and risk assessment and government regulation. Prerequisite: 2.0 in BIOL 220; either 2.0 in CHEM 224, 2.0 in CHEM 239, or 2.0 in CHEM 337. Offered: Sp.
ENV H 417 Children's Environmental Health (3) Discussion of environmental health issues as they pertain to children's health. Topics include historical perspective of public health research and policies directed at protecting children's health and emerging scientific and public health issues such as the risks and
benefits of seafood consumption during pregnancy the use of pesticides on food and in the home; air polIution and childhood asthma, and childhood injuries and the built environment. Offered: Sp .
ENV H 431 Environmental and Occupational Sampling and Analysis I (3) NW Laboratory and lecture on sampling. Field and laboratory analysis of chemical and physical agents found in the occupational and ambient environments. Prerequisite: minmum grade of 2.0 in each of the following: either CHEM 162 or CHEM 164; PHYS 114, which may be taken concurrently; ENV H 311. Offered: A.

ENV H 432 Environmental and Occupational Sampling and Analysis II (4) NW Laboratory and lecture on sampling. Field and laboratory analysis of chemical and physical agents found in the occupational and ambient environments. Prerequisite: ENV H 431. Offered: W.
ENV H 433 Environmental and Occupational Sampling and Analysis III (4) NW Laboratory and lecture related to the evaluation of water quality. The identification and analysis of microorganisms in water, food, and air. Prerequisite: ENV H 431; MICROM 301; MICROM 302. Offered: Sp.

ENV H 440 Water, Wastewater, and Health (3) Review of water supply, water quality, and water/wastewater treatment as they relate to human health. Includes water law and regulations, source water protection, basic treatment technologies for water and waste, chemical and microbial contaminants, and recreational water. Recommended: ENV H 311. Offered: A.
ENV H 441 Food Protection (3) Study of identification and characteristics of chemicals and biological agents implicated in foodborne disease outbreaks and conditions or circumstances by which food contamination occurs. Examination of food protection activities conducted by local and state government at the retail level. Prerequisite: either 2.0 in CHEM 155, or 2.0 in CHEM 162, or 2.0 in CHEM 164; 2.0 in MICROM 302. Offered: W.
ENV H 442 Zoonotic Diseases and Their Control (3) Examines the transmission and control of zoonotic and vector-borne diseases of public health importance in the United States and globally. Pays attention to identification, surveillance, and control methods. Prerequisite: 2.0 in BIOL 220. Offered: W.
ENV H 445 Solid Waste Management (3) Examination of the public health, environmental, economic, and materials conservation aspects of solid wastes management; amounts and sources of solid wastes, waste reduction and recycling, methods of storage, transportation and disposal, integrated waste management, identification of present problems and future needs. Prerequisite: 2.0 in CHEM 155, 2.0 in CHEM 162, or 2.0 in CHEM 164; either 2.0 in MATH 124, 2.0 in MATH 127, 2.0 in MATH 134, or 2.0 in MATH 144; recommended: PHYS 115. Offered: Sp.
ENV H 446 Hazardous Waste Management (3) Characterization of hazardous wastes and introduction to pertinent federal and state regulations. Discussion of exposure pathways and description of management options at pre-generation, pre-release, and post-release stages. Emphasis on public health significance. Supplemented with case studies. Prerequisite: either 2.0 in CHEM 155, 2.0 in CHEM 162, or 2.0 in CHEM 164; either 2.0 in MATH 112, 2.0 in MATH $124,2.0$ in MATH 127, 2.0 in MATH 234, or 2.0 in MATH 144; recommended: MATH 125; CHEM 224; PHYS 115. Offered: W.
ENV H 448 Community Air Pollution (3) Offers a comprehensive overview of community air pollution including: air pollution sources, chemistry, and meteorology; human health and environmental effects; global warming; air quality standards, monitoring, control,
and management; indoor air; and local air quality management. Offered: Sp.
ENV H 451 Ecology of Environmentally Transmitted Microbiological Hazards (3) Focuses on the transmission of infectious microorganisms by air, food, water, and other environmental media. Provides an introduction to environmentally transmitted pathogens, and discusses factors affecting their environmental fate, transport, and persistence. Offered: A.
ENV H 452 Detection and Control of Environmentally Transmitted Microbiological Hazards (3) Focuses on the detection and control of infectious microorganisms in air, food, water, and other environmental media. Provides a discussion on sample collection, processing, and detection for infectious microorganisms. Provides coverage of engineered controls and disinfection/decontamination processes for infectious microorganisms. Recommended: ENV H 451. Offered: W.
ENV H 453 Industrial Hygiene (3) Introduction to the principles and scientific foundation of industrial hygiene. Examines the anticipation, recognition, evaluation, and control of work place hazards to health and safety. Focuses on the first three functions, but includes some consideration of control methods. Prerequisite: BIOL 200; CHEM 224; either PHYS 115 or PHYS 122. Offered: A.

ENV H 460 Occupational Safety Management (3) Explores industrial organization and methods of integrating safety and industrial hygiene programs with industrial operations. Investigates issues related to industrial safety and health such as responsibility for safety, dependency on safe practice, and hierarchy of prevention. Offered: Sp.
ENV H 461 Air Pollution Control (4) Fundamental concepts of air pollution. Emission sources, atmospheric dispersion, ambient concentrations, adverse effects, governmental regulations, emission standards, airquality standards, processes and equipment for controlling emissions. Offered: jointly with CEE 490; A.

ENV H 462 Technical Aspects of Occupational Safety (3) Reviews federal OSHA (Occupational Safety and Health Administration) and state WISHA (Washington Industrial Safety and Heath Act) standards. Explores the impact of these regulations on industry, particularly construction. Upon completion of the course, students receive an OSHA 510 30-hour Construction Safety and Health certification. Offered: W.

ENV H 472 Environmental Risk and Society (3) I\&S Examines scientific determinations of environmental risks and explores how such determinations are evaluated by affected communities and society. Employs risk analysis to integrate technical knowledge in hazard identification and exposure assessment to provide a more rational basis for environmental policies. Role of public participation in risk-based decision making discussed. Offered: W.

ENV H 473 Environmental Health Policy and Practice (3) I\&S Explores how environmental health problems are controlled in the United States. Examines both the policies and practices of environmental health. Looks at how various government programs are established, organized, and operated to prevent or control hazards in the community. Also examines the legal and regulatory framework. Offered: Sp.

ENV H 480 Undergraduate Seminar (1, max. 6) Covers career exploration and planning within the environmental health major through presentation of current environmental and occupational health issues. Credit/ no-credit only. Offered: A.
ENV H 482 Environmental Health Internship (2-15, max. 15) Assignment to an environmental health or environmental protection agency for supervised observa-
tion and experience in environmental health technology, program planning, and utilization of community resources. Prerequisite: 2.5 in ENV H 311. Credit/ no-credit only. Offered: AWSpS.
ENV H 490 Selected Topics in Environmental Health (1-6, max. 20) In-depth study of a current environmental health topic. Offered: Sp .
ENV H 497 Environmental Health Special Electives (*) Offered: Sp.

ENV H 499 Undergraduate Research (*) Individual research on a specific topic in environmental health upon which specific conclusions, judgments, or evaluation can be made or upon which facts can be presented. Offered: AWSpS.
ENV H 510 Global Environmental and Occupational Health
(4) Provides an overview of environmental and occupational health, with major focus on developing countries. Examines a variety of environmental hazards and influential factors, interactions with human health and well-being, and relevance to public health. Considers workplace, community, home, regional, and global problems. Offered: W.

ENV H 511 Environmental and Occupational Health (1-3, max. 3) Effects of exposure to chemical, physical, and biological agents, embracing the community and workplace environments. Current issues, using specific cases from recent literature as basis for classroom discussion and written assignments. Offered: W.

ENV H 513 Basic Concepts in Pharmacogenetics and Toxicogenomics (3) Addresses current DNA sequencing and genotyping approaches, and basic concepts of pharmacogenetics and toxicogenomics. Emphasis placed on applications of genomic technologies to the understanding of "gene-environment interactions" that cause diseases of public health importance, including cancer, chronic neurological diseases, and adverse drug reactions. Offered: jointly with PGH 513/PCEUT 513

ENV H 514 Environmental and Occupational Toxicology I (3) Covers major topical areas in human and environmental toxicology, including the biochemical, cellular, and physiological mechanisms by which chemicals produce toxic responses; principles of toxicity testing; and nterpretation of toxicological data. Prerequisite: BIOL 212, BIOC 440, or permission of instructor. Offered: A.

ENV H 515 Environmental and Occupational Toxicology II (3) Focuses on organ system toxicology. Emphasizes the pathophysiology of toxicant-induced organ injury, including adaptive responses to toxicant exposure, inflammation, and tissue repair pathways. Prerequisite: ENV H 514 or permission of instructor. Offered: W.

ENV H 516 Environmental and Occupational Toxicology III (3) Covers major topical areas in human and environmental toxicology, including the toxicology of the major classes of chemicals (e.g., pesticides, metals, air pollutants, solvents, natural toxins); and principles of occupational and clinical toxicology. Prerequisite: ENV H 515 or permission of instructor. Offered: Sp.
ENV H 517 Children's Environmental Health (3) Discussion of environmental health issues as they pertain to children's health. Topics include historical perspective of public health research and policies directed at protecting children's health and emerging scientific and public health issues such as the risks and benefits of seafood consumption during pregnancy; the use of pesticides on food and in the home; air pollution and childhood asthma, and childhood injuries and the built environment. Offered: Sp.
ENV H 531 Neurotoxicology (3) Advanced discussions of the principles and methodological approaches
to neurotoxicology (including behavioral toxicology), classes of neurotoxic agents, types and mechanisms of neurotoxic effects, as well as the role of neurotoxicology in toxicology and public health. Prerequisite: ENV H 514, ENV H 515, ENV H 516 or ENV H 405 or permission of instructor. Offered: W, even years.
ENV H 532 Reproductive and Developmental Toxicology
(3) Investigates chemicals that can induce adverse reproductive and developmental outcomes. Discussion topics include identification and characterization of specific classes of toxic agents, mechanisms of action of these agents at the molecular and cellular level, and risk assessment and regulatory issues. Prerequisite: ENV H 514 and ENV H 515 or ENV H 405 or permission of instructor. Offered: S, even years.
ENV H 533 Molecular Toxicology (3) Advanced discussion of molecular mechanisms whereby chemical and biological agents produce their harmful effects on biological tissues. Topics include the role of xenobiotic biotransformation enzyme expression in chemical susceptibility, toxicogenomics, chemical-induced oxidative stress, alternative models, species differences, and dietary anti-carcinogens. Prerequisite: prior coursework in toxicology and biochemistry, or permission of instructor. Offered: Sp , odd years.
ENV H 534 Biochemical Toxicology of the Puget Sound (3) Advanced discussion of effects of pollutants on aquatic organisms at the molecular, biochemical, and physiological levels, and in the context of Puget Sound case studies. Topics include assessing toxicant-induced cell injury in aquatic organisms, biotransformation and detoxification pathways, toxicogenomics, assessing chemical diseases in fish, biomarkers, and zebrafish models. Prerequisite: prior coursework in toxicology and biochemistry or permission of instructor. Offered: W, even years.

ENV H 536 Health Impact Assessment (2) Examines the use of Health Impact Assessment as a public health tool for informing decision-makers about the potential health impacts of proposed projects and policies. Students learn the steps for conducting HIAs, review case studies, and conduct an HIA of a current local proposed project. Offered: jointly with URBDP 536; Sp.

ENV H 537 Introduction to Manufacturing Systems (3) Description of manufacturing systems. Includes discussion of current trends in manufacturing, especially lean principles. Introduces process flow analysis, manufacturing organizations including job-shop, assembly lines, and group technology, manufacturing inventory philosophies (just-in-time, MRP, OPT), work environment, and work simplification. Offered: jointly with IND E 537; A.

ENV H 538 Public Health and the Built Environment (2) Examines how the design of communities and land use and transportation decision have positive and adverse effects on health. Considers built environment impacts on physical activity, obesity, air quality, injuries, mental health, social capital, and environmental justice; and explores interventions to promote healthy community design. Offered: jointly with URBDP 538; W.
ENV H 541 Ecology of Environmentally Transmitted Microbial Hazards (3) Focuses on the transmission of infectious microorganisms by air, food, water, and other environmental media. Provides an introduction to environmentally transmitted pathogens, and discusses factors affecting their environmental fate, transport, and persistence. Offered: A.
ENV H 542 Detection and Control of Environmentally Transmitted Microbial Hazards (3) Focuses on the detection and control of infectious microorganisms in air, food, water, and other environmental media. Provides a discussion on sample collection, processing,
and diction for infectious microorganisms. Provides coverage of engineered controls and disinfection/decontamination processes for infectious organisms. Offered: W.

ENV H 543 Quantitative Microbial Risk Assessment (3) Focuses on the principles of quantitative risk as sessment as applied to infectious microorganisms. Covers hazard identification, exposure assessment, health effects assessment, risk characterization, and risk communiation. Offered: Sp , even years.

ENV H 545 Water, Wastewater, and Health (4) Review of water supply, water quality, and water/wastewater treatment as they relate to human health. Includes water law and regulations, source water protection, basic treatment technologies for water and waste, chemical and microbial contaminants, and recreational water. Offered: A.
ENV H 546 Pesticides and Public Health (3) Examines health risks and benefits associated with pesticide use in the United States and internationally; reviews exposure, toxicity, epidemiology, and regulation of pesticides, focusing on populations such as workers and children; discusses benefits derived from vector control, food production, and food preservation. Of fered: W, odd years

ENV H 548 Community Air Pollution (3) Offers a comprehensive overview of community air pollution includ ing: air pollution sources, chemistry, and meteorology; human health and environmental effects; global warming; air quality standards, monitoring, control, and management; indoor air; and local air quality management. Prerequisite: SPH graduate student or permission. Offered: Sp.

ENV H 549 Human Factors in Engineering Design (3) Engineering considerations of the abilities and limitations of the human aspect in the design of operational systems and components. Functional, psychological, physiological, and environmental considerations. Covers traditional human factors material with a project-based focus/emphasis. Offered: jointly with IND E 549; Sp.
ENV H 551 Principles of Human Exposure Science (3) Ex amination of the scientific principles and methods used to characterize human exposures to environmental disease agents, discuss sources and pathways of exposure, use of standard factors, analytical approaches for exposure data, exposure biomarkers, and the energetics of physical agents and injuries. Prerequisite: CHEM 162; MATH 124. Offered: A.
ENV H 552 Environmental Chemistry of Pollution (4) Chemical and physical processes determining distribution and fate of chemical hazards, detection of low levels of hazardous compounds, and environmental evaluation and prediction. Fundamental chemical concepts and measurable properties of individual compounds to interpret and relate measurements. Prerequisite: admission to graduate program or permission of instructor. Offered: W.
ENV H 553 Environmental Exposure Monitoring Methods (4) Provides an in-depth understanding of current monitoring methods for occupational, residential, and community exposures to hazardous chemical agents. Examines the technical basis for sampling strategies and sampling and analytical methods for chemicals in air, water, food, and soil, and for biological markers of exposure and effect in humans and other biota. Prerequisite: ENV H 453 or permission of instructor. Offered: W.
ENV H 554 Biological Monitoring for Chemical Exposure (2) Advanced seminar on biological monitoring for assessment of chemical exposure and health risks from environmental agents. Considers applications and interpretation of results from analysis of biologi-
cal specimens taken from persons exposed to chemicals in the work place and the general environment. Prerequisite: ENV H 551 or permission of instructor. Offered: Sp, odd years.
ENV H 555 Instrumental Methods for Industrial Hygiene Measurement: Laboratory (3) Utilizes typical instrumental techniques and analytical methods for the evaluation of potential occupational exposures. Prerequisite: ENV H 453 and ENV H 553 or permission of instructor. Offered: Sp.
ENV H 556 Quantitative Occupational Exposure Analysis (3) Exploration of industrial hygiene data to understand nature of airborne exposures in the occupational environment, and their interpretation for human health. Focus on reading and discussion of primary exposure assessment literature and statistical analysis of real dataset. Prerequisite: one quarter of statistics or biostatistics and basic industrial hygiene. Offered: W, odd years.
ENV H 557 Exposure Controls (3/4) Presents engineering concepts for selecting exposure controls for chemical, physical, and biological agents. Topics include regulatory mandates, hazard rating strategies, protective clothing, respiratory protection, chemical safety management, building ventilation, local exhaust ventilation, chemical and biohazards controls, airflow measurements, and ventilation troubleshooting. Offered: W.

ENV H 559 Applied Occupational Health and Safety (3) Application of occupational safety and health principles. Student teams perform evaluations, assess production methods/processes and exposures, health and safety procedures and programs, and develop engineering and administrative controls. Students perform on a consulting project with a local company including budgeting, project reporting, and presentation. Offered jointly with IND E 567 and NSG 505. Offered: Sp, even years.

ENV H 560 Occupational Safety Management (4) Explores industrial organization and methods of integrating safety and industrial hygiene programs with industrial operations. Investigates philosophic issues related to industrial safety and health such as responsibility for safety, dependency on safe practice, and hierarchy of prevention. Contains numerous case problems and student involvement opportunities. Offered: jointly with NSG 506; Sp.

ENV H 562 Technical Aspects of Occupational Safety (3) Reviews federal OSHA (Occupational Safety and Health Administration) and state WISHA (Washington Industrial Safety and Health Act) standards. Explores the impact of these regulations on industry, particularly construction. Upon completion of the course, student receive an OSHA 510 30-hour Construction Safety and Health certificate. Offered: jointly with NSG 507; W.
ENV H 564 Recognition of Health and Safety Problems in Industry (2) Develops skills in occupational health and safety hazard recognition in a variety of important Northwest industries. Focuses on process understanding and hazard recognition skills during walkthrough inspections of several local facilities, stressing a multidisciplinary approach. Offered: jointly with IND E 564; A.

ENV H 566 Introduction to Ergonomics (3) Basic principles of ergonomics in work environment applied to problems of worker and management. Topics include measurement of physical work capacity, problems of fatigue and heat stress, applied biomechanics, work-er-machine interactions and communication, design of displays and controls. Prerequisite: basic human physiology or permission of instructor. Offered: jointly with IND E 566/NSG 508; W.

ENV H 567 Mechanisms of Carcinogenesis (2) Lectures/ presentations of biochemical and molecular basis of carcinogenesis induced by environmental agents, including approaches to identification of carcinogens. Role of cell proliferation and cell death (apoptosis) in cancer formation and cancer treatment. Molecular mechanisms that regulate proliferation and apoptosis. Prerequisite: ENV H 516, ENV H 405, or permission of instructor. Offered: jointly with PHCOL 567; A, even years.
ENV H 568 Molecular Epidemiology of Infectious Diseases (2) Application of molecular typing techniques to study of microbial pathogens to increase understanding of epidemiology of infectious diseases. Brief review of molecular biology. Evaluation of methods used in outbreaks and epidemics reported in literature. Prerequisite: ENV H 511 or ENV H 512 or permission of instructor. Offered: jointly with EPI 568/PABIO 568; W.

ENV H 569 Occupational Biomechanics (4) Lectures and laboratories address human occupational biomechanical and physiological limits and measurement, analysis, and modeling techniques that are used by ergonomists for design of safe, healthful, and productive physical work. Prerequisite: ENV H 566 or permission of instructor. Offered: jointly with IND E 569; Sp, even years.
ENV H 570 Occupational and Environmental Epidemiology (3) Research in occupational and environmental determinants of disease. Defining exposed populations, characterizing exposure levels, estimating disease risks relative to exposure. Cohort, case-control, cross-sectional designs for various health outcomes. Applications to exposure standard setting and risk assessment. Prerequisite: EPI 511 or EPI 512, EPI 513 or permission of instructor. Offered: jointly with EPI 570; Sp.
ENV H 571 Neuroepidemiology and Environmental Risk Factors (3) Focus on neurologic diseases and etiology. Presentation of descriptive epidemiology, clinical features, and risk factors, including stroke, Parkinson's disease, Alzheimer's disease, multiple sclerosis, and other disorders. Discussion of NIH grantsmanship. Guest experts present some topics. Recommended: either EPI 511 or equivalent. Offered: jointly with EPI 571; W, odd years.
ENV H 572 Environmental Risk and Society (3) Examines environmental health risk assessments and explores how such assessments are viewed by affected communities. Reviews scientific risk assessment methods, risk perception, risk communication, and public participation processes. Examines the influence of advocacy and special-interest publications on risk assessment debates. Offered: W.

ENV H 573 Methods and Issues in Using Biological Measurements in Epidemiologic Research (3) Introduction to use of measurements from biological specimens in epidemiologic studies. Prepares epidemiology and laboratory science students for conduct of interdisciplinary human studies. Evaluation of biomarkers, preliminary studies, methodologic issues, quality control. Brief review of molecular biology. Applications and current literature discussed. Prerequisite: EPI 511 or EPI 512. Offered: jointly with EPI 573; A.
ENV H 574 Probabilistic Exposure Analysis (3) Examination of probabilistic (in contrast to deterministic) approaches to prediction of human exposure to environmental contaminants including explicit separation of population variability from uncertainty due to ignorance. Discussion of data needs, pitfalls, policy ramifications, and current state of development and regulatory acceptance. Examples from real world. Student project required. Offered: Sp , odd years.

ENV H 576 Clinical Occupational Medicine (2) For clinicians in training, comprehensive overview of occupational disease principles, occupational history-tak ing, and the provider's role in workers' compensation. Epidemiologic evidence and pathophysiologic basis for occupational diseases reviewed, emphasizing organ system approach to diagnosis and management. Prerequisite: occupational medicine or preventive medicine residents/fellows, nursing students, or permission of instructor. Offered: S.

ENV H 577 Risk Assessment for Environmental Health Hazards (3/4) Examines context, methodologies, data, uncertainties, and institutional arrangements for risk assessment. Qualitative and quantitative approaches to identification, characterization, and control of environmental hazards to health emphasized through didactic and case studies. Offered: jointly with CEE 560/PB AF 589; A.
ENV H 580 Environmental and Occupational Health Sciences Seminar (1, max 6) Presentation of current environmental and occupational health research and issues. Credit/no-credit only. Offered: AWSp.

ENV H 581 Environmental Health Reading (1) Critical reading of selected basic and applied research publications on environmental health problems and programs.
ENV H 583 Thesis Research Proposal Preparation (1) Includes reviewing components of research proposals and practicing writing and developing effective aims, hypotheses, background materials, and analytic strategies for writing theses and presenting at scientific meetings. Offered: Sp.
ENV H 584 Occupational and Environmental Health: Policy and Politics (3) Provides an understanding of the policy process and policy issues in occupational and environmental health and safety, including exploring the relationships between science, values, and politics in the process of setting public policy. Offered: Sp.
ENV H 587 Introduction to Biopharmaceutical Product Development (3) Provides a framework of the drug development process and its regulation. Prerequisite: ENV H 405 or ENV H 514, ENV H 515, and ENV H 516, or PCEUT 501, PCEUT 502, and PCEUT 503; or equivalent, or instructor permission. Offered: jointly with PCEUT 587; A, even years.

ENV H 590 Selected Topics (1-6, max. 20) In-depth study of a current environmental health topic.
ENV H 591 Current Topics in Toxicology (1, max. 6) Provides in-depth examination of current topics in environmental and occupational toxicology taken from journal articles and seminars. Consists of presentations led by outside speakers, students, post-doctoral fellows, and faculty. Students expected to participate actively in discussion. Assigned weekly readings given according to the schedule of seminar speakers and topics.

ENV H 592 Current topics in Occupational Health Sciences (1/3) Weekly discussion of current research on a broad range of topics relevant to occupational and environmental health including exposure assessment, occupational epidemiology, occupational hygiene, and control of environmental hazards. Presentations and discussion sessions designed to help students organize and prepare a critical analysis of research findings. Credit/no-credit only. Offered: A.
ENV H 593 Current Topics in Risk Assessment (1, max. 6) Examines current topics in risk assessment and risk communication with a focus on issues in environmental health. Consists of presentations led by students, postdoctoral fellows, and faculty. Students expected to participate actively in discussion. Credit/ no-credit only. Offered: AWSp.

ENV H 594 Current Topics in Environmental Health (1, max.
2) Critical review and discussion of current scientific literature of particular relevance to the Environmental Health program. Primary presentations rotate among faculty and students. Credit/no-credit only. Offered: W.
ENV H 595 Research Rotation (3, max. 9) Research laboratory rotation for pre-doctoral graduate students. Students commit at least 10 hours per week to a laboratory research project aimed at introducing the student to current methods of laboratory research, and to familiarize the student with specific faculty research interests. Prerequisite: graduate standing and permission of program director.
ENV H 596 Current Issues in Occupational and Environmental Medicine (2, max. 12) Interdisciplinary seminar on current and emerging topics in the practice of environmental and occupational health. Faculty- and student-led presentations with an interdisciplinary focus, including occupational hygiene, nursing, and medical issues. Prerequisite: environmental health graduate student, occupational health nursing student, or permission of instructor. Offered: jointly with NURS 580; AWSp.
ENV H 597 Case Studies in Environmental and Occupational Health (1) Discusses clinical cases, recent journal articles, and global environmental health scenarios relevant to the clinical practice of environmental and occupational health. Explores collaborative management of environmental and occupational healthrelated illnesses and navigation of complex environmental health scenarios through real-world cases and critical analysis of published literature. Offered: AWSp.

ENV H 598 Degree Program Project/Portfolio (1-9-, max. 18) Supervised project work on a topic related to student's concentration in graduate study that results in a paper. Offered: AWSpS.

ENV H 599 Field Studies (2-6, max. 6) Assignment to an environmental research or service program to develop field research and evaluation skills. Credit/nocredit only. Offered: AWSpS.
ENV H 600 Independent Study or Research (*) Prerequisite: permission of departmental adviser. Offered: AWSpS.
ENV H $\mathbf{7 0 0}$ Master's Thesis (*) Prerequisite: permission of departmental adviser. Offered: AWSpS.

ENV H 800 Doctoral Dissertation (*) Prerequisite: permission of departmental adviser. Offered: AWSpS.

## Epidemiology

## GRADUATE PROGRAM

Epidemiology Program Office
F262 Health Sciences, Box 357236
(206) 685-1762 or (206) 543-8226
epi@uw.edu
depts.washington.edu/epidem

The Department of Epidemiology offers the following three graduate degrees: Doctor of Philosophy, Master of Science, and Master of Public Health, for individuals intending to become academicians, highly qualified research specialists, or well-trained public health practitioners, respectively. The department also offers a number of degree tracks within the degree programs, as well as several graduate certificates.

The Master of Public Health (MPH) degree in epidemiology requires coursework in health services and environmental health, in addition to epidemiology and biostatistics, as well as a thesis and a practicum as preparation for a career in public health practice or as a prelude to the PhD program. Three tracks are available: the General track, which is selected by most students; the Maternal and Child Health track (MCH); and the Global Health track (GH). The MCH and GH tracks require coursework in the respective specialty areas in addition to the requirements of the General track, and have work experience prerequisites for admission. (The epidemiology Global Health track is not the same as the MPH in Global Health through the Global Health Department, but incorporates some of the same classes.)
Formal concurrent degree programs involving the MPH (epidemiology) include the following: Doctor of Medicine (MD), Doctor of Philosophy (PhD) in Anthropology, Master of Arts in International Studies (MAIS), and Master of Public Affairs (MPA)

The Master of Science (MS) degree in epidemiology requires concentration on courses and research in epidemiology and biostatistics as preparation for a research specialization or as a prelude to the PhD program. It also requires electives from the School of Public Health. Two tracks are available, the General track and the Clinical Research track. A formal concurrent degree program combines the epidemiology General track MS with the PhD in Molecular and Cellular Biology. Applicants interested in an MS in genetic epidemiology, administered by the Institute for Public Health Genetics (a School of Public Health program that is not part of the Department of Epidemiology), should visit depts.washington.edu/phgen/degreeprograms/MSGE_degree.shtml.

The requirements for the PhD degree in epidemiology differ from the MS program requirements primarily in the scope and complexity of research for the dissertation. Coursework includes a core series in epidemiology and biostatistics. Electives in substantive disease and exposure areas, as well as research methods, are required. Requisite general electives from the School of Public Health are also part of the curriculum. MD students at the UW may apply for formal concurrent MD and PhD degrees.

An informal concurrent degree program involving the MPH, MS, or PhD in epidemiology and another graduate or professional degree at the UW may be pursued with the permission of both departments.
The Epidemiology Department and other School of Public Health departments offer several graduate certificate programs open to any qualified graduate student at the University (sph.washington.edu/prospective/edprograms. asp\#cert). Some certificate programs are open to Graduate Non-Matriculated students, if indicated on the certificate websites. Following is a partial listing of certificate programs:

- Advanced Clinical Research Methods: depts.washington.edu/epidem/Certificates/acrc.shtml (May not be combined with epidemiology PhD degree at UW)
- Basic Clinical Research Methods: depts.washington. edu/epidem/Certificates/bcrc.shtml (May not be combined with epidemiology PhD degree at UW)
- Global Health Graduate Certificates: globalhealth.wash-ington.edu/academics/certificates-and-fellowships
- HIV and Sexually Transmitted Infections
- Global Injry and Violence
- Global Heath of Women, Adolescents, and Children
- General Global Health
- Maternal and Child Health: depts.washington.edu/mchprog/certificate/
- Public Health Genetics: depts.washington.edu/phgen/ certificateprogram/Certificate.shtml
- Statistical Genetics: www.stat.washington.edu/statgen/index.php?page=certificate (Offered by the Biostatistics department)

## Admission Requirements for All Degrees

Admission to all graduate programs is highly competitive and is based on the following:

1. Background in epidemiology or other health-related fields (such as medicine, health or biological sciences, mathematics, quantitative social sciences), including prior areas of study and work experience, especially quantitative public health research
2. Undergraduate and graduate grades (if applicable)
3. GRE scores (exceptions are often made for master's degree applicants with a prior PhD, MD, DO, DDS, DVM, or equivalent health-related degree from a U.S. university; MD/MPH applicants at UW; and MD/ PhD applicants funded by the Medical Scientist Training Program at UW. No exceptions to GRE requirement are made for PhD program applicants.).
4. TOEFL or IELTS score from international ap plicants, unless bachelor's degree taught entirely in English
5. Letters of reference

## Master of Public Health

## Degree Requirements

Minimum 63 credits, as follows:

1. 45 to 49 course credits
2. Core Courses: 33 graded credits, including EPI 512 (4), EPI 513 (4), EPI 514 (4), BIOST 511 (4), BIOST 512 (4), BIOST 513 (4), ENVH 511 (4), HSERV 510 (3), HSERV 511 (3).BIOST 517-BIOST 518 may be substituted for BIOST 511, BIOST 512, BIOST 513
3. EPI 510 (2), a prerequisite for EPI 514, is required for students without substantial SAS or Stata programming experience
4. Electives: 6 credits of EPI course electives of 2 or more credits each (See acceptable electives in the appropriate degree checklist at depts.washington.edu/epidem/ CurrentStudents)
5. 3 to 6 credits ( 120 to 240 hours) in a field based practicum (EPI 595)
6. 9 to 18 thesis (EPI 700) credits
7. Students may enroll in additional elective courses in epidemiology and other courses with substantial public health content with departmental approval, and for independent study (EPI 600) to bring the total to 63 credits. Public health-related 400-level courses taken as a graduate student at the UW may count toward total credits with departmental approval. Coursework without substantial public health content, and at the 300-level or below, does not count toward the degree.

MPH Specialized Program Options: The MPH degree offers specialized tracks as listed below. They have additional admission and course requirements detailed at the program websites.

- Global Health Track: Requires approximately two years of prior health science work experience in a developing country to be eligible. Applicants without this experience may apply to the General track and the Global Health certificate listed above, which combined offer the equivalent training. More information about the Global Health track is at depts.washington.edu/epidem/program/globalhealth.shtml.
- Maternal and Child Health Track: Requires approximately two years of prior U.S. MCH experience to be eligible. Applicants without this experience may apply to
the General track and the MCH certificate listed above, which combined offer the equivalent training. More information about the MCH track is at depts.washington. edu/mchprog/academic/.

## Master of Science

## Degree Requirements

60 credits, to include:

## 1. 36 to 40 course credits

2. Core Courses: 24 graded credits, including EPI 512 (4), EPI 513 (4), EPI 514 (4), BIOST 511 (4), BIOST 512 (4), BIOST 513 (4). BIOST 517-BIOST 518 may be substituted for BIOST 511, BIOST 512, BIOST 513.
3. EPI 510 (2), a prerequisite for EPI 514, is required for students without substantial SAS or Stata programming experience.
4. Electives: 6 credits of EPI course electives of 2 or more credits each. (See acceptable electives in the appropriate degree checklist at depts.washington.edu/epidem/ CurrentStudents)
5. School of Public Health Electives: Two additional 500-level courses (2 or more credits each) in any department of the School of Public Health (including Epidemiology) or other UW courses with significant public-health content. (See acceptable electives in the appropriate degree requirements checklist at depts. washington.edu/epidem/CurrentStudents.)
6. 9 to 18 thesis credits (EPI 700)

Students may enroll in additional elective courses in epidemiology and other relevant departments, and for independent study (EPI 600) to bring the total to 60 credits. Public health-related 400-level coursework taken as a graduate student at the UW may count toward total credits with departmental approval. Coursework unrelated to public health and at the 300-level or below does not count toward the degree

## MS Specialized Program Options

MS Clinical Research Track:Intended chiefly for professionals who have already completed clinical training and who plan to conduct research with patients in healthcare settings as a significant part of their future careers. For specific coursework requirements, visit the program website at depts.washington.edu/epidem/program/cr.shtml.

## Doctor of Philosophy

Produces academics who are highly qualified as independent investigators, teachers, and practitioners. The curriculum includes courses on epidemiologic methods, biostatistics, and the epidemiology of specific diseases or risk factors. A dissertation project consisting of hypothesisdriven independent research, involving data collection and analysis, is the most important aspect of training. A master's degree in health sciences or related field is required for enrollment in the PhD program.

## Admission Requirements Specific to the PhD

1. Admission requirements listed here are in addition to the admission requirements for all degrees listed above.
2. Master's degree in epidemiology or other health-related field, including mathematics and quantitative social sciences. A prior doctorate without a health-related master's degree is not acceptable. An applicant with a doctorate only and no master's degree should apply to the MS or MPH first. All courses and credits from the MS or the MPH in the Department of Epidemiology at the UW count directly toward the PhD.
3. GRE from all applicants, including those who hold a U.S. doctorate, except MSTP MD students at UW.
4. An applicant should research the interest areas of appropriate Department of Epidemiology faculty, but do not need to locate a faculty mentor in advance.

## Degree Requirements

Minimum 90 total credits, to include the following courses, credits, and waivers:

1. Minimum reduced to 60 credits for students with a prior relevant master's degree (All course requirements must be satisfied even if more than 60 credits are needed to do so.)
2. 54 to 66 course credits
3. Core Courses: 32 graded credits including EPI 512 (4), EPI 513 (4), EPI 514 (4), EPI 515 (4), EPI 536 (4) EPI 537 (4), BIOST 517 (4), BIOST 518 (4). BIOST 511, BIOST 512, BIOST 513 may be substituted for BIOST 517-BIOST 518.
4. EPI 510 (2), a prerequisite for EPI 514, is required for students without substantial SAS or Stata programming experience.
5. Required Non-graded Courses: EPI 528 (3), three quarters of EPI 584 (1 credit each), EPI 588 (2)
6. Minimum three required epidemiology electives (minimum 2 credits each). (See acceptable electives in the appropriate degree checklist at depts.washington. edu/epidem/CurrentStudents/.)
7. Three additional electives (minimum 2 credits each) from any department of the School of Public Health, including Epidemiology, or other UW courses with significant public health content
8. Students are encouraged to take EPI 583 (1) each quarter of the first year and EPI 591 (1) each quarter after the first year.
9. Dissertation: 27 credits of EPI 800
10. The student's Supervisory Committee may require additional courses to ensure that the student has adequate training in the area of epidemiology he or she is pursuing.
11. Additional epidemiology courses and EPI 800 credits, independent study (EPI 600), and courses with substantial public health content offered by other departments or schools (with permission), may be applied to the total PhD credits. Public health-related, 400-level coursework taken as a graduate student at the UW may count toward total credits with departmental approval. Coursework unrelated to public health, and at the 300-level or below does not count toward the degree.

## Financial Aid

Research assistantships for work on various projects provide salary and tuition waivers for students working 20 hours/week. Although funding is not guaranteed with admission, the majority of new PhD and about half of master's students find a research assistantship before the start of autumn quarter. Research training stipends with partial tuition support are available on a limited basis, especially for more advanced doctoral students. Teaching assistantships are available competitively for second-year and higher-level students.

## Research Facilities

University facilities include an excellent library system and access to computers. Many varied opportunities for field research and practica are provided in Seattle and elsewhere in the state and nation, at institutions such as Seattle Children's Hospital, Fred Hutchinson Cancer Research Center, Group Health Research Institute, Harborview Medical Center, the Center for AIDS and STD, Public Health: Seattle-King County, Washington State Department of Health, VA Puget Sound Healthcare Systems, and many
other local health institutions. Cooperating organizations focusing on global health also are available in Seattle and internationally. Additional, but not exhaustive, lists of cooperating agencies are at depts.washington.edu/epidem/ research/Other_Institutions.shtml.

## COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations.
EPI 405 Physical Activity in Health and Disease (3) Duncan Impact of physical activity on individual and public health. Overview of physiological adaptations to activity, exercise prescription, exercise epidemiology, and prevention of chronic diseases. Public health recommendations for activity in the U.S. population, and the effects of the built environment on activity. Prerequisite: either BIOL 118 or BIOL 180. Offered: Sp.
EPI 420 Introduction to Epidemiology (3) NW Goldberg For the undergraduate student wishing to devote only one quarter to a course in epidemiologic methods. Description of ways in which variation in disease occurrence is documented and how that variation is studied to understand causes of disease. Offered: WSp.
EPI 497 Epidemiology Special Electives (*) Off-campus course for medical students. Offered: AWSpS.

EPI 499 Undergraduate Research (*) Offered: AWSpS.
EPI 502 Physical Activity in Health and Disease (3) Duncan Impact of physical activity on individual and public health. Overview of physiological adaptations to activity, exercise prescription, exercise epidemiology, and prevention of chronic diseases. Public health recommendations for activity in the U.S. population, and the effects of the built environment on activity. Prerequisite: either BIOL 118 or BIOL 180. Offered: jointly with NUTR 505; Sp.
EPI 503 Applied Epidemiology in Public Health Practice (3) Baseman Introduces the principles, methods, and issues in public health practice-based epidemiology. Covers public health surveillance, outbreak and cluster investigation, community health assessment, screening, evaluation, and other select topics. Offered: jointly with HSERV 503; Sp.
EPI 504 Health Needs Assessment (3) Bell Covers key methods and principles for needs assessment. Recommended for students who plan to monitor and measure the health of populations, plan health services, or make decisions about health resource distribution. Offered: jointly with HSERV 530.
EPI 505 Prevention of Healthcare Associated Infections (1) Lynch Uses a multidisciplinary approach to understanding, measuring, and developing policy to prevent healthcare associated infections. Offered: jointly with MED 540; W.
EPI 507 HIV and STIs in Women and Children (3) JohnStewart, Singh Examines the emerging global public health crisis and the plight of women and children with HIV/STIs. Reviews targeted approaches pertaining to women and children and their vulnerability to HIV/STIs. Prerequisite: EPI 511 or EPI 512, EPI 513. Offered: jointly with G H 564/OB GYN 590; Sp.
EPI 510 Epidemiologic Data Analysis (3) Hawes, Winer Intended for students planning to take EPI 514. Introduces concepts and programming skills necessary to analyze data sets for case-control and cohort studies. Provides students hands-on experience in using epidemiologic data sets for stratified analyses with SAS and Stata. Credit/no-credit only. Prerequisite: EPI 511 or EPI 512. Offered: W.

EPI 511 Introduction to Epidemiology (4) Kukull Epidemiologic methods for non-epidemiology majors. Focuses on research designs and methods to describe disease occurrence and risk factor associations; uses quantitative and biomedical information to infer whether causal relationships exist between potential causes and disease in populations. Offered: A.

EPI 512 Epidemiologic Methods I (4) Holt, Rowhani, Weiss Considers principles and methods of epidemiology. Covers measures of disease frequency, descriptive epidemiology, overview of study designs, measures of excess risk, causal inference, screening, measurement error, misclassification, effect modification, and confounding. First in a two course sequence. Prerequisite: BIOST 511, which may be taken concurrently, or equivalent. Offered: A.
EPI 513 Epidemiologic Methods II (4) Holt, Rowhani, Weiss Considers how epidemiologic studies may be designed to maximize etiologic inference. Covers infectious disease epidemiologic studies, randomized controlled trials, cohort studies, case-control studies, cross-sectional studies, ecological and multilevel studies, and selected topics such as meta-analysis. Second in a two course sequence. Prerequisite: EPI 512. Offered: W.

EPI 514 Application of Epidemiologic Methods (4) Hawes, Mueller Practical experience in analysis of data. Students analyze data sets currently on file using contemporary epidemiologic methods as taught in EPI 512 and EPI 513. Prerequisite: EPI 510 or experience in statistical programming; EPI 512, EPI 513, and epidemiology major. Offered: Sp.
EPI 515 Advanced Epidemiologic Methods (4) Guthrie, Phipps Introduces advanced epidemiologic methods, including causal modeling, inverse probability weighting, propensity scores, sensitivity analysis, imputation for missing data, approaches to multiple comparisons, Bayesian adjustment of risk estimates, recursive portioning, and modeling for prediction. Prerequisite: EPI 512; EPI 513; EPI 514; EPI 536/ BIOST 536. Offered: jointly with BIOST 519; Sp.
EPI 516 Statistical Methods in Genetic Epidemiology (3) Weir Theory and application of statistical techniques used in genetic epidemiology. Includes discussion of association studies, linkages, and segregation analyses. Examples stressed with reference to assumptions and limitations. Prerequisite: either BIOST 513 or BIOST 518; PHG 511/EPI 517; or permission of instructor. Offered: jointly with BIOST 516/PHG 519.

EPI 517 Genetic Epidemiology (3) Austin Research methods for evaluating genetic influences on disease and risk factors and genetic-environmental interactions. Study designs and statistical methods include twin studies, family studies, population-based association studies, segregation analysis, and linkage analysis. Prerequisite: EPI 511, BIOST 511, and GENOME 371, or equivalent. Offered: jointly with PHG 511; Sp.
EPI 518 Computer Demonstrations in Genetic Epidemiology (2-4, max. 4) Edwards Demonstrations and use of computer programs designed specifically for analysis of genetic epidemiologic data, including heritability, segregation, and sib-pair linkage analysis. Discussions focus on interpretation of results. Laboratory sections apply methods to data provided by instructor. Offered: jointly with PHG 518.
EPI 519 Epidemiology of Cardiovascular Disease (3) Psaty, Siscovick Principles, methods, and issues in the epidemiology of cardiovascular disease. Focuses on coronary heart disease and its major risk factors; also covers other topics such as stroke and sudden death. The format includes informal lectures and discussions of the current literature. Prerequisite: EPI 511 or EPI 512, EPI 513. Offered: A.

EPI 520 Epidemiology of Infectious Diseases (3) Manhart Infectious diseases from a public health perspective. Topics include analytic methods, study design, outbreak investigations, surveillance, vaccine evaluations, global eradication, screening, modeling, and infectious causes of chronic diseases. Homework and discussion based on current examples from the published literature. Prerequisite: EPI 511, EPI 512, or permission of instructor. Offered: W.
EPI 521 Epidemiology of Maternal and Child Health Problems ([3-4]-, max. 4) Enquobahrie Contributions to understanding and prevention of major maternal and child health problems, including pregnancy outcome, infant and child morbidity and mortality, maternal morbidity and mortality, abnormal child growth and development, and early-life factors in adult health problems. Prerequisite: graduate, medical, or dental school standing and EPI 511 or EPI 512 or permission of instructor. Offered: jointly with HSERV 542; W.
EPI 522 Reproductive Epidemiology (3) Holt Focuses on female reproductive system conditions and diseases, non-birth pregnancy outcomes, and impact of pregnancy on later health. Presentation of current epidemiologic knowledge and discussion of methodologic issues on topics including the menstrual cycle; contraception; infertility; spontaneous and induced abortion; and uterine and ovarian disease. Prerequisite: either EPI 511, both EPI 512 and EPI 513, or permission of instructor. Offered: $S p$, even years.
EPI 524 Epidemiologic Studies of Cancer Etiology and Prevention (3/4) Li Current knowledge of the role of environmental/lifestyle factors and genetic susceptibility in the etiology of several cancers with an emphasis on study design. Prerequisite: either EPI 511 or EPI 512; concurrent enrollment in EPI 513. Offered: W.
EPI 527 Vaccines (3) Wald Overview of issues in vaccine development, clinical trials, implementation of vaccination programs, and the role of vaccines in the control of infectious diseases. Emphasizes current issues and real-world challenges in the vaccine field and features critical reading of the literature. Prerequisite: either EPI 511, EPI 512, or EPI 513. Offered: A.

EPI 528 Exposure Measurement in Epidemiology (3) White Principles and methods of measuring exposures (risk factors) in epidemiological studies. Questionnaire design; quality-control procedures for interviews, record abstraction, and lab methods; validity and reliability of measures; effects of measurement error; maximizing response rates; measurement of specific exposures. Credit/no-credit only. Prerequisite: EPI 513. Offered: Sp.

EPI 529 Emerging Infections of International Public Health Importance (3-, max. 3) Focuses on the nexus between emerging infections and increasing globalization of the world due to the mobility of people and goods. Examines emergent events through risk factors and associated macro changes implicated in their genesis. Reviews microbial evolutionary strategies and factors of emergence. Prerequisite: graduate standing. Offered: jointly with HSERV 536.
EPI 530 AIDS: A Multidisciplinary Approach (2) Farquhar Comprehensive overview of the public health, clinical, and laboratory aspects of human immunodeficiency virus (HIV) infection and disease. Topics include the pathogenesis, natural history, and management of HIV infections. The impact of HIV/AIDS on community and global healthcare and prospects for prevention and control. Credit/no-credit only. Offered: jointly with MED 530/G H 562; A.
EPI 531 Statistical Methods for Analysis with Missing Data (3) Chan Covers statistical methods for the analysis of missing data, including likelihood-based, weighted GEE, multiple imputation, and Bayesian approaches. Uses computational tools such as EM
algorithm and Gibbs' sampler. Covers both ignorable and non-ignorable missing data mechanisms as well as cross-sectional and longitudinal study designs. Primarily uses data arising from epidemiologic studies. Offered: jointly with BIOST 531; W.

EPI 532 Epidemiology of Infectious Diseases in ResourceLimited Countries (3) McClelland A review of major infectious disease problems of the developing world, including AIDS, malaria, tuberculosis, measles, and diarrhea, with an emphasis on public health control strategies
EPI 533 Pharmacoepidemiology (3) Boudreau, Heckbert Overview of pharmacoepidemiology including drug development and approval; application of epidemiologic methods to study drug safety and effectiveness; exploration of the interplay between research and public policy; introduction to resources for information about drugs; introduction to pharmacology principles pertinent to pharmacoepidemiology. Prerequisite: Health Sciences graduate student; either EPI 511 or both EPI 512 and EPI 513; or permission of instructor. Offered: jointly with PHARM 533; Sp, even years.
EPI 536 Categorical Data Analysis in Epidemiology (4) McKnight Summary of univariate categorical data analysis; ilntroduction to multivariate analysis of categorical epidemiologic and health sciences data using multiplicative models. Experience at interpretation; familiarity with available softwareprograms gained by analysis of bona fide data and critiques of published analyses appearing in literature. Prerequisite: BIOST 515; EPI 513 and either BIOST 513 or BIOST 518; or permission of instructor. Offered: jointly with BIOST 536; A.

EPI 537 Survival Data Analysis in Epidemiology (4) Breslow Introduction to multivariate analysis of survival data using multiplicative models. Application to epidemiologic and health sciences studies. Familiarity with interpretation and available softwarecomputer programs gained by analysis of bona fide sets of data and critiques of published analyses appearing in the literature. Prerequisite: EPI 536 or permission of instructor. Offered: jointly with BIOST 537;W.
EPI 538 Nutritional Epidemiology (3) Beresford Application of epidemiological methods to current studies of diet, nutrition, and chronic disease. A discussion of current issues and controversies enables students to plan studies in nutritional epidemiology and disease prevention. Prerequisite: EPI 511 or EPI 512 or permission of instructor. Offered: jointly with NUTR 538; A.
EPI 539 Research Methods in Developing Countries (3/4) Micek, Mock Simple, practical methodologies to obtain and validate information regarding health status and health services in developing countries. Usefulness, validity, limitation of vital records, health reports, household (and cluster) surveys, nutritional anthropometry, and qualitative methods discussed. Lectures, computer lab, and student participation in community-based survey. Prerequisite: graduate standing. Offered: jointly with G H 531; W.
EPI 540 Introduction to Cancer Biology (3) Madeleine Provides a general understanding of cancer biology, covering the carcinogenic process and various biological causes of cancer. Integrates knowledge from different fields of cancer research, guiding students through diverse literature on cancer and carcinogenesis. Prerequisite: undergraduate biology coursework or permission of instructor. Offered: Sp , even years.
EPI 541 Introduction to Systematic Reviews and Metaanalysis of Evidence (3) Wolf Conceptual understanding of the quantitative methods used to synthesize evidence. Methods for pooling evidence across
independent studies, pooling binary/continuous outcomes, differences between fixed and random effects models, and guidelines for appraising published systematic reviews/meta-analyses. Prerequisite: introductory-level courses in statistics, epidemiology, or biostatistics. Offered: jointly with MEBI 541/HSERV 529; Sp.

EPI 542 Clinical Epidemiology (2) Weiss Principles and methods involved in studying the outcome of illness. Prerequisite: EPI 511, or EPI 512 and EPI 513. Offered: S.
EPI 546 Psychiatric Epidemiology (3) Vander Stoep Applies epidemiological methods to the study of mental illnesses. Topics include occurrence and distribution of mental illness, classification of psychiatric disorders; treatment-based vs. community-based studies; epidemiology of depression and schizophrenia; familial transmission; developmental epidemiology; mental illness and violence. Credit/no-credit only. Prerequisite: either EPI 511, EPI 512, HSERV 591, or permission of instructor. Offered: jointly with PBSCI 546; Sp.
EPI 547 Social Determinants of Population Health and Health Disparities (3) Williams Explores the elements and actions of a population health approach, including conceptualizing the determinants of health, synthesizing knowledge about major social determinants, and applying knowledge to improve population health and reduce health disparities. Enrollment priority for Health Services PhD students. Prerequisite: HSERV 511, permission of instructor; recommended: HSERV 512; HSERV 513. Offered: jointly with HSERV 514.

EPI 548 Social Determinants of Health: Research Methods (3) Beresford, Smith Explores study design, measurement and analytic issues applicable to research into the social determinants of health and health disparities. Semi-weekly graduate-level seminar offered to students with a basic knowledge of epidemiological and biostatistical principles. Credit/no credit only. Prerequisite: either EPI 511 or EPI 512/EPI 513; BIOST 511/BIOST 512 or BIOST 517/BIOST 518. Offered: jointly with HSERV 548; W.
EPI 549 HIV/STI Prevention Research Methods (3) Baeten Focuses on current research and implementation of HIV/STI prevention (biomedical, behavioral, and public health interventions). Includes analyzing strength of research evidence to support candidate interviews, understanding key features of clinical trial design, and applying appropriate/feasible interventions for specific settings and populations. Offered: jointly with G H 563; Sp.
EPI 554 Introduction to Epidemic Modeling for Infectious Diseases (3) Cassels Covers the basic tools for building and analyzing mathematical models of infectious disease epidemics. Model types include deterministic and stochastic models, compartmental and indi-vidual-based models. Laboratory provides hands-on model building experience in Excel, Stella, and R. Offered: A.
EPI 555 Statistical Methods for Spatial Epidemiology (3) Wakefield Motivates the need for, and describes methods for, the analysis of spatially indexed epidemiological data. Covers four major topics: clustering and cluster detection, disease mapping, spatial regression, and an introduction to geographical information systems. Considers both point-references and spatially aggregated data. Offered: jointly with BIOST 555; W.
EPI 570 Occupational and Environmental Epidemiology (3) Checkoway Research methods for studying occupational and environmental determinants of disease. Defining exposed populations, characterizing exposure levels, estimating disease risks relative to expo-
sure. Cohort, case-control, cross-sectional designs for various health outcomes. Applications to exposure standard setting and risk assessment. Prerequisite: EPI 511 or EPI 512, EPI 513, or permission of instructor. Offered: jointly with ENV H 570; Sp.

EPI 571 Neuroepidemiology and Environmental Risk Factors (3) Kukull Focus on neurologic diseases and etiology. Presentation of descriptive epidemiology, clinical features, and risk factors, including stroke, Parkinson's disease, Alzheimer's disease, multiple sclerosis, and other disorders. Discussion of NIH grantsmanship. Guest experts present some topics. Recommended: either EPI 511 or equivalent. Offered: jointly with ENV H 571; W, odd years.
EPI 573 Methods and Issues in Using Biological Measurements in Epidemiologic Research (3) Schwartz Introduction to use of measurements from biological specimens in epidemiologic studies. Prepares epidemiology and laboratory science students for conduct of interdisciplinary human studies. Evaluation of biomarkers, preliminary studies, methodologic issues, quality control. Brief review of molecular biology. Applications and current literature discussed. Prerequisite: EPI 511 or EPI 512. Offered: jointly with ENV H 573; A.
EPI 582 Design and Analytic Strategies to Enhance the Validity of Epidemiologic Studies (1) Weiss Discusses the issues that led to specific methodologic developments during the past 30 years, along with a characterization of these developments and the consequences of their application. Credit/no-credit only. Prerequisite: EPI 512; EPI 513. Offered: W.

EPI 583 Epidemiology Seminar (1, max. 12) Vander Stoep Presentation of current epidemiologic research and application of epidemiologic research in the practice of public health. Offered: AWSp.
EPI 584 Doctoral Dissertation Seminar (1, max. 2) Davis, Holt Forum for Epidemiology doctoral students to obtain information for doctoral research, including: project ideas; forming a committee; developing a proposal; conducting the project; and presenting results. Prerequisite: EPI 512 and EPI 513, admission to the PhD program, successful completion of the preliminary examination, or second-year status. Offered: AWSp.
EPI 585 Injury and Violence: A Public Health Approach (3) Schiff Focuses on broad concepts including a conceptual model, surveillance, research methods, control and prevention of injuries. Topics include unintentional injuries from motor vehicle crashes, falls, drowning, sports injuries and intentional injuries from youth violence, intimate partner violence, homicide and suicide. Recommended: EPI 511. Offered: A.
EPI 586 Responsible Conduct of International Research (3) Farquhar Prepares international and U.S. students to develop research proposals, conduct international field research, and present scholarly work. Topics include proposal writing, human subjects protection, data management, peer review, scholarly integrity, responsible authorship, and grants and budget management. Open to graduate and non-matriculated students. Credit/no-credit only. Offered: jointly with G H 532; A.
EPI 587 Practical Aspects of Research Operations (2) Fitzpatrick Provides the basics necessary to plan, implement, and manage a research study. Topics include human subjects applications, data collection, hiring and training of staff, participant recruitment and retention, data management, quality assurance and control, results reporting, communications, and budgeting. Prerequisite: K12 Clinical Scholar or one course in EPI/BIOST. Credit/no-credit only. Offered: A, even years.

EPI 588 Preparing and Writing Research Proposals (2) Kristal, Reiber Experience in preparing, organizing, and writing research proposals, following NIH and AHRQ guidelines. Includes weekly assignments and didactic exercises, leading to final research proposal. All students participate in mock study section to review and critique proposals. Credit/no-credit only. Prerequisite: second-year graduate student (PhD recommended), or PhD or MD in health-related field. Offered: Sp.
EPI 590 Selected Topics in Epidemiology or International Health (1-6, max. 6) Tutorials arranged for a small number of students for in-depth examination of an area of epidemiology or international health, usually of current nature. Seminar format. Prerequisite: EPI 511. Also a special summer format presenting introductory material. May be offered with ENV H 590 and/ or HSERV 590. For more information and permission, consult department program adviser. Offered: AWSpS.
EPI 591 Current Literature in Epidemiology (1, max. 15) Articles pertaining to epidemiology and related subjects selected from the current literature to be distributed and read by all participants. Faculty members and enrolled students alternate being responsible for conducting sessions and choosing articles to read. Credit/no- credit only. Prerequisite: EPI 513. Offered: AWSp.
EPI 592 Program Seminars (1-6, max. 6) Graduate seminars organized to address specific educational needs of students in various specialized programs within the Department of Epidemiology (i.e., Maternal and Child Health). Prerequisite: permission of instructor. Offered: AWSpS.

EPI 593 Cancer Prevention Research Laboratory (3, max. 24) White Research experience for pre- and post-doctoral students working on cancer prevention projects at the Fred Hutchinson Cancer Research Center. Credit/no-credit only. AWSpS.

EPI 595 Epidemiology Master's Practicum (1-6, max. 6) Supervised practice experience providing students an opportunity to learn how epidemiology is applied in a public health setting and in the formulation and application of public health policy. Credit/no-credit only. Prerequisite: EPI 512 and BIOST 511 or equivalent and permission of instructor. Offered: AWSpS.
EPI 600 Independent Study or Research (*) Prerequisite: permission of independent study supervisor. Offered: AWSpS.
EPI 700 Master's Thesis (*) Prerequisite: permission of thesis chair. Offered: AWSpS.

EPI 800 Doctoral Dissertation (*) Prerequisite: permission of dissertation chair. Offered: AWSpS.

## Health Services

H664 Magnuson Health Sciences Center
Box 357600

The mission of the Department of Health Services is to work with partners in public health and healthcare to prepare leaders, design solutions, and conduct innovative research that translates into practice and policy. The department offers rigorous academic preparation that integrates learning, service, and research opportunities, emphasizing practical experience and student-faculty collaboration. Through this approach, students master competencies needed for success.
The department offers rigorous academic preparation that integrates learning, service, and research opportunities,
emphasizing practical experience and student-faculty collaboration. Through this approach, students master competencies needed for success.

Bachelor's and master's degrees are available in public health, health services administration, health information management, and health services research. Additionally, doctorate and post-doctoral opportunities are available in health services research.

## UNDERGRADUATE PROGRAM

## Adviser

(206) 543-8810
hihim@uw.edu
depts.washington.edu/hihim

The program in Health Informatics and Health Information Management offers both a postbaccalaureate certificate and a bachelor's degree (HIHIM).

## Health Informatics and Health

Information Management
Postbaccalaureate Certificate

## Admission Requirements

Applicants must hold a baccalaureate degree from an accredited college or university with a minimum GPA of 2.50 . They must also have taken courses in, or have the requisite knowledge and skills pertaining to, the following: human anatomy and physiology (laboratory course); introduction to basic computer applications such as spreadsheets, data bases, or word processing, or introductory programming; principles of management; statistics (any discipline); and medical terminology

## Certificate Requirements

65 credits:
Both the postbaccalaureate certificate and bachelor's degree programs require 65 credits, which may be completed in either one or two academic years.

For current information, visit the Health Informatics and Health Information Management website.

## Bachelor of Science

## Health Informatics and Health Information Management Major

Suggested First- and Second-Year College Courses: Human anatomy and physiology (laboratory course); introduction to basic computer applications such as spreadsheets, data bases, or word processing, or introductory programming; statistics (any discipline); English composition; and medical terminology.

## Department Admission Requirements

1. Admission to UW Evening Degree Program for summer quarter of planned entry to Health Informatics and Health Information Management (HIHIM)
2. Minimum 90 transferable credits (HIHIM 2-year curriculum plan). Students who have completed a minimum 120 transferable credits including 70 of the 80 UW general education required credits are eligible for the 1-year curriculum plan.
3. Completion of prerequisite coursework in the following areas:
a. Statistics (4-5 credits)
b. Anatomy and physiology with laboratory ( 6 credits)
c. Medical terminology ( $3-5$ credits): Not offered at UW. Available at various community colleges ( $3-5$ credits).
4. Grades: Minimum cumulative GPA of 2.50. Minimum cumulative GPA of 2.50 in prerequisite coursework. Minimum 2.0 grade in each prerequisite course.
5. All applicants must demonstrate English language proficiency through English courses or a satisfactory score on a designated English proficiency examination specified on the program website.
6. Prerequisites must be completed prior to admission, with the following exception: A maximum of one prerequisite course may be in progress during summer quarter. Applicant must include written petition with HIHIM application. Applicant may be considered for conditional admission. Offer of admission to HIHIM is withdrawn if prerequisite is not completed by the end of summer quarter or if prerequisite grade requirement is not met.
7. Admission is once a year, for summer quarter. Admission is competitive; completion of admission requirements guarantees consideration but not acceptance. Application deadline for each year is April 15. The academic summer schedule begins with an introductory course and an optional independent study course.
Additional information about prerequisite coursework can be viewed at depts.washington.edu/hihim/prerequisites.

## Degree Requirements

1. General Education Requirements ( 80 credits)
a. English composition (C) and additional writing (15 credits): English composition (5 credits); additional writing (W courses) (10 credits)
b. Quantitative and Symbolic Reasoning (QSR) (4-5 credits): Depending on course taken, may be satisfied by the statistics prerequisite requirement.
c. Areas of Knowledge ( 60 credits): Minimum 20 credits each in Visual, Literary, and Performing Arts (VLPA), Individuals \& Societies (I\&S), and Natural World (NW). BIOL 118 and BIOL 119 may count toward both the prerequisite and NW requirements.
2. Major Requirements ( 65 credits)
a. Disease concepts (4 credits)
b. Information systems ( 15 credits)
c. Coding and vocabulary (8 credits)
d. Management ( 30 credits)
e. Internships and projects (8 credits) - HIHIM 460, HIHIM 462
3. Additional electives to complete minimum 180 credits required for a degree.
4. Minimum cumulative 2.00 GPA in core courses and minimum 2.0 grade in individual courses.
For current information on application and program completion requirements, visit the Health Informatics and Health Information Management program website.

## Student Outcomes and Opportunities

- Learning Objectives and Expected Outcomes: The bachelor's degree program is designed to prepare individuals for careers in the management and use of healthcare information, and prepares students for the Registered Health Information Administrator (RHIA) national certifying examination of the American Health Information Management Association. The program gives students the tools to work in a wide variety of healthcare positions upon graduation, including health information management, health informatics with emphasis on electronic health records, healthcare quality improvement, decision support analysis, research, health insurance, and consulting. Graduates pass a national credential examination, with a majority working within the health information management field.
- Instructional and Research Facilities: None
- Honors Options Available: None
- Research, Internships, and Service Learning: Students complete two internships, one of which is the capstone project.
- Department Scholarships: None
- Student Organizations/Associations: Students are invited to join the health information management professional association at reduced rates.

## GRADUATE PROGRAM

Graduate Program Coordinator
(206) 616-2926
hservmph@uw.edu

The Department of Health Services offers a two-year graduate program in health services leading to the Master of Public Health or Master of Science degree. The MPH degree prepares future health practitioners, managers, and researchers to conduct the unfinished work of improving the well being of communities in the United States and throughout the world. Graduates take jobs in health sys tem management, health program design and evaluation, health promotion, public health practice, and policy analysis. Among other options, the department offers an MPH in community-oriented public health practice (COPHP). This program uses problem-based learning methods, and integrates classroom instruction and experiential fieldwork to prepare students to work in community and public health practice settings. Students may also pursue any of the MPH specialty options. The department also offers a three-year extended degree program in community health management, leading to the MPH degree for employed professionals working fulltime.
The department also maintains primary responsibility for the graduate program in Health Services Administration (an interdisciplinary degree-granting program of the Graduate School described in the Interdisciplinary Graduate Degree Programs section of this catalog). In addition, an executive version of the traditional MHA degree, designed for mid-career healthcare professionals, is offered. The MHA degree provides full academic preparation for careers in management and policy positions in health systems, hospitals, medical groups, health plans, and other types of healthcare organizations.

The department offers a PhD in health services and participates in the training of doctoral fellows.

## Master of Public Health

For current listings of MPH options and their requirements, see the MPH program website.

## Admission Requirements

1. One set of official transcripts from all institutions of higher learning
2. Official scores from the general Graduate Record Examination (GRE) (required for applicants who have not already earned a doctoral-level degree from a U.S. institution of higher learning)
3. Test of English as a Foreign Language (TOEFL) scores, if applicable.
4. Written statement, including a description of the applicant's professional background, career goals, and the educational objectives
5. Three recent letters of recommendation, preferably from former supervisors and teachers.
6. An in-person or telephone interview with a Health Services faculty person is highly recommended Complete applicaiton details can be viewed at depts. washington.edu/hservmph/admission

## Degree Requirements

63 credits for each program (specialty option) listed below. For detailed requirements, see depts.washington.edu/ hservmph.

## Community-Oriented Public Health Practice Program

 63 credits, to include:1. Problem-based Learning (PBL) Core Curriculum: 36 credits
2. Integrated Fieldwork: 6 credits (first year)
3. Seminars: 6 credits
4. Capstone project: 9 credits (second year)
5. Electives: 6 credits from School of Public Health and Community Medicine and other schools/colleges at the UW, as appropriate

## Health Systems and Policy

63 credits, to include:

1. At least 30 credits from graduate-level courses, of which at least 18 credits are from Health Services courses.
2. Practicum: 3 credits
3. Thesis or Capstone Project: 9 credits

## Maternal and Child Health

63 credits, to include:

1. At least 30 credits from graduate-level courses, of which at least 18 credits are from Health Services courses.
2. Practicum: 3 credits
3. Thesis: 9 credits

## Social and Behavioral Sciences

63 credits, to include:

1. At least 30 credits from graduate-level-in-classroom courses of which at least 18 credits are from Health Services courses.
2. Practicum: 3 credits
3. Thesis: 9 credits

## Master of Health Administration

See UW General Catalog listing at www.washington.edu/ students/gencat/academic/health_services_administration.html.

## Master of Science

## Admission Requirements

For current information, see the MS program website.

1. One set of official transcripts from all institutions of higher learning
2. Official scores from the general Graduate Record Examination (GRE) (required for applicants who have not already earned a doctoral-level degree from a U.S. institution of higher learning)
3. Test of English as a Foreign Language (TOEFL) scores, if applicable
4. Written statement, including a description of the applicant's professional background, career goals, and the educational objectives
5. Three recent letters of recommendation, preferably from former supervisors and teachers
6. An in-person or telephone interview with a Health Services faculty person is highly recommended

## Degree Requirements

Minimum 63 credits, to include:

1. At least 30 credits from graduate-level courses, of which at least 18 are from Health Services courses
2. Participation in a program research seminarEither HSERV 587 (3), HSMGMT 513 (4), or HSMGMT 514 (3)

## 3. Thesis: 9 credits

## Doctor of Philosophy

For the most current information, visit the PhD program website.

## Admission Requirements

Admission priority is given to applicants who have graduated from a master's program with high academic standing. Applicants who have a bachelor's, master's, or professional degree in a field related to health services are given preferential review. Students with only a bachelor's degree are occasionally admitted. Applicants with relevant research experience and publications are the most competitive.
Students admitted to the program generally have GRE scores in or above the 75 th percentile.
International applicants must submit the results of the Test of English as a Foreign Language (TOEFL), unless they meet UW criteria for waiving the requirement. Scores must show high English language proficiency. A minimum score of 580 (paper based) or 237 (computer based) on the TOEFL is required to be considered for admission to the UW.

## Degree Requirements

100 credits minimum, as follows:

1. Required Core Competencies ( 35 credits): HSERV 512 (3), HSERV 513 (3), HSERV 514 (3), HSERV 523 (4), HSERV 524 (4), HSERV 525 (4); one of the following: HSMGMT 514 (3), HSERV 587 (3), or ECON 500 (3); HSERV 522 (3); BIOST 517 (4), BIOST 518 (4), or BIOST 511 (4), BIOST 512 (4), BIOST 513 (4), or BIOST 514 (4), BIOST 515 (4); EPI 512 (4), EPI 513 (4)
2. Area of Emphasis: Five courses or 15 credits in an area of emphasis. Suggested areas of emphasis: economics or finance; health behavior and health promotion; occupational health; cancer prevention and control; evaluation sciences; population health the social determinants; global health; maternal and child health; sociology/demography; bioinformatics. For a customized area of emphasis, specific courses taken are selected by the student and the adviser, based on the student's past coursework, experience, proposed dissertation topic, and future career goals.
3. Doctoral Courses in Advanced Theory and Methods in Health Services: 50 credits, including a minimum of 30 dissertation credits
4. Written preliminary examination
5. Written and oral general examinations
6. Dissertation
7. Dissertation defense (final examination)

## Financial Aid

Every attempt is made to ensure that students admitted are not prevented from pursuing graduate studies because of inadequate finances. Some fellowships, assistantships, scholarships, and loans are available each year.

## Research Facilities

In addition to using University facilities, the program has extensive links with community healthcare delivery systems and agencies for research and training.

## Executive MPH

Graduate Program Coordinator
H674 Health Sciences, Box 357660
(206) 685-7580

For current information, see the Extended MPH program website.

The Executive MPH degree program is a part-time, partial distance learning program delivered through a combination of intensive four-week summer sessions on the University campus, directed independent study, and four intensive weekend seminars during the academic year. The program is designed for mid-career public and community health professionals with three or more years of experience related to public health. The program provides knowledge and skills required at mid- and upper-level practice and management positions for health professionals. In addition to the core courses in health services, epidemiology, biostatistics, and environmental health, the prescribed coursework includes a broad exposure to the health-care system plus specific management training in budgets, finance, personnel management, economics, organization theory, and program planning and evaluation. Pathways are available in health education, maternal and child health, public health practice, and oral health.
The Executive MPH degree program provides training in developing skills in the scientific base of public health, analytic methods, management and communication, and policy and advocacy, as well as training in cross-cutting issues. Graduates apply their skills directly to their careers.

## Admission Requirements

1. Current employment in a public health-related agency preferred
2. Minimum three years experience in community, public, or environmental health-related field
3. Baccalaureate degree from an accredited college or university
4. Minimum 3.00 GPA in the last graded 90 quarter/60 semester hours
5. Graduate Record Examination (GRE) scores, taken within 6 years. (Applicants with MD, DO, or PhD degrees from an accredited U.S. college or university may waive the GRE requirement.)

## Degree Requirements

63 credits minimum, as follows:

1. Year 1 Required Courses: BIOST 502 (4), EPI 511 (3/4), HSERV 501 (3), HSERV 516 (4), HSERV 520 (1-3, max. 3), HSMGMT 560 (1-4, max. 4)
2. Year 2 Required Courses: BIOST 503 (4), ENV H 511 (13, max. 3), HSERV 504 (1-3, max. 3), HSERV 522 (1-4, max. 4), HSMGMT 514 (3/4), HSMGMT 563 (3)
3. Year 3 Required Courses: HSMGMT 566 (3), HSMGMT 572 (3)
4. Thesis or Project Option: HSERV 700 (master's thesis) or HSERV 598 (project); EPI 600/ENV H 600
5. Practicum (required): Focus based on pathway choice
6. Elective or Pathway Credits (required): Pathway courses may be spread out over two years. Electives may be taken at any time.

## COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations.

## Health Services

HSERV 100 Personal and Public Health (3) I\&S Provides an overview of the key components of health and wellness. Presents a balance between individual responsibility and social determinants of public health, emphasizing a holistic preventative model. Incorporates self-assessment and considers the impact of personal, family, social, cultural, and environmental factors on health.
HSERV 475 Perspectives in Medical Anthropology (5) I\&S Introduction to medical anthropology. Explores the
relationship among culture, society, and medicine. Examples from Western medicine as well as from other medical systems, incorporating both interpretive and critical approaches. Offered: jointly with ANTH 475.

HSERV 480 Introduction to Public Health (3) Covers history and major agencies and organizations of public health, Systems perspective on understanding factors affecting public health, the core functions and services of public health, and the major current public health issues in the U.S. and world. Uses a modified problem-based learning (PBL format. Includes substantial group work.

HSERV 481 Issues in Public Health (3) Introduces public health by taking an in-depth look at local public health practice. Focuses on practical solutions for real life problems in local public health settings. Incorporates speakers from the local practice community.
HSERV 482 The Health of Populations (4) I\&S Explores what makes a population healthy or unhealthy. Examines why the United States is less healthy than all other rich countries, despite being one of the healthiest fifty years ago.
HSERV 490 Undergraduate Special Topics (1-6, max. 12) Collect and analyze literature related to historical and current public health issues, problems and programs; analyze information and develop written summaries to demonstrate increased knowledge and competencies as applied to public health. Prerequisite: HSERV 480.

HSERV 499 Independent Study in Health Services (1-12, max. 12) Individual library or field study project selected in consultation with a faculty adviser.
HSERV 501 Public Health Practice at the Local Level (3) Basic overview of state and local public health practice with leaders in the field and case studies focusing on rural and urban public health challenges. Offers preparation for practice in public health agencies. Prerequisite: HSERV 511 or permission of instructor. Offered: jointly with EPI 501.
HSERV 503 Applied Epidemiology in Public Health Practice (3) Introduces the principles, methods, and issues in public health practice-based epidemiology. Covers public health surveillance, outbreak and cluster investigation, community health assessment, screening, evaluation, and other select topics. Offered: jointly with EPI 503; Sp.
HSERV 504 Health Communication ([1-3]-, max. 3) Overview of the theory and practice of designing, producing, and evaluating public health communication campaigns, including the use of mass media. Develops greater capacity for critical judgment about the use of communication strategies for achieving public health goals.
HSERV 507 Health Communication and Marketing for Health Promotion: Theory and Practice (3) Discusses health communication theories and applications at the individual level (persuasion), interpersonal level (motivational) interviewing), and population level (mass media). Examines marketing principles for health promotion. Develops a health communication campaign for clients. Investigates adaptation frameworks of communication campaign cutting across cultures.
HSERV 508 Dynamics of Community Health Practice (3) Analysis of principles of community health as applied to the delivery of clinical services in order to improve public health, reduce disparities, provide leadership in delivery of care, and synthesize one's clinical role with public health. Examines environmental, social, cultural, and behavioral determinants of health. In-
cludes family, aggregates, and populations. Offered: jointly with NURS 560.
HSERV 509 Public Health and Informatics (3) Introduction to the emerging field of public health informatics. Covers general public health topics as well as key public health informatics issues and applications. Evaluates a public health information system. Prerequisite: either MEBI 530 or permission of instructor. Offered: jointly with MEBI 533.
HSERV 510 Society and Health (3) Provides an overview of three core areas in the social and behavioral sciences of public health practice and research: social determinants of individual and population health, health promotion and disease prevention, and cultural competency and community collaboration. Prerequisite: HSERV 511 or equivalent or permission of instructor.
HSERV 511 Introduction to Health Services and Public Health (3-4) History, organization, and effectiveness of U.S. healthcare and public health systems. Determinants of health, need, and utilization. Public and private financing. Supply and provision of personal and public health services. Managed care. Government and private sector roles. Prerequisite: graduate standing or permission of instructor.
HSERV 512 Health Systems and Policy (3) Students review and examine selected topics from literature. Includes need and access to care; theory and effects of health insurance; private and public insurance programs; managed care; costs/expenditures; availability and organization of health resources; and quality assessment and improvement. Enrollment priority for Health Services PhD students. Prerequisite: HSERV 511.
HSERV 513 Health Policy Research (3) Extends students' understanding of the nature of health policy and health policy development in the context of a market-based economy. Enrollment priority for Health Services PhD students. Prerequisite: HSERV 511, permission of instructor; recommended: HSERV 512.

HSERV 514 Social Determinants of Population Health and Health Disparities (3) Explores the elements and actions of a population health approach, including conceptualizing the determinants of health, synthesizing knowledge about major social determinants, and applying knowledge to improve population health and reduce health disparities. Enrollment priority for Health Services PhD students. Prerequisite: HSERV 511, permission of instructor; recommended: HSERV 512; HSERV 513. Offered: jointly with EPI 547.
HSERV 516 Introduction to Health Services ([3-4]-) Provides overview of healthcare system, exposes students to current issues and developments affecting organization and delivery of health services, helps students develop ability to frame and analyze questions and issues related to health services. Prerequisite: registration in Extended MPH degree program.

HSERV 518 Social and Ethical Issues (2-4, max. 4) Presents introduction to ethical issues in public health policy and practice. Additional one credit option focuses on health administration/managed care. Coursework designed to train students in basic skills of ethical analysis and increase competency in recognizing, researching, and analyzing issues arising in public health and health services delivery.
HSERV 520 Methods in Applied Community Research ([0-4]-, max 4) Skills/knowledge necessary to conduct orderly investigation of specific problems in preparation for MPH thesis or project. Includes problem identification, posing research questions, literature review, consideration of theoretical/practical context, choosing study design, data collection, protec-
tion of human subjects, and recognizing potential errors. Credit/no-credit only. Prerequisite: registration in Extended MPH degree program.

HSERV 521 Qualitative Methods in Health Services Research (3) Provides theoretical training in qualitative research and in depth training in qualitative data management, analysis, interpretation, and presentation. Focuses on how to frame qualitative research questions, design appropriate research strategies, and integrate qualitative and quantitative methods in research designs in public health. Offered: jointly with G H 538 .
HSERV 522 Health Program Evaluation ([1-5]-, max. 5) Politics, theory, methods of evaluation, from simple health programs to evaluation of large-scale interventions. Emphasizes experimental and quasi-experimental designs to estimate program impacts, as well as evaluation of program implementation. Case studies drawn from health field illustrate various types of evaluations. Prerequisite: background in introductory statistics.
HSERV 523 Advanced Health Services Research Methods I (4) Examines how to apply research methods and addresses recurring issues in health services research. Covers statistical theory that motivates the methods and empirical work that demonstrates a method's use. Enrollment priority for Health Services PhD students. Prerequisite: either HSERV 511, BIOST 511/ BIOST 512/BIOST 513, BIOST 517/BIOST 518, or EPI 511/EPI 512, and permission of instructor.

HSERV 524 Advanced Health Services Research Methods II (4) Emphasizes the application of advanced biostatistical/econometric techniques in applied research. Examines a wide variety of posed research questions and demonstrates how to best obtain answers. Enrollment priority for Health Services PhD students. Prerequisite: either HSERV 511, BIOST 511/BIOST 512/BIOST 513, BIOST 517/BIOST 518, or EPI 511/ EPI 512, and permission of instructor.
HSERV 525 Advanced Health Services Research Methods III (4) Introduction to methods of handling data and conducting basic analyses in the broad and heterogeneous field of health services research. Examine concepts and conduct hands-on research using using data sets selected by students. Enrollment priority for Health Services PhD students. Prerequisite: either HSERV 511, BIOST 511/BIOST 512/BIOST 513, BIOST 517/BIOST 518, or EPI 511/EPI 512, and permission of instructor.

HSERV 526 Qualitative Research Methods for Public Health (4) Covers a range of qualitative, ethnographic tools for practical applications in public health. Methods covered include direct observation, informant interviews, focus groups, and formal methods. Covers Rapid Assessment Procedures and Participatory Action Research. Student teams investigate research questions using these techniques. Offered: jointly with G H 537.
HSERV 527 Survey Research Methods (4) Provides students with skills in questionnaire development and survey methods. Students develop a questionnaire and design a survey research proposal on a healthrelated or social topic. Prerequisite: either HSERV 511/HSERV 513; BIOST 517/BIOST 518; or EPI 512/ EPI 513, which may be taken concurrently, or permission of instructor. Students should have a survey project in mind. Offered: jointly with CS\&SS 527.
HSERV 528 Critically Appraising and Applying Evidence in Healthcare (3) Literature appraisal skills for various articles (therapy effectiveness, diagnostic tests, literature reviews, clinical measurement, prognosis, quality of care, decision analysis, causation/etiology, guidelines, and economic evaluation). Appraisal of clinical information from literature, strengths/weak-
nesses of data, analyses, study design/applicability to a current patient's problem. Prerequisite: permission of instructor. Offered: jointly with MEBI 540.

HSERV 529 Introduction to Systematic Reviews and Meta-analysis of Evidence (3) Conceptual understanding of the quantitative methods used to synthesize evidence. Methods for pooling evidence across independent studies, pooling binary/continuous outcomes, differences between fixed and random effects models, and guidelines for appraising published systematic reviews/meta-analyses. Prerequisite: introductory-level courses in statistics, epidemiology, or biostatistics. Offered: jointly with MEBI 541/EPI 541.

HSERV 530 Health Needs Assessment (3) Covers key methods and principles for needs assessment and is recommended for students who plan to monitor and measure the health of populations, plan health services, or make decisions about health resource distribution. Offered: jointly with EPI 504.

HSERV 536 Emerging Infections of International Public Health Importance (3-, max. 3) Focuses on the nexus between emerging infections and increasing globalization of the world due to the mobility of people and goods. Examines emergent events through risk factors and associated macro changes implicated in their genesis. Reviews microbial evolutionary strategies and factors of emergence. Offered: jointly with EPI 529.

HSERV 541 Topics in Maternal and Child Health I (3-, max. 3) Provides an overview of the historical and legislative basis for the major MCH health and social service policies and programs. Uses the life-course perspective to examine the social determinants of health and development of women, children, and adolescents. Pays special attention to racial inequities on the health of families.

HSERV 542 Epidemiology of Maternal and Child Health Problems ([3-4]-, max. 4) Contributions to understanding and prevention of major maternal and child health problems, including pregnancy outcome, infant and child morbidity and mortality, maternal morbidity and mortality, abnormal child growth and development, and early-life factors in adult health problems. Prerequisite: graduate, medical, or dental school standing and EPI 511 or EPI 512, or permission of instructor. Offered: jointly with EPI 521.

HSERV 544 Maternal and Child Health in Developing Countries (3) Emphasizes critical health problems of women and children in developing countries in social, economic, and cultural contexts. Practical approaches to developing MCH programs shared via lecture/ discussions, exercises, and small group work. Students acquire skills in baseline assessment, setting objectives, planning and evaluating interventions, and involving communities.
HSERV 548 Social Determinants of Health: Research Methods (3) Explores study design, measurement, and analytic issues applicable to research into the social determinants of health and health disparities. Semi-weekly graduate-level seminar offered to students with a basic knowledge of epidemiological and biostatistical principles. Credit/no credit only. Prerequisite: either EPI 511 or EPI 512/EPI 513; BIOST 511/BIOST 512 or BIOST 517/BIOST 518. Offered: jointly with EPI 548.
HSERV 551 Public Health Law (2) Focuses on the role of law in public health administration and in the increasingly regulated healthcare industry. Provides a foundation in the relevant law for public health officers and healthcare industry administrators. Offered: jointly with LAW H 512.

HSERV 552 Health Policy Development (3-, max. 3) Uses primarily case- and problem-based learning and small-group projects to focus on factors that influence public policy development concerning health services in the U.S., with some global health content. Examines the roles of science and stakeholder interests in the structure of and changes to a nation's health system. Offered: A.
HSERV 553 Politics of Healthcare (3) Understanding of health policy making within the context of American politics. Health policy making is examined in light of political leadership, the legislature, the initiative process, rule making, interest groups, and lobbying. Prerequisite: HSERV 551, a basic understanding of the American healthcare system, or permission of instructor.
HSERV 554 Health Legislation Seminar (1) Discussion of current state of health policy, topics with legislative staff and others involved with state health policy. In addition to four sessions on campus, course meets once in Olympia during legislative session. Credit/ no-credit only.

HSERV 556 Tobacco Related Health Disparities (1/2) Integrates multiple disciplinary perspectives to address the pressing issue of disproportionate tobacco use and related diseases among marginalized populations, including those defined by socioeconomic status, race/ethnicity, and sexual orientation. Explores links between, and intervention strategies for, smoking and mental illness, social stress, acculturation processes, and genetics.
HSERV 558 Tobacco and Public Health: Prevention, Treatment, Policy, and Social Change (1-3) Integrates multiple disciplinary perspectives to provide a comprehensive overview of the history, health effects, policy, prevention, and treatment of tobacco use. Utilizes readings, stimulates discussions, and hosts renowned experts to provide students with the foundation to understand and address the local, national, and global epidemic of tobacco use.

HSERV 559 Public Policy and the Public's Health ([0-3]-, max. 3) Watts Explores the factors that affect health policy and the interaction of policy, markets, and the legal system through public health examples. Examines how science and community values intertwine in policy development, and how context influences the structure of and changes to a nation's health system.

HSERV 560 Adult Learning: Theory and Practice (3) Designed to help students apply Popular Education theory and practice to preparation, presentation, and evaluation of health education. Students design, teach, and evaluate four separate teaching sessions (one between each seminar) using theory and principles of Popular Education learned to date. Prerequisite: graduate standing or permission of instructor.

HSERV 561 Introduction to Health Promotion Planning and Evaluation ([0-3]-, max. 3) Links practice to theory between the planning, implementation, and evaluation of health promotion intervention and behavior change theory. Uses PRECEDE/PROCEED planning model by Green and Kreuter as framework.
HSERV 571 Cultural Competency for Public Health Practice ([1-4]-, max. 4) Application of cultural competency to clinical practice, healthcare management, and health services research when working with culturally diverse populations. Methodological orientation is qualitative, historical, and ethnographic. Lecture, narratives, discussions, guest presentations, film, video. Interdisciplinary perspective appropriate for graduate students in public health, health administration, nursing, social work, and anthropology.
HSERV 575 Cancer Prevention and Control (3) Provides an overview of research in cancer prevention and
control for students training for a career in this field. Students identify major areas of prevention and control research, conduct an analysis of data in cancer prevention and control, and learn to prepare a research project grant. Prerequisite: permission of instructor.
HSERV 576 Health, Culture, and Community (3) A multidisciplinary approach to the development of leadership in personal and organizational cultural competence in community-based participatory research. Emphasizes understanding collaborative assessment, planning, and evaluation of health promotion and disease prevention programs to address the social determinants of health at the population level. Offered: jointly with NURS 557; W.

HSERV 577 Health Behavior and Preventative Medicine ([2/4]-, max. 4) Focuses on psychosocial and cultural factors related to health, preventive health behavior, illness perception, and behavior; theoretical basis for prevention; the interaction of consumers and providers in the delivery of healthcare services; and clinic and community based applications.

HSERV 581 Strategies of Health Promotion (4) Assessment of health promotion planning, implementation, and evaluation strategies for their strengths, weak nesses, and effectiveness. Students critique strategies to modify behavioral factors that influence lifestyles of individuals, including decisions influencing their reciprocal relationship with environmental factors affecting the health of individuals, organizations, and communities. Prerequisite: HSERV 511.
HSERV 582 Theoretical Perspectives on Health Behavior Change ([3-4, max. 4]-) Overview of theoretical perspectives in health behavior at the individual, interpersonal, and community level. Focuses on increasing skills in describing, applying, and integrat ing these frameworks in the design and evaluation of health promotion interventions. Prerequisite: HSERV 511 or permission of instructor.
HSERV 583 Economic Evaluation in Health and Medicine (3) Methods and techniques for evaluating costs and cost-effectiveness of health, medical, and pharmaceutical interventions. Emphasis on economic evaluation, decision analysis, and modeling techniques for resource allocation and decision making. Applications to technology assessment, health policy, clinical practice, and resource allocation. Prerequisite: permission of instructor. Offered: jointly with PHARM 534.

HSERV 584 Assessing Outcomes in Health and Medicine (3) Concepts and methods for developing and using patient-reported outcomes in health and medicine. Emphasis on patient self-reported health status and quality of life. Qualitative research and psychometric methods applied to health outcomes assessment and all applications. Prerequisite: permission of instructor. Offered: jointly with PHARM 535.

HSERV 585 Seminar in Medical Geography (5, max. 10) Intensive research seminar dealing with new and promising research themes in medical geography and public health. Offered: jointly with GEOG 581.
HSERV 586 Medical Geography (3) Geography of disease, consideration to health systems planning. Distributions, diffusion models, migration studies. Application of distance, optimal location models to health systems planning; emergency medical services, distribution of health professionals; cultural variations in health behavior. Prerequisite: familiarity with social science research, health-related issues. Offered: jointly with GEOG 580.

HSERV 587 Health Policy Economics (3) Applies economic theory to selected topics in healthcare, including information, risk and insurance, industry organiza-
tion, government regulation, and public health issues. Emphasizes policy implications of these applications.

HSERV 588 Community Approaches to Health Promotion (3) Provides opportunities to critically examine community-based health promotion interventions and the design, evaluation, and implementation issues they raise. A wide range of disciplinary perspectives is presented. Case studies and class projects are designed to give students the skills needed to critically assess community projects around health promotion.
HSERV 590 Selected Topics in Health Services (*-, max. 30) By individual arrangement, the student and faculty member(s) develop a program of reading and conference appropriate to the topic selected by the student. The topic chosen is within the special competence of the faculty participating in the course, in the areas of healthcare delivery and healthcare administration. Prerequisite: permission of instructor.

HSERV 591 Community Oriented Public Health Practice (1-6, max. 42) Seven-quarter integrated sequence covers public health aspects of community assessment, biostatistics, epidemiology, health promotion/ disease prevention, behavior change, environmental health, community development, policy development and analysis, and program planning and management. It is taught in a problem-based format. Prerequisite: enrollment in the COPHP program.
HSERV 592 Program Seminars (1-6, max. 20) Graduate seminars organized to address specific educational needs of students in various fellowships, residencies, and other specialized programs within the Department of Health Sciences (i.e., maternal and child health, international health, preventive medicine, social and behavioral sciences). Prerequisite: permission of instructor.

HSERV 595 Practicum/Field Work in Community Medicine
(1-12-, max. 12) Experience in variable time blocks in community health activities in agencies delivering and planning health services. Sites include neighborhood clinics, health planning bodies, medical practice settings, public health agencies, special problem clinics and facilities, environmental programs and services. Prerequisite: master's student in health services and permission of instructor.
HSERV 598 Extended Degree Program Project Option (*, max. 9) Supervised project work on a selected topic related to student's concentration in graduate study. Includes survey of literature, development of approach, and written paper on conclusions. Prerequisite: registration in extended MPH degree program and satisfactory completion of the first summer's coursework.

HSERV 599 Capstone Project (*) Applies and extends the public health skills learned to other settings, develops new skills, expands a professional network, and provides specialized knowledge that can be used to advance the student's future career and effectiveness in public health.

HSERV 600 Independent Study or Research (*) Prerequisite: permission of instructor.
HSERV 700 Master's Thesis (*) Prerequisite: permission of instructor.

HSERV 800 Doctoral Dissertation (*)

## Health Informatics and Health Information Management

HIHIM 407 Foundations for Healthcare Vocabularies (3) Focuses on health concepts, documentation, healthcare taxonomies, and clinical vocabularies, terminologies, classifications, and nomenclatures required
for health data analysis, clinical coding, and clinical systems associated with the electronic health record.
HIHIM 408 Management Concepts with HIM Applications (3) Covers core management functions of planning, organizing, staffing, leading, and contracting in healthcare environment and decision-making, operations, supervision, and communication foundations for health information administration.

HIHIM 409 Disease Concepts for Managers (4) Develops a methodology for understanding and communicating dimensions of disease states as all health state that a person might experience. Presents clear, effective ways to describe the diversity of health conditions and focuses on disease from a health information systems perspective.
HIHIM 410 Introduction to Healthcare Systems and Health Data Systems (5) Covers current issues in healthcare; relationship of the healthcare system to health data systems: accreditation, licensure and professional standards; health records analysis, statistics, data linkage, application of professional standards to health records and record management systems; retrieval, tracking, and retention systems.

HIHIM 412 Healthcare Coding, Vocabulary, and Revenue Cycle Management (5) Overview of clinical vocabularies and classifications, detailed instruction on International Classification of Diseases, ninth revision, clinical modification (ICD-9-CM) and Current Procedural Terminology (CPT) coding principles, and revenue cycle management. Prerequisite: HIHIM 409.
HIHIM 413 Revenue Cycle Management (3) Covers the revenue cycle management of health information administration.
HIHIM 420 Healthcare Computer Systems and Electronic Health Records (5) Current health information systems and the role of health informatics; technology infrastructure and health informatics standards, electronic health records, definitions, functions, issues, and barriers; hospitals, ambulatory care, home health and long-term care and computer applications. Prerequisite: HIHIM 410; HIHIM 411.
HIHIM 421 Health Information Systems Analysis (5) Examines lifestyle systems development process and tools, project management and team coordination, analysis of health information systems, and user requirements. Prerequisite: HIHIM 420.
HIHIM 450 Organizational Theory in Health Facilities and Healthcare Delivery (3) Addresses the organization of healthcare services across the spectrum of healthcare delivery systems - both governmental (federal, state, local) and private. Financing of healthcare services and related policy issues are explored.

HIHIM 454 Finance Concepts for Healthcare Managers (4) Covers financial concepts applied to today's healthcare environment, financial management tools, and budgeting.
HIHIM 455 Professionalism and Leadership (4) Professional development, leadership assessment and ethics, interpersonal skills and effective communication, and human resource management requirements.
HIHIM 456 Quality Assurance and Research in Healthcare (5) Quality improvement, risk management, and utilization management in healthcare; design and analysis of quality improvement systems, including use of data systems in quality assurance and research; health data retrieval, analysis and presentation, and review of relevant healthcare informatics research. Prerequisite: statistics; medical terminology.
HIHIM 460 Management Project I (3) Explores the development of management skills and competencies, and a seminar through site experience in healthcare
facilities with campus and clinical faculty. Prerequisite: HIHIM 410
HIHIM 462 Management Project II (5) Explores applied management using a formal capstone project in a healthcare setting. Prerequisite: HIHIM 460.
HIHIM 470 Legal Concepts for Health Fields (3) Examines principles of law as applied to the health field, with reference to health information management.
HIHIM 480 Management, Problem-Solving, and DecisionMaking (5) Provides the tools and experiences useful at a management level for problem-solving and de-cision-making in health information administration.

HIHIM 490 Special Topics (1-5, max. 15)
HIHIM 499 Independent Study (1-5, max. 5)
HIHIM 510 Enterprise Systems and Electronic Health Records (3) Covers industry drivers, development, compliance framework, and certification of electronic health record systems status and operations addressed through strategic decision making and leadership: data movement among enterprise clinical, business, administrative systems to legal health record; and barrier and benefit assessment within major institutional culture and technology initiative changes. Offered: A.

HIHIM 520 Law, Policy, and Ethics in Health Informatics and Health Care (3) Provides an overview of data models, architecture platforms, and relational database theory and technology. Covers design and uses of databases in patient record systems, registries and indexes, and health databases, security, privacy and ethical issues, database design, data integrity, field properties, tables, reports, queries, and data retrieval. Offered: W.
HIHIM 525 Database Concepts and Applications in Health Informatics (3) Explores the laws, policies, and issues involved in oversight and management of health data and health information systems. Defines the legal health record and the requirements, role, and uses. Covers the legal and ethical framework, issues and concepts, and the role of e-discovery on the emerg ing health data environment. Offered: Sp.
HIHIM 530 Privacy and Security in Electronic Environments (3) Covers the laws, regulations, policies, and practice related to the confidentiality, privacy, and security of health information in an electronic environ ment. Federal and state laws and regulations require specific performance in the acquisition, use, storage, and maintenance of health information. Examines systems and practices. Offered: Sp.
HIHIM 535 Clinical Vocabularies, Terminologies, Classifications, and Mapping (3) Covers clinical terminologies, classifications, and mapping, which provides information on taxonomies and metadata, information objects, and classification theory in organizing information in an electronic system. Includes current initiatives in terminologies and data mapping in electronic health record systems. Offered: S.
HIHIM 540 Community Health Information and Information Exchange (2) Covers community and consumer health informatics associated with health services provides; electronic health records that address internal and external standards; accreditation and regulatory requirements needed to provide quality care; and health information exchange from policy to implementation. Offered: A.
HIHIM 550 Healthcare Data Management - Health Record to Enterprise (2) Covers the conceptualization, design, and management of data initiatives and knowledge needed by the healthcare enterprise. Reviews data integrity principles and guidelines to determine methodology for evaluation development and man-
agement of internal and external information requirements. Offered: W.
HIHIM 555 EHR/HI Systems Operations and Improvement (2) Addresses leadership and management of an organization's health information assets that are required as the nation transitions to interoperable health information systems. Offered: W.
HIHIM 556 Environment of Care (2) Explores the current healthcare environment related to healthcare safety issues. Examines an overview of major health and safety challenges and responses; focusing on the impact of the issues in improving health and safety in healthcare and information resources needed. Offered: Sp.
HIHIM 560 Special Topics in Health Informatics (1-3, max. 6) Presents problem solving opportunities on health industry information issues, strategies and unmet challenges. Topics reflect the current state, progress, and future expectations faced by healthcare and health information managers.
HIHIM 599 Capstone Project (3) Provides a practicebased problem solving experience that draws on health informatics and information management; health industry knowledge; leadership and management strategies; and applies project management skills to design, plan, and implement a management project in healthcare and healthcare related organizations. Offered: S.
HIHIM 600 Independent Study or Research (*)

## Health Services Management

HSMGMT 500 Risk and Insurance Seminar (2) Presents the principles and practices of health insurance and risk. Emphasizes healthcare financing arrangements in the United States, including both private and gov-ernment-sponsored (public) programs. Discusses comparisons with other developed countries. Recommended: HSERV 511.
HSMGMT 501 Epidemiology/Critical Evidence Appraisal (3-4) Basic knowledge about methods used in epidemiology and their application to critical appraisal of clinical, epidemiological, and health administration literature for evidence-based management of healthcare organizations, improvement of delivery of health services, and for creating health policies.
HSMGMT 502 Evidence-Based Healthcare Planning (3-4) Applies the techniques of statistics, epidemiology, and critical evidence appraisal to the design and evaluation of population-based healthcare programs.
HSMGMT 505 Managing Healthcare Organizations (2-4) Introduces healthcare organizations and organizational management concepts. Develops a broad perspective by integrating conceptual, strategic, and systemic frameworks using four knowledge themes; the management role, organizational theory, management economics, and theory and practice of systemic organizational change within overall strategic management and systemic contexts.
HSMGMT 506 Introduction to Clinical Care (2) Introduces the world of clinical care. Discovers through readings, discussion, and direct experience, the people and processes of clinical care and how they relate to healthcare administration.

HSMGMT 507 Group Dynamics and Team Leadership (2-, max. 4) Focuses on theories and observations of team behaviors and techniques with emphasis on the individual as a team member; introduces team management/leadership models, theories, and skills. Students develop self-awareness, knowledge, and skills associated with building interpersonal relationships. Credit/no-credit only.

HSMGMT 509 Negotiation Skills (1) Explores the literature and assesses values, knowledge, and skills associated with teamwork and the development of collaborative negotiation skills. Blends cognitive theory, behavioral learning, and project team experience into holistic learning experiences. Credit/no-credit only.
HSMGMT 510 Organizational Behavior and Human Resource Management (4) Application of organizational behavior theory to explore the factors that affect behavior, performance, and job satisfaction of people working in organizations. Provides a body of knowledge and skills needed to successfully manage and lead healthcare organizations. Focuses on "best practices" for managing individuals, teams, and organizations.
HSMGMT 512 Introduction to Management in Health Services (3) Overview of managerial roles, such as supervising and motivating, approaches to organizational and environmental assessment and change, and development of systems analysis skills. For students pursuing careers in research and teaching who are likely to have management responsibilities.
HSMGMT 513 Seminar in Healthcare Finance (3-4, max. 4) Focuses on case studies and modern theory in managerial finance relevant to health services. Students prepare group presentations and individual case study analyses of health services finance problems. Builds on accounting and finance principles. Recommended: either ACCTG 503 and HSMGMT 571 or equivalent.
HSMGMT 514 Health Economics (3/4) Uses economic concepts and tools to examine range of issues pertaining to healthcare, delivery of healthcare services. Includes demand analysis, production of health services, expenditure growth, markets for hospital and physician services, externalities. Emphasis on using economics to examine issues and solve problems. Prior economics courses not required.
HSMGMT 515 Advanced Economics - Decision Analysis (1-3, max. 3) Develops skills to become informed consumers of economic evaluations of health programs. Develops skills necessary to conduct economic analyses of public health and health service programs.
HSMGMT 518 Ethical Issues in Health Services (2-3) Presents an introduction to ethical issues that arise in management of health services organizations. Covers clinical and organizational ethics.
HSMGMT 523 Informatics in Healthcare Management (3) Medical informatics concerns the representation, organization, and manipulation of biomedical information and knowledge. Exposes students to a highlevel understanding of informatics and its healthcare applications. Discussion of successes and failures in implementing information technology focuses on gaining leadership and management knowledge that embraces informatics.
HSMGMT 544 Evidenced Based Management and Capstone Planning (1) Organizes teams to consult with a local healthcare organization on a specific management project. Reviews critical elements of the project planning and management process and oversees the development of a project plan. Credit/no-credit only.
HSMGMT 545 Capstone Integrative Seminar ([1-4]-, max. 4) Designed to assist students in the transition from theory to practice. Emphasis on sharpening analytical and intuitive leadership practices through the use of interactive case studies, team building exercises, and field projects. Prerequisite: second-year MHA students.
HSMGMT 550 Medical Practice Quality Measurement and Management (3) Provides an overview of healthcare industry themes regarding cost, access, and quality. Concentrates on definition, measurement,
and improvement of quality. Shows how quality measurements and specifications; the concept of value, guidelines, and pathway; and the evidence-based medicine movement interconnect. Utilizes examples of cutting edge programs to apply and promote improvement.
HSMGMT 552 Health Administration and Business Law (4) Studies numerous interrelated legal topics pertinent to healthcare organizations, typically including contracts, medical malpractice, legal and ethical obligations to provide healthcare, privileging, medical decision-making, tax-exemption, antitrust, fraud, and health information management. Encourages discussion of how the law supports or hinders current efforts to improve healthcare delivery systems.
HSMGMT 553 Healthcare Marketing Strategy (2) Provides an understanding of wholesale and retail markets in the healthcare sector. Examines market research and the application of marketing strategies and tactics to support an organization's core strategies. Applies the concepts of market segmentation, targeting, and positioning to decisions about design, distribution, pricing, and promotion of health services.
HSMGMT 554 Entrepreneurship (2) Focuses on developing students' resourcefulness, know how, and decision support skills needed to critically identify, evaluate, and develop new healthcare ventures. Topics include anatomy of startup ventures; new venture creation and innovation, business plan development and assessment, financing, marketing, and growth strategies; and corporate venturing.
HSMGMT 560 Management Practice in Healthcare and Public Health Organizations (1-4, max. 4) Introduction to leadership and management, focusing on effective strategies for creating a productive work environment. Organizational structure and strategy introduced. Case studies and other problem-solving methods, using health services applications, are utilized in order to apply theoretical material. Prerequisite: graduate student.
HSMGMT 562 Strategic Management of Healthcare Organizations (3-4, max. 4) Management of goals, strategy, and structure in healthcare organizations. Design of external relationships and internal structures., strategy-formulation, decision-making, and change. Integration of professional, social, and organizational values. Theory, student and practitioner experience, and case studies used to enhance repertoire of management approaches and skills. Prerequisite: HSERV 511 and HSMGMT 560 or equivalent.
HSMGMT 563 Personnel Management for Health Professionals ([1-3]-, max. 3) Designed for midcareer health services professionals developing strategies and skills in human resource management. Focuses on policy and practice issues important to handling day-to-day personnel problems-selection, promotion, performance appraisal, discipline, grievances. Prerequisite: registration in Extended MPH degree program or permission of instructor; non-business majors.
HSMGMT 566 Decision Support Models for Health Services (3) Management science and approaches developed as applied to problems in public health. Emphasizes conceptual understanding of processes/ application of systematic and rational approach to managerial problem solving, including cost-benefit, cost effectiveness analysis. Prerequisite: BIOST 502 and BIOST 503, or BIOST 511; registration in Extended MPH degree program; non-business majors.
HSMGMT 567 Clinical Systems Management (3) Introduces the management of clinical systems and their underlying cultures. Focuses on quality improvement, change management, governance, and clinical
leadership development of physician-administrator partnerships in complex medical care settings.
HSMGMT 568 Quality Process Management (3-4) Provides a thorough understanding of the main concepts of operations management with a focus on total quality management techniques, along with key integrative frameworks that provide the foundation for successful applications of these approaches, as applied to healthcare organizations.
HSMGMT 570 Quantitative Methods (3-4) Concentrates on fundamental concepts of statistics and their application to healthcare management. Approaches statistics from two different perspectives that benefit leaders in healthcare: that of biostatistics and evidence based medicine, and that of management statistics for process improvement.
HSMGMT 571 Healthcare Financial Management (4) Third course in a three-course sequence dealing with health services financial management. Topics covered: health services law, hospital and program policy decisions, financial planning, and hospital design and architecture; and presentation of hospital survey and health services research project reports. Prerequisite: HSERV 511 and ACCTG 500 or ACCTG 501 or permission of instructor.
HSMGMT 572 Financial Management for Health Professionals (3) Intensive review of basic accounting principles/terminology and an introduction to financial management/managerial accounting, including budgeting for managerial control, planning, cost accounting, financing health programs. Managerial accounting, program costing, rate setting, budget preparation. Prerequisite: BIOST 502 and BIOST 503, or BIOST 511; registration in Extended MPH degree program or permission of instructor; non-business majors.
HSMGMT 573 Seminar in Healthcare Finance (3) Practical applications of corporate finance principles. Applies theoretical framework to healthcare financial problems, including capital investment analysis, leasing vs. borrow-to-buy, debt capacity analysis, bond refunding, control of capital, joint venture. Prerequisite: either HSMGMT 514, HSMGMT 587; ECON 400, or ECON 500; ACCTG 503 (or equivalent); HSMGMT 571; or permission of instructor.
HSMGMT 574 Financial Management I (3-4) Prepares clinical professionals for participating intelligently in, and contributing to, financial decisions of healthcare organizations. Learn the language and fundamental concepts of accounting and finance, and become comfortable with what is required in formal financial analysis.
HSMGMT 575 Financial Management II (4) Second in a two part series. Emphasis on preparing medical executives for managerial and leadership roles in healthcare organizations. Focus on tools and analytic frameworks that healthcare managers use to make forward-looking decisions, including capital budgeting and risk analysis.
HSMGMT 576 Capital Planning (2) Emphasizes preparing clinical executives for managerial and leadership in healthcare organizations. Key concepts include capital cycle, creditworthiness, financial planning, cost of capital, capital structure, and capital allocation.
HSMGMT 577 Environment of Care (2) Addresses the basic issues of the "environment of care." Explores the physical environments in which care is provided to patients, JCAHO standards provide the core structure. Uses real world experiences and examples.
HSMGMT 578 Project Management (2) Introduces need for, concepts of, and tools and techniques used in contemporary project management. Builds upon
prior courses and experience in leadership, management, planning, and team development. Focuses on difference between management of ongoing operations and of projects, and the need for a disciplined approach when planning and executing projects.
HSMGMT 579 Accounting for Health Service Managers (4) Emphasis on preparing graduate students for management and leadership roles in their healthcare organizations. Covers financial accounting including the accounting equation, journal entries, and processes of accounting.
HSMGMT 590 Select Topics (1-6, max. 12) By arrangement, students and faculty members develop a program of reading and conference appropriate to the selected topic. Topic chosen is within the special competence of the participating faculty member, in the area of health services management.

## HSMGMT 592 Health Management Program Seminar (1-6, max. 6)

## Reserve Officer Training Corps Programs

## Aerospace Studies

104 Clark Hall

The Air Force Reserve Officer Training Corps program (AFROTC) is designed to motivate, educate, and commission highly qualified students for active duty as officers in the U.S. Air Force. The curriculum provides the opportunity for students in any major to gain military knowledge and to become effective Air Force officers and leaders in the aerospace environment.

UNDERGRADUATE PROGRAM<br>Adviser<br>104 Clark Hall<br>Box 353830<br>(206) 543-2360<br>afrotc@uw.edu

## General Program Requirements

All aerospace studies courses are open to all University students. Additionally, any student may join the AFROTC program as a cadet and enroll in the 100- and 200-level general military courses. AFROTC 100- and 200-level courses count as credit toward graduation beginning autumn, 2007. Entry into the professional officer courses (300- and 400-level courses) as a cadet seeking a commission in the Air Force is on a controlled, selective basis.

## Commissioning Requirements

Students who successfully complete the AFROTC program and receive an academic degree from the University are offered commissions as second lieutenants in the Air Force.

## General Military Courses

The 100- and 200-level courses for AFROTC cadets consist of one classroom hour, one-and-a-half hours of leadership laboratory, and two hours of physical fitness per week during the freshman and sophomore years. Uniforms and textbooks are provided. Students may enter the freshman class at the start of autumn, winter, or spring quarter. Sophomore students may enter at the start of autumn or winter quarter and take the freshman- and sophomore-level courses concurrently. A four-week field-training course, taken during the summer between the sophomore and junior years, is required for entry into the professional officer courses. Students receive pay and travel costs for field training.

Except for sophomore cadets on AFROTC scholarship, students incur no active-duty service commitment by taking general military courses and may drop the courses at any time within the limits of University course-drop policies. Non-ROTC students take the A S 100- and 200-level classes without any additional requirements for leadership laboratory or physical fitness.

## Professional Officer Courses

Cadets selected for enrollment in professional officer courses are enlisted in the Air Force Reserve and receive a tax-free monthly subsistence stipend. They are furnished texts and uniforms. Junior- and senior-level classes consist of three hours of academic classes, three hours of leader-ship-laboratory and two hours of physical fitness per week. Non-ROTC students take AS classes without any additional
requirements to attend leadership laboratory or physical fitness. Non-ROTC students earn academic credits for 300and 400-level courses, but do not earn an Air Force commission.

## Financial Assistance

The Air Force offers one-, two-, and three-year scholarships to college students. AFROTC scholarships pay tuition, certain fees, and textbook reimbursement. In addition, scholarship winners receive a monthly subsistence allowance. To apply for one of these scholarships, students should contact the Unit Admissions Officer in the Department of Aerospace Studies (AFROTC), (206) 543-2360 or at afrotc@uw.edu.

## Two-Year Program

To provide for those students wishing to join AFROTC but unable to take the general military courses, a two-year professional officer course is available on a competitive basis. This program is open to graduate students and full-time undergraduate students in select majors who will complete a bachelor's degree in two years.
Students in this program are required to attend a six-week field-training course at an Air Force base during the summer preceding program entry. The student is paid during the six-week period. Upon return to the campus, students enter the professional officer course. Uniform, texts, and a monthly subsistence are provided. Students interested in this program should contact the AFROTC department by February prior to the autumn quarter they desire to enter, at (206) 543-2360 or at afrotc@uw.edu.

## Minor

## Minor Requirements

29 credits, to include the following:

1. 24 credits of Aerospace Studies coursework
2. 5 credits in a foreign language beyond the first-year level
3. Minimum 18 upper-division credits in Aerospace Studies coursework
4. Minimum 24 credits in residence at the UW
5. Minimum 2.5 grade in each course presented for the minor.

## COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations.
A S 101 Foundations of the United States Air Force I (1) Focuses on the basic characteristics of air doctrine; U.S. Air Force mission and organization; functions of United States strategic offensive and defensive, general-purpose, and aerospace support forces; officership/professionalism and an introduction to communicative skills. Additional one-hour leadership laboratory is mandatory for cadets, but not special students. Offered: A.
A S 102 Foundations in the United States Air Force II (1) Focuses on the basic characteristics of air doctrine; U.S. Air Force mission and organization; functions of United States strategic offensive and defensive, general-purpose, and aerospace support forces; officership/professionalism and an introduction to communicative skills. Additional one-hour leadership laboratory is mandatory for cadets, but not special students. Offered: W.

A S 103 Foundations in the United States Air Force III (1) Focuses on the basic characteristics of air doctrine; U.S. Air Force mission and organization; functions of United States strategic offensive and defensive, general-purpose, and aerospace support forces; officership/professionalism and an introduction to
communicative skills. Additional one-hour leadership laboratory is mandatory for cadets, but not special students. Offered: Sp.
A S 211 The Evolution of Air and Space Power I (1) Factors contributing to the development of air power from its beginnings to the present, and the evolution of air power concepts and doctrine. History of air power employment in military and nonmilitary operations in support of national objectives. Assessment of communicative skills. Additional one-hour leadership laboratory is mandatory for cadets, but not special students. Prerequisite: either A S 101, A S 102, or A S 103, anyof which may be taken concurrently. Offered: A.

A S 212 The Evolution of Air and Space Power II (1) Factors contributing to the development of air power from its beginnings to the present, and the evolution of air power concepts and doctrine. History of air power employment in military and nonmilitary operations in support of national objectives. Assessment of communicative skills. Additional one-hour leadership laboratory is mandatory for cadets, but not special students. Prerequisite: either A S 101, A S 102, or A S 103, anyof which may be taken concurrently. Offered: W.
A S 213 The Evolution of Air and Space Power III (1) Factors contributing to the development of air power from its beginnings to the present, and the evolution of air power concepts and doctrine. History of air power employment in military and nonmilitary operations in support of national objectives. Assessment of communicative skills. Additional one-hour leadership laboratory is mandatory for cadets, but not special students. Prerequisite: either A S 101, A S 102, or A S 103, anyof which may be taken concurrently. Offered: Sp.
A S 250 Aerospace Studies Leadership Laboratory (0) Evaluates the challenges of team leadership in complex contemporary environments. Students apply critical thinking skills using scenarios that emulate real-life Air Force issues and environments. Evaluates Air Force leadership attributes, skills, and activities. Focuses on advanced leadership development. Credit/no-credit only. Corequisite: any A S course. Offered: AWSp.

A S 331 Aerospace Studies $\mathbf{3 0 0}$ (3) Emphasis on basic leadership and management fundamentals, professional knowledge, and communicative skills required of an Air Force officer. Case studies used to examine leadership and management situations. An additional leadership laboratory (mandatory for cadets but not special students) provides leadership experiences, giving students the opportunity to apply learned principles. Prerequisite: A S 213. Offered: A.
A S 332 Aerospace Studies $\mathbf{3 0 0}$ (3) Emphasis on basic leadership and management fundamentals, professional knowledge, and communicative skills required of an Air Force officer. Case studies used to examine leadership and management situations. An additional leadership laboratory (mandatory for cadets but not special students) provides leadership experiences, giving students the opportunity to apply learned principles. Prerequisite: A S 213. Offered: W.
A S 333 Aerospace Studies $\mathbf{3 0 0}$ (3) Emphasis on basic leadership and management fundamentals, professional knowledge, and communicative skills required of an Air Force officer. Case studies used to examine leadership and management situations. An additional leadership laboratory (mandatory for cadets but not special students) provides leadership experiences, giving students the opportunity to apply learned principles. Prerequisite: A S 213. Offered: Sp.

A S 431 Aerospace Studies 400 (3) I\&S Needs for national security, evolution of American defense strat-
egy, policy, and organization; methods for managing conflict, alliances and regional security to preserve American interests. Arms control, terrorism, and current military issues; refinement of communicative skills. A one-hour leadership laboratory is also required for cadets, but not special students. Prerequisite: A S 333. Offered: A.

A S 432 Aerospace Studies 400 (3 I\&S Needs for national security, evolution of American defense strategy, policy, and organization; methods for managing conflict, alliances and regional security to preserve American interests. Arms control, terrorism, and current military issues; refinement of communicative skills. A one-hour leadership laboratory is also required for cadets, but not special students. Prerequisite: A S 333. Offered: W.
A S 433 Aerospace Studies $\mathbf{4 0 0}$ (3) I\&S Needs for national security, evolution of American defense strategy, policy, and organization; methods for managing conflict, alliances and regional security to preserve American interests. Arms control, terrorism, and current military issues; refinement of communicative skills. A one-hour leadership laboratory is also required for cadets, but not special students. Prerequisite: A S 333. Offered: Sp.

## Military Science

104 Clark Hall

The ROTC program provides students an opportunity to learn and practice the art of leading people. Recognizing there is a great difference between cognition and volition, the program is structured to give the student practical experience in leading and managing resources.
The Army ROTC (AROTC) program enables the student to learn about the military profession and the role it plays in our democratic system of government. Courses enable such knowledge to be acquired on campus without serving in the military forces.
Army ROTC electives enrich the student's course of study. Such courses also open up an additional career option, enabling the student to earn a commission and to serve in the Army as an officer, or in the Reserves or National Guard while pursuing a civilian career. Officers serve in a wide variety of career paths, including infantry, human resources, aviation, intelligence, automation, and hospital administration.

Army ROTC provides the student membership in a closeknit fraternal organization.

ROTC programs on college campuses ensure that the influences of higher education are transferred into the military services - a mandatory requirement in a democracy.

A minor in military science and leadership is available to any student at the UW. Requirements are shown below.
For information on the programs described below, contact the following:

Enrollment and Scholarship Officer
105 Clark, Box 353820
206-543-9010

## Traditional Four-Year Program

Open to freshman and sophomore men and women. Academic studies include courses in military history, principles of leadership, techniques of instruction, management and staff procedures, logistics, physical conditioning, and military law. Extracurricular activities include such options as Ranger Company, color guard, training exercises, field trips, and related activities. A non-scholarship student incurs no
obligation of any kind during the first two years of the fouryear AROTC program.
Placement credit toward completion of AROTC courses may be given for prior ROTC or military training. Veterans routinely receive full credit for the first two years of AROTC and may enter the advanced course when they are academic juniors. All military textbooks and uniform items are furnished without charge. Students in the advanced course receive tax-free monthly subsistence of $\$ 350$ per month as an academic junior and $\$ 400$ per month as an academic senior. In the advanced course, cadets are required to participate in the leadership-development program, which is a practicum of skills and principles taught during the previous two years. Between their junior and senior years, cadets attend a five-week summer camp during which they receive varied and challenging training and for which they are paid both for the time at camp and for travel expenses to and from the camp location. Upon entering the advanced course, students agree to complete the program, accept a commission upon graduation, and serve a minimum of four years if scholarship (three years if non-scholarship) and be on active-duty commitment. If the cadet chooses to go into the Reserves or National Guard, then he or she serves a minimum of eight years.

## Four-Year Scholarship Program

Application to this program should be made while the student is still in high school. Selection of students is made on a nationwide competitive basis. This program may lead to a commission in the Active Army, the Army Reserve, or the Army National Guard. All tuition, a flat rate for books and laboratory expenses, and uniform items, plus monthly tax-free stipends, are provided by the Army. The program requires four years of academic study on campus, as well as a five-week advanced camp training period between the junior and senior years, for which the cadet is paid for both time and travel expense to and from the camp location. Academic studies are identical to those of the traditional four-year program. The student must sign a contract wherein the student agrees to complete this program, along with a chosen academic program, to accept a commission, and to serve on active duty or in the reserve forces after commissioning.

## Three-Year Scholarship Program

Open to qualified students already on campus. The scholarship provides financial assistance during the remaining years of the student's enrollment. Each scholarship pays for tuition and a flat rate for books and laboratory expenses and provides tax-free monthly stipends of $\$ 350$ for academic juniors and $\$ 400$ for academic seniors. All other advantages and obligations are the same as those of the fouryear scholarship program.

## Two-Year or Lateral Entry Program

Open to qualified undergraduate and graduate students who have at least two years remaining in school and who have completed at least 81 credits. Students may qualify for entrance into the advanced course under this program in two ways.
They may participate as qualified veterans who receive placement credit for the first two years of AROTC. Veterans are also eligible to compete for two- and three-year scholarships while receiving their educational benefits. Members of the Reserves and National Guard may also be eligible to participate in AROTC and receive their commission upon graduation.
Requires attendance at the Leader's Trainers Course for five weeks at Fort Knox, Kentucky. Completion of this training also qualifies students for direct entry into the advanced course. While at camp, students receive pay plus travel expenses to and from the camp location, and they may compete for two-year scholarships, provided scholarships are available.

## UNDERGRADUATE PROGRAM

Enrollment and Scholarship Officer
105 Clark, Box 353820
206-543-9010

The Army ROTC program offers a minor in military science and leadership.

## Minor

## Minor Requirements:

27 credits, to include the following:

1. M SCI 401, M SCI 402, M SCI 403 ( 9 credits)
2. Additional military science coursework (18 credits)
3. Minimum 18 credits of military science completed at the upper-division level.
4. Minimum 18 credits of military science completed in residence at the UW.
5. Minimum 2.5 grade in each course presented for the minor.

## COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations.
M SCI 101 Military Science and Leadership Development (3) Introduction to challenges and competences critical for effective leadership. Examines how critical thinking, goal setting, time management, and stress relate to leadership. Develops knowledge and comprehension of leadership dimensions. Lessons include history and mission of the Army and leadership, personal development, values and ethics, and tactics and techniques discussions. Offered: A.
M SCI $\mathbf{1 0 2}$ Military Science and Introduction to Tactical Leadership (3) Overviews leadership fundamentals of problem solving, listening skills, briefings, providing feedback, and effective writing. Explores dimensions of leadership values, attributes, skills, and actions in the context of practical, hands-on, and interactive exercises. Introduction of effective oral communication. Develops skills in map reading, land navigation, and tactical maneuvering at team levels. Offered: W.

M SCI 103 Military Science and Introduction to Applied Basic Leadership (3) Final introductory series on lead ership. Applies leadership fundamentals emphasizing attributes, skills, and actions. Students assess capabilities simultaneously, considering their personal leadership. Lessons apply leadership to military tasks of map reading, navigation, and tactics. Offered: Sp.

M SCI 110 Military Science Leadership Laboratory (.5, max. 3) Evaluates the challenges of leading teams in complex contemporary environments. Students ap ply critical thinking skills using challenging scenarios related to small unit operations. Provides feedback on the 16 Army leadership attributes, skills, and actions. Focuses on leadership development. Credit/ no-credit only. Credits do not count toward gradua tion. Offered: AWSp.

M SCI 201 Military Science and Innovative Team Leadership (3) Explores dimensions of innovative tactical leadership strategies and styles. Practices personal motivation and team building through planning, preparing, and executing group exercises. Develops knowledge of leadership values and attributes through an understanding of Army leadership examples. Lessons include leadership, personal development, values and ethics, officership, and tactics and techniques. Offered: A.

M SCI $\mathbf{2 0 2}$ Military Science and Foundations of Tactical Leadership (3) Explores creative and innovative tactical leadership strategies and styles by examining team dynamics and leadership theories. Examines challenges of leading teams in complex contemporary environments. Practical exercises focus on dimensions of terrain analysis, patrolling, operation orders, and cultural awareness. Lessons include fundamentals of leadership, personal development, and tactics and techniques. Offered: W.
M SCI $\mathbf{2 0 3}$ Military Science and Transformational Leadership (3) Continues study of the theoretical basis of Army leadership and framework and dynamics of transformational leadership in the context of military operations. Develops greater self-awareness by assessing leadership styles and practices oral and written communication skills. Enables progress to applied and advanced tactical leadership study. Offered: Sp.

M SCI 301 Military Science and Tactical Leadership (3) Studies, practices, and evaluates adaptive leadership skills. Develops self-awareness and critical thinking skills using challenging scenarios related to small unit operations. Analyzes and evaluates leadership values, attributes, skills, and actions. Lessons focuses on leadership, land navigation, oral and written presentations, tactics, and physical fitness. Prerequisite: M SCI 101; M SCI 102; M SCI 103; M SCI 201; M SCI 202; M SCI 203; may not be repeated if received grade of 2.0 or higher. Offered: A.
M SCI $\mathbf{3 0 2}$ Military Science and Applied Leadership (3) Continues adaptive approach to leadership applying situations necessary to build skills required in complex scenarios. Develops proficiency in evaluating, decision-making, persuading, and motivating peers through practical exercises. Students evaluate individual leadership values, attributes, skills, and actions, and receive specific feedback on their leadership abilities based on written and oral presentations. Prerequisite: M SCI 101; M SCI 102; M SCI 103; M SCI 201; M SCI 202; M SCI 203; may not be repeated if received grade of 2.0 or higher. Offered: W.

M SCI 303 Military Science and Advanced Tactical Leadership (3) Finalizes M SCI 301 and M SCI 302 leadership skills that are necessary to successfully lead others while solving complex problems. Explores, evaluates, and develops decision-making skills required in contemporary environments. Reviews critical aspects of combat, specifically stability and support operations. Provides specific leadership feedback and prepares for advanced leadership and management. Prerequisite: M SCI 101; M SCI 102; M SCI 103; M SCI 201; M SCI 202; M SCI 203; may not be repeated if received grade of 2.0 or higher. Offered: AWSp.
M SCI $\mathbf{3 0 5}$ Practicum-Techniques of Military Instructions (1-3, max. 3) Analysis, review of techniques used in military training and instructions. Students plan, rehearse, deliver, provide written critique on block of military instruction from the Military Qualification Skills Manual. Prerequisite: M SCI 101; M SCI 102; M SCI 103; M SCI 201; M SCI 202; M SCI 203; may not be repeated if received grade of 2.0 or higher.
M SCI $\mathbf{3 1 0}$ Military Science Advanced Leadership Laboratory (1, max. 6) Evaluates the challenges of leading teams in complex contemporary environments. Students apply critical thinking skills using challenging scenarios related to small unit operations. Provides feedback on the 16 Army leadership attributes, skills, and actions. Focuses on advanced leadership development. Credit/no-credit only. Prerequisite: M SCI 110. Offered: AWSp.
M SCI 401 Military Science and Developmental Leadership (3) I\&S Develops proficiency in planning, executing,
and assessing complex problems, functioning as a staff member, and providing leadership-performance feedback. Explores situational opportunities assessing values, risk, and ethical decisions. Performance measured by abilities to give and receive systematic, specified feedback on 16 leadership attributes, skills, and actions focusing on advanced leadership development. Prerequisite: M SCI 301; M SCI 302; M SCl 303; may not be repeated if received grade of 2.0 or higher. Offered: A.
M SCI $\mathbf{4 0 2}$ Military Science IV: Advanced (3) I\&S Explores dynamics of leading in complex situations of contemporary environments. Examines differences in customs and courtesies, military law, principles of war, and rules of engagement. Lessons review aspects of interacting with nongovernmental organizations, civilians, and host nation support with case studies examining complex ethical and practical demands of leadership. Prerequisite: M SCI 301; M SCI 302; M SCl 303; may not be repeated if received grade of 2.0 or higher. Offered: W.

M SCI $\mathbf{4 0 3}$ Military Science and Advanced Leadership (3) I\&S Completes fundamental learning of advanced leadership attributes, skills, and actions that effectively prepare students for careers in military or civilian leadership. Examines Army modularity, unit organization, joint operations, and the role of junior leaders. Focuses on case studies, situational exercises, student presentations, and battlefield analysis to develop insights on leadership. Prerequisite: M SCI 301; M SCI 302; M SCI 303; may not be repeated if received grade of 2.0 or higher. Offered: Sp .

## Naval Science

## 202 Clark

The Department of Naval Science offers University students an opportunity to engage in study that leads to a commission in the U.S. Navy or Marine Corps while working toward a baccalaureate degree. The Naval Reserve Officer Training Corps (NROTC) Unit functions in conjunction with the Department of Naval Science. An NROTC student may select an academic major within certain limitations (e.g., some programs that normally lead to immediate graduate education, such as architecture, are not consistent with the mission of the NROTC program)
In addition to their University curricula, NROTC students take naval science courses in history and customs, naval engineering/weapons systems, navigation, naval operations, and leadership/management. In addition, each student must attend one naval science laboratory session and one physical training session per week. During the summer, students may have a four-to-six-week training cruise to put into practice their earlier classroom training.
Two NROTC programs are offered, as outlined below. In addition, any University student may take a naval science course without enrolling in the NROTC program, or may complete a minor in naval science, requirements for which are shown below.

## Navy Marine Scholarship Program

Each year students are accepted for scholarship status in the four-year, three-year alternate, and two-year NROTC scholarship programs. Eligibility for the three- and four-year programs is based upon nationwide competition and selection by a central selection committee. Application must be made by December 1 of the academic year preceding appointment as a midshipman. Those selected are provided educational benefits, including subsidy by the Navy of all tuition, fees, and uniforms. In addition, there is a textbook
stipend each quarter and a monthly subsistence pay which ranges between $\$ 250$ and $\$ 400$.
For the two-year scholarship program, applications from current sophomores, or juniors enrolled in five-year programs of study, must be received by March. Those chosen by a central selection committee attend a six-week course of instruction at the Naval Science Institute (NSI) at Newport, Rhode Island, during the summer prior to their junior year. Successful completion of NSI instruction qualifies these students for enrollment in the advanced courses in the NROTC program. All scholarship students are appointed as midshipmen, USNR-R, and upon graduation are commissioned as officers in the Navy or Marine Corps Reserve, after which they serve on active duty for a minimum of four years.

## Navy-Marine College Program

Each year, men and women are accepted for four- and two-year non-scholarship college programs. Applications for the two-year program are accepted from current sophomores in community colleges or four-year colleges and must be received prior to March of their sophomore year (or third year, if in a five-year program).
Those students selected for the two-year program attend a six-week course of instruction at NSI during the summer prior to their junior year. Successful completion of NSI instruction qualifies students for enrollment in the advanced course in the NROTC program. Students in the NROTC college program pay their own college expenses but receive monthly subsistence pay during their junior and senior years. The Navy furnishes all uniforms and textbooks used in naval science courses.

All college-program students are eligible for a scholarship after completing one academic term, with scholarship awards based on academic grades and participation within the midshipman battalion. The two-year college-program students also may win a scholarship for superior performance at NSI. Upon graduation, college-program students are commissioned in the Navy Reserve or Marine Corps Reserve and serve on active duty for three years.

## UNDERGRADUATE PROGRAM

Adviser<br>202 Clark, Box 353840<br>206-543-0170<br>nrotc@uw.edu

## Minor

## Minor Requirements

25 credits, to include the following:

1. N SCI 201; N SCl 402 (6 credits)
2. Additional naval science coursework ( 19 credits)
3. Minimum 12 naval science credits completed at the upper-division level.
4. Minimum 12 naval science credits completed in resi dence at the UW.
5. Minimum 2.5 grade in each course presented for the minor.

## COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations.

N SCI 101 The Naval Service (3) McCalden General introduction to the Navy, its organization, missions, roles, tasks, and operating methods. The relationship to the other services within the Department of Defense emphasized. Offered: A.
N SCI 102 History of U.S. Sea Power I (3) I\&S McCalden A comprehensive study of the role of sea power in
the history of the United States, the current status of the various elements of the nation's sea power as they influence the development and implementation of national security policy. Focuses on ancient navies of the Mediterranean to U.S. Navy just prior to World War II. Prerequisite: N SCI 101. Offered: W.
N SCI 103 History of U.S. Sea Power II (3) I\&S McCalden A comprehensive study of the role of sea power in the history of the United States, the current status of the various elements of the nation's sea power as they influence the development and implementation of national security policy. Focuses on the U.S. Navy from World War II to current times. Prerequisite: N SCI 102. Offered: Sp.
N SCI 110 Naval Science Laboratory (0) Melin Evaluates the challenges of leading teams in complex contemporary environments. Topics vary. Credit/no-credit only. Offered: AWSp.
N SCI 201 Naval Leadership and Management (3) I\&S Szymanski Introduction of the theory and techniques of naval leadership based on principles of behavioral science that are pertinent to understanding individual and group behavior of adults. Introduces the management process and the relationship of management functions to leadership. Stresses acceptance of a traditional deep sense of moral responsibility on the part of the aspiring leader. Prerequisite: minimum 2.0 grade in N SCI 101. Offered: A.
N SCI 202 Navigation I (3) NW Gardner The science and practice of maritime coastal navigation, including visual fixing, dead reckoning, and piloting methods. Computation of tides and currents and nautical rules of the road. Prerequisite: N SCI 101. Offered: W.
N SCI 203 Navigation II (3) NW Gardner Basic theory and practice of celestial and electronic navigation. Relative motion theory and contact coordination practice in a multiple ship environment. Prerequisite: N SCI 202. Offered: Sp.

N SCI 301 Naval Ship Systems I (3) Gavrich Study of fundamental principles of energy transfer and thermodynamics. An introduction to nuclear propulsion, gas turbines, and auxiliary power systems. Offered: A.
N SCI 302 Naval Ship Systems II (3) Gavrich Study of ship characteristics, ship design, hydrodynamic forces, stability, damage control, and shipboard electrical systems. Includes introduction to engineering documentation, electrical safety, preventative maintenance, and personnel qualifications. Prerequisite: N SCI 301. Offered: W.

N SCI 303 Naval Weapon Systems (3) Gavrich Study of fundamental principles of sensor, tracking, weapon delivery subsystems, and current naval weapons. Includes techniques of linear analysis of ballistics and weapons, and dynamics of basic components of weapon-control systems. Prerequisite: N SCI 302. Offered: Sp.
N SCI 321 Evolution of Warfare I (3) I\&S Robertson Introduction to the art of war, the evolution of warfare from the earliest recorded battles to the present day. Prerequisite: minimum 2.5 grade in N SCI 103. Offered: W, odd years.
N SCI 323 USMC Leadership and Administration of Justice I (3) Robertson Concepts, objectives, characteristic qualities, and practical techniques of leadership as exercised by the Marine Corps officer. Emphasizes leadership and management role of the junior officer in the Fleet Marine Forces. Intensive physical activities and outdoor projects to test an individual's physical and mental endurance. Prerequisite: either N SCl 321 or N SCI 421. Offered: Sp.
N SCI 401 Naval Operations (3) Gardner Introduction to naval operations, the employment of naval forces, naval tactics, formulation of operations plans and or-
ders, employment of detection equipment, and meteorology. Prerequisite: N SCI 101. Offered: A.
N SCI 402 Naval Leadership and Ethics (3) I\&S Melin Study of leadership and ethics within a military context using applicable case studies. Examines the Law of Armed Conflict and Code of Conduct; the importance of integrity, moral courage, and ethical behavior to effective leadership; and the interrelationship between authority, responsibility, and accountability. Prerequisite: N SCI 201. Offered: W.
N SCI 403 Naval Organization and Management (3) Szymanski Study of organization, systems, and techniques employed in the Navy for management of its human, material, and financial resources. Some work relates to the administration of discipline in the Navy under the Uniform Code of Military Justice. Emphasis on the leadership and management role of the junior officer in the fleet. Prerequisite: minimum 2.0 grade in N SCl 402 . Offered: Sp.
N SCI 421 Amphibious Warfare (3) I\&S Robertson Provides basic knowledge of evolution of amphibious warfare from premodern era to present. Strategic and tactical considerations in planning specific operations and amphibious landings. Prerequisite: minimum 2.5 grade in N SCI 321. Offered: A, even years.
N SCI 423 USMC Leadership and Administration of Justice II (3) Robertson Concepts, objectives, characteristic qualities, and practical techniques of leadership as exercised by the Marine Corps officer. Emphasizes the leadership and management role of the junior officer in the Fleet Marine Forces. Intensive physical activities and outdoor projects to test an individual's physical and mental endurance. Offered: Sp.

# School of Social Work 

## Dean

Edwina Uehara

## 210 Social Work/Speech and Hearing Sciences

The School of Social Work offers two professional programs, one at the undergraduate level and one at the graduate level, as well as a PhD program. The Bachelor of Arts in Social Welfare (BASW) program prepares students for entry-level generalist practice. The graduate professional program prepares students for advanced practice within a field of concentration; students earn a Master of Social Work degree. Both the BASW. and MSW. programs are accredited by the Council on Social Work Education. The School also offers a Doctor of Philosophy degree in social welfare that prepares students for careers in research and education. Consistent with University policy, no credit is granted on the basis of life experience or previous employment. All three programs are housed in the Social Work/ Speech and Hearing Sciences Building, 4101 Fifteenth Avenue Northeast, Seattle, WA 98105-6299.
In addition, the School offers two concurrent degree programs - one with the School of Public Health leading to the MSW. and MPH degrees, and a second with the Evans School of Public Affairs, leading to MSW. and MPA degrees.

## UNDERGRADUATE PROGRAM

## Adviser

23D Social Work, Box 354900
(206) 543-8617
sswstsrv@uw.edu

The School of Social Work offers the following program of study

- The Bachelor of Arts degree with a major in social welfare

The program includes upper-division courses in social welfare, with prerequisites in human biology, economics, psychology, statistics, and sociology. Students enter at the start of their junior year after completing most of the gen-eral-education requirements established by the College of Arts and Sciences. Social welfare courses include content on social welfare history, policy and services, human behavior and the social environment, social welfare research, and cultural diversity. These academic courses prepare students for the senior year three-quarter practicum experience, which involves a total of 480 hours of direct social services under the supervision of a practicum instructor approved by the School.

## Bachelor of Arts Program

Suggested First- and Second-Year College Courses: SOC WF 101, SOC WF 200; SOC WF 201; prerequisites in psychology, sociology, economics, and biology (see list below); also, courses in American ethnic studies, sociology, psychology, and women studies.

## Department Admission Requirements

Approximately 40 juniors are admitted each year. Admission, which is for autumn quarter only, is competitive and completion of the requirements listed below does not guarantee acceptance. April 1 is the application deadline. To be considered for admission, applicants must meet the following criteria by the time they begin classes in the social welfare program:

1. Completion of a minimum of 65 credits
2. Five prerequisite courses, four of which must be completed prior to beginning the program in autumn (minimum grade of 2.0 required in each): PSYCH 101, PSYCH 203, PSYCH 206, PSYCH 210, PSYCH 245, or PSYCH 250; SOC 105, SOC 110, SOC 111, SOC 212, SOC 240, SOC 247, SOC 251, SOC 260, SOC 270, SOC 271; GWSS 251 or ANTH 330; ECON 100, ECON 200, or ECON 201; LSJ 363, POL S 382, AFRAM 437, or GEOG 208; and one of the following courses in human biology: BIOL 118, BIOL 180, PSYCH 202, PSYCH 357, GENOME 261, or GENOME 351; STAT 220 (STAT 220 may be taken as late as spring quarter of the junior year, but is a required prerequisite of the senior year courses and is recommend prior to admission).
3. A minimum 2.00 cumulative GPA
4. Have some paid or volunteer social service experience
5. Applicants must submit a completed application, admission essay, résumé, and provide copies of their college transcripts

Application forms and a detailed description of the social welfare major are available at the School's Web site, socialwork.uw.edu/. A student may discuss the program in person by contacting the Director of Admissions, (206) 543-5676, sswadmis@uw.edu. Students accepted to the major complete a change-of-college form and transfer their academic file to the School's Student Services Office. Students not accepted may contact the Director of Admissions to discuss alternatives to the social welfare major, or the appeal process.

## Major Requirements

61 credits as follows:

1. SOC WF 200; SOC WF 310; SOC WF 311; SOC WF 312; SOC WF 315; SOC WF 320; SOC WF 390; SOC WF 402SOC WF 404; SOC WF 405; SOC WF 410, SOC WF 415; practice selective; capstone project; and skills lab
2. STAT 220 must be completed before the senior year.

## Student Outcomes and Opportunities

- Learning Objectives and Expected Outcomes: The BASW. program produces beginning-level social work practitioners and is accredited by the Council on Social Works Education. Students become generalist social work professionals able to work with individuals, families, groups, communities, and organizations in enhancing the health, well being, and empowerment of disadvantaged communities across the lifespan. Graduates may pursue social work practice jobs, or graduate education in social work, or a range of other fields (e.g., law, medicine, public policy, international development). Students receive an interdisciplinary liberal arts education, drawing on a range of social science courses which prepare them to promote human welfare and deal with complex social problems. Students are involved in both academic coursework (gaining intellectual knowledge and critical thinking skills) and a field placement experience ("lived" or "on the ground" experience).
The following outcomes define the BASW. program:
- Preparation of entry-level baccalaureate social workers for generalist practice in a multicultural context.
- Education and training of generalist social workers who are informed, engaged, and responsive practitioners, able to understand and take action in enhancing human welfare and in promoting social and economic justice.
- Education of students within the context of an interdisciplinary liberal arts education, to foster a comparative and critical examination of social welfare and social work through the study of its history, policies, research, and practice interventions.
- Preparation for graduate education.

In addition, the School of Social Work houses a number of centers and projects. For more information on these research activities, visit socialwork.uw.edu/research/ research-centers.

- Honors Options Available: For Interdisciplinary Honors, see University Honors Program.
- Research, Internships, and Service Learning: Contact the adviser for information.
- Department Scholarships: A limited number of financialaid opportunities are available to students. Applicants are urged to apply for assistance through the Office of Student Financial Aid by February 15. Completion of the Free Application for Federal Student Aid (FAFSA) is required for consideration for any departmental funding. Inquiries may be directed to the Chair of the Scholarship Committee, School of Social Work.
- Student Organizations/Associations: Organization of Student Social Workers (OSSW)

## GRADUATE PROGRAM

Graduate Program Coordinator<br>Box 354900<br>(206) 543-8617<br>sswstsrv@uw.edu

## Master of Social Work

The School of Social Work offers a Master of Social Work degree with three options for completion: a two-year fulltime program; a one-year advanced-standing program for qualified students with a degree in social work/social welfare from a Council on Social Work Education accredited undergraduate program; and a three-year part-time extended degree program.
All program options prepare students for advanced professional practice with a culturally diverse range of at-risk populations in publicly funded social services. The curriculum encompasses two distinct but interconnected areas: the beginning content or professional foundation, and opportunities for advanced content in areas of policy, services, and methods

The professional foundation provides instruction in the basic knowledge and skills required for effective, generalist social work practice, as well as socialization to the profession, its value orientation, ethics, and history.
The advanced curriculum provides in-depth knowledge and skills needed for advanced practice in the social work profession. The advanced curriculum is being revised. Check the School's website, socialwork.uw.edu for current information.

## Admission Requirements

Admission to the MSW. program requires formal admission to the Graduate School as well as to the School of Social Work. Applicants must have a bachelor's degree, a strong academic background, and social-service experience. Applicants submit official transcripts from all colleges and universities attended, references, application forms, résumé, and an admission essay to be considered for autumnquarter entry. January 15 is the closing date for receipt of applications and materials. Admission is competitive and selection is based on a review of the applicant's submitted materials. Current application materials can be obtained from the School's Admissions Office website at socialwork. uw.edu/admissions/.

## Degree Requirements

Minimum 46 credits (advanced standing program); 75 credits (day and extended degree programs), as follows:

1. MSW program requirements include completion of required professional foundation and advanced cur-
riculum credits and demonstrated competence in both academic and field practicum work.
2. Human Biology Requirements: BIOL 100, BIOL 101-, BIOL 118, BIOL 161, NUTR 300, or GENOME 261 (or equivalent), or SSW Continuing Education course "Human Biology" taken within 10 years of admission to the MSW. program. MSW. students must complete the requirement prior to beginning the advanced curriculum, (including practicum). Credit may not be applied to the MSW. degree. Courses in nutrition, psychobiology of women, and biology of aging also fulfill this requirement.
3. Basic Statistics Requirement: An introductory course in statistics (any discipline) is a prerequisite for SOC W 505/SOC W 506.
4. Professional Foundation Courses Required for the Day and Extended Degree Program: SOC W 500 (3), SOC W 501 (3), SOC W 504 (1-3), SOC W 505 (3), SOC W 506 (3), SOC W 510 (3), SOC W 511 (3), SOC W 512 (3), SOC W 513 (3), SOC W 523 (1), 3 credits of electives, SOC W 524 (8). All foundation courses must be completed before beginning the advanced curriculum.
5. Advanced Curriculum for the MSW Day Program: Specialization in an advanced methods area or field of practice. Current areas of concentration include policy and administrative practice, health and mental health practice, community-centered integrative practice, practice with children, youth, and families, and multigenerational practice. Students enter the second year with an individualized learning plan (developed by winter quarter of their foundation year) that sets out a coherent program of advanced study. Identified in the learning plan is a policy/services course, an advanced methods area, an advanced field practicum, and proposed choices for methods and elective courses that support the student's overall area of concentration.
Programs of study vary slightly by concentration, but a typical program of study includes:
a. One policy/services course (3 credits), consistent with the student's second year specialization
b. Two advanced methods ( 6 credits) in the student's primary method area or across methods with the approval of the faculty adviser and practicum coordinator
c. Elective course offerings ( 9 credits) to include courses related to the policy/services areas, and advanced HBSE and theory courses, with the primary focus on development of knowledge and skills in intervention. Students permitted to take one elective course from outside the school. Elective courses range from 1 to 3 credits.
d. Advanced practicum (SOC W 525, 18 credits) aligns with the student's policy/services course and with the student's primary intervention method area.
6. Advanced Curriculum for the MSW Extended Degree Program: Students select one of two specializations within the Interpersonal/Direct Social Work Practice concentration: Integrative Health-Mental Health Advanced Practice, or Multigenerational Practice with Children, Families, and Elders. Advanced curriculum consists of policy/services course, a two-quarter advanced practice methods sequence, SOC W 571 (3), 6 credits of electives, and a 720 -hour advanced practicum.
7. MSW Electives: Courses may be selected from curriculum offerings related to particular fields of practice, intervention theories, intervention modalities, social problems, populations, and research methods. Students may take advanced methods courses in areas other than the student's primary methods area.and relevant courses in other graduate programs and professional schools of the University. Three credits of external coursework may be included.

## Financial Aid

A limited number of financial-aid opportunities are available. Applicants to the MSW. program are urged to apply for assistance through the Office of Student Financial Aid by February 15. Completion of the Free Application for Federal Student Aid (FAFSA) is required for consideration for any departmental funding. Departmental funding is limited and typically requires a department-specific application be submitted by April 1. Inquiries may be directed to the Admissions Office, School of Social Work. Information on available tuition awards may also be reviewed on the Social Work Admissions Website, socialwork.uw.edu/admissions.

## Master of Social Work/Master of Public Health Concurrent Degrees

The concurrent degrees prepare professionals who function at the interface of both fields in practice, research, planning, administration, and policy development. Students develop (1) competence in social work practice in community health; (2) understanding of the organization and functioning of the health and social service delivery systems; and (3) basic analytical skills necessary to conduct research and to perform competently in a variety of public health social work roles. Students also have an opportunity for in-depth study of particular issues related to their special interests and career goals.

## Application

Students who matriculate into the full time program in either Social Work or Public Health are eligible. Students admitted to Social Work with advanced standing should apply for both programs simultaneously. Students in the part-time evening degree program in either Social Work or Public Health are not eligible for the program.

1. Students must apply to and be accepted by both schools.
2. Students are strongly encouraged to complete up to one year of studies in Social Work before entering the Public Health program. Applications for entry are due in both schools by January 15. Typically students apply to Social Work in January and enter the MSW. program in September. They then apply to Public Health the following January and begin the MPH program the next September. Staggered entry permits students to complete all requirements of both degrees within three years.

## Degree Requirements

$115-125$ credits (depending on number of electives taken)

1. Two separate sets of at least 36 credits each.
2. At least 18 numerically graded credits for each degree in courses numbered 500 through 599. All required courses in the MPH program must be taken for a grade.
3. Up to 12 credits taken in one school may be counted toward the other school's total credit requirements, if approved by both programs. Electives for each department can be fulfilled by taking the required courses of the other department.
4. The M.P.H requires a thesis.

## Master of Social Work/Master of Public Affairs Concurrent Degrees

Graduate students at the UW School of Social Work may concurrently pursue a Master of Social Work and a Master of Public Administration at the UW Evans School of Public Affairs. Earning degrees in both areas prepares students to be professionals who work at the interface of the two fields in practice, research, planning, administration, and policy development.

Students are able to combine their studies at the Schools of Social Work and Public Affairs to meet the requirements for both degrees in approximately three years. This document provides guidance for students who are interested in
this option. The concurrent degree option described here assumes that students are pursuing degrees in the School of Social Work MSW. day program and the Evans School's traditional M.P.A degree.
The MSW-M.P.A is an informal concurrent degree program under UW code and, as such, it is the student's responsibility to make sure her or his plan of study aligns with the requirements of the respective schools and the Graduate School.

## Admission

Students must apply to and be accepted by both schools. Application decisions are made independently by both schools. Students interested in the concurrent degree should indicate that interest in the personal statement portion of both applications.
Current students in either Public Affairs or Social Work who decide in the fall of their first year that they wish to ap ply to the other school may request a courtesy transfer of some application materials from their current school to the other school's admission office. Students are responsible for monitoring the completeness of their own admissions materials.

## Program Entry and Foundation Preparation

Given the integrated first-year curriculum in both programs, students complete the first year of foundation study in each program largely without substitution.

The concurrent degree option is flexible enough to allow students who begin in either program to decide during the first year to pursue the concurrent degree. However, students who know at the point of initial application that they wish to pursue the concurrent option are strongly advised to complete the Social Work foundation in year one and the Public Affairs foundation in year two. This allows greater flexibility in scheduling electives and provides a margin ally more coherent sequencing of theoretical and research methods content.

## Doctor of Philosophy

The PhD program in social welfare prepares students to contribute to the advancement of knowledge and practice in the field of social welfare and the profession of social work for the promotion of social justice. Students are expected to acquire both the substantive and methodological competence to contribute theoretical formulations and empirical research that inform effective social work practice and advance scholarship in social welfare.

After the first year of required courses, each student's program of study is individually designed and focuses on welldefined substantive and interventive areas of research relevant to the field of social welfare. In the basic core of required courses, which includes teaching and research practice, students have an opportunity to pursue their particular interests with faculty members in the School of Social Work and in other schools and departments.
During the first two years, students define and develop the specialized areas that are the focus of their general examination and, typically, their subsequent dissertation research. Selected areas must have clear significance for the development of practice, programs, or policies in social work and social welfare

The general examination for advancement to candidacy generally occurs at the end of the second year or during the third year. After advancement to candidacy, students devote themselves full time to completion of their dissertation research. The last step before the degree is the final examination, defense of the dissertation. Students are strongly encouraged to remain in residence at the University until the dissertation is accepted. The PhD program takes approximately four years, although academic excellence in learning and performance is always the first criterion for degree progress.

## Admission Requirements

Admission is highly selective and students are admitted for autumn-quarter entry only. Applicants must have a master's degree in social work or a closely related field.
The Council on Social Work Education requires that faculty who teach practice courses in accredited programs have two years of supervised practice experience. Thus, obtaining such experience is highly important for those who seek academic positions following graduation.

Applicants selected for admission are those whose scholastic achievements, previous experience, and aptitude for social welfare research, scholarship, and teaching indicate the greatest promise for achieving the objectives of the program. In addition, an effort is made to maintain a balanced student group reflecting the range of concerns in social welfare and of faculty resources. The deadline for receipt of admission material is December 15. For more information, call (206) 685-1680, or email phdmhpr@ uw.edu.

## Degree Requirements

90 credits minimum, to include:

## Required Courses

All required PhD courses must include content on diverse populations, including the disadvantaged and oppressed. This includes content on people of color, women, gay men and lesbians, and persons with disabilities. The specific type or nature of the content (e.g., readings, exemplars, exercises) and how it is introduced and integrated likely differs across courses. In all cases, content on diversity must be in accord with course objectives and be visibly present in the course syllabus.
All required coursework (with the exception of the 800 tutorials) must be completed before or during the quarter in which the oral section of the general examination takes place.
The following courses are required of all students in the program and must be taken on a graded basis unless offered credit/no-credit only (i.e., they cannot be taken on a Satisfactory/Not-Satisfactory basis).

1. Introduction to Advanced Research Methods and Design. Two quarters during first year.
2. Fundamentals of Statistics. Two quarters during the first year through other departments (primarily Sociology or Biostatistics).
3. Research Issues and Priorities in Social Welfare. Two quarters during the first year.
4. Social Welfare Policy. Two quarters during the first year (contemporary policy and international and global policy).
5. Research Practicum. Two quarters; to be completed by the end of the second year (credit/no-credit only).
6. Teaching Practicum. One quarter; to be taken after successful completion of first year (credit/no-credit only).
7. Career Planning Seminar. One-credit seminar offered quarterly (credit/no-credit only). These focus on professional development issues and skills with emphasis on academic and research careers.
8. Teaching Preparation. One quarter in the second year.
9. A minimum of two ( $3+$ credit) courses in advanced graduate research methods (typically 500-level courses offered in other departments) relevant to the student's anticipated research in a substantive or interventive area. Coursework beyond the minimum is encouraged.
10. A minimum of two ( $3+$ credit) graduate social science theory courses ( 500 level or above), designed to provide strong theoretical foundations. Students often use these courses to develop a "minor" in one of the social sciences. Offered in the College of Arts and Sci-
ences or one of the professional schools, they are related to the substantive or interventive content of the student's program. Coursework beyond the minimum is encouraged for greater depth of interdisciplinary theoretical training.
11. Dissertation Tutorials (SOC WL 800). Taken after the student has successfully completed the oral general examination and has been advanced to candidacy for the PhD Students must complete a total of 27 credits over at least three quarters to satisfy the Graduate School requirement

## Elective Courses in the School of Social Work

1. Qualitative Methods in Social Work Research. One or two quarters, offered alternate years.
2. Analytical Perspectives on Social Welfare Policy. One quarter, offered annually.
3. Advanced Topics in Data Analysis. One quarter, offered annually, covering advanced quantitative methods.
4. Social Movements and Participatory Action Research Methods. One quarter, offered alternate years.
5. Psychosocial scale construction and measurement. One quarter, offered alternate years.
6. Interdisciplinary Prevention Science: Children and Adolescents. Overview of developmental perspective examining factors that promote or inhibit health development at different stages and during transitions (focus on birth through age 21), 3-credit course (credit/ no-credit only).
7. Promoting Well-Being among At-Risk Groups. Guidance for Health Promotion/Prevention Research.

## Additional Course Expectations

Students may take tutorials (SOC WL 600) with faculty members while completing advanced coursework and writing the integrative paper (prior to the oral general examination). These tutorials should include one or more written products.
Students are also encouraged to take additional courses that bear on their substantive areas of interest. Courses may be taken in any department or school of the University but should ordinarily be at the 500 level or above.

## Prevention Research Training Program Courses

(Trainee requirements in addition to all PhD program courses)

1. Seminar in Prevention Science. One-credit seminars taken autumn, winter, and spring quarters each year of the traineeship. Credit/no-credit only.
2. Promoting Well-Being among At-Risk Groups: Interdisciplinary Guidance for Health Promotion/Prevention Research. One quarter, 3 credits, introduction to prevention research.
3. Two additional graduate level (500+) courses, one social science theory and one research methods, related to the prevention research area of study.

## Financial Aid

The School of Social Work ensures that all students have some means of financial support during the nine-month school year for the first three years in the program and is frequently able to continue support beyond this point. In each of the first three years, the PhD program director assists students in obtaining funding from the School, other UW sources, or external federal and private granting agencies. Each year, awards of stipends, fellowships, and research and teaching assistantships are made on the basis of resources available and match with areas of student interest. An award of a particular stipend or assistantship in one academic year does not carry a commitment for that same award in another year because both the grant situation and the applicant pool change. Advanced teaching and research positions are available on a competitive
basis. Students are encouraged to begin their efforts to secure dissertation research support early and to stay in communication with the PhD program directors and associate deans, who oversee assistantship assignments in consultation with the School administration.

## COURSE DESCRIPTIONS

See page 5 for an explanation of course numbers, symbols, and abbreviations.

## Social Welfare (SOC WF)

SOC WF 101 Social Work in Action: Bridging the Gap From Science to Service (5) I\&S Explores current social work practice and research applied to major societal problems. Lectures and discussions by leading faculty introduce students to the evidence-based perspective underlying program planning and practice innovation. Topics include: juvenile delinquency, child maltreatment, domestic violence, foster care reform, mental health, school violence, substance abuse, and poverty. Offered: A.
SOC WF 120 International Responses to Human Needs: Social Welfare Polices and Services (5) Focuses on major global social services such as poverty, immigration, and health that are reshaping social welfare policies and services throughout the world. Provides a comparative overview of social welfare policies and programs in the United States and selected other countries.
SOC WF 200 Introduction to Social Welfare Practice (5) I\&S Introduction to the field of social work, including the theoretical concepts and institutional framework that guide practice. Overview of social work profession and social welfare system within which it operates. Lectures supplemented by exercises, films, guest lectures, and class discussions. Offered: A.
SOC WF 201 Advances in Prevention Science: Bridging the Gap from Science to Service (5) I\&S Investigates the potential for preventing major social problems (child abuse and neglect, alcohol misuse, and interpersonal violence). Critically examines the state of prevention science, includes dialogue about ways to enhance the exchange of ideas between research and practice communities, and explores implications for social policy.
SOC WF 215 Intergroup Dialogues (3) Explores issues of social identities, differences, and inequalities to build understanding, skills, and values for bringing about greater social justice using dialogic communication.
SOC WF 250 Writing for Social Welfare (2) Focuses on producing short essays, paragraphs, and individual sentences. Discusses writing conventions and students' questions and challenges; analyzes writing samples; and practices short writing to develop greater ease with writing well and writing frequently.

SOC WF 297 Study Abroad in Social Work (1-15, max. 15) For participants in a UW study abroad program. Specific content varies and must be individually evaluated.
SOC WF 310 Social Welfare Practice I (3) Provides an introduction to the roles, tasks, and functions of the social welfare practitioner and to theories and methods of intervention; a conceptual framework for social work practice with individuals, families, and small groups; and an opportunity to develop skills in problem assessment, intervention, termination, and evaluation. Offered: A.
SOC WF 311 Social Welfare Practice II (3) Provides an introduction to the roles, tasks, and functions of the social welfare practitioner and to theories and methods of intervention; a conceptual framework for
social work practice with individuals, families, and small groups; and an opportunity to develop skills in problem assessment, intervention, termination, and evaluation. Prerequisite: SOC WF 310. Offered: W.
SOC WF 312 Social Welfare Practice III (3) Focus on macro systems in a diverse society using the generalist perspective. The implications of system resources and configurations for meeting human needs are considered. The role and function of generalist social workers to understand and advocate for system development and change is emphasized. Prerequisite: SOC WF 311. Offered: Sp.

SOC WF 315 Community Service Learning (1-5, max. 6) Opportunity for students to apply social work theory to practice, to advocate for social justice, and to be involved in community service. Students learn by connecting classroom theory and community-based experience through the completion of communitybased projects in social work-type agencies. Majors only.

SOC WF 320 Social Welfare Policy (5) I\&S Emphasizes policy and program development in social welfare with emphasis on the context, making, and unmaking of social policy. Covers policy formulation as well as current and emerging policies in social welfare. Prerequisite: SOC WF 200. Offered: WSp.
SOC WF 390 Introduction to Social Welfare Research (5) Introduction to logic of the scientific method as applied to social work and social welfare practice, to the design and conduct of a research study, and to data collection and summarization. Skill development in critical consumption of social welfare research. Prerequisite: either STAT 220 or QMETH 201. Offered: A.
SOC WF 402 Human Behavior and Social Environment I (5) I\&S Focuses on understanding human development across the lifespan. Integrates biological, psychological, structural, environmental, political, global, and socio-cultural perspectives. Explores the relationship between the person and the environment including families, groups, organizations, communities, and institutions.
SOC WF 404 Cultural Diversity and Justice (5) I\&S History and culture of disadvantaged and oppressed groups served by social welfare generalist practitioners. Offered: Sp.
SOC WF 405 Fieldwork Seminar (1-4, max. 9) Integrates social work practicum experiences with prior and concurrent coursework in social sciences, social work, and research. Includes discussion of class presentations and simulations or practice situations that combine knowledge and skill utilization. Student logs provide a basis for individual goal identification and achievement. Required of social welfare seniors. Offered: AWSp.
SOC WF 410 Evidence-Based Practices in Social Welfare (3) Focuses on interface between social work research and practice, with attention to origins and defining features of evidence-based practice (EBP) and approaches to intervention consistent with EBP framework. Integrates content on research and practice priorities, and provides students with knowledge and skills to promote use of theory-driven, empirical-ly-supported interventions.
SOC WF 415 Beginning Field Instruction (1-12, max. 12) Students are placed in selected social service agencies and accept beginning social service assignments under the supervision of competent agency personnel. Credit/no-credit only. Offered: AWSp.
SOC WF 435 Skills for Social Welfare Practice (1) Builds on first-year generalist practice content. Provides skill building in one or two areas of social work practice relevant to many practice settings. Topic chosen by students and faculty. Credit/no-credit only.

SOC WF 442 Building Competencies for Intergroup Dialogue Facilitation (5) VLPA/I\&S Focuses on both knowledge and skills development for peer facilitators. Topics include philosophy and principles of dialogic education and dialogic communication; intergroup communication; social identity development; principles of working with conflict; group dynamics, observation, and facilitation; team building among cofacilitators; and creating a support system among instructors and facilitators.
SOC WF 443 Facilitating Intergroup Dialogue (5) VLPA/ I\&S Practicum seminar providing instruction, consultation, and supervision of peer group facilitators. Focuses on comparison of facilitation experiences and consultations, trouble-shooting with other facilitators, co-facilitator team building, and planning for dialogues. Exploration of specific, current intergroup issues, such as affirmative action and immigration. Continuation of team-building work begun in SOC WF 442.

SOC WF 445 Special Topics in Social Work Practice Methods (3, max. 6) Examines roles, skills, and methods in designated areas of social work practice. Content builds on foundation practice methods.

SOC WF 450 Integrative Seminar: Poverty Analysis (5) Critical analysis of poverty both in the United States and from a global perspective. Analytical and descriptive focus on measurement, processes of production and perpetuation, and theoretical perspectives that lead to different social and economic policy responses.
SOC WF 460 Chemical Dependency: Assessment and Treatment (3) Provides students the knowledge and basic skills needed to recognize and understand the dynamics of chemical dependency in the lives of individuals. Students learn how to assess the presence of this disorder and what the issues are in referring individuals to treatment.
SOC WF 465 Social Welfare Capstone Seminar (1) Students demonstrate and reflect on mastery of core competencies and respective practice behaviors foundational to generalist practice. Studies analyze and synthesize data from their experiences in the BASW program and integrate this understanding with their new identity as a professional social worker. Credit/no-credit only.
SOC WF 490 Independent Research in Social Welfare (1-15, max. 15) Individual work with faculty member to assist with current research project(s). Students trained and supervised in some or all of the following research tasks: literature review, data analysis, record-keeping, interviewing, report writing, data entry and coding, data collection, and other tasks commonly found in research problems in social welfare. Credit/no-credit only.
SOC WF 495 Special Topics in Generalist Social Welfare (1-5, max. 15) Readings, lectures, and discussions pertaining to significant topics of special and current interest to social workers.
SOC WF 497 Advanced Study Abroad in Social Work (1-15, max. 15) For participants in a UW study abroad program. Specific content varies and must be individually evaluated.
SOC WF 499 Independent Study in Social Welfare (1-15, max. 15) Independent reading or independent study. Includes written paper. Not open to graduate or nonmatriculated students.

## Social Welfare (SOC WL)

SOC WL 515 Community Service Practicum (3, max. 6) Development of skills on working in partnership with community institutions in the role of researcher or scholarly collaborator, through ongoing reflection and consultation with a faculty member. Uses a learning
contract to focus specific activities. Credit/no credit only. Offered: AWSpS.

SOC WL 552 Seminar in Contemporary Social Welfare Policy (3) Critical review of contemporary American income maintenance and related social welfare policies, and the economic, political, and social factors that affect their development, implementation, and effectiveness. Evaluation of their effects on poverty, income inequality, and related social outcomes, including international comparisons. Assessment of proposals for reform. Closely linked to SOC WL 553.
SOC WL 553 Globalization and International and National Social Welfare Issues and Politics (3) Critical examination of globalization and its implications for the historic and contemporary development, formulation, and adoption of policies related to international and national social welfare. Emphasizes the development of conceptual frameworks that further understanding of the complex interplay of international and national issues and social welfare policies.
SOC WL 554 Analytical Perspectives on Social Welfare Policy (3) Broad overview of the social welfare policy process, including epistemological issues, content on social problem construction and definition, policy agendas and case study methodology. Introduction to analytical tools and concepts needed to take a proactive role in policy development, advocacy, implementation, and policy research.
SOC WL 556 West Coast Poverty Center Seminar Series (1, max. 20) Presents cutting-edge research on poverty, inequality, and public policy. Offered: AWSp.
SOC WL 557 Dissertation and Career Seminar (1, max. 20) Orients advanced PhD students to three main tasks: dissertation, job market, and entering teaching and research careers. Offered: AWSp.
SOC WL 559 Preparing to Teach: Instructional Theory and Practice (3) Teaching conceptualized as professional practice. Focuses on integration of theory, research and educational strategies, techniques, and skills into students' practice as educators. Classroom discussions and activities promote reflection, exploration, critical analysis, and experimentation.
SOC WL 577 Promoting Well-Being among At-Risk Groups through Prevention Research (3) Nurius Interdisciplinary overview of major concepts and methods in health promotion and prevention research, with emphasis on at-risk populations. Attentive to health disparities, collaboration with diverse communities and biobehavioral advances in addition to application of theory and prevention-science framework. Encourages interdisciplinary participation and supporting students in articulating their research perspectives.
SOC WL 578 Seminar in Special Topics for Prevention Research (1, max. 30) Interdisciplinary overview of major concepts in promotion of mental health and prevention of mental distress with prevention science as framework. Provides conceptual foundations for advanced study in specialized aspects of mental health prevention research.
SOC WL 579 Interdisciplinary Approaches to Prevention Science: Children and Adolescents (3) Overview of theory, research, and practice in prevention science. Developmental perspective examining factors that promote or inhibit health development at different stages and during transitions (focus on birth through age 21). Designed for interdisciplinary dialogue, and includes guest faculty from around the University who are specialists in course topics. Credit/no credit only.
SOC WL 580 Quantitative Research Methods and Design (3) Logic, terminology, and methods of quantitative social science approaches to correlational, experimental, quasi-experimental, survey, and program
evaluation research. Components of the research process (problem definition, concept explication, ethical evaluating, and designing defensible quantitative research studies).
SOC WL 581 Qualitative Research Methods and Design (3) Theoretical and methodological foundations of a range of qualitative methods relevant to social welfare and social science research. Fundamentals of qualitative research design and implementation, including framing research questions, sampling, data collection, analytical methods, and quality criteria. Focus on ethics, cultural sensitivity, and communitybased research with vulnerable populations.

SOC WL 582 Research Practicum (3-) Development of specific methodological skills in social welfare research through participation in an ongoing research project. Learning contract used to target specific research competencies. Credit/no-credit only. Offered: ASpS.
SOC WL 583 Research Practicum (3) Development of specific methodological skills in social welfare research through participation in an ongoing research project. Learning contract used to target specific research competencies. Credit/no-credit only. Offered: ASpS.

SOC WL 584 Teaching Practicum (3) Supervised teaching of a required course or teaching as a co-instructor with a faculty member. Learning contract used to target specific teaching competencies, e.g., assessing and evaluating student outcomes, identifying class session goals and objectives, tailoring instruction methods to diverse learning styles. Offered: AWSpS.
SOC WL 585 Qualitative Methods in Social Work Research I (3) The first in a two-quarter sequence offering intensive experience in the theory and application of qualitative and ethnographic research methods. Prepares students for conducting qualitative studies and for combining qualitative and quantitative research methods. Focuses on applications especially relevant to social welfare.

SOC WL 586 Qualitative Methods in Social Work Research II (3) The second in a two-quarter sequence offering intensive experience in the theory and application of qualitative and ethnographic research methods. Prepares students for conducting qualitative studies and for combining qualitative and quantitative research methods. Focuses on applications especially relevant to social welfare.

SOC WL 589 Multivariate Data Analysis for the Social Sciences (4, max. 8) Erosheva Provides social scientists with an introduction to multivariate analysis techniques and the knowledge to carry them out. Focuses on statistical methods that explore relationships between observed variables. Topics include principal components, cluster, factor, latent class analysis. Prerequisite: SOC WL 587, SOC WL 588, or equivalent. Offered: jointly with CS\&SS 589; A.
SOC WL 590 Topics in Advanced Research Methods (3) Special topics in social and behavioral research design for advanced graduate students. Topics vary and focus on community-based research methods and measurement construction for culturally diverse populations. Prerequisite: doctoral student in social welfare or related discipline; advanced master's level students by permission of instructor.

SOC WL 591 Seminar on Topics in Social Welfare (1-3, max. 15)

SOC WL 598 Issues and Priorities in Social Welfare Research (3) Foundations in the definitions of theory; the socially constructed nature of theory and definitions of social "problems"; conceptual and theoretical perspectives on human society, interaction, and change;
and analysis of the theoretical foundations of social science research paradigms.
SOC WL 599 Research Problems and Priorities in Social Work and Social Welfare (3) Assists students in applying theory in building an original conceptual model. Emphasizes critical thinking, including ideological, political, methodological, and ethical contexts/implications of ideas, theories, and models that shape social welfare scholarship and its application to social practice. Prerequisite: admission to social welfare PhD program or permission of instructor.
SOC WL 600 Independent Study or Research (*) Prerequisite: approval of a well-specified plan by the instructor and program director. Includes a written product. Offered: AWSpS.
SOC WL 800 Doctoral Dissertation (*) Offered: AWSpS.

## Social Work

SOC W 500 Intellectual and Historical Foundations of Professional Social Work Practice (3) Intellectual, historical, and ethical foundations of the social work profession. Engagement with crucial aspects of the profession's history; contemporary issues, problematics, and directions; and key concepts and theoretical frameworks. Students develop personal, professional, and intellectual foundations for practicing social work built on the central values of plurality and social justice.
S0C W 501 Poverty and Inequality (3) Analysis of poverty and inequality in United States. Analytic and descriptive focus on measurement, processes of production and perpetuation, and public policy responses. Examines causes of poverty, the role of policy, and socioeconomic dimensions of stratification, including race, ethnicity, class, gender, immigration status, disability, age, sexual orientation, and family structure.

SOC W 504 Social Work for Social Justice: Developing a Personal-Professional Stance (3) Focuses on personal and professional development toward social work practice for social justice. Employs critically self-reflective, experiential, and dialogic learning processes to engage students to explore personal meaning systems and narratives in the context of professional values of social justice, multiculturalism, empowerment, and globalization.
SOC W 505 Foundations of Social Welfare Research (3) Almgren, Balassone, Erera, Roffman Overview of research process/methods in social work, with focus on consuming and performing practice-related research and evaluating one's own practice. Emphasis on critical understanding of empirical literature, development of useful and appropriate questions about social work practice, and strategies and techniques for doing research and applying findings to practice. Offered: Sp.
SOC W 506 Social Welfare Research and Evaluation (3) Second of a two-quarter research sequence. Introduces a range of methods for informing evidencedbased social work practice. Emphasizes critical appraisal of the literature, development of research questions, and strategies and techniques for conducting practice-relevant research, including data collection and analysis. Prerequisite: minimum 2.5 grade in SOC W 505.
SOC W 507 Advanced Standing Social Welfare Research and Evaluation (5) Introduces a range of methods for informing evidence-based social work practice. Emphasizes critical appraisal of the literature, development of research questions, and strategies and technique for conducing practice-relevant research, including data collection and analysis. Prerequisite: advanced standing students.

SOC W 510 Practice I: Introduction to Social Work Prac tice (3) Foundation knowledge and skills for direct practice with individuals, families, and groups. As sists students toward mastery of interviewing and relationship building skills and knowledge of crosscultural communication and practice issues and of social work values and ethics. Provides opportunity to develop beginning level skills in assessment. Of fered: ASp.
SOC W 511 Practice II: Intermediate Direct Service Practice (3) Foundation knowledge and skills for direct practice with individuals, families, and groups. Course assists students toward mastery in assess ment, development of treatment plans based on theory and assessment information, goalsetting skills, and selection of appropriate interventions. Offered: AW.

SOC W 512 Practice III: Organizational Practice (3) Focuses on ways in which management activities contribute to service effectiveness for clients and qual ity of conditions for staff. Various managerial roles, functions, and skills examined. Impact of agency structure, culture, and mission on staff, clients, and organizational outcomes discussed with emphasis on ways social work managers influence change. Of fered: W.

SOC W 513 Practice IV: Community Change Practice (3) Provides frame of reference and skills for community based social work practice. Theories of social change are examined with examples drawn from community organizing and policy advocacy. Offered: Sp.
SOC W 516 Research Base for Prevention Science (3) Introduces the transdisciplinary field of prevention science; enhances understanding of the developmental epidemiology of risk, protection and outcome and how prevention interventions are conceptualized and evaluated; critiques research on preventive interventions and practice; and outlines the role of prevention science in advancing health and well-being over the life course.
SOC W 517 Promoting Individual, Family, School, and Community Risk Prevention (3) Covers existing evidencebased practices in prevention science that have demonstrated effects on reducing risks and promoting positive development in youth. Emphasizes practice skills, topic include promotion of healthy development in childhood/adolescence; prevention of child abuse and neglect, early pregnancy, violence and delinquency, substance abuse, school misbehavior, and mental health disorders
SOC W 518 Macro Practice in Health and Promotion (3) Students engage in the translation of research, ad vocacy, and the sustainability and dissemination of prevention initiates and programs. Includes skill development in policy analysis, community organiz ing, and media/legislative advocacy. Covers current issues in prevention, the policy context surrounding them, and skills to propel prevention forward as a priority in or society.

SOC W 520 Policy/Services (3) Investigates how social and economic inequality in America is established, manifested, and maintained. Also examines interventions that purportedly address inequality. Provides analytic tools to help with critical thinking about competing views of inequality and the interventions that address it.

SOC W 521 Child and Family Inequalities: Policy/Services Platform (3) Advanced study of policy and services relevant to practice with children, adolescents, and families. Applies social justice framework to understanding policy context and organization of services responses to child and family inequalities, especially for historically oppressed and marginalized popula-
tions. Examines social construction of policies in historical, political, and comparative context.
SOC W 522 Introduction to Practicum: Advanced Standing (2) Orients advanced standing students towards their practicum. Covers critical issues related to the advanced standing practicum and prepares students for successful practice in their chosen agencies. Incorporates and builds upon content and skills acquired through a generalist (micro, mezzo, and macro levels of practice) undergraduate social work education.
SOC W 523 Introduction to Practicum (*, max. 1) Workshops for preparation for agency-based placement Interviewing and orientations occur at agencies. Credit/no-credit only.
SOC W 524 Foundation Practicum (1-8, max. 12) Agencybased practicum with emphasis on development of knowledge, perspectives, and skills needed for practice with individuals, families, groups, organizations, and communities. Credit/no-credit only. Prerequisite: social work major. Offered: AWSpS.

SOC W 525 Advanced Practicum (1-10, max. 24) Agencybased advanced practicum. Credit/no-credit only. Prerequisite: completion of foundation courses and practicum. Offered: AWSpS.
SOC W 526 Multigenerational Policy-Services Platform: A Feminist, Multicultural Lens (3) Builds social workers' competencies to analyze, critique, and advocate for policies and processes that support growing numbers of multigenerational families. Presents a feminist, multicultural, and multigenerational perspective to analyze how historical and current service structures, policies, and regulations support or undermine families across the lifespan.

SOC W 527 Global and Local Inequalities: Critical Analyses of the Processes and Policies of Globalization (3) Discussion of the health of the planet, economic and cultural globalization, the enduring legacies of imperialism and colonialism in this global era, and their local impacts. Foci include international agreements, UN conventions, immigration, and refugee policies.
SOC W 528 Healthcare Inequalities: Policy/Services Platform (3) Examines the organization, policies, and services of U.S. healthcare system from a social justice framework. Topics include the U.S. healthcare system's historical development, differential access to health and healthcare, healthcare system reform, and the analysis of healthcare policy from contrasting ideological perspectives.

SOC W 529 Mental Health Inequalities: Policy/Services Platform (3) Mental health policy trends and organization of services at national, state, and local levels reflected in legislative, regulatory, and institutional policies. Provides historical perspective on the development of U.S. mental health policies and services. Discusses specific areas of intersystem linkages in terms of equitable access and empowerment.

SOC W 530 Advanced Practice with Diverse Children and Families (3) Builds on foundation frameworks and competencies to develop specialized knowledge and skills for working with vulnerable children and families. An ecological framework informs family- and community-centered assessment and intervention that is empowering, culturally responsive, and clinically relevant. Foci include resilience, violence, attachment, loss, substance abuse, and disability.

SOC W 531 Advanced Practice with Diverse Children and Families: Focus on Child Mental Health (3) Develops specialized knowledge and skills for practice with children with mental health concerns and their families. Emphasis on child and family mental health assessment and interventions that are culturally relevant, collaborative, and strength-promoting. Topics in-
clude culture and mental health, system of care, psychotropic medication, ADHD, and depression.
SOC W 532 Advanced Practice with Diverse Children and Families: Focus on Child Welfare (3) Develops advanced knowledge and skills for culturally relevant child welfare practice across a range of settings including child protection, foster care, and adoption. Topics include family dynamics around child maltreatment; trauma and its impact on children; separation, loss, and identity development; and self-care in child welfare practice.
SOC W 533 Multigenerational Advanced Practice with Older Adults (3) Emphasizes a multigenerational, culturally competent empowerment approach and in-depth knowledge on "best practices" related to assessment, diagnosis, and clinical interventions with older adults and their families. Builds on other multigenerational classes.

SOC W 534 Praxis of Intergroup Dialogue (3) Students design, plan, implement, and evaluate intergroup dialogue sessions as peer facilitators. Students facilitate intergroup dialogue in conjunction with SOC W 504. Focuses on intensive in-vivo instruction, consultation, and supervision of facilitators.
SOC W 535 Special Topics in Interpersonal/Direct Practice (2-3, max. 9) Examines current substantive topics in direct/interpersonal practice.
SOC W 536 Social Movements and Organizing: People, Power, and Praxis (3) Focuses on social, economic, and political problems from an organizer's perspective, and strategies, tactics, and skills necessary to engage in organizing activities. Emphasizes principles common to community, electoral, union, and issue organizing. Addresses why people organize, how organizing works, and what it takes to be a good organizer.

SOC W 537 Empowerment Practice with Refugees (3) Empowerment practice with refugees and immigrants across a transnational continuum of forced migration, including flight, internal displacement, asylum seeking, repatriation, and resettlement. Instruction includes classroom activities, workshops with local service providers, and agency-based projects. Addresses implications for strengths-based social services, policy, and practice skills.
SOC W 538 Critical Empowerment Practice with Multiethnic Communities (3) Principles of empowering practice, critical analyses of models of multiculturalism and paradigms of knowledge and practice proven problematic in our increasingly diverse society. Assists students in developing empowering practice values, knowledge, and skills for work in multi-ethnic communities.

SOC W 539 Ethnographic Interviewing (3) Facilitates empowering and culturally sensitive practice, while providing an understanding of the other from his/her own perspective. Addresses power in worker-client relationships, clients as experts, communication across cultures, the uses and presentation of data to effect social change, ethical issues, and specific ethnographic interviewing techniques.

SOC W 540 Advanced Social Work Practice in Health Settings I (3) Teaches theory and strengths-based practice within interprofessional health care settings from bio-pyschosocial, family systems, multi-cultural, contextual, and lifespan perspectives. Advances skills in conducting assessments and interventions to support individuals and families experiencing pain and loss associated with trauma and acute or chronic illness.

SOC W 541 Advanced Social Work Practice in Health Settings II (3) Teaches health care theory and practice skills relevant to working with adults and children in
a variety of health care settings, using biopsychoso cial, contextual, multicultural, interdisciplinary, and lifespan perspectives. Advances skills in adherence assessment, ethical decision-making, discharge planning, cross-cultural and cross-professional practice, and counseling regarding life-threatening illness.

SOC W 542 Recovery-Oriented Social Work Practice in Community Mental Health (3) Emphasizes recovery-oriented practice with adults with severe and persistent mental illness and persons with co-occurring mental illness and substance disorders. Trains for generalist social work practice in most community mental health settings: community mental health centers, psychiatric hospitals, residential programs, jails, homeless shelters, on-the-streets, client's homes, etc.

SOC W 543 Social Work Practice in Community Mental Health II (3) Focuses on social work practice with persons with severe mental illness. Emphasizes recovery, supported housing, supported employment, integrated treatment of co-occurring disorders. Cov ers practice with diverse populations: multicultural, developmentally disabled, geriatric, and gay/lesbian. Examines partnering with family members and work ing with Social Security. Complements SOC W 542, but may be taken free-standing.
SOC W 544 Clinical Social Work with Individuals I: Theory and Practice (3) First quarter of a two-quarter sequence on the theory and practice of clinical social work. Focuses on key concepts underlying direct practice. Topics include the therapeutic relationship, therapeutic listening, the ground rules, transference, counter transference, psychological defenses, resistance, phases of treatment, transference, counter transference, and vicarious trauma.

SOC W 545 Clinical Social Work With Individuals II: Theory and Practice (3) Second of a two-quarter sequence on the theory and practice of clinical social work. Focuses on the use of interpretation, obstacles to treat ment, intervention techniques, case formulations that link assessment and intervention, monitoring client progress, and on selected theories of therapy.
SOC W 546 Addressing Trauma and Recovery in MultiGenerational Advanced Practice (3) Multigenerational perspective on clinical interventions for various traumas: childhood sexual abuse, battering at any age, chemically dependent parents, elders with abusive adult children, and a range of losses throughout the lifespan. Recovery process explicated in terms of family strengths across the generations and through state-of-the art techniques for healing trauma.
SOC W 548 EDP Advanced Practice I (3) First quarter of a two-quarter sequence. Emphasizes preparation of practitioners with capacity to move flexibly among a variety of professional roles, including the provision of direct services, program planning, supervision, and community practice. Emphasizes contextual as sessment from micro to macro levels.

SOC W 549 EDP Advanced Practice II (3) Second quarter of a two-quarter sequence. Highlights program planning, supervision, and intervention across all levels of practice.
SOC W 550 Strategic Program Management and Change Leadership in Human Services (3) Examines tools and techniques required for leadership, program planning, implementation, and program change. Topics include strategic planning, logic modeling, agencybound relations, work-group facilitation, and diversi-ty-promoting management. Lecture, discussion, and exercises. Required for SSW administration concentrators; open to others with permission of instructor.

SOC W 551 Human Resource Management in the Human Services (3) Theories and techniques for 1) designing human services workplaces that support employees' performance and well-being, and 2) managing diverse, satisfied, and high-performing human service staffs. Topics include job quality analyses; job descriptions; employee interviewing, supervision and performance evaluation; models of negotiation and conflict resolution; and strategies for working with volunteers.
SOC W 552 Financial Management of Human Services Programs (3) Covers key financial management components of human service programs, including development and use of business plans, budgets, and financial statements. Helps students to demonstrate an understanding of financial management through budget preparation, financial statement analysis, new project cost projections, audits, and presentations using computer-based spreadsheets and presentation software.
SOC W 554 People, Place, Equity (3) Introduces empirical, theoretical, and applied knowledge on place as a key dimension of social work practice. Examines how people-place relationships differentially affect social opportunities such as health and wellness, employment, and housing. Provides intellectual and practical foundations for incorporating spatial analyses and collaborative place-making interventions in practice.
SOC W 555 Global Perspectives in Social Work Practice (3) Focuses on contemporary social issues of global importance: poverty; HIV/AIDS; population growth; gender inequality; and war, conflict, and displacement, with specific focus on these issues in the global south. Examines sociocultural, economic, and political processes that shape these issues, and entwined perspective of human rights and development.
SOC W 556 Family Healing: A Cross-Generational Approach (3) Lustbader Explores how to respond to multi-generational dynamics within the entire extended family and examines how bow difficulties and strengths are passed from one generation to another. Emphasizes cultural differences as well as issues pertaining to the impact of chemical dependency, mental illness, and disability across generations.
SOC W 557 Caring for Persons with Life-Limiting IIIness: A Lifespan Approach (3) Focuses on multi-systemic social work practice with seriously ill people with a lifelimiting condition. Examines how families care for a critically ill love one, and the differences that occur when the seriously ill person is a child, adolescent, a mid-aged adult, or an elder at the end of life.
SOC W 558 Gender, Gender Identity, and Sexuality (3) Anti-oppression focus on social work practice with lesbian, gay, bisexual, transgender, two-spirit, intersexed, and queer communities. Emphasizes cultural, social, and political context within which such practice occurs as well as an examination of the diversity and heterogeneity within these communities. Enhances students' micro and macro practice skills.
SOC W 559 Child Development (3) Provides students with a basic understanding of child development theory and research as well as specific knowledge about the development of children from infancy through adolescence. Emphasizes developmental approach to assessment and intervention with children and families. Particular emphasis paced on developmentallybased child welfare practice.

SOC W 560 Policy Processes, Institutions, and Influences (3) Focuses on the process and institutions through which social policies are developed, adopted, and implemented, with special attention to the implications of these processes for social justice. Develops practice skills in analyzing and influencing the policy
process, including social problem definition, policy design, policy adaptation, and policy implementation.
SOC W 561 Concepts and Methods of Policy Analysis (3) Engages students in the concepts and applied practice of policy analysis and evaluation. Prepares students to address two generic policy questions: Given an identified problem, what policy or program should be selected? Given a particular policy or program, how do we evaluate effectiveness? Particular attention paid to social justice implications.
SOC W 565 Special Topics in Policy Practice (2-3) Examination of current substantive topics in policy practice. Content varies according to recent developments in the field and the interests of the instructor.
SOC W 570 Anti-racist Organizing for Social and Economic Change (3) Applies an institutional analysis of racism and white privilege to the strategies of community organizing by communities of color and indigenous peoples. Examines anti-racist organizational transformation, intersectionality of oppressions and privileges, white allies in anti-racist struggles, and the role of social workers in maintaining and combating institutional racism.
SOC W 571 Assessment of Mental Disorders (3) Provides basic knowledge and skills to assess mental disorders and improve critical thinking concerning assessment and diagnosis. Emphasizes the Diagnostic and Statistical Manual of Mental Disorders (DSM-IV) for its system of symptom description and classification. Examines challenges of methodological implications of mental health assessment across race, gender, and ethnicity.
SOC W 572 Understanding Addiction, Pharmacology of Drugs, and Treatment Methods (3) Provides students with the knowledge and basic skills to recognize and understand the dynamics of chemical dependency in the lives of individuals, how to assess the presence of this disorder, and what the issues are in referring individuals to treatment for this disorder.

SOC W 573 Child Welfare and Permanency Planning (3) Focuses on social work interventions within the public child welfare system for children who have been abused and neglected. Includes practice models to ensure safety and permanency for children, federal and state mandates for permanency, cultural determinants, juvenile court dependency system, and research findings pertaining to permanency planning outcomes.
SOC W 574 Collaborative Community-Based Program Evaluation (3) Focuses on carrying out a formative and process evaluation of a community program in conjunction with program staff and clients. In addition to learning about program theory, measurement construction, study design, and data analysis, students develop consultative and presentation skills needed in utilization-focused evaluation.

SOC W 575 Domestic Violence Policy and Intervention (3) Examines policy, theory, research, and intervention in field of intimate partner violence with emphasis on historical, cultural, and political contexts. Advanced study of structural contributors, policy parameters, and service delivery and cross-systems necessary to effective practice and leadership in the field locally, nationally, and globally.

SOC W 576 Empowerment Practice with Persons with Disabilities (3) Provides background in theories and models of disability that contribute to empowermentoriented intervention techniques. Emphasizes direct practice skills for working with people with disabilities and their families. Emphasizes understanding how disability studies and the disability movement influence social work practice.

SOC W 577 Maintaining Quality Social Work Practice: Ethics, Self-care, and Risk Management (2-3) Develops models for managing ethical and legal obligations to clients and others; managing risk; and maintaining ethical, responsible, and self-sustaining practice over a professional career. Examines competing ethical frameworks and material on essential values underlying ethical principles and the basis for ethical and legal regulation of practice.
SOC W 578 Evidence-Based Practice in Child Mental Health (3) Critically examines the program components and empirical research base of selected child mental health treatment program models designed to serve children and youth who present with severe emotional or behavioral disorders. Focuses on treatment models that reflect a "systems care philosophy" and which offer alternatives to traditional services.
SOC W 579 Faith Matters and Mental Health Practice: Conflict vs Integration (3) Examines the complex interrelation between faith matters and the practice of mental health professions, including approaches to definitions and assessments.

SOC W 580 Grant Writing and Fund Development (3) Prepares students to participate and provide leadership in grant writing and fundraising for community-based human services. Opportunity to practice skills required for developing a successful grant proposal and planning a successful fundraising program. Identify, cultivate, and develop sources of funding. Students assist in writing a complete grant proposal as final project.
SOC W 581 Historical Trauma and Healing (3) Provides specialized knowledge and skills for practice with communities experiencing historical trauma. Covers emerging theories of historical trauma, impact of historical trauma on families and communities, and culturally relevant interventions to promote healing. Builds upon the concepts of empowerment practice and indigenous models of social work.
SOC W 582 Interpersonal Violence and Trauma (3) Examines trauma theory, nature of interpersonal violence, psychodynamic concepts, cognitive behavioral theory, treatment of victims and offenders. Topics include psychological trauma, abuse-specific psychotherapy, multidisciplinary and cognitive behavioral interventions with victims and offenders, effects of interpersonal violence, and counter-transference reactions. Format includes lecture, discussion, case presentations, and presentations by community experts.

SOC W 583 Multicultural and Multigenerational Approaches to Healing Grief and Loss (3) Uses critical analysis to expand Western symptom-oriented grief and loss theory to include multicultural approaches, exploring new constructionist models of meaning-making, narrative biography, and cultural tradition through case studies. Assessment and intervention exercises include journaling, art, and ritual, allowing students to explore how their own grief affects practice.
SOC W 584 Multicultural Mental Health Practice (3) Ad-vanced-practice course that builds upon foundation content in HUB, micro- and macro-practice/HBSE sequences, policy, diversity, and research. Grapples with complex mental health service design and delivery issues often informed by ethnocentric paradigms of knowledge and practice that have proven problematic in their general application in our increasingly diverse society.
SOC W 585 Advanced Group Work (3) Overview of group work and major theorist in the field. Examines differential applicability of methods across diverse populations. Emphasis on developing powers of observation of group process (as opposed to content) and on ability to intervene at the group level (as opposed to individual level). Prerequisite: Group work experience.

SOC W 586 Policy Advocacy (1-3, max. 3) Focuses on involvement in the policy-making process. Students design projects to influence public policy in local, state, and federal levels. Readings based on policy materials (proposed and final laws, regulations, budgets, advocacy documents). Credit/no credit only.
SOC W 587 Spirituality in Health Care (2) Carrigan, McCormick Examination of the beliefs, values, meanings, and spirituality of health professionals for the wellbeing of their patients as well as for themselves. Offered: jointly with FAMED 547/B H 518; Sp.
SOC W 588 Social Work in Schools (3) Required for School Social Worker certification. Explores theoretical frameworks, current issues in education, individual, group and family practice; organizational context; and systems change. Also covers legal issues, racism and educational outcomes, special education, culturally sensitive practice, advocacy, family involvement, child abuse mandated reporting, collaboration, and ethics.
SOC W 589 Social Work Practice with Families (3) Philosophical, theoretical, and practice issues relevant to family-centered social work. Presents family systems theory and a generalized model of engagement, assessment, and treatment. Clinical applications with particular client populations and their presenting problems, such as couples, family crisis, child behavioral problems, and affective disorders.
SOC W 590 Social Work Supervision and Consultation (3) Provides knowledge and skills involved in the role of social worker as supervisor and team leader; supervision as a leadership function, power and authority, professional boundaries, staff recruitment, selection, performance evaluation, and addressing staffrelated performance problems.
SOC W 591 Social Work Practice in Long-Term Care Across the Lifespan (3) Applies a multigenerational framework to introduce values, skills, and knowledge necessary for social work practice in long-term care settings across all age groups. Meets at a nearby continuing care community and provides regular opportunities to interact with persons requiring long-term care, their families, and formal caregivers.
SOC W 592 Social Work Practice with African-American Families (3) Introduces the study of African-American families from a historical, socio-cultural, and political perspective. Presents various theories for understanding African-American families and addresses an Afrocentric framework for intervention.
SOC W 593 Social Work Practice with Chemically Dependent Adults: Understanding Assessment, Evaluation, and Counseling (3) Teaches skills in four contexts: (1) incorporating questions concerning alcohol/drug use in an assessment of new clients, (2) conducting a comprehensive alcohol/drug assessment when a problem has been identified, (3) offering a brief motivational enhancement intervention to ambivalent clients, and (4) delivering cognitive-behavioral counseling focusing on overcoming dependence.
SOC W 594 Gender and Inequalities in the Global Context (3) Examines issues of gender, globalization, and inequality through a gender lens. Topics include global movements of capital (the global factory) and labor (migration, trafficking, etc.), disruption/creation of family forms and gender roles (domestic violence), social welfare, private/public polices, international frames (human rights), resistance, and response.
SOC W 595 Co-Occurring Addiction and Mental Health Disorders (3) Provides students with the knowledge and skills to understand the dynamics of co-occurring addiction and mental health disorders (COD) in the lives of individuals. Students learn how to assess the presence of COD and what the issues are in referring
individuals to treatment or providing them treatment for COD.
SOC W 596 Statistics in Social Work (1-3, max. 3) Introductory foundation in descriptive statistics, probability theory, statistical inference, and bivariate statistics commonly used in evaluations of social program and clinical practice. Conceptual emphasis on understanding the logic of measurement and statistical inference. Understanding reinforced by hand calculations involving high school algebra. Fulfills SOC W 505 prerequisite.
SOC W 597 Graduate Study Abroad in Social Work (1-15, max. 15) For graduate students in a UW study abroad program. Specific content varies and must be individually evaluated.
SOC W 598 Integrative Seminar (1-5, max. 12) Integrates specialized knowledge in social work settings. Offered: AWSp.
SOC W 599 Readings in Social Work (*) Independent Studies. Credit/no credit only. Prerequisite: permission of instructor.
SOC W 600 Independent Study or Research (*)
SOC W $\mathbf{7 0 0}$ Master's Thesis (*)

Please note: Faculty are listed only in their primary appointing department.

## College of Arts and Sciences

## American Ethnic Studies

## Professors

FLORES, LAURO H 2008; PhD, 1980, University of California (San Diego)
KASHIMA, TETSUDEN * 2008; MA, 1968, San Francisco State; PhD, 1975, University of California (San Diego)
SUMIDA, STEPHEN H. 2008; MA, 1970, Columbia University; PhD, 1982, University of Washington
WALTER, JOHN C * 2007, (Emeritus); MA, 1968, University of Bridgeport; PhD, 1971, University of Maine

## Associate Professors

BONUS, ENRIQUE C. 2006; MA, 1990, California State University, Fresno; PhD, 1997, University of California (San Diego)
GAMBOA, ERASMO * 2008; MA, 1973, University of Washington; PhD, 1984, University of Washington
NOMURA, GAIL M. 2008; MA, 1971, University of California (Berkeley); PhD, 1978, University of Hawaii
RETMAN, SONNET H. 2010; PhD, 1997, University of California (Los Angeles)
SALAS, ELIZABETH 2008; MA, 1977, California State University, Los Angeles; PhD, 1987, University of California (Los Angeles)

## Assistant Professors

PINEDO-TURNOVSKY, CAROLYN 2011; MA, 2003, City University of New York; PhD, 2006, City University of New York STEPTOE, TYINA LEANEICE 2008; MA, 2002, University of Wisconsin (Madison); PhD, 2008, University of Wisconsin (Madison)

## Senior Lecturer

S0, CONNIE C. 2008; MPA, 1989, Princeton University

## Lecturers

ATIENZA, RICHARD 2012; MAE, 2008, St. Joseph's College SCOTT, TERRY A. 2011; MA, 2002, Southern Methodist University
WAITA, JACQUELINE N. 2010; MBA, 2000, Seattle Pacific University

## American Indian Studies

## Professors

HARMON, ALEXANDRA J * 2011; MA, 1990, University of Washington; PhD, 1995, University of Washington HART, DANIEL 2008; MFA, 1985, Temple University
OLIVER, MARVIN E 2008; MFA, 1973, University of Washington
WITHERSPOON, GARY J. * 2010, (Emeritus); MA, 1969, University of Chicago; PhD, 1970, University of Chicago

## Associate Professor

COTE, CHARLOTTE 2009; MA, 1996, University of California (Berkeley); PhD, 2002, University of California (Berkeley)

## Assistant Professor

MILLION, DIAN L. 2008; MA, 1998, University of California (Berkeley); PhD, 2004, University of California (Berkeley)

## Senior Lecturer

WRIGHT, MARY C 2008; MA, 1973, Portland State University; PhD, 1996, Rutgers University

## Lecturers

COLONNESE, TOM G 2011; MA, 1974, University of Northern Iowa; PhD, 1981, Arizona State University
URAN, CHAD S 2012; MA, 2002, University of Iowa; PhD, 2012, University of Iowa
WASHUTA, ELISSA 2011; MFA, 2009, University of Washington

## Anthropology

## Professors

ANAGNOST, ANN S. * 2007; MA, 1977, University of Michigan; PhD, 1985, University of Michigan
CLOSE, ANGELA E. * 2004; MA, 1974, Cambridge University (UK); PhD, 1976, Cambridge University (UK)
GRAYSON, DONALD K * 2004; MA, 1969, University of Oregon; PhD, 1973, University of Oregon
HARRELL, STEVAN * 2000; MA, 1971, Stanford University; PhD, 1974, Stanford University
HUNN, EUGENE S 2006, (Emeritus); MA, 1969, University of California (Berkeley); PhD, 1973, University of California (Berkeley)
KAHN, MIRIAM * 2000; MA, 1974, Bryn Mawr College; PhD, 1980, Bryn Mawr College
LEONETTI, DONNA 2008; MA, 1967, University of Washington; PhD, 1976, University of Washington
NASON, JAMES * 2004, (Emeritus); MA, 1967, University of Washington; PhD, 1970, University of Washington
NEWELL, LAURA L * 2011, (Emeritus); MA, 1957, Northwestern University; PhD, 1967, University of Washington
NUTE, PETER E * 1995, (Emeritus); PhD, 1969, Duke University
O'CONNOR, KATHLEEN A. * 2012; MA, 1987, State University of New York (Albany); PhD, 1995, State University of New York (Albany)
OTTENBERG, SIMON * 1990, (Emeritus); PhD, 1957, Northwestern University
PENA, DEVON G 2000; MA, 1978, University of Texas (Austin); PhD, 1983, University of Texas (Austin)
RHODES, LORNA A * 2002; MA, 1971, Cornell University; PhD, 1973, Cornell University
SHELL-DUNCAN, BETTINA * 2008; MS, 1988, University of Wisconsin; PhD, 1994, Pennsylvania State University
SMITH, ERIC A * 1993; MA, 1976, Cornell University; PhD, 1980, Cornell University
SPAIN, DAVID H * 2000, (Emeritus); MA, 1962, Ohio State University
WINANS, EDGAR V * 2001, (Emeritus); MA, 1954, University of California (Los Angeles); PhD, 1959, University of California (Los Angeles)

## Associate Professors

BILANIUK, LAADA M. 2006; MA, 1991, University of Michigan; PhD, 1998, University of Michigan

CHAPMAN, RACHEL R 2012; MA, 1991, University of California (Los Angeles); PhD, 1998, University of California (Los Angeles)
ECK, GERALD G * 2007, (Emeritus); MA, 1974, University of California (Berkeley); PhD, 1977, University of California (Berkeley)
FEATHERS, JAMES K * 2001, (Research); MA, 1985, University of Washington; PhD, 1990, University of Washington
FITZHUGH, J.BEN 2004; MA, 1992, University of Michigan; PhD, 1996, University of Michigan
GOODREAU, STEVEN M. 2012; MA, 1998, Pennsylvania State University; PhD, 2001, Pennsylvania State University HOFFMAN, DANIEL J 2011; MA, 2001, Duke University; MD, 2004, Duke University

HOLMAN, DARRYL J. * 2005; MS, 1990, University of Wisconsin; PhD, 1996, Pennsylvania State University
LAPE, PETER V 2008; MA, 1995, San Francisco State; PhD, 2000, Brown University
LLOBERA, MARCOS 2012; MSc, 1993, University of Leices ter (UK); DPhil, 1999, University of Oxford (UK)
LOWE, CELIA 2006; MPhil, 1996, Yale University; PhD, 2000, Yale University
TAYLOR, JANELLE S 2007; MA, 1990, University of Chicago; PhD, 1999, University of Chicago

## Assistant Professors

AMRUTE, SAREETA BIPIN 2008; MA, 2001, University of Chicago; PhD, 2007, University of Chicago
EISENBERG, DANIEL T. A. 2012; PhD, 2012, Northwestern University
MARWICK, BENJAMIN 2008; MA, 2002, University of West Australia; PhD, 2008, Australian National University

## Senior Lecturer

BENTZ, MARILYN G * 2001, (Emeritus); MSW, 1967, University of Illinois; PhD, 1984, University of Washington

## Lecturers

BARKER, HOLLY M. 2012; MA, 1993, American University; PhD, 2000, American University
CARNEY, MEGAN A 2012; MA, 2009, University of California (Santa Barbara); PhD, 2012, University of California (Santa Barbara)
JOHNSON, JESSICAA. 2012; MA, 2006, University of Washington; PhD, 2010, University of Washington
KUSHNICK, GEOFFREY C. 2012; MA, 1998, California State University, Sacramento; PhD, 2006, University of Washington
PEREZ, MICHAEL VINCENTE 2011; MA, 2006, Michigan State University; PhD, 2011, Michigan State University
SPEED, CLARKE K. 2008; MA, 1984, University of California; PhD, 1991, University of Washington
WANDER, KATHERINE S. 2012; MPH, 2009, University of Washington; PhD, 2012, University of Washington

## Applied Mathematics

## Professors

ADAMS, LOYCE M. * 2005; MS, 1978, University of Virginia; PhD, 1983, University of Virginia
CRIMINALE, WILLIAM 0 * 2006, (Emeritus); PhD, 1960, Johns Hopkins University
DECONINCK, BERNARD 2011; MSc, 1995, University of Colorado (Boulder); PhD, 1998, University of Colorado (Boulder)

GREENBAUM, ANNE 2009; MA, 1978, University of California (Berkeley); PhD, 1981, University of California (Berkeley)
KUTZ, JOSE NATHAN 2005; PhD, 1994, Northwestern University
LEVEQUE, RANDALL J. * 1989; PhD, 1982, Stanford University
MARTIN, R DOUGLAS * 2012; MS, 1965, University of Washington; PhD, 1969, Princeton University
MURRAY, JAMES D. * 2001, (Emeritus); MA, 1961, 0xford University (UK); DSc, 1968, Oxford University (UK)
O'MALLEY, ROBERT E. * 2009, (Emeritus); MS, 1961, University of New Hampshire; PhD, 1966, Stanford University PEARSON, CARL E * 1992, (Emeritus); PhD, 1949, Brown University
QIAN, HONG 2006; PhD, 1989, Washington University
SCHMID, PETER J. * 2007, (Affiliate); MS, 1989, Technical University of Munich (Germany); PhD, 1993, Massachusetts Institute of Technology
TUNG, KA KIT 1988; MS, 1972, California Institute of Technology; PhD, 1977, Harvard University
WAN, FREDERIC Y * 2001, (Affiliate); MS, 1963, Massachusetts Institute of Technology; PhD, 1965, Massachusetts Institute of Technology

## Associate Professors

KOT, MARK * 2000; MS, 1987, University of Arizona; PhD, 1987, University of Arizona
SHEA-BROWN, ERIC T. 2012; MS, 2001, Princeton University; PhD, 2004, Princeton University

## Assistant Professors

HETMANIUK, ULRICH L. 2008; MS, 2002, University of Colorado (Boulder); PhD, 2002, University of Colorado (Boulder)
SHLIZERMAN, ELI 2012; MSc, 2005, Weizmann Institute for Science (Israel); PhD, 2009, Weizmann Institute for Science (Israel)

## Art

## Professors

BERGER, PAUL E * 2008; MFA, 1973, State University of New York (Buffalo)
BRAVMANN, RENE A. 2011, (Emeritus); MA, 1963, Indiana University; PhD, 1971, Indiana University
BRODY, DAVID * 2008; MFA, 1983, Yale University
CARRAHER, RONALD G * 2000, (Emeritus); MA, 1961, San Jose State University
CASTERAS, SUSAN P * 2008; MPhil, 1975, Yale University; PhD, 1977, Yale University
CELENTANO, FRANCIS * 1994, (Emeritus); MA, 1957, New York University
CHRISTOFIDES, C G * 1994, (Emeritus); MA, 1950, University of Michigan; PhD, 1956, University of Michigan
CLAUSEN, MEREDITH L 2008; MA, 1972, University of California (Berkeley); PhD, 1975, University of California (Berkeley)
DAHN, RICHARD F * 1997, (Emeritus); MFA, 1959, Yale University
FAILING, PATRICIA A * 2008; MA, 1974, University of California (Berkeley)
GARVENS, ELLEN J. * 2010; MA, 1983, University of New Mexico; MFA, 1987, University of New Mexico
GOLDSMITH, LAYNE * 2008; MA, 1975, San Jose State University; MFA, 1979, Cranbrook Academy of Art
GOVEDARE, PHILIP B. * 2008; MFA, 1984, Tyler School of Art
HIXSON, WILLIAM J * 1990, (Emeritus); MFA, 1950, University of Oregon

HOLM, BILL * 1989, (Emeritus); MFA, 1951, University of Washington
HU, MARY L * 2006, (Emeritus); MFA, 1967, Southern IIlinois University
HURLEY, DENZIL * 1994; MFA, 1979, Yale University
JONES, ROBERT C * 1995, (Emeritus); MS, 1959, Rhode Island School of Design
KEHL, RICHARD L. * 2002, (Emeritus); MFA, 1961, Kansas City Art Institute
KINGSBURY, MARTHA 2003, (Emeritus); MA, 1963, Harvard University; PhD, 1969, Harvard University
LIN, ZHI 2009; MFA, 1989, University of London, UK; MFA, 1992, University of Delaware
LUNDIN, NORMAN K * 2000, (Emeritus); MFA, 1963, University of Cincinnati
MARSHALL, JOHN C * 2001, (Emeritus); MFA, 1968, Syracuse University
MASON, ALDEN 1982, (Emeritus); MFA, 1947, University of Washington
OPPERMAN, HAL N * 1998, (Emeritus); MA, 1963, University of Chicago; PhD, 1972, University of Chicago
OZUBKO, CHRISTOPHER * 2008; MFA, 1981, Cranbrook Academy of Art
PAWULA, KENNETH J 2002, (Emeritus); MA, 1962, University of California (Berkeley)
SPAFFORD, MICHAEL C * 1994, (Emeritus); MA, 1960, Harvard University
TAKAMORI, AKIO * 2008; MFA, 1978, New York State College of Ceramics
TAYLOR, NORMAN J * 2005, (Emeritus); MA, 1967, University of lowa; MFA, 1967, University of lowa
WADDEN, DOUGLAS J. * 2008; MFA, 1970, Yale University
WALKER, JAMIE * 2008; MFA, 1983, Rhode Island School of Design
WARASHINA, M PATRICIA * 1995, (Emeritus); MFA, 1964, University of Washington
WHITEHILL-WARD, JOHN * 2001, (Emeritus); MS, 1974, Chicago Institute of Design and Technology
WRIGHT, ROBIN K 2008; MA, 1977, University of Washington; PhD, 1985, University of Washington
YOUNG, JOHN T * 2008; MFA, 1978, Rhode Island School of Design

## Associate Professors

BRIXEY, SHAWN 2009; MS, 1988, Massachusetts Institute of Technology
CABEEN, LOUISE * 2008; MFA, 1989, The School of Art Institute of Chicago
CHENG, KAREN 2008; MDes, 1996, University of Cincinnati
CUMMINS, REBECCA 2008; MA, 1982, University of New Mexico; PhD, 2003, University of Technology (Australia)
GALE, ANN E 2008; MFA, 1991, Yale University
GOULD, ANNABELLE K 2011; MFA, 1999, Cranbrook Academy of Art
JECK, DOUGLAS A. * 2008; MFA, 1989, The School of Art Institute of Chicago
LABITZKE, CURT W * 2008; MFA, 1984, University of Notre Dame
LAIRD, MARGARET L 2011; MS, 1994, Princeton University; PhD, 2002, Princeton University
LINGO, ESTELLE C 2009; MA, 1993, Brown University; PhD, 1999, Brown University
LINGO, STUART P 2009; MA, 1986, University of London, UK; PhD, 1998, Harvard University
O'TOOLE, HELEN J. 2008; MFA, 1989, The School of Art Institute of Chicago
PRACZUKOWSKI, EDWARD * 1995, (Emeritus); MFA, 1965, Cranbrook Academy of Art

PROCTOR, RICHARD M * 1992, (Emeritus); MA, 1962, Michigan State University
ROESLER, AXEL 2012; MFA, 2001, Ohio State University; PhD, 2005, Ohio State University
SCHEIER, SHIRLEY E. * 2008; MFA, 1985, University of Wisconsin (Madison)
WELMAN, VALENTINE S * 1983, (Emeritus); MFA, 1954, University of Colorado (Boulder)
WIECZOREK, MAREK K. 2008; MPhil, 1992, Columbia University; PhD, 1997, Columbia University

## Assistant Professors

AHN, SANG-GYEUN 2006; MA, 2000, Purdue University; MFA, 2002, University of Illinois
DRPIC, IVAN 2011; MA, 2005, Harvard University; PhD, 2011, Harvard University
FEIL, MAGNUS 2008; PhD, 2004, Ohio State University HIRSCH, EDWARD 2011; MS, 2004, Massachusetts Institute of Technology; PhD, 2008, Massachusetts Institute of Technology
KHULLAR, SONAL 2009; MA, 2004, University of California (Berkeley); PhD, 2009, University of California (Berkeley)
MATTHEWS, KRISTINE 2008; MA, 1997, Royal College of Art (UK)
MCNEEL, AMIE L. 2007; MFA, 1990, University of California (Berkeley)
WANG, HAICHENG 2008; MA, 2000, Peking University (China); PhD, 2007, Princeton University
ZIRPEL, MARK 2008; MFA, 1989, San Francisco Art Institute

## Lecturers

BARTENBACH, JEFF 2012; MS, 2006, Indiana University BENSON, COLE R. 2011; MFA, 2011, University of Washington
JOHNSON, EIRIK ANDERS 2012; MFA, 2003, San Francisco Art Institute
MUREN, DOMINIC L 2008; MA, 2007, The University of the Arts

RICE, KOLYA. 2012; MA, 1993, Rice University
SEWELL, STEPHEN P. 2012; MFA, 2012, University of Washington
TIHANYI, TIMEA 2010; MFA, 2003, University of Washington
VALENZUELA, RODRIGO A. 2012; MFA, 2012, University of Washington
WALKER, SUZANNE J 2012; MA, 1994, Stanford University; PhD, 2004, University of California (Berkeley)

## Asian Languages and Literature

## Professors

BOLTZ, WILLIAM * 2008; MA, 1969, University of California (Berkeley); PhD, 1974, University of California (Berkeley) COX, COLLETT D. * 2008; MPhil, 1976, Columbia University; PhD, 1983, Columbia University
KNECHTGES, DAVID R 2008; MA, 1965, Harvard University; PhD, 1968, University of Washington
PAUWELS, HEIDI R. 2009; MA, 1986, Catholic University of Leuven (Belgium); PhD, 1994, University of Washington SALOMON, RICHARD G. * 2008; PhD, 1975, University of Pennsylvania
SHAPIRO, MICHAEL 2008; MA, 1970, University of Chicago; PhD, 1973, University of Chicago
YUE-HASHIMOTO, ANNE 0 * 2008; MA, 1963, University of Texas; PhD, 1966, Ohio State University

## Associate Professors

ATKINS, PAUL S 2008; MA, 1994, Stanford University; PhD, 1999, Stanford University
BHOWMIK, DAVINDER L. 2008; MA, 1993, University of Washington; PhD, 1997, University of Washington
BRANDAUER, FREDERICK P * 1997, (Emeritus); MA, 1965, University of Pittsburgh; PhD, 1973, Stanford University
HAMM, JOHN C. 2008; MA, 1994, University of California
(Berkeley); PhD, 1999, University of California (Berkeley)
HANDEL, ZEV * 2008; MA, 1992, University of California (Berkeley); PhD, 1998, University of California (Berkeley)
KANO, TAMAKO-NIWA * 1982, (Emeritus); MA, 1946, Radcliffe; PhD, 1956, Radcliffe

MACK, EDWARD T 2008; MA, 1996, Columbia University; PhD, 2002, Harvard University
OHTA, AMY * 2008; MA, 1990, University of California (Los Angeles); PhD, 1993, University of California (Los Angeles)

## Assistant Professors

CHO, HEEKYOUNG 2010; MA, 1999, Yonsei University (Korea); PhD, 2010, University of Chicago
DUBROW, JENNIFER E. 2011; MA, 2002, University of Chicago; PhD, 2011, University of Chicago
JESTY, JUSTIN C. 2012; MA, 2010, University of Chicago; PhD, 2010, University of Chicago

## Senior Lecturers

BI, NYAN-PING 2009; MA, 1988, Indiana University; PhD, 2000, Indiana University
KIM, SOOHEE 2008; MA, 1991, Florida International University; PhD, 1999, University of Washington
MATSUDA-KIAMI, IZUMI 2010; MA, 1992, University of Wisconsin (Madison)
OHTA, KAORU * 2008; MA, 1987, University of California (Los Angeles); PhD, 1994, University of California (Los Angeles)
YU, LIPING 2010; MA, 1988, Tsinghua University (China); MA, 1998, Louisiana State University

## Lecturers

ABEDIN, NANDINI 2009; MS, 1987, Bangladesh University of Engineering and Technology (India); MS, 2004, University of Washington
AHMAD, JAMEEL 2004; MA, 1996, Jawaharlal Nehru University (India)
CAO, YU QING 2004; MA, 1992, University of Washington; PhD, 2001, University of Washington
IWATA, AKIKO 2008; MA, 2001, University of Minnesota; MA, 2002, Columbia University
KESAVATANA-DOHRS, WIWORN 2008; MA, 1984, University of Detroit; PhD, 1989, University of Michigan
NGUYEN, CHI LINH 2008; MA, 2004, Vietnam National University
NISHIKAWA, ITSUKO 2005; MA, 1999, Columbia University PAHLAJRAI, PREM 2008; MS, 1990, Georgia Institute of Technology; MA, 2005, University of Washington
SANDJAJA, DESIANA P. 2008; MA, 2000, Ohio University
WON, EUNYOUNG 2011; MA, 2004, Michigan State University

## Astronomy

## Professors

ANDERSON, SCOTT * 2000; MA, 1980, University of California (Los Angeles); PhD, 1985, University of Washington BALICK, BRUCE * 2008; PhD, 1971, Cornell University BOHM, KARL-HEINZ * 1993, (Emeritus); PhD, 1954, University of Kiel (Germany)
BOHM-VITENSE, ERIKA H * 1993, (Emeritus); PhD, 1951, University of Kiel (Germany)

BROWNLEE, DONALD E * 1981; PhD, 1971, University of Washington
CONNOLLY, ANDREW J. 2011; PhD, 1993, University of London, UK
DALCANTON, JULIANNE 2009; PhD, 1995, Princeton University
HAWLEY, SUZANNE * 2008; MA, 1984, University of Texas (Austin); PhD, 1989, University of Texas (Austin)
IVEZIC, ZELJKO 2010; PhD, 1995, University of Kentucky
QUINN, THOMAS R. * 2008; PhD, 1986, Princeton University
SULLIVAN, WOODRUFF T * 2008; PhD, 1971, University of Maryland
SZKODY, PAULA * 2008; MS, 1972, University of Washington; PhD, 1975, University of Washington
WALLERSTEIN, GEORGE * 1998, (Emeritus); PhD, 1958, California Institute of Technology

## Associate Professors

AGOL, ERIC 2009; PhD, 1997, University of California (Santa Barbara)
MEADOWS, VICTORIA S 2009; PhD, 1994, University of Sydney (Australia)

## Senior Lecturers

LARSON, ANA M. 2007; PhD, 1996, University of Victoria (Canada)
SMITH, TOBY R. 2007; MS, 1990, University of Washington; PhD, 1995, University of Washington

## Lecturers

FRASER, OLIVER J. 2012; MS, 2003, University of Washington; PhD, 2008, University of Washington
LAWS, CHRISTOPHER S 2011; MS, 2001, University of Washington; PhD, 2004, University of Washington

## Biology

## Professors

AMMIRATI, JOSEPH 2008; MA, 1967, San Francisco State; PhD, 1972, University of Michigan
BENDICH, ARNOLD J 2007, (Emeritus); PhD, 1969, University of Washington
BERGSTROM, CARL T 2010; PhD, 1998, Stanford University
BLISS, LAWRENCE C * 1994, (Emeritus); MSc, 1953, Kent State University; PhD, 1956, Duke University
BOERSMA, P DEE * 2008; PhD, 1974, Ohio State University BRADSHAW, HARVEY D 2008; PhD, 1984, Louisiana State University
CARRINGTON, EMILY 2010; PhD, 1992, Stanford University CATTOLICO, ROSE A. 2008; MA, 1968, Temple University; PhD, 1973, State University of New York (Stony Brook)
CLELAND, ROBERT E. * 2001, (Emeritus); PhD, 1957, California Institute of Technology
CLONEY, RICHARD A * 1995, (Emeritus); MA, 1954, Humboldt State University; PhD, 1959, University of Washington
DANIEL, THOMAS L. * 2008; MS, 1978, University of Wisconsin; PhD, 1982, Duke University
DEL MORAL, ROGER 2008; MA, 1966, University of California (Santa Barbara); PhD, 1968, University of California (Santa Barbara)
DICKINSON, MICHAEL H. 2011; PhD, 1989, University of Washington
GRAUBARD, KATHERINE * 2007, (Research Emeritus); PhD, 1973, University of Washington
HALL, BENJAMIN D 2008, (Emeritus); MA, 1956, Harvard University; PhD, 1959, Harvard University

HALPERIN, WALTER * 1995, (Emeritus); MS, 1961, South ern Connecticut State University; PhD, 1965, University of Connecticut
HASKINS, EDWARD F * 1994, (Emeritus); MS, 1962, University of Minnesota; PhD, 1965, University of Minnesota
HILLE, MERRILL * 2011, (Emeritus); PhD, 1965, Rockefeller University
HUEY, RAYMOND B * 1998; MA, 1969, University of Texas (Austin); PhD, 1975, Harvard University
KENAGY, GEORGE JAMES * 2008, (Emeritus); PhD, 1972, University of California (Los Angeles)
KINGSOLVER, JOEL * 2000, (Affiliate); MS, 1978, University of Wisconsin; PhD, 1981, Stanford University
KOHN, ALAN J * 1998, (Emeritus); PhD, 1957, Yale University
KOZLOFF, EUGENE N * 1986, (Emeritus); MA, 1946, University of California (Berkeley); PhD, 1950, University of California (Berkeley)
KRUCKEBERG, ARTHUR R * 1988, (Emeritus); PhD, 1950, University of California (Berkeley)
LAIRD, CHARLES D * 2012, (Emeritus); PhD, 1966, Stanford University

LEOPOLD, ESTELLA B * 2001, (Emeritus); MS, 1950, University of California (Berkeley); PhD, 1955, Yale University
MOODY, WILLIAM J * 2008; PhD, 1977, Stanford University
ODELL, GARRETT M. * 2011, (Emeritus); PhD, 1972, Johns Hopkins University
OLMSTEAD, RICHARD G. 2008; PhD, 1988, University of Washington
ORIANS, GORDON H * 1995, (Emeritus); PhD, 1960, University of California (Berkeley)
PAINE, ROBERT T * 1999, (Emeritus); MS, 1958, University of Michigan; PhD, 1961, University of Michigan
PALKA, JOHN M * 2002, (Emeritus); PhD, 1965, University of California (Los Angeles)
PARICHY, DAVID M 2009; PhD, 1997, University of California (Davis)
PERKEL, DAVID J 2009; PhD, 1992, University of California (San Francisco)
RIDDIFORD, LYNN M * 2007, (Emeritus); PhD, 1961, Cornell University
ROHWER, SIEVERT A * 2007, (Emeritus); MA, 1970, University of Kansas; PhD, 1971, University of Kansas
RUESINK, JENNIFER 2012; MPhil, 1991, Cambridge University (UK); PhD, 1996, University of Washington
SCHUBIGER, GEROLD A * 2010, (Emeritus); Diploma, 1957, Teachers Training College, Zurich; PhD, 1968, University of Zurich (Switzerland)
SEBENS, KENNETH 2005; PhD, 1977, University of Washington
SIDOR, CHRISTIAN A 2012; MS, 1997, University of Chicago; PhD, 2000, University of Chicago
STRATHMANN, RICHARD R * 2009, (Emeritus); MS, 1966, University of Washington; PhD, 1970, University of Washington
SUMMERS, ADAM P. 2011; MS, 1992, New York University; PhD, 1999, University of Massachusetts
SWALLA, BILLIE J. 2009; MS, 1983, University of Iowa; PhD, 1988, University of lowa
TEWKSBURY, JOSHUA J 2011; PhD, 2000, University of Montana
TORII, KEIKO * 2009; MS, 1989, University of Tsukuba (Japan); PhD, 1993, University of Tsukuba (Japan)
TRUMAN, JAMES W * 2007, (Emeritus); MA, 1969, Harvard University; PhD, 1970, Harvard University
TSUKADA, MATSUO * 2000, (Emeritus); MSc, 1958, Osaka City University (Japan); PhD, 1961, Osaka City University (Japan)

588 COLLEGE OF ARTS AND SCIENCES
VAN VOLKENBURGH, ELIZABETH 2008; PhD, 1980, University of Washington
WAALAND, J ROBERT 2009, (Emeritus); PhD, 1969, University of California (Berkeley)
WAKIMOTO, BARBARA T 2008; PhD, 1981, Indiana University
WARD, PETER D. 2003; MS, 1973, University of Washington; PhD, 1976, Mcmaster University (Canada)
WHITELEY, ARTHUR H * 1987, (Emeritus); MA, 1939, University of Wisconsin; PhD, 1945, Princeton University
WILLOWS, ARTHUR 0 * 2006, (Emeritus); PhD, 1967, University of Oregon
WINGFIELD, JOHN C. * 2007, (Emeritus); PhD, 1973, University College of North Wales (UK)

## Associate Professors

BAKKEN, AIMEE * 2005, (Emeritus); PhD, 1970, University of lowa
BOSMA, MARTHA 2008; PhD, 1986, University of California (Los Angeles)
COOPER, MARK S * 2008; PhD, 1985, University of California (Berkeley)
DE LA IGLESIA, HORACIO 0. 2009; MA, 1991, University of Buenos Aires (Argentina); PhD, 1997, University of Massachusetts
DISTILIO, VERONICA SANDRA 2012; PhD, 1998, University

## of Massachusetts

HILLE RIS LAMBERS, JANNEKE 2011; PhD, 2001, Duke University
KERR, BENJAMIN B 2010; PhD, 2002, Stanford University
NEMHAUSER, JENNIFER L 2011; PhD, 2000, University of California (Berkeley)
PRIESS, JAMES R. * 2001, (Affiliate); PhD, 1983, University of Colorado (Boulder)

## Assistant Professors

IMAIZUMI, TAKATO 2008; MS, 1998, Tokyo Metropolitan University; PhD, 2001, Tokyo Metropolitan University
LEACHE, ADAM D. 2010; MS, 2000, San Diego State University; PhD, 2008, University of California (Berkeley)
PAREDEZ, ALEXANDER R. 2012; MS, 1999, University of California (San Diego); PhD, 2006, Stanford University
PARRISH, JAY Z 2010; PhD, 2002, University of Colorado (Boulder)
RIFFELL, JEFFREY A 2010; PhD, 2004, University of California (Los Angeles)
SANTANA MATA, SHARLENE E. 2012; MSc, 2004, Universidad de Los Andes (Venezuela); PhD, 2010, University of Massachusetts
STROMBERG, CAROLINE A. 2008; MSc, 1997, University of Lund (Sweden); PhD, 2003, University of California (Berkeley)
WILSON, GREGORY 2008; PhD, 2004, University of California (Berkeley)

## Senior Lecturers

BUTTEMER, HELEN A. 2008; MAT, 1987, University of Washington
CROWE, ALISON J 2007; PhD, 1993, State University of New York (Stony Brook)
FREEMAN, SCOTT RIDER 2011; PhD, 1990, University of Washington
KENNEDY, MICHAEL L 2008; MS, 1980, Central Washington University; PhD, 1994, Arizona State University
MARTIN-MORRIS, LINDA E 2012; PhD, 1991, Brandeis University
O'CONNOR, EILEEN 2008; MS, 1976, University of Washington
ZEMAN, LESLIE B. 2008; DVM, 1975, Michigan State University

## Lecturers

BILGEN, TOLGA 2004; MSc, 1994, University of British Columbia (Canada); PhD, 1998, Carleton University (Canada) BOURNS, BRENDA 2012; PhD, 1997, University of Washington
BUCHWITZ, BRIAN JOSEPH 2012; PhD, 2004, University of Washington
HORWITH, MICAH J. 2011; PhD, 2011, University of Washington
MCABEE, JESSICA 2012; PhD, 2004, University of California (Davis)
PETERSEN, KAREN E. 2011; MS, 1977, University of New Mexico; PhD, 1983, University of New Mexico
SCHIVELL, AMANDA E 2008; PhD, 2000, University of Washington
SMARR, BENJAMIN 2012; PhD, 2012, University of Washington
WAALAND, KATHRYN SUSAN D. 2008, (Emeritus); PhD, 1969, University of California (Berkeley)
WENDEROTH, MARY PAT 2009; MS, 1981, Purdue University; PhD, 1987, Rush University

## Chemistry

## Professors

ANDERSEN, NIELS * 2005; PhD, 1967, Northwestern University
CALLIS, JAMES B * 2008, (Emeritus); PhD, 1970, University of Washington
CAMPBELL, CHARLES T. * 2008; PhD, 1979, University of Texas (Austin)
CHIU, DANIEL T. 2011; PhD, 1998, Stanford University
DALTON, LARRY R. 2011, (Emeritus); MA, 1971, Harvard University; PhD, 1971, Harvard University
DAVIDSON, ERNEST 2002; PhD, 1961, Indiana University
DROBNY, GARY P 1998; PhD, 1981, University of California (Berkeley)
ENGEL, THOMAS * 2005, (Emeritus); MA, 1964, Johns Hopkins University; PhD, 1969, University of Chicago

FOOT, KIRSTEN A 2009; MA, 1990, Wheaton College; PhD, 1999, University of California (San Diego)
HAROLD, CHRISTINE L 2011; MA, 1999, Pennsylvania State University; PhD, 2003, Pennsylvania State University JOSEPH, RALINA L 2012; MA, 2001, University of California (San Diego); PhD, 2005, University of California (San Diego) KIELBOWICZ, RICHARD B * 1990; MA, 1978, University of Minnesota; PhD, 1984, University of Minnesota
NEFF, GINA S 2012; MPhil, 2001, City University of New York; PhD, 2004, Columbia University
POST, ROBERT M * 2002, (Emeritus); MA, 1958, Ohio University; PhD, 1961, Ohio University

## Assistant Professors

NISHIME, LEILANI 2008; MA, 1991, University of Michigan; PhD, 1997, University of Michigan
PEARCE, KATY E. 2012; MA, 2006, University of London, UK; PhD, 2011, University of California (Santa Barbara)

## Senior Lecturers

HENDERSON, MICHAEL W. 2004; BS, 1971, University of Oregon
MCGARRITY, MATTHEW K 2010; MA, 2000, Indiana University; PhD, 2004, Indiana University
NYQUIST, JODY D 2003, (Emeritus); MA, 1967, University of Washington

## Lecturers

BAMMERT, GAY MICHELLE 2012; MA, 1998, California State University, Northridge; PhD, 2007, Southern Illinois University
BATRA, ANIL K. 2012; MS, 1995, University of Tennessee; MBA, 2005, University of Washington
COUTU, LISA 2009; MA, 1992, University of Washington; PhD, 1996, University of Washington
DAVILA, FLORANGELA 2012; MA, 1992, Columbia University

DEBRAY, NATALIE T. 2012; MA, 2001, University of Wash ington; PhD, 2007, University of Washington
GILL, KATHY E 2012; MS, 1979, Virginia Polytechnic Institute and State University
LAWSON, LINDA 2012; MA, 1979, Michigan State Univer sity; PhD, 1988, University of Washington
LOCKETT JOHN, M SUE 2012; MA, 1980, University of Washington; PhD, 2008, University of Washington
MACKLIN, SCOTT K. 2012; MPhil, 1995, Institute for Christian Studies

MCPHERSON, RICHARD S. 2012; MBA, 1997, University of Denver
PARTNOW, JESSICA 2012; BA, 2006, City University of New York
RATHE, KAREN M. 2004; MS, 1986, University of Oregon
STONEHILL, ALEXANDER M 2012; BA, 2003, New School University
STUTEVILLE, SARAH R 2012; BA, 2006, City University of New York
WAY, DEBORAH 2012; MA, 2002, University of Southern California; PhD, 2010, Arizona State University

## Comparative History of Ideas

## Lecturers

BUSHNELL, JEANETTE M. 2007; MN, 1979, University of Washington
MORAN, STACEY C. 2008; MA, 2003, University of California (Berkeley)
SMITH, MICHAEL LEE 2011; MA, 2000, Boston College; PhD, 2008, New School for Social Research
SOKOLOVA, VERA 2011; MA, 1996, University of Washington; PhD, 2002, University of Washington
WACKER, ZORICA G. 2012; MSc, 1996, University of Belgrade (Serbia)
WYGANT, CHRISTINA D 2011; MA, 2003, Washington State University; PhD, 2010, University of Washington

## Comparative Literature

## Professors

ADAMS, HAZARD S * 1996, (Emeritus); MA, 1949, University of Washington; PhD, 1953, University of Washington BORCH-JACOBSEN, MIKKEL * 1990; DOCT, 1981, Univer sity of Strasbourg (France)
BRAESTER, YOMI 2009; MA, 1992, Yale University; PhD, 1998, Yale University
BROWN, MARSHALL J 2008; MPhil, 1969, Yale University; PhD, 1972, Yale University
ROSSEL, SVEN H * 2001, (Affiliate); PhD, 1968, University of Copenhagen (Denmark)
STEELE, CYNTHIA 2008; MA, 1979, University of California (San Diego); PhD, 1980, University of California (San Diego)

## Associate Professors

BEAN, JENNIFER M. 2008; PhD, 1998, University of Texas (Austin)
KOGOJ-KAPETANIC, BREDA * 1990, (Emeritus); Diploma, 1954, University of Zagreb (Yugoslavia); LittD, 1966, University of Zagreb (Yugoslavia)
KONICK, WILLIS * 2007, (Emeritus); MA, 1954, University of Washington; PhD, 1964, University of Washington
TWEEDIE, JAMES 2011; MA, 1999, University of Iowa; PhD, 2002, University of lowa

## Assistant Professors

BENITEZ, JOSE FRANCISCO 2008; MA, 1996, University of Wisconsin (Madison); PhD, 2004, University of Wisconsin (Madison)
MAHADEVAN, SUDHIR 2009; MA, 2000, New York University

## Lecturers

COOPER, TAMARA 2009; MA, 1998, Carleton University (Canada)
DAAD, SIMA 2012; MA, 1981, University of Tehran; PhD, 2012, University of Washington

## Dance

## Professors

COOPER, ELIZABETH A 2012; MFA, 1997, University of Washington
KNAPP, JOAN S * 1989, (Emeritus); MA, 1964, University of Illinois
WILEY, HANNAH * 1987; MA, 1981, New York University

## Associate Professors

MCMAINS, JULIET 2011; PhD, 2003, University of California (Riverside)
SALK, JENNIFER 2007; MFA, 1994, Ohio State University

## Assistant Professors

COUPE, JAMES 2007; MA, 2000, University of Salford (UK); PhD, 2007, University of Washington
FABER, JURG PETER KOCH 2008; MA, 1998, London Contemp. Dance School (England)

## Lecturers

CASTEEL, STEVE 2012; MFA, 2004, University of Arizona
CINOTTO, RHONDA M. 2011; BA, 1997, University of Washington
CURTIS, JEFF 2011; MFA, 2002, University of Washington
MONROE-COOK, BRENNA 2012; MFA, 2011, University of Washington
MOORE, PAUL R. 2012; BA, 1993, University of California (Santa Barbara)
PARKER KOUMBASSA, SARAH LE 2012; BS, 1993, University of Minnesota
PETERS, PAULA 2012; MFA, 2011, University of Washington

## Drama

## Professors

BRYANT-BERTAIL, SARAH * 2011, (Emeritus); MA, 1981, University of Minnesota; PhD, 1986, University of Minnesota
CLAY, JACK D. * 1992, (Emeritus); MA, 1956, Northwestern University
COMTOIS, MARY ELIZABETH * 1993, (Emeritus); MA, 1962, San Francisco State; PhD, 1970, University of Colorado (Boulder)
CRIDER, JAMES R * 1983, (Emeritus); MA, 1950, University of Washington
CURTIS-NEWTON, VALERIE 2012; MA, 1996, University of Washington
GATES, SARAH N * 1999; MA, 1974, University of California (Santa Barbara); MFA, 1983, Boston University
JOHNSON, DAVID ODAI 2012; MFA, 1990, University of Utah; PhD, 1994, University of Texas (Austin)
LYNCH, THOMAS 2006; MFA, 1979, Yale University

## Associate Professors

FORRESTER, WILLIAM D * 2004, (Emeritus); MFA, 1969, Yale University
KORF, GEOFFREY L 2008; MFA, 1991, Yale University
TROUT, DEBORAH L * 2012; MFA, 1994, Yale University
TSAO, ANDREW H 2009; MFA, 1990, California Institute of the Arts
VALENTINETTI, AURORA 1992, (Emeritus); MA, 1949, University of Washington
ZANE, LORA 2012; MFA, 1994, University of Southern California

## Assistant Professors

FRACE, JEFFREY H. 2009; MFA, 1997, Columbia University MIHAYLOVA, STEFKA G 2012; MA, 2001, Central European University (Budapest); PhD, 2008, Northwestern University WOLCOTT, JOHN R * 1998, (Emeritus); MFA, 1964, Carnegie Institute of Technology; PhD, 1967, Ohio State University

## Senior Lecturer

SHAHN, JUDITH * 2012; BFA, 1977, Carnegie Mellon University

## Lecturers

ALM, GEOFFREY E. 2008; BA, 1976, Evergreen State College
BONJEAN, ELIZABETH G. 2011; MA, 2000, San Francisco State; PhD, 2005, University of Washington
HAFSO, SCOTT 2007; MFA, 1995, University of Washington; MMUS, 1999, University of Washington
LIENAU, PHILLIP 2011; BA, 2000, University of California (Berkeley)
MADDEN, CATHERINE M 2011; MA, 1977, Washington University
RICHLOVSKY, JANE F. 2012; BA, 1991, Columbia College
SMITH, ANDREW D. 2011; MFA, 2005, University of Washington
STARRITT, MATTHEW 2011; BFA, 2005, University of Washington
TIENCKEN, CHARLOTTE 2012; MFA, 1983, University of Texas (Austin)
TORBECK, BRET A 2011; BFA, 1991, Carnegie Mellon University

## Economics

## Professors

BAJARI, PATRICK L 2012; PhD, 1997, University of Minnesota
BARZEL, YORAM * 1981; MA, 1956, Hebrew University (Israel); PhD, 1961, University of Chicago
BROWN, GARDNER * 2001, (Emeritus); PhD, 1964, University of California (Berkeley)
BRUCE, NEIL * 1991; MA, 1969, Queen's University at Kingston (Canada); PhD, 1975, University of Chicago
CRUTCHFIELD, JAMES A * 1984, (Emeritus); MA, 1942, University of California (Los Angeles); PhD, 1954, University of California (Berkeley)
EICHER, THEO S. * 2012; MPhil, 1993, Columbia University; PhD, 1994, Columbia University
HALVORSEN, ROBERT F * 1981; MPA, 1968, Harvard University; PhD, 1973, Harvard University
HARTMAN, RICHARD C * 2011, (Emeritus); MA, 1971, University of California (Berkeley); PhD, 1971, University of California (Berkeley)
KHALIL, FAHAD A. * 2012; MA, 1988, Virginia Polytechnic Institute and State University; PhD, 1991, Virginia Polytechnic Institute and State University

KIM, CHANG JIN 2006; PhD, 1989, University of Washington
LAWARREE, JACQUES P. * 2006; MA, 1984, University of Liege (Belgium); PhD, 1990, University of California (Berkeley)
LUNDBERG, SHELLY * 2011, (Emeritus); PhD, 1981, Northwestern University
MAH, FENG-HWA * 1987, (Emeritus); MA, 1956, University of Michigan; PhD, 1959, University of Michigan
MC CAFFREE, KENNETH M * 1986, (Emeritus); MA, 1942, University of Denver; PhD, 1950, University of Chicago
MC GEE, JOHN S 1991, (Emeritus); PhD, 1952, Vanderbilt University
NELSON, CHARLES R * 2011, (Emeritus); MA, 1967, University of Wisconsin; PhD, 1969, University of Wisconsin (Madison)
NORTH, DOUGLAS C 1985, (Emeritus); PhD, 1952, University of California (Berkeley)
PARKS, RICHARD * 2007, (Emeritus); MA, 1964, University of California (Berkeley); PhD, 1966, University of California (Berkeley)
SILBERBERG, EUGENE 2008, (Emeritus); PhD, 1964, Purdue University
STARTZ, RICHARD * 2011, (Emeritus); PhD, 1978, Massachusetts Institute of Technology
THORNTON, JUDITH A * 1985; MA, 1958, Radcliffe; PhD, 1960, Radcliffe
TURNOVSKY, STEPHEN J * 1987; MA, 1963, Victoria University of Wellington (New Zealand); PhD, 1968, Harvard University
WONG, KAR-YIU * 1990; MPhil, 1981, Columbia University; PhD, 1983, Columbia University
ZIVOT, ERIC W * 2007; PhD, 1992, Yale University

## Associate Professors

BROCK, PHILIP L * 1991; PhD, 1982, Stanford University CHEN, YU-CHIN 2012; MA, 1996, Harvard University; PhD, 2002, Harvard University
HADJIMICHALAKIS, MICHAEL * 1982; PhD, 1970, University of Rochester
KOCHIN, LEVIS A * 1981; PhD, 1975, University of Chicago ROSE, ELAINA 2001; MA, 1988, University of Pennsylvania; PhD, 1993, University of Pennsylvania

## Assistant Professors

HEATH, RACHEL M 2011; MPhil, 2008, Yale University; PhD, 2012, Yale University
KIM, SEIK 2008; MPhil, 2005, Yale University; PhD, 2008, Yale University
LEUKHINA, OKSANA M 2010; MA, 2003, University of Minnesota; PhD, 2005, University of Minnesota
WOLFF, HENDRIK GEORG 2012; MSc, 2004, University of California (Berkeley); PhD, 2007, University of California (Berkeley)
YANG, MUJEUNG 2012; Diploma, 2006, University of Bonn (Germany)

## Senior Lecturers

ELLIS, GREGORY M. * 2012; PhD, 1992, University of California (Berkeley)
SALEHI-ESFAHANI, HAIDEH 1999; PhD, 1985, University of Pennsylvania
TURNOVSKY, MICHELLE H. L. 2012; MBA, 1965, Harvard University; PhD, 1978, Australian National University

## Lecturers

KNOX, MELISSA A 2011; PhD, 2008, University of California (Berkeley)
O'DEA, DENNIS C 2012; MA, 2007, University of Illinois (Urbana); PhD, 2010, University of Illinois (Urbana)

## English

## Professors

ABRAMS, ROBERT * 2008; PhD, 1973, Indiana University ALEXANDER, EDWARD * 2004, (Emeritus); MA, 1959, University of Minnesota; PhD, 1963, University of Minnesota
ALLEN, CAROLYN * 2008; MA, 1966, Claremont Graduate School; PhD, 1972, University of Minnesota
BAWARSHI, ANIS 2011; MA, 1995, University of Kansas; PhD, 1999, University of Kansas
BIERDS, LINDA L * 2008; MA, 1971, University of Washington
BLAKE, KATHLEEN * 2010, (Emeritus); MA, 1967, University of California (Los Angeles); PhD, 1971, University of California (San Diego)
BLAU, HERBERT 2012, (Emeritus); MA, 1949, Stanford University; PhD, 1954, Stanford University
CHERNIAVSKY, EVA 2008; PhD, 1990, University of California (Berkeley)
COLDEWEY, JOHN C * 2010, (Emeritus); MA, 1969, Northern Illinois University; PhD, 1972, University of Colorado (Boulder)
DILLON, GEORGE L. * 1986; MA, 1966, University of California (Berkeley); PhD, 1969, University of California (Berkeley)
DUNN, RICHARD J. * 2008, (Emeritus); MA, 1961, Case Western Reserve University; PhD, 1964, Case Western Reserve University
FOSTER, RONALD THOMAS 2008; MA, 1984, University of Texas (Austin); PhD, 1990, University of Wisconsin
FREY, CHARLES HUBBARD * 2005, (Emeritus); JD, 1960, Harvard University; PhD, 1971, Yale University

YEE, SHIRLEY J. * 2012; MA, 1983, Ohio State University; PhD, 1987, Ohio State University

## Associate Professors

GINORIO, ANGELA B * 1999; MA, 1971, University of Puerto Rico; PhD, 1979, Fordham University
HABELL-PALLAN, MICHELLE 2007; MA, 1994, University of California (San Diego); PhD, 1997, University of California (Santa Cruz)
ROSS, LUANA K. 1999; MSW, 1981, Portland State University; PhD, 1992, University of Oregon

SWARR, AMANDA L 2012; MA, 1998, University of Minnesota; PhD, 2003, University of Minnesota
WELLAND, SASHA 2012; MA, 1998, University of California (Santa Cruz); PhD, 2005, University of California (Santa Cruz)

## Senior Lecturer

AANERUD, REBECCA 2010; MA, 1993, University of Washington; PhD, 1998, University of Washington

## Lecturers

BRIGHT, CLARE 2010; MA, 1967, American University; PhD, 1979, University of Washington
MAURER, SERENA D. 2012; MPA, 2006, University of Washington; PhD, 2006, University of Washington
NOVOTNY, PATRICIA S. 2011; JD, 1983, University of Washington

## Geography

## Professors

BEYERS, WILLIAM B * 2010, (Emeritus); PhD, 1967, University of Washington
BROWN, MICHAEL P. * 2007; MA, 1990, University of British Columbia (Canada); PhD, 1994, University of British Columbia (Canada)
CHAN, KAM WING * 1995; MSc, 1983, University of Hong Kong; PhD, 1988, University of Toronto (Canada)
ELLIS, JOHN MARK 2006; MA, 1984, Indiana University; PhD, 1988, Indiana University
ELWOOD-FAUSTINO, SARAH A. 2011; MA, 1996, University of Minnesota; PhD, 2000, University of Minnesota
ENGLAND, KIM V.L. 2008; MA, 1984, Ohio State University; PhD, 1988, Ohio State University
HERBERT, STEVEN K 2008; MA, 1987, University of Minnesota; PhD, 1995, University of California (Los Angeles)
JAROSZ, LUCY A. * 2012; MA, 1979, University of Wisconsin; PhD, 1990, University of California (Berkeley)
KRUMME, GUNTER * 2003, (Emeritus); PhD, 1966, University of Washington
LAWSON, VICTORIA A. * 1991; MA, 1982, Ohio State University; PhD, 1986, Ohio State University
MAYER, JONATHAN D * 1982; MA, 1975, University of Michigan; PhD, 1977, University of Michigan
MITCHELL, KATHARYNE 2004; MA, 1989, University of California (Berkeley); PhD, 1993, University of California (Berkeley)
MORRILL, RICHARD L * 2002, (Emeritus); MA, 1957, University of Washington; PhD, 1959, University of Washington
NYERGES, TIMOTHY L. * 1991; MA, 1976, Ohio State University; PhD, 1980, Ohio State University
SPARKE, MATTHEW * 2006; MA, 1991, University of British Columbia (Canada); PhD, 1996, University of British Columbia (Canada)
VELIKONJA, JOSEPH * 1994, (Emeritus); PhD, 1948, State University (Italy)
ZUMBRUNNEN, CRAIG * 1979; MS, 1968, California Institute of Technology; PhD, 1973, University of California (Berkeley)

## Associate Professors

CHANG, KUEI-SHENG * 1987, (Emeritus); MA, 1950, University of Michigan; PhD, 1955, University of Michigan KAKIUCHI, GEORGE H * 1990, (Emeritus); MA, 1953, University of Michigan; PhD, 1957, University of Michigan WITHERS, SUZANNE D 1997; MA, 1988, Queen's University at Kingston (Canada); PhD, 1992, University of California (Los Angeles)

## Assistant Professor

BERGMANN, LUKE R 2012; MA, 2006, University of Minnesota; PhD, 2012, University of Minnesota

## Lecturers

AGUIRRE, ROBERT W. 2012; MA, 1995, University of Texas (Austin); PhD, 1999, Louisiana State University
HANNAH, JOSEPH 2012; MA, 1989, Cornell University; PhD, 2007, University of Washington

## Germanics

## Professors

BARRACK, CHARLES M * 1996; MA, 1966, University of Washington; PhD, 1969, University of Washington
BROWN, JANE K * 2012, (Emeritus); MPhil, 1969, Yale University; PhD, 1971, Yale University
GRAY, RICHARD T * 1991; MA, 1976, University of Cincinnati; PhD, 1981, University of Virginia
HRUBY, ANTONIN F * 1985, (Emeritus); PhD, 1946, Charles University (Czech Republic)
WILKE, SABINE * 1997; PhD, 1986, University of Mainz (Germany)

## Associate Professors

AMES, ERIC C. 2008; MA, 1993, University of Washington; PhD, 2000, University of California (Berkeley)
BLOCK, RICHARD 2007; MA, 1979, University of Washington; PhD, 1998, Northwestern University
MCLEAN, SAMMY K * 1990, (Emeritus); MA, 1957, University of Michigan; PhD, 1963, University of Michigan
PRUTTI, BRIGITTE * 1997; DPhil, 1988, University of Graz (Austria); PhD, 1991, University of California (Irvine)

## Assistant Professors

BRANDL, KLAUS K 2009; MA, 1987, University of Texas; PhD, 1991, University of Texas (Austin)
WIGGINS, ELLWOOD 2012; MA, 2006, Johns Hopkins University; PhD, 2011, Yale University

## History

## Professors

ALDEN, DAURIL * 2003, (Emeritus); MA, 1952, University of California (Berkeley); PhD, 1959, University of California (Berkeley)
BACHARACH, JERE L * 2004, (Emeritus); MA, 1962, Harvard University; PhD, 1967, University of Michigan

THOMAS, CAROL G * 2008; MA, 1961, Northwestern University; PhD, 1965, Northwestern University
THOMAS, LYNN M. 2012; MA, 1993, Northwestern University; PhD, 1997, University of Michigan
TOEWS, JOHN E * 2008; MA, 1968, Harvard University; PhD, 1973, Harvard University
ULLMAN, JOAN CONNELLY * 1995, (Emeritus); MA, 1953, Bryn Mawr College; PhD, 1963, Bryn Mawr College
WAUGH, DANIEL CLARKE * 2006, (Emeritus); MA, 1965, Harvard University; PhD, 1972, Harvard University
YOUNG, GLENNYS J. * 2012; MA, 1983, University of California (Berkeley); PhD, 1989, University of California (Berkeley)

## Associate Professors

CAMP, STEPHANIE M 2010; MA, 1992, Yale University; PhD, 1998, University of Pennsylvania
DHAVAN, PURNIMA 2012; MA, 1998, University of Virginia; PhD, 2003, University of Virginia
HEVLY, BRUCE W * 2008; PhD, 1987, Johns Hopkins University
JUNG, MOON-HO 2008; MA, 1995, Cornell University; PhD, 2000, Cornell University
NASH, LINDA L 2008; MS, 1989, University of California (Berkeley); PhD, 2000, University of Washington

D'MARA, MARGARET PUGH 2011; MA, 2002, University of Pennsylvania; PhD, 2002, University of Pennsylvania
O'NEIL, MARY R * 2008; MA, 1971, Stanford University; PhD, 1982, Stanford University
SMALLWOOD, STEPHANIE E 2008; PhD, 1999, Duke University

THURTLE, PHILLIP S 2008; MA, 1994, Stanford University; PhD, 1999, Stanford University
WALKER, JOEL T 2008; MA, 1994, Princeton University; PhD, 1998, Princeton University

WARREN, ADAM W 2010; MA, 2000, University of California (San Diego); PhD, 2004, University of California (San Diego)

## Assistant Professors

CAMPBELL, ELENA 2008; MA, 1996, European University; PhD, 1999, Russian Academy of Sciences (Russia)

LOPEZ, SHAUN T 2012; MA, 1995, University of Utah; PhD, 2004, University of Michigan
RODRIGUEZ SILVA, ILEANA M. 2008; MA, 1997, University of Wisconsin (Madison); PhD, 2004, University of Wisconsin (Madison)

## Lecturers

MEYER, MAHLON D. 2012; MA, 1994, Harvard University; PhD, 2008, University of Washington
O'DONNELL, WILSON E. 2008; MA, 1982, State University of New York (Cooperstown)

SKOOG, GABRIEL J 2012; MA, 2009, University of Washington; PhD, 2012, University of Washington
URBANSKI, CHARITY L. 2012; MA, 1999, University of California (Berkeley); PhD, 2007, University of California (Berkeley)

## International Studies

## Professors

ANCHORDOGUY, MARIE C * 2008; MBA, 1982, University of California (Berkeley); PhD, 1986, University of California (Berkeley)
BACHMAN, DAVID M * 2008; MA, 1977, Stanford University; PhD, 1984, Stanford University

BARZILAI, GAD 2008; MA, 1982, Bar-Ilam University (Israel); PhD, 1988, Hebrew University (Israel)
BUTOW, ROBERT J C * 1990, (Emeritus); MA, 1948, Stanford University; PhD, 1953, Stanford University
CHIROT, DANIEL * 2011; PhD, 1973, Columbia University HA, YONG-CHOOL 2008; MA, 1978, Kent State University; PhD, 1985, University of California (Berkeley)

HAMILTON, GARY G. 2008; MA, 1970, University of Washington; PhD, 1975, University of Washington
HANLEY, SUSAN B * 2002, (Emeritus); MA, 1964, Yale University; PhD, 1971, Yale University
JAFFEE, MARTIN S. * 2012, (Emeritus); MA, 1974, Florida State University; PhD, 1980, Brown University
KASABA, RESAT * 2012; MA, 1979, State University of New York (Binghamton); PhD, 1986, State University of New York (Binghamton)

LAVELY, WILLIAM R. * 2011; MA, 1977, University of California (Berkeley); PhD, 1982, University of Michigan
LEGTERS, LYMAN H * 1990, (Emeritus); MA, 1956, Boston University; PhD, 1958, Freie University of Berlin (Germany) MIGDAL, JOEL S * 2008; MA, 1968, Harvard University; PhD, 1972, Harvard University
PEKKANEN, SAADIA 2009; MA, 1988, Columbia University; PhD, 1996, Harvard University
POZNANSKI, KAZIMIERZ * 2008; MA, 1969, University of Warsaw (Poland); PhD, 1974, University of Warsaw (Poland) PYLE, KENNETH B * 2008; PhD, 1965, Johns Hopkins University

WEBB, EUGENE * 2000, (Emeritus); MA, 1962, Columbia University; PhD, 1965, Columbia University
WILLIAMS, MICHAEL A * 2008; MA, 1970, Miami University (Ohio); PhD, 1977, Harvard University
YAMAMURA, KOZO * 1999, (Emeritus); PhD, 1964, Northwestern University

YANG, ANAND A 2008; PhD, 1976, University of Virginia

## Associate Professors

CALLAHAN, MARY P. 2008; MA, 1991, Cornell University; PhD, 1996, Cornell University
CURRAN, SARA R 2008; MS, 1990, North Carolina State University; PhD, 1994, University of North Carolina
DONG, YUE 2008; MA, 1991, University of Oregon; PhD, 1996, University of California (San Diego)

FRIEDMAN, KATHIE 2008; MA, 1979, State University of New York (Binghamton); PhD, 1992, State University of New York (Binghamton)
GARCIA, MARIA E 2010; MA, 1996, Brown University; PhD, 2001, Brown University
GIEBEL, CHRISTOPH 2008; MA, 1991, Cornell University; PhD, 1996, Cornell University
GODOY, ANGELINA SNODGRASS 2008; MA, 1997, University of California (Berkeley); PhD, 2001, University of California (Berkeley)
JONES, CHRISTOPHER D * 2008; MA, 1969, Harvard University; PhD, 1975, Harvard University

LANG, SABINE 2011; MA, 1985, Free University Berlin; PhD, 1997, Free University Berlin
LUCERO, JOSE A 2011; MA, 1997, Princeton University; PhD, 2002, Princeton University
NAM, HWASOOK BERGQUIST 2012; MA, 1989, Seoul National University (Korea); PhD, 2003, University of Washington
NOVETZKE, CHRISTIAN L. 2009; MS, 1996, Harvard University; PhD, 2002, Columbia University

PEKKANEN, ROBERT J. 2008; MA, 1992, Harvard University; PhD, 2002, Harvard University
PIANKO, NOAM 2011; PhD, 2004, Yale University
PORTER, DEBORAH 2008; PhD, 1989, Princeton University
RADNITZ, SCOTT B. 2012; PhD, 2006, Massachusetts Institute of Technology
SORENSEN, CLARK W. * 2008; MA, 1974, University of Washington; PhD, 1981, University of Washington
WARREN, JONATHAN W. 2008; MA, 1990, University of California (Berkeley); PhD, 1997, University of California (Berkeley)
WELLMAN, JAMES K. 2008; MDiv, 1985, Princeton Theological Seminary; PhD, 1995, University of Chicago

## Assistant Professors

KALE, SUNILA S. 2008; PhD, 2007, University of Texas (Austin)
NAAR, DEVIN E 2011; MA, 2010, Stanford University; PhD, 2011, Stanford University
ROBINSON, CABEIRI DEBERGH 2008; MA, 1999, Cornell University; PhD, 2005, Cornell University
WILLIAMS, NATHALIE E 2012; PhD, 2009, University of Michigan

## Senior Lecturers

LATSCH, WOLFRAM W. 2011; MSc, 1991, University of Oxford (UK); DPhil, 2000, University of Oxford (UK)

LORENZ, FREDERICK M. 2012; JD, 1971, Marquette University; LLM, 1982, George Washington University
TOKUNO, KYOKO 2008; MA, 1983, University of California (Berkeley); PhD, 1994, University of California (Berkeley)

## Lecturers

ARAI, ANDREA G. 2009; MA, 1986, Hebrew University (Israel); PhD, 2004, Columbia University

BEYER, JESSICA 2012; MA, 2005, University of Washington; PhD, 2011, University of Washington

CIRTAUTAS, ARISTA MARIA 2009; MA, 1987, University of California (Berkeley); PhD, 1996, University of California (Berkeley)
LARUE, DEAN 2012; MA, 2003, University of Washington MONTGOMERY, SCOTT 2011; MS, 1978, Cornell University MOODY, CHAD J 2012; MA, 2003, University of Washington PANAGIOTIDES, HERACLES S 2007; PhD, 1996, University of Washington

## Law, Societies, and Justice

## Professor

BECKETT, KATHERINE A 2009; MA, 1989, University of California (Los Angeles); PhD, 1994, University of California (Los Angeles)

## Associate Professor

OSANLOO, ARZOO 2009; JD, 1993, American University; PhD, 2002, Stanford University

## Lecturers

WENDER, JONATHAN M 2010; PhD, 2004, Simon Fraser University, B.C. (Canada)
WOIAK, JOANNE D 2012; MA, 1990, University of Toronto (Canada); PhD, 1998, University of Toronto (Canada)

## Linguistics

## Professors

CONTRERAS, HELES * 1998, (Emeritus); MA, 1959, Indiana University; PhD, 1961, Indiana University
HARGUS, SHARON * 2008; MA, 1981, University of California (Los Angeles); PhD, 1985, University of California (Los Angeles)
HERSCHENSOHN, JULIA R. 2008; MA, 1970, University of California (Santa Barbara); PhD, 1976, University of Washington
KAISSE, ELLEN * 2008; PhD, 1977, Harvard University KLAUSENBURGER, JURGEN 2007, (Emeritus); MA, 1966, University of Michigan; PhD, 1969, University of Michigan NEWMEYER, FREDERICK * 2006, (Emeritus); MA, 1967, University of Rochester; PhD, 1969, University of Illinois TARLINSKAYA, MARINA * 2007, (Research Emeritus); PhD, 1967, Moscow Institute of Foreign Languages; DPhil, 1976, Moscow Institute of Foreign Languages
ZAGONA, KAREN T * 2008; PhD, 1982, University of Washington

## Associate Professors

BENDER, EMILY R. MENON 2010; MA, 1997, Stanford University; PhD, 2000, Stanford University
CITKO, BARBARA 2011; PhD, 2000, Stony Brook University OGIHARA, TOSHIYUKI * 2008; MA, 1983, Sophia University (Japan); PhD, 1989, University of Texas
WASSINK, ALICIA BECKFORD 2008; PhD, 1999, University of Michigan
WRIGHT, RICHARD A. 2008; MA, 1993, University of California (Los Angeles); PhD, 1996, University of California (Los Angeles)
XIA, FEI 2008; MS, 1997, University of Pennsylvania; PhD, 2001, University of Pennsylvania

## Assistant Professors

ALDRIDGE, EDITH 2008; MA, 1992, Sophia University (Japan); PhD, 2004, Cornell University
EVANS, BETSY E 2008; MA, 1992, Kent State University; PhD, 2001, Michigan State University

LEVOW, GINA-ANNE 2010; PhD, 1998, Massachusetts Institute of Technology

## Lecturers

FORSHAY, LANCE 2007; MS, 1998, Southern Christian University
MCGARRITY, LAURA WILBUR 2007; MA, 1999, Indiana University; PhD, 2003, Indiana University
SUREK-CLARK, CLARISSA 2011; MA, 1998, University of Pennsylvania
WINTER, KRISTI G 2010; MA, 2008, Gallaudet University

## Mathematics

## Professors

BILLEY, SARA 2009; MA, 1991, University of California (San Diego); PhD, 1994, University of California (San Diego) BLUMENTHAL, ROBERT M * 1997, (Emeritus); PhD, 1956, Cornell University
BROWNELL, FRANCIS H * 1987, (Emeritus); MS, 1947, Yale University; PhD, 1949, Princeton University
BUBE, KENNETH P. * 2008; MS, 1976, Stanford University; PhD, 1978, Stanford University
BURDZY, KRZYSZTOF * 2008; MA, 1979, Maria CurieSklodowska University; PhD, 1984, University of California

## (Berkeley)

BURKE, JAMES V. * 2008; PhD, 1983, University of Illinois CHEN, ZHEN-QING * 2008; MS, 1987, East China Normal University; PhD, 1992, Washington University

KELSEY, PHILIP A. 2012; MA, 1975, Harvard University
KLINE, RHONDA D. 2012; BS, 1977, Greenwille College
KORN, STEVEN 2012; MAc, 1996, University of Washington
NELSON, JENNIFER 2012; BM, 1983, University of Southern California

OLKA, CHRISTOPHER P 2012; MM, 1998, Juilliard School PASTERNACK, JONATHAN 2010; MM, 1999, University of Washington; DMA, 2004, University of Washington
SPICCIATI, SHANNON K. 2012; MAc, 1997, University of Washington

## Near Eastern Languages and Civilization

## Professors

CIRTAUTAS, ILSE D * 2003; PhD, 1958, University of Hamburg (Germany)
HEER, NICHOLAS L. * 1990, (Emeritus); PhD, 1955, Princeton University
NOEGEL, SCOTT B. 2006; MA, 1993, Cornell University; PhD, 1994, Cornell University
SOKOLOFF, NAOMI B. * 2003; MA, 1979, Princeton University; PhD, 1980, Princeton University
ZIADEH, FARHAT J * 1987, (Emeritus); LLB, 1940, University of London, UK

## Associate Professors

DEYOUNG, TERRI LYNN * 2003; MA, 1981, American University in Cairo; PhD, 1988, University of California (Berkeley)
ELKHAFAIFI, HUSSEIN M. 2009; MA, 1977, University of Utah; PhD, 1985, University of Utah
KURU, SELIM SIRRI 2007; MA, 1993, Bogazici University (Istanbul); PhD, 2000, Harvard University

## Lecturers

BADIEE, MARYAM 2012; MA, 1997, Islamic Azad University (Tehran)
BENSON, SUSAN 2008; MA, 1983, University of Utah
GABBAY, ALYSSA 2011; MFA, 2000, University of Pittsburgh; PhD, 2007, University of Chicago
MARTIN, GARY D. 2008; MA, 2003, University of Washington; PhD, 2007, University of Washington
ROMANO, TOVI 2010; BEd, 1990, Levinski College of Education (Israel)
SHAMS, SHAHRZAD 2012; MA, 1995, California State University, Fullerton
YUCEL, MELIKE 2012; MA, 2008, Cukurova University (Turkey); MA, 2011, Portland State University

## Philosophy

## Professors

BLAKE, MICHAEL I. 2012; PhD, 1998, Stanford University BONJOUR, LAURENCE A * 1984; PhD, 1969, Princeton University
CLATTERBAUGH, KENNETH C. * 1981; PhD, 1966, Indiana University
COBURN, ROBERT * 2008, (Emeritus); MA, 1958, Harvard University; PhD, 1958, Harvard University
COHEN, S MARC * 2008, (Emeritus); PhD, 1967, Cornell University
FINE, ARTHUR I 2001; MS, 1960, Illinois Institute of Technology; PhD, 1963, University of Chicago
GARDINER, STEPHEN M. 2011; MA, 1993, University of Colorado (Boulder); PhD, 1999, Cornell University
HANKINSON NELSON, LYNN 2003; PhD, 1987, Temple University
KEYT, DAVID * 2007; MA, 1953, Cornell University; PhD, 1955, Cornell University

MARKS, CHARLES * 2004, (Emeritus); PhD, 1972, Cornel University
MOORE, RONALD M * 2007; PhD, 1971, Columbia University
POTTER, KARL H * 1998, (Emeritus); MA, 1952, Harvard University; PhD, 1955, Harvard University

ROBERTS, JEAN VALERIE * 2011; MA, 1978, University of Pittsburgh; PhD, 1982, University of Pittsburgh
ROSENTHAL, MICHAEL 2012; MA, 1996, University of Chicago; PhD, 1996, University of Chicago
TALBOTT, WILLIAM J. 2005; PhD, 1976, Harvard University WYLIE, MARGARET ALISON 2006; MA, 1979, State Univer sity of New York (Binghamton); PhD, 1982, State University of New York (Binghamton)

## Associate Professors

GOERING, SARA L. 2011; MA, 1994, University of Colorado (Denver); PhD, 1998, University of Colorado (Denver)
MISHALANI, JAMES K * 1999, (Emeritus); MA, 1958, Brown University; PhD, 1961, Brown University
MOORE, ADAM DANIEL 2009; MA, 1993, Ohio State University; PhD, 1997, Ohio State University
WELLER, CASS J 2004; MA, 1981, University of Pittsburgh; PhD, 1983, University of Pittsburgh
WOODY, ANDREA I. 2004; PhD, 1996, University of Pittsburgh; PhD, 1997, University of Pittsburgh

## Assistant Professors

LEE, CAROLE J 2008; PhD, 2006, University of Michigan MANCHAK, JOHN B. 2009; PhD, 2009, University of California (Irvine)
SCHELLENBERG, INGRA R. 2007; MA, 2003, University of North Carolina, Chapel Hill; PhD, 2006, University of North Carolina, Chapel Hill

## Lecturers

BAKER, ANN MICHELLE 2011; MA, 1983, University of Washington; PhD, 1990, University of Washington
HARKEWICZ, LAURA J. 2012; MA, 2000, Michigan State University; PhD, 2010, University of California (San Diego) SHAPIRO, DAVID 2012; MA, 2001, University of Washington

## Physics

## Professors

ADELBERGER, ERIC G * 2007, (Emeritus); PhD, 1967, Cali fornia Institute of Technology
ANDREEV, ANTON 2011; MA, 1993, Johns Hopkins University; PhD, 1996, Massachusetts Institute of Technology
BAKER, MARSHALL * 2002, (Emeritus); PhD, 1958, Harvard University

BARDEEN, JAMES M * 2006, (Emeritus); PhD, 1965, California Institute of Technology
BERTSCH, GEORGE F * 1992; PhD, 1965, Princeton University
BODANSKY, DAVID . * 1994, (Emeritus); MA, 1948, Harvard University; PhD, 1950, Harvard University
BOULWARE, DAVID G * 2009, (Emeritus); MA, 1960, Harvard University; PhD, 1962, Harvard University
BOYNTON, PAUL * 2010, (Emeritus); PhD, 1967, Princeton University
BROWN, LOWELLS * 2001, (Emeritus); MA, 1958, Harvard University; PhD, 1961, Harvard University
BULGAC, AUREL * 1997; MSc, 1973, Leningrad State University; PhD, 1977, Leningrad Nuclear Physics Inst (Russia) BURNETT, THOMPSON H * 2012, (Emeritus); PhD, 1968, University of California (San Diego)
CHALOUPKA, VLADIMIR * 1981; PhD, 1975, University of Geneva (Switzerland)

COBDEN, DAVID 2011; MSc, 1987, St. Andrews College; PhD, 1992, Cambridge University (UK)
COOK, VICTOR * 2001, (Emeritus); PhD, 1962, University of California (Berkeley)
CRAMER, JOHN G * 2010, (Emeritus); MA, 1959, Rice University; PhD, 1961, Rice University
DEHMELT, HANS G * 2002, (Emeritus); MA, 1948, University of Gottingen (Germany); PhD, 1950, University of Gottingen (Germany)
DEN NIJS, MARCEL P * 1983; PhD, 1979, Katholieke University (Netherlands)
DOE, PETER J. * 2001, (Research); MSc, 1974, University of Durham (UK); PhD, 1977, University of Durham (UK)
ELLIOTT, STEVEN R * 2008, (Affiliate); MS, 1984, University of California (Irvine); PhD, 1987, University of California (Irvine)
ELLIS, STEPHEN D * 2001; PhD, 1971, California Institute of Technology
FORTSON, E. NORVAL * 2006, (Emeritus); PhD, 1964, Harvard University
GARCIA, ALEJANDRO 2002; PhD, 1991, University of Washington
GOUSSIOU, ANNA 2011; PhD, 1995, University of Wisconsin (Madison)
GUNDLACH, JENS 2005; PhD, 1990, University of Washington
HALPERN, ISAAC * 1994, (Emeritus); PhD, 1948, Massachusetts Institute of Technology
HECKEL, BLAYNE * 1987; MA, 1978, Harvard University; PhD, 1981, Harvard University
HENLEY, ERNEST M * 1995, (Emeritus); PhD, 1952, University of California (Berkeley)
HERON, PAULA 2007; MS, 1992, University of Ottawa (Canada); PhD, 1995, University of Western Ontario (Canada)
HERTZOG, DAVID 2010; MS, 1979, College of William and
Mary; PhD, 1983, College of William and Mary
HOGAN, CRAIG J. * 2008, (Affiliate); PhD, 1980, Cambridge University (UK)
INGALLS, ROBERT L * 2000, (Emeritus); MS, 1960, Carnegie Institute of Technology; PhD, 1962, Carnegie Institute of Technology
KAPLAN, DAVID B. * 2006; PhD, 1985, Harvard University KARCH, ANDREAS 2011; MA, 1996, University of Texas (Austin); PhD, 1998, Humboldt University (Germany)
LUBATTI, HENRY J * 1981; MS, 1963, University of Illinois; PhD, 1966, University of California (Berkeley)
MCDERMOTT, LILLIAN C * 1984; MA, 1956, Columbia University; PhD, 1959, Columbia University
MILLER, GERALD * 1982; PhD, 1972, Massachusetts Institute of Technology
MOCKETT, PAUL M * 2006, (Research Emeritus); PhD, 1965, Massachusetts Institute of Technology
NELSON, ANN E * 1999; MA, 1981, Harvard University; PhD, 1984, Harvard University
OLMSTEAD, MARJORIE A * 2000; MA, 1982, University of California (Berkeley); PhD, 1985, University of California (Berkeley)
PUFF, ROBERT D * 1962, (Emeritus); PhD, 1960, Harvard University
REDDY, SANJAY K. 2011; MSc, 1993, Indian Institute of Technology (India); PhD, 1998, State University of New York (Stony Brook)
REHR, JOHN J * 1985; PhD, 1972, Cornell University
RIEDEL, EBERHARD K. * 2001, (Affiliate); Diploma, 1964, University of Zu Koln (Germany); PhD, 1966, Technical University of Munich (Germany)
ROBERTSON, R. G. HAMISH * 1994; MA, 1965, Oxford University (UK); PhD, 1971, Mcmaster University (Canada)

ROSENBERG, LESLIE 2006; MS, 1980, San Francisco State; PhD, 1985, Stanford University
ROTHBERG, JOSEPH E * 2012, (Emeritus); MA, 1958, Columbia University; PhD, 1963, Columbia University
SAVAGE, MARTIN J. * 1999; MSc, 1985, University of Auckland (New Zealand); PhD, 1990, California Institute of Technology
SCHICK, MICHAEL * 1981; MS, 1964, Stanford University; PhD, 1967, Stanford University
SEIDLER, GERALD T. 2011; MA, 1991, University of Chicago; PhD, 1993, University of Chicago
SHAFFER, PETER S. 2008; PhD, 1993, University of Washington
SHARPE, STEPHEN R. * 1988; PhD, 1983, University of California (Berkeley)
SNOVER, KURT ALBERT * 2007, (Research Emeritus); MS, 1968, Stanford University; PhD, 1969, Stanford University
SORENSEN, LARRY B * 1989; MS, 1974, University of IIlinois; PhD, 1979, University of Illinois
SPIVAK, BORIS * 1991; PhD, 1978, Leningrad Polytechnic Institute (Russia)
STERN, EDWARD A * 2000, (Emeritus); PhD, 1955, California Institute of Technology
STUBBS, CHRISTOPHER * 2003, (Affiliate); MS, 1983, University of Washington; PhD, 1988, University of Washington
THOULESS, DAVID * 2003, (Emeritus); PhD, 1958, Cornell University
TRAINOR, THOMAS A * 2001, (Research); PhD, 1973, University of North Carolina
VAN DYCK, ROBERT S * 2011, (Emeritus); PhD, 1971, University of California (Berkeley)
VILCHES, OSCAR E * 2006, (Emeritus); PhD, 1966, National University of Cuyo (Argentina)
WATTS, GORDON T. 2008; PhD, 1995, University of Rochester
WEITKAMP, WILLIAM G. * 1995, (Research Emeritus); MS, 1961, University of Wisconsin (Madison); PhD, 1965, University of Wisconsin (Madison)
WILKERSON, JOHN F. * 2009, (Affiliate); MS, 1979, University of North Carolina; PhD, 1982, University of North Carolina
WILKES, RICHARD JEFFREY * 2001; MS, 1969, University of Wisconsin; PhD, 1974, University of Wisconsin (Madison) WILLIAMS, ROBERT W * 1990, (Emeritus); MA, 1943, Princeton University; PhD, 1948, Massachusetts Institute of Technology
YAFFE, LAURENCE G * 1988; MS, 1977, Princeton University; PhD, 1980, Princeton University

## Associate Professors

BLINOV, BORIS B. 2011; Diploma, 1995, Moscow State University (Russia); PhD, 2000, University of Michigan
ZHAO, TIANCHI * 2001, (Research); MS, 1984, Columbia University; PhD, 1986, Columbia University

## Assistant Professors

DETWILER, JASON 2012; PhD, 2005, Stanford University
GUPTA, SUBHADEEP 2006; PhD, 2003, Massachusetts Institute of Technology
HSU, SHIH-CHIEH 2012; MS, 2001, National Taiwan University; PhD, 2008, University of California (San Diego)
MORALES, MIGUEL 2008; PhD, 2002, University of California (Santa Cruz)
TOLICH, NIKOLAI 2007; MSc, 1999, University of Auckland (New Zealand); PhD, 2005, Stanford University
WIGGINS, PAUL A 2010; PhD, 2005, California Institute of Technology
XU, XIAODONG 2010; PhD, 2008, University of Michigan

## Senior Lecturers

PEDIGO, ROBERT D. 2012; MA, 1972, Stanford University; PhD, 1977, University of Texas (Austin)
PENGRA, DAVID B. 2007; MS, 1988, University of Washington; PhD, 1991, University of Washington
ROBERTSON, CHARLES E 2001, (Emeritus); MS, 1963, University of Washington; MS, 1981, University of Washington

## Lecturers

EFIMOV, VITALY 2002; PhD, 1966, Physico-Technical Institute (Russia)
GLADYCHEVA, SVETLANA 2010; PhD, 2000, University of Michigan; MFA, 2003, University of Michigan
LEINWEBER, ISAAC M. 2011; MS, 2010, University of Washington
MESSINA, DONNA L 2010; MEd, 1988, Seattle University
PAQUETTE, GLENN CURTIS 2012; PhD, 1993, University of Illinois (Urbana)
REID, JAMES H 2008; MSc, 1968, University of Sussex (UK); PhD, 1973, University of Calgary (Canada)
TOLICH, KAZUMI 2012; MS, 2006, Stanford University; PhD, 2008, Stanford University

## Political Science

## Professors

BENNETT, WALTER LANCE * 2003; MPhil, 1973, Yale University; PhD, 1974, Yale University
BRASS, PAUL R * 1999, (Emeritus); MA, 1959, University of Chicago; PhD, 1964, University of Chicago
CAPORASO, JAMES A * 1988; MA, 1965, Villanova University; PhD, 1968, University of Pennsylvania
FRAGA, LUIS R. 2007; MA, 1981, Rice University; PhD, 1984, Rice University
GILL, ANTHONY J * 2008; MA, 1989, University of California (Los Angeles); PhD, 1994, University of California (Los Angeles)
GOLDBERG, ELLIS * 2002; MA, 1970, University of California (Berkeley); PhD, 1983, University of California (Berkeley)
GORE, WILLIAM J * 1989, (Emeritus); MA, 1950, University of Southern California; PhD, 1952, University of Southern California
HARTSOCK, NANCY C.M * 2010, (Emeritus); MA, 1967, University of Chicago; PhD, 1972, University of Chicago
LEVI, MARGARET * 2012; PhD, 1974, Harvard University
MAJESKI, STEPHEN J * 2000; MA, 1975, University of New Hampshire; PhD, 1981, Indiana University
MAY, PETER J. * 1986; MPP, 1976, University of California (Berkeley); PhD, 1979, University of California (Berkeley)
MAYERFELD, JASON * 2011; MA, 1988, Princeton University; PhD, 1992, Princeton University
MC CANN, MICHAEL W * 2005; MA, 1976, University of California (Berkeley); PhD, 1983, University of California (Berkeley)
MC CRONE, DONALD J. * 2001, (Emeritus); PhD, 1966, University of North Carolina
MODELSKI, GEORGE * 1995, (Emeritus); PhD, 1954, University of London, UK
OLSON, DAVID J * 2005, (Emeritus); MA, 1966, University of Wisconsin; PhD, 1971, University of Wisconsin
PRAKASH, ASEEM 2010; MBA, 1988, Indian Institute of Management, India; PhD, 1997, Indiana University
RESHETAR, JOHN S * 1989, (Emeritus); MA, 1946, Harvard University; PhD, 1950, Harvard University
SMITH, MARK A. 2010; PhD, 1997, University of Minnesota

TAYLOR, MICHAEL JOHN * 2007, (Emeritus); MSc, 1965, University of Essex (UK); PhD, 1976, University of Essex (UK)
WILKERSON, JOHN D * 2012; MA, 1989, University of Rochester; PhD, 1991, University of Rochester

## Associate Professors

BARRETO, MATTHEW A 2009; MS, 2003, University of California (Irvine); PhD, 2005, University of California (Irvine) CICHOWSKI, RACHEL A 2007; MA, 1997, University of California (Irvine); PhD, 2001, University of California (Irvine) DI STEFANO, CHRISTINE * 1991; MA, 1984, University of Massachusetts; PhD, 1984, University of Massachusetts
KIER, ELIZABETH L. * 1998; MA, 1985, Columbia University; PhD, 1992, Cornell University
LITFIN, KAREN T * 1999; MA, 1978, University of Maryland; PhD, 1992, University of California (Los Angeles)
LOVELL, GEORGE I 2006; MA, 1990, University of North Carolina; PhD, 1997, University of Michigan
MERCER, JONATHAN L. * 1998; PhD, 1993, Columbia University
PARKER, CHRISTOPHER S 2010; MA, 1996, University of Chicago; PhD, 2001, University of Chicago
WHITING, SUSAN H. * 2005; PhD, 1995, University of Michigan

## Assistant Professors

ADOLPH, CHRISTOPHER A 2005; MA, 2000, Harvard University; PhD, 2005, Harvard University
MENALDO, VICTOR A. 2009; MA, 2003, Claremont Graduate School; PhD, 2009, Stanford University
MURAKAWA, NAOMI D 2005; MSc, 1997, London School of Economics (UK); PhD, 2004, Yale University
THORPE, REBECCA U 2010; PhD, 2009, University of Maryland

TURNER III, JACK 2007; MPhil, 2001, University of Cambridge (UK); PhD, 2006, Princeton University

## Lecturers

DATTA, ROBIN 2011; MA, 1988, University of Delaware; PhD, 1997, University of California (Santa Barbara)
POOL, HEATHER N 2012; MA, 2008, University of Washington; PhD, 2011, University of Washington
SINKLER, ADRIAN C. 2011; MA, 2004, University of Washington; PhD, 2011, University of Washington

## Psychology

## Professors

BAER, JOHN S. * 2006, (Research); MS, 1982, University of Oregon; PhD, 1986, University of Oregon
BARASH, DAVID P * 1981; MA, 1968, University of Wiscon$\sin$ (Madison); PhD, 1970, University of Wisconsin (Madison)

BASSOK, MIRIAM 2010; MA, 1978, Hebrew University (Israel); PhD, 1984, Hebrew University (Israel)
BECKER, JOSEPH * 1995, (Emeritus); MA, 1952, George Washington University; PhD, 1958, Duke University
BEECHER, MICHAEL D * 1981; MA, 1965, Boston University; PhD, 1970, Boston University
BERNSTEIN, ILENE L * 2011, (Emeritus); MA, 1967, Columbia University; PhD, 1972, University of California (Los Angeles)
BRENOWITZ, ELIOT A. * 1997; PhD, 1982, Cornell University
BUCK, STEVEN L. 1997; MA, 1974, University of California (San Diego); PhD, 1976, University of California (San Diego) CASSEDAY, JOHN H. * 2006, (Research Emeritus); MA, 1963, Indiana University; PhD, 1970, Indiana University

CAUCE, ANA MARI 2008; MS, 1979, Yale University; PhD, 1984, Yale University
COVEY, ELLEN * 2003; MS, 1976, University of Houston; PhD, 1980, Duke University
DAWSON, GERALDINE * 2008, (Emeritus); PhD, 1979, University of Washington
DIAZ, JAIME * 1982; MA, 1972, University of California (Los Angeles); PhD, 1975, University of California (Los Angeles) FIEDLER, FRED E * 1993, (Emeritus); PhD, 1949, University of Chicago
GEORGE, WILLIAM H * 2004; PhD, 1982, University of Washington
GOTTMAN, JOHN M * 2002, (Emeritus); MA, 1967, University of Wisconsin; PhD, 1971, University of Wisconsin
GREENWALD, ANTHONY G. * 1986; PhD, 1963, Harvard University

GURALNICK, MICHAEL J 1986; MS, 1964, Lehigh University; PhD, 1967, Lehigh University
HUNT, EARL B * 2001, (Emeritus); PhD, 1960, Yale University
KAHN, PETER H. 2012; MA, 1984, University of California (Berkeley); PhD, 1988, University of California (Berkeley)
KIM, JEANSOK J 2009; MA, 1989, University of California (Los Angeles); PhD, 1991, University of California (Los Angeles)
KOHLENBERG, ROBERT J. * 2004; MS, 1963, University of Wisconsin; PhD, 1968, University of California (Los Angeles)
KYES, RANDALL C. * 2007, (Research); MA, 1985, Bucknell University; PhD, 1989, University of Georgia
LENGUA, LILIANA J 2009; PhD, 1994, Arizona State University
LINEHAN, MARSHA M * 1982; MA, 1970, Loyola University; PhD, 1971, Loyola University
LOCKARD, JOAN S. * 2002, (Emeritus); MS, 1961, San Diego State College; PhD, 1963, University of Wisconsin (Madison)
LOFTUS, ELIZABETH F * 2002, (Affiliate); MA, 1967, Stanford University; PhD, 1970, Stanford University
LOFTUS, GEOFFREY R * 1987; PhD, 1971, Stanford University

MCMAHON, ROBERT J. * 2010, (Emeritus); MS, 1977, University of Georgia; PhD, 1979, University of Georgia
MELTZOFF, ANDREW N 1986; PhD, 1976, Oxford University (UK)
MIZUMORI, SHERI J 2003; MS, 1983, University of California (Berkeley); PhD, 1985, University of California (Berkeley)
OSTERHOUT, LEE E * 2007; MS, 1987, Tufts University; PhD, 1990, Tufts University
SACKETT, GENE P * 2002, (Emeritus); MA, 1961, Claremont Graduate School; PhD, 1963, Claremont Graduate School
SARASON, BARBARA R * 1998, (Research Emeritus); MA, 1954, Iowa State University; PhD, 1956, Indiana University SARASON, IRWIN G * 2002, (Emeritus); MA, 1953, University of Iowa; PhD, 1955, Indiana University
SAX, GILBERT * 1994, (Emeritus); MA, 1956, University of California (Los Angeles); PhD, 1958, University of Southern California
SHODA, YUICHI * 2007; PhD, 1990, Columbia University
SIMONI, JANE M 2006; MA, 1988, University of California (Los Angeles); PhD, 1990, University of California (Los Angeles)
SMITH, RONALD E * 1986; MA, 1964, Southern Illinois University; PhD, 1968, Southern Illinois University
SMOLL, FRANK L * 1981; MS, 1966, University of Wisconsin; PhD, 1970, University of Wisconsin

STONE, WENDY L 2010; MS, 1978, University of Miam (Florida); PhD, 1981, University of Miami (Florida)

## Associate Professors

BOYNTON, GEOFFREY M 2009; MA, 1989, University of California (Santa Barbara); PhD, 1994, University of California (Santa Barbara)
BROWN, JONATHON D * 1994; PhD, 1986, University of California (Los Angeles)
CORINA, DAVID P. * 2005, (Affiliate); MA, 1984, Gallaudet University; PhD, 1991, University of California (San Diego) DORSEY, SHANNON 2012; MS, 2003, University of Geor gia; PhD, 2003, University of Georgia
FINE, IONE 2010; MA, 1999, University of Rochester; PhD, 1999, University of Rochester
FLAHERTY, BRIAN P 2011; MS, 1997, Pennsylvania State University; PhD, 2003, Pennsylvania State University
HA, JAMES * 1999, (Research); MA, 1983, Wake Forest University; PhD, 1989, Colorado State University
KAISER, CHERYL R 2010; MA, 1999, University of Vermont; PhD, 2001, University of Vermont
KENNEY, NANCY J * 1982; MA, 1972, University of Virginia; PhD, 1974, University of Virginia
KERR, F BETH * 2011, (Emeritus); MA, 1973, University of Oregon; PhD, 1974, University of Oregon
MIYAMOTO, JOHN M. * 1991; MA, 1978, University of Mich igan; PhD, 1985, University of Michigan
MURRAY, SCOTT O. 2010; MA, 1997, University of Hawaii; PhD, 2002, University of California (Davis)
OLAVARRIA, JAIME F * 1996; MD, 1974, State University of Chile; PhD, 1984, University of California (Berkeley)
REPACHOLI, BETTY M 2008; MS, 1986, University of West Australia; PhD, 1996, University of California (Berkeley)
ROSE, RICHARD M * 1991, (Emeritus); MA, 1961, University of Pennsylvania; PhD, 1964, University of Pennsylvania SISNEROS, JOSEPH A. 2010; MA, 1989, California State University, Long Beach; PhD, 1999, Florida Institute of Technology
SOMMERVILLE, JESSICA A 2009; MA, 2000, University of Chicago; PhD, 2002, University of Chicago

ZOELLNER, LORI A 2004; MA, 1992, University of California (Los Angeles); PhD, 1997, University of California (Los Angeles)

## Assistant Professors

CHERYAN, SAPNA 2007; PhD, 2007, Stanford University JOSLYN, SUSAN L. 2010; MS, 1994, University of Washington; PhD, 1995, University of Washington

KING, KEVIN M 2007; MA, 2002, Arizona State University; PhD, 2007, Arizona State University
LEU, JANXIN 2006; MA, 1997, Stanford University; PhD, 2004, University of Michigan
PRAT, CHANTEL 2010; MA, 2001, University of California (San Diego); PhD, 2004, University of California (San Diego)

## Senior Lecturers

CHUN, DEBORAH Y 2012; MS, 1990, University of Washington; PhD, 1993, University of Washington
FAGAN, COREY N. * 2001; MA, 1982, University of Massachusetts; PhD, 1988, University of Massachusetts
MC DERMOTT, LOIS J. 2009; PhD, 1979, University of Chicago
PASSER, MICHAEL W * 2000; MA, 1972, University of California (Los Angeles); PhD, 1977, University of California (Los Angeles)

## Lecturers

LITTLE, LAURA M. 2011; MS, 1993, University of New Mexico; PhD, 1998, University of New Mexico
LOESCHE, PATRICIA 2009; MS, 1975, East Carolina University; PhD, 1991, University of Washington

MC LAUGHLIN, JUDITH L 2012; PhD, 1999, University of Washington
NELSON, DANA C 2012; PhD, 2005, University of Washington
PENNER, MARSHA R 2010; MSc, 2001, Dalhousie University (Canada); PhD, 2008, University of Arizona
VOORHIES, ANN C 2012; PhD, 2006, University of Washington

## Romance Languages and Literature

## Professors

ANDERSON, FARRIS FURMAN * 2001, (Emeritus); MA, 1962, Duke University; PhD, 1968, University of Wisconsin GEIST, ANTHONY L 2002; MA, 1969, University of California (Berkeley); PhD, 1978, University of California (Berkeley) O’HARA, EDGAR * 2001; MA, 1985, Catholic University; PhD, 1989, University of Texas

## Associate Professors

COLLINS, DOUGLAS P * 1986; MA, 1972, University of Missouri; PhD, 1978, University of Missouri
DALE, ROBERT C * 1991, (Emeritus); MA, 1960, University of Wisconsin
DELCOURT, DENYSE * 1997; MA, 1980, University of Montreal (Canada); PhD, 1987, University of Montreal (Canada) GILBERT, DONALD W. 2008; MA, 1991, University of California (Berkeley); PhD, 1997, University of California (Berkeley)
MACKENZIE, LOUISA 2010; MA, 1997, University of California (Berkeley); PhD, 2001, University of California (Berkeley)
MERCER, LEIGH K. 2012; MA, 1998, University of Texas (Austin); PhD, 2004, Boston University
PETERSEN, SUZANNE HELEN * 1982; MA, 1967, University of Wisconsin; PhD, 1976, University of Wisconsin (Madison) RAFTERY, ANA M 2012; MA, 1986, Universidad Autonoma de Madrid; PhD, 1991, University of California (Berkeley)
SBRAGIA, ALBERT J * 2008; MA, 1983, University of California (Berkeley); PhD, 1988, University of California (Berkeley)
SHIPLEY, GEORGE A * 2002, (Emeritus); MA, 1962, Harvard University; PhD, 1967, Harvard University
TURNOVSKY, GEOFFREY 2010; MA, 1995, Columbia University; PhD, 2001, Columbia University
WATTS, RICHARD HENRY 2009; MPhil, 1994, Yale University; PhD, 1998, Yale University

## Assistant Professors

ARDUINI, BEATRICE 2012; MA, 2005, Indiana University; PhD, 2008, Indiana University
FERNANDEZ DOBAO, ANA M. 2007; MA, 1999, University of Santiago, Spain; PhD, 2005, University of Santiago, Spain GAYLARD, SUSAN L 2005; MA, 1999, University of California (Berkeley); PhD, 2004, University of California (Berkeley)

## Senior Lecturers

GILLMAN, MARIA 2012; MA, 1986, Oregon State University LEPORACE, GIUSEPPE 2002; MA, 1989, University of Washington
MAZZOLA, CLAUDIO 2005; MA, 1982, University of Washington; PhD, 1986, University of Washington
MEYER, HEDWIGE M 2002; MA, 1992, University of Washington
VILAVELLA, HELENE 2002; MA, 1986, University of Washington; PhD, 1996, University of Washington

YOWELL, DONNA LYNNE * 2011, (Emeritus); MA, 1982, University of California (Berkeley); PhD, 1987, University of California (Berkeley)

## Lecturers

BARABOI, OTILIA G. 2012; MA, 2003, University of Washington; PhD, 2010, University of Washington
BENSADON, LEON M. 2001; MA, 1991, University of Washington
BODDEN, RODNEY V. 1996, (Emeritus); MA, 1961, University of Toronto (Canada); PhD, 1969, University of Wiscon$\sin$ (Madison)
FOX, JOAN H. 1999; MA, 1973, University of British Columbia (Canada)
GONZALEZ, JORGE 2001; MM, 1986, University of Wiscon$\sin$

KENNEDY, DONALLY S 2009; MA, 1988, University of Washington
MARKLEY, PHILLIP L. 2012; MA, 1984, Ohio State University; PhD, 1994, University of Texas (Austin)
MATTHIES, R. JOHN 2011; MA, 1998, University of Washington; PhD, 2005, University of Washington
MITCHELL, WILLIAM C. 2012; MA, 2005, University of Washington; PhD, 2011, University of Washington
RANEDA-CUARTERO, I. 2001; MA, 1994, University of Wisconsin (Madison)
TARADEL, RUGGERO M. 2009; BA, 1992, University of Rome (Italy)
TASSONE, GIUSEPPE 2006; BA, 1997, University of Washington
TATTA, SABRINA 2007; MA, 1997, University of Washington WITTE, ANNA B. 2011; MA, 1986, University of Texas (Austin); PhD, 1991, University of Texas (Austin)
YANCI, ESTEFANIA 2007; MA, 1992, University of Washington

## Scandinavian Studies

## Professors

GAVEL ADAMS, ANN-CHARLOTTE * 2005; MA, 1975, Linkoping University (Sweden); PhD, 1990, University of Washington
INGEBRITSEN, CHRISTINE 2007; MA, 1986, Columbia University; PhD, 1993, Cornell University
LEIREN, TERJE I * 2002; MA, 1970, California State University, campus unspecified; PhD, 1978, North Texas State University
SJAVIK, JAN * 2006; MA, 1976, Harvard University; PhD, 1979, Harvard University
STEENE, BIRGITTA * 1990, (Emeritus); PhD, 1960, University of Washington; PhD, 1966, University of Uppsala (Sweden)

## Associate Professors

NESTINGEN, ANDREW 2007; MA, 1999, University of Washington; PhD, 2001, University of Washington
SMIDCHENS, GUNTIS I. 2012; MA, 1988, Indiana University; PhD, 1996, Indiana University
STECHER, MARIANNE T * 1997; MA, 1981, University of Washington; PhD, 1990, University of California (Berkeley)

## Senior Lecturer

DUBOIS, IA G 2001; MA, 1981, University of California (Los Angeles); PhD, 1991, University of Washington

## Lecturers

JENNER, LARS B. 2012; MA, 1992, University of Washington; PhD, 1999, University of Pennsylvania
KORYNTA, KYLE ANDREW 2012; MA, 2008, University of Washington; PhD, 2008, University of Washington

## Slavic Languages and Literatures

## Professors

AUGEROT, JAMES E. 2011, (Emeritus); MA, 1959, New Mexico Highlands University; PhD, 1968, University of Washington
DIMENT, GALYA * 2002; MA, 1978, Claremont Graduate School; PhD, 1987, University of California (Berkeley)
DZIWIREK, KATARZYNA A. * 2012; MA, 1987, University of California (San Diego); PhD, 1991, University of California (San Diego)
KAPETANIC, DAVOR * 1993, (Emeritus); MA, 1954, University of Zagreb (Yugoslavia); PhD, 1972, University of Zagreb (Yugoslavia)
KRAMER, KARL D * 1999, (Emeritus); MA, 1957, University of Washington; PhD, 1964, University of Washington

## Associate Professors

ALANIZ, JOSE 2009; PhD, 2003, University of California (Berkeley)
COATS, HERBERT S * 2001, (Emeritus); MA, 1964, Fordham University; PhD, 1970, University of Illinois
CRNKOVIC, GORDANA * 2001; MA, 1991, Stanford University; PhD, 1993, Stanford University
HENRY, BARBARA J 2009; MA, 1990, University of London, UK; DPhil, 1997, Oxford University (UK)
WEST, JAMES D * 2001; MA, 1969, University of Cambridge (UK); PhD, 1970, University of Cambridge (UK)

## Senior Lecturers

BELIC, BOJAN 2010; MA, 2000, University of Illinois
HOLDSWORTH, NORA 1999, (Emeritus); BA, 1965, University of Washington
POLACK, ZOYA M 2001; MA, 1975, University of Washington

## Lecturers

BASIC, DENIS 2012; MA, 1992, University of Vienna, Austria; PhD, 2006, University of Washington
CHILDS, MARY 2012; MA, 1984, University of California (Berkeley)
LOMINADZE, AIDA 2012; PhD, 1982, A.M. Gorky Inst. of World Lit (Russia)
MANETTI, CHRISTINA 2012; MA, 1993, University of Washington; PhD, 1998, University of Washington
SOLDANOVA, JAROSLAVA M. 2001; MA, 1977, Palackeho University, Czech Republic
ZAITSEVA, VALENTINA A 2011; MA, 1988, Harvard University; PhD, 1992, Harvard University

## Sociology

## Professors

BORGATTA, EDGAR F * 1994, (Emeritus); MA, 1949, New York University; PhD, 1952, New York University
BURSTEIN, PAUL * 1985; MA, 1971, Harvard University; PhD, 1974, Harvard University
CAMPBELL, FREDERICK L * 2001, (Emeritus); MA, 1962, University of Michigan; PhD, 1967, University of Michigan
COSTNER, HERBERT L * 1996, (Emeritus); MA, 1956, Indiana University; PhD, 1960, Indiana University
CROWDER, KYLE 2011; PhD, 1997, State University of New York (Albany)
CRUTCHFIELD, ROBERT D * 2004; MA, 1976, Vanderbilt University; PhD, 1980, Vanderbilt University
GROSS, EDWARD * 1989, (Emeritus); MA, 1945, University of Toronto (Canada); PhD, 1949, University of Chicago

GUEST, AVERY * 2003, (Emeritus); MA, 1967, University of Wisconsin (Madison); PhD, 1970, University of Wisconsin (Madison)
HECHTER, MICHAEL N. * 2005, (Emeritus); PhD, 1972, Columbia University
HIRSCHMAN, CHARLES * 2012; MA, 1969, University of Wisconsin (Madison); PhD, 1972, University of Wisconsin (Madison)

HOWARD, JUDITH A * 1988; MA, 1977, University of Oregon; PhD, 1982, University of Wisconsin (Madison)
KISER, EDGAR VANCE * 2004; MA, 1980, University of Arizona; PhD, 1987, University of Arizona

MATSUEDA, ROSS L. * 1999; MA, 1980, University of California (Santa Barbara); PhD, 1984, University of California (Santa Barbara)
MIYAMOTO, S FRANK 1982, (Emeritus); MA, 1938, University of Washington; PhD, 1950, University of Chicago
MORRIS, WANDA MARTINA 2003; MA, 1986, University of Chicago; PhD, 1989, University of Chicago
PETTIT, ELIZABETH M. 2011; MA, 1997, Princeton University; PhD, 1999, Princeton University
PFAFF, STEVEN J. * 2012; MA, 1995, University of North Carolina; PhD, 1999, New York University
RESKIN, BARBARA F 2010, (Emeritus); MA, 1970, University of Washington; PhD, 1973, University of Washington
SCHMITT, DAVID R * 2001, (Emeritus); MA, 1962, Washington University; PhD, 1963, Washington University
SCHWARTZ, PEPPER J * 1996; MPhil, 1970, Yale University; PhD, 1974, Yale University
SCOTT, JOSEPH W * 2003, (Emeritus); MA, 1959, Indiana University; PhD, 1963, Indiana University

TOLNAY, STEWART E 2000; MA, 1975, University of Washington; PhD, 1981, University of Washington
VAN DEN BERGHE, PIERRE * 1998, (Emeritus); MA, 1959, Harvard University; PhD, 1960, Harvard University
WAGER, L WESLEY * 1993, (Emeritus); MA, 1952, University of Washington; PhD, 1959, University of Chicago
WEIS, JOSEPH G * 1987; DCrim, 1974, University of California (Berkeley)

## Associate Professors

BRINES, JULIE E. * 2000; MA, 1985, Harvard University; PhD, 1990, Harvard University

CLARK, SAMUEL J 2011; MA, 1995, University of Pennsylvania; PhD, 2001, University of Pennsylvania
HARRIS, ALEXES 2011; MA, 1999, University of California (Los Angeles); PhD, 2002, University of California (Los Angeles)
ROSENFELD, JAKE H 2012; MA, 2004, Princeton University; PhD, 2007, Princeton University
STOVEL, KATHERINE W. 2005; MA, 1994, University of North Carolina; PhD, 1999, University of North Carolina

## Assistant Professors

DECHTER, AIMEE 2009; MA, 1987, University of Pennsylvania; PhD, 1991, University of Pennsylvania
LEE, HEDWIG E 2009; MA, 2005, University of North Carolina; PhD, 2009, University of North Carolina
QUINN, SARAH L 2010; MA, 2006, University of California (Berkeley); PhD, 2010, University of California (Berkeley)

## Senior Lecturer

PITCHFORD, SUSAN * 2004; MA, 1990, University of Washington; PhD, 1994, University of Washington

## Speech and Hearing Sciences

## Professors

COGGINS, TRUMAN E * 2007; MS, 1971, University of Redlands; PhD, 1976, University of Wisconsin (Madison)
FOLSOM, RICHARD C * 1987; MS, 1970, Portland State University; PhD, 1979, University of Washington
KUHL, PATRICIA K 1981; MA, 1971, University of Minnesota; PhD, 1973, University of Minnesota
MINIFIE, FRED D * 1998, (Emeritus); MA, 1962, University of Iowa; PhD, 1963, University of Iowa

OLSWANG, LESLEY B. * 2011, (Emeritus); MA, 1971, University of Illinois; PhD, 1978, University of Washington
PRINS, DAVID * 1992, (Emeritus); MA, 1957, University of Michigan; PhD, 1961, University of Michigan
STOEL-GAMMON, CAROL * 2009, (Emeritus); MA, 1968, Stanford University; PhD, 1974, Stanford University
TREMBLAY, KELLY L 2011; MSc, 1987, Dalhousie University (Canada); PhD, 1998, Northwestern University
WERNER, LYNNE A. * 1999; MA, 1980, Loyola University; PhD, 1980, Loyola University

WILSON, WESLEY * 2001, (Emeritus); MA, 1961, University of Redlands; PhD, 1969, University of Washington

## Associate Professors

BIERER, JULIE A 2011; PhD, 2001, University of Michigan; MS, 2003, San Francisco State
BURNS, EDWARD M. * 2003, (Emeritus); MS, 1966, University of Arizona; PhD, 1977, University of Minnesota
CARPENTER, ROBERT L * 2007, (Emeritus); MA, 1965, Northwestern University; PhD, 1969, Northwestern University
COOKER, HARRY S * 1993, (Emeritus); MA, 1961, University of Iowa; PhD, 1963, University of Iowa
EADIE, TANYA L 2009; MS, 1999, University of Western Ontario (Canada); PhD, 2003, University of Western Ontario (Canada)
KENDALL, DIANE L. 2010; MA, 1989, California State University, Fullerton; PhD, 1999, University of Pittsburgh
MAX, LUDO 2009; MA, 1992, Katholieke Universiteit Leuven (Belgium); PhD, 2000, Kent State University

SPENCER, KRISTIE A. 2009; MS, 1992, University of Pittsburgh; PhD, 2003, University of Washington
STECKER, GEORGE C 2011; MA, 1998, University of California (Berkeley); PhD, 2000, University of California (Berkeley)

## Assistant Professors

LEE, ADRIAN K 2011; ScD, 2007, Massachusetts Institute of Technology
SULLIVAN, JESSICA R 2010; MS, 2000, Lamar University; PhD, 2010, University of Texas (Dallas)

## Senior Lecturers

ALARCON, NANCY B. 2001; MS, 1981, University of Wisconsin (Madison)
MILLER, ROBERT M 2011; MA, 1969, University of Redlands; PhD, 1976, University of Washington

## Lecturers

ANDERSON, ELIZABETH S 2012; MA, 1980, University of Minnesota; PhD, 2011, University of Minnesota

ANDERSON, SUSAN J 2007; MA, 1989, University of Northern Colorado; AD, 2005, Pennsylvania College of Optometry
DUNNELL, JANET J 2012; MS, 1990, University of Washington
GRAY, JENNIFER 2011; BS, 1976, University of Washington HARNEY, MARTHA L. 2011; MS, 1984, University of Washington

ILLICH, LISA L 2008; MS, 1992, University of Montana NEVDAHL, MARTIN 2011; MS, 1984, University of Washington
SILKES, JOANN P. 2012; MS, 1990, University of Wisconsin; PhD, 2009, University of Washington
SNOW, LAURA A. 2007; MA, 1996, University of Washington; PhD, 2007, University of Washington
THORNE, JOHN C 2011; MS, 1997, University of New Mexico; PhD, 2010, University of Washington

## Statistics

## Professors

BOOKSTEIN, FRED L 2005; MA, 1971, Harvard University; PhD, 1977, University of Michigan
DRTON, MATHIAS 2012; Diploma, 2000, University of Augsburg (Germany); PhD, 2004, University of Washington
GUTTORP, PETER * 1988; MA, 1976, University of California (Berkeley); PhD, 1980, University of California (Berkeley)
HOFF, PETER D 2011; MS, 1994, University of Wisconsin; PhD, 2000, University of Wisconsin
PERCIVAL, DONALD B 2009; MA, 1976, George Washington University; PhD, 1983, University of Washington

PERLMAN, MICHAEL D * 1982; MS, 1965, Stanford University; PhD, 1967, Stanford University
RAFTERY, ADRIAN ELMES * 1986; MSc, 1977, Trinity College (Ireland); DOCT, 1980, Universite De Paris Vi (France) RICHARDSON, THOMAS S. * 2007; MS, 1995, Carnegie Mellon University; PhD, 1996, Carnegie Mellon University
SAMPSON, PAUL D * 2001, (Research); MS, 1974, Brown University; PhD, 1979, University of Michigan
SCHOLZ, FRIEDRICH-WILHELM * 2010, (Affiliate); Diploma, 1966, University of Gottingen (Germany); PhD, 1971, University of California (Berkeley)
SHORACK, GALEN * 1981; MA, 1962, University of Oregon; PhD, 1965, Stanford University
STUETZLE, WERNER * 1984; PhD, 1977, Swiss Federal In stitute of Technology
THOMPSON, ELIZABETH A * 1985; MA, 1974, University of Cambridge (UK); PhD, 1974, Cambridge University (UK)
WAKEFIELD, JONATHAN C * 2002; PhD, 1992, University of Nottingham (UK)
WELLNER, JON A * 2003; PhD, 1975, University of Washington
ZEH, JUDITH * 2008, (Research Emeritus); MS, 1969, University of Washington; PhD, 1979, University of Washington

## Associate Professors

DOBRA, ADRIAN 2012; MS, 1996, University of Bucharest (Romania); PhD, 2001, Carnegie Mellon University
MEILA-PREDOVICIU, MARINA 2007; MS, 1985, University Politehnica of Bucharest (Romania); PhD, 1999, Massa chusetts Institute of Technology

## Assistant Professors

FOX, EMILY 2012; MEng, 2005, Massachusetts Institute of Technology; PhD, 2009, Massachusetts Institute of Technology
MCCORMICK, TYLER HARRIS 2011; MPhil, 2010, Columbia University; PhD, 2011, Columbia University
MININ, VOLODYMYR 2007; MS, 2004, University of California (Los Angeles); PhD, 2007, University of California (Los Angeles)
NARAYANAN, HARIHARAN 2012; MS, 2006, University of Chicago (Illinois); PhD, 2009, University of Chicago (Illinois)

## Lecturers

CARDOSO, TAMRE 2011; MS, 1985, California State University, Long Beach; PhD, 2004, University of Washington

## 600 COLLEGE OF ARTS AND SCIENCES

GROVE, RANJINI 2011; MS, 1993, Cornell University; PhD, 1995, Cornell University
KLIMOVA, ANNA 2012; PhD, 1993, St. Petersburg State University (Russia); PhD, 2012, University of Washington MARZBAN, CAREN 2008; PhD, 1988, University of North Carolina, Chapel Hill

MORITA, JUNE G 2006; MA, 1978, University of California
(Berkeley); PhD, 1984, University of California (Berkeley)

## College of Built Environments

## Architecture

## Professors

BADANES, STEVEN P. * 2006; MArch, 1971, Princeton University
BONSTEEL, DAVID 1988, (Emeritus); MArch, 1964, University of Washington
BOSWORTH, THOMAS L 2000, (Emeritus); MA, 1954, Oberlin College; MArch, 1960, Yale University

SASANOFF, ROBERT * 1997, (Emeritus); MCP, 1968, University of California (Berkeley)

## Assistant Professors

CORSER, ROBERT J 2008; MArch, 1993, University of Virginia; MDes, 2003, Harvard University
HUPPERT, ANN C 2011; MA, 1992, University of Virginia; PhD, 2001, University of Virginia
IAROCCI, LOUISA M 2004; MA, 1994, Washington University; PhD, 2003, Boston University
MERLINO, KATHRYN ROGERS 2006; MArch, 1999, University of Virginia
PROKSCH, GUNDULA 2008; DipArch, 1997, Tech University of Braunschweig(Germany); MArch, 2000, Cornell University
SIMONEN, KATHRINA L 2012; MS, 1991, University of California (Berkeley); MArch, 1992, University of California (Berkeley)

## Senior Lecturers

GOLDEN, ELIZABETH M 2012; BArch, 1992, University of Arkansas
NICHOLLS, JAMES KEITH 2008; BArch, 1986, University of British Columbia (Canada)
ZUBERBUHLER, DOUGLAS 2009, (Emeritus); MArch, 1968, University of Washington

## Lecturers

BLANCO, LUCRECIA 2012; MFA, 1999, University of Illinois BYRNE, PATRICK A 2012; MArch, 1995, University of Virginia
DEE, JENNIFER 2001; MArch, 1984, University of Washington
GRANT, ANJALI 2012; MArch, 1996, University of Washington

GREGGA, KAILIN 2012; MArch, 2007, Parsons School of Design
HUDACEK, DAVID J 2012; MArch, 1988, University of Washington
HUDAK, JEFFREY P 2011; MArch, 2011, University of Washington
STAMETS, JOHN WILLIAM 2008; BA, 1971, Yale University
STETTLER, DANIEL D 2012; MA, 1993, University of Oregon SWAIN, JUDITH D. 2012; MArch, 1987, University of Oregon

THOMAS, KAREN H 2012; BArch, 1985, University of Texas (Austin)
WEST, PENELOPE 2012; MArch, 2001, University of Washington

## Construction Management

## Professors

DANIALI, SAEED 1997; MSCE, 1972, Strasbourg School for Water and Environment Engineering (France); PhD, 1975, University of Lille (France)
SCHAUFELBERGER, JOHN E. 2008; MSCE, 1970, University of Illinois; PhD, 1971, University of Illinois

## Associate Professors

ABDEL AZIZ, AHMED 2009; MSc, 1992, Zagazig University (Egypt); PhD, 2000, University of British Columbia (Canada) DOSSICK, CARRIE S 2010; MS, 1998, Columbia University; PhD, 2001, Columbia University
GOLDBLATT, STEVEN M 2009, (Emeritus); JD, 1977, Golden Gate University
KIM, YONG-WOO 2011; MS, 1999, University of California (Berkeley); PhD, 2002, University of California (Berkeley)
NEMATI, KAMRAN M. 2002; MCP, 1989, University of California (Berkeley); PhD, 1994, University of California (Berkeley)
TORRENCE, GERARD R 1988, (Emeritus); MS, 1950, Massachusetts Institute of Technology

## Assistant Professors

EL-ANWAR, OMAR HOSSAM 2009; MSc, 2005, Cairo University (Egypt); PhD, 2009, University of Illinois (Urbana)
LIN, KEN-YU 2008; MS, 1999, National Taiwan University; PhD, 2005, University of Illinois (Urbana)
MIGLIACCIO, GIOVANNI C 2010; MS, 2007, University of Texas (Austin); PhD, 2007, University of Texas (Austin)

## Lecturers

HOLM, ARNOLD L. 2010; BS, 1980, University of Washington
NYROP, KARIN 2012; JD, 1984, University of Puget Sound

## Landscape Architecture

## Professors

BUCHANAN, ROBERT T * 1990, (Emeritus); MLA, 1956, Harvard University
HAAG, RICHARD 1997, (Emeritus); MLArch, 1952, Harvard University
SCHAUMAN, SALLY * 2000, (Emeritus); MS, 1971, University of Michigan
WINTERBOTTOM, DANIEL M. * 2011; MLA, 1988, Harvard University

## Associate Professors

HORNER, RICHARD R. * 2011, (Research Emeritus); MD, 1966, University of Pennsylvania; PhD, 1978, University of Washington
HOU, JEFFREY 2007; MArch, 1994, University of California (Berkeley); PhD, 2001, University of California (Berkeley)
JOHNSON, JULIE M 2003; MCP, 1988, Massachusetts Institute of Technology
MANZO, LYNNE C 2007; MA, 1988, City University of New York; PhD, 1994, City University of New York
ROBERTSON, IAIN M * 2002; MLA, 1975, University of Pennsylvania
ROTTLE, NANCY D 2007; MLA, 1987, University of Oregon

WAY, THAISA 2010; MArch, 1991, University of Virginia; PhD, 2005, Cornell University

## Assistant Professors

SPENCER, BENJAMIN R 2008; MLA, 2004, University of Virginia
YOCOM, KENNETH P 2008; MLA, 2002, University of Washington; PhD, 2007, University of Washington

## Senior Lecturer

SMITH, LUANNE 2010; MLA, 1984, University of Oregon

## Lecturers

GERICH, JOHN B 2012; MArch, 2004, University of Virginia; MLArch, 2004, University of Virginia
PARRETT, JULIE L 2012; MLA, 1997, University of Pennsylvania
UMBANHOWAR, ELIZABETH A 2012; MLA, 2007, University of Washington

## Urban Design and <br> Planning

## Professors

ALBERTI, MARINA * 2008; PhD, 1992, Massachusetts Institute of Technology
BELL, EARL J * 1999, (Emeritus); PhD, 1965, University of California (Berkeley)
BLANCO, HILDA J. * 2008, (Emeritus); MRP, 1984, University of California (Berkeley); PhD, 1989, University of California (Berkeley)
KASPRISIN, RONALD J. * 2011; MUP, 1968, University of Washington
LUDWIG, RICHARD L * 2002, (Emeritus); MUP, 1965, University of Washington; PhD, 1971, University of Pittsburgh MILLER, DONALD H * 1981; MCP, 1960, University of California (Berkeley); PhD, 1972, University of California (Berkeley)
MUGERAUER, ROBERT 2007; PhD, 1973, University of Texas (Austin)
SHEN, QING 2009; MA, 1986, University of British Columbia (Canada); PhD, 1993, University of California (Berkeley)
UNTERMANN, RICHARD K 1997, (Emeritus); MLA, 1967, Harvard University
VERNEZ-MOUDON, ANNE * 1996; DSc, 1987, Ecole Polytechnique Federale De Lausanne

## Associate Professors

ABRAMSON, DANIEL B 2008; MCP, 1992, Massachusetts Institute of Technology; PhD, 1998, Tsinghua University (China)
BAE, CHRISTINE 2003; MRP, 1986, State University of New York (Albany); PhD, 1994, University of Southern California BORN, BRANDEN M 2010; MS, 1998, University of Wiscon$\sin$ (Madison); PhD, 2003, University of Wisconsin (Madison)
DELISLE, JAMES R 2002; MS, 1976, University of Wiscon$\sin$ (Madison); PhD, 1981, University of Wisconsin (Madison)
PURCELL, MARK H. 2006; MA, 1995, University of California (Los Angeles); PhD, 1998, University of California (Los Angeles)
ROLFE, GEORGE R 1987; MArch, 1968, University of Pennsylvania; MCP, 1968, University of Pennsylvania
RYAN, DENNIS M * 2010, (Emeritus); MCP, 1968, University of Pennsylvania; PhD, 1976, University of Pennsylvania WESTERLUND, FRANK * 2010, (Emeritus); MUP, 1971, University of Washington; PhD, 1977, University of Washington

## Assistant Professors

BITTER, CHRISTOPHER 2009; MA, 1996, University of Arizona; PhD, 2008, University of Arizona

CHALANA, MANISH 2008; MArch, 1995, School of Planning and Architecture (India; MLArch, 1999, Pennsylvania State University
WHITTINGTON, JANICE M 2008; MA, 1993, Calif Polytechnic State (San Luis Obis); PhD, 2008, University of California (Berkeley)

## Senior Lecturers

AMSTER, GLENN J 2011; JD, 1978, Washington University CAMPBELL, CHRISTOPHER D 2011; MA, 1994, University of California (Los Angeles); PhD, 2002, University of California (Los Angeles)
FREITAG, ROBERT C 2011; MUP, 1969, University of Washington

## Lecturers

CRELLIN, GLENN E 2012; MA, 1974, University of Maryland O'CONNOR, STEPHEN H 2012; PhD, 2011, Rutgers University

## Foster School of Business

## Accounting

## Professors

BOWEN, ROBERT M * 2012, (Emeritus); MBA, 1971, Washington University; PhD, 1978, Stanford University
BURGSTAHLER, DAVID C * 2005; PhD, 1981, University of lowa
DUKES, ROLAND E * 2005; MBA, 1970, Stanford University; PhD, 1974, Stanford University
HEATH, LOYD C * 1998, (Emeritus); MBA, 1953, Northwestern University; PhD, 1965, University of California (Berkeley)
JIAMBALVO, JAMES * 2006; MAS, 1973, University of Illinois; PhD, 1977, Ohio State University
JOLLINEAU, SUSAN JANE 2012, (Emeritus); MBA, 1977, University of Alberta, Canada; PhD, 1992, Duke University MATSUMOTO, DAWN A. 2012; PhD, 1998, University of Washington

MUELLER, GERHARD G * 1996, (Emeritus); MBA, 1957, University of California (Berkeley); PhD, 1961, University of California (Berkeley)

NOREEN, ERIC W * 2001, (Emeritus); MBA, 1974, Stanford University; PhD, 1976, Stanford University
RAMANATHAN, K V * 2006, (Emeritus); MBA, 1962, Northwestern University; PhD, 1969, Northwestern University
SEFCIK, STEPHAN E * 2005; MAS, 1976, University of IIlinois; PhD, 1983, University of Illinois
SHEVLIN, TERRENCE J 2012, (Emeritus); MA, 1981, Monash University (Australia); PhD, 1986, Stanford University
SUNDEM, GARY L * 2008, (Emeritus); MBA, 1969, Stanford University; PhD, 1971, Stanford University

## Associate Professors

GE, WEILI 2011; MBA, 2001, Washington University; PhD, 2006, University of Michigan
HODGE, FRANK D 2007; MBA, 1996, Indiana University; PhD, 2000, Indiana University
MCVAY, SARAH E 2012; PhD, 2004, University of Michigan, Ann Arbor
SHORES, DONNA J * 1993; MS, 1980, University of Wisconsin (Madison); PhD, 1986, Stanford University

SOLIMAN, MARK T 2007; MS, 1999, Seattle University; PhD, 2003, University of Michigan

## Assistant Professors

CURTIS, ASHER B 2012; PhD, 2007, University of New S. Wales (Australia)
TANLU, LLOYD J 2009; MA, 1999, Brandeis University; PhD, 2009, Harvard University
THORNOCK, JACOB R 2010; MAcc, 2006, Brigham Young University; PhD, 2010, University of North Carolina

## Senior Lecturers

GILLICK, JAMES V. 2012; BBA, 1957, Manhattan College RESLER, WILLIAM M 2005; JD, 1972, University of Washington; LLM, 1973, New York University
RICE, STEVEN J 2012, (Emeritus); MS, 1971, Oklahoma State University; PhD, 1974, University of Texas (Austin)
WELLS, WILLIAM L. 2005; MBA, 1973, Syracuse University; MPAcc, 1989, University of Washington

## Lecturers

ANGELL, PATRICIA L. 2008; MPAcc, 1999, University of Washington

BAESLER, WENDY G. 2010; MA, 1990, Brigham Young University
DU CHARME, LARRY L 2010; MBA, 1989, University of Washington; PhD, 1994, University of Washington
FEBRY, PAUL ANDREW 2012; MPA, 2010, University of Washington
HASSAN, WHITNEY J. 2012; MPAcc, 2008, University of Washington
HEDLUND, JASON D 2012; MBA, 2001, Willamette University; LLM, 2003, University of Washington
MCAULIFFE, ILESA B. 2011; JD, 2003, University of Washington; LLM, 2004, University of Washington
PHILLIPS, THOMAS E. 2012; MBA, 1992, University of Washington
REICH, JANE M 2008; MBA, 1979, Boston University
WIDDISON, ELIZABETH 2012; BS, 1992, City University

## Finance and Business Economics

## Professors

BRADFORD, WILLIAM D 2006; MBA, 1968, Ohio State University; PhD, 1972, Ohio State University
FROST, PETER A * 2002, (Emeritus); MA, 1961, University of California (Los Angeles); PhD, 1966, University of California (Los Angeles)
HALEY, CHARLES * 2004, (Emeritus); MBA, 1964, Stanford University; PhD, 1968, Stanford University
HARFORD, JARRAD 2008; MS, 1995, University of Rochester; PhD, 1998, University of Rochester
HESS, ALAN C. * 1981; MS, 1967, Carnegie Institute of Technology; PhD, 1969, Carnegie Institute of Technology
HIGGINS, ROBERT C * 2011, (Emeritus); MBA, 1965, Harvard University; PhD, 1969, Stanford University
KAMARA, AVRAHAM * 1997; MPhil, 1981, Columbia University; PhD, 1986, Columbia University
KARPOFF, JONATHAN M * 1988; MA, 1980, University of California (Los Angeles); PhD, 1982, University of California (Los Angeles)
MALATESTA, PAUL H * 2005; MS, 1976, University of Rochester; PhD, 1982, University of Rochester
SCHALL, LAWRENCE D * 1981; PhD, 1969, University of Chicago

## Associate Professors

DEWENTER, KATHRYN L * 2002; MBA, 1985, Stanford University; PhD, 1993, University of Chicago
DUCHIN, RAN 2012; MBA, 2003, Hebrew University (Israel); PhD, 2008, University of Southern California
KOSKI, JENNIFER LYNCH * 1999; MBA, 1987, Harvard University; PhD, 1991, Stanford University
RICE, EDWARD M * 1981; MBA, 1973, University of Rochester; PhD, 1978, University of California (Los Angeles)

## Assistant Professors

BROGAARD, JONATHAN A. 2012; PhD, 2012, Northwestern University
GILBERT, THOMAS 2008; MS, 2005, University of California (Berkeley); PhD, 2008, University of California (Berkeley)
HRDLICKA, CHRISTOPHER M 2010; PhD, 2010, University of Chicago
KOLASINSKI, ADAM 2006; PhD, 2006, Massachusetts Institute of Technology
SIEGEL, STEPHAN 2006; MPhil, 2002, Columbia University; PhD, 2006, Columbia University
WESTERFIELD, MARK M 2012; PhD, 2004, Massachusetts Institute of Technology

## Senior Lecturers

GLASSMAN, DEBRA A 2001; MS, 1979, University of Wis consin; PhD, 1980, University of Wisconsin (Madison) YOUNG, LANCE A 2011; MS, 1999, University of Rochester; PhD, 2005, University of Rochester

## Lecturer

MALOY, FRANCES 2001; MA, 1985, Southern Illinois University; PhD, 1999, University of Washington

## Information Systems and Operations Management

## Professors

CHIU, JOHN S Y * 1994, (Emeritus); MS, 1955, University of Kentucky; PhD, 1960, University of Illinois
DEY, DEBABRATA * 2003; MS, 1992, University of Rochester; PhD, 1994, University of Rochester
FAALAND, BRUCE H * 1982; MS, 1968, Stanford University; PhD, 1971, Stanford University
KLASTORIN, THEODORE * 1981; PhD, 1973, University of Texas (Austin)
MOINZADEH, KAMRAN * 1990; MS, 1982, Stanford University; PhD, 1985, Stanford University
SIEGEL, ANDREW F * 1983; MS, 1975, Stanford University; PhD, 1977, Stanford University
TAMURA, HIROKUNI * 2011, (Emeritus); MS, 1961, University of Michigan; PhD, 1967, University of Michigan
TAN, YONG 2011; PhD, 1993, University of Washington; PhD, 2000, University of Washington

## Associate Professors

FAN, MING 2009; MA, 1991, University of Akron; PhD, 1999, University of Texas (Austin)
HILLIER, MARK S. * 2000; MS, 1991, Stanford University; PhD, 1994, Stanford University

JAIN, APURVA 2006; MS, 1989, National Institute Training Engineers (Bombay); PhD, 1999, Purdue University
ZHOU, YONGPIN 2007; MA, 1997, University of Pennsylvania; PhD, 2000, University of Pennsylvania

## Assistant Professors

LAHIRI, ATANU 2010; MS, 2007, University of Rochester; PhD, 2010, University of Rochester
MAMANI, HAMED 2008; PhD, 2008, Massachusetts Institute of Technology
WAGNER, MICHAEL 2012; MEng, 2001, Massachusetts Institute of Technology; PhD, 2006, Massachusetts Institute of Technology

## Senior Lecturers

BURROWS, WILLIAM E 2002, (Emeritus); MBA, 1972, University of Washington
OU, SHAOSONG 2009; MA, 1999, University of Illinois; PhD, 2006, University of Southern California
PARAMESWARAN, MANOJ 2010; PhD, 1999, University of Texas (Austin)
PILCHER, MARTHA G * 2000; MS, 1978, Georgia Institute of Technology; PhD, 1985, Georgia Institute of Technology STUDER-ELLIS, ERICH 2009; MBA, 1986, Indiana Univer sity; PhD, 1996, Duke University

## Lecturer

CHON, IZIC 2009; BA, 2000, University of Washington

## Management and Organization

## Professors

AVOLIO, BRUCE 2008; MA, 1978, University of Akron; PhD, 1981, University of Akron
BOEKER, WARREN * 2002; PhD, 1987, University of California (Berkeley)
CHEN, XIAO-PING 2012; MA, 1992, University of Illinois; PhD, 1998, University of Illinois
HENNING, DALE A * 1981, (Emeritus); MBA, 1949, University of Pennsylvania; PhD, 1954, University of Illinois
HILL, CHARLES WILLIAM L * 1998; PhD, 1983, University of Manchester (UK)
HUBER, VANDRA LEE * 1987; MBA, 1981, Indiana University; DBA, 1982, Indiana University
JONES, THOMAS M 2002; MBA, 1970, University of Washington; PhD, 1977, University of California (Berkeley)
KAST, FREMONT E * 1989, (Emeritus); MBA, 1949, Stanford University; DBA, 1956, University of Washington
KOTHA, SURESH * 2002; MS, 1986, Rensselaer Polytechnic Institute; PhD, 1988, Rensselaer Polytechnic Institute
LEE, THOMAS W 2002; MA, 1977, Bowling Green State University; PhD, 1984, University of Oregon
MITCHELL, TERENCE R. * 2002; MA, 1967, University of Illinois; PhD, 1969, University of Illinois
MOXON, RICHARD W * 2000, (Emeritus); MS, 1964, Stanford University; DBA, 1973, Harvard University
NEWELL, WILLIAM T * 1999, (Emeritus); MBA, 1955, University of Denver; PhD, 1962, University of Texas
NOLAN, RICHARD L 2011, (Emeritus); MBA, 1963, University of Washington; PhD, 1966, University of Washington
STEENSMA, HARVEY K. 2006; MBA, 1988, Washington
State University; PhD, 1996, Indiana University
VESPER, KARL H * 2007, (Emeritus); MS, 1966, Stanford University; PhD, 1969, Stanford University
WOODWORTH, ROBERT T. * 2001, (Emeritus); MBA, 1956, Northwestern University; PhD, 1963, Northwestern University

## Associate Professors

BIGLEY, GREGORY 2004; MBA, 1991, University of California (Irvine); PhD, 1995, University of California (Irvine)
BUCK, VERNON E * 2009, (Emeritus); MS, 1960, Cornell University; PhD, 1963, Cornell University
JOHNSON, MICHAEL D. 2012; MA, 1999, University of Phoenix; PhD, 2006, Michigan State University
KIENAST, PHILIP K * 2011, (Emeritus); PhD, 1972, Michigan State University
REYNOLDS, SCOTT J. 2012; MA, 1995, Brigham Young University; PhD, 2002, University of Minnesota
SIRMON, DAVID G. 2012; MBA, 1997, University of Montana; PhD, 2004, Arizona State University
STRONG, DENNIS FULTON * 1991, (Emeritus); PhD, 1959, University of Washington
UMPHRESS, ELIZABETH 2011; PhD, 2003, Tulane University
WICKMAN, JAMES A * 1983, (Emeritus); MBA, 1954, University of Washington; DBA, 1961, University of Washington

## Assistant Professors

BARDEN, JEFFREY Q. 2006; MBA, 1999, Indiana University; PhD, 2006, Duke University
COX, EMILY 2010; MA, 2010, Stanford University; PhD, 2010, Stanford University
FEHR, RYAN 2011; MA, 2007, University of Maryland; PhD, 2010, University of Maryland
HERNANDEZ, MORELA 2007; MA, 2004, Duke University; PhD, 2007, Duke University

SHAH, SONALI K. 2007; PhD, 2003, Massachusetts Institute of Technology

## Senior Lecturer

FONG, CHRISTINA T. 2011; MA, 2000, Stanford University; PhD, 2003, Stanford University

## Lecturers

BERGSTROM, TOD 2007; MA, 1985, Stanford University; JD, 1988, University of Washington
BETTIN, PATRICK J 2007; MS, 1978, Long Island University; PhD, 1983, University of Washington
CASTLE, JOHN R 2007; ScD, 1964, Massachusetts Institute of Technology
CORMICK, GERALD W 2007; MBA, 1965, University of Michigan; PhD, 1971, University of Michigan
DAWSON, ROBERT K 2009; JD, 1978, Willamette University ECKMANN, THOMAS E. 2011; BS, 1971, University of California (Berkeley)
HUWE, RUTH A 2007; MA, 1990, San Diego State University; PhD, 1995, University of Washington
JAMIESON, RONALD BARRIE 1986, (Emeritus); LLB, 1939, Harvard University
JUDD, HUGH 2008; JD, 1967, Stanford University
LEONG, ALAN 2011; MSE, 1977, University of Washington MYER, KENNETH L 2008; JD, 1973, Stanford University
NISHANOV, VITALY 2007; Diploma, 1971, Novosibizsk State University (Russia); PhD, 1981, Ural State University (Russia)

HOFFMAN, JENNIFER L 2010; MA, 1998, Seattle University; PhD, 2006, University of Washington
ISHIMARU, ANN 2012; MA, 1994, Stanford University; EdD, 2011, Harvard University

LOTT, JOE 2007; MPA, 2000, Louisiana State University; PhD, 2005, Louisiana State University
SANDERS, ELIZABETH 2011; MEd, 2004, University of Washington; PhD, 2011, University of Washington

## SCHINDLER, HOLLY S 2012; PhD, 2007, Boston College

## Senior Lecturers

HALVERSON, THOMAS J 2011; MEd, 1990, Western Washington University; PhD, 1996, University of Washington KIMBALL, KATHLEEN L. 2012, (Emeritus); MEd, 1972, University of Utah; EdD, 1993, University of Washington
LOPEZ, SARA L. 2012; MEd, 2003, University of Washington
MASSEY, DIXIE DICK 2012; MA, 2000, University of North Carolina; PhD, 2003, University of North Carolina O'DOHERTY, ANN 2012; MEd, 1992, University of Texas (Austin); EdD, 2007, University of Texas (Austin)

## Lecturers

MCCUE, FRANCES A 2012; MEd, 1996, Columbia University; EdD, 2001, Columbia University
ROSENBERG, NANCY E 2012; MS, 1987, Stanford University

## College of Engineering

## Aeronautics and Astronautics

## Professors

BOLLARD, R JOHN * 1997, (Emeritus); PhD, 1954, Purdue University
BREIDENTHAL, ROBERT E * 1997; MS, 1974, California Institute of Technology; PhD, 1978, California Institute of Technology
BRUCKNER, ADAM * 1991; MA, 1968, Princeton University; PhD, 1972, Princeton University
CHRISTIANSEN, WALTER H * 2001, (Emeritus); PhD, 1961,
California Institute of Technology
DECHER, REINER * 2001, (Emeritus); PhD, 1968, Massachusetts Institute of Technology
FYFE, IAN M * 1994, (Emeritus); PhD, 1957, Stanford University
HERMANSON, JAMES C. 2008; MS, 1980, California Institute of Technology; PhD, 1985, California Institute of Technology
HOFFMAN, ALAN LOWELL * 2011, (Emeritus); PhD, 1967, California Institute of Technology
HOLSAPPLE, KEITH A * 1982; MS, 1964, University of Washington; PhD, 1965, University of Washington
JARBOE, THOMAS R. 1992; PhD, 1974, University of California (Berkeley)
KUROSAKA, MITSURU * 1987; MS, 1961, University of Tokyo (Japan); PhD, 1968, California Institute of Technology
LIN, KUEN-YUAN * 1991; MA, 1967, Princeton University; PhD, 1970, Princeton University
LIVNE, ELI * 2002; MSc, 1982, Israel Institute of Technology; PhD, 1990, University of California (Los Angeles)
MESBAHI, MEHRAN 2010; MS, 1995, University of Southern California; PhD, 1996, University of Southern California PARMERTER, R REID * 1999, (Emeritus); MS, 1959, California Institute of Technology; PhD, 1963, California Institute of Technology
RUSSELL, DAVID A * 2000, (Emeritus); MSc, 1957, California Institute of Technology; PhD, 1961, California Institute of Technology

SHUMLAK, URI 2007; PhD, 1992, University of California (Berkeley)
VAGNERS, JURIS * 2002, (Emeritus); MS, 1963, Stanford University; PhD, 1967, Stanford University

## Associate Professors

DABIRI, DANA 2009; MS, 1987, University of California (Berkeley); PhD, 1992, University of California (San Diego) HILL, KRISTI MORGANSEN 2009; MS, 1996, Harvard University; PhD, 1999, Harvard University
LY, UY-LOI * 2011, (Affiliate); MS, 1976, California Institute of Technology; PhD, 1983, Stanford University
MATTICK, ARTHUR T. * 2011, (Emeritus); MS, 1971, Massachusetts Institute of Technology; PhD, 1975, Massachusetts Institute of Technology
SLOUGH, JOHN T. * 2007, (Research); MA, 1976, Columbia University; PhD, 1981, Columbia University

## Assistant Professors

FERABOLI, PAOLO 2012; MS, 2002, University of Bologna (Italy); PhD, 2005, University of California (Santa Barbara) FERRANTE, ANTONINO 2009; MS, 1997, von Karman Institute for Fluid Dynamics; PhD, 2004, University of California (Irvine)

YOU, SETTHIVOINE 2009; MSc, 1997, Imperial College; PhD, 2002, Imperial College

## Lecturers

GOLINGO, RAYMOND P. 2012; MS, 1998, University of Washington; PhD, 2003, University of Washington
KNOWLEN, CARL 2012; MS, 1985, University of Washington; PhD, 1991, University of Washington
LUM, CHRISTOPHER W. M. 2012; MS, 2005, University of Washington; PhD, 2009, University of Washington

## Chemical Engineering

## Professors

BABB, ALBERT L * 1991, (Emeritus); MS, 1949, University of Illinois; PhD, 1951, University of Illinois
BANEYX, FRANCOIS * 2001; PhD, 1991, University of Texas (Austin)
BERG, JOHN C. * 1981; PhD, 1964, University of California (Berkeley)
BOWEN, J RAY * 2000, (Emeritus); MS, 1957, Massachusetts Institute of Technology; PhD, 1963, University of California (Berkeley)
CASTNER, DAVID G. * 2012; PhD, 1979, University of California (Berkeley)
HEIDEGER, WILLIAM J * 1995, (Emeritus); MSE, 1955, Princeton University; PhD, 1959, Princeton University
HILLHOUSE, HUGH 2012; MS, 1999, University of Massachusetts; PhD, 2000, University of Massachusetts
JENEKHE, SAMSON A. 2000; MA, 1981, University of Minnesota; PhD, 1985, University of Minnesota
JIANG, SHAOYI 2006; MS, 1988, Nanjing University of Technology (China); PhD, 1993, Cornell University
LIDSTROM, MARY E. 2005; MS, 1975, University of Wisconsin (Madison); PhD, 1977, University of Wisconsin (Madison)
OVERNEY, RENE M * 2008; MS, 1989, University of Basel (Switzerland); PhD, 1992, University of Basel (Switzerland) RIBE, FRED L * 1989, (Emeritus); PhD, 1951, University of Chicago
RICKER, NEIL L * 1991; MS, 1972, University of California (Berkeley); PhD, 1978, University of California (Berkeley) SCHWARTZ, DANIEL T. 2009; MS, 1985, University of California (Davis); PhD, 1989, University of California (Davis)
SLEICHER, CHARLES A * 1991, (Emeritus); MS, 1949, Massachusetts Institute of Technology; PhD, 1955, University of Michigan
STUVE, ERIC M * 1990; MS, 1979, Stanford University; PhD, 1983, Stanford University
WOODRUFF, GENE L * 2000, (Emeritus); MS, 1963, Massachusetts Institute of Technology; PhD, 1966, Massachusetts Institute of Technology

## Associate Professors

ADLER, STUART B. 2006; MS, 1989, University of California (Berkeley); PhD, 1993, University of California (Berkeley)
HOLT, BRADLEY R * 1990; PhD, 1984, University of Wisconsin
KRIEGER-BROCKETT, BARBARA * 2004, (Emeritus); MS, 1972, Wayne State University; PhD, 1975, Wayne State University

## Assistant Professors

CAROTHERS, JAMES 2012; PhD, 2005, Harvard University HAYES, BRIAN * 2002, (Affiliate); PhD, 1997, University of Washington
PFAENDTNER, WALTER JAMES 2012; PhD, 2007, Northwestern University
POZZO, DANILO C. 2007; MS, 2006, Carnegie Mellon University; PhD, 2006, Carnegie Mellon University

SHEN, HONG 2006; MS, 1998, Tsinghua University (China); PhD, 2004, Cornell University

## Civil and Environmental Engineering

## Professors

ARDUINO, PEDRO 2012; MSCE, 1996, Georgia Institute of Technology; PhD, 1996, Georgia Institute of Technology
BENJAMIN, MARK M * 2011; MS, 1973, Stanford University; PhD, 1979, Stanford University
BOGAN, RICHARD H * 1995, (Emeritus); MS, 1952, Massachusetts Institute of Technology; DSc, 1954, Massachusetts Institute of Technology
BRETT, MICHAEL T. * 2008; MSc, 1985, University of Maine; PhD, 1990, University of Uppsala (Sweden)
BROWN, COLIN B * 1994, (Emeritus); PhD, 1962, University of Minnesota
BURGES, STEPHEN J * 2010, (Emeritus); MS, 1968, Stanford University; PhD, 1970, Stanford University
CARLSON, DALE A. * 1983, (Emeritus); MSCE, 1951, University of Washington; PhD, 1960, University of Wisconsin (Madison)
EBERHARD, MARC 0. * 2004; MS, 1986, University of IIlinois; PhD, 1989, University of Illinois
ELIAS, ZIAD * 2001, (Emeritus); DSc, 1963, Massachusetts Institute of Technology
EVANS, ROGER J * 1990, (Emeritus); MSc, 1959, Brown University; PhD, 1965, University of California (Berkeley)
HOLTZ, ROBERT DEAN * 2008, (Emeritus); MSCE, 1962, University of Minnesota; PhD, 1970, Northwestern University
JACOBY, JEAN M. * 2004, (Affiliate); MS, 1981, University of Washington; PhD, 1986, University of Washington
KORSHIN, GREGORY * 2007; PhD, 1983, Chemical Engineering Institute (Russia)
KRAMER, STEVEN * 2002; MEng, 1979, University of California (Berkeley); PhD, 1984, University of California (Berkeley)
LARSON, TIMOTHY * 2003; MS, 1972, University of Wash ington; PhD, 1976, University of Washington
LETTENMAIER, DENNIS P * 1991; MS, 1973, George Washington University; PhD, 1975, University of Washington
MAHONEY, JOE PAUL * 2003; MSCE, 1970, Texas A\&M University; PhD, 1979, Texas A\&M University
MATTOCK, ALAN * 1991, (Emeritus); MSc, 1949, University of London, UK; PhD, 1955, University of London, UK
MILLER, GREGORY * 1995; MSCE, 1981, Northwestern University; PhD, 1984, Northwestern University
NECE, RONALD E * 1996, (Emeritus); MS, 1951, Lehigh University; DSc, 1958, Massachusetts Institute of Technology
NIHAN, NANCY L * 2012, (Emeritus); MSCE, 1967, Northwestern University; PhD, 1970, Northwestern University PALMER, RICHARD * 2008, (Affiliate); MS, 1973, Stanford University; PhD, 1979, Johns Hopkins University
PILAT, MICHAEL J * 2008, (Emeritus); MS, 1963, University of Washington; PhD, 1967, University of Washington
REED, DOROTHY * 1994; MSE, 1977, Princeton University; PhD, 1980, Princeton University
ROEDER, CHARLES W. * 1998; MS, 1971, University of IIlinois; PhD, 1977, University of California (Berkeley)
RUTHERFORD, G. SCOTT 1995; MSCE, 1968, Washington State University; PhD, 1974, Northwestern University SCHNEIDER, JERRY * 1996, (Emeritus); MCP, 1961, University of California; PhD, 1966, University of Pennsylvania STAHL, DAVID A 2000; MS, 1975, University of Illinois (Urbana); PhD, 1978, University of Illinois (Urbana)

610 COLLEGE OF ENGINEERING
STANTON, JOHN 1982; MSCE, 1975, Cornell University; PhD, 1978, University of California (Berkeley)
STEINEMANN, ANNE 2004; MS, 1985, University of California (Los Angeles); PhD, 1993, Stanford University
STENSEL, H. DAVID * 1987; PhD, 1971, Cornell University WANG, YINHAI 2011; MSCE, 1991, Tsinghua University (China); PhD, 1998, University of Tokyo (Japan)
WELCH, EUGENE B * 1997, (Emeritus); MS, 1959, Michigan State University; PhD, 1967, University of Washington YEH, HARRY H * 2003, (Affiliate); MS, 1977, Washington State University; PhD, 1983, University of California (Berkeley)

## Associate Professors

BERMAN, JEFFREY WILLIAM 2012; MS, 2003, State University of New York (Buffalo); PhD, 2006, State University of New York (Buffalo)
CHEN, QIUZI 2009; MS, 1995, New Jersey Institute of Technology; PhD, 2001, University of California (Davis)
GOODCHILD, ANNE V. 2012; MS, 2002, University of California (Berkeley); PhD, 2005, University of California (Berkeley)
HORNER-DEVINE, ALEXANDER 2004; MSEng, 1998, Stanford University; DPhil, 2003, Stanford University
JANSSEN, DONALD J. * 1991; MS, 1980, University of IIlinois; PhD, 1985, University of Illinois
KENT, JOSEPH C * 1990, (Emeritus); MS, 1948, Stanford University; PhD, 1952, University of California (Berkeley)
LEHMAN, DAWN E 2009; MSEng, 1992, University of California (Berkeley); PhD, 1998, University of California (Berkeley)
LOWES, LAURA N 2010; MS, 1999, University of California (Berkeley); PhD, 1999, University of California (Berkeley) LUNDQUIST, JESSICA D. 2011; MS, 2000, University of California (San Diego); PhD, 2004, University of California (San Diego)
MUENCH, STEPHEN T 2010; MSCE, 1998, University of Washington; PhD, 2004, University of Washington
SPYRIDAKIS, DIMITRIS * 1996, (Emeritus); MS, 1959, University of Wisconsin; PhD, 1965, University of Wisconsin (Madison)
WARTMAN, JOSEPH 2010; MSCE, 1996, University of California (Berkeley); PhD, 1999, University of California (Berkeley)

## Assistant Professors

DODD, MICHAEL 2009; MSEE, 2003, Georgia Institute of Technology; PhD, 2008, Swiss Federal Institute of Technology
ISTANBULLUOGLU, ERKAN 2009; MS, 1998, University of Uludag (Turkey); PhD, 2003, Utah State University
MOTLEY, MICHAEL 2012; MA, 2010, Princeton University; PhD, 2011, Princeton University
NEUMANN, REBECCA B 2011; PhD, 2009, Massachusetts Institute of Technology
PARSONS, JEFFREY D * 2006, (Affiliate); MSCE, 1995, University of Illinois (Urbana); PhD, 1998, University of Illinois (Urbana)
THOMSON, JAMES M. 2009; PhD, 2008, Massachusetts Institute of Technology

## Lecturers

MAY, CHRISTOPHER W. 2012; MS, 1985, University of Minnesota; PhD, 1997, University of Washington
TAYLOR, ANDREW WARREN 2011; MSCE, 1985, University of Washington; PhD, 1990, University of Texas (Austin)

# Computer Science and Engineering 

## Professors

ANDERSON, RICHARD J. * 1991; PhD, 1985, Stanford University
ANDERSON, THOMAS E. * 2001; MS, 1990, University of Washington; PhD, 1991, University of Washington
BAER, JEAN-LOUP * 2003, (Emeritus); MS, 1963, Grenoble (France); PhD, 1968, University of California (Los Angeles) BEAME, PAUL W. 1999; MS, 1982, University of Toronto (Canada); PhD, 1987, University of Toronto (Canada)
BERSHAD, BRIAN * 2009, (Affiliate); MS, 1990, University of Washington; PhD, 1990, University of Washington
BORNING, ALAN H * 1993; MS, 1974, Stanford University; PhD, 1979, Stanford University
BORRIELLO, GAETANO 1993; MS, 1980, Stanford University; PhD, 1988, Stanford University
CHAMBERS, CRAIG D * 2009, (Affiliate); PhD, 1992, Stanford University
CURLESS, BRIAN L. 2010; MSEE, 1991, Stanford University; PhD, 1997, Stanford University
DE ROSE, ANTHONY DAVID * 1999, (Affiliate); PhD, 1985, University of California (Berkeley)
DOMINGOS, PEDRO MORAIS DEL 2012; MS, 1994, University of California (Irvine); PhD, 1997, University of California (Irvine)
EGGERS, SUSAN JANE * 2011, (Emeritus); PhD, 1989, University of California (Berkeley)
ETZIONI, OREN 2005; MS, 1988, Carnegie Mellon University; PhD, 1991, Carnegie Mellon University
GOLDE, HELLMUT * 1992, (Emeritus); MS, 1955, Stanford University; PhD, 1959, Stanford University
GRIBBLE, STEVEN 2012; MS, 1997, University of California (Berkeley); PhD, 2000, University of California (Berkeley)
HALEVY, ALON Y * 2006, (Affiliate); PhD, 1993, Stanford University
KARLIN, ANNA R. * 1995; PhD, 1987, Stanford University
KEHL, THEODORE * 2000, (Emeritus); MS, 1958, University of Wisconsin; PhD, 1961, University of Wisconsin (Madison)
LADNER, RICHARD E 1985; PhD, 1971, University of California (Berkeley)
LANDAY, JAMES A 2010; MS, 1993, Carnegie Mellon University; PhD, 1996, Carnegie Mellon University
LAZOWSKA, EDWARD D * 1986; MSc, 1974, University of Toronto (Canada); PhD, 1977, University of Toronto (Canada)
LEVY, HENRY M * 1994; MS, 1981, University of Washington
NOTKIN, DAVID S * 1994; PhD, 1984, Carnegie Mellon University
POPOVIC, ZORAN 2011; MS, 1993, Carnegie Mellon University; PhD, 1999, Carnegie Mellon University
RUZZO, WALTER L * 1990; PhD, 1978, University of California (Berkeley)
SALESIN, DAVID HENRY * 2009, (Affiliate); PhD, 1991, Stanford University
SEITZ, STEVEN M. 2008; PhD, 1997, University of Wiscon$\sin$ (Madison)
SHAPIRO, LINDA G. 1990; MS, 1972, University of Iowa; PhD, 1974, University of lowa
SHAW, ALAN CARY * 2000, (Emeritus); MS, 1962, Stanford University; PhD, 1968, Stanford University
SNYDER, LAWRENCE * 2010, (Emeritus); PhD, 1973, Carnegie Mellon University

SUCIU, DAN 2008; MS, 1991, University of Bucharest (Romania); PhD, 1995, University of Pennsylvania
TANIMOTO, STEVEN L * 1987; MA, 1974, Princeton University; PhD, 1975, Princeton University
TOMPA, MARTIN * 1989; MS, 1975, University of Toronto (Canada); PhD, 1978, University of Toronto (Canada)
WELD, DANIEL SABEY * 1993; MS, 1984, Massachusetts Institute of Technology; PhD, 1988, Massachusetts Institute of Technology
WETHERALL, DAVID JAMES 2011; MS, 1994, Massachusetts Institute of Technology; PhD, 1998, Massachusetts Institute of Technology
YOUNG, PAUL R. 1998, (Emeritus); PhD, 1963, Massachusetts Institute of Technology
ZAHORJAN, JOHN * 1989; MS, 1976, University of Toronto (Canada); PhD, 1980, University of Toronto (Canada)

## Associate Professors

BALAZINSKA, MAGDALENA 2012; MS, 1999, Ecole Polytechnique De Montreal (Canada); PhD, 2005, Massachusetts Institute of Technology
CEZE, LUIS HENRIQUE DE BAR 2012; MEng, 2002, University of San Paulo (Brazil); PhD, 2007, University of Illinois
DIORIO, CHRISTOPHER J * 2005; MSEE, 1984, California Institute of Technology; PhD, 1997, California Institute of Technology
ERNST, MICHAEL D 2009; MS, 1997, University of Washington; PhD, 2000, University of Washington
FOGARTY, JAMES A 2011; MS, 2005, Carnegie Mellon University; PhD, 2006, Carnegie Mellon University
FOX, DIETER 2011; MSc, 1993, University of Bonn (Germany); PhD, 1998, University of Bonn (Germany)
GROSSMAN, DANIEL JOSEPH 2009; MS, 2001, Cornell University; PhD, 2003, Cornell University
KOHNO, TADAYOSHI 2011; MS, 2004, University of California (San Diego); PhD, 2006, University of California (San Diego)
KRISHNAMURTHY, ARVIND 2011; MS, 1994, University of California (Berkeley); PhD, 1999, University of California (Berkeley)
LEE, JAMES RUSSELL 2011; PhD, 2005, University of California (Berkeley)
MATSUOKA, YOKY 2012; MS, 1995, Massachusetts Institute of Technology; PhD, 1998, Massachusetts Institute of Technology
OSKIN, MARK H. 2007; MS, 2000, University of California (Davis); PhD, 2001, University of California (Davis)
RAO, RAJESH P.N. 2006; MS, 1994, University of Rochester; PhD, 1998, University of Rochester
SMITH, JOSHUA R. 2011; MA, 1997, University of Cambridge (UK); PhD, 1999, Massachusetts Institute of Technology

## Assistant Professors

FARHADI, ALI 2012; PhD, 2011, University of Illinois (Urbana)
LEE, SU-IN 2010; PhD, 2010, Stanford University
PATEL, SHWETAK NARAN 2011; PhD, 2008, Georgia Institute of Technology
RAO, ANUP 2010; PhD, 2007, University of Texas (Austin)
ZETTLEMOYER, LUKE S 2010; PhD, 2009, Massachusetts Institute of Technology

## Senior Lecturers

MONES, BARBARA 2001; MFA, 1979, Rhode Island School of Design
PERKINS, JOHN H. JR. 2001; MS, 1982, Cornell University
STEPP, MARTIN 2011; MS, 2003, University of Arizona

## Lecturers

ANDERSON, RUTH ELIZABETH 2011; MS, 1994, University of Washington; PhD, 2006, University of Washington
HUNT, DAVID G. 2009; BA, 2000, University of Washington

MARTIN, HELENE 2011; BS, 2008, University of Washington
REGES, STUART THOMAS 2008; MS, 1982, Stanford University

## Electrical Engineering

## Professors

AFROMOWITZ, MARTIN * 1989; MS, 1966, School of Engineering and Applied Science (NY); PhD, 1969, Columbia University
ALBRECHT, ROBERT W * 2001, (Emeritus); MS, 1958, University of Michigan; PhD, 1961, University of Michigan
ALEXANDRO, FRANK J * 2001, (Emeritus); MSEE, 1959, New York University; DSc, 1964, New York University
ALLSTOT, DAVID 2012; MSEE, 1974, Oregon State University; PhD, 1979, University of California (Berkeley)
ANANTRAM, MANJERI 2008; MSc, 1989, University of Poona, India; PhD, 1995, Purdue University
ATLAS, LES EUGENE 2002; MS, 1978, Stanford University; PhD, 1984, Stanford University
BERNARD, GARY D * 2001, (Affiliate); MSEE, 1960, University of Washington; PhD, 1965, University of Washington
BILMES, JEFFREY A. * 2011; MS, 1993, Massachusetts Institute of Technology; PhD, 1999, University of California (Berkeley)
BJORKSTAM, JOHN L * 1996, (Emeritus); MS, 1952, University of Washington; PhD, 1958, University of Washington

BOHRINGER, KARL F. 2007; MS, 1992, Cornell University; PhD, 1997, Cornell University
CHIZECK, HOWARD JAY * 1998; MS, 1976, Case Western Reserve University; ScD, 1982, Massachusetts Institute of Technology
CRUM, LAWRENCE A. * 2001, (Research); MS, 1965, Ohio University; PhD, 1967, Ohio University
DAILEY, DANIEL J * 2003, (Research); MS, 1982, University of Washington; PhD, 1988, University of Washington
DAMBORG, MARK J * 2007, (Emeritus); MSEE, 1963, University of Michigan; PhD, 1969, University of Michigan
DARLING, ROBERT B * 1999; MS, 1982, Georgia Institute of Technology; PhD, 1985, Georgia Institute of Technology DOW, DANIEL G * 1995, (Emeritus); MS, 1953, University of Michigan; PhD, 1958, Stanford University
DUNHAM, SCOTT T. * 1999; MSEE, 1980, Stanford University; PhD, 1985, Stanford University
EHRENBERG, JOHN E * 2010, (Affiliate); MSEE, 1968, Massachusetts Institute of Technology; PhD, 1973, University of Washington
EL-SHARKAWI, MOHAMED A. * 1990; MS, 1977, University of British Columbia (Canada); PhD, 1980, University of British Columbia (Canada)
HANNAFORD, BLAKE * 1998; MS, 1982, University of California (Berkeley); PhD, 1985, University of California (Berkeley)
haralick, ROBERT M * 2001, (Emeritus); MSEE, 1967, University of Kansas; PhD, 1969, University of Kansas HAUCK, SCOTT * 2008; MS, 1992, University of Washington; PhD, 1995, University of Washington
HUANG, XUEDONG * 2001, (Affiliate); MS, 1984, Tsinghua University (China); PhD, 1989, University of Edinburgh (UK) HWANG, JENQ-NENG * 2000; MSEE, 1983, National Taiwan University; PhD, 1988, University of Southern California
ISHIMARU, AKIRA * 1998, (Emeritus); PhD, 1958, University of Washington
JACKSON, DARRELL R * 2000, (Research Emeritus); PhD, 1966, University of Washington; PhD, 1977, California Institute of Technology

JANDHYALA, VIKRAM 2010; MSEE, 1995, University of IIlinois (Urbana); PhD, 1998, University of Illinois (Urbana)
JOHNSON, DAVID L 1989, (Emeritus); PhD, 1955, Purdue University
KIRSCHEN, DANIEL SADI 2011; MSc, 1980, University of Wisconsin (Madison); PhD, 1985, University of Wisconsin (Madison)
KUGA, YASUO * 1997; MS, 1979, University of Washington; PhD, 1983, University of Washington
LAURITZEN, PETER 0 * 1999, (Emeritus); MS, 1958, Stanford University; PhD, 1961, Stanford University
LIN, LIH-YUAN 2009; MS, 1996, University of California (Los Angeles); PhD, 1996, University of California (Los Angeles)
LIU, HUI 2008; MS, 1992, Portland State University; PhD, 1995, University of Texas (Austin)
MORITZ, WILLIAM E * 1997, (Emeritus); MS, 1966, Stanford University; PhD, 1969, Stanford University
OSTENDORF, MARI 1999; MSEE, 1981, Stanford University; PhD, 1985, Stanford University
PEDEN, IRENE CARSWELL * 1994, (Emeritus); MS, 1958, Stanford University; PhD, 1962, Stanford University
POOVENDRAN, RAADHAKRISHNAN 2010; MSEE, 1991, University of Michigan, Ann Arbor; PhD, 1999, University of Maryland
PORTER, ROBERT P * 1998, (Emeritus); MSEE, 1965, Massachusetts Institute of Technology; PhD, 1970, Northeastern University
RISKIN, EVE A 2012; MS, 1986, Stanford University; PhD, 1990, Stanford University
RITCEY, JAMES A. * 1995; MS, 1980, Syracuse University; PhD, 1985, University of California (San Diego)
ROY, SUMIT * 2002; MSEE, 1985, University of California (Santa Barbara); PhD, 1988, University of California (Santa Barbara)
SAHR, JOHN D. * 2004; PhD, 1990, Cornell University
SHI, CHUAN JIN 2004; MAS, 1991, University of Waterloo (Canada); PhD, 1994, University of Waterloo (Canada)
SIGELMANN, RUBENS A * 1991, (Emeritus); MS, 1961, University of Washington; PhD, 1963, University of Washington
SOMA, MANI * 1992; MSEE, 1977, Stanford University; PhD, 1980, Stanford University
SPINDEL, ROBERT C. 2006, (Emeritus); MPhil, 1968, Yale University; PhD, 1971, Yale University
SUN, MING-TING * 1996; MS, 1981, University of Texas (Arlington); PhD, 1985, University of California (Los Angeles) TSANG, LEUNG * 2007; MS, 1973, Massachusetts Institute of Technology; PhD, 1976, Massachusetts Institute of Technology
YEE, SINCLAIR S 2006, (Emeritus); MS, 1961, University of California (Berkeley); PhD, 1965, University of California (Berkeley)
ZICK, GREGORY L 2006, (Emeritus); MS, 1972, University of Michigan; PhD, 1974, University of Michigan
AMIRPARVIZ, BABAK 2012; MS, 2001, University of Michigan; PhD, 2001, University of Michigan

## Associate Professors

ARABSHAHI, PAYMAN 2009; MS, 1990, University of Washington; PhD, 1994, University of Washington
CHRISTIE, RICHARD DUNSTAN * 1996; MSEE, 1974, Rensselaer Polytechnic Institute; PhD, 1989, Carnegie Mellon University
GIRI, JAY * 2001, (Affiliate); MS, 1971, State University of New York (Stony Brook); PhD, 1977, Clark University
HELMS, WARD J * 2004, (Emeritus); MS, 1963, University of Washington; PhD, 1968, University of Washington
KLAVINS, ERIC 2009; MS, 1998, University of Michigan; PhD, 1998, University of Michigan

MAMISHEV, ALEXANDER V * 2005; MS, 1994, Texas A\&M University; PhD, 1999, Massachusetts Institute of Technology
MATULA, THOMAS J. * 2010, (Affiliate); MS, 1990, Washington State University; PhD, 1993, Washington State University
OTIS, BRIAN P 2011; MS, 2002, University of California (Berkeley); PhD, 2005, University of California (Berkeley)
WILSON, DENISE M * 2001; MSEE, 1989, Georgia Institute of Technology; PhD, 1995, Georgia Institute of Technology

## Assistant Professors

FAZEL SARJOUI, MARYAM 2007; MS, 1997, Stanford University; PhD, 2002, Stanford University
PIERQUET, BRANDON 2012; PhD, 2011, Massachusetts Institute of Technology
RUDELL, JACQUES CHRISTOPHE 2009; MSEE, 1994, University of California (Berkeley); PhD, 2000, University of California (Berkeley)
SEELIG, GEORG 2009; Diploma, 1999, University of Basel (Switzerland); PhD, 2003, University of Geneva (Switzerland)

## Senior Lecturer

PECKOL, JAMES 2000; MS, 1975, University of Washington; PhD, 1985, University of Washington

## Lecturers

CHEN, TAI-CHANG 2012; MS, 1993, University of Washington; PhD, 1997, University of Washington
MISHRA, APURVA 2011; MS, 2000, Boston University; PhD, 2011, University of Washington
POTTER, WILLIAM W 1990, (Emeritus); MSEE, 1959, US Naval Postgraduate School
SCHNEIDER, KEVIN P 2012; MSEE, 2002, University of Washington

## Human Centered Design and Engineering

## Professors

ATMAN, CYNTHIA J. 2008; MS, 1983, Ohio State University; PhD, 1990, Carnegie Mellon University
BEREANO, PHIL * 2005, (Emeritus); JD, 1965, Columbia University; MRP, 1971, Cornell University
CONEY, MARY B * 2002, (Emeritus); MA, 1963, University of Illinois; PhD, 1973, University of Washington
FARKAS, DAVID K. * 1997; MA, 1969, University of Chicago; PhD, 1976, University of Minnesota
HASELKORN, MARK P * 1990; PhD, 1977, University of Michigan; MA, 1980, University of Michigan
KOLKO, BETH E 2010; MA, 1991, University of Texas (Austin); PhD, 1994, University of Texas (Austin)
RAMEY, JUDITH A * 1988, (Emeritus); MA, 1971, University of Texas; PhD, 1983, University of Texas
SKEELS, DELL R 2009, (Emeritus); MA, 1942, University of Idaho; PhD, 1949, University of Washington
SPYRIDAKIS, JAN * 2008; MAT, 1972, University of Wash ington; PhD, 1986, University of Washington
TSUTSUI, MICHIO * 2010; MA, 1980, University of Illinois; PhD, 1984, University of Illinois
TURNS, JENNIFER A. 2012; MS, 1990, University of Virginia; PhD, 1999, Georgia Institute of Technology

## Associate Professors

ARAGON, CECILIA 2010; MS, 1987, University of California (Berkeley); PhD, 2004, University of California (Berkeley) ZACHRY, MARK R 2006; MA, 1992, Arizona State University; PhD, 1998, Iowa State University

## Assistant Professors

KIENTZ, JULIE A 2012; PhD, 2008, Georgia Institute of Technology
LEE, CHARLOTTE P 2008; MA, 1997, San Jose State University; PhD, 2004, University of California (Los Angeles)

## Senior Lecturers

DAVIDSON, ANDREW H. 2012; MSE, 1982, University of Pennsylvania
KATO, MASASHI 2007; MA, 1980, University of Washington

## Lecturers

BOYD, SUZANNE M 2006; MA, 2000, University of Washington
CRUTH, MARK A 2012; MS, 2012, University of Washington DESTELLO, REBECCA 2012; MS, 2011, University of Washington
EJLALI, PARINAZ 2012; MS, 2012, University of Washington
HANAFI, ZAKIYA A 2012; MA, 1987, University of British Columbia (Canada); PhD, 1991, Stanford University
KEPHART, KERRIE L 2012; MA, 1998, University of Wiscon$\sin$ (Madison); PhD, 2005, University of Wisconsin (Madison)
LAGOS, TASO 2012; MA, 1999, University of Washington; PhD, 2004, University of Washington
LOUCKS-JARET, CHRISTINE M. 2011; MS, 1999, University of Washington
SPYRIDAKIS, IRINI K 2012; MS, 2010, University of Washington
WRENN, LISA A 2012; MS, 1993, University of Washington

# Industrial Systems and Engineering 

## Professors

FURNESS, THOMAS A. * 1990; PhD, 1981, University of Southampton (UK)
KAPUR, KAILASH C. * 1992; MS, 1967, University of California (Berkeley); PhD, 1969, University of California (Berkeley)
STORCH, RICHARD * 2005; MS, 1968, Massachusetts Institute of Technology; PhD, 1978, University of Washington ZABINSKY, ZELDA * 1998; MS, 1984, University of Michigan; PhD, 1985, University of Michigan

## Associate Professors

BEAMON, BENITA M. * 2006; MS, 1990, Cornell University; PhD, 1994, Georgia Institute of Technology
BOYLE, LINDA T. 2009; MS, 1994, University of Washington; PhD, 1998, University of Washington
CHAOVALITWONGSE, WANPRACHA 2011; MS, 2000, University of Florida; PhD, 2003, University of Florida
DRUI, ALBERT B * 1999, (Emeritus); MS, 1957, Washington University
GHATE, ARCHIS VIJAY 2012; MS, 2003, Stanford University; PhD, 2006, University of Michigan
MASTRANGELO, CHRISTINA M. 2007; MS, 1990, Arizona State University; PhD, 1993, Arizona State University

## Materials Science and Engineering

## Professors

BORDIA, RAJENDRA KUMAR * 2003; MS, 1981, Cornell University; PhD, 1986, Cornell University

CAO, GUOZHONG 2007; MS, 1985, Shanghai Institute of Ceramics, China; PhD, 1991, Eindhoven University of Technology (Netherlands)
FISCHBACH, DAVID B * 1992, (Emeritus); MS, 1951, Yale University; PhD, 1955, Yale University
FISHER, ROBERT M * 2006, (Research Emeritus); PhD, 1962, Cambridge University (UK)
JEN, ALEX K-Y. 2007; PhD, 1984, University of Pennsylvania

KRISHNAN, KANNAN 2001; MS, 1980, State University of New York (Stony Brook); PhD, 1984, University of California (Berkeley)
OHUCHI, FUMIO * 1996; MS, 1974, Sophia University (Japan); PhD, 1981, University of Florida
POLONIS, DOUGLAS H * 1995, (Emeritus); MA, 1953, University of Toronto (Canada); PhD, 1955, University of British Columbia (Canada)
RAO, Y KRISHNA * 2012, (Emeritus); PhD, 1965, University of Pennsylvania
SARIKAYA, MEHMET 2003; MS, 1979, University of California (Berkeley); PhD, 1982, University of California (Berkeley)
SCOTT, WILLIAM D * 1997, (Emeritus); MS, 1959, University of California (Berkeley); PhD, 1961, University of California (Berkeley)
STOEBE, THOMAS GAINES * 2001, (Emeritus); MS, 1963, Stanford University; PhD, 1965, Stanford University
ZHANG, MIQIN 2010; MAS, 1993, University of Victoria (Canada); PhD, 1999, University of California (Berkeley)

## Associate Professors

BRUSH, LUCIEN N * 1996; PhD, 1988, Carnegie Mellon University
LUSCOMBE, CHRISTINE K. 2012; MA, 2003, University of Cambridge (UK); PhD, 2005, University of Cambridge (UK)
MILLER, ALAN D * 1995, (Emeritus); PhD, 1967, University of Washington
STANG, ROBERT GEORGE * 2001, (Emeritus); MS, 1965, University of California (Los Angeles); PhD, 1972, Stanford University
YANG, JIHUI 2011; MS, 1993, Wayne State University; PhD, 2000, University of Michigan, Ann Arbor
PAUZAUSKIE, PETER JOHN 2010; PhD, 2007, University of California (Berkeley)
ROLANDI, MARCO 2011; MS, 2000, University of London, UK; PhD, 2005, Stanford University

## Mechanical Engineering

## Professors

BALISE, PETER * 1992, (Emeritus); MS, 1950, Massachusetts Institute of Technology
CHALUPNIK, JAMES * 1995, (Emeritus); MS, 1960, University of Texas; PhD, 1964, University of Texas (Austin)
CORLETT, RICHARD * 1996, (Emeritus); PhD, 1963, Harvard University
DAHL, PETER H. * 2010; MS, 1982, University of Washington; PhD, 1989, Massachusetts Institute of Technology DAY, EMMETT E * 1985, (Emeritus); MS, 1947, Massachusetts Institute of Technology
DEPEW, CREIGHTON A * 1995, (Emeritus); MS, 1957, University of California (Berkeley); PhD, 1960, University of California (Berkeley)
DEVASIA, SANTOSH 2005; MS, 1990, University of California (Santa Barbara); PhD, 1993, University of California (Santa Barbara)

EMERY, ASHLEY F * 1981; MS, 1958, University of California (Berkeley); PhD, 1961, University of California (Berkeley)
FABIEN, BRIAN C. * 2008; MPhil, 1990, Columbia University; PhD, 1990, Columbia University
FIREY, JOSEPH C 1985, (Emeritus); MSME, 1941, University of Wisconsin
FRIED, ELIOT 2012; MS, 1989, California Institute of Technology; PhD, 1991, California Institute of Technology
GALLE, KURT R * 1986, (Emeritus); MSME, 1949, Purdue University; PhD, 1951, Purdue University
GANTER, MARK * 2000; MS, 1981, University of Wisconsin; PhD, 1985, University of Wisconsin (Madison)
GAO, DAYONG 2004; PhD, 1991, Concordia College
GARBINI, JOSEPH 1991; MS, 1973, University of Washington; PhD, 1977, University of Washington

GESSNER, FREDERICK B * 2004, (Emeritus); MSME, 1960, Purdue University; PhD, 1964, Purdue University
JORGENSEN, JENS E * 2001, (Emeritus); DSc, 1969, Massachusetts Institute of Technology
KOBAYASHI, ALBERT S * 1997, (Emeritus); MS, 1952, University of Washington; PhD, 1958, Illinois Institute of Technology
KRAMLICH, JOHN C. * 1997; MS, 1975, Washington State University; PhD, 1980, Washington State University
MALTE, PHILIP C * 1981; MSE, 1966, University of Michigan; PhD, 1971, University of Michigan
MAMIDALA, RAMULU * 1994; PhD, 1982, University of Washington
MC CORMICK, NORMAN J. * 2003, (Emeritus); MS, 1961, University of Illinois; PhD, 1965, University of Michigan
PRATT, DAVID T * 1997, (Emeritus); MS, 1962, University of California (Berkeley); PhD, 1968, University of California (Berkeley)
REINHALL, PER G * 2001; MS, 1978, California Institute of Technology; PhD, 1982, California Institute of Technology RILEY, JAMES J * 1986; PhD, 1971, Johns Hopkins University
SHEN, I-YEU (STEVE) * 2002; MS, 1986, National Taiwan University; PhD, 1991, University of California (Berkeley)
TAGGART, RAYMOND * 1991, (Emeritus); PhD, 1956, Queen's University (UK)
TAYA, MINORU 1989; MS, 1973, Northwestern University; PhD, 1977, Northwestern University
TUTTLE, MARK E 1990; MS, 1978, Michigan Technological University; PhD, 1984, Virginia Polytechnic Institute and State University
WILSON, WILLIAM R.D. * 2007, (Emeritus); PhD, 1967, Queen's University of Belfast (Ireland)

## Associate Professors

ADEE, BRUCE H * 1981; MS, 1968, University of California (Berkeley); PhD, 1972, University of California (Berkeley) ALISEDA, ALBERTO 2012; MSc, 2000, University of Califor nia (San Diego); PhD, 2004, University of California (San Diego)
BERG, MARTIN C. * 1993; MSME, 1978, University of Washington; PhD, 1986, Stanford University
BODOIA, JOHN R * 1991, (Emeritus); MS, 1957, Carnegie Institute of Technology; PhD, 1959, Carnegie Institute of Technology
CHALK, WILLIAM 1989, (Emeritus); MSME, 1961, University of Washington
CHUNG, JAEHYUN 2011; MS, 1997, Sungkyunkwan University (Korea); PhD, 2004, Northwestern University

COOPER, JOYCE S. 2012; MS, 1992, Duke University; PhD, 1996, Duke University
FRIED, AMY SHEN 2008; MS, 1996, University of Illinois; PhD, 2000, University of Illinois (Urbana)

HOLT, RICHARD * 1982, (Emeritus); MS, 1957, University of Washington
KIELING, WILLIAM C * 1985, (Emeritus); MSME, 1959, University of Washington
KUMAR, VIPIN 2003; MBA, 1974, University of Rhode Island; PhD, 1988, Massachusetts Institute of Technology LI, JIANGYU 2008; MS, 1998, University of Colorado (Boulder); PhD, 1998, University of Colorado (Boulder)
MESCHER, ANN M. 2003; MS, 1992, Ohio State University; PhD, 1995, Ohio State University
POSNER, JONATHAN D 2011; MS, 1998, University of California (Irvine); PhD, 2001, University of California (Irvine)
SHERRER, ROBERT E * 1987, (Emeritus); MSME, 1953, University of Wisconsin; PhD, 1958, University of Wisconsin (Madison)
STORTI, DUANE W * 1989; MS, 1981, Cornell University; PhD, 1983, Cornell University
WANG, JUNLAN 2008; MS, 1997, Univ. of Science and Technology (China); PhD, 2002, University of Illinois

## Assistant Professors

BAILEY, MICHAEL R. 2010; MSME, 1994, University of Texas (Austin); PhD, 1997, University of Texas (Austin)
SNIADECKI, NATHAN JOHN 2007; MS, 2003, University of Maryland; PhD, 2003, University of Maryland
STEELE, KATHERINE M. 2012; MS, 2009, Stanford University
Senior Lecturer
JONES, JULIA H. 2007; MSME, 1991, University of Washington

## College of the Environment

## Aquatic and Fishery Sciences

## Professors

ANDERSON, JAMES J * 2006, (Research); PhD, 1977, University of Washington
ARMSTRONG, DAVID A. * 1981; MS, 1974, Oregon State University; PhD, 1978, University of California (Davis)
BEAUCHAMP, DAVID A. 2008; MS, 1982, University of Washington; PhD, 1987, University of Washington
BURGNER, ROBERT L * 2000, (Emeritus); PhD, 1958, University of Washington
CHEW, KENNETH K * 2000, (Emeritus); MS, 1958, University of Washington; PhD, 1962, University of Washington
CONQUEST, LOVEDAY L * 1997; MS, 1972, Stanford University; PhD, 1975, University of Washington
DE MASTER, DOUGLAS PAUL * 2005, (Affiliate); PhD, 1978, University of Minnesota
DICKHOFF, WALTON W * 1991; PhD, 1976, University of California (Berkeley)
ERICKSON, ALBERT * 1994, (Emeritus); MS, 1955, Michigan State University; PhD, 1964, Michigan State University
FRIEDMAN, CAROLYN 2011; PhD, 1990, University of California (Davis)
GALLUCCI, VINCENT * 1982; MS, 1966, State University of New York (Buffalo); PhD, 1971, North Carolina State University
HILBORN, RAY * 1992; PhD, 1974, University of British Columbia (Canada)
HORNE, JOHN K. 2011; MSc, 1988, Dalhousie University (Canada); PhD, 1995, Memorial University of Newfoundland
KARR, JAMES * 2006, (Emeritus); MSc, 1967, University of Illinois; PhD, 1970, University of Illinois
KOCAN, RICHARD M * 2001, (Emeritus); MS, 1965, Michigan State University; PhD, 1967, Michigan State University LISTON, JOHN * 1989, (Emeritus); PhD, 1955, University of Aberdeen (UK)
MATHEWS, STEPHEN B * 1998, (Emeritus); MA, 1962,
University of California (Berkeley); PhD, 1967, University of Washington
MILLER, BRUCE S * 2002, (Emeritus); MS, 1965, University of Washington; PhD, 1969, University of Washington
NAIMAN, ROBERT J 1996; MA, 1971, University of California (Los Angeles); PhD, 1974, Arizona State University PARRISH, JULIA 2011; PhD, 1988, Duke University
PIETSCH, THEODORE * 1981; MS, 1969, University of Southern California; PhD, 1973, University of Southern California
PIGOTT, GEORGE M * 2000, (Emeritus); MS, 1955, University of Washington; PhD, 1963, University of Washington
PLISETSKAYA, ERIKA * 1996, (Research Emeritus); PhD, 1958, Academy of Science (Ussr); DSc, 1973, Academy of Science (Ussr)
PUNT, ANDRE * 2007; MSc, 1988, University of Cape Town (South Africa); PhD, 1991, University of Cape Town (South Africa)
QUINN, THOMAS P. * 2000; MS, 1978, University of Washington; PhD, 1981, University of Washington
SCHINDLER, DANIEL E. 2008; MS, 1992, University of Wisconsin; PhD, 1995, University of Wisconsin (Madison)

SIMENSTAD, CHARLES * 2006, (Research); MS, 1971, University of Washington
SKALSKI, JOHN R. * 1995; MS, 1978, Cornell University; PhD, 1985, Cornell University
SMITH, LYNWOOD S * 1993, (Emeritus); MS, 1955, University of Washington; PhD, 1962, University of Washington
SWARTZMAN, GORDON LENI * 2004, (Research Emeritus);
MSEE, 1965, University of Michigan; PhD, 1969, University of Michigan
TAUB, FRIEDA B * 2000, (Emeritus); MS, 1957, Rutgers University; PhD, 1959, Rutgers University
WISSMAR, ROBERT C * 2007, (Emeritus); MS, 1968, University of Idaho; PhD, 1972, University of Idaho
YOUNG, GRAHAM 2004; PhD, 1980, University of Sheffield (UK)

## Associate Professors

ANDERSON, CHRISTOPHER M. 2012; PhD, 2001, California Institute of Technology
BENTZEN, PAUL * 2001, (Affiliate); MSc, 1982, University of British Columbia (Canada); PhD, 1989, McGill University (Canada)
ESSINGTON, TIMOTHY E. 2012; MS, 1995, University of Minnesota; PhD, 1999, University of Wisconsin (Madison)
GRUE, CHRISTIAN E * 1989; MS, 1977, Northern Arizona University; PhD, 1977, Texas A\&M University
HAUSER, LORENZ 2007; MSc, 1990, University of Wales (UK); PhD, 1996, University of Wales (UK)
HERWIG, RUSSELL P * 1999, (Research); MA, 1978, College of William and Mary; PhD, 1989, University of Washington
MANTUA, NATHAN 2006; PhD, 1994, University of Washington
NAISH, KERRY-ANN 2008; MSc, 1990, Rhodes University, South Africa; PhD, 1993, University of Wales (UK)
OLDEN, JULIAN D. 2011; MS, 2000, University of Toronto (Canada); PhD, 2004, Colorado State University
PAULEY, GILBERT B 1998, (Emeritus); MS, 1965, University of Washington; PhD, 1971, University of California (Irvine) VANBLARICOM, GLENN R. * 1993; PhD, 1978, University of California (San Diego)

## Assistant Professors

BRANCH, TREVOR 2010; MSc, 1998, University of Cape Town (South Africa); PhD, 2004, University of Washington HORNER-DEVINE, MARIE CLAIR 2006; PhD, 2004, Stanford University
LAIDRE, KRISTIN L. 2011; PhD, 2003, University of Washington
ROBERTS, STEVEN 2006; PhD, 2002, University of Notre Dame

## Lecturer

JENSEN, GREGORY 2009; PhD, 1990, University of Washington

## Atmospheric Sciences

## Professors

ACKERMAN, THOMAS P 2007; MS, 1971, University of Washington; PhD, 1976, University of Washington BATTISTI, DAVID S * 2008; MS, 1981, University of Washington; PhD, 1988, University of Washington
BRETHERTON, CHRISTOPHER S. * 2008; PhD, 1984, Massachusetts Institute of Technology
BROWN, ROBERT A * 2005, (Research Emeritus); MS, 1962, University of California (Berkeley); PhD, 1969, University of Washington
BUSINGER, JOOST A * 1983, (Emeritus); PhD, 1954, University of Utrecht (Netherlands)

HOUZE, ROBERT A. * 2008; MS, 1969, Massachusetts Institute of Technology; PhD, 1972, Massachusetts Institute of Technology
JAEGLE, LYATT * 2011; MS, 1992, California Institute of Technology; PhD, 1996, California Institute of Technology
MASS, CLIFFORD F * 2008; PhD, 1978, University of Washington
OVERLAND, JAMES E * 1983, (Affiliate); MS, 1971, University of Washington; PhD, 1973, New York University
RADKE, LAWRENCE F. * 1964, (Affiliate); MS, 1967, University of Washington
SARACHIK, EDWARD * 2007, (Emeritus); MS, 1963, Brandeis University; PhD, 1966, Brandeis University
WALLACE, JOHN M * 1982; PhD, 1966, Massachusetts Institute of Technology
WARREN, STEPHEN G * 2008; MA, 1969, Harvard University; PhD, 1973, Harvard University

## Associate Professors

BATES, TIMOTHY S * 2001, (Affiliate); MS, 1978, University of Washington; PhD, 1988, University of Washington
BITZ, CECILIA 2009; MS, 1990, University of Washington; PhD, 1997, University of Washington
FRIERSON, DARGAN M 2012; MS, 2002, Princeton University; PhD, 2005, Princeton University
HARRISON, HALSTEAD * 2001, (Emeritus); PhD, 1960, Stanford University
THORNTON, JOEL A. 2012; PhD, 2002, University of California (Berkeley)
WOOD, ROBERT 2010; PhD, 1997, University of Manchester (UK)

## Assistant Professors

SUESS, BECKY ALEXANDER 2008; PhD, 2002, University of California (San Diego)
SWANN, ABIGAIL 2012; MA, 2005, Columbia University; PhD, 2010, University of California (Berkeley)

## Senior Lecturer

MC MURDIE, LYNN A 2009; MS, 1983, University of Washington; PhD, 1989, University of Washington

## Earth and Space Sciences

## Professors

ADAMS, JOHN B * 1998, (Emeritus); MS, 1958, University of Washington; PhD, 1961, University of Washington
ATWATER, BRIAN F * 2001, (Affiliate); MS, 1974, Stanford University; PhD, 1980, University of Delaware
BAKER, MARCIA * 2004, (Emeritus); MS, 1960, Stanford University; PhD, 1971, University of Washington
BERGANTZ, GEORGE W * 2000; MS, 1985, Georgia Institute of Technology; PhD, 1988, Johns Hopkins University BOOKER, JOHN R 2011, (Emeritus); MS, 1965, University of California (San Diego); PhD, 1968, University of California (San Diego)
BOURGEOIS, JOANNE * 2002; PhD, 1980, University of Wisconsin (Madison)
BROWN, J. MICHAEL 1993; MS, 1978, University of Washington; PhD, 1980, University of Minnesota
BUICK, ROGER 2005; PhD, 1986, University of West Australia

CATLING, DAVID C. 2012; DPhil, 1994, Oxford University (UK)
CHENEY, ERIC S. * 2005, (Emeritus); PhD, 1964, Yale University
COWAN, DARREL S * 1982; PhD, 1972, Stanford University CREAGER, KENNETH C 1999; PhD, 1984, University of California (San Diego)
CROSSON, ROBERT S 2004, (Emeritus); MS, 1963, University of Utah; PhD, 1966, Stanford University
EVANS, BERNARD W * 2003, (Emeritus); PhD, 1959, 0xford University (UK)
GHIORSO, MARK S * 2007, (Affiliate); MA, 1978, University of California (Berkeley); PhD, 1980, University of California (Berkeley)
GHOSE, SUBRATA 2005, (Emeritus); MS, 1959, University of Chicago; PhD, 1959, University of Chicago
GILLESPIE, ALAN R. 1997; MS, 1977, California Institute of Technology; PhD, 1982, California Institute of Technology
HALLET, BERNARD * 1986; PhD, 1975, University of Cali-
fornia (Los Angeles)
HOLZWORTH, ROBERT 1988; MA, 1974, University of California (Berkeley); PhD, 1977, University of California (Berkeley)
HOUSTON, HEIDI B 2006; MS, 1980, University of Wiscon$\sin$ (Madison); PhD, 1987, California Institute of Technology IRVING, ANTHONY J * 2009, (Affiliate); PhD, 1972, AustraIian National University
IVERSON, RICHARD M * 2002, (Affiliate); MS, 1981, Stanford University; PhD, 1984, Stanford University
MAYKUT, GARY * 2004, (Research Emeritus); PhD, 1969, University of Washington
MC CALLUM, IAN S * 2009, (Emeritus); PhD, 1968, University of Chicago
MERRILL, RONALD T 2005, (Emeritus); MS, 1961, University of Michigan; PhD, 1967, University of California (Berkeley)
MONTGOMERY, DAVID R * 2000; PhD, 1991, University of California (Berkeley)
NELSON, BRUCE K. 1999; MS, 1980, University of Kansas; PhD, 1985, University of California (Los Angeles)
PARKS, GEORGE K * 2000, (Emeritus); PhD, 1966, University of California (Berkeley)
PORTER, STEPHEN C 2002, (Emeritus); MS, 1958, Yale University; PhD, 1962, Yale University
RAYMOND, CHARLES F * 2002, (Emeritus); PhD, 1969, California Institute of Technology

RENSBERGER, JOHN M 2004, (Emeritus); MA, 1961, University of California; PhD, 1967, University of California
ROE, GERARD H 2012; PhD, 1999, Massachusetts Institute of Technology
SMITH, STEWART W * 1994, (Emeritus); MS, 1958, California Institute of Technology; PhD, 1961, California Institute of Technology
STEIG, ERIC J 2008; MS, 1992, University of Washington; PhD, 1996, University of Washington
STUIVER, MINZE * 1998, (Emeritus); PhD, 1958, University of Groningen (Netherlands)
SWANSON, DONALD A * 2001, (Affiliate); PhD, 1964, Johns Hopkins University
VIDALE, JOHN E 2006; PhD, 1987, California Institute of Technology
WADDINGTON, EDWIN D 1999; MSc, 1973, University of Alberta, Canada; PhD, 1981, University of British Columbia (Canada)
WINGLEE, ROBERT M 2000; PhD, 1984, University of Sydney (Australia)

## Associate Professors

BACHMANN, OLIVIER 2012; MSc, 1997, University of Geneva (Switzerland); PhD, 2000, University of Geneva (Switzerland)
NESBITT, ELIZABETH A. * 2007; PhD, 1982, University of California (Berkeley)
STONE, JOHN O.H. 2002; PhD, 1986, Cambridge University (UK)
VANCE, JOSEPH A * 1990, (Emeritus); PhD, 1957, University of Washington

## Assistant Professors

CRIDER, JULIET G 2010; MS, 1993, University of Washington; PhD, 1998, Stanford University
DUVALL, ALISON R 2012; MS, 2003, University of California (Santa Barbara); PhD, 2011, University of Michigan
GORMAN-LEWIS, DREW J 2008; PhD, 2006, University of Notre Dame
HUNTINGTON, KATHARINE W 2012; PhD, 2006, Massachusetts Institute of Technology

## Senior Lecturer

SWANSON, TERRY W 2012; MA, 1989, University of California (Davis); PhD, 1994, University of Washington

## Lecturers

BRAND, BRITTANY D 2011; MS, 2004, Boise State University; PhD, 2008, Arizona State University
HARRELL, MICHAEL D 2012; MS, 1994, University of Oregon; PhD, 2002, University of Washington
WALTERS, STEVEN 2012; MS, 1994, Purdue University; PhD, 2002, University of Maryland

## Program on the Environment

## Lecturers

HELMIERE, FREDERICA R 2012; BA, 2004, Dartmouth College
MCDONALD, PATRICK S. 2012; PhD, 2006, University of Washington
SOLIE, STACEY 2011; MS, 2006, Columbia University STRAUS, KRISTINA M 2012; PhD, 2010, University of Washington
STYLES, MEGAN 2012; MA, 2006, University of Washington; PhD, 2011, University of Washington
WHEAT, ELIZABETH E 2012; MA, 2001, New York University; PhD, 2011, University of Washington
WILDERMUTH, TODD 2012; MS, 1999, University of Illinois; PhD, 2008, University of Illinois

## Environmental and Forest Sciences

## Professors

AGEE, JAMES K * 2007, (Emeritus); MS, 1968, University of California (Berkeley); PhD, 1973, University of California (Berkeley)
ALLAN, G GRAHAM 1973; PhD, 1956, University of Glasgow (UK); DSc, 1971, University of Strathclyde (UK)
BARE, B BRUCE * 1981; MS, 1965, University of Minnesota; PhD, 1969, Purdue University
BOLTON, SUSAN M 2004; MS, 1985, New Mexico State University; PhD, 1991, New Mexico State University
BRADLEY, GORDON A 1981; MLA, 1972, University of California (Berkeley); PhD, 1986, University of Michigan
BRIGGS, DAVID G * 2012, (Emeritus); MF, 1968, Yale University; PhD, 1980, University of Washington
BRUBAKER, LINDA B 2006, (Emeritus); MS, 1967, University of Michigan; PhD, 1973, University of Michigan
COLE, DALE W * 1997, (Emeritus); MS, 1957, University of Wisconsin (Madison); PhD, 1963, University of Washington DELUCA, THOMAS H 2012; MS, 1987, Montana State University; PhD, 1993, Iowa State University
DRIVER, CHARLES H * 1997, (Emeritus); MSF, 1950, University of Georgia; PhD, 1954, Louisiana State University EASTIN, IVAN 2004; MSc, 1989, University of Washington; PhD, 1992, University of Washington
EDMONDS, ROBERT L 2012, (Emeritus); MSF, 1968, University of Washington; PhD, 1971, University of Washington EWING, KERN 2003; MS, 1978, University of Washington; PhD, 1982, University of Washington
FORD, E DAVID * 1985; PhD, 1968, University College, London (UK)
FRANKLIN, JERRY F. 1986; MS, 1961, Oregon State University; PhD, 1966, Washington State University
FRIDLEY, JAMES 1995; MS, 1980, Michigan State University; PhD, 1984, University of Washington
FRITSCHEN, LEO J * 1993, (Emeritus); MS, 1958, Kansas State University; PhD, 1960, Iowa State University
GARA, ROBERT I 2007, (Emeritus); MS, 1962, Oregon State University; PhD, 1964, Oregon State University
GLAWE, DEAN 2006; MS, 1978, Washington State University; PhD, 1982, Washington State University
GRAUMLICH, LISA J 2010; MS, 1978, University of Wisconsin; PhD, 1985, University of Washington
GREULICH, FRANCIS E 1982; MS, 1967, University of California (Berkeley); PhD, 1976, University of California (Berkeley)
GUSTAFSON, RICHARD ROY * 1996; PhD, 1982, University of Washington
HALPERN, CHARLES * 2002, (Research); PhD, 1987, Oregon State University
HARRISON, ROBERT B. 1993; MS, 1981, University of New Hampshire; PhD, 1985, Auburn University
HATHEWAY, WILLIAM H * 1986, (Emeritus); MF, 1954, Harvard University; PhD, 1956, Harvard University
HINCKLEY, THOMAS M * 2012, (Emeritus); PhD, 1971, University of Washington
HODGSON, KEVIN T * 2001; MS, 1980, Carnegie Mellon University; PhD, 1986, University of Washington
JOHNSON, JAY A * 2009, (Emeritus); MS, 1970, State University of New York (Syracuse); PhD, 1973, University of Washington
LEE, ROBERT G 2007, (Emeritus); PhD, 1973, University of California (Berkeley)
LIPPKE, BRUCE R * 2009, (Emeritus); MSEE, 1959, New Mexico State University; MSIE, 1966, University of California (Berkeley)

MANUWAL, DAVID 2008, (Emeritus); MS, 1968, University of Montana; PhD, 1972, University of California (Los Angeles)
MARZLUFF, JOHN M. 2003; MSc, 1983, Northern Arizona University; PhD, 1987, Northern Arizona University
MCKEAN, WILLIAM T * 2007, (Emeritus); PhD, 1970, University of Washington
PEREZ-GARCIA, JOHN * 2006; MS, 1982, University of Puerto Rico; DF, 1990, Yale University
PETERSON, DAVID L * 2012, (Affiliate); MS, 1977, University of Illinois; PhD, 1980, University of Illinois
PICKFORD, STEWART G * 1999, (Emeritus); MSF, 1966, University of Washington; PhD, 1972, University of Washington
RAEDEKE, KENNETH J * 2006, (Affiliate); PhD, 1979, University of Washington
REICHARD, SARAH E. 2010; MS, 1989, University of Washington; PhD, 1994, University of Washington
RYAN, CLARE 2009; MS, 1990, University of Michigan, Ann Arbor; PhD, 1996, University of Michigan, Ann Arbor
SCHIESS, PETER 1981; MS, 1968, Swiss Federal Institute of Technology; PhD, 1975, University of Washington
SCHREUDER, GERARD FRITZ 2007, (Emeritus); MS, 1967, University of North Carolina; PhD, 1968, Yale University
SPRUGEL, DOUGLAS GEORGE * 1990; MPhil, 1974, Yale University; PhD, 1974, Yale University
STETTLER, REINHARD F. * 1995, (Emeritus); Diploma, 1955, Swiss Federal Institute of Technology; PhD, 1963, University of California (Berkeley)
TABER, RICHARD D * 1986, (Emeritus); MS, 1949, University of Wisconsin; PhD, 1951, University of California (Berkeley)
THORUD, DAVID B * 2002, (Emeritus); MS, 1960, University of Minnesota; PhD, 1964, University of Minnesota
TUKEY, HAROLD B * 1997, (Emeritus); MS, 1956, Michigan State University; PhD, 1958, Michigan State University
VOGT, KRISTIINA 2000; MS, 1974, New Mexico State University; PhD, 1976, New Mexico State University
WAGGENER, THOMAS R * 2000, (Emeritus); MA, 1965, University of Washington; PhD, 1966, University of Washington
WEST, STEPHEN D 2002; MS, 1974, University of Alaska; PhD, 1979, University of California (Berkeley)
WOTT, JOHN A 2007, (Emeritus); MS, 1966, Cornell University; PhD, 1968, Cornell University
ZABOWSKI, DARLENE 2006; MS, 1983, University of Washington; PhD, 1988, University of Washington

## Associate Professors

BAKKER, JONATHAN 2012; MSc, 1996, University of Regina (Saskatchewan); PhD, 2005, Northern Arizona University
BURA, RENATA 2012; MSc, 2000, University of Toronto (Canada); PhD, 2004, University of British Columbia (Canada)
DOTY, SHARON L 2009; PhD, 1995, University of Washington
ETTL, GREGORY J 2012; MAT, 1989, University of Washington; PhD, 1995, University of Washington
KIM, SOO-HYUNG 2012; MS, 1994, Seoul National University (Korea); PhD, 2001, University of California (Davis)
LAWLER, JOSHUA J 2010; MS, 1997, Utah State University; PhD, 2000, Utah State University
PAUN, DOROTHY A * 1999; MBA, 1984, Catholic University of Leuven (Belgium); PhD, 1993, University of Oregon
RUSTAGI, KRISHNA P * 1997, (Emeritus); MF, 1971, Yale University; PhD, 1973, Yale University
TURNBLOM, ERIC 2002; MSc, 1986, University of British Columbia (Canada); PhD, 1994, University of Minnesota
VOGT, DANIEL 2000; MS, 1976, New Mexico State University; PhD, 1987, University of Washington

## Assistant Professors

ASAH, STANLEY TANYI 2009; MS, 2003, University of Minnesota; PhD, 2006, University of Minnesota
MOSKAL, LUDMILA M. 2006; MSc, 2000, University of Calgary (Canada); PhD, 2005, University of Kansas
PACHECO DE RESENDE, FERNAN 2012; MS, 2008, University of Michigan, Ann Arbor; PhD, 2009, University of Michigan, Ann Arbor
RABOTYAGOV, SERGEY S. 2007; MS, 2002, Iowa State University; PhD, 2007, Iowa State University
TORGERSEN, CHRISTIAN E. 2012; MS, 1996, Oregon State University; PhD, 2002, Oregon State University
TOTH, SANDOR F. 2007; MS, 2002, Shinshu University (Japan); PhD, 2005, Pennsylvania State University
WIRSING, AARON 2008; MS, 2001, University of Idaho; PhD, 2005, Simon Fraser University, B.C. (Canada)

## Lecturer

LEWIS, MARK S. 2012; PhD, 1986, University of Washington

## Marine and Environmental Affairs

## Professors

ALVERSON, DAYTON L * 2001, (Affiliate); PhD, 1967, University of Washington
CHRISTIE, PATRICK JOHN 2012; MS, 1993, University of Michigan, Ann Arbor; PhD, 1999, University of Michigan, Ann Arbor
HUPPERT, DANIEL D. 2011, (Emeritus); MA, 1972, University of Washington; PhD, 1975, University of Washington
LESCHINE, THOMAS M 2003; MA, 1970, University of Pittsburgh; PhD, 1975, University of Pittsburgh
MILES, EDWARD L * 2010, (Emeritus); PhD, 1965, University of Denver
MILLER, MARC * 1984; MA, 1972, University of California (San Diego); PhD, 1974, University of California (Irvine)

## Associate Professors

COPPING, ANDREA * 2001, (Affiliate); MS, 1977, University of Washington; PhD, 1982, University of Washington
FLUHARTY, DAVID L * 1999; MS, 1972, University of Washington; PhD, 1977, University of Michigan
KLINGER, TERRIE 2007; MSc, 1984, University of British Columbia (Canada); PhD, 1988, University of California (San Diego)

## Assistant Professor

JENKINS, LEKELIA D 2011; PhD, 2006, Duke University

## Lecturers

BRYANT, BETH C 2012; MA, 1994, University of Washington; JD, 1996, University of Washington
PAVIA, ROBERT 2010; MS, 1979, Oregon State University; PhD, 1989, University of Washington

## Oceanography

## Professors

AAGAARD, KNUT * 2009, (Emeritus); MS, 1964, University of Washington; PhD, 1966, University of Washington
ANDERSON, GEORGE C 1983, (Emeritus); MA, 1949, University of British Columbia (Canada); PhD, 1954, University of Washington
ARMBRUST, E. VIRGINIA 2006; PhD, 1990, Massachusetts Institute of Technology
BANSE, KARL * 1995, (Emeritus); DOCT, 1955, University of Kiel (Germany)

BAROSS, JOHN A * 1995; MA, 1966, San Francisco State; PhD, 1973, University of Washington
CANNON, GLENN A. * 2001, (Affiliate); MA, 1965, Johns Hopkins University; PhD, 1969, Johns Hopkins University CARPENTER, ROY * 2006, (Emeritus); PhD, 1968, University of California (San Diego)
CREAGER, JOE S * 1991, (Emeritus); MS, 1953, Texas A\&M University; PhD, 1958, Texas A\&M University
DELANEY, JOHN R. * 1982; MA, 1967, University of Virginia; PhD, 1977, University of Arizona
DEMING, JODY W * 1995; PhD, 1981, University of Maryland
DEVOL, ALLAN * 1990; PhD, 1975, University of Washington

RATTRAY, MAURICE * 1985, (Emeritus); MS, 1947, California Institute of Technology; PhD, 1951, California Institute f Technology
RHINES, PETER B. * 1984; MS, 1964, Massachusetts Institute of Technology; PhD, 1967, Cambridge University (UK)
RICHEY, JEFFREY E * 1990; PhD, 1973, University of California (Davis)
RISER, STEPHEN C 2009; MS, 1974, Massachusetts Institute of Technology; PhD, 1980, University of Rhode Island STERNBERG, RICHARD * 2001, (Emeritus); MS, 1961, University of Washington; PhD, 1965, University of Washington

THOMPSON, LUANNE 2010; MA, 1986, Harvard University; PhD, 1990, Woods Hole Oceanographic Institution
WILCOCK, WILLIAM S D 2008; MSc, 1986, Imperial College; PhD, 1992, Massachusetts Institute of Technology

## Associate Professors

DUXBURY, ALYN C * 2003, (Emeritus); MS, 1956, University of Washington; PhD, 1963, Texas A\&M University

GRUNBAUM, DANIEL 2004; MSME, 1987, University of Washington; PhD, 1991, Cornell University
HAUTALA, SUSAN L 2003; PhD, 1992, University of Washington
NGALLS, ANITRA E. 2011; MS, 1998, State University of New York (Stony Brook); PhD, 2002, State University of New York (Stony Brook)
KAWASE, MITSUHIRO 1994; MA, 1983, Princeton University; PhD, 1986, Princeton University

OGSTON, ANDREA S 2006; MS, 1993, University of Washington; PhD, 1997, University of Washington
ROCAP, GABRIELLE L. 2007; PhD, 2000, Massachusetts Institute of Technology

SACHS, JULIAN P. 2006; PhD, 1997, Massachusetts Institute of Technology
WARNER, MARK J * 1998; PhD, 1988, University of California (San Diego)
WILLIAMS, KEVIN L. 2009; MS, 1983, Washington State University; PhD, 1985, Washington State University

WOODGATE, REBECCA A 2010; PhD, 1994, University of Oxford (UK)

## Assistant Professors

KEISTER, JULIE E 2008; MS, 1996, University of Maryland; PhD, 2008, Oregon State University
MORRIS, ROBERT 2007; PhD, 2004, Oregon State University

SOLOMON, EVAN A 2009; PhD, 2007, Scripps Oceanographic Institution

## Senior Lecturer

LOGSDON, MILES G. 2008; MS, 1978, Oklahoma State Uni-
versity; PhD, 1997, University of Washington

## Lecturer

NUWER, MIKELLE 2010; MS, 2004, University of Washington; PhD, 2008, University of Washington

## The Information School

## Professors

BENNE, MAE M * 1988, (Emeritus); MS, 1955, University of Illinois
BRUCE, HARRY 2005; MLibr, 1993, University of New S. Wales (Australia); PhD, 1996, University of New South Wales(Australia)
DRESANG, ELIZA T 2009; MLS, 1966, University of California (Los Angeles); PhD, 1981, University of Wisconsin (Madison)
EISENBERG, MICHAEL. 2001; MLS, 1973, State University of New York (Albany); PhD, 1986, Syracuse University
FIDEL, RAYA * 2011, (Emeritus); MLS, 1976, Hebrew University (Israel); PhD, 1982, University of Maryland
FISHER, KAREN E 2009; MLIS, 1991, University of Western Ontario (Canada); PhD, 1997, University of Western Ontario (Canada)
FRIEDMAN, BATYA * 2004; PhD, 1988, University of California (Berkeley)
HIATT, PETER * 1998, (Emeritus); MLS, 1957, Rutgers University; PhD, 1963, Rutgers University
LEVY, DAVID M 2001; MS, 1974, Stanford University; PhD, 1979, Stanford University
MASON, ROBERT M 2005; MS, 1965, Massachusetts Institute of Technology; PhD, 1973, Georgia Institute of Technology

## Associate Professors

CARLYLE, ALLYSON 2002; MLS, 1986, University of California (Los Angeles); PhD, 1994, University of California (Los Angeles)
HENDRY, DAVID 2008; MSc, 1989, University of Guelph (Canada); PhD, 1996, The Robert Gordon University (Scotland)
JANES, JOSEPH W. 2003; MLS, 1983, Syracuse University; PhD, 1989, Syracuse University
JOHNSON, RONALD A. 2011; MA, 1972, University of Chicago; MS, 1975, University of Southern California
MCDONALD, DAVID W 2008; MS, 1995, University of California (Irvine); PhD, 2000, University of California (Irvine)
METOYER, CHERYL 2007; MA, 1969, Immaculate Heart College, Ca; PhD, 1976, Indiana University
NAHON, KARINE 2010; MSc, 2000, Tel Aviv University (Israel); PhD, 2001, Tel Aviv University (Israel)
PRATT, WANDA 2005; MS, 1991, University of Texas (Austin); PhD, 1999, Stanford University
SCHOLL, HANS JOCHEN 2008; MBA, 1997, Graduate School of Business Admin Zurich Switzerland; PhD, 2002, State University of New York (Albany)
SUTTON, STUART * 2010, (Emeritus); MLS, 1987, University of California (Berkeley); PhD, 1991, University of California (Berkeley)
TAYLOR, HAZEL A 2012; MSc, 1978, University of Otago (New Zealand); PhD, 2004, Queensland University of Technology(Australia)
WOBBROCK, JACOB 0 2011; MS, 2000, Stanford University; PhD, 2006, Carnegie Mellon University

## Assistant Professors

DAVIS, KATHARINE E. 2012; EdD, 2011, Harvard University GOMEZ, RICARDO J 2008; MA, 1992, Universite du Quebec; PhD, 1997, Cornell University
KO, ANDREW J 2008; PhD, 2008, Carnegie Mellon University
LEE, JIN HA 2009; MS, 2002, University of Illinois; PhD, 2008, University of Illinois
NELSON, JEROLD A * 2000, (Emeritus); MA, 1964, University of Minnesota; PhD, 1971, University of California (Berkeley)

SOPER, MARY E * 1996, (Emeritus); MS, 1963, University of Illinois; PhD, 1972, University of Illinois
TENNIS, JOSEPH T. 2007; MLIS, 1999, Indiana University; PhD, 2005, University of Washington

## Senior Lecturers

BARKER, SCOTT F 2000; MS, 1987, Syracuse University BOIKO, ROBERT B. 2007; MS, 1985, University of Utah
BRUCE, LORRAINE 2007; BS, 1977, Riverina College of Advanced Education, Australia
CRANDALL, MICHAEL D. 2005; MLS, 1986, University of Washington
GERSHENFELD, NANCY 2009; MLS, 1991, University of Washington
HILL, TRENT G. 2007; PhD, 1994, Duke University; MLIS, 2002, University of Washington
SAXTON, MATTHEW 2007; MLS, 1994, University of California (Los Angeles); PhD, 2000, University of California (Los Angeles)

## Lecturers

COKER, FRANK 2012; MS, 1975, Frostburg State University, Maryland
DEL VECCHIO, STEPHEN V. 2012; MS, 1987, Columbia University; MS, 2001, Polytechnic Institute of Brooklyn
DOANE, MICHAEL 2012; MA, 1985, San Francisco State; MLIS, 2005, University of Washington
DOOCY, MORGAN 2011; BS, 2011, University of Washington
FUSCO, LISA M. 2004; MLS, 1997, Kent State University
GOLDSMITH, ANNETTE 2012; MLS, 1983, University of Toronto (Canada); PhD, 2009, Florida State University
HAY, GREGORY THOMAS 2012; BA, 2005, University of Washington
LARSON, ROBERT E. 2012; MBA, 1984, University of Washington
LYSENKO, VOLODYMYR 2012; MS, 2005, Syracuse University; PhD, 2011, University of Washington
NICKLAS, ROBERT B 2012; MA, 1977, University of Pittsburgh
PEARL, NANCY 2012; MLS, 1967, University of Michigan, Ann Arbor; MA, 1976, Oklahoma State University
SANCHEZ, MARIO E 2012; MS, 2010, University of Washington
SARAT CHANDRA, MALA 2011; MBA, 1977, University of Pittsburgh
WILLIAMS, HELENE C. 2012; MA, 1987, Purdue University; MLS, 1989, Indiana University

## Interschool or Intercollege Programs

## Bioengineering

## Professors

AUTH, DAVID C * 2001, (Affiliate); MS, 1966, Georgetown University; PhD, 1969, Georgetown University
BARRETT, PETER HUGH RUSSEL * 2008, (Affiliate); PhD,
1989, University of Adelaide (Australia)
BASSINGTHWAIGHTE, JAMES 1982; MD, 1955, University of Toronto (Canada); PhD, 1964, Mayo Medical School/ Graduate School
BRYERS, JAMES D 2012; MSc, 1976, University of Idaho; PhD, 1980, Rice University
DAGGETT, VALERIE D. 2007; PhD, 1990, University of California (San Francisco)
GIACHELLI, CECILIA 2004; PhD, 1987, University of Washington
GUY, ARTHUR W * 1991, (Emeritus); MSEE, 1957, University of Washington; PhD, 1966, University of Washington HORBETT, THOMAS A * 2010, (Emeritus); PhD, 1970, University of Washington
HUNTSMAN, LEE L * 2005; PhD, 1968, University of Pennsylvania
LAI, HENRY C 2012, (Emeritus); PhD, 1977, University of Washington
MARTYN, DONALD A * 2006, (Research Emeritus); PhD, 1975, University of Southern California
O'DONNELL, MATTHEW 2006; PhD, 1976, University of Notre Dame

POLLACK, GERALD H 1999; PhD, 1968, University of Pennsylvania
RATNER, BUDDY D 1986; PhD, 1972, Polytechnic Institute of Brooklyn
REGNIER, MICHAEL 2009; MS, 1983, Portland State University; PhD, 1991, University of Southern California
SANDERS, JOAN ELIZABETH * 2011; MSME, 1985, Northwestern University; PhD, 1991, University of Washington
SPELMAN, FRANCIS A * 2001, (Emeritus); MSEE, 1968, University of Washington; PhD, 1975, University of Washington
STAYTON, PATRICK 2004; MS, 1989, University of Illinois; PhD, 1989, University of Illinois

WANG, RUIKANG 2010; MSc, 1990, Tianjin University (China); PhD, 1995, University of Glasgow (UK)
YAGER, PAUL 2007; PhD, 1980, University of Oregon

## Associate Professors

FOLCH, ALBERT 2006; PhD, 1994, University of Barcelona (Spain)
GAO, XIAOHU 2011; PhD, 2004, Indiana University
PUN, SUZIE H 2010; MS, 1998, California Institute of Technology; PhD, 2000, California Institute of Technology
SAURO, HERBERT M 2011; MSc, 1982, University of York (UK); PhD, 1986, Oxford University (UK)
THOMAS, WENDY 2012; MS, 2003, University of Washing-
ton; PhD, 2003, University of Washington

## Assistant Professors

KIM, DEOK-HO 2011; MS, 2000, Seoul National University (Korea); PhD, 2010, Johns Hopkins University
RATNER, DANIEL M. 2007; PhD, 2004, Massachusetts Institute of Technology
WOODROW, KIM A. 2010; MS, 2001, Stanford University; PhD, 2006, Stanford University

## Senior Lecturer

NEILS, CHRISTOPHER 2012; MS, 1998, University of Texas (Austin); PhD, 2000, University of Texas (Austin)

## Lecturers

COREY, MICHAEL J. 2012; MA, 1978, Antioch University; PhD, 1997, University of California (Berkeley)
TAYLOR, ALYSSA 2010; BS, 2003, University of California (Davis)
WONG, ROBERTA J 2011; PharmD, 1983, University of California (San Francisco)

## Global Health

## Professors

CARTER, WILLIAM G * 2009, (Affiliate); PhD, 1974, University of California (Davis)
CELUM, CONNIE L. 2007; MD, 1984, University of California (San Francisco); PhD, 1989, University of Washington
GLOYD, STEPHEN S. 2009; MD, 1973, University of Chicago; MPH, 1983, Harvard University
HAIGWOOD, NANCY L. * 2009, (Affiliate); PhD, 1980, University of North Carolina, Chapel Hill
HAKOMORI, SEN-ITIROH 2009, (Emeritus); MD, 1951, Tohoku Imperial University (Japan); DrMeds, 1956, Tohoku Imperial University (Japan)
HOLMES, KING K. 2006; MD, 1963, Cornell University; PhD, 1967, University of Hawaii
JAMISON, DEAN T 2011; MS, 1967, Stanford University; PhD, 1970, Harvard University
JOHN STEWART, GRACE C. 2010; MPH, 1995, University of Washington; PhD, 2000, University of Washington
KENNY, GEORGE E * 2009, (Emeritus); MS, 1957, University of North Dakota; PhD, 1961, University of Minnesota
LOZANO, RAFAEL 2009; MD, 1979, Universidad Autonoma de Yucatan, Mexico
MARTIN, ROBERT 2010; MS, 1976, Michigan Technological University; MPH, 1977, University of North Carolina, Chapel Hill
MOKDAD, ALI H. 2009; PhD, 1997, Emory University
MURRAY, CHRISTOPHER J 2007; DPhil, 1987, Oxford University (UK); MD, 1991, Harvard University
PARSONS, MARILYN * 2009, (Affiliate); PhD, 1979, Stanford University
REED, STEVEN G. * 2009, (Affiliate); PhD, 1979, University of Montana
SHERMAN, DAVID R. * 2010, (Affiliate); PhD, 1987, Vanderbilt University
STUART, KENNETH DANIEL * 2009, (Affiliate); MA, 1965, Wesleyan University; PhD, 1969, University of lowa
WASSERHEIT, JUDITH N. 2006; MD, 1978, Harvard University; MPH, 1989, Johns Hopkins University

## Associate Professors

BAETEN, JARED 2011; PhD, 2001, University of Washington; MD, 2003, University of Washington
DOWNER, ANN E. 2012; MS, 1984, University of Washington
GAKIDOU, EMMANUELA 2007; MS, 1997, Harvard University; PhD, 2001, Harvard University
KURATH, GAEL * 2009, (Affiliate); MS, 1980, Oregon State University; PhD, 1984, Oregon State University
LIM, STEPHEN SZE-PING 2010; PhD, 2005, Monash University (Australia)
LINGAPPA, JAIRAM R. 2009; PhD, 1987, Harvard University; MD, 1991, University of California (San Francisco) LINGAPPA, JAISRI * 2009; PhD, 1985, Harvard University; MD, 1987, University of Massachusetts

MONTANO, DANIEL E * 2009, (Affiliate); MA, 1979, University of Illinois; PhD, 1983, University of Washington
NAGHAVI, MOHSEN 2009; MD, 1979, Tehran University (Iran); PhD, 1996, Tehran University (Iran)
PFEIFFER, JAMES T. 2009; MPH, 1997, University of California (Los Angeles); PhD, 1997, University of California (Los Angeles)

## Assistant Professors

BABIGUMIRA, JOSEPH BRIAN 2011; MS, 2004, Case Western Reserve University; PhD, 2011, University of Washington
CHUNG, MICHAEL H. 2009; MD, 1998, University of Chicago; MPH, 1998, Harvard University
FLAXMAN, ABRAHAM DAVID 2010; PhD, 2006, Carnegie Mellon University
FRAHM, NICOLE 2010; MS, 1996, Technical University of Braunschweig; PhD, 2003, University of Hamburg (Germany)
GIMBEL-SHERR, KENNETH 2009; MPH, 2000, University of Washington
HAGOPIAN, AMY 2009; MHA, 1983, University of Washington; PhD, 2003, University of Washington
O'MALLEY, GABRIELLE E. 2009; MA, 1989, Johns Hopkins University; PhD, 2000, University of Washington
SLYKER, JENNIFER A. 2012; MSc, 1998, Oxford University (UK); PhD, 2007, Open University (UK)
WALSON, JUDD L. 2009; MD, 2000, Tufts University; MPH, 2000, Tufts University
WANG, HAIDONG 2011; MA, 2004, University of Pennsylvania; PhD, 2008, University of Pennsylvania

## Senior Lecturers

GONZALES, VIRGINIA 2009; MPH, 1974, University of California (Berkeley); EdD, 1988, Harvard University
MERCER, MARY ANNE * 2009; MPH, 1981, Johns Hopkins University

## Lecturers

HANLON, MICHAEL 2010; MA, 2008, University of Washington; PhD, 2010, University of Washington
KUMAR, SANTOSH 2012; MA, 2006, University of Houston; PhD, 2009, University of Houston

## School of Law

## Professors

MORGAN, PHILIP G 2008; MS, 1975, University of Colorado (Boulder); MD, 1980, University of Colorado (Denver) OPP, MARK R 2010; MS, 1983, Walla Walla College; PhD, 1987, Washington State University
ORR, ROSEMARY J 2009; MBBCh, 1967, Queen's University of Belfast (Ireland)
OXORN, DONALD C. 2006; MD, 1978, McGill University (Canada)

PALERMO, TONYA M 2010; PhD, 1998, Case Western Reserve University
PAVLIN, D JANET 2004; MSc, 1966, University of Manitoba (Canada); MD, 1969, University of Manitoba (Canada)
PAVLIN, EDWARD G 1981; MD, 1968, University of Manitoba (Canada)
RAFTERY, MICHAEL D 2012; PhD, 1991, University of California (Berkeley); MBA, 2004, University of Chicago
ROOKE, G. ALEC 2008; MD, 1980, University of Washington; PhD, 1985, University of Washington
ROSS, BRIAN K 2003; PhD, 1975, University of North Dakota; MD, 1983, University of Washington
SCHWID, HOWARD A 2000; MD, 1982, University of Wisconsin (Madison)
SCHWINN, DEBRA A 2007; MD, 1983, Stanford University SEDENSKY, MARGARET M 2008; MS, 1975, University of Colorado (Boulder); MD, 1980, University of Colorado (Denver)
SHARAR, SAMUEL R 2004; MD, 1983, University of Washington
SIVARAJAN, MURALI 2003; MBBS, 1967, Jawaharlal Institute of Postgraduate Medical Education and Research
SOUTER, MICHAEL J. 2010; MBChB, 1984, University of Edinburgh (UK)
TERMAN, GREGORY W. * 2009; PhD, 1985, University of California (Los Angeles); MD, 1987, University of Miami (Florida)
TIAN, RONG 2009; PhD, 1992, University of Aarhus (Denmark)
TREGGIARI, MIRIAM 2011; MD, 1999, University of Geneva (Switzerland); MPH, 2002, University of Washington
TURK, DENNIS C 1996; MA, 1975, University of Waterloo (Canada); PhD, 1978, University of Waterloo (Canada)
VAN NORMAN, GAIL 2008; MD, 1981, University of Washington
VAVILALA, MONICA S. 2011; MD, 1991, University of Texas (Houston)
WALCO, GARY 2009; MA, 1982, Ohio State University; PhD, 1984, Ohio State University
WARD, RICHARD J 1990, (Emeritus); MD, 1949, St Louis University

## Associate Professors

BHANANKER, SANJAY M. 2009; MBBS, 1987, Goa University (India); MD, 1992, Goa University (India)
BRAMHALL, JOHN S. 2004; PhD, 1976, Aston University (England); MD, 1991, University of California (San Diego)
CHADWICK, HEATHCLIFF S. 2009, (Emeritus); MD, 1976, University of Oregon
DAVIES, JOANNA M. 2009; MBBS, 1991, London Hospital Medical College (UK)
DEMBO, GREGORY 2009; MD, 1978, First Leningrad Medical Institute, Russia
DUNBAR, PETER J. 2008; MBChB, 1978, University of Aberdeen (UK)
EISSES, MICHAEL J. 2011; MD, 1995, University of Washington
FALK VAN ROOYEN, INGE 2010; MBChB, 1992, University of Stellenbosch (So Africa)
FLACK, SEAN H. 2012; MBChB, 1992, University of Cape Town (South Africa)
HECKER, JAMES G. 2010; PhD, 1982, University of Washington; MD, 1989, University of Virginia
JARDINE, DAVID 1996; MD, 1980, Johns Hopkins University
JOFFE, DENISE C 2006; MD, 1986, McGill University (Canada)
KARL, HELEN W. 1997; MD, 1976, University of Virginia
KENT, CHRISTOPHER D 2012; MD, 1988, University of Saskatchewan (Canada)

KUNDU, ANJANA 2010; DA, 1995, Seth Gs Medical College (India); MD, 2002, Medical College of Wisconsin
LANG, JOHN D 2006; MD, 1988, American University of the Caribbean
LOLAND, VANESSA J 2011; MD, 2002, New York Medical College
MARTAY, KENNETH 2007; MD, 1987, University of Freiburg (Germany)
METZNER, IULIA IRINA 2012; MD, 1986, Timisoara University of Med and Pharm (Romania)
MINHAJ, MOHAMMED M 2011; MD, 2000, University of Miami (Florida)
NANDATE, KOICHIRO 2008; MD, 1992, University of Occupational and Environmental Health; PhD, 2006, University of Occupational and Environmental Health
PETERSON, GENE N. 2008; PhD, 1980, University of Leeds (UK); MD, 1982, University of Chicago
RICHEBE, PHILIPPE G N 2009; MD, 1995, Grenoble (France)
ROCHE, ANTHONY M 2011; MBChB, 1993, University of Stellenbosch (So Africa)
ROZET, IRENA 2009; MD, 1985, Academy of Medicine of Latvia
RUBENS, DANIEL D 2009; MBBS, 1992, University of New South Wales(Australia)
SHARMA, DEEPAK 2012; MBBS, 1997, University of Rajasthan; MD, 2003, University of Rajasthan
SOUTER, KAREN J. 2006; MBBS, 1985, St. Bartholomew's Hospital Medical School (UK); MS, 1999, University of East Anglia (UK)
VATER, YOURI L. 2007; MD, 1977, Riga High Medical School (Israel); PhD, 1988, Riga High Medical School (Israel)
VITIN, ALEXANDER A. 2012; MD, 1981, Kharkov State
Medical University (Ukraine); PhD, 1985, Kharkov State Medical University (Ukraine)

## Assistant Professors

BEN-ARI, ALON Y 2012; MD, 2000, Technion Israel Institute of Technology
BENTOV, ITAY 2009; MD, 1992, Hadassah Medical Center; PhD, 2006, Tel Aviv University (Israel)
BOLLAG, LAURENT A. 2010; MD, 1999, University of Zurich (Switzerland)
BUDAC, STEFAN 2012; MD, 2000, Ohio State University CILIBERTO, CHRISTOPHER 2010; MD, 1991, University of Medicine and Dentistry of New Jersey
DAGAL, ARMAGAN H. C. 2010; MD, 1993, Dokuz Eylul University (Turkey)
DALAL, APARNA R 2012; MBBS, 1997, Grant Medical College (India)
DEPINTO, MARIO 2007; MD, 1985, University of Rome (Italy)
FAGLEY, RICHARD E 2011; MD, 2002, Tulane University
FERREIRA, RENATA G 2012; MD, 2001, Universidade Federal do Rio de Janeiro (Brazil)
GOFELD, MICHAEL 2008; MD, 1989, Crimea State Medical University (Ukraine)
GRABINSKY, ANDREAS 2008; MD, 1995, University of Frankfurt (Germany)
HAWKINS, BRIAN J 2010; MS, 2000, University of Pennsylvania; PhD, 2003, Virginia Polytechnic Institute and State University
HORIBE, MAYUMI 2011; MD, 1984, Hiroshima University (Japan)
HUNYADY, AGNES I. 2012; MD, 1993, Semmelweis Medical University (Hungary)
IVASHKOV, YULIA 2010; MD, 1989, Far Eastern State University (Russia)
JENSE, RYAN 2009; MD, 2002, University of Washington

JIMENEZ, NATHALIA 2010; MD, 1994, Universidad Javeriana (Colombia)

JOFFE, AARON M 2010; DO, 1998, Midwestern University LATHAM, GREGORY J. 2011; MD, 2000, University of Kansas
LEWANDOWSKI, AMY 2012; MA, 2006, Case Western Reserve University; PhD, 2009, Case Western Reserve University
LOW, DANIEL K W 2012; MBBS, 1997, University of Nottingham (UK)
MCFADYEN, JAMES G 2012; MBChB, 1992, University of Cape Town (South Africa)
MCGINN, KATHLEEN LYNN 2010; MD, 1998, New York Medical College
MEYERS, JENNIFER L 2011; MD, 2001, Pennsylvania State Hershey Medical Cntr.
NISHIO, ISUTA 2008; MD, 1986, Nara Medical University (Japan); PhD, 1997, Keio University (Japan)
OCAMPO, MA. CARMEN B. 2012; MD, 1985, University of the Philippines
O'DONNELL, BRENDAN R 2009; MA, 1996, San Francisco State; MD, 1998, University of California (Davis)
ORTNER, CLEMENS M. 2012; MD, 2002, Medical University of Vienna (Austria); MSc, 2004, Bocconi University (Italy) PITTAWAY, ANDREW J 2008; MBBS, 1991, University of Nottingham (UK)
RABBITTS, JENNIFER A 2011; MBChB, 2002, University of Stellenbosch (So Africa)

SOULAKVELIDZE, IRAKLI 2012; MD, 1979, Tbilisi State Medical Institute; PhD, 1987, Moscow State University (Russia)
THOMPSON, DOUGLAS R 2011; MD, 2005, University of California (San Diego)
VON HOMEYER, PETER 2010; MD, 2001, Free University Berlin
WANG, WANG 2010; MD, 1997, Beijing Medical University
(China); PhD, 2002, Peking University (China)
ZAKY, AHMED F 2012; MBBCh, 1995, University of Alexandria (Egypt); MS, 2001, University of Alexandria (Egypt)

## Biochemistry

## Professors

BAKER, DAVID * 2004; PhD, 1989, University of California (Berkeley)
BORNSTEIN, PAUL 2008, (Emeritus); MD, 1958, New York University
CHUNG, DOMINIC W 2007; PhD, 1976, University of California (Los Angeles)
COOPER, JONATHAN A. * 2001, (Affiliate); MA, 1973, University of Cambridge (UK); PhD, 1976, University of Warwick (UK)
DAVIE, EARL WARREN 1981; PhD, 1954, University of Washington

DAVIS, TRISHA NELL 1994; PhD, 1983, Yale University
EISENMAN, ROBERT M * 2001, (Affiliate); PhD, 1971, University of Chicago
FISCHER, EDMOND H * 2001, (Emeritus); PhD, 1947, University of Geneva (Switzerland)
HAHN, STEVEN M. * 2005, (Affiliate); PhD, 1984, Brandeis University
HAUSCHKA, STEPHEN D 1996; PhD, 1966, Johns Hopkins University
HOL, WILHELMUS G.J. 2001; MS, 1966, Technical University (Eindhoven); PhD, 1971, University of Groningen (Netherlands)

HURLEY, JAMES BRYANT 1990; PhD, 1979, University of Illinois
KIMELMAN, DAVID 2002; PhD, 1985, Harvard University
KLEVIT, RACHEL E 1991; DPhil, 1981, Oxford University (UK)
MORRIS, DAVID R 1981; PhD, 1964, University of Illinois
PALMITER, RICHARD D * 1982; PhD, 1969, Stanford University
PARSON, WILLIAM W * 1981; PhD, 1965, Case Western Reserve University
PETRA, PHILIP H * 2008, (Emeritus); PhD, 1966, Tulane University
ROBERTS, JAMES MICHAEL * 2001, (Affiliate); MD, 1984, Columbia University; PhD, 1984, Columbia University
ROTH, MARK * 2005, (Affiliate); PhD, 1988, University of Colorado (Boulder)
RUOHOLA-BAKER, HANNELE 2004; MSc, 1984, University of Helsinki (Finland); PhD, 1989, University of Helsinki (Finland)
SHAPIRO, BENNETT M * 2001, (Affiliate); MD, 1964, Jefferson Medical College
STODDARD, BARRY L. * 2005, (Affiliate); PhD, 1990, Massachusetts Institute of Technology
TELLER, DAVID C 2006, (Emeritus); PhD, 1965, University of California (Berkeley)
TSUKIYAMA, TOSHIO * 2009, (Affiliate); MS, 1987, Obihiro University of Agriculture and Veterinary Medicine, Japan; PhD, 1991, University of Horishima (Japan)
WALSH, KENNETH A * 2001, (Emeritus); MS, 1953, Purdue University; PhD, 1959, University of Toronto (Canada) WEINER, ALAN 2000; PhD, 1973, Harvard University YOUNG, ELTON 1981; PhD, 1967, California Institute of Technology

## Associate Professors

BROCKERHOFF, SUSAN E. 2007; PhD, 1993, University of Washington
MERZ, ALEXEY 2010; PhD, 2000, Oregon Health Sciences University
MULLER, ERIC D. * 2001, (Research); PhD, 1981, Yale University

VERLINDE, CHRISTOPHE 2001; PhD, 1988, Catholic University of Leuven (Belgium)

## Assistant Professors

AILION, MICHAEL 2011; PhD, 2000, University of Washington
MILLER, DANA L 2010; PhD, 2003, Johns Hopkins University

## Bioethics and Humanities

## Professors

BERRYMAN, JACK W * 1981; MA, 1974, University of Massachusetts; PhD, 1976, University of Maryland
BRADDOCK, CLARENCE H. * 2010, (Affiliate); MD, 1981, University of Chicago; MPH, 1995, University of Washington
BURKE, WYLIE 2000; PhD, 1974, University of Washington; MD, 1978, University of Washington
JECKER, NANCY A.S. * 1988; MA, 1984, University of Washington; PhD, 1986, University of Washington
JONSEN, ALBERT R. * 2008, (Emeritus); MA, 1956, Gonzaga University; PhD, 1967, Yale University
WHORTON, JAMES C. * 2008, (Emeritus); PhD, 1969, University of Wisconsin (Madison)

## Associate Professors

DUDZINSKI, DENISE M 2008; MS, 1993, Vanderbilt University; PhD, 2001, Vanderbilt University EDWARDS, KELLY ALISON 2007; MA, 1995, University of Washington; PhD, 2000, University of Washington
FULLERTON, STEPHANIE MALIA 2011; DPhil, 1995, University of Oxford (UK)
STARKS, HELENE 2010; MPH, 1989, University of California (Berkeley); PhD, 2004, University of Washington

## Assistant Professor

BLACKSHER, ERIKA A 2010; MA, 1996, University of Virginia; PhD, 2007, University of Virginia

## Senior Lecturer

MC CORMICK, THOMAS R. * 2001, (Emeritus); MDiv, 1960, Drake University; DMin, 1976, Southern Methodist University

## Biological Structure

## Professors

ADMAN, ELINOR T * 2001, (Research Emeritus); MA, 1964, Brandeis University; PhD, 1967, Brandeis University BRINKLEY III, JAMES F. * 2007; MD, 1974, University of Washington; PhD, 1984, Stanford University
CLARK, JOHN I 1983; PhD, 1974, University of Washington DACEY, DENNIS M. 1998; PhD, 1983, University of Chicago FARR, ANDREW G * 1985; PhD, 1975, University of Chicago
GRANEY, DANIEL 0 2000; MA, 1962, University of Cali fornia (San Francisco); PhD, 1965, University of California (San Francisco)
HENDRICKSON, ANITA E * 2006, (Emeritus); PhD, 1964, University of Washington
KOEHLER, JAMES K * 1998, (Emeritus); MS, 1958, University of California (Berkeley); PhD, 1961, University of California (Berkeley)
LEE, MINAKO Y * 1999, (Research Emeritus); MD, 1963, Tokyo Women's Medical College (Japan)
RAIBLE, DAVID W. 2007; PhD, 1989, University of Pennsylvania
REH, THOMAS A. 2007; PhD, 1981, University of Wisconsin REUVENI, ZIPORA * 2008; MSc, 1975, Weizmann Insti tute for Science (Israel); PhD, 1979, University of Windsor (Canada)
ROBINSON, FARREL R. 2010; PhD, 1982, Brown University ROSSE, CORNELIUS * 2000, (Emeritus); MD, 1974, University of Bristol (UK); DSc, 1983, University of Bristol (UK)
SHERK, HELEN * 2003; PhD, 1978, Massachusetts Institute of Technology
STENKAMP, RONALD E 2002; MS, 1971, University of Washington; PhD, 1975, University of Washington
WONG, RACHEL 0 2007; PhD, 1986, Australian National University
XU, WENQING 2009; MS, 1988, Chinese Academy of Sciences (China); PhD, 1995, Massachusetts Institute of Technology

## Associate Professors

BERMINGHAM-MCDONOGH, 0 2007; PhD, 1987, University of California (Los Angeles)
DE VITO, JUNE R * 1989, (Research Emeritus); MA, 1949, University of British Columbia (Canada); PhD, 1954, University of Washington
GADDUM-ROSSE, PENELOPE * 1996, (Emeritus); PhD, 1965, University of Liverpool (UK)
HARRIS, ROGER M * 2006, (Emeritus); PhD, 1975, University of Washington

MOENS, CECILIA B * 2004, (Affiliate); PhD, 1993, University of Toronto (Canada)
PASUPATHY, ANITHA 2012; MS, 1994, McGill University (Canada); PhD, 2001, Johns Hopkins University
PROTHERO, JOHN W * 1999, (Emeritus); PhD, 1960, University of Western Ontario (Canada)
SUNDSTEN, JOHN WALLIN 1998, (Emeritus); PhD, 1961, University of California (Los Angeles)

## Assistant Professors

BAIR, WYETH DANIEL 2011; PhD, 1996, California Institute of Technology
DHAKA, AJAY K 2009; PhD, 2002, University of California (Los Angeles)
WANG, LIGUO 2011; PhD, 2003, Cornell University

## Senior Lecturers

MULLIGAN, KATHLEEN A. 2001; PhD, 1985, University of New South Wales(Australia)
PITTACK, CATRIN 2006; PhD, 1995, University of Washington

## Lecturer

AGONCILLO, AUGUSTO V 2012; MD, 1977, University of Santo Tomas (Philippines)

## Comparative Medicine

## Professors

DENNIS, MELVIN B. * 2005, (Emeritus); DVM, 1961, Washington State University
DI GIACOMO, RONALD F. * 2000, (Emeritus); DVM, 1965, University of Pennsylvania; MPH, 1974, University of Washington
LADIGES, WARREN C. 1988; DVM, 1971, Washington State University; MS, 1978, Washington State University
LIGGITT, H DENNY 2005; DVM, 1972, Colorado State University; PhD, 1979, Colorado State University
PRICE, LILLIAN M. * 2006; DVM, 1972, University of Pennsylvania; PhD, 1983, University of Pennsylvania
RAUSCH, ROBERT L. * 1992, (Emeritus); MS, 1946, Michigan State University; PhD, 1949, University of Wisconsin
VAN HOOSIER, GERALD * 2004, (Emeritus); DVM, 1957, Texas A\&M University
WARE, CAROL B. 2009; PhD, 1986, University College (Ireland)

## Associate Professors

FREVERT, CHARLES W 2010; DVM, 1984, Iowa State University; ScD, 1994, Harvard University

IRITANI, BRIAN M 2006; DVM, 1988, Washington State University; PhD, 1997, University of Washington
TREUTING, PIPER 2012; DVM, 1996, Louisiana State University; MS, 2000, University of Washington
WEIGLER, BENJAMIN J * 2010, (Affiliate); MPH, 1988, University of California (Berkeley); PhD, 1991, University of California (Davis)

## Lecturers

CHANG, MARY Y. 2011; PhD, 1991, Massachusetts Institute of Technology
DOWLING, SUSAN C. 2011; DVM, 1986, Washington State University
MOLK, DENISE M 2012; DVM, 2006, University of Pennsylvania; MS, 2009, University of Washington
PAIK, JISUN 2011; MS, 1994, University of Michigan; PhD, 2000, University of Washington
SANDERS, GEORGE E. 2008; DVM, 1997, Louisiana State University

## Family Medicine

## Professors

BALDWIN, LAURA M. 2004; MD, 1980, University of Southern California; MPH, 1986, University of Washington
BERG, ALFRED 0 2011, (Emeritus); MD, 1974, Washington University; MPH, 1979, University of Washington
CRITTENDEN, ROBERT A 2012; MD, 1976, University of Washington; MPH, 1987, University of Washington
DOBIE, SHARON A. 2012; MD, 1979, University of California (San Francisco)
DREZNER, JONATHAN 2012; MD, 1996, University of California (Los Angeles)
FARBER, STUART J. 2012; MD, 1974, University of Washington
GEYMAN, JOHN P 1995, (Emeritus); MD, 1960, University of California (San Francisco)
GORDON, MICHAEL J * 1999, (Emeritus); MA, 1970, Michigan State University; PhD, 1973, Michigan State University GREER, H THOMAS 2012; MD, 1974, University of Mississippi; MPH, 1979, University of Washington
HARMON, KIMBERLY G 2012; MD, 1993, Indiana University
LOSH, DAVID PAUL 2012; MD, 1974, University of Kansas NORRIS, THOMAS E. 1993; MD, 1973, University of Texas (Galveston)
ROSENBLATT, ROGER A * 1993; MD, 1971, Harvard University; MPH, 1971, Harvard University
SCHNEEWEISS, RONALD 2007, (Emeritus); MBChB, 1964, University of Cape Town (South Africa)
STEVENS, NANCY G 2012; MD, 1979, University of Washington; MPH, 1982, University of Washington
SUGARMAN, JONATHAN R. * 2001, (Clinical); MD, 1981, Albert Einstein College of Medicine; MPH, 1990, University of Washington

## Associate Professors

BALLWEG, RUTH A 2004; PA, 1978, University of Washington; MPA, 1998, University of Washington
BEARD, JOHN MARK 2012; MD, 1986, University of Missouri
BROCK, DOUGLAS MICHAEL 2011; MEd, 1987, University of Washington; PhD, 1995, University of Washington
CHEN, FREDERICK 2011; MPH, 1995, University of California (Berkeley); MD, 1996, University of California (San Francisco)
ELLSBURY, KATHLEEN E 2007, (Emeritus); MD, 1977, Johns Hopkins University; MPH, 1982, University of Missouri
GODFREY, EMILY M 2012; MD, 1997, Medical College of Wisconsin; MPH, 2003, University of Rochester
HUNTINGTON, JANE 2012; MD, 1994, University of Washington
MAESTAS, RAMONCITA R. 2002; MD, 1983, University of Washington

## Genome Sciences

## Professors

BERG, CELESTE A 2006; MS, 1981, Yale University; PhD, 1986, Yale University
BREWER, BONITA J 2004; PhD, 1979, University of Washington
BRUCE, JAMES 2008; PhD, 1992, University of Florida
EICHLER, EVAN E 2008; PhD, 1995, Baylor College of Medicine
FELSENSTEIN, JOSEPH 1981; PhD, 1968, University of Chicago
FIELDS, STANLEY 2003; MA, 1978, Cambridge University (UK); PhD, 1981, Cambridge University (UK)
GALLANT, JONATHAN A 2003, (Emeritus); PhD, 1961, Johns Hopkins University
GOTTSCHLING, DANIEL E * 2001, (Affiliate); MS, 1980, University of Colorado; PhD, 1984, University of Colorado GREEN, PHILIP * 2009; PhD, 1976, University of California (Berkeley)
HARTWELL, LELAND H 2010, (Emeritus); PhD, 1964, Massachusetts Institute of Technology
HOOD, LEROY E. * 2001, (Affiliate); MD, 1964, Johns Hopkins University; PhD, 1968, California Institute of Technology
MANOIL, COLIN C. 1992; PhD, 1979, Stanford University
NICKERSON, DEBORAH A 2003; PhD, 1978, University of Tennessee
NOBLE, WILLIAM S 2011; MS, 1996, University of California (San Diego); PhD, 1998, University of California (San Diego)
OLSON, MAYNARD V. 2008, (Emeritus); PhD, 1970, Stanford University
PALLANCK, LEO J. 2011; MS, 1989, Albert Einstein College of Medicine; PhD, 1992, Albert Einstein College of Medicine
SIBLEY, CAROL HOPKINS 2012, (Emeritus); MS, 1970, University of Rochester; PhD, 1974, University of California (San Francisco)
SWANSON, WILLIE J 2012; PhD, 1998, University of California (San Diego)
THOMAS, JAMES H 2000; PhD, 1985, Massachusetts Institute of Technology
WATERSTON, ROBERT H 2002; MD, 1972, University of Chicago; PhD, 1972, University of Chicago

## Associate Professors

AKEY, JOSHUA M 2010; PhD, 2002, University of Texas (Houston)
MACCOSS, MICHAEL 2009; PhD, 2001, University of Vermont
SHENDURE, JAY A 2011; PhD, 2005, Harvard University; MD, 2007, Harvard University
STAMATOYANNOPOULOS, JOHN A 2011; MD, 1995, University of Washington

## Assistant Professors

BORENSTEIN, ELHANAN A 2009; PhD, 2007, Tel Aviv University (Israel)
DUNHAM, MAITREYA J 2008; PhD, 2003, Stanford University
FOWLER, DOUGLAS M 2012; PhD, 2007, The Scripps Research Institute
VILLEN, JUDIT 2010; MSc, 1999, University of Barcelona (Spain); PhD, 2003, University of Barcelona (Spain)
WOLF YADLIN, ALEJANDRO M 2010; MS, 2001, University of Chile; PhD, 2007, Massachusetts Institute of Technology

## Lecturers

CHEONG, KA YAN 2012; PhD, 2010, Johns Hopkins University

MUNN, MAUREEN M. 2009; PhD, 1986, University of California (San Francisco)
PAUL, ANNE S 2012; MS, 1994, University of Washington

## Immunology

## Professors

ADEREM, ALAN A. * 2001, (Affiliate); PhD, 1979, University of Cape Town (South Africa)
BEVAN, MICHAEL J. * 1990; MSc, 1968, University of London, UK; PhD, 1972, National Inst for Medical Research (UK)
FINK, PAMELA J. 2008; PhD, 1981, Massachusetts Institute of Technology
GALE, MICHAEL J 2011; PhD, 1994, University of Washington
GOVERMAN, JOAN M 2008; PhD, 1981, University of California (Los Angeles)
MAIZELS, NANCY 2000; PhD, 1974, Harvard University NEPOM, GERALD T * 2001, (Affiliate); PhD, 1977, University of Washington; MD, 1978, University of Washington
PERLMUTTER, ROGER M. * 2001, (Affiliate); MD, 1979, Washington University; PhD, 1979, Washington University STRONG, ROLAND K * 2004, (Affiliate); PhD, 1990, Harvard University
ZIEGLER, STEVEN F. * 2006, (Affiliate); PhD, 1984, University of California (Los Angeles)

## Associate Professor

WEINMANN, AMY S 2009; PhD, 2000, University of California (Los Angeles)

## Assistant Professors

OBERST, ANDREW A 2012; PhD, 2005, University of Pierre and Marie Curie (France); PhD, 2005, University of Rome Tor Vergata (Italy)
PEPPER, MARION 2011; PhD, 2006, University of Pennsylvania
SAVAN, RAM 2011; MSc, 2001, University of Agricultural Sciences (India); PhD, 2004, Kagoshima University
STETSON, DANIEL B 2008; PhD, 2002, University of California (San Francisco)

## Laboratory Medicine

## Professors

ASHLEY MORROW, RHODA * 1990; PhD, 1977, University of California (Davis)
ASTION, MICHAEL L. * 2011, (Clinical); MD, 1989, University of Pennsylvania; PhD, 1989, University of Pennsylvania CHATRIAN, GIAN E 1991, (Emeritus); MD, 1951, University of Naples (Italy)
CHOU, DAVID * 2008; MD, 1974, University of Pittsburgh; MS, 1979, University of Minnesota
CLARRIDGE, JILL E. 2002; MS, 1962, University of Michigan; PhD, 1973, Purdue University
COOKSON, BRAD T 2011; MD, 1991, Washington University; PhD, 1991, Washington University
COOMBS, ROBERT W * 2002; PhD, 1977, Dalhousie University (Canada); MD, 1981, Dalhousie University (Canada) COREY, LAWRENCE * 2011; MD, 1971, University of Michigan
COYLE, MARIE B * 2000, (Emeritus); MS, 1963, St. Louis University; PhD, 1965, Kansas State University
DETTER, JAMES C * 1999, (Emeritus); MD, 1962, University of Kansas
FANG, FERRIC C. 2001; MD, 1983, Harvard University

FINE, JAMES * 2009; MD, 1972, University of Minnesota; MS, 1977, University of Minnesota
JEROME, KEITH R 2012; PhD, 1992, Duke University; MD, 1993, Duke University
KENNY, MARGARET * 1997, (Emeritus); PhD, 1968, University of Illinois
LABBE, ROBERT F * 1993, (Emeritus); MS, 1949, Oregon State University; PhD, 1951, Oregon State University
PLORDE, JAMES J * 1998, (Emeritus); MD, 1959, University of Minnesota
RAINEY, PETRIE M. 2000; PhD, 1973, University of California (Berkeley); MD, 1980, University of North Carolina, Chapel Hill
RAISYS, VIDMANTAS A * 2001, (Emeritus); MS, 1965, University of Illinois; PhD, 1969, State University of New York (Buffalo)
RUTLEDGE, JOE C. * 1989; MD, 1976, Vanderbilt University SCHMER, GOTTFRIED * 1998, (Emeritus); MD, 1956, University of Vienna, Austria
STEPHENS, KAREN G. 2011; MA, 1978, Indiana University; PhD, 1982, Indiana University
TAIT, JONATHAN F * 2003; MD, 1983, Washington University; PhD, 1983, Washington University
WENER, MARK H * 2005; MD, 1974, Washington University WOOD, BRENT L. 2008; PhD, 1988, Loma Linda University; MD, 1990, Loma Linda University

## Associate Professors

BANKSON, DANIEL D 2009; MS, 1981, Massachusetts Institute of Technology; PhD, 1985, Massachusetts Institute of Technology
DELANEY, COLLENE J * 2011, (Emeritus); MS, 1967, University of Illinois; PhD, 1972, University of Illinois
FROMM, JONATHAN R 2012; MD, 1997, University of Iowa; PhD, 1997, University of Iowa
GRETCH, DAVID R. * 1999; MD, 1990, University of Iowa; PhD, 1990, University of lowa
HOOFNAGLE, ANDREW N 2012; PhD, 2002, University of Colorado (Boulder); MD, 2004, University of Colorado (Denver)
NESTER, THERESA 2008; MD, 1994, University of Rochester
OPHEIM, KENT E * 1988; PhD, 1972, Cornell University
QIN, XUAN 2011; PhD, 1995, State University of New York (Albany)
SABATH, DANIEL E. * 2000; MD, 1989, University of Pennsylvania; PhD, 1989, University of Pennsylvania
SCHILLER, HARVEY S * 1982; MD, 1966, Washington University
TSUCHIYA, KAREN D. 2010; MD, 1990, University of Michigan
ZHU, TUOFU 2012; MD, 1984, Tiangxi (Jiangxi) Medical School, China; PhD, 1990, Peking Union Medical College (China)

## Assistant Professors

ABBOTT, APRIL N 2012; PhD, 2009, University of Texas (Houston)
BAIRD, GEOFFREY S 2010; PhD, 2001, University of California (San Diego); MD, 2003, University of California (San Diego)
BUTLER-WU, SUSAN 2011; PhD, 2005, Tufts University CHERIAN, SINDHU 2008; MD, 2000, Emory University
DANIEL-JOHNSON, JENNIFER A 2010; MBBS, 1995, University of Melbourne (Australia)
DELANEY, MEGHAN 2011; DO, 2004, University of New England; MPH, 2010, University of Washington
EDLEFSEN, KERSTIN 2012; MD, 2002, University of Washington
GREISMAN, HARVEY A 2005; PhD, 1997, Massachusetts Institute of Technology; MD, 1998, Harvard University

HAVER, VIRGINIA MARY * 2001, (Clinical); PhD, 1980, University of Virginia
HOFFMAN, NOAH G 2010; PhD, 2003, University of North Carolina; MD, 2005, University of North Carolina
LE CRONE, CAROL N * 1997, (Emeritus); MS, 1966, Colorado State University
PEREIRA, SHALINI 2008; MS, 1991, University of Rochester; PhD, 1996, University of Rochester
PRITCHARD, COLIN C. 2011; PhD, 2005, University of Washington; MD, 2007, University of Washington
SHIRTS, BRIAN H 2012; PhD, 2006, University of Pittsburgh; MD, 2008, University of Pittsburgh
SOMA, LORINDA A 2012; MD, 1998, University of Minnesota
WU, DAVID 2008; PhD, 2001, Massachusetts Institute of Technology; MD, 2003, Harvard University
XU, MIN 2008; MD, 1986, Beijing Medical University (China); PhD, 1993, Wayne State University

## Senior Lecturer

HANSEN-SUCHY, KARA F 2012; MEd, 2005, Weber State University

## Medical Education and Biomedical Informatics

## Professors

CARLINE, JAN D. * 1999; MEd, 1976, University of Washington; PhD, 1979, University of Washington

FULLER, SHERRILYNNE * 2001; MLS, 1968, Indiana University; PhD, 1984, University of Southern California
ROBINS, LYNNE S * 2008; PhD, 1990, University of Michigan
SCHAAD, DOUGLAS C. * 2010; MEd, 1974, University of Washington; PhD, 1986, University of Washington

SCOTT, CRAIG S * 1990; MA, 1970, California State University, Sacramento; PhD, 1973, University of Iowa
TARCZY-HORNOCH, PETER 2012; MD, 1989, Stanford University
WOLF, FREDRIC M 1997; MEd, 1977, Kent State University; PhD, 1980, Kent State University

## Associate Professor

GENNARI, JOHN H 2007; MS, 1985, University of Wisconsin; PhD, 1990, University of California (Irvine)

## Assistant Professors

ABERNETHY, NEIL F 2008; PhD, 2005, Stanford University ANDERSON, NICHOLAS R 2009; MS, 2004, Oregon Health Sciences University; PhD, 2007, University of Washington YETISGEN-YILDIZ, MELIHA 2009; MS, 2000, Middle East Technical University (Turkey); PhD, 2007, University of Washington

## Lecturer

MASUDA, DAVID 2001; MD, 1980, University of North Dakota; MS, 1996, University of Wisconsin (Madison)

## Medicine

## Professors

ABKOWITZ, JANIS L 2007; MD, 1977, Harvard University

## Microbiology

## Professors

CHAMPOUX, JAMES J 1981; PhD, 1970, Stanford University CLARK, EDWARD A * 1985; PhD, 1977, University of California (Los Angeles)
GALLOWAY, DENISE A * 2001, (Research); PhD, 1976, City University of New York
GREENBERG, E. PETER 2005; MS, 1972, University of Iowa; PhD, 1977, Harvard University
HARWOOD, CAROLINE 2005; MA, 1976, Boston University; PhD, 1982, University of Massachusetts
KATZE, MICHAEL GERALD * 2009; MS, 1978, Hahnemann Medical College; PhD, 1980, Hahnemann Medical College
LEIGH, JOHN A. 2005; MS, 1979, University of Illinois; PhD, 1983, University of Illinois
LINIAL, MAXINE L * 2001, (Research); PhD, 1970, Tufts University
MOSELEY, STEPHEN L. * 2005; MS, 1978, Catholic University of America; PhD, 1981, University of Washington
MULLINS, JAMES I 1994; PhD, 1978, University of Minnesota
NESTER, EUGENE W 2010, (Emeritus); PhD, 1959, Case Western Reserve University
OVERBAUGH, JULIE MAUREEN * 2001, (Affiliate); PhD, 1983, University of Colorado
PARSEK, MATTHEW R 2011; PhD, 1995, University of Illinois

RAMAKRISHNAN, LALITA 2010; MD, 1983, Baroda Medical College (India); PhD, 1990, Tufts University
SHERRIS, JOHN C * 1986, (Emeritus); MBBS, 1948, London Contemp. Dance School (England); MD, 1950, London Contemp. Dance School (England)
SOKOURENKO, EVGUENI V. 2009; MD, 1985, Moscow Medical Academy (Russia); PhD, 1989, All-Union Institute of Genetics and Selection of Industrial Microorganisms (Russia)
STALEY, JAMES T * 2008, (Emeritus); MS, 1963, Ohio State University; PhD, 1967, University of California (Davis)

## Associate Professors

BUMGARNER, ROGER E. 2004; MS, 1983, Eastern Illinois University; PhD, 1988, University of Arizona
FULLER, DEBORAH 2010; PhD, 2001, University of Wiscon$\sin$ (Madison)
HILL, WALTER E * 2001, (Affiliate); PhD, 1972, University of Washington
LAGUNOFF, MICHAEL 2007; PhD, 1995, University of Chicago
LARA, JIMMIE CANO * 2011, (Emeritus); MS, 1967, California State College; PhD, 1970, University of California (San Diego)
MITTLER, JOHN E. 2007; PhD, 1992, University of Califor nia (Irvine)
SAMUDRALA, VAIKUNTANATH V 2006; PhD, 1997, University of Maryland
TRAXLER, BETH A * 1999; PhD, 1987, Carnegie Mellon University

## Assistant Professors

MERRIKH, HOURA 2012; MS, 2006, Brandeis University; PhD, 2009, Brandeis University
MOUGOUS, JOSEPH D 2008; PhD, 2004, University of California (Berkeley)
SMITH, JASON G 2010; PhD, 2004, Harvard University
WOODWARD, JOSHUA J 2012; PhD, 2009, University of California (Berkeley)

## Senior Lecturers

ANDERSON, DENISE G 2001; MS, 1985, University of Washington; MS, 1987, University of Washington
BICKNELL, MARY 2000, (Emeritus); MS, 1962, University of Washington
CHANDLER, MARK S 2004; MS, 1979, University of Washington; PhD, 1998, University of Illinois
FULTON, JANIS R 2001; MS, 1977, Montana State University
GRAY, KENDALL M 2004; PhD, 1989, University of Southern California

## Lecturers

MEMMER, RAMONA 1993, (Emeritus); MS, 1957, University of Washington
PARKHURST, DALE J. 1999, (Emeritus); BS, 1960, University of Washington

## Neurological Surgery

## Professors

AVELLINO, ANTHONY M. 2009; MD, 1992, Columbia University
CHESNUT, RANDALL M 2007; MD, 1984, University of Washington
ELLENBOGEN, RICHARD G. 2004; MD, 1983, Brown University
HARRIS, A BASIL 2000, (Emeritus); MD, 1954, University of Alabama
HEVNER, ROBERT F 2008; MD, 1992, University of Michigan; PhD, 1992, University of Michigan
KELLY, WILLIAM A 1990, (Emeritus); MD, 1954, University of Cincinnati

LOESER, JOHN D 2008, (Emeritus); MD, 1961, New York University
MORRISON, RICHARD S * 1999; PhD, 1982, University of California (Los Angeles)
OJEMANN, GEORGE A 2010, (Emeritus); MD, 1959, University of lowa
OJEMANN, JEFFREY G 2009; MA, 1992, Washington University; MD, 1992, Washington University
RAMIREZ, JAN M 2008; Diploma, 1983, University of Regensburg (Germany); PhD, 1986, University of Regensburg (Germany)
ROSTOMILY, ROBERT C. 2012; MD, 1987, Case Western Reserve University
SEKHAR, LALIGAM N 2005; MBBS, 1974, University of Madras (India)
SILBERGELD, DANIEL L 2005; MD, 1984, University of Cincinnati
TEMKIN, NANCY R * 2002; MS, 1971, University of Connecticut; PhD, 1976, State University of New York (Buffalo)

## Associate Professors

D'AMBROSIO, RAIMONDO 2005; PhD, 1995, University of Milan (Italy)
HORNER, PHILIP J 2006; MS, 1992, Ohio State University; PhD, 1995, Ohio State University
MOURAD, PIERRE 2009; MS, 1982, University of Washington; PhD, 1987, University of Washington

OJEMANN, LINDA M 2002, (Emeritus); MD, 1960, University of Illinois
TREDWAY, TRENT L 2011; MD, 1997, Rush Medical College BROWD, SAMUEL 2008; MD, 2000, University of Florida; PhD, 2000, University of Florida

## Assistant Professors

CRANE, COURTNEY 2012; PhD, 2005, University of Virginia FERREIRA, MANUEL 2010; MD, 2002, Georgetown University; PhD, 2002, Georgetown University
GELFENBEYN, MIKHAIL 2010; MD, 1978, Moscow State University (Russia); PhD, 1991, Moscow State University (Russia)
HEBB, ADAM 0 2009; MD, 2000, Dalhousie University (Canada)
KIM, LOUIS J. 2007; MD, 1999, Columbia University
LEE, AMY 2011; MD, 2003, University of Texas (San Antonio)
ZHANG, FANGYI 2009; MD, 1986, Capital University
Lecturers
KINOSHITA, YOSHITO 2001; PhD, 1982, Tohoku University, Japan
PRIDGEON, JAMES S 2010; MHA, 2007, University of Minnesota

## Neurology

## Professors

BECKER, KYRA J. 2008; MD, 1989, Duke University BIRD, THOMAS D. 2011, (Emeritus); MD, 1968, Cornell University
CHAMBERLAIN, JEFFREY S 2000; PhD, 1985, University of Washington
CHAMBERLAIN, MARC C 2007; MS, 1973, University of California (Berkeley); MD, 1977, Columbia University

KALINA, ROBERT E 2010, (Emeritus); MD, 1960, University of Minnesota
KINYOUN, JAMES L 1990; MD, 1971, University of Nebraska
MILAM, ANN H. 1998, (Emeritus); PhD, 1967, University of Texas (Southwestern)
NEITZ, JOHN 2009; PhD, 1986, University of California (Santa Barbara)
NEITZ, MAUREEN 2009; PhD, 1986, University of California (Santa Barbara)
ORCUTT, JAMES C 2008; PhD, 1976, University of Colorado (Denver); MD, 1977, University of Colorado (Denver)
SAARI, JOHN C * 2008, (Emeritus); MS, 1963, University of
Minnesota; PhD, 1970, University of Washington
VAN GELDER, RUSSELL 2010; MD, 1994, Stanford University; PhD, 1994, Stanford University
WEISS, AVERY H 2006; MD, 1974, Miami University (Ohio)

## Associate Professors

CHUANG, ELAINE L. 1993; MD, 1979, University of Texas (San Antonio)
MUDUMBAI, RAGHU 2010; MD, 1994, SUNY Brooklyn
SHEN, TUENG T 2009; PhD, 1994, Massachusetts Institute of Technology; MD, 1997, Harvard University
WU, MICHAEL 2011; MD, 1998, University of Texas (Dallas)

## Assistant Professors

CHANG, SHU-HONG 2011; MD, 2004, Johns Hopkins University
CHAO, JENNIFER 2009; PhD, 2002, Yale University; MD, 2003, Yale University
FRANCIS, COURTNEY 2010; MD, 2005, University of Rochester
HANNA, EISSA M 2012; MD, 2007, University of California (Davis)
HERLIHY, ERIN P. 2008; MD, 2003, Loyola University (Chicago)
LAM, DEBORAH 2009; MD, 2002, Northwestern University
LEE, BRYAN S 2012; JD, 2005, Harvard University; MD, 2007, Washington University
SLABAUGH, MARK 2010; MD, 2004, University of Washington
TARAVATI, PARISA 2009; MD, 2005, University of Iowa

VEMULAKONDA, GURUNADH 2008; MD, 2002, Washing ton University

## Orthopedics

## Professors

BELLABARBA, CARLO 2011; MD, 1992, McGill University (Canada)
BENIRSCHKE, STEPHEN K. 1992; MD, 1979, Case Western Reserve University
BIGOS, STANLEY J 2001, (Emeritus); MD, 1975, University of Missouri
CAVANAGH, PETER R 2008; PhD, 1972, University of Lon don, UK; DSc, 2004, University of London, UK
CHANSKY, HOWARD ALAN 2010; MD, 1987, University of Pennsylvania
CHAPMAN, JENS R. 2012; MD, 1983, Technical University of Munich (Germany)
CONRAD, ERNEST U. 1997; MD, 1979, University of Virginia EYRE, DAVID R. 1985; PhD, 1969, University of Leeds (UK) GROSS, TED S 2007; MS, 1985, Pennsylvania State University; PhD, 1993, State University of New York (Stony Brook) HANEL, DOUGLAS PAUL 1992; MD, 1977, St Louis University
HANSEN, SIGVARD T 2011, (Emeritus); MD, 1961, University of Washington
HENLEY, MICHAEL BRADFORD 2003; MD, 1979, University of Washington
LEOPOLD, SETH S 2008; MD, 1993, Cornell University
MATSEN, FREDERICK A * 1982; MD, 1968, Baylor College of Medicine
MOSCA, VINCENT S. 2011; MD, 1978, University of Roch ester
ROUTT, MILTON L. 1995; MD, 1983, University of Texas (Galveston)
SANGEORZAN, BRUCE J. 1998; MD, 1981, Wayne State University
SIDLES, JOHN ARTHUR 1998; PhD, 1982, University of Washington
SMITH, DOUGLAS G. 2006; MD, 1984, University of Chicago
STAHELI, LYNN T 1996, (Emeritus); MD, 1959, University of Utah
TEITZ, CAROL CLAIRE 2000; MD, 1974, Yale University
TENCER, ALLAN FRED * 1997; MEng, 1973, McGill University (Canada); PhD, 1981, McGill University (Canada)

## Associate Professors

ALLAN, CHRISTOPHER H 2005; MD, 1992, Northwestern University
BAREI, DAVID P 2007; MD, 1991, University of Ottawa (Canada); MS, 2001, University of Ottawa (Canada)
BEINGESSNER, DAPHNE M. 2011; MD, 1997, University of Western Ontario (Canada); MS, 2003, University of Western Ontario (Canada)
BRAGE, MICHAEL 2011; MD, 1986, University of Illinois
BRANSFORD, RICHARD 2011; MD, 1996, Vanderbilt University
DUNBAR, ROBERT P 2011; MD, 1993, Georgetown University
GREEN, JOHN R 2002; MD, 1991, University of Cincinnati
GREENLEE, THEODORE K 2004, (Emeritus); MD, 1959, Northwestern University
KRIEG, JAMES C 2007; MD, 1990, University of Medicine and Dentistry of New Jersey
LARSON, ROGER V 1990; MD, 1973, University of Utah MANNER, PAUL A 2010; MD, 1991, McGill University (Canada)

NORK, SEAN E. 2004; MD, 1992, University of California (San Diego)
O'KANE, JOHN 2004; MD, 1993, University of Vermont
SCHMALE, GREGORY A 2007; MEd, 1984, Southern Illinois
University; MD, 1994, University of Washington
TAITSMAN, LISA A. 2009; MD, 1994, Brown University; MPH, 1995, Harvard University
WARME, WINSTON J 2007; MD, 1989, Uniformed Services University of the Health Sciences
WHITE, KLANE K 2012; MS, 1993, University of Southern California; MD, 1997, George Washington University

## Assistant Professors

DAVIDSON, DARIN J 2011; MD, 2003, University of Ottawa (Canada)
FIROOZABADI, REZA 2012; MA, 2001, Boston University; MD, 2005, Boston University
GEE, ALBERT 0 2012; MD, 2005, Washington University
HUANG, JERRY I 2010; MD, 2001, University of California (Los Angeles)
KWON, RONALD Y 2012; MS, 2005, Stanford University; PhD, 2008, Stanford University
LEE, MICHAEL J 2007; MD, 2000, Northwestern University WILCOX, JASON J 2010; MD, 2004, University of Tennessee

## Otolaryngology-Head and Neck Surgery

## Professors

COLTRERA, MARC DANTE 1999; MD, 1981, Yale University DONALDSON, JAMES A 1992, (Emeritus); MD, 1954, University of Minnesota
DUCKERT, LARRY GENE 1982; MD, 1972, University of Minnesota; PhD, 1977, University of Minnesota
FUTRAN, NEAL DAVID 2009; DMD, 1982, University of Pennsylvania; MD, 1987, St University of New York (Downstate Medical Center)
GATES, GEORGE A. 2004, (Emeritus); MD, 1959, University of Michigan
HILLEL, ALLEN D * 2000; MA, 1972, Stanford University; MD, 1976, Stanford University
MANNING, SCOTT C. 1999; MD, 1980, Tulane University
MERATI, ALBERT L 2007; MD, 1991, University of Washington
NORTON, SUSAN J. * 1991; MS, 1973, Purdue University; PhD, 1982, University of Washington
PERKINS, JONATHAN A. 2010; D0, 1987, Osteopathic Medicine and Surgery (lowa)
RUBEL, EDWIN W. 1986; MS, 1967, Michigan State University; PhD, 1969, Michigan State University
RUBINSTEIN, JAY T. 2004; MD, 1987, University of Washington; PhD, 1988, University of Washington
SIE, KATHLEEN C.Y. 2008; MD, 1984, University of Michigan
STANLEY, ROBERT B. 2012; DDS, 1973, University of North Carolina; MD, 1976, Duke University
TEMPEL, BRUCE L. 1999; PhD, 1983, Princeton University WEAVER, EDWARD M. 2012; MD, 1993, Yale University; MPH, 2000, University of Washington
WEYMULLER, ERNEST A 1992; MD, 1966, Harvard University

## Associate Professors

HUME, CLIFFORD 2008; PhD, 1988, Cornell University; MD, 1996, Cornell University
INGLIS, ANDREW F 1993; MD, 1981, Medical College of Pennsylvania

MENDEZ, EDUARDO 2012; MD, 1999, University of Maryland
MOE, KRISTEN S 2007; MD, 1989, University of Washington
OU, HENRY 2012; MA, 1998, Washington University; MD, 1998, Washington University
PARIKH, SANJAY R 2011; MD, 1994, University of British Columbia (Canada)
REES, THOMAS 1992; MA, 1969, University of Redlands; PhD, 1972, University of Washington
WHIPPLE, MARK E. 2008; MD, 1991, University of Washington; MS, 2001, Massachusetts Institute of Technology

## Assistant Professors

BHRANY, AMIT 2009; MD, 2001, Boston University BOHANNON, ISAAC A 2010; MD, 2004, Drexel University DAVIS, GREG E. 2008; MD, 2000, University of Washington HORN, DAVID L. 2010; MS, 1997, Georgetown University; MD, 2002, Medical College of Wisconsin
MEYER, TANYA K 2009; MD, 1996, University of California (San Diego)
SARDESAI, MAYA G. 2011; MD, 2002, Queens University

## Lecturers

DRENNAN, WARD R. 2012; PhD, 1998, Indiana University
NIE, KAIBAO 2009; MS, 1991, Shandong University (China); PhD, 1999, Tsinghua University (China)
OWENS, KELLY N. 2010; PhD, 1996, University of Washington

## Pathology

## Professors

ALPERS, CHARLES E. 1997; MD, 1978, University of Rochester
ARGENYI, ZSOLT B 2001; MD, 1978, Semmelweis Medical University (Hungary)
BOWEN-POPE, DANIEL * 1986; PhD, 1979, University of California (Berkeley)
BYERS, PETER H 2002; MD, 1969, Case Western Reserve University
DISTECHE, CHRISTINE M * 1992; PhD, 1976, University of Liege (Belgium)
EISEN, HARVEY * 2001, (Affiliate); PhD, 1967, University of Toronto (Canada)
HACKMAN, ROBERT C 2009, (Emeritus); MD, 1971, Stanford University
HORWITZ, MARSHALL S 2011; PhD, 1988, University of Washington; MD, 1990, University of Washington
KAPUR, RAJ P. 2008; PhD, 1986, University of Southern California; MD, 1988, University of Southern California
KIVIAT, NANCY C * 1999; MA, 1969, University of Washington; MD, 1975, University of Washington
LOEB, LAWRENCE A 1981; MD, 1961, New York University; PhD, 1967, University of California (Berkeley)
MARTIN, GEORGE 2003, (Emeritus); MD, 1953, University of Washington
MILLER, ARTHUR D. * 2001, (Affiliate); PhD, 1982, Stanford University
MONNAT, RAYMOND J * 2003; MD, 1976, University of Chicago
MONTINE, THOMAS J 2002; PhD, 1988, University of Rochester; MD, 1991, McGill University (Canada)
MURRY, CHARLES E. * 2012; MD, 1989, Duke University; PhD, 1989, Duke University
NARAYANAN, A SAMPATH * 2004; MSc, 1963, University of Madras (India); PhD, 1967, University of Madras (India) NICOSIA, ROBERTO F 1999; MD, 1976, University of Rome (Italy); PhD, 1984, Medical College of Pennsylvania

NORWOOD, THOMAS H * 1986; MD, 1968, University of Maryland
PORTER, PEGGY L. 2006; MD, 1987, University of New Mexico
PRESTON, BRADLEY D 2002; PhD, 1983, University of Wisconsin
RABINOVITCH, PETER S. * 1995; MD, 1979, University of Washington; PhD, 1980, University of Washington
RAINES, ELAINE W * 2000, (Research); MS, 1975, University of California (San Francisco)
REAY, DONALD T 2000, (Emeritus); MD, 1963, University of Utah; MPA, 1978, Seattle University
REICHENBACH, DENNIS D 1999, (Emeritus); MD, 1958, University of Washington
ROHRSCHNEIDER, LARRY R * 2001, (Affiliate); PhD, 1973, University of Wisconsin (Madison)
SALE, GEORGE E 2011, (Emeritus); MD, 1968, Stanford University
SCHMIDT, RODNEY 2008; MD, 1984, University of Washington; PhD, 1984, University of Washington
SCHWARTZ, STEPHEN MARK 1982; MD, 1967, Boston University; PhD, 1973, University of Washington
SHAW, CHENG-MEI 2000, (Emeritus); MD, 1950, National Taiwan University
SHULMAN, HOWARD M 1985; MD, 1971, University of California (Los Angeles)
SIEBERT, JOSEPH ROBERT 2007; MA, 1984, University of Washington; PhD, 1985, University of Washington
SMITH, GERALD R * 2001, (Affiliate); PhD, 1970, Massachusetts Institute of Technology
SUMI, SHUZO MARK 1996, (Emeritus); MD, 1956, University of Toronto (Canada)
SWANSON, PAUL E 2001; MD, 1984, Oregon Health Sciences University
TRUE, LAWRENCE DASHIELL * 2004; MD, 1971, Tulane University
UPTON, MELISSA P 2011; MD, 1978, Northwestern University
WIGHT, THOMAS * 2001, (Affiliate); MS, 1968, University of New Hampshire; PhD, 1972, University of New Hampshire WOLF, NORMAN S * 2012, (Emeritus); DVM, 1953, Kansas State University; PhD, 1960, Northwestern University
ZHANG, JING 2010; MS, 1987, Second Military Medical University, China; PhD, 1995, Duke University

## Associate Professors

ALLISON, KIMBERLY H. 2012; MD, 2001, New York Medical College
DEUTSCH, GAIL H 2008; MD, 1993, University of Chicago
DINTZIS, SUZANNE M 2012; MD, 1993, Stanford University; PhD, 1993, Stanford University
FANG, MIN 2008; MD, 1990, Shanghai University (China); PhD, 1998, University of Alabama
FINN, LAURA S 2005; MD, 1989, Pennsylvania State University
FLIGNER, CORINNE L. 2006; MD, 1976, University of New Mexico
GARCIA, ROCHELLE 2008; MD, 1989, University of Washington
HOCH, BENJAMIN 2008; MD, 1999, Thomas Jefferson University
KAEBERLEIN, MATT R 2011; PhD, 2002, Massachusetts Institute of Technology

MCLAREN, KIMBERLY D. 2012; MD, 2000, University of Texas (Houston)
MICHAEL, SCOTT T. 2009; MA, 1999, University of Kansas; PhD, 2002, University of Kansas
MONROE-DEVITA, MARIA 2010; MA, 1998, University of Nebraska; PhD, 2001, University of Nebraska
MURRAY, SUZANNE B 2012; MD, 1997, Temple University NJOROGE, WANJIKU 2009; MD, 1999, Baylor College of Medicine

PAGULAYAN, KATHLEEN F. 2012; MA, 2000, University of Cincinnati; PhD, 2004, University of Cincinnati
POESCHLA, BRIAN D. 2006; MD, 1986, Emory University
RATZLIFF, ANNA DE HAAS 2012; PhD, 2003, University of California (Irvine); MD, 2005, University of California (Irvine)
ROCKHILL, CAROL 2011; MD, 2000, University of Illinois; MPH, 2007, University of Washington

STEPHENS, KARI A 2012; MS, 2001, University of Washing ton; PhD, 2008, University of Washington
STRACHAN, ERIC 2010; MLS, 2003, University of Nebraska, campus unspecified; PhD, 2004, University of Nebraska, campus unspecified
THIELKE, STEPHEN M. 2010; MA, 1995, University of Washington; MD, 2001, University of Washington
TOTH, KAREN E. 2008; MS, 2001, University of Washington; PhD, 2007, University of Washington

TRITTSCHUH, EMILY H 2012; PhD, 2006, Northwestern University
VANNOY, STEVEN D. 2007; PhD, 2005, University of Wisconsin (Madison); MPH, 2007, University of Washington
VEITENGRUBER, JASON P. 2011; MD, 2000, University of Washington

## Senior Lecturers

CARMICHAEL OLSON, HEATHER 2004; MA, 1976, University of Iowa; PhD, 1986, University of Washington
LEBLANG, JOSHUA 2011; MEd, 1994, University of Florida SZOT, PATRICIA 2003; MS, 1982, Idaho State University; PhD, 1987, Oregon State University

## Lecturers

BACKUS, FRANK 1997, (Emeritus); MD, 1992, University of Washington
WRIGHT, ROBERT G 1992, (Emeritus); MD, 1954, University of Rochester

## Radiation Oncology

## Professors

GROUDINE, MARK * 1982; MD, 1975, University of Pennsylvania; PhD, 1976, University of Pennsylvania

KALET, IRA J * 2011, (Emeritus); MA, 1966, Princeton University; PhD, 1968, Princeton University
KOH, WUI-JIN 2002; MD, 1984, Loma Linda University
LARAMORE, GEORGE E 1982; PhD, 1969, University of IIlinois; MD, 1976, University of Miami (Florida)
PHILLIPS, MARK H 2010; PhD, 1982, University of Wisconsin (Madison)

RUSSELL, KENNETH J. 2005; MD, 1979, Harvard University SANDISON, GEORGE A 2010; MSc, 1979, University of London, UK; PhD, 1987, University of Manitoba (Canada)
WILBUR, D. SCOTT 2002; PhD, 1978, University of California (Irvine)

## Associate Professors

CHVETSOV, ALEXEI V 2011; MS, 1985, Moscow Institute of Engineering Physics; PhD, 1992, Moscow Institute of Engineering Physics
FORD, ERIC 2011; MA, 1994, Columbia University; PhD, 1997, Columbia University
KANE, GABRIELLE M 2007; MEd, 1998, University of Toronto (Canada); EdD, 2005, University of Toronto (Canada) MEYER, JUERGEN 2012; PhD, 2001, Coventry University ROCKHILL, JASON K. 2010; PhD, 1997, University of Illinois; MD, 1998, University of Illinois
SCHWARTZ, JEFFREY L. 1995; PhD, 1979, University of Texas (Dallas)

STEWART, ROBERT D 2010; MS, 1990, Kansas State University; PhD, 1997, Kansas State University
WALLNER, KENT E 1997; MD, 1981, Ohio State University

## Assistant Professors

ERMOIAN, RALPH PHILIP 2011; MS, 1993, Stanford University; MD, 2003, University of California (San Francisco) FANG, LI MING C 2011; MD, 2005, University of Utah HALASZ, LIA M. 2011; MD, 2006, Harvard University KIM, EDWARD Y 2012; MD, 2001, Case Western Reserve University

KIM, JANICE N 2006; MS, 1997, Chicago Medical School; MD, 2001, Chicago Medical School
KIM, MINSUN 2012; MS, 2000, Columbia University; PhD, 2010, University of Washington
LIAO, JAY J 2007; MD, 2002, University of Michigan
PARVATHANENI, UPENDRA 2007; MBBS, 1993, Annamalai University (India)
PATEL, SHILPEN 2006; MD, 2001, University of Texas (Galveston)
QUANG, TONY 2007; MD, 2002, Drexel University
ZENG, JING 2012; MD, 2007, Duke University

## Senior Lecturers

CLAEYS, KAREN MARIE 2005; MS, 1992, University of Colorado (Denver)
HENDRICKSON, KRISTI 2010; MS, 1993, University of Washington; PhD, 1999, University of Washington
YOUNG, LORI A. 2010; MS, 1990, University of Utah; PhD, 1998, University of Washington

## Radiology

## Professors

ANZAI, YOSHIMI 2006; MD, 1986, Chiba University (Japan) BEAUCHAMP, NORMAN J. 2002; MD, 1990, Michigan State University
CHESNUT, CHARLES * 2011; MD, 1966, University of Florida

CHEW, FELIX S 2004; MEd, 1995, Harvard University; MBA, 2004, Duke University

LITTLE, JAMES WENDELL * 2011, (Emeritus); PhD, 1976, University of Chicago; MD, 1977, University of Chicago

MASSAGLI, TERESA L. * 2005; MD, 1982, Yale University MCCOY, SARAH WESTCOTT 2012; MPT, 1979, University of Washington; PhD, 1993, University of Washington
PATTERSON, DAVID R. * 2009; PhD, 1982, Florida State University
PEPPING, MARY * 2007; MA, 1975, California State University, Los Angeles; PhD, 1981, Washington State University ROBINSON, LAWRENCE R. * 2000; MD, 1982, Baylor College of Medicine
SHUMWAY-COOK, ANNE * 2008, (Emeritus); MS, 1973, University of Oregon; PhD, 1983, University of Oregon
SLIMP, JEFFERSON C * 2005; MA, 1974, University of Wisconsin; PhD, 1976, University of Wisconsin (Madison)
STOLOV, WALTER C 1999, (Emeritus); MA, 1951, University of Minnesota; MD, 1956, University of Minnesota
WARREN, C GERALD * 2001, (Clinical); MPH, 1971, University of Washington
YORKSTON, KATHRYN * 1985; MS, 1972, University of Oregon; PhD, 1975, University of Oregon

## Associate Professors

APKON, SUSAN D 2009; MD, 1994, University of Vermont BARR, KAREN P. 2011; MD, 1993, Northeast Ohio University College of Medicine
BRITELL, CATHERINE WOLLEAT * 2002, (Clinical); MD, 1973, University of Southern California
BURNS, STEPHEN P. 2006; MD, 1992, Brown University
GUTHRIE, MARK R. * 1997; MPT, 1980, University of Washington; PhD, 1990, University of Washington
hoffman, JEANNE MARIE 2012; MA, 1995, Arizona State University; PhD, 2000, Arizona State University
KANNY, ELIZABETH M * 2011, (Emeritus); MA, 1977, Seattle University; PhD, 1996, University of Washington KINNEY, GREGORY A. 2008; PhD, 1996, Northwestern University
MAITLAND, MURRAY E 2006; MS, 1989, University of British Columbia (Canada); PhD, 1996, University of Calgary (Canada)
MC MILLAN, JO ANN * 1996, (Emeritus); BS, 1953, North Texas State College
MCQUADE, KEVIN J 2004; MPH, 1986, University of Washington; PhD, 1995, University of lowa
ODDERSON, IB R. * 1998; PhD, 1979, Indiana University; MD, 1985, Vanderbilt University
POWELL, JANET M. 2007; MS, 1998, University of Washington; PhD, 2001, University of Washington
rodriquez, ARTHUR A. * 2011, (Emeritus); MD, 1972, University of Wisconsin (Madison); MS, 1978, University of Minnesota
STIENS, STEVE A. 2000; MD, 1986, University of Cincinnati; MS, 1991, University of Washington
TURNER, AARON P. 2010; MS, 1997, University of Washington; PhD, 2001, University of Washington
WIECHMAN, SHELLEY A 2012; MS, 1994, University of Arizona; PhD, 2000, University of Washington
WILLIAMS, RHONDA M. 2009; MA, 1995, Arizona State University; PhD, 1999, Arizona State University

## Assistant Professors

CRANE, DEBORAH ANN 2012; MD, 2005, Tulane University; MPH, 2005, Tulane University
FOGELBERG, DONALD J 2010; PhD, 2008, University of Southern California
FRIEDLY, JANNA L. 2011; MD, 2001, Oregon Health Sciences University
HAFNER, BRIAN 2009; PhD, 2003, University of Washington
HAKIMI, KEVIN N. 2008; MD, 2000, Wayne State University HOLDEFER, ROBERT N 2009; MA, 1985, Southern Illinois University; PhD, 1985, Southern Illinois University

JIRIKOWIC, TRACY L. 2011; MS, 1995, University of Washington; PhD, 2003, University of Washington
JOHNSON, SHANA L 2011; MD, 2004, Medical College of Wisconsin
KELLY, VALERIE E 2007; MS, 1999, Washington University; PhD, 2003, Washington University
MACK, DAVID L 2012; MA, 1993, Indiana University; PhD, 2005, Indiana University
MCGOUGH, ELLEN L. 2011; MEd, 2003, University of Washington
MCNALLEY, THOMAS E 2011; MA, 1987, University of Virginia; MD, 2004, University of lowa
MOLTON, IVAN 2011; MA, 2001, University of Colorado; PhD, 2006, University of Miami (Florida)
MORITZ, CHET T 2010; PhD, 2003, University of California (Berkeley)
PRADHAN, SUJATA 2012; MS, 2002, University of Pittsburgh; PhD, 2007, University of Pittsburgh
REYES, MARIA 2008; MD, 1992, Pennsylvania State University
SURIYAARACHCHI, PRADEEP 2012; MD, 2002, University of Michigan, Ann Arbor; MSc, 2011, Harvard University
SVIRCEV, JELENA N 2011; MD, 2001, University of Wisconsin
WHITE, DAVID M * 2001, (Clinical); MA, 1983, University of Alabama; PhD, 1987, University of Alabama

## Senior Lecturers

HERTLING, DARLENE 2000, (Emeritus); BS, 1956, University of California (Berkeley)
OKUMURA, RAMONA M. 2003; BS, 1981, University of Washington
YAMANE, ANN 2003; BS, 1976, University of Washington

## Lecturers

ABRAHAMSON, DANIEL C. 2003; BS, 1998, University of Washington
BENNETT, KIMBERLY D. 2009; PhD, 1974, University of California (Los Angeles)
DRALLE, ALAN J 1995, (Emeritus); BS, 1968, University of Washington
KERFELD, CHERYL 2012; MS, 1993, University of Washington
ROBINSON, CYNTHIA A. 2007; MS, 1990, Long Island University
ROLLINGER, BARBARA E 2012; MHA, 1986, University of Washington; MS, 1988, University of Washington

## Surgery

## Professors

ALDEA, GABRIEL S. 2002; MD, 1981, Columbia University ANDERSON, BENJAMIN 0. 2004; MD, 1985, Albert Einstein College of Medicine
ARBABI, SAMAN 2011; MD, 1992, University of California (Davis); MPH, 2001, University of Washington
ASHBAUGH, DAVID G. 1993, (Emeritus); MD, 1957, Ohio State University
BEACH, KIRK WATSON * 2008, (Research Emeritus); PhD, 1971, University of California (Berkeley); MD, 1976, University of Washington
BULGER, EILEEN 2009; MD, 1992, Cornell University
BYRD, DAVID R. 2005; MS, 1978, Tulane University; MD, 1982, Tulane University
CLOWES, ALEXANDER W * 1990; MD, 1972, Harvard University
CUSCHIERI, JOSEPH 2011; MD, 1994, Wayne State University

DELLINGER, E PATCHEN * 1990; MD, 1970, Harvard University
ENGRAV, LOREN H 2012, (Emeritus); MD, 1969, University of California (Los Angeles)
FICHERA, ALESSANDRO 2012; MD, 1989, Catholic University
FLUM, DAVID R 2008; MD, 1991, University of Miami (Florida); MPH, 2002, University of Washington
FOY, HUGH M 2006; MD, 1978, University of Nebraska
GIBRAN, NICOLE 2004; MD, 1985, Boston University
GRUSS, JOSEPH S. 1991; MBChB, 1969, University of Witwatersrand (S. Africa)
HATSUKAMI, THOMAS 2003; MD, 1982, University of California (Los Angeles)
HEIMBACH, DAVID M 2011, (Emeritus); MD, 1964, Cornell University
HORVATH, KAREN D. 2009; MD, 1990, New York Medical College
KOHLER, TED R 1985; MD, 1976, Harvard University
LANGDALE, LORRIE A. 2010; MD, 1979, University of Washington
MAIER, RONALD V 2000; MD, 1973, Duke University
MEISSNER, MARK H. 2008; MD, 1985, University of Colorado
MILLER, DONALD W 2003; MD, 1965, Harvard University MOCK, CHARLES N. 2006; MPH, 1994, University of Washington; PhD, 1997, University of Washington
MULLIGAN, MICHAEL S 2008; MD, 1989, University of Connecticut
NELIGAN, PETER CAMILLUS 2007; MBChB, 1975, Trinity College (Ireland)
OELSCHLAGER, BRANT K 2010; MD, 1995, University of North Carolina, Chapel Hill
O'KEEFE, GRANT E. 2009; MD, 1988, University of Alberta, Canada
PELLEGRINI, CARLOS A. 1993; MD, 1971, University of Rosario Medical School (Argentina)
PERKINS, JAMES D. 1996; MD, 1979, University of Arkansas
RAYHILL, STEPHEN C 2010; MD, 1987, Columbia University REYES, JORGE DIONISIO 2004; MD, 1979, Federal University of Minas Gerais (Brazil)
SATAVA, RICHARD M. 2012, (Emeritus); MD, 1968, Hahnemann Medical College; MS, 1972, Mayo Medical School/ Graduate School
SAWIN, ROBERT 2002; MS, 1976, University of lowa; MD, 1982, University of Pittsburgh
SINANAN, MIKA N. * 2003; MD, 1980, Johns Hopkins University
SOBEL, MICHAEL 2001; MD, 1975, Albert Einstein College of Medicine
STARNES, BENJAMIN WARE 2011; MD, 1992, Jefferson Medical College
VEDDER, NICHOLAS 2002; MD, 1981, Case Western Reserve University
VERRIER, EDWARD D. 1993; MD, 1974, Tufts University WALDHAUSEN, JOHN H. 2005; MD, 1986, Pennsylvania State University
WINTERSCHEID, LOREN C 1993, (Emeritus); PhD, 1953, University of Pennsylvania; MD, 1954, University of Pennsylvania
WOOD, DOUGLAS E. 2002; MD, 1983, Harvard University
YEUNG, RAYMOND S. 2003; MD, 1982, University of Toronto (Canada)
ZIERLER, ROBERT 1996; MD, 1976, Johns Hopkins University

## 640 SCHOOL OF MEDICINE

## Associate Professors

BAKTHAVATSALAM, RAMASAMY 2009; MBBS, 1984, Madras Medical College (India); MS, 1988, Madras Medical College (India)
CALHOUN, KRISTINE E. 2010; MD, 1998, University of Washington
DRUGAS, GEORGE THEODORE 2008; MD, 1984, Northwestern University
FRIEDRICH, JEFFREY BARTON 2012; MD, 2000, University of Texas (Houston)
GOLDIN, ADAM BRADLEY 2012; MD, 1997, Rush Medical College; MPH, 2003, University of Washington
GOW, KENNETH W 2007; MD, 1991, University of Manitoba (Canada); MS, 1997, University of British Columbia (Canada)
HEALEY, PATRICK J. 2005; MD, 1987, Boston University
HOPPER, RICHARD A. 2006; MD, 1993, Memorial University of Newfoundland; MSc, 1997, University of Toronto (Canada)
LEDBETTER, DANIEL J. 2000; MD, 1981, University of Florida
LYNGE, DANA C. 2004; MD, 1985, McGill University (Canada)
MANN, GARY N. 2006; MBBCh, 1989, University of Witwatersrand (S. Africa)
MATHES, DAVID WOODBRIDGE 2011; MD, 1996, Tulane University
MCINTYRE, LISA KUWAMURA 2012; MD, 1995, University of Washington
MCMULLAN, D. MICHAEL 2012; MD, 1994, University of Texas (Southwestern)
MEEHAN, JOHN JAMES 2008; MD, 1993, University of lowa MOKADAM, NAHUSH A. 2012; MD, 1998, University of Pennsylvania
PARK, JAMES OH 2012; MD, 1998, University of Pennsylvania
PERMUT, LESTER C. 2002; MD, 1983, Boston University
SAID, HAKIM K 2012; MS, 1994, Johns Hopkins University; MD, 1998, University of Michigan
TATUM, ROGER P. 2011; MD, 1995, Northwestern University
VARGHESE, THOMAS K 2012; MBBS, 1995, University of Kerala (India); MS, 2003, Northwestern University
WRIGHT, ANDREW S. 2011; MD, 1998, University of Louisville
WU, PETER CHANG CHUNG 2011; MD, 1993, Jefferson Medical College

## Assistant Professors

AVANSINO, JEFFREY RONALD 2008; MD, 1999, University of Nevada
BACKHUS, LEAH MONIQUE 2009; MD, 2000, University of Southern California
BIRGFELD, CRAIG B 2007; MD, 2000, Virginia College of Medicine
CHENG, AARON MING 2010; MD, 2000, Harvard Medical School
COLOHAN, SHANNON MARGARET 2011; MD, 2004, Dalhousie University (Canada); MS, 2007, London School of Hygiene and Trop Med (UK)
DICK, ANDRE AINSWORTH S. 2008; MD, 1999, State University of New York (Buffalo)
EVANS, HEATHER L 2008; MD, 1999, University of Rochester; MS, 2004, University of Virginia
FARJAH, FARHOOD 2012; MD, 2002, Oregon Health Sciences University; MPH, 2007, University of Washington
FIGUEREDO, EDGAR 2009; MD, 1988, Universidad El Bosque, Colombia
JAVID, PATRICK J 2008; MD, 1999, University of Michigan JAVID, SARA H 2008; MD, 1999, Harvard University

KEYS, KARI ANNE 2012; MD, 2006, University of California (San Francisco)
KHANDELWAL, SAURABH 2011; MD, 2002, Rush Medical College
KO, JASON H 2012; MD, 2004, Duke University
LOUIE, OTWAY 2008; MD, 1997, Tufts University
PARR, ZOE EDEN 2012; MD, 2004, University of Calgary (Canada)
PETERSEN, REBECCA P 2012; MSc, 2000, Harvard University; MD, 2002, Oregon Health Sciences University
PHAM, TAM NGOC 2008; MD, 1998, University of California (San Diego)
PILLARISETTY, VENU G 2009; MD, 1999, Columbia University
RIEHLE, KIMBERLY 2012; MD, 2001, Emory University SMITH, JASON W 2012; MD, 2002, Loyola University (Chicago)
SUN, JACK CHENG-JEH 2011; MD, 2004, University of Toronto (Canada); MSc, 2007, McMaster University (Canada)
SWEET, MATTHEW P 2011; MD, 2002, University of Southern California; MS, 2007, University of California (San Francisco)
TANG, GALE LYNN 2008; MD, 1998, University of Michigan TRAN, NAM THANH 2007; MD, 1996, University of Washington
TSE, RAYMOND 2009; MD, 2005, University of Toronto (Canada)
VAN EATON, ERIK 2009; MD, 2001, University of Washington
WASSENAAR, EELCO B 2012; MD, 2002, University of Utrecht (Netherlands); PhD, 2009, University of Utrecht (Netherlands)

## Urology

## Professors

ANSELL, JULIAN S 1992, (Emeritus); MD, 1951, Tufts University; PhD, 1959, University of Minnesota
BERGER, RICHARD E 2011, (Emeritus); MD, 1973, University of Chicago
BRANNEN, GEORGE 2006, (Emeritus); MD, 1969, Northwestern University
CHAPMAN, WARREN H 1991, (Emeritus); MD, 1952, University of Chicago
DALKIN, BRUCE L 2008; MD, 1985, Northwestern University
ELLIS, WILLIAM J. 2003; MD, 1985, Johns Hopkins University
GRADY, RICHARD W. 2012; MD, 1990, University of Michigan
JOYNER, BYRON DAVID 2009; MD, 1988, Harvard University
KRIEGER, JOHN N 1990; MD, 1974, Cornell University

## Assistant Professors

CHAN, KWUN CHUEN GARY 2008; PhD, 2008, Johns Hopkins University
SHOJAIE, ALI 2010; MS, 2010, University of Michigan; PhD, 2010, University of Michigan
SZPIRO, ADAM A. 2009; PhD, 1999, Brown University
THORNTON, TIMOTHY A. 2009; PhD, 2005, University of Chicago
WITTEN, DANIELA 2010; MS, 2006, Stanford University; PhD, 2010, Stanford University

## Environmental and Occupational Health Sciences

## Professors

BURBACHER, THOMAS M * 2007; PhD, 1983, University of Washington

CANGELOSI, GERARD A. 2012; PhD, 1983, University of California (Davis)
CHECKOWAY, HARVEY 1991; MPH, 1975, Yale University; PhD, 1978, University of North Carolina
COSTA, LUCIO GUIDO 1992; PharmD, 1977, University of Milan (Italy)
EATON, DAVID L 1992; PhD, 1978, University of Kansas
FAUSTMAN, ELAINE M. 1992; PhD, 1981, Michigan State University
FENSKE, RICHARD A. 1998; MPH, 1978, University of California (Berkeley); PhD, 1984, University of California (Berkeley)
FRANKLIN, GARY M. * 2001, (Research); MD, 1969, George Washington University; MPH, 1982, University of California (Berkeley)
FRUMKIN, HOWARD 2010; MD, 1982, University of Pennsylvania; MPH, 1982, Harvard University
GALLAGHER, EVAN P 2008; MA, 1986, Duke University; PhD, 1991, Duke University
GILBERT, STEVE * 2008, (Affiliate); PhD, 1986, University of Rochester
KALMAN, DAVID A 1995; PhD, 1978, University of Washington

KAUFMAN, JOEL D. * 2006; MD, 1986, University of Michigan; MPH, 1990, University of Washington
KAVANAGH, TERRANCE J 2002; MS, 1980, Michigan State University; PhD, 1985, Michigan State University
KISSEL, JOHN C. * 2006; MS, 1974, Harvard University; PhD, 1985, Stanford University
KOENIG, JANE 2010, (Emeritus); MS, 1961, University of Washington; PhD, 1963, University of Washington
LUCHTEL, D * 2012, (Emeritus); PhD, 1969, University of Washington
MORGAN, MICHAEL 2012, (Emeritus); DSc, 1972, Massa chusetts Institute of Technology
OMENN, GILBERT S * 2001, (Affiliate); MD, 1965, Harvard University; PhD, 1972, University of Washington
OMIECINSKI, CURTIS J * 2002, (Affiliate); PhD, 1980, University of Washington
ROBERTS, MARILYN C 2007; MS, 1977, University of Washington; PhD, 1978, University of Washington
ROBKIN, MAURICE A * 1997, (Emeritus); PhD, 1961, Massachusetts Institute of Technology
ROSENFELD, MICHAEL E. 2007; MS, 1978, University of Vermont; PhD, 1981, University of Wisconsin (Madison)
SEIXAS, NOAH S. * 2001; MS, 1982, Harvard University; PhD, 1990, University of Michigan
SHEPPARD, ELIZABETH A. * 2009; MSc, 1985, Johns Hopkins University; PhD, 1992, University of Washington
SILVERSTEIN, BARBARA A. * 2004, (Affiliate); MPH, 1982, University of Michigan; PhD, 1985, University of Michigan
VEDAL, SVERRE 2007; MD, 1976, University of Colorado (Boulder); MSc, 1983, Harvard University
WILSON, JOHN T * 1992, (Emeritus); MD, 1950, Columbia University; DSc, 1956, University of Cincinnati
WOODS, JAMES * 2010, (Research Emeritus); PhD, 1970, University of Washington; MPH, 1978, University of North Carolina

XIA, ZHENGUI 2011; MS, 1985, Wuhan University (China); PhD, 1991, University of Washington
YOST, MICHAEL G. * 1999; MS, 1984, University of California (Berkeley); PhD, 1989, University of California (Berkeley)
ZARBL, HELMUT * 2002, (Affiliate); PhD, 1983, McGill University (Canada)

## Associate Professors

BRODKIN, CARL * 2007, (Clinical); MD, 1983, University of Colorado (Denver)
DANIELL, WILLIAM E * 2005; MD, 1979, Tufts University; MPH, 1986, University of Washington
DOOLITTLE, THEUS LEE * 1991, (Emeritus); MS, 1955, University of California (Los Angeles); PhD, 1963, University of Southern California
HATLEN, JACK B * 1983, (Emeritus); MS, 1958, University of Washington
JOHNSON, PETER W 2007; MS, 1998, University of Califor nia (Berkeley); PhD, 1998, University of California (Berkeley)
MESCHKE, JOHN SCOTT 2010; MS, 1996, Indiana University; PhD, 2001, University of North Carolina, Chapel Hill SIMPSON, CHRISTOPHER DAVID 2012; MSc, 1992, University of Waikato; PhD, 1997, University of British Columbia (Canada)

## Assistant Professor

SPECTOR, JUNE 2012; MD, 2005, Yale University; MPH, 2009, Johns Hopkins University

## Senior Lecturers

CAMP, JANICE E 2001; MN, 1984, University of Washington FREEMAN, STANLEY H 2001, (Emeritus); MA, 1958, New York University
HECKER, STEVEN 2012, (Emeritus); MS, 1981, University of Washington

MONTEITH, LEE E 1999, (Emeritus); MS, 1956, University of Washington
MORRIS, SHARON L 2005, (Emeritus); BA, 1965, Reed College
TRESER, CHARLES D * 2001; MPH, 1976, University of Michigan

## Lecturer

GLEASON, RICHARD 2005; BS, 1978, Montana Tech

## Epidemiology

## Professors

ASTLEY, SUSAN J. * 2004; MS, 1979, Oregon State University; PhD, 1990, University of Washington
AUSTIN, MELISSA A. * 2008; MS, 1975, University of California (Los Angeles); PhD, 1985, University of California (Berkeley)
BECKER, THOMAS * 2001, (Affiliate); MD, 1981, Case Western Reserve University; PhD, 1986, University of New Mexico
BERESFORD, SHIRLEY A. 1997; MA, 1973, University of Cambridge (UK); PhD, 1981, University of London: King's College (UK)
CAMPBELL, LEE ANN 2008; MS, 1979, Pennsylvania State University; PhD, 1982, Pennsylvania State University
CRITCHLOW, CATHY W * 2004, (Affiliate); MS, 1978, University of Washington; PhD, 1993, University of Washington
CUMMINGS, PETER * 2009, (Emeritus); MD, 1970, Case Western Reserve University; MPH, 1993, University of Washington
DALING, JANET R * 2007, (Emeritus); MA, 1973, University of Washington; PhD, 1977, University of Washington
DAVIS, ROBERT L. * 2005, (Affiliate); MD, 1983, University of California (San Diego)
DAVIS, SCOTT * 2000; MS, 1977, University of Rochester; PhD, 1980, University of Washington
DREWNOWSKI, ADAM 1998; MA, 1971, Oxford University (UK); PhD, 1977, Rockefeller University
EDWARDS, KAREN L. 2010; MS, 1991, California State University, campus unspecified; PhD, 1996, University of Washington
EMANUEL, IRVIN * 2000, (Emeritus); MD, 1960, University of Rochester; MS, 1966, University of Washington FOY, HJORDIS * 1998, (Emeritus); MS, 1967, University of Washington; PhD, 1968, University of Washington
GALE, JAMES L 2004, (Emeritus); MD, 1961, Columbia University; MS, 1969, University of Washington
GRAYSTON, J THOMAS * 2002, (Emeritus); MD, 1948, University of Chicago; MS, 1952, University of Chicago
HECKBERT, SUSAN R. * 2004; MPH, 1987, University of Washington; PhD, 1990, University of Washington
HENDERSON, MAUREEN M * 1996, (Emeritus); MBBS, 1949, University of Durham (UK); DPH, 1956, University of Durham (UK)
HOLT, VICTORIA L. 1997; MPH, 1987, University of Washington; PhD, 1990, University of Washington
JACKSON, LISA A. * 2005, (Research); MD, 1988, University of Virginia; MPH, 1996, University of Washington
KIMBALL, ANN M. 2011, (Emeritus); MD, 1976, University of Washington; MPH, 1981, University of Washington
KOEPSELL, THOMAS D 2012, (Emeritus); MD, 1972, Harvard University; MPH, 1979, University of Washington
KOUTSKY, LAURA A * 1994; PhD, 1987, University of Washington
KRISTAL, ALAN R. * 1994; MS, 1976, Framingham State College; MPH, 1979, Northwestern University
KUKULL, WALTER A * 1997; MS, 1974, Western Washington University; PhD, 1983, University of Washington

KUO, CHO-CHOU 2008, (Emeritus); MD, 1960, National Taiwan University; PhD, 1970, University of Washington
LACROIX, ANDREA Z. * 1992; MPH, 1981, University of North Carolina; PhD, 1984, University of North Carolina
LEE, JOHN A. H. * 1993, (Emeritus); DPH, 1952, London Sch of Hygiene and Trop Med (UK); MD, 1955, University of Edinburgh (UK)
MCTIERNAN, ANNE * 2003, (Research); PhD, 1982, University of Washington; MD, 1989, New York Medical College
MOOLGAVKAR, SURESH H. * 1984; MBBS, 1966, University of Bombay; PhD, 1973, Johns Hopkins University
MUELLER, BETH A. * 1993; MPH, 1980, University of California (Los Angeles)
POTTER, JOHN D * 1995; MBBS, 1971, University of Queensland (Australia); PhD, 1984, University of Queensland (Australia)
ROSENDAAL, FRITS R. * 2001, (Affiliate); MD, 1985, Erasmus University (Netherlands)
ROSSING, MARY ANNE * 2010, (Research); MPH, 1988, University of Washington; PhD, 1993, University of Washington
SCHIFF, MELISSA A 2009; MD, 1987, University of Michigan
SCHWARTZ, STEPHEN MARC * 2002; MPH, 1984, Yale University; PhD, 1990, University of Washington
SMITH, NICHOLAS L 2010; MPH, 1993, University of California (Berkeley); PhD, 1997, University of Washington
STANFORD, JANET L. * 2001, (Research); MPH, 1982, Emory University; PhD, 1985, Johns Hopkins University
STERGACHIS, ANDREAS S 2001; MS, 1976, University of Minnesota; PhD, 1979, University of Minnesota
THOMAS, DAVID B * 1983; MPH, 1969, Johns Hopkins University; DPH, 1972, Johns Hopkins University
TSU, VIVIEN D. * 2009, (Affiliate); MPH, 1977, University of California (Los Angeles); PhD, 1991, University of Washington
ULRICH, CORNELIA M. 2009; MS, 1992, Oregon State University; PhD, 1998, University of Washington
VAUGHAN, THOMAS L * 1996; MD, 1978, University of IIlinois; MPH, 1983, University of Washington
WEISS, NOEL S 1981; MPH, 1969, Harvard University; DPH, 1971, Harvard University
WHITE, J EMILY * 2010; MS, 1978, University of Washington; PhD, 1982, University of Washington
WILLIAMS, MICHELLE A. * 2011, (Affiliate); MS, 1988, Harvard University; ScD, 1991, Harvard University
ZHAO, LUE-PING * 2005, (Affiliate); MS, 1987, University of Washington; PhD, 1989, University of Washington

## Associate Professors

CHU, JOSEPH * 2005, (Clinical); MD, 1975, Georgetown University; MPH, 1981, University of Washington
DE ROOS, ANNECLAIRE JENICE 2009; MPH, 1995, University of California (Berkeley); PhD, 2000, University of North Carolina, Chapel Hill
DUNCAN, GLEN E 2008; MS, 1994, Ball State University; PhD, 1997, University of Tennessee
GOLDBAUM, GARY M. * 1996; MD, 1978, University of Colorado (Denver); MPH, 1989, University of Washington
HAWES, STEPHEN E. 2008; MS, 1993, University of Washington; PhD, 2001, University of Washington
HELGERSON, STEVEN D. * 2001, (Clinical); MD, 1973, University of Washington; MPH, 1980, University of Washington
HOOVER, J JOANNE * 1998, (Research Emeritus); MD, 1960, University of Illinois; MPH, 1972, University of Washington
MANHART, LISA E. 2009; MPH, 1994, Tulane University; PhD, 2002, University of Washington

## Assistant Professors

BASEMAN, JANET G. 2007; MPH, 1999, University of Texas (Houston); PhD, 2005, University of Washington
CASSELS, SUSAN L 2010; PhD, 2005, Princeton University ENQUOBAHRIE, DANIEL ASMAMA 2009; MPH, 2005, University of Washington; PhD, 2007, University of Washington KIRK, ELIZABETH 2012; PhD, 1995, University of Washington
ROWHANI-RAHBAR, ALI 2012; MPH, 2005, Yale University; PhD, 2009, University of Washington
WINER, RACHEL L. 2011; MPH, 2002, University of Washington; PhD, 2005, University of Washington

## Senior Lecturers

BRUEMMER, BARBARA 2012, (Emeritus); MS, 1983, University of Washington; PhD, 1993, University of Washington
WILLIAMS, MARCIA FRANCES 2010; MPA, 1992, University of Washington; PhD, 2000, University of Washington

## Lecturers

AVERILL, MICHELLE M. 2012; PhD, 2007, University of Washington
GREGORY, NILA N 2012; MPH, 2010, University of Washington

## Health Services

## Professors

ALTAMORE, RITA A * 2003, (Clinical); MD, 1977, Boston University; MPH, 1984, University of Washington
BOWEN, DEBORAH J * 2007, (Clinical); PhD, 1986, Uniformed Services University of the Health Sciences
CHAPKO, MICHAEL K * 2001, (Research); MA, 1970, Hunter College; PhD, 1972, City University of New York
CHEADLE, ALLEN D. * 2011, (Affiliate); PhD, 1987, University of California (Berkeley)
CONNELL, FREDERICK A 1999; MD, 1972, New York University; MPH, 1978, University of Washington
CONRAD, DOUGLAS A 1987; MBA, 1977, University of Chicago; PhD, 1978, University of Chicago
DAY, ROBERT W * 2005, (Emeritus); MPH, 1958, University of California (Berkeley); PhD, 1962, University of California (Berkeley)
DEYO, RICHARD A. * 2010, (Affiliate); MD, 1975, Pennsylvania State University; MPH, 1981, University of Washington DOWLING, WILLIAM L 1994; MA, 1970, University of Michigan; PhD, 1971, University of Michigan
GREMBOWSKI, DAVID 1999; MA, 1975, Washington State University; PhD, 1982, University of Washington GROSSMAN, DAVID C. 2004; MD, 1982, University of California (Los Angeles); MPH, 1990, University of Washington HARRIS, JEFFREY R 2011; MPH, 1993, Johns Hopkins University; MBA, 2003, University of Washington
HEDRICK, SUSAN * 2009, (Emeritus); MA, 1975, Michigan State University; PhD, 1982, Michigan State University
HUEBNER, COLLEEN ELLEN 2012; PhD, 1991, University of Washington; MPH, 1994, University of Washington
KESSLER, LARRY 2009; ScD, 1978, Johns Hopkins University
MARTIN, DIANE P 2011, (Emeritus); MA, 1972, Temple University; PhD, 1979, University of Washington
MAYNARD, CHARLES C * 2012, (Research Emeritus); MSW, 1977, University of Washington; PhD, 1986, University of Washington
MEISCHKE, HENDRIKA W. * 2011; MPH, 1987, University of Michigan; PhD, 1992, Michigan State University
MONSEN, ELAINE R * 2004, (Emeritus); MS, 1959, University of California (Berkeley); PhD, 1961, University of California (Berkeley)

OBERLE, MARK W. 2002; MD, 1974, Johns Hopkins University; MPH, 1979, University of California (Berkeley)
PATRICK, DONALD L. 1987; MS, 1968, Columbia University; PhD, 1972, Columbia University
PERRIN, EDWARD * 1999, (Emeritus); MA, 1956, Columbia University; PhD, 1960, Stanford University
PLOUGH, ALONZO L. * 2011, (Clinical); MPH, 1977, Yale University; PhD, 1978, Cornell University
REIBER, GAYLE * 2002; MPH, 1975, Johns Hopkins University; PhD, 1989, University of Washington
RICHARDSON, MARY L. * 2006, (Emeritus); MHA, 1978, University of Washington; PhD, 1984, University of Washington
ROSS, AUSTIN 1999, (Emeritus); MPH, 1955, University of California (Berkeley)
SPIGNER, CLARENCE * 2012; MPH, 1982, University of California (Berkeley); DPH, 1987, University of California (Berkeley)
TAYLOR, VICTORIA M. * 2004, (Research); MD, 1978, Nottingham University; MPH, 1989, University of Washington THOMPSON, ENGELBERTA 1999; MA, 1978, Western Michigan University; PhD, 1981, Western Michigan University
URBAN, NICOLE D. * 2001, (Research); MS, 1973, Harvard University; DSc, 1978, Harvard University
WAGNER, EDWARD H * 1984; MD, 1965, State University of New York (Buffalo); MPH, 1972, University of North Carolina

## Associate Professors

ALLAN, SUSAN 2008; MD, 1981, Harvard Medical School; MPH, 1992, Johns Hopkins University
BASU, ANIRBAN 2012; MS, 1999, University of North Carolina; PhD, 2004, University of Chicago
BELL, MICHELLE * 2006, (Emeritus); MSW, 1967, University of Washington; PhD, 1984, University of Washington DURAN, BONNIE M 2007; MPH, 1989, University of California (Berkeley); DPH, 1997, University of California (Berkeley)
JOHNSON, CHRISTOPHER E. 2012; PhD, 1998, University of Minnesota
JOHNSON, DONNA 2006; MS, 1979, Syracuse University; PhD, 1995, University of Washington
KOPJAR, BRANKO 2000; MSc, 1991, University of Zagreb (Yugoslavia); PhD, 1996, University of Oslo (Norway)

## Assistant Professors

BELL, JANICE F. 2012; MPH, 2001, University of Washington; PhD, 2005, University of Washington
CEBALLOS, RACHEL M. 2011; MS, 2002, Pennsylvania State University; PhD, 2005, Pennsylvania State University HANNON, MARGARET A. 2008; MPH, 2001, University of North Carolina, Chapel Hill; PhD, 2001, University of North Carolina, Chapel Hill
ORNELAS, INDIA J 2012; MPH, 1999, University of Washington; PhD, 2009, University of North Carolina, Chapel Hill PETRESCU-PRAHOVA, MIRUNA 2012; MA, 2008, University of California (Irvine); PhD, 2009, University of California (Irvine)
SENTURIA, KIRSTEN D. * 2001, (Clinical); MA, 1990, University of California (Los Angeles); PhD, 1995, University of California (Los Angeles)

## Senior Lecturers

BEZRUCHKA, STEPHEN A. 2010; MD, 1973, Stanford University; MPH, 1993, Johns Hopkins University

HANKEN, MARY A. 2001; MEd, 1974, Seattle University; PhD, 1989, University of Washington
HOUSE, PETER J. 2011; MHA, 1974, University of Michigan MURPHY, GRETCHEN C. 2001; MEd, 1973, University of Washington
OKAMOTO, CAROLE 2009; MBA, 1983, Houston Baptist University
PETERSON, KATHLEEN 2008; MS, 1994, Central Michigan University
SAPPINGTON, JEREMY L. 2011; MPH, 1964, University of North Carolina
STEELE, MARSHA C 2009; MS, 1980, University of Washington
STILLMAN, DENNIS 2011; MHA, 1979, University of Washington
WELTON, WILLIAM E. 2001; MHA, 1972, University of Michigan; DPH, 1999, University of Michigan

## Lecturers

KATZ, AARON 2009; CPH, 1975, University of Toronto (Canada)
THOMPSON, JOHN R. 2010; MSW, 1976, University of Washington

## Reserve Officer Training Corps

## Aerospace Studies

## Professor

MASTIN, KEVIN 2012; MAS, 1994, Embry Riddle Aeronautical University

## Assistant Professors

ALLARDICE, ANGELA 2012; MBA, 2011, Liberty University BASS, ZACHARY P 2010; BBA, 2006, University of Portland BOWEN, SPENCER J 2011; MS, 2009, Air Force Institute of Technology
CUNNINGHAM, JAMES A. 2009; MBA, 2003, Western New England College
GOODWIN, MICHAEL 2012; BBA, 2007, Austin Peay State University
SANDGREN, RENA MICHELLE 2010; BA, 2005, University of Florida

## Military Science

## Professor

MOUNTCASTLE, CLAY 2012; MA, 2003, Duke University; PhD, 2006, Duke University

## Assistant Professors

KOVALSKY, MICHAEL 2012; BA, 2005, Seton Hall University
PIERCE, RYAN 2010; MBA, 2010, City University (Seattle)
POLA, WILLIAM 2006; BA, 1988, California State University, Sacramento
RUBIO, BRETT 2008; JD, 2006, Gonzaga University

## Naval Science

## Professor

MELIN, DAVID W. 2012; MBA, 1990, University of Maine; MA, 1996, Naval War College

## Associate Professor

SZYMANSKI, BRUCE H. 2011; MBA, 1999, Benedictine College
Assistant Professor
GARDNER, DANIEL E. 2011; BS, 2007, Maine Maritime Academy
GAVRICH, JOSHUA L. 2011; MS, 2006, Naval Postgraduate School
MCCALDEN, KATHERINE M. 2010; BA, 2003, University of Notre Dame
ROBERTSON, SEAN F. 2010; BS, 2004, Southern Illinois University

## School of Social Work

## Professors

CATALANO, RICHARD F 1992; MA, 1976, University of Washington; PhD, 1982, University of Washington
CONTE, JON * 1990; MSW, 1974, University of Washington; PhD, 1979, University of Washington
FREDRIKSEN GOLDSEN, KAREN * 2011; MSW, 1986, University of Washington; PhD, 1993, University of California (Berkeley)
GILCHRIST, LEWAYNE D 2007, (Emeritus); MSW, 1977, University of Washington; PhD, 1981, University of Washington
GILLMORE, MARY LOUISE 2006, (Emeritus); MA, 1977, University of Washington; PhD, 1983, University of Washington
HAWKINS, JOHN D 1981; MA, 1969, Northwestern University; PhD, 1975, Northwestern University
HERRENKOHL, TODD 2012; MSW, 1993, Simmons College; PhD, 1998, University of Washington
HOOYMAN, NANCY * 2008; MSW, 1970, University of Michigan; PhD, 1974, University of Michigan
LEVY, RONA L 2008; PhD, 1974, University of Michigan; MPH, 1975, University of Michigan
LONGRES, JOHN F. * 2000, (Emeritus); MSW, 1966, University of California (Los Angeles); PhD, 1970, University of Michigan
MARCENKO, MAUREEN * 2012; MSW, 1978, Wayne State University; PhD, 1988, McGill University (Canada)
MEYERS, MARCIA 2006; MSW, 1992, University of California (Berkeley); PhD, 1992, University of California (Berkeley)
MORRISON, DIANE M * 2003; MS, 1979, University of Washington; PhD, 1982, University of Washington
NURIUS, PAULA S. * 2007; MA, 1983, University of Michigan; PhD, 1984, University of Michigan
PECORA, PETER * 2005; MSW, 1977, University of Wisconsin (Milwaukee); PhD, 1982, University of Washington
RESNICK, HERMAN * 2001, (Emeritus); PhD, 1970, Bryn Mawr College
RICHEY, CHERYL A * 2003, (Emeritus); MSW, 1971, University of California (Berkeley); DSW, 1974, University of California (Berkeley)
ROFFMAN, ROGER ALAN 2009, (Emeritus); MSW, 1965, University of Michigan; DSW, 1983, University of California (Berkeley)
TAKEUCHI, DAVID 2002; MA, 1974, University of Hawaii; PhD, 1986, University of Hawaii
UEHARA, EDWINA * 2006; MSW, 1977, University of Michigan; PhD, 1987, University of Chicago
VAN SOEST, DOROTHY 2011, (Emeritus); MSW, 1975, University of Minnesota; DSW, 1994, Catholic University
WALTERS, KARINA 2011; MSW, 1990, University of California (Los Angeles); PhD, 1995, University of California (Los Angeles)
WEATHERLEY, RICHARD A * 1999, (Emeritus); MA, 1963, University of Chicago; PhD, 1975, Massachusetts Institute of Technology
WHITTAKER, JAMES * 2007, (Emeritus); MSW, 1966, University of Michigan; PhD, 1970, University of Minnesota

## Associate Professors

AISENBERG, EUGENE 2009; MSW, 1994, University of Southern California; PhD, 2001, University of Southern California
ALMGREN, GUNNAR R. 2002; MSW, 1979, Portland State University; PhD, 1990, University of Washington
ARTHUR, MICHAEL * 2001, (Research); MA, 1987, University of Virginia; PhD, 1990, University of Virginia

BALASSONE, MARY LOU * 2000; MSW, 1980, Syracuse University; DSW, 1987, University of California (Berkeley) BERLEMAN, WILLIAM C * 1990, (Emeritus); MSW, 1960, University of Washington
DEAR, RONALD BRUCE * 2001, (Emeritus); MSW, 1957, University of Pittsburgh; DSW, 1972, Columbia University DUPLICA, MOYA M * 2003, (Emeritus); MSW, 1956, St Louis University
ELLIS, JACK A N * 1988, (Emeritus); MSW, 1955, University of British Columbia (Canada)
